

## Appendix 2

Order of Priority	Details provided by:	Area	Description of the task	Effect of the task	NWDC Responsibility	Approx cost of the works
1	NWDC	MINETY/ CRUDWELL/ PURTON	Topographic surveys and hydraulic modelling by consultants. At villages and rural areas prone to flooding Crudwell will be the first village closely followed by Minety and Purton.	Identify flood stress points. Targeting of these areas is both high profile and will give best value for money.	YES this is required to prevent flooding in the future for the most threatened villages by targeting solutions now.	30,000.00
2	NWDC	MURCOTT, CRUDWELL	MURCOTT 240metres of 600mm diameter surface water sewer with associated silt pit and outfall structure.	Eliminate surface water flooding to the highway and properties known as The Paddock and Ashley	YES this will ease Crudwell flooding and already promised	14,000.00
3	NWDC	CHIPPENHAM?	Sarum Road surface water pipe through POS needs replacement between 28 Sarum Road and Highfield Cottage.	Current flooding of properties in Cranfield Close from pipe in POS.	YES presently causing flooding to adjacent properties in severe storms.	25,000.00
4	NWDC	CALNE	Warren Close, CALNE. Present 170 metres of 300mm diameter piped watercourse beneath rear gardens from St Dunstan's School. Water flooding nearby roads and rear gardens. Investigation in progress with cctv survey.	Excavate and repair pipe could be in several locations.	NO but private residents are unable to finance repair work and are even unaware of the culverts existence below their land.	500.00
5	NWDC	CHIPPENHAM	Cepen Park North POS. Several watercourses in need of maintenance to prevent flooding of land and dwellings.	Lack of maintenance has lead to watercourses requiring re-establishing	YES because this is a public open space but can get by with cosmetic works this year.	20,000.00
6	NWDC	WOOTTON BASSETT	Morningside Farm, Wootton Bassett. Purchased by NWDC to facilitate work of Wilts and Berks Canal Trust. Badly in need of general watercourse maintenance over 65 acres.	Adjacent farms have suffered minor flooding and have offered to undertake the watercourse maintenance but the work is still outstanding.	YES because the farm belongs to NWDC and causes neighbouring farms flood problems.	5,000.00
7	NWDC	CRUDWELL	Eastcourt Road, Crudwell. Road bridge culvert on the Swill Brook needs replacement to larger culvert.	Removal of constriction to aid free passage of flood water upstream at A419. Funds towards construction works.	NWDC making a donation of £5,000 towards the cost of works.	5,000.00
8	NWDC	CHIPPENHAM	Increase the height of the flood barrier and length between Wentworth Close and Gleneagles Close, Chippenham	Raise top level of bank to re-establish 1 in 100 year protection level	YES this flood defence asset belongs to NWDC but offers reduced protection since design parameters increased by PPS25.  Height increase unknown therefore even a rough estimate is impossible.	Yet tbc, subject to further design/ investigation.
