Wiltshire Council
Where everybody matters

Item No.09

Report to	**Malmesbury Area Board**
Date of Meeting	**3 March 2010**
Title of Report	**Malmesbury Community Issues Update**

Purpose of Report

1. Members of the Area Board are asked to endorse the road safety prioritisation matrix and note the progress of the Community Speedwatch Scheme.

2. To provide a Community Issues update and invite members of the Area Board to agree closure of selected issues.

Background

1. Members used the road safety prioritisation matrix (appendix 1) containing the views from partners to enable them to identify the priority level of sites for road safety initiatives. The prioritisation process enabled the Camera Safety Team to install metro counts to identify whether speeding was a perceived or real problem. Where a speeding issue has been identified, parishes have been invited to participate in the Community Speedwatch Scheme, details of which have been previously circulated.

2. At the time of writing (16 February 2010), a total of 43 community issues have been received, of which 20 have been closed and 23 are in progress (appendix 2).

Actions

1. Members are asked to endorse the prioritisation matrix and note the progress.

2. Members are invited to close the following issues (emboldened in appendix 2)

   - Issues 369, 567 and 561 all relate to the Community Speedwatch Scheme which will shortly commence Sherston, Luckington and Oaksey.

   - Issue 435 relates to the Town Council's willingness to take forward the issue of town centre regeneration within the town.
