Wiltshire 2026 – Planning for Wiltshire's Future

The Wiltshire 2026 consultation formed an important step towards the development of the **Wiltshire Core Strategy**.

The strategy will eventually replace elements of the existing local plans which planning decisions are currently set against.

The Wiltshire 2026 consultation, launched during October 2009, outlined;

- a vision for Wiltshire;
- the opportunities and issues within each community area;
- proposals for how that area will change over time, including;
- an outline of the suggested scale and location of housing and employment development where identified.

Consultation process

- The consultation ran from **30 October until 31 December 2009**.
- The consultation was **publicised widely** throughout this period.
- **Public exhibitions** were held in each community area.
- The consultation material was available for consideration on the council's website, within libraries and council offices.
- **Workshops** were also held with community representatives and organisations.
- Over **2,000 comments** from more than 600 individuals, and organisations were made.

Overarching opinion

- The vision demonstrated **sound underlying principles**, however it was felt that it should be more **locally distinct** rather than just delivering central government objectives.
- The plan should be **firm and clear**, ensuring that development takes place with the agreement of the local community.
- The **level of growth**, set regionally, was highlighted as a concern and was felt to be unnecessary by many.
- **Infrastructure delivery** was seen as a key concern, especially in terms of its timely delivery at the point of development rather than later on in the plan period.

Issues raised in the Westbury Community Area

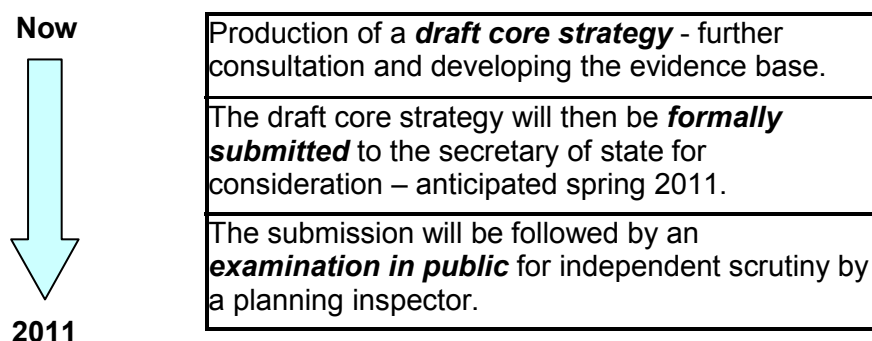

- Improving services and facilities within Westbury town centre
- Directing appropriate growth to the villages as well as the town
- Having a more integrated public transport system, which links the villages with the town and makes full use of good rail and road links between Westbury and other main settlements nearby
- The implications of relocating Matravers Schools to the Leigh Park area in terms of sustainable transport and accessibility
- The impact on the town centre of community facilities, such as the School, moving to an edge of town location
- The perception that too much employment, in comparison with housing, had been allocated to Westbury. However, the relative allocations reflect the high level of housing growth in recent years

Proposed actions to respond to issues raised

- Consider how to improve **the range of town centre facilities and services** in Westbury
- Consider how **the needs of villages**, such as Bratton and Dilton Marsh, can be addressed
- Identify how the core strategy can **deliver required infrastructure**, including transport solutions, in Westbury and the villages
- Explore the **opportunities for sustainable transport linkages**, should the relocation of Matravers School go ahead
- Investigate the opportunities provided by planned growth in the Core Strategy to deliver **town centre regeneration**
- Explore the level of **employment provision**, and type, required within the community area.

Next steps for the core strategy

A full report on the consultation outcome will be available by the end of June. The report will be available to view on the council's website and offices.
