

Area Board Project/Councillor Initiative

1. What is the project?

Scoping work for the viability of a Wilton Parkway Railway Station, illustrations, budget costs to enable a wider consultation to be carried out.

2. Where is the project taking place?

The Avenue, Wilton

3. When will the project take place?

ASAP

4. Please outline:

- **Community benefits**
- **Evidence of need**
- **Links to Community Plan**
- **Community Issue**

The ultimate aim is to reduce the travel pressures on the A36 by providing a Wilton Parkway Railway Station.

This will reduce the need for Network Rail to provide additional commuter parking in Salisbury as commuters will be able to use the Wilton P & R.

This will also be a location for visitors to Stonehenge travelling by rail to be able to transfer to coaches for their visit to the World Heritage site, which will again relieve the traffic problems of Salisbury.

The project will also improve the travel for Wilton commuters and can raise the profile of Wilton both Nationally and Internationally as the gateway to Stonehenge. This in turn should have great economic benefits for the tourism and shops in Wilton.

The project is supported by Wilton Town Council, Wilton Town Team, Wilton CLT and Wilton and District Chamber of Commerce, TransWilts and many others

Area Board Project/Councillor Initiative

5. What is the desired outcome/s of this project?

To confirm that the proposal is viable and that it should go forward for to the next stage which would be a full feasibility study

6. Who will Project Manage this project?

TransWilts CIC/ Peter Edge
