Given this decision, the ability to be flexible in our approach by retaining our budget allows us to make a local decision about the needs of individuals. From our perspective, we would therefore prefer a reduction in the size of an NPA to a wholesale transfer of a significant proportion	No	Secondary

However this does in fact disproportionately hit larger schools and I dont see the model being appropriate going forwards. If there has to be an ongoing call on Finances from elsewhere, how about alternating the areas targeted?	No	Secondary
