<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>My objection to the plan is that it is not "Sound".  The Land is not suitable for development it is vital to the well being of,people, fauna and flora. An ancient Bridle Way has already been tarmaced over (perhaps in the hope that it is out of sight out of mind)?  The proposed housing development will alter the flood plain and lead to flooding. Air and noise pollution will inevitably occur owing to increased population and motor vehicle exhausts.  It is unsound because it smacks of vested interest. In these times of political cynicism,Is it sound for a Council to totally disregard the local wshes of the people it represents?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The plan has assessed that there is no need to identify additional land at Mere for further residential development. However, it is proposed to revise the settlement boundary in various areas on the edge of the settlement. One proposal is to include land at Townsend Nurseries (see F7,F8,G7,G8 and H7). But the reason given in the community area topic paper - Mere (June 2017) is to "amend boundary to include employment development that is physically related to the settlement". All of the land at Townsend Nurseries is previously developed and is the most logical area for residential development to meet the future housing needs of the settlement. This site is far more suited and is deliverable (landowners have shown an interest in the site being redeveloped) than the land directly to the west of the site where permission is currently being sought for a sizeable speculative development by Richborough Estates. In particular land between SHLAA sites S99A and S99B (land to the rear of Hinton, Townsend)- see area edged green on settlement boundary plan for Mere attached is unconstrained, suitable and available for development comprising a logical "rounding off", on the eastern side of the site and between two projections running north and south on the existing/proposed settlement boundaries which effectively enclose this area. The plan needs to be reassessed to take into account recent ministerial statements or it will immediately become out of date (and therefore subject to challenge). Parts 4 & 5 of the plan need to be revisited. With regard to Mere, the Nursery site and the specific area of land (land to the rear of Hinton) - see area edged green on settlement boundary plan for Mere - are unconstrained, suitable and available for development. With the land being deliverable to meet what will now have to be an increased housing supply figure this is the most logical location for additional growth at Mere. In the circumstances, following a reassessment of the process, consideration should be given to amending the proposed settlement boundary to include the land to the rear of Hinton which comprises a logical rounding off/enclosing of land which has settlement

<b>Comment ID:</b> <a href="#">2441</a>		<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Table		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.11 South Wiltshire HMA - Distribution of housing development 2006-2026			Positively prepared  Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Dolphin Farms Ltd does not support table 4.11 but gives details as to why it is unsound. On behalf of Dolphin Farms Ltd, Pegasus has commented on Table 4.1 of the WHSAP (Housing Land Supply for Wiltshire HMAs) and considered that the residual requirement for the South Wiltshire HMA be increased by 1300 homes to 1,894 to reflect that the Churchfields and Central Car Park sites in Salisbury are highly unlikely to be developed within the plan period. As these sites are located in Salisbury, the Principal Settlement within the South Wiltshire HMA, it is submitted that the OAN must be provided for within the plan period. The effect of the increased residual requirement in the HMA would impact on Table 4.11 of the WHSAP (South Wiltshire HMA - distribution of housing development 2006-2026). The table sets out the developable commitments for Salisbury to be 3,833. This figure includes the Churchfields and Central Car Park allocations, despite the WHSAP's stating in supporting text at paragraph 4.66 that the Churchfields allocation is expected to commence later than envisaged and much less land for new housing will be available before 2026. Commercial space at Churchfields is available to let and there is no evidence to indicate that the decant process will commence. Similarly, the Central Car Park site is in commercial use with no evidence or application coming forward to indicate its deliverability within the plan period. Pegasus submit there is no realistic prospect of these sites coming forward in the plan period and that they should not be elide upon in the supply of housing land. Accordingly, the developable commitments for Salisbury at Table 4.11 should be reduced by 1300 to 2,533. The removal of these commitments results in a residual requirement of 723 homes in the Salisbury and Wilton Community Area. Housing allocations have been proposed in the Salisbury and Wilton Community Area for 795 homes which would, if developed meet the revised OAN as suggested above. However, Pegasus has stated in representations to the WHSAP that Netherhampton Road sited (S1027 &amp; S1028) totalling 740 dwellings should not be included as allocations at this stage given the number of unknown and unresolved technical issues. Notwithstanding this, research indicates that it would be 2026 at the earliest for development to commence at Netherhampton Road (see representations made in relation to Policy H3.1). Dolphin Farms Ltd can provide land that is available and deliverable for sustainable developable of about 350 dwellings (Site S801) within the plan period, to address part of the shortfall that has been identified above. The purpose of the Housing SDite Allocations Plan is to provide surety in the supply of housing land in the plan period. This would be better achieved by replacing the strategic mixed use allocation (S1028) with a number of alternative sustainable housing sites. On behalf of Dolphin Farms Ltd, Pegasus submit that the developable commitments for Salisbury at Table 4.11 should be reduced by 1300 to 2,533. The removal of these commitments results in a residual requirement of 723 homes in the Salisbury and Wilton Community Area.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you</b>	Dolphin Farms Ltd has good local knowledge and would welcome discussion on the assumptions made within the housing land supply and the appropriate level of housing to be allocated.

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>All of the land at Townsend Nurseries is previously developed and is the most logical area for residential development to meet the future housing needs of the settlement.</p> <p>This site is far more suited and is deliverable (landowners have shown an interest in the site being redeveloped) than the land directly to the west of the site where permission is currently being sought for a sizeable speculative development by Richborough Estates.</p> <p>In particular land between SHLAA sites S99A and S99B (land to the rear of Hinton, Townsend)- see area edged green on settlement boundary plan for Mere attached is unconstrained, suitable and available for development comprising a logical "rounding off", on the eastern side of the site and between two projections running north and south on the existing/proposed settlement boundaries which effectively enclose this area. It is considered that the assessment process both in terms of the housing delivery strategy (how many homes are needed and where?) and proposed housing site allocations is flawed.</p> <p>The assessment of need must now be considered out of date following recent ministerial announcements of proposals that the manner by which the level of housing need is assessed must be based upon the disparities between average incomes and average house prices. This process is likely to identify a significant additional quantum of housing to be delivered across the Wiltshire Council area. For this reason, the assessment that no further growth is required at Mere (because the level of housing growth at the settlement is broadly in line with plan requirements) is now out of date and incorrect.</p> <p>Because of the assumptions made by Wiltshire Council, none of the SHLAA sites on the periphery of the settlement have been considered (as has been the case in those locations where additional growth is considered to be necessary). These sites will need to be reassessed with a view to identifying and allocating suitable sites for additional housing developments to meet the emerging (revised) requirements.</p> <p>The plan needs to be reassessed to take into account recent ministerial statements or it will immediately become out of date (and therefore subject to challenge). Parts 4 &amp; 5 of the plan need to be revisited. With regard to Mere, the Nursery site and the specific area of land (land to the rear of Hinton) - see area edged green on settlement boundary plan for Mere - are unconstrained, suitable and available for development. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The provision of the Wiltshire Housing Site Allocations Plan in respect of Site 316 in Chapmanslade is an essential element in the future health of the village. Individual new properties which have been built in Chapmanslade in recent years do not in any way satisfy the demand for affordable housing, as they have invariably been larger houses at high prices. Only a larger development which has the scope for Wiltshire Council to insist on the inclusion of affordable housing will enable the village to begin to recover from the price inflation effect which has forced the children of residents and other first time buyers to live away from this community. If the site development is not allowed to proceed, the future of this land is possibly going to be seriously in question. I would urge the inspector to approve this plan.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I strongly disapprove of the proposal for a further forty houses to be built on the Ridgeway Farm site in Tetbury Lane, Crudwell, in addition to the ten houses already being built. Crudwell is a village of some two hundred and sixty dwellings. It has no shops, a very limited bus service, with no buses after 5.30pm and none at all on Sundays. It lies predominantly on one side of the extremely busy A429. A further forty houses would incur a greatly increased traffic flow to and from the A429 on to Tetbury Lane, with the associated air and noise pollution, and danger to pedestrians, especially the young and the elderly. This country lane is ill-equipped to handle extra traffic safely.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Flooding is also a major concern for many residents of Crudwell. I understand that it will not present a problem on the development site itself, but it will certainly present a huge problem in other parts of the village. Lower areas such as along and near Tuners Lane, where the Swill Brook flows, have experienced horrendous flooding in the past. Ten years ago twelve houses in this part of the village were badly flooded, along with others at the other end of the village. The antiquated pumping station is situated at the lower end, near Tuners Lane. Engineers from Wessex Water have admitted, on more than one occasion, that the pumping station is inadequate for the size of the village. They have also stated that improvements cannot be made without huge investment being undertaken, and that this will not happen as their budget is insufficient for such an investment.</p> <p>The major problems with flooding have largely occurred since previous developments were built. How much worse will these problems become with another forty dwellings? As a resident whose house has been flooded on more than one occasion, I dread to contemplate it.</p> <p>The planned additional forty houses goes against the Crudwell Development Plan currently being drawn up. not because the villagers of Crudwell are against any new developments, but because these must be planned in accordance with the needs and wishes of the villagers. I understand that the current Wiltshire Plan forecasts that there are more than enough new dwellings being planned and built in the Malmesbury area. There is, therefore, no strategic need for a development of the size being planned for Ridgeway Farm.</p>

Comment ID:	<a href="#">2446</a>	<b>Consultee</b> The Orders of St John Care Trust  <b>Person ID:</b> 711399	<b>Agent</b> Ms Emma Norman Planner  GVA  <b>Person ID:</b> 1132875	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	Yes
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Ommission site - Semington			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		SEE ATTACHED LOCATION PLAN AND LETTER. The following representation is written on behalf of our client 'The Order of St John Care Trust' to promote their land interest at Semington, Wiltshire, BA14 6JW for a field that is approximately 3.26 ha in size (see appendix I). The site is to the south east of the village, adjoining the settlement boundary along the High Street; the Council gritting depot is to the immediate south. The site benefits from an extant permission for a motel (Reference: W/74/00403/) which was granted permission in September 1979. The consent was implemented by way of the access being constructed; this should be considered relevant as the principle of urban form has been considered acceptable on the site. The site is being promoted for residential development, with the extant permission on site, proximity to the settlement boundary and excellent connection to the A361 and A350 this is an outstanding site to bring sustainable development to the area. Topic Paper 3 Housing Land Supply (July 2017) sets out the Wiltshire Housing minimum requirement to 2026 as 24,740. Of this number 12,603 have been completed and there is a deliverable supply (to 2022) of 8,922. This leaves a residual requirement of 3,215. Development commitments (to 2026) are increased in the draft Site Allocation Plan to 11,566 leaving a minimum allocation of 571. Paragraph 4.2 of the draft Site Allocations Plan recognises that a surplus above this number is required to meet the housing requirements of the National Planning Policy Framework (NPPF). Part of the housing commitments are made up by windfall sites; as per the NPPF paragraph 48 windfall sites may only be included if evidenced robustly. Table A5: Summary of windfall evidence of the Housing Land Supply. Table A5 sets out a per annum delivery of windfall sites of 185. Table 4.7 of the draft housing allocations sets out a windfall allowance of 2,086 from 2017 to 2026. This equates to a per annum delivery of 231 dwellings. There is no justification given for the per annum increase. If the information used from the Housing Land Supply Statement (update) April 2016 is used the windfall delivery rate between 2017 and 2026 is 1,665, leaving a reduced surplus of 2,289. Though it is not disagreed that the current surplus is above the current buffer required it is stressed that the housing target is a minimum that requires a healthy surplus to deliver the required housing in the Local Planning Authority Area. This is in keeping with the NPPF paragraph 47 to 'boost significantly the supply of housing' and the message given in Housing White Paper: Fixing our broken housing market: "We need to build many more houses, of the type people want to live in, in the places they want to live. To do so requires a comprehensive approach that tackles failure at every point in the system." Theresa May Semington is considered to be a large village (Adopted Wiltshire Core Strategy January 2015), this is defined as a village with a limited range of employment, services and facilities. Core Policy 2 accepts that there is a presumption in favour of sustainable development at these locations.			

Appendix Q - Schedule of representations

	<p>Other planning policy with regards to development outside the settlement boundary do not apply as by virtue of extant permission W/74/00403/ the area has already been deemed acceptable for development in the countryside.</p> <p>As it stands Semington has not been allocated for any growth, though there have been some minor amendments to the settlement boundary. A change to the settlement boundary to reflect the submitted redline and subsequent allocation within the Wiltshire Housing Site Allocation Plan will allow a site with an extant permission to come forward with as part of a plan lead approach.</p> <p>The site is well related to the existing settlement and benefits from excellent transport links to Melksham, Trowbridge and the wider area. With its extant permission and already created access it presents an excellent permission to provide housing in a sustainable location to help provide much needed housing in a desirable area.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2448</a>	<b>Consultee</b> Mr Peter White Parish Clerk  Southwick Parish Council  <b>Person ID:</b> 1132724	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Southwick Parish Council (SPC) is completely in favour of Wiltshire having a robust, strategic house-building plan. In this respect, SPC is very keen to see a local plan that is equitable, caters for local housing need and that takes fully into account the limitations of existing infrastructure and employment opportunities.</p> <p>However, SPC are completely against the proposed large-scale development of c180 new residential dwellings on the open Greenfield site known as Southwick Court, Firs Hill/Frome Road, Southwick, (SHLAA site 3565).</p> <p>Please see full details of our strongest objections to the proposed development at Southwick Court/SHLAA Site 3565 below: These objections are based on Southwick's settlement boundary remaining 'as is'.</p> <p>Lack of Co-ordination with Southwick's Neighbourhood Plan.</p> <p>There appears to have been a complete failure here, as the local planning authority should work with the qualifying body (i.e. Southwick Parish Council) to produce complementary Neighbourhood and Local Plans.</p> <p>Based on the standards required by the Localism Act 2011 and subsequent Planning Practice Guidance the proposal to include Southwick Court within the HSAP is contrary to Southwick's Neighbourhood Plan Area Designation (approved May 2016)</p> <p>As part of the Core Strategy, open land at West Ashton and Yarnbrook has been designated for the build of 2500/3000 new dwellings. We believe that Southwick Division has made more than enough in terms of sacrificing open Greenfield spaces in order to accommodate the Ashton Park development alone.</p> <p>Further open Greenfield sacrifice in Southwick Division would not only be unfair. It would also 'break the bank' in terms of available infrastructure to support it, especially in terms of traffic volumes and school places (please see my comments in 7 below).</p> <p>So why is Southwick being targeted and having imposed upon it, the building of another 180+ new homes on precious open Greenfield that is located outside of its existing settlement boundary? There is absolutely no justification for this.</p> <p>We suggest that you look elsewhere other than Southwick to achieve your target figures. You can achieve your targets by paying particular attention to potential brownfield sites in and around Trowbridge, as per the resolution and proposals raised by Trowbridge Town Council meeting on 5th Sept. 2017.</p> <p>We are also concerned that the area of land designated to develop 180 new dwellings has the capacity for up to 280 new dwellings. Indeed as SHLAA site 3565, a conservative total of 237 dwellings have been quoted.</p> <p>SPC's concern is that the area on the map within the documented proposal denoted with a 'red line' is far too large. Any intention to retain a Greenfield space as part of the area designated for development will be quickly consumed for further development once the settlement boundary change has been approved.</p> <p>In principle, Southwick Parish Council fully supports the protections that a robust HSAP/Local Plan can bring against non-strategic /speculative developments.</p> <p>However, SPC have very serious concerns regarding the proposal to build on the area of land known as Southwick Court.</p>			

Appendix Q - Schedule of representations

	<p>This proposal has not been included in Southwick's Neighbourhood Plan. The proposal does not bring with it any tangible benefits for the village, existing residents or for future residents. Southwick Parish Council seeks to work with Wiltshire Council to ensure a robust Local Plan is produced and trust that Wiltshire Council will support its people in this matter.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Contradiction to Core Policy:                      The proposed development of up to 180 houses is not required in our area (Trowbridge remainder). Please refer to Wiltshire Council's Housing Land Supply Statement Table: Housing delivery compared to annualized requirement (page 6) and appendix 6 - Summary assessment of supply and remaining housing to be identified (page 101).                      Southwick has already exceeded its duty in terms of contribution to housing in the region. Being part of the Trowbridge Community Area Remainder, it has an indicative requirement for years 2006 - 2026 of 165 new homes, with 242 completions to 2016, leaving an indicative remaining requirement of zero new builds up to 2026.                      Looking at the broader picture, North and West Wiltshire have already exceeded its five-year land supply (5.73 years vs. 5.25 years target). Building of an additional 180 new homes on this site would be superfluous and contrary to CP1, CP2, CP51, CP57, CP60, and CP61 of the Wiltshire Core Strategy 2015 and the policies of the NPPF taken as a whole."                      By Wiltshire Council's own figures, Southwick is already above target in the amount of affordable housing it has created in the village. Developments on the old Mowlem site, Lewis Court and Swan Court plus smaller 'in-fill' development are evidence of this, producing 77 new affordable homes in total. 21 of these homes were planned for local people in the village. Just one was allocated on The Mowlem's/Swan Court site to a local resident and again just one in Lewis Court.                      Also, to impose this housing development on the Southwick community, when there is zero demand for housing would also conflict with the Localism Act 2011.                      In addition, the allocation of proposed new housing numbers between Trowbridge and Chippenham is inequitable. Why is Chippenham only expected to build 4810 new dwellings? Trowbridge, with far inferior infrastructure and employment opportunities, has been targeted to build many, many more new dwellings when compared to Chippenham.                      There is clearly a disparity here that needs to be resolved. Chippenham area needs to give up a greater number of sites for development purposes. If Chippenham, with its far superior infrastructure links and employment opportunities, actually delivered its fair share of new housing numbers, the need to build on Southwick Court would completely diminish.                      SPC would also urge you to ensure that the rate of building on the development at Yarnbrook/West Ashton is duly accelerated now that the Bechstein's Bat issue has been resolved. The developers no longer have an excuse to protract delivery of the new homes promised on this site any further.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Settlement 'In-Fill': Any housing development on this site would be in-fill between settlements and would be in direct conflict with Wiltshire's Green Infrastructure Strategy. Core Policy 29 also advises that open countryside should be maintained to protect the character and identity of Southwick as a village. The balance of the village community and cohesive nature of the local population would be put at risk. The village sense of identity will be eroded as the population expands and Southwick becomes just another suburb of Trowbridge. The proposal is detrimental to the overall identity of Southwick as a village and there is a real risk that Southwick would become just a suburb of Trowbridge due to erosion of the protective green buffer.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Campaign for the Protection of Rural England (CPRE) has published a new detailed picture of England's light pollution at night using satellite data captured at 1:30am throughout September 2015. Nationwide, they show that just 22% of England is untouched by night-time light pollution. This research comes at a time of increased awareness of the harmful effects of light pollution on people and wildlife. In addition, Local Councils were estimated to spend £613m on street lighting in 2014-15. Those lights account for between 15-30% of council's carbon emissions. Increased noise and air pollution from additional traffic should also be considered and the impact these will have on existing and future residents of Southwick. The impact of this on resident's health and well being needs to be fully considered, given the Government's recent findings regarding the link between traffic pollution, dementia and chronic respiratory diseases.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Erosion of Greenfield: Government policy and its directive to Local Authorities are not to allow development on Greenfield sites. "The Government supports building on brownfield sites and not Greenfield sites"</p> <p>This is official Government policy as demonstrated by the Government going ahead with its new garden towns and villages programme where brownfield sites are being prioritised for the development of 200,000 new homes across the UK.</p> <p>Media coverage (Peston on Sunday 5th Feb ITV) and a Government White Paper supports the conservation of Greenfield.</p> <p>Southwick has already been forced to give up large areas of Greenfield following Wiltshire Council's decision to allow the construction of two solar farms in the village. Both of these sites are visually detracting, spoiling the open countryside. It would be unfair to expect the residents of Southwick to have to sacrifice more Greenfield, especially as it does not need any further housing to support local needs</p> <p>Therefore, as the local authority, Wiltshire Council needs to have exhausted all brownfield options in the Trowbridge area before it considers Greenfield sites for development purposes.</p> <p>Then and only then, should Greenfield sites be considered as an exception to Government policy.</p> <p>In this respect we urge you to fully reconsider inclusion of this site as part of the HSAP and to source appropriate brown field sites in instead. The old Bowyers site in Trowbridge must be a prime candidate for development and we cannot understand from the information available to us, why this site is not up for greater consideration as part of the HSAP.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Infrastructure: The Government has stated that before building in an area the infrastructure has to be in place before further development takes place. Core Policy 1- Southwick is a village with very limited infrastructure, employment and general services. Southwick should be considered unsuitable for large scale housing developments because it would put already inadequate services under even more pressure This would fall contrary to Core Policy 1-par; 17 of the NPPF and does not meet the housing needs of Southwick. Southwick's existing utilities are already over stretched. Without doubt, this development will put extra pressure and may even 'break' the existing infrastructure. Higher capacity sub-stations, more or bigger gas pipes and sewerage waste pipes will no doubt be required, leading to digging up of the roads and general disturbance for existing residence. Schools and other amenities. Based on current information and projections, we would suggest that at least 2-3 new Secondary Schools will need to be built in and around Trowbridge to accommodate the 5000/6000 new pupils generated by Ashton Park plus the other developments illustrated in the HSAP. In this respect, the current plans for new secondary schools in the area are wholly inadequate. Eventual demand for places will not be met. Primary School places are also at a premium, with just enough places available to There seems to be a general lack of planning to ensure available primary school places for the families affected by the HSAP generally, not just those on the proposed development at Southwick Court. Also, lets not lose sight of the impact that the Ashton Park development will have on primary school places in the area generally. Our concern is that over-crowding and lower academic/behavioural standards in existing primary schools will be the result.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Increase in Traffic Volumes, to from and within the village:                  Core Policy 60 -Advises the Council to use it's planning and transport powers to reduce the need for travel, especially by car. This in conjunction with Core Policy 61 advises that new developments should be located with this in mind. Also to encourage alternative sustainable methods of travel (i.e. walking, cycling and by buses/public transport).                  On the proposal, there will be 180 new dwellings. If there is an average of 2 new cars per household, there will be c 400 additional vehicles using A361 Frome Road on a regular basis.                  There are no designated cycle-ways in the area. Bus travel is not a viable option for many, as buses do not run a service post 17:00 each day. The distance to Trowbridge Train Station is greater than the 1.8km optimal walking distance to make this development sustainable. Therefore the only viable transport solution aligned to this proposal will be the increased used of motorised vehicles, which is contrary to CP60.                  Full consideration should also be given to the increase volume of vehicle traffic on local roads due to the additional c3000 new homes being built in Yarnbrook and West Ashton. At an average of 2 cars per household this would introduce 6000+ vehicles onto local roads that are already struggling to cope with existing volumes.                  Vehicle access from the Yarnbrook towards the A361/Frome Road will certainly impact Southwick to its detriment.                  Access.                  The details emerging with regard to site access are, at best, confusing. There are flaws with all of the options muted and there does not appear to be a 'natural choice' in terms of access to and from this site.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Flooding: Southwick already has serious issues with flooding, although the various agencies do not seem to have any record of this. However, the documented proposal recognises that a part of the site at Southwick Court is a floodplain of the Lambrook River.</p> <p>The NPPF clearly states that: "The identification of functional flood plain should take account of local circumstances and not defined solely on rigid probability parameters". Strong historical and local evidence shows that the Lambrook floodplains on this site and at other sites in Southwick flood far more regularly and with greater intensity than the average parameter guidelines set out in the NPPF. In this respect, please refer to the Operational Flood Working Group for specific details on flood risk on this site and impact to other areas of Southwick.</p> <p>Also, Core Policy 67 requires all new development to include measures to reduce rainwater runoff and improve rainwater infiltration to soil and ground.</p> <p>Overall, SPC do don't believe that the engineering solutions being proposed for this site will alleviate flood risk to an acceptable level. Also the knock on effect of water diversion still needs to be fully considered and evaluated.</p> <p>We request that the developer and/ or the existing landowner should also be made to set aside funds in order to compensate future flood victims in the village should suffer serious flooding as a result of this proposal.</p>

<b>Comment ID:</b> <a href="#">2461</a>		<b>Consultee</b> Oxford University Endowment Management  <b>Person ID:</b> 642979	<b>Agent</b> Mr Matthew Dawber Savills  <b>Person ID:</b> 1100945	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	North and West HMA				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Savills is instructed by OUEM Ltd to submit representations on the Wiltshire Site Housing Allocations DPD – Pre-Submission Draft. These representations relate specifically to proposed residential development at Whitehill Lane, Royal Wootton Bassett. These representations also make comments on the proposed amendments to the settlement boundaries of Royal Wootton Bassett. The matters will be discussed in turn below.</p> <p><b>Proposed Housing Allocations</b>                  Royal Wootton Bassett is classified as ‘Market Town’ within the Wiltshire Core Strategy (WCS), which is the second highest settlement category in the County. As such, the WCS states that Market Towns have the potential to make a significant contribution towards the provision of homes and jobs.                  Furthermore, Royal Wootton Bassett is the closest major tier settlement to Swindon, which is a key employment centre in the region, and has excellent public transport links.                  Royal Wootton Bassett is a Market Town and accordingly displays a high level of services and facilities. Adding to the sustainability credentials of the town is its proximity to Swindon. Therefore, it is surprising that there have only been two housing allocations of any significant size in the last decade, both of which appeared in the Wiltshire Local Plan (adopted June 2006).                  A further 110 dwellings are proposed at Maple Drive, Royal Wootton Bassett through the town’s Neighbourhood Plan, which is currently awaiting a date for its examination. However, given the sustainability credentials of the settlement one would expect a greater number of housing allocations.                  While it is understood that the Housing Site Allocations DPD has sought to only allocate in localities that are not deemed to have met their housing requirements as set out in the WCS (Core Policy 2), the allocation of significant numbers of houses in villages such as Hullavington, Crudwell and Bratton does not represent sustainable development. This is owing to the fact that there are significant opportunities for development in higher tier settlements, such as Royal Wootton Bassett, which offer greater services within them, as well as more sustainable access to regional centres.</p> <p>In order to maximise the potential for sustainable development, the Council should include the enclosed site at Whitehill Lane in order to ensure that opportunities presented by the higher tier settlements in the County with the best links to employment facilities are maximised.                  The Site Allocations DPD should also acknowledge the fact that the housing requirement figure as outlined in the WCS for between 2006 and 2026 is soon to be out of date and the Council will need to plan for a new evidence based housing need. This is owing to the fact that the publication of the Wiltshire and Swindon SHMA is expected soon and also the fact that the Government has recently published its standardised methodology for the calculation of housing need for consultation. Although only for consultation at this stage, the calculation shows a 127 dwelling per annum increase in the housing requirement from the 2,100 per annum figure in the Core Strategy to a new 2,227 figure.</p>				

Appendix Q - Schedule of representations

	<p>This clearly shows that the need for housing in the County will soon increase and the Council should plan accordingly. The identification of further sites in the North and West Housing Market Area, which had the largest need for housing according to the WCS (60% of the 42,000 housing requirement in the plan was identified in this area), would seem to be a logical response to meet these needs.</p> <p>Failing the identification of Whitehill Lane as a full housing allocation, the Housing Site Allocation DPD should include the site as a 'reserve site' in order to contribute towards meeting a higher housing requirement.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Please take this letter as a formal objection to the allocation of a further 40 dwellings at Ridgeway Farm, Crudwell, currently contained within the Wiltshire 'draft' Housing Site Allocation Plan under consultation.</p> <p>As a parish resident for over 20 years, I strongly objected to the planning proposal on the site for 30 dwellings in 2014, which was refused, and consider the subsequent permission granted for a far smaller development of 10 units (already underway) should be the absolute maximum . I understand that the housing landscape has changed / evolved over the last few years, with allocations now coming out from central government to meet UK wide expected needs both the short and longer terms. What I did not appreciate, however, was any parish, which had not had the foresight to draw up (and get approved) a detailed 'Neighbourhood Plan', was totally exposed to having seemingly 'unlimited development' in its parish with no grounds for objection!</p> <p>I feel that the whole village has been let down first and foremost by its Parish Councillors, who did not bring the village vulnerability to the residents' attention until this '11th hour'. Additionally, the County Councillors, and nearby Parish Councillors, clearly aware of Crudwell's exposure to imposition of unwanted development, have seemingly 'kept quiet', thus ensuring that Neighbourhood Plan's for their own Parishes have been well progressed / approved and villages such as Crudwell would have to accept development these Parishes do not want!</p> <p>Whilst we have been led to believe that the land owner for the Ridgeway Farm land is aggressively looking to sell off their land for residential development, and a development of one large development as opposed to several smaller ones would be less for the County to administer, I am firmly of the view that the many objections (listed below) raised by Crudwell Parishioners in 2014 – which were accepted by the County Council – remain apposite and accordingly should be upheld as the reasons for refusing further Planning Permission for the Farm site.</p> <p>Should it be identified that there is a pressing need for further housing within Crudwell Parish, there are several sites on which it would be more suitable to be built upon than Ridgeway Farm – the majority of which would be to the East of the A429, although, I am clearly not aware whether those land owners would be willing to sell for such a purpose. As part of the Crudwell Neighbourhood Plan such sites will clearly need to considered, if the other overriding hurdles to further development in the parish can be overcome.</p> <p>For clarity, I list below my main objections to the Ridgeway Farm proposed further development, with the non site specific objections clearly hurdles which would also need to be overcome / mitigated should further development in the Parish be considered necessary / appropriate.</p> <p>Objections:-</p> <ul style="list-style-type: none"> <li>• The proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Site Allocations Plan to too large a number for a village of c200 existing homes. A total of 29 units on the site was rightly refused planning in 2014 so allowing 50 makes no sense whatsoever! I support the assertion that Crudwell is not anti-growth; it would simply like to plan for any growth itself, via the emerging Neighbourhood Plan which I believe is now well advanced. It may well be that the Parish plan may suggest that it might be sensible to grow places like Cricklade, Purton and Lyneham (where there would appear to be more pressing and genuine need) before growing Crudwell because the impact in these locations will be less dramatic.</li> </ul>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission site Maple Drive, Royal Wootton Bassett			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Savills have previously submitted representations on earlier drafts of the Site Allocations DPD in relation to Whitehill Lane, Royal Wootton Bassett. I have enclosed a layout of the scheme which demonstrates that the site is suitable for a mix of residential development (circa 150 dwellings) in conjunction with a site for allotments and public open space. Indeed, this site was included in a draft of the Royal Wootton Bassett Neighbourhood Plan dated 2015. This draft allocation was supported by a raft of technical reports covering the following matters: Arboriculture; Ecology; Heritage; Landscape; and Highways. While high level, these reports confirmed that there are no technical constraints present on the site that would limit its ability to accommodate circa 150 dwellings.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Serious concerns about road capacity and safety, and environmental impacts of new development on the landscape and wildlife. The A429 is already massively in need of repair and attention on the stretch through the village which has been untouched in 20+ years and I am horrified at the prospect of mass development down effectively a single carriageway country lane which Tetbury/Crudwell Lane cannot support without surface and road safety improvements.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Settlement Boundary Review</p> <p>The proposed amendments to the Settlement Boundary of Royal Wootton Bassett are not appropriate as they are currently shown. This is owing to the fact that the methodology underpinning this, as shown in Topic Paper 1 – Settlement Boundary Review Methodology, is flawed. The methodology states that existing allocations, such as the extant employment allocation at Templars Way Industrial Estate, should not be included within the boundary. This approach limits the value of identifying a boundary as it will be redundant as soon as significant allocations are implemented beyond it.</p> <p>This is also the case in terms of the draft Neighbourhood Plan allocation at Maple Drive. The adoption of the Neighbourhood Plan and subsequent implementation of the allocation will result in significant residential development beyond the settlement boundary. This is a type of development explicitly not favoured within the WCS. As such, the adoption of a revised settlement boundary as set out currently, would result in a contradiction between the WCS, Neighbourhood Plan and the Site Allocations DPD.</p> <p>The boundary should therefore be reviewed in order to include the aforementioned Templars Way Industrial Estate allocation to the south of the town and the emerging Neighbourhood Plan allocation to the west to ensure consistency between the WCS, Neighbourhood Plan and Site Allocations DPD.</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2476</a>	<b>Consultee</b> Sian Burke-Murphy  <b>Person ID:</b> 1132949	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Ridgeway Farm				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to register my opposition to the proposed allocation of an additional 40 houses in Crudwell, on the Ridgeway Farm site as per the Draft Site Allocations Plan. There is no immediate, strategic need or justification to allocate new homes to Crudwell and the Draft Site Allocations Plan should not do so. I am also concerned that the site size / boundary of the Ridgeway Farm Development encompasses an area larger than that which would be required for 40 homes - so I question why that is the case and would like it reviewed.</p> <p>I also do not think that the allocation is justified when you look at your own guidance or notes within the Site allocations Plan. This states that housing sites will only be allocated where there is a strategic priority to do so. From the data available, the Site Allocation Plan currently results in an oversupply of some 4,300 dwellings to 2026 when you take into account past completions with deliverable commitments and windfall sites; even excluding windfall sites, the oversupply is still 2,200 across the housing market area. More specifically, the Site Allocations Plan results in an oversupply of homes in the Malmesbury Community Area; Wiltshire Council also has a history of oversupply of dwellings - in eight of the last ten years, more homes have been built than planned and over that period the over supply has been over 140% of target.</p> <p>I strongly believe that the emerging Neighbourhood Plan in consultation with and with full engagement of the local community and businesses should determine the scale and type of housing need in Crudwell. The Neighbourhood Plan would examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity. The consultation will also help determine from local businesses what their needs might be to enable them to sustain and expand employment opportunities going forward.</p> <p>The Crudwell Neighbourhood Plan is progressing at a pace, with the full support of the community and so whilst it may not be at 2nd draft stage (where it carries more weight) by February 2018, given there is NO IMMEDIATE STRATEGIC NEED to allocate homes to Crudwell, I strongly believe that the Ridgeway farm site should be removed from the Draft Site Allocations Plan to allow our Neighbourhood Plan to be completed to a stage where IT can inform decisions about how and where our village grows. I am not anti-development....I want to ensure my children and grandchildren can live in the village if they choose to. I am however in favour of sensible development with full engagement of the local community.</p> <p>Policy 1 of the Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", given that we have circa 250 homes in Crudwell, I do not see how an additional 40 homes on top of the 10 already being built - a staggering 20% increase overall - even falls within Wiltshire Councils own Core strategy.</p> <p>I, along with many other villagers and parishioners, was in favour of the 10 houses houses which were finally agreed. I was gobsmacked when suddenly this allocation for 40 additional houses appeared on this site which was previously considered unsuitable.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2477</a>	<b>Consultee</b> Five Rivers Homes Ltd	<b>Agent</b> Mr Stephen Young Senior Planning Consultant	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1132956	Pro Vision  <b>Person ID:</b> 902049	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.65		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED document: Five Rivers Homes Ltd - Representation to Draft Wilts Housing Allocations 22.09.17 - Para 4.65</p> <p>SETTLEMENT BOUNDARY - SALISBURY</p> <p>Table 8.1 of the Wiltshire Housing Site Allocations Plan (WHSAP) Topic Paper 1 (Settlement Boundary Review Methodology) indicates that the proposed settlement boundaries are now intended to include:</p> <ul style="list-style-type: none"> <li>• “commenced residential and community facilities...that is physically elated to the settlement”</li> <li>• “built...employment development in principal settlements, market towns and local service centres that is physically related to the settlement”</li> </ul> <p>but to exclude allocations or unimplemented planning permissions.</p> <p>Salisbury is a Principal Settlement. Thus commenced permissions and/or existing employment sites should be included within the proposed boundaries.</p> <p>There is, however, significant inconsistency regarding how the principles of Table 8.1 have been applied to the proposed settlement boundaries. For example:</p> <p>a) Fugglestone Red has commenced and is under construction. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area of outline permission S/2012/0814 and Phase 1A RM permission 15/05120/REM lies outside the proposed settlement boundary for Salisbury (Cells E3-4 and F3-5).</p> <p>b) Longhedges, approved by 13/00673/OUT and 15/07253/REM, has also commenced. A number of properties have been sold. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area lies outside the proposed settlement boundary for Old Sarum (Cells J1-2, K1-2 &amp; L1).</p> <p>c) A 200 unit scheme on the NE of Calne, approved by N/11/03524/OUT and 15/05831/REM, has also commenced. Many of the properties have been allocated postal addresses by the Council. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area lies outside the proposed settlement boundary for Calne (Cells G4-6, H4-6).</p> <p>d) A 12 unit scheme, in close proximity to (c) and approved by 14/03053/OUT and 15/07282/REM, has also commenced. Some of the properties have been allocated postal addresses by the Council. By virtue of the criteria in Table 8.1, this site should be within a settlement. However, the area lies outside the proposed settlement boundary for Calne (Cell J6).</p> <p>The proposed alterations to a number of settlement boundaries are therefore not correctly related to the criteria by which they should be drawn. This error applies to a number of very significant developments within Wiltshire. There should therefore be a complete revisit of all the settlement boundaries to ensure that the criteria of Table 8.1 are being correctly applied.</p> <p>For the avoidance of doubt these representations seek, as part of the reassessment of all the settlement boundaries to ensure correct application of the principles in Table 8.1 of the Housing Topic Paper on settlement boundaries, the continued inclusion of the Castle Works site, Salisbury (SP1 3SB at SU141 319; see plan 1476-P01) within the settlement boundary on the grounds that it is an existing employment development that</p>				

Appendix Q - Schedule of representations

	<p>is physically related to the development this supports the proposed boundary of Salisbury as drawn in the Salisbury settlement boundary (Cell J5);  <b>PARAGRAPH 4.65</b>  The draft Housing Allocations Plan acknowledges that the WCS for Salisbury would deliver sufficiently within the plan period to meet housing requirements and . The Allocation Plan then proceeds to bolster supply at Salisbury, in the event of undersupply from Churchfields, by allocating Land at Netherhampton Road.  Notwithstanding this additional allocation, this paragraph should be amended to indicate that, provided other sites also comply with the Policies of the Wiltshire Core Strategy, these other developments within the settlement boundary would also be acceptable alongside the allocations. Without such clarification / addition, the current Draft implies that only allocated development will be acceptable.  Paragraph 4.65 should therefore be amended as follows (additions in italics):  A shortage of land could impede the City's prospects and it could also lead to greater development pressures in other settlements in the HMA less suited to growth. In any event, it should be recognised that other sites, not allocated within this document, may be developed or redeveloped alongside the allocations proposed here. This would be on the condition that those sites demonstrate compliance with the Policies of the Wiltshire Core Strategy. Sites to which this comment would relate would include the Castle Works site on Castle Road, where the Council resolved to grant permission in December 2014.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2478</a>	<b>Consultee</b> Mr Robert Sparke  <b>Person ID:</b> 1132963	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> Yes
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Trowbridge			Justified
				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The draft Wiltshire Housing Site Allocation Plan (WHSAP) document as made available at the public exhibition held at County Hall Trowbridge (Wed 26 July 2017) presents a summary of the WHSAP and makes a number of statements and assertions which I consider to be unsound (whether not positively prepared, not justified, not effective or possibly not consistent with national policy).</p> <p>Accordingly I am providing my comments, as requested by the council. I have not found the representation form to be user-friendly way of doing this and I am therefore providing my comments in these separate pages (pages 4-6). I have attached these to the representation form (pages 1-3) as these provide you with my personal details for your reference.</p> <p>My comments refer to the WHSAP document with some reference to the Wiltshire Core Strategy (WCS). As I live in North Bradley I make specific reference to three sites within the Trowbridge Community – these being Elm Grove Farm (ref H2.1), A363 White Horse Park (ref H2.2) and Southwick Court (ref H2.6). I also make some general comments that are not directed to these three sites in particular but are relevant. My comments follow:</p> <p><b>Southwick and North Bradley – Separate Communities</b></p> <p>North Bradley and Southwick are recognised in the WCS as large villages surrounding Trowbridge and that these have separate and distinct identities as villages. These villages reflect the rural nature of the county. The WCS goes on to say that open countryside should be maintained to protect the character and identity of these villages as separate communities. Therefore all three proposed sites (H2.1, H2.2 and H2.6) are unsound proposals as they are in direct conflict with the WCS. The SCW additionally states that at the settlements identified as villages, a limited level of development will be supported in order to help retain the viability of these communities. At large village settlements (i.e. Southwick, North Bradley) settlement boundaries are retained and development will take the form of small housing (defined as sites involving fewer than 10 dwellings and not a major application) and employment sites within settlement boundaries.</p> <p>The WCS goes on to say that these local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning. It is my understanding that both Southwick and North Bradley have submitted neighbourhood plans and therefore I do not understand why these proposed sites should be considered further.</p> <p><b>Flooding and Wildlife</b></p> <p>Plan areas H2.1 and H2.2 are both adjacent to Woodmarsh lands which I suspect have that name for a reason. Throughout the year and particularly in the winter months these (current) fields are prone to flooding – these areas are not at risk of flooding that are guaranteed to do so. If you have ever walked these areas you would know this. This evidence by the ‘lake of rainwater’ that gathers by the roadside and on the lower part of the football field beside the Woodmarsh road (even though there has been some drainage work undertaken on the football field itself) every time a moderate amount of rainfall happens. Covering these fields in concrete and with houses will only make matters worse.</p> <p>Within the WCS there is a requirement for all development in Trowbridge to be sensitive to wildlife and wildlife sites. There is reference to bats to the south east of Trowbridge. I am not privileged or informed as to the exact location of these – however I do know that I am able to sit at the rear of my property on many evenings at dusk and witness a number of bats flying over my garden as they feed and fly freely.</p>			

## Infrastructure and Employment

The WCS the WHSAP document focuses almost totally on allocating sites to make sure there is sufficient housing land supply as required by the WCS (it states so). It goes on to say that significant housing development has already taken place since 2006 and that there are also significant commitments for new homes including allocations within the WCS. It then adds that further housing sites are necessary. It further states that there is a focus on settlements where there is a shortfall in housing and where there is a need to introduce new sites. To my mind there appears to be a blind pursuit of building houses to 'meet a plan number' and in response to a failing government pledge to build more houses without any serious consideration to the wider issues of infrastructure (such as transport, employment and public services) – even those as stated in the council's own WCS.

The WCS states that development will be managed to ensure that jobs and the right infrastructure are delivered at the right time to ensure that out-commuting is not increased and development does not have a detrimental impact on the infrastructure. The WCS further states that adequate services and infrastructure provision are brought forward in a timely and responsive manner alongside new development proposals (to include highway improvements). It adds that measures will have been implemented which reduce traffic delays and disruption, safety for all road users will have been improved and the impact of traffic speeds in towns and villages mitigated.

I have lived in Woodmarsh for over 30 years and I have only witnessed an evening increase in traffic volume and density along with greater disruption and therefore an increased risk to safety for both road users and importantly also pedestrian and cycle users. The A350 road becomes busier and busier as each year passes. The amendments to the West Ashton crossroads have only moved the log-jams elsewhere. Journeys on the A350 from the M4 through our area to Westbury and beyond take longer and longer. The promise to mitigate issues has fallen well short.

The road through North Bradley (Yarnbrook to Trowbridge and visa versa) also suffers from speeding traffic as it is used as a short cut (or rat run). Additionally the increase in traffic using the Bradley Road into (and out of) Trowbridge caused both by the increase in commuting traffic and as a result of the two retail centres on Bradley Road means that the traffic regularly backs up around the White Horse business park road and also backs up into North Bradley all up Woodmarsh. A traffic incident or a road closure (whether in the immediate area or elsewhere) often results in a near grid-lock, exacerbated by frustrated drivers then turning around in a fruitless search for a quicker way.

North Bradley road into Trowbridge, with all outward traffic from the two retail centres being directed one way upon exit has become a busy road and one that is hazardous for pedestrian to cross. The proposed H2.1 and H2.2 do not specify in detail how they will access the road infrastructure but they will only worsen the traffic situation further. Does somebody have to be killed crossing an even busier road such as Bradley Road before it is realised that the traffic/highway infrastructure is unacceptable and failing against the WCS requirements?

Before any further development is proposed or takes place significant improvements to the traffic infrastructure have to be both planned and implemented. If the developments are allowed to proceed first the situation just gets worse – and the infrastructure improvements just don't happen.

With regards to employment, and the WCS requirement to manage development to ensure that out-commuting is not increased, this is probably already being conflicted. We have already seen considerable housing development in the Trowbridge area with little or no inward investment that has resulted in high value skilled jobs (as called for in the WCS). I can, however, recall Virgin pulling out of the area. Building houses will not create an environment in which investment will be attracted in high value skilled jobs. Rather it has a tendency to attract employment where the requirements are for low skills and minimum wages are paid.

## Other Infrastructure

As a general comment our hospital(s), doctors, dentists and schools are coming under increasing pressure and are struggling to cope to provide a decent (or any in some instances) service. Building more houses will not help with this unless additional infrastructure is put in place. This has to be put in first – if left to later it somehow does not seem to happen. As an example of this – I am informed that there was a Doctor's surgery planned for Paxcroft Mead but it never happened – The Red Admiral (or whatever it is now called) happened instead. In order to ensure that the services form or Infrastructure is improved it must be put in place before the houses are built that are then accommodated by the people that demand an increasing service from these services.

In closing, I had further points to make. I request an extension to the closing deadline but I was refused this. I fully understand this – please allow me to apologise for the slightly dis-organised nature of these pages which have been drafted in a rush.

Appendix Q - Schedule of representations

<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>I fear that this Plan will be steam-rolled through without the local community/people of Trowbridge and North Bradley being given any genuine consideration. I believe this to be an important matter.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge Coalescence			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Southwick and North Bradley – Separate Communities</p> <p>North Bradley and Southwick are recognised in the WCS as large villages surrounding Trowbridge and that these have separate and distinct identities as villages. These villages reflect the rural nature of the county. The WCS goes on to say that open countryside should be maintained to protect the character and identity of these villages as separate communities. Therefore all three proposed sites (H2.1, H2.2 and H2.6) are unsound proposals as they are in direct conflict with the WCS. The SCW additionally states that at the settlements identified as villages, a limited level of development will be supported in order to help retain the viability of these communities. At large village settlements (i.e. Southwick, North Bradley) settlement boundaries are retained and development will take the form of small housing (defined as sites involving fewer than 10 dwellings and not a major application) and employment sites within settlement boundaries.</p> <p>The WCS goes on to say that these local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning. <b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		The whole document		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Plan is not positively prepared because it does not meet objectively assessed development requirements. WC propose to increase the size of Trowbridge by one quarter during the Plan period (and more after that) which exceeds the requirement for a five year supply. The Plan is not effective because WC's examination of 'windfall', which is expected to provide 60% of new housing, is grossly inadequate - comprising one page out of 4,500 pages of the Plan documents. The changes that are necessary to the plan are set out precisely in the submissions made by the Trowbridge Town Council (Mr Lance Allan - 06/09/2017) and the Hilperton Gap Action Group (Mr George Bundy - 19/09/2017)

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to comment on the proposed development and in particular that outside the city boundary at Netherhampton and also on other allied matters concerning the general policy as applied to housing and specifically relating to the Netherhampton site.  MY comments are based on my view that the WHSAP is not objective .  A housing crisis exists particularly in respect of affordable housing.It is the prime concern particularly in a high cost housing market as exists in Salisbury. The Netherhampton site being large is likely to be taken up by one of the large housing deveolpers. Only a small no of what they term affordable are likely to be constructed. Those that are will not be to Parker Morris Standard of old which ensures internal accommodation is flexible and of usable dimensions. IT is therefore unlikely to meet the real need to house those in most need.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to comment on the proposed development and in particular that outside the city boundary at Netherhampton and also on other allied matters concerning the general policy as applied to housing and specifically relating to the Netherhampton site.</p> <p>MY comments are based on my view that the WHSAP is not objective .</p> <p>The broad plan does not identify sites with highway infrastructure and their capacity to take Further development. IN order to properly identify sites ,a study of available capacity is a prime task and would of itself properly identify sites with additional sustainable housing capacity.</p> <p>I do not consider that WHSAP is sound for other local reasons.</p> <p>The impact on the highway infrastructure from the West of the city which passes over the Avon Bridge was demonstrated when reduced to 2 lanes (necessary repair), impacted back to East of Alderbury by- pass and interfered with the inner ring road. The bridge is a bottleneck where only major alterations to both the A3094 and Exeter st. roundabouts could effect improvement. WE have no data or scheme to know if it were possible and the cost impact .It would need to be done in tandem with any significant increase in development and especially that on the A3094 . There is no doubt 740 houses could via developer contribution provide a school.</p> <p>However that itself would contribute massively to traffic congestion at peak times.</p> <p>Should the school be in the East Harham area as actually was a consideration of a previous County Council in the 1980s. The effect could be to reduce traffic by localising it in the East.</p> <p>Traffic flow could be improved by reconsidering the opportunity to easily make a pedestrian underpass to the North of the A3094 junction. There is however a question concerning fibre optic cabling that some think is present. That itself would be a complication and may render any improvement impossible.</p> <p>In conclusion, I am not opposed to small schemes of really affordable housing off Netherhampton Road but the highways implications still need to be sustainable.</p> <p>Decisions need to be made taking into account impact on Salisbury,s highway network and known problems of parts that are over capacity and for which there are currently no adequate proposals. WE do not need piecemeal development to make matters worse I consider the strategy the community is being asked to comment on lacks sufficient real detail and is pre emptive. The total traffic could in fact be increased with more housing on the Wellworthy site . A question needs to be asked about whether the designation of this site as industrial has been change to Mixed which would of itself make housing numbers even larger than the consultation proposes. This information is lacking.</p>

To my mind there appears to be a blind pursuit of building houses to 'meet a plan number' and in response to a failing government pledge to build more houses without any serious consideration to the wider issues of infrastructure (such as transport, employment and public services) – even those as stated in the council's own WCS.</p> <p>The WCS states that development will be managed to ensure that jobs and the right infrastructure are delivered at the right time to ensure that out-commuting is not increased and development does not have a detrimental impact on the infrastructure. The WCS further states that adequate services and infrastructure provision are brought forward in a timely and responsive manner alongside new development proposals (to include highway improvements). It adds that measures will have been implemented which reduce traffic delays and disruption, safety for all road users will have been improved and the impact of traffic speeds in towns and villages mitigated.</p> <p>I have lived in Woodmarsh for over 30 years and I have only witnessed an evening increase in traffic volume and density along with greater disruption and therefore an increased risk to safety for both road users and importantly also pedestrian and cycle users. The A350 road becomes busier and busier as each year passes. The amendments to the West Ashton crossroads have only moved the log-lams elsewhere. Journeys on the A350 from the M4 through our area to Westbury and beyond take longer and longer. The promise to mitigate issues has fallen well short.</p> <p>The road through North Bradley (Yarnbrook to Trowbridge and vice versa) also suffers from speeding traffic as it is used as a short cut (or rat run). Additionally the increase in traffic using the Bradley Road into (and out of) Trowbridge caused both by the increase in commuting traffic and as a result of the two retail centres on Bradley Road means that the traffic regularly backs up around the White Horse business park road and also backs up into North Bradley all up Woodmarsh. A traffic incident or a road closure (whether in the immediate area or elsewhere) often results in a near grid-lock, exacerbated by frustrated drivers then turning around in a fruitless search for a quicker way.</p> <p>North Bradley road into Trowbridge, with all outward traffic from the two retail centres being directed one way upon exit has become a busy road and one that is hazardous for pedestrian to cross. The proposed H2.1 and H2.2 do not specify in detail how they will access the road infrastructure but they will only worsen the traffic situation further. Does somebody have to be killed crossing an even busier road such as Bradley Road before it is realised that the traffic/highway infrastructure is unacceptable and failing against the WCS requirements?</p> <p>Before any further development is proposed or takes place significant improvements to the traffic infrastructure have to be both planned and implemented. If the developments are allowed to proceed first the situation just gets worse – and the infrastructure improvements just don't happen.</p>			

Appendix Q - Schedule of representations

	<p>With regards to employment, and the WCS requirement to manage development to ensure that out-commuting is not increased, this is probably already being conflicted. We have already seen considerable housing development in the Trowbridge area with little or no inward investment that has resulted in high value skilled jobs (as called for in the WCS). I can, however, recall Virgin pulling out of the area. Building houses will not create an environment in which investment will be attracted in high value skilled jobs. Rather it has a tendency to attract employment where the requirements are for low skills and minimum wages are paid.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">2492</a>	<b>Consultee</b> Five Rivers Homes Ltd  <b>Person ID:</b> 1132956	<b>Agent</b> Mr Stephen Young Senior Planning Consultant  Pro Vision  <b>Person ID:</b> 902049	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Salisbury Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED DOCUMENT: Five Rivers Homes Ltd - Representation to Draft Wilts Housing Allocations 22.09.17 - Salisbury Settlement Boundary SETTLEMENT BOUNDARY - SALISBURY Table 8.1 of the Wiltshire Housing Site Allocations Plan (WHSAP) Topic Paper 1 (Settlement Boundary Review Methodology) indicates that the proposed settlement boundaries are now intended to include: <ul style="list-style-type: none"> <li>• “commenced residential and community facilities...that is physically elated to the settlement”</li> <li>• “built...employment development in principal settlements, market towns and local service centres that is physically related to the settlement” but to exclude allocations or unimplemented planning permissions.</li> </ul> Salisbury is a Principal Settlement. Thus commenced permissions and/or existing employment sites should be included within the proposed boundaries. There is, however, significant inconsistency regarding how the principles of Table 8.1 have been applied to the proposed settlement boundaries. For example: a) Fugglestone Red has commenced and is under construction. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area of outline permission S/2012/0814 and Phase 1A RM permission 15/05120/REM lies outside the proposed settlement boundary for Salisbury (Cells E3-4 and F3-5). b) Longhedges, approved by 13/00673/OUT and 15/07253/REM, has also commenced. A number of properties have been sold. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area lies outside the proposed settlement boundary for Old Sarum (Cells J1-2, K1-2 & L1). c) A 200 unit scheme on the NE of Calne, approved by N/11/03524/OUT and 15/05831/REM, has also commenced. Many of the properties have been allocated postal addresses by the Council. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area lies outside the proposed settlement boundary for Calne (Cells G4-6, H4-6). d) A 12 unit scheme, in close proximity to (c) and approved by 14/03053/OUT and 15/07282/REM, has also commenced. Some of the properties have been allocated postal addresses by the Council. By virtue of the criteria in Table 8.1, this site should be within a settlement. However, the area lies outside the proposed settlement boundary for Calne (Cell J6). The proposed alterations to a number of settlement boundaries are therefore not correctly related to the criteria by which they should be drawn. This error applies to a number of very significant developments within Wiltshire. There should therefore be a complete revisit of all the settlement boundaries to ensure that the criteria of Table 8.1 are being correctly applied. For the avoidance of doubt these representations seek, as part of the reassessment of all the settlement boundaries to ensure correct application of the principles in Table 8.1 of the Housing Topic Paper on settlement boundaries, the continued inclusion of the Castle Works site, Salisbury			

Appendix Q - Schedule of representations

	<p>(SP1 3SB at SU141 319; see plan 1476-P01) within the settlement boundary on the grounds that it is an existing employment development that is physically related to the development this supports the proposed boundary of Salisbury as drawn in the Salisbury settlement boundary (Cell J5);</p> <p>PARAGRAPH 4.65</p> <p>The draft Housing Allocations Plan acknowledges that the WCS for Salisbury would deliver sufficiently within the plan period to meet housing requirements and . The Allocation Plan then proceeds to bolster supply at Salisbury, in the event of undersupply from Churchfields, by allocating Land at Netherhampton Road.</p> <p>Notwithstanding this additional allocation, this paragraph should be amended to indicate that, provided other sites also comply with the Policies of the Wiltshire Core Strategy, these other developments within the settlement boundary would also be acceptable alongside the allocations. Without such clarification / addition, the current Draft implies that only allocated development will be acceptable.</p> <p>Paragraph 4.65 should therefore be amended as follows (additions in italics):</p> <p>A shortage of land could impede the City's prospects and it could also lead to greater development pressures in other settlements in the HMA less suited to growth. In any event, it should be recognised that other sites, not allocated within this document, may be developed or redeveloped alongside the allocations proposed here. This would be on the condition that those sites demonstrate compliance with the Policies of the Wiltshire Core Strategy. Sites to which this comment would relate would include the Castle Works site on Castle Road, where the Council resolved to grant permission in December 2014.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7 East of the Dene			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I note the proposals that are being made to alter existing settlement boundaries in Salisbury, Trowbridge, and other Market towns to develop these areas, with the purpose of ensuring the delivery of houses in Wiltshire's three Market Town areas for the period up to 2026. I strongly object to ANY changes within Warminster to the existing settlement boundaries, and further allocation of new sites for housing, as the selection of sites is not sound.</p> <p>The proposed plan is NOT sound, and I object strongly for the following reasons:</p> <p>Environment and character of the area</p> <p>The proposed change to the settlement boundary at Home farm is a particularly baffling suggestion. This site has already been rejected by the planning inspector, for a great number of reasons, one of which was due the character of the area, the following was stated by the planning inspector</p> <p>"I saw that the land mostly comprises arable fields, with similar fields to the north, together with a few cottages and other houses (some set in trees) and bounded by lanes or roads, to the east, west and south. Although there is urban development immediately to the west (across Grange Lane), the area has a pleasant and obviously rural appearance and is very much on the edge of Warminster. From my observations from local footpaths to the north, west and east of the area and from Battlesbury Hill I consider that the land relates well in visual terms to the open countryside to the north and east, forming an integral part of the countryside east of the town. I accept that a high stone wall and cottages fronting Boreham Road impact on any meaningful visual relationship with the countryside to the south, other than when seen from the Hill top. However, in view of the open-ness of the land and its linkage with other open land to the east and north (and especially Battlesbury Hill), I consider that the town policy limit hereabouts should be drawn along the eastern edge of the denser development fronting The Dene, St George' Close and (the southern part of) Grange Lane."</p> <p>The character of the area has not changed and these comments are still valid.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Infrastructure</p> <p>The plan has not considered the effect on Warminster's current infrastructure, which is struggling in many areas, for example one of our Doctors' surgeries has recently closed, and it is extremely difficult to get an appointment to see a doctor. This is not the only problematic area, there are many more including (but not limited to) Parking and Education.</p> <p>The plan only increases the number of houses, and makes no provision for increasing or upgrading the infrastructure of the individual areas. Relying on all residents travelling across the town to use a single service only increases the pressure on roads, and discourages people from walking or cycling. No provision is made for local employment in the plan, and the large employment areas of Bath, and Trowbridge will increase the pressure on roads further still. Currently we have problems in the very narrow streets on the B3414 near the centre of Town.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Flooding                  Warminster has a great number of flooding problems at the moment, and it seems that nobody is willing to accept responsibility for managing it. This needs good sound solution to this problem.                  Home Farm is very wet during periods of heavy rain, and usually has a large pond on it during the winter period. Grange Lane floods regularly. There was a period last year when the Post Office was refusing to deliver letters to some of the properties. Clearly Home Farm is a run off area for water off the high ground to the North of it, and if it were developed the flooding issues will only become worse, with the development potentially increasing the flood risk to existing properties. Boreham Road regularly floods, and with more run off this will become worse.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Site Access</p> <p>The proposed site access is onto Boreham Road. I consider this to be very dangerous. As a resident of Grange Lane, I know how dangerous and difficult it is currently to exit the lane safely due to the fast movement of traffic in this area including around the proposed entrance area. Having the entrance to the site to the south when the main housing development area is to the north also seems contrary and only inviting further applications for development the south of the area. If you must develop this area, why not consider an entrance directly from the roads near the north of the site of Woodcock Road.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Justification The increase in the allocation seems to be made as a contingency plan to the existing sound, and well considered delivery plan failing to meet the requirements for the 2026 figures. It seems an overreaction to change settlement boundaries, encouraging development of green field sites when the chances are that the existing plan will deliver the required housing and infrastructure that is required for this housing. The existing site at the West Urban Extension could have its allocation increased to cover this shortfall, and this way all of the issues regarding infrastructure etc will not pose problems. The sound existing plan for the West Urban extension, which was subject to careful consideration to deliver the housing to 2026 was considered sound by a planning inspector previously. Whilst we have some concerns about the negative impact of further development on the West side of town, this has the support of local councilors and as they have been recently reelected, presumably the local population there.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Consistency The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA), thereby managing and reducing risk of flooding throughout Wiltshire. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages. This omission may open up the threat of judicial review should the plan progress as it stands. In summary, I strongly object to any change to the housing numbers and settlement boundaries in Warminster, and want my letter to be brought to the attention of the Planning Inspector's examination currently scheduled for Spring 2018.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.12		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>No evidence of housing need for Yatton Keynell                  The proposal for 30 houses on land east of Farrells Field has been put forward at County level in order to meet the County's strategic housing requirements for the Chippenham remainder area. The site allocation for 30 houses in Yatton Keynell is not based on any evidence that there is a specific local housing need in Yatton Keynell. Appendix E of the Chippenham Community Area topic paper, confirms that no local housing needs survey was undertaken as part of the draft Plan. The proposed dwellings should be justified with evidence that there is a specific local need and the plan should confirm how that need will be met.</p> <p>In light of the above the plan is unsound, it not justified and is not consistent with national policy set out in paragraph 158 of the NPPF which states:                  'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local Planning Authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals'.                  Absence of a Neighbourhood Plan                  Of the five large villages within the Chippenham Community Area, Yatton Keynell is the only village without a Neighbourhood Plan. It is acknowledged that delivery of housing supply through a community led Neighbourhood Plan offers a positive and proactive approach to delivering housing need rather than a site selection process which is only put forward by landowners.                  The local Ward Councillor called for a Neighbourhood Plan to be made at a Parish Council meeting back in November 2014 (copy of minutes attached). This was suggested in response to specific concerns that were raised by the community in relation to the proposal for development of land adjacent to Farrells Field. The Parish Council have not addressed this request.                  Notes from the minutes to November 2014 (extract)                  'Cllr. Scott advised that Yatton Keynell should look into setting up a neighbourhood plan, which allows people in the village more of a say as to what they want in terms of any developments that may be proposed'. (extract)                  'The proposed land is just outside the village boundary for Yatton Keynell, and unless the village see it a necessity the council favours objecting to the development'. (extract)                  In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:                  'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be engaged in a proactive way, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.                  Site selection process unsound</p>				

Appendix Q - Schedule of representations

	<p>Para 5.13 of the Chippenham Community Area Remainder Topic Paper – June 2017 states that the village of Sutton Benger which has an identified a housing need, was discounted as a village which could accommodate additional housing growth. The Plan states that the village primary school cannot accommodate growth and therefore the village cannot accommodate more housing. The exclusion of the village from the housing allocation plan seems unjustified as the plan should consider all housing types not just those for families. Just because the school is full that doesn't exclude new housing being delivered for elderly, and people without children (flats starter homes). If some additional housing was accepted in Sutton Benger it might reduce the overall need for housing which has been identified in the other larger villages where there is considered no housing need.</p> <p>The village of Yatton Keynell which has no evidence of identified housing need (this is minutes in Parish Council Meeting minutes November 2014), and no Neighbourhood plan has been identified for having a significant proportion of the 138 dwellings needed to meet the Chippenham Area Strategic housing target.</p> <p>The housing sites selection process is contrary to Para 159 of the NPPF. It states:          'Local planning authorities should have a clear understanding of housing needs in their area. They should:          -prepare a strategic Housing Market Assessment to assess their full housing needs and .....The Strategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which ..... addresses the need for all types of housing, including affordable housing and the needs of different groups in the community such as but not limited to families with children, older people people with disabilities, service families and people wishing to build their own homes...';          Withdraw the land East of Farrells Field from the Draft Wiltshire Housing Allocation Plan and allow a Neighbourhood Plan to be prepared giving local residents an opportunity to explore other site options in a proactive way, in line with NPPF paragraph 155.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4730027</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>I am prepared to participate in an oral discussion on the unsound points if the Draft Wiltshire Housing Allocation Plan.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Lack of community engagement and poor consultation</p> <p>The draft plan process is lengthy, complicated and difficult for the public to become engaged with. The planning process which has taken place and resulted in the Farrells Field site being put forward for housing, has not been meaningful, as it has not provided opportunity for the local community to comment on or consider alternative sites. The Parish Council have not engaged in the plan process or adequately represented the views of the local people in response to the proposal being put forward.</p> <p>I consider the proposed allocation for such a large site which will have such a significant impact on the community in yatton Keynell should be the subject of more meaningful consultation process by means of a Neighbourhood Plan.</p> <p>It is my understanding (from P61 of the Chippenham Community Area Remainder Topic Paper) that of the five large villages identified as part of the Chippenham remaining area, none of the Parish Council's responded to the Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement. It states in para 2.23:</p> <p>'Town and parish councils are the most local tier of democratic representation and, as such, they provide a key link with local communities. They are a specific consultation body under the Town and Country Planning (Local Planning) (England) Regulations 2012. Regulation 18 requires that Wiltshire Council has to consult with specific consultation bodies which they consider may have an interest in the subject. Wiltshire Council is committed to continuing to consult with the local councils'.</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p> <p>'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be proactively engaged, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <p>Withdraw the land East of Farrells Field from the Draft Wiltshire Housing Allocation Plan and allow a Neighbourhood Plan to be prepared giving local residents an opportunity to explore other site options in a proactive way, in line with NPPF paragraph 155.</p> <p>I am prepared to participate in an oral discussion on the unsound points if the Draft Wiltshire Housing Allocation Plan.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.3			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Salisbury Sites – impact on A36</p> <p>There are 740 dwellings proposed on Netherhampton Road. Of these, 640 are identified for land at H3.1 Netherhampton Road, Salisbury' and 100 on land 'H3.3 North of Netherhampton Road'. Policy H3.1 requires "Transport network improvements necessary to accommodate the scale of development envisaged". There is no equivalent Policy quoted for site H3.3. and it is the view of Highways England that both should be subject to the same requirement.</p> <p>There are other sites in villages to the north and south of the A36 as it passes through Wiltshire. Though these sites are mostly small in nature, the cumulative impact would add to the traffic to the A36 and this impact on the operational performance is not known. For example, there are 200 dwellings proposed in the Warminster area. This will need consideration in development of the evidence base.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2513</a>	<b>Consultee</b> Rachel Sandy Asset Manager South West  Highways Agency  <b>Person ID:</b> 903251	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>		
				<b>Do you consider the draft WHSAP is sound?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.12					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Chippenham sites - impact on M4 junction 17  The Plan introduces three other allocations in the vicinity of M4 junction 17 which were not included in the Chippenham Site Allocations Plan. These are at Hullavington (50 dwellings), Yatton Keynell (30 dwellings), and Crudwell (50 dwellings). There is no transport evidence to show that these sites would or would not impact on the SRN.  Transport Evidence Base  Wiltshire Council is currently in the process of developing the transport evidence base to support the development set out in the DPD. However, until that work is complete, Highways England is unable to confirm the scale or cost of the necessary highway interventions, or whether all parts of the Strategic Road network likely to be impacted by the development included in the Plan have been identified.  As recorded in the 'Consultation statement - Annex A: Report on the regulation 18 consultation June 2017' on the Plan, Highways England is committed to assisting Wiltshire Council with the production of a Transport Evidence Base. This may include the use of a number of Highways England transport models. These include a new VISSIM model of A36 between College Roundabout and Petersfinger, which, could be used to test the impact of the Netherhampton sites on A36 College roundabout and the already congested section to the east of that junction. Our current work on the A36 has two objectives, to understand what improvement options there are to help improve its current performance and operation, and to understand the impact of growth and how this might be safely accommodated.  Highways England will continue to work with Wiltshire Council to determine whether the impact of any of these sites is likely to have a material impact.  The work to assess infrastructure requirements for the Strategic Road Network is currently ongoing. This is being led by Wiltshire Council in consultation with Highways England. It is envisaged that infrastructure requirements will have been assessed by the time of the examination and Highways England will be willing to assist the inspector at that time to report on any residual implications for the Strategic Road network as may arise due to the Plan.  What modifications are necessary?  The need for any modifications to the plan will not be established until the transport evidence base has been completed.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>No evidence of housing need for Yatton Keynell                      The proposal for 30 houses on land east of Farrells Field has been put forward at County level in order to meet the County's strategic housing requirements for the Chippenham remainder area. The site allocation for 30 houses in Yatton Keynell is not based on any evidence that there is a specific local housing need in Yatton Keynell. Appendix E of the Chippenham Community Area topic paper, confirms that no local housing needs survey was undertaken as part of the draft Plan. The proposed dwellings should be justified with evidence that there is a specific local need and the plan should confirm how that need will be met.</p> <p>In light of the above the plan is unsound, it not justified and is not consistent with national policy set out in paragraph 158 of the NPPF which states:                      'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local Planning Authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals'.                      Absence of a Neighbourhood Plan                      Of the five large villages within the Chippenham Community Area, Yatton Keynell is the only village without a Neighbourhood Plan. It is acknowledged that delivery of housing supply through a community led Neighbourhood Plan offers a positive and proactive approach to delivering housing need rather than a site selection process which is only put forward by landowners.                      The local Ward Councillor called for a Neighbourhood Plan to be made at a Parish Council meeting back in November 2014 (copy of minutes attached). This was suggested in response to specific concerns that were raised by the community in relation to the proposal for development of land adjacent to Farrells Field. The Parish Council have not addressed this request.                      Notes from the minutes to November 2014 (extract)</p> <p>'Cllr. Scott advised that Yatton Keynell should look into setting up a neighbourhood plan, which allows people in the village more of a say as to what they want in terms of any developments that may be proposed'. (extract)                      'The proposed land is just outside the village boundary for Yatton Keynell, and unless the village see it a necessity the council favours objecting to the development'. (extract)</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:                      'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be engaged in a proactive way, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.                      Site selection process unsound</p>			

Appendix Q - Schedule of representations

	<p>Para 5.13 of the Chippenham Community Area Remainder Topic Paper – June 2017 states that the village of Sutton Benger which has an identified a housing need, was discounted as a village which could accommodate additional housing growth. The Plan states that the village primary school cannot accommodate growth and therefore the village cannot accommodate more housing. The exclusion of the village from the housing allocation plan seems unjustified as the plan should consider all housing types not just those for families. Just because the school is full that doesn't exclude new housing being delivered for elderly, and people without children (flats starter homes). If some additional housing was accepted in Sutton Benger it might reduce the overall need for housing which has been identified in the other larger villages where there is considered no housing need.</p> <p>The village of Yatton Keynell which has no evidence of identified housing need (this is minutes in Parish Council Meeting minutes November 2014), and no Neighbourhood plan has been identified for having a significant proportion of the 138 dwellings needed to meet the Chippenham Area Strategic housing target.</p> <p>The housing sites selection process is contrary to Para 159 of the NPPF. It states:          'Local planning authorities should have a clear understanding of housing needs in their area. They should:          -prepare a strategic Housing Market Assessment to assess their full housing needs and .....The Strategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which ..... addresses the need for all types of housing, including affordable housing and the needs of different groups in the community such as but not limited to families with children, older people people with disabilities, service families and people wishing to build their own homes...';          Withdraw the land East of Farrells Field from the Draft Wiltshire Housing Allocation Plan and allow a Neighbourhood Plan to be prepared giving local residents an opportunity to explore other site options in a proactive way, in line with NPPF paragraph 155.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Lack of community engagement and poor consultation</p> <p>The draft plan process is lengthy, complicated and difficult for the public to become engaged with. The planning process which has taken place and resulted in the Farrells Field site being put forward for housing, has not been meaningful, as it has not provided opportunity for the local community to comment on or consider alternative sites. The Parish Council have not engaged in the plan process or adequately represented the views of the local people in response to the proposal being put forward.</p> <p>I consider the proposed allocation for such a large site which will have such a significant impact on the community in yatton Keynell should be the subject of more meaningful consultation process by means of a Neighbourhood Plan.</p> <p>It is my understanding (from P61 of the Chippenham Community Area Remainder Topic Paper) that of the five large villages identified as part of the Chippenham remaining area, none of the Parish Council's responded to the Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement. It states in para 2.23:</p> <p>'Town and parish councils are the most local tier of democratic representation and, as such, they provide a key link with local communities. They are a specific consultation body under the Town and Country Planning (Local Planning) (England) Regulations 2012. Regulation 18 requires that Wiltshire Council has to consult with specific consultation bodies which they consider may have an interest in the subject. Wiltshire Council is committed to continuing to consult with the local councils'.</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p> <p>'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be proactively engaged, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <p>Withdraw the land East of Farrells Field from the Draft Wiltshire Housing Allocation Plan and allow a Neighbourhood Plan to be prepared giving local residents an opportunity to explore other site options in a proactive way, in line with NPPF paragraph 155.</p> <p>I am prepared to participate in an oral discussion on the unsound points if the Draft Wiltshire Housing Allocation Plan.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2518</a>	<b>Consultee</b> Mike and Annie Smith  <b>Person ID:</b> 1133304	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. We wish to submit comment on the Draft Wiltshire Housing Site Allocations Plan, which has been issued recently by Wiltshire Council for consultation; specifically that part concerning the proposed allocation of 50 dwellings to the Ridgeway Farm development in Crudwell. We believe that this allocation is unjustified and unnecessary; furthermore we believe that it is undeliverable, counter to the needs and expressed wishes and desires of the villagers of Crudwell, and prejudices the village's development of a more reasonable and sensible Neighbourhood Plan. Unjustified and Unnecessary</p> <p>2. Wiltshire's Core Strategy Policy document explains a housing requirement for 42,000 new dwellings across the county in the period 2006-2026, of which 24,740 are required in the North and North West Wilts Housing Market Area (HMA). The Plan details [Figure 11 of Appendix 1 to the Draft Wiltshire Housing Site Allocations Plan] the 12,603 completions that have been achieved in this HMA by March 2017 and identifies a further 11,566 commitments being achieved by 2026; for a total of 24,169. With an estimated additional "Windfall Allowance" of 2,086, the forecast total of 26,255 dwellings already greatly exceeds the established housing requirement in this North and North West Wilts HMA, by some 1,515.</p> <p>3. The Plan's proposed allocation of some 1,195 additional dwellings to this HMA simply increases the oversupply to some 2,710.</p> <p>4. Looking specifically at the Malmesbury Community Area (of which Crudwell is a part), the corresponding housing requirement [Figure 14 of Appendix 1 to the Draft Wiltshire Housing Site Allocations Plan] of 1,395 dwellings is already more than satisfied by the total of 1,495 for Completions (896) and Commitments (599); an oversupply of 100. This is before any allowance is made for "Windfalls".</p> <p>5. The Plan and Core Strategy states that housing sites will only be allocated to Villages where there is a strategic priority to do so. Given that the Plan identifies an existing forecast oversupply of housing in the North and North Wilts Housing Market Area (oversupply by 2,710) and in the Malmesbury Community Area (by 100), and given that there is no stated strategic priority otherwise, we argue that there is simply no justification for the allocation of additional housing in Crudwell.</p> <p>8. We are not anti-development. We would wish, however, that Crudwell be given the opportunity to plan itself for its future growth via an emerging Neighbourhood Plan; rather than have an unjustified and unnecessary allocation imposed on it, for a most unsuitable site.</p> <p>9. Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on genuine needs and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and in the meantime there should be no unnecessary allocation of one site for what is a very substantial and, we believe, disproportionate development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Unwanted</p> <p>6. The village of Crudwell currently has some 260 dwellings [NOMIS data as at 2011]. The proposed allocation of 50 additional dwellings represents an increase approaching some 20%. This increase is significantly greater than for most other villages in the County, and has not been justified by any housing needs surveys in the village, nor does it improve employment opportunities or services to the village. We are not against development in Crudwell, but we are very greatly concerned by the scale of this proposed allocation, its particular location and the likely adverse impact on the infrastructure of the village.</p> <p>8. We are not anti-development. We would wish, however, that Crudwell be given the opportunity to plan itself for its future growth via an emerging Neighbourhood Plan; rather than have an unjustified and unnecessary allocation imposed on it, for a most unsuitable site.</p> <p>9. Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on genuine needs and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Undeliverable</p> <p>7. Careful examination of any proposals to build a further 40 houses on the Ridgeway Farm site (10 houses are already under construction, and we welcome these) will reveal significant local concerns about: Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following periods of sustained heavy downpours falling on already sodden ground. The surface water systems are already operating at maximum capacity. Unless significant additional investment is made in increasing the drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.</p> <p>8. We are not anti-development. We would wish, however, that Crudwell be given the opportunity to plan itself for its future growth via an emerging Neighbourhood Plan; rather than have an unjustified and unnecessary allocation imposed on it, for a most unsuitable site.</p> <p>9. Careful examination of any proposals to build a further 40 houses on the Ridgeway Farm site (10 houses are already under construction, and we welcome these) will reveal significant local concerns about: Crudwell Primary School is already greatly oversubscribed. Its classrooms, assembly hall and kitchens are already operating at maximum capacity. Forty additional homes will inevitably require the provision of at least one additional classroom, and unless the hall is extended, would prevent assembly of the whole school. The site is constrained; it lies in a conservation area, the building is listed and additional buildings could be accommodated only at the expense of encroaching into their playing fields. The school governors do not support further growth and have raised concerns about already over-crowded parking around the school. The school's ability to expand is not guaranteed.</p> <p>8. We are not anti-development. We would wish, however, that Crudwell be given the opportunity to plan itself for its future growth via an emerging Neighbourhood Plan; rather than have an unjustified and unnecessary allocation imposed on it, for a most unsuitable site.</p> <p>9. Careful examination of any proposals to build a further 40 houses on the Ridgeway Farm site (10 houses are already under construction, and we welcome these) will reveal significant local concerns about: Increased traffic using Tetbury Lane. The proposed site is accessed from Tetbury Lane, which is a narrow country lane with few stretches of pavement (and few opportunities to put in a pavement), and is used by many heavy vehicles and wide farm vehicles. The prospect of increased traffic movements, combined with increased numbers of pedestrians accessing the school and other facilities in the village give rise to serious road safety concerns.</p> <p>8. We are not anti-development. We would wish, however, that Crudwell be given the opportunity to plan itself for its future growth via an emerging Neighbourhood Plan; rather than have an unjustified and unnecessary allocation imposed on it, for a most unsuitable site.</p> <p>9. <b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We have lived in Crudwell for more than 30 years and would like to give our views on the proposed development of Ridgeway Farm, Tetbury Lane, Crudwell.</p> <p><b>Traffic</b> Tetbury Lane between the new site and the A429 has restricted width in several places, even cars cannot pass safely. When articulated lorries use this route it is impossible to pass. The road from the site towards Long Newton is even worse. The view from the junction of Tetbury Lane and the A429 turning towards Malmesbury has a very restricted view due to parked in the adjacent layby. There will no doubt be an accident on these two roads. There will also be increase noise and pollution.</p> <p>The main road which is the main route to the school is busy with vehicles usually travelling above the speed limit and the footpath near the school is very narrow. This encourages (rightly so for safety of children) to drive to the school, resulting in severe congestion around the school. Additionally children going to the school will make the situation worse.</p> <p>There are no employment vacancies in the village so where are the additional residents going to work? Obviously not in the village this will increase traffic and have an impact as described in points (Traffic, School).</p> <p><b>Public Transport</b> As with many other villages in Wiltshire the public transport service is minimal and inadequate for residents looking for work/shopping in local towns.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2524</a>	<b>Consultee</b> Mr R Clarke  <b>Person ID:</b> 836764	<b>Agent</b> Jeremy Flawn Bluestone Planning  <b>Person ID:</b> 836762	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Legal Compliance and Soundness</p> <p>Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment and the Environmental Assessment of Plans and Programmes Regulations 2004 (SI 2004 No. 1633) require the consideration of 'Reasonable Alternatives' in determining which sites to allocate in a Plan.</p> <p>In this case land to the south of Westbury Leigh (see enclosed Land Registry plans) is demonstrably a reasonable alternative to those considered by the Council and should have been allocated. This omission means that the Plan is legally non-compliant and it is not sound because it is not the most appropriate strategy when considered against reasonable alternatives.</p> <p>To remedy this significant flaw in the process, the Council must re-consider its approach to meeting the needs of the Westbury Community Area, including the assessment of land south of Westbury Leigh as a reasonable alternative to the options already identified and assessed. The consideration of this land should result in the allocation of this site for residential development, because it is consistent with the Council's settlement hierarchy (which identifies Westbury as a Market Town) and consistent with the principles of sustainable development.</p> <p>In addition to the above concerns, the Plan is also considered to be unsound because it fails to properly consider the most sustainable approach to meeting the objectively assessed needs of the Westbury Community Area (CA). In seeking to allocate only one residential site on the edge of a Large Village, the Plan is failing to provide for sufficient capacity at the main Market Town in the CA, thus undermining the delivery of the Plan's strategy and putting at risk the proposals to meet the Planning Authority's and the CA's objectively assessed needs.</p> <p>In order to remedy this failing, the Plan should provide for the allocation of additional sites, to ensure that the Plan is based upon a strategy that is capable of meeting objectively assessed needs of the Plan area and the CA of Westbury. Land to the south of Westbury Leigh should be allocated as a housing allocation in order to assist in meeting the objectively assessed needs.</p> <p>Land to the south of Westbury Leigh is available, deliverable, benefits from an enclosed landscape setting and lies immediately adjacent to the urban area (see enclosed plans). It is a defensible site which can be assimilated well into the edge of the settlement with appropriate landscaping. Access to the site is via Westbury Leigh, and although there is a slope across the site it is not considered to be a constraint to development. Part of the site is also proposed to be included within the settlement boundary following the granting of planning permission for residential development (in the north east part of land parcel WT219265).</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Please find enclosed my Pre-submission Representation Form duly completed with the particulars set out on Continuation sheets and with supporting documents and photographs attached. I was unable to email the whole document because of the attachments and therefore deliver the letter direct to the Spatial Planning Team within the deadline of 5pm 22nd September.</p> <p>This is made on my own behalf and not in my capacity as a Parish Councillor in Bratton and Vice Chair. It is made by me and my 3 adult children named on the Form. If my late husband James Ward were alive he would join in also, I mention this as he too would be most upset to be involved in this process of proving that what we had spent 18 years together (to 2012) hands-on building and renovating Grange Farm including the garden now has the garden designated "open countryside" for "up to date" Settlement Boundary purposes, wholly ignoring the development and changes which have taken place years before and the circumstances on the ground and the other factors set out in the enclosed. What is an administrative process to Wiltshire Council has an unforeseen consequence on me, as my husband cannot enjoy the house or "garden" as he was shot in Devizes in July 2012, and died 3 weeks later, and thus preparing this paper is too close to the bone. I do appreciate that this has no bearing on the process. I am also very grateful for the help which the Spatial planning officers have given me in relation to the process.</p> <p>Representation on the Wiltshire Housing Site Allocations Plan Pre-submission Document.. (Continuation sheets)                  Policy: 1.1 of the PLAN. (Settlement boundary review).                  Paragraph: 3 of the Westbury Community Area Topic Paper, Settlement Boundary Review, page 6, and                  Table: Appendix A.2 Bratton plan on page 24 and explanations on page 23 of Proposed Amendments to Bratton Settlement Boundary                  Figure: n/a                  Site: n/a                  Other: n/a</p> <p>This representation is made by Nicola Morris of Grange Farm, 61 Lower Road, Bratton Westbury BA13 4RQ and supported by Louise Morris, Alexander Morris and Pippa Morris.</p> <p>This representation relates to the Settlement Boundary Review of the Plan. The Representation relates to the changes made to the Settlement Boundaries which affect my property because it is located at the northern boundary of Bratton village.</p> <p>My Case/Representation:                  The Boundary Settlement lines on the Pre-submission Draft Settlement Boundary Plan for Bratton have been reviewed and revised at Grange Farm but NOT in accordance with the Objects, policies and the methodology of the Plan nor of the WCS but in breach of these and the changes are opposed. The proposed alternative is set out and shown on Plan 1                  The Wiltshire Core Strategy is referred to as "WCS".                  The Wiltshire Housing Site Allocations Plan is referred to as "the Plan".                  The Settlement Boundary Review Methodology, Topic Paper 1 is referred to as "Topic Paper 1".</p>				

#### Appendix Q - Schedule of representations

"Plan 1" is the enclosed Plan marked Plan 1, large scaled map of the north west section of Bratton.

The Red Line means the line of the proposed settlement boundary proposed by Wiltshire Council in the Draft Plan, marked in red on Plan 1.

The Blue Line is the line of the development boundary set previously by the West Wiltshire District Plan and under review, marked in blue on Plan 1.

The Green Line (marked on Plan 1) is the proposed Line which I claim should be set as the line of the Settlement Boundary at Grange Farm.

NOTE: The Bratton Plan & explanation page for the Settlement Review of boundaries is contained in the Westbury Community Area Topic Paper, Appendix A, at Table A.2 on pages 23 and 24.

The Policies, paragraphs and other details are set out in this representation clearly throughout the representation and are set out at the end section.

Particulars of incorrect proposal of boundary changes:

Table A.2 BRATTON in the Appendix of the Westbury Community Topic Paper. Map Grid Reference: G5

Description: "Amend boundary .....and to remove area of land more closely related to the open countryside".

An inspection of this plan shows that the Red Line for the Draft proposed new boundary at Grange Farm has been brought in towards (that is reduced) to remove an area of established garden adjacent to a residential dwelling and to follow the features of walls within the Property which are not walls for boundary purposes but garden features.

The Red Line has not been moved to the established physical boundary of the curtilage and the fence /hedge line in line with the physical features of the Property and in line with the Draft Plan northern Settlement Boundary of the Village at its northern boundary.

This representation and objection requires the Pre-submission Draft Plan for Bratton to be reviewed so that

The Settlement Boundary at the property is revised and extended (enlarged) to the existing physical northern garden boundary established in 1995 shown by the Green Line on Plan 1.

Where the above is not accepted, the Settlement Boundary at the property must be drawn to adequately and properly reflect the changes and circumstances on the ground and the establishment of the garden commenced in 1995 and established by 1999so that it is not necessary to make a change to the Settlement Boundary line at the Property and the Blue Line should remain and the Draft Plan's Red Line should be deleted, and

In all cases the proposed Draft Red Line sets an impermanent and unacceptable new Settlement Boundary for Bratton at this property, is in breach of the WCS, the Plan and the methodology of setting Settlement Boundaries and should not apply.

The correct categorisation should be: "The curtilage of a property that relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in the terms of the scale and location".

The "area of land" referred to at Map Grid Reference G5 on Table A.2 is a part of the garden, the central area of lawn, hedge, flower beds and rose garden of my property. The Property is Grange Farm, 61 Lower Road, Bratton, Westbury BA13 4RQ. This is a single residential house, previously a farmhouse until the purchase with my late husband James Ward on 21 December 1994. It is a Grade II Listed Building. The house dates from the 16th century and was gentrified in 1739 by the addition of its Georgian facade.

At the end of this representation I have set out the sections of policies which are relevant and apply to the Settlement Boundary review process from the WCS and Topic Paper 1., and other relevant documents of Wiltshire Council.

Grounds for representation: Not sound.

Looking at the Representation guidance for representations, the proposed changes to the Settlement boundary is not sound. To be sound:-

The Plan must be sound, meaning it must be positively prepared, ie based on a strategy which seeks to meet objectively assessed development & infrastructure requirements; it must be justified ie: it should be the most appropriate strategy, (when considered against the reasonable alternatives, based on proportionate evidence); it must be effective ie deliverable over its period, and it must be consistent with national policy. A critical part of the effectiveness and deliverability of the housing and housing numbers in Wiltshire under the WCS and through the Plan is (where necessary) the reviewing, revising, placing and siting of each boundary line of each settlement and, it follows, the correct interpretation of policy and methodology and the correct executing of the methodology for reviewing, revising and amending the boundary lines shown on the Policies Maps. Errors and breaches over the policy and methodology in relation to the boundary lines mean the Plan is not sound.

In support of my case I attach:

Appendix Q - Schedule of representations

1(A). Plan marked "PLAN 1": A large scale map provided by the Council for this purpose of the immediate area with the existing blue line of the development boundary as presently fixed under the West Wiltshire District Council plan marked in blue, (the Blue Line) the proposed Draft Plan new Settlement Boundary red line marked in red (the Red Line) and the curtilage line of the property for the revised Settlement Boundary set out in this objection marked by a green line (the Green Line)

1(B). AERIAL PHOTOGRAPH to supplement Plan 1 showing the Red Line, the Blue Line and the Green Line, photo taken from South towards the North, Grange Farm to left and Yew Tree House to right, agricultural field to the North.

2. "Planning Permission" Plan from the planning permission W95/0562 granted on 17 April 1996 for the change of use of the whole curtilage of the property from agricultural use to domestic curtilage and new vehicle access on to the Trowbridge road

3. 2 Land registry plans showing the full extent of the curtilage of Grange Farm, house purchased 21 December 1994 and access land purchased 5 April 1995.

4. Aerial photograph of Grange Farm in its setting taken April 1966.

5. 5 x O.S. Maps dated 1887, 1901, 1924, 1978-79 and 1924 to show extent of the built up farm buildings.

6. Layout Plan of 18.07.1991 of the Planning Permission of adjacent Grange Court ref W93/0992 (site of the two houses subsequently altered and access through to Grange Farm removed.

7. Site Plan of Grange Court development of 1993 to show the built up extent of agricultural buildings to rear of House and proposed access way and parking for Grange farm House to east side.

8. Photographs itemised on attached list.

Explanation provided in Table A.2 for the change and review:  
The explanation for the removal of this part of the garden in Table A.2 is given as: "Amend boundary .....and to remove area of land more closely related to the open countryside".

**FIRST OBJECTION**

Incorrect categorisation to the area as it is a garden not open countryside.

This categorisation of open countryside is clearly wrong. The area is not open countryside but a garden. The reviewing process by the Council has failed to note the establishment of a garden, established under a planning permission for change of use. The changes were made between 1995 and 1999 with the garden in its present form by 1999, some 18 years ago. This is beyond any doubt a garden and one which must be included within the Settlement Boundary. There must have been a failure by the council to note the changes which have happened and the circumstances on the ground have excluded the garden as an area of land more closely related to the countryside. The methodology has not been applied properly or consistently. Referring to the policy to establish this objection:  
Topic Paper 1 clearly sets out the policy for gardens which are to be included within the Settlement Boundaries:  
"Areas which have been included are:  
"The curtilage of a property that relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in the terms of the scale and location".  
Further:  
Areas excluded are:  
" the extended curtilage of a property that relates more closely to the open countryside (e.g a field or paddock) or has the capacity to substantially extend the built form of the settlement in terms of scale and location".  
2 Grange Court, (1994 house to the west of the garden) and the adjacent 1 Grange Court (1995 house built to the rear and west side of Grange Farm) have gardens abutting this garden and windows overlooking the garden. They do not overlook the open countryside, which is clearly the field to the north. Nor do they overlook a field or paddock. They overlook our lawn and garden.  
In particular, included in the same Map Grid reference " box" on Table A.2 for Bratton is the entry for Yew Tree House situated in HS adjacent to Grange Farm in GS. This Georgian House has a large garden which abuts the garden of Grange Farm on its western boundary at one point and is separated by a ditch and some trees (Grange Farm's eastern boundary). The entire garden of Yew Tree House is included in the Draft Plan right up to the northern boundary of its garden in line with the main field boundary, whereas before the West Wiltshire District Council

Appendix Q - Schedule of representations

line ran very close to the rear of the house. The explanation given for the proposed amendment is "amend boundary to include the curtilages of the properties that relate more closely to the built environment". This is a very large garden and certainly one which should be included as a whole. It is larger than the garden of Grange Farm which has been developed in the "rump" of the farmyards and housing development over time.

**CONSISTENCY:**

The entire garden of Yew Tree House has been included as a curtilage of a property that relates closely to the built environment. The policy must be interpreted consistently county-wide.

The Plan paragraph 2.11, stipulates:

"2.11 An objective of the Plan is therefore to review and update existing settlement boundaries to ensure they are up-to-date and accurately reflect circumstances on the ground, derived on a consistent county-wide basis...."

On this policy and methodology the entire garden of Grange Farm should be included as a whole within the settlement boundary, as shown by the GREEN LINE on Plan 1 on the basis:

"to include the curtilage of a property that relates more closely to the built environment"

In addition this enlargement will mean that together with the extension /inclusions of the garden of Yew Tree House and the gardens of the other houses and bungalows along Lower Road right up to the northern field boundary of the village there will be conformity for the village's northern boundary and the village setting.

These points also apply through the Second and Third Objection below dealing with the "built form" or "built environment".

**SECOND OBJECTION** to the new proposed settlement boundary in the Draft Plan (The Red Line on Plan 1) and removal of part of the garden - The new physical boundary chosen (the Red Line) is in breach of policy and correct methodology.

Topic Paper 1 states that first and foremost

"The settlement boundaries define the built form of the settlement by, where practicable, following but not including clearly defined physical features, such as walls, fences, hedgerows, roads and water courses."

Under Paragraph 1.1 of the Plan, Settlement Boundaries must only be revised "where necessary". It must be the case that on the Review the Blue Line was found wanting as it does not follow a physical boundary on the ground at all points. If this was not found to be necessary the Blue Line should remain unchanged.

The boundary has been moved to the Red Line and I contest the boundary Red Line chosen by the Council.

Please see Photographs showing the effect of the new Red Line in the area at the back of the house in particular the patio and to the eastern side of the house adjacent to 59 Lower Road.

To define the built form the RED LINE boundary has not been moved outwards to the 1995 physical boundary and curtilage of the property, which is the fence and hedge line.

Rather, to define the built form, ("where practicable"), the RED LINE boundary has been

brought in by utilising the more recently constructed hard physical landscaping structures in the garden by the back of the house, in particular of the flower beds and patio which we laid out and its low dwarf walls which we built and were in place by 1997/8.

These dwarf walls are not permanent features and can be moved or removed at any time. They provide no certainty for the future. They are internal decorations. It cannot be in accordance with the Plan that when referring to clearly defined physical boundaries such as "walls", the Council means these dwarf patio walls. They are not an acceptable physical feature for the Council to be using as a "planning tool" for where development will take place.

In the Plan Paragraph 2.11 it states that: "In simple terms, they are the dividing line, or boundary between areas of built/ urban development (the settlement) and non- urban or rural development - the countryside." Clearly this is not the case here. On one side there are herbs and flowers and on the other side of the dwarf wall there are roses and flowers. Both sides are built settlement.

Under the policy, the physical feature itself is not within the settlement and so to follow it to the logical conclusion, the small herb bed within the dwarf wall will be within the Settlement Boundary of Bratton, but the dwarf wall itself will not be.

Appendix Q - Schedule of representations

THIRD OBJECTION to the new Red Line boundary and the removal of the Garden: The Red Line breaches the policy as the area to the north of the Red Line, Map Grid

Reference GS is within the extent of the built settlement/ built environment/built form and is not the countryside.

Grange Farm, its farmhouse and farm yards (previously known as Bratton Farm) and its buildings and barns to the left (west), rear (north) and right hand side ( east) and immediate yards and orchards are one of the oldest and earliest areas of settlement and development in Bratton. For hundreds of years the farmhouse was the settlement.

The proposed Red Line would mean that Grange Farm will have a built form, a rear garden which is part of the built environment to a distance of no more than 8.2 metres from its back wall and back door before it comes to a point designated by the Council as the "open countryside".

The new Red Line boundary will mean that the built form at the back of the house is:

- \*A minimal area between the most western stretch of the back wall (4 storeys high from its cellar door) of the house and the side wall of the immediate garage of 2 Grange Court; and
- \*An area of patio which is 8.2 metres from the back door and back wall of the house.
- \*nothing else.

As for the eastern side of the house, the settlement boundary excludes the small lawn and rose garden, and the wall used for the boundary at this point is not even at a point beyond the back wall of the house, but within it. It is 1.4 metres from the north east corner of the house corner, and to emphasise, the garden paths, flower beds and lawn are excluded from the settlement and the countryside is 1.4 metres from the side wall of the house. The physical brick wall separating Grange Farm and 59 Lower Road relevant to this part of the garden is not used to include this portion of the garden, although it was used by the West Wiltshire District Council for the Blue Line and it is now used by the Council as the physical boundary for 59 Lower Road to extend that neighbouring garden of 59 Lower Road northwards (to include its whole curtilage) to the shared back boundary.

This type of fixing of a boundary was one of the ones heavily criticized during the consultation process.

As already set out above, at Yew Tree House the opposite methodology has been used. The whole garden has been included within the settlement boundary. This inconsistency means the methodology used for Grange Farm is so flawed as to be invalid.

The Built Form of Grange Farm:

The farmhouse area was and remains built up, previously as a farm now as a garden.

The old plans, the 1966 Photograph and the Site Plan and Development Plan of Grange Court enclosed show the density of the site, the large size and the location of the numerous buildings and yards across this corner of the village. These crossed to the rear of the farm house with some to the east. The concrete and other hardstanding passed over the whole main area to the rear of the house linking up the yards and buildings on the east side.

The old plans show that the buildings of the farm extended to the east of the present boundary with Grange Court, that is to an area directly north and to the east. In 1994 the small breeze block building on the corner with 59 Lower Road still stood.

Grange Court (2 houses, garages and gardens) passes across almost one half of the house at the back the garden and impinges on the space.

The large scale Site Plan enclosed of the Grange Court development shows the location of the barns across the rear site.

In 1994 on our purchase the rear yard to the north of Grange Farm house was made of hard standing with several buildings and foundations of buildings remaining.

This changed after we bought the property in December 1994.

Planning Permission: Reference W95/0562

Planning Permission was granted and commenced on 17 April 1996 for change of use from agricultural land to domestic curtilage and a new vehicle access off Trowbridge Road, for the whole curtilage of the property, including the house and front garden and front outbuilding.

Please see the Permission Plan showing the curtilage edged in red. The post and rail boundary fence on the northern boundary is shown clearly marked on this plan as already in place. (Installed April 1995)

The garden is very much a constructed garden, with hard landscaping of patio and low dwarf walls at the back and a side garden with wall and steps at the side. It is a built environment with 400 tons of hardcore and building material removed and the same weight of soil brought in, with levelling and planting, so that the garden is formal by the house and more countrified at its edges. This is intentional. The garden has been a garden with formal lawn since 1998-1999, over 18 years.

#### Appendix Q - Schedule of representations

The removal of agricultural buildings from farm yard sites and yards does not result in the land changing to open countryside. The result was a cleared site covered with hard surfacing and foundations, as an agricultural "brown field" site. The subsequent removal of the hard surfacing does not result in open countryside. Building of a garden does not result in the construction of buildings but the change of use to a garden is just as much a change and development. The methodology only refers to the built form, and not to actual buildings built. Indeed, Paragraph 4.13 of WCS states that the boundaries must be reviewed so that they are "up to date and adequately reflect changes which have happened since they were first established." This includes the construction of gardens.

The change has been made from land in agricultural use to land used as domestic curtilage and residential use as garden and the changes come within the policy and the Settlement Boundary should be reviewed to include the changes.

Please see photographs enclosed.

Summary: the built form of Grange Farm far exceeds the area designated by the Red Line. The Red Line breaches the objects of the Plan and its policy and has been reviewed in breach of its methodology and should be cancelled.

#### FOURTH OBJECTION

Relating to the removal of the area breaches the Plan and the extension to the established physical field boundary is in accordance with policy of the Plan.

For the Policy and methodology: See paragraph 8 of Topic Paper 1, page 23, Table 8.1 stipulates (as mentioned above)

"The settlement boundaries define the built form of the settlement by, where practicable, following but not including clearly defined physical features, such as walls, fences, hedgerows, roads and water courses."

The Property has had just such a defined physical boundary since April 1995 for over 22 years, providing clarity between the agricultural field and agricultural use to the north and to the south the domestic garden use of the Property and its vehicular accessway. The stock-proof wooden fence was erected along the most northern boundary being the GREEN LINE on PLAN 1 in April 1995, followed by the partial planting of a mixed native hedge along the inner length of the fence. This is just the type of physical boundary to which Paragraph 2.11 of the Plan relates, that is

: "in simple terms, [the boundary lines] are the dividing line, or boundary between areas of built/urban development (the settlement) and non-urban or rural development - the countryside."

#### FIFTH OBJECTION.

Relating to the grant and commencement of Planning Permissions of the whole curtilage.

Referring to the list as above in Topic Paper 1.

(b)"Areas which have been included are:

"Built and commenced development .....that is physically related to the settlement." Topic Paper 1 in paragraph 7.14 states: "..... for those planning permissions where development has commenced, there is a much greater certainty over the final built form of the development.

Therefore, the revised settlement boundary review methodology will include within the settlement boundary built or commenced planning permissions but exclude all unimplemented planning permissions."

As stated above, planning permission has been granted and commenced. It was granted on 17 April 1996 for change of use from agricultural land to domestic curtilage and the construction of a new vehicle access from Trowbridge Road, reference W95/0562. This is for the whole curtilage of the property as shown edged red on the Planning Permission plan. There is no time limit condition in the permission, it applies until another permission should take its place. The whole area has been used as domestic garden land, the garden of the house.

The access way is physically located to the settlement. It is attached to the property and it is not isolated or separated. It immediately abuts and wraps the northern boundary of the house and garden of 1 Grange Court which is part of the original built form of the Grange Farm settlement. Visually the access way at the rear may seem disjointed, but historically the house has always had access to Trowbridge and the methodology sets out that the visual nature is to be disregarded and it is the physical test that must apply.

The driveway/access way at the rear has been used regularly and often intensively during a period of approximately 12 years (1995 to 2007) with heavy machinery, lorries, JCBs, skips and vehicles whilst the house was restored, renovated and extended, and the garden was constructed and developed, and since then has been used as the only vehicular access way and place for off road parking and the keeping of

significant numbers of old bricks, tiles and other building materials (in keeping with an old property and buildings in a rural setting) for our intended construction of out buildings for garages, lawn mowers, log stores, and potting shed on the garden.

#### SIXTH OBJECTION

If Grange Farm curtilage cannot be included up to the Green line boundary in the same manner as Yew Tree House under the category of "the curtilage of a property that relates more to closely to the built environment (e.g. a garden)" then the alternative in this particular category should be applied to Grange Farm,

In other words:

"OR has limited capacity to extend the built form of the settlement in the terms of the scale and location".

I have already dealt with this category above in relation to the garden area which has been removed from the settlement boundary by the moving in of the Red Line.

Enlarging the Settlement Boundaries to take in the curtilage of the property affects all parts of the land north of the Blue Line. The objections and the reasons in favour of the property being included as set out above also apply to the remaining part of the curtilage of the property and are repeated here.

(that is the up to date circumstances of the land, the changes to the land, the built up form, the planning permission, the defined physical boundary).

The area of garden to the east is set out with fruit trees and is what remains of the orchards that once covered large parts of the farm land, and indeed Bratton. This land is not open countryside. It is not a large area in terms of the countryside. It is not a field or a paddock or anything resembling a field or paddock. It is physically attached to the main garden and only set to the side because of the development of residential properties at 57 and 59 Lower Road, including the demolition of the timber framed house and northern section of the cow shed on Lower Road. It is a well defined part of the garden, opening off directly from the lawn with views through to Yew Tree House garden. It is nor screened or divided off. It has proper boundaries, firstly with the boundary hedge to the north, ditch and trees to the east and the hedge and hedge/fence to the south with 59 and 57 Lower Road.

The extension of the boundary at this point will bring the northern boundary up to the field boundary in the same way as the rest of the properties in Lower Road and thus will be limited in scale and location.

#### SEVENTH OBJECTION:

Consistency.

The Plan paragraph 2.11, makes it clear that the policy of setting settlement boundaries must be consistent on a county-wide.

"2.11An objective of the Plan is therefore to review and update existing settlement boundaries to ensure they are up-to-date and accurately reflect circumstances on the ground, derived on a consistent county- wide basis...."

This has not been the case with the imposition of the Red Line at Grange Farm. At Grange Farm, not only has the Red Line been brought in to remove an area of garden, but the boundary has not been extended as has been done in other areas where the same or very similar reasons apply. I have considered revisions in the local area and have noted the following properties at the edge of settlements immediately nearby or in the local area.

Yew Tree House:

The nearest property is the garden of Yew Tree House, Lower Road, Bratton, shown in Map Grid Reference HS. Here the very opposite change has been made to that at Grange Farm. The objections made in Objection 1 above are repeated here and I add the following. Yew Tree House has a large garden with a large open lawn area. There is direct access from the garden

direct to Lower Road. Its garden area far exceeds the area of garden which has been "removed" from Grange Farm in GS. It is more homogenous than Grange Farm in shape as it has not been developed for housing in the same way as Grange Farm.

It is clearly a garden.

The garden of Yew Tree House has not always been this open and had previously been divided up with different uses as shown by the earlier enclosed maps. Up until the 0.5. Map of 1978 the western section of the present lawn is shown as separate orchard.

It does have limited capacity to extend the built form of the settlement as the area extended is large.

#### Appendix Q - Schedule of representations

It could be argued that there is space for small development in the garden if required and so as to not impact on the Listed house. In Table A.2 page 24 the explanation in Map grid reference HS for the change and enlargement of the boundary is "amend boundary to include the curtilages of properties that relate more closely to the built environment". This expansive scale for the extent of the "built environment" has not been applied in the same way for Grange Farm. With Grange Farm, rather than a large expansion and inclusion, there has been a large exclusion and removal. The inconsistency is all the more marked for the properties being so similar in size and so close together.

Westbury Leigh Property.

Another similar large house and garden in the local area is shown at Westbury, (Westbury Community Topic Area) at Map Grid Reference F14, F15 of Table A.1 of Westbury. This is a large Victorian house with garden and access to the road in Westbury Leigh and to a rear lane. The property is at the edge of the settlement on two sides. This property previously was not included within the limits of development of the West Wiltshire District Plan at all, but has been included as a whole. At the Consultation stage of town & parish councils, recorded in the Statement on the Informal Consultation, at page 613 in the Westbury section, a "specific comment" is registered that "It would appear logical that the boundary line be moved to include the whole of their site which is currently shown as garden", and the officer commented "Accept. Include garden physically related to the settlement within the boundary".

In the Table A.1 for Westbury, it has been included as a proposed amendment as "to include the curtilage of a property that relates more to the built environment (e.g. a garden) and/or has a limited capacity to extend the built form of the environment."

It does extend the settlement boundary considerably. It is a garden.

It can be argued there is space and access for housing.

Clearly the area of that property is judged by the Council to either be a garden or have a "limited" capacity to extend the built form.

Bratton:

In Bratton, at Map grid reference 18 on the Bratton Plan, the settlement boundary has been extended so that two properties which previously had gardens which were partly excluded have now been included, with a road which would enable development potentially.

Clearly, the Council will expand areas which will then bring in development potential.

Also, properties shown in 18 and H8 have been extended to include "built residential development that is physically related to the settlement" and these provide some space which could potentially allow development.

In Semington in the Melksham Community Area Table A.4 the boundary at the property in Map Grid reference JS has been extended to accommodate a drive with the same explanation as the property above (save for "to extend the built form of the settlement" rather than the word "environment"). That property has direct access to the public road and the extension provides additional space and access. This could potentially be used for small development.

At Shaw and Whitley, in the Melksham Community Area again, larger garden boundaries have been extended at Table A.5 Map Grid reference 18 (two gardens) under the same category as the above and this opens up potential small development in the rear gardens.

In general terms almost all the boundaries at Bratton apart from at Grange Farm and a small part at Yew Tree Farm have been extended outwards to the main line of the outer boundaries, field hedges or similar, taking in the numerous properties which previously were not included as part of the settlement and within the limits of development. It is inconsistent not to enlarge the area at Grange Farm in keeping with this change.

In terms of the size of the area, the location of the property and the proposed enlarged village boundary this inclusion at Grange Farm would be no more than limited capacity to extend the built form.

and forms a homogenous circular village, particularly with the enlargement of the neighbouring Yew Tree House.

The policies in the Plan specifically allow the inclusion of areas where the curtilage of the property relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in terms of scale and location."

The policy and methodology does however exclude the extended curtilage of a property that relates more closely to the open countryside (e.g a field or paddock) or has the capacity to substantially extend the built form of the settlement in terms of scale and location".

Throughout the Plan area, the plans reveal many properties have been extended where there may be a limited capacity to extend the built form of the settlement in terms of scale and location.

Extending the settlement boundary of Grange Farm to include the whole curtilage up to the physical field fence and hedge extends the area of Bratton settlement boundary by an amount

## Appendix Q - Schedule of representations

Similar in size to the area of extension of Yew Tree House and up to the same northern boundary and similar in size to the large garden areas made available in Map grid reference H8 and 18.

The above inclusions have been put in the Draft Plan and therefore I conclude they must be acceptable in size. A consistent approach should include the Grange Farm land.

This is particularly relevant to the location as Grange Farm and Yew Tree Farm abut each other at the Settlement Boundary line. Extending the settlement boundary at Grange Farm will mean that the northern boundary of the village is almost uniform, running in a clear line from west to east. The northern boundary fence and hedge of Grange Farm almost meet at the corner with Yew Tree House. Beyond that to the east, the Plan proposes the extension of all the garden boundaries up to the point of the tennis court. This forms a tightly formed village with the northern houses closely knit at the base of the incline on Lower Road.

This is in keeping with the scale and location.

As for the western accessway of Grange Farm, this is the accessway to on to Trowbridge Road. The accessway area is immediately adjacent to the house and garage of the new property (1995) 1, Grange Court. This physical boundary of the settlement was fixed in 1995 and the change of the settlement boundary will not make any change here. The scale of the extension at this point is narrow and not harmful.

Impact on the road and other properties at Trowbridge Road, western side : at this point the village extends further north on the other side of the road by the width of the three properties built from the 1980s up to 1996 which go up to/ impinge on the site of the medieval village remains. There has been one recent infill built to the south of these three, making 4 in all above the converted barn and Court House. As such the western side of Trowbridge Road has already been extended considerably since the 1980s to beyond the point of the accessway. There are 4 driveways on the western side for the 4 houses. The accessway of Grange Farm has been in place since 1995 and is a part of the up to date circumstances on the ground, and the change to the designation of the settlement boundary will not affect the location. The settlement boundaries at the rear of these properties to the west have all been extended to include large sections of the gardens up to the field boundaries. Only the northern most boundary has been reduced to exclude the medieval village site.

What is clear is that the WCS and the Plan envisage that development will take place beyond the settlement boundaries and that these will grow as determined by the Plan and WCS. At paragraph 3.4 of Topic Paper 3 Settlement Strategy, working towards a core strategy for Wiltshire, in relation to settlement boundaries it states: "At all other settlements [other than small villages] where existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or neighbourhood plan it is expected that the review would then provide for the development beyond the current settlement and the new boundary would again form the limit of development".

Boundaries being extended is part of the process of reviewing settlements, some will be enlarged and some may include an area for small housing. Although the process of reviewing boundaries is a planning tool it is not in itself a means of preventing development as each boundary has to be fixed according to the methodology.

Extending the boundary at Grange Farm is in keeping with policy and is consistent with enlargements within the County.

One of the characteristics of Bratton is its tight, close knit form, very different from many villages in the area with long ribbon development. Expanding the settlement boundary at Grange Farm up to the northern physical boundary would be in keeping with this characteristic and would not be more than limited capacity and it is a limited capacity which would be in keeping with the scale and its location.

The Red Line boundary and to a lesser extent the Blue Line are wholly out of keeping with the built form of Grange Farm and the form of the village settlement.

Neighbourhood Plans:

Councils can subsequently alter boundaries through neighbourhood plans, so long as this is in accordance with the WCS. Wiltshire Council through its development plans can allocate housing outside the limits of development (which will subsequently be taken in to the boundaries) and also enable development by using the settlement boundary as a planning tool. At the present stage of the process it is for Wiltshire Council to review comprehensively and settle the settlement boundaries in Bratton as it is the first purpose set out in paragraph 1.1 of the Plan and the first Objective set out in paragraph 3.2 of the Plan, and this should not be left to a subsequent review.

Summary:

1. The northern boundary of the Settlement Boundary at Grange Farm should not be changed to the Red Line shown on Plan 1, nor remain unchanged as per the Blue Line shown on the Bratton plan,

Appendix Q - Schedule of representations

but should be extended to the existing northern boundary fence and hedge of the Property as per the Green Line shown on Plan 1 and the property changes should be designated on Table A.2 as  
"The curtilage of a property that relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in the terms of the scale and location".  
Other issues.  
The Methodology.  
For best practice, the council reviewed how Winchester City Council, Purbeck District Council and Kettering Borough Council carried out their reviews, recorded in Topic Paper 1. Yet despite this as set out in Topic Paper 1 Wiltshire Council has undertaken a desktop review using GIS data sets with aerial imagery and Ordnance Survey maps. They considered consultation responses. At paragraph 8.4 the Council "recognize that a desktop review alone may not necessarily take into account the detail and most recent changes on the ground. Therefore, following the desktop assessment planning officers with relevant knowledge were consulted on the maps produced for each settlement....feedback from planning officers was then taken in....." This seems very late in the process and accepts that reliance on GIS alone is flawed.  
Winchester undertook site visits and local consultation in addition to GIS mapping, aerial photography and information from planning permissions. Purbeck carried out public consultations and meetings with town and parish councils. Kettering carried out site visits and consultation with parish councils in addition to desk top review using GIS mapping and aerial photography. All went further than Wiltshire Council.  
The OS map for the Bratton area (shown on the SHLAA plan for site 321 in Bratton) is inaccurate for the purpose of the settlement review. It does not reveal the actual house at Grange Farm with any clarity, giving the impression that the rear garden is not attached to the particular property and thus it loses its "anchor" so that a garden becomes an extension of a field. I have checked the OS map on the standard Wiltshire Council on line site, and in the area of my property and at the location of Site 321 (mentioned below) it reveals the OS map as per the 1982-89 plan enclosed. Grange Farm is not clearly shown, and is difficult to make out, and the buildings which are shown do not record the buildings which exist. This is the same for the buildings on 57 and 59 Lower Road which are not accurately sited. Indeed it does not reveal the property immediately abutting Site 321 for 40 houses allocated in the Plan at Bratton, namely the Old Police House, Westbury Road. (The information on the main specific sites (e.g. Planning permission sites) do show the larger up to date accurate specific information)  
From the enclosed maps, it can be seen that the OS map of 1978-79 is particularly clear, but the OS map of 1982 through to 1989 is flawed. GIS mapping information is only as good as the information which has been loaded on to the particular system used and in a large unmapped rural area such as Wiltshire it may not suffice for particular properties. Satellite information varies depending upon the date of mapping and may not be a reliable tool, certainly not in Wiltshire in terms of complying with the methodology of ensuring that the boundaries are "up to date". The Council acknowledge that the desk top review did not take into account recent changes, but resorting to planning officers could not result in a proper, effective, consistent, thorough approach as it could only be as good as the varying experience of the particular officers consulted and the time available. No mention is made of any planning officers being designated to this role. At the very least, site visits should have been carried out at locations which warranted a site visit, such as where the data was poor, or the circumstances were unusual or the impact of the designation had a greater impact on the locality, property or site.  
Consultations are only so good as the body receiving the information. Bratton Parish Council did receive the questionnaire in relation to the Settlement Boundaries, but according to the poor quality minutes, no steps were taken and in any event there was no response and the village was not engaged. Notification was sent to me on the adverse negative effects of the changes to the boundary at the point of my property. Had I been aware I would have been alerted and responded at that time.  
.....  
Relevant paragraphs of the WCS, the Plan and Topic Paper 1.  
As set out in the Plan: 1.1 The purpose of the Wiltshire Housing Site Allocations Plan ('the Plan') is to:  
Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages; and  
Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three HMAs over the period to 2026" .....  
The Objectives of the Plan are:

Appendix Q - Schedule of representations

3.1 Three objectives carry out the two purposes of the Plan to review settlement boundaries and allocate sites for housing development.  
Settlement Boundary Review

3.2 The first objective for the Plan is to review settlement boundaries:  
Objective 1: To ensure there is a clear definition to the extent of the built up areas at Principal Settlements, Market Towns, Local Service Centres and Large Villages  
The WCS stipulates At Paragraph 4.13  
These settlement boundaries will be reviewed as part of the Wiltshire Housing Site Allocations and Chippenham Site Allocations DPDs, as set out in the council's Local Development Scheme, in order to ensure they are up to date and can adequately reflect changes which have happened since they were first established. It will also be the prerogative of the community to review settlement boundaries through a neighbourhood plan.  
And at Paragraph 4.15  
At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. These settlement boundaries will also be reviewed,..... in order to ensure that they remain up to date and properly reflect building that has happened since they were first established. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled.  
Relaxation of the boundaries will only be supported where it has been formally reviewed through a subsequent DPD or a community-led neighbourhood plan, which includes a review of the settlement boundary to identify new developable land to help meet the housing and employment needs of that community.  
The Plan stipulates:  
Policies Map  
1.16 On adoption, the Wiltshire Policies Map will be amended to include the proposals set out in Chapters 5 {Housing site allocations) and 6 {Settlement boundary review) of this Plan.  
These proposals are set out in the Community Area Topic Papers which have been published as evidence to support this Plan.

2.8 Settlement boundaries have been used in development plans for the County for a number of years. The WCS retains them. Except in small villages each category of settlement has a "settlement boundary". In simple terms, they are the dividing line, or boundary between areas of built/ urban development (the settlement) and non-urban or rural development - the countryside. In general, development within the settlement boundary is, in principle, acceptable, whereas development outside the settlement - boundary is, with limited exceptions, not acceptable. The WCS uses settlement boundaries as a policy tool for managing how development should take place. Settlement boundaries are identified on the Policies Maps accompanying the WCS(S).

2.9 Other than in circumstances as permitted by other policies listed in paragraph 4.25 of the WCS, development will not be permitted outside the defined settlement boundaries.

2.10 The WCS, in paragraph 4.13, sets out the intention for the retained settlement boundaries to be reviewed through the Housing Site Allocations Plan and the Chippenham Site Allocations Plan. Settlement boundaries can also be reviewed by the community through neighbourhood plans. The previous boundaries did not always reflect the built extent of settlements because they were determined some years ago. ....

2.11 An objective of the Plan is therefore to review and update existing settlement boundaries to ensure they are up-to-date and accurately reflect circumstances on the ground, derived on a consistent county- wide basis.....  
The Settlement Boundary Review Methodology paper, Topic Paper 1 states that (Paragraph 1.3 on page 11) "...the Council has undertaken a comprehensive review of the boundaries to ensure they are up to date and adequately reflect changes which have happened since they were first established. The Plan amends the settlement boundaries where necessary ...".  
At paragraph 4.7 of Topic Paper 1 it states in relation to the two sentences in the WCS paragraphs 4.13. and 4.15 (emphasised in bold in the paragraphs set out above) "... the Council considers both sentences to be similar, with the words "adequately" and "properly" used interchangeably."  
Purpose of the Settlement Boundary:  
Referring to Topic Paper 1, this has the definition of the role of the settlement boundary and states in paragraph 7.14:

Appendix Q - Schedule of representations

	<p>"7.14 The role of a settlement boundary is to define the built form of the settlement."          And again:          "Conclusion          7.17 Again, the purpose of the settlement boundary is to define the built form of a settlement"</p> <p>Schedule of Photographs submitted with the Representation          Establishing the garden - dates of work.</p> <ol style="list-style-type: none"> <li>1. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Education Crudwell School is very successful and popular it is therefore at full capacity. The ability to expand is questionable because of known restrictions. The main road which is the main route to the school is busy with vehicles usually travelling above the speed limit and the footpath near the school is very narrow. This encourages (rightly so for safety of children) to drive to the school, resulting in severe congestion around the school. Additionally children going to the school will make the situation worse.</p> <p>General Will the development improve employment possibility, services and facilities? We think not.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I wish to object to the proposed housing development at Southwick Court (Site 3565) & the revision of the adjacent Settlement Boundary. Please see my detailed objections below: Trowbridge/Southwick Gap The Wiltshire Core Strategy (WCS) clearly recognises that "open countryside should be maintained to protect the villages surrounding Trowbridge". The development of Southwick Court which is in the parish of Southwick, yet on the edge of the Trowbridge Parish & Settlement Boundaries, will join Trowbridge & Southwick together & violate the WCS. It is essential that open countryside is maintained between Trowbridge & surrounding villages, otherwise their unique identities will be lost in urban sprawls.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I wish to object to the proposed housing development at Southwick Court (Site 3565) & the revision of the adjacent Settlement Boundary. Please see my detailed objections below:  Flooding & Pollution The Southwick Court site already suffers from serious flooding, & the surface water from Sandringham & surrounding roads drain into a ditch on its boundary. After a long wet spell the drainage system has backed-up forcing polluted water back into the gardens of the residents in Sandringham Road. Therefore the building of an additional 200 houses on the "Southwick Court Flood Plain" will only make this pollution worse & more frequent.

<b>Comment ID:</b> <a href="#">2535</a>	<b>Consultee</b> Hannick Homes & Developments Ltd and Mr A Hawker  <b>Person ID:</b> 1133384	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.11 The Street, Hullavington		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Sustainability Assessment</p> <p>The Sustainability Assessment considers the SHLAA Site 690 with a site area of 3.8 hectares and capacity of 86 dwellings. There is no indication as to why a decision was made to reduce the site area other than perhaps consideration of the overall sustainability of the site in the Assessment Criteria and Output from Stage 4a of the site selection process (App. G, Chippenham C.A. Remainder Topic Paper) In terms of “overall sustainability” the assessment concludes that “the net developable area would need to be reduced to accommodate mitigation measures to ensure sufficient landscaping. Taking account of land needed to mitigate landscape, biodiversity and heritage impact issues the net developable area is considered capable of delivering approx. 50 dwellings which would significantly contribute towards meeting the overall indicative requirement for the Community Area Remainder.”</p> <p>However, if the purpose of the reduction of the SHLAA site 690 is to reflect the need to reduce the net developable area, this would not be effective in delivering the mitigation and benefits associated with development of the site.</p> <p>Paragraph 5.102 of the HSAP draws from the SA/site selection process by referring to the need for a sufficient buffer to be provided to the watercourse to safeguard the function of the tributary to the River Gauze and that this also provides options to deliver public open space and biodiversity enhancement. However, excluding the watercourse and its environs from the site allocation reduces the effectiveness of the Policy to deliver these potential benefits through the Development Management process. A future planning application would need to accord with the allocation boundary and could therefore not include associated public open spaces and biodiversity enhancements along the corridor of the watercourse as part of a comprehensive scheme. It is normal practice for allocated sites to include all land for development as well as any associated public open space and community facilities etc.</p> <p>Hannick have prepared an illustrative concept plan for SHLAA site 690 which demonstrates the additional benefits and mitigation that could be delivered by the larger site, compared with the proposed Policy H2.11. allocation. There would need to be a modest increase in the capacity of the allocation to about 70 dwellings, to support the additional benefits and provide surveillance of the parkland open space from a secure by design perspective. However, this would be at a reasonably density (&lt; 30dph) to reflect the edge of village location and would not have a material impact above the allocated number.</p> <p>The SHLAA site 690 comprises 3.8 ha and has capacity for about 70 dwellings. An indicative concept plan is included as Appendix F and would deliver the following benefits:</p> <ul style="list-style-type: none"> <li>• Land reserved for expansion of adjoining primary school (0.2ha) as confirmed in discussions with Local Education Authority and the draft allocation.</li> <li>• Potential improvements to the junction of The Street with Norton Road which may include the use of land within the control of Hannick.</li> <li>• About 28 affordable homes (40%) to meet local needs (compared to 20 for draft allocation).</li> </ul> <p>The following mitigation and benefits would only be secured through the larger site 690 allocation:</p> <ul style="list-style-type: none"> <li>• Additional off-street car parking area for school to address current congestion problems experienced at pick-up and drop-off times.</li> </ul>			

Appendix Q - Schedule of representations

- New public parkland along watercourse for use by the development and existing community, excluded from the draft allocation site boundary.
- Potential for ecological enhancement along the watercourse corridor within the parkland.
- New equipped children’s play area and informal natural play features along the new parkland.
- Circular walk for residents within the parkland and the historic public right of way crossing the site, within an enhanced green corridor linking to The Street.

It should be noted that Hannick Homes are engaging with the Neighbourhood Plan Steering Group. Whilst the Neighbourhood Plan is at an early stage in preparation, an Open Day was held in April 2016 where the SHLAA sites were shown and pins used to indicate peoples’ preferences. The SHLAA site 690 had the highest recorded preference of those sites. The Open Day also sought people’s views on what they would like to see for the village. Some common suggestions relevant to the Option 2 proposals above, included:

- Improved off-street parking for the school
- Improved play facilities for children and teenagers
- Public park/green space for all village.

As indicated above, these local objectives can only be delivered with the larger site 690. In particular, engagement with the local community has revealed a chronic lack of parking space at the school with lack of parking spaces for staff and parents alike. This is leading to conflict with local residents due to parking congestion on the surrounding streets by parents during pick up/drop off times. It has also resulted in the school strongly discouraging local children from cycling to school due to the danger associated with children having to cycle around temporarily parked cars on the approach road. The obvious solution to this would be to extend the car park into the adjoining site and also potentially provide a pick up/drop off facility. Hannick would agree to such provision with a larger site. A lack of a children’s play area in the village has also been identified as an issue. Play facilities in the village for children of any age are very limited. There is some very basic equipment suitable for toddlers on the school grounds, which can only be used by local residents at the discretion of the school. This is not without its problems for the school, particularly security issues relating to members of the public accessing school grounds both during and out of school hours. The larger SHLAA site 690 option would allow sufficient space to provide a LEAP, or similar range of facilities, for use by the whole village. This would provide play facilities for a much wider age range and would also negate the need for the school to make its basic equipment available to all villagers. The opportunity to provide land for the expansion of the primary school is a key benefit that can clearly only be provided by this site. The existing site is 1 ha and to accord with DfE guidelines a further 0.2 ha requirement has been identified for a 1FE school. The Local Education Authority officer has indicated that further land to accommodate car parking would be welcomed. Hannick Homes and Mr A. Hawker propose that the allocation under Policy HC.11 should be increased in size to 3.8 hectares to reflect the SHLAA 690 site which was subject of the Sustainability Appraisal (SA). The allocation should also be increased to 70 dwellings as a reasonable density for the larger site. Specific changes sought by our client are as follows:

- Amend Policy H2.11 to refer to “approximately 70 dwellings” and replace the allocation plan with a plan that reflects SHLAA Site 690 – see Appendix A.
- Paragraph 5.100; replace first sentence with “Approximately 3.8 hectares of land adjacent to the Primary School is allocated for development of approximately 70 dwellings with public open space and 0.2 hectares to allow for the expansion of the school, with additional area of off-street parent parking.”
- Paragraph 5.102; amend first sentence with: “A sufficient buffer should be provided to the watercourse within the northern part of the site....”

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Heritage  The SA notes that the site has medium archaeological potential and an assessment would be required. Our client has commissioned a Historic Environment desk based assessment which is included as Appendix D. The desk based assessment has not revealed any direct evidence of archaeological remains within the site. The site has low potential for significant remains from all periods. Any buried remains would not preclude development and a watching brief would be sufficient. It is also concluded that residential development would not result in harm to any other heritage assets, including the Hullavington Airfield Conservation Area.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Odour Assessment The Sewage Treatment works is approx. 220m to the north of the site and therefore the SA states that an odour assessment will be necessary to ensure that properties are not vulnerable to odour nuisance. Our client has commissioned an odour assessment report given part of the site is within the standard odour consultation zone, which is included in Appendix C. Odour dispersion modelling has predicted that only a very small portion of the north-western extent of the SHLAA 690 site lies within the I.S O<sub>Ue</sub>/m<sup>2</sup> contour, indicating that the proposed development is unlikely to be adversely affected by odours generated by the sewage treatment works. In fact this corner of the site, if included in the allocation, would be open space/parkland in any case. Wessex Water have accepted the report's conclusions as a representative assessment relating to odour emissions and impact upon future residents of new homes on the site.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Foul &amp; Surface Water Drainage The site is located in Flood Zone 1 although the SA notes that surface water and full drainage disposal may be an issue that would need to be addressed at application stage. Our client has commissioned a preliminary drainage assessment (Technical Note) which is included as Appendix B to the representation. Preliminary assessment indicates that infiltration type SUDS will be viable on the site and any residual run-off would be to the existing watercourse. There are adopted foul sewers located immediately adjacent to the site. The capacity would need to be investigated, however it is noted that Wessex Water have confirmed that capacity exists to the Neighbourhood Plan Steering Group.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Pegasus are instructed to submit representations on behalf of Hannick Homes (Hannick) and Mr A Hawker, who control land at The Street, Hullavington, which has been promoted as SHLAA Site 690.</p> <p>Hannick support the Policy H2.11 allocation of land at The Street, Hullavington as a sustainable location, consistent with the NPPF and the adopted Wiltshire Core Strategy.</p> <p>The land as allocated can be viably developed for about 50 dwellings with land (0.2ha) reserved for expansion of the school as agreed with the Local Education Authority. However, the allocation is considered to be unsound insofar as the draft allocated site has reduced the size of the SHLAA site 690 without justification, which will limit the effectiveness of the policy to deliver the range of additional associated planning benefits to the village which can be provided by the larger site, without any material increase in impact from the development.</p> <p>A location plan indicating the SHLAA site 690 is included as Appendix A to these representations.</p> <p>Hannick would first support the sustainability of the location of land North of The Street, Hullavington for residential development and the findings of the site selection process set out in the Chippenham Community Area Remainder Topic Paper and Sustainability Appraisal.</p> <p>The SA Summary Assessment of the Site (Appendix F, Chippenham CA Remainder Topic Paper) assesses the full SHLAA site of 3.8 hectares and whilst finding the site to be more sustainable than other options, makes reference to areas requiring further assessment. This would form part of the application process, however Hannick have undertaken several preliminary surveys and assessments which demonstrate the sustainability of the site.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Chairman and members of the Parish Council discussed the review of the settlement boundaries at a meeting of the Council held on Thursday 21st September 2017.</p> <p>Firstly, the parish council wishes Wiltshire Council to note that it is currently in the process of preparing a Neighbourhood Plan. The neighbourhood area has been designated, a steering group established and a Wiltshire Council link officer has been appointed. The parish council would be grateful if this update could be reflected in the consultation material.</p> <p>Following debate on the settlement boundary for Dilton Marsh the Chair and members resolved that the parish council did not support any changes to the settlement boundary until the Neighbourhood Planning process has been completed. It was however noted that one site which could be considered for inclusion in the settlement boundary at a later date was the Bullivant site, off Petticoat Lane.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		There are a lot of Brownfield sites in the town centre which need re-development and blight the look of the town. So why build on open countryside when the vast number of new homes Trowbridge is expected to provide could in fact be built on the Bowyers site, the County Council East Wing, Margaret Stancomb School site, etc.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to express our concerns regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Plan. With the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings).</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell is not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Our house in Crudwell have experienced severe flooding at least 3 times and small water entry at least twice, since we have lived here (21 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development. We live in the constant fear of being flooded again, we on several occasions have moved a lot our furniture and belongings upstairs when we have a heavy rainfall not to have them flood damaged again.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		There is significant community concern about safety and the increased traffic flows that will arise on Tetbury Lane, particularly during morning and afternoon school runs, and particularly given the location of the Ridgeway site on Tetbury Lane. The lane is narrow and has only limited and broken stretches of pedestrian pathway down to the A429 main road and to the School and other facilities in the village. I am a frequent walker along Tetbury lane and is aware of the already amount of traffic using this road, it is dangerous when two cars can't pass in places, with more houses at the ridgeway site it will only increase the traffic using in places a narrow lane. If people can't walk safely with their children along Tetbury Lane they will use their car to get to school or the village hall instead of walking creating more cars at the school which is a chaotic area at school times.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.11			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>With reference to the proposed development policy H2.11 to the field of 2.44ha adjacent to Hullavington Primary School. I accept the need for some housing development in the area around Hullavington but was alarmed to see that Hannick Housing had added a second proposal for a further twenty houses in the adjacent field to the north with the watercourse flowing through it. If this further development was allowed to go ahead it would have a detrimental effect and impact the area as follows:</p> <p>a) The field to the north with the watercourse would be classed as rough grassland for cattle to graze. Because this field has a considerable area within it that is wet and boggy for most of the year it has not been ploughed or cultivated in living memory. Cattle are only kept in this field from spring to autumn as it is too wet for the rest of the year. As a consequence of this it supports a large populations of voles and other small mammals. This in turn attracts Barn Owls that are regularly seen in the spring quartering the field in search of these mammals to successfully rear their young. This rough grassland is now getting rare and birds of prey such as Barn Owls are dependent on it.</p> <p>b) Kestrels are seen regularly hovering over this field because of the abundance of natural food, i.e. voles and small mammals</p> <p>c) During the winter months snipe are attracted to the watercourse and wetland areas to feed. These birds are very shy and any development in this field would have a disturbing influence on them. All of the birds listed are now nationally in decline.</p> <p>d) During the summer months bats fly along the hedgerows and over this field in search of moths and other flying insects that are abundant due t the undisturbed nature of this field</p> <p>e) The dry stone wall that is the boundary of this field to the village and runs down nearly to the watercourse provides a good habitat for voles and amphibians such as newts. My next door neighbour Mr Peter Tracey found a newt on his kitchen floor three or four years ago and must have come from the watercourse or the dry stone wall that is only a few metres from his door at No. 51</p> <p>In conclusion I would ask you not to include the field north next to the proposed development and by allowing this field to act as a buffer strip between the school field and the watercourse it would limit the environmental impact and give some protection to the wildlife that is dependent on this type of undisturbed grassland.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2564</a>	<b>Consultee</b> Mr David Aitken Property Surveyor	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1133465	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	Yes
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission site Brook House, Cricklade			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for your letter of 12 July 2017 addressed to Brook House, Cricklade regarding the planning consultation process. I have subsequently had a conversation with Wiltshire Council today about the Brook House site having considered the draft Wiltshire Housing Site Allocations Plan. Please find attached the completed Representation Form. I understand an email from me is going to be acceptable. The downloaded form is a pdf copy from your website. The changes we would like made to Brook House in the draft Housing Site Allocations plan are set out below: Please refer to the Promap of the Brook House site attached. The changes that we would like to make to the draft Wiltshire Housing Allocations Plan is to review the current site allocation and provide a Housing Site Allocation for Brook House, Cricklade, Swindon, Wiltshire, SN6 6DD for future new Class C2 and C3 Housing, that would allocate the barn, stables and field for new housing to be built. The barn and stables could be converted and extended into two Class C3 detached houses and in the field new housing could be provided along the existing residential boundary of the existing Red Lion Lane and Abingdon Court houses. We feel that a Class C3 use on part of the field to provide up to 8 detached dwellings should be allocated in the site allocations plan.</p> <p>The main house Brook House would still retain a sufficient amount of amenity space and back garden.</p> <p>If a new housing allocation for Brook House is made another option would be to convert the large house into a Class C2 residential institution and provide Care Home accommodation for elderly people in need of care. There is a need for more care facilities in Cricklade.</p> <p>The house and property sits on the edge of the town centre and is already in a residential area with established residential use along two boundaries of the field. On the Promap attached please refer to Garden Bungalow, Thameside, Aetheimar House and Hatchetts Bungalow. The old farm buildings along the other boundary of the field have already been turned into retirement housing and the old farmhouse has been demolished and recently a new detached house built in 2016. The total site area of Brook House is approximately 3.5 acres and suitable for redevelopment to housing being so close to the town.</p> <p>Based on the Promap of Brook House and the large field at the back shown in green a number of sketch development feasibility studies have been produced for new housing on the Brook House site and in the field. These are available for you to review. I can forward a copy to you for your consideration upon request.</p> <p>We would ask that Wiltshire Council consider the Brook House site on the edge of Cricklade town centre for future new housing in the Wiltshire Plan and provide a Housing Site Allocation for Brook House.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I write with particular concern for site 3565 between Lambrok Stream/Boundary Walk Trowbridge and Southwick Court in Southwick (plan reference H2.6). On page 181 of Wiltshire Core Strategy it is stated that open countryside should be maintained to protect the character and identity of villages as separate communities. The proposal to build houses on site 3565 seems to be contrary to this aim. Additionally, in your Wiltshire Council Site Allocation Plan it is noted that site 3565 separates Trowbridge from Southwick and that development would potentially threaten the separate identity of Southwick and the intrinsic quality of the countryside. The green spaces we have in and around Trowbridge are beneficial to residents' health and welfare. I hope you will oppose the allocation of site 3565 in order to maintain open countryside and protect the character and identity of Southwick as a separate community

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	With regard to your site selection process, I note in your documentation that Strategic Housing Land Availability Assessment (SHLAA) sites are rejected from further consideration or their capacity reduced where affected by obstacles to development such as heritage and wildlife designations and flood plain. Site 3565 between Lambrok Stream/Boundary Walk Trowbridge and Southwick Court in Southwick is affected by these obstacles. The land floods easily and some houses in Sandringham Road have had flood water in their rear gardens. If houses were built on site 3565 then the problem would be increased. On page 200 of Wiltshire Council Site Allocation Plan, in the context of flooding on site 3565, it is stated that "conventional soakaways/infiltration systems may not work due to underlying soil/geological conditions. The land is prone to holding surface water after prolonged periods of rain". Test bore holes were drilled in July 2017 and these filled very quickly.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I attended the Wiltshire Council Cabinet meeting in the Council Chamber on 20 June 2017, and the public exhibition at County Hall, Trowbridge on 26 July 2017. On both occasions concern was raised about access roads and the increase in traffic.</p> <p>With regard to site 3565 between Lambrok Stream/Boundary Walk Trowbridge and Southwick Court in Southwick I could not get an answer at the public exhibition on 26 July about the location of vehicle access routes to and from the site. This is an important consideration for a proposed development of 180 houses as most households now have at least two cars.</p> <p>In the Wiltshire Council Site Allocation Plan on page 201 mention is made of air quality. The plan optimistically states that people will walk or cycle to schools, shops and other facilities. This is laudable but unrealistic. The Grove School in Hazel Grove has had such problems with traffic that there is currently an Experimental Order in place. There is 'No Waiting' in Hazel Grove from Mondays to Fridays from 3pm to 6pm. This has resulted in an increase in vehicles parking in Silver Street Lane and the top of Balmoral Road. Balmoral Road is a 'No Through' residential road with mature roadside trees. Balmoral Road would not be a suitable access route to the proposed development on site 3565 as it curves with a blind bend and separates into two cul-de-sacs as well as giving the only vehicular access to Holyrood Close. The Balmoral Road junction at Silver Street Lane is almost directly opposite Hazel Grove so a large increase in traffic and parked cars could compromise the safety of school children.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Also raised was the need for sufficient places in schools and enough doctors and dentists to deal with the increase in population. In relation to school provision, I note that Grove School has applied to renew planning permission on a mobile classroom. The lack of sufficient space in a permanent building is a matter of concern. Mobile classrooms can be cold and damp in winter and too hot in summer. I am not clear that sufficient school places within reasonable travelling distance of the proposed housing development will be available.

Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I can appreciate that there is pressure on Wiltshire Council from Central Government to provide additional housing. My concern is the allocation of the sites under consideration. Surely priority should be given to making full use of all the Brownfield sites such as Bowyers, East Wing, Trowbridge Hospital, Margaret Stancomb school and the former District Council Offices. Also, is sufficient pressure being put on the Developers who hold granted planning permission but are not actually building? The Campaign to Protect Rural England have been analysing local authority plans and their report urges local authorities to set a clear requirement that all suitable Brownfield sites must be built on before any protected green site is considered for development. The Times newspaper, dated 3 July 2017, quotes a spokesman for the Department for Communities and Local Government, "We have been clear that councils must prioritise development on Brownfield land".

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.35			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Further to the recent publication of the Draft Wiltshire Housing Site Allocations Plan, I attended the public consultation event in Chippenham and had the opportunity to speak to one of your team about submitting a request for the settlement boundary around Crudwell to be revised for my property. From this discussion, they advised me to submit a representation with the relevant information for your consideration.</p> <p>My property is called Ravenscourt and lies within grids 16 &amp; J6 of the Crudwell boundary map, located on the eastern side of the A429 in the middle of Crudwell village. Under the draft boundary review, only some of my garden is being included in the plan and I would be grateful if you would consider including all of my residential property within the boundary. This would then ensure the curtilage of my property that relates more closely to the built environment is included and would provide a very clear boundary definition along stock-proof fences that are legal obligations upon me to maintain. The ability to extend the built form of the settlement within this land is extremely limited and is again prevented through a specific clause in a legal conveyance that states the land must be only used in relation to the single property known as Ravenscourt.</p> <p>In 1995, two outbuildings located within the property were subject to a change of use request from agricultural to residential and as use as ancillary accommodation. The request was granted and the outbuildings have been used as garaging and storage for Ravenscourt since that time. In 2014, the land to the NW of one of the outbuildings was granted a change of use to residential and for use as a garden for Ravenscourt. This land in question was not included in the draft settlement boundary review, but the outbuilding was. It is requested that this land be included within the boundary as it is an integral part of the built form of the property. It is currently used as a parking area for Ravenscourt.</p> <p>In 2016, an application to the Bristol Diocese was made to purchase a small strip of land around the North and East boundary of Ravenscourt, which was agreed. This small piece of land had a conveyance attached to it, stating that it was to be used for residential uses only in connection with Ravenscourt and that a fence was to be erected in perpetuity between the open countryside beyond and the land being sold. The nature of this conveyance means that there is now a clearly defined boundary between Ravenscourt and the open countryside along which the revised boundary could run as it would follow a defined physical feature that had to remain in place. Whilst this land does border the open countryside, there is very limited capacity to extend the built form of the settlement within it due to its scale and location and due to legal restrictions placed upon it by Bristol Diocese.</p> <p>I have provided a number of documents to support this request for review and these are attached:                  Document 1 is the existing Land Registry title for Ravenscourt.                  Document 2 is the existing revised settlement boundary proposal, with the 2014 change of use land highlighted in yellow. The additional land purchased from Bristol Diocese is shown as a red dotted line along the fence-line.                  Document 3 is the TP1 showing the area of land purchased from Bristol Diocese and the legal covenants placed upon us by the sale.                  Document 4 shows a number of photographs of land granted a change of use and its use as a parking area as well as the fence-line erected following the purchase of land from Bristol Diocese.</p> <p>Should you feel a site visit is required in order to fully assess this request, I would be more than happy to accommodate this visit. I stand by to provide any further information you should require and await you decision.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Base Data  At the time of writing, both the draft plan and the published evidence apply a base date of the 1st April 2017, although these figures are provisional as the final figures are yet to be published. This is unfortunate given the time that has passed since the base date and that representations are now being sought on this Pre-Submission Stage. From previous examinations we have been involved in, it is not uncommon for the Council to update or provide new evidence in relation to its housing land supply position post submission of the plan, or even during the examination. In this instance Topic Paper 3 advises that the housing supply will be updated to the 1st April 2017 base date prior to the consultation on the submission draft. Therefore at that stage we can give full and proper consideration and respond to that new evidence which will be prepared in order to demonstrate that the plan is sound. [see attached for representation in full]				
<b>Attached files (Please see Objective)</b>	4731454				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Our client has recently had an application refused and is the subject of an appeal. The site is a sustainable extension to Westbury and we consider that the site should be allocated to ensure a deliverable supply of housing land in the plan period to meet the OAN for Wiltshire. Our objections go directly to the soundness of the plan.				

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2583</a>	<b>Consultee</b> Mr R Nevill	<b>Agent</b> Mr Stephen Harris Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1133494	Emery Planning <b>Person ID:</b> 389561	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.1 - 4.72		Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There a number of key conclusions:</p> <p>The first is that it is not properly prepared as the OAN was 44,000 dwellings as confirmed by the Core Strategy Inspector. The requirement of 42,000 was adopted on the basis that:</p> <ul style="list-style-type: none"> <li>• It was a minimum;</li> <li>• The Core Strategy provided flexibility; and,</li> <li>• The Council would undertake a SHMA in 2016. That has subsequently not been undertaken.</li> </ul> <p>The second is that the Site Allocations Plan should be providing sufficient sites to meet the 44,000 dwelling OAN. The plan is not effective or consistent with national policy.</p> <p>The third is that even on the requirement in the Core Strategy there is insufficient flexibility and a greater number of sites should be allocated for development. As drafted the plan is not effective or consistent with national policy.</p> <p>Under either scenario, a greater number of sites should be allocated which can assist meeting the housing needs in Wiltshire and specifically the North and West HMA. Our clients have 3 that are deliverable in the 5 year period. As drafted the plan is not justified.</p> <p>[for full representation is attached]</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The Council's 2017 provisional statement does not provide a robust assessment of the supply and it is relying on the April 2016 base date (March 2017 update). In order for the plan to be assessed for its soundness then it will be necessary for the April 2017 Housing Land Supply Statement to be published and consulted upon. As drafted it is not positively prepared, justified, effective or consistent with national policy. However on the evidence in the current consultation further sites are required to be allocated. [See attached for full presentation]

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2585</a>	<b>Consultee</b> Mr R Nevill	<b>Agent</b> Mr Stephen Harris Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1133494	Emery Planning <b>Person ID:</b> 389561	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.44 Royal Wootton Bassett Settlement Boundary			Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We object to the settlement boundary as currently drafted. The reason for this is that the methodology sets out a number of criteria for how the settlement boundaries have been defined. One of the criteria is: “builtand commenced residential and communities facilities development such as religious buildings, schools and community halls that is physically related to the settlements”.</p> <p>Our client has had a number of planning permissions at Royal Wootton Bassett over the last number of years and these developments have necessitated changes to the settlement boundary for Royal Wootton Bassett as set out in the plan in Appendix A. This correctly shows some of these permissions being included within the settlement boundary. However the revised settlement boundary has not taken into account the extant consent to the south of the Interface Business Park. That application (14/03343/FUL) was for 68 dwellings and outline consent for a 39 bed care home and 22 age restricted dwellings and Country Park. There has been subsequent consent on the care homes scheme for additional dwellings. Enclosed at Appendix EP1 is the location plan for the permission which we can confirm has been commenced and under construction. Therefore the settlement boundary for Royal Wootton Bassett should be amended to reflect these consents.</p> <p>We consider that the settlement boundary should be revised to take account of the whole site including the open space/country park as this would accord with Criterion 4 in Table 8.1 which proposed to include within the settlement boundary: “recreational or amenity space at the age of settlement that relates more closely to the built environment.”</p> <p>It is apparent from the extant consents on the site and how the country park relates to the settlement that the settlement boundary should be drawn along the railway line which forms the southern boundary of our client’s landholding.</p>

<b>Comment ID:</b> <a href="#">2587</a>	<b>Consultee</b> Mr R Nevill  <b>Person ID:</b> 1133494	<b>Agent</b> Mr Stephen Harris Director  Emery Planning  <b>Person ID:</b> 389561	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - land at Bratton Road, Westbury		Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We also seek the allocation of Mr Nevill's site at Bratton Road, Westbury. This would provide the opportunity to deliver a sustainable development in accordance with the NPPF, addressing the three dimensions of economic, social and environmental sustainability. Westbury lies in the North and West Wiltshire Housing Market Area (NWWHMA).</p> <p>The site is located on the eastern edge of Westbury, immediately adjacent to the settlement boundary. It is bordered to the north and to the east by agricultural land, apart from a small section to the northwest which is adjacent to Coach Road. To the south is Bratton Road and a cemetery, while to the west, a small area of amenity land separates the site from Bitham Park. To the west of Bitham Park is an existing housing development.</p> <p>An application for development comprising up to 47 new dwellings (reference 16/06413/OUT) was refused in January 2017 and is now the subject of an Appeal against the decision. The assessment of the site's characteristics carried out to inform the decision concludes that there are no aspects of the proposal that would make it unacceptable, except for the conflict with policy on development outside the settlement boundary and the need to contribute to the improvement of employment opportunities and other services and facilities in the town centre.</p> <p><b>Contribution to Supply</b></p> <p>As we discuss elsewhere, Wiltshire Council state that they can currently<sup>1</sup> demonstrate a five year supply of housing land in the NWWHMA. However, this follows a period when a 5 year supply has not been demonstrated and thus we consider the supply position is fragile and in need of more sites to be identified to ensure that the supply is maintained.</p> <p>Table 4.1 of the draft Site Allocations Plan sets out an overall requirement for the NWWHMA of 24,740 dwellings for 2016 to 2026, identified completions between 2006 and 2017 of 12,603 dwellings and identified commitments of 11,566. This leaves a minimum to be allocated of 571 dwellings</p> <p>Table 4.10 of the draft Allocations Plan confirms a surplus of identified supply over the requirement for Westbury. However, it also confirms that there is only a 1% positive variation across all the urban areas. Table 5.4 of Topic Paper 4 confirms that excluding windfalls there is a surplus across the whole plan area of only 624 dwellings, or 2.5% of the total requirement.</p> <p>Table 4.10 also highlights the significant deficit in supply in terms of both Warminster and Trowbridge, which are higher order 'Principal Settlements' as identified in the Core Strategy. Both these towns are in close proximity to Westbury with Warminster being approximately 4 miles distant and Trowbridge is some 6 miles away. Good public transport links are available to both settlements and there is therefore the case that development at Westbury can in the short term assist in addressing the shortfall that seems to be persisting in the growth of these settlements compared to the aims of the Core Strategy.</p> <p>The Topic Paper 4 (Developing Plan Proposals) published alongside the draft Site Allocations Plan provides further analysis of the identified housing supply and the relationship with the spatial strategy set out in the Core Strategy. Table 5.5 provides an analysis for the 5 year housing land supply (2017 to 2022) for the NWWHMA. This states that there is a deliverable supply of 9,643 units or 7.15 years supply over this period. Table 5.7 then sets out the conclusions of the Council's 'resilience testing' assessment for the sources of the supply. This notes that</p>			

Appendix Q - Schedule of representations

“over a quarter of new dwellings are anticipated to be built on strategic sites and plan allocations that do not have planning permission.”<sup>1.5</sup> The table further notes that:  
“In the past five years overall completions have continued to be just below the average annualized HMA figure.....Falling short of annualized rates can imply that there is vulnerability in the surety of supply.”  
At paragraph 5.11, the paper goes on to state:  
“There is a significant reliance on large strategic housing sites to meet strategic requirements in the HMA.”  
While at paragraph 5.12, with respect to the expanding role of the strategic sites in contributing to housing growth, the paper states that:  
“It would however be unwise to place too much reliance on this being the case when some key strategic sites have yet to gain planning permission.”  
The acknowledgement that the ability of the plan to deliver housing growth is reliant on large strategic allocations with the associated risks that delivery will be delayed is evidence that supports the allocation of further sites where they are evidently deliverable and not strategic in scale, particularly in the short term.  
We therefore consider that there is a need for additional sites to be brought forward in the short term in Westbury to provide for the necessary level of flexibility within the plan proposals for delivering new housing. We will set out here that the site at Bratton Road has no site specific constraints to development, is of a scale that does not require significant infrastructure to be provided in advance and could be delivered in the very near future.  
**Sustainable Development**  
The site is located within a reasonable walking distance of the important everyday services and facilities available locally and within Westbury town.  
The site is also accessible by non-car modes of transport. Bus services are available from stops close to the site with these being appropriately timed and to an appropriate frequency to allow for higher order retail trips, leisure trips and some employment trips. Cycle access can be obtained via the former Coach Road and Bitham Park.  
Delivery of this site would contribute to social sustainability as it is proposed to deliver up to 47 new dwellings, including 14 affordable homes to meet the required 30% contribution and the remainder being open market housing. This would meet identified housing needs in the NWWHMA as defined in the adopted Core Strategy.  
In terms of economic sustainability, development of housing at this site would:  
Create construction related jobs and indirect jobs during the build programme, benefiting local contractors and suppliers;  
Help to ensure that there is a stable workforce in terms of ability and age;  
Lead to an increased expenditure in Westbury and the surrounding area by residents of the scheme. The proposed development would therefore generate significant spending in the Wiltshire which would help create full time jobs in the local retail, service and leisure sectors  
In addition to the above, deliver a New Homes Bonus and Council Tax income for the Council  
With respect to the environmental aspect of sustainable development,  
The allocation of our client’s site would result in the loss of open countryside. However, we note that the Council is relying on sites in the open countryside to meet its housing requirement to 2026 elsewhere across the plan area;  
No concerns with respect to flood risk or drainage have been raised during consideration of technical work underpinning the proposals. The site lies within Flood Risk Zone 1;  
Access would be taken from a priority junction on Bratton Road. An assessment of the transport impacts has not found any severe adverse impact and there were no objections on highways grounds to the earlier application;  
The site is not subject to any special landscape designations. In terms of trees and hedges, these would be retained wherever possible. Potential ecological impacts as a result of disturbance to bats can be mitigated through careful design and other specific measures. There were no objections to the application for ecological, landscape or arboricultural reasons;  
In summary, the loss of open countryside and agricultural land does not significantly or demonstrably outweigh the significant benefits the proposed development would deliver.  
We therefore seek that this site is allocated in the Wiltshire Housing Site Allocations Plan.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">2589</a>	<b>Consultee</b> Mr R Nevill  <b>Person ID:</b> 1133494	<b>Agent</b> Mr Stephen Harris Director  Emery Planning  <b>Person ID:</b> 389561	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission Site - Lower Woodshaw, Royal Wootton Bassett		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	As set out in the introduction to this statement, we seek the allocation of our client's site at Lower Woodshaw Farm for development. The site would provide the opportunity to deliver a sustainable development in accordance with the Framework for the following reasons. Paragraph 7 of the Framework states that there are three dimensions to sustainable development: economic, social and environmental. The social role means: "supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well being." The proposed development would meet this role by delivering around 260 open market and affordable homes to meet housing needs in Royal Wootton Bassett and Wiltshire. It would also assist in delivering a five year supply of housing land and flexibility to meet the overall requirement in the plan period. The Royal Wootton Bassett Neighbourhood Plan (RWBNP) does not recognise that there is a need to provide additional housing land now to meet Wiltshire's five year housing land supply requirement. As set out above, Wiltshire Council's 5 year supply is precarious and therefore additional sites are needed in the short term to meet the deficit, and this is likely to necessitate additional sites coming forward in the Market Towns. A further practical effect of the housing land supply position is that all policies relevant to the supply of housing will be automatically out of date, by the operation of Framework paragraphs 47 and 49. This also necessitates further sites to be brought forward. Being located adjacent to the settlement boundary of Royal Wootton Bassett, our client's site is well located in terms of accessibility. In particular, it is in close proximity to the Interface Business Park, which provides a range of employment opportunities. There is also a pub (Woodshaw Arms) and a supermarket (Tesco Express) in close proximity to the site. Open space (including a Local Equipped Area of Play) would be provided on site. Should a railway station be developed at the Interface Business Park, which is one of the potential locations put forward in policy 14 of the RWBNP, the site would be within close proximity to this. Indeed as stated above, an allocation at our client's site could assist facilitating the railway station in this location. Paragraph 7 of the Framework explains that the economic role means: "contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and co-ordinating development requirements, including the provision of infrastructure" During the build programme, construction related jobs and indirect jobs would be created. This would benefit local contractors and suppliers. Once occupied, the proposed development would help contribute to ensuring the Borough has a stable workforce in terms of ability and age. The residents of the scheme would spend money in Royal Wootton Bassett and other towns in Wiltshire. The proposed development		Effective	
			Consistent with national policy	

Appendix Q - Schedule of representations

	<p>would therefore generate significant spending in the Borough, which would help create full time jobs in the local retail and leisure sectors. In addition, the proposed development would deliver a New Homes Bonus and Council Tax income for the Council.</p> <p>Paragraph 7 of the Framework states that the environmental role means:  “contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimize waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”</p> <p>The allocation of our client’s site would result in the loss of open countryside. However the Council is relying on large sites in the open countryside to meet its housing requirement to 2026 across the Borough.</p> <p>In terms of flood risk, the site is located within an area identified in the Core Strategy (policy CP67) as being at risk of flood. However, an indicative layout for the site has been drafted, which includes a flood storage area to the south west of the site. Flood risk issues can therefore be mitigated.</p> <p>Access would be taken from the access road to the Interface Business Park to the west of the site. Two access points are proposed on the indicative layout plan. A Transport Assessment would be prepared to assess the impact the proposal would have on the highway network.</p> <p>In terms of trees and hedges, these would be retained wherever possible, Most of the existing trees and hedges are located on the boundaries of the site, but there is a line of trees and hedges, which bisects the site in two. This would be retained in the proposed layout of the scheme.</p> <p>In terms of other environmental considerations, including: agricultural land, landscape and visual impact and ecology, these would be addressed through the design and detailed reports would be provided in support of a planning application.</p> <p>In summary, the loss of open countryside and agricultural land does not significantly or demonstrably outweigh the significant benefits the proposed development would deliver. Therefore, the presumption in favour of sustainable development applies and we seek the allocation of the site in the RWBNP.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4731454</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Our client has recently had an application refused and is the subject of an appeal. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	In terms of flooding risk the displacement of natural slow drainage (mainly farming land) on the southern side of the A3094 would further impact on the river Nadder and fields on the northern side of the road that are frequently under water most winters. Any further increase to these levels could affect residents living on the meadows estates further to the east of the floodplain, the town path and the Cathedral. In view of comments made earlier at para 6 the most mitigating factor towards assisting the traffic situation would be a bypass for Salisbury particularly for the A36 but the problem of a higher risk of flooding would remain.. The only glimmer of light is to build a much smaller number of houses on the plot of land on the southern side of the A3094 next to the Wellworthys residential development which has just one "cash and carry" building on it. This area was previously earmarked for industrial retail units (mainly car sales) moving from the Churchfields Industrial estate. This proposal was declined and hence only one building is on the site.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The application takes no account of the local environment. This involves serious current issues over flooding, pollution and the lack of a viable roads system needed to assist in such a large proposed housing development.</p> <p>The A3094 is regularly congested at both the Wilton junction with the A36 and the gyratory at New Bridge Road where it connects to both the A354 (Blandford) and A338 (Bournemouth) roads. The A3094 up to a few years ago was a B road but now also bears the brunt of the A36 traffic much of it heavy goods vehicles passing over two narrow bridges alongside Wilton Park wall turning left on to the A36 towards Wilton with great difficulty due to the 45 degree angle.</p> <p>Despite the urgent need for additional housing most local people would not benefit as local salaries are comparatively low due to the lack of large commercial employers in the area. Thus future occupants are more likely to be from higher priced areas and willing to commute long distances to work adding to the already overburdened traffic situation.</p> <p>In view of comments made earlier at para 6 the most mitigating factor towards assisting the traffic situation would be a bypass for Salisbury particularly for the A36 but the problem of a higher risk of flooding would remain.. The only glimmer of light is to build a much smaller number of houses on the plot of land on the southern side of the A3094 next to the Wellworths residential development which has just one "cash and carry" building on it. Comment ID:	<a href="#">2593</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Malcolm Read	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.3			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>On no account should any development be permitted to the north of the Netherhampton Road to the west of West Harnham. Apart from the obvious traffic objections being raised by local residents, this land is the floodplain of the River Nadder, after it has been boosted by the River Wylde, which in turn has been boosted by the River Till.</p> <p>Various hydrological and hydraulic studies may show that, for example, some small areas of this land may be slightly higher than a 100 year flood map, but determining what constitutes a 100 year flood flow (which leads to the flood map) is quite arbitrary in the first place, as I learned from being the lead objector on hydrology at the 1993-4 Salisbury Bypass Inquiry. Not only that but it is much easier to defend a floodplain from development if there is a clearly defined boundary, such as the Netherhampton Road on one side of Salisbury, and the A36 on the other side, (in respect of the Avon floodplain). Failure to defend clear floodplain boundaries will result in development nibbling away at the floodplain until very little is left, which would be absolutely catastrophic for flooding in the City.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		My other very strong objection is that the land to the north of the Netherhampton Road is a vital part of what remains of the City's landscape setting. The road from Sparsholt village into Winchester is a beautiful example of town meeting country, with no internally illuminated signs or any other signs of commerce. The Netherhampton Road into Harnham is the last example of this as far as Salisbury is concerned.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I wish to register my objections to the proposed building of 200 houses on the land East of Elizabeth Way. They are as follows: The roads are already strained with traffic from Paxcroft Mead Developments, as there are only 2 (two) routes out of Trowbridge to Bath via Bradford on Avon & Staverton. Both of which have narrow bridges, in Bradford's case narrow streets, none of which were built to take the amount of traffic that they presently do. Staverton Bridge was strengthened some years ago, but the amount of traffic has increased substantially since then & should this proposal go ahead even more traffic would add to the mix! Twice a day Trowbridge is "gridlocked" with traffic, Staverton also has traffic jams at peak times. How much longer can the bridge there cope with the amount of traffic that is steadily increasing? Heavy lorries plus cars etc. The road system has not been considered when all this housing has been built or is under consideration. So planners, give the rest of Wiltshire a share of equal housing, sort out the "eyesores" in the county town and make Trowbridge a more attractive place again!!

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I wish to register my objections to the proposed building of 200 houses on the land East of Elizabeth Way. They are as follows:                      The fields under consideration are very prone to flooding in winter or even any time of year when heavy rain occurs, it's not called "Hilperton Marsh" for nothing!!! I know several residents of Wyke Road whose houses are adjacent to the stream, whose houses have flooded and they are very concerned about the risk of flooding in the future should the development go ahead. The fields either side of "the road to nowhere" i.e. Elizabeth Way every year are flooded at some point and remain extremely wet and "boggy" for at least four months of the year (winter time). The small brooks that traverse the land could not cope with the flow-off from any development.                      So planners, give the rest of Wiltshire a share of equal housing, sort out the "eyesores" in the county town and make Trowbridge a more attractive place again!!</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Having lived in Harnham for in excess of 60 years it is clear that businesses are very reluctant to move to the South of the City; the Wellworthy Site was transferred to housing and the Booker site remains vacant. Therefore, although an admirable objective the reality is that industry will not move Churchfields to Harnham at any point in the future and the plan should be amended to both recognise and be open with regards to this. The plan should clearly state the maximum number of additional dwellings which would be built on this site if the sought for move of industry from Churchfields to Harnham fails to materialise. If industry is reluctant to move to the areas of housing consideration should be given to locating the housing closer to the industrial sites where arguably better infrastructure facilities already exist. In particular consideration should be given to further expansion between Salisbury and Amesbury given that Boeing have announced major expansion plans for Bascombe Down and major expansion is planned at the Parton Science Park.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Although it is noted that a Transport Assessment will be prepared it is to be noted that if industry fails to move to Harnham all workers and students together with those undertaking 'the school run' from beyond the immediate vicinity will need to travel along the A3094 which is already running at its design capacity - approx 14,000 vehicles and we are advised in the Salisbury Transport Strategy that both the Harnham Gyratory and Park Wall junctions are operating at full capacity and that improvements to either of these junctions will naturally increase traffic flows due to being easier to negotiate - and that is before the effects of building at least a further 700+ dwellings are taken into account. It is noted that there is no mention of a shop being provided on site and therefore it is likely that residents will choose to shop in Salisbury, a major centre, thus adding to the number of vehicles negotiating the Harnham Gyratory. Increased delays and environmental pollution are therefore inevitable contrary to Sustainability Objectives Nos 4 &amp; 5.</p> <p>Attention is drawn to the fact that in 2011 a proposal to construct 400+ dwellings on this site was rejected and one of the reasons for the rejection was 'traffic congestion' in Netherhampton Rd. It is difficult therefore to understand how the construction of 700+ dwellings can be considered acceptable.</p> <p>Emphasise that Master Plan MUST include ALL infrastructure improvements including both those local to the sites in question, and also those required further away e.g. Harnham Gyratory and Park Wall junction and that all improvements are implemented and completed BEFORE any development of the Harnham sites is undertaken.</p> <p>It is particularly important to consider the infrastructure requirements of the wider area because the Netherhampton Rd South site has been sited on the line of the Southern By-Pass - proposed and rejected in the 1990s. There does not appear to be any other suitable Southern By pass route should this matter be resurrected.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Para 2.9 recognises the delay in securing planning permission @ Ashton Park, therefore Wiltshire Council needs to be proactive in re-developing the numerous Brown Field Sites (many of which are owned by the council) within Trowbridge, & also rebalancing the disparity between Trowbridge & Chippenham. These actions would prevent the development of grasslands surrounding Trowbridge, which currently provide open countryside between it & small villages. The proposed development of Site 3565 Southwick Court by Waddeton Park agent Savills is a prime example, as its' development would merge Southwick with Trowbridge & be contrary to the WCS.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Appendix G, Page 27 - Site 3565 Southwick Court - Accessibility</p> <p>The plan identifies &amp; I quote "Potential vehicle, pedestrian &amp; cycling routes through existing built form to the immediate north on to Silver Street Lane". To use Sandringham Rd for access would require building a road through the communal open space &amp; historic protected hedgerow &amp; a bridge across the brook.</p> <p>This access would be in breach of the original planning approval &amp; conditions for the Home Farm Development in 1971, which stipulated:-</p> <p>(1) "The area of land shown edged green on the approved plan shall be reserved /or communal open spaces purposes, &amp; shall be satisfactorily maintained by the Trowbridge Urban District Council/or such purposes".</p> <p>(2) "Existing hedges &amp; trees on the site shall be maintained".</p> <p>This open space which contains mature trees, &amp; has provided a safe recreational area for local adults &amp; children for over 40 years would be destroyed.</p> <p>A conservative estimate of the increase in vehicle movements is 900 a day (180 x 2.5 cars per house x 2 journeys/day + deliveries). Therefore the impact of this 4 fold increase in vehicle traffic would devastate the environment &amp; safety of the current neighbourhood, &amp; completely change the character of a quiet culde-sac into a very busy thoroughfare.</p> <p>The obvious access to the proposed Southwick Court development is from the main A361 road which borders the site, or through land at Upper Studley (Site 3260).</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Appendix A, Trowbridge - Proposals for Revised Settlement Boundaries</p> <p>On the large map (page 27) @ Grid References G9 &amp; G10, (please see annotated extract below) the proposal is to move the boundary (Blue line) from currently being the brook, &amp; to sever the end 65 metres of Sandringham Road &amp; then continue along to Balmoral Rd (Red Line)</p> <p>The justification for this proposal is claimed to be in line with the Topic Paper 1: Settlement Boundary Review Methodology (TP1: SBRM) and explained in Table A 1, 2nd Row &amp; I quote "Amend boundary to remove area more closely related to the countryside".</p> <p>This proposal completely ignores the natural run of the brook &amp; hedge/trees &amp; moves away from "a clearly defined physical feature", &amp; is contrary to the criterion in TP1: SBRM. Also this grassed Public Open Space is part of an integrated series of grass open spaces allocated in 1971 (as part of the original planning consent) that encompass the Home Farm Housing Development.</p> <p>Furthermore the draft of the TP1: SBRM was revised to specifically include &amp; I quote "Recreational or amenity space at the edge of a settlement that relates more closely to the built environment". Hence if this grassed Public Open Space was currently not within our settlement boundary it could be included following the methodology in TP1: SBRM, because it is not agriculture land as the adjacent countryside, &amp; the grass &amp; trees are maintained by the local authority. Therefore TP1: SBRM does NOT support a revision of our boundary, &amp; it should remain unchanged.</p> <p>Finally with the proposal to build 180/237 houses in the countryside (Site 3565 - Southwick Court) immediately on the other side of the current boundary (Blue Line), the countryside could be no more!</p> <p>Therefore moving this open space out of the housing development is totally illogical.</p> <p>I trust you will consider my objections carefully, recognize their logic &amp; make the necessary changes to the draft CAPT for Trowbridge.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The former Bell Inn, at Appendix 3 grid squares G8 and F8, is a Grade II listed building. The extended western car park of this property has been included within the settlement as part of the proposed boundary change. If the proposed boundary change was to stand this would facilitate future unnecessary and unwanted housing development of the car park in proximity to a Grade II historical asset. This would be in opposition to the policies of Seend's emerging neighbourhood plan. Within that plan this land relates to, and facilitates, a designated significant view within a landscape gap from Seend to the open countryside to the south west of the Seend settlement. The Seend Parish Neighbourhood Plan Landscape Analysis Map shows the identified view in that landscape gap. Public consultation on the landscape element of the Seend neighbourhood plan has already taken place. Allowing the proposed change to stand will undermine the value of neighbourhood planning and create unnecessary boundary amendment work for both Wiltshire Council and the neighbourhood plan steering group. The extended area of the former Bell Inn car western park should be excluded from the proposed boundary change and the existing boundary line retained. Boundaries will remain subject to review and parishioner support within the ongoing process of the Seend neighbourhood plan. Local engagement from people who know the settlement supersedes the weak desktop methodology for determining the built environment of Seend. In the case of Seend, doing nothing in terms of boundary change will keep the site allocations plan compliant.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The desktop methodology for determining necessary boundary changes in Seend is understood but there are inconsistencies in application and an apparent lack of knowledge on actual land use. The Seend Lye Recreation Field (SLRF), now excluded from the Seend large village settlement by the proposed boundary change, has been part of the settlement since the 1960s. The SLRF is enclosed on three sides by the built environment of the settlement. The SLRF has constructed upon it a cricket pitch, 2 x tennis courts, a children's play area, an equipment store and a concrete pad for cricket net practice. All of these features are said, by the methodology, to be "more related to the open countryside" than the settlement. This is patently not the case due to the very recreational nature and physical location of these facilities. Furthermore, when standing on the SLRF one has the sense of being in the settlement and not in the open countryside or anywhere related to the open countryside. Similarly, in the case of the WI allotments, in Appendix 3 map grid H6, the well-used allotments are bounded on west, east and south sides by the built environment. To the north, about half the boundary abuts an open field and the built environment to the east extends well north of that northern boundary. Again, there is a sense that one is on land within the settlement and not on land more related to the open countryside. The change necessary to achieve consistency and accuracy is to do nothing and leave the Seend settlement boundary unchanged but subject to review by the forthcoming Seend Neighbourhood Plan.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Site 1021 is a flood plain for Lambrok Stream. We have witnessed water erupting 3 feet in the air when the drainage pipe through the field has been unable to cope with the volume of water. The Lambrok Stream overflows its banks regularly, (photos enclosed) and if dwellings are built on this site and also upstream at Southwick Court and Upper Studley, it will exacerbate this. The Pitt report, 2008, states flood plains should only be built on if no other land is available and the need is great. We are aware that the plan says provision would be made by the developer to deal with this, but are sure a similar undertaking was made when 24 and 26 Church Lane were built on land that used to be an orchard uphill from the stream. If you were to walk along the footpath between Church Lane and Acorn Meadow after rainfall you would need your wellies! The surface water run off from Churchfields and Church Lane no longer run into the drainage ditch alongside the field as the end of it was filled in by the builder, probably not deliberately, just ignorantly.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">2617</a>	<b>Consultee</b> Mr Chris Crowther  <b>Person ID:</b> 1113716	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to highlight my concerns on the sound component of this plan from the perspectives of evidence and track record.</p> <p>Evidence. I attended the consultation on 26 July where I spoke with the team and reviewed the documentation. To me, it was clear that the plan lacks effective justification. In sum, it is a strategy based on the premise of “build it and they will come”.</p> <p>When I asked to see the modelling that had taken place to show the load on the infrastructure and the environment, the team were unable to show it to me. Similarly, the coverage in the plan lacks the necessary depth. I have lived in the area for some time and have seen the implementation of previous plans so I have first hand experience of their failure.</p> <p>There is an equal lack of detail in the guarantee of securing additional employment to come to the area in the aftermath of building additional houses. Wiltshire has become a commuter region and those with the necessary means will relocate if the lack of detail in this plan begins to look like a ghetto-isation of Trowbridge and Wiltshire. In sum, the lack of evidence of employers seeking to relocate to this part of the world makes me feel that this strategy is a repeat condemnation for the county similar to the aftermath of the closure of the Mills.</p> <p>A simple example of this lack of detail is the fact that much of the commercial and industrial space around Trowbridge lies empty but yet the plan insists on building more.</p> <p>Track Record. I have lived in the Trowbridge / West Ashton area for 6 years now and see the annual transformation of that land into a lake that slowly metamorphosis to a pond followed by a swamp before drying up for the Summer. In that time, I have also witnessed the repeated efforts of the various building contractors to “get it right” as they have to return time and again to repair or re-engineer various works to keep nature at bay.</p> <p>I enclose some email correspondence between myself and the Council from May 2014 enquiring about the delays in building a “simple” roundabout near to Castle Mead. From memory, that simple task took 4 months. You can see from the email trail that the necessary levels of QA are not in place and I am not convinced that anything will have changed in the interim.</p> <p>My beliefs are further reinforced from the Consultation when I see that the Plan seems fit to build on Level 3 Flood areas – see attached photo from the consultation session. Again, given my first hand experience of the number of attempts that it took to get the drainage right for Green Lane, I question the track record of this decision and its implementation.</p> <p>My fears are only heightened because there is a noticeable gap in any detailed modelling and evidence within any of the plans.</p> <p>In order to make the Plan justifiable and effective, it is necessary to provide the following:</p> <p>Detailed modelling of the impact in the following domains:</p> <ul style="list-style-type: none"> <li>Economic</li> <li>Infrastructure</li> <li>Environmental</li> </ul> <p>The results of these detailed investigations should set the basis of what is in “the art of the possible” and avoid a more fanciful “build it and they will come”.</p>				

Appendix Q - Schedule of representations

	Confidence will also increase if there is a coalition of the willing . It would be a real vote of confidence for the Planners to enlist the explicit support of potential employers by committing to come to Trowbridge and Wiltshire to fill the new spaces that will be created.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		D3 (Salisbury CATP)		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan Pre-Submission (Regulation 19) draft plan (WHSAP) was published for public consultation on Friday 14th July 2017, the consultation runs until Friday 22nd September 2017.</p> <p>These representations are submitted on behalf of Longford Estate and relate to the allocation of sites and the resultant housing land supply in the Southern Wiltshire Housing Market Area.</p> <p>The WHSAP is a daughter development plan document to the adopted Wiltshire Core Strategy (2015) (WCS). The WCS set out minimum housing requirements for each of the three Housing Market Areas in the County.</p> <p>Wiltshire Council published a Housing Site Allocations Informal Consultation in February 2015. Included within this was a Plan identifying "Potential Site Options". The Council's Site Identification Process involved removal of sites with strategic policy concerns, including land within Flood Zone 2 or 3. As a result of several discussions with Wiltshire Council policy officers in August 2014 through to the publication of the Informal Consultation regarding the deliverability of the site, Site 3435 was included as a Potential Site Option (see Appendix 1). The site is referred to as SAL2 (and erroneously includes the neighbouring rugby fields).</p> <p>The Stage 2(a) assessment contained within the Salisbury Community Area Topic Paper has clearly not taken any of this technical information into account, which has led to its unreasonable exclusion from the site selection process. The details of the errors are set out in the representation form relating to Table D.3.</p> <p>The Stage 2a assessment is based on a series of "exclusionary questions" which are set out at Table D.2. We do not object to the principle of the methodology, however the approach taken to question 5 ("Is the site fully or partly within flood risk areas, zones 2 or 3?") is inflexible and has resulted in errors which has consequently led to the removal of Site 3435 (Land off Britford Lane) from the assessment at this stage. Indeed, the Informal Consultation published in 2015 included Site 3435 where other sites had been excluded for falling within Flood Zone 2 or 3.</p> <p>Furthermore, the assessment makes an uninformed and incorrect assumption of the highway capacity of the 'main road' (Newbridge Road), using this as a reason to remove the site from further assessment. There is a major inconsistency in the approach taken to the site assessments and we detail below the specific errors in the approach taken to assessing site 3435 (Land of Britford Lane):</p> <p>First, a small area in the north-western corner of Site 3435 (Land off Britford Lane) falls within Flood Zone 2 (not Flood Zone 3 as incorrectly stated in Table D.3 of the Salisbury Community Area Topic Paper - page 47). Consequently, the site has been given a "P" for "Partly". The vast majority of the site falls within Flood Zone 1. No development would be proposed within Flood Zone 2, the entirety of the ownership of the site was included within the red line for clarity. We have prepared a planning application for this site and no development is proposed within Flood Zone 2. The proposed development of the site for residential use has been discussed with strategic and planning policy officers of Wiltshire Council since 2014. Masterplans have been presented including a detailed package of technical information which specifically excludes the Flood Zone 2 area from development. The detailed package of information (titled "Response to Draft Wiltshire Housing Site Allocations Plan") is included as Appendix 2 to this submission. We refer the Inspector to Section 5 of Appendix 2 which outlines the flooding and drainage issues relating to the site, including a surface water drainage strategy.</p>				

Appendix Q - Schedule of representations

In light of the amount and detailed level of information made available to officers over recent years, this would have been apparent and should have factored into the consideration of the site.

Second, the assessment assumes the 'Remaining developable site capacity' to be 45. As mentioned above, a large amount of technical information has been given to the Council, and a number of meetings held which concluded in agreement that the site could accommodate 100 dwellings (excluding the land within Flood Zone 2). This is evidenced on the masterplan included at Appendix 2.

Third, Table D.3 identified the site as being available, but not developable. There is no explanation for this. Longford Estates has invested significant resources, time and money on demonstrating that the site is indeed developable. All technical aspects of developing the site have been carefully assessed and the findings shared with Wiltshire Council. Furthermore, we believe that the site can accommodate 100 dwellings which is based on detailed site feasibility studies. This is more than double the 45 dwelling capacity set out in Table D.3.

Fourth, Table D.3 states that "The main road is unable to take additional traffic from this development". There is no evidence provided in the Topic Paper to justify this assertion. Detailed transport information was been provided to the Council (see Appendix 2) which demonstrates that the highways impact would be acceptable. Notwithstanding this, any major residential development south of the River will arguably generate additional traffic on the same main road referred to in relation to Site 3435 (New Bridge Road and the 'Harnham Gyration') would be impacted by development along Netherhampton Road (draft allocation sites S1028 and S1027) and most sites located to the south of the city centre (draft allocation site 3272).

Fifth, an inconsistent approach has been taken to the Stage 2(a) assessment of sites. For example, the majority of site ref. 3554a falls within Flood Zone 2/3 yet was considered to be developable and taken to the next round of assessment.

To summarise, the assessment of Site 3435 (Land off Britford Lane) makes incorrect assumptions that are not justified by evidence. The inconsistent approach to site assessment is amplified by the fact that Wiltshire Council planning officers have been party to a number of meetings discussing the development potential of the site and have received a detailed package of technical information which demonstrates that the site can accommodate 100 houses in a highly sustainable location, bringing with it numerous material benefits including 40% affordable housing. A housing allocation at Site 3435 (Land off Britford Lane) would be consistent with one of the Core Planning Principles as set out in the NPPF at paragraph 17:

"Within the overarching roles that the planning system ought to play, a set of core land-use planning principles should underpin both plan-making and decision taking. These 12 principles are that planning should:

- Not simply about scrutiny, but instead be a creative exercise in finding ways to enhance and improve the places in which people live their lives;
- Actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable."

Paragraph 4.63 of the WHSAP states that the South Wiltshire HMA has a slightly less generous housing land supply than elsewhere in Wiltshire and confirms that Salisbury is the Principal Settlement within the HMA and it is intended to be the primary focus for development. Site 3435 (Land off Britford Lane) offers a deliverable, viable and available opportunity for housing to be developed within walking distance of the city centre and is achievable early in the Plan period.

Please see Appendix 2 for further details.

It is submitted that in order to make the WHSAP sound that Site 3435 be re-assessed in light of the technical information that has been provided to the Council regarding the capacity of the site.

The site is highly sustainable and deliverable that could be allocated to help address housing need.

Including Site 3435 as a housing allocation would ensure that the WHSAP is effective as it is deliverable within the plan period and would ensure that despite proposed changes made to the residual requirement in the Salisbury and Wilton Community Area (as set out in accompanying representations), the objectively assessed needs can be met before 2026.

Longford Estate request that the site is considered as an 'omission site' at the Examination as it is well placed to accommodate growth in order to meet local housing needs and support existing services and facilities and reduce the number of car journeys and pressure on the highway network in comparison with other proposed allocations further away from the city centre which would result in a heavier reliance on the car.

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

We request that Site 3435 (Land off Britford Lane) be considered as an omission site at the Examination. We request the opportunity to explain the background to the site's promotion and its development potential and how its inclusion as an allocation would ensure the WHSAP is "effective" and therefore sound.

## Appendix Q - Schedule of representations

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I refer to the response of Worton Parish Council to the Settlement Boundary Review (as outlined in the attached document) and wish to record my support for their request for no change to the existing boundary without direct consultation and consideration. The existing boundary is long established and reflects in many respects the historic settlement as defined by burgage plots etc. In addition, many of the proposed changes fail to accurately reflect the criteria defined in the settlement boundary review methodology document. For example, the school grounds (G6) and gardens (H6, I6 and J6) are certainly not "more related to the open countryside". It would appear that the compiler was unfamiliar with the location and may not even have examined the aerial photography. Worton is in the process of preparing a Neighbourhood Plan and I have no doubt that responsible proposals will be made regarding the settlement boundary in due course if that is appropriate.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">2623</a>	<b>Consultee</b> unidentified client Land at Shotwell, Chippenham  <b>Person ID:</b> 1137289	<b>Agent</b> Annie Gingell Assistant Planner  Tetlow-King Planning  <b>Person ID:</b> 1137295	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Tetlow King Planning submits these representations on behalf of our client in relation to the Wiltshire Site Allocations Pre-submission draft. Our client has an interest in land at Shotwell, Chippenham and would like to like to propose the site for allocation as site to develop C2 Care Home with significant facilities for dementia care. A site location plan is provided at Appendix A.</p> <p><b>Context</b></p> <p>The Local Government Association (LGA) published a report in September 2017 entitled ‘Housing our ageing population’. The report highlighted a distinct and urgent need to better provide a range of housing options to meet the wide variety of housing circumstances, aspirations and needs of people nationally as they age.</p> <p>The LGA indicated that between 2008 and 2039, 74% of projected household growth will be made up of households with someone aged 65 or older. We need to plan for the housing and care needs of the population as they age and the PPG says it is “critical” that we do so.</p> <p>Research carried out by property consultants JLL, published on the BBC website on the 1 August 2017, found that since 2002 an average of 7,000 new care home beds had opened in the UK every year but that even with this by 2026 there would be an additional 14,000 people needing care home places per year. In addition to this additional need there continues to be a significant rationalisation in care homes with older homes and unviable homes closing and new high tech homes, designed for higher dependency levels, opening. This proposal would be part of that process whereby the increase in older people, with increased levels of higher dependency, can be accommodated in a situation away from pressurised NHS beds.</p> <p>That BBC article included a quote from JLL lead researcher James Kingdom saying “We’re currently building half the number of care home beds every year that we need.”</p> <p><b>The Site and Surroundings</b></p> <p>The site at Chippenham covers 1.01 hectares of open countryside and is located in flood zone 1. The site is outside the Chippenham Community Area Boundary Limit set out in the Core Strategy and Chippenham Site Allocations Plan (CSAP); it is not currently allocated within the Core Strategy or CSAP; nor is it designated for any other purpose.</p> <p>The site is located to the south west of Chippenham and bordered to the north west by the B5428. The B5428 provides a direct route to Bath Road; a key arterial route in to Chippenham and the wider area.</p> <p>The site is currently surrounded by open countryside however, as illustrated in figure one; there are approved applications for development on three sides. The land to the north west of the site does not currently have a planning application but it is allocated in the CSAP as a smaller extension site for residential development under Policy CH1.</p> <p><b>Site History</b></p> <p>There is no planning history for the site though it is surrounded on three sides by developments with permission granted for various uses (see figure 1) [In attached document].</p> <p><b>Proposal</b></p>				

## Appendix Q - Schedule of representations

Our client would like to develop the site for the purpose of a Use C2 Care Home responding to the need in the area and an identified shortage of dementia care.

Planning Policy

The Development Plan for the site is comprised of the Wiltshire Core Strategy (adopted 2015). The Chippenham Site Allocations Plan (adopted May 2017) is also relevant.

Core Strategy

Core Policy 46 of the Core Strategy states that new housing, and housing schemes, to meet the specific needs of vulnerable and older people in “suitable locations” will be required in Wiltshire, and that such accommodation should be in sustainable locations where there is good access to services and facilities and an identified need. This is such a location.

The policy allows for such developments adjacent to Chippenham provided that there is (a) a genuine need; (b) environmental and landscape considerations will not be compromised; (c) facilities and services are accessible from the site; and (d) its scale and type is appropriate to the nature of the settlement and will respect the character and setting of that settlement.

We do consider that Policy 46 applies to this area and would welcome a discussion on this point.

Chippenham Site Allocations Plan

Policy CH1 of the CSAP deals with allocations to the south west of Chippenham and is comprised of the Rowden Park site and ‘Smaller Extension’ sites (identified in figure 2).

The Rowden Park site is identified in the CSAP is proposed for a mixed use development to include the following:

- 1,000 dwellings
- 18ha of land for employment (B1, B2, and B8 uses of the Use Classes Order) adjacent to the A350
- Land for a 2 Form Entry primary school
- A local centre
- Approximately 100ha as a riverside country park
- strategic landscaping and open space to retain and reinforce existing hedgerows and establish new areas of substantial planting

No more than 800 homes to be completed before the Cocklebury Link Road (from the A350 to Cocklebury Lane) is open for use or a set of comprehensive transport improvement measures of equivalent benefit.

Further to this, approximately 11ha of land is identified as part of the policy for residential development under ‘Smaller Extension’ sites. These will include:

- Up to 400 dwellings
- Strategic landscaping and open space, including the retention of important hedgerows, where appropriate, to provide a ‘soft’ urban edge to development.

Justification

The site is effectively an undeveloped, non-allocated island, surrounded by the South West Chippenham strategic allocation (Policy CH1), as illustrated by figures 1 and 2. It is evident that the development of a C2 Care Home would be acceptable in this location given that the strategic allocation is comprised predominately of residential uses.

The main impacts on the nearby listed buildings and landscape, ecological concerns, and relationship with Chippenham are all mitigated to a large degree by the site being physically wrapped up by the allocation and other neighbouring developments.

The allocation also increases our client’s sites sustainability by providing a range of facilities and services in the immediate vicinity, which would be easily accessible to residents and further reduce any negative impacts associated with the development on Chippenham.

ONS population statistics show that whilst 27% of Wiltshire’s population is 60 years or over, 49% of the borough is over 45 years old. It is therefore inevitable that there will become an increasing need for C2 accommodation in Wiltshire.

Evidently, it is increasingly important that the Council appropriately plans for an ageing population. Not doing so will mean an inadequate provision of care home accommodation and a lack of family houses being vacated which will have an effect on house prices and a detrimental impact on housing affordability and the ability of families to purchase in the area. A lack of care home beds and can lead to serious issues of bed blocking and increased social care costs.

Appendix Q - Schedule of representations

	<p>The only reason we can see why this site was not allocated was because it was not promoted and the developers of all adjacent sites did not do any deal with the landowner. Building land and care development are two very important things and leaving this site as an island of no development would be incongruous and illogical.</p> <p>Summary</p> <p>It is our view that by allocating our client's site within the wider Wiltshire Site Allocations Plan (WSAP) should be considered and that a care home would be an appropriate allocation.</p> <p>Paragraph: 006 Reference ID: 12-006-20150320 of the PPG says that Local Plans should ensure that the policies in their Local Plan recognise the diverse types of housing needed in their area and, where appropriate, identify specific sites for all types of housing to meet their anticipated housing requirement. It goes onto say this could include, amongst other things care homes, and that such proposals can be allocated in plans. Failure to respond to identified need can be a serious issue for the progress of a development plan.</p> <p>The inclusion of the site would provide a much needed care element to the allocation, which it is currently lacking, whilst enabling the site to be positively integrated with the south west of Chippenham allocation in terms of meeting local community needs and traffic management.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - land at Christian Malford		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Halsall Homes are a well-established family owned business forming part of the Shepperton Group, a property and development group based in Bath, whose history dates back to a pre- World War II era. Halsall Homes has a long history dating back to 1974. Halsall Homes build a range of high quality, desirable homes for open market sale throughout the region. They pride themselves on designing homes to complement their setting, incorporating a traditional style typical of the local area with character features and individual finishes. Halsall Homes has the expertise and financial resources to help deliver a high quality new housing development at Christian Malford.		Effective	
	Site Context The site lies to the south east of the settlement of Christian Malford covering an area of 11.35ha of Grade 3 agricultural land. The site is approximately 4 miles north east of Chippenham, 19 miles east of Bristol, 17 miles west of Swindon, and 17 miles south of Cirencester. The site is located between Station Road, Orchard Leaze Lye Common and the Bristol main railway line which is raised. The north west corner of the site is bordered by residential development. The site benefits from two existing access points: one from Orchard Leaze Lye Common and the other from Station Road, providing access to junction 17 of the M4. There are a number of services and facilities in the local area, including but not limited to: village store, primary school, guest house and pub. Christian Malford benefits from existing bus stops along the route from Chippenham to Little Somerford. Chippenham has a wide range of services and facilities and is approximately 4 miles away. A review of Natural England's Magic Maps Application shows that the site has no statutory designations and no historic statutory designations on the site. There are three listed buildings within approximately 150m of the site with residential development and an existing road between the site and these buildings. The north east corner of the site is situated in Flood Zone 2 with the remainder in Flood Zone 1. A location plan is appended to this representation.		Consistent with national policy	
Potential Uses and Capacity We propose that the net developable area of the site would be able to accommodate up to 50 dwellings, including affordable housing. This capacity has been calculated as a result of a masterplanning exercise that takes into account the site's characteristics and constraints. It is considered that the site is capable of achieving development of up to 50 dwellings whilst incorporating generous open space provision along with landscaping features.				
Site Suitability The Wiltshire Core Strategy identifies Christian Malford as a Large Village, defined as a settlement with a limited range of employment, services, and facilities. Development at Large Villages is intended to be limited to that needed to help meet the housing needs of settlements. Halsall Homes have undertaken a significant amount of work towards an outline planning application for the site including a number of technical assessments that are on-going. The technical studies have been used to inform the development of the masterplan for the delivery of up to 50 dwellings.				

Appendix Q - Schedule of representations

	<p>Technical work is on-going for the site, however it is known that the site is predominantly in Flood Zone 1, with the north east corner of the site situated in Flood Zone 2, and studies of surface water flooding on the site have been undertaken. This knowledge has been used to inform the layout used in the masterplanning exercise whereby development is removed from the section of the site in Flood Zone 2, and focused only in areas of the site in Zone 1 where risk of surface water flooding is also at its lowest.</p> <p>The site can be suitably accessed from Station Road and on-going Transport work is being undertaken to inform the best location for primary access. There is the potential for pedestrian access routes to the village through the Village Hall or the nearby public house.</p> <p>There is no known potential for any contamination or any other key constraints on the site.</p> <p>Forthcoming proposals for the site will be carefully considered and informed by technical assessments. The design of the scheme will be informed by an understanding of the local character and mitigate risk of surface water flooding to the built form. The site's potential for biodiversity will be informed by ecological surveys however it is considered that this will be restricted primarily to the hedgerows and trees on the boundaries of the site which should not be affected by any forthcoming proposal.</p> <p><b>Site Availability</b></p> <p>The site is currently owned by a single party who have already concluded discussions with Halsall Homes, resulting in the exchange of an Option Agreement between Halsall Homes and the landowner.</p> <p>Therefore, there is a realistic prospect that a planning application will be submitted within the next two years of the Plan period.</p> <p><b>Site Achievability</b></p> <p>There is a highly realistic prospect that the site will come forward for residential use as the site has willing landowners, and an actively engaged house builder who have put in place a development team to bring forward a planning application on the site. It is confirmed that the site is 'deliverable' in accordance with paragraph 47 of the NPPF, which means the site is:</p> <ul style="list-style-type: none"> <li>Available now (the site has no current use that would delay development);</li> <li>Offers a suitable and sustainable location for development; and</li> <li>Is achievable with a realistic prospect that housing, including affordable units, will be delivered within five years and that development will be viable.</li> </ul> <p>Allocating the site for development would assist in contributing towards the supply of housing. While the Council can currently demonstrate a five year housing land supply this should not be seen as a cap on housing delivery.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To discuss issues of the Plan's soundness and any site specific details relating to the site at land off Station Road, Christian Malford.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">2636</a>	<b>Consultee</b> Mr Simon Jenvey Halsall House  <b>Person ID:</b> 1133667	<b>Agent</b> Mr Tom Stanley Director  Colliers International  <b>Person ID:</b> 1133670	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Delivery Strategy		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Wiltshire Strategic Housing Market Assessment (SHMA) (2011) informed the Wiltshire Core Strategy, and has informed the Wiltshire Housing Site Allocations Pre-Submission Draft (WHSAP). Based on the SHMA, the Core Strategy proposed a housing requirement of 42,000 over the period of 2006 to 2026. The SHMA identified a need of 34,000 over the period 2011 to 2026, of which 15,264 should be new affordable dwellings. In the Chippenham Community Area Remainder, the WHSAP identifies a residual requirement for the Plan Period, removing completions and developable commitments from the indicative requirement for 2006 – 2026, of 58 dwellings. The WHSAP allocates two sites in the Chippenham CA Remainers: H2.11 – Land at the Street, Hullavington H2.12 – East of Farrels Field, Yatton Keynell The site allocation process excluded those areas that have a forthcoming Neighbourhood Plan, thus allocating sites where need was unlikely to be met due to a lack of site allocation. The two sites allocated together are intended to provide approximately 80 dwellings, 22 more than the indicative requirement for the CA Remainder. The treatment of OAN requirements being exceeded is agreed as positive and justified given Central Governments views on the matter. The 'over-supply' of housing is reinforced by appeal decisions, such as the Appeal Decision on APP/Y3940/W/17/3166946 for 6 dwellings in Bradford on Avon dated 28 July 2017. In this decision, the Inspector notes that whilst North and West Wiltshire HMA can demonstrate a five year housing land supply which it notes it is exceeding, these targets are not intended to be a cap, and the appeal was allowed given the sustainable location of the development. Exceeding the OAN also assists in the contribution towards affordable housing. The SHMA identified a requirement from 2011 – 2026 of 15,264 affordable homes out of a total requirement of 34,000. This equates to a requirement of approximately 45% of new dwellings in the county to be affordable. Core Policy 43 sets out two zones for the provision of affordable housing – a 30% zone and a 40% zone. Given that sites of fewer than five dwellings are not subject to this policy, this would give an approximate rate of only 35% affordable across the region, 10% lower than the OAN for affordable housing. The Council's adopted OAN for the period 2006 – 2026 is 42,000. For clarity, we will use the total OAN identified above for the period of 2011-2026 of 34,000 throughout to align with the identified affordable housing OAN. Based on the full OAN outlined above of 34,000 dwellings, and the judgement that approximately 35% of all new dwellings will be affordable units, only 11,900 affordable units will be provided. This is a shortfall of 3,364 dwellings from the OAN for affordable housing. As the LPA strategy for delivering the affordable housing contribution is a market led policy approach, if the LPA intends to meet fully the required full amount of affordable housing, 15,264 dwellings, this would require approximately 43,600 new dwellings to be built in the period of 2011-2026. This is an approximate increase of 28%, significantly higher than the 34,000 identified for the period 2011 – 2026. The approach taken by planning inspectors at a series of local plan examinations recently		Effective	

Appendix Q - Schedule of representations

has been consistent. Inspectors view the importance of meeting fully the OAN where Affordable Housing is concerned as a priority. Without fail Inspectors are expecting LPAs to address this either before or during the Examination and where during the examination they are directing at least a 10% increase in the housing target. To ensure there is a willingness to exceed the existing housing target and any future 5 year housing land supply deficit, the Site Allocations DPD should begin to address these shortcomings.

The adopted OAN in the Wiltshire Core Strategy covering the period 2006 – 2026 is 42,000. An increase of 28% on this figure would equate to an additional 11,760 forming a total of 53,760 dwellings for the Plan period. The site allocations DPD should seek to address the shortcomings in the Local Plan by allocating sites that can assist in bridging the supply gap and bring Wiltshire into alignment when considering their performance against the evidence directs a full OAN for affordable housing for the period 2006-2026 of 24,192 (45% of all new dwellings).

The WHSA identifies a total housing supply as follows:

Area	Minimum requirement 2006 - 2026	Completions 2006-2017	Developable commitments 2017-2026	Allocations	TOTAL	%Variation
East Wiltshire HMA	5,940	3,497	2,273	350	6,120	3.0%
North and West Wiltshire HMA	24,740	12,603	11,566	1,205	25,374	2.6%
South Wiltshire HMA	10,420	5,067	4,759	910	9,736	-6.6%
Wiltshire Total	41,100	21,167	18,598	2,465	41,230	0.3%

This demonstrates that the indicative requirement has barely been exceeded. Given the above calculations, whilst the WHSA meets the adopted minimum OAN, in order to meet the OAN for affordable housing the Council will need to deliver at minimum an additional 12,530 dwellings of which at least 5,638 should be affordable units.

Whilst exceeding the current residual requirement in the Chippenham CA Remainder, there is a significant way to go before the affordable housing need is met. Applying a 28% increase to the Chippenham CA Remainder gives an indicative requirement for 2006 – 2026 of 742 dwellings. The WHSA identifies that 409 dwellings have been completed between 2006-2017, and developable commitments for 2017-2026 are 113 dwellings. This leaves a residual requirement for the Plan period of a minimum of 220 dwellings in order to meet the affordable housing need.

Paragraph 182 of the NPPF sets out the requirements for a Plan to be considered sound, namely that it is:

Positively prepared – should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;

Justified – should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

Effective – should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and

Appendix Q - Schedule of representations

	<p>Consistent with National Policy – should enable the delivery of sustainable development in accordance with the policies in the Framework. For the reasons outlined above, in order to safeguard against an impending 5 year housing land supply gap Wiltshire would need to deliver an additional 12,530 dwellings for the period 2006 – 2026 above what has already been completed, committed, or allocated. In light of this, it is considered that the Plan is not positively prepared as it does not seek to address the full needs of the Authority.</p> <p>The Plan is not the most appropriate strategy when considered against the alternatives. In order to meet the full needs of affordable housing within Wiltshire, the Council should seek to deliver a greater number of allocations in areas that are considered appropriate for development. As such, it is considered that the Plan is not justified.</p> <p>The policies contained in the Plan can be considered effective in so far as they would be sufficient to meet the adopted housing targets for the authority and allow for cooperation across boundaries. However, for the reasons outlined above, the Plan is not considered when considering the ability to meet fully the needs of the authority where affordable housing is concerned. The Plan is therefore not consistent with national policy. Given what is outlined above, it is recommended that the Council should allocate additional large sites that have the potential to deliver higher numbers of affordable housing to meet the Full OAN for affordable housing. In order to meet this, the Council would be required to deliver at least an additional 12,530 dwellings. Allocation of additional sites will assist the Council in exceeding the minimum figures set out by the OAN. By allocating further sites, the Council will have a more realistic chance to meet the needs of the authority where affordable housing is concerned. As outlined above the true affordable needs are approximately 24,192 dwellings. Increasing the certainty of supply of viable housing land will also ensure that the annualised housing target is consistently met and will allow for any potential issues in other allocated sites causing a delay in delivery to be addressed. Increased flexibility will ensure the DPD is capable of being delivered and any potential shortcomings in future years will be catered for.</p> <p>Christian Malford is a sustainable location that can support development. The forthcoming Neighbourhood Plan allocates some sites towards the supply of housing. However, the consultation version of the Neighbourhood Plan allocates only three sites with five or more dwellings. All three are identified as supporting six dwellings, meaning that Christian Malford will be providing a maximum of 6 affordable units out of anticipated housing delivery of 30 dwellings. In comparison, if the site outlined above were allocated and the full 50 dwellings were brought forward, this would contribute at least 20 affordable units.</p> <p>In conclusion, the Council should aim to allocate additional sites in sustainable locations such as Christian Malford in order to ensure both the overall housing target and also the full complement of affordable units are delivered. The above site at Christian Malford would contribute towards the supply of housing in general, but crucially will also contribute towards the supply of much needed affordable housing.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>That aside, I really must take issue with the (seemingly) uninformed planning officer, who has earmarked land adjacent to Durrington Manor for these houses. This area has never been part of the Village Plan. Clearly, he or she has never seen or visited this particular piece of land or has any idea of its current usage.</p> <p>For your information, the area annotated is currently used for agricultural use and is leased to a self help group of equestrian tenants. I attach a copy of the plan. I would like to point out that the suggestion by the planning officer to take the part annotated A, and add it to Piece Meadow B would render the remainder of the fields and stables useless. The fields at Part C have no access to any roads in the area, and the stable area at Part D would be completely divorced from the pasture land.</p> <p>In conclusion, and as a matter of urgency, I suggest the planning officer(s) responsible for this proposal visit the site as soon as possible and I will be very happy to show them the problems their short sighted proposal is likely to create.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I write in response to the recent declaration by Wiltshire Council 'to allocate land for the building of 60 new homes' in Durrington. My first question is why Durrington? It is close to the A303 corridor and suffering, along with many other villages in this part of south Wiltshire, from 'rat running' and a marked increase in traffic congestion - as a result of continued 'urban development'.

Comment ID:	<a href="#">2641</a>	<b>Consultee</b> Amita Management Ltd  <b>Person ID:</b> 824512	<b>Agent</b> Mr Mark Chadwick Hunter Page Planning  <b>Person ID:</b> 901379	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Consistent with national policy	
Please identify the policy, paragraph, table, figure or site to which you are referring.	Housing Delivery Strategy				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The draft WHSAP is being prepared and will be examined during the period when the Wiltshire Core Strategy (WCS) is being reviewed. As set out in the previous section the WCS time period is to 2026 and is required to provide 'at least 42,000 dwellings' over that period. As also mentioned above, Government consultation on local housing requirements, identifies that the Wiltshire figure for 2016-2026 is over 100 dwellings per year higher than the figure in the WCS. Given these factors Amita Management Limited considers that the WHSAP should identify sufficient sites in order to provide the necessary flexibility to address those needs. Failure to do so is considered to be contrary to the soundness test to plan positively.</p> <p>Amita Management Limited notes that in order to meet the Malmesbury Community Area Remainder figure, a site is allocated in Policy H2 for 50 dwellings at Ridgeway Farm, Crudwell (H2.13). The written justification at paragraph 5.111 would apply to the Cotswold Community site, only to a greater degree in that the Cotswold Community site is wholly previously developed, has 27 existing dwellings and can provide a further 48 dwellings and community gains as follows:</p> <ul style="list-style-type: none"> <li>Enhancing existing heritage assets and the historic hub, by giving the buildings a viable new lease of life to secure good stewardship in the future.</li> <li>Opening up public access and delivering the 'missing link' in terms of the local cycle network.</li> <li>Replacing the existing housing stock and supplementing it with a range of houses and cottages of a variety of sizes and mix.</li> <li>Securing high quality design and building practices, respectful of traditional crafts and building vernacular governed by a masterplan.</li> <li>Facilitating the upgrading and modernisation of the existing community facilities at Ashton Keynes through planning obligations; including the village hall, crèche and GP surgery.</li> </ul> <p>Given the above, Amita Management Limited believes that the approach of the WHSAP fails to plan positively by not allocating the Cotswold Community site and fails to meet the test of compliance with the Framework requirements to 'significantly boost the supply of housing' and to "encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value".</p> <p>[see attached for full representation]</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?	Complex issues which need to be explained.				

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2642</a>	<b>Consultee</b> Amita Management Ltd  <b>Person ID:</b> 824512	<b>Agent</b> Mr Mark Chadwick Hunter Page Planning  <b>Person ID:</b> 901379	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission site -The Cotswold Community			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Around 12 hectares of the site is capable of accommodating development. The site presently forms an unoccupied C2 planning unit; which included 27 individual C3 residential planning units on the site. The site currently accommodates circa 120,000 sq. ft. of buildings including: 27 detached, semi-detached and terraced C3 houses, dormitories, hostel accommodation and extensive staff accommodation Weaving (community) hall a large function barn Cricket ground and pavilion, gymnasium and swimming pool Forge, science laboratories, maintenance and craft workshops The buildings identified above are supplemented by extensive hardstanding areas of storage and parking and playing fields. In addition, physical infrastructure to serve the site is already established including mains electricity, water and a private sewerage plant. The supply of new housing stock at the site will meet identified needs but also forms a financial driver, enabling the delivery of wider benefits to the locality, including the much desired extraction of minerals in accordance with the Wiltshire and Swindon Aggregate Minerals Site Allocations Local Plan, (Adopted May 2013). Importantly, redevelopment of the site will to help enhance and sustain existing services and facilities in Ashton Keynes and neighbouring settlements. It will also enable new services and facilities to be provided to serve both the new and existing community; enhancing the sustainability of the local area without development putting additional strain on the existing development boundaries. Key benefits of the redevelopment of the Cotswold Community would include: The extraction of mineral resources in a quick, efficient manner and the reinstatement of those areas to landscaping and lakes. A community bus service, controlled by the local community rather than by Wiltshire and Gloucestershire councils. That bus service will serve the neighbouring villages and provide a link to Kemble Station. Contributions towards improved GP facilities in the parish, through expansion of the existing GP facilities at Ashton Keynes. Contributions towards an improved village hub; community shop, meeting spaces and pre- school facilities. A financial contribution would be made towards the existing primary school to enable its much needed updating and expansion of which there is an existing identified issue that needs to be addressed. The provision of some workshop and studio space as well as business units and a possible live work hub with central facilities such as admin support, rooms for meetings and office hardware. The opening up of public access through the site and the improvement of footpaths, bridleways and cycle paths to provide greater integration with the surrounding communities. The provision of the much desired "missing link" of the existing footway/cycle way on the Spine Road East. Addressing the concerns of the public regarding the safety of the North End Crossroads. Developable and Deliverable			

## Appendix Q - Schedule of representations

The National Planning Policy Framework states that for sites to be considered 'developable' they should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged. To be considered 'deliverable' the Framework requires sites to be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered within five years and, in particular, that development of the site is viable. In respect of the Cotswold Community site, those tests are addressed as follows.

### Suitable

#### Landscape

According to the Settlement Strategy Topic Paper (2012) about 70 percent of Wiltshire is designated as Areas of Outstanding Natural Beauty (AONB), Special Landscape Area (SLA) or Green Belt which restrict the location of new housing in the area.

However, the Cotswold Community site is not subject to any special landscape designations and is relatively free from physical constraints. The development is remote from the Cotswold AONB and other landscape designations where there is a presumption against development. The site is also not subject to any special wildlife or nature conservation designations.

#### Accessibility

The site is located approximately 1.9 miles to the north west of the village of Ashton Keynes; identified as a Large Village. The market town of Cirencester is approximately 6 miles to the north and the market town of Malmesbury is approximately 10 miles south west. Both settlements provide a high order of employment opportunities, services and facilities.

Kemble Train Station is located approximately 4.5 miles north West of the Cotswold Community. Regular services operate from Kemble to Stroud, Gloucester, Cheltenham and Swindon. A detailed assessment has been undertaken to deliver a new regular bus service linking the site to existing villages and Kemble Station.

The site has an existing vehicular access from Spine Road West, located about 700m west of the North End crossroads. A highway assessment has identified that the site can accommodate safe access onto the public highway via the existing vehicular access.

There are three public rights of way that run through the site (reference AKEY 3, 4 and 5) and the area around the site benefits from a large number of public rights of way, including footpaths, bridlepaths and cycle routes which provide both day to day and leisure routes between settlements. Significant opportunities exist to enhance that provision across the site.

#### Socio-economic

As identified earlier within this statement, the residential redevelopment of this site will provide a key opportunity to make efficient use of previously developed land and to provide benefits to the wider community through the injection of new investment into the local area as well as supporting the existing community facilities

#### Available and Achievable

The site is privately owned and there are no constraints that would delay commencement of development. The site has been subject to initial technical land appraisals that have identified there are no physical or environmental constraints that would delay or preclude the development of the site. An agreement is in place with a local minerals operator and it is clear the redevelopment of the site will enable extraction of mineral resources within an 18month-2year period

It is clear that the Wiltshire Housing Allocations Site Plan does not provide the sufficient range of sites to enable flexibility of housing provision. This is particularly the case given the review of the Wiltshire Core Strategy and Government consultation on local housing requirements. On this basis the submitted Wiltshire Housing Allocations Site Plan will fail the test of soundness in respect of planning positively.

The redevelopment of sites such as the Cotswold Community is supported by national policy. Paragraph 55 of the Framework is of particular relevance which advises that in order to promote sustainable development in rural areas 'housing should be located where it will enhance or maintain the vitality of rural communities. For example, where there are groups of smaller settlements, development in one village may support services in a village nearby.' In addition, the Framework provisions to "boost significantly the supply of housing" and "encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that is it not of high environmental value" are not complied with. On this basis the submitted Wiltshire Housing Allocations Site Plan will fail the test of soundness in respect of compliance with national policy.

It is therefore suggested that the Wiltshire Housing Site Allocations Plan should allocate the Cotswold Community site to address these issues.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Chapter 7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for consulting the Authority on the above document. On behalf of the Authority I would like to take the opportunity of this consultation to make the following comment.</p> <p>Chapter 7 Implementation and Monitoring</p> <p>Paragraph 6.77 of the adopted Wiltshire Core Strategy (January 2015) states that;</p> <p>'Wiltshire Council will support the production and implementation of a New Forest Mitigation Strategy in partnership with Natural England and other partners as appropriate. This will set out the delivery mechanisms and funding requirements (through either CIL, S106 or other appropriate mechanism) such that impacts of the plan upon the New Forest SPA are fully mitigated. After adoption the New Forest Mitigation Strategy will be a relevant planning consideration. Prior to this, planning applications will be subject to individual HRAs and bespoke mitigation secured as necessary.'</p> <p>The New Forest National Park Authority is aware that a New Forest Mitigation Strategy hasn't been produced to date, two and a half years after the adoption of the Council's Core Strategy. It is also unclear in the absence of an Annual Monitoring Report (the Planning Policy page of the website refers to an Annual Monitoring Report for 2016 which is currently being prepared) whether in the absence of a Mitigation Strategy whether bespoke mitigation has been secured for individual planning applications as set out above.</p> <p>Whilst the Authority recognises that none of the housing site allocations in this current consultation are identified as falling within the visitor catchment of the New Forest SPA and the requirements of the adopted Core Strategy in relation to the New Forest SPA as set out above may not apply, the Authority would like to emphasise that Wiltshire Council isn't currently meeting its requirements in relation to other housing allocations identified within the adopted Core Strategy. As such, the impacts on the New Forest SPA are not currently being mitigated – an issue that was identified in the HRA of the Council's adopted Core Strategy some years ago.</p> <p>As you may be aware mitigation strategies have been in place for planning permissions granted by the National Park Authority and New Forest District Council since 2012 and 2015 respectively and I would suggest that these could provide a useful starting point to any discussions on the production of a mitigation strategy in line with Wiltshire Council's obligations under the habitats regulations.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Plan Objectives			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Plan Objectives and Housing Need</p> <p>The purpose of the Wiltshire Housing Site Allocations Plan ('the Plan') is to allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five-year land supply in each of Wiltshire's three HMAs over the period to 2026.</p> <p>The WCS refers to the role of the Plan, in combination with the Chippenham Site Allocations Plan, to help ensure a sufficient choice and supply of suitable sites throughout the plan period in accordance with national policy and to complement neighbourhood planning.</p> <p>CorePolicy2 sets out the Delivery Strategy for the plan, which seeks to deliver a minimum of 42,000 new homes across Wiltshire between 2006 and 2026, including the provision of at least 24,740 new dwellings within the North and West Wiltshire Housing Market Area (NWWHMA). Completions to date (2006-2017) is 12,603. Leaving a minimum requirement for 12,137 homes to be completed in the next nine years to 2026.</p> <p>The draft Plan (para 4.2) states a surplus is necessary to maintain five years supply of housing land in each HMA and to surpass the buffer in excess of five years required by the NPPF. There has been persistent under delivery in the NWWHMA. Over the last 10 years the at least requirement has only been exceeded on three occasions (Wiltshire Housing Land Supply Statement (Update) Base date: April 2016). The housing land supply issue in the NWWHMA can be summarised as follows:</p> <p>Minimum annual requirement 2006- 2026 = 1237 homes per annum Requirement 2006-2017 = 13,607                  Completions to date (2006-2017) = 12,603 (1145 homes per annum)                  Minimum requirement 2017-2026 = 12,137 (1214 homes per annum)                  Commitments 2017-2026 = 11,566 Proposed allocations = 1195                  Commitments and proposed allocations = 12,761 Windfall = 2086                  Minimum requirement plus 20% buffer = 14,564 Five-year land supply requirement = 8091 homes</p> <p>The 20% buffer is applied to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land (NPPF para 47).</p> <p>The Chippenham Site Allocations Inspectors Report notes the Courts have established that the NPPF does not require a site allocations plan to also question whether further housing provision will need to be made: that is the role of the WCS through review. In December 2014 the Wiltshire Core Strategy Inspector noted the Council has clarified that it will be undertaking a planned early review of the CS. Nearly three years later this review hasn't taken place and therefore a risk adverse approach to the Plan should be applied in order to achieve the at least 42,000 homes.</p> <p>The opportunity now and what is being proposed is not to question further provision but to ensure the housing provision in the WCS is achieved. The overall purpose of the buffer is not to deliver homes over and above the minimum requirement (24,740). The buffer reduces the risk of not achieving the minimum requirement rather than heightening the prospect of exceeding the minimum requirement. The 20% buffer is necessary to meet the housing need in a sustainable planned fashion.</p>			

Appendix Q - Schedule of representations

	<p>By allocating sites to match the minimum requirement plus 20% the certainty to achieve the minimum is heightened and any Windfall delivers the over and above the minimum portion. Reducing the risk of failing to meet the minimum requirement will boost significantly the supply of housing (NPPF para 47). The Plan would not be positively prepared and effective if it only relied upon Sites which have not been specifically identified as available in the Local Plan process to deliver more than 42,000 homes. Windfall sites normally comprise previously-developed sites that have unexpectedly become available (NPPF glossary). The expected supply, the allocations, should be set to achieve the minimum requirement.</p> <p>A positively prepared Plan and one that stands the best prospect of being effective would include allocations for NWWHMA for up to 14,564 homes.</p> <p>Excluding an allowance for windfalls, anticipated land supply in the North and West Wiltshire Housing Market Area compared to strategic requirements, according to the Topic Paper 4 Developing Plan Proposals (Table 5.4) delivers a 'surplus' of 5% (624 homes) of the remaining requirement. This assumes all the commitments and proposed allocations are delivered. To be prudent and pragmatic a 20% buffer should be applied to reduce the risk of a shortfall as a consequence of not all of the commitments and allocations delivering. This is considered to be a suitable non-implementation/delivery rate. This is particularly pertinent as the Plan is intended to achieve more than 42,000 homes overall and more than 24,740 homes in the NWWHMA. The 624 homes is therefore not a surplus, it is, if all the sites deliver, 102.5% of the 'at least' requirement. Therefore, non-delivery of any of the proposed allocations and commitments could result in the housing figure not being achieved. The NPPF (para 47) advocates the application of a 20% buffer to have a realistic prospect of achieving the planned supply. The planned supply is more than 42,000 homes. A 2.5% buffer in the NWWHMA is therefore insufficient and therefore the Plan is not effective or compliant with National Policy.</p> <p>In its current form the Plan isn't sound.</p> <p>Changes required</p> <ol style="list-style-type: none"> <li>a. Allocate additional sites, including the available land west of Ashton Road, Trowbridge which is being promoted by Taylor Wimpey, to match the minimum required housing plus 20% in order to ensure the minimum homes required is achieved</li> <li>b. Add allocations in total for an additional 1803 homes in the NWWHMA including the land west of Ashton Road, Trowbridge.</li> <li>c. Utilise windfall sites to achieve delivery beyond the minimum required.</li> </ol>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Core Strategy Review</p> <p>The latest Local Development Scheme (LDS) shifts from a Core Strategy review to the completion of a new Local Plan. Aligned but separate Local Plans for Wiltshire and Swindon are to be undertaken, informed by a joint evidence base and a non-statutory 'joint framework' covering matters similar to a joint strategic plan which both authorities are 'signed' up to.</p> <p>The Wiltshire Local Plan is anticipated to be adopted by early 2021 depending upon a variety of factors including a jointly agreed Spatial Framework with Swindon by mid-2019. If this timetable is achieved the early review of the WCS will have been completed seven years after the WCS Inspectors report was completed.</p> <p>Again, to minimise the risk of failure to achieve the requirements of the WCS the changes sought above should be applied to the WHSAP to cover the period to 2021 and beyond if there is delay. If the WHSAP is adopted as anticipated by winter 2018 this will be twelve years into the twenty-year development plan period.</p> <p>There is a risk of further delay and consequently contingency should be applied to the land allocated to meet the Core Strategy requirement of at least 42,000 new homes.</p> <p>Change required</p> <p>a. Allocate additional sites, including the available land west of Ashton Road, Trowbridge which is being promoted by Taylor Wimpey, to match the minimum required housing plus 20% in order to ensure the minimum homes required is achieved</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site Selection		Justified	Effective
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Site Selection</p> <p>The Plan (Topic Paper 3 para 3.26) states “In the North &amp; West HMA and South HMA there is a significant reliance on large strategic housing sites to meet strategic requirements. These are now beginning to play a much more substantial role in housing growth. The housing land supply position is considerably lower than in the East HMA, and in the South HMA there are a number of occurrences where the 5.25 years’ worth of supply is marginal. This would indicate a greater degree of intervention to meet the objectives of the Plan.”</p> <p>The Plan (Topic Paper 4 Developing Plan Proposals) also states:</p> <p>Site delay- large sites for housing, Experience shows that the complexity of delivering large sites can result in forecast start dates slipping. (para 2.11)</p> <p>The WCS allocation at Ashton Park, South East Trowbridge is the largest single site within the HMA. More than one in ten of all new dwellings in the HMA are expected to be built on this one site over the remaining years of the plan period. It is self-evidently important to ensuring a surety of supply, and a site where planning permission has yet to be granted and a master plan agreed. (para 5.13)</p> <p>Notwithstanding this scepticism, Table 5.1 in Topic Paper 4 Developing Plan Proposals anticipates quite a substantial turnaround in future completions compared to past completions.</p> <p>The WCS allocates a number of large mixed use sites for development over the plan period. Evidence to date shows that several strategic sites proposed in the WCS are failing to be developed to the timescales originally envisaged, despite Council and developer aspirations to do so, because of the complexities involved. (Topic Paper 4, para 2.18)</p> <p>One of the tests of resilience (Topic Paper 4, para 2.11 c) is Persistent under delivery – NPPF requires a larger land supply where there has been persistent under-delivery (a 20% buffer rather than 5%). The Paper states It would be prudent to aim to have a 20% buffer. The application of the 20% buffer is the means to achieve the minimum requirement and Windfall is the means to deliver the homes over and above the at least 42,000.</p> <p>Change required</p> <p>a. Allocate additional sites, including the available land west of Ashton Road, Trowbridge which is being promoted by Taylor Wimpey, to match the minimum required housing plus 20% in order to ensure the minimum homes required is achieved</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		Given the complexity and significance of the issues raised it is considered necessary to be present at the oral part of the examination.			

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2647</a>	<b>Consultee</b> Ms Elizabeth Burt Taylor Wimpey	<b>Agent</b> Mr Darren Parker Operational Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1113871	RPS Planning & Development  <b>Person ID:</b> 1133715	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge CATP		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Trowbridge Community Area Topic</p> <p>The Topic Paper states At Trowbridge, approximately 5,860 will be delivered which includes an area for strategic growth to the south east of the town (Ashton Park). An additional 950 dwellings will then be developed at the town only once improved secondary provision is in place towards the end of the Plan period and there has been a further assessment of effects on protected bat species and their habitats. (para 2.2)</p> <p>The provision of housing at Trowbridge is therefore subject to the delivery of a large urban extension and other qualifying criteria being met to enable other sites to come forward.</p> <p>The residual requirement at Trowbridge to meet the minimum housing required by the WCS is 2020 homes. It is noted in the Topic Paper (para 2.4) that woodland sites to the south east of Trowbridge support a breeding population of Bechstein bats, associated with the Bath and Bradford on Avon Bats SAC. All development will be required not to adversely affect this designation and to ensure that connectivity with the SAC is maintained, having particular regard to the Wiltshire Bats SAC Guidance.</p> <p>The Topic Paper goes on to conclude (para 5.22) Six available, achievable and deliverable sites are identified for allocation at the Principal Settlement of Trowbridge. Whilst not capable of delivering all the indicative housing requirement, these sites are considered to be the best and most appropriate options to allocate at the town. Development of the sites for housing would contribute positively towards meeting some of the indicative shortfall as well as delivering aims of the area strategy for the town through a plan-led approach to maintaining levels of housing supply.</p> <p>These six sites account for 800 of the 2020 home residual requirement. This is set against a backdrop of the delivery risks outlined above, namely the delays often associated with large urban extensions, school provision and bat mitigation. The scale of allocations especially given the risks outlined is inadequate for a Principal Settlement such as Trowbridge. Therefore, the Plan is not currently effective or justified. More sites should be allocated to meet the needs of Trowbridge and the wider HMA. The site at West of Ashton Road is suitable and available to meet some of the needs of Trowbridge and should be allocated for housing.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		Given the complexity and significance of the issues raised it is considered necessary to be present at the oral part of the examination.			

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2648</a>	<b>Consultee</b> Ms Elizabeth Burt Taylor Wimpey	<b>Agent</b> Mr Darren Parker Operational Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1113871	RPS Planning & Development  <b>Person ID:</b> 1133715	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - Land West of Ashton Road (Site 292 Land North of Green Lane)			Justified	Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Land West of Ashton Road (Site 292 Land North of Green Lane)</p> <p>To improve resilience and make the Plan sound further land should be allocated.</p> <p>As per the Trowbridge Community Area Topic Paper site 292 Land north of Green Lane, in the control of Taylor Wimpey, was removed from the SHLAA after Stage 3 because it was identified that it could have a major adverse effect in relation to the Bath and Bradford on Avon Bats SAC. This is not a site-specific issue it is one that applies across Trowbridge. It is however an issue that can be addressed on a site by sites basis. Appropriate mitigation is possible at the West of Ashton Road site.</p> <p>The readily available site is the subject of an outline planning application for up to 250 homes submitted in April 2016 and yet to be determined. In June 2017, a revised masterplan was submitted to take into account additional measures required to provide further mitigation for Bat habitat. The revised masterplan and technical notes are attached to this submission. Subsequent to which the Habitats Regulations Assessment (HRA) of the draft Wiltshire Housing Site Allocations Plan was published. The Plan (para 5.44) recommends developing a strategy for managing recreational pressure across the town. Detailed design and layout of schemes would need to consider additional planting and open space to protect and enhance these Biodiversity Action Plan priority habitats and thereby augment opportunities for bat foraging routes and roosting sites. This could include establishing dark corridors through sites to protect foraging routes and roosting areas for bats. Specific measures that will be required are explained for each site and funding contributions may be sought toward measures to be contained in the Trowbridge Recreation Management Mitigation Strategy. The Council has therefore recognised that mitigation can be implemented to address the issue of the Bats SAC. A planning application would provide the mechanism by which to consider the issue and employ appropriate mitigation.</p> <p>A review of the HRA has been undertaken and anticipated major adverse effects noted at the SHLAA review can be managed and mitigated. This is set out in the Technical Note attached to this submission. In summary, the findings are the Ashton Road site falls within the SAC zone of influence set out within the Housing Site Allocations HRA, as do draft allocations. However, the zone of influence is not based on location-specific evidence. The HRA acknowledges that individual sites within the zone of influence might not produce a significant effect on the SAC. The Ashton Road mitigation package has been prepared as a standalone scheme which could be effectively delivered prior to (or indeed in the absence of) Ashton Park mitigation being brought forward. The specific standalone measures that can be delivered at the site are:</p> <ul style="list-style-type: none"> <li>Design;</li> <li>A 100m buffer / standoff from Green Lane Wood;</li> <li>Avoidance of development within easy walking distance of Green Woods;</li> <li>The western boundary secured using a combination of SuDS, fencing and thorny planting;</li> <li>The boundary along Green Lane secured as above or by backing dwellings onto the hedgerow;</li> <li>New habitat creation to enhance bat habitat.</li> <li>Retention of all hedgerows within the public domain;</li> <li>Inclusion of dark corridors through the development;</li> </ul>				

Appendix Q - Schedule of representations

	<p>Minimisation of hedgerow breaks and use of vegetated hop-over features to ensure continued functionality of hedgerows as commuting features;            Other possible measures;            Habitat enhancement of Paxcroft Brook Park and;            Wardening and Country Park management.</p> <p>The outline application was made on behalf of Taylor Wimpey. The application forms a logical and sustainable location to fulfil some of the at least 12,137 homes required, as determined by the Council, in the remaining Plan period. As an application has been made by a housebuilder and a great deal of technical work has been completed the site is capable of delivering homes in the short term. The site is large enough to make a reasonable contribution to the housing land supply but not so large that it will be hindered by the complexities experienced elsewhere.</p> <p>The sustainability appraisal scoring of the land west of Ashton Road, identified as site 292 by the Council, is not significantly different to the other sites proposed for allocation (albeit the bat issue has been addressed at Ashton Road as above) including site 297 Elizabeth Way which received a scoring very similar to land west of Ashton Road.</p> <p>The land at Ashton Road is a sustainable location for growth and available now. It forms a logical location adjoining the settlement edge of Trowbridge and will deliver a range of homes to assist in meeting the housing needs of Trowbridge and Wiltshire as a whole.            [see attached for full representation]            Change required</p> <p>a. Add the site (292) West of Ashton Road to Table 5.7, Preferred sites identified for allocation for Trowbridge in the WHSAP Community Area Topic Paper - Trowbridge            b. Allocate land West of Ashton Road (292) for housing and add the site (to Table 5.3 at Policy H2, in the Wiltshire Housing Sites Allocations Plan</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4732026</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Given the complexity and significance of the issues raised it is considered necessary to be present at the oral part of the examination.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2649</a>	<b>Consultee</b> Mr James Proyer Planner	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		Persimmon Homes (Wessex)		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Soundness of the Plan		Justified	Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Persimmon Homes supports the preparation of the Wiltshire Site Allocations DPD as an opportunity to revise the out-of-date settlement boundaries and allocate new sites for housing to support the delivery of housing over the remainder of the Core Strategy plan period. However the draft Wiltshire Housing Site Allocations Plan is unsound because it is not: Positively prepared, Justified, Effective Consistent with national policy.</p> <p>The reasons why the draft Plan is not considered to be sound are detailed in these representations. The principal matters of soundness relate to:          The failure to identify sufficient land to meet the Council's overall objectively assessed need for housing          The Council's site selection methodology including the approach taken to the 'Stage 1' assessment and identification of 'areas of search' that excludes settlements that have capacity to support sustainable development, which is inconsistent with the spatial strategy set out in the Wiltshire Core Strategy          The exclusion of sites currently allocated for non-residential uses in 'Stage 2' of the assessment which is not justified or consistent with national policy          Inconsistency in the application of the sustainability appraisal carried out in 'Stage 3' of the assessment          Inconsistency in the application of the proposed settlement boundary review methodology.          Furthermore, on 14 September 2017, the Government published its proposed standardised approach to calculating the local housing need. The draft methodology will have implications for local authorities at an individual level and in Wiltshire the application of the proposed formula for assessing housing results in an increase in need compared to the current local assessment set out in the Wiltshire Core Strategy. Applying the Government's proposed formula, there is a requirement for 2,227 new dwellings per annum in Wiltshire over the period 2016-2026. Compare this to the Wiltshire Core Strategy which is based on 2,100 dwellings per annum, there is potential for considerable under-supply of housing in Wiltshire over the remainder of the plan period. The draft Wiltshire Site Allocations Plan is therefore planning for some 127 dwellings per annum short of the Government's emerging target (which equates to an undersupply of 2,540 dwellings over the whole plan period). The emerging Wiltshire Housing Site Allocations Plan offers the most suitable way forward for identifying further sites to meet this additional need. This would be a sound approach that would allow for a Plan that could be justified and consistent with emerging national planning guidance. The Plan is considered to be unsound and we wish to provide oral evidence.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Duty to Cooperate		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Plan is prepared under a legal 'duty to cooperate' requirement through the Localism Act 2011 which requires local authorities to work with neighbouring authorities and other prescribed bodies when preparing a DPD.</p> <p>Wiltshire Council identifies the need to maintain a five year land supply as one of the principal objectives of this Plan. It is therefore disappointing that the draft Plan makes no attempt to support the under-supply at the adjacent local authority of Swindon. Swindon Borough Council's land supply position stands at less than 2.5 years however it is clear that Wiltshire Council has not considered the needs of Swindon in this draft Plan. This Plan provided an opportunity to take forward a review of land to the West of Swindon within the Wiltshire Council administrative boundary and help meet the needs of Swindon.</p> <p>The two Local Authorities of Swindon and Wiltshire are preparing a joint Strategic Housing Market Assessment which will provide the opportunity to develop a joint Local Plan review. However Swindon and Wiltshire have recently adopted revised Local Development Schemes which do not include a commitment to this. Instead, a non-statutory Swindon and Wiltshire Joint Spatial Framework is to be developed for the period up to 2036.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The relationship between the draft Wiltshire Housing Site Allocations and emerging neighbourhood plans is not clear. Paragraph 2.22 states that the Site Allocations Plan does not take decisions in areas where Neighbourhood Plans have been made or are 'well advanced', however does not define this term. There is no guarantee that a draft Neighbourhood Plan will be progressed by the relevant Qualifying Body or be considered to meet the 'basic conditions' by an independent examiner. It is therefore possible that settlements with capacity for housing development have not been comprehensively assessed as part of the DPD plan-making process. With respect to areas where Neighbourhood Plans are 'well advanced' or have been made, Wiltshire Council would be encouraged to take a more positive approach to the preparation of the Housing Site Allocations DPD. The identification of 'reserve sites' would be supported as this would allow for new housing to come forward in the event that a Neighbourhood Plan allocation proved to be unavailable or undeliverable.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The purpose of the Plan stated in paragraph 1.1 of the draft DPD, principally to update the settlement boundaries and identify sites to demonstrate a five year supply of land for housing, is reflected in the plan objectives 1 and 2 set out in section 3 of the draft DPD. However the stated objective 3 which is “to allocate sites at the settlements in the County that support the spatial strategy of the Wiltshire Core Strategy” has been neglected in the plan-making process. The Council’s approach disregards opportunities to meet the housing shortfall in alternative ‘high-level’ settlements based only on perceived ‘over-delivery’ against the indicative housing need figures set out in the Wiltshire Core Strategy. For example, potential development sites in the Market Town of Westbury have not been subject to any assessment as part of this plan-making process, despite the location in a sustainable settlement.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	STAGE 1 - AREAS OF SEARCH		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The approach taken to identifying 'areas of search' to meet the remaining housing requirement is unsound. The decisions taken at stage 1 in selecting areas of search is inflexible and does not allow for a comprehensive consideration of potentially more sustainable sites for development in areas where the 'indicative' housing requirement has been met. Persimmon Homes supports paragraph 4.35 of the draft DPD which states that "It would not, however, be reasonable to expect the distribution and scale of land supply to adhere rigidly to the levels set out in the WCS. It would be unrealistic to expect as much. The WCS explains that levels are indicative and that there needs to be some flexibility." This is consistent with Wiltshire Council's adopted local plan, which is clear on this matter. Paragraph 4.20 of the Wiltshire Core Strategy states "The indicative figures also allow a flexible approach which will allow the council including through the preparation of the Site Allocations DPD and local communities preparing neighbourhood plans to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach which might otherwise prevent sustainable development proposals that can contribute to delivering the strategic objectives of the plan." The site selection process is therefore flawed as the process only seeks to allocate housing sites at settlements where land supply needs to be supplemented in order to meet the indicative requirements. Instead the selection process should consider the most suitable sites for development which fit with the spatial strategy to direct development to the most sustainable settlements. The Core Strategy Inspector within his report states that the HMAs should provide the basis of supply rather than the smaller community areas which could limit the flexibility and effectiveness of the plan. This is clearly outlined at paragraph 43 of his report: The CS is clear that the distribution of housing land in terms of ensuring adequate supply will be disaggregated in accordance with three housing market areas. I am satisfied, based on the broad assessments of housing need, that such an approach is an appropriate scale for consideration rather than the smaller community areas which would limit the flexibility and effectiveness of the plan. I am also satisfied that the identification of indicative levels of housing for Community Areas is not unduly rigid or prescriptive; such an approach will enable suitable flexibility to be applied by the Council in managing the effective delivery of necessary housing within the HMAs. The site selection process is overly rigid by only considering sites at locations where the 'indicative' requirement has not been met. In doing so the council has discounted sites from the outset which are more suitable and sustainable at alternative settlements. The site selection methodology is therefore not sound in this respect. The exclusionary criterion within the site selection process is unsound. The process excludes sites which are fully or partially within a Principal Employment Area, or other existing development plan allocation. The site selection topic paper places great emphasis on the council's requirement to undertake a SHLAA. However, the NPPF is also clear that the council should undertake a review of economic land in combination or at the same time (para. 161). The absence of this information and the councils approach to excluding all employment sites from the selection			
	Effective  Consistent with national policy			

Appendix Q - Schedule of representations

	<p>process is unsound. The plan is not justified when compared against reasonable alternatives or based on proportionate evidence. Furthermore the plan is not consistent with national policy.</p> <p>The NPPF also states that employment sites should not be protected where there is no reasonable prospect of a site being used for that purpose (para. 22). The NPPS also reiterates that land allocations should be reviewed regularly. The council's last employment land review was undertaken over 6 years ago and can therefore not be relied upon.</p> <p>In accordance with paragraph 22, the Council should include long term employment allocations in their review of potentially sustainable sites for new housing. This is particularly relevant to areas of search where the indicative remaining requirement is high, such as the Principal Settlement of Trowbridge. Paragraph 22 specifically references the need to support sustainable local communities and so the degree of local support should also be considered. Land to the west of Biss Farm (SHLAA site 3247) offers the potential to contribute to the housing shortfall at Trowbridge. The development of the site for residential use is supported by Trowbridge Town Council.</p> <p>In order for the plan to be positively prepared, justified and effective the council should assess and consider the release of employment land for residential development where there is no reasonable prospect of it being used for that purpose.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Table 4.8 of the draft Plan is misleading and should be amended to reflect the latest position and provide an additional buffer of 5% as required by paragraph 47 of the NPPF. This table states that the five year land supply estimate for the North and West Wiltshire HMA as of 2017/18 is 7.15 years. It is unclear why this differs from the Planning Inspectorate's appeal decision of 22 June 2017 at Forest Farm Chippenham (Ref: APP/Y3940/W/16/3150514) which considered that the Council could demonstrate a land supply of 5.40 years. Furthermore, is it to be considered that any reduction against the estimates set out in Table 4.8 represents an undersupply of housing land?

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Master Planning		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		As a general comment, it is critical that the approximate number of dwellings identified for each proposed site allocation is treated as indicative. For the majority of proposed site allocations, it is not possible at this stage in the planning process to prescribe an absolute figure for the capacity of each site. A design-led approach to the master planning of each site should be adopted, as informed by a detailed understanding of the site constraints and opportunities. The following sections of the report discuss the site selection process in areas of search in detail.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Persimmon Homes supports the identification of land for new housing at Market Lavington. The Wiltshire Core Strategy identifies that 490 dwellings should be delivered in the Devizes Community Area 'remainder' between 2006 and 2026. According to Wiltshire Council's Housing Land Supply Statement (March 2017) there is an indicative remaining requirement of some 154 dwellings still to be identified. As a Local Service Centre with a good level of services and facilities, it is appropriate to deliver a high proportion of this identified local need at Market Lavington, particularly given the lack of housing development at the settlement over recent years. Persimmon Homes supports the allocation of sites 2055 and 530 for residential development. The land offers a suitable location for residential development and is available and deliverable in the short term. Persimmon Homes has undertaken work at the site and can confirm that all technical issues can be resolved.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	A Visual Appraisal has been prepared to provide an analysis of views into SHLAA site 2055 and is attached to this representation. The report demonstrates that the whole of the site has the potential to be developed for residential use without significant adverse visual impacts, and that any potential impact on landscape and visual receptors will be localised. Furthermore, through appropriate mitigation, comprehensive redevelopment of the site has the potential to enhance the residential edge of Market Lavington. Wiltshire Council's assessment of the site appears to support these conclusions as table F.3 of the Devizes Community Area Topic Paper identifies that the site is likely to have a minor adverse effect (-) against Sustainability Appraisal (SA) objective 7 (landscape) as per the other sites considered as part of the Market Lavington area of search. There is no reasonable justification for the exclusion of half of SHLAA site 2055 on the basis of landscape impact and it is therefore recommended that the draft Plan be amended to allocate the whole of SHLAA site 2055. The proposed approximate number of dwellings should also be increased to reflect this amendment to the site area.

<b>Comment ID:</b>  <a href="#">2666</a>	<b>Consultee</b> Mr James Proyer Planner  Persimmon Homes (Wessex)  <b>Person ID:</b> 983136	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - SHLAA SITE 1300 - ASTLEY CLOSE, PEWSEY		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Pewsey Community Area Topic Paper considers that the indicative residual requirement for the Pewsey Community Area over the Plan Period has been met and concludes that therefore the Wiltshire Site Allocations Plan does not need to allocate additional land in this area. This is not a sound basis for failing to consider any of the potentially developable sites at Pewsey for allocation. The Wiltshire Core Strategy is clear that the housing requirement figures that are afforded to individual settlements and Community Areas are indicative, and that a flexible approach to delivery of housing should be adopted.			
	It is noted that a relatively high proportion of the housing already provided for at Pewsey is within developable commitments that have not yet been built. The deliverability of some of the committed sites in this Community Area is disputed. The Highview site at Marlborough Road is identified in the Pewsey Neighbourhood Plan for approximately 49 dwellings, however it is understood that the site is not currently available for development. This site is within the settlement boundary of the Neighbourhood Plan and before this was included in the Limits of Development set out in the Kennet Local Plan 2011 (adopted 2004) - so the principle of development at the site has been set for some time. It is noted that the Council's land supply statement identifies that the site is unlikely to be delivered in the next five years. There is no reasonable prospect of this site delivering housing in the Plan period and therefore alternative sites should be considered.			
The housing land supply position in the East Wiltshire HMA is strong due to a relatively high number of completions early in the plan period and a number of developable commitments still to be built. However it is noted that for each of the last five years the annual number of completions has been below the annualised housing requirement for the East Wiltshire HMA (297 dwellings/annum) and so the area is unlikely to fare well against the Government's proposed Housing Delivery Test.				
If the Council were to reconsider the potential for allocating land at Pewsey for housing, Persimmon Homes would support the identification of land at Astley Close (SHLAA Site 1300).				
The site has not been subject to detailed SA through the preparation of the Housing Site Allocations Plan; however the table below sets out a proposed assessment against the Council's sustainability objectives.				
As the highest order settlement in the Pewsey Community Area, the Local Service Centre of Pewsey represents the most sustainable location for housing development. The site is positioned in a sustainable location close to the existing services and amenities within the settlement.				
The settlement of Pewsey is washed over by the North Wessex Downs Area of Outstanding Natural Beauty (AONB) which the NPPF attaches great weight to conservation of. However the effect against sustainability objective 7 (landscape) is not likely to be major adverse. The North Wessex Downs AONB office carried out a landscape sensitivity assessment of SHLAA sites in the AONB in 2012 and thus provides a starting point for the consideration of potentially developable sites in this landscape. The AONB report concluded that site 1300 had some potential for development. The site is well contained by mature trees and hedgerows which would be retained as part of comprehensive development of the site.				

Appendix Q - Schedule of representations

There are no other environmental designations at the site. The site is not within an area of high risk for flooding. Access to the site will be taken from Astley Close, which is acceptable according to the Local Highways Authority.

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2668</a>	<b>Consultee</b> Mr James Proyer Planner	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Persimmon Homes (Wessex)  <b>Person ID:</b> 983136		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission site - SHLAA SITE 3247 – LAND WEST OF BISS FARM (WEST ASHTON ROAD)		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Wiltshire Council's assessment of SHLAA site 3247 is unsound as it is not justified or consistent with national planning policy. The Council's consideration of the site is limited to stating that it is "Part of the Core Strategy strategic allocation south west of Trowbridge" and on this basis removes the site from further consideration. This statement is inaccurate as the site is not part of the Mixed Use Allocation identified at Ashton Park, South East Trowbridge and therefore the assessment with regard to this site is not robust.</p> <p>The site is identified for employment use in the current local plan (Wiltshire Core Strategy, adopted 2015) under Core Policy 35 however the draft Plan is not sound on the basis that the evidence does not justify the exclusion of the further consideration of this site for residential development. Paragraph 22 of the NPPF states that "Planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. Land allocations should be regularly reviewed. Where there is no reasonable prospect of a site being used for the allocated employment use, applications for alternative uses of land or buildings should be treated on their merits having regard to market signals and the relative need for different land uses to support sustainable local communities." In accordance with paragraph 22, the Council should include long term employment allocations in their review of potentially sustainable sites for new housing. This is particularly relevant to areas of search where the indicative remaining requirement is high, such as the Principal Settlement of Trowbridge.</p> <p>The site has been identified for employment use for some considerable time, having been allocated in the previous local development plan (the West Wiltshire District Plan, adopted 2004) prior to the allocation in the Wiltshire Core Strategy. The site has been marketed for employment use with a valid planning permission and two access points on the new Leap Gate road have been created. However no suitable employment use has been forthcoming. It should also be noted that the context of the site has changed. The site is currently located on the south east urban edge of the Principal Settlement of Trowbridge, however once the strategic allocation at Ashton Park has been developed the site will no longer offer an edge of town employment opportunity.</p> <p>The site offers an available and deliverable option to contribute to the housing supply shortfall at the Principal Settlement of Trowbridge in a sustainable location.</p> <p>Persimmon Homes is to submit a planning application for a mixed use development at land to the west of Biss Farm in October 2017. The proposed development will comprise circa 270 dwellings (including 30% affordable homes), a play area, a pub/restaurant (Use Class A3/A4), a residential care home (Use Class C2), and land for a Primary School (Use Class D1). It is considered that this proposed site masterplan reflects a more appropriate and deliverable way of developing this allocation. Potential end-users for the non-residential uses have been identified.</p> <p>The site has not been subject to detailed SA; however the table below sets out a proposed assessment against the Council's sustainability objectives.</p> <p>As per the other land considered for development at Trowbridge, the site is located within the consultation zone of Bath and Bradford on Avon Bats Special Area of Conservation (SAC). Although the SAC is relatively well removed from the site (7.9km), woodlands in closer proximity to the site (namely Biss Wood and Green Lane Wood) have been identified as supporting important breeding populations of Bechstein's Bat, a qualifying feature of the SAC, which are functionally linked to the SAC. As such, proposed development of the site will need to be subject to a</p>			

Appendix Q - Schedule of representations

Habitats Regulations Assessment (HRA) under the Conservation of Habitats and Species Regulations 2010, to assess the potential for likely significant effects on European designations (i.e. the SAC). An Ecological Appraisal and additional report to inform the HRA have been prepared to support the planning application to be submitted. It is considered that development of the site is not likely to have a major adverse effect against SA objective 1 (biodiversity). It should be noted that SHLAA site 3247 is at its closest point some circa 600m from Biss Wood and there is the ability for mitigation measures to reduce any effect on the woodland.

There are no other environmental designations relevant to the site and therefore the proposed development is not likely to have a moderate-major adverse effect against any of the Council's other SA objectives. A Landscape and Visual Impact Assessment (LVIA) has been prepared to support the emerging planning application. The LVIA concludes that there will be no significant effects in respect of changes to landscape character associated with the proposed development. The option is likely to have a minor adverse effect against SA objective 7 (landscape) because mitigation measures are achievable to reduce the significance of effects. The site is well contained and the proposed development includes a substantial landscape buffer to Blackball Brook to the north.

Due to the high capacity of the site to contribute to local housing needs and potential to accommodate proposed non-residential uses (such as a primary school, care home, pub) the site option is likely to have a moderate-major positive effect against objectives 8 (housing), 11 (economic growth) and 12 (employment).

Table 5.1.2.1 Proposed Sustainability Appraisal of SHLAA Site 3247

SHLAA Ref	Capacity	SA Objective											
		1	2	3	4	5	6	7	8	9	10	11	12
3247	250-350	--	-	-	-	-	-	-	+++	-	-	++	++

Persimmon Homes notes Trowbridge Town Council's comments to this consultation in support of the allocation of SHLAA site 3247 for residential development as a "logical extension to the town" (Trowbridge Town Council representations to draft Wiltshire Housing Site Allocations Plan consultation, dated 5 September 2017). These representations are made following a public consultation event held by Persimmon Homes at Trowbridge Civic Centre on 25 May 2017 where the development proposals were presented and discussed with the local community.

The option at Biss Farm represents a more sustainable location for housing development than the other options in Trowbridge put forward for allocation in the draft Plan. By way of example, the draft Plan identifies land east of Southwick Court (SHLAA site 3565) despite likely moderate adverse effects against sustainability objectives 1, 2, 6, 7 and 9. Of particular concern is the potential of the development of the Southwick Court option to result in significant adverse effects on the historic environment and landscape at this rural edge location. The Council's SA comments on these matters as follows "The site includes a number of features plotted on the Wiltshire and Swindon Historic Environment Record which relate to a post-Medieval water meadow system. Southwick Court lies immediately to the south of the site and contains a number of important heritage assets including a Medieval moat and farmstead of which the farmhouse is Grade II\* Listed. A Heritage Impact Assessment and archaeological assessment would be required (SA Obj. 6). The site functions as a green infrastructure corridor. The fields are large and open in character and exhibit a strong relationship with the Lambrook Stream (and its floodplain)/Southwick Court. Development of the site would lead to an urbanising effect. The stream and its floodplain, along with mature hedgerows/trees help define a logical edge to the current built framework in landscape terms. Mitigation of landscape and visual impacts could be problematic (SA Obj. 7)." This assessment is not favourable and raises concerns as to whether the site is developable. Trowbridge Town Council also opposes the allocation of site 3565.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2671</a>	<b>Consultee</b> Mr James Proyer Planner  Persimmon Homes (Wessex)  <b>Person ID:</b> 983136	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - SHLAA SITE 600 – LAND AT SUTTON LANE, SUTTON BENGER		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	According to Wiltshire Council's Housing Land Supply Statement (March 2017) there is an indicative remaining requirement of some 153 dwellings still to be identified in the Chippenham Community Area 'Remainder' (rural) area. Sutton Benger is one of five Large Villages in the Chippenham Community Area however the Council's Topic Paper concludes that despite the availability of potentially suitable development sites, Sutton Benger should not be carried forward for further assessment. The reasons given for not taking Sutton Benger forward relate to the higher proportion of recent growth at the settlement compared to other Large Villages in the Community Area and concerns regarding the capacity of the local Primary School. According to the Council's Topic Paper the number of dwellings at Sutton Benger is set to grow by 27% over the twenty year plan period 2006-2026. Whilst it is evident that this is a greater proportionate increase than the other villages in the Chippenham rural area, this is not a reasonable justification for eliminating the settlement from further consideration. Sutton Benger is a highly sustainable location which benefits from a good range of services and amenities not common to all Large Villages (including a Primary School, Doctor's Surgery, Recreation Ground, Hotel, Pub and Restaurants), yet no weighting is afforded to the relative sustainability of the settlement. Furthermore, it is unclear whether this proportion of growth is disproportionate to the level of growth in other North and West Wiltshire Large Villages, particularly in rural areas where the 'indicative' housing requirement has been met such as in the Calne, Corsham and Trowbridge Community Areas (the respective Topic Papers do not provide this data). The draft Site Allocations Plan identifies only two sites within the Chippenham Community Area rural area, which have a combined capacity for approximately 80 dwellings. This is some 73 dwellings short of the 153 dwelling remaining requirement set out in the Council's latest Housing Land Supply Statement for the area. The land at Sutton Lane (SHLAA site 600) is available and developable now and has the capacity to address this shortfall. The draft Site Allocations Plan has allocated other sites in the county where primary school capacity is an issue (e.g. Trowbridge). This is not a sound reason to not allocate land for new homes. The site has not been subject to detailed SA; however the table below sets out a proposed assessment against the Council's sustainability objectives. There are not considered to be any moderate or major adverse effects of developing the site. There are no environmental designations at the site and there is no known priority habitat on the site (SA objective 1). Sutton Meadows SSSI is approximately 530m south of the site and the potential for impact would need to be assessed however it is considered that this can be adequately mitigated. The site is outside but adjacent to the Sutton Benger Conservation Area. The option would likely have a minor adverse effect against SA objective 6 (historic environment) because mitigation measures are achievable to reduce the significance of effects. Despite the site's location adjacent to the Conservation Area there are no Listed Buildings within 200 metres of the site. The site is not located within an Area of Outstanding Natural Beauty and there are no Tree Preservation Orders on the land.		Effective	

Appendix Q - Schedule of representations

The site is located close to the village centre and its services and amenities. There is an existing public footpath running through the site (SBEN19A), which could be enhanced through the development of the land. Vehicular access to the site would be taken from Sutton lane which runs along the eastern boundary.

Table 4.2.1.1 Proposed Sustainability Appraisal of SHLAA Site 600

SHLAA Ref	Capacity	SA Objective												
		1	2	3	4	5	6	7	8	9	10	11	12	
600	80	-	-	-	-	-	-	-	-	+++	-	-	++	+

As noted in the Council's Topic Paper, the emerging Sutton Benger Neighbourhood Plan is not at an advanced stage in its preparation and should therefore not be relied on to identify land for housing.

**Attached files (Please see Objective)**

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

The Plan is considered to be unsound and we wish to provide oral evidence.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2672</a>	<b>Consultee</b> Mr James Proyer Planner  Persimmon Homes (Wessex)  <b>Person ID:</b> 983136	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes								
			<b>Do you consider the draft WHSAP is sound?</b>	No								
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared									
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Westbury CommunityArea Remainder		Justified									
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Westbury has suitable sites for development and that further housing at the town would not undermine the spatial strategy of the Wiltshire Core Strategy. There are other Market Towns in Wiltshire that have a greater number of completions and developable commitments than Westbury (such as Melksham, also in the North and West HMA). The Principal Settlements of Chippenham, Trowbridge and Salisbury all have a far greater level of committed housing land than the Market Towns in the county and therefore further development can be identified at the Market Towns without undermining the settlement hierarchy. The strategy for the allocation of sites to meet the identified local need should be focused on the spatial strategy set out in the Core Strategy and not the indicative number of dwellings assigned to each settlement and Community Area. Westbury is a market town defined as having the ability to support sustainable patterns of living and the potential for 'significant' development that will increase the jobs and homes to help sustain and where necessary enhance their services and facilities and promote better levels of self containment. However, the council have sought not to identify any sites for development, within this DPD, on the basis that the 'indicative' requirement has already been met. This is considered unsound as the approach conflicts with the local plan which states that the 'indicative' requirements should not prevent sustainable development proposals coming forward that can contribute to delivering the strategic objectives of the plan. The Principal Settlement of Trowbridge also falls within the North and West Housing Market Area and is only 5mins away via rail and 15mins via road from Westbury. The housing requirement for Trowbridge Town between 2006 and 2026 is 6,810. The residual remainder to be identified is 2,020 homes (2017-2026) which equates to an annualised requirement of 224 per annum. The town has 1,825 developable commitments for the period up-to 2026 this equates to 202 dwellings per annum. In combination the council therefore requires 426 dwellings per annum to be delivered to meet its 'indicative' requirement. From the period 2006-16 Trowbridge has delivered an average of 270 per annum some 156 dwellings short of the requirement. The allocation of an additional 800 units to the town at sites divorced from the town centre and subject to considerable constraint will not serve to overcome this issue. The council appear to have given no consideration of the ability of localised housing markets to take-up the quanta of housing proposed. Based on previous delivery rates and the size of the settlement it is clear that Trowbridge will not be able to deliver the level of growth proposed in the plan period. A more reasonable alternative appears to be the disaggregation of a proportion of the housing requirement to an alternative location within the same HMA. Westbury provides this opportunity with only 931 developable commitments equating to only 103 dwelling per annum compared to 426 required at Trowbridge.		Effective

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The Plan is considered to be unsound and we wish to provide oral evidence.			

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2673</a>	<b>Consultee</b> Mr James Proyer Planner  Persimmon Homes (Wessex)  <b>Person ID:</b> 983136	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes																																									
			<b>Do you consider the draft WHSAP is sound?</b>	No																																									
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared																																										
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - SHLAA SITE 268 - LEIGH PARK (LAND WEST OF DARTMOOR ROAD)		Justified																																										
			Effective																																										
			Consistent with national policy																																										
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Council has not considered any sites at Westbury town in the preparation of the draft Wiltshire Site Allocations Plan. SHLAA site 268 offers the potential to make a moderate contribution to the land supply in the North and West Wiltshire HMA in accordance with objective 2 of the draft Plan.</p> <p>A full planning application (Ref: 16/08998/FUL) at Land West of Dartmoor Road for a residential development comprising 26 dwellings and associated landscaping was refused by Wiltshire Council on 21 September 2017.</p> <p>The only reasons for refusal relate to the principle of development due to the location of the site outside the existing Limits of Development and therefore a conflict with Core Policies 1, 2 and 32 of the Wiltshire Core Strategy. As detailed in the Officer's Report, there are no other officer objections to the scheme following amendments made to the layout and design during the determination process.</p> <p>The site is located in a sustainable location on the edge of the existing settlement of Westbury close to services and amenities within the town including the adjacent Primary School. As confirmed by the Officer's Report the proposed access to the site is safe and the transport impacts of the development are acceptable. Following amendments made to the design of the scheme, the Council's landscape officer considered that the impacts could be successfully mitigated and that the landscape could be enhanced. The design, layout and mix of units are considered to be acceptable. The Council's ecology officer supports the proposal to manage and enhance the degraded area of land to the west of the application site as part of any permission on the site, which will be secured through an Ecological Management Plan. The Officer's Report considered that the scheme provided and maintained acceptable levels of residential amenity. The Council's land drainage engineer raised no objection to the scheme. The quantum and mix of affordable housing was accepted by the Council. The Section 106 Heads of Terms are agreed in principle. The site therefore represents an excellent opportunity to contribute to the five year land supply, subject to a change in planning policy position through the allocation of the site or an amendment to the settlement boundary.</p> <p>The site has not been subject to detailed SA; however the table below sets out a proposed assessment against the Council's sustainability objectives. There are no moderate or major adverse effects of developing the site.</p> <p>Table 5.3.1.1 Proposed Sustainability Appraisal of SHLAA Site 268</p> <table border="1"> <thead> <tr> <th rowspan="2">SHLAA Ref</th> <th rowspan="2">Capacity</th> <th colspan="12">SA Objective</th> </tr> <tr> <th>1</th> <th>2</th> <th>3</th> <th>4</th> <th>5</th> <th>6</th> <th>7</th> <th>8</th> <th>9</th> <th>10</th> <th>11</th> <th>12</th> </tr> </thead> <tbody> <tr> <td>268</td> <td>26</td> <td>-</td> <td>-</td> <td>-</td> <td>-</td> <td>-</td> <td>-</td> <td>-</td> <td>-</td> <td>+++</td> <td>-</td> <td>-</td> <td>++</td> <td>+</td> </tr> </tbody> </table>				SHLAA Ref	Capacity	SA Objective												1	2	3	4	5	6	7	8	9	10	11	12	268	26	-	-	-	-	-	-	-	-	+++	-	-	++	+

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2674</a>	<b>Consultee</b> Mr James Proyer Planner  Persimmon Homes (Wessex)  <b>Person ID:</b> 983136	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes																																							
			<b>Do you consider the draft WHSAP is sound?</b>	No																																							
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared																																								
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - SHLAA SITE 3205 - MANE WAY		Justified																																								
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The site totals approximately 65 acres. The site is relatively flat and does not have any impact on the wider landscape or views into or out of the site. The site is well enclosed and is bound by the railway line to the north, Mane Way to the east; the doctor's surgery and the A3098 to the south and agricultural land/associated buildings to the west with the railway line beyond. There is a scheduled ancient monument to the east of the site which will need to be retained and protected. Persimmon Homes have undertaken a setting assessment of the Penleigh monument. The illustrative buffer is reflective of this assessment. The buffer will safeguard a view corridor between the moat and historic buildings at Penleigh (should vegetation be removed in the future). It is also anticipated that a Management Plan for the moat will be submitted as part of any application, or commit to doing this at a fixed point in the future. This will ensure the ongoing preservation of the monument alongside a commitment to interpretation panels to aid the public understanding of the monument. The Station Road strategic allocation lies to the north which includes the 'provision of a link road connecting Station Road and Mane Way, via a new railway bridge crossing'. The outline application for land at Station Road includes an 'illustrative layout' which shows a new bridge over the railway line. The delivery of the missing road link forms one of the key objectives identified in the Local Plan and is a long-term objective of planning policy in Westbury and saved policy T4 from the West Wiltshire District Plan makes it clear that this should be funded by new development. Having considered the viability of delivering a 350 unit scheme on land west of Mane Way it is proposed that the development could help deliver the bridge funding gap and the land contribution to deliver the bridge.		Effective

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons: Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion. Justified- The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable. Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets. Consistent- The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection. For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Persimmon Homes proposes an amendment to the settlement boundary at Westbury. The existing western edge of the settlement boundary follows the railway line and the A3098 (Mane Way). This existing infrastructure forms a physical boundary to the built edge of the town along this route. There is however a parcel of land to the east of Mane Way that is excluded from the existing boundary (grid reference D14). The review of the settlement boundary offers the potential to correct what is assumed to be a drafting error from the preparation of the previous local development plan, and therefore an amendment to the proposed settlement boundary is sought.</p> <p>This proposed change would be consistent with the Council's draft settlement boundary review methodology (Topic Paper 1, Table 5.1) which states "Where practical, the draft settlement boundaries follow clearly defined physical features, such as, walls, fences, hedgerows, roads and water courses in order to define the built area of the settlement." Indeed the Westbury Community Area Topic Paper identifies a number of amendments to the existing settlement boundary for this reason, stating "Amend boundary to follow but not include clearly defined physical features - the road".</p> <p>This justification is relevant to the amendment proposed in the attached plan. Appendix 7.4.1 – proposed amendment to Westbury Town Limits of Development</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am utterly astounded to hear that this is even under consideration. If permission has already been refused on the grounds of 'preserving the character and scenic quality of the landscape' twice and nothing has changed - why on earth are we here again?</p> <p>The Council stated in its Core Policy just two years ago that 'it does not wish to deliver strategic housing in either large or small villages in the county', so why are you going back on your word?</p> <p>This site is totally unsuitable. The B3098 cannot cope with the increase in traffic that these houses will produce, let alone the heavy vehicles involved in the construction of this site. There will be serious environmental consequences with air pollution caused by increased CO2 emissions.</p> <p>An estate of this size is NOT needed in this village. We have had two new estates in recent years, Chestnut Corner and Pear Tree Orchard; surely we have fulfilled our responsibility with regards to housing. Furthermore, I understand that plans are already underway for additional housing at the Pear Tree site. To suggest that this is the ONLY suitable site in the Westbury area is ridiculous. Westbury itself is currently under mass development with a huge estate on Bitham Park and another proposed on MOD land on the other side of town. Bratton does not have the infrastructure to support this level of house building. Healthcare services are a particular concern and woefully inadequate in both Bratton and Westbury.</p> <p>The countryside in this area is beautiful, and rich in both archaeology and flora and fauna. Featured in television adverts and admired by locals and tourists alike, this will be ruined! Have the consequences for the wildlife of this area been considered? What will the impact be on our historic landscape?</p> <p>I AM STRONGLY OPPOSED TO THIS DEVELOPMENT</p>

Comment ID:	<a href="#">2685</a>	<b>Consultee</b> Mr & Mrs Emberson  <b>Person ID:</b> 1134103	<b>Agent</b> Mr Matt Williams Planning Partner  Brimble, Lea & Partners  <b>Person ID:</b> 931633	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.52				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This representation relates to the exclusion of SHLAA Site 3516 and the West Warminster Urban Extension allocation (WWUE) from the revised settlement boundary for Warminster.</p> <p>According to Table D.4 in the Warminster Community Area Topic Paper – Warminster (June 2017) (WCATP), Site 3516 was graded red under exclusionary criteria 1 because the "Site is detached from the built edge of the town".</p> <p>According to exclusionary question 1, the test in this case is whether the site is isolated from the urban edge of the settlement i.e. not adjacent to the settlement boundary and not adjacent to a SHLAA site that is. The stated consideration about the site's relationship to the built edge is therefore incorrect as the exclusionary question asks about the site's relationship to the urban edge of the town.</p> <p>Site 3516 is not isolated from the urban edge of the settlement as it lies immediately opposite Crusader and Warminster Business Parks which have been specifically included in the revised settlement boundary for Warminster which, according to Table A.1 in the WCATP, is because the area of built employment development is physically related to the settlement. It therefore follows that Site 3516, which is immediately opposite the business park, is also physically related to the settlement and, significantly, is adjacent to this revised settlement boundary. This is well illustrated in the enclosed extract of the map of Warminster SHLAA sites in Appendix B of the Warminster Community Area Topic Paper.</p> <p>As such, the Site should have been graded green and proceeded to the subsequent assessments. It would have then passed all of the subsequent stage assessment criteria on the basis that a recent application for outline planning permission to develop the Site was only refused on the basis that it was outside the settlement boundary defined in the Core Strategy, thereby confirming that there are no constraints or technical objections to the development of the site as a matter of principle (reference 16/12036/OUT). In summary, the site constitutes previously developed land in a sustainable location in terms of accessibility to local services and facilities by means other than the car. For these reasons alone, the site should have been included within the revised settlement boundary for Warminster.</p> <p>Notwithstanding the Site's relationship to the business parks included within the revised settlement boundary, and the recently tested merits of the site as a matter of principle, the site is adjacent, and actually partly within, the WWUE allocation. This is highlighted in the enclosed extract of the Warminster Proposals Map in the adopted Core Strategy. The Council is absolutely dependent on this allocation coming forward as part of its supply of housing and the Site will therefore be seen in the context of a significant urban extension and established business parks. The Site is therefore consumed by existing and forthcoming urban development and not in an isolated countryside location divorced from the town, as the Council allege.</p> <p>On the subject of the WWUE allocation, it has been noted from the Topic Paper 1 – Settlement Boundary Review Methodology (June 2017) that the draft settlement boundary review methodology, developed from a consideration of consultation feedback and the policy and best practice reviews, proposed to include site allocations identified in the development plan. However, it would seem that many of those who responded to the informal consultation disagreed with the inclusion of site allocations within the settlement boundary for reasons similar to that behind their opposition to the inclusion of unimplemented planning permissions which, in summary, was because of the uncertainty around the final built form of any development.</p>			

Appendix Q - Schedule of representations

	<p>There are a number of reasons why individual planning permissions may not be implemented although there is certainty that site allocations will come forward and whilst the actual built form of the allocation may be unknown, Site 3516 will be seen in the context of this urban extension. Even if the site is adjacent to open space or recreation areas, these spaces/areas will be seen in the context of the built environment of the extended town and will not relate more closely to the open countryside. As such, the WWUE allocation should also be included within the revised settlement boundary of Warminster.</p> <p>The Site Allocation Plan runs contrary to the Government's stated commitment in the Housing White Paper that policies and plans should allow a good mix of sites to come forward for development, particularly noting that small sites were particular opportunities for custom builders and smaller developers. A review of the Site Allocations Plan, however, reveals that not one single small site (i.e. less than 10 dwellings) has been allocated. Of the 24 sites allocated, 14 (58%) are for 10-50 dwellings which suite medium-sized builders and the remaining 10 are for more than 50 dwellings which only suits medium-large developers. Given the Government's clear policy direction of travel and the Council's traditional reliance on small sites, the decision to not allocate any small sites runs contrary to national policy.</p> <p>The inclusion of SHLAA Site 3516 and the WWUE allocation would be a justified inclusion within the revised settlement boundary for Warminster and would consequently make the Wiltshire Housing Site Allocations Plan sound. The inclusion of the allocation would, of course, have ramifications for other parts of the Plan where allocated sites have been excluded from the revised settlement boundaries. However, unlike speculative permissions which may lapse for a number of reasons, the Council is absolutely dependent on site allocations coming forward for development to satisfy the national planning policy requirement to boost significantly the supply of housing by, inter alia, identifying specific deliverable and developable sites to provide the full, objectively assessed needs for housing as such, there is no justifiable reason for excluding site allocations from the settlement boundaries. It is also noteworthy that the initial settlement boundary review methodology, which was correctly based on policy and best practice reviews, included site allocations which supports this representation.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4734129 / 4734128</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>It is considered necessary to participate to discuss the merits of SHLAA Site 3516 given its very clear relationship to the established business parks on the opposite side of Bath Road and the WWUE allocation to the rear and side (noting that part of the site is within the strategic allocation and therefore inherently accepted as being sustainable).</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Comments on the Housing Site Allocations Plan (HSAP)</p> <p>4. As you will be aware, the primary focus at this stage of the Local Plan's preparation is on the soundness of the plan, with regard to it being positively prepared, justified, effective and consistent with national policy. The following detailed comments set out the ESFA's view of the plan's soundness in respect of education provision.</p> <p>5. The ESFA supports the Council's allocation and safeguarding of land for schools as set out in the following policies:                      H1.1, Land at Empress Way                      H2.1, Elm Grove Farm                      H2.11, Land at the Street, Hullavington                      H3.1, Land at Netherhampton Road</p> <p>6. While the ESFA supports the safeguarding of land for schools, the plan is inconsistent in its approach to seeking developer contributions for construction costs of new schools and school expansions. For instance, paragraphs under housing sites (Chapter 5) sometimes refer to contributions being required to increase local school capacity, in addition to safeguarded land where appropriate, but this is missing elsewhere. If local school capacity is considered sufficient to accommodate the pupils generated by development, this should be explained in the document. However, where land is safeguarded within a development site because a need has been identified, the requirement for contributions to deliver the school should be explicit in the policy. To address these inconsistencies, the following minor modifications are recommended:                      Policies H1.1 (land at Empress Way), H2.1 (Elm Grove Farm), H2.11 (land at the Street, Hullavington) and H3.1 (land at Netherhampton Road) – include within the policies a requirement for school construction costs and the expected trigger point for delivery, and supplement the supporting text with cross-references to the Infrastructure Delivery Plan (IDP) and the Council's Section 106 Methodology.                      Policies H1.2, H1.3, H1.4, H2.5, H2.10, H2.12, H2.14, H3.5, H3.6 – make explicit reference in supporting text to the requirement for education contributions to increase local school capacity, or demonstrate that sufficient capacity exists to meet needs arising from new development. Reference should be made as appropriate (for example, paragraphs 5.44 and 5.128) on the impacts of development on secondary school provision, and how delivery will be secured.</p> <p>7. The amendments recommended above would help demonstrate that the plan is positively prepared in seeking to meet objectively assessed infrastructure requirements, effective in setting clear delivery requirements, and justified based on proportionate evidence.</p> <p>Evidence base</p> <p>7. The IDP has not been published alongside the HSAP for consideration as part of this consultation, though it is a crucial part of the evidence base. Published with the Community Infrastructure Levy (CIL) documents on the Council website, the IDP does not include an assessment of how many school places are generated by the sites in the HSAP, and how/where the places are to be delivered. Although updated in December 2016, the IDP does not appear to reflect additional housing in HSAP or the additional education infrastructure needs which have been identified. Prior to submission of the plan for examination, the Council should consider revising the IDP to include the latest forecast school construction</p>				

Appendix Q - Schedule of representations

	<p>and expansion projects and the costs of provision. In light of the reference in paragraph 5.16 to the expansion of special schools, it may also be beneficial to update the Council's Section 106 methodology to include pupil yield and provision costs for special school places, taking account of local evidence and national cost data.<sup>1</sup> This would support the Council's efforts in securing developer contributions and help to demonstrate that the plan is effective, justified and positively prepared.</p> <p>The Council has produced various topic papers to support the HSAP. It would be helpful if a Planning for Schools topic paper could also be produced, expanding on the evidence in the Council's IDP (as revised) and explaining the interplay between CIL and Section 106 for education provision in Wiltshire. At present, the R123 list for CIL refers to some specific secondary school projects, implying that all other education contributions will be sought through Section 106 Agreements. The Planning Obligations SPD (2016) does not prevent this, though it recognises the legal limitations on pooling funds from Section 106 Agreements. A topic paper on Planning for Schools might also clarify how CIL and Section 106 have been considered in the Council's Viability Assessment, which appears to assign a nominal Section 106 charge of £1000 per dwelling, which is substantially below the amount that would be charged via Section 106 for primary education provision. The topic paper should set out clearly how the forecast housing growth at allocated sites has been translated (via an evidence based pupil yield calculation) into an identified need for specific numbers of school places and new schools over the plan period. This would help to demonstrate more clearly that the approach to the planning and delivery of education infrastructure is justified based on proportionate evidence. If required, the ESFA can assist in providing good practice examples of such background documents relevant to this stage of your emerging Plan.</p> <p>Developer Contributions and CIL</p> <p>One of the tests of soundness is that a Local Plan is 'effective' i.e. the plan should be deliverable over its period. In this context and with specific regard to planning for schools, there is a need to ensure that education contributions made by developers are sufficient to deliver the additional school places required to meet the increase in demand generated by new developments.</p> <p>In the paragraphs above, the ESFA has requested modifications to the HSAP to ensure that sufficient developer contributions are sought in all cases. In the opinion of the ESFA, the HSAP and its evidence base do not at present demonstrate deliverability of education provision, or fully meet the tests of soundness, due to a lack of clarity and consistency with regard to developer contributions. The ESFA considers this to be rectifiable through minor modifications and updates to the evidence base as suggested above, ensuring that:</p> <p>Policies require offsite contributions from all housing sites that do not provide an onsite school, where there will be insufficient school capacity to absorb the demand for school places generated by the development.</p> <p>Free transfer of land to the Council and construction costs are to be provided by the development, including trigger points for delivery, on sites which include a school.</p> <p>Clear references are made to the funding mechanism to be applied, whether Section 106 or CIL, and cross-references to the relevant evidence that justifies this approach.</p> <p>The ESFA would be particularly interested in responding to any update to the IDP or review of infrastructure requirements, which will inform any CIL review R123 list. As such, please add the ESFA to the list for future consultations</p> <p>See attached for full comments.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The preparation for a project this size needs clarification as the impact on the local community and environment will be huge. The lack of detail and information is of concern as the area around Harnham junction, Exeter and College roundabouts, Downton, Blandford and Wilton roads are non-existent. These points are vital to public transport, hospital access, fire services, garages, shops, commuting, out-of-town stores and the building of 810+ houses over a period of time would congest the area beyond reasonable limits. The traffic involved in this project would be enormous and there is no possibility of the existing road enlarged to cope with this.</p> <p>Thus I consider this development has not been positively prepared.</p> <p>The said site is not effective as the impact on the city is too high. We rely on tourism many of which arrive by bus or train. How can an unsound project enhance the possibility of building on the assets of a medieval town? P + R sites are not near this site so cars would still be used, traffic problems would frustrate tour companies which would move to other cities. Stonehenge and Bath would be obvious choices. Time involved in queuing whilst building this enormous site would last for a long period and be unacceptable.</p> <p>The road system could be improved by linking the radiating roads from the city far enough out to encourage through traffic not to use the city as a rat run.</p> <p>I consider that the road, environment, drainage be given greater emphasis.</p> <p>To be sound the road system needs to be improved. Most of the city roads are not suitable for widening thus it would make sense to build roads on the circumference of the city to take through traffic before planning an enormous project like 1028. Common sense is needed.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This project is not justified as development has already been undertaken in Wilton, Tidworth and in the city centre. There is still scope within the city boundary for sites to be developed. There are areas within the town that have remained undeveloped for a long time. I suggest that said areas either be used within a time scale (e.g. five years) or the landlord is liable to compulsory purchase and the side used for starter homes, flats or houses. Thus I do not consider that development on this scale is justified as all the amenities are already in place and would not cause the chaos that a new development would. I understand that national policy required a said number of houses to be built in each county. The development in Wilton, Tidworth and town centre plus smaller sites 3272 and 1027 would help towards our allocation. Salisbury is used as the 'fat cat' and bears a large allocation that is not sustainable. Not enough emphasis has been placed on the pointers that make this city difficult to develop with large numbers. I'm sure national policy requires level-headed thinking and a sensitive hand neither of which are evident with the current policy.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The farmland allocated is on a slope. With removal of the vegetation and replaced with buildings, roads, drives, pavements, school, roundabouts, Drs surgery et al would cause flooding in the plain. Drainage does not solve the problem as the water is just pushed down river. Dams, river widening is not effective (Dept of the Environment). Plus the erosion, dredging etc. makes development of this proportion unsound. The large scale development would cause more flooding in the plain. By covering a large percentage of ground with concrete, roads etc. the water would automatically be drained into the rivers. Building dams, lakes etc. would not contain the increased volume. They would also have to be dredged constantly to avoid flooding further down. As no plans have been suggested to plant trees to absorb excess water I presume that is not on the plans. This suggestion would require a large no of trees to counter this development. Perhaps 'environmental studies' could be encouraged at school/college and this turned into a countryside study area and used as an incentive to come to the city.

<b>Comment ID:</b> <a href="#">2701</a>	<b>Consultee</b> Mr Peter White Develop6  <b>Person ID:</b> 1134177	<b>Agent</b> Mr Samuel Croft Principal Planner  Willis & Co  <b>Person ID:</b> 1126238	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - Yatton Keynell		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Develop6 are seeking to promote land in Yatton Keynell which could be provided alongside or in place of the allocation at East of Farrells Field, Yatton Keynell. The site is currently available and deliverable and it is the intention of Develop6 to prepare a pre-application submission which will be submitted in due course. An Access Appraisal of the site has been prepared and submitted as part of this representation. Site Description The proposed site allocation for development is located at Yatton Keynell off the B4039. The site is bordered to the north/east by agricultural fields and to the south/west by residential dwellings and the B4039. The site area proposed for development currently comprises part of an existing agricultural field. The exact design and composition of the proposed development has yet to be confirmed and will be the subject of any forthcoming planning application. However, the opportunity for residential use and the construction of up to approximately 40 dwellings has been identified and it is this number which has been assumed as the basis for the allocation and consideration within this report. An indicative site location plan is reproduced below: [see attached] Access to the existing site is taken approximately 15m north of the B4039/Blacksmith Close junction adjacent to Anvil Cottage in the form of a priority junction. The existing access (designated as right of way YKEY12) is approximately 4.1 metres wide narrowing to 3.4 metres and is restricted in width by residential dwellings directly adjacent to both sides of the road. Opposite the existing access, the northbound Farrells Field bus stop is present in addition to a telephone pole with bus flag affixed. A road grit bin, post-box and a public footpath sign are also present in the verge opposite the existing site access. In reviewing the Site Allocations Document, it was noted that two sites were considered as part of the allocation process, which were very closely related to the proposed allocation site (shown above). The first site at Land to East of Yatton Keynell (474a), which was the larger of the two site, was discounted early on in the process as it was not known who owned the land and whether it was available for development. The second site at Land adjacent to The Old Forge (474b) made it through the entire selection process and was assessed as being more sustainable. It would appear that the reason The Old Forge site was discounted at the latter stages was due to the fact that the site at Land East of Farrells Field was considered to be more sustainable and provide a greater number of benefits. Having reviewed the assessment criteria, Land East of Farrells Field scored higher in respect to the following Sustainability Appraisal (SA) objectives: Provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwelling sizes, types and tenures Encourage a vibrant and diversified economy and provide for long-term sustainable economic growth It should be noted that the land adjacent to The Old Forge scored lower in respect to its impact upon the historic environment and landscape. The rest of this representation looks to take the proposed allocation site through the site selection process for the Chippenham Community Area Remainder to demonstrate how it would have scored in respect to Land adjacent to The Old Forge and Land East of Farrells Field. It follows the methodology outlined in Section Four of the WSA PSCONS18 Chippenham Community Area Remainder Topic Paper June 2017 and is also			

Appendix Q - Schedule of representations

	covered in more detail by Topic Paper 2: Site Selection Process Methodology. The proposed allocation site is considered in respect to these 12 objectives attached.

<b>Comment ID:</b> <a href="#">2702</a>	<b>Consultee</b> Mr Peter White Develop6  <b>Person ID:</b> 1134177	<b>Agent</b> Mr Samuel Croft Principal Planner  Willis & Co  <b>Person ID:</b> 1126238	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - Atworth		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Develop6 are seeking to promote land in Atworth. The site is currently available and it is the intention of Develop6 to prepare a pre-application submission which will be submitted in due course. The WHSA PSCONS23 Melksham Community Area Topic Paper June 2017 identifies that Core Policies 1 (Settlement Strategy) and 15 (Melksham Area Strategy) of the Wiltshire Core Strategy set out the settlement hierarchy for sustainable development in the Melksham Community Area, and associated indicative housing requirements. Core Policy 15 requires approximately 2,370 homes to be provided in the Melksham Community Area of which about 2,240 should occur at the Market Town of Melksham and Bowerhill village and approximately 130 homes in the rest of the community area over the Plan period 2006 to 2026. It goes on to set out that to date (between 2006 and 2017) 1,370 dwellings were delivered in Melksham and Bowerhill and an addition 101 were delivered in the remainder of the Melksham Community Area. This has resulted in a residual requirement of 1,221 dwellings in Melksham and Bowerhill, and 38 in the remainder of the Community Area which, as set out in table 2.2 of the Topic Paper, are all covered by developable commitments. This has been produced based upon Wiltshire's Housing Land Supply Statement Update (March 2017) which includes, at Appendix 6, a summary of completions, developable commitments, and the residual indicative requirement against each main settlement and Community Area. Appendix 1 of the Wiltshire's Housing Land Supply Statement provides a breakdown of the developable commitments by the individual site. From this information it would appear that the following sites would be contributing to the Melksham Community Area. 3 Lowbourne – 17 units (2018/2019) 303 Sandridge Common – 23 units (between 2016/17 and 2017/18) Forest and Sandridge School – 12 units (2016/2017) Former George Ward School Shurnhold – 261 units (between 2016/2017 and 2021/22) Land East of Spa Road – 450 units (between 2019/2020 and 2023/24) Land off Lewington Close and Longford Road – 12 units (2016/2017) Withleigh House Spa Road – 29 units (between 2018/19 and 2020/2021) Melksham small site units outstanding – 21 units in the plan period Melksham CA remainder small site outstanding - 23 units in the plan period Additional sites identified beyond the monitoring base date of 1 April 2016 also look to provide an additional 509 units, although it is not clear whether these sites will come forward within the plan period. Overall, this equates to 1,357 units which is less than the residual requirement of 1,259 set out in the Melksham Community Area Topic Paper. However, the figures only show 24 out 38 units being delivered in Melksham CA remainder, with the rest coming forward on smaller site. The 24 are to be delivered upon a single site in Semington which is only subject to outline permission.			

Appendix Q - Schedule of representations

	<p>Whilst any shortfall could be addressed by the developments in Melksham and Bowerhill this is not in line with Core Policy 15 which allocated 130 dwellings (38 residual) outside of these areas. This also does not take into account the deliverability of the sites which make up the developable contributions at Melksham and Bowerhill.</p> <p>Section 5 and 6 of the Melksham Community Area Topic Paper summarises the outcome of the site selection process form Melksham and Bowerhill, and the Remainder of the Community Area, respectively.</p> <p>Stage 1 of the site selection process to establish where housing site allocations may be needed during the rest of the Plan period. To do this, Stage 1 reviews the indicative residual requirement outstanding for Melksham and Bowerhill village. Generally the areas with an outstanding requirement to be met form the broad 'areas of search', which are then progressed for further assessment through Stage 2.</p> <p>In respect to the Melksham and Bowerhill village and the remainder of the Community Area the report concludes that the residual requirement for the Melksham Community Area Remainder to be delivered during the Plan period has been met. Therefore, the Plan will not need to allocate additional land to help meet an indicative residua requirement.</p> <p>Whilst it is accepted that the figure demonstrate that there are sufficient deliverable site in Melksham and Bowerhill to meet the minimum housing numbers, it is not considered that the deliverable commitments in the remainder of the are sufficient to meet the minimum target as set in Core Policy 15 and as such the plan should have sought to identify potential allocations in remainder of the community area.</p> <p>Furthermore, the margins are very narrow so should any identified site not come forward in line with projections or should turn out not to be deliverable then the Council may not be able to deliver the housing requirement within the plan period. The proposed allocation site at Atworth is available and presents an opportunity to address some of this potential shortfall.</p> <p>Site Description</p> <p>The proposed site allocation for development is located at Atworth off Prospect Fields. The site is bordered to the south/east by agricultural fields and to the north/west by residential dwellings. The site area proposed for development currently comprises part of an existing agricultural field. The exact design and composition of the proposed development has yet to be confirmed and will be the subject of any forthcoming planning application. However, the opportunity for residential use and the construction of up to approximately 30 dwellings has been identified and it is this number which has been assumed as the basis for the allocation and consideration within this report.</p> <p>An indicative site location plan is reproduced below: [see attached].</p> <p>Conclusion</p> <p>Develop6 are seeking to promote land in Atworth. The site is currently available and deliverable and it is the intention of Develop6 to prepare a pre- application submission which will be submitted in due course.</p> <p>Whilst it is accepted that the figure demonstrate that there are sufficient deliverable site in Melksham and Bowerhill to meet the minimum housing numbers, it is not considered that the deliverable commitments in the remainder of the are sufficient to meet the minimum target as set in Core Policy 15 and as such the plan should have sought to identify potential allocations in remainder of the community area.</p> <p>Furthermore, the margins are very narrow so should any identified site not come forward in line with projections or should turn out not to be deliverable then the Council may not be able to deliver the housing requirement in the plan period. The proposed allocation site at Atworth is available and presents an opportunity to address some of this potential short fall.</p> <p>It is considered that the proposed allocation offers a reasonable option to the proposed strategy in order to address potential shortfall in housing numbers in the area and should be considered and assessed as part of the Housing Site Allocations Plan Pre-Submission Document going forward. To not do so would result in the plan being unsound by virtue of the fact that it will not have been positively prepared, would not be justified and would not be effective.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2704</a>	<b>Consultee</b> Mr John Fleming Gladman Developments	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 977912	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Housing Delivery Strategy			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Gladman object to the proposed Housing Delivery Strategy, which introduces a number of restrictions to the growth of sustainable settlements. The proposed approach also uses tightly drawn settlement boundaries which would effectively preclude development that is well related to settlements and their associated services and facilities from coming forward. In particular, settlement boundaries should not be used to prevent otherwise appropriate development from coming forward in sustainable locations. The Framework is clear that development which is sustainable should go ahead without delay. The use of settlement limits to arbitrarily restrict suitable development from coming forward on the edge of settlements would not accord with the positive approach to growth required by the Framework. The overly restrictive approach proposed would result in a plan that is not positively prepared or effective and ultimately fails to deliver the housing required. Gladman are of the view that greater flexibility and contingency will be required to enable sustainable development to come forward and ensure that the full housing requirement is met over the plan period. It is essential that the site selection process acknowledges that the CS requirements are flexible and provide only an indicative approach which should not restrain Wiltshire's ability to maintain a five year housing supply and in doing so achieve the wider objectives of the Plan.</p> <p>Further to the above, it is essential that sustainable settlements across the hierarchy are enabled by the Local Plan to develop in a manner that will support and expand the range of services and facilities that can be accessed locally to meet the day-to-day needs of the population. It is therefore of concern that several sustainable options for site allocations in large villages and small villages have not been explored as reasonable alternatives through the plan making process and its associated sustainability appraisal. This is in direct conflict with Core Strategy Policy CP1, which sets out that sustainable development will take place to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. Indeed, Paragraph 55 of the Framework seeks to promote sustainable development in rural areas to maintain and enhance rural vitality and viability.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Housing Delivery Strategy and Settlement Boundary Review			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Gladman considers that the methodology for identifying site allocations is unduly rigid and creates an interpretation of the spatial strategy that is overly reliant on providing further development in Wiltshire's principal settlements, market towns and local service centres. A greater proportion of development should be directed to the</p> <p>In preparing its Housing Site Allocations Plan, the Council must take into account that in the Core Strategy the proposed distribution of housing below the Housing Market Area is simply indicative<sup>3</sup> and that all sustainable settlements, whether large or small, can housing needs. It should instead take a flexible and positive approach to allocating land for development across its lower order villages and smaller rural settlements, recognising that the level of development considered acceptable in these locations should take account of their needs and ability to support further sustainable growth. Gladman is opposed to unduly restrictive policies that would prevent development from coming forward in some settlements whilst allowing for the expansion of others, contrary to the requirements of national policy and the cost/benefit approach to decision taking advocated by the Framework.</p> <p>Gladman contend that a positive approach to the distribution of housing is necessary and that this must more accurately reflect the needs and characteristics of individual settlements. In considering the distribution of housing growth it is important to note that a fundamental objective of the Framework is to secure a thriving rural economy by taking a positive approach to sustainable new development<sup>4</sup>.</p> <p>[see attached for full representation]</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Section 7 of the Plan provides details of how the Council intends to manage and monitor the implementation of its Local Plan. As discussed elsewhere in these representations, it is the view of Gladman that further flexibility and contingency is required within the Plan in order to ensure that development needs can be met in full over the plan period. It is considered necessary for any such approach to include a clear monitoring and review mechanism within policy wording to ensure that the Local Plan is fully responsive to changes in circumstance relating to the development needs of the area and the maintenance of a five year housing land supply.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2708</a>	<b>Consultee</b> Mr John Fleming Gladman Developments	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Person ID: 977912		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site submissions			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There is a need for the Wiltshire Site Allocationsto be flexible to allow for changes in circumstances which include sites not coming forward as anticipated or delivering fewer units than expected. Typically, Inspectors are seeking an additional 20% above the housing requirement to ensure that the Local Plan meets or hopefully surpasses the housing requirement over the Plan period. In the case of Wiltshire, the OAN is known to be higher than the minimum requirement of 42,000 that is set out in the adopted Core Strategy. Furthermore, a wide number of sustainable opportunities exist across the settlement hierarchy that can support the delivery of the development needs of the area in full.</p> <p>Therefore, in order to account for all of the above factors, it is considered that the site selection process must be re-visited and that through this process, additional allocations made Plan to deliver housing over the remainder of the plan period to meet development needs in full and support the delivery of the vision and objectives of the Plan. This approach will contribute to securing the Council's 5-year housing land supply and allow a wider range of housebuilders (including those that are Small and Medium Sized) the opportunity to deliver sites across Wiltshire thereby increasing the range of products available and speeding up delivery in the county. It will also ensure a Plan that positively responds to the imperative to plan for thriving rural communities.</p> <p>Gladman are promoting a number of sites across the County which can each be successfully integrated into sustainable settlements and are available, achievable and deliverable. Further details relating to these sites are provided in the sections that follow [following representations]:</p> <ul style="list-style-type: none"> <li>Land at Chippenham Road, Lyneham</li> <li>Land at Storridge Road, Westbury</li> <li>Land at High Street, Sutton Benger</li> <li>Land at Melksham Road, Holt</li> <li>Land at Wynsome Street, Southwick</li> <li>Land at Westbury Road, Great Cheverell</li> </ul>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission site - Melksham Road, Holt			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site comprises approximately 3.7 hectares of land, situated to the east of the village of Holt in Wiltshire. It is bordered by two roads, Melksham Road (B3107) to the north and Great Parks to the west. A site location plan is provided overleaf.</p> <p>An outline planning application was submitted for up to 98 dwellings with associated landscaping and open space, with all matters reserved, except for access. In December 2014. The application was resolved to be refused by Wiltshire Council in April 2015.</p> <p>At the time, an appeal was not perused. Gladman believe however that the reasons given for refusal, can be overcome by the submission of a new application, comprising additional and updated survey work to demonstrate there are no issues in relation to the reasons given.</p> <p>Technical documents submitted in support of the outline planning application included:</p> <ul style="list-style-type: none"> <li>Site Location Plan</li> <li>Proposed Access Drawing</li> <li>Planning Statement</li> <li>Sustainability Assessment</li> <li>Socio-Economic Sustainability Statement</li> <li>Development Framework Plan</li> <li>Design and AccessPla</li> <li>Landscape and Visual Impact Appraisals</li> <li>Ecological Appraisal</li> <li>Archaeological Assessment</li> <li>Transport Assessment and Travel Plan</li> <li>Air Quality and Noise Assessment</li> <li>Phase 1 Site Investigation</li> <li>Flood Risk Assessment and Foul Drainage Analysis</li> </ul> <p>Opportunities</p> <ul style="list-style-type: none"> <li>Provision of high quality sustainable housing, with site access to accommodate up to 80 new homes (including policy compliant affordable percentage).</li> <li>Retention of the vast majority of the existing hedgerows and trees located within the site to maintain their ecological value.</li> <li>Opportunity to provide new safe and suitable vehicular access to the development via Great Parks.</li> <li>New area of publicly accessible open space, to include a children's play area</li> <li>Creation of new footways connecting into the existing PROW running through the site.</li> <li>Possibility of Sustainable Drainage System (SuDS) features which will form an integral part of the developments green infrastructure, designed to help maximise biodiversity benefits.</li> </ul>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2713</a>	<b>Consultee</b> Mr John Fleming Gladman Developments  <b>Person ID:</b> 977912	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - Land at Wynsome Street, Southwick			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Site measures approximately 9.83 hectares and lies to the east of Southwick. The site has a developable area of 4.29 ha, which can accommodate up to 140 dwellings at a density of 33 dwellings per hectare.</p> <p>The site is considered to be suitable, available and achievable and can be delivered within 0-5 years. The proposal is currently the subject of a planning application (reference: 17/03269/OUT), which seeks outline planning consent for a high quality sustainable development comprising the following:</p> <p>Residential development for up to 140 dwellings</p> <p>Green Infrastructure (GI) including new areas of green space that will incorporate a new country park, ecological mitigation and habitat creation, retained hedges and trees, sustainable drainage features, play and recreation space. The site is bounded to the west by the village of Southwick, open fields to the north, Bradley Road Solar Park to the east and Wynsome Street/ Breach Lane to the south. Lambrok Stream runs along the western boundary. A site location plan can be seen below: [see attached]</p> <p>There are a large number of public footpaths and bridleways within the wider context of the Site which form an interlinked network of Public Rights of Way between Southwick, North Bradley and Trowbridge. Public Footpath SWCK3 crosses the Site and leads from Wynsome Street in the south west corner of the Site to the north-east corner of the Site, where it continues north until reaching the southern edge of Trowbridge. Access to the highway network can be taken off directly off Wynsome Street by way of a simple priority junction which has been agreed with the Local Highways Authority. The length of hedgerow that is being removed to facilitate access will be mitigate by substantial new hedgerow planting and reinforcement of existing hedgerows within the site. An access plan is provided below: [see attached]</p> <p>The planning application is accompanied by a suite of technical reports that confirm that any potential adverse impacts can be successfully mitigated.</p> <p>The whole of the site is within Flood Zone 1 and surface water discharge rates will be managed via SuDS so that there is no increased risk of Flooding from this development.</p> <p>A number of trees on site are subject to a TPO, which appropriate buffers have been allowed around these trees to save any impact on them. Ecology surveys were conducted across the site, which found that the majority of the site is improved grassland and is of low ecological and nature conservation interest. Low numbers of bat species were noted using field boundaries as foraging and commuter corridors and a buffer has been created along Lambrok Stream.</p> <p>The site is not adjacent to any Conservation areas. The grade 2 listed Baptistry on the south site of Wynsome Street is not adversely affected by the development of the site.</p> <p>A proposed development framework for the site can be seen below, which illustrates how the scheme can be integrated into the existing built form of Southwick: [see attached].</p> <p>Summary of Opportunities                  Provision of high quality sustainable housing, with the site able to accommodate up to 140 new homes and associated green space.</p>			

Appendix Q - Schedule of representations

	<p>The creation of a development that is well-related to the existing settlement of Southwick. As a consequence, it is considered that the north eastern extent of the new residential development area should broadly follow the existing settlement edge to the north west of the Site, with the areas of the Site beyond being left undeveloped as a potential new country park.</p> <p>Retention of the vast majority of the existing hedgerows and trees located within the site to maintain their ecological value</p> <p>Safe and acceptable vehicular access from Wynsome Street.</p> <p>Provision of new recreation routes within the site with connections to the existing public right of way network and Wynsome Street.</p> <p>The provision of new Sustainable Drainage System (SuDS) features which would form an integral part of the developments green infrastructure and be designed to maximise landscape and biodiversity benefits.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4734586</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To update date the Inspector on the progress of the proposed allocation sites and to adequately present the benefits of sites in general.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2714</a>	<b>Consultee</b> Mr John Fleming Gladman Developments  <b>Person ID:</b> 977912	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site - Land at Westbury Road, Great Cheverell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Gladman seek the allocation of land at Westbury Road, Great Cheverell for residential development. The site measures a little under 1 hectare and lies to the east of Great Cheverell. The site is considered suitable, available and achievable and its development and a main access can be achieved off Westbury Road. The proposal would create:</p> <p>Residential development for up to 15 dwellings for self-builders.</p> <p>Green Infrastructure (GI) including new areas of green space, ecological mitigation and habitat creation, retained hedges and trees, sustainable drainage features, play and recreation space.</p> <p>The site is bounded to the north and west by the village of Great Cheverell and open fields to the south and east. A site location plan is provided below: [see attached]</p> <p>There are public footpaths and bridleways within the wider context of the Site, which form an interlinked network of Public Rights of Way. A Public Footpath crosses the Site along part of its northern boundary which leads from Hillside and joins the wider footpath network to the east of the site.</p> <p>Access is taken off directly off Westbury Road by way of a simple priority junction. The length of hedgerow that is being removed to facilitate access will be mitigate by substantial new hedgerow planting and reinforcement of existing hedgerows within the site.</p> <p>The site is relatively well contained by existing vegetation and built form.</p> <p>The whole of the site is within Flood Zone 1 and surface water discharge rates will be managed via SuDS so that there is no increased risk of Flooding from this development.</p> <p>Ecology surveys were conducted across the site, which found that the site is improved grassland and is of low ecological and nature conservation interest.</p> <p>The site is close to the Conservation areas but it lies beyond rear gardens of properties and is beyond its visual setting.</p> <p>Summary of Opportunities</p> <p>Provision of high quality sustainable housing, with the site able to accommodate up to 15 new homes for self-build and associated green space.</p> <p>Opportunity to create a development that is well-related to the existing settlement edge of Great Cheverell.</p> <p>Existing landscape features will be protected and enhanced wherever possible in order to improve green networks and habitat opportunities.</p> <p>Additional ecological habitats would be introduced as part of the green infrastructure to encourage strong wildlife corridors through the development and enhance the sites biodiversity.</p> <p>Opportunity to provide vehicular access to the new development from Westbury Road which runs directly along its western boundary.</p> <p>Provision of new attractive footpaths and cycleways within the site with connections to the existing public right of way network.</p> <p>To provide new Sustainable Drainage System (SuDS) features which will form an integral part of the developments green infrastructure and be designed to maximise landscapes and biodiversity benefits.</p>

<b>Comment ID:</b>	<a href="#">2720</a>	<b>Consultee</b> Mr Richard Ayre Land and Planning Director	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Baker Estates  <b>Person ID:</b> 1134745		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Baker Estates consider the following to be apparent:  There is too great a reliance on the "commitments" delivering the housing numbers required to meet the housing identified in the core strategy. Allocating more sites in the slower market areas and towns and on larger sites increases the risk of not keeping up with the trajectory. This is shown in previous completion figures.  A town which has demonstrably shown that it can deliver large numbers of houses in Melksham. It makes sense to allocate further land where it will turn into actual houses.  The attached site is in a very sustainable location that could also facilitate the delivery of new education infrastructure that is needed in the town. A shortfall in infrastructure has been identified. It should be the role of each development plan document to do more than just seek to meet numbers. Positive planning should identify "contributing" sites even if that potentially means a risk of exceeding numbers set out in the Core Strategy.  The attached site also offers the prospect of reserving a corridor for the aspirational canal corridor with landowner support rather than (as currently) with objection.  The plan as it relates to Melksham is not positively planned in terms of actually providing homes where there is demonstrated demand, meeting identified infrastructure deficiencies and reducing risk of underdelivery across the housing market area.  The attached site should be allocated for residential development plus associated infrastructure which could include potentially a school site and a canal corridor reservation.</p>				
<b>Attached files (Please see Objective)</b>	4734884 / 4734883				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	It will be useful to discuss the matters identified particularly the realism of allocating more sites to other towns (notwithstanding the core strategy) and the benefits of allocating a larger site at Melksham.

<b>Comment ID:</b>  <a href="#">2726</a>	<b>Consultee</b> Greatworth Developments Ltd  <b>Person ID:</b> 404224	<b>Agent</b> Mr Diccon Carpendale Brimble Lea and Partners  <b>Person ID:</b> 1122261	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	SHLAA site 239		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This objection relates to Wiltshire Council deciding not to include land east of Damask Way, Warminster (SHLAA site 239) within the draft Wiltshire housing site allocations plan. Within the north and west Wiltshire housing market area the plan states an indicative requirement (2006-2026) for 1920 dwellings for Warminster. It identifies a shortfall of 212 dwellings (14%). The draft plan has failed to identify SHLAA site 239 for inclusion and as such objection is made to paragraphs 5.85 – 5.101 and the settlement boundary review methodology (topic paper 1) which has resulted in the exclusion of this site from further consideration based on erroneous assumptions. The methodology apportions weight to the informal consultation with Town and Parish Councils exercise undertaken in 2014 and feedback received from it. Objection was raised at the time with the LPA to the failure to involve landowners or their agents and, as such, it is not considered that this part of the process was undertaken in an appropriate fashion allowing all relevant parties to be involved in the assessment process. Topic paper 2 – Site selection process methodology – contains a flow chart confirming that selection focuses on community areas where land supply needs to be supplemented but immediately excludes SHLAA sites which are affected by barriers to development i.e. much is made of the veracity of the initial SHLAA assessment and if (as is the case with this land) there are errors within this process, the exclusion of the site on this basis is clearly unreasonable and flawed. The Wiltshire housing site allocations DPD/pre-submission consultation includes a series of community area topic papers along with one specifically for the Warminster community area WHSAPCONS32. Within this the SHLAA site 239 (land on Upper Marsh Road) with an identified site capacity to deliver 78 dwellings has been assessed against a series of criteria. Under strategic (exclusionary) criteria it is identified as in part being contrary to criterion 1 and it is stated that this is because the site is partly permitted. This relates to only a small area of the land (5 dwellings). Similarly under criterion 2 the site has been excluded as it is considered to be “partially” within the settlement boundary. In actual fact all of the site sits within the town policy boundary as defined within the West Wiltshire Local Plan and carried forward into the Wiltshire Core Strategy. The main reason for the exclusion of the site appears to be on the assessment as to whether the land is developable. The reason it is identified as not being developable is that there is insufficient access to the site. This is incorrect. There is currently a pre-application enquiry lodged with Wiltshire Council with respect to the further (limited) development of the land in question and the access arrangements to the site have been discussed with the Highway Authority. Whilst various issues have been raised by the Highway Authority, ongoing work is being undertaken and it is understood (based on discussions between Highways Consultants and Wiltshire Council) that those areas that need to be addressed have been agreed and are considered capable of being resolved. It is therefore incorrect to assume that the land cannot be developed for this reason. The site is assessed positively in relation to the strategic (exclusionary) criteria 3-6 (inclusive) and is also confirmed as being available.			
	Effective  Consistent with national policy			

Appendix Q - Schedule of representations

	<p>It is not stated within the (very brief) assessment of the site that it is considered to be isolated from the urban edge or to have adverse visual impact. However, further landscape and visual impact assessment (LVIA) work is being undertaken in relation to the pre-application submission to demonstrate that there is no adverse visual harm associated with part of the site being developed. It is recognised that additional strategic landscaping will be required and that not all of the site will necessarily be appropriate for further development. However, it is assessed that approximately 30 additional dwellings can be accommodated on the site with an acceptable visual impact served by a suitable and safe access onto Upper Marsh Road.</p> <p>On this basis site 239 has unreasonably been excluded (without justification) at an early stage of the process. Had it been carried forward for further consideration as it is clear that it should have been, there would have been no justifiable reason for excluding the site from allocation. On this basis, objection is raised to the process. This objection can be addressed through proper reconsideration of the site, the access arrangements to it and further consideration of visual impact – additional information is being provided on both of these grounds (in association with the pre-application enquiry) which should be taken into account by relevant departments at Wiltshire Council during reconsideration of the site.</p> <p>The land East of Damask Way, Warminster (SHLAA site 239) should be allocated for development and the Town Policy boundary left unchanged as the decision to exclude the site is based on erroneous assumptions about accessibility and landscape impact.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2729</a>	<b>Consultee</b> C/O Agent  Hallam Land Management	<b>Agent</b> Mr Nick Mathews Director  Savills	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 645345	<b>Person ID:</b> 389644	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7		Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Hallam Land Management control an area of land approximately 11.05 hectares in size adjacent to the eastern edge of Warminster, a proportion of which is allocated within the Draft Plan under Policy H2.7 (East of the Dene, Warminster) for residential development. In addition, an outline planning application was submitted in October 2016 (ref: 16/10502/OUT) for the development of the site for up to 135 residential dwellings. This application is currently pending a decision. A significant amount of technical work has been prepared to support the application proposals, all of which concludes that there are no technical or environmental matters which would preclude development and that appropriate design and mitigation measures can be readily implemented to create an attractive high-quality development. It is therefore considered that the development of the site would be technically sound and is entirely deliverable and achievable. Whilst the enclosed representations include copies of a number of consultation responses from officers at Wiltshire Council confirming the application is technically sound, copies of all the consultation responses to the application can be found via the Council's online planning portal using the application reference number 16/10502/OUT. Whilst we welcome the Council's recognition of the site's suitability and sustainability, given the potential significant implications for the site as a result of the current wording of Policy H2.7, we have endeavoured to meet with your planning policy officers prior to the consultation deadline on 22 September 2017, but have been unable to secure a meeting date. However, now that formal representations have been provided, it is important we are able to meet with the planning policy team prior to the current extension of time on the planning application which runs until 13 October 2017. Our main concern is that the Site Allocations DPD evidence base is not as substantial and rigorously tested as that associated with the planning application information, thus it seems eminently appropriate to have full regard to the most up-to-date information. Having said that, there is clear opportunity for the Council and applicants to work together to achieve the most suitable scheme, now that the location in principle has been deemed acceptable by the Council. In this respect, we would like to set up a meeting during the week commencing 9 October 2017 and will be in touch with the planning policy team to arrange this. [Representation setting out that the proposed allocation of site H2.7 is welcomed, but that a number of amendments to the proposed allocation are sought having regard to the evidence set out in support of current planning application 16/10502/OUT.] See enclosed representations</p>

<b>Person ID:</b> 1134308			<b>Person ID:</b> 1134306		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph 2.8, 2.9		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The settlement boundary drawn up excludes land granted planning permission and also allocations which is not considered to be positively prepared or justified as it will immediately become out of date when these schemes come forward. The site's allocated or permitted are a commitment to supporting development and as a result they should be shown within the settlement boundary to encourage positive planning and provide the necessary presumption in favour of development stance. Paragraph 2.8 reconfirms this approach - "development within the settlement boundary is, in principle, acceptable, whereas development outside the settlement boundary is, with limited exceptions, not acceptable."</p> <p>Therefore allocated or permitted sites outside the settlement boundary start from a negative position when judged in the development process. Reference at para 2.9 to para 4.25 of WCS does not include allocated sites or those sites with permission. It is appreciated that the draft version did include these and was then changed to exclude them however it does not seem logical to exclude land highlighted for development. The settlement boundary should reflect allocated and permitted sites. Wording of para 2.9 should be reconsidered.</p> <p>It is understood that these may not come forward immediately but where they form part of a supply of housing or employment which the Council are depending on during the lifetime of the Plan then they should be included to demonstrate commitment that development in that area is supported.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph 4.9		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	At para 4.9, it is stated that land not included in the SHLAA has not been included in the Council's assessment of suitable sites. This is not considered to be the most positive way of shaping settlements and delivering housing and does not allow strategic thought about what land is most desirable to development for each use. Whilst it is understood that there are limited resources available to research land ownership on land not put forward in the SHLAA, the Council could have reviewed land and allocated based on the most sustainable location and form of development and through the plan process consulted with land owners to identify a preferred strategy rather than restrict the strategy to only land put forward via the SHLAA to date. Paragraph 4.9 does state that other land may be capable of development but that the Council cannot count on that land to deliver and therefore be effective. However, the Council could have allocated other land or considered it to promote a preferred strategy. For example, our clients previously developed land within the settlement boundary could have been earmarked as suitable to create a sustainable form of development despite it not coming forward via the SHLAA.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Policy H2 defines residential allocations made based on the SHLAA sites and does not consider potential alternative sites within Westbury itself before Bratton. Whilst Bratton is not considered to be an unacceptable location for development, land exists within the proposed settlement boundary which is better located and sequentially preferable but this is not included. The Bratton site is within a Special Landscape Area My client has land available for development for residential purposes which would have employment opportunities within walking distance and which should be included to provide a mix of land uses in this location. Residential uses are immediately adjacent to the site and therefore the land could come forward to help deliver the ever-increasing housing land supply figures. This would be consistent with current national policy and would not prejudice the delivery of employment land due to the significant available provision at Hawkeridge. The inclusion of our client's land in the allocation under Policy H2 for residential purposes or mixed use development contributing to meeting the housing need and providing a more balanced mix of uses consistent with national policies. The site has been submitted to the Council for consideration and given the overall increase in housing requirement and underperformance of delivery at Trowbridge, additional land in Westbury could be beneficial to maintaining a 5 year supply.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Section 6 of WHSA and Topic Paper 1				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Westbury settlement boundary has long been inappropriate due to the exclusion of a huge amount of built development to the north of the avoiding railway line. The proposed settlement boundary now at least reflects the extent of development in which there would be a presumption in favour of sustainable development. We therefore support the change to the boundary to include these areas and consider that perhaps it could go further and include other committed land in the form of allocations / permissions which form part of the supply in the plan to provide a realistic picture of the built form during the plan period.</p> <p>The settlement boundary should include the areas now defined at Brook Lane and elsewhere in Westbury to reflect the extent of built development in the town as a whole and within these areas development should be supported in principle as defined in Core Strategy policies.</p>

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2734</a>	<b>Consultee</b> Mr Paul Gardner Director	<b>Agent</b> Mr Alan Pearce Partner	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Absolute Solvents Ltd	Alder King Planning Consultants	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Person ID:</b> 1134308			<b>Person ID:</b> 1134306		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Para – 4.47 and 4.57			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Paragraphs 4.45 to 4.57 provide commentary on the growth rates and delivery of housing across the plan area and make specific comments on Westbury delivering at a better rate than Trowbridge. Without assessing the reasons why, it can be seen that Trowbridge has delivered 43.5% of its requirement in the first part of the plan period and is earmarked to under deliver by 18%.</p> <p>Westbury however has provided 58.5% of its requirement and is set to deliver 21% over the initial requirement. This could be reflecting demand in part and as a result, to help ensure delivery of the overall housing requirement there could be justification for further allocations in Westbury to meet the demand and help achieve the housing requirement across Wiltshire i.e. include flexibility in delivery location in order to achieve overall targets rather than restrict further growth at Westbury (as the Core Strategy seems to indicate at 4.57).</p> <p>Further consideration on the overall strategy should be given reflecting upon delivery across the plan period so far to appreciate whether it is correct to restrict housing growth in Westbury. Westbury has excellent communication links with the railway station connections and employment land with further employment allocations and as such is a good location for further growth with the planned new infrastructure improvements resulting from the Station Road development.</p> <p>Allocation of land in my client's ownership could assist in meeting the overall housing land target and would represent sustainable development.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>6 THE ABILITY OF OTHER SITES TO DELIVER THE NECESSARY DEVELOPMENT WITHIN WARMINSTER</p> <p>6.1 The WHLAS takes forward three separate sites in Warminster for allocation for further residential development. The sites in question are considered below;</p> <p>Boreham Road – approximately 30 dwellings</p> <p>6.2 This site was refused planning permission but allowed on appeal by the Secretary of State (SoS) (Appendix 1). The SoS gave limited weight to the emerging WHLAS in reaching this decision he also concluded that there was evidence of a 5 year land supply (in July 2017) and noted that ‘the site is outside of the development limits for Warminster and the appeal scheme is not in accordance with policy CP2 of the Development Plan, and therefore is not in accordance with the Development Plan overall...The Secretary of State considers that the proposal would provide a number of housing benefits, including contributing to boosting the supply of housing; providing 30% affordable housing as required by Core Policy 43; providing much needed custom build homes; and bringing economic benefits during and after the construction phase...overall, given the significant benefits of the proposal set out above and the absence of any unacceptable harm, the Secretary of State concludes that material considerations indicate that the appeal should be allowed’.</p> <p>6.3 The decision letter likewise made clear that in respect of housing delivery ‘in line with paragraph 47 of the Framework, which requires local authorities to boost significantly the supply of housing, he takes the view that the five year requirement is a minimum and not a cap’.</p> <p>6.4 This decision confirms the acceptability of the site but it does also confirm that at a time when the housing need was considered to be being met in terms of a 5 year land supply that if a site is acceptable in other respects it should still be able to come forward for development even if it is outside of the settlement boundary because there is a clear need to boost housing land supply in the WMCA. The situation in terms of housing land supply is worse now than when the SoS considered the appeal (following the outcome of the Gleeson appeal in August) which lends further support to additional housing.</p> <p>Borehill Farm – approximately 70 dwellings</p> <p>6.5 This site is subject to an extant planning permission for industrial use and is located in close proximity to a bio-digester both of which are likely to give rise to noise and air quality complaints. These factors indicate that the site is likely to offer future residents a poor level of amenity which whilst the allocation suggests this can be mitigated it is unclear on what basis this conclusion has been reached.</p> <p>6.6 The site is relatively removed from the centre of Warminster and it is acknowledged in the WMCA Topic Paper June 2017 that ‘the site is more than 1km from the town centre and is therefore not considered to be within good walking distances of services and facilities at town...residents at likely to use private vehicles’.</p>				

## Appendix Q - Schedule of representations

6.7 My Client's land is in a more sustainable location having regard to the significant level of facilities within walking distance and the WWUE which will significantly increase these and provide a 30min frequency bus service. My Client's land is preferable therefore and the WHSAP is not justified as it is not the most appropriate strategy.

Land East of the Dene – approximately 100 dwellings

6.8 WMCA Topic Paper outlines a number of constraints for this site. The site is acknowledged to be an important gap between Warminster and Bishopstrow House (grade II listed). The south of the site also provides a setting for a number of listed buildings. The eastern boundary of the site also adjoins the Bishopstrow conservation area. Development of the site would necessitate removal of a stretch of natural stone wall which is a non-designated heritage asset and a significant contributor to the character and appearance of the area.

6.9 A planning application has been lodged 16/10502/OUT which seeks outline permission to develop the site. The application is pending consideration at present but has been stalled since it was submitted in November 2016 with the Council seeking withdrawal of the application.

6.10 There are several areas of in principle objection to the proposals and these are in respect of the impact on designated and undesignated heritage assets and the landscape impact of the proposal. The Council's Conservation Officer considers that the development of the site would result in 'significant harm' which would be at the upper end of 'less than substantial harm' for the purposes of the NPPF. The Council considers that harm will be caused to the setting of Bishopstrow house and several other grade II listed buildings. The setting of the neighbouring Battlesbury Hill which is a Scheduled Ancient Monument will likewise be harmed. The wall which would need to be removed to facilitate access into the site has been considered to be an undesignated heritage asset and the loss of the wall has likewise been objected to.

6.11 The Council's Landscape Officer likewise objects to the development of the site noting that only a small amount of development could be appropriate. It was concluded in the CS evidence base document 'Wiltshire Council Strategic Site Options – Landscape Assessment; Appraisal of Strategic Site Options, capacity to accommodate landscape and visual change, Autumn 2011' that 'this green space gives a strong visual setting to the edge of Warminster with views to the Wylve and the chalk download. Small parts of the site could cope with minor changes if there was substantial mitigation. However to develop the entire site would dramatically alter the character of this approach to Warminster and obstruct views to the chalk land. There are other options proposed for the town that would be more appropriate for a strategic site before this is considered'.

6.12 There are significant questions about the deliverability of this proposed allocation. Given the areas of identified harm to designated and undesignated heritage assets and the landscape setting of the edge of Warminster it is argued that this site should not be allocated for development. My Client's site could obviate the need for harm to be caused by developing Land east of the Dene. The NPPF (paragraph 126) outlines the requirement, in respect of plan making, that 'LPAs should take into account the desirability of sustaining and enhancing the significance of heritage assets'. Paragraph 159 advises that Local Plans should 'contain a clear strategy for enhancing the natural, built and historic environment'. The allocation of the land east of the Dene is not consistent with these requirements of the NPPF and is therefore not consistent with national policy.

6.13 My Client's position is that inadequate housing is being planned for in Warminster to meet the objectively assessed need. In this respect further site allocations should take place. The existing allocation at Land East of the Dene appears contrary to planning policy and therefore it should also be removed from the identified supply. The Council's strategy for allocations does not represent the most appropriate strategy and is therefore not justified.

### 7 AMENDMENTS SOUGHT TO THE WHSAP

7.1 My Client's land outlined in (Fig 3 and Appendix 2) is available, deliverable and should be a preferred option for development under the WHSAP. Allocation of the site in full for residential development is therefore sought as an amendment to the WHSAP. A suggested density of 40 dwellings per hectare over the developable part of the site is suggested which provides an indicative figure of around 110 dwellings

### THE RELEVANT POLICY TO WHICH THIS REPRESENTATION RELATES

1.1 This objection centres on the following parts of the document;

## Appendix Q - Schedule of representations

Section 4. Housing delivery strategy – How many homes are needed and where, How were sites selected, 2A: Exclusionary criteria; Summary of site allocations; Objective 3: Spatial Strategy North and West Housing Market area;

Section 5. Housing site allocations – Warminster H2.7, H.2.8; Warminster Community Area Topic Paper June 2017; 4. Overview of the site selection process; 5. Outcome of the site selection process for Warminster; the Appendices to the Topic Paper.

1.2 The submission also references some of the other Topic Papers which underpin the Pre-submission Draft Wiltshire Housing Sites Allocation Plan (WHSAP). This representation is structured to firstly consider the rationale underpinning the requirement for the site allocation process before considering the housing supply position within the North West Housing Market Area (NW HMA) and the Warminster Community Area (WMCA). It goes on then to consider my Client's land at Warminster and the case for its inclusion as a site allocation before looking at alternative sites and drawing overall conclusions.

### 2 EVOLUTION OF THE REQUIREMENT FOR SITE ALLOCATIONS

2.1 The Wiltshire Core Strategy, Inspector's Report December 2014 noted (at paragraph 378) in relation to the Warminster Community Area (WMCA) that the level of housing being proposed at 2,060 homes 1,920 of which to be provided within Warminster having 'due regard to the updated evidence base, including the SA, the SHMA and the Council's topic papers such an approach is justified adequately and I recommend accordingly'. He noted at (paragraph 379) that 'subsequent details of housing distribution can reasonably emerge through the Sites DPD'.

2.2 At (paragraph 380) he concluded that the West Warminster Urban Extension (WWUE) 'offers a suitable opportunity to secure a coherent and sustainable urban extension to the town. It is supported, particularly by the IDP, by an adequate consideration of infrastructure requirements, including education, health, emergency services and transportation'.

2.3 Wiltshire Core Strategy (CS) (paragraph 4.26d) guided that 'the Council is also preparing a Housing Site Allocation DPD in order to ensure a sufficient choice and supply of suitable sites over the period up to 2026'. The supporting text to CS Policy CP2 likewise notes that outside of existing settlements 'the limits of development may only be altered through the identification of sites for development through subsequent Site Allocations Developments Plan Documents...and neighbourhood plans'. It is accepted within the CS that it is vitally important that the WHSAP should cater for the residual unmet housing need in the WMCA. Indeed this is precisely the rationale for producing the WHSAP.

### 3 HOUSING SUPPLY IN THE NORTH AND WEST HOUSING MARKET AREA

3.1 The Council on the 17th August 2017 received the Inspector's decision in respect of an appeal against a refusal of residential development of up to 60 dwellings near Lyneham by Gleeson Developments Limited (Appendix 1). The Inspector in reaching his decision considered the latest position in terms of the Council's ability to demonstrate a 5 year land supply in the North and West Housing Market Area (NW HMA). The Inspector concluded in the period 2016-2021 the minimum target is 6,817 dwellings (which includes a 5% buffer) and that the Council's supply would be 6,891 as opposed to the 7,033 which was alleged by the Council. The agreed supply figure for housing only marginally therefore exceeds the required level of housing by a projected 74 dwellings over the next 5 years.

3.2 This calculation presumes also that the Council will continue to be required to demonstrate only a 5% buffer above the 5 year housing target. The Inspector in this appeal concluded that a 5% buffer was appropriate despite an earlier Inspector ruling in a Malmesbury appeal that persistent under-delivery had taken place, and therefore a 20% buffer should be required. The Inspector did however sound a cautionary note in concluding 'overall whilst I acknowledge performance is not strong in housing delivery and there are worrying signs that the Council need to address, particularly in the more recent years since adoption of the WCS where delivery has not met requirements, I do not conclude that under delivery at this point has been persistent in the context of the framework'.

3.3 The Government White Paper 'fixing the broken housing market' published a consultation response to a proposed Housing Delivery Test. This proposes an assessment of delivery against the housing requirement in the past 3 monitoring years, beginning in November 2017. In cases where delivery over this time period falls behind then a 20% buffer may be required. This measure is likely to increase the risk of Wiltshire Council having to apply a 20% buffer which would immediately in the NW HMA result in a lack of a five year land supply.

3.4 The review of the need for site allocations and of the settlement boundaries which underpin the WHSAP was predicated on a very different understanding of the housing trajectory coming forward over the 5 year period 2016-21. Hitherto the Council identified a supply of 7,446 dwellings against a target of 6,817 dwellings. The Inspector in the Lyneham appeal referred to above concluded that the supply was actually 6,891 dwellings against a target of 6,817.

## Appendix Q - Schedule of representations

3.5 Delivery rates have failed to meet the Council's expectations and in the months since the publication of the Interim Housing Land Supply Statement (March 2017) 555 dwellings have fallen away from the projected deliverable 5 year land supply. The published WHSAP has clearly been superseded by events and the appeal conclusions clearly indicate there is a need to increase supply within the NW HMA to avoid the risk of a lack of 5 year housing land supply occurring. The plan is un- sound in this regard because it is not positively prepared and it is not justified because it needs to be reviewed in terms of the material change in circumstances which the Lyneham appeal has yielded.

3.6 The WHSAP recognises the uncertainties inherent in housing delivery. Paragraph 2.3 of Topic Paper 4: Developing Plan Proposals advises that Wiltshire Council's (WC) strategy is 'to be sure of maintaining a five year housing land supply over each of the remaining years of the plan period, annual supply should exceed the five years and buffer required by planning policy. Any target level will be arbitrary but the Plan might look to provide at least six years of supply in each of the remaining years of the Plan period (to allow for any possibility of under- delivery in the future)'.

3.7 The 5 year housing land supply trajectory as published in the NW HMA purports to demonstrate that this is achievable in the HMA. This assessment is however based upon the now out of date projected deliverable supply. Whilst a delay in supply might bolster housing delivery at the end of the plan period, this becomes more uncertain when looking towards the end of the plan period. It is however more likely that housing required to 2026 will slip outside of the plan period thereby resulting in a shortfall.

3.8 Based upon the Inspector's conclusions on housing land supply in the Lyneham appeal it is clear that WC will be unable to demonstrate a 6 year supply over the forthcoming 5 years (2017-22). The WHSAP therefore needs to be fundamentally looked at in respect of the NW HMA in order to boost supply if it is going to achieve its own stated goal of at least a 6 year supply being projected in each of the remaining Core Strategy years to 2026. Given the required step change in delivery rates and the recent under-delivery of housing it is argued that a 6 year supply is an entirely reasonable and necessary target.

### 4 HOUSING SUPPLY IN WARMINSTER AND ITS ASSOCIATED COMMUNITY AREA

4.1 The position is significantly worsened when looking at the housing position for Warminster and its associated community area. Evidence base Topic Paper 3 to the WHSAP table 2.2 reproduced below evidences the position (Table 1);

Table 1 – Housing requirements

[See attached Appendix 1]

4.2 The Council's evidence shows a residual requirement of 494 dwellings. This represents nearly 25% of the required supply needing to be found through the WHSAP by a combination of settlement boundary review and site allocations. Against this challenging housing target it is important to also recognise that at present only 693 completions have taken place in the first 11 years of the plan period averaging 63 completions per annum leaving 1,367 completions required over the last 9 years of the plan period at a delivery rate of 151 dwellings per annum. This requires a step change in housing delivery in the area and any further delays in bringing the WWUE forward to be delivering housing from 2018 will make the situation much worse. This lack of contingency and reliance on one large site puts the already inadequate levels of housing being projected at risk of slippage.

4.3 The WHSAP attempts to deal with the housing shortfall and proposes allocations within Warminster totalling 200 dwellings and a further allocation in Chapmanslade of 35 dwellings. Even if one presumes that these allocations are deliverable (which is questioned later) the strategy is not planning for enough housing to meet the objectively assessed need (OAN). The settlement boundary review has followed a process designed to regularise existing areas of development which sit outside the boundary rather than to seek to support additional windfall developments at Warminster and the large villages.

4.4 The WHSAP recognises as did the CS that area based targets for housing need not be overly prescriptive indeed they should not be recognised as maximum levels of appropriate development. There are some instances of settlements and community areas which WC consider will not be capable of delivering their required levels of development. Core Policy 31 of the CS (paragraph 5.158) outlines the specific issues related to the WMCA but at paragraph 2.6 of the WMCA Topic Paper it is noted that 'neither the WCS or the IDP identify insurmountable issues to the extent that they would restrict delivery of the level of housing proposed over the plan period'. There is then no reason articulated by WC to explain development not meeting the target outlined in the WMCA. Whilst there will be an element of windfall development within the WMCA this alone will be insufficient to meet the residual requirement of 259 dwellings.

#### Appendix Q - Schedule of representations

- 4.5 As outlined above at 3.6 the stated approach of the Council is to seek to deliver a 6 year supply of housing for each of the remaining years of the plan period. In the case of the WMCA this level of housing has not been planned for. Indeed it seems highly unlikely given the existing shortfalls within the WMCA that the required levels of housing are achievable. The plan is not in this regard sound because it has not been positively prepared and is failing to meet the objectively assessed need without any strong environmental reason for not doing so.
- 4.6 The Core Strategy Inspector was clear upon the basis which he found the housing figure for the WMCA to be sound and at paragraph 378 of his Report he noted that 'the level of indicative housing contained in Core Policy 31 is proposed to be 2,060 homes, of which some 1,920 would be at Warminster...with due regard to the updated evidence base, including the SA, the SHMA and the Council's Topic Papers such an approach is justified adequately and I recommend accordingly (MM 66)'.
- 4.7 Main modification 66 is relevant and quoted below;  
'At least 1,770 approximately 2,060 new homes will be provided. Of these about 1,920 ~~4,650~~ dwellings should occur at Warminster, between the existing built form and the A350 for strategic growth'
- 4.8 The Inspector advised that the additional housing required, above and beyond that to be delivered in the WWUE should be located between the existing built form of Warminster and the A350. He went on (paragraph 379) subsequent details of housing distribution can reasonably emerge through the sites DPD but this statement must be understood in context of paragraph 378 where the Inspector was clear that development would come forward between the A350 and the built form of Warminster.
- 4.9 The WMCA Topic Paper which underpins the WHSAP accepts that there is a residual requirement for housing of 462 dwellings and 200 dwellings are planned for. The WHSAP is not consistent with the WCS because it fails to deliver the requisite level of housing. It is suggested in table G.7 of the document that 'the West Warminster Urban Extension provides by far the largest part of new housing to serve the town and this area will continue to do so for several more years after 2026. This provides certainty and continuity to the supply of housing to the town...the level of development proposed at Warminster over the plan period is not so below the indicate level of the WCS that it significantly undermines the spatial strategy'.
- 4.10 The argument advanced is that we should not be seeking to meet the identified need to 2026 and that the residual need can be met in the years following the plan period. This argument should not be accepted because future delivery beyond 2026 will be going towards meeting the future need within the WMCA beyond 2026 which has not yet been calculated. In the meantime the Council's strategy is to leave part of the objectively assessed need unmet. The plan is not positively prepared in this regard.
- 4.11 WC are seeking to argue that the allocation of the WWUE acts to increase the surety of supply within the WMCA. The converse argument can be made with more force however. The lack of flexibility and over- reliance on one site could act to seriously undermine the surety of supply.
- 4.12 The following two tables show how the projected delivery of the WWUE has slipped over the last 3 years. Fig 1 is an extract from WC's Housing Land Supply Statement 2014 and Fig 2 is an extract from the 2017 interim statement. In 2014 it was envisaged that 215 dwellings would be completed during 2016/17 and 2017/18. The latest projection is for the site to begin delivering first completions from 2018/19 and then at a slower rate than previously expected. In total over the plan period the estimated delivery for the WWUE has been reduced from 1,200 dwellings to 793 dwellings over a period of less than 3 years.  
Fig 1 – Extract from Housing Land Supply Statement 2014 showing projected delivery of WWUE  
[See attached Appendix 1]
- 4.13 It is notable that at present the outline planning application (15/01800/OUT) for the development of the WWUE remains undetermined. There is no Committee resolution in place which would need to precede the preparation of a S106 agreement. There are existing objections to the planning application from a number of consultees including the Environment Agency, Natural England, AONB board, landscape officer, urban designer, drainage engineer.  
Fig 2 - Extract from Interim Housing Land Supply Statement 2017 showing projected delivery of WWUE  
[See attached Appendix 1]
- 4.14 The application is not therefore in a position to be approved at present and there has been little progress made with the application in the last two years since submission. It is entirely reasonable in this context to question the legitimacy of the suggestion that the site will be delivering completed dwellings from 2018. Even if a resolution were to be granted for the outline permission there would then be a likely hiatus of 3-6 months for the s106 agreement to be completed. There will thereafter be a requirement to prepare and submit the reserved matters

## Appendix Q - Schedule of representations

submissions for each phase. Only after reserved matters have been approved for the early phase and the necessary conditions have been discharged will it be possible for the site to begin construction and only sometime thereafter can it start to deliver completed dwellings. It is not possible to foresee a set of circumstances where the WWUE can start delivering dwellings in accordance with the latest published timescales in the 2017 interim Housing Land Supply Statement.

4.15 The strong likelihood is that the WWUE will not start delivering completions until at least 2019/20. As the WWUE comprises some 793 dwellings of a forecast supply of 881 dwellings it is expected to be the largest contributor to housing but that supply will be delayed which means that housing land supply position is much graver for the WMCA than reported by WC. Being optimistic, it is highly likely that at least a year's supply will be lost out of the Core Strategy period which equates a minimum of 100 additional dwellings not being built in WMCA. In this context additional housing land is required to ensure that the significant unmet need within Warminster does not grow further. In the absence of any contingency the WHSAP cannot be considered to be positively prepared.

### 5 MY CLIENT'S LAND IN WARMINSTER AND THE CASE FOR ITS INCLUSION AS AN ALLOCATED SITE

5.1 My Client's land is shown in the below (Fig 3) and as a scaled drawing in (Appendix 2) and at Fig 4 superimposed onto the SHLAA 2012 output map. My client's land has not hitherto been put forward for development under the 'call for sites' exercise. The site does however abut SHLAA site 2091. At the same time as this submission is being made the site is being put forward for registration on the SHLAA. Wiltshire Council's website is clear that any site put forward for the SHLAA will be reviewed in terms of its suitability on an annual basis but also that 'as soon as it is received it will be considered in the development of plans'.

Fig 3 – Land at Brick Hill being put forward for development

[See attached Appendix 1]

5.2 The land holding incorporates approximately 3.5ha of developable land when taking into account the need to safeguard existing vegetation along the boundaries and a hedgerow which crosses the site. The existing western boundary would be proposed for further tree planting in the form of a belt of a minimum of 10m in width which would be likely to reduce the developable area by a further 0.2ha. WC would require on site open space provision and it is proposed to at least meet the minimum level required.

Fig 4 – Land at Brick Hill, Warminster in relation to the SHLAA output map

[See attached Appendix 1]

5.2 The land holding incorporates approximately 3.5ha of developable land when taking into account the need to safeguard existing vegetation along the boundaries and a hedgerow which crosses the site. The existing western boundary would be proposed for further tree planting in the form of a belt of a minimum of 10m in width which would be likely to reduce the developable area by a further 0.2ha. WC would require on site open space provision and it is proposed to at least meet the minimum level required.

5.3 The WMCA has adequate levels of employment space being planned for when taking into account the demand has been identified to be for 7ha of space. The WWUE will provide 6ha and the balance is to be provided through smaller allocations. The land to the east of my Client's site is also put forward through the NP for allocation in future for employment needs. The shortfall in development within the WMCA has been shown to be in housing numbers rather than employment space. It is considered that my Client's land could be expected to contribute up to 110 dwellings towards the unmet housing requirement of which 30% would be affordable dwellings.

### SUSTAINABILITY AND TRANSPORT IMPLICATIONS

5.4 In order to understand why my Client's land should be allocated for development it is important to understand the policy context underpinning the allocation of the WWUE. Section 2 of this report has outlined, using direct quotes, the reasons why the WWUE was chosen as the most sustainable site for a strategic level expansion of the town.

5.5 The Wiltshire LDF Strategic Transport Assessment (2009) formed a crucial part of the evidence base for 'Wiltshire 2026 Planning for Wiltshire's Future Strategic Sites Background Paper' October 2009. Both of these documents compare the sustainability credentials of the sites coming forward for development around Warminster. Fig 5 provides a map extract from the Strategic Transport Assessment (2009) showing the areas of search and (Fig 6) shows a summary of the accessibility of each of the areas of search for Warminster.

5.6 The Strategic Transport Assessment rated the areas of search based upon accessibility, bus connectivity, highway capacity, journey to work, access to a railway station and rail connectivity. Fig 6 includes the WWUE areas at sites B-H. It can be seen that all of the areas of search around Warminster score similarly with the exception of sites G and I which are either proposed for development or unavailable at present.

Fig 5 – The areas of search around Warminster

[See attached Appendix 1]

Fig 6 – The comparative scores of the areas of search

[See attached Appendix 1]

5.7 To put these figures into context the sites of the WWUE rank between 60-68 in terms of sustainability out of the 162 areas of search. Only Westbury of the 'B category' towns scored higher in terms of accessibility within Wiltshire. The areas of search for the following category B settlements all scored much lower than the WWUE – Ludgershall, Tidworth, Calne, Melksham, Marlborough, Devizes, Corsham, Amesbury and Wootton Bassett along with the 'A category' town of Chippenham. In relative terms then the area of the WWUE performed comparably to other sites around Warminster and considerably better than virtually all of the other similarly sized town's sites.

5.8 In this context it is eminently sensible to be seeking to achieve the housing need of Warminster, around Warminster. The identified unmet need should be met within this area and the Inspector concluded that in respect of Warminster itself the development of land should take place between the A350 and the existing built up area. This in practical terms should confine the area of search to land to the west or north west of Warminster.

5.9 My client's land has not been put forward to date as a possible development option and as one of the few remaining unallocated sites located between the A350 and the built up part of Warminster it requires consideration. The site directly to the south SHLAA site 2091 has bizarrely been excluded as a possible site to develop under the Council's methodology for site selection. The site itself has been recognised in the latest iteration of the SHLAA to be suitable for development and it relates extremely well to the WWUE directly to the south. The reason it has been excluded from further consideration is because it is more than 400m from a bus stop. The same criteria would apply to my Client's land however the Council's methodology fails to recognise that public transport connections will be improved shortly and that sustainability is ultimately a much wider consideration. The exclusionary criteria is therefore overly simplistic and flawed.

5.10 There is a specific requirement outlined within the WCS CP31 for the WWUE to provide a new bus service to the town centre. WC's Infrastructure Delivery Plan makes clear that the bus service should be a 30 min frequency (on weekday daytimes) connecting the WWUE and the town centre and that this will be delivered by 2021. There will also be a bus service provided for school children to get to Kingsdown School which is on the eastern side of Warminster town centre.

5.11 The below (Fig 7) is an extract from the travel plan which supports the current outline application which shows a new bus route with a 30 min frequency to be delivered servicing the roundabout access from Bath Road. This would bring my Client's land within 400m of the bus likewise for SHLAA land parcel 2081.

5.12 My Client's land already scored as highly and in some cases more highly than areas of the WWUE in terms of its sustainability and is directly comparable to the majority of sites around Warminster. The land has excellent connections to both the A350 and A36 and would reduce the level of cross town traffic which is an acknowledged problem within Warminster. The fact that my client's land will soon be within 400m of a bus stop would allow it to score significantly greater points when using the Council's Strategic Transport Assessment (2009) criteria. Taking this fact into account my client's land would be likely to become the most sustainable location for future growth around Warminster in terms of its accessibility.

Fig 7 – Travel plan extract from 15/01800/OUT showing proposed bus route with dashed dark blue line

[See attached Appendix 1]

5.13 The provision of the bus service is a requirement of the WWUE and is included within the pending planning application for the development of the site and has a timescale to be delivered prior to 2021. The allocation of my client's land will increase patronage of the new bus service making it a more sustainable long-term service. In light of these point it can reasonably therefore be taken into account in considering the suitability of my client's land. This point notwithstanding my client's land performs comparatively well to other Warminster sites, and much better than similar sized settlements areas of search, in sustainability terms even in the absence of a bus stop being within 400m of the site it can be justified to be brought forward now.

5.14 Whilst my client's land is not located in close proximity to the town centre itself it is actually located closer to the centre than the suggested allocation at 'Land east of the dene' which is the largest planned allocation at 100 dwellings. Furthermore my client's land benefits from its close proximity to the Warminster Services which is less than 300m from my clients site access. The Warminster services provides a

## Appendix Q - Schedule of representations

Travelodge hotel. Several restaurant including Little Chef, Burger King and Subway. It also has a BP garage and shop which provide for daily shopping requirements.

5.15 The WWUE will likewise provide for a local centre with use classes A1- A5, D1 community facilities and a new one and a half form primary school. There is a public footpath which connects the lane off Bath Road directly into the WWUE so it will be possible in the future for pedestrians and cyclists to access the local centre of the WWUE directly without needing to walk alongside the Bath Road and back into the development.

5.16 My client's land likewise has excellent access to employment opportunities. The Crusader Business Park and Warminster Business Park are located within walking distance of the site and is a major employment site within Warminster. The WWUE also proposes an area of employment comprising some 6 hectares at the northern tip of the allocation. Given also the proximity to the A36 and A350 the site is well located for local employment opportunities with excellent communications links.

5.17 The Warminster Neighbourhood Plan (NP) is a made plan and therefore forms part of the Development Plan. Fig 8 is an extract from the NP which shows the land to the east of my client's land has also been identified as a new/potential employment site. This is significant for two reasons firstly it shows that further employment is proposed within walking distance of my client's site thereby further enhancing its sustainability credentials and secondly the principle of development to the north of the existing settlement area has been considered to be acceptable in principle and the settlement will be expanded in this direction.

Fig 8 – Neighbourhood Plan spatial expression of development strategy

[See attached Appendix 1]

5.18 Access can be gained from the site onto the Bath Road. There is an existing access junction onto Bath Road which offers good visibility splays in both directions. The access would be capable of dealing with an increase in traffic patronage.

### LANDSCAPE CONSIDERATIONS

5.19 My Client's land falls within the Cley Hill greensand and chalk terrace (G4) character area in the Wiltshire Landscape Character Assessment (2007) (WLCA). The most significant landscape feature within this area is Cley Hill, a chalk knoll hillfort which provides extensive views over surrounding areas. More generally the landscape character area comprises flat to gently undulating farmland. The field pattern consists of mostly medium sized, generally regular fields, often enclosed by mainly intact hedgerows with hedgerow trees.

5.20 The feature of Norridge Wood to the north west of Warminster is identified as a strong feature. The A36 and A350 which cut through the landscape to the west of Warminster are referenced as disturbing the landscape pattern in the WLCA.

5.21 Views into the site are limited. The land is raised above the A36 which was formed in a cutting. The top of the highway embankment is then marked by significant vegetation. In the form of a dense belt of trees in the southern half of the site and more sporadic trees within an established hedgerow to the northern part of the site. The eastern boundary of the site with the Bath Road has a dense belt of trees running the length of the site prohibiting views into the site from the east.

5.22 The only possible views into the site would be from the elevated position of the ridge of Cley Hill. The distance between the site and Cley Hill is approximately 3km at this point. Taking into account the distance and the strong intervening vegetation, particularly along the south part of the western boundary the impact on views from Cley Hill would be extremely limited. It is proposed that the landscape approach which is to be adopted at the WWUE could likewise be taken forward within my Client's site. The suggestion is for the existing tree lined buffer to be augmented with additional planting along the length of the western boundary of the fields to provide a denser vegetative screen. The WWUE proposes woodland structure planting comprising of locally indigenous species to create a strong edge and separation between the town and the countryside. The current proposed allocation could be designed to dovetail with this strategy.

5.23 The current site is less sensitive in landscape terms than the WWUE which is located in closer proximity to Cley Hill with views across the land. Given that the principle of the WWUE has been found to be acceptable it is argued that my Client's land can likewise be considered acceptable. The land in question forms a logical conclusion to the WWUE being situated as it is between two main roads to the west and east and a small access road to the south. It is adjacent to the WWUE and represents the completion of the infilling of the gap between the bypass and Warminster to the north and west of the settlement.

5.24 The site itself is grassed agricultural land which is currently underutilised forming two parcels of isolated agricultural land. The land is category 3b and 4 grade agricultural land (Fig 9) and therefore not the high quality land which paragraph 112 of the NPPF seeks to safeguard

Appendix Q - Schedule of representations

from development. Fig 10 displays an aerial view of the site. There is an existing hedgerow with trees dividing the site west-east. This hedgerow would be retained as part of the development to safeguard its landscape and ecological value with the siting of buildings and internal access roads being designed to allow this to happen.

Fig 9 – Extract from MAGIC database showing the site to be Grade 3B and 4 agricultural land  
[See attached Appendix 1]

Fig 10 – Aerial view of the site  
[See attached Appendix 1]

5.25 The land is situated in between the A36 and the Bath Road. The site offers unparalleled visual and physical containment when compared to competing sites on the fringes of Warminster. The landscape has been affected at this point by the introduction of the A36, the large roundabout, and to a lesser but still noticeable extent by the Bath Road. The presence of these roads has limited the parcel of land size to reduce its usefulness for modern agricultural practices. There is clearly no argument to be made with this site that it may set a precedent for further expansion of the town being contained by the roads. In plan making terms it should be seen as a desirable site which may benefit from the WWUE facilities and enhanced connectivity whilst allowing for the necessary expansion of the town at a site which is not prominent from public view points.

**ECOLOGY**

5.26 Norridge Woods is a Local Wildlife Site (LWS) and is separated from the site by the A36. This is a significant barrier for faunal movement between the site and the woods. The separation distance from the WWUE was considered to be adequate to ensure any impacts on the woods would be negligible. The current site runs parallel to the woods but no closer to them than the WWUE in this regard it is expected that the impact would be similar to the WWUE.

5.27 Cley Hill is identified as a Site of Special Scientific Interest (SSSI) because it comprises botanically rich chalk grassland that supports many plants which are characteristic of the south and south-west England. The River Avon is a Special Area for Conservation (SAC) as is the Salisbury Plain a SAC. These sites are all though over 3km from the site in question and sufficiently separated from the site that its development would not result in any significant effects.

5.28 The site itself comprises grassed fields which have negligible ecological value. The hedgerows within the site are of mixed quality with some being continuous in nature and dense whilst other areas are more 'gappy'. The network of hedgerows offer some ecological value and they are proposed to be largely retained if the site is developed. Overall there are no significant barriers from an ecological impact perspective that should stop the site coming forward for development. The proposed tree belt and areas of open space should also assist in safeguarding the ecological value of the site.

**FLOODING**

5.29 My Client's land is situated exclusively in flood zone 1 (Fig 11). As such it passes the first step of the exclusionary criteria adopted by the Council. There are likewise no local flooding issue designations for the site and no history of drainage problems experienced by my Client at the land. There are no barriers to developing the site in this regard.

Fig 11 – Extract from Environment Agency to show the site is in flood zone 1  
[See attached Appendix 1]

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

In the event that the Council is unwilling to make the amendment sought through this representation it will be necessary to address the Inspector at the examination in public because the representation raises issues which question the soundness of the plan.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2739</a>	<b>Consultee</b> WebbPaton Client Group  <b>Person ID:</b> 1134382	<b>Agent</b> Mr Nathan McLoughlin Director  McLoughlin Planning  <b>Person ID:</b> 404491	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1.0 General Comments on the DPD</p> <p>1.1. McLoughlin Planning has been instructed to submit representations on behalf of various sites being promoted by Webbpaton (WP) throughout the County. The purpose of this document is to set out the respondent's position on the various sites and how they are treated through the emerging Housing Site Allocations DPD.</p> <p>Objective 1: To ensure there is a clear definition to the extent of the built- up areas at Principal Settlements, Market Towns, Local Service Centres and Large Villages</p> <p>1.2. WP support the objective of the DPD in defining the clear extent of these locations as this will address a previous deficiency highlighted in the Core Strategy Inspector's Report. This previous weakness identified a number of settlement boundaries as being out of date. Through meeting the CS housing requirements, the settlement boundaries will have to be redefined and where sites are promoted for development through this consultation, then the settlement boundaries should be so adjusted to accommodate development.</p> <p>Objective 2: To demonstrate a rolling five-year supply of deliverable land for housing development</p> <p>1.3. WP supports the need for the Council to maintain a 5-year housing land supply. This is critical in light of the fact that the Core Strategy Inspector recognising that the Council commitment to undertaking an early review of the CS.</p> <p>1.4. However, the context for preparing the HSADPD is the CS which is based on a housing target that was and still is in need of immediate review. Therefore, whilst the DPD is clearly assisting the Council in maintaining a 5-year supply figure, the level of provision conflicts with the requirements of Framework paragraph 47 that requires LPAs to ensure that a Local Plan meets the "full objectively assessed needs for market and affordable housing".</p> <p>1.5. As set out with a number of the representations, given the above, there is no specific limit on the allocations made by the DPD. As a result, there is flexibility for the number of allocations to be increased, over the 42,000 dwellings of the Core Strategy. The Council should consider the flexibility offered by the CS in this regard.</p> <p>1.6. Without the prompt review of the CS the Council will remain vulnerable to any application on a 5-year supply basis or one which successfully recalculates the OAN for the County, especially in light of the emerging SHMA work. As a result, WP take the view that given the expression of the CS housing target of 42,000 as a minimum and a recognition that few of the community sub-areas have no limitation placed on them for additional development over and above what is set out in the CS, then there is an opportunity for the HAS DPD to allocate additional land over and above the figures in any given CA, barring specific limitations in CA policy.</p> <p>Objective 3: To allocate sites at the settlements in the County that support the spatial strategy of the Wiltshire Core Strategy</p> <p>1.7. WP support the need of the HSADPD to allocate sites which accord with the CS. To do so would otherwise risk the HSADPD being found unsound as it is not in general conformity with the CS. WP still has concerns about the non-allocation of housing sites in the HSADPD and the inability of the plan to meet the requirements of Framework paragraph 47.</p> <p>Other Matters</p>			

## Appendix Q - Schedule of representations

1.8. WP is aware of the recent Cabinet Meeting of 12 September and welcomes the clear commitment to review the Core Strategy. Whilst the details of the emerging Local Plan's housing target remain confidential, the papers make reference with the fact that the current housing market areas in the Core Strategy will be subject to change. In preparing site allocations through the HSADPD, the Council should actively consider the implications of this HMA change, especially in light of a proposed Swindon HMA, which is likely (it is assumed) to have cross-boundary implications.

### 2.0 Site-Specific Representations

2.1. This Section of the document sets out site specific representations:

#### Potterne

2.2. Paragraph 4.3 sets out that there is a "priority" for housing land allocation to be located at the higher tier settlements (excluding Large Villages) that meets objective 2 of the plan. The respondent's position is that this is contrary to the general approach set out in the Core Strategy for the following reasons.

2.3. Core Strategy Core Policy 1 sets out the Settlement Strategy, identifying the various tiers of settlements across the County. Whilst the Policy sets out different requirements for each tier, the Policy does not set out any "priority" for where new development should be focused. This is further evidenced by Paragraph 4.15 of the Core Strategy which sets out that the HSADPD will review settlement boundaries to allow new housing to come forward. In contrast, paragraph 4.3 of the HAS resembles a quasi-sequential approach to housing site allocations.

2.4. The submission site is located to the northeastern edge of Potterne and is well placed to deliver circa 40 dwellings, subject to masterplanning. The site comprises around 3.4ha of agricultural land, which is not subject to any form of policy or landscape designation and is not at an unacceptable risk of flooding. Furthermore, development of the site would not have an adverse impact on the village conservation area.

2.5. The site is in a sustainable location with very good access to nearby bus stops and a convenience store. The main site access point would be created to the north of Blackberry Lane, off the A360. From this point there is a pedestrian footpath leading towards the centre of the village around 300m away. This could be used to access numerous other facilities, including a village hall, post office, public house, primary school and playing fields. The local bus services also provide good accessibility to larger settlements.

#### Pewsey

2.6. Pewsey is the only community Local Service Centre in the Community Area and is therefore the focal point for new development. Whilst the land available is considerable, a logical extension to the settlement could be provided immediately to the south of Pewsey.

2.7. Whilst Pewsey and the surrounding land fall within an AONB, the land immediately abutting the southern settlement boundary is already heavily influenced by existing residential development. Consequently, further residential development in this location would not necessarily be out of character. Moreover, the proper masterplanning of the site could provide opportunities for new landscaping to the south, which could provide a more appropriate transition between the settlement edge and the countryside beyond.

2.8. It is noted that there is extensive Grade 1 Agricultural Land surrounding Pewsey, however, the land to the south of the settlement is not afforded such status. Land to the south of Pewsey is not at risk of flooding and is not located within a conservation area. Moreover, land to the south of Pewsey is ideally located relative to the various services and facilities Pewsey has to offer.

2.9. Should the HSADPD lead to a review of the OAN for the County and/or require additional development over and above the minimum target of 42,000 dwellings, land to the south of Pewsey could provide such housing.

#### Bradford-on-Avon

2.10. This Green Belt site is located on the western edge of the town and immediately borders the playing fields of St Lawrence School and residential development at The Old Batch. The site comprises circa 16ha of agricultural land to which the main access point is from Winsley Road (B3108). The land is largely flat and set out as three distinctive arable fields with mature boundaries. The site is not subject to any formal landscape designations and is located within Flood Zone 1 (low risk) as defined the Environment Agency.

2.11. In terms of meeting strategic requirements, there is nothing in the Core strategy that prevents additional review of the green belt from taking place. Whilst the housing target for the CA has been met through commitments and completions, as set out in the general commentary on the HSADPD, the Plan is under delivering against its OAN as 42,000 is not the OAN. This area is therefore, promoted for housing development.

## Appendix Q - Schedule of representations

- 2.12. The site has a net capacity of around 325 dwellings, which could be achieved at a style and density similar to that of its surroundings. There is also sufficient space to provide for landscaping and public open space.
- 2.13. The site is in a sustainable location approximately one mile from the town centre where a range of services and facilities are available. There are also bus stops near to the site on Winsley Road, which provide links to Bath, Salisbury, Trowbridge, Westbury and Warminster. A train station is also located near the town centre on the Wessex mainline, which runs between Bristol and Southampton.
- Calne
- 2.14. This circa 15 ha site is situated on the eastern edge of the town and is not subject to any specific environmental constraints which would prevent its development. The site is afforded good access from Sand Pit Road, which in turn is accessed off the A3102 Oxford Road. The site sits immediately adjacent an existing housing development and in close proximity to a significant business park. The site is also ideally located relative to the numerous services and facilities that Calne has to offer.
- 2.15. Given the expressed concerns about the Plan meeting an out-of-date housing target, this site is being promoted as a development opportunity.
- Melksham
- 2.16. This circa 29 ha site is located to the west of Melksham. The site is generally flat and featureless and is not subject to any formal landscape designation. The site is accessed directly off Bath Road and has good access to the considerable level of services and facilities that Melksham has to offer as a Market Town. Moreover, the site is ideally located relative to the train station and nearby employment opportunities.
- 2.17. Whilst the fringes of the site are at risk from flooding, the size of the land is such that it could still accommodate a considerable level of housing, including appropriate levels of community facilities and green infrastructure. Subject to masterplanning, the site could yield circa 400 dwellings and could be phased accordingly.
- 2.18. Again, given the expressed concerns about the Plan meeting an out-of-date housing target, this site is being promoted as a development opportunity.
- Trowbridge
- 2.19. WP object to the non-allocation of this land for housing development. Under the CS housing requirements, there is an outstanding requirement for 2,020 dwellings still to be met. It is understood that the site (SHLAA reference 3130) has been automatically excluded under the Council's site selection methodology because of its Green Belt designation.
- 2.20. In response, WP consider the Council's site selection methodology is flawed in this context as national guidance does not prescribe green belt development as a development of "last resort". Given the need to consider a significant level of housing at the Town, the lack of a Green Belt review is concerning in that without it, the DPD cannot demonstrate that it has considered all reasonable alternatives.
- 2.21. There can be wider sustainability benefits to development in the green belt, because of proximity to the town centre, relative to other opportunities. It is therefore recommended that the site is reconsidered as a housing allocation.
- Crudwell
- 2.22. WP object to the non-allocation of land at Tuners Lane for housing for circa 30-40 dwellings (subject to masterplanning) and object to the allocation at Ridgeway Farm.
- 2.23. WP is disappointed to note that the site has not be considered in the supporting Malmesbury Area Topic Paper. This is because the site has been subject to pre- application advice (17/02801/PREAPP) with the Council and despite the proactive approach on the part of promoters, there does not appear to have been any subsequent consideration of the site in preparing the DPD. As a result, there is a need for development around the village to be reconsidered to ensure that any allocation is based on a robust and credible evidence base.
- 2.24. To reiterate, the site is a circa 3.75 acre field located on the western edge of Crudwell village. There is an existing field gate access in the southeast corner of the site, providing access from Turners Lane at a point within a 30 mph zone that commences at the western entrance to the village.
- 2.25. The site is relatively flat, with a very gentle gradual slope up from south to north, rising away from Turners Lane. The site is not subject to any formal landscape designations and is not at an unacceptable risk of flooding. Furthermore, there are no listed buildings in the proximity of the site and the site does not form part of the setting of the conservation area in the eastern part of the village.
- Appended Representations by WebbPaton in respect of various sites
1. General comment s on the DPD

## Appendix Q - Schedule of representations

WebbPaton have been instructed to act for a number of landowning clients throughout Wiltshire to make representation on the Wiltshire Housing Site Allocation DPD.

**Objective 1**

WebbPaton would like to see an alteration of Clause 1.1 and Objective 1 so it states that there should be a revision of the settlement boundaries by adding a review to the settlement boundaries adjoining Swindon Borough Council's planning area, so that this fits with the commitment by Wiltshire Council 's Cabinet on 12th September 2017 to do a joint new HMA for Swindon and the M4 corridor with Swindon Borough Council. It would appear to be totally against this commitment if the Site Allocation DPD is agreed before this joint initiative is completed.

WebbPaton consider that the DPD will have to be redefined taking into account where sites are promoted for development through this consultation and adjust the settlement boundaries so to accommodate these developments. Clause 2.8 regarding settlement boundaries should be reviewed so it is in line with the NPPF as such development should be in sustainable locations as defined by planning law and the NPPF. As such, we see no need to continue to retain the policy of having defined settlement boundaries with a policy of restricting development. The Core Strategy should identify the allocated sites but should not prevent other sites from coming through because they are not within a settlement boundary where there is a lack of 5 year housing supply.

**Objective 2**

WebbPaton support the need for the Council to maintain a 5 year housing supply. Questions have to be asked as to whether the current strategic allocated sites such as those in Chippenham are currently delivering housing supply. We know that the Chippenham site is already behind schedule for housing delivery, questions have to be asked about the validity of the current 5 year land supply situation.

The Core Strategy Inspector recognised the need for Wiltshire Council to do an early review of the Core Strategy. Questions have to be asked as to the context of the HSADPD as it is based on a housing target that was and still is in need of an immediate review. Therefore this in direct conflict of NPPF paragraph 47 that requires Local Planning Authorities to ensure the Local Plan meets the "full objectively assessed needs for market and affordable housing". Therefore, paragraphs 2.9 and 4.25 of the WCS HSADPD need deleting or amendment.

As set out with a number of the representations, given the above, there is no specific limit on the allocations made by the DPD. As a result, there is flexibility for the number of allocations to be increased, over the 42,000 dwellings of the Core Strategy. The Council should consider the flexibility offered by the CS in this regard.

Without the prompt review of the CS the Council will remain vulnerable to any application on a 5-year supply basis or one which successfully recalculates the OAN for the County, especially in light of the emerging SHMA work. As a result, WebbPaton take the view that given the expression of the CS housing target of 42,000 as a minimum and a recognition that few of the community sub-areas have no limitation placed on them for additional development over and above what is set out in the CS, then there is an opportunity for the HASDPD to allocate additional land over and above the figures in any given CA, barring specific limitations in CA policy.

**Objective 3**

WebbPaton support the need of the HSADPD to allocate sites which accord with the CS. To do so would otherwise risk the HSADPD being found unsound as it is not in general conformity with the CS. WebbPaton still has concerns about the non-allocation of housing sites in the HSADPD and the inability of the plan to meet the requirements of Framework paragraph 47.

WebbPaton is aware of the recent Cabinet Meeting of 12th September and welcomes the clear commitment to review the Core Strategy. Whilst the details of the emerging Local Plan's housing target remain confidential, the papers make reference with the fact that the current housing market areas in the Core Strategy will be subject to change. In preparing site allocations through the HSADPD, the Council should actively consider the implications of the HMA change, especially in light of a proposed Swindon HMA, which is likely (it is assumed) to have cross-boundary implications.

Paragraph 2.10 Neighbourhood Plans are likely to be updated if there is an amendment of the Core Strategy. The wording needs to be amended so to allow additional sites to come forward.

Table 2.1 shows the Core Policy 2 proposing the Minimum Housing Requirement in each HMA. These need to be reviewed to take into account Swindon Council's needs on the boundary with Swindon in particular in the current Cricklade and Royal Wootton Bassett HMA, which we presume will become part of the Swindon and M4 Corridor HMA.

## Appendix Q - Schedule of representations

Questions have to be asked where the 24,740 dwellings in north and west Wiltshire are to be allocated. The evidence does not demonstrate how this figure has been arrived at considering the current demand for housing close to Swindon, as can be proven by the number of dwellings already built in Royal Wootton Bassett and Calne, both of which join Swindon which has a current lack of 5-year land supply. The 1,455 dwellings Indicative Requirement in Royal Wootton Bassett appears extremely low as Swindon Council alone has a requirement to build 1,466 dwellings per year and currently has less than 3 years' housing supply. Wiltshire Council has a duty to co-operate with Swindon, and the WHSADPD must take this into consideration. Moreover, no consideration appears to have been given to the economic benefits of the electrification of the Paddington to Cardiff railway line which will speed up journey times to London, adding to demand for housing near Swindon. Therefore we question the accuracy of the Royal Wootton Bassett and Cricklade CA total.

Table 4.2 needs to reflect the new Swindon and M4 Corridor HMA as proposed in the Cabinet meeting of 12th September 2017. WebbPaton's clients would also like to see housing numbers increase in the towns of Pewsey, Calne, Melksham, Bradford on Avon, Royal Wootton Bassett and the larger villages such as Crudwell. It appears completely wrong that those towns where builders have the highest demand and sell houses quicker than they can build them that Wiltshire Council has completely ignored this economic data.

Clause 4.8 refers to the SHLAA. The fact is that the Wiltshire SHLAA has not been updated since 2012 when a number of sites were rejected because they were outside the settlement boundary. Therefore, how can the sites capable of development have been properly assessed? In particular this SHLAA was conducted in the middle of a property recession. The revision of the HMA should be based on up to date housing demand and take into account sites brought forward by landowners/developers/promoters. A call for SHLAA sites was carried out in 2014 but nowhere in the evidence base have the sites that were put forward at this time been analysed, it appears this data is missing within the Wiltshire Council's evidence base.

Clause 4.14 states that opportunities in larger villages have not been explored. This is of concern as other Unitary Authorities and District Councils have considered such larger villages as they are in sustainable locations under the NPPF. Leaving this to Neighbourhood Plans results in poor planning.

4.21 Selection of Preferred Sites - WebbPaton's clients point out that despite previously making representations on various sites, there has been no dialogue or discussion with Wiltshire Council. The wording in 4.21 is misleading as Wiltshire Council have only looked at selected favoured towns and have never considered sites in Royal Wootton Bassett, west of Swindon, Calne, Pewsey, Bradford on Avon, and the larger villages as it does not suit the local councillors' wishes. Surely this is not a satisfactory methodology. Rather than taking economic data of where demand for housing and employment lies, the whole of this plan appears to be written totally around political reasoning.

Clause 4.25 - WebbPaton would like to point out that one thing which has been completely ignored is where houses sell, which is surely a fundamental constraint. The fact is that the highest demand for housing is nearest to the M4 at Swindon. In fact the demand here is one of the highest in the United Kingdom.

Table 4.7 showing north and west Wiltshire has a surplus of 2,710 houses is very misleading as it clearly states this is taking into account 2,086 windfall sites coming forward. If the strategic allocation at Chippenham is delayed these projections are completely flawed.

WebbPaton would like to see the number reviewed taking into account the new Swindon/M4 Corridor HMA requirements and the duty for Wiltshire to co-operate with Swindon Borough Council.

Table 4.9 - WebbPaton question the accuracy that 426 completions have happened in the Pewsey CA between 2006 and 2017. This does not appear to be supported by sales evidence.

Table 4.10 - we believe there is recent market evidence that there should be more housing in Bradford-on-Avon (greenbelt needs to be amended), Calne, Melksham and Bowerhill, Royal Wootton Bassett, the new Swindon and M4 Corridor HMA and Trowbridge. The evidence clearly points to higher numbers being required in these locations. The fact is that we are 11 years into the plan and towns such as Royal Wootton Bassett have no further allocations and therefore restricted from having development for 9 years. We do question the age of the evidence as a great deal has changed in the housing market since 2006. The fact that all of the housing has been built in under half of the Local Plan period demonstrates that these towns have a need for more housing allocations.

It appears wrong that the plan does not recognise in any way the economic powerhouse of neighbouring Swindon with its job supply and requirements for housing. We all know that Swindon is running out of suitable development land within its boundaries and is looking towards Wiltshire Council to assist with providing housing numbers. The WHSADPD is out of date completely if, as it does, it ignores the perils of Swindon's housing capacity. A great deal of weight led by politicians directs housing towards the inner rural towns in Wiltshire.

Appendix Q - Schedule of representations

Unfortunately, due to the lack of road and railway infrastructure in Wiltshire these middle county locations do not attract as much demand for housing and employment when compared to Swindon and Royal Wootton Bassett. It is beyond belief that in the 21st century the whole of a Local Plan and its update can ignore Swindon. As such there has be justification to rewrite the WHSADPD and the Local Plan Review to fully recognise Swindon's existence and future requirements and as such the Housing Site Allocations, Settlement Plan Review and Appendix B amending the settlement boundaries also need to be rewritten. It is important to note the sites that WebbPaton have put forward later in this representation were all promoted via the SHLAA call for sites in 2014, the results of which have never been published as the most recent results are those of the 2012 SHLAA.

Before any progress is made with this WHSADPD, the SHLAA needs to be updated.

2. Site Specific Representations

This section of the document sets out site specific presentations for:

2.1 Bowerhill (14.640 acres)  
Melksham and Bowerhill are ideally located close to the A350 road, one of few roads which runs north to south within the county. Should the HSADPD lead to a review of the OAN and additional development is required, this site could provide housing.

2.2 Land north of Coped Hall, Swindon Road, Royal Wootton Bassett (54.774 acres)  
This site is held under a Promotional Agreement by Gallagher Estates. The site sits due north of Coped Hall Business Park and adjoins the Malmesbury road with good connectivity to the M4 Junction 16. As part of the Swindon and M4 Corridor HMA review this site needs to be considered for housing.

2.3 Land north of Swindon Road, Royal Wootton Bassett (25.49 acres)  
This site adjoins 2.2 above. If the joint Swindon and M4 Corridor HMA identifies the need for additional housing this site is available and should be considered for development.

2.4 Land immediately north of the railway line off Bincknoll Lane at Woodshaw, Royal Wootton Bassett (22.120 acres)  
This site is in the location of the proposed Royal Wootton Bassett railway station. It benefits from being north of the railway line, therefore it is easily accessible to Royal Wootton Bassett town centre and the M4 Junction 16. If additional housing numbers are needed for the new Swindon and M4 Corridor HMA this site is suitable for development.

2.5 Land north of Bincknoll Lane, Woodshaw, Royal Wootton Bassett (64.669 acres)  
This land is under Option to David Wilson Homes. Boyer Planning will be making their own representations. Again it is not landlocked by the railway and represents a good opportunity to make the additional housing numbers if the joint Swindon/Wiltshire HMA identifies the need for growth.

2.6 Land at Hook Street, Lydiard Tregoze, Swindon (423.432 acres)  
This land is under an Option with Primegate (Hook North) Ltd. They control all of the 423.432 acres. The site is ideally located for a new settlement adjoining the urban area of West Swindon. The developer has carried out various surveys on ecology, archaeology, highways, landscape impact and local deliveries connection. This is a viable site suitable to provide new housing and employment development. If the joint Swindon & Wiltshire HMA progresses this site is available and suitable for development.

2.7 Land south of the A365 at Roundponds Farm, Shurnhold, Melksham (36.696 acres)  
Roundponds Farm has been identified by a number of developers as suitable for residential development. It is close to Melksham railway station and the Asda supermarket. If it is identified in the Melksham HMA that more houses are required, this land should be considered.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	5.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Affordable Housing Provision</p> <p>The Strategic Housing Market Assessment (December 2011) (SHMA) provides a total net annual affordable housing need of 3,862 units. Assuming the North and West HMA makes up 60% of the proposed housing in Wiltshire, this translates to a requirement of circa 2,325 affordable units in HMA per year.</p> <p>With the present total requirement for 1,237 units per year in the HMA, the Plan is not providing a sufficient level of development to provide enough affordable housing for the HMA. More should be done within the Plan to try and bridge the gap and to provide affordable housing, particularly in sustainable locations.</p> <p>Allocate more sites that will provide much needed affordable housing.</p> <p>Summary</p> <p>The Housing Site Allocations Plan provides a significant surplus of housing in the North and West HMA based on the OAN. However, it is evident that the OAN is now out of date.</p> <p>Even if we accept the OAN, the level of delivery in the HMA is falling year on year and it is likely that the completion projections are too optimistic. There is an over reliance on strategic sites that have failed to deliver housing thus far.</p> <p>In addition to the under delivery, it is also clear that Wiltshire will not provide sufficient affordable housing across the plan period. Therefore, it should promote sites that will deliver affordable housing and reduce the affordable housing need.</p> <p>It is also evident that the Melksham CA Remainder area will have no planned development for the most part of the remaining plan period. This will result in small scale and unplanned development, which will not contribute towards infrastructure and the affordable housing shortage.</p> <p>Considering all the above, the allocation of non-strategic housing sites would help maintain delivery in the HMA and provide planned development in the Melksham CA Remainder area throughout the plan period.</p> <p>The land north of The Lye in Seend is a sustainable site that is well related to the settlement of Seend. The proposals provide significant improvements to local open space and sports facilities; in addition to affordable houses. At 45 dwellings, the site could be delivered within the next 2 years providing a boost towards housing land supply and help maintain the HMA's housing delivery.</p>

<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Table</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	<p>No</p>
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>4.8</p>			<p>Justified</p> <p>Effective</p>	
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Housing Delivery</p> <p>The North and West Housing Market Area (HMA) has an annual requirement to provide 1,237 units. Carries forward undersupply from previous years. Apart from a single year, the position does not appear to be improving. The Housing Land Supply Statement (HLSS) shows that housing delivery has fallen short of this number in both 2014/2015 (1,139 units) and 2015/2016 (915 units). Topic Paper 3 on Housing Land Supply (HLS) states that the Council are making assumptions for the completions expected in Year 1 (2016/17), i.e. up to 31 March 2016, as well as for later years. Even then, Table 3.2 estimates 847 completions for the current year.</p> <p>This means that over the past three years, not only will housing completions be below the 1,237 unit requirement but also the level of delivery is falling and the under provision to be dealt with in the last 9 years of the plan period is increasing – making it continuously more difficult to meet the Plan requirements every year.</p> <p>The Plan is overly optimistic in predicting the level of completions, especially when considering the heavy reliance within the HMA on a small number of large strategic sites coming forward – one of the reasons for the under provision of housing in recent years. The Council’s approach is susceptible to changes in the market; such as weaker market conditions and land banking.</p> <p>This is evident from the Topic Paper 4 which confirms that it was first envisaged that the whole of the Ashton Park allocation would have been completed in the plan period, however it is now proposed that 1000 of the 2600 will come forward post 2026. It is likely that a site of this scale could be further delayed. This is also true of many of the strategic sites; such as the 650 units at Rawlings Green, 200 units at Elm Grove Farm, 150 units at White Horse Business Park, 180 units at Southwick Court, 205 units at Elizabeth Way and 100 units at East of the Dene.</p> <p>The trajectory of many of these dwellings are predicted to come forward within 5 years, but if they are delayed this would affect 5YHLS in years 3/4/5. In addition to this, too many windfall sites have been predicted in next 5 years as delivery in recent years do not match Council’s aspirations. Therefore, more allocations should be made to further protect the Plan from any of the large strategic sites underperforming.</p> <p>Allocate more non-strategic sites.</p> <p>Summary</p> <p>The Housing Site Allocations Plan provides a significant surplus of housing in the North and West HMA based on the OAN. However, it is evident that the OAN is now out of date.</p> <p>Even if we accept the OAN, the level of delivery in the HMA is falling year on year and it is likely that the completion projections are too optimistic. There is an over reliance on strategic sites that have failed to deliver housing thus far.</p> <p>In addition to the under delivery, it is also clear that Wiltshire will not provide sufficient affordable housing across the plan period. Therefore, it should promote sites that will deliver affordable housing and reduce the affordable housing need.</p> <p>It is also evident that the Melksham CA Remainder area will have no planned development for the most part of the remaining plan period. This will result in small scale and unplanned development, which will not contribute towards infrastructure and the affordable housing shortage.</p>				

Appendix Q - Schedule of representations

	<p>Considering all the above, the allocation of non-strategic housing sites would help maintain delivery in the HMA and provide planned development in the Melksham CA Remainder area throughout the plan period.</p> <p>The land north of The Lye in Seend is a sustainable site that is well related to the settlement of Seend. The proposals provide significant improvements to local open space and sports facilities; in addition to affordable houses. At 45 dwellings, the site could be delivered within the next 2 years providing a boost towards housing land supply and help maintain the HMA's housing delivery.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To promote the benefits of a better mix of allocations to help with 5YHLS and completions.</p>

<b>Comment ID:</b> <a href="#">2742</a>	<b>Consultee</b> Aster Homes  <b>Person ID:</b> 1134431	<b>Agent</b> Mr Matt Allsopp Principal Planner  WYG Planning  <b>Person ID:</b> 1134428	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	2.3		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Melksham Community Area                  The Melksham Community Area (MCA) is required to deliver 2,370 units between 2006 – 2026. This is then split into the Melksham and Bowerhill village area and the Melksham CA Remainder area.                  The Community Area Topic Paper – Melksham (June 2017) designates Seend as a ‘Large Village’. The level of development that will be acceptable in these settlements will be "limited to that needed to help meet the housing needs of settlements and improve housing opportunities, services and facilities".                  The Melksham Community Area is required to provide a minimum of 130 dwellings over the plan period, however there were 101 completions between 2006 and 2017. This has left only 29 more dwellings be required for the remainder of the plan period. Developable commitments for this area are 38 dwelling between 2017 and 2026, which means only an average of circa 4 dwellings will be built in this Melksham CA per year for the next 9 years and it is likely that many of these will be built in the next few years and leaving the area with no new houses for the rest of the plan period – particularly if in due course a restrictive neighbourhood plan is adopted in areas where they see that CS requirements have been met. This in the context of the ongoing housing crisis and NPPF which seeks to boost supply of housing.                  Assuming windfalls come forward in an alternative scenario, unplanned and small scale development without proper planning will preclude delivery of infrastructure, affordable housing and services needed to support new development.                  It would be better to identify small-mid sized development opportunities in sustainable locations and deliver any necessary supporting infrastructure alongside a larger site, rather than piecemeal windfall sites that won't deliver these benefits; including any affordable housing.                  As Topic Paper 4 states, the plan has a "significant reliance on large strategic housing sites to meet strategic requirements in the HMA. This has contributed to rates of development in recent years not reaching the rates of development implied by the WCS requirement for the HMA.                  It would however be unwise to place too much reliance on this being the case when some key strategic sites have yet to gain planning permission. The Plan should therefore look to allocate sites that can help to ensure a surety of supply. This is a justification for allocating sites for housing development to meet local needs at Large Villages where indicative requirements are not being met and there is not enough certainty that neighbourhood plans will provide for sufficient housing."                  New allocations should be made to deliver houses across the whole plan period.                  Summary                  The Housing Site Allocations Plan provides a significant surplus of housing in the North and West HMA based on the OAN. However, it is evident that the OAN is now out of date.                  Even if we accept the OAN, the level of delivery in the HMA is falling year on year and it is likely that the completion projections are too optimistic. There is an over reliance on strategic sites that have failed to deliver housing thus far.                  In addition to the under delivery, it is also clear that Wiltshire will not provide sufficient affordable housing across the plan period. Therefore, it should promote sites that will deliver affordable housing and reduce the affordable housing need.</p>			

Appendix Q - Schedule of representations

	<p>It is also evident that the Melksham CA Remainder area will have no planned development for the most part of the remaining plan period. This will result in small scale and unplanned development, which will not contribute towards infrastructure and the affordable housing shortage. Considering all the above, the allocation of non-strategic housing sites would help maintain delivery in the HMA and provide planned development in the Melksham CA Remainder area throughout the plan period.</p> <p>The land north of The Lye in Seend is a sustainable site that is well related to the settlement of Seend. The proposals provide significant improvements to local open space and sports facilities; in addition to affordable houses. At 45 dwellings, the site could be delivered within the next 2 years providing a boost towards housing land supply and help maintain the HMA's housing delivery.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The over delivery in the Melksham CA Remainder will leave the area without new houses or development for many years. The case for a better distribution of development over the plan period can be made.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2743</a>		<b>Consultee</b> Aster Homes  <b>Person ID:</b> 1134431	<b>Agent</b> Mr Matt Allsopp Principal Planner  WYG Planning  <b>Person ID:</b> 1134428	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Table		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.5/4.7/4.8			Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Land North of The Lye, Seend                  Aster Homes are promoting land in the 'Large Village' of Seend. The site is located north of The Lye and the Seend High Street (A361). This sustainable site is connected via pedestrian and cycle access to the village High Street and surrounding area. The site is within 0.3 miles to bus stops that provide routes to Devizes and Trowbridge and in close proximity to schools, recreational grounds, children's play areas, sports pitches, a place of worship, a pub and walking paths into the countryside with access to Kennet and Avon canal walks. Nearby Devizes, Melksham and Trowbridge have supermarkets and petrol stations as well as local community hospitals. Seend Church of England Primary School is situated only 0.7 miles from the site and Melksham Oak Community Secondary School located 2.5 miles away.                  The 8.2 acre site is suitable for development of up to 45 dwellings, 40% of which would be affordable and would form a significant help towards reducing the undersupply of affordable housing. Significant areas of informal open space are also proposed at the western portions of the site which are proposed to incorporate community facilities such as additional public open space and the potential for an overflow car park to serve The Lye Field.                  The site is available for development and could be brought forward within 2 years, helping boost housing land supply.                  Non-strategic sites like Land North of The Lye in Seend will help provide surity on delivery of houses and help meet housing land supply targets.                  Summary                  The Housing Site Allocations Plan provides a significant surplus of housing in the North and West HMA based on the OAN. However, it is evident that the OAN is now out of date.                  Even if we accept the OAN, the level of delivery in the HMA is falling year on year and it is likely that the completion projections are too optimistic. There is an over reliance on strategic sites that have failed to deliver housing thus far.                  In addition to the under delivery, it is also clear that Wiltshire will not provide sufficient affordable housing across the plan period. Therefore, it should promote sites that will deliver affordable housing and reduce the affordable housing need.                  It is also evident that the Melksham CA Remainder area will have no planned development for the most part of the remaining plan period. This will result in small scale and unplanned development, which will not contribute towards infrastructure and the affordable housing shortage.                  Considering all the above, the allocation of non-strategic housing sites would help maintain delivery in the HMA and provide planned development in the Melksham CA Remainder area throughout the plan period.                  The land north of The Lye in Seend is a sustainable site that is well related to the settlement of Seend. The proposals provide significant improvements to local open space and sports facilities; in addition to affordable houses. At 45 dwellings, the site could be delivered within the next 2 years providing a boost towards housing land supply and help maintain the HMA's housing delivery.</p>

				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		2.1		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Baseline Data</p> <p>In the first instance, we believe that the baseline data that the whole plan is based on is out of date. The recent Government Whitepaper 'Planning for the right homes in the right places: consultation proposals' discusses its proposed approach to calculating the local housing need. This states that "the most recent official projections should be used, with the household growth calculated for the period over which the plan is being made ... We therefore propose that projections of household growth should be the demographic baseline for every local authority area ... The Office for National Statistics' projections for numbers of households in each local authority are the most robust estimates of future growth." Planning Policy Guidance on Housing and Economic Development Needs Assessments supports this position by requiring, "wherever possible, local needs assessments should be informed by the latest available information".</p> <p>Since the publication of the Strategic Housing Market Assessment (December 2011) (SHMA) these projections have been updated twice. However, the plan does not acknowledge this shortcoming.</p> <p>In addition to this, the methodology that was used to create this SHMA pre-dates the National Planning Policy Framework (NPPF) and conforms to CLG Guidance (PPS3 Housing 2010 and Practice Guidance Version 2 (2007)) rather than current planning policies and guidance.</p> <p>Even when using this older guidance, the agreed housing requirement in the adopted Wiltshire Core Strategy is below the OAN for the area, which was in the region of 44,000 units.</p> <p>Update SHMA and use this data to review OAN.</p> <p>Summary</p> <p>The Housing Site Allocations Plan provides a significant surplus of housing in the North and West HMA based on the OAN. However, it is evident that the OAN is now out of date.</p> <p>Even if we accept the OAN, the level of delivery in the HMA is falling year on year and it is likely that the completion projections are too optimistic. There is an over reliance on strategic sites that have failed to deliver housing thus far.</p> <p>In addition to the under delivery, it is also clear that Wiltshire will not provide sufficient affordable housing across the plan period. Therefore, it should promote sites that will deliver affordable housing and reduce the affordable housing need.</p> <p>It is also evident that the Melksham CA Remainder area will have no planned development for the most part of the remaining plan period. This will result in small scale and unplanned development, which will not contribute towards infrastructure and the affordable housing shortage.</p> <p>Considering all the above, the allocation of non-strategic housing sites would help maintain delivery in the HMA and provide planned development in the Melksham CA Remainder area throughout the plan period.</p> <p>The land north of The Lye in Seend is a sustainable site that is well related to the settlement of Seend. The proposals provide significant improvements to local open space and sports facilities; in addition to affordable houses. At 45 dwellings, the site could be delivered within the next 2 years providing a boost towards housing land supply and help maintain the HMA's housing delivery.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Amendment to Settlement Boundary                  Paragraph A.53 of the WHSA Plan in Appendix A: Amending settlement boundaries reviews the settlement boundary for Seend. This amends boundary to exclude recreational / amenity space more closely related to the open countryside. This amendment should not be retained as they are not in compliance with the revised settlement boundary review methodology, as set out in Topic Paper 1. This states that areas which should be included within the settlement boundary are "recreational or amenity space at the edge of a settlement that relates more closely to the built environment".</p> <p>The recreation space that is proposed to be removed, grid reference H6, I6, I7 of the Seend Proposals for Revised Settlement Boundaries map, is clearly more closely related to the built environment than to the countryside. This land is enclosed on three sides (east, south and west) by built development and is enclosed on the north by a hedgerow. This land has virtually no relationship to the open countryside and should, therefore, be included within the settlement boundary of Seend.</p> <p>Retain recreation land north of High Street/A361 within the settlement boundary.</p> <p>Summary                  The Housing Site Allocations Plan provides a significant surplus of housing in the North and West HMA based on the OAN. However, it is evident that the OAN is now out of date.</p> <p>Even if we accept the OAN, the level of delivery in the HMA is falling year on year and it is likely that the completion projections are too optimistic. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing to submit my objection to the proposed planning application to develop Southwick Court Farm. I have lived next to these fields for 15 years and on uncountable occasions have witnessed major flooding. This area is prone to flooding and I am sure that any houses built here will be subject to being flooded. In addition there is a ditch which runs alongside our house which is the only thing which has prevented our house from being flooded however it has been very close sometimes and water has run off the field, filled the ditch and spilled over onto our land. Surely this water will be further displaced if building is allowed.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		My main objection is the lack of public services in this area to sustain an increase in population. Our local schools are already over subscribed and there is a lack of doctors and dentists in this area. In addition there are so many empty shops in the town centre that surely developing the infrastructure of Trowbridge should take priority. Continuously building new properties with no facilities is a ridiculous idea and will only further breed discontent especially within the younger generation. Teenagers especially in our area have very little to do with their time which causes them to be disruptive. I work for Barnardos with teenagers and their biggest complaint is that their parents have to work all hours to pay the bills so not only do they not feel supported but parents can not afford to pay for extra curricular activities. Therefore they hang around the street corners and in the town park where they are easy prey for unsavoury characters.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>It defies belief as to why anyone would want to build houses on a beautiful green area when half of Trowbridge town centre is prime development sites with derelict buildings on. Surely any logical individual must see that developing the brown field sites is a much more appropriate way to go.</p> <p>I implore you to reconsider this proposal and instead consider investing and concentrating on improving our failing town. We need central regeneration before Trowbridge ends up being a sprawling town of houses with no centre or community and no facilities. Otherwise our next generation will be discontented and disillusioned which is not a world I want to leave for my children.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2771</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Claire Buxton	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I am writing about the proposed allocation of an additional 40 houses to the village of Crudwell on the Ridgeway Farm site as detailed in the draft Site Allocations Plan as I have concerns about the scale of the development on one site. The main reasons being the potential impact on the drain and sewerage & risk of flooding, the increased traffic on Tetbury lane and the effects of this size of development in one go on the primary school.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Crudwell still has severe flooding problems and this is a huge concern to people in the village - many of who have experienced bad damage to their homes through surface water and also raw sewerage. I am concerned that significant development on this site (due to it's position) will make things significantly worse.

The school is at capacity and has no current plans to expand - it would need an additional classroom and hall space and as far as I am aware there are no guarantees that planning will be granted for this and this has not been looked into.				
Attached files (Please see Objective)					
If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2774</a>	<b>Consultee</b> Claire Buxton  <b>Person ID:</b> 1134553	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Aside from this I do not feel that it is necessary to have this site allocated. The council's own guidance states that housing sites will only be allocated where there is a strategic priority to do so? From the data available, the Site Allocation Plan currently results in an oversupply of some 4,300 dwellings to 2026 when you take into account past completions with deliverable commitments and windfall sites; even excluding windfall sites, the oversupply is still 2,200 across the housing market area. More specifically, the Site Allocations Plan results in an oversupply of homes in the Malmesbury Community Area; Wiltshire Council also has a history of oversupply of dwellings - in eight of the last ten years, more homes have been built than planned and over that period the over supply has been over 140% of target. On that basis there is no strategic need or justification to allocate new homes in Crudwell and the Draft Site Allocations Plan should not do so. I realise that 'Crudwell must take it's fair share' of houses but we need to understand what this is and what it means. Policy 1 of the Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", as we have circa 250 homes in Crudwell, I feel that an additional 40 homes on top of the 10 already being built ( 20% increase overall)- falls outside Wiltshire Councils own Core strategy.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Finally the site size of the Ridgeway Farm Development encompasses an area far greater than is required - even for 40 homes - so I am concerned that there are plans for even more houses (and again the issues that this might bring). Like others in the village I am questioning why that is the case and would like it reviewed.</p> <p>I would like development in Crudwell to be led by the Neighbourhood Plan so we can examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads (narrow and busy at certain times) and the local school, which is at capacity. I still question why we are too late to do this if we are able to move quickly with our plan?</p> <p>I do not oppose the number of house per se, but rather than being allocated one site (because that is the only option which previously came up for assessment)- I would like the development of a Neighbourhood plan to look into/address all the issues and options for the village and shape this so we can get an outcome which works for the village and for Wiltshire Council in terms of housing needs in the area.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Ridgeway Farm, Crudwell				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Please accept this letter as my opposition to the proposed further develop of the Ridgeway Farm Site. I am not anti-development; and acknowledge the need for additional housing, but I and other Crudwell parishioners wish to have a say in where and how further development of the village should proceed.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met.</p> <p>Together with the 10 dwellings already being built on the Ridgeway Farm site, the proposed further 40 dwellings represents an almost 20% increase to the village of currently some 260 dwellings. This increase appears to be excessive for the village. I believe that there can be no strategic need for a site of this scale in Crudwell.</p> <p>I understand that your Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so, however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account.</p> <p>Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy.</p> <p>Previous proposals for additional housing at the site in question have led to significant debate about issues, such as, the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. Previous development on the site was not granted based on numerous concerns raised by the villagers. Furthermore, there is significant community concern about safety and the increased traffic flows that will arise on Tetbury Lane, particularly during morning and afternoon school runs, and particularly given the location of the Ridgeway site on Tetbury Lane. The lane is narrow and has only limited and broken stretches of pedestrian pathway down to the A429 main road and to the School and other facilities in the village.</p> <p>It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.</p> <p>Many houses in Crudwell, INCLUDING MY OWN, have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development. In periods or heavy or persistent rainfall, even now the sewerage manhole at the end of the culdesac where I live overflows. The water utilities have been informed but nothing has happened, it appears that the pumping station on the other side of the ford (by the Mayfield Hotel) has inadequate capacity!</p>			

Appendix Q - Schedule of representations

	<p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.12		Effective	
		<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p> <p>No requirement from local population.  No consultation with those most affected.  Affordable housing impossible.  Keep to existing settlement boundaries.  Ensure a local need by fully canvassing local need.  Stop ribbon development.  Do not jeopardise safety of existing residents.  I am writing to object in the strongest possible terms to the proposed development of 30 dwellings to the East of Farrells Field in Yatton Keynell. This proposed residential site is outside the existing settlement boundary and, if allowed to proceed, would open the flood gates for even larger scale building as it sets a precedent which could seriously jeopardise the future character of this Cotswold village. Furthermore the proposed development would link Yatton Keynell to Coldharbour and Tiddleywink resulting in ribbon development.  The area of land is clearly more closely related to the countryside than to the settlement and should be left to the wildlife it contains. A quotation from PPS4 Planning for Sustainable Economic Growth (2009) at EC6.1:  "Local planning authorities should ensure that the countryside is protected for the sake of its intrinsic character and beauty, the diversity of its landscapes, heritage and wildlife, the wealth of its natural resources and to ensure it may be enjoyed by all."  Indeed there is no local need that I am aware of for these proposed dwellings at all.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Crudwell Primary School is already greatly over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>With regard to the site application for a further 40 dwellings on the Ridgeway Farm in Crudwell, I would like to raise serious objections on the following grounds:</p> <p>a) The influx of additional residents which a site of this size would bring to the village would have a very negative impact on a village school which is already full to capacity. Although plans may be projected to increase the size of the school in due course, the practical time span for this to be effected is far outside the time within which the projected new houses would be completed and occupied. More importantly, there are already major issues around the school site with regard to parking and the safety of children in a small village with very narrow pavements alongside a major road heavily used by large vehicles - both agricultural and commercial.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	As mentioned above, usage of Tetbury Lane is heavy, both by huge agricultural vehicles and by large container lorries using the lane as a shortcut to Tetbury avoiding the more circuitous route via the outskirts of Malmesbury and Filands, and by vehicles supplying Chedglow pig farm and egg farm, and the agricultural base in Chedglow itself. Tetbury Lane does NOT however have a pavement for pedestrians that extends continuously beyond The Street. There are partial pavements, but nothing which connects the juncture of The Dawneys and The Butts and the new development currently under construction at Ridgeway Farm. More to the point there is insufficient roadside verge for such a pavement, and the potential for a young child, elderly resident or indeed any pedestrian to be struck by some of the vehicles progressing along the lane at far higher speed than the designated limit is huge.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There is no current need for a site on this scale within Crudwell. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. I have 3 children all of whom are anxious to buy properties of their own, so I do understand the need to provide more affordable housing, but I feel that the housing being suggested here does not fit with the needs nor the best interests of those people wishing to purchase property locally - without changing the whole aspect of such a sought after village.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Hi I'd like my view represented in consideration of the plan to add at least 40 houses to the site at tetbury lane, crudwell.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met.</p> <p>I believe that as a large village we need time to asses our local need and the amenities that support this. As the village has an a road going through it additional traffic, footpaths, flood defense, appropriate homes for local people and lack of facilites needs to be considered before the village agrees a plan to support this.</p> <p>Therefore I wouldn't be in favour of the proposed 40 homes as we have not had counsellors in place to discuss.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>As lifelong residents of Salisbury, we strongly oppose the planned housing development at Netherhampton Road. We are very concerned about extra traffic causing additional pollution, increasing the potential flood risk to the city and the impact on the local roads which are already exceeding capacity.</p> <p>We support all the other objection letters about the desperate need of a bypass in order to protect our city for the benefit of future generations. Traffic is literally choking the city and our precious lungs as well. The ring road is constantly full of queues and existing residents have to battle through school, business, freight and holiday traffic to get about their daily lives.</p> <p>The increased housing in Harnham and Rowbarrow has already had a drastic impact on the poor traffic arrangements at Newbridge Road, Harnham Road, Downton Road and Coombe Road which carry a huge amount of traffic through the city. This does not even mention the similar situation occurring at Southampton Road, London Road, Castle Road, Devizes Road and the ever expanding Wilton Road. With all access points into Salisbury clogged, the city simply cannot sustain yet another large housing development.</p> <p>The Salisbury bypass plans involved the use of some of this land at Netherhampton Road – without this, what hope is there that this dreadful situation will ever be improved?</p> <p>We sincerely hope the concerns raised by all those who have responded will be taken seriously and ultimately the right decision will be made.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As lifelong residents of Salisbury, we strongly oppose the planned housing development at Netherhampton Road. We are very concerned about extra traffic causing additional pollution, increasing the potential flood risk to the city and the impact on the local roads which are already exceeding capacity.</p> <p>We support all the other objection letters about the desperate need of a bypass in order to protect our city for the benefit of future generations. Traffic is literally choking the city and our precious lungs as well. The ring road is constantly full of queues and existing residents have to battle through school, business, freight and holiday traffic to get about their daily lives.</p> <p>The increased housing in Harnham and Rowbarrow has already had a drastic impact on the poor traffic arrangements at Newbridge Road, Harnham Road, Downton Road and Coombe Road which carry a huge amount of traffic through the city. This does not even mention the similar situation occurring at Southampton Road, London Road, Castle Road, Devizes Road and the ever expanding Wilton Road. With all access points into Salisbury clogged, the city simply cannot sustain yet another large housing development.</p> <p>The Salisbury bypass plans involved the use of some of this land at Netherhampton Road – without this, what hope is there that this dreadful situation will ever be improved?</p> <p>We sincerely hope the concerns raised by all those who have responded will be taken seriously and ultimately the right decision will be made.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm, Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to strongly object to the proposed allocation of an additional forty houses on the Ridgeway Farm site in Crudwell. Crudwell is a small village, the likes of which should be treasured. There are currently 260 houses in the village and a further forty, on top of the ten currently being built, would enlarge the village by twenty percent. I strongly believe that this is substantially out of proportion for the size of the village and its existing infrastructure, and does not consider that the Wiltshire Development Plan forecasts a significant oversupply of housing in the Malmesbury area, of which Crudwell is included.</p> <p>Last year a proposal for an additional twenty nine houses in Crudwell was scaled down. On that basis the decision to approve an additional forty houses in not consistent with recent planning decisions.</p> <p>I sincerely hope that in writing to you, you will take notice of the voices of the parishioners in Crudwell and consider the impact your decision will have on our lives</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2805</a>	<b>Consultee</b> Mr and Mrs Kevin and Georgina Bubble	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1134632	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm, Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Concern has been expressed regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Plan. Together with the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings). The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell. A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p> <p>Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy. Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met. Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan. Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development. In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell is not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2806</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr and Mrs Kevin and Georgina Bubble	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm, Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm, Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Crudwell Primary School is already greatly over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There is significant community concern about safety and the increased traffic flows that will arise on Tetbury Lane, particularly during morning and afternoon school runs, and particularly given the location of the Ridgeway site on Tetbury Lane. The lane is narrow and has only limited and broken stretches of pedestrian pathway down to the A429 main road and to the School and other facilities in the village.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I have lived in Crudwell for +10 years and have significant concerns over the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell. These concerns are not raised from a personal (not in my backyard) perspective but genuinely from a belief that the village is simply not suitable or appropriate for such a significant expansion which has not been quantified as necessary.</p> <p>Some specific concerns are as follows:                      Together with the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings).                      The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

You advice that Wiltshire proposes to:</p> <p>Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and</p> <p>Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Consistent</p> <p>The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Ridgeway Farm, Crudwell		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This representation relates to the Site Allocations plan with specific reference to the proposed allocation of site H2.13 - Ridgeway Farm, Crudwell for residential development.</p> <p>The draft Allocation plan identifies a residual requirement for an additional 70 new homes in the Malmesbury Community Area. We agree with the comments made at Paragraph 3.23 – 3.24 of the Council’s Housing Land Supply Topic Paper that there is a requirement to plan for additional growth to maintain supply throughout the plan period in accordance with Para 47 of the National Planning Policy Framework (NPPF). That paragraph states that ‘to boost significantly the supply of housing, local planning authorities should:</p> <p>Identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land;</p> <p>Identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;</p> <p>For market and affordable housing, illustrate the expected rate of housing delivery through a housing trajectory for the plan period and set out a housing implementation strategy for the full range of housing describing how they will maintain delivery of a five year land supply of housing land to meet their housing target</p> <p>It is considered that the proposed allocation is consistent with those objectives and the allocation of this site in the Plan will enable the delivery of sustainable development in accordance with the policies of the Framework.</p> <p>We also note that in the February 2017 minutes from the Swindon and Wiltshire Local Enterprise Partnership Joint Strategic Economic Committee refer to the joint Wiltshire and Swindon SHMA. The minutes highlight that the full OAN for housing over the 20-year period 2016-36 is considered to be 73,000 dwellings in Swindon and Wiltshire or 3,650 dwellings per annum. This compares to a level of approximately 3,600 dwellings per annum set out in the authorities adopted Plans. Whilst it is acknowledged that this is yet to be tested at examination through the Plan making process, this OAN indicates that there could be a need for further housing over the plan period than currently identified. As such the identification of sites such as Ridgeway Farm for development in the Malmesbury Community Area will assist in the Council maintaining a 5 year supply of deliverable housing land.</p> <p>Crudwell is identified in the Core Strategy as a Large Village where some development is required to support existing services and facilities, and encourage new services, but to also meet identified local needs for housing including affordable homes, helping the Council achieve its affordable housing target. Based on the Council’s current Affordable Housing Register, we understand that there are currently 61 households on seeking affordable housing in the Malmesbury Community Area and the allocation of this site will therefore go some way to helping to address this need.</p>				

#### Appendix Q - Schedule of representations

The evidence base supporting the plan demonstrates that the site at Ridgeway Farm is the most sustainable and logical location for new housing to contribute to meeting the identified growth needs of the area. Its inclusion as an allocated housing site for 40 additional dwellings is fully supported by Edenstone Homes.

The Framework states that for sites to be considered 'developable' they should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged. To be considered 'deliverable' the Framework requires sites to be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered within five years and, in particular, that development of the site is viable. In respect of the subject site, those tests are addressed as follows:

##### Available

The site is under the control of Edenstone Homes who have a good track record of delivering quality residential development that is sensitively designed. The site was formerly a farmstead and associated agricultural land; it is no longer in use for agricultural purposes and is therefore available for development now.

The site has been the subject of initial technical appraisals which have identified that there are no significant physical or environmental constraints which would delay or preclude the development of the site.

This is further demonstrated by the current planning permission that is being developed out by Edenstone Homes at the front of the site for 10 dwellings (application reference: 15/03136/OUT). Furthermore, the Council will be aware that prior to permission being granted for 10 units, an outline application was submitted for 19 units (14/07419/OUT), which was later withdrawn.

Pre-application discussions with the Planning Authority's Development Management team have now been instigated for a scheme for a further 40 dwellings; in line with the draft allocation plan.

##### Suitable

The site is situated on the edge of the large village of Crudwell which is a sustainable location in line with Core Policy 1 of the adopted Wiltshire Core Strategy.

The site does not fall within any landscape or environmental designation and is not within Flood Zones 2 or

3. It is outside of the Crudwell Conservation Area and there are not any listed buildings within the immediate vicinity of the site.

Technical surveys have been carried out which conclude that the site is of limited ecological value; it has no notable landscape features and makes limited contribution to the overall character of the area.

A Heritage Desk based assessment confirms that there are no designated heritage assets within the site and setting of assets within the village would not be adversely affected by the proposals.

Initial highways studies have confirmed that safe and suitable access can be achieved from the site onto the public highway and that the addition of 40 dwellings will not have a significant cumulative impact on the local highway network. In addition, the site is suitably located for development with good accessibility to local services and employment opportunities by sustainable modes of transport. The site is within reasonable walking/cycling distance to the centre of the village and a bus stop is present providing connectivity to Chippenham, Cirencester and Bath and the wider the public transport network.

Initial drainage studies have identified that suitable drainage proposals for the management of both surface water and foul drainage can be adequately provided to support the development and its quantum of 40 dwelling units.

Initial landscape studies have identified that the site relates very well in both landscape and visual terms to the existing settlement, and that the site represents a logical development which should be easily assimilated into this part of the landscape. The site also offers opportunities to provide enhancement to the local hedgerow network and tree stock, including the management of existing features. It also offers a significant opportunity to connect to the adjacent PROW network providing a safe walkable route between the village centre to the east and the village hall to the west. This is in line with the Council's Sustainability Appraisal report which states that "the development of the site would have the potential to appropriately protect and enhance the intrinsic character and scenic beauty of the countryside." This conclusion is supported by the technical work that by the work undertaken by the Environmental Design Partnership.

In light of the above it is evident that the site has no notable development constraints. The site lies adjacent to a large village and existing residential development and is considered wholly suitable for residential development to address housing needs.

##### Achievable

Appendix Q - Schedule of representations

	<p>The site is unused, in single ownership and is being actively promoted by Edenstone Homes for residential development. There are no legal or ownership issues that would prevent development coming forward on the site.</p> <p>The site represents a viable development which can be delivered quickly. The site is adjacent to existing residential development. Furthermore, as previously noted, part of the site already has permission for the development of 10 dwellings which is currently being built out by Edenstone, further demonstrating the suitability of the site for residential development.</p> <p>It is evident that residential development represents a viable future use for the site which can be delivered quickly. As such, the development of the site can be considered achievable.</p> <p>The above demonstrates that land at Ridgeway Farm, Crudwell, is suitable for residential development as identified by the Council's evidence base. The site does not have any significant development constraints and will help achieve the Government's aim to boost significantly the supply of housing in sustainable locations.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Recommendations and conclusion</p> <p>The site is available, suitable and achievable and thus satisfies the requirements of the Framework in terms of it being deliverable. The NPPF at paragraph 47 requires LPA's to boost significantly the supply of housing. It is considered that the proposed allocation is consistent with that objective and the plan should enable the delivery of sustainable development in accordance with the policies in the Framework. However, whilst Edenstone fully support the allocation of the site for 40 dwellings, they have undertaken an initial development appraisal of the land in question. It is considered that, when taking into account the necessary amenities needed to accommodate the development, the proposed boundary for the allocation will not necessarily deliver the number of dwellings that the draft Plan envisages. It is therefore considered that a slight amendment to the boundary within the draft Plan should be made. This amendment will allow the proposed allocation to be consistent with established field boundaries and the existing pattern of development in the Village; will provide a strong boundary of development for the Village and would better reflect the envisaged quantum of development to meet local housing needs.</p> <p>A plan is enclosed [see attached] to show the suggested amendments to the boundary. You will note from the red line plan provided that we consider it sensible to utilise the northern most field boundary which is well established and would act as an appropriate buffer to the site in landscape terms. It is our consideration that if the red line boundary depicted in the draft allocation were to be followed, this would leave an undesirable strip between the development and existing hedgerow boundary to the North.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm, Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my objections to the proposed development at the above site. The proposed allocation of an additional 40 houses at the site is completely out of proportion to the size of our village, and represents an increase of almost 20% in the the number of dwellings in Crudwell. Furthermore, there is no strategic need for these additional dwellings, as Wiltshire's Plan has forecast an oversupply in the Malmesbury Community Area.</p> <p>It is very important that any future developments are planned with the needs and also restraints of the village taken into account. The Neighbourhood Plan for Crudwell is being developed with these in mind, and should be considered above any county plan. We as a village are not anti-development. We wish to plan any future development with the needs of our community at heart. Real concerns have been expressed by our community that the existing infrastructure will not sustain the proposed development of 40 additional dwellings, including drainage issues, increased traffic, capacity at our local primary school and environmental impact.</p> <p>Therefore it is vital that the Crudwell Neighbourhood Plan should determine any further development, having fully considered the needs and wishes of villagers, and bearing in mind infrastructure and environmental constraints.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2823</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Terri Murphy	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm, Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Real concerns have been expressed by our community that the existing infrastructure will not sustain the proposed development of 40 additional dwellings, including drainage issues, increased traffic, capacity at our local primary school and environmental impact. The existing drainage systems are already operating beyond their capacity, and drains and sewers overflow on a regular basis after periods of heavy rain. On these occasions, foul water then runs off into Swill Brook, contaminating this water. Our house, along with 30 others in the village, has been flooded on several occasions, the most severe being in July 2007, when foul water reached levels of 45cm throughout the ground floor. We have been told by more than one Wessex Water engineers that the existing pumping station cannot cope with the existing flow during heavy downpours. Significant investment to increase drainage capacity is vital to ensure that flooding never happens again. Has this investment been included in the planning of this development? if it has not, then the likelihood of further flooding is almost inevitable. Therefore it is vital that the Crudwell Neighbourhood Plan should determine any further development, having fully considered the needs and wishes of villagers, and bearing in mind infrastructure and environmental constraints.</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2824</a>		<b>Consultee</b> Candice McCrum  <b>Person ID:</b> 1134708	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.12			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Housing Sites Allocation Plan -                      I am writing to raise my concerns in relation to the above public consultation event.                      I would like to object to the allocation of housing site 482 adjacent to Farrells Field in Yatton Keynell which is proposed for 30 houses.                      As a resident of Yatton Keynell village I acknowledge the importance of sustainable housing growth in the village however, I consider the proposal to allocate one development of 30 houses at the edge of the Yatton Keynell village is unsustainable and will have a negative impact on the future of the village.                      I have the following concerns about how the selection process of this site has evolved. I believe the proposed housing sites allocation plan is unsound and is not consistent with national planning policy for the following reasons:                      Issue:                      No evidence of housing need for Yatton Keynell                      Details:                      Appendix E of the Chippenham Community Area topic paper) confirms that no local housing needs survey was undertaken as part of the plan.                      The proposed dwellings should be justified with evidence that there is a specific local need.                      Relevant National Policy in conflict with:                      paragraph 158 of the NPPF which states: 'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic , social and environmental characteristics and prospects of the area. Strategies for housing and other uses are integrated and they take into account relevant market and economic signals'.                      Issue:                      Lack of a Neighbourhood Plan                      Details:                      At a Parish Council meeting back in November 2014 there was a call for a Neighbourhood Plan to be made so that residents can engage in how many and where future housing might take place.                      Relevant National Policy in conflict with:                      Para 155 of NPPF                      Issue:                      Site selection process unsound                      Details:                      Sutton Benger has an identified need and no housing has been allocated. Yatton Keynell has no identified need yet 30 houses are proposed                      Relevant National Policy in conflict with:                      Para 159 of the NPPF</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Issue: Poor consultation Details: None of the Parish Council's from the five villages in the Chippenham Community Area responded to Wiltshire Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement. Relevant National Policy in conflict with: Para 155 of NPPF</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Issue: Proposal will have significant impact on the character of the area</p> <p>Details: A large scale proposal of 30 additional houses at the entrance to the village is not suitable and will have a negative impact on the character of the area. In light of the above, I urge Wiltshire Council to withdraw the allocation of land at Farrells Field and work together with the Parish Council to produce a Neighbourhood Plan for Yatton Keynell which will explore whether there is a specific housing need in this village. A Neighbourhood Plan will also enable the villagers to have more say in where future housing could go rather than one site being allocated at County level.</p>

<b>Comment ID:</b>	<a href="#">2828</a>	<b>Consultee</b> Hampshire County Council Planning Policy	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Hampshire County Council  <b>Person ID:</b> 1134720		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for consulting Hampshire County Council on this matter. The County Council has previously responded to a Duty to Cooperate query on the draft Wiltshire Housing site allocations plan and so I would reiterate those comments At the time the County Council highlighted the importance of two safeguarded mineral and / or waste sites on the Hampshire / Wiltshire border that should be taken into account. For reference, the two sites and relevant details are as follows:</p> <p>Dean Hill MOD site, West Dean This is a waste water treatment work site and there is no reason why this would not continue to function</p> <p>Pound Bottom This previously was within the Hampshire border, but is now a site that sits within Wiltshire. However it comes under the Hampshire Minerals and Waste Plan (HMWP) 2013 because it is within the New Forest National Park. This is an operational non-hazardous landfill site. In 2007, the New Forest National Park granted planning permission for the installation and operation of a leachate storage tank (which was to replace the previous leachate lagoon). New Forest National Park also granted planning permission (in 2007) for the installation and operation of a landfill gas utilisation plant. This permission allows the operation of this function to continue until November 2017.</p> <p>Please also note that safeguarding requires any proposed development to avoid prejudicing the continued use of safeguarded minerals and waste infrastructure. For further information please see the Hampshire Minerals and Waste Safeguarding SPD <a href="http://www3.hants.gov.uk/hmwp-spds.htm">http://www3.hants.gov.uk/hmwp-spds.htm</a></p> <p>We have no further comments to make at this time.</p>

<b>Comment ID:</b>	<a href="#">2829</a>	<b>Consultee</b> Mrs Sandra Harry Parish Clerk	<b>Agent</b>  <b>Person ID:</b>		<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Tisbury Parish Council			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.77					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Grid Refs		TPC Resolution	Comments/justification		
	F3-G4		Support	This reflects new edge of village development of employment units at Wyndhams Place.		
	I8, J8, I9,H9 Station Works site, formerly Parmiter		Support	This parcel of land is a derelict brownfield site which the parish council supports for mixed re-development. It will be allocated in the neighbourhood plan		
	I4, J4, I5, J5		Support	This revision reflects existing development of Duck St and Ladydown View on the north-eastern edge of the settlement but potentially would encourage undesirable infilling along a very narrow single track lane with few passing places.  Not in the neighbourhood plan. Narrowness of the lane may make further development unsuitable.		
	I6, J6, K6 The Avenue		Support	The parish council strongly supports the adjustment of the settlement boundary to the northern side of 'The Avenue' , reflecting the existing settlement.		

Appendix Q - Schedule of representations

	H3, H4, I4	Object	Back Garden development along Hindon Lane. The parish council does not support these revisions of the settlement boundary which are not conducive to sustainable development as there is no existing access
	I6 Nadder Close car park	Object	This area is currently in use as the village car park and should remain so. The parish council objects to the movement of the boundary. The site should be transferred permanently to the ownership and control of the parish council.
	K6 The Old Farmyard	Object	This parcel of land is in the flood plain and floods regularly. It is unsuitable for development.
	F4,F5,G4,G5	Object	The parish council objects most strongly to this proposed revision. The proposed new boundary is around the site of St John's school and the former Nadder Middle School.  The parish council supports the recommendations of TisPlan, the emerging neighbourhood plan that this site should be reserved only for future potential expansion of educational provision. The site should not be allocated for general development.
	I8 land and gardens around the South Western Hotel	Object	This revised boundary reflects the re-development of the old outbuildings but the gardens flood routinely. They should be excluded from the development boundary.
	H8 G9 F8 G7 E8 D8	Neither support nor object	These revisions reflect the existing settlement, but note comment below re G7
	G7 Knapp Hollow	Object	It should be noted that the gardens of Knapp Hollow extend to the Oddford Brook. The land is unsuitable for any further development.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.11				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We are writing to you regarding the proposed development of housing in Hullavington on the land accessible from The Street. We understand that the original decision agreed by the council was to permit the development of 50 houses on the field that is adjacent to Hullavington Primary school. In principle, we have no Issue with this proposal as we understand the need to provide a range of housing to meet the increasing needs of the local area.</p> <p>We would like to express our deepest concern, however, about Hannick's proposal to build an extra 20 houses, on the plot of land that is directly In front of our properties. We were informed of Hannick's intentions during a public presentation during which two options were presented to local residents, the details of which I have attached to this letter. We would like to outline our concerns regarding Option 2, with the following points:</p> <ol style="list-style-type: none"> <li>1) the extra 20 houses will represent an overdevelopment of the village, Intensifying the potential increase in traffic congestion, noise and air pollution and resulting in an increased danger of road traffic accidents;</li> <li>2) the plot of land containing the proposed extra 20 houses, is an unploughed field that supports a number of species of birds of prey;</li> <li>3) the proposed housing overlooks the front of our properties, directly compromising our privacy;</li> <li>4) the owners of 47 Newtown, recently purchased the property on the guarantee that this field would not be built on in the near future;</li> <li>5) the proposal will create a large public space, within 5 metres of the front of our properties. We have concerns that this could .result in noise pollution (particularly late in the evening). This will have a negative impact on the sleep patterns of young families and older residents who live In the houses adjacent to the proposed development;</li> <li>6) this area of the village already has excellent links to the wider countryside. There are 4 well developed public footpaths.</li> <li>7) the original allocation for new housing for the village, presented at the initial public meeting was between 40 and 50. Seventy houses represents a considerable increase on this initial allocation.</li> </ol> <p>Thank you for considering our concerns. We ask that you uphold your original decision not to allow the development of an extra 20 houses on the land in front of our properties.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to state my opposition to the inclusion of site 3565 (fields adjacent to Southwick Court) in the Trowbridge Site Allocation Plan. The field system is a recognisable part of our heritage and dates back hundreds of years in its current form. The land has been used by many generations for its current use of farming and recreational space and is a valuable and valued asset to the local community.</p> <p>Housing on this site would not only contradict government policy of building on brownfield sites in preference to Greenfield, but would cause massive problems in its creation and existence for current residents. Given that much of the building would take place in an area of notified flooding and standing surface water, the existing residents would have their property seriously threatened by an increased risk of flooding.</p> <p>The site has been opposed by the Town Council and alternatives for a greater number of dwellings proposed. There is no need to forever lose this valuable space.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Draft Housing Site Allocations Plan – Knook MOD Camp, BA12 0JB</p> <p>I write on behalf of our client, Bloombridge LLP, to provide representations in respect of the Wiltshire draft Housing Site Allocations Plan. Our purpose is to highlight the benefits of additional housing delivery at Knook MOD Camp on the A36 near Warminster for housing and other uses. These representations should be read in conjunction with the completed representations pro-forma that accompanies the consultation.</p> <p><b>Background</b></p> <p>The site is located in the North and West Wiltshire Housing Market Area. It is approximately 18 Ha and comprises previously developed land as a MOD Transit Training Camp with roads and tarmac surfaces. The current use is being reviewed as part of the MOD long term land strategy and this may release all or part of this site for development. Existing accommodation comprises Military huts, lecture rooms, offices and a large central cookhouse. The site is located approximately 1km east of the village of Heytesbury and approximately 6km south-east of Warminster. The site is bisected by the B390 north-east to Shrewton. The south part of the site lies in the Cranbourne Chase Area of Outstanding Natural Beauty (AONB) and adjacent to the A36. The north part of the site is located outside the AONB.</p> <p><b>Planning potential</b></p> <p>The National Planning Policy Framework (NPPF) seeks to boost significantly housing supply (paragraph 47). The Wiltshire Unitary Authority Housing Site Allocations DPD seeks to allocate an additional 2,456 homes on top of the 42,000 allocated in the Core Strategy (adopted 2015) over the plan period in order to ensure a five year supply and buffer. This is a minimum target and Council's are encouraged to deliver more housing than minimum targets.</p> <p>Knook MOD Camp site plan [refer to plan in attached statement]</p> <p>The site has the following attributes that warrants consideration for allocating the site for housing and other uses:</p> <ul style="list-style-type: none"> <li>An opportunity to make an important contribution to housing and affordable housing and can accord with Core Policy 43 (Affordable Homes);</li> <li>Comprises previously developed land;</li> <li>Excellent highway connections to the local infrastructure network being adjacent to the A36, a major trunk route linking Southampton to Trowbridge and Bristol. Development can accord with Core Policy 62 (Transport Network);</li> <li>Other uses might include roadside, commercial or logistics use, given the transport connections;</li> <li>Real opportunity for landscape improvements and protection of the Cranbourne Chase AONB in which part of the site is located. Landscape impacts of development can be mitigated through building design, layout and landscaping measures to ensure development positively assimilates with the wider landscape setting in accordance with Core Policy 51 (Landscape);</li> <li>Impact on ecology managed in accordance with the site comprising previously developed land with low biodiversity value and Core Policy 50 (Biodiversity and Geodiversity);</li> <li>The site is not located in a flood zone and can comply with Core Policy CP 67 (Flood Risk);</li> </ul>			

Appendix Q - Schedule of representations

	<p>No impact on heritage assets as the site is not located in a conservation area or within the setting of any listed buildings and can comply with Core Policy 58 (Ensuring Conservation of the Historic Environment);          Site has capacity to accommodate its own infrastructure including local services and a primary school and can meet Core Policy 3 (Infrastructure requirements).          Alternative development strategies          Neighbourhood Plan          The consultation document acknowledges that there are some 60 Neighbourhood Plans in preparation in Wiltshire. Core Policy 1 of the adopted Core Strategy is supportive of additional housing coming through the Neighbourhood Plan process. The redevelopment of Knook MOD Camp could bring significant benefits to the nearby Heytesbury with few, if any, impacts. Local consultation and promotion of these benefits to local residents may generate sufficient support for the redevelopment of the camp that it could feasibly come forward for allocation through a Neighbourhood Plan.          Permission in principle          The Town and Country Planning (Permission in Principle) Order 2017 and the Town and Country Planning (Brownfield Land Register) Regulations 2017 are now in force. The permission in principle consent route is an alternative way of obtaining planning permission which separates the consideration of matters of principle for proposed development from the technical detail of the development. The regulations require Council to have completed their Brownfield Land registers by 31 December 2017.          Part 1 of the brownfield register needs to be a comprehensive list of all brownfield sites in a local authority area that are suitable for housing, regardless of their planning status. Much of this information is already collected and reviewed as part of the Strategic Housing Land Availability Assessment process. If the authority considers that permission in principle should be granted for a site the local authority is required to enter that site in Part 2 of their register after they have followed the consultation and publicity requirements. Proposed development would then need to satisfy the technical requirements before development can commence.          Policies Map (2015) showing location of Knook MOD Training Camp [refer to map extract in attached statement]          Conclusion          The site is currently in use as a MOD Training Centre. However, the current use is being reviewed as part of the MOD long term land strategy. The site comprises 18 Ha of previously developed land. The site affords potential for a number of significant benefits outlined in the letter above, and would contribute to the housing delivery in Wiltshire above the minimum level required by government. It would provide an opportunity for increasing the availability of affordable homes for local residents and for roadside commercial or logistics uses.</p>

Comment ID:	<a href="#">2841</a>	<b>Consultee</b> James Burke-Murphy  <b>Person ID:</b> 1134824	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to register my opposition to the proposed allocation of an additional 40 houses in Crudwell, on the Ridgeway Farm site as per the Draft Site Allocations Plan.</p> <p>I am also concerned that the site size / boundary of the Ridgeway Farm Development encompasses an area larger than that which was requested and refused planning on, for the same 40 homes back in 2014 - so I question what has changed in the subsequent three years. I strongly believe that the emerging Neighbourhood Plan in consultation with and with full engagement of the local community and businesses should determine the scale and type of housing need in Crudwell. The Neighbourhood Plan would examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity.</p> <p>I strongly believe that the Ridgeway farm site should be removed from the Draft Site Allocations Plan to allow our Neighbourhood Plan to be completed to a stage where it can inform decisions about how and where our village grows. I am not anti-development....I want to ensure my children and grandchildren can live in the village if they choose to. I am however in favour of sensible development with full engagement of the local community.</p> <p>Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", in policy 1. Given that the village of Crudwell is about 250 homes as is, I do not see how an additional 40 homes on top of the 10 already being built - a staggering 20% increase overall - even falls within Wiltshire Councils own Core strategy.</p> <p>I objected to the Ridgeway Farm planning application for these houses back in 2014 on the basis that that scale of the development at that one site in the village is unsustainable:</p> <ul style="list-style-type: none"> <li>• The scale of the development was much larger than previous developments.</li> <li>• This development would not be 'in-fill'.</li> <li>• Crudwell Primary School is oversubscribed and already at capacity.</li> <li>• It is outside the red line settlement boundary and not even adjacent to it.</li> </ul> <p>I, along with many other villagers and parishioners, was in favour of the 10 houses which were finally agreed. I was shocked when I heard about this re allocation for 40 additional houses appeared on this site which was previously considered unsuitable.</p> <p>There is no immediate need or justification to allocate new homes to Crudwell and the Draft Site Allocations Plan should not do so.</p>

People across Wiltshire should rise up and object to Wiltshire Council's irresponsible plans to develop our green fields when there are plenty of perfectly good brown field sites available.</p> <p>Wiltshire Council sprung its previously hushed plans for development within the Church lane/Southwick green belt at a Cabinet meeting on 20th June, including a 10-week public consultation to take place through the summer holidays when many people are away and busy doing other things. A tranquil green field like the one at Church Lane should not even be on the agenda for development.</p> <p>We should keep the diggers out of our remaining green and pleasant fringes on the edge of the Trowbridge boundaries which are home to our wildlife, and halt the urban sprawl into our lovely Wiltshire countryside.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>'Town centre growth should be a priority with Greenfield development being phased.'</p> <p>Digging up some of the last remaining green fields at the most distant fringes of the 2km town boundary and taking away forever those last remaining peaceful rural enclaves is environmentally irresponsible, will do little to tackle Trowbridge's decaying town centre, and does not accord with Wiltshire Council's Core Strategy.</p> <p>The Trowbridge Town Council Strategy 2013-17 states - 'Trowbridge Town Council will continue to support growth in areas closest to the town centre, recognising that significant areas of Greenfield development have now been allocated 300 or more houses per year to the East and South East.'</p> <p>Despite the above very public commitments by our local councils one reason why Greenfield sites on the outskirts of Trowbridge are now being considered is because many of those large, derelict brownfield spaces in the town centre have been excluded from Wiltshire Council's list of housing options as the Council has classified these as 'windfall' sites.</p> <p>I daresay Wiltshire Council would argue that they are holding onto potentially valuable Trowbridge town centre plots until the market is 'right', for reasons of Best Value and financial responsibility tosh. But really, is it morally right to sit on these Brownfield plots for years, or even decades whilst irreversibly pillaging our green rural countryside and destroying natural habitat?</p> <p>The presence of such prominent brown field sites standing derelict in the centre of Trowbridge is hardly the way to inspire local residents, businesses and visitors to want to live or invest in our town. Such sites visibly fester, like sores upon the landscape – as carbuncles even! The Campaign to Protect Rural England (CPRE) has expressed strong objection to councils which go against local and national government policy by developing in Greenfield locations. The CPRE states, 'The Conservative manifesto pledged to maintain the existing strong protections on designated land like the green belt. However, development on that land can be permitted under 'exceptional circumstances'. One wonders what exceptional circumstances exist to justify building on the green fields at Church Lane?</p> <p>The CPRE goes on to say the Government is offering councils financial incentives to plan for more housing under its New Homes Bonus Scheme. This may be getting us nearer to the truth – that it's all about money.</p> <p>A spokesman for the Department for Communities and Local Government said, 'This government is committed to protect the green belt. We have been clear that councils must prioritise development on Brownfield land, and announced plans to radically boost Brownfield development. So, is a Conservative Wiltshire Council going to defy Conservative central government policy by building houses on green fields in Wiltshire instead of prioritising Brownfield development?</p> <p>The Wiltshire Times published an article on Friday 4th August 2017 (page 4) highlighting the travesty of building on green fields at the extremes of Trowbridge whilst brown field sites in the town centre lie decaying and undeveloped, and increasing numbers of town centre businesses close.</p>			

Appendix Q - Schedule of representations

	<p>On 17th July I requested via Cllr David Halik that Wiltshire Council provide me with a list of the identified Windfall sites in the North &amp; West Housing Market Area, identifying for each site the area (hectares) and whether each one is a greenfield or brownfield site to help inform my response to the WHSAP consultation. Cllr Halik replied to me on 19th July 2017 saying, 'Awaiting of Wiltshire planning offices for detailed figures hope to get back to you by end of next week'. The information has never been provided by Wiltshire Council – just one of a number of obstructions by Wiltshire Council to the consultation process.</p>
<p><b>Attached files (Please see Objective)</b></p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>When Wiltshire Council held its Cabinet meeting on 20th June Wiltshire Councillor Graham Payne (Conservative) said, 'Someone said to me that Trowbridge is becoming like a doughnut, there is nothing in the middle.'</p> <p>So, I have carried out my own audit of Trowbridge Town Centre and found:                      Of the 7 prestigious and large retail units on Bythesea Road only 5 are occupied. This means currently a 28.6% vacancy level of these key retail units.                      Castle Place Shopping Centre on Market Street has 2 levels. The lower level looks relatively shabby and has a fair amount of unused floor space. The ground floor level has only 9 of the 16 units currently occupied – a shocking 43.8% vacancy level. Even JD Wetherspoons closed down and moved out in recent weeks. It seems a dreadful indictment for a town not to even be able to generate enough trade to maintain a Wetherspoons pub.                      The town's major shopping centre, The Shires fares slightly better, in part because the vacant units that exist are better camouflaged with bright pictures, in contrast to the sadly empty units in full view in Castle Place. I counted 9 vacant units out of 52 in the Shires, a 17.3% vacancy level, which of course represents further loss of investment and business and retail opportunity in Trowbridge's main shopping mall.                      Numerous other local independent traders have gone out of business in recent years many of which still stand empty including QS Extra, Walter Rose the butcher, Aston Interiors, Betterlife, The Carpenters Arms, and HB Pitt Ltd Gifts which had to close in 2016 due to lack of business after having traded in Trowbridge for 116 years.                      Instead we should get on and regenerate that gaping big hole in the centre of the Trowbridge ring doughnut.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Yes, the country needs more housing – mostly 1 and 2 bed affordable units to enable first-time buyers to get onto the housing market, and for some older people to downsize. Such housing is best located in town centres for easy access to the shops, leisure facilities and transport links. Ripping up our green fields to build ‘country piles’ each costing £½million does nothing to meet the real housing need. Of course, building affordable homes in the town centre doesn’t make the developers so much profit. But Toby Sturgess (Wiltshire Council’s Cabinet Member for Spatial Planning) said at the June Cabinet meeting that Wiltshire’s planning process is not developer-led. And pigs can fly!

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13		
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>We're writing this email to express our concerns regarding the recent proposed allocation of an additional 40 dwellings at Ridgeway Farm, Crudwell.</p> <p>We've recently moved into Crudwell - part of the attraction for us was the fact that Crudwell is a small, attractive village on the edge of the Cotswolds with green space around us.</p> <p>With this proposal for another 40 dwellings, this represents nearly a 20% increase in the number of houses in this small village ( currently 260 we believe ).</p> <p>We're not against development of rural communities at all but equally we believe any development has to be right for the village and in proportion. These additional 40 dwellings we believe are not right for the village nor are they in proportion.</p> <p>We understand from attending a recent meeting in the village, that there is no strategic need for a site of this scale in Crudwell. We believe the developers have identified a 'gap' in that Crudwell does not have a neighbourhood plan in place at this point in time and have taken advantage of this situation. A neighbourhood plan is now being produced and as part of this a planned survey will determine what the local needs for housing are and how they should be met.</p> <p>It is important that any allocation of sites for more housing must be on a genuine need rather than greed. They must take into account legitimate and real concerns felt by the local community ie drainage and flooding, school capacity, road safety and the impact on the environment - sadly our green spaces are declining at an alarming rate and everything that's associated with that.</p> <p>The school, which we understand to be a very good school, will be stretched way beyond its capacity - the school does not have the ability to extend - it's in a conservation area - unless of course that can conveniently be overlooked ( but that's another issue! ).</p> <p>As we've already said were not anti-development - we personally believe, however, that this proposal ( increasing the number of houses in the village by almost 20% ) is not in the best interests of the village, there is no strategic need for this number of new dwellings and we believe the developer has taken advantage of the fact that a neighbourhood plan has not been put in place. The residents of Crudwell deserve the right to have a say in how the village develops in line with housing needs.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Flooding has been a major issue for many houses/residents in Crudwell over the last few years. The existing waterways and drains have at times been unable to cope with run off water after heavy rains. Additional housing, where foundations are replacing open land will only make this problem worse for other residents.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Traffic in Crudwell can be an issue at times anyway without the additional traffic these proposed dwellings will bring. Tetbury Lane is quite narrow, with very basic and infrequent pavement along the lane. I have walked with my grandchildren to the play area by the village hall on a few occasions and have had to ask/ gesticulate to drivers to slow down. I wouldn't allow an older child to cycle along Tetbury Lane to the playing fields with the traffic as it is now, never mind with all the additional traffic associated with 40 more dwellings.

The Lambrok Stream runs along the bottom edge of the field and the marks the line of the Trowbridge town boundary – 2km from the town centre. This field is therefore at the most distant corner possible from the town centre. To consider a housing development at this location flies in the face of Wiltshire Council policy, Trowbridge Town Council priorities, and common sense.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Wiltshire Council's Core Strategy for 2006-26 (adopted in January 2015) includes a number of strategic commitments and priorities for Trowbridge which are directly contradicted by the proposal for housing development at Church Lane. Para 5.146 (page 131) 'Further significant house building on Greenfield sites, will only be able to commence if adequate education infrastructure exists, such as delivered on the Ashton Park extension.'</p> <p>The Ashton Park extension has been delayed, seemingly indefinitely due to complications with bats, and apparently cannot now be delivered by 2026. This means the education infrastructure planned as part of the development will not be delivered, and to quote the Core Strategy other Greenfield development should not therefore be pushed forward at this time.</p> <p>Contradictions in the Wiltshire Council Strategy A core strategy or local plan is considered "sound" when it is consistent with national policy. The National Planning Framework and Planning Guidance documents clearly state that 72 - The Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Local planning authorities should take a proactive, positive and collaborative approach to meeting this requirement, and to development that will widen choice in education. They should: give great weight to the need to create, expand or alter schools; and work with schools promoters to identify and resolve key planning issues before applications are submitted. In addition to this the Wiltshire Local Development Framework states: "the preferred option comprises a collection of sites that could deliver a coherent sustainable urban extension to the South East of Trowbridge and a town centre strategic site" There are clear contradictions to these statements in the core strategy as follows: The plan is for some 6,000 new homes for the Trowbridge area. Ashton Park has 2,000 already built and the plan was for a further 2,600 to be built there by 2026, leaving just 1,400 more to be identified. However there has been a two year delay re: the Ashton Park site due to the debate over the bats in the woods meaning the remaining 2,600 houses there cannot be built by the 2026 deadline, The sites named in the core strategy are not big enough to allow for increases in infrastructure (schools and healthcare). This can ONLY be provided by including the West Ashton Site which would not only provide infrastructure but already has a new road and would fulfil all the need for 900 new houses.</p>			

Appendix Q - Schedule of representations

	The Core strategy has clearly been written with developers, not the local communities in mind and it would appear that the council has opted for the smaller “developer friendly” sites in which developers are not required to provide social housing and infrastructure as opposed to one larger site which could clearly provide the needs of the whole of Trowbridge.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Trowbridge				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Para 5.147 bullet point 6 (page 132) 'It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick, North Bradley and West Ashton have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities.'</p> <p>The proposal to develop at Church Lane fails to comply with the above requirements on all counts. The proposed development site sits immediately next to the Southwick Country Park and Nature Centre, is a part of the current green buffer between Trowbridge and Southwick, and the site has flooding issues.</p> <p>Para 5.147 bullet point 2 (page 131) 'Town centre growth should be a priority with Greenfield development being phased.'</p> <p>Para 5.147 bullet point 7 (page 132) 'The regeneration of Trowbridge central area is a priority...'</p> <p>'The regeneration of centrally located vacant sites will improve the services and facilities the town needs.'</p> <p>What Trowbridge needs is development of the significant number of large, prominent, vacant and derelict sites in the town centre. New affordable housing to increase the number of people living in the town centre right in amongst our shops, cinema, cafes and restaurants, library etc, and within walking distance of the railway station is how you regenerate the town centre and its businesses.</p> <p>Digging up some of the last remaining green fields at the most distant fringes of the 2km town boundary and taking away forever those last remaining peaceful rural enclaves is environmentally irresponsible, will do little to tackle Trowbridge's decaying town centre, nor does it accord with Wiltshire Council's Core Strategy.</p> <p>The Trowbridge Town Council Strategy 2013-17 sets out commitments from the Town Council regarding development priorities in Trowbridge. In section 1.2 Future Growth it states, 'Trowbridge Town Council will continue to support growth in areas closest to the town centre, recognising that significant areas of Greenfield development have now been allocated 300 or more houses per year to the East and South East.' The document also acknowledges the work done by the 'Campaign for a Better Trowbridge' group calling for the need to ensure brownfield sites in the town centre are developed first.</p> <p>Despite the above very public commitments by our local councils one reason why Greenfield sites on the outskirts of Trowbridge are now being considered is because many of those large, derelict brownfield spaces in the town centre have been excluded from Wiltshire Council's list of housing options as Wiltshire Council has classified these as 'windfall' sites. I understand that windfall sites are defined as those that become suddenly and unexpectedly available and which therefore cannot be factored into long-term development planning. However, many of these town centre brownfield locations like the Bowyers site, the old library site on Bythesea Road and numerous others have been vacant for years, and indeed Wiltshire Council itself owns many of them. So it is very hard to see how they can be legitimately classified as windfall sites.</p> <p>I daresay Wiltshire Council would argue that they are holding onto potentially valuable Trowbridge town centre plots until the market is 'right', for reasons of Best Value and financial responsibility tosh. But really, is it morally right to sit on these Brownfield plots for years, or even decades whilst irreversibly pillaging our green rural countryside and destroying natural habitat?</p>				

Appendix Q - Schedule of representations

The presence of such prominent brown field sites standing derelict in the centre of Trowbridge is hardly the way to inspire local residents, businesses and visitors to want to live or invest in our town. Such sites visibly fester, like sores upon the landscape – as carbuncles even! In an article in The Times Newspaper (3rd July 2017) the Campaign to Protect Rural England (CPRE) expressed strong objection to some councils going against local and national government policy by developing in Greenfield locations. The article said, ‘The Conservative manifesto pledged to maintain the existing strong protections on designated land like the green belt. However, development on that land can be permitted under ‘exceptional circumstances’. One wonders what exceptional circumstances exist to justify building on the green field at Church Lane? The article went on to say the Government is offering councils financial incentives to plan for more housing under its New Homes Bonus Scheme. This may be getting us nearer to the truth – that it’s all about money.

Tom Fynans, Director of Campaigns and Policy at CPRE says, ‘We must not be the generation that sells off our precious green belt in the mistaken belief it will help improve the affordability of housing. The only ones set to benefit from future green-belt development will be landowners and the big house builders, not communities in need of decent, affordable housing. Protecting the green belt is part of, not a barrier to, solving the housing crisis. It encourages us to focus on the million-plus homes we can build on suitable brown field sites, and avoid the environmental costs of urban sprawl. The green belt makes our towns and cities better places to live. It provides quick access to the countryside. The government must do more to protect it.’

A spokesman for the Department for Communities and Local Government said, ‘This government is committed to protect the green belt. We have been clear that councils must prioritise development on Brownfield land, and announced plans to radically boost Brownfield development. So, is a Conservative Wiltshire Council going to defy Conservative central government policy by building houses on green fields in Wiltshire instead of prioritising Brownfield development?

Contradictions in the Wiltshire Council Strategy

A core strategy or local plan is considered “sound” when it is consistent with national policy.

The National Planning Framework and Planning Guidance documents clearly state that

111 - Planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value. Local planning authorities may continue to consider the case for setting a locally appropriate target for the use of brownfield land.

In addition to this the Wiltshire Local Development Framework states:

“the preferred option comprises a collection of sites that could deliver a coherent sustainable urban extension to the South East of Trowbridge and a town centre strategic site”

There are clear contradictions to these statements in the core strategy as follows:

That potential (windfall) housing on Brownfield sites including Bowyers, the old library site on Bythesea Road and many others have not been included in Wiltshire Council’s housing allocations, which if they were we would not need the proposed new Greenfield sites;

A further 82 homes are going to pre-application on Bradley Road (West Wilts site). Have these been included in the allocation or are they simply seen as windfall sites.

Also several sites were ruled out during the SHLAA process, the reason given being that they were inside the existing town boundary. These should surely be counted as sites and developed BEFORE open countryside is touched.

The lack of inclusion in developing the Bowyers site as part of the planned housing in Trowbridge does not comply with National Planning Policy 111 above.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Re: PLANNING APPLICATIONS FOR HOME FARM (16/10502/OUT) and SPURT MEAD, BISHOPSTROW, WARMINSTER.</p> <ol style="list-style-type: none"> <li>1. The above applications are for housing development, on agricultural and green field sites. Areas such as these need our full protection, not only for wildlife and the well being of the local people, but also for the future production of our food.</li> <li>2. The villagers of Bishopstrow made no objection to the development of the former Beeline bus depot, because it was a brownfield site, and therefore had the necessary infrastructure of drains, water, electricity. However, the problem with that development, is now becoming apparent, i.e. not enough car parking spaces which is leading to people parking on the narrow main road within a short distance of a roundabout causing considerable traffic congestion; this is especially evident at school run times.</li> <li>3. With regard to the SPURT MEAD application, it is right on the roundabout (mentioned in para 2) at the junction of Bishopstrow Road and Boreham Road - both of which are narrow and busy. If planning permission is granted it must be stipulated that there is to be no parking on the public roads. However, it will be tragic to see houses and cars (with their run-off) right beside the river Wylye which runs along the side of the proposed development. The NRA and local people have put great energy into keeping the river clean, and to nurturing wild life i.e. water voles and kingfishers. What is the point of our nature charities putting so much effort into the countryside when developers can wipe it out instantly?</li> <li>4. With regard to HOME FARM, which we understand has had several previous bids for development rejected, because it is agricultural land and should be sacrosanct.</li> <li>5. It is time the developers were made to build LOW-RISE FLATS in which six families can be housed on the footprint of two or three detached houses (3 floors: two flats coming off central staircase on each floor), and which are more affordable for the buyers. The Europeans build flats as a matter of course and one only needs go as far as Belgium, France, Holland and Germany to see plenty of fine examples. The added benefit of flats is that the reception rooms can be more spacious for families, rather than the cruelly tiny boxes that we make them buy at the moment.</li> <li>6. As I understand it, the Warminster area currently has enough housing to meet the targets until 2026. If more housing is needed why is the council not insisting on developers building on brown-field sites in the Warminster area. There are several, unused and/or neglected, such as the old police station in Station road, and a former old people's home, "Woodmead", on Portway. Our town centres need to be brought back to life.</li> <li>7. Clearly there is a money element in all this. We suspect that developers prefer Greenfield sites, as they are easier to build on, and they will make more profit. Surely it is the duty of our local council to respect the wishes of the people they represent, before giving in to rich developers, who only think of themselves and their profits.</li> </ol>

Areas such as these need our full protection, not only for wildlife and the well being of the local people, but also for the future production of our food.</p> <p>With regard to the SPURT MEAD application, it is right on the roundabout (mentioned in para 2) at the junction of Bishopstrow Road and Boreham Road - both of which are narrow and busy. If planning permission is granted it must be stipulated that there is to be no parking on the public roads. However, it will be tragic to see houses and cars (with their run-off) right beside the river Wylye which runs along the side of the proposed development. The NRA and local people have put great energy into keeping the river clean, and to nurturing wild life i.e. water voles and kingfishers. What is the point of our nature charities putting so much effort into the countryside when developers can wipe it out instantly? It is time the developers were made to build LOW-RISE FLATS in which six families can be housed on the footprint of two or three detached houses (3 floors: two flats coming off central staircase on each floor), and which are more affordable for the buyers. The Europeans build flats as a matter of course and one only needs go as far as Belgium, France, Holland and Germany to see plenty of fine examples. <b>Comment ID:</b>	<a href="#">2870</a>	<b>Consultee</b> Mrs Bev Cornish Clerk and RFO	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Downton Parish Council		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.62 - 4.72		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We also believe the Plan is unsound on the grounds of not being effective. The proposal is to plan for the remaining 850 homes allocated to Southern Wiltshire in just two areas with 750 of these to be built in one area. We believe that this proposal will encounter objection and consequent delay or possible abandonment of some of the proposed development as a result. With a proposal for Churchfields to become residential we believe that, despite the stated consultation and cooperation of various organisations on strategic issues such as transport and environment impact (cited at item 1.12 of the draft Plan), there is insufficient detail about how the impact on traffic and accessibility will be mitigated.</p> <p>We also consider that there is a lack of information about how the infrastructure will be provided to meet the needs of future residents living in the 850 homes and where those people will find employment – Salisbury has low unemployment figures. It is therefore quite possible that future residents will need to travel outside of Salisbury to the South for employment in Bournemouth and Ringwood, using the already congested A338. The lack of detail about impact on other community areas indicates either that the implications have been insufficiently thought through or inadequately explained. Either of these reasons means that too much is unknown and there is deficient foundation for true consultation and the draft Plan is therefore not 'effective'. Furthermore there is mention in the methodology nor obvious reference to registered conservation areas. Given a presumption in favour of development within settlement boundaries and the importance of sustainability criteria, we would wish to see evidence that that conservation areas have relevance and been taken into account.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2874</a>	<b>Consultee</b> Mrs Bev Cornish Clerk and RFO	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Downton Parish Council		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.94			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Downton Parish Council considers that the Wiltshire Site Allocations Plan is unsound because it is not positively prepared. We believe that it is inaccurate in that the settlement boundary shown for Downton does not show the extended boundary that should exist for the 99 houses already being built by Persimmon for Charles Church in grid reference F4 and G4. We believe that, as this development was granted full planning permission with the decision notice dated 1st June 2016 under 14/065161/FUL and is already being built with some houses already sold, this should be included in the Revised Settlement Boundary for Downton.</p> <p>We also note that the settlement boundary has been revised to exclude recreational ground at the Moot (grid reference L6) and the area known as the cricket ground (grid reference H5). Although we agree with this, we believe that the Borough greens (grid references H5 and I5) should be excluded from the settlement boundary as they are also amenity greens.</p> <p>St Laurence Parish church and graveyard are included within the boundary. Given the methodology relating to "religious buildings... physically related to the community" it is unclear to us why the catholic church (grid ref M3) is not included within the settlement boundary and why the Baptist church car park (grid ref I 6) has been excluded although we accept that in the latter case the plot is separated from the church itself, and may thus be exempt from inclusion.</p> <p>Because we believe that the Wiltshire Housing Site Allocations Plan is unsound, we cannot support its legal compliance or soundness but we wish to make the following comments to be noted at the point of compliance.</p> <p>Downton Parish Council believes that the Wiltshire Site Allocations Plan is correct to end the assessment for Downton at Stage 1 as it has a made Neighbourhood Plan (January 2017), has reached the allocated total of housing either being built or with outline planning permission, has identified sites that would be acceptable in principle if the housing allocation is not made and has no area where housing supply needs to be supplemented. Table 2.3 under section 2.9 of the Southern Area Community Topic Paper identifies that Downton Neighbourhood Plan did not include a review of the settlement boundary. This was because we received no advice to do so at the time and the boundary was under consultation as part of the ongoing 2015 review. However we would like to make use of the ability within the Neighbourhood Plan process (even after its adoption) to make amendments within the period of the Plan (i.e. before 2026) and to consider including a properly consulted, local informed settlement boundary review as part of the local Neighbourhood Plan and retaining the authority and force of the Neighbourhood Plan. We have no immediate plans to do this because of the stated intention not to include a further allocation for Downton but, should it become relevant, Downton will consider carrying out this process.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I live in chedglow and use the road from crudwell on a daily basis. I feel that to put a further 40 houses on this site will cause a big problem for the existing road.It is basically just wide enough for two cars but if you add pedestrians (pushing prams) and schoolchildren as well as the high usage of the playground and village hall then the pure volume of pedestrians will surely lead to accidents on a scale not seen before. Furthermore the increase of traffic on to Tetbury Lane and then to the junction of the A429, will cause further problems at the junction which may lead to either traffic lights or a roundabout being installed.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing to object to the allocation of housing site 482 east of Farrells Field, Yatton Keynell. I believe this proposal is unsustainable, and the reasoning behind the decision is unsound and inconsistent with national planning policy. There has been a total absence of a neighbourhood plan which would allow residents to engage in the question of future development, which conflicts with paragraph 155 of the National Planning Policy Framework (NPPF). I oppose the proposal of Site 482 in the Wiltshire Housing Sites Allocation Plan. Wiltshire Council must work together more closely with our Parish Council and residents to form a Neighbourhood Plan that would establish the housing need for Yatton Keynell. Withdraw land east of Farrells Field and allow residents of Yatton Keynell to explore other site options, in accordance with NPPF para 155. This proposal would join Yatton Keynell to Tiddleywink in a most dreadful style, reflective of ribbon development.

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2881</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Jacqueline Smith	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>As a resident of Crudwell, I would like to register my concern about the proposal to build 40 new homes on the Ridgeway Farm site. Firstly this site has already received permission to build 10 homes which are currently under construction, however, if the proposal for a further 40 homes is passed then it represents an almost 20% increase to the existing housing stock in Crudwell. I understand that the Draft Site Allocations Plan states that housing sites will only be allocated to villages where there is a strategic need to do so but as the Plan also forecasts an oversupply in the Malmesbury Community Area this surely means that Crudwell does not fulfil that criteria. I also understand that there is a similar level of oversupply forecast across the wider housing market area in North and West Wiltshire.</p> <p>The village has begun the process of producing a Neighbourhood Plan a part of which will be to undertake a survey to determine what needs exist for housing and how they should be met. Crudwell is not anti-development but clearly as a community we would like to be involved in determining what those needs are. I would also like to draw your attention to the fact that this additional development would place a strain on existing facilities and services, not to mention the safety implications of increased traffic on Tetbury Lane which is narrow with limited paving and is used by many villagers accessing the Village Hall and play facilities. Many houses have suffered with severe flooding over the past 15 years, additional housing in this location would also place an increased burden on the existing waterways and drains.</p> <p>In conclusion, my understanding is that Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities" but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy. Based on the above points it is clear that there is no substantiated strategic need for further housing allocations in Crudwell but also that it is absolutely appropriate that the Crudwell Neighbourhood Planning should determine what housing is required taking into consideration parishioners wishes and having examined the environmental and infrastructure constraints and options.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		This would result in an increase of at least 70 cars and delivery vehicles making their way through our development with all their associated noise, pollution and safety risks for small children which is unacceptable. Withdraw land east of Farrells Field and allow residents of Yatton Keynell to explore other site options, in accordance with NPPF para 155. This proposal would join Yatton Keynell to Tiddleywink in a most dreadful style, reflective of ribbon development.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I don't believe that this is a sensible proposal since -</p> <p>1) It will obviously open immediately onto the very narrow, twisty and dangerous road between Bratton and Westbury which is always busy and often clogged by enormous lorries. If 40 houses are built then there will be 80 more cars using that road to the detriment of all.</p> <p>2) I have lived in Bratton for 50 years and in that time I have seen the village virtually double in size with these housing estates built all around the village. The village can't absorb any more, for instance it is difficult enough to get a Doctors appointment now never mind if another crowd of people turn up needing healthcare. The School has more than doubled in size since my children went to it but I do not believe there is anymore space, unless they lose a small playground, to add yet more classrooms.</p> <p>I believe the above are very cogent reasons NOT to put more housing in Bratton village.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SA objective 10. Reduce the need to travel and promote more sustainable transport choices Decision: This will have the exact opposite effect. Thousands of extra journeys each day will make Netherhampton Road to the gyratory system and adjoining roads considerably more congested -> increased danger for cyclists. Extra traffic will violate SA objective 4 and 5a\5b regarding air quality. The infrastructure is not there and I doubt it can be put in place. It needs more than a token cycle lane. Dangerous enough as it is at the moment for cyclists and I use the road regularly. Stop concentrating huge housing developments in a few selected places, based upon large building firms land grabs and spread the housing throughout ALL villages, towns and cities to give small sustainable numbers of houses in each area with minimal impact on the environment and would be of benefit to each village\town\city. Each village\town\village can decide where the houses go and what type, and they could actually be affordable, contribute to the local economy & meet the objectives for the strategy. And you'll still get your Council Tax. Current Wiltshire strategy only benefits the landowners\building firms of these sites. Don't build hundreds of houses at these sites until the infrastructure is in place for these extra vehicles. Infrastructure can't be implemented afterwards (if they actually get implemented) and will be too late. Builder's contributions are pitiful to pay for infrastructure changes.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to register my objection to the plans for the Land West of Elizabeth Way (Land SW of Hilperon Marsh) HILPERTON GAP, Trowbridge, Wiltshire, 16/00672/OUT</p> <p>I consider the Wiltshire housing Site Allocation Plan to be unsound because it is NOT positively prepared, since it does not meet the assessed development requirements objectively. The proposal to increase the size of Trowbridge by more than a quarter exceeds the requirement for the five year supply. This plan is also not justified as they have not explained where the provision for jobs, schools, roads and other services (including recreation) also infrastructure, will be provided to support this plan. The plan is not effective because Wiltshire Council's examination of 'windfall', which is expected to provide 60% of new housing, is inadequate since it is only comprised of one page of the whole 4,500 pages of the plan.</p> <p>This plan is also inconsistent with the national policy as the council have not given enough weight to developing brownfield sites as a matter of priority e.g. Ashton Street centre, Court Mills, Bowyers site, Town Bridge; many of which are derelict and are an eye-sore, and which would lend themselves to providing a great number of homes. This makes a mockery of so-called protected 'green belt' when it is being targeted preferentially over brown sites in this 'land-grab'!</p> <p>Our government and council are ever-concerned with the 'carbon footprint' and actively encourage car-sharing and keeping healthy through daily exercise. So why then, don't they let us keep such recreation areas, right on our doorsteps? Many people would agree that these green sites should be kept for future generations to enjoy and use for recreation as is the case on the other side of town with Southwick Country Park. One size does not fit all, and not everybody can afford to, nor wishes to work out in the depressing and soulless four walls of a 'gym'- some of us prefer to have a brisk walk in the countryside for the sake of both our physical and mental health! It certainly is not a pleasure to walk polluted, over-used streets, and you'll probably find that we'd sooner not bother- this will fuel the obesity, diabetes and depression epidemic and place further strain on local medical services.</p> <p>Please leave us some open (green belt!) spaces to enjoy.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>New Forest District Council Reponse to the Consultation on the Pre-submission draft Wiltshire Housing Site Allocations Plan Objectively Assessed Housing Need and Housing Site Selection Approach</p> <p>The draft Wiltshire Housing Site Allocations Plan (WHSAP) is based on the housing requirement from the existing adopted Wiltshire Core Strategy. The Duty to Cooperate statement appendix 2 makes reference to implications of housing requirements of the wider South Wiltshire Housing Market Area that are within the New Forest. We welcome this being recognised as a strategic issue for the Duty to Cooperate. The site selection methodology for the Pre-submission draft Housing Sites Allocation Plan seeks solely to deliver a relatively modest number of additional dwellings to ensure that the Wiltshire Core Strategy housing requirements are met. On this basis it excludes detailed consideration of the housing potential of several of the Large Villages in the South Wiltshire HMA, and does not appear to consider potential needs arising outside of Wiltshire.</p> <p>Officers from NFDC and the new Forest National Park Authority have recently met with Wiltshire representatives to explain that there is likely to be housing need in our plan areas (parts of which are in the Salisbury HMA) that we will not be able to accommodate. Both authorities aim to publish draft local plans for submission early in 2018 and we would ask that in finalising the WHSAP, Wiltshire Council take into account any unmet housing need from our areas.</p> <p>It is also important that future assessment of housing needs in the next review of the Wiltshire Core Strategy includes consideration of the parts of the New Forest located within the Salisbury HMA.</p>

				<b>Do you consider the draft WHSAP is sound?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1, H3.2, H3.3, H3.4, H3.5, H3.6					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>New Forest District Council Reponse to the Consultation on the Pre-submission draft Wiltshire Housing Site Allocations Plan</p> <p>Recreational impacts on the New Forest European Sites                      The Habitat Regulations Assessment that forms part of the evidence base for the WHSAP concludes no likely significant effects on the New Forest SPA due to no proposed sites being within the visitor catchment area (HRA uses an 8km radius to establish the visitor catchment area). The draft Housing Site Allocations Plan does not propose to allocate any sites that are proximate to the New Forest SPA/SAC. However, given that there are parts of Wiltsh.ire (e.g. Downton) that are closer to the New Forest SPA/SAC than some locations in New Forest District, and new homes are being constructed in this area, we reiterate the importance for any forthcoming relevant Neighbourhood Plans and the next review of the Wiltshire Core Strategy to have an appropriate mitigation approach for recreational impacts in place for the New Forest SPA/SAC. As the draft WHSAP notes at paragraph 2.21:                      "There are at the moment over sixty Neighbourhood Plans either being prepared or completed in Wiltshire and many more plans are likely over the years ahead. Many of these involve identifying land to meet the need for new homes. Their role in meeting housing requirements will become more significant alongside the Plan".</p> <p>Air quality impacts on the New Forest European Sites                      The Wiltshire Core Strategy HRA did not identify an adverse effect on the integrity of any European sites (including the New Forest SAC) from nitrogen deposition, subject to the implementation of an air quality strategy for Wiltshire. This conclusion remains the same on the basis that little has changed and no additional growth is being proposed in those parts of the county closest to those designations. However, following a High Court judgement earlier this year the approach to assessing in combination air quality impacts in the Wiltshire HRA may need to be reconsidered. Appropriate Assessment work for the emerging New Forest Local Plan has for example been unable to screen out potentially significant in-combination effects from nitrogen deposition in a number of main road corridors through the New Forest, including the A36 Salisbury to Southampton. Second stage screening is in progress.</p> <p>In-combination water quality impacts on the Hampshire Avon SAC/SPA/RAMSAR                      The draft WHSAP proposes site allocations of 910 homes in the South Wiltshire HMA and around 200 in Warminster, all of which will be served by waste water treatment works that discharge to the River Avon or its tributaries. We understand that the Warminster WWTW was unable to achieve the required phosphorus reductions after an EA review of consents in 2010, and that this was part of the reason for production of the River Avon Nutrient Management Plan (2015). We also understand that there are some concerns about whether the NMP has achieved its phosphorus reduction objectives and also that the housing growth assumptions that it is based on are already being exceeded. Appropriate Assessment work in progress for the NFDC Local Plan review has not been able to rule out likely significant effects on water quality, including in-combination effects. The authors recommend further work with the relevant bodies including Wiltshire Council, to gather more detailed evidence to inform the appropriate assessment.</p>				

Appendix Q - Schedule of representations

	<p>It therefore seems likely to us that allocation of additional housing sites in South Wiltshire and Warminster (and any Neighbourhood Plan housing additions on the Avon system e.g. at Downton) may trigger the same in-combination effects issues for Wiltshire Council, affecting high risk parts of the Avon system as identified in the NMP.</p> <p>We suggest that this is a matter that requires joint (and wider) consideration under the Duty to Cooperate to identify appropriate solutions for the Avon catchment as a whole. We would welcome an early discussion about next steps.</p>

		Salisbury Walking, Salisbury Greenspace, Salisbury Air Quality groups	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This response relates to the Salisbury Community Area notably the proposed sites -H3.1 Netherhampton Road and H3.3 -North of Netherhampton Road.</p> <p>I consider the Wiltshire Housing Site Allocations Plan to be unsound for the following reasons:</p> <p>1. Lack of strategic documents: There is frequent reference in the supporting documents for this consultation to strategies and plans which have never been consulted upon or adopted. These include:</p> <p>i) A detailed Salisbury Transport Strategy. All we have to date is a Summary dated November 2012, while the Salisbury Transport Strategy Refresh, which we were promised last year, has not taken place. This would have given the opportunity to assess the transport impact of developments which have already taken place around the city and to come up with new ideas before any further development was proposed. It was agreed in the adopted Wiltshire Core Strategy that to cope with the significant growth planned for Salisbury and the surrounding parishes that a radical approach to transport must be adopted to avoid overwhelming pressure on the road network and an unacceptable increase in air pollution. In spite of this Salisbury has already grown considerably and further sites are now being considered without an adopted Transport Strategy. It seems that without this each site is being considered in isolation rather than assessing the cumulative effect on the road network especially the radial routes into the city.</p> <p>The numbers and location of housing developments have changed significantly from those in the adopted Core Strategy and referred to in the Summary Salisbury Transport Strategy 2012, which included 1,300 houses on the brown field sites of Central Car Park and Churchfields. These developments have been delayed for some reason not explained resulting in the current proposal of further green field developments to the south of the city. Edge of town developments add significantly to traffic movements, resulting in further congestion and deteriorating air quality. In view of this it is vital that Wiltshire Council produce a more detailed Salisbury Transport Strategy which addresses the impact of housing developments that have been completed or are in the process of being built since 2012 and how the new proposals to the south of the city will impact on the current road network.</p> <p>ii) Green Infrastructure Strategy (GI) Core Policy 52. Although there are frequent references to a GI Strategy in the Wiltshire Core Strategy, Core Policy 52, this 'remains in preparation' with, as far as we know, no progress towards consultation or formal adoption. In spite of the recognised importance of GI to the health and wellbeing of a community the Wiltshire Core Strategy does not consider this to be essential infrastructure. Without these two fundamental and interlinked strategies it would seem impossible to assess the impact of further development as proposed in the Draft Housing Site Allocation Plan (WHSAP).</p> <p>Green Infrastructure is key to achieving a major shift to active travel such as walking and cycling. As set out in the Wiltshire Core Strategy "The Council will use its planning and transport powers to help reduce the need to travel particularly by private car by promoting sustainable transport alternatives". The Sustainability Appraisal Report accepts the need for radical improvements to the walking and cycling infrastructure but the</p>				

Appendix Q - Schedule of representations

Council does not have a good record on this where developers have been able to side step Planning conditions e.g at Longhedge Village they have failed to put in any off road links to the adjacent development of Old Sarum and thence to the wider community and the city. The result is an isolated community dependent on the private car.

In view of the lack of a county GI strategy the Salisbury Area Greenspace Partnership Connectivity Group, of which I am chair, have been working on developing a local GI Strategy for the Salisbury Area. Having identified the gaps and missing links within the current network we went on to develop a draft plan for strategic 'greenways' linking new developments to key destinations with the majority of routes being off road and so away from traffic and the health impacts from air pollution associated with walking and cycling along main roads. We believe this would provide the impetus needed for a shift in people's behaviour away from the private car and encourage active travel. Please find attached a map of our draft strategic routes around the city with radial links to key destinations. More detailed descriptions are available.

The Salisbury Cycling Network is developing some of these routes but many of the planned cycling routes are along main roads while green off-road routes are classified as rural routes for recreational purposes. As a settlement grows there needs to be a willingness to create new Rights of Way (RoW) as well as upgrading existing routes. The historic network of RoW does not always serve the needs of growing communities but there seems to be a reluctance to accept that provision of routes that go where people need to travel is vital to encourage modal shift. Wherever possible new routes should be off-road and away from traffic, providing a healthy, safe environment if active travel is to have any impact on minimising the predicted traffic growth.

The Department for Transport encourages Councils to develop Local Cycling and Walking Infrastructure Plans (LCWIPs) as part of the Planning process and incorporate these into Supplementary Planning Documents and Neighbourhood Plans. The views expressed above are backed up by Government Policy e.g. included in the DfT LCWIPS are the following statements encouraging Councils to:

Consider incorporating LCWIPS into Supplementary Planning Documents where this would provide more guidance on the policies in the Local Plan and Neighbourhood Plans.(2.27)

Identify places where new strategic cycling and walking routes can be delivered by a new development, and ensure the protection of alignments for future planned cycling and walking routes (2.29)

Encourage access to green routes away from the highway. (This is increasingly important as air pollution levels along main roads is of growing concern.)

Travel to work areas and the location of significant trip generators should be identified. (The Hospital is a large employer where an off road route from the Netherhampton Road development should be considered avoiding main roads and the Harnham Gyratory).

2. Cross boundary working.

Much of the new housing, already built or proposed in the current Draft Housing Allocations Plan, lies outside the Salisbury Community Area but greenspace and green infrastructure, the network of footpaths and cycleways, must inevitably cross community boundaries; which highlights the importance of cross-boundary working. There appears to be no mention of how this issue will be addressed.

Netherhampton Road sites H3.1/S1028 and H3.3/S1027.

The Council do not appear to have seriously considered the impact of these developments on the road network. There is no improvement to the road infrastructure that is either possible or likely to have any impact on what is already a heavily used route through a residential area with bottlenecks at either end.

The large development of 740 houses on theNetherhampton Roadin the draft plan can only be considered if the impact of traffic on the Harnham Gyratory is addressed and high quality GI is provided to encourage sustainable travel.

Both these sites are within the accepted walking and cycling distance from the City centre and most key destinations. The WHSAP does indicate that the site will be linked to the existing Rights of Way network but my understanding is that the cycleways will mainly be along the main roads with no new 'green' routes being considered or upgrading of existing paths such as Town Path and Broken Bridges footpath. Further details will become apparent if/when a detailed planning application is submitted but we wish to highlight at this stage that these routes need to be identified before detailed design is submitted so that alignments with the least gradient and the most direct route are protected. The incorporation of LCWIPs into Supplementary Planning Documents would avoid the previous pitfalls of developers reneging on agreed Planning conditions.

It was agreed in the adopted Wiltshire Core Strategy that to cope with the significant growth planned for Salisbury and the surrounding parishes that a radical approach to transport must be adopted to avoid overwhelming pressure on the road network and an unacceptable increase in air pollution. In spite of this Salisbury has already grown considerably and further sites are now being considered without an adopted Transport Strategy. It seems that without this each site is being considered in isolation rather than assessing the cumulative effect on the road network especially the radial routes into the city.</p> <p>The numbers and location of housing developments have changed significantly from those in the adopted Core Strategy and referred to in the Summary Salisbury Transport Strategy 2012, which included 1,300 houses on the brown field sites of Central Car Park and Churchfields. These developments have been delayed for some reason not explained resulting in the current proposal of further green field developments to the south of the city. Edge of town developments add significantly to traffic movements, resulting in further congestion and deteriorating air quality. In view of this it is vital that Wiltshire Council produce a more detailed Salisbury Transport Strategy which addresses the impact of housing developments that have been completed or are in the process of being built since 2012 and how the new proposals to the south of the city will impact on the current road network.</p> <p>ii) Green Infrastructure Strategy (GI) Core Policy 52. Although there are frequent references to a GI Strategy in the Wiltshire Core Strategy, Core Policy 52, this 'remains in preparation' with, as far as we know, no progress towards consultation or formal adoption. In spite of the recognised importance of GI to the health and wellbeing of a community the Wiltshire Core Strategy does not consider this to be essential infrastructure. Without these two fundamental and interlinked strategies it would seem impossible to assess the impact of further development as proposed in the Draft Housing Site Allocation Plan (WHSAP).</p> <p>Green Infrastructure is key to achieving a major shift to active travel such as walking and cycling. As set out in the Wiltshire Core Strategy "The Council will use its planning and transport powers to help reduce the need to travel particularly by private car by promoting sustainable transport alternatives". The Sustainability Appraisal Report accepts the need for radical improvements to the walking and cycling infrastructure but the</p>				

Appendix Q - Schedule of representations

Council does not have a good record on this where developers have been able to side step Planning conditions e.g at Longhedge Village they have failed to put in any off road links to the adjacent development of Old Sarum and thence to the wider community and the city. The result is an isolated community dependent on the private car.

In view of the lack of a county GI strategy the Salisbury Area Greenspace Partnership Connectivity Group, of which I am chair, have been working on developing a local GI Strategy for the Salisbury Area. Having identified the gaps and missing links within the current network we went on to develop a draft plan for strategic 'greenways' linking new developments to key destinations with the majority of routes being off road and so away from traffic and the health impacts from air pollution associated with walking and cycling along main roads. We believe this would provide the impetus needed for a shift in people's behaviour away from the private car and encourage active travel. Please find attached a map of our draft strategic routes around the city with radial links to key destinations. More detailed descriptions are available.

The Salisbury Cycling Network is developing some of these routes but many of the planned cycling routes are along main roads while green off-road routes are classified as rural routes for recreational purposes. As a settlement grows there needs to be a willingness to create new Rights of Way (RoW) as well as upgrading existing routes. The historic network of RoW does not always serve the needs of growing communities but there seems to be a reluctance to accept that provision of routes that go where people need to travel is vital to encourage modal shift. Wherever possible new routes should be off-road and away from traffic, providing a healthy, safe environment if active travel is to have any impact on minimising the predicted traffic growth.

The Department for Transport encourages Councils to develop Local Cycling and Walking Infrastructure Plans (LCWIPs) as part of the Planning process and incorporate these into Supplementary Planning Documents and Neighbourhood Plans. The views expressed above are backed up by Government Policy e.g. included in the DfT LCWIPS are the following statements encouraging Councils to:

Consider incorporating LCWIPS into Supplementary Planning Documents where this would provide more guidance on the policies in the Local Plan and Neighbourhood Plans.(2.27)

Identify places where new strategic cycling and walking routes can be delivered by a new development, and ensure the protection of alignments for future planned cycling and walking routes (2.29)

Encourage access to green routes away from the highway. (This is increasingly important as air pollution levels along main roads is of growing concern.)

Travel to work areas and the location of significant trip generators should be identified. (The Hospital is a large employer where an off road route from the Netherhampton Road development should be considered avoiding main roads and the Harnham Gyratory).

2. Cross boundary working.

Much of the new housing, already built or proposed in the current Draft Housing Allocations Plan, lies outside the Salisbury Community Area but greenspace and green infrastructure, the network of footpaths and cycleways, must inevitably cross community boundaries; which highlights the importance of cross-boundary working. There appears to be no mention of how this issue will be addressed.

Netherhampton Road sites H3.1/S1028 and H3.3/S1027.

The Council do not appear to have seriously considered the impact of these developments on the road network. There is no improvement to the road infrastructure that is either possible or likely to have any impact on what is already a heavily used route through a residential area with bottlenecks at either end.

The large development of 740 houses on theNetherhampton Roadin the draft plan can only be considered if the impact of traffic on the Harnham Gyratory is addressed and high quality GI is provided to encourage sustainable travel.

Both these sites are within the accepted walking and cycling distance from the City centre and most key destinations. The WHSAP does indicate that the site will be linked to the existing Rights of Way network but my understanding is that the cycleways will mainly be along the main roads with no new 'green' routes being considered or upgrading of existing paths such as Town Path and Broken Bridges footpath. Further details will become apparent if/when a detailed planning application is submitted but we wish to highlight at this stage that these routes need to be identified before detailed design is submitted so that alignments with the least gradient and the most direct route are protected. The incorporation of LCWIPs into Supplementary Planning Documents would avoid the previous pitfalls of developers reneging on agreed Planning conditions.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I am writing to state my opposition to the inclusion of sites 3565, 3260 and 1021 in the Trowbridge Site Allocation Plan. The field system is a recognisable part of our heritage and dates back hundreds of years in its current form. The land has been used by many generations for its current use of farming and recreational space and is a valuable and valued asset to the local community. Housing on these sites would not only contradict government policy of building on brownfield sites in preference to greenfield, but would cause massive problems in its creation and existence for current residents. Given that much of the building would take place in an area of notified flooding and standing surface water, the existing residents would have their property seriously threatened by an increased risk of flooding. The proposed development of these sites will also increase the volume of road traffic on the A361 Frome Road, Church Lane and Silver Street Lane and exacerbate a major problem during the rush hour.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>North Dorset District Council (NDDC) notes the contents of the Wiltshire Housing Site Allocations Plan. NDDC has no objection to this Plan as it is not aware of any potential strategic impacts on the North Dorset District.</p> <p>NDDC notes that a summary of the comments it made in June 2016 with respect to the draft Wiltshire Housing Site Allocations DPD have been recorded in your Duty to Cooperate statement (June 2017). The summary reads: "Shaftesbury is within the North Dorset District boundary but there are limited land options for further growth within their administrative boundary. In their plan examination report the Inspector recommends that a site in the Wiltshire administrative area adjacent to Wincombe Business Park could be considered for housing or employment use."</p> <p>At present we are aware that land adjacent to the north-east of Shaftesbury (but within Wiltshire) has been promoted for mixed use residential-led development by an agent representing the landowners. However, we appreciate that the Housing Site Allocations DPD has been prepared under the framework of the current Wiltshire Core Strategy. Such a development would not be in conformity with this Core Strategy.</p> <p>Furthermore, we are not in a position at this stage to demonstrate that such a site is needed for development purposes. We may have a clearer view after the completion of our Local Plan Review Issues &amp; Options consultation, which is due to start this November. Therefore, we wish it to be noted that expansion of Shaftesbury into Wiltshire's area could be an option that we will need to pursue in the future, and if so, this is something we will need to work with Wiltshire Council on under the duty to cooperate.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I have one very significant issue related to flood risk management in East Warminster and its implication within the draft Housing Allocation Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA), thereby managing and reducing risk of flooding throughout Wiltshire. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP) Wiltshire's SFRA identifies certain areas that are at higher flood risk and requires them to undergo these additional flood risk assessments. These areas are Salisbury, Chippenham, Trowbridge and Warminster. In addition, the Core Strategy and associated Sustainability Appraisals highlighted these sites, under guidance from the Environment Agency (EA). The Wiltshire Site Allocation Plan proposes selection of 3 new sites within Warminster, but the selection of the sites has clearly not followed the national planning process through the absence of sequential flood tests. In addition, no reference is made to why the correct national and local flood risk management policies was not followed. Further NPPF guidance clearly states if the correct processes and procedures are not followed then new site selections should be rejected. These processes were followed for the new site selection in Chippenham and therefore should be also followed for Warminster. Observing correct planning procedures before selection of new sites may prevent costly legal challenge in the future, thereby safe guarding Wiltshire tax payer's money. Wiltshire Council should reject the selection of these Warminster sites until sequential flood tests are completed, thereby adhering to national planning policy and guidelines.			
<b>Attached files (Please see Objective)</b>				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	I made a written representation to the Wiltshire Council Cabinet meeting in June on my concerns over the selection of the new sites in Warminster. I was unable to attend due to other commitments. The Cabinet Member for Planning acknowledged receipt of this representation by personally naming me at the meeting, but failed to discuss the implications of lack of following NPPF guidelines and releasing a non-evidence based draft. The Leader assumed it was evidence based. Further, despite a public assurance at the meeting from the Cabinet Member that he would respond to me in writing, he has yet to do so. The Cabinet therefore released a non-evidence based draft plan for Warminster, which is in direct contradiction with national planning policy and guidance. To ensure this representation will be correctly heard, I would wish to discuss the matter verbally with the Inspector			

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2909</a>	<b>Consultee</b> Mr Nick Parker  <b>Person ID:</b> 397127	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I strongly object to the proposed East of Dene (known locally as Home Farm) allocation for the following reasons: Wiltshire Core Strategy CPI - Development Principles The underlying principles of the Wiltshire Core Strategy seek to manage future development by ensuring that communities have an appropriate balance of employment, infrastructure, service facilities and houses. The strategy recognises that previous growth hasn't always been delivered in a proportionate manner, when housing is delivered into settlements where there are insufficient employment opportunities leading to out-commuting. The West Urban Extension, which is a mix of housing, employment land, primary school, local amenities, etc was specifically selected to accommodate the above and thus avoid out-commuting. The East of Dene site is purely a housing site and does not meet the principles of the Core Strategy listed above, in providing the balanced facilities that are needed for a self-contained community. Wiltshire Council and Warminster Town Council have both recognised that Warminster is unusual in that most residents commute out of town for work. The main towns for employment are Bristol, Bath, Frome, Westbury, Trowbridge and Salisbury. With the exception of Salisbury, all of these would involve residents from the East of Dene crossing Warminster Town Centre or using Copheap. This proposed site therefore will contribute to Warminster's current severe traffic problems, in order to reach the new employment area on the West Urban Extension or Bath, Bristol, Frome, Trowbridge and Westbury: Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, as the development site within Warminster. This site can also take the perceived increase in housing numbers for Warminster, if Wiltshire disagree with the above arguments and representations.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Housing Need Wiltshire's documentation now indicates that Warminster is 468 houses short of its target. The underlying reason for this shortfall has been the delay in agreeing solutions for the issues associated with the West Urban Extension development. Problems particularly associated with Warminster include secondary education places, flooding, pollution of the River Wylye, traffic, recreation, and loss of green buffer. Time is required to provide the additional facilities needed to support development in Warminster and therefore the proposed rate of development on the West Urban Extension is the maximum possible given these constraints. The Home Farm site does not provide any additional facilities and so rather than increase the overall number of houses completed, it would limit the number that could be immediately developed on the West Urban Extension in order to stop undue burden on an already overstretched supporting infrastructure Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	River Wylve The pollution problems associated with the River Wylve were recently discussed at a Wiltshire Council 'Our Community Matters' event. Recognising that the River Wylve is a SAC, and as such is afforded the highest protection under European Law the Wiltshire Council's Ecology Officer (See Below) comments are specific and concerning on the Wylve. These comments indicate that if this site is developed, in conjunction with the West Urban Extension, he anticipates significant amounts of pollution will be discharged into the Wylve. The Core Strategy selected the West Urban Extension as the Warminster development site and therefore it would not be appropriate to hinder development of this site by also granting permission for this new site. Wiltshire Council 's Ecology Officer- "River Avon SAC - The East of Dene development would presumably discharge to Warminster sewage works (STW). This STW discharges into the River Wylve, which is part of the River Avon SAC, a European protected site, which has nationally agreed targets for its water quality. The targets are being widely breached across the catchment for phosphorus. As a result the Environment Agency and Natural England have therefore published a Nutrient Management Plan to demonstrate how water quality will be improved over the next few years to ensure the targets are met. However, it is currently recognised there is a high risk that the plan will not deliver its objectives for the upper Wylve (and lower Avon) sub-catchments. The Council is therefore not able to approve planning applications that would discharge to Warminster STW, where they would take the quantum of development above that forecast in the Wiltshire Core Strategy. Permitted and pending applications currently exceed the Core Strategy allocation and this places uncertainty in the short to medium term for further residential housing applications in the Warminster catchment. The Council is working with Wessex Water, the EA and NE to undertake further modelling of housing growth scenarios and identify the scope for measures that would offset additional forecast phosphate. This situation will have implications for the current pre-application site. Optimistically the matter could be resolved within the next year. However, it seems more likely that significant further growth at Warminster may be delayed until after 2020 when advanced phosphate stripping technologies may be available for the STW Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, as the development site within Warminster. This site can also take the perceived increase in housing numbers for Warminster, if Wiltshire disagree with the above arguments and representations.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Flooding The site is subject to ground water and surface water flooding issues. Many instances of flooding have been reported to Wiltshire Council by residents of Grange Lane, those close to the Sutton Veny roundabout and Bishopstrow village over the past few years. These reports have included photographic evidence, available if required. The new proposed allocation is within Flood Zone 1 in relation to fluvial flood risk. The recent review of 'The Winter Floods of 2015/2016 in the UK' brings together both river flow and meteorological data in an analysis of the events that led to extensive river flooding. This report considered the three months of 'remarkably persistent and exceptionally mild cyclonic' activity which, along with Storm Desmond, included the major storms of Abigail, Frank and Gertrude. Current speculation is that the flood risk is increasing due to climate change and higher river flow trends over the last five decades, especially in western Britain. Wiltshire and the EA report concerns over flooding on this proposed site, Bishopstrow Village, Sutton Veny roundabout and Grange Lane. I remain very concerned that if this development was to be allowed, a period of persistent rain would not only cause this site to flood, but also increase significantly the risk of flooding to adjacent properties and surface water discharge into the River Wylye, endangering properties down stream. Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, as the development site within Warminster. This site can also take the perceived increase in housing numbers for Warminster, if Wiltshire disagree with the above arguments and representations.

Local residents witness speeds of traffic in both directions significantly higher and consider there is a high risk of accidents happening at the proposed junction. The matter is made worse as traffic flowing from Warminster towards Salisbury needs to negotiate a blind bend before meeting the proposed junction within 200 metres. All local residents close to the proposed entrance consider Boreham Rd to be at its most dangerous on this bend due to lack of clear sight and non observance of speed limits. The Wiltshire traffic officer was not at liberty to comment on the perceived danger of the bend, merely the entrance splay lines as defined by national policy.</p> <p>Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after long examination by the nominate Planning Inspectorate. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Environment This site was considered for development during the West Wiltshire District Plan and the examiner described the site as - "I saw that the land mostly comprises arable fields, with similar fields to the north, together with a few cottages and other houses (some set in trees) and bounded by lanes or roads, to the east, west and south. Although there is urban development immediately to the west (across Grange Lane), the area has a pleasant and obviously rural appearance and is very much on the edge of Warminster. From my observations from local footpaths to the north, west and east of the area and from Battlesbury Hill, I consider that the land relates well in visual terms to the open countryside to the north and east, forming an integral part of the countryside east of the town. I accept that a high stone wall and cottages fronting Boreham Road impact on any meaningful visual relationship with the countryside to the south, other than when seen from the Hill top. However, in view of the open-ness of the land and its linkage with other open land to the east and north (and especially Battlesbury Hill), I consider that the town policy limit hereabouts should be drawn along the eastern edge of the denser development fronting The Dene, St George's Close and (the southern part of) Grange Lane." The character of this site has not changed since this time and I further agree with Wiltshire's Conservation Officer who reported on speculative development 16/10502/FUL - The development of this site is extremely problematic in terms of the potential adverse impact the development would have on the character of the area and the setting of designated heritage assets, principally Bishopstrow House, The Cotes and the Bishopstrow Conservation Area. Irrespective of the quality of the development or design of the individual units, it is difficult to see how development of this area would make "a positive contribution to local character and distinctiveness" of the area (para 126 of the NPPF). Core policy 58 also requires that 'development should protect, conserve and where possible enhance the historic environment'. My view is that this proposal would fail to protect or conserve. Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing to inform you of my objections to Wiltshire Councils Proposed Development Site at Southwick Court - 3565. My objections to the unsuitability of the proposed development are based on the Plan being unjust and not consistent with national policy 'where brown field sites should at all times take precedent over any others.' Brown field sites at Bowyers and the former Council Offices on Bradley Road in addition to other sites in and surrounding Trowbridge have received outline planning permission but are not favoured by developers. The site at Southwick Court is purely developer driven and led and not in the interests of the County Town of Trowbridge, the outlying villages of Southwick and North Bradley or the wider communities it serves. Remove site 3565 from Proposal

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The land designated at Southwick Court is of significant archaeological importance encompassing medieval earthworks with fish ponds. Any development on or near the site would undermine the archaeology and cause irrefutable and permanent damage to the integrity of the medieval site.</p> <p>Southwick Court is a Grade II* Listed property. Development in the immediate and surrounding area would alter the historic aspect of the building and its surroundings. Heavy lorries, persistently travelling in close proximity/adjacent to the building and its out buildings together with construction machinery would undermine the very foundations of the listed property and outlying land. Digging foundations for houses and roads would potentially affect the very structure that has been designated as of significant historic importance. As custodians of listed buildings, we have a duty of care to ensure they are preserved and any threat to their integrity must be challenged for future posterity.</p> <p>The land designated at Southwick Court on Wiltshire's Housing Site Allocation Plan is surrounded by a continuous and unbroken medieval hedge demarcating parish boundaries as evidenced on the 1793 map. According to the 1997 Hedgerow Act, it would be deemed unlawful to break through any part of the hedgerow as it comes with preservation rights. Permission to break through may only be granted in the event of a breach to national security or to gain access during an emergency/crisis situation where no alternative access can be gained. If such an event was deemed necessary any breakthrough must by law be reinstated with the hedgerow being replanted to preserve its integrity. Access to the proposed building site would necessitate a breakthrough of the hedgerow.</p> <p>Given the location of Southwick Court and the scale and regularity of flooding that is currently known by government agencies, any further development on an identified flood plain would pose an immediate threat to the structure of the Grade II* listed building. Wiltshire Council has a duty to ensure the buildings are preserved and government advice and recommendations are strictly adhered to.</p> <p>Remove site 3565 from Proposal</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Land that has been designated in the plan for development falls into a category 2/3 floodplain area. See plan supplied by Environmental Agency for South Court Farm enclosed within this letter. A significant area of the proposed site floods annually. Drainage systems in Sandringham Road are currently unable to cope with water from the flood plain during spells of heavy rain and gardens are regularly subjected to sewage spewing out of drainage holes. This currently poses a significant health risk to the residents. Additional housing developments would exacerbate the situation and put additional strain on a network that is currently unable to serve the current housing stock and unfit for propose. Extensive test pits carried out on the site in July 2017 on behalf of Waddington Homes, a subsidiary of Barratt Homes, highlighted a lack of adequate drainage. The site lies on a bed of clay with less than 10 inches of top soil. The paucity of soil prevents the fields from draining freely and effectively. It must be noted at this point that one of the test pits was located on top of a medieval earthworks where the level of soil was greater due to the nature of the archaeology beneath. Not only will test results potentially highlight erroneous and inaccurate data from this survey, more importantly the integrity of a significant archaeological site has been compromised by a developer led and financial drive to develop land that is not required to fulfil the government housing request. Brown field sites that have been granted outline planning permission have yet to be developed and remain untouched.</p> <p>Given the location of Southwick Court and the scale and regularity of flooding that is currently known by government agencies, any further development on an identified flood plain would pose an immediate threat to the structure of the Grade II* listed building. Wiltshire Council has a duty to ensure the buildings are preserved and government advice and recommendations are strictly adhered to.</p> <p>This is the most up to date Environmental Agency Map for site – 3565. [Map is attached.]</p> <p>In conclusion, the development of site 3565 would be split in two by the floodplain that covers an estimated area of between one and three acres. The Lambrook Stream emanates from Southwick Court and regularly bursts its banks during periods of heavy and persistent rainfall. Following the flooding of 2007 the Pitt report stated, 'building on floodplains should be the absolute exception, done only in areas of genuine housing shortage where there is no alternative land available.'</p> <p>Remove site 3565 from Proposal</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Economic and sustainable The designated proposed site is currently farmed by a tenant farmer (Mr Marshall) at Bramble Farm who uses the fields to graze his cows. Moreover the land produces hay to feed the cattle throughout the winter months. The farm is sustainable in its current form given the extent of its acreage. Any reduction to the size and scale of the site would be untenable and the farm would not be economically viable. As the land has been economically sustainable for a significant period of time any development on the fields would render future farming viability as null and void. By developing the site any future economic and financial prosperity would be terminated forthwith. Wiltshire Council are responsible for ensuring economic sustainability and any development that serves to alter the integrity and continuity of land use that has existed for a significant period of time must be challenged. Remove site 3565 from Proposal

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Development of the site would necessitate the need for a clearly identified and extended infrastructure to support an increase in population and an influx of pupils. Road systems, health providers and schools need to be provided to meet increased demands. In Friday, July 14, 2017 copy of The Wiltshire Times, the front cover featured an article titled 'Housing boom fuels primary school crisis.' The article highlighted the lack of school spaces and the growing severity of the situation in Trowbridge and its surrounding area. Schools in the Trowbridge area have neither, the budget, or grounds to expand, and the two schools identified for construction are destined for the Ashton Park site. Clare Medland, Wiltshire Council's head of school place commissioning believes the two primary schools due to be built in Ashton Park will not be enough to meet the needs of the town and is quoted as saying. 'If hundreds of houses are built then the situation will become critical. Primary schools in the Trowbridge area are already tight. If all these applications are approved it would create a real problem.' Monies that have been made available by the property developer looking to develop land in Southwick off Blind Lane have been allocated to The John of Gaunt School and Walwayne Court Primary. Walwayne Court is situated at the other side of Trowbridge. Families would be forced to drive their children across town adding to the already congested roads during peak times of the day. Families will incur additional financial pressure as parents will require transportation to access a school space. Parents have a right to expect adequate and appropriate schooling provision within walking distance of housing developments.</p> <p>Remove site 3565 from Proposal</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The detail in this letter should be considered as part of my representation in response to question 6 on the attached form. In response to question 6 on the form, I set out my reasons for the plan being unsound on the following grounds:</p> <p>The proposed site is outside of the boundary for the village and is unsustainable  There is no evidence of any housing need for Yatton Keynell  Yatton Keynell has a lack of a Neighbourhood plan  The site selection process has been unsound  There are significant infrastructure issues on the site proposed  The consultation process has been poor  The proposal for 30 houses in this area will have a significant impact on the character of the area  These points have been further justified below. I have detailed how the plan does not comply with National Policy and how it is not justified, effective or positively prepared.</p> <p>There is an Absence of a Neighbourhood Plan  Of the five large villages within the Chippenham Community Area, Yatton Keynell is the only village without a Neighbourhood Plan. It is acknowledged that delivery of housing supply through a community led Neighbourhood Plan offers a positive and proactive approach to delivering housing need rather than a site selection process which is only put forward by landowners.  The local Ward Councillor (Cllr Scott) called for a Neighbourhood Plan to be made at a Parish Council meeting back in November 2014 (copy of minutes attached and minutes quoted below). This was suggested in response to specific concerns that were raised by the community in relation to the proposal for development of land adjacent to Farrells Field. The Parish Council have not addressed this request.  Notes from the minutes to November 2014 (extract)  'Cllr. Scott advised that Yatton Keynell should look into setting up a neighbourhood plan, which allows people in the village more of a say as to what they want in terms of any developments that may be proposed'. (extract)  The proposed land is just outside the village boundary for Yatton Keynell, and unless the village see it a necessity the council favours objecting to the development'. (extract)  In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:  'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be engaged in a proactive way, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.  There have been applications for development by local residents in Yatton Keynell (as infill) including a recent one in Tiddlywink which would work towards addressing the local community need.  The site selection process is unsound</p>				

Appendix Q - Schedule of representations

	<p>Para 5.13 of the Chippenham Community Area Remainder Topic Paper - June 2017 states that the village of Sutton Benger which has an identified a housing need, was discounted as a village which could accommodate additional housing growth. The Plan states that the village primary school cannot accommodate growth and therefore the village cannot accommodate more housing. The exclusion of the village from the housing allocation plan seems unjustified as the plan should consider all housing types not just those for families. Just because the school is full that doesn't exclude new housing being delivered for elderly, and people without children (flats starter homes). If some additional housing was accepted in Sutton Benger it might reduce the overall need for housing which has been identified in the other larger villages where there is considered no housing need.</p> <p>In light of these views I urge Wiltshire Council to withdraw the allocation of land at Farrells Field and work together with the Parish Council to produce a neighbourhood plan for Yatton Keynell which will explore whether there is a specific housing need in this village. A neighbourhood plan will also enable the villagers to have more say in where future housing could go rather than one site being allocated which will dramatically change the landscape and approach to the village.</p> <p>In line with NPPF para 155 allow Neighbourhood Plan to be prepared and the local residents to look into other options for sites. Until that is done remove land at east of Farrells Field.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Outside of village boundary Land east of Farrells Field is currently outside of the village boundary. Granting permission for housing allocation means an extension to the village perimeter in turn linking up the separate communities that surround it (Tiddlywink and Cold Harbour). Currently there is open country-side which is a green site. It provides an attractive green buffer zone separating Yatton Keynell from the adjacent but separate small communities at Cold Harbour and Tiddlywink to the south-east. Recent applications for development by local residents have been turned down by the very fact they reside outside of the village boundary. As a resident of the village, I acknowledge the importance of sustainable housing growth, however this proposal to allocate one development of 30 houses at the edge of the village is unsustainable, outside of Yatton Keynell boundary and will have a negative impact on the future of the village. The site is outside the framework of settlements boundary and is open country-side. It provides an attractive green buffer zone separating Yatton Keynell from the adjacent but separate small communities at Cold Harbour and Tiddlywink to the south-east. Another factor which was not considered as part of the site selection was the landscape constraints in place for the village Yatton Keynell. A significant amount of Yatton Keynell settlement and adjoining land is washed over by AONB rendering a large area of land that is not available for development. This fact should have been identified as a constraint in the overall site selection process and taken into account when considering the amount of new development proposed in the village. 30 dwelling will have a significant impact on the character of the area Para 5.31 identifies land East of Farrells Field, Yatton Keynell for the development of approximately 30 dwellings which currently resides outside of the boundary. The Council claim that 'it is in a location that has the capacity to accommodate change from an environmental, heritage and landscape perspective, and could assimilate into the existing built form, whilst positively conserving and enhancing the village-edge setting'. However, a large scale proposal of 30 additional houses at the entrance to the village is not suitable and will have a negative impact on the character of the area. In line with NPPF para 155 allow Neighbourhood Plan to be prepared and the local residents to look into other options for sites. Until that is done remove land at east of Farrells Field.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There is No evidence of housing need for Yatton Kevnell</p> <p>The proposal for 30 houses on land east of Farrells Field has been put forward at County level in order to meet the County's strategic housing requirements for the Chippenham remainder area. The site allocation for 30 houses in Yatton Keynell is not based on any evidence that there is a specific local housing need in Yatton Keynell. Appendix E of the Chippenham Community Area topic paper, confirms that no local housing needs survey was undertaken as part of the draft Plan. The proposed dwellings should be justified with evidence that there is a specific local need and the plan should confirm how that need will be met.</p> <p>In light of the above the plan is unsound, it not justified and is not consistent with national policy set out in paragraph 158 of the NPPF which states:</p> <p>'Each local planning authority should ensure that the local Plan is based on adequate, up to date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local Planning Authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals'. The village of Yatton Keynell which has no evidence of identified housing need (this is minuted in Parish Council Meeting minutes November 2014, attached), and no Neighbourhood plan has been identified for having a significant proportion of the 138 dwellings needed to meet the Chippenham Area Strategic housing target.</p> <p>The housing sites selection process is contrary to Para 159 of the NPPF. It states:</p> <p>'local planning authorities should have a clear understanding of housing needs in their area. They should:</p> <ul style="list-style-type: none"> <li>-prepare a strategic Housing Market Assessment to assess their full housing needs and .....The Strategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which .....addresses the need for all types of housing, including affordable housing and the needs of different groups in the community such as but not limited to families with children, older people people with disabilities, service families and people wishing to build their own homes...';</li> </ul> <p>In line with NPPF para 155 allow Neighbourhood Plan to be prepared and the local residents to look into other options for sites. Until that is done remove land at east of Farrells Field.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There are Infrastructure issues</p> <p>Drainage is considered to be fundamental constraint on the land adjacent to Farrells Field. It is acknowledged in the Council's Sustainability appraisal that the moderate adverse effects related to the limited drainage supply capacity in the local distribution mains and that there is a potential need to serve the site by a pumped connection for foul water and that the site falls within a groundwater vulnerability area. The development of Blacksmith Close has put the drainage at capacity. These issues are identified in the site allocation supporting text, and the need for a capacity appraisal and further assessment is required. Infrastructure needs should be identified and established prior to the allocation of the site. In line with NPPF para 155 allow Neighbourhood Plan to be prepared and the local residents to look into other options for sites. Until that is done remove land at east of Farrells Field.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Lack of community engagement and poor consultation</p> <p>The planning process which has taken place and resulted in the Farrells Field site being put forward for housing, has not been meaningful, as it has not provided opportunity for the local community to comment on or consider alternative sites. The Parish Council have not engaged in the plan process or adequately represented the views of the local people in response to the proposal being put forward. (as noted in point 2.)</p> <p>I consider the proposed allocation for such a large site which will have such a significant impact on the community in Yatton Keynell should be the subject of a more meaningful consultation process by means of a Neighbourhood Plan.</p> <p>It is my understanding (from P61 of the Chippenham Community Area Remainder Topic Paper) that of the five large villages identified as part of the Chippenham remaining area, none of the Parish Council's responded to the Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement. It states in para 2.23:</p> <p>Town and parish councils are the most local tier of democratic representation and, as such, they provide a key link with local communities. They are a specific consultation body under the Town and Country Planning (Local Planning) (England) Regulations 2012. Regulation 18 requires that Wiltshire Council has to consult with specific consultation bodies which they consider may have an interest in the subject. Wiltshire Council is committed to continuing to consult with the local councils'.</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p> <p>'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be proactively engaged, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <p>In line with NPPF para 155 allow Neighbourhood Plan to be prepared and the local residents to look into other options for sites. Until that is done remove land at east of Farrells Field.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2933</a>	<b>Consultee</b> Mrs Amanda Cuff  <b>Person ID:</b> 701840	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as I feel your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified- The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent – The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p>				

Appendix Q - Schedule of representations

	For the above reasons, I object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring next year.

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as I feel your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified- The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent – The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p>				

Appendix Q - Schedule of representations

	For the above reasons, I object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring next year.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to raise my concerns in relation to the above public consultation event. I would like to object to the allocation of housing site 482 adjacent to Farrells Field in Yatton Keynell which is proposed for 30 houses. As a resident of Yatton Keynell village I acknowledge the importance of sustainable housing growth in the village however, I consider the proposal to allocate one development of 30 houses at the edge of the Yatton Keynell village is unsustainable and will have a negative impact on the future of the village.</p> <p>I have the following concerns about how the selection process of this site has evolved. I believe the proposed housing sites allocation plan is unsound and is not consistent with national planning policy for the following reasons:</p> <p>No evidence of housing need for Yatton Keynell  Appendix E of the Chippenham Community Area topic paper) confirms that no local housing needs survey was undertaken as part of the plan. The proposed dwellings should be justified with evidence that there is a specific local need.  Relevant national policy in conflict with: paragraph 158 of the NPPF which states: 'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic , social and environmental characteristics and prospects of the area. Strategies for housing and other uses are integrated and they take into account relevant market and economic signals'.  Lack of a Neighbourhood Plan  At a Parish Council meeting in November 2014 there was a call for a Neighbourhood Plan to be made for Yatton Keynell so that residents can engage in how many and where future housing might take place:  "Clr Scott advised Yatton Keynell should look into setting up a neighbourhood plan which allows people in the village more of a say as to what they want in terms of any developments that may be proposed. The land proposed is just outside the village boundary for Yatton Keynell and unless the village see it a necessity the council favours objecting to the development".  Relevant national policy in conflict with: Para 155 of NPPF  Site selection process unsound  Sutton Benger has an identified need and no housing has been allocated. Yatton Keynell has no identified need yet 30 houses are proposed .  Relevant national policy in conflict with: Para 159 of the NPPF  In light of the above, I urge Wiltshire Council to withdraw the allocation of land at Farrells Field and work together with the Parish Council to produce a Neighbourhood Plan for Yatton Keynell, which will explore whether there is a specific housing need in this village. A Neighbourhood Plan will also enable the villagers to have more say in where future housing could go rather than one site being allocated at County level.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Proposal will have significant impact on the character of the area</p> <p>Adding a development of 30 additional houses at the entrance to the village is not suitable and will have a negative impact on the character of the area. The allocations plan states (section 5.31 p. 18) site 482 “ is in a location that has the capacity to accommodate change from an environmental, heritage and landscape perspective, and could assimilate into the existing built form, whilst positively conserving and enhancing the village-edge setting”. This statement is unfounded and incorrect - the development no matter what form it takes will severely detract from the leafy village edge setting YK now possesses.</p> <p>In light of the above, I urge Wiltshire Council to withdraw the allocation of land at Farrells Field and work together with the Parish Council to produce a Neighbourhood Plan for Yatton Keynell, which will explore whether there is a specific housing need in this village. A Neighbourhood Plan will also enable the villagers to have more say in where future housing could go rather than one site being allocated at County level.</p>

<b>Comment ID:</b>	<a href="#">2940</a>	<b>Consultee</b> Miss Eleanor Fitton Strategic Planner	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Berkeley Strategic  <b>Person ID:</b> 1135680		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This representation has been prepared in response to the Housing Site Allocations Plan ("the plan") in relation to the proposed settlement boundary for Devizes. Berkeley Strategic ("Berkeley") is the freehold owner of 7.2 hectares of the land at Horton Road, Devizes ("the site"). The site is allocated in the Wiltshire Adopted Core Strategy where it has been identified as a strategic employment allocation under Core Policy 12 whereby the site is referenced as the Land between A361 and Horton Road, Devizes. The policy states the strategic allocation will contribute a total of 8.4 ha of employment land.</p> <p>In reference to paragraph 36 of the Core Strategy Inspector's Report, the Inspector addresses the problem of relying upon pre-existing development plan documents to inform decisions concerning the settlement boundaries and stated these boundaries can be seen to be out of date. It was therefore concluded in paragraph 37 of the report that this issue could be resolved adequately by the Housing Sites Allocations DPD. The proposed settlement boundary for Devizes has been prepared contrary to paragraph 4.15 of the Wiltshire Core Strategy, which states the need for the settlement boundaries to be reviewed as part of the Sites DPD. The Core strategy states development outside the settlement boundary will be strictly controlled whereby the relaxation of the boundaries will only be supported where it has been formally reviewed through a subsequent DPD or community-led neighbourhood plan.</p> <p>Berkeley objects to the proposed Devizes settlement boundary on the basis that, following the adoption of the Core Strategy and the allocation of the land at Horton Road, the settlement boundary has not been amended to include within the settlement the land allocated under Core Strategy Policy 12. The settlement boundary is therefore not justified as it is inconsistent with the Core Strategy.</p> <p>The failure to include the allocated land within the settlement boundary poses a risk to the future development of this site, for the reasons set out at paragraph 4.15 of the Core Strategy.</p> <p>Berkeley is seeking a modification to the proposed settlement boundary of Devizes to include the Core Strategy employment allocation set out in Inset Map 11: Devizes, at Appendix 1. This shows the proposed allocation under Core Policy 12. Therefore, Berkeley seeks a change to the settlement boundary as shown in the Draft Proposals for Revised Settlement Boundaries Plan that was prepared by Wiltshire Council, which is included at Appendix 2.</p>				
<b>Attached files (Please see Objective)</b>	4736809 / 4736808				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Berkeley is the freehold owner of the land between A361 and Horton Road, Devizes. Therefore we deem it suitable to participate at the examination given the risk that the failure to amend the settlement boundary poses to the future development of this allocated site.

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I wish to make representations regarding the Council's Draft Housing Site Allocations Plan dated June 2017, currently out for consultation. I am a resident of Crudwell, Malmesbury, Wilts and my representations focus on the allocation of the site at Ridgeway Farm, Crudwell : SHLAA Site 3223 (or 3233) for a further 40 houses.</p> <p>My representations are as follows:</p> <p>The allocation of this site is not necessary to meet any strategic need for housing, which is already met or exceeded by completed, committed or planned developments in the North &amp; West Wiltshire Housing Market Area (HMA) and the Malmesbury Community Area (MCA). (This claim is supported by numbers quoted in the draft Site Allocation Plan.)</p> <p>The Plan also states that, in Large Villages such as Crudwell, development should be '...limited to that needed to help meet the housing needs of settlements and improve... (employment) opportunities, services and facilities.' It further states (at Clause 4.4) that 'Some new development, to meet local needs, may be appropriate at some of the designated Large Villages...' However, the nature of these needs local to Crudwell is not explored in the Plan, nor how development of this site at the scale envisaged would contribute to satisfying them.</p> <p>The site is outside both the existing settlement boundary and the revised boundary proposed in the Plan. Clause 2.8 of the Plan states that '...development outside the settlement boundary is, with limited exceptions, not acceptable.'</p> <p>A significant development of houses on the proposed Ridgeway Farm site is not appropriate and will only serve to exacerbate the infrastructure and environmental concerns expressed previously. [Officer note: specific issues have been separated into individual comments, number 2942 and 2942] There may be other potential development sites which should be considered instead. I believe that the best way to identify what developments can and should be put forward in the future is through the Crudwell Neighbourhood Plan which is currently being developed. Indeed, the Site Allocations Plan acknowledges that planning controls should pass to local communities.</p> <p>For the reasons stated above, I do not think that the allocation of the Ridgeway Farm site for a further 40 houses is justified and therefore it should be withdrawn from the Site Allocations Plan pending development of Crudwell's own Neighbourhood Plan.</p>			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>

		Olive M Malcolm	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>The allocation is disproportionately and unjustifiably large with regard to the existing community in the village of Crudwell. 40 additional houses would represent approximately a 15% increase for the village itself.</p> <p>Previous proposals for development on this site were scaled down after legitimate concerns were raised by local people, in particular with regard to the ability of the infrastructure to cope with these additional dwellings. The increase in traffic would result in congestion and pose serious threats to pedestrians using Tetbury Lane to access the Village Hall and playing fields. The potential risk of flooding would also be exacerbated.</p> <p>For the reasons stated above, I do not think that the allocation of the Ridgeway Farm site for a further 40 houses is justified and therefore it should be withdrawn from the Site Allocations Plan pending development of Crudwell's own Neighbourhood Plan.</p>

Broad Chalke Neighbourhood Plan.                  This is now nearing completion with legal negotiation ongoing with landowners to finalise development site(s). In accordance with the conclusions of the Wiltshire Council Site Allocation Plan, we do not envisage any large-scale development. However, we reserve the right to present community proposals for a very limited mixed development (affordable and market homes in the ratio of 2:1) taking note of the environmental, schooling and highways factors cited in the draft Site Allocation Plan. We have discussed our proposals with the relevant Wiltshire Council representatives in Spatial Planning and Highways Departments who are supportive. We will therefore be bringing our final proposals forward by Spring 2018, i.e. as soon as the current negotiations and community consultation are complete.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7, H2.8, H2.9		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as I feel your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified- The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent – The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as I feel your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified- The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Harnham lacks the infrastructure to support an extra 850 houses. Of most concern is the local road system which will not cope with another 1000 plus cars in what is as highly residential area with 30 MPH limit which no one adheres to anyway. I have two young children aged 11 and 9 and I am very concerned about the danger for them of crossing the Netherhamton Road. The single zebra crossing opposite the One Stop shop is not sufficient. Traffic often speeds at up to 60 MPH on this stretch of road. The Harnham gyratory currently cannot cope with the volume of traffic and there are often long delays, especially during rush hours and the same for the Wilton Park Wall junction. With the extra houses, the situation will be made much worse. The site is not within walking distance of town, so cars will be used even if the bus service was increased. Major traffic alterations around Salisbury need to be put in place, including cycle and pedestrian paths. The road needs to be made much safer. The 30 MPH limit is not adhered to by most who use this road.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We would like to register our objection to this proposed development for the following reason:</p> <p>These fields are beyond the natural boundary of the brook</p> <p>Is an expansion into open countryside and is against Wiltshire County Council's own strategy not to fill in gaps between villages and towns.</p> <p>The solar farm was placed where it is away from any development this proposal would put development closer to the farm.</p> <p>The fields being on a flood plain should be redesignated as a village green. My family having enjoyed the open fields for dog walking, blackberrying and collecting damsons for over 20 years.</p> <p>The local and main roads cannot sustain anymore traffic, at peak times the queues are very long. Frustrating.</p> <p>The infrastructure is insufficient to accommodate any increase in population and facilities provided are extremely poor compared to other Wiltshire towns.</p> <p>There are other more suitable sites within the town and other towns that developers could build on and pressure should be put on them to commence building.</p> <p>Facilities provided by Wiltshire County Council in Melksham at cost of several millions of pounds, additional housing should be developed there.</p> <p>There development would affect all manor of wildlife not just the Bechstein bat's but birds, foxes, dear and numerous wildfowl at times.</p> <p>Many other points of objection have been forwarded to you some very profound, all of which we fully support but would be pointless in repeating here.</p> <p>Thank you for taking the time to read this, and hopefully you may be able to support our objections.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write to register my serious concerns regarding the proposal to allow the development of an additional 40 houses on long established farm land at Ridgeway Farn, Crudwell.</p> <p>Over the past 15 years I have been supportive of sustained development within the village. This includes the current development of 10 houses on the Ridgeway Farm site adjoining Tetbury Lane which I think was originally proposed in 2014. When considering the development of this site my main concern was for the impact the development would have on properties in the village that were flooded in 2007.</p> <p>Current development of 10 homes on Ridgeway Farm</p> <p>The developers held a presentation in the Village Hall for the purpose of addressing villager concerns. On attending this presentation I made enquires as to how the drainage from the proposed residential properties would be managed. The developers at that point demonstrated they were aware of the flooding in 2007 and made a number of salient points.</p> <ol style="list-style-type: none"> <li>1. The homes were to be constructed primarily on a farm yard that was primarily hard standing.</li> <li>2. The proportion of hard standing to free drainage would not much alter because of gardens and the use of materials in driveways that would allow drainage to the underlying soil.</li> <li>3. The run off from the farm yard was already flowing into Tetbury Lane.</li> <li>4. Recognising this, part of the development would include a large underground large sink well into which run off from rainfall would be directed. It was suggested that this inclusion would in fact lessen the existing run off from the site to Tetbury Lane.</li> </ol> <p>The explanation satisfied my main concerns.</p> <p>I did have secondary concerns about the size of the proposed development, which was originally for 19 houses, and the ability of the village infrastructure to cater for this in a short time frame and the dangers to pedestrians if there was more road and pedestrian traffic in the existing narrow and laneway which has no footpath. There was a vague undertaking to see what could be done on that matter.</p> <p>When the final plans for ten new homes on the site were presented I was supportive of the development.</p> <p>Over the past few months I have intermittently seen the building commence. It is possible I may have missed the digging and installation of the sink well that was discussed by the developer. But I now do have a concern that if this has not been included, then I was misled in the presentation made to the village parishioners. I know that this query should be easily resolved and my concerns allayed.</p> <p><b>Flooding in the Village</b></p> <p>It should be common knowledge that a score or more homes in the village were flooded in 2007. I would describe the situation as “flash flooding” because the flood waters rose very rapidly and then fell just as quickly. This is an important point to understand because I believe it demonstrates that the village per se is not in a flood plain.</p> <p>I was in the village the day that the homes were flooded and saw first-hand how the flood developed.</p>				

## Appendix Q - Schedule of representations

The storm water and sewerage systems were unable to cope with the volume of water and backed up. Pressurised water and sewerage started gushing out of the man hole covers into the A429. As rains continued Tetbury Lane virtually became a river as run off from the homes in streets to the north flowed down into Tetbury Lane.

Some of this water flowed south of the village in a watercourse flowing behind the area known as the Butts. It caused flood damage to some of the houses in this development. This stream flows under the A429 at the southern edge of the village. The drain under the road could not cope with the volume of water and so backed up, flooding homes at the south end of the village. The water from this stream entered the A429 where it flowed back down towards the watercourse known as Swillbrook in the centre of the Village.

As the water flowed down the A429 it met with the flood waters flowing down Tetbury Lane. I would estimate that the water across the A429 was 12-18" deep at this point.

Swillbrook runs parallel to Tuners Lane. Run off from the homes on streets to the north of Tuners Lane entered Swill Brook which burst its banks.

The run off from Swillbrook met with the floodwaters flowing down the A429. The bridge on the A429 under which Swillbrook flows was unable to cope with the volume of water and so the homes within 100m or so of the bridge were flooded.

The situation was worsened with additional water flowing into Swill Brook as the watercourse running south down the A429 also overflowed.

As the rain eased, the volume of water trying to flow under the bridge on the A429 reduced and the area drained within a few hours.

Following the flooding I attended a community meeting in the Village Hall that I think was facilitated by the Parish Council. At this meeting were four representatives from DEFRA. They bluntly explained that village was recognised as a flood risk, but was not a priority because of its rural location. What funds they had were being directed to flood defences in more populated urban areas. In brief, DEFRA were not prepared to assist the village in any way.

I wanted to describe this to you because

1. I believe it clearly demonstrates that the village cannot cope with any actions that increase the speed and volume of run off into the streams surrounding the village.
2. DEFRA acknowledged the village as a flood risk in 2007 but were quite clear in stating that flood alleviation work was not a priority.

Proposed Development of a further 40 houses on Ridgeway Farm

The eco-system surrounding the village has been reasonably stable for hundreds of years. The surrounding woodlands have transitioned to farmland. The surrounding fields have continued to protect the village from flooding for hundreds of years by absorbing water into ground and, when saturated, slowing the rate of run off into adjoining waterways.

Over many hundreds of years the village has gradually grown to approximately 250 dwellings.

I understand that the current proposal for 40 new houses on Ridgeway Farm forms part of a master plan to perhaps develop 150 houses on the site. Such a development in a short time frame will alter the fabric of the village and challenge its infrastructure. I know that many Villagers will be commenting in detail on these concerns, many of which I share. However, I believe that these are all secondary considerations because the proposed location will increase the risk of flood damage and so is quite unsuitable for any further development.

The proposed development on Ridgeway Farm is on an area that the ordinance map shows is elevated above both Tetbury Lane and Tuners Lane. As such, it is outside the areas of the village that are prone to flood risk. However, development on this location will increase the occurrence and severity of flash flooding within the village for four reasons.

1. The loss of agricultural land which would absorb rainfall.
2. The loss of agricultural land which would reduce the rate of flow of water from saturated land into the village.
3. The accelerated flow of storm water and into the village from the residential downpipes and road side gutters.
4. The additional sewerage that would flow into the village when already over stretched pumping stations receive this additional volume.

The explanation of how the village flooded in 2007 describes the problems we face. Locating 40 additional houses on Ridgeway Farm will only exacerbate the flood risk.

Whilst reviewing the current development of 10 houses on Ridgeway Farm I became more aware of actions that developers can take to provide on-site storage of run-off water. The heavy consistent rain fall in in the days leading up to the flooding in July 2007 would most probably have filled any on-site water storage to capacity. This would mean that the run off from guttering, roads and hard course on the properties will flow unimpeded into the surrounding water courses.

Appendix Q - Schedule of representations

	<p>I believe that should the development proceed it could lead to the loss of approximately a dozen homes surrounding Swill Brook and increased flood damage to a further 20 or so homes in The Butts and The Street.</p> <p>Insurance companies already recognise that many homes in the village are a high flood risk. If the destruction witnessed in 2007 becomes more common, homes affected around Swill Brook will be uninsurable and unsaleable. Eventually they will be abandoned. The impact on the aesthetics of the village will be considerable. The financial losses will be measured in millions of pounds. The impact on residents affected is immeasurable.</p> <p>Liability for Damages</p> <p>Many persons familiar with the Village understand the effect this development will have on flood risk.</p> <p>The land owners who are offering to make the land available for a residential development must also fully understand that should this proceed, they will be effectively destroying the viability of around a dozen existing homes. As long standing parishioners they will also be aware that scores of other homes that were marginally affected by flooding in 2007 will now be at a higher risk.</p> <p>The developer of the ten homes being constructed on Ridgeway Farm acknowledged the flood risk in the village consultation process. They must also be aware that the development now being proposed cannot use the defence of being built on a site with hard standing already in place. As professionals in residential development they will understand, or be expected to understand, that building on this site will lead to increased incidence and severity of flooding on the village.</p> <p>Finally, given the concerns I have raised, and which I expect others will have raised, the Council and its planning officers will also be aware of the impact.</p> <p>I think it is a reasonable moral expectation that each of the parties should consider the effect of their actions on others and simply withdraw the plan.</p> <p>However, when a party is aware that an action is likely to lead to damage to another person or property a legal liability is created.</p> <p>If this development was to proceed, I wonder what action will be considered when the village next floods? When we have a repeat of the rains of 2007 I would expect residents who know their homes are about to flood will be collecting real time evidence of how the events unfold. I can envisage experts being brought in to study this evidence and conclude that the flooding was caused, or the severity of the flooding was exacerbated, by the run off of water from the proposed Ridgeway development.</p> <p>There will be a body of evidence showing that the risk of damage was known to the parties involved in planning and approving the development. It would seem to me a legal action for damages for losses suffered is likely to be raised. Could the land owner, developer, council and its officers all be considered liable for losses that could be pursued in the courts?</p> <p>Conclusion</p> <p>From my perspective, any development proposal in Crudwell that puts at risk the viability of existing homes, or increases the risk of damage to existing homes, should quite simply be rejected.</p> <p>This Residential Development Proposal on Ridgeway Farm, Crudwell risks the eventual abandonment of around a dozen existing homes and increased flood damage risk to perhaps 20 other homes. Hence, it must be rejected.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I write to register my serious concerns regarding the proposal to allow the development of an additional 40 houses on long established farm land at Ridgeway Farn, Crudwell.</p> <p>Over the past 15 years I have been supportive of sustained development within the village. This includes the current development of 10 houses on the Ridgeway Farm site adjoining Tetbury Lane which I think was originally proposed in 2014.</p> <p>Proposed Development of a further 40 houses on Ridgeway Farm</p> <p>Over many hundreds of years the village has gradually grown to approximately 250 dwellings.</p> <p>I understand that the current proposal for 40 new houses on Ridgeway Farm forms part of a master plan to perhaps develop 150 houses on the site. Such a development in a short time frame will alter the fabric of the village and challenge its infrastructure. I know that many Villagers will be commenting in detail on these concerns, many of which I share.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Ridgeway Farm Development / Crudwell Parish Neighbourhood Plan</p> <p>Please take this letter as a formal objection to the allocation of a further 40 dwellings at Ridgeway Farm, Crudwell, currently contained within the Wiltshire 'draft' Housing Site Allocation Plan under consultation. As a parish resident for over 20 years, I strongly objected to the planning proposal on the site for 30 dwellings in 2014. Permission was subsequently for 10 units - presently underway and already causing significant irritation noise-wise; traffic-wise and general nuisance-wise.</p> <p>I find it thoroughly reprehensible that a plan now seems to be in the offing to exceed the original declined development application by a significant margin. How can this be? The original concerns and objections have not been ameliorated...they are still, relevant and thus still apply! The draft plan defies any logic and is a major threat to this village and its residents.</p> <p>Apparently, the allocation against Crudwell has arisen because we do not have a so-called 'Neighbourhood Plan'? The importance of this administrative device has not been made clear to the villagers although I do understand that one has been in the pipeline for several years and that the Wiltshire planning department was involved in the early work. I feel that the whole village has been let down by you at 'Head Office'; our local councillor Mr Berry and naturally our Parish Councillors. Perhaps this was a deliberate strategy to pave the way for other parishes to get their plans sorted leaving Crudwell - probably the most outlying of parishes given our closeness to the Gloucestershire border – as the dumping ground/pressure valve release for the county's perceived housing need? In short, the previous objections remain entirely relevant. Increasing the village size by 20-25% is ludicrous and will only exacerbate the issues originally raised regarding infrastructure; road usage (the roads are in a parlous state already and it is plainly stupid to expect that they will cope with more traffic); road safety; general environmental impact and specific flooding issues; pressure on the school Should it be identified that there is a pressing need for further housing within Crudwell Parish, there are several sites which would be more suitable than Ridgeway Farm – the majority of which would be to the East of the A429 or to the South and West of Rommel Lane. Alternatively, leave Crudwell alone and focus on Purton and Lyneham (say) where need seems more logically obvious. No doubt we will get little support if and when the development leads to flooding and loss of property; surely it is only fair and reasonable that any growth in Crudwell is shaped by the local residents who will have to suffer the outcomes in the years following the developer's profits being taken as they sail off into the sunset. I await the outcome of the consultation with great interest and trust that an element of sense will prevail with the 'draft allocation' not fructifying!</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There appears to have been a lack of consultation with the community in identifying suitable areas, and justification as to why this has been chosen as a suitable area. I recognise the need for additional housing, but not at the cost of protecting village and rural boundaries. In accordance with NPPF para 155, allow residents to engage with the process to identify and select suitable sites. Therefore withdraw the original land (East of Farrels field) until such a time as this has been done. Allowing the development to progress in this location will effectively join Yatton Keynell to neighbouring Tiddlywink and pave the way for further expansive developments.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing as a resident of Tetbury Lane Crudwell to express my concerns at the proposed plan for the development of an additional 40 houses in Crudwell.</p> <p>I am disturbed by the decision to allocate an excessive number of houses to the Crudwell area specifically and the Malmesbury area more generally. There is no justification by Wiltshire Council or government more nationally that this area is one of strategic priority. I am aware that the government recently released a consultation on the "priority" registration areas for housing development; Wiltshire did not feature on that list. Indeed the risk at the moment on the current projections of completed developments in the Crudwell and Malmesbury area, does point towards an oversupply of some 2000 homes when deliverable commitments are taken into account and without considering the impact of windfall developments.</p> <p>The strategic need for this level of development within Crudwell is unproven.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2964</a>	<b>Consultee</b> Mr Ian Churchill  <b>Person ID:</b> 1135864	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Also the plan shows that, unlike other villages, there has been absolutely no consideration of alternate development locations within Crudwell. This location has been driven by a developer with no consultation with the community. Furthermore it goes against the planning department's findings last year that 29 houses at this location was inappropriate – and now a total of over 50 is proposed. The community is in the process of drawing up a local plan and this development should be shelved until this plan has been completed. The only justification so far proposed in the consultation is at 5.111-2 where it is said that the proposed development "would expand the village by a relatively significant extent but would deliver substantial benefits". There appears to be almost no justification for this conclusion in the remainder of the paragraphs, save for the suggestion that a development would support the extension of the local school. Yet as the Local Authority Governor for the school I can categorically state that the school, nor myself as LA liaison, have been consulted as to whether this is to benefit the school. The school's strategic plan does not envisage any increase as there is no teaching space available and more importantly the Victorian school does not have enough communal space for any increase in a site restricted in its development within a conservation area. If any consultation had taken place it would have highlighted that Police are already involved due to traffic-safety issues because of the number of cars coming to the school. This proposed site has no pedestrian access to the school (Tetbury Lane has no footpath to the main road) which will only exacerbate this issue.</p> <p>This is a plan developed without the appropriate consultation – particularly with the school who are ironically being used as the justification! Furthermore to approve a development without having regard to the housing and development plan being prepared by the local community could amount to ignoring very relevant considerations in the decision-making process by the relevant decision-making body. To ignore or fail to take into account the views of the local community, particularly before they have had a view to be properly formalised into a plan which could have a meaningful contribution towards the process which the Council is to determine, would be to deprive the council of vital information. Local views on the impact that a development of this nature would have on flooding, road safety, the education at the local primary school and the community more generally can only improve the judgement of the decision-makers in this process. To fail to wait for such a community plan would also be a kick in the teeth to a local community encouraged by the talk by national and local government of taking a more engaged approach to the views of local communities. Indeed I would go so far as to suggest that no reasonable decision maker would take a decision on development before considering the results of community opinion on future strategic developments in the area. A failure to wait and consider such a plan could exceed the generous ambit of discretion permitted to the decision-maker in this process.</p> <p>It is for those reasons that I would urge the council to consider a pause in the present process to enable any developer to better justify a development in the Crudwell area as one of "priority". Further, or in the alternative it would allow the council the opportunity to be better informed by the views of local people and engage with them in taking forward any development in the most sustainable way.</p>

<b>Comment ID:</b>	<a href="#">2966</a>	<b>Consultee</b> Barratt David Wilson Homes Barratt David Wilson Homes	<b>Agent</b> Mr Cliff Lane Savills Planning	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1135954	<b>Person ID:</b> 556489	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3, para 5.125, table 5.4		Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Policy H3 in the Draft Plan allocates sites for housing development in the South Wiltshire Housing Market Area. Figure 5.4 shows that only sites in the Salisbury and Amesbury Community Areas are being allocated. This site is in the Tisbury Community Area. It is just in Wiltshire, with land to the west and south in North Dorset. (See plan)</p> <p>Land beyond the western boundary is the Wincombe Business Park and land to the south received planning permission from North Dorset District Council on 8th June 2016 for 191 dwellings. (see plan)</p> <p>Land east of Littledown (or sometimes referred to as Land east of Wincombe Business Park) Shaftesbury was submitted as a SHLAA site in 2014 to Wiltshire Council (See attached).</p> <p>On 30 March 2015 representations were made to the Informal Consultation on initial site options for this Housing Allocations DPD (See attached). Many of the points made in that representation still apply today</p> <p>A further SHLAA rep was submitted in 2016 (Ref 3446). This time it was shown as part of a larger development taking access from the A350 to the north west. That larger proposal has not gone away and is still being worked up as a longer term proposal. This smaller site is submitted now as it can be delivered in the timeframe of this Housing Site Allocations Plan.</p> <p>The site currently submitted is 7.26 ha in area and is one of the component land parcels making up the 2016 SHLAA submission. Whilst a complete land parcel is submitted, in terms of actual housing development, only a triangular part is potentially developable, as shown on earlier plans, because of the Shaftesbury bypass, which has a land reservation in North Dorset up to the boundary with Wiltshire. The developable area has a potential capacity of 50 – 75 dwellings, as stated previously. The whole land parcel is submitted for allocation to allow flexibility regarding access. Housing development could be accessed from the existing Barratt Homes site to the south, or could also be accessed from a wider allocation of the adjoining land. North Dorset District Council has confirmed Barratt Homes could access more units from the access they already have approval for to the south.</p> <p>Whilst Barratt Homes has planning permission for the land to the south, a start on site has not been made and the current layout could be amended to allow access into the site the subject of these reps.</p> <p>Unfortunately, the Topic Paper covering the Tisbury Community Area seems to completely ignore the fact that this Community Area abuts the market town of Shaftesbury in North Dorset. This is despite the representations previously made by Savills imploring Wiltshire and North Dorset Councils to work together. This omission is an obvious failure in respect of the ‘Duty to Cooperate’ set out in Localism Act 2011’.</p> <p>The Topic Paper divides the Community Area into two - Tisbury and Tisbury CA Remainder. It identifies that 149 dwellings need to be found in Remainder area. Stage 2a of the process gives further consideration of potential sites for assessment. Only SHLAA sites in the immediate vicinity of settlements are considered through the Stage 2a strategic assessment.</p> <p>Large villages, Local Service Centres, Market Towns or Principal Settlements are all identified as areas for consideration for further development. Only large villages are identified in the remainder area however, but no sites in their vicinity are identified as worthy as being taken forward. The conclusion of the report is that no housing sites will be identified for allocation in the Remainder Area.</p>				

Appendix Q - Schedule of representations

	<p>Despite land east of Littledown being submitted as part of previous SHLAA exercises and representations being made to the Initial Consultation on this Allocations Plan, no consideration seems have taken place of this site adjacent to the market town of Shaftesbury where reference is also made to it in North Dorset's Local Plan 2016. This is obviously because the housing needs of Shaftesbury, immediately adjacent to the Wiltshire boundary, have not been taken into account.</p> <p>Planners at North Dorset are also aware of this site and its ability to meet Shaftesbury's housing needs. It was discussed at the Examination into the North Dorset Local Plan in 2015 and meetings subsequently.</p> <p>Paragraph 99 of the Inspector's report for the North District Local in 2015 stated that:</p> <p>Bearing in mind the proposed extension to the plan period , it is also important that the longer-term role of Shaftesbury, particularly in terms of housing provision, is acknowledged. One opportunity may lie on land within the area of Wiltshire Council which is adjacent to the allocation to the south east of Wincombe Business Park. The Council proposes to introduce a reference to this potential future direction of growth. In the circumstances I consider it appropriate that LP1 provides an indication of the Council's future aspirations for the locality. MM16, which encompasses the above points, is recommended accordingly.</p> <p>The Local Plan was modified accordingly.</p> <p>The site is ideal for allocation and with access from the existing housing site to the south, the site could be delivered in the timeframe of this Plan and could provide some of the housing numbers for Tisbury CA remainder area which currently have not been achieved and also meet the housing needs of Shaftesbury.</p> <p>Under the Duty to Cooperate Wiltshire Council and North Dorset District Council should engage to plan for the housing needs of both Councils. Savills has made representations on this matter for the last few years and the matter is highlighted in the North Dorset Local Plan. Unfortunately, to date Wiltshire Council seem to have ignored the issue. This needs rectifying and meaningful discussions are needed between the two councils. This having occurred, this site should be allocated in the Housing Allocations Plan for up to 75 dwellings, taking up some of the Tisbury Remainder housing requirement. This will also help address housing needs in North Dorset where that Council has recently admitted it does not have a five year housing land supply, as required by government guidance.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4738835 / 4738833 / 4738837 / 4738836 / 4738838</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To deal with any questions from the Inspector and to emphasise the lack of meaningful cooperation between Wiltshire and North Dorset to date and therefore failure under the Duty to Cooperate.</p>

<b>Comment ID:</b>	<a href="#">2971</a>	<b>Consultee</b> Miss Katherine Burt Sustainable Places - Planning Specialist	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Environment Agency (Wessex Area)  <b>Person ID:</b> 395940		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Proposed allocations within hampshire Avon catchment and associated evidence base		Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>We consider the plan to be unsound because there is insufficient certainty and information provided in the evidence documents and plan relating to nutrient management issues and the proposed growth given in the Wiltshire Housing Site Allocations Plan. There is therefore uncertainty on the potential impact to the designated Hampshire Avon Special Area of Conservation (SAC), which is located in the vicinity of some of the proposed allocations.</p> <p>The River Avon NMP has been produced to assess the impact of forecast growth and other pressures in order to achieve compliance with the Habitats Directive and facilitate development without affecting the integrity of the River Avon SAC. This is to help reduce and manage phosphorus levels in the Hampshire Avon Special Area of Conservation (SAC), in accordance with international obligations, principally in the EU Habitats, Wild Birds and Water Framework Directives. It also aids development and change in the Hampshire Avon catchment by ensuring the amount of phosphorus in the river does not increase and conflict with the conservation objectives for the SAC.</p> <p>At the current time it is not clear whether the proposed Wiltshire Housing Site Allocations Plan development is within the growth forecast considered as part of the River Avon NMP. If evidence shows that growth will exceed the NMP forecast targets, then specific mitigation will need to be identified as part of the Allocations Plan unless risk assessment confirms that this is not required. Therefore the deliverability of some of the proposed allocations is not certain.</p> <p>In order to make the plan sound Wiltshire Council should adequately demonstrate that proposed development will connect to sewage treatment works with Phosphorus stripping and that the development is within the growth forecast considered as part of the Hampshire Avon Nutrient Management Plan (NMP). If evidence shows that growth will exceed the NMP forecast targets, then specific mitigation will need to be identified as part of the Allocations Plan. Alternatively a risk assessment would need to be undertaken and demonstrate why this mitigation may not be required. At the current time it is not clear if this is the case and Wiltshire Council should present this data to assist in auditing of the plan.</p> <p>Stronger linkages should be given in the Wiltshire Housing Allocations Plan to Annex 2 of the Hampshire Avon NMP, which is currently being drafted by Wiltshire Council in liaison with the Environment Agency and Natural England. Annex 2 should provide more detail of any required mitigation, including consideration of any required flexibility for future scenarios over the lifetime of the Allocations Plan. This flexibility should include any potential outcomes from the review of the NMP. It would be recommended that a policy(s) is included in the Allocations Plan to ensure development addresses nutrients issues, such as a need to implement any requirements that may be highlighted in Annex 2 of the NMP.</p> <p>Habitats Regulations Assessment</p> <p>From reviewing the Wiltshire Housing Site Allocations Plan and the associated Habitats Regulation Assessments (HRA) our comments relating to nutrient management are as follow:</p> <p>The Habitats Regulations Assessment may need to be reviewed following completion of Environment Agency and Natural England consent order investigations in March 2019.</p>			

Appendix Q - Schedule of representations

	<p>If offsetting of Codford and or Heytesbury Development Phosphorus loading cannot be achieved or any development connected to sewage treatment works (STW) with Phosphorus removal, Wiltshire Council's proposal to remove these sites from the development plan would meet criteria set out in the Hampshire Avon Nutrient Management Plan (NMP).</p> <p>The Environment Agency would not object from a nutrient management point of view to development that take place which will connect to STW with P stripping and where this development is within the growth forecast considered as part of the NMP and where the STW has sufficient headroom to accept such growth. It is not clear if this is the case and Wiltshire should present this data to assist in auditing of the plan.</p> <p>As outlined in "conclusions on the integrity test" (page 59 onwards of the HRA) Wiltshire Council's Offsetting P loading from development (NMP Annex 2) will be required to identify if and where Wiltshire Site Allocations Plan growth will exceed the growth considered within the Avon NMP and or existing STW permit headroom. Where this occurs Wiltshire Council will need to assess the impact this may have on achieving Habitats Directive objectives and offset any additional P load (above that considered acceptable within the NMP) may be required.</p> <p>We understand any increased phosphorus loading resulting from Salisbury Plain Army re-basing will be offset through catchment management across the Hampshire Avon catchment. This will need to continue indefinitely or until permanent measures are put in place. The growth forecast from the MoD should however be included within Wiltshire Council's risk assessment to be considered as part of River Avon NMP Annex 2 calculations.</p> <p>Water Resources</p> <p>Wessex Water Supply Grid (being installed by Wessex Water in 2018), will help to reduce the impact of water supplies to development within the Hampshire Avon. Wessex Water shall need to confirm they can supply such water within permitted headroom and without causing unfavourable condition to Habitats Directive sites.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>If our issues raised above cannot be addressed prior to the Examination, we would wish to attend any relevant examination Hearings that may be set up to discuss these issues.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">2972</a>	<b>Consultee</b> Miss Katherine Burt Sustainable Places - Planning Specialist	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Environment Agency (Wessex Area)  <b>Person ID:</b> 395940		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		All sites			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		With regard to other environmental issues, we are satisfied with the plan provided the following are addressed at each of the sites: Built development would only be in Flood Zone 1. If any sites have Flood Zone 2 or 3 within the boundary, then a Sequential Approach must be taken, to ensure any development is only in FZ1. This must take into the potential effects of climate change. For sites in groundwater Source Protection Zone 1 (SPZ1) – there must be no discharges to ground other than clean surface water.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		All sites			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Groundwater Protection A number of the allocations are within source protection zones, some of the locations are clearly within the inner, SPZ1, zones. There are rarely any absolute constraints to housing development concerning SPZs. However there are constraints regarding the disposal of both surface water and sewage with SPZs. It is therefore important that Wiltshire Council identify where SPZs are and their status and additionally that they review the Environment Agency's groundwater protection policy and ensure that all of the proposed activities associated with these sites, i.e. disposal of surface water are compliant with this policy, which can be found here: <a href="https://www.gov.uk/government/collections/groundwater-protection">https://www.gov.uk/government/collections/groundwater-protection</a>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The possibility that the site allocations previous uses could have given rise to contamination should not be discounted at this stage. It is therefore important that any planning application is supported by an appropriate contaminated land desk study where sites are other than 'green field'. Desk studies should identify any potential risks, this will enable the Environment Agency and Wiltshire Council's own contaminated land experts to recommend appropriate conditions.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Biodiversity On reviewing the boundary changes to those sites, it would seem the changes are mostly small with many boundaries being pulled back from watercourses which is beneficial. One settlement that does seem to have significantly changed is that of Westbury where a new area has been included to the north-west of the town. This area has the River Biss along its western edge and we would advise any development is kept at least 8m from the watercourse corridor to preserve its function as a wildlife route.

		Person ID: 395940	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.9 Boreham Road, Warminster			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Provided sequential approach within the site is applied, and development only takes place in FZ 1 then we have no objection to this allocation. This site has been the subject of a couple of recent planning applications. We have not objected to the proposals subject to the submitted site layout plans ensuring no development in Flood Zones 3 &amp; 2 (site specific sequential approach) and provision of an appropriate clear buffer strip between top of bank of main river and the ordinary watercourse. Usual other conditions would also apply e.g. minimum finished floor level (FFL). Wiltshire Council as Lead Local Flood Authority (LLFA) should comment on surface water drainage. Measures must be put in place to ensure River Wylde SAC and SSSI is not impacted by the development. An appropriate natural buffer zone should be incorporated into the design. All development projects should seek to enhance the natural and local environment. EA constraints: Edges of site in Flood Zone 2 and 3, including adjacent access roads. River Avon SAC, SSSI runs adjacent to the site.</p>

<p><b>Comment ID:</b></p>	<p><a href="#">3000</a></p>	<p><b>Consultee</b> Minton Group Ltd</p> <p><b>Person ID:</b> 1136804</p>	<p><b>Agent</b> Ms Emily Penkett Hunter Page Planning</p> <p><b>Person ID:</b> 1138276</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>		<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>	<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>		<p>Omission site - Land adjacent to Waitrose, Malmesbury</p>			
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>		<p>We write to you to make representation on behalf of our client, Minton Group Ltd, regarding the Wiltshire Housing Site Allocations Plan: Pre-submission draft plan. This submission relates specifically to land at Malmesbury adjoining Waitrose to the west of the A429. A site location plan is attached for your reference which sets out the site and its developable area (see Appendix 1). [see attached]</p> <p>At present, the site to the west of the A429 lies adjacent to the existing settlement boundary to the north and west.</p> <p>The site and surroundings</p> <p>To the north, the site is contained by the River Avon with residential development beyond, defining the natural boundary of the site. To the east lies the A429 a key transport route running from Chippenham to Coventry and beyond that agricultural land. The western boundary of the site is also defined by the River Avon with further residential development beyond. To the south lies the Malmesbury Bypass Waitrose store which was completed in 2014. By virtue of the site's enclosure by development to the north, south and west, but also its distinct physical separation from the agricultural land to the east by the A429, the site is considered to be well enclosed and more in character with the land within the settlement boundary, rather than open landscape to the east.</p> <p>Constraints</p> <p>The site is not subject to any environmental or landscape designations. Due to the sites shared boundaries with the River Avon, as identified by the Environment Agency's Flood data mapping part of the site falls into flood zone 3. However, this area has been excluded from the developable area. It also lies within the Malmesbury Conservation Area but there are no listed buildings within the immediate vicinity of the site. The developable area of our client's site is therefore free from constraints and barriers to development.</p> <p>Sustainability</p> <p>Policy CP1 of the adopted Core Strategy identifies four tiers of settlements namely Principle Settlements, Market Towns, Local Service Centres and Large and Small Villages. Malmesbury is identified as a Market Town (second tier settlement) in the settlement hierarchy. The Policy highlights that Market Towns are settlements that have the ability to support sustainable patterns of living in Wiltshire through their current levels of facilities, services and employment opportunities. 'Market Towns have the potential for significant development that will increase the jobs and homes in each town in order to help sustain and where necessary enhance their services and facilities and promote better levels of self-containment and viable sustainable communities.' Malmesbury already holds a wide range of community facilities. As such, there is less reliance upon the need to travel to meet the day to day needs of residents, other than for some employment purposes.</p> <p>The high street is within walking distance of the site which contains local amenities such as a food store, pharmacy, several public houses, bank and hairdressers. There is also a primary school, primary care centre and a range of recreational and leisure facilities within close proximity to the site. Bus stops are also located within walking distance of the site offering frequent services within the local area and to surrounding settlements such as Swindon, Bath and Cirencester. As such, the site is considered to be a sustainable site that could link well to other sites within the settlement.</p>			

Appendix Q - Schedule of representations

	<p><b>Status of the Land</b>  The National Planning Policy Framework states that for sites to be considered 'deliverable' means they will be available now, in a suitable location now and achievable within five years and viable, as per footnote 11 of paragraph 47.</p> <p><b>Available</b>  The site is in single ownership, and is being promoted by the landowner. There are no legal or ownership problems which could limit development. It can, therefore, be considered to be available now.</p> <p><b>Suitable</b>  The site is suitably and sustainably located for development with good accessibility to local services, as identified in the above Sustainability section of this document. There are no physical constraints that would prevent or delay development coming forward on the developable area of the site.</p> <p>The area immediately adjacent to the south of the site hosts a Waitrose food store comprising commercial/retail space with residential development located further beyond this. As such, the site is clearly located in a sustainable location suitable for employment led development given the surrounding compatible land uses.</p> <p><b>Achievable</b>  This site is located within a location that developers find attractive to bring forward for development given that Malmesbury is a sustainable Market Town.</p> <p><b>Conclusion</b>  Our client's site is located in a sustainable location, there are no constraints on the developable area of the site and it would logically follow on from the existing development surrounding the site. In conclusion, it is considered that there is no principle reason for the land adjacent to the Waitrose Site to be omitted from the revised settlement boundary as it would provide an appropriate and defensible boundary to the urban edge in this location.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4769575</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3001</a>	<b>Consultee</b> Minton Group Ltd  <b>Person ID:</b> 1136804	<b>Agent</b> Ms Emily Penkett Hunter Page Planning  <b>Person ID:</b> 1138276	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.33 Malmesbury SBR			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Allocations Plan includes a review of the Settlement Boundaries within the area and the Settlement Boundary in Malmesbury has been amended to include the Waitrose land to the south. However, it is considered that the site adjoining Waitrose should also be included within the Settlement Boundary in order to present a more logical boundary (see Appendix 2). [see attached]. This is considered further below.</p> <p>Revision of boundary at adjacent Waitrose Site</p> <p>I note specifically that there is a proposed settlement boundary change to include the adjacent Waitrose Site at land to the rear of Avon Mills. This is because it is a built planning permission for employment use which is physically/functionally related to the settlement. However, this results in an awkward and illogical settlement boundary. The subject site which is adjacent to the Waitrose site is also well related to the settlement and its inclusion within the settlement boundary would represent the logical "rounding off" to this area of the settlement. It is of note that the Waitrose site is of little discernible difference in terms of landscape character or appearance when compared to the adjacent subject site. Furthermore, in terms of historic sensitivity, the Waitrose site it is in closer proximity to the Grade II listed St John's Bridge and Avon Mills, whereas the adjacent subject site has no listed buildings within its immediate vicinity. Furthermore, our client's site is visually and functionally contained by the River Avon to the north and west, built development to the south and the A429 to the east. Looking at the line of the proposed settlement boundary at the Waitrose site, it is concluded it should also be extended for the adjacent subject site. This would create a logical extension to the urban edge within the defined settlement boundary.</p> <p>Conclusion                  Our client's site is located in a sustainable location, there are no constraints on the developable area of the site and it would logically follow on from the existing development surrounding the site. In conclusion, it is considered that there is no principle reason for the land adjacent to the Waitrose Site to be omitted from the revised settlement boundary as it would provide an appropriate and defensible boundary to the urban edge in this location.</p>

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">3002</a></p>	<p><b>Consultee</b> Bovis Homes Bovis Homes</p> <p><b>Person ID:</b> 998345</p>	<p><b>Agent</b> Jon Waite Senior Planner</p> <p>Carter Jonas LLP incorporating Kemp and Kemp</p> <p><b>Person ID:</b> 1136047</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>					
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>1.1. This representation is made in response to the Wiltshire Housing Site Allocations Plan - Pre-submission Draft Plan (“the Draft Plan”) consultation and is submitted on behalf of our client Bovis Homes (“Bovis”). Bovis have an interest in Land at Swan Road, Pewsey.</p> <p>1.2. Bovis have a number of concerns with the Draft Plan. These are set out below.</p> <p>1.3. Appendix1 of this representation is a ‘Vision Document’ prepared for Bovis and provides details on how the site could be comprehensively developed for a sustainable new neighbourhood at Pewsey.</p> <p>1.4. On a separate but related matter, the majority of the site appears in the Council’s Strategic Housing Land Availability Assessment (SHLAA - site references 1072 and 1083). Bovis would respectfully ask the Council to accept this ‘Vision Document’ to update its SHLAA tables.</p> <p>2. Background</p> <p>2.1. The Wiltshire Core Strategy was adopted in January 2015. Core Policy 1 sets out the district’s settlement strategy and identifies Pewsey as a ‘Local Service Centre’ meaning it is one of the more sustainable settlements in the district. The Core Strategy splits Wiltshire into a number of ‘Community Areas’. The settlement of Pewsey sits within the Pewsey Community Area.</p> <p>3. The Wiltshire Housing Site Allocation Plan</p> <p>3.1. As stated above, the Core Strategy (and consequently this Draft Plan) covers the period 2006 – 2026. Paragraph 47 of the National Planning Policy Framework states that to boost significantly the supply of housing, local planning authorities should: “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;”</p> <p>3.2. According to the Council’s Local Development Scheme, the Draft Plan is not expected to be adopted until September 2018. At best, this will mean a deliverable housing supply of 7.5 years. This is some way off the NPPF requirement identified above and does not help ‘boost significantly the supply of housing’. It is inevitable that this will be of concern to the Inspector examining the Draft Plan.</p> <p>3.3. Bovis also note that in finding the Core Strategy sound, the Inspector for the strategy’s Examination in Public was clear that his decision was based on the premise that there would be an early review of the plan. Paragraph 20 of the Inspector’s report states: “Indeed, the Council has clarified that it will be undertaking a planned early review of the core strategy to ensure ‘the development provision looks to an appropriately long term end date’ which will be supported by an updated Strategic Housing Market Assessment (SHMA).”</p> <p>3.4. Furthermore, paragraph 81 of the Inspector’s report states that: “Indeed, I am particularly mindful that the Council intends to produce a new HMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes. Consequently I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more.”</p> <p>3.5. Additionally, the Inspector referenced the need for flexibility in the Core Strategy to deliver more homes and the Draft Plan does not provide this; it offers a ‘do minimum’ approach. Bovis consider that housing targets should be treated as a minimum and planned to be</p>				

Appendix Q - Schedule of representations

	<p>exceeded. As such, Bovis suggest that as a minimum there are a suite of 'reserve sites' allocated within each Community Area to address any shortfall in housing delivery. Land at Swan Road, Pewsey (see below) could be a suitable reserve allocation site.</p> <p>3.6. To ensure much needed housing is provided, all Community Areas within the District should include allocated and reserve sites, in appropriate sustainable locations. It would be incorrect to merely assume that a whole area (such as the Pewsey Community Area) will need no further growth.</p> <p>3.7. Notwithstanding the points above, the Council carried out a consultation on the scope of its partial review of the Wiltshire Core Strategy during April / May 2015. With reference to the partial review, the Council's website states:          "We anticipate that a draft policy document showing changes to the WCS will be published for consultation in July 2015 together with proposed amendments to the policies map (pre-submission consultation). Following the pre- submission consultation, we anticipate that the partial review will be submitted for examination in December 2015."</p> <p>3.8. This timetable has not come to fruition. In fact the Council appears to have carried out very little, if any, further work on this important partial review of its Core Strategy. The NPPF is clear at paragraph 47 that local authorities should be planning to meet the full, objectively assessed needs for market and affordable housing in the housing market area. The Council is not currently fulfilling this duty.</p> <p>3.9. It is clear from the above that the Council is pressing ahead with a Draft Plan that is based on old and outdated housing targets. Moreover, considering the Inspector's report quoted above, the Council is not working to the Inspector's agreed and expected time frame.</p> <p>3.10. It is Bovis' view therefore that this Draft Plan should in fact be a joint Core Strategy Partial Review and Housing Site Allocations Plan. This will ensure that:          A supply of specific, developable sites is provided for years 6-10 and for years 11-15.          It is based on an up-to-date SHMA identifying a true, objectively assessed, housing need.          The Council is working closer to the timeframe identified by the Inspector in implementing the findings of the new SHMA.</p> <p>3.11. As a point of note, it is Bovis' understanding that a Joint SHMA has been undertaken, between Wiltshire and Swindon and was concluded earlier this year. However it has not, to Bovis' knowledge, ever been published, or the results made publically available. In the interests of openness and transparency, the Joint SHMA results should be published and taken into consideration for the joint Plan's strategy for growth and allocations.</p> <p>3.12. If the Council finds it does require additional allocations for this joint Plan, Bovis would ask it to consider further its site; Land at Swan Road, Pewsey.</p> <p>3.13. Bovis are aware that there is a Pewsey Neighbourhood Plan in place but believe that a strategic allocation of this nature should appear in the Council's Local Plan.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4737862</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">3003</a></p>	<p><b>Consultee</b> Bovis Homes Bovis Homes</p> <p><b>Person ID:</b> 998345</p>	<p><b>Agent</b> Jon Waite Senior Planner</p> <p>Carter Jonas LLP incorporating Kemp and Kemp</p> <p><b>Person ID:</b> 1136047</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Policy</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>			
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>Settlement boundary review</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>4. Proposed Settlement Boundary</p> <p>4.1. As well as identifying housing allocations, the draft Plan has amended a number of settlement boundaries. Objective 1 of the draft Plan is: “To ensure there is a clear definition to the extent of the built up areas at Principal Settlements, Market Towns, Local Service Centres and Large Villages”</p> <p>4.2. The Council has also published a separate ‘Topic Paper: Settlement Boundary Review Methodology’. Table 8.1 of the Topic Paper sets out areas which have been included and excluded in the new boundaries: Included – “Built and commenced residential and community facilities development such as religious buildings schools and community halls, that is physically related to the settlement. Built and commenced employment development in principal settlements, market towns and local service centres that is physically related to the settlement. The curtilage of a property that relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in terms of scale and location Recreational or amenity space at the edge of a settlement that relates more closely to the built environment” Excluded Employment development, farm buildings and farmyards, at the edge of large villages. Isolated development that is physically detached from the settlement (including farm buildings or agricultural buildings and renewable energy installations). The extended curtilage of a property that relates more closely to the open countryside (e.g. a field or paddock) or has the capacity to substantially extend the built form of the settlement in terms of scale and location. Recreational or amenity space at the edge of the settlement that relates more closely to the open countryside. All types of unimplemented planning permission. Site allocations.</p> <p>4.3. Bovis note that there is no new proposed boundary for Pewsey. This is considered a short-sighted and damaging strategy for the Council.</p> <p>4.4. Through the partial review of the Core Strategy (based on a more realistic housing need), it is likely that further housing sites will be required by the Council. As such, it should be taking this opportunity to provide further directions for growth in sustainable locations, not reduce its options.</p>				

Appendix Q - Schedule of representations

	4.5 It is Bovis' view that the settlement boundary review should form part of a combined Core Strategy Partial Review and Housing Site Allocations Plan with housing allocation sites included in the revised boundaries. This will help ensure the delivery of the allocation and offer greater certainty to communities.

<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>					
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>5. Land at Swan Road, Pewsey</p> <p>5.1. The site extends to approximately 29.05 hectares (ha) and is currently in agricultural use. It is located at the south western fringe of Pewsey, approximately 800m from the village centre.</p> <p>5.2. It is located within the North Wessex Downs Area of Outstanding Natural Beauty (AONB). However, the Council's Strategic Housing Land Availability Assessment (SHLAA) which assesses the suitability, availability and deliverability of sites states that the site is 'suitable' for development. Furthermore, Bovis is committed to delivering a development, which minimises any impact on the landscape and provides appropriate mitigation measures such as planting where required. A comprehensive Landscape Assessment would form part of any planning application. There are no other national designations adjacent or within any part of the site, nor are there any designated heritage assets.</p> <p>5.3. The site is not covered by any international or national statutory designations. However, within 10km of the site, there are three internationally important designated sites, namely Pewsey Downs Special Area of Conservation (SAC), Salisbury Plain SAC/ SPA and the River Avon SAC. Any potential impacts on these sites would be considered through the planning application process and if required, mitigation would form part of the proposal.</p> <p>5.4. The attached 'Vision Document' explains that access to the site is proposed via primary access points onto Swan Road to the east of the site and the A345 Salisbury Road to the south of the site. A further access point could also be provided on Swan Road opposite the existing Esso petrol station.</p> <p>5.5. Swan Road is subject to a 30mph speed limit and Salisbury Road is subject to a 50mph speed limit. The 30mph speed limit could be extended past the site on Salisbury Road, if considered necessary. It is likely that a gateway feature or sequence of features would be provided on Salisbury Road, to provide an element of traffic calming and management.</p> <p>5.6. In terms of connectivity, there are existing local pedestrian routes which connect the site to the village centre and Pewsey Railway Station. Pedestrian or cycle links could be provided to the north towards the village centre to connect to existing public rights of way. It is proposed that the existing public right of way would be retained within the development and the possibility of improvements would be explored.</p> <p>5.7. There are also bus stops close to the site on Swan Road and Salisbury Road which offer regular peak and off -peak services to Swindon, Marlborough and Salisbury.</p> <p>6. Conclusion</p> <p>6.1. The housing targets in the Pre-submission Wiltshire Housing Site Allocation Plan are in-line with Council's adopted Core Strategy 2015. The draft Plan is expected to be adopted in September 2018 (some 3 years after the adoption of the Core Strategy).</p> <p>6.2. There is insufficient flexibility in the Draft Plan. If the Council is to continue its current strategy, it should be allocating reserve sites in all Community Areas to ensure housing delivery.</p>				

Appendix Q - Schedule of representations

	<p>6.3. The Inspector found the Core Strategy sound on the basis that there would be an early review of the strategy based on an up-to-date SHMA (the Inspector's Report referred to a new SHMA in early 2016). To date this has not happened.</p> <p>6.4. Bovis therefore believe that the Council should now be preparing a joint Core Strategy Partial Review and Housing Site Allocations Plan to ensure it has a 6-10 year and an 11-15 year housing supply (as required by the NPPF) based on an up-to-date need.</p> <p>6.5. The drawing of new settlement boundaries should form part of the joint Core Strategy Partial Review and Housing Site Allocations Plan process and include the new housing allocations. This will ensure their delivery and provide certainty for local communities.</p> <p>6.6 The attached 'Vision Document' provides details on how Land at Swan Road, Pewsey could be comprehensively developed for a sustainable new neighbourhood to the settlement.</p>

<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>					
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>1. Introduction</p> <p>1.1. This representation is made in response to the Wiltshire Housing Site Allocations Plan – Pre-submission Draft Plan (“the draft Plan”) consultation and is submitted on behalf of our client Leda Properties (“Leda”). Leda are the owners of Land at Marsh Farm, Royal Wootton Bassett (RWB). An outline of the site is shown at Appendix1 of this representation.</p> <p>1.2. Leda have a number of concerns with the draft Plan which are set out below.</p> <p>2. Background</p> <p>2.1. The Wiltshire Core Strategy was adopted in January 2015. Core Policy 1 sets out the district’s settlement strategy and identifies RWB as a market town meaning it is one of the more sustainable settlement in the district. The Core Strategy splits Wiltshire into a number of ‘Community Areas’. RWB sits within the Royal Wotton Bassett and Cricklade Community Area.</p> <p>2.2. Table 1 on page 48 of the Core Strategy shows an indicative requirement during the Core Strategy period (2006 – 2026) of 1,455 new dwellings for the Royal Wootton Bassett and Cricklade Community Area. These are to be delivered through the planning application process, Neighbourhood Plans and this draft Plan.</p> <p>3. The Wiltshire Housing Site Allocation Plan</p> <p>3.1. As stated above, the Core Strategy (and consequently this draft Plan) covers the period 2006 – 2026. Paragraph 47 of the National Planning Policy Framework states that to boost significantly the supply of housing, local planning authorities should: “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;”</p> <p>3.2. According to the Council’s Local Development Scheme, the draft Plan is not expected to be adopted until September 2018. At best, this will mean a deliverable housing supply of 7.5 years. This is some way from the NPPF requirement identified above and does not help ‘boost significantly the supply of housing’. It is inevitable that this will be of concern to the Inspector examining the draft Plan.</p> <p>3.3. Leda also note that in finding the Core Strategy sound, the Inspector for the plan’s Examination in Public was clear that his decision was based on the premise that there would be an early review of the plan. Paragraph 20 of the Inspector’s report states: “Indeed, the Council has clarified that it will be undertaking a planned early review of the core strategy to ensure ‘the development provision looks to an appropriately long term end date’ which will be supported by an updated Strategic Housing Market Assessment (SHMA).”</p> <p>3.4. Furthermore, paragraph 81 of the Inspector’s report states that: “Indeed, I am particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes. Consequently I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more.”</p>				

Appendix Q - Schedule of representations

	<p>3.5. The Council carried out a consultation on the scope of the partial review of Wiltshire Core Strategy during April / May 2015. With reference to the partial review, the Council’s website states:          “We anticipate that a draft policy document showing changes to the WCS will be published for consultation in July 2015 together with proposed amendments to the policies map (pre-submission consultation). Following the pre- submission consultation, we anticipate that the partial review will be submitted for examination in December 2015.”</p> <p>3.6. This timetable has not come to fruition. In fact the Council appears to have carried out very little, if any, further work on this important partial review of its Core Strategy. The NPPF is clear at paragraph 47 that local authorities should be planning to meet the full, objectively assessed needs for market and affordable housing in the housing market area. The Council is not currently fulfilling this duty.</p> <p>3.7. It is clear from the above that the Council is pressing ahead with a draft Plan that is based on old and outdated housing targets. Moreover, considering the Inspector’s report quoted above, the Council is not working to the Inspector’s agreed and expected time frame.</p> <p>3.8. It is Leda’s view therefore that this draft Plan should in fact be a joint Core Strategy Partial Review and Housing Site Allocations Plan. This will ensure that:          A supply of specific, developable sites is provided for years 6-10 and for years 11-15.          It is based on an up-to-date SHMA identifying a true, objectively assessed, housing need.          The Council is working closer to the timeframe identified by the Inspector in implementing the findings of the new SHMA.</p> <p>3.9. If the Council finds it does require additional allocations for this joint Plan, Leda would ask it to consider further its site Land at Marsh Farm, Royal Wootton Bassett.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">3006</a></p>	<p><b>Consultee</b> Nick Hardcastle Leda Properties Ltd</p> <p><b>Person ID:</b> 840643</p>	<p><b>Agent</b> Mr Steven Sensecall Partner</p> <p>Carter Jonas LLP incorporating Kemp and Kemp</p> <p><b>Person ID:</b> 646956</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Figure</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>			
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>A.44</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>1. Proposed Settlement Boundary</p> <p>1.1. As well as identifying housing allocations, the draft Plan has amended a number of settlement boundaries. Objective 1 of the draft Plan is: “To ensure there is a clear definition to the extent of the built up areas at Principal Settlements, Market Towns, Local Service Centres and Large Villages”</p> <p>1.2. The Council has also published a separate ‘Topic Paper: Settlement Boundary Review Methodology’. Table 8.1 of the Topic Paper sets out areas which have been included and excluded in the new boundaries: Included – “Built and commenced residential and community facilities development such as religious buildings schools and community halls, that is physically related to the settlement. Built and commenced employment development in principal settlements, market towns and local service centres that is physically related to the settlement. The curtilage of a property that relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in terms of scale and location Recreational or amenity space at the edge of a settlement that relates more closely to the built environment” Excluded Employment development, farm buildings and farmyards, at the edge of large villages. Isolated development that is physically detached from the settlement (including farm buildings or agricultural buildings and renewable energy installations). The extended curtilage of a property that relates more closely to the open countryside (e.g. a field or paddock) or has the capacity to substantially extend the built form of the settlement in terms of scale and location. Recreational or amenity space at the edge of the settlement that relates more closely to the open countryside. All types of unimplemented planning permission. Site allocations.</p> <p>1.3. Leda note the proposed new boundary for RWB on page 132 of the draft Plan. This new boundary is drawn even tighter to the existing built development and dramatically restricts any further growth of the town. Leda is confused by this approach and consider it a short-sighted and damaging strategy by the Council.</p>				

Appendix Q - Schedule of representations

	<p>1.4. Through the review of the Core Strategy (based on a more realistic housing need), it is likely that further housing sites will be required by the Council. As such, it should be taking this opportunity to provide further directions for growth in sustainable locations, not reduce its options.</p> <p>1.5. It is Leda's view that the settlement boundary review should form part of a combined Core Strategy Partial Review and Housing Site Allocations Plan with housing allocation sites included in the revised boundaries. This will help ensure the delivery of the allocation and offer greater certainty to communities.</p>

<p><b>Comment ID:</b></p>	<p><a href="#">3007</a></p>	<p><b>Consultee</b> Nick Hardcastle Leda Properties Ltd</p> <p><b>Person ID:</b> 840643</p>	<p><b>Agent</b> Mr Steven Sensecall Partner</p> <p>Carter Jonas LLP incorporating Kemp and Kemp</p> <p><b>Person ID:</b> 646956</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>					
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>5. Land at Marsh Farm, Royal Wootton Bassett.</p> <p>5.1. Land at Marsh Farm is located on the northern edge of the town at Coped Hall, lying to the west of the A3102 and north of the B4042, extending northwards to the M4 motorway. The land is presently in agricultural use and generally has gentle contours and a level topography. There is varied landscaping around the site's perimeter, with hedges demarcating the existing field pattern and some mature trees.</p> <p>5.2. To the southwest, across the B4042, are residential properties, while to the east, across the A3102, are agricultural fields. To the west is an area that is being developed to accommodate a new sports 'hub' comprising a range of facilities for rugby, cricket, football and tennis. Along the A3102 frontage of the site there are also a number of residential properties and the Marsh Farm Hotel.</p> <p>5.3. The Coped Hall roundabout to the south west corner of the site is a key gateway into Royal Wootton Bassett from Swindon and the M4 and is the focus for a range of commercial activities including a car sales garage, public house, Travis Perkins builder's merchants and a Rapid Hire tool and plant hire centre.</p> <p>5.4. Leda's current proposal for Land at Marsh Farm is a comprehensive mixed use development of up to 320 dwellings, a community hub comprising up to 500 sq. metres of A1/A2/A3/A4/A5/D1/D2 uses, public open space, landscape works, extension to the approved sports 'hub' and access. The wider proposal includes a supermarket and Class C2 care home.</p> <p>5.5. A number of studies have already been carried out on the site including: Landscape and Visual Impact Assessment Ecology Survey Air Quality Assessment Flood Risk Assessment Noise Survey Archaeological Evaluation Transport Assessment A Statement of Community Involvement Illustrative Masterplan (a copy of which can be found at Annex 2 of this submission)</p> <p>5.6. No 'show stopper' constraints were identified in the studies. The site is not located within any areas where development should be restricted i.e. it is not designated as a SSSI, Green Belt, green space, schedule ancient monument etc. In short, there are no over-riding obstacles to development, which would outweigh the presumption in favour of this site being built out. The site is readily available for development with no known impediment to ensuring timely delivery.</p> <p>6. Conclusion</p>				

Appendix Q - Schedule of representations

	<p>6.1. The housing targets in the Pre-submission Wiltshire Housing Site Allocation Plan are in-line with Council's adopted Core Strategy 2015. The draft Plan is expected to be adopted in September 2018 (some 3 years after the adoption of the Core Strategy).</p> <p>6.2. The Inspector found the Core Strategy sound on the basis that there would be an early review of the strategy based on an up-to-date SHMA (the Inspector's Report referred to a new SHMA in early 2016). To date this has not happened.</p> <p>6.3. Leda therefore believe that the Council should now be preparing a joint Core Strategy Partial Review and Housing Site Allocations Plan to ensure it has a 6-10 year and a 11-15 year housing supply (as required by the NPPF) based on an up-to-date need.</p> <p>6.4. The Council's settlement new settlement boundary for RBW is too restrictive. The drawing of new settlement boundaries should form part of the joint Core Strategy Partial Review and Housing Site Allocations Plan process and include the new housing allocations. This will ensure their delivery and provide certainty for local communities.</p> <p>6.5. A number of key studies have already been carried out on land at Land at Marsh Farm, Royal Wotton Bassett and no serious impediments to development have been identified. Leda's current proposal for the site is a mixed use residential development which would deliver both market and affordable housing and local facilities including employment, retail and a care home.</p>

<b>Comment ID:</b>	<a href="#">3008</a>	<b>Consultee</b> Bovis Homes Bovis Homes	<b>Agent</b> Mr Cliff Lane Savills Planning	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 998345	<b>Person ID:</b> 556489	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3, 5.125. table 5.4			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site 70 is shown is confusingly shown in Table 6.2 of the Amesbury Community Area Topic Paper as both removed in Stage 2a and taken forward to the next stage (2b). Table D.5 in Appendix D shows the site scores well in respect of the five exclusionary criteria from Table D.2, with all greens, for a capacity of 57 dwellings, with a recommendation that the site is taken forward to the next stage.</p> <p>In the question in Appendix E Stage 2 Assessment Criteria 'Have local housing needs already been considered by a sufficiently advanced neighbourhood plan?' for Porton, the answer is Yes given for the sole reason that a neighbourhood plan has been made. Unfortunately, the Idmiston Neighbourhood Plan assesses only local housing need in Porton and Idmiston and does not have regard to housing need in the wider Salisbury Housing Market Area or the Council area generally. Wiltshire Council is not meeting the housing needs of its area and a step change in provision is needed, not only in main settlements but also in large villages like Porton.</p> <p>It would seem this is partially recognised by the Council as the Draft Site Allocations is already proposing to allocate sites in large villages. For example:</p> <ul style="list-style-type: none"> <li>-50 dwellings in Hullavington</li> <li>50 dwellings in Crudwell; and</li> <li>40 dwellings in Bratton</li> </ul> <p>The Neighbourhood Plan allocates small sites around Porton which should not exceed 11 in number. These are unlikely to deliver affordable housing to meet even local needs, yet alone wider Council needs. The Neighbourhood Plan relies on affordable housing to be delivered via exception sites, which is not a very reliable way forward.</p> <p>Whilst part of Site 70 received early support in the selection process for up to 10 dwellings, the whole site is excluded because of the made Neighbourhood Plan.</p> <p>The selection criteria note that the local primary school is full but the school site has capacity for expansion. It is often the case that small schools can benefit from expanding, leading to less year groups needing to be mixed. The development of Site 70 for approximately 50 dwellings would bring valuable education contributions, which could lead to a worthy expansion of the primary school, as well contributions to secondary education in Salisbury. The Neighbourhood Plan's approach of just allocating small market housing sites, with exception sites for affordable, will not have the same significant effect.</p> <p>Whilst Appendix E of the Draft Allocations Plan notes that Porton has a regular bus service to Salisbury, adding to its other sustainability credentials of shops, doctors etc, it concludes the site should be removed because of the made Neighbourhood Plan.</p> <p>The Neighbourhood Plan was made in April 2017. Just because this Plan has been made, this should not be an automatic reason to discount Site 70. It must be remembered that the housing target in the Wiltshire Core Strategy 2015 is at least 42,000 homes to be delivered 2006 – 2026. The Inspector considering the Core Strategy was at pains to stress these words 'at least'.</p>				

Appendix Q - Schedule of representations

	<p>The Local Development Scheme envisages adoption of this Allocations Plan in September 2018, albeit that date could slip. We have already heard that a Submission version of the Draft Plan is only likely to be published in early summer of 2018. An Inspector at a recent appeal decision at Hilltop Way Salisbury (APP/Y3940/W/17/3173509) made the following comment in paragraph 16 of the decision letter:          ...the fact that the Council cannot demonstrate a 5 year housing land supply, when allowing for 5% buffer would render the adopted plan out of date for the purposes of housing land supply, as paragraph 49 of the Framework states .....</p> <p>Extracts from Paragraph 14 of the Framework state:          For plan-making this means that:          Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless:          - Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or          - Specific policies in the Framework indicate development should be restricted.</p> <p>For decision-taking this means:          Where the development plan is absent, silent or relevant policies are out of date, granting permission unless:          - Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or          - Specific policies in the Framework indicate development should be restricted.</p> <p>Housing policies for the Southern HMA in the Core Strategy are therefore at risk of being considered out of date in the decision making process, if planning applications are submitted. Those preparing plans also need to take this into account and provide sufficient housing allocations in the Plan.</p> <p>Bearing in mind that the only reason that this site was not taken forward in this Allocations Plan was because of the Neighbourhood Plan, with all other matters being satisfactory, Wiltshire should reassess this matter, taking into account the dynamic nature of the planning background in terms of increased housing need and lack of adequate housing land supply. The planning situation has changed since the Neighbourhood Plan was made with the South Wiltshire not have a five year housing land supply.</p> <p>Bovis Homes has an arrangement in place with the landowner, has a preliminary layout for 50 dwellings drawn up, with 30% affordable housing (See attached) and are prepared to make financial contributions to education and community facilities. This site could be delivered rapidly. This is against the backdrop of the Council being on the knife edge currently with regard to its housing land supply in the Southern HMA and the severe need for the provision of more affordable housing throughout Wiltshire.</p> <p>Taking into account the Framework, in respect of Porton, it is respectfully requested that because of these issues, the Council reassesses this site and allocate it for development of around 50 dwellings, which would make a valuable contribution to the Council's 5 year housing land supply and the provision of affordable housing.</p>

D14	Support.
D15/D16	No specific comment.
H14	No specific comment.

Westbury Town Council  
Housing

Westbury Town Council is pleased to see that it has been acknowledged that Westbury has had excessive housing development in recent years and has met previous housing allocations with little infrastructure support and no further large scale development is planned for Westbury. This is a voted opinion of Westbury Town Council (meeting date 18.9.17) in response to the consultation entitled (Draft Wiltshire Housing Site Allocations Plan) which the majority of town councillors have confirmed that they thought was a consultation about housing allocations as per the title.

The following are narrative, collated from the meeting but not voted opinions of Westbury Town Council and should be treated as draft.

Explanation of situation relating to the settlement boundary review

Staff and most councillors had failed to realise that the consultation (Draft Wiltshire Housing Site Allocations Plan) was actually a consultation on Housing Site Allocations and Settlement Boundaries unexpectedly merging two previous separate consultations into one.

When the agenda was sent out for our HP&D meeting of 18.9.17, the item was described to councillors as housing site allocations policy which as previously discussed had no housing allocations for Westbury. Some councillors queried the references to the boundary review and staff contacted Spatial Planning (Helena Carney) for clarification and were still confused to receive a link to a site entitled Draft Wiltshire Housing Site Allocations Plan, which was a consultation we already knew about. As late as at the meeting on 18.9.17 staff still believed that the opportunity to respond to the settlement boundary review was missing from the consultation site.

It did not help that the site was not functioning during our meeting when we tried to check the details for a response date.

Appendix Q - Schedule of representations

	<p>At the end of the meeting we were still uncertain as to how to submit our comments on the settlement boundary review and what the closing date was and by the time we were able to confirm this the three day rule prevented the committee from reconvening. We would respectfully request that we would be allowed to clarify our views at an Extraordinary Committee meeting on Weds 27th Sept 2017.</p> <p>At this stage we would still question the decision to take what was two separate consultations, merge them into a single one, and give it the same title as one or the original consultations. This was particularly unfortunate in the case of Westbury as the named aspect of the consultation (Housing Site Allocations) has no elements effecting Westbury.</p> <p>Many councillors complained that becoming aware that the documentation was also about a settlement boundary review and not just housing allocations, with just 3 working days notice until the meeting where we were expected to agree our comments.</p> <p>At the meeting the following items on the settlement boundary were discussed.</p> <ul style="list-style-type: none"> <li>• Status of Leighton House</li> <li>• Status of built land at Leighton Sports Centre</li> <li>• Implications of inclusion of Industrial Areas?</li> <li>• Brownfield Sites within the town</li> <li>• The inclusion of the former hospital site</li> <li>• The absence of the permitted site, land north of The Mead</li> <li>• Is the doctors surgery any way protected for that purpose?</li> <li>• Small boxes in the area of The Grove which we take to be allotments but would like to confirm this with the current process for allotments</li> <li>• Would we expect an approved strategic site to appear within the boundary ie the land at Station Road?</li> <li>• How does the future housing land fit with other land usage types (commercial/leisure)?</li> <li>• What pressure would proposed future development put on existing infrastructure?</li> <li>• Where are the pinch points with regards protected land, flood zones, wildlife preservation, long term sustainable development/town planning, neighbourhood plan, etc?</li> <li>• I would like to be able to see the proposed settlement area in relation to other relevant layers, is this available on mapping software anywhere?</li> <li>• whether the boundaries are subject to review when we draw up our neighbourhood plan.</li> </ul>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write in response to the consultation on housing allocation.</p> <p>Firstly I accept the need for new homes, particularly low cost homes, to serve an evolving demographic. However, it has long been my view that an undue burden has been placed on the west of the county through the artifice of combining north and west Wiltshire for planning purposes in the core strategy. You can see how artificial this is by looking at the disparity in numbers at table 1 in the plan. It has succeeded in shifting allocation south and west, particularly to Trowbridge and Westbury, and away from the logical Wiltshire growth site around junction 17 of the M4 which would have better allowed the 'sustainable distribution of growth' referred to in the draft plan. The continuation of this process has forced into scope the 'less sustainable' sites referred to in the plan that abut Trowbridge. The subordination of the sustainability criterion calls into question the value of the already strained decision algorithm reproduced in the plan.</p> <p>I strongly object to the use of what the plan admits are 'less sustainable' sites, particularly where it would have the effect of filling in green space between a principal settlement and the villages in its immediate neighbourhood.</p>

<b>Person ID:</b> 900160			<b>Person ID:</b> 900154		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.68		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Paragraph 4.68 relates to the likely lead-in time for the delivery of Site S0128 (Land at Netherhampton Road). It states the following: "Recognising the scale of the site, a generous lead in time is provided for the delivery of Netherhampton Road. The site is not expected to contribute to housing delivery for several years whilst work is carried out to masterplan the site and develop mitigation measures." As outlined in the representations made to Policy H.3.1, there are a large number of concerns relating to the deliverability of the Land at Netherhampton Road. These include major highways concerns; landscape impact; archaeological concerns and viability (relating to the lack of water supply to the site). Paragraph 4.68 implies that masterplanning and mitigation measures will take only "several years". The mitigation of the City's current highways concerns have been on Wiltshire Council's agenda for 5-10 years (since the traffic modelling for this Plan Period was undertaken in 2008), yet no action has been taken.</p> <p>In terms of lead times a report into the delivery of urban extensions on behalf of Gladman developments limited was prepared in February 2014 and was submitted as evidence to the Stroud Examination. The Gladman study was supported by evidence provided by local authorities on 78 sites. The Study considered the factors associated with bringing forward major urban extensions of 500+ dwellings before moving on to look at specific case studies from each of the English regions, Scotland and Wales. The Study was an exercise in considering deliverability, the factors which affect deliverability, the timescales involved from a site being identified for development to planning permission being granted and thereafter the rates at which housing can realistically be delivered on major urban extension sites of 500+ dwellings.</p> <p>The results of the site specific research, was then drawn together to inform an overall assessment of the timescales associated with bringing forward urban extensions and rates of delivery once development gets underway. The Study was made available to LPAs, government departments and agencies and industry bodies as an evidence based tool which can be drawn upon to inform Development Plans across the UK.</p> <p>The Study found that the time taken to determine planning applications is a major factor in the overall delivery timescales for Major Residential Development sites. The average time period from the initial concept to the grant of planning permission for sites in England is 6.67 years. The average timescale from submission to a grant of outline planning permission was 34 months (time periods for determination as provided by the relevant Authority).</p> <p>The average across those sites in the Study which have extant permission in outline and where the timescales between the Council resolving to grant permission and the decision being issued are available (where the time period for legal agreements to be made has been provided by the Authority) was 23.6 months. It should be noted many sites failed to progress beyond a resolution to grant because of unresolved legal matters. In terms of delivery from subsequent discussions with the relevant developers the Study found (including Taylor Wimpey, Barratt, David Wilson Homes, Bellway and Redrow), the average annual delivery rate of 30 - 35 dwellings per annum per single house builder outlet is realistically achievable.</p> <p>The Study concluded that an 8-year period should be allowed for from the preparation of an outline/ principle planning application to the delivery of homes. It is important to note that the Study was rooted in factual evidence provided by Local Authorities across England and Scotland.</p>				

Appendix Q - Schedule of representations

	<p>The Savills Study on behalf of Barratt Homes in October 2014 provided an update on the Gladman Study (also submitted to the Stroud Local Plan Examination). It identified 24 sites for which an outline application was submitted after 2010, 18 of which were identified in the original Gladman report.</p> <p>Compared with the overall sample, these sites progressed much more quickly, taking an average of 33 months from the submission of the outline application to start on site, against the average of the whole sample of 60 months. "This suggests that it has become more likely that large sites will progress through the planning system quickly enough to begin delivering housing units within the lifetime of a five-year housing land supply plan." Even so, 33 months from submission of outline planning application to a start on site would still point to an overall period approaching 4 years for the first occupation once the initial infrastructure phase has been allowed for together with the construction period for the first houses.</p> <p>If this were applied to the Netherhampton site, it would take 6.7 years to progress to outline application stage, and a further 33 months so first commencement. This would take the timeframe to 2026 at the very earliest. It cannot be assumed by Wiltshire Council that it will only take several years before it starts to contribute to the housing supply.</p> <p>Therefore, even in the event where Site S1028 is considered to be developable, it is highly unlikely to commence within the plan period. It is submitted that the inclusion of Site S1028 is not "effective" as it is not deliverable within the plan period.</p> <p>Longford Estate owns Site 3435 (Land off Britford Lane) which has been subject to technical studies which confirm that the site is deliverable and achievable within the plan period. A planning application is ready for submission immediately following the adoption of the WHSAP.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Longford Estate welcome the opportunity to discuss with the Inspector the research relating to the lead-in times relating to strategic housing allocations and the implications to the WHSAP.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3013</a>	<b>Consultee</b> Mr Alasdair Jones-Perrott Estate Manager	<b>Agent</b> Mrs Alison Whalley Associate Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Longford Estate	Pegasus Planning	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.128		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Paragraph 5.128 of the WHSAP relates to the transport network in Salisbury, one of two Principal Settlements in Wiltshire. The paragraph seeks to provide reassurance relating to 'measures to support the scale of growth envisaged by the WCS'. Longford Estate has several key concerns in this regard.</p> <p>The Summary of the Salisbury Transport Strategy (2012) is attached at Appendix 3. There are no page numbers unfortunately, but page 1 sets out the housing growth for Salisbury and Wilton as set out in the WCS as 4, 170 homes. However, the indicative requirement is in fact 6,060 homes by 2026.</p> <p>Figure 3.2 of the Summary document specifically identifies the Harnham Gyratory, Exeter Street roundabout and the Park Wall Junction as operating at over 70% - 90% capacity. These junctions would all be heavily affected by the proposed allocation of 640 homes on Netherhampton Road as the traffic from that site (Site S0128) will pass at least one of these junctions when travelling to any destination.</p> <p>Section 3 of the Summary document sets out the highway constraints as including: The highway network is constrained by the operation of Exeter Street Roundabout. There are delays on the roads approaching the Harnham Gyratory. Some through traffic between Wilton and Southampton Road routes through Harnham rather than the A36. Despite forecasting traffic modelling dating back to 2008, there has been no progress in terms of upgrading the existing highway network to date. The Summary document makes the following recommendations for network improvements to the Harnham Gyratory and Exeter Street roundabouts but there has been no progress in terms of upgrading the capacity. Furthermore as the housing requirement increases, there is no evidence to demonstrate that the proposed measures to 'upgrade' the road network will be sufficient to address the increased amount of traffic. Paragraph 5.6 of the Summary document states that: "Junction improvements tend to result in more traffic passing through a particular junction and thus consume any of the additionally created capacity. This is particularly so in Salisbury, where the Netherhampton Road provides an alternative route for traffic passing through Salisbury and improvement to traffic flow through the Harnham Gyratory would result in more traffic travelling along Netherhampton Road rather than along the A36." This implies that Netherhampton Road could (in 2012) accommodate increased levels of traffic from the Harnham Gyratory travelling away from Salisbury City Centre. The proposal of 740 homes on Netherhampton Road will not only have a major adverse impact on these junctions, it would also have content with the additional traffic proposed above if the Council's plans come to fruition. It is proposed that the Council's Transport Strategy is flawed and before any strategic allocations can be made, the traffic modelling and proposed network improvements MUST be robust and based on housing trajectories looking forward to 2036 in line with the timescales of the Council's intended Local Plan Review. The Council cannot rely on the status quo to support the levels of traffic movements that would be generated from 740 homes on Netherhampton Road.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan Pre-Submission (Regulation 19) draft plan (WHSAP) was published for public consultation on Friday 14th July 2017, the consultation runs until Friday 22nd September 2017.</p> <p>These representations are submitted on behalf of Longford Estate and relate to the allocation of sites and the resultant housing land supply in the Southern Wiltshire Housing Market Area of Wiltshire.</p> <p>The WHSAP is a daughter development plan document to the adopted Wiltshire Core Strategy (2015) (WCS). The WCS set out minimum housing requirements for each of the three Housing Market Areas in the County.</p> <p>Table 2.1 of the WHSAP reiterates the Core Strategy requirement and states that the minimum housing requirement for the Southern Wiltshire Housing Market Area is 10,420 dwellings for the plan period 2006- 2026.</p> <p>The spatial strategy seeks to locate development using the hierarchical approach set out at Table 2.2 of the WHSAP. The spatial strategy identifies settlements according to the following hierarchy Principal Settlements; Market Towns; Local Service Centres; Large Villages and Small Villages.</p> <p>The WCS adopted indicative Community Area requirements for housing delivery for the period 2006 -2026. The WHSAP seeks to ensure that sufficient allocations are made to meet the minimum requirements of the WCS, in accordance with the spatial strategy adopted by the WCS in 2015.</p> <p>Table 2.3 of the WHSAP reiterates the Indicative Requirements for each community area set in the WCS. For the Southern Wiltshire Community Area the indicative requirement for the Plan Period totals 615 dwellings, with 190 to be delivered at the settlement of Downton and 425 dwellings across the remainder of the Southern Wiltshire Community Area.</p> <p>The strategy for the allocation of sites to meet Community Area Requirements is described in detail in each Community Area Paper, in my clients instance the Southern Wiltshire Community Area Topic Paper (June 2017) applies (SWCTP).</p> <p>The WHSAP also includes a review of settlement boundaries as this was not undertaken as part of the WCS plan making process. The WHSAP clearly states at paragraph 1.3 that local communities are able to review their own settlement boundaries through the preparation of neighbourhood plans.</p> <p>The WHSAP has three objectives;</p> <p>Objective 1: To ensure there is a clear definition to the extent of the built up areas at Principal Settlements, Market Towns, Local Services Centres and Large Villages.</p> <p>Objective 2: To help demonstrate a rolling five-year supply of deliverable land for housing development - a duty on each Local Planning Authority required by the NPPF.</p> <p>Objective 3: To allocate sites at the settlements in the County that support the spatial strategy of the Wiltshire Core Strategy. The spatial strategy for Wiltshire contained in the Core Strategy promotes the sustainable development of the County.</p>				

Appendix Q - Schedule of representations

Table 4.1 of the WHSAP states that of the minimum 10,420 dwellings to be provided in the South Wiltshire Housing Market Area 2006-2026, 5,067 have been completed between 2006-2017 and 4,759 are allegedly committed to be delivered between 2017-2026 leaving a minimum to be allocated of 594 dwellings. We refer to our representations relating to Table 4.1 which concludes that the developable commitments are incorrect and the therefore the minimum to be allocated should be 1,544 rather than 594.

Paragraph 4.2 of the WHSAP states that these figures are a minimum to be allocated but, 'that a surplus is necessary in order to maintain a five year housing land supply in each housing market area and to surpass the buffer in excess of five years required by the NPPF.'

Policy H3 of the WHSAP states the sites to be allocated to meet the 594 dwelling need in South Wiltshire HMA at Salisbury and Amesbury as follows;

Community Area	Reference	Site name	No of Dwellings
Salisbury	H3.1	Netherhampton Road, Salisbury	640
	H3.2	Hilltop Way	10
	H3.3	North of Netherhampton Road	100
	H3.4	Land at Rowbarrow	100
Amesbury	H3.5	Clover Lane, Durrington	45
	H3.6	Larkhill Road, Durrington	15

It is submitted however that the approach taken in the South Wiltshire HMA is an inconsistent approach as the plan proposes to make allocations at Large Villages in the North and West Wiltshire Housing Market Area within the Chippenham; Malmesbury, Warminster and Westbury Community Area remainders in order to meet housing land supply requirements.

The adopted WCS set up requirements for each community area to have a housing target. The evidence that sites behind the WHSAP demonstrates that the Southern Wiltshire Community Remainder Area still has a requirement to be met (notwithstanding the wider supply across the HMA).

The Southern Wiltshire Community Area Topic Paper for (June 2017) (SWCTP) states at Table 2.1 that the settlement strategy for the Community Area is as follows; Downton is a Local Service Centre; Alderbury, Coombe Bissett, Morgan's Vale/Woodfalls, Pitton, Whiteparish and Winterslows/Middle Winterslow are Large Villages 12 other villages are Small Villages.

Table 2.2 of the SWCTP identifies an indicative residual requirement of 0 dwellings for Southern Wiltshire Community Area for the plan period 2006-2026. This relies on 183 Developable Commitments coming forward within the plan period. There is no evidence provided which sets out the developable commitments, nor their status.

It is submitted that Policy 1 of the WHSAP is not sound as;

It fails to plan positively in accordance with the paragraph 17 of the NPPF to identify sites to meet the South Wiltshire Remainder Housing need identified in the WCS and instead relies on existing committed supply within the HMA, but outside the Southern Wiltshire Community Area remainder, to meet that locally specific minimum need.

Paragraph 17 of the NPPF states that,

'Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth'.

**Attached files (Please see Objective)**

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

To be able to explain to the Inspector the relative merits of my client's sites for the delivery of housing in accordance with the Council's published spatial strategy and to meet the local housing needs of the Southern Wiltshire Community Area remainder as identified in the Draft Wiltshire Housing Site Allocations Plan (June 2017) and its supporting evidence.

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3015</a>	<b>Consultee</b> Mr Alasdair Jones-Perrott Estate Manager  Longford Estate  <b>Person ID:</b> 900160	<b>Agent</b> Mrs Alison Whalley Associate Planner  Pegasus Planning  <b>Person ID:</b> 900154	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					Effective  Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Table 4.2 of the WHSAP states that in the South Wiltshire HMA allocations are to be made at the Principal Settlement of Salisbury and the Market Town Settlements of Amesbury, Bulford and Durrington. Paragraph 4.5 of the WHSAP states that no allocations are made at Large Villages in the South Wiltshire HMA because, 'No suitable sites were available at Large Villages in the South Wiltshire HMA and therefore the Plan makes no allocations in that area either.'</p> <p>Longford Estate disagrees with this statement. The Estate has promoted Site S110 (Land to the East of Southampton Road, Alderbury) for over 15 years. It was considered to be a suitable housing site and recommended to be allocated for housing by the Planning Inspector who reviewed the Salisbury District Local Plan (adopted in 2003). It has continued to be promoted since then and an outline planning application for 50 dwellings is currently under consideration by Wiltshire Council (planning application ref. 17/04001/OUT). A copy of the location plan is included at Appendix 4.</p> <p>The proposals will deliver a range of social, economic and environmental benefits which can be afforded varying levels of weight as identified below. These include;</p> <ul style="list-style-type: none"> <li>Facilitating a community 'hub' for Alderbury Land to Alderbury Football Club (AFC) enabling its relocation and expansion plans to develop;</li> <li>A relocated Guide Hut which would benefit from the AFC car parking;</li> <li>A new Pre-School building to enable the charity to meet the increasing demands for places and ensure longevity, and</li> <li>Safeguarded land for the adjacent Primary School to benefit from additional play space.</li> </ul> <p>The site is outside of any designations and surrounded by built form therefore the degree of change to Alderbury village is at worst marginal. Of all the Large Villages identified in the SWCTP, Alderbury is the largest with a greater number of residents and facilities, and it is the most sustainable, being the closest to Salisbury city centre (2km) with a number of regular bus routes into the City Centre and within 1km of the Park and Ride. Alderbury has a primary school; including before and after school care (with confirmed capacity to accommodate children from the proposed 50 dwellings); a pre-school and other village infrastructure such as local pubs, shops, churches and community facilities that are well placed to accommodate growth in order to meet local housing needs and support existing services and facilities including rural employment opportunities.</p> <p>It is submitted that Policy 1 of the WHSAP is not sound as;</p> <p>The WHSAP also fails to allocate sites in accordance with spatial strategy of the WCS, as in this instance, after the Local Service Centre of Downton, (which has a large strategic allocation adopted plus a recently adopted Neighbourhood Plan), the next tier of settlement to accommodate housing growth to meet housing need are the Large Villages described above.</p> <p>The WHSAP is inconsistent as it allocates sites in Large Villages in the North and West Housing Market Area but does not adopt the same approach for the South Wiltshire HMA.</p> <p>The WHSAP relies on the delivery of housing to meet local need at Large Villages through Neighbourhood Plans, however of the Large Villages in the Southern Wiltshire Community Area only one has a Neighbourhood area identified. Given the WHSAP is in the process of being prepared</p>				

Appendix Q - Schedule of representations

	<p>now it is incumbent upon the Council to identify sites for development in the Southern Wiltshire Community Area in Large Villages in order to provide certainty over housing delivery for the plan period in the absence of substantive neighbourhood plan preparation across the large villages in the Community Area, with Alderbury being the logical choice being the largest and most sustainable of all the large villages.</p> <p>Site S110 is located in a sustainable location as described above and has a thriving local community with active community organisations and associations. The allocation of Site S110 in this location would help to sustain the local services and facilities and would meet local housing need. However, as the Sustainability Appraisal has not assessed any sites in the Southern Wiltshire Community Area it is not possible to assess their relative merits against the sustainability merits of those sites that have been allocated by Policy H3.</p> <p>The suggested change to Policy H3 is to include S110 (Land to the east of Southampton Road, Alderbury) at Large Villages in the Southern Wiltshire Community Area as a housing allocation.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4738357</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To be able to explain to the Inspector the relative merits of my client's sites for the delivery of housing in accordance with the Council's published spatial strategy and to meet the local housing needs of the Southern Wiltshire Community Area remainder as identified in the Draft Wiltshire Housing Site Allocations Plan (June 2017) and its supporting evidence.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3016</a>	<b>Consultee</b> Mr Alasdair Jones-Perrott Estate Manager	<b>Agent</b> Mrs Alison Whalley Associate Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Potential development sites in the Southern Wiltshire Community Area, including site (Site S110 - Land to the east of Southampton Road, Alderbury) submitted to the Wiltshire Strategic Housing Land Availability Assessment process, have not been assessed in the Sustainability Appraisal (June 2017) as the WHSAP states that development in the Large Villages in the Southern Wiltshire HMA should come forward through Neighbourhood Plans, not through allocations in the WHSAP.</p> <p>The Housing White Paper published in February 2017, 'Fixing our Broken Housing Market' (HWP), states at paragraph 1.29 that: 'Small sites create particular opportunities for custom builders and smaller developers. They can also help to meet rural housing needs in ways that are sensitive to their setting while allowing villages to thrive'.</p> <p>Paragraph 1.33 of the HWP states that the National Planning Policy Framework (NPPF) will be changed to; 'Expect local planning authorities to identify opportunities for villages to thrive, especially where this would support services and help meet the need to provide homes for local people who currently find it hard to live where they grew up'.</p> <p>It is clear from the HWP (Feb 2017) that the current policy approach of the Government to housing in villages is to support development that will help villages to thrive and to meet local housing need. While changes to the NPPF are yet to be published for consultation the Government's emerging direction of travel with regard to this policy matter is clear, and accordingly sites for growth in the Large Villages of the WHSAP should be positively considered for allocation within the Southern Wiltshire Housing Market Area where Neighbourhood Plans are not at an advance stage of preparation.</p> <p>For certainty and to plan positively for housing land supply purposes, and to meet the minimum local housing need identified through the WCS the WHSAP should allocate sites in the Large Villages.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.9			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We write on behalf of our client (Mr. Bill Evans) to provide a response to the Pre-Submission Draft Wiltshire Housing Site Allocations Plan (hereafter called 'Draft Wiltshire SAP') which is currently out for public consultation until Friday, 22nd September, 2017.</p> <p>We note that the purpose of the Draft Wiltshire SAP is twofold - to revise, where necessary, settlement boundaries; and to allocate new sites for housing to ensure the delivery of homes across the plan period. In regards to the former, the document includes a settlement boundary review of the village of Baydon which is found within the Marlborough Community Area.</p> <p>We note that on page 16 of the Draft Wiltshire SAP it sets out the following objective to review settlement boundaries: "To ensure there is a clear definition to the extent of the built up areas at Principle Settlements, Market Towns, Local Service Centres and Large Villages."</p> <p>We also note Table 8.1 of the 'Topic Paper 1- Settlement Boundary Review Methodology' (June 2017) which provides a list of areas that have been included and excluded from the settlement boundaries. The list of areas that have been included within the settlement boundaries include: "built and commenced residential and community facilities development such as religious buildings schools and community halls, that is physically related to the settlement." (our emphasis)</p> <p>Noting the Objective within the Draft Wiltshire SAP and what is indicated at Table 8.1 within the Topic Paper, we consider that the house (and its curtilage) at Becketts does not represent the perceived 'natural' southern edge of the village of Baydon.</p> <p>On behalf of our client, Barton Willmore have prepared a Landscape Statement (September 2017) (Appendix 1). As the series of Site Context Photographs 1-7 within this Landscape Statement demonstrate, the perception of the edge of the village when approaching from the Aldbourne direction to the south west of the village, clearly lies to the south of Turf Run. Views of street and road signage, glimpses of built form, telegraph poles, boundary treatments (such as clipped and brightly coloured conifer hedging, brick walls with gates and lighting, wooden panel and close boarded fencing etc), and the repeated use of evergreen conifers within the gardens of the various properties in this part of Baydon, combine to give a strong impression that one has entered the village as one turns the corner of Aldbourne Road adjacent to the entrance to Baydon House Farm. Furthermore, Site Context Photograph 3 shows the 'Welcome to Baydon' gateway feature which is located prior to the corner of Aldbourne Road and clearly gives the impression of arrival to the village.</p> <p>This combination of non-natural features clearly indicates the presence of a series of properties which stands in strong contrast to the rural features further to the south along Aldbourne Road, and are therefore physically related to the settlement of Baydon.</p> <p>On this basis, it is considered that the more logical location for the Baydon Settlement Boundary would be the southern boundary of Turf Run (see image below identified by the dashed redline). This would represent a logical and robust Settlement Boundary which is well-defined by physical features and responds positively to the existing landscape character. This in turn would therefore accord with the Objective within the Draft Wiltshire SAP, as a clear defined extent of the built-up area of Baydon.</p> <p>Figure1:Revised Proposed Settlement Boundary (see attachment)</p>				

Appendix Q - Schedule of representations

	<p>Furthermore, we have found examples within the Draft Wiltshire SAP of extensions to the proposed settlement boundaries to include residential properties on the edge of settlements. This is evident at other settlements within the Marlborough Community Area as identified below:  Dwellings to the west of Marlborough (Grid references B6, B7 and C6 on page 87)  Dwellings to the north of Aldbourne (Grid references 13, J2 and J3 on page 88)  Dwellings north west of Baydon (Grid reference HS)</p> <p>On the basis of the above, we question the robustness of the settlement boundary review which has been undertaken by Wiltshire Council. As indicated by the above, there are clear examples where the settlement boundary is proposed to be extended to include residential properties which form a natural edge to those settlements. We therefore consider that the Draft Wiltshire SAP is unsound as the settlement boundary review it is not based on a justified approach.</p> <p>Summary</p> <p>On behalf of our client, we consider that there are no clear reasons as to why the proposed settlement boundary to the south of Baydon should not be extended to the 'natural' edge of the village (i.e. the southern boundary of Turf Run). As indicated above, there are examples within the Draft Wiltshire SAP where settlement boundaries are proposed to be extended to include residential properties which form a natural edge of that settlement, and therefore we consider that this situation is no different.</p> <p>If the Council consider that the settlement boundary to the south of Baydon should remain as it is, then we question the robustness of the settlement boundary review and consider that the approach taken is not justified and therefore the Draft Wiltshire SAP is unsound.</p> <p>We trust this response is clear and helpful but should there be any queries in relation to the above and attached, please do not hesitate to contact the writer.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4738849</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We consider that the settlement boundary review which forms part of the Pre-Submission Draft Housing Site Allocations Plan is inconsistent (as explained in the attached letter) and therefore the methodology is not justified. On behalf of our client we would like to have the opportunity to raise this matter at the oral part of the examination.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Habitats Regulation Assessment - Bath and Bradford on Avon Bats SAC - Habitat Loss / Deterioration	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Habitats Regulation Assessment - Bath and Bradford on Avon Bats SAC - Habitat Loss / Deterioration Bat usage of sites. The sites under consideration have not, in general, been subject to site specific bat surveys. Instead, their value for SAC related bats has been based on ad-hoc bat records, habitat information, and professional judgement around how bats are thought to use the area. As such, significant uncertainty remains around the significance of these sites for bats. As such it is possible that, at application stage, site specific survey will show specific sites to be much more important, and potentially undeliverable. This should be recognised in the Plan. Onsite mitigation. A range of onsite mitigation measures are proposed. However, it is not clear that these measures can be delivered while delivering the development requirements of the site. For example, can hedgerows be retained or will they need to be bisected by access roads etc.? If they cannot be delivered, it is not clear whether this invalidates the conclusions of the HRA. The onsite mitigation policy says “Sensitive habitat features...include: ... These features should be retained...”. The policy thus only protects the listed sensitive features, but not any unlisted sensitive features. The HRA does not discuss whether this list of features covers the vast majority of features or otherwise quantified the proportion of features covered. It would give greater certainty to the HRA if it did. We note that the onsite mitigation policy requires 10-16m of native landscaping. It is not clear why these figures were chosen, and why there is such a spread in width. We suggest this is reviewed and justified, to provide greater certainty in the conclusions of the HRA. Site specific onsite mitigation – Church lane. We note that the site boundary is some distance from the river edge (in contrast to Upper Studley). Inclusion of this land within the red line boundary would allow this area to be used as onsite mitigation. Given the known sensitivities of this area, we strongly advise the redline boundary is extended to the river, and the area used to mitigate bat impacts. Residual effects. We welcome the recognition that the tests of the Habitats Regulations are unlikely to be met in the absence of measures to address residual habitat loss/degradation. Indeed, we imagine that subject to clarification of the two points relating to onsite mitigation, a strategic mitigation strategy would be capable of addressing the residual effects. However, as recognised in the HRA such a strategy will need to be approved before adopting this plan. The current title of the Mitigation Strategy is the Trowbridge Recreation Management Mitigation Strategy, implying it is solely concerned with recreation and not habitat related matters. We advise the title of the strategy is amended to address this. At this stage, however, it is worth noting that, in order to be confident that development in this area will not have an adverse effect on the SAC population, the contribution to such a strategy may be significant due to a number of factors: The significance of the area for this bat species. The high levels of uncertainty around how bats use the area currently, and how this may change due to natural factors over time. Uncertainty around how people will use the area, and how this may affect bat habitat (e.g. potentially higher H&S requirements to fell dead trees etc. as an impact vector). Uncertainty around the ecology of this species (e.g. how faithful they may be to routes which may become suboptimal (i.e. sufficiently dark to continue to be used by bats, but sufficiently light to allow them to be predated).			

Appendix Q - Schedule of representations

	Changing levels of resilience due to climate change and other anthropogenic influences (e.g. ash dieback). Historic issues around developer's compliance with permissions and conditions, and the ability of the Council to monitor and enforce these.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Habitats Regulation Assessment - River Avon SAC - Phosphate				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Context                      The Environment Agency's Review of Consents (RoC) Project for the River Avon SAC, which concluded in 2010, gave rise to a number of new permits for Wessex Water STW discharges. The EA concluded that these permits were compliant with the requirements of the Habitats Regulations, even though concentrations of phosphorus (P) throughout much of the SAC would remain unacceptably elevated in comparison to the Conservative Objectives of the site. This conclusion was based on their commitment to work with NE and other partners to develop additional actions to reduce other sources of P, particularly diffuse agricultural pollution. The Nutrient Management Plan (NMP), jointly produced by EA, NE and Wiltshire Council in 2015, provided the evidence base and framework to support these additional requirements, and in the context of these, also considered the need to manage future housing growth to ensure that it did not compromise the achievement of the Conservation Objectives for the SAC. As part of this process Wiltshire Council has led on the production of Annex 2 to the NMP, which deals specifically with the management of increases in P to the SAC arising from housing growth.</p> <p>To ensure that the NMP is robust and fully reflects available knowledge, EA and NE have recently initiated a focused review of the plan, which should be concluded by early 2019, to take account of some specific technical issues that have come to light. This process will also be closely linked with work to deliver EA and NE's Consent Order (CO) obligations following the recent Judicial Review on diffuse water pollution. Natural England has already advised Wiltshire Council that Annex 2 of the NMP will need to accommodate the potential changes arising from the NMP review. Natural England is also aware of more recent modelling undertaken by Wiltshire Council, which has examined the effects of higher housing allocation compared to the NMP values, enhanced water efficiency in new builds and the consequences of any increase in P concentrations in the effluents of relevant STWs, which is possible given current permits.</p> <p>Advice                      The HRA has drawn attention to the fact that the NMP calculations need to be revised to take account of a number of issues. The available evidence indicates that proposed housing growth could unacceptably increase the concentration of phosphate within the River Avon SAC, even where growth can be accommodated within the existing Wessex Water permits. Linked to this we endorse the advice provided by the Environment Agency re the Habitats Regulation Assessment of the Plan, and conclude that at present the plan is not HRA compliant. We will continue to work with EA and WC to resolve these issues.</p>

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3021</a>	<b>Consultee</b> Mr Charles Routh Planning and Local Government	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Natural England  <b>Person ID:</b> 382216		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Strategic Environmental Assessment			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It is not clear how public rights of way and valued open space has been considered in the Sustainability Appraisal. While they feature under objective 7, (will the policy protect rights of way, open space and common land?), a word search shows that right/rights of way is only mentioned 3 times in the site assessments, while existing open space is mentioned only twice.</p> <p>We note that sites 263 – Elizabeth Way and 293 – Land to the east of Elizabeth Way are described very differently in terms of their effect on objective 7 (landscapes). Of 293, it says Development of this site would represent a significant encroachment into what’s known as the ‘Hilperton Gap’ (i.e. land beyond the line of Elizabeth Way). It is not clear where this definition of ‘Hilperton Gap’ comes from. The Regulation 14 Pre-Submission Consultation Draft Hilperton Neighbourhood Development Plan provides a plan consistent with what would appear to be the intuitive extent of the “gap”, namely all the open land between Hilperton and Trowbridge, not just the land beyond the line of Elizabeth Way.</p> <p>Nor is it clear why they score differently under objectives 8 and 11. This reflects a more general point that for some objectives the assessment appears to be assessing impact of the site rather than impact per dwelling. E.g. “However the size of the development will result in an increase in private vehicle trips (SA Obj. 10).” It would seem inappropriate if (say) two adjoining small sites were to score differently than if they were considered as one single site. We suggest for all objectives, the consideration should be an assessment of impact per dwelling.</p>

<b>Comment ID:</b> <a href="#">3022</a>	<b>Consultee</b> Mr Alasdair Jones-Perrott Estate Manager  Longford Estate  <b>Person ID:</b> 900160	<b>Agent</b> Mrs Alison Whalley Associate Planner  Pegasus Planning  <b>Person ID:</b> 900154	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.11		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan Pre-Submission (Regulation 19) draft plan (WHSAP) was published for public consultation on Friday 14th July 2017 , the consultation runs until Friday 22nd September 2017.</p> <p>These representations are submitted on behalf of Longford Estate and relate to the allocation of sites and the resultant housing land supply in the Southern Wiltshire Housing Market Area.</p> <p>The WHSAP is a daughter development plan document to the adopted Wiltshire Core Strategy (2015) (WCS). The WCS set out minimum housing requirements for each of the three Housing Market Areas in the County.</p> <p>Longford Estate has commented on Table 4.1 of the WHSAP (Housing Land Supply for Wiltshire HMAs) and considered that the residual requirement for the South Wiltshire HMA be increased by 1300 homes to 1,894 to reflect that the Churchfields and Central Car Park sites in Salisbury are highly unlikely to be developed within the plan period.</p> <p>As these sites are located in Salisbury , the Principal Settlement within the South Wiltshire HMA, it is submitted that the OAN must be provided for within the plan period. The effect of the increased residual requirement in the HMA would impact on Table 4.11 of the WHSAP (South Wiltshire HMA - distribution of housing development 2006-2026) . The table sets out the developable commitments for Salisbury to be 3,833. This figure includes the Churchfields and Central Car Park allocations, despite the WHSAP stating in supporting text at paragraph 4.66 that the Churchfields allocation is expected to commence later than envisaged and much less land for new housing will be available before 2026 . Commercial space at Churchfields is available to let and there is no evidence to indicate that the decant process will commence. Similarly, the Central Car Park site is in commercial use with no evidence or application coming forward to indicate its deliverability within the plan period. Accordingly, the developable commitments for Salisbury at Table 4.11 should be reduced by 1300 to 2,533 . The removal of these commitments results in a residual requirement of 723 homes in the Salisbury and Wilton Community Area.</p> <p>Housing allocations have been proposed in the Salisbury and Wilton Community Area for 795 homes which would, if developed meet the revised OAN as suggested above. However, Longford Estate has stated in representations to the WHSAP that the Netherhampton Road site (Site S1028) should not be included as an allocation at this stage given the number of unknown and unresolved technical issues.</p> <p>Notwithstanding this, research indicates that it would be 2026 at the earliest for development to commence at Netherhampton Road (see representations made in relation to Paragraph 4 .68).</p> <p>Longford Estate can offer an opportunity for a highly sustainable, developable site (Site 3435) to deliver up to 100 homes comfortably within the plan period, to address some of the shortfall that has been identified above. Technical evidence to support the deliverability of Site 3435 is contained at Appendix 2. This site combined with the remaining allocations and windfall sites would ensure that the OAN can be addressed within the plan period and enabling further studies (particularly in relation to highways) to be undertaken at the Netherhampton Road site which could result in that site coming forward in the next plan period.</p> <p>Longford Estate consider that the developable commitments for Salisbury at Table 4.11 should be reduced by 1300 to 2,533 . The removal of these commitments results in a residual requirement of 723 homes in the Salisbury and Wilton Community Area.</p>			

Appendix Q - Schedule of representations

	This will ensure that the plan is justified insofar as being the most appropriate strategy when considered against the reasonable alternatives , based on proportionate evidence (paragraph 182 of NPPF).
<b>Attached files (Please see Objective)</b>	4738363
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Longford Estate welcome the opportunity to discuss with the Inspector the merits of Site 3435 coming forward as an omission site to address the shortfall resulting in the proposed amendments detailed above.

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3023</a>	<b>Consultee</b> Mr Charles Routh Planning and Local Government	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Natural England  <b>Person ID:</b> 382216		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Impacts on rights of way/open space			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>We note that a high proportion of the proposed sites are land which is either bisected or bounded by public rights of way or is used for recreational purposes as open space. Development of these sites is likely to detrimentally affect the recreational value of these features. (C.f. NPPF paras 74.</p> <p>Existing open space...should not be built on unless... and 75. Planning policies should protect and enhance public rights of way and access.). We note that the Wiltshire Core Strategy says (CP51 – green infrastructure) “If damage or loss of existing green infrastructure is unavoidable, the creation of new or replacement green infrastructure equal to or above its current value and quality, that maintains the integrity and functionality of the green infrastructure network, will be required. Proposals for major development should be accompanied by an audit of the existing green infrastructure within and around the site and a statement demonstrating how this will be retained and enhanced through the development process.”</p> <p>We are unaware of any such audits being undertaken since the Core Strategy was adopted, and our impression is that, compensatory provision has rarely, if ever, been made.</p> <p>Whilst impacts of this kind should not preclude sites from development, they should be weighed in the site selection process (as discussed above under Strategic Environmental Assessment section), and loss resulting from the proposed development be replaced by equivalent or better provision.</p> <p>We recognise that it may be inappropriate for the Plan to specify what such compensatory provision should look like, but we are very concerned that the allocation of such sites will result in a loss of recreational amenity. As such, without confirmation that a robust approach will be taken to implementing NPPF paras 74 and 75 and CP51, we advise that the plan is unsound.</p>

		<b>Person ID:</b> 900160	<b>Person ID:</b> 900154												
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared										
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.1			Justified										
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan Pre-Submission (Regulation 19) draft plan (WHSAP) was published for public consultation on Friday 14th July 2017, the consultation runs until Friday 22nd September 2017. These representations are submitted on behalf of Longford Estate and relate to the allocation of sites and the resultant housing land supply in the Southern Wiltshire Housing Market Area. The WHSAP is a daughter development plan document to the adopted Wiltshire Core Strategy (2015) (WCS). The WCS set out minimum housing requirements for each of the three Housing Market Areas in the County. Table 4.1: Housing Land supply for Wiltshire's HMAs (forecast at 1 April 2017) indicates that the remaining housing requirement in the South Wiltshire HMA is as follows:</p> <table border="1"> <thead> <tr> <th>Area</th> <th>Requirement (at least 2006-2026)</th> <th>Completions (2006-2017)</th> <th>Developable Commitments 2017-2026</th> <th>Minimum to be allocated</th> </tr> </thead> <tbody> <tr> <td>South Wiltshire HMA</td> <td>10,420</td> <td>5,067</td> <td>4,759</td> <td>594</td> </tr> </tbody> </table>					Area	Requirement (at least 2006-2026)	Completions (2006-2017)	Developable Commitments 2017-2026	Minimum to be allocated	South Wiltshire HMA	10,420	5,067	4,759	594
	Area	Requirement (at least 2006-2026)	Completions (2006-2017)	Developable Commitments 2017-2026	Minimum to be allocated										
South Wiltshire HMA	10,420	5,067	4,759	594											
<p>Longford Estate do not agree that the Developable Commitments as set out in Table 4.1 at 4,759 is correct. This figure includes 750 (of the allocated 1100) homes at Churchfields (Salisbury) and 200 homes at the Central Car Park site (Salisbury). It is widely known that these sites have been longstanding allocations (ref. Wiltshire Core Strategy, Core Policy 20). Paragraphs 4.66 of the WHSAP confirm that Churchfields is a strategic mixed use site that, in order to be developed requires substantial employment uses to decant, and is now expected to commence "later than envisaged and much less land for new housing will be available before 2026." Commercial space at Churchfields is available to let and there is no evidence to indicate that the decant process will commence. Similarly, the Central Car Park site is in commercial use with no evidence or application coming forward to indicate its deliverability within the plan period. Longford Estate do not consider that Churchfields or the Central Car Park site should be included within the Developable Commitments as this is misleading and contrary to paragraph 14 of the NPPF which states that local planning authorities should positively seek opportunities to meet the development needs of their area and should meet their objectively assessed needs. The WHSAP acknowledges the delay in these allocations being deliverable and on this basis, Wiltshire Council has not positively sought opportunities to meet the housing needs. Longford Estate consider that the Developable Commitments in Table 4.1 to be reduced by 950 homes to 3,809. This would have the impact of increasing the residual requirement to 1,544 in the South Wiltshire HMA. This will ensure that the plan is justified insofar as being the most appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence (paragraph 182 of NPPF).</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Consultation			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>My first observation is the confusing, head-scratching online consultation. As a Cllr, I know of at least a dozen residents who have just given up trying to send in their comments, due to the ham-fisted, totally confusing website consultation. I also know of many who have emailed/written in their comments for the same reason. It's unacceptable for a local authority to run such a (deliberate?) confusing consultation, and these words come from resident after resident. I guess no 'plain English' award for this consultation? I've pondered over the online consultation for two nights, and will not do a third, hence it being sent by email.</p> <p>Please accept this as an objection to the council's proposal to build 740 houses on Netherhampton Rd. Let's also hope that Wiltshire council will listen to residents' concerns after this consultation ends. It's just a pity that many have been denied sending in their comment through a cumbersome online consultation.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury.			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	740 houses on Netherhampton Rd: I've had no comment from any residents regarding the 100 houses at Rowbarrow, so my comments and questions lie with the two proposals for 740 houses, a small Town, on Netherhampton Rd. In fact, the proposal raises more questions, which the council so far, has been unable to answer. This alone, is enough to make these proposals unsound.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Traffic: Just how many vehicle movements will be created from these developments onto Netherhampton Rd? Does the council think that the 'pinch points' at either end, particularly Harnham, will be able to cope? These questions have yet to have answers. Tweaking the Gyratory is no answer, unless an enormous flyover is proposed? A recent pedestrian death on Harnham Rd raises eyebrows. Residents have just endured several weeks of misery through Salisbury during the recent New Bridge Rd repairs. The council is aware of this; queues along all southern roads into and out of Salisbury; fact; most of the day long, every day. These proposals will add 1,000 vehicle movements on Netherhampton Rd and the Gyratory. Both roads cannot take this extra amount of traffic. Does the council think it can? If so, on what assumption? Just make the queue longer? It's already bottlenecked!</p> <p>This proposed development is a Town, added to an existing Village. It will increase Netherhampton parish tenfold. I've also just checked the definition of a Town and it's a settlement of 1,000 to 20,000 people. I would guess 1,300 people will eventually live here; likely more.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Why more 'doughnut development'?</p> <p>Why is the council not looking at building a small town, or garden town, somewhere in Wiltshire? Many community facilities would come with this, along with new roads. And who knows, maybe some funding too? I don't believe that this has seriously been looked at by the council. Just the easy option of 'doughnut development' around existing settlements; the cheap option for the council and the worst for existing residents. This 'doughnut development' proposal will bring chaos to existing road networks, which will eventually grind to a halt, all thanks to Wiltshire council. Salisbury has seen too much of this development over the past 20 years or so. No more can be sustained, enough is enough. Just look at the road network now.</p> <p>A new Town would take all the pressure off Salisbury, and other areas across Wiltshire, giving those new residents in that new Town the community facilities which would be deserved.</p> <p>Netherhampton Rd will come with no new community facilities, except a new primary school. Doesn't the council have a prejudicial interest demanding this? What about a shop? Pub? Church? Community Hall? Plenty of green open space? These are what residents would like too, along with a bus to serve them. Is there a proposal for a bus service here? There needs to be. This major settlement will be 'cut off' from the rest; with no local buses.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">3035</a>	<b>Consultee</b> Land Value Alliances Ltd Land Value Alliances Ltd  <b>Person ID:</b> 1136406	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We write on behalf our client Land Value Alliances (LVA) in relation to the above consultation on the Wiltshire Site Allocations Development Plan Document 'SADPD' (June 2017). LVA have a general interest in Wiltshire Council's forward planning but specifically in relation to Land at Sandlease Farm, Worton as edged red on the attached site location plan (Appendix 1). Where relevant this letter will highlight the potential for residential development on this land.</p> <p>It is noted that the draft SADPD only proposes site specific allocation policies which will supplement the strategic policies in the Wiltshire Core Strategy. The draft SADPD does not propose to allocate sites to deliver the overall housing requirement for the East Housing Market Area in large villages such as Worton as part of this process, and instead leaves 'local needs' to be delivered by communities through Neighbourhood Plans.</p> <p>LVA acknowledge that neighbourhood plans can be used as a vehicle to deliver housing need for large villages, but consider that further sites in should be allocated in the SADPD now to ensure a flexible supply of housing to meet future requirements, for the following reasons:</p> <ul style="list-style-type: none"> <li>The status of the new SHMA and partial WCS review which could have implications on the OAHN in Wiltshire;</li> <li>The flexible approach endorsed in the adopted WCS which suggests the overall housing requirement is a 'minimum' with 'indicative' requirements for each Community Area;</li> <li>The doubts about the delivery of some sites in the East HMA and their build out rates;</li> <li>Concerns regarding the suitability of sites proposed as allocations in Market Lavington.</li> </ul> <p>On this basis LVA consider that the Plan is unsound as currently drafted as it is not justified or consistent with national policy. To make the Plan sound further sites should be allocated to ensure a flexible supply of deliverable sites are available in the plan period.</p> <p>This is particularly the case for the East HMA which includes Worton, a large sustainable village. As set out in the following sections Land at Sandlease Farm in Worton can accommodate residential development which can make an important contribution to the housing supply in the East HMA. These representations are supported by an illustrative masterplan (Appendix 2) and baseline assessments (Appendix 3-8) which help to confirm the sites overall acceptability.</p> <p>The Wiltshire Core Strategy (WCS) was adopted in January 2015 and sets out the strategic vision for delivering sustainable growth over the period up to 2026. A Neighbourhood Plan (NP) is currently being prepared in Worton and Land at Sandlease Farm is being considered as an option for residential development. The purpose of the Wiltshire SADPD is to:</p> <ul style="list-style-type: none"> <li>Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages; and</li> <li>Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three Housing Market Areas (HMAs) over the period to 2026.</li> </ul>

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

A number of issues are raised in the representation letter regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3036</a>	<b>Consultee</b> Terra Strategic Ltd	<b>Agent</b> Ms Rosie Dinnen Associate Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1136436	TETLOW KING PLANNING  <b>Person ID:</b> 1135353	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Plan Period</p> <p>Whilst it is acknowledged that the proposed timeframe of the Draft Site Allocations Plan is aligned to the plan period of the Wiltshire Core Strategy and Chippenham Site Allocations Plan (2006 – 2026), NPPF Paragraph 157 states that Local Plans should: "be drawn up over an appropriate time scale, preferably a 15-year time horizon, to take account of longer term requirements, and be kept up to date"</p> <p>Once adopted, which according to the approved updated Local Development Scheme on has an anticipated adoption date of Winter 2018, the Site Allocations Plan would have a maximum time horizon of just eight years: half of what is expected by the NPPF. This consultation arrives at a time where the partial review to the Core Strategy should be at an advanced stage of its review. However, the partial review is yet to commence. In addition, it is questioned whether planning for just eight years in advance of its adoption really takes account of "longer term requirements", as outlined in Paragraph 182. With the plan period commencing in 2006 indicates that the Draft Site Allocations Plan is more retrospective than forward-thinking.</p> <p>On this basis it is considered that the provision of an eight year time horizon is not consistent with national policy, nor will this timeframe be effective. Moreover, covering a plan period all the way back to 2006 does not indicate that the plan has been positively prepared with much forethought. As such this element of the Draft Site Allocations Plan already fails the tests of soundness.</p> <p>Summary</p> <p>In order to make the Draft Site Allocations Plan sound, the Council needs to increase the proposed plan period: if the intentions of the Council to adopt the plan in Winter 2018 are correct, this would mean that the document would have a foresight of just eight years, and currently presents a more retrospective picture.</p> <p>RE: LAND WEST OF SEMINGTON ROAD, MELKSHAM</p> <p>On behalf of our client, Terra Strategic Ltd, who has an interest in land to the west of Semington Road, Melksham, Tetlow King Planning is instructed to make a representation on the Draft Wiltshire Site Allocations Plan. We also enclose a completed copy of the representation form. The site has recently been subject to a planning application (ref. 17/0195/OUT) for residential development and a site location plan is enclosed. The production of the Site Allocations Plan is welcome and as it will provide greater certainty for housing delivery in Wiltshire. However, the plan's production is long overdue due to protracted delays in examination and adoption of both the Core Strategy and the Chippenham Site Allocations Plan. In the absence of a Site Allocation Plan, Wiltshire Council has not been able to demonstrate that they have a five year housing land supply and consequently the Council has been operating in a planning by appeal system whereby planning permissions have been granted for residential development in locations where development would not normally be permitted (i.e. unsustainable locations). Due to the absence of an up-to-date development plan, several recent appeal decisions, and indeed Council own decisions, have been approved contrary to the development plan, therefore undermining the primary importance of development plan in decision making as stipulated by Section 38(6) of the Planning and Compulsory Purchase Act 2004.</p>				

Appendix Q - Schedule of representations

	<p>Furthermore, delays in the partial review of the Core Strategy have further hindered Wiltshire achieving an up-to-date development plan and again undermines plan-led process in decision making. Indeed the Council's commitment to an early partial review of the Core Strategy was a determining factor in the Inspector's report recommendation adoption of the Core Strategy subject to main modifications.</p> <p>These representations have been prepared having regards to the wider planning policy context for Wiltshire and the tests of soundness i.e. a 'sound' local plan should be positively prepared; justified; effective; and consistent with national policy.</p> <p>For the reasons that are established below, it is considered that the emerging Wiltshire Site Allocations Plan does not meet the tests of what a 'sound' Plan should comprise. The inclusion of our site at Melksham would ensure that a sufficient supply of housing will be delivered to the town and would meet an emerging need for new housing in the Chippenham and Trowbridge Housing Market Areas – as established by the forthcoming Strategic Housing Market Assessment (see explanation below).</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In light of the ongoing promotion of the site for residential development our client is keen to engage in the process on further stages of the Site Allocations Plan and emerging planning policy in Wiltshire. We would therefore like to be consulted on further stages of the Site Allocations Plan and other related publications,</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3037</a>	<b>Consultee</b> Terra Strategic Ltd  <b>Person ID:</b> 1136436	<b>Agent</b> Ms Rosie Dinnen Associate Director  TETLOW KING PLANNING  <b>Person ID:</b> 1135353	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Melksham</p> <p>Melksham is a key market town in Wiltshire, a high order settlement in the Settlement Strategy (Core Policy 1) in recognition of its sustainability credentials in terms of the employment opportunities, provision of a wide of services and facilities to sustain housing. Therefore it is a significant shortcoming that the Draft Wiltshire Site Allocation Plan does not allocate any new homes.</p> <p>With regard to the town's role in the Core Strategy, we note that whilst the examining Inspector determined that the Council's decision to not identify a strategic allocation for Melksham at the time of adoption was "on balance, warranted" , the Inspector was concerned about housing delivery in the latter part of the plan period. Paragraph 288 of the Core Strategy Inspector's report states:</p> <p>"Whilst, in the shorter term, there appears to be sufficient commitments to ensure an adequate supply of housing land for the town, there is a notable degree of uncertainty for the latter part of the plan period. The Council acknowledged in its Position Statement the scope for a Sites DPD to assist in delivering such housing which, given my earlier comments in relation to overall housing numbers for the county, seems to be the most pragmatic and efficient way of complementing the neighbourhood planning process to ensure the provision of sufficient housing to meet identified needs in a timely fashion..."</p> <p>Now we are in the "latter stages" of the respective plan periods of the Draft Site Allocations Plan, it appears that no sites in Melksham have been allocated. This was an assumption made by the Inspector and Wiltshire Council that a Sites DPD would allocate relevant sites to make up local need, which it has failed to include.</p> <p>The Inspector also notes that the Neighbourhood Planning process would assist in allocating sites in Melksham Community Area. Following an online review of Steering Group minutes, it appears that we are no closer to viewing a draft version of a Neighbourhood Plan than when the Inspector issued his report in December 2014. As a result we are unable to conclude whether a Melksham Neighbourhood Plan will be allocating any housing sites up to 2026.</p> <p>Whilst the Melksham Topic Paper establishes that the indicative residual requirement for the Melksham Community Area has been met, it has been written as though a housing moratorium has been placed on the town – indicating that the town is full up and no more housing should be built here.</p> <p>It is important to highlight that the absence of any site Melksham-related site assessments in the Topic Paper does not reflect the 'positive', 'forward' planning advocated by national planning guidance. The NPPF establishes a responsibility on local planning authorities to "boost significantly" the supply of housing: essentially putting a cap on development up to 2026 in Melksham does not represent positive planning, or 'significantly' boosting housing supply in the town. It is important to note that the residual housing requirement established in the Topic Paper does not represent a cap on development, nor does it indicate that no more additional new homes are required. Core Policy 2 refers to 'at least 42,00 homes' and a minimum housing requirement for the three Housing Market areas and west of Swindon. The figures identified for Melksham Town and Melksham remainder is expressed as an 'indicative requirement'. There is a swathe of evidence which outlines that such</p>				

#### Appendix Q - Schedule of representations

housing requirements and the demonstration of a five year housing land supply should not represent a ceiling for new development, they should represent approximate targets which can be exceeded.

An example of this includes an appeal at Shurnhold, Melksham (ref. 3132915 – Appendix I) where the Inspector presiding over the appeal acknowledged that matters were "finely balanced", but stated that the cumulative impacts outweighed the benefits: leading to dismissal. Despite the dismissal of the appeal, the Inspector concluded that the Council was unable to demonstrate a five year housing land supply, and that the requirement of 6,822 homes within the relevant five year period was "not a maximum", nor a "ceiling" (Paragraph 66).

A more recent example was the Secretary of State's (SoS) decision at Boreham Road, Warminster in July 2017 (ref. 3150774, attached at Appendix II) where at Paragraph 17 he notes (our emphasis added):

"He concludes that the Council can demonstrate a 5 year supply of housing land and, therefore, the fourth bullet point of paragraph 14 of the Framework is not engaged. However, he considers that this does not negate the benefits arising from the proposed development, particularly the contribution to custom built housing and affordable housing. In line with paragraph 47 of the Framework, which requires local authorities to boost significantly the supply of housing, he takes the view that the five year requirement is a minimum and not a cap."

Drawing the above comments together, it is disappointing to see that the Council considers that Melksham has 'reached capacity' by fulfilling its residual requirement up to 2026: which does not accord with the principles of the NPPF. The plan is more of a monitoring document than one that looks ahead for new development. As such, the emerging Site Allocations Plan has not been positively prepared, nor is it consistent with national policy, effective and justified.

Summary

In consideration of the Inspector's findings during the examination of the Wiltshire Core Strategy it is unusual not to see any allocated sites in Melksham, considering the assumption between the Council and the Inspector that a Sites DPD and the Neighbourhood Planning process would contain prospective sites. The Inspector expressed his concerns at the lack of housing sites in the longer term, and there seems to be no emerging sites coming forward via the neighbourhood planning route – in which a draft document is yet to be published. As highlighted above Melksham town is an example of the disorderly 'planning by appeal system' which operates in Wiltshire. Consequently, Melksham's growth is being artificially constrained and the Council is not planning for its future and an opportunity is being missed.

RE: LAND WEST OF SEMINGTON ROAD, MELKSHAM

On behalf of our client, Terra Strategic Ltd, who has an interest in land to the west of Semington Road, Melksham, Tetlow King Planning is instructed to make a representation on the Draft Wiltshire Site Allocations Plan. We also enclose a completed copy of the representation form. The site has recently been subject to a planning application (ref. 17/0195/OUT) for residential development and a site location plan is enclosed. The production of the Site Allocations Plan is welcome and as it will provide greater certainty for housing delivery in Wiltshire. However, the plan's production is long overdue due to protracted delays in examination and adoption of both the Core Strategy and the Chippenham Site Allocations Plan. In the absence of a Site Allocation Plan, Wiltshire Council has not been able to demonstrate that they have a five year housing land supply and consequently the Council has been operating in a planning by appeal system whereby planning permissions have been granted for residential development in locations where development would not normally be permitted (i.e. unsustainable locations). Due to the absence of an up-to-date development plan, several recent appeal decisions, and indeed Council own decisions, have been approved contrary to the development plan, therefore undermining the primary importance of development plan in decision making as stipulated by Section 38(6) of the Planning and Compulsory Purchase Act 2004.

Furthermore, delays in the partial review of the Core Strategy have further hindered Wiltshire achieving and up-to-date development plan and again undermines plan-led process in decision making. Indeed the Council's commitment to an early partial review of the Core Strategy was a determining factor in the Inspector's report recommendation adoption of the Core Strategy subject to main modifications.

These representations have been prepared having regards to the wider planning policy context for Wiltshire and the tests of soundness i.e. a 'sound' local plan should be positively prepared; justified; effective; and consistent with national policy.

For the reasons that are established below, it is considered that the emerging Wiltshire Site Allocations Plan does not meet the tests of what a 'sound' Plan should comprise. The inclusion of our site at Melksham would ensure that a sufficient supply of housing will be delivered to the town and would meet an emerging need for new housing in the Chippenham and Trowbridge Housing Market Areas – as established by the forthcoming Strategic Housing Market Assessment (see explanation below).

			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire and Swindon Joint Spatial Framework                  In partnership with Swindon Borough Council, Wiltshire Borough Council is preparing a joint spatial planning framework in order to guide new development up to 2036. In a recent Cabinet meeting on 12 September, Wiltshire Council resolved to agree an updated Local Development Scheme for the future programme of preparing Development Plan Documents.                  In support of the preparation of a joint spatial framework with Swindon Borough Council, the Agenda confirms that there will be a new Strategic Housing Market Assessment (SHMA) and Functional Economic Market Area Assessment (FEMAA) for both authorities, in which draft versions have been considered at a joint meeting on 18 September 2017. The Cabinet Agenda suggests that a Regulation 18 public consultation is due in Q4 of 2017, which will include a proposed Scope of the Plan, the new SHMA and FEMAA, and a fresh Call for Sites.                  We note at Paragraph 19 of the Cabinet Agenda that the SHMA and FEMAA propose new Strategic Housing Market Areas (HMAs) – based around Chippenham, Salisbury, Swindon and Trowbridge, and has formed the basis against which policy officers in both authorities have been working towards.                  Melksham town is strategically located between the two proposed HMAs of Chippenham and Trowbridge: thus elevating its importance within wider Wiltshire. This has significant implications for the town as it will be viewed by Wiltshire Council and Swindon Borough Council as a strategically significant settlement which will be pivotal in accommodating further growth from Chippenham and Trowbridge. Due to its location between two of Wiltshire’s most principal settlements, the town of Melksham will inevitably need to grow further, leading to the allocation of more residential and commercial sites within and around the town and our clients site is ideally located to facilitate this growth.                  Summary                  In light of the prospective elevated status of Melksham as a town through the emerging SHMA and FEMAA and the Council’s Joint Spatial Framework with Swindon Borough Council, it is inevitable that more sites will need to be directed towards Melksham in the longer term. As such this representation has adequately demonstrated why our site should be included as an allocation within the Draft Site Allocations Plan. The site is available for development, now.                  RE: LAND WEST OF SEMINGTON ROAD, MELKSHAM                  On behalf of our client, Terra Strategic Ltd, who has an interest in land to the west of Semington Road, Melksham, Tetlow King Planning is instructed to make a representation on the Draft Wiltshire Site Allocations Plan. We also enclose a completed copy of the representation form. The site has recently been subject to a planning application (ref. 17/0195/OUT) for residential development and a site location plan is enclosed. The production of the Site Allocations Plan is welcome and as it will provide greater certainty for housing delivery in Wiltshire. However, the plan’s production is long overdue due to protracted delays in examination and adoption of both the Core Strategy and the Chippenham Site Allocations Plan. In the absence of a Site Allocation Plan, Wiltshire Council has not been able to demonstrate that they have a five year housing land supply and consequently the Council has been operating in a planning by appeal system whereby planning permissions have been granted for residential development in locations where development would not normally be permitted (i.e. unsustainable locations). Due to the absence of</p>			

Appendix Q - Schedule of representations

	<p>an up-to-date development plan, several recent appeal decisions, and indeed Council own decisions, have been approved contrary to the development plan, therefore undermining the primary importance of development plan in decision making as stipulated by Section 38(6) of the Planning and Compulsory Purchase Act 2004.</p> <p>Furthermore, delays in the partial review of the Core Strategy have further hindered Wiltshire achieving and up-to-date development plan and again undermines plan-led process in decision making. Indeed the Council's commitment to an early partial review of the Core Strategy was a determining factor in the Inspector's report recommendation adoption of the Core Strategy subject to main modifications.</p> <p>These representations have been prepared having regards to the wider planning policy context for Wiltshire and the tests of soundness i.e. a 'sound' local plan should be positively prepared; justified; effective; and consistent with national policy.</p> <p>For the reasons that are established below, it is considered that the emerging Wiltshire Site Allocations Plan does not meet the tests of what a 'sound' Plan should comprise. The inclusion of our site at Melksham would ensure that a sufficient supply of housing will be delivered to the town and would meet an emerging need for new housing in the Chippenham and Trowbridge Housing Market Areas – as established by the forthcoming Strategic Housing Market Assessment (see explanation below).</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In light of the ongoing promotion of the site for residential development our client is keen to engage in the process on further stages of the Site Allocations Plan and emerging planning policy in Wiltshire. We would therefore like to be consulted on further stages of the Site Allocations Plan and other related publications,</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3039</a>	<b>Consultee</b> Terra Strategic Ltd  <b>Person ID:</b> 1136436	<b>Agent</b> Ms Rosie Dinnen Associate Director  TETLOW KING PLANNING  <b>Person ID:</b> 1135353	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Land West of Semington Road, Melksham</p> <p>The development of our client's site to the west of Semington Road, Melksham would assist the Council in achieving its spatial priorities in the Site Allocations Plan and the joint spatial planning framework.</p> <p>The site extends to approximately 4.8ha and is situated to the south-west of Melksham, immediately adjacent to the existing settlement boundary. The site itself is flat and constraint free. It is a self-contained site with well defined defensible boundaries, which are screened by mature vegetation. The site is within Flood Zone 1.</p> <p>The site is in a sustainable location within walking distance to facilities in Melksham town centre and Berryfield to the south. The site has excellent bus links with the X34 providing a regular long service bus route which connects Melksham to Chippenham, Trowbridge and Frome. Semington Road also forms part of the 403 National Cycle network. Melksham Railway Station is just over a mile away and the site has excellent connectivity by car.</p> <p>The site benefits from ample employment opportunities in the locality. As well as the Town Centre, employment opportunities exist along Hampton Park West (for example the Evans Business Centre and the Ashville Centre) along Semington Road to the south, and at Bowerhill in the east.</p> <p>In assessing the Principle of Development, the findings of the 2012 SHLAA cannot be ignored. Within its assessment of the site (ref. Site 728), Wiltshire Council identified the site as suitable, available, and deliverable within five years. As footnote of NPPF Paragraph 47 highlights that to be considered deliverable, sites "should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable". The development of the site would fulfil those requirements.</p> <p>The SHLAA also recognises that the site is in single ownership, therefore can be delivered without difficulty and has the capacity for approximately 103 dwellings.</p> <p>In considering the suitability of the scheme in principle, another important element is the Melksham Link Project, as established in Wiltshire Core Strategy Policy 16. The most up-to-date plans of this project outline the proposed route of the canal running to the West of the site, and designate the site for new residential development. The proposal will not hinder the future development of the proposed canal.</p> <p>In terms of the local landscape, the site contains a low-level landscape perceived as an extension to the host town of Melksham as opposed to Berryfield in the south. This was established within the Landscape and Visual Impact Assessment which concluded that development "would not be perceived as significantly closing the gap between Berryfield and Melksham or be perceived as coalescing the individual settlements, particularly with the retention and enhancement of the southern boundary vegetation as part of the mitigation measures".</p> <p>Our client's site is situated immediately adjacent to the existing settlement boundaries. The Site Allocations Plan proposes to review the settlement boundaries across Wiltshire and therefore it is an ideal opportunity to include our client's site within the new defined boundaries for Melksham.</p>			

Appendix Q - Schedule of representations

	<p>Indeed several precedents have previously been established for developing beyond the settlement boundaries. Planning permission has been granted on land to the south of Western Way, Bowerhill (reference 16/01123/OUT). This site had been historically preserved from development to avoid coalescence with Bowerhill. This decision therefore sets an important precedent for developing to the south of the Melksham Ring Road (A350), which has previously defined the urban edge of Melksham.</p> <p>An outline planning application for residential development was submitted for the site earlier this year (ref. 17/0195/OUT). Whilst the application was refused by the Council, the grounds for refusal were primarily on 'in principle' grounds as the site is located outside of the defined settlement limits of Melksham. However, as outlined above the site is constraint free and in a sustainable location and therefore forms a logical extension to Melksham.</p> <p>The outline planning application included an indicative layout plan that demonstrated that the site had capacity to accommodate 160 dwellings. Revised plans are currently being prepared for a reduced number of units more in line with the SHLAA capacity of 103 units.</p> <p>Moreover, the Council also recently approved an outline application for the erection of up to 150 dwellings on land to the east of Semington Road, to the south of the proposed boundary. Although it should be noted that this site is further removed from the existing settlement boundary for Melksham than our client's site and has a closer relationship with Berryfields.</p> <p>As the Site Allocations Plan is reviewing the settlement boundaries across Wiltshire, it seems odd that the two Melksham examples have been deliberately excluded from the revised settlement boundary for Melksham. Therefore the rationale for approving these planning applications beyond the settlement boundaries seems unjustified as the settlement boundaries have not be adjusted to include these sites.</p> <p>As a result, the settlement boundaries for Melksham and Bowerhill as presented in the Draft Site Allocations Plan are out of date and do not allow for further housing growth, and so these boundaries are not effective and not justified. Accordingly the settlement boundaries should be reviewed to include our client site which is immediately adjacent to the existing settlement boundary and forms a logical extension to the town and we enclose a plan indicating the revised boundary.</p> <p>The provision of new residential development adjacent to Melksham – a Market Town that is capable of facilitating "significant" growth – complies with the overarching aims and objectives of Core Policy 1 and Core Policy 2 of the Wiltshire Core Strategy. In addition, the added importance of the town through the development of new HMAs at Chippenham and Trowbridge further project its importance as a strategic settlement within Wiltshire. As a result, the site is sustainably located, in close proximity to Melksham Town Centre and a suitable highways network.</p> <p>Summary Moreover, the site boundaries of Melksham and Bowerhill need to be amended to include our client's site and a plan of the revised boundary is enclosed.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4739142 / 4739140</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In light of the ongoing promotion of the site for residential development our client is keen to engage in the process on further stages of the Site Allocations Plan and emerging planning policy in Wiltshire. We would therefore like to be consulted on further stages of the Site Allocations Plan and other related publications,</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3040</a>	<b>Consultee</b> De Vernon Trustees De Vernon Trustees  <b>Person ID:</b> 556491	<b>Agent</b> Mr Thomas Rumble Woolf Bond Planning  <b>Person ID:</b> 901380	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy			Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	No  Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Housing Site Allocations Plan – Pre-Submission Draft Plan (June 2017) Land to the north of Leafield Industrial Estate, Corsham</p> <p>We write on behalf of our client, De Vernon Trustees, with regard to the current consultation on the Wiltshire Housing Sites Allocations Plan. We object to the pre- submission draft plan, in particular its failure to identify housing allocations in the Corsham Community Area.</p> <p>Our client’s interest at land north of Leafield Industrial Estate, Corsham should be included in the Wiltshire Housing Site Allocations Plan (hereon referred to as ‘the Plan’) as a residential allocation for approximately 140 no. dwellings.</p> <p>Introduction</p> <p>The NPPF sets out the principal components to be included in local plans. Paragraph 182 requires that in order to be “sound” a Local Plan should be positively prepared, justified, effective and consistent with national policy.</p> <p>In order to be justified, a development plan must be founded upon a robust and credible evidence base and represent the most appropriate strategy when considered against the reasonable alternatives.</p> <p>Effective means the document must be deliverable, flexible and be able to be monitored. The positive preparation test requires plans to objectively assess development and infrastructure requirements from neighbouring authorities.</p> <p>Accordingly, in order to be sound, the Wiltshire Housing Site Allocation Plan needs to comply with the NPPF in respect of meeting objectively assessed development needs in full.</p> <p>For the reasons set out in this paper there are a number of shortcomings with the Plan, as currently drafted, that result in the need for amendment.</p> <p>Policy H2 (Allocations in the North and West Housing Market Area), supporting Table 4.10 and supporting paragraph 4.50</p> <p>Wiltshire County consists of three housing market areas each with varying minimum housing requirements. These representations focus primarily on the North and West Wiltshire Housing Market Area (‘HMA’), where our client’s site is located. For the reasons set out below, we object to the proposed housing allocations and the Council’s decision to not identify housing allocations at Corsham.</p> <p>Positively Prepared Plan and the Duty to Cooperate</p> <p>Paragraph 182 of the NPPF requires the Plan to be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development.</p> <p>The North and West Wiltshire HMA borders four different Local Planning Authorities – North Somerset, South Gloucestershire, Bath &amp; North East Somerset, and the Cotswolds. Paragraph 1.11 of the draft Plan states:</p> <p>‘The Council engaged with neighbouring authorities and statutory consultees throughout the preparation of the Wiltshire Core Strategy, which sets the framework for this Plan. They supported the spatial strategy and quantum of development throughout the WCS preparation process. The spatial strategy and quantum of development can be considered to involve strategic issues where the duty to cooperate has already been fulfilled through the Core Strategy process.’</p>				

#### Appendix Q - Schedule of representations

We have examined the housing land supply documents in the above authorities and note that: North Somerset's housing requirement for the period 2006 to 2026 is 20,985 dwellings. The five year supply calculations show a backlog of 2,692 dwellings resulting in a five year requirement of 7,937 dwellings. When compared with supply figures, the Council claims a 5.15 year housing land supply. This represents a marginal position and if a 20% buffer were applied, the Council would have a housing land supply deficit. South Gloucestershire's latest available Annual Monitoring Report shows that the Council is unable to demonstrate a five-year land supply with only a 4.54 year supply. (South Gloucestershire Council AMR 2016)

Cotswold District Council suggest they can demonstrate a 7.54 year land supply in their emerging local plan, which is currently being examined. The Inspector has raised several questions regarding this claim, particularly in reference to relying on a single large housing allocation, and the assumptions made behind the windfall allowance. (Cotswold DC LP Examination – Inspector's Matters, Issues & Questions for Examination (Sept 2017))

Bath and Northeast Somerset calculates its five year supply of housing against the target of 13,000 dwellings over the period 2011 to 2029. The council's latest housing trajectory suggests a five year supply of 2,558 years, equating to an approximate housing land supply of 3.54 years. It is clear from the above, that the neighbouring authorities are struggling to fully meet their housing needs and many are relying upon large strategic allocations to do so. Development of large strategic sites is often delayed and results in altered housing delivery trajectories, which often expose the Local Planning Authorities to potential housing land supply deficits.

The above position suggests a potential future need for Wiltshire County to potentially accommodate other Authorities' needs and furthers the importance that this plan identifies sufficient housing to go beyond identified minimum housing requirements. This can be achieved through the formal allocation of more sites, that would in turn create a more flexible (and therefore sound) development plan.

**Justified Plan**

The NPPF requires the plan to be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence.

**Housing Need in Wiltshire County**

Core Strategy Policy CP 2 (Delivery Strategy) provides for a minimum housing requirement of 42,000 dwellings (2,100 dwellings per annum) in Wiltshire over the plan period 2006 to 2026. In addition, Policy CP 11 (Spatial Strategy for the Corsham Community Area) requires approximately 1,220 new dwellings to be delivered at Corsham town.

As a further contextual point, the Government's recent "Planning for the right homes in the right places: consultation proposals" (September 2017) document consulted on a number of potential changes to national planning policy and guidance. One measure included a consultation upon a new standardised methodology towards calculating local housing need. This document was supported by a table that provided an "Indicative assessment of housing need based on proposed formula, 2016 to 2026 (dwellings per annum)" for every Local Authority in the country. The identified figure for Wiltshire is 2,227 dwellings per annum. This suggests an underlying increased housing need for the County when compared to the current Core Strategy (2,100dpa) housing requirement.

There are two important points that arise from the above discussion. First, the Wiltshire Core Strategy housing requirement (and the resulting community area targets) are minimum housing requirement figures. It follows that an element of flexibility must be inserted into the resulting identified supply in order to meet these minimum needs. Such an approach is consistent with NPPF paragraph 47 that requires Local Authorities to boost significantly the supply of housing and that the five year requirement is to be treated as a minimum not a cap (Consistent with SoS Appeal Decision (Ref: APP/Y3940/W/16/3150774)). Second, when the Council finally review the Core Strategy housing requirement (not scheduled to occur in the short term), it is likely that the true objectively assessed need will have increased yet further, as evidenced by the higher figure identified in the Government's recent consultation. This furthers the necessity for the plan to go beyond minimum requirements and introduce flexibility now so to avoid an accumulated backlog when the Core Strategy housing requirement is finally reviewed.

**The need for allocations at Corsham**

Table 4.10 of the Plan refers to an indicative requirement of 1,220 dwellings at Corsham town over the period 2006 to 2026 as originally identified in the Core Strategy. Table 4.10 then goes onto identify that 1,233 dwellings have either been completed or form developable commitments at Corsham town over that period, resulting in a surplus of 13 units or a variation of 1%. Paragraph 4.50 then goes onto state: 'Until very recently there has been a shortage of development opportunities in the town. It is difficult to substantiate a direct connection, but this shortage may also have contributed to the higher than anticipated rates of development experienced by Calne, neighbouring Chippenham.

## Appendix Q - Schedule of representations

Higher rates of development than expected cause concern about the adequacy of local infrastructure to support population growth and about environmental impacts. No allocations are proposed in the Plan for Calne or Corsham' (Our emphasis).  
The discussion in the below section confirms that when the actual developability of the suggested supply at Corsham over the plan period is analysed, there is a quantifiable shortfall between suggested commitments and the Core Strategy housing requirement. In the case of Corsham, rather than going beyond the minimum allocated figure, the Council are therefore actually planning for housing delivery below the requirement. This alone is unsound and justifies a need to allocate additional housing at Corsham. A flexibility level similar to Calne (23%) would be far more appropriate. In addition, one must then remember that the overall true housing need in Wiltshire is higher than that set out in the Core Strategy. Again this justifies a need to introduce a greater element of flexibility and allocate beyond the originally identified levels of housing growth at Corsham.

We also refer to the neighbouring Chippenham Community Area, where we have also identified that much of the suggested supply is not truly developable. As illustrated in Figure 4.1a (Wiltshire Key Diagram) in the Core Strategy, Corsham lies on a 'primary route network', a strategic bus route and has a potential railway station. It is the closest settlement of any notable size to Chippenham and represents the most logical alternative settlement to account for under delivery at Chippenham. The Corsham housing figure is not capped and the settlement has a separate market that can supplement the Chippenham market. This point again re-asserts the need to identify housing allocations at Corsham. Appropriateness of Allocations at Nos.H2.10, 2.11, 2.12, 2.13 & H2.14

As a matter of principle, we strongly object to these proposed allocations, that all occur at identified 'Larger Villages'. The NPPF Core Planning Principles require that plan making decisions should actively manage patterns of growth and focus significant development upon locations which are sustainable. The identification of allocations at 'Larger Villages', particularly in the Chippenham Community Area (that as discussed below is failing to deliver at necessary rates) yet the exclusion of Corsham - an identified 'Market Town' is inconsistent with national policy and does not represent a justified plan when considered against the reasonable alternative of identifying housing allocations at Corsham.

**Infrastructure Constraints**  
Paragraph 4.50 of the plan states that higher rates of development than expected at Calne and Chippenham, cause concerns regarding the adequacy of local infrastructure to support population growth and potential environmental impacts. No allocations are therefore proposed at Calne or Corsham partly on this basis.  
We strongly object to this infrastructure led reason to constrain housing growth. Paragraph 5.62, bullet point 6 of the Wiltshire Core Strategy clearly states that it is developer contributions from future housing that will help to deliver necessary infrastructure in Corsham. The Core Strategy also states that additional community and health facilities are needed, including a permanent and centrally located ambulance standby point in the town. Furthermore, the Core Strategy refers to the potential reopening of Corsham railway station that would act as a significant boost to local businesses and should remain a priority. Such infrastructure and a possible reopening of the train station can only be achieved by assuring that there is sufficient developable land available in Corsham. The provision of such infrastructure could be funded through a revised Regulation 123 list or site specific Section 106 contributions. Ultimately, there is absolutely no evidence that infrastructure constraints justify capping housing growth in this area and the plan is unjustified in this respect.

**Effective Plan**  
The NPPF states that the plan should be deliverable over its full plan period and based on effective joint working on cross-boundary priorities. Having specific regard to the North and West Wiltshire Housing Market Area and Policy H2, the plan proposes housing allocations totaling 1,195 units and claims that it over provides across the market area.  
However, there are several fundamental weaknesses in the above claimed position, particularly in the relevant Corsham and Chippenham areas. These are discussed in turn below.

**Housing Commitments at Corsham**  
There are two particular sites in Corsham that contribute to the Council's suggested housing supply that we have concerns with:  
Land South East of MoD Copenacre, Bath Road, Corsham – This site is scheduled to deliver 29 dwellings. However it forms identical land to that at the site named 'Land at Copenacre, Bath Road' also included in the Council's supply schedule to deliver 100 units under outline permission reference N/12/00836/OUT. A detailed review of the planning history has been undertaken and only 96 dwellings are set to come forward from this land. Consequently the overall contribution from both these sites should be reduced by 33 units. The inclusion of this site therefore results in double counting and the site should not appear in the land supply alongside the original outline planning permission commitment.

#### Appendix Q - Schedule of representations

Old Glove Factory, Adjacent to 25 Brockleaze – The original outline permission at the site expired in February 2017. In the absence of a planning permission, this site should not be included as a commitment and its contribution (10 units) should be removed in full. It should also be noted that an additional site at Hangers 18 – 20, Colerne Industrial Park in the wider Corsham area no longer benefits from a planning permission and again should not be included as a commitment.

The above evidence provides that the 1% flexibility between the Council's suggested commitments and the minimum Core Strategy housing target that the Council asserts is in fact incorrect and the total commitments are actually below the Core Strategy housing requirement. Consequently the plan as drafted fails to even meet the defined minimum housing target for Corsham. This cannot be sound when compared to the logical alternative of identifying additional allocations at Corsham now. We strongly object to the plan for this reason.

**Housing Commitments at Chippenham and across the HMA**

The Council relies heavily on completions from large and strategic sites over the remaining nine years of the plan period. There are a number of sites which are unlikely to deliver in line with the Council's stated trajectories:

Land at North Chippenham – Outline planning permission (LPA Ref.: N/12/00560/OUT) for up to 750 dwellings was granted in February 2016. However, no Reserved Matters application has yet been submitted. This site has to deliver a significant piece of infrastructure in the form of an extension of the existing A350 ring road. There is therefore significant doubt as to whether the site will be developable in full inside the plan period.

Policy CH1 of the adopted Chippenham Site Allocations Plan allocates the South West Chippenham site for up to 1,000 dwellings. An outline permission for a mixed use urban extension (LPA Ref.: 14/12118/OUT) was granted in March 2017. There remains a need to undertake further public engagement, prepare and approve reserved matters applications, discharge multiple conditions, undergo site preparation and clearance works, alongside potential delays associated with existing uses on the land and/or necessary substantial infrastructure works. There is no further application submitted either for reserved matters or discharging of conditions. The Council's suggestion that delivery will occur in this monitoring year is therefore wholly unrealistic. As a best case scenario, first completions may come forward in 2020/21 such that the Council's trajectory is overly optimistic and 340 units of the suggested supply are not developable within the plan period.

Policy CH2 allocates approximately 50ha of land at Rawlings Green. The outline application for up to 700 dwellings (LPA Ref.: 15/12351/OUT) is yet to be determined. Furthermore, the allocation policy itself restricts the development to 200 dwellings in the first phase. This is due to the requirement to complete a bridge over the existing railway and the completion of the so called 'Cocklebury Ring Road'. The completion of this scheme by 2024 and first completions in 2018/19 is overly optimistic, considering the complexity of the infrastructure needed and likely resulting procedural delays.

Land South East of Trowbridge – Outline application for mixed use development with up to 2,500 dwellings (LPA Ref.: 15/04736/OUT) has been submitted, but remains undetermined 2 years on. This is unlikely to be determined in the near future. The Council's trajectory suggests that 1,600 dwellings will be delivered at this site by 2026 and 100 completions will come forward in 2019/20. Subsequent to any potential outline permission, there will then be a selling process in order to identify housebuilders for the scheme, a need to undertake further public engagement, prepare and approve reserved matters applications, discharge multiple conditions, undergo site preparation and clearance works, alongside potential delays associated with existing uses on the land and/or necessary substantial infrastructure works. We therefore consider that whilst some works may occur inside the 5 year period, the site cannot be relied upon to deliver any housing completions inside the immediate 5 year period. We therefore consider that only 850 dwellings could come forward from this site in the plan period (with first completions coming forward in 2022/23). This results in a reduction in developable supply by 750 units.

Two key points arise from the above discussion. First, there is a quantifiable need both in the Corsham and neighbouring Chippenham area to identify additional housing allocations in order to meet the minimum housing targets set out in the Core Strategy. Second, there is a significant risk in the Council's delivery strategy, especially at Chippenham in placing an over reliance upon strategic sized sites. Such sites suffer from significant lead in times prior to delivery are therefore at considerable risk of delay. It follows that there is no flexibility built into the plan, should any component of supply be delayed or fail to deliver. This does not form a justified delivery strategy, when considered against the reasonable alternative of some smaller site allocations at Corsham to supplement the larger site allocations identified.

**Consistency with National Policy**

By failing to effectively meet the defined needs for housing even set as a minimum requirement in the Core Strategy, the plan is contrary to NPPF paragraph 47 that requires Local Authorities to significantly boost the supply of housing. In addition, the identified housing allocations are

#### Appendix Q - Schedule of representations

now consistent with the NPPF's Core Planning Principles. Finally, an over reliance upon strategic sites threatens the Council's ability to demonstrate a deliverable five year supply of housing land.

##### Summary

The necessary solution to insert greater flexibility into the plan is to allocate additional housing allocations at Corsham. This will account for a quantified under delivery that exists in the plan as drafted. In the absence of such amendment, the plan fails to meet the NPPF tests of soundness for the various reasons set out above.

##### Conclusion

For the reasons set out above, the Housing Site Allocations Plan, as drafted, fails the NPPF tests of soundness for the following reasons:

Negatively Prepared – Does not plan for appropriate housing delivery having regard to needs within Wiltshire or adjoining Council areas. Further it fails to allocate a sufficient amount of housing land to meet pressing needs.

Unjustified – The proposed housing distribution strategy is overly reliant on large strategic sites and fails to make sufficient allocations at Corsham.

Ineffective – The plan fails to propose an appropriate housing distribution strategy or introduce sufficient flexibility into the developable supply over the plan period.

Inconsistent with the National Policy – The plan fails to allocate an appropriate amount of housing land or in the right location.

##### Summary

Our client's site offers a deliverable opportunity for a medium density housing scheme and should be allocated accordingly in the Housing Site Allocations Plan. We trust the above comments are of assistance in producing a final version of the plan and await confirmation of receipt of our representations in due course.

We welcome the opportunity to enter into dialogue with the Council in order to further proposals for the potential to deliver a sound plan.

Please do not hesitate to contact the writer should you wish to discuss any matter(s) arising.

Omission Site: Land to the North of Leafield Industrial Estate, Corsham

Land to the north of Leafield Industrial Estate is shown on the attached Location Plan (No. WBP1). The site extends to approximately 6ha, comprising a roughly rectangular shaped field on the southern side of Corsham, adjoining the town's defined settlement boundary. The site is considered to be appropriate for residential development and provides a viable and deliverable development opportunity adjoining Corsham within the coming five year period.

The site benefits from a location within cycling distance of the services and facilities in Corsham Town Centre, where there are also bus services to Chippenham and Bath. The site therefore in location terms (distance to services and facilities) affords a suitable opportunity for housing in accordance with national and regional planning guidance.

Local facilities are focused around the centre of Corsham on the High Street. Local employment opportunities exist at the Leafield Industrial and Fiveways Trading Estates. There are also four primary schools, one senior school, and a number of care homes located within the town.

The site slopes gradually down from south to north and comprises agricultural land fronting onto Upper Potley to the south. To the south of the site is Leafield Industrial Estate, whilst the site is bound by residential development on its eastern side. To the west lie agricultural fields. The main line railway in a deep wooded cutting forms the site's northern boundary. The site is naturally contained on all its sides such that it forms a natural rounding off to the settlement.

It is also noted that the now closed Corsham Railway Station lies within close proximity to the subject site and there is the potential that any major scheme could contribute towards the re-opening of the railway line, a community aspiration and a Core Strategy objective.

The conceptual masterplan CSA/1867/112 shows the site's potential to deliver approximately 140 no. dwellings, alongside sizeable areas of public open space and associated landscaping. The development of the site would strongly contribute to the overall betterment of the area whilst offering housing close to a large employment area.

The latest version of the Council's SHLAA identified our client's site as 'suitable' for housing development and 'deliverable' within the immediate 5 year period (SHLAA Site Reference: 3149 - Land to North of Leafield Industrial Estate). It is no doubt for this reason that the site was identified as one of 4 refined housing development options at the Informal consultation (July – September 2014) stage.

For the reasons set out above the site should be allocated within the emerging plan as a housing site allocation for approximately 140 no. dwellings.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3041</a>	<b>Consultee</b> De Vernon Trustees De Vernon Trustees  <b>Person ID:</b> 556491	<b>Agent</b> Mr Thomas Rumble Woolf Bond Planning  <b>Person ID:</b> 901380	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.41		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Appendix A (Map A41: Corsham Settlement Boundary) [Officer note: It is assumed that this comment relates to Figure A.29 - Proposed amendments to the settlement boundary for Corsham.] Land to the south of Potley Lane, Corsham benefits from detailed planning permission for 64 dwellings (LPA Ref. 16/02523/REM). It is therefore unjustified and ineffective to remove this land from inside the settlement boundary and place it within the countryside. For this reason the settlement boundary should remain as per its current boundary and amended to also include our client's site at land to the north of Leaffield Industrial Estate, Corsham.			
	Conclusion For the reasons set out above [and in comment ID 3040], the Housing Site Allocations Plan, as drafted, fails the NPPF tests of soundness for the following reasons: Negatively Prepared – Does not plan for appropriate housing delivery having regard to needs within Wiltshire or adjoining Council areas. Further it fails to allocate a sufficient amount of housing land to meet pressing needs. Unjustified – The proposed housing distribution strategy is overly reliant on large strategic sites and fails to make sufficient allocations at Corsham. Ineffective – The plan fails to propose an appropriate housing distribution strategy or introduce sufficient flexibility into the developable supply over the plan period. Inconsistent with the National Policy – The plan fails to allocate an appropriate amount of housing land or in the right location. The settlement boundary should remain as per its current boundary and amended to also include our client's site at land to the north of Leaffield Industrial Estate, Corsham. Our client's site offers a deliverable opportunity for a medium density housing scheme and should be allocated accordingly in the Housing Site Allocations Plan. We trust the above comments are of assistance in producing a final version of the plan and await confirmation of receipt of our representations in due course.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.5 Upper Studley			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The public release of the June 2017 Habitats Regulations Assessment for Wiltshire Housing Site Allocations Plan Pre-submission Draft, places a significant emphasis on the danger to habitats. This is far more wide-reaching than hitherto and suggests further obstacles to the development of site 3565. The public release of this document comes literally at the conclusion of the consultation period and does not provide the opportunity for informed public scrutiny of this document and the inclusion of this information within public objections.</p> <p>This timing could be seen to be highly suspicious, especially in the light of the cancellation of the promised second public presentation in Trowbridge (committed to in June 2017 and cancelled at the end of August with little or no public information) and the refusal to even acknowledge requests to extend the consultation process to make allowances for officers' summer leave arrangements.</p> <p>The fact that this document has been referenced in Council documentation and has not been available for independent scrutiny and public access for the entire period of the consultation is a matter of grave concern and questionable procedure. Any public access has been based on the 2012 HRA and does not contain references to surveys made by Wiltshire Wildlife in 2015, 2016 and 2017 which are of direct relevance to the Site Allocation Proposal.</p> <p>If there is no reasonable explanation for the release of the HRA June 2017 document, at such a late date in the consultation process, the person who authorised this delay should be held publicly accountable.</p> <p>The public release of the 2017 HRA made yesterday clearly states that: Recommendations on page 76 specifically relate to Site 3565 and state. 'Recommendations (continued) Bath and Bradford on Avon Bats SAC Habitat Loss / Deterioration H2.5 – Upper Studley The site is in an area likely to be used by Bechstein's bats associated with the Bradford and Bath Bats SAC. Sensitive habitat features on / adjacent to the site include: Boundaryhedgerows/ tree lines LambrookStream These features should be retained and / or buffered from development (including residential gardens) by wide (10-16m), dark (&lt;1 lux) dark continuous corridors of native landscaping which will allow for their long-term protection and favourable management in order to secure continued or future use by Bechstein's bats.'</p> <p>This recommendation therefore makes access to the full site impossible and therefore the site MUST be removed from the Proposal. Directives in the 2017 HRA should be adhered to, and site 3565 should be removed from the proposal forthwith.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.7				Justified  Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Paragraph 47 of the NPPF requires that the full objectively assessed needs for market and affordable housing (OAN) is met within the Housing Market Area (HMA) as far as is consistent with the policies set out in the NPPF.</p> <p>The Wiltshire Core Strategy Inspector issued a letter on 2nd December 2013 (large parts of which are maintained in his Final Report) which identified that the OAN was in the region of 44,000 dwellings over the plan period. Nevertheless, the Inspector went on to accept a housing requirement of 42,000 dwellings.</p> <p>The High Court Judgment of Jelson Limited vs Hinckley and Bosworth Borough Council et al [2016] EWHC 2979 (Admin), defines what is meant by the terms OAN and housing requirement in paragraph 41, as follows:</p> <p>"Full Objective Assessment of Need for Housing: This is the objectively assessed need for housing in an area, leaving aside policy considerations. It is therefore closely linked to the relevant household projection; but it is not necessarily the same. An objective assessment of housing need may result in a different figure from that based on purely demographics...</p> <p>Housing Requirement: This is the figure which reflects, not only the assessed need for housing, but also any policy considerations that might require that figure to be manipulated to determine the actual housing target for an area. For example, built development in an area might be constrained by the extent of land which is the subject of policy protection, such as Green Belt or Areas of Outstanding Natural Beauty. Or it might be decided, as a matter of policy, to encourage or discourage particular migration reflected in demographic trends. Once these policy considerations have been applied to the figure for full objectively assessed need for housing in an area, the result is a "policy on" figure for housing requirement. Subject to it being determined by a proper process, the housing requirement figure will be the target against which housing supply will normally be measured."</p> <p>This identifies that a policy-on housing requirement can be different from the policy-off OAN to achieve particular policy objectives, such as protecting environmental assets or preventing unsustainable cross boundary relationships. However, in Wiltshire no such policy objective was fulfilled through the adoption of a housing requirement below the OAN. The reasons were in effect that:</p> <ul style="list-style-type: none"> <li>the OAN could not be achieved;</li> <li>the Council could not demonstrate a five-year land supply against the OAN;</li> <li>the OAN was not assessed as being the preferred option through the Sustainability Appraisal; and</li> <li>the Council were committed to rapidly reviewing and responding to the OAN.</li> </ul> <p>However, none of these reasons can now be justified (as described below) and so there can be no reason for not meeting the full OAN as required by paragraph 47 of the NPPF.</p> <p>The OAN could not be achieved</p> <p>Wiltshire delivered in excess of the annualised housing requirement in 2013/14 and in 2014/15, even in the absence of allocations prior to 2015. This clearly demonstrates that the adopted housing requirement can be sustainably exceeded. Indeed, now that the Strategic Allocations of the Core Strategy (and the Chippenham Site Allocations Plan and Neighbourhood Plans) are delivering it would be expected that these rates of</p>			

## Appendix Q - Schedule of representations

delivery would increase significantly. This entirely undermines the previous evidence presented to the Inspector examining the Wiltshire Core Strategy that such rates of development were unachievable.

The Council could not demonstrate a five-year land supply against the OAN

Based on the Council's figures and method of calculation, the Council would currently be able to identify a five-year land supply against a housing requirement of 46, 158 dwellings (7,440 in East Wiltshire HMA; 27,898 in North and West Wiltshire HMA; 10,820 in South Wiltshire HMA) in addition to the allowance for 900 dwellings at the West of Swindon. The adopted housing requirement can therefore be increased to reflect (or even exceed) the OAN in accordance with the NPPF.

The OAN was not assessed as being the preferred option through the Sustainability Appraisal

The Sustainability Appraisal (SA) has evolved since the adoption of the Core Strategy, and this has been used to inform the Housing Site Allocations Plan which proposes to deliver circa 46,600 dwellings.

The Council were committed to rapidly reviewing and responding to the OAN

The Inspectors Final Report relied upon the Council producing a new SHMA by early 2016 (see paragraph 81). This would have enabled the Council to respond positively to address the identified needs through the planned early review of the Core Strategy. However, in the intervening 3 years, no such SHMA has been produced and there has been no progress on the early review of the Core Strategy. It is self-evidently the case, that the Council have not re-assessed needs and responded appropriately. The continued reliance upon the commitments of the Council to identify and address the OAN should not be afforded weight, given that the previous commitments have not been fulfilled.

Based on the preceding analysis, there is no evidence and no justification for not meeting the OAN in full in Wiltshire, as required by paragraph 47 of the NPPF. The Housing Site Allocations Plan should therefore seek to deliver the OAN of 44,000 dwellings. Such an approach would be wholly consistent with the housing requirement of the Core Strategy which requires the delivery of at least 42,000 dwellings.

The SHMA

Wiltshire Council and Swindon Borough Councils have jointly commissioned a SHMA. A draft of this document was presented at workshops in October 2016 although the document was not published. However, in the following year no further progress has been made towards the publication of this SHMA. This is highly unusual given that SHMAs typically take only a few months to produce and that the Wiltshire Core Strategy Inspector had relied upon the publication of this document in early 2016 to find the Wiltshire Core Strategy sound.

This SHMA should be published as soon as possible in order that participants can either be reassured that the Development Plan for Wiltshire is doing its job and meeting the OAN in full; or that appropriate action can be taken to identify additional sources of supply.

The Standardised Methodology

The Government are due to consult upon a standardised methodology for the OAN in September 2017. Whilst this will only be a consultation document and the weight to be afforded should be viewed in this context, it will provide an indication of the OAN for Wiltshire.

Once the SHMA and/or the standardised methodology is made available, it will be necessary for the OAN to be responded to within the Housing Site Allocations Plan in accordance with the findings of the Inspector Ware regarding the Harrogate District Sites and Policies DPD who identified that where the OAN had been reassessed it is necessary to take this into account in a Site Allocations Plan. The same finding has recently been reached by Inspector Lyons in relation to the Forest of Dean Site Allocations Plan.

Based on the preceding analysis, it is clear that in order to accord with national policy, it is necessary for the Housing Site Allocations Plan to deliver the full OAN for Wiltshire, taking account of the identified OAN (44,000 dwellings) and any newly arising evidence.

**DISTRIBUTION OF GROWTH BETWEEN THE HMAs**

Wiltshire contains 3 HMAs, each of which is planned to deliver at least 9% in excess of the Core Strategy minimum housing requirement (according to Table 4.7). Provision of a level of housing in excess of the minimum housing requirements, and cumulatively in excess of the currently identified OAN is to be supported providing this supports the spatial distribution identified in the Core Strategy.

**DISTRIBUTION TO THE SUB AREAS**

The Core Strategy contains approximate housing requirements for each sub-area (towns and CA remainders). These approximate requirements are essential to ensure the spatial distribution of the Core Strategy.

Whilst the sub-area housing requirements are approximate it is necessary for the Housing Site Allocations Plan to conform to these (approximately) to be in accordance with the spatial distribution of the Core Strategy. However, the planned supply identified in the Draft Plan (Tables 4.9 to 4.11) deviates significantly from the adopted spatial distribution in a large number of sub-areas, including a significant shortfall (of

#### Appendix Q - Schedule of representations

more than 10%) in Marlborough CA remainder, Tidworth CA remainder, Chippenham CA remainder, Trowbridge Town, Warminster Town, Amesbury CA remainder, Mere CA remainder, Wilton CA remainder, Tisbury and Tisbury CA remainder. Additional allocations will be required in these sub areas to ensure consistency with the adopted spatial distribution.

Furthermore, the approximate requirements are consistent with the adopted housing requirement, which as addressed previously does not fulfil the objectives of national policy as this does not provide for the OAN. It is therefore appropriate to apply a 5% uplift to these approximate sub-area requirements to be consistent with the OAN (which is 5% greater than the housing requirement).

Once this necessary uplift is applied, there would be an even greater shortfall in the planned supply in these sub-areas (although not in any other sub-areas).

Additional allocations are required in these sub-areas to meet the OAN whilst maintaining the spatial distribution of the Core Strategy and to accord with the approximate requirements of the Core Strategy, even on the basis of the Council's own figures. The accuracy of these figures is addressed below.

#### DEVELOPABLE SUPPLY

The Council have identified the developable supply in the CA Topic Papers and in Table 4.9 of the draft Plan. However, the Council have not identified the individual components that make up this supply and as such the total figures in Table 4.9 cannot be relied upon. The necessary evidence should have been made available for this consultation, and will be required prior to examination. Pegasus Group reserve the right to submit detailed representations on this when the necessary evidence is made available.

The latest assessment of the developable supply which is available is contained in the Wiltshire Housing Land Supply Statement Update March 2017 (HLSS). It is useful to consider some of the components of supply identified in this report in order to assess the robustness of the Councils current unpublished assessment.

There are a number of sources of supply in the HLSS which should not be relied upon to deliver as outlined below.

#### Windfall allowance

The Draft Plan includes a windfall allowance based on the previous delivery of previously developed sites. This source of supply is in itself uncertain, but it is useful as an indication of what would be delivered if previous rates of delivery were able to be maintained.

There are however, two methodological flaws in the approach the Council take to calculating the windfall allowance.

Firstly, the Council propose to allocate at least one previously developed site (at Chapmanslade) which would otherwise have been classified as windfall development. The inclusion of this site as an allocation as well as maintaining the windfall rates results in double counting. This makes only a minor difference of 35 dwellings.

Secondly, the Council have changed their methodology for calculating the windfall allowance since the examination of the Wiltshire Core Strategy. At that time, the Council assumed that small sites would deliver circa 575 dwellings and that large sites would deliver circa 364 dwellings totalling 939 dwellings within five years. However, the Council now assume that there will be 1,611 windfall dwellings within five years.

This has been calculated using a consistent methodology for calculating the small site allowance (although based on a different period) from which it can be calculated that the Council now assume that circa 1,036 dwellings will be delivered on previously developed large windfall sites.

This is despite the fact that the Council do not have any evidence that there is sufficient capacity on such sites to deliver this level of housing. Indeed, at the time of the examination the Council identified a total potential capacity of only 364 dwellings (and some of these may have subsequently gained consent and so be included in the developable supply already).

The approach of the Council in regards to the large windfall allowance relies upon the delivery of a level of dwellings for which there is no evidence that there is the requisite capacity. Indeed, the Council rely upon the trends of large windfall development in recent years, but this is inevitably hugely variable and a single large windfall development can have a disproportionate effect on the average.

#### Saved Local Plan Allocations

The Council continue to rely upon the delivery of saved Local Plan allocations in the HLSS. This includes sites which were allocated in the North Wiltshire Local Plan in June 2006, the Salisbury District Local Plan in June 2003, and the West Wiltshire District Plan 1st Alteration in June 2004.

Despite the fact that these sites have been allocated for development for between 11 and 13 years, there has been no progress towards site delivery.

## Appendix Q - Schedule of representations

The record of delivery of sites needs to be taken into account when assessing the availability of sites as set out in the NPPG (3-020). These saved allocations have an extensive record of non-implementation and against this background the certainty of any delivery from these sites is limited. Accordingly, in accordance with the NPPG these sites should not be relied upon to deliver.

### Neighbourhood Plan Allocations

The HLSS also includes a number of Neighbourhood Plan allocations which are not subject to planning applications. The developability of sites is not required to be demonstrated in order for a Neighbourhood Plan to be made. Indeed, this is demonstrated by the fact that Wiltshire Council do not consider that the majority of sites allocated in the Devizes Neighbourhood Plan will deliver prior to 2024 in the HLSS.

The fact that the Council do not consider that these sites are deliverable for an extended period casts doubt on whether these sites will deliver at all. Even if they do deliver, it would only take a minimal delay for them to deliver outside of the plan period. As such, these sites should not be relied upon to deliver in the absence of detailed evidence.

### Newly arising information

It is understood that new information in relation to the delivery of some sites has been made available to the Council, including through recent planning inquiries. By way of example, a new trajectory for Ashton Park was provided to the recent Lyneham inquiry since the publication of the Draft Plan. This identifies that this allocation will deliver 300 fewer homes during the plan period.

The Inspector in this case also considered that the trajectories for some other sites were overly optimistic and these should also be delayed, which is likely to further reduce the developable supply.

The effects of these necessary adjustments to the identified supply cannot be identified in full until the supporting evidence is made available. Nevertheless, based solely on this analysis, it is clear that the supply relied upon by the Council is overly optimistic. Indeed, it is estimated that the above would reduce the developable supply by circa 3,734 dwellings. With a detailed site specific analysis, it is likely that the supply would be even lower.

Table 4.7 of the Draft Plan identifies that with the proposed allocations and including an allowance for windfall, it is expected that 45,639 dwellings will be delivered across the plan period, although an additional 950 dwellings will be provided to the west of Swindon. However, with the removal of at least 3,734 dwellings this would amount to only 41,905 dwellings to meet the requirements of Wiltshire in addition to the 950 dwellings at the west of Swindon. This would marginally exceed the adopted housing requirement but would be over 1,000 short of meeting the OAN, even if every site delivered on schedule. The resultant shortfalls would exist in each HMA and would necessitate additional allocations in each

However, such allocations would be required to conform to the adopted spatial strategy and so should be located in the sub-areas which have significant shortfalls in the planned supply including Marlborough CA remainder and Trowbridge Town.

### MONITORING

The Housing Site Allocations Plan is one of the delivery mechanisms for the Core Strategy. As such, the Council will be required to demonstrate that a five-year land supply exists at adoption. The Council have not yet produced the HLSS for 2017 which will be required to demonstrate this and so Pegasus Group reserve the right to submit comments on this matter when the relevant information is available.

The examination of the Housing Site Allocations Plan provides the opportunity to set the framework for monitoring housing delivery through the remainder of the plan period. Such an exercise will prevent this matter being continually debated through S78 appeals as has happened for many years.

### The Buffer

Paragraph 47 of the NPPF requires that a 5% buffer is applied to the five-year housing requirement, but where there is a record of persistent under-delivery this should be increased to 20%.

The Council assess the record of delivery against the adopted housing requirement, which in itself does not represent the OAN. This means that even if the housing requirement was achieved there would still be a record of under-delivery against the housing needs. It is therefore necessary to treat the housing requirement as an absolute minimum.

Even against this housing requirement, East Wiltshire HMA has under-delivered in 60% of years; North and West Wiltshire HMA in 70% of years; and South Wiltshire HMA in 80% of years.

The Local Plans Expert Group report to Government proposed that where there was under-delivery in 65% of years this would equate to a record of persistent under-delivery. Similar approaches have been supported by Inspectors at S78 inquiries (for example ref: 3025120). This would

Appendix Q - Schedule of representations

	<p>indicate that a 20% buffer is required in both North and West Wiltshire HMA and in South Wiltshire HMA. Indeed, in these HMAs, the record of delivery has resulted in a significant shortfall against the housing requirement across the plan period to date.</p> <p>The approach to dealing with undersupply</p> <p>Wiltshire Council adopt the Liverpool (or residual) approach to addressing undersupply which has arisen over the plan period to date. This approach has been adopted in Wiltshire since before the publication of the NPPG.</p> <p>The NPPG (3-035) identifies that:</p> <p>"Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. Where this cannot be met in the first 5 years, local planning authorities will need to work with neighbouring authorities under the duty to cooperate."</p> <p>This is commonly referred to as the Sedgefield approach, and it is the preferred approach of the Government where there is undersupply (NB - where there is no such undersupply, there is no guidance of the appropriate approach). To adopt an alternative approach (including the Liverpool approach) it would be necessary to demonstrate that it was not possible to adopt the Sedgefield approach and that the Council was working jointly to address any five-year land supply shortfalls with neighbouring authorities.</p> <p>Indeed, this matter was discussed in detail during the appeal regarding Land off Park Road, Malmesbury (2200503) where the Inspector identified that it was necessary to adopt the Sedgefield approach to accord with the NPPG. This recommendation was supported by the Secretary of State.</p> <p>In the South Wiltshire HMA it would not be possible to demonstrate a five-year land supply using the Sedgefield approach. The Council should therefore have worked with neighbouring authorities to address the current shortfall, but they have not done so. In the absence of such joint working, it is necessary to adopt the Sedgefield approach and identify additional allocations to demonstrate a five-year land supply</p> <p><b>CONCLUSIONS</b></p> <p>The Draft Housing Site Allocations Plan will not provide for the OAN in any of the HMAs as required by national policy. Furthermore, the allocations proposed do not accord with the adopted spatial distribution of the Core Strategy.</p> <p>In order to address this, it will be necessary to identify additional allocations in those sub-areas which have a significant shortfall against the approximate sub-area housing requirements (which themselves do not meet the OAN).</p> <p>Furthermore, the Draft Housing Site Allocations Plan does not provide the requisite five-year land supply for South Wiltshire HMA in accordance with national guidance. It will therefore be necessary to identify additional allocations within this HMA.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Longford Estate welcome the opportunity to discuss with the Inspector the merits of Site 3435 coming forward as an omission site to address the shortfall resulting in the proposed amendments detailed above.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3044</a>	<b>Consultee</b> Land Value Alliances Ltd Land Value Alliances Ltd  <b>Person ID:</b> 1136406	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Future Housing Requirements in Wiltshire</p> <p>LVA are concerned with the timing of the proposed submission consultation on the SADPD (which allocates sites until 2026) and the fact it takes no account of the potentially imminent review of the WCS (which will allocate sites until 2036) which will be informed by a new SHMA. Without the partial WCS review in place there is a risk that the SADPD (scheduled for adoption in winter 2018) along with any made Neighbourhood Plans in Wiltshire will become out of date very quickly. This is especially concerning considering the significant delays which have taken place with production of the SHMA (initially anticipated for early 2016).</p> <p>LVA consider that more sites should be allocated in the SADPD now (reserve sites at the very least) which will provide certainty and flexibility to Wiltshire and will avoid the risk of having to restart this process again when the SHMA is available and the partial review of the WCS takes place. Indeed the adopted WCS housing requirement was identified as a 'minimum' to ensure opportunities for residential development can come forward in a sustainable manner without comprising the Plan, which ensures a flexible approach can be followed.</p> <p>The need to provide greater flexibility and allocate more sites is supported by the governments approach endorsed in the recently published consultation 'Planning for the right homes in the right places: consultation proposals' (September 2017) on further measures set out in the housing white paper to boost housing supply in England. This proposes a standard method for calculating local authorities' housing need. The standard methodology approach suggests that LPAs may require a significant boost in housing in the future, this including Wiltshire which is one of the larger LPA areas</p> <p>in the country. It is important to note that the household projections figure simply shows the bare minimum that will be required in order to stand still and 'to boost significantly the supply of housing' for many LPAs including Wiltshire this number may raise significantly once further factors are taken into account.</p> <p>Based on the above LVA do not consider that the SADPD is sound as currently drafted as it is not the most appropriate strategy when considered against reasonable alternatives. For the Plan to be sound LVA would urge the Council to allocate more sites for residential development now to provide certainty and flexibility.</p> <p>Overall Housing Requirement in SADPD                  Core Policy 2 of the WCS sets out that sites for development will be identified through subsequent Site Allocations DPDs and by supporting communities to identify sites through neighbourhood planning. Therefore, the SADPD is the vehicle (along with neighbourhood plans) to allocate</p>			

Appendix Q - Schedule of representations

	<p>sites to meet the 'minimum' WCS housing requirement of 42,000 between 2006 and 2026.</p> <p>Figure 5 of the draft SADPD suggests that 3,497 completions have taken place in the East HMA between 2006-2017 with 2,273 developable commitments available for the remainder of the plan period, leaving only a requirement of 170 dwellings. Importantly Figure 5 states this as 'minimum to be allocated' and is not a cap on further development which is consistent with Core Policy 2 of the adopted Core Strategy and reflects the aims of Paragraph 47 of the NPPF to 'boost significantly the supply of housing'.</p> <p>LVA welcome that the requirement for each HMA has been expressed as a minimum. It will be important that the draft SADPD fully embraces this to ensure that sufficient sites which are suitable for development in sustainable locations can come forward in addition to the allocations proposed. This will ensure a flexible approach to housing in Wiltshire and it is especially important to allocate enough sites now to reflect future requirements which may be required once further evidence is published relating to the OAHN.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Neighbourhood Plans It is acknowledged that neighbourhood plans have an important role to play in delivering housing requirements in Wiltshire in the plan period. At paragraph 2.22 of the draft SADPD it states: “The work being done on Neighbourhood Plans influences the selection of sites and where Neighbourhood Plans have been ‘made’ or are well advanced the Plan leaves decisions on the scale and locations for growth in settlements to the communities concerned.” Furthermore, paragraph 4.5 of the draft SADPD states; “No allocations are made at Large Villages in the East Wiltshire HMA because there is no strategic priority to do so due to the level of completions and supply committed within the HMA. Housing to meet local needs can be identified where necessary through neighbourhood planning.” Whilst LVA generally support this approach, they raise concerns with Neighbourhood Plans which have not yet been made and are still at an early stage and which are proposed to deliver housing to meet local needs in the future, especially for the large villages. Whilst sites are often identified in neighbourhood plans to deliver sustainable development it will be important to ensure that neighbourhood plans are not used as a mechanism to restrict development (to avoid an antidevelopment stance) which in turn could have an impact on the delivery of important sites in Wiltshire. In addition, the uncertainty regarding timescales of the production of neighbourhood plans is another potential issue. This was a particular concern to the Inspector who examined the WCS albeit was seen in the context of the early review of settlement boundaries to ensure they are up to date. In the Inspectors Report for the WCS (December 2014) when considering the settlement strategy proposed in the WCS he noted at paragraph 36: “To review boundaries, the CS identifies community led planning as the vehicle to deliver the necessary updates. However, there remains a considerable risk that, for example, Neighbourhood Plans will not be delivered across the country in a comprehensive or timely fashion. Such an outcome would, in the context of the CS Settlement and Delivery Strategy, potentially preclude development initiatives on the basis of an unjustified evidence base and therefore no represent a positive form of planning.” This exemplifies the importance of bringing forward more sites which are suitable and available for development now through the SADPD process due to the potential risk posed by significant delays in neighbourhood plans.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">3046</a>	<b>Consultee</b> Land Value Alliances Ltd Land Value Alliances Ltd  <b>Person ID:</b> 1136406	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Deliverability of Sites</p> <p>A Housing Trajectory is not included in the Plan or as an evidence base document. LVA consider it is very important for an up to date trajectory to be included in the Plan so that it is clear how many dwellings each site is expected to yield and at what point in the Plan period. We note that the latest trajectory available for public viewing is from the Wiltshire Housing Land Supply Statement dated November 2016. The Council have referred us to the 2016 Housing Land Availability Report showing the most up to date housing delivery figures (with a base date of April 2016), however no detailed housing trajectory is provided in this document.</p> <p>In terms of the East HMA, the 2016 trajectory predicts that 80 dwellings will delivered in the 2019/2020 period for the Horton Road site. For the Riverbourne Fields site the trajectory predicts delivery of 83 in the 2019/2020 period and a substantial 156 dwellings in the 2018/2019 period. In later years for this site (2020/21 and 2021/22) the trajectory predicts that the site will only deliver 18 dwellings in each year. LVA consider that these figures are too high and would urge the Council to provide evidence justifying these significant rates as it is not clear this has been provided. As set out above the Council will firstly need to prepare a new trajectory for the 2017/2018 base year.</p> <p>LVA also raise concerns with sites which are expected to deliver housing in the period 2017/2018 (i.e by end of March 2018) with some sites not delivering as quickly as expected and some which have not yet even started construction. The trajectory suggests that a large proportion of the five year land supply of sites will come from large allocations and it is unclear whether all of these will come forward as expected. One of the largest allocations which is expected to deliver a significant quantum of housing in the next five years is 'Land West of Salisbury Road in Marlborough' (site E15.2026).</p> <p>In this trajectory Wiltshire Council have indicated that 175 dwellings will be delivered on this site by 2021/22. An outline application for 175 dwellings was approved on July 2016 (LPA Ref:15/02026/OUT). The trajectory suggests 55 dwellings will be delivered on this site in 2017/2018 (i.e.by end of March 2018). A reserved matters application for 168 dwellings on the same land was live at the time of writing, however there is still likely to be a need to discharge relevant planning conditions, therefore it is unlikely whether the site will come forward as quickly as suggested. Based on a site visit to date we can confirm construction is yet to begin on this site with no obvious signs this will begin in the near future therefore LVA question whether 55 dwellings will be delivered by April 2018.</p> <p>Based on the above, the SADPD provides an opportunity for the Council to allocate additional sites to provide flexibility in their housing supply and reflecting the status of sites which are not delivering as expected.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">3047</a>	<b>Consultee</b> Land Value Alliances Ltd Land Value Alliances Ltd  <b>Person ID:</b> 1136406	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Allocations in East HMA</p> <p>Figure 5 of the draft SADPD suggests that 3,497 completions have taken place in the East HMA between 2006-2017 with 2,273 developable commitments available, leaving only a requirement of 170 dwellings to be delivered in the remainder of the plan period. Policy H1 of the draft SADPD proposes land allocated for residential development on a number of sites in the East HMA including in Market Lavington which are discussed below.</p> <p>Three allocated Market Lavington Sites (H1.2 – H1.4)</p> <p>Paragraph 5.23 of the draft SADPD notes that Market Lavington is an area affected by flooding, it states:</p> <p>“Surface water management and flood risk: parts of Market Lavington are affected by surface water flooding during extreme weather events. In part this is due to the village’s proximity to the chalk escarpment associated with the Salisbury Plain”</p> <p>Furthermore, all three sites are shown in the Sustainability Appraisal (SA) to have a moderate adverse effect on the objective to use and manage water resources in a sustainable manner (objective 3) and to minimise impacts on climate change through reducing vulnerability to future climate change effects.</p> <p>LVA raise concerns regarding the allocation of sites located in areas at risk to flooding which should be discounted unless it can be demonstrated that there are no other reasonable options available.</p> <p>LVA consider that locating further growth in sustainable locations in large villages such as Worton should be considered as a reasonable alternative to sites located in floodplains. This is particularly the case for Land at Sandlease Farm which is not constrained by the floodplain and has no insurmountable constraints which would prevent development coming forward.</p> <p>In addition we are not aware of any technical assessments which have been prepared to demonstrate the acceptability of residential development on the sites proposed as allocations in Market Lavington. In particular we note the Underhill Nursery site (H1.2) allocated for approximately 50 dwellings does not appear to be have been assessed in relation to access. Indeed the SA states (SA objective 10):</p> <p>“It should be noted that access to this site is constrained and this would need to be investigated further if this site progresses to any further stage</p>			

Appendix Q - Schedule of representations

	<p>in the site selection process.”</p> <p>LVA question whether a suitable access can be achieved at this site without having to use land outside of the red line. This is an issue which could prevent development coming forward. On this basis further sites which are suitable for development and deliverable in the plan period should be allocated in the SADPD.</p> <p>Based on the above LVA consider the Plan is not sound as it has not considered all reasonable alternatives and has based its strategy on allocating sites with doubts regarding their suitability without consideration of other sites which are less constrained and located in more sustainable locations.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>A number of issues are raised in the representation letter regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3048</a>	<b>Consultee</b> Land Value Alliances Ltd Land Value Alliances Ltd	<b>Agent</b> Mr Jonathan Chick Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1136406	Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The potential for development of land at Sandlease Farm, Worton</p> <p>As set out in the previous sections LVA consider that further sites should be allocated in the SADPD for the following reasons:</p> <ul style="list-style-type: none"> <li>• The status of the new SHMA and partial WCS review which could have implications on the OAHN in Wiltshire;</li> <li>• The flexible approach endorsed in the adopted WCS which suggests the overall housing requirement is a 'minimum' with 'indicative' requirements for each Community Area;</li> <li>• The uncertainty regarding timescales for the production of neighbourhood plans;</li> <li>• The doubts about the delivery of some sites in the East HMA and their build out rates;</li> <li>• Concerns regarding the suitability of sites proposed as allocations in Market Lavington.</li> </ul> <p>Based on these points LVA consider that the plan is not justified and not consistent with national policy, therefore is not sound. At a very minimum reserve sites should be allocated now in the event that the OAHN significantly increases when the SHMA is published/partial review of WCS takes place, but it would be prudent to allocate sites for development now which are available and can be delivered quickly to ensure the Council does not encounter problems in the future.</p> <p>In particular we draw the Council's attention to Land at Sandlease Farm in Worton which is a sustainable site capable of delivering housing development. The application area comprises approximately 2.1 hectares of undeveloped land to the east of Worton. The site is outside but immediately adjacent to the limits of development of Worton and next to existing residential development on two sides to the north and west, as shown on the attached site location plan (Appendix 1).</p> <p>Worton comprises a relatively large linear settlement which is served by a number of key facilities including a primary school, park, playing field, church, public transport service and public house. Notably a small part of the LVA site forms part of a much larger site which has been registered as a SHLAA site on a map of Worton (ref: 1068) and this was considered in an informal consultation on the SADPD in February 2015.</p> <p>LVA have promoted the site through the Worton Neighbourhood Plan process and have attended a number of meetings with the Steering Group.</p>				

## Appendix Q - Schedule of representations

The site is being considered as an option for growth as part of this process.

The site was subject to an outline planning application in February 2017 for up to 26 dwellings (reduced from 29) which helps to confirm the sites overall suitability for development (LPA Ref:17/01905/OUT). The land still represents an opportunity for development and could make an important contribution to meeting future market and affordable housing needs. It should be noted that the land is in control of Worton LVA LLP and is available for development now. For reference an illustrative masterplan is submitted in support of these representations to demonstrate how development on the site can be accommodated (Appendix 2). This masterplan has been prepared following a detailed assessment of likely constraints and opportunities, and includes a large open space buffer to the south of the site which retains the existing village edge.

The proposals were shaped by pre-application discussions with Wiltshire Council and on-going engagement with key stakeholders, including the Parish Council, Neighbourhood Plan Group and the local community. LVA consider development on this site can provide the housing needed in Worton and provide the following benefits for the local community;

- Create a thriving community by providing a range of new homes at the logical site in Worton.
- New homes for first time buyers, families and existing residents who wish to down size.
- Provide affordable housing for local people who are unable to buy on the open market.
- Support sustainable growth of Worton in order to retain and develop local services.
- Fund local infrastructure projects and contribute to local education facilities (including the school which has a shortage of pupils according to the latest village survey).
- Enhance the existing Public Rights of Way.
- Enhance the village connections with the existing Sandlease play area.
- Create a new area of public open space and recreation for the whole community to enjoy.
- Round off and protect the southern edge of Worton whilst retaining and improving the existing pedestrian and cycle links to Sandlease Playing Field to the west of the site.

Prior to submission of the planning application local residents were made aware of the proposals via a leaflet dropout, the process is set out in the submitted statement of community involvement. The planning application was also supported by a suite of baseline assessments including the following:

- Flood Risk Assessment (including Drainage Strategy) (Appendix 3)
- Ecological Assessment (Appendix 4)
- Transport Assessment (including Proposed access details) (Appendix 5)
- Landscape and Visual Impact Assessment (Appendix 6)

Appendix Q - Schedule of representations

	<ul style="list-style-type: none"> <li>• Geophysical Survey (Appendix 7)</li> <li>• Contaminated Land Desk Study (Appendix 8)</li> </ul> <p>The above baseline assessments have not identified any insurmountable constraints which would prevent development from coming forward. These documents were also subject to consultation with consultees during the planning application process. Notably the proposals received no technical objection from the Wiltshire Transportation Officer who has confirmed that the proposed access from High Street is acceptable. In addition the proposals have received support from the Parish Council subject to achieving a safe access to the site.</p> <p>Significantly the only outstanding technical matters related to local landscape impact and the need for further archaeological investigation (which Wiltshire would not condition). Our client has instructed the further archaeological work in the form of trial trenching which we anticipate will be completed shortly.</p> <p>Summary</p> <p>Overall LVA raise broader concerns with the draft SADPD and consider that further sites in sustainable locations should be allocated now to ensure a flexible approach. This is particularly the case for sites such as Land at Sandlease Farm in Worton which is in a sustainable location, has no insurmountable constraints and is available to deliver housing now.</p> <p>We wish to take part in the forthcoming examination and reserve the right to comment further if the issues raised aren't addressed satisfactorily in future versions of the SADPD.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4739513 / 4739515 / 4739518 / 4739519 / 4739520 / 4739516 / 4739514 / 4739517</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>A number of issues are raised in the representation letter regarding soundness of the plan. Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3049</a>	<b>Consultee</b> Mr Alasdair Jones-Perrott Estate Manager  Longford Estate  <b>Person ID:</b> 900160	<b>Agent</b> Mrs Alison Whalley Associate Planner  Pegasus Planning  <b>Person ID:</b> 900154	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>  Effective		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Salisbury - Netherhampton Road				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan Pre-Submission (Regulation 19) draft plan (WHSAP) was published for public consultation on Friday 14th July 2017, the consultation runs until Friday 22nd September 2017.</p> <p>These representations are submitted on behalf of Longford Estate and relate to the allocation of sites and the resultant housing land supply in the Southern Wiltshire Housing Market Area.</p> <p>The WHSAP is a daughter development plan document to the adopted Wiltshire Core Strategy (2015) (WCS). The WCS set out minimum housing requirements for each of the three Housing Market Areas in the County.</p> <p>Policy H3.1 of the WHSAP states the following:                  "Approximately 63ha of land at Netherhampton Road, as identified on the policies map, is proposed for mixed-use development comprising the following elements:                  Approximately 640 dwellings                  Land for employment (81, 82 and 88 uses of the Use Classes Order                  At least 1.8ha of land for a two form entry primary school along with playing pitches                  A local centre                  A Country Park of at least 10ha in size with associated parking and facilities.                  Development will be subject to the following requirements:                  Strategic landscaping and open space provision . All built development to be located below the 75m contour and a Country Park to be located in the east and south of the site.                  Transport network improvements necessary to accommodate the scale of development envisaged                  Provision of sufficient school and healthcare capacity to meet the need created by the development                  Measures to safeguard the interest of Harnham Hill Chalk Pit SSS/ and Harnham Slope County Wildlife Site.                  Surface water management that achieves equivalent or less than current greenfield rates of run off.                  Development will take place in accordance with a masterplan for the site approved by the Council."                  The WHSAP proposes to allocate 750 houses in the Salisbury Community Area. Site S1028 would accommodate the vast majority (640) with 100 houses proposed on the site opposite (Site S1027(It is noted that Wiltshire Council do not expect Site S 1027 to come forward within the plan period.)), 100 houses to extend the existing Rowbarrow housing development (Site 3272), and 10 houses at Hilltop Way (Site S61).                  The Plan therefore proposes to allocate 85% of the potential future housing in Salisbury in one location at Netherhampton Road. Longford Estate have several major concerns in this regard:                  Highways Impact                  The Netherhampton Road sites are located in an area already noted in Wiltshire Council's Transport Model Forecasting report as having two key access junctions which are highway hotspots. These are: Harnham Gyratory and Park Wall Junction. Any development at Netherhampton Road</p>				

Appendix Q - Schedule of representations

	<p>would severely impact on these two junctions which are already over capacity in peak periods. See the representations made in relation to Paragraph 5.128.</p> <p>The Summary of the Salisbury Transport Strategy is included at Appendix 3. Paragraph 5.6 states that:          "Junction improvements tend to result in more traffic passing through a particular junction and thus consume any of the additionally created capacity. This is particularly so in Salisbury, where the Netherhampton Road provides an alternative route for traffic passing through Salisbury and improvement to traffic flow through the Harnham Gyratory would result in more traffic travelling along Netherhampton Road rather than along the A36."</p> <p>This implies that Netherhampton Road could (in 2012) accommodate increased levels of traffic from the Harnham Gyratory travelling away from Salisbury City Centre. The proposal of 740 homes on Netherhampton Road will not only have a major adverse impact on these junctions, it would also have content with the additional traffic proposed above if the Council's plans come to fruition. It is proposed that the Council's Transport Strategy is flawed and before any strategic allocations can be made, the traffic modelling and proposed network improvements MUST be robust and based on housing trajectories looking forward to 2036 in line with the timescales of the Council's intended Local Plan Review. A planning application was submitted by Wiltshire County Council in 2002 (ref. S/2002/1961) for the construction of a viaduct over the River Nadder and the construction of a single carriageway relief road for Harnham including associated infrastructure and works on land which forms part of the Site S1028.</p> <p>It is submitted that the development of Sites S1027 and S1028 would not only substantially increase traffic movements along Netherhampton Road and have major adverse impacts on the already burdened highway, it would also remove the opportunity to provide a clear and practical highways solution for the city. As it stands, there are no proposals to improve the current highways problems, despite having been on the Council's agenda for many years.</p> <p>Longford Estate believe that prior to any allocation, it is fundamental that a highways solution be proposed in order to be confident in the delivery of the homes. Site 3435 was technically assessed as part of the lead up to the WHSAP and concluded that the main road (Newbridge Road) could accommodate the level of car movements, and in all other elements (please see Appendix 1). No such studies have been undertaken for Sites S1027 and S1028, and therefore it is an extremely risky approach for these sites to be allocated in the absence of critical technical information and proposed solutions.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We request that Site 3435 be considered as an omission site at the Examination. We request the opportunity to explain the background to the site's promotion and its development potential and how its inclusion as an allocation would ensure the WHSAP is "effective" and therefore sound.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3050</a>	<b>Consultee</b> Mr Alasdair Jones-Perrott Estate Manager	<b>Agent</b> Mrs Alison Whalley Associate Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>

<b>Person ID:</b> 900160			<b>Person ID:</b> 900154		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Landscape</p> <p>The evidence base supporting the WHSAP includes a Landscape Assessment which assesses all of the proposed site allocations. The assessment of Site Ref. S1028 is set out at pages 13-16 of the Landscape Assessment Part 2. It judges the site to be:</p> <ul style="list-style-type: none"> <li>- Attractive and peaceful with high visual prominence;</li> <li>- High sensitivity for public accessibility;</li> <li>- Contains highly important views;</li> <li>- Low mitigation potential;</li> <li>- HIGH ADVERSE effect on landscape character;</li> <li>- HIGH ADVERSE impact on views (including view from public rights of way);</li> <li>- Medium adverse effects on neighbouring residential properties, and</li> <li>- Low capacity to accommodate change.</li> </ul> <p>The assessment goes on to state that development of the site would adversely affect views and it would be difficult to mitigate against this; and that development of the site would conflict with the recommendations made for the site and the wider area, as set out in the "Salisbury District Settlement Setting Assessment" (2008).</p> <p>The findings of the Landscape Assessment as documented were not included in the summary assessment of the Sustainability Appraisal of Site S1028 which is set out at Table F.9 within the Salisbury Community Topic Paper. Misleadingly, the second paragraph specifically states that "No major adverse effects have been identified for this site". It is submitted that due consideration has not been given to the potential landscape harm that would arise through the site's development and its encroachment towards the Cranborne Chase AONB boundary, thereby potentially affecting its setting.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p><b>Deliverability</b>                  Longford Estate is concerned that the deliverability of Site S 1208 is extremely questionable. There is no evidence to indicate that development could come forward within the Plan Period. Longford Estate consider that the approach taken in the WHSAP to allocate 87% of the Salisbury housing allocations in one location, with many unknown and unresolved issues, risks a huge housing shortage in Salisbury in the future. Particularly when considered in tandem with the allocations of housing at Churchfields (1100 houses) and the Central Car Park (200 houses) which have been confirmed in the WHSAP as unlikely to come forward within the Plan period. Paragraph 4.66 of the WHSAP states that:</p> <p>By limiting the potential housing supply to one large site in Salisbury, the plan conflicts with paragraph 14 of the NPPF which states that: "Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change"</p> <p>Should Sites S1028 and S1027 be rendered undevelopable, the Plan would not allow for sufficient flexibility for an alternative, deliverable site to come forward in accordance with policy.</p> <p>In terms of lead times a report into the delivery of urban extensions on behalf of Gladman developments limited was prepared in February 2014 and was submitted as evidence to the Stroud Examination. The Gladman study was supported by evidence provided by local authorities on 78 sites. The Study considered the factors associated with bringing forward major urban extensions of 500+ dwellings before moving on to look at specific case studies from each of the English regions, Scotland and Wales. The Study was an exercise in considering deliverability, the factors which affect deliverability, the timescales involved from a site being identified for development to planning permission being granted and thereafter the rates at which housing can realistically be delivered on major urban extension sites of 500+ dwellings.</p> <p>The results of the site specific research, was then drawn together to inform an overall assessment of the timescales associated with bringing forward urban extensions and rates of delivery once development gets underway. The Study was made available to LPAs, government departments and agencies and industry bodies as an evidence based tool which can be drawn upon to inform Development Plans across the UK.</p> <p>The Study found that the time taken to determine planning applications is a major factor in the overall delivery timescales for Major Residential Development sites. The average time period from the initial concept to the grant of planning permission for sites in England is 6.67 years. The average timescale from submission to a grant of outline planning permission was 34 months (time periods for determination as provided by the relevant Authority).</p> <p>The average across those sites in the Study which have extant permission in outline and where the timescales between the Council resolving to grant permission and the decision being issued are available (where the time period for legal agreements to be made has been provided by the Authority) was 23.6 months. It should be noted many sites failed to progress beyond a resolution to grant because of unresolved legal matters.</p>			

Appendix Q - Schedule of representations

	<p>In terms of delivery from subsequent discussions with the relevant developers the Study found (including Taylor Wimpey, Barratt, David Wilson Homes, Bellway and Redraw), the average annual delivery rate of 30 - 35 dwellings per annum per single house builder outlet is realistically achievable .</p> <p>The Study concluded that an 8-year period should be allowed for from the preparation of an outline/ principle planning application to the delivery of homes. It is important to note that the Study was rooted in factual evidence provided by Local Authorities across England and Scotland. The Savills Study on behalf of Barratt Homes in October 2014 provided an update on the Gladman Study (also submitted to the Stroud Local Plan Examination). It identified 24 sites for which an outline application was submitted after 2010, 18 of which were identified in the original Gladman report. Compared with the overall sample, these sites progressed much more quickly, taking an average of 33 months from the submission of the outline application to start on site, against the average of the whole sample of 60 months. "This suggests that it has become more likely that large sites will progress through the planning system quickly enough to begin delivering housing units within the lifetime of a five-year housing land supply plan." Even so, 33 months from submission of outline planning application to a start on site would still point to an overall period approaching 4 years for the first occupation once the initial infrastructure phase has been allowed for together with the construction period for the first houses.</p> <p>If this were applied to the Netherhampton site, it would take 6.7 years to progress to outline application stage, and a further 33 months so first commencement. This would take the timeframe to 2026 at the very earliest.</p> <p>Therefore, even in the event where Site S1028 is considered to be developable, it is highly unlikely to commence within the plan period. It is submitted that the inclusion of Site S 1028 is not "effective" as it is not deliverable within the plan period.</p> <p>Local Plan Review</p> <p>The Wiltshire Core Strategy (WCS) 2015 plans for housing to come forward through its strategic allocations, neighbourhood plans and planning applications as well as subsequent site allocations development plan documents. The need to bring forward a Housing Site Allocations Plan to compliment the WCS was identified to provide a surety of housing supply through the remaining plan period to 2026.</p> <p>At the same time the Council has embarked upon the Wiltshire Plan Review for the period 2016 - 2036 with a regulation 18 consultation on Options in 2018.</p> <p>Notwithstanding the concerns over the sustainability of the proposed H3.1 allocation, there is a clear doubt over its ability to deliver housing over the plan period. Paragraph 4.68 recognises the need for a "generous lead in time" for delivery of Netherhampton Road, recognising the scale of the site and need to develop a mitigation strategy and master plan. The site is also identified as having potential to provide employment land for relocation of businesses from Churchfields Business Park, thus freeing up land for delivery of housing at that location in the "longer term". There is no indication of the extent of employment land to be provided under H3.1.</p> <p>It should be noted that this is a "Housing Sites Allocations Plan" intended to compliment the WCS and provide surety in housing land supply during the plan period up to 2026. Employment sites are allocated with land requirements specified through the WCS, mainly as part of strategic mixed use developments. The need for further employment sites will form part of the Local Plan review.</p> <p>Policy H3.1 is the only mixed use allocation within the HSAP and of a significantly larger scale than the other allocations. In all the circumstances, it is evident that the land at Netherhampton Road should be given more time to assess constraints and develop a mixed use development strategy. The scale of development should be more appropriately considered through the Local Plan review 2016-2036.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We request that Site 3435 be considered as an omission site at the Examination. We request the opportunity to explain the background to the site's promotion and its development potential and how its inclusion as an allocation would ensure the WHSAP is "effective" and therefore sound.</p>

## Appendix Q - Schedule of representations

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	We note that the methodology now excludes sites allocated in the Development Plan. We consider that this is not appropriate for the reasons given in paragraph 7.15 and 7.16. By way of example, our client's site at Drynham Lane, Trowbridge is allocated in the Core Strategy as part of a wider Ashton Park Urban extension. However the revised settlement boundary for Trowbridge excludes the whole of the Ashton Park Urban extension. This applies to all settlements which have allocations in the Core Strategy. However these are sites which the Council is reliant on to deliver the much needed new homes in Wiltshire and as the revised settlement boundaries will form the development plan then they should reflect the adopted policies and allocations in both the Core Strategy and this Allocations DPD. It will also give certainty to anyone reading the development plan on the precise status of these allocated sites.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Wainhomes is a key developer in Wiltshire with sites west of Swindon, Trowbridge and Royal Wootton Bassett. Our client has additional sites which we consider should be allocated to ensure a deliverable supply of housing land in the plan period to meet the OAN for Wiltshire. Our objections go directly to the soundness of the plan.				

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3054</a>	<b>Consultee</b> Wainhomes (South West) Holdings Ltd	<b>Agent</b> Mr Stephen Harris Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 389564	Emery Planning <b>Person ID:</b> 389561	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	A.44 Royal Wootton Bassett Settlement Boundary	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We object to the settlement boundary as currently drafted. The reason for this is that the methodology sets out a number of criteria for how the settlement boundaries have been defined. One of the criteria is:  “built and commenced residential and communities facilities development such as religious buildings, schools and community halls that is physically related to the settlements”.</p> <p>Our client has had a number of planning permissions at Royal Wootton Bassett over the last number of years and these developments have necessitated changes to the settlement boundary for Royal Wootton Bassett as set out in the plan in Appendix A. This correctly shows some of these permissions being included within the settlement boundary. However the revised settlement boundary has not taken into account the extant consent to the south of the Interface Business Park. That application (14/03343/FUL) was for 68 dwellings and outline consent for a 39 bed care home and 22 age restricted dwellings and Country Park. There has been subsequent consent on the care homes scheme for additional dwellings. Enclosed at Appendix EP1 is the location plan for the permission which we can confirm has been commenced and under construction. Therefore the settlement boundary for Royal Wootton Bassett should be amended to reflect these consents.</p> <p>We consider that the settlement boundary should be revised to take account of the whole site including the open space/country park as this would accord with Criterion 4 in Table 8.1 which proposed to include within the settlement boundary:  “recreational or amenity space at the age of settlement that relates more closely to the built environment.”</p> <p>It is apparent from the extant consents on the site and how the country park relates to the settlement that the settlement boundary should be drawn along the railway line which forms the southern boundary of our client’s landholding.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission Site - Lower Woodshaw, Royal Wootton Bassett				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As set out in the introduction to this statement, we seek the allocation of our client's site at Lower Woodshaw Farm for development. The site would provide the opportunity to deliver a sustainable development in accordance with the Framework for the following reasons. Paragraph 7 of the Framework states that there are three dimensions to sustainable development: economic, social and environmental. The social role means: "supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well being." The proposed development would meet this role by delivering around 260 open market and affordable homes to meet housing needs in Royal Wootton Bassett and Wiltshire. It would also assist in delivering a five year supply of housing land and flexibility to meet the overall requirement in the plan period. The Royal Wootton Bassett Neighbourhood Plan (RWBNP) does not recognise that there is a need to provide additional housing land now to meet Wiltshire's five year housing land supply requirement. As set out above, Wiltshire Council's 5 year supply is precarious and therefore additional sites are needed in the short term to meet the deficit, and this is likely to necessitate additional sites coming forward in the Market Towns. A further practical effect of the housing land supply position is that all policies relevant to the supply of housing will be automatically out of date, by the operation of Framework paragraphs 47 and 49. This also necessitates further sites to be brought forward. Being located adjacent to the settlement boundary of Royal Wootton Bassett, our client's site is well located in terms of accessibility. In particular, it is in close proximity to the Interface Business Park, which provides a range of employment opportunities. There is also a pub (Woodshaw Arms) and a supermarket (Tesco Express) in close proximity to the site. Open space (including a Local Equipped Area of Play) would be provided on site. Should a railway station be developed at the Interface Business Park, which is one of the potential locations put forward in policy 14 of the RWBNP, the site would be within close proximity to this. Indeed as stated above, an allocation at our client's site could assist facilitating the railway station in this location. Paragraph 7 of the Framework explains that the economic role means: "contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and co-ordinating development requirements, including the provision of infrastructure" During the build programme, construction related jobs and indirect jobs would be created. This would benefit local contractors and suppliers. Once occupied, the proposed development would help contribute to ensuring the Borough has a stable workforce in terms of ability and age. The residents of the scheme would spend money in Royal Wootton Bassett and other towns in Wiltshire. The proposed development</p>				

Appendix Q - Schedule of representations

	<p>would therefore generate significant spending in the Borough, which would help create full time jobs in the local retail and leisure sectors. In addition, the proposed development would deliver a New Homes Bonus and Council Tax income for the Council.</p> <p>Paragraph 7 of the Framework states that the environmental role means:  “contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimize waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”</p> <p>The allocation of our client’s site would result in the loss of open countryside. However the Council is relying on large sites in the open countryside to meet its housing requirement to 2026 across the Borough.</p> <p>In terms of flood risk, the site is located within an area identified in the Core Strategy (policy CP67) as being at risk of flood. However, an indicative layout for the site has been drafted, which includes a flood storage area to the south west of the site. Flood risk issues can therefore be mitigated.</p> <p>Access would be taken from the access road to the Interface Business Park to the west of the site. Two access points are proposed on the indicative layout plan. A Transport Assessment would be prepared to assess the impact the proposal would have on the highway network.</p> <p>In terms of trees and hedges, these would be retained wherever possible, Most of the existing trees and hedges are located on the boundaries of the site, but there is a line of trees and hedges, which bisects the site in two. This would be retained in the proposed layout of the scheme.</p> <p>In terms of other environmental considerations, including: agricultural land, landscape and visual impact and ecology, these would be addressed through the design and detailed reports would be provided in support of a planning application.</p> <p>In summary, the loss of open countryside and agricultural land does not significantly or demonstrably outweigh the significant benefits the proposed development would deliver. Therefore, the presumption in favour of sustainable development applies and we seek the allocation of the site in the RWBNP.</p>
<p><b>Attached files (Please see Objective)</b></p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3057</a>	<b>Consultee</b> Wainhomes (South West) Holdings Ltd	<b>Agent</b> Mr Stephen Harris Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 389564	Emery Planning	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission site - land at Bratton Road, Westbury		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We also seek the allocation of Mr Nevill's site at Bratton Road, Westbury. This would provide the opportunity to deliver a sustainable development in accordance with the NPPF, addressing the three dimensions of economic, social and environmental sustainability. Westbury lies in the North and West Wiltshire Housing Market Area (NWWHMA).</p> <p>The site is located on the eastern edge of Westbury, immediately adjacent to the settlement boundary. It is bordered to the north and to the east by agricultural land, apart from a small section to the northwest which is adjacent to Coach Road. To the south is Bratton Road and a cemetery, while to the west, a small area of amenity land separates the site from Bitham Park. To the west of Bitham Park is an existing housing development.</p> <p>An application for development comprising up to 47 new dwellings (reference 16/06413/OUT) was refused in January 2017 and is now the subject of an Appeal against the decision. The assessment of the site's characteristics carried out to inform the decision concludes that there are no aspects of the proposal that would make it unacceptable, except for the conflict with policy on development outside the settlement boundary and the need to contribute to the improvement of employment opportunities and other services and facilities in the town centre.</p> <p><b>Contribution to Supply</b></p> <p>As we discuss elsewhere, Wiltshire Council state that they can currently<sup>1</sup> demonstrate a five year supply of housing land in the NWWHMA. However, this follows a period when a 5 year supply has not been demonstrated and thus we consider the supply position is fragile and in need of more sites to be identified to ensure that the supply is maintained.</p> <p>Table 4.1 of the draft Site Allocations Plan sets out an overall requirement for the NWWHMA of 24,740 dwellings for 2016 to 2026, identified completions between 2006 and 2017 of 12,603 dwellings and identified commitments of 11,566. This leaves a minimum to be allocated of 571 dwellings.</p> <p>Table 4.10 of the draft Allocations Plan confirms a surplus of identified supply over the requirement for Westbury. However, it also confirms that there is only a 1% positive variation across all the urban areas. Table 5.4 of Topic Paper 4 confirms that excluding windfalls there is a surplus across the whole plan area of only 624 dwellings, or 2.5% of the total requirement.</p> <p>Table 4.10 also highlights the significant deficit in supply in terms of both Warminster and Trowbridge, which are higher order 'Principal Settlements' as identified in the Core Strategy. Both these towns are in close proximity to Westbury with Warminster being approximately 4 miles distant and Trowbridge is some 6 miles away. Good public transport links are available to both settlements and there is therefore the case that development at Westbury can in the short term assist in addressing the shortfall that seems to be persisting in the growth of these settlements compared to the aims of the Core Strategy.</p> <p>The Topic Paper 4 (Developing Plan Proposals) published alongside the draft Site Allocations Plan provides further analysis of the identified housing supply and the relationship with the spatial strategy set out in the Core Strategy. Table 5.5 provides an analysis for the 5 year housing land supply (2017 to 2022) for the NWWHMA. This states that there is a deliverable supply of 9,643 units or 7.15 years supply over this period. Table 5.7 then sets out the conclusions of the Council's 'resilience testing' assessment for the sources of the supply. This notes that</p>				

Appendix Q - Schedule of representations

“over a quarter of new dwellings are anticipated to be built on strategic sites and plan allocations that do not have planning permission.”  
The table further notes that:  
“In the past five years overall completions have continued to be just below the average annualized HMA figure.....Falling short of annualized rates can imply that there is vulnerability in the surety of supply.”  
At paragraph 5.11, the paper goes on to state:  
“There is a significant reliance on large strategic housing sites to meet strategic requirements in the HMA.”  
While at paragraph 5.12, with respect to the expanding role of the strategic sites in contributing to housing growth, the paper states that:  
“It would however be unwise to place too much reliance on this being the case when some key strategic sites have yet to gain planning permission.”  
The acknowledgement that the ability of the plan to deliver housing growth is reliant on large strategic allocations with the associated risks that delivery will be delayed is evidence that supports the allocation of further sites where they are evidently deliverable and not strategic in scale, particularly in the short term.  
We therefore consider that there is a need for additional sites to be brought forward in the short term in Westbury to provide for the necessary level of flexibility within the plan proposals for delivering new housing. We will set out here that the site at Bratton Road has no site specific constraints to development, is of a scale that does not require significant infrastructure to be provided in advance and could be delivered in the very near future.  
**Sustainable Development**  
The site is located within a reasonable walking distance of the important everyday services and facilities available locally and within Westbury town.  
The site is also accessible by non-car modes of transport. Bus services are available from stops close to the site with these being appropriately timed and to an appropriate frequency to allow for higher order retail trips, leisure trips and some employment trips. Cycle access can be obtained via the former Coach Road and Bitham Park.  
Delivery of this site would contribute to social sustainability as it is proposed to deliver up to 47 new dwellings, including 14 affordable homes to meet the required 30% contribution and the remainder being open market housing. This would meet identified housing needs in the NWWHMA as defined in the adopted Core Strategy.  
In terms of economic sustainability, development of housing at this site would:  
Create construction related jobs and indirect jobs during the build programme, benefiting local contractors and suppliers;  
Help to ensure that there is a stable workforce in terms of ability and age;  
Lead to an increased expenditure in Westbury and the surrounding area by residents of the scheme. The proposed development would therefore generate significant spending in the Wiltshire which would help create full time jobs in the local retail, service and leisure sectors;  
In addition to the above, deliver a New Homes Bonus and Council Tax income for the Council.  
With respect to the environmental aspect of sustainable development,  
The allocation of our client’s site would result in the loss of open countryside. However, we note that the Council is relying on sites in the open countryside to meet its housing requirement to 2026 elsewhere across the plan area;  
No concerns with respect to flood risk or drainage have been raised during consideration of technical work underpinning the proposals. The site lies within Flood Risk Zone 1;  
Access would be taken from a priority junction on Bratton Road. An assessment of the transport impacts has not found any severe adverse impact and there were no objections on highways grounds to the earlier application;  
The site is not subject to any special landscape designations. In terms of trees and hedges, these would be retained wherever possible. Potential ecological impacts as a result of disturbance to bats can be mitigated through careful design and other specific measures. There were no objections to the application for ecological, landscape or arboricultural reasons;  
In summary, the loss of open countryside and agricultural land does not significantly or demonstrably outweigh the significant benefits the proposed development would deliver.  
We therefore seek that this site is allocated in the Wiltshire Housing Site Allocations Plan.

Appendix Q - Schedule of representations

<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Wainhomes is a key developer in Wiltshire with sites west of Swindon, Trowbridge and Royal Wootton Bassett. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	At the time of writing, both the draft plan and the published evidence apply a base date of the 1st April 2017, although these figures are provisional as the final figures are yet to be published. This is unfortunate given the time that has passed since the base date and that representations are now being sought on this Pre-Submission Stage. From previous examinations we have been involved in, it is not uncommon for the Council to update or provide new evidence in relation to its housing land supply position post submission of the plan, or even during the examination. In this instance Topic Paper 3 advises that the housing supply will be updated to the 1st April 2017 base date prior to the consultation on the submission draft. Therefore at that stage we can give full and proper consideration and respond to that new evidence which will be prepared in order to demonstrate that the plan is sound.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Overall housing provision 2006-2026</p> <p>Paragraph 14 of the Framework requires that Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change. No definition of rapid change is provided, but in our view the potential delay or non-delivery of sites is precisely the kind of rapid change the Framework requires the LPA to provide flexibility for. Even where Local Plans are produced in more than one part, as is the case in Wiltshire, in practice each DPD takes a number of years to produce and adopt, and therefore reviewing the plan (even in part) is not usually an effective response to a shortfall in housing land supply. Plans should have the inbuilt flexibility to ensure that a shortfall in housing land supply is never encountered throughout the lifetime of the plan.</p> <p>It is important to note that the housing requirement set by Core Policy 2 of the adopted Core Strategy is a minimum requirement. The Core Strategy Inspector's Report states at paragraph 40:</p> <p>"The overall indicated quantities of development provide a flexible and positive basis for provision to meet predominantly the needs of the area. These are appropriately expressed as minimums."</p> <p>However our concern is that within the Allocations DPD as presently drafted, insufficient flexibility has been built into the supply. In our view, the Allocations DPD needs to plan for significantly more housing than just the minimum requirement, to provide a realistic prospect of the overall requirement being met.</p> <p>It is also noted that the Core Strategy Inspector states at paragraph 78:</p> <p>78. Overall, the balance of evidence suggests that the objectively assessed housing need, to be disaggregated across the three Wiltshire HMAs, is currently in the region of 44,000 dwellings over the plan period.</p> <p>This is 2,000 dwellings more than the 42,000 in the adopted Core Strategy. The reasons for not applying the full objectively assessed need are set out in paragraph 80 of the Inspectors Report which are:</p> <p>A deliverability issue in that the average delivery rate would be 2,100 over the entire plan period which would be significantly above recent annual performance and the longer term historic average as a whole.</p> <p>the subsequent intended early review of the CS, the Sites DPD, the Chippenham Site Allocation DPD and the neighbourhood planning processes will enable the Council to proactively seek to meet, and if necessary reassess, its objectively assessed housing need and plan for its provision accordingly.</p> <p>he was "particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes".</p> <p>Consequently the Core Strategy Inspector stated that "at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more".</p> <p>A number of points arise:</p>				

## Appendix Q - Schedule of representations

The first is that the Inspector based his conclusion to reduce the requirement on the basis that there would be a new SHMA. That has not occurred.

The second is that he set out that the plan could provide greater flexibility to provide more homes. We now assess how that is being achieved by the adopted and emerging development plan.

Topic Paper 4 (Developing Plan Proposals) sets out the housing position for each of the housing market areas in Wiltshire. As our clients sites are located within the North and West Housing Market Area, these representations concentrate on that area.

Table 5.4 of Topic Paper 4 sets out the position to meet the housing requirement for the North and West Housing Market Area between 2006 and 2026. For ease of reference the table is below. [see attached]

As can be seen from the table, the supply only just meets the overall requirement, with an oversupply of just 624 dwellings against a minimum requirement of 24,740 which equates to a flexibility of just 2.5%. Therefore there is insufficient flexibility to deal with the potential non- delivery of sites in part or full.

As a result it is apparent that the Allocations DPD is not allocating enough land. Even where sites can be demonstrated to be developable, there should always be a contingency in place in the event that they do not come forward as expected.

The Local Plans Expert Group has strongly advocated providing a high degree of flexibility in the supply of housing land. The group published its report to the Communities Secretary and the Minister of Housing and Planning in March 2016. Although it remains how the conclusions of the report will be taken forward as national policy is revised, they nevertheless highlight a number of common failings in plan making that often result in recently adopted plans being found to be 'out-of-date' not long after adoption. Paragraph 11.2 of the report identifies that particular problems currently occur with identifying and maintaining a five year supply of housing land, not least because:

the factors affecting a five year land supply calculation are 'live', in the sense that matters such as build rates, site circumstances etc. change constantly so that, whatever a Local Plan Inspector finds as a result of the local plan examination will be out of date even before the local plan is adopted;

even though local plan examinations are often dominated by five year supply issues, they rarely have the time to address the full detail properly and there are several examples of appeals being won on the five year issue immediately after a local plan has been adopted because further scrutiny is possible through section 78 appeals;

even where a Local Plan has recently been found sound – with a housing requirement that meets OAN – the subsequent publication of new household projections or other data is being cited by developers and others as reason to argue that the plan is out of date;

because Plans tend only to allocate the minimum amount of land they consider necessary, once adopted, there is little that Local Plans can do to address any shortages that appear in the five year supply. Any shortages, therefore, trigger (slow) local plan reviews meaning that shortfalls tend to be addressed by application or appeal led solutions, rather than plan-led solutions; and

the combination of short term focus, coupled with inevitable long term shortcomings, then encourages the concept of plans being found sound subject to early reviews, which undermines the credibility and sustainability of the plan-led system.

One of the report's recommendations (paragraph 11.4) is that local plans should not only demonstrate a five year land supply, but also focus on ensuring a more effective supply of developable land for the medium to long term (over the whole plan period), plus make provision for, and provide a mechanism for the release of, developable reserve sites equivalent to 20% of their housing requirement. In the case of Wiltshire, where the requirement is a minimum, we see no specific need for reserve sites, providing that sufficient flexibility is built into the housing supply; at present it is not.

At present the recommendations of the Group are just that; recommendations. However their conclusions reflect the concerns that we have in respect of the Site Allocations DPD. We consider that there is insufficient flexibility to deal with changing circumstances, specifically a failure to deliver housing at the anticipated rates. There are also no reserve or backup sites proposed. Consequently, the reality is that any slippage from the allocated or committed sites could result in the housing requirement not being met. This would have serious implications in terms of the failure to meet identified housing need, and also the plan would be 'out-of-date'. This could happen almost immediately following adoption, as has been widely experienced elsewhere. Further sites should therefore be allocated.

Conclusions

There a number of key conclusions from this section.

Appendix Q - Schedule of representations

	<p>The first is that it is not properly prepared as the OAN was 44,000 dwellings as confirmed by the Core Strategy Inspector. The requirement of 42,000 was adopted on the basis that:  It was a minimum;  The Core Strategy provided flexibility; and,  The Council would undertake a SHMA in 2016. That has subsequently not been undertaken.  The second is that the Site Allocations Plan should be providing sufficient sites to meet the 44,000 dwelling OAN. The plan is not effective or consistent with national policy.  The third is that even on the requirement in the Core Strategy there is insufficient flexibility and a greater number of sites should be allocated for development. As drafted the plan is not effective or consistent with national policy.  Under either scenario, a greater number of sites should be allocated which can assist meeting the housing needs in Wiltshire and specifically the North and West HMA. Our clients have 3 that are deliverable in the 5 year period. As drafted the plan is not justified.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4739831</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Wainhomes is a key developer in Wiltshire with sites west of Swindon, Trowbridge and Royal Wootton Bassett. Our client has additional sites which we consider should be allocated to ensure a deliverable supply of housing land in the plan period to meet the OAN for Wiltshire. Our objections go directly to the soundness of the plan.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3060</a>	<b>Consultee</b> Wainhomes (South West) Holdings Ltd	<b>Agent</b> Mr Stephen Harris Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The fourth bullet point of paragraph 47 of the Framework provides:  “for market and affordable housing, [local planning authorities should] illustrate the expected rate of housing delivery through a housing trajectory for the plan period and set out a housing implementation strategy for the full range of housing describing how they will maintain delivery of a five-year supply of housing land to meet their housing target;”  The Council has published its provisional 2017 statement which forms part of the evidence base for this consultation. It will be necessary for representors to be provided with the opportunity to comment in full on the document once it is finalised and published.  Appendix C of the adopted Core Strategy includes a housing trajectory. That trajectory was based on the housing land supply paper (July 2014) and considered sound by the Inspector.  The Council has produced a housing trajectory as part of this consultation and is set out in more detail in Topic Paper 4. It is noted that when comparing the two trajectories (as set out below) [see attached] it is clear that for the North and West Housing Market Area the expected level of completions have not been delivered.  Adopted Core Strategy Trajectory [see attached]  March 2017 Trajectory [see attached]  It is noted from the above two trajectories the expected levels of development since 2014/15 have not been met and the trajectory is now fundamentally different in its expectations. Indeed, last year 1,738 dwellings were completed across Wiltshire with only 847 being delivered in the North and West HMA. The table below shows how that compares for each year since the start of the plan period.</p> <table border="1"> <thead> <tr> <th>Year</th> <th>Completions</th> </tr> </thead> <tbody> <tr> <td>2006/07</td> <td>1,365</td> </tr> <tr> <td>2007/08</td> <td>1,609</td> </tr> <tr> <td>2008/09</td> <td>999</td> </tr> <tr> <td>2009/10</td> <td>926</td> </tr> <tr> <td>2010/11</td> <td>1,219</td> </tr> </tbody> </table>					Year	Completions	2006/07	1,365	2007/08	1,609	2008/09	999	2009/10	926	2010/11	1,219
Year	Completions																
2006/07	1,365

2008/09	999																
2009/10	926																
2010/11	1,219																

Appendix Q - Schedule of representations

	<p>2011/12 1,028</p> <p>2012/13 1,039</p> <p>2013/14 1,517</p> <p>2014/15 1,139</p> <p>2015/16 915</p> <p>2016/17 847</p> <p>As will be noted 847 completions is the smallest number of annual completions since the start of the plan period in 2006 and is significantly below the level of completions anticipated in the housing trajectory endorsed by the Core Strategy Inspector. Indeed it is of note that since 2013/14 there has been a downward trend annually in the completion rates. This indicates that the Council significantly over-estimated the actual deliverable supply and has not allocated the right sites in the right locations. It also demonstrates that the Council's methodology for the delivery of sites should be revised. As a result, the timescales for the delivery of sites are longer than the Council claims, and consequently fewer dwellings should be deliverable within the 5 year period.</p> <p>With regard to housing supply specifically, Topic Paper 3 states:          "3.21 The Council anticipate it will have completed its survey exercise for the 2016/2017 monitoring year and published the results in its Housing Land Supply Statement later in 2017, but prior to submission of the Plan, which is programmed for 2018. The 'confirmed' 2017 position will be considered at the time of submission.</p> <p>Therefore the data that will assess the soundness of the plan is not the subject of this consultation and therefore we will assess the new position statement as part of the submission consultation which will then be considered by the Inspector.</p> <p>As to the current 5 year land supply position, we note recent decisions at Forest Farm, Chippenham and at Hilperton. Whilst each of the Inspectors stated that there was a 5 year land supply these decisions were on the April 2016 base date and the surplus of homes in the most recent decision being 59 dwellings.</p> <p>We note that paragraph 3.23 of Topic Paper 3 states:          "As shown in Table 3.3 there is currently a demonstrable 5-year housing land supply in all three HMAs. However even within a context of delivery on allocated sites in the Core Strategy, allocations in the Chippenham Housing Site Allocations Plan, and the prospect of further 'windfall' development, there will continue to be a requirement to plan for additional growth to maintain supply."</p> <p>We consider that in the context of annual completions reducing year on year and the 5 year supply being precarious further sites are required which is seemingly recognised in Topic Paper</p> <p>3. With completions only being 847 in 2016/17 the shortfall to date will only increase resulting in the 5 year supply being reduced further unless new sites come forward.</p> <p>Conclusions</p> <p>The Council's 2017 provisional statement does not provide a robust assessment of the supply and it is relying on the April 2016 base date (March 2017 update). In order for the plan to be assessed for its soundness then it will be necessary for the April 2017 Housing Land Supply Statement to be published and consulted upon. As drafted it is not positively prepared, justified, effective or consistent with national policy. However on the evidence in the current consultation further sites are required to be allocated.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3061</a>	<b>Consultee</b> Keysley Ltd	<b>Agent</b> Mr Cliff Lane Savills Planning	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1137935	<b>Person ID:</b> 556489	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.8 Bore Hill Farm Warminster			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>It is noted that Policy H2 and H2.8 of the Draft Plan allocates approximately 4.47ha of land at Bore Hill Farm/Bradley Road as shown on Figure 5.12. This combines two sites submitted for the SHLAA - Site 302 and Site 1032. (See site plan attached). The two sites are in separate ownership but the owners, through their agents, have been collaborating on a joint proposal.</p> <p>Please note the more accurate site area of the two sites provided in separate representations by the agents for Site 1032, which gives a combined site area of 5.14ha.</p> <p>It is also recognised that para 5.96 of the Draft Plan states that: 'Future development of the site shall be brought forward in such a way that ensures the residential and employment uses on the site are compatible.' The landowners acknowledge this, and future proposals will be drawn up accordingly.</p> <p>The Warminster Community Area Topic Paper, which accompanies the Draft Plan, explains in para 5.22 that the sites have been combined 'as together they present an opportunity to holistically provide a significant level of housing development in a sustainable location to ensure the provision of a suitable access/egress arrangement, open space and landscaping.' With the other two sites allocated in Warminster, they are described as 'available, achievable and deliverable'. The owners confirm that collaboration will continue to deliver these proposals at an early date, to satisfy current housing and employment needs.</p> <p>Paragraph 5.23 explains that the combined site is allocated for the development of approximately 70 dwellings. It goes on to state that the site 'is in a location that has the capacity to accommodate change from an environmental , landscape and heritage perspective, and could assimilate into the existing built form of the town. The site is in an accessible and sustainable location served by existing highways infrastructure'.... 'The development of approximately 70 dwellings would contribute towards the availability of affordable and open market housing at Warminster'. All of these positive comments are supported, and follow similar representations which accompanied the SHLAA submissions.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.1		Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Plan Objectives and Housing Need</p> <p>The Wiltshire Housing Site Allocations Plan (June 2017), herein referred to as ‘the Draft Plan’, advises at paragraph 1.1, that its purpose is to: Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages; and Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire’s three HMAs over the period to 2026.</p> <p>The Wiltshire Core Strategy (WCS) refers to the role of the Draft Plan, in combination with the Chippenham Site Allocations Plan, to help ensure a sufficient choice and supply of suitable sites throughout the plan period in accordance with national policy and to compliment neighbourhood planning (paragraph 1.4).</p> <p>Core Policy 2 of the WCS sets out the Delivery Strategy for the Draft Plan, which seeks to deliver a minimum of 42,000 new homes across Wiltshire over the period 2006 and 2026, including the provision of at least 10,420 new dwellings within the South Wiltshire Housing Market Area (HMA).</p> <p>The Draft Plan refers to the NPPF’s requirement that each Local Planning Authority demonstrate that there is a five year supply of deliverable land for housing development for each of the HMA’s based on the implied delivery rates of the WCS requirement (paragraph 2.14). Completions to date (2006-2017) in the South Wiltshire HMA is 5,067. Leaving a minimum requirement for 5,353 homes to be completed in the next nine years to 2026. The Draft Plan, at paragraph 4.2, acknowledges that a surplus is necessary to maintain five years supply of housing land in each HMA and to surpass the buffer in excess of five years required by the NPPF.</p> <p>Excluding an allowance for windfall, the housing land supply in the South Wiltshire HMA can be summarised as follows: (See attached Table 1)</p> <p>Paragraph 4.63 of the Draft Plan acknowledges that the South Wiltshire HMA has a slightly less generous housing land supply than elsewhere in Wiltshire and as can be seen from Table 1 below there has been persistent under delivery in the South Wiltshire HMA for the period 2006-2014. Indeed, over the last 10 years the at least requirement has only been met on two occasions. (See attached Table 2)</p> <p>The Five year housing land supply position for the South Wiltshire HMA, including windfalls, is as shown in the two tables below: (See attached Tables 3 and 4)</p> <p>What is clear from the above tables is that whilst the scale of housing meets the requirements for the HMA plan period, the buffer (shown in brackets) is not sufficient to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land as advised by the NPPF (para 47).</p> <p>The opportunity therefore exists to ensure the housing provision in the WCS is achieved. The overall purpose of the buffer is not just to deliver homes over and above the minimum requirement (10,420). Rather, the aim of the buffer should be to reduce the risk of not achieving the</p>				

## Appendix Q - Schedule of representations

minimum requirement rather than increasing the prospect of exceeding the minimum requirement. It is therefore considered that a 20% buffer is necessary to meet the housing need in a sustainable planned fashion.

By allocating sites to match the minimum requirement, plus 20%, the certainty to achieve the minimum is increased and any 'Windfall' sites will deliver over and above the minimum portion. Reducing the risk of failing to meet the minimum requirement will boost significantly the supply of housing (NPPF para 47). The expected supply, that is the allocations, should be set to achieve the minimum requirement.

1 Table 2.2 of the Wiltshire Housing Site Allocations Plan, Pre-Submission Draft Plan, Topic Paper 4 Developing Plan Proposals June 2017

Changes required

Allocate sites to match the minimum required plus 20% in order to ensure the minimum required is achieved.

Utilise windfall sites to achieve delivery beyond the minimum required.

Add allocations for additional homes in the South Wiltshire HMA.

Excluding an allowance for windfalls, anticipated land supply in the South Wiltshire Housing Market Area compared to strategic requirements, according to the Topic Paper 4 Developing Plan Proposals (Table 6.4) delivers a 'surplus' of 3.75% (201 homes) of the remaining requirement. This assumes all the commitments and proposed allocations are delivered. To be prudent and pragmatic a 20% buffer should be applied to reduce the risk of a shortfall as a consequence of not all of the commitments and allocations delivering. This is particularly pertinent as the Plan is intended to achieve more than 42,000 homes overall and more than 10,420 homes in the SWHMA. The 201 homes is not a surplus it is, if all the sites deliver, 1.93% of the 'at least' requirement. It is therefore a minor achievement of the overall objective of the WCS. The NPPF (para 47) advocates the application of a 20% to have a realistic prospect of achieving the planned supply. The planned supply is more than 42,000 homes.

Core Strategy Reviewed

The latest Local Development Scheme (LDS) shifts from a Core Strategy review to the completion of a new Local Plan. Aligned but separate local plans for Wiltshire and Swindon are to be undertaken, informed by a joint evidence base and a non-statutory 'joint framework' covering matters similar to a joint strategic plan which both authorities are 'signed' up to.

The Wiltshire Local Plan is anticipated to be adopted by early 2021 depending upon a variety of factors including a jointly agreed with Swindon Spatial Framework by mid-2019. If this timetable is achieved the early review of the WCS will have been completed seven years after the WCS Inspectors report was completed.

Again, to minimise the risk of failure to achieve the requirements of the WCS the changes sought above should be applied to the WHSAP to cover the period to 2021 and beyond if there is delay. If the WHSAP is adopted as anticipated by winter 2018 this will be twelve years into the twenty-year development plan period.

I am instructed by my client, Asda Stores Ltd, to submit the enclosed representations to the Pre- Submission Draft Wiltshire Housing Site Allocations Plan. The representations are made in respect of land at Salisbury Retail Park, London Road, Bishopdown, Salisbury, herein referred to as the 'Asda' site.

You will be aware that the 'Asda' site has an extant planning permission for a bulky goods retailing scheme, dating back to the 1990's, and that more recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.

Unfortunately, due to a change in market conditions, there is no longer a requirement for a foodstore in this location. This brownfield site is therefore immediately available for alternative forms of development, and for the reasons detailed in our representations, it is considered to be a suitable site for residential development.

The representations, as submitted, therefore object to the proposed revised settlement boundary for Salisbury and suggest that the 'Asda' site, being a brownfield site that is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods, is appropriate for housing. It should therefore either be allocated for housing or included within the revised settlement boundary.

The 'Asda' site lies on the northeastern edge of Salisbury in the Bishopdown area of the city, and fronts on to Pearce Way and the A30 London Road. It extends to 3.9 hectares and has a history of planning consents. The site has an extant planning permission for a bulky goods retailing scheme, which was approved in the mid 1990's and a start was made on the scheme, (the creation of an access arrangement off London Road). Planning permission was subsequently granted for a similar bulky goods retail scheme in 2009 (application ref S/2007/1460 refers). This permission was subsequently renewed by later applications for modifications to the scheme until April 2015. More recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.

Appendix Q - Schedule of representations

	<p>Vehicular access into the site would be taken from the roundabout at the junction of the A30 and Pearce Way, at which point where preliminary ground works associated with an access has been undertaken previously.</p> <p>The site is bounded to the west by Green Lane, a pedestrian and cycle path that separates it from residential properties on St Lukes Close; Myrrfield Road; Lindford Road and Monxton Close, and to the east by the A30 London Road and Pearce Way: to the northeast on the other side of Pearce Way is a Premier Inn motel and the Hampton Inn pub-restaurant, while to the southeast running down London Road are a number of car dealerships. Further south along London Road are additional commercial premises, including a health &amp; fitness centre and a petrol filling station containing a small M&amp;S Simply Food, as well as a Park &amp; Ride facility that is accessed off the St Thomas Way/London Road roundabout just south of the site. To the southwest the site abuts the rear gardens of Bishopdown Cottages, a small terrace of houses. Land to the north of Pearce Way is allocated for new housing within the adopted Core Strategy and has recently been developed (Hampton Park).</p> <p>With regards the suitability of the site for housing, in granting consent for the retail development of the site, the Local Planning Authority recognises that the site falls within the definition of brownfield previously developed land due to the extant planning permission on the site from the 1990's. Officers, in their report to committee for the Asda scheme, also recognised that the site is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods.</p> <p>In summary, it is considered that the 'Asda' site presents an opportunity to fulfil some of the housing requirement in the South Wiltshire HMA on a site which lies immediately adjacent to existing residential development without encroaching into the countryside and can be seen as a logical extension of this part of Bishopdown.</p>

		<b>Do you consider the draft WHSAP is sound?</b>			
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.6			Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Selection</p> <p>The Plan, at paragraph 4.63, acknowledges that the South Wiltshire HMA has a slightly less generous housing land supply than elsewhere in Wiltshire. It is also acknowledged that Salisbury, which is the Principal Settlement within the HMA, is intended to be the primary focus for development, providing significant levels of jobs and homes and therefore it is important that sufficient housing is allocated to ensure the City achieves the role set out in the spatial strategy:</p> <p>The Plan recognises that it is unlikely that all the strategic sites allocated in the WCS for Salisbury would deliver sufficiently within the plan period to meet housing requirements and ensure supply, and that a shortage of land could impede the City's prospects and it could also lead to greater development pressures in other settlements in the HMA less suited to growth.</p> <p>Paragraph 4.66 refers to Churchfields which is required to deliver 1100 dwellings by 2026 but in order to do so requires substantial employment uses to decant and is now expected to commence later than envisaged and much less land for new housing will be available before 2026.</p> <p>Land at Salisbury Retail Park, London Road, Bishopdown, Salisbury</p> <p>To improve the resilience of the plan and heighten the prospects of it being effective further land should be allocated within Salisbury and it is considered that land owned by Asda Stores Ltd at London Road, Salisbury is suitable for housing being a brownfield site that is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods.</p> <p>The site lies on the northeastern edge of Salisbury in the Bishopdown area of the city, and fronts on to Pearce Way and the A30 London Road. It extends to 3.9 hectares and has a history of planning consents. The site has an extant planning permission for a bulky goods retailing scheme, which was approved in the mid 1990's and a start was made on the scheme, (the creation of an access arrangement off London Road). Planning permission was subsequently granted for a similar bulky goods retail scheme in 2009 (application ref S/2007/1460 refers). This permission was subsequently renewed by later applications for modifications to the scheme until April 2015. More recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.</p> <p>Vehicular access into the site would be taken from the roundabout at the junction of the A30 and Pearce Way, at which point some limited development has already taken place, being preliminary ground works associated with an access that was intended to serve a previously approved retail park.</p> <p>The site is bounded to the west by Green Lane, a pedestrian and cycle path that separates it from residential properties on St Lukes Close; Myrrfield Road; Lindford Road and Monxton Close, and to the east by the A30 London Road and Pearce Way: to the northeast on the other side of Pearce Way is a Premier Inn motel and the Hampton Inn pub-restaurant, while to the southeast running down London Road are a number of car dealerships. Further south along London Road are additional commercial premises, including a health &amp; fitness centre and a petrol filling station containing a small M&amp;S Simply Food, as well as a Park &amp; Ride facility that is accessed off the St Thomas Way/London Road roundabout</p>				

## Appendix Q - Schedule of representations

just south of the site. To the southwest the site abuts the rear gardens of Bishopdown Cottages, a small terrace of houses. Land to the north of Pearce Way is allocated for new housing within the adopted Core Strategy and has recently been developed (Hampton Park).

As explained above, full planning permission has recently been granted for an Asda foodstore with associated petrol filling station and car parking. Unfortunately, due to a change in market conditions, there is no longer a requirement for a foodstore and therefore there is now an opportunity to utilise this brownfield site for residential development.

With regards the suitability of the site for housing, in granting consent for the retail development of the site, the Local Planning Authority recognised that the site fell within the definition of brownfield previously developed land due to the extant planning permission on the site from the 1990's. Officers, in their report to committee, also recognised that the site is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods.

In summary it is considered that the land at London Road presents an opportunity to fulfil some of the at least 5,353 homes required in the remaining plan period. The site is large enough to make a reasonable contribution to the housing land supply but not so large that it will be hindered by the complexities experienced elsewhere.

The land at Salisbury Retail Park, London Road (the 'Asda' site) should be included as an allocation for housing for reasons set out in the attached document.

Change required

Include the site Land at Salisbury Retail Park, London Road to Policy H3/ Table 5.4 of the WHSAP.

I am instructed by my client, Asda Stores Ltd, to submit the enclosed representations to the Pre- Submission Draft Wiltshire Housing Site Allocations Plan. The representations are made in respect of land at Salisbury Retail Park, London Road, Bishopdown, Salisbury, herein referred to as the 'Asda' site.

You will be aware that the 'Asda' site has an extant planning permission for a bulky goods retailing scheme, dating back to the 1990's, and that more recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.

Unfortunately, due to a change in market conditions, there is no longer a requirement for a foodstore in this location. This brownfield site is therefore immediately available for alternative forms of development, and for the reasons detailed in our representations, it is considered to be a suitable site for residential development.

The representations, as submitted, therefore object to the proposed revised settlement boundary for Salisbury and suggest that the 'Asda' site, being a brownfield site that is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods, is appropriate for housing. It should therefore either be allocated for housing or included within the revised settlement boundary.

The 'Asda' site lies on the northeastern edge of Salisbury in the Bishopdown area of the city, and fronts on to Pearce Way and the A30 London Road. It extends to 3.9 hectares and has a history of planning consents. The site has an extant planning permission for a bulky goods retailing scheme, which was approved in the mid 1990's and a start was made on the scheme, (the creation of an access arrangement off London Road). Planning permission was subsequently granted for a similar bulky goods retail scheme in 2009 (application ref S/2007/1460 refers). This permission was subsequently renewed by later applications for modifications to the scheme until April 2015. More recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.

Vehicular access into the site would be taken from the roundabout at the junction of the A30 and Pearce Way, at which point where preliminary ground works associated with an access has been undertaken previously.

The site is bounded to the west by Green Lane, a pedestrian and cycle path that separates it from residential properties on St Lukes Close; Myrrfield Road; Lindford Road and Monxton Close, and to the east by the A30 London Road and Pearce Way: to the northeast on the other side of Pearce Way is a Premier Inn motel and the Hampton Inn pub-restaurant, while to the southeast running down London Road are a number of car dealerships. Further south along London Road are additional commercial premises, including a health & fitness centre and a petrol filling station containing a small M&S Simply Food, as well as a Park & Ride facility that is accessed off the St Thomas Way/London Road roundabout just south of the site. To the southwest the site abuts the rear gardens of Bishopdown Cottages, a small terrace of houses. Land to the north of Pearce Way is allocated for new housing within the adopted Core Strategy and has recently been developed (Hampton Park).

With regards the suitability of the site for housing, in granting consent for the retail development of the site, the Local Planning Authority recognises that the site falls within the definition of brownfield previously developed land due to the extant planning permission on the site from

Appendix Q - Schedule of representations

	<p>the 1990's. Officers, in their report to committee for the Asda scheme, also recognised that the site is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods. In summary, it is considered that the 'Asda' site presents an opportunity to fulfil some of the housing requirement in the South Wiltshire HMA on a site which lies immediately adjacent to existing residential development without encroaching into the countryside and can be seen as a logical extension of this part of Bishopdown.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Table A.1 within Appendix A of the WHSAP Pre-Submission Draft Community Area Topic Paper for Salisbury explains why each of the proposed amendments were made to the existing settlement boundary in line with the settlement boundary review methodology. It is noted that the settlement boundary at Bishopdown (Map Grid Ref: M5, M4, L4) is proposed to be amended to include built and commenced development that is physically related to the settlement, but that the proposed revised settlement boundary does not include land at Salisbury Retail Park, London Road (the 'Asda' site).</p> <p>This 'Asda' site has a history of planning consents including an extant planning permission for a bulky goods retailing scheme, which was approved in the mid 1990's and for which a start was made on the scheme, (the creation of an access arrangement off London Road). More recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.</p> <p>Unfortunately, due to a change in market conditions, there is no longer a requirement for a foodstore in this location. Therefore there is now an opportunity to utilise this brownfield site for an alternative use such as residential development.</p> <p>In the planning officers report to committee for the Asda application, the Local Planning Authority recognises that the site falls within the definition of brownfield previously developed land due to the extant planning permission on the site from the 1990's. The LPA has also accepted that a start was made on the 1990's scheme, (the creation of an access arrangement off London Road) thus keeping the permission alive in law and in theory, enables that particular development to be continued at any time. In other words it has been accepted that development has commenced on site. Officers, in their report to committee, also recognised that the site is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods.</p> <p>Given that the site meets the criteria for being included within the settlement boundary, i.e. land which is physically related to the settlement and for which development has commenced, there is a justification for including it within the revised settlement boundary. To not do so would mean that the plan has not been positively prepared and is not consistent with national policy.</p> <p>The settlement boundary for Salisbury should be amended to include within it the land at Salisbury Retail Park, London Road (the 'Asda' site) to ensure that the plan has been positively prepared and is consistent with national policy.</p> <p>I am instructed by my client, Asda Stores Ltd, to submit the enclosed representations to the Pre- Submission Draft Wiltshire Housing Site Allocations Plan. The representations are made in respect of land at Salisbury Retail Park, London Road, Bishopdown, Salisbury, herein referred to as the 'Asda' site.</p> <p>You will be aware that the 'Asda' site has an extant planning permission for a bulky goods retailing scheme, dating back to the 1990's, and that more recently consent was granted for an Asda foodstore (Ref: 14/04756/FUL) which was approved on the 15th August 2017.</p>			

Appendix Q - Schedule of representations

	<p>Unfortunately, due to a change in market conditions, there is no longer a requirement for a foodstore in this location. This brownfield site is therefore immediately available for alternative forms of development, and for the reasons detailed in our representations, it is considered to be a suitable site for residential development.</p> <p>The representations, as submitted, therefore object to the proposed revised settlement boundary for Salisbury and suggest that the 'Asda' site, being a brownfield site that is located within an established and growing mixed residential and commercial area with good transport links and accessible via a variety of sustainable transport methods, is appropriate for housing. It should therefore either be allocated for housing or included within the revised settlement boundary.</p> <p>The 'Asda' site lies on the northeastern edge of Salisbury in the Bishopdown area of the city, and fronts on to Pearce Way and the A30 London Road. <b>Comment ID:</b> <a href="#">3067</a>		<b>Consultee</b> Forum Trustees Ltd & Lutea Trustees Ltd  <b>Person ID:</b> 1136806	<b>Agent</b> John Jupp William Heath & Co Solicitors  <b>Person ID:</b> 1136797	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As you are aware from our letter to you of the 24th November 2015, copy attached for ease of reference, we act for the unencumbered freeholders of the land comprised in Land Registry Title Number WT297457. We enclose HM Land Registry official office copy entry and title plan in respect of this title number by way of verification.</p> <p>We wish to make the following representations on behalf of our clients adopting the numbering of the Paper seriatim.</p> <p>Table 6.3 Stage 6.18 page 20. This states potential sites are rejected where the appraisal concludes development would result in one or more major adverse effects. Table F.1 Stage 3 page 89 defines a Major adverse effect as one adverse to the objective with no satisfactory mitigation possible. It goes on to say that as a result the Site may be inappropriate for housing development as opposed to outright rejection.</p> <p>Table 6.4 Stage 3 pages 21 and 22. This sets out the reasons for each of the Sites being rejected namely "Given the major adverse effects associated with air quality, specifically regarding odour from the nearby pig farm, the site should not be considered further in the site selection process.". Save for reference to the nearby pig farm there is no other evidence identified of adverse air quality being present. In this context we refer to Table F.16 on page 108 relating to Site S90. The Site Overview states "This site option is located in the village of Winterbourne Earls. With an area of 4.56 hectares the site has a capacity for approximately 103 dwellings; however, mitigation measures might reduce this number.". Under the heading "Assessment Results" for this Site S90 no reference is made to anything at all. This is to be contrasted with the Assessment Results at Tables F.17 and F.18 (pages 108, 109 and 110) where there is detailed references to a noise issue with the railway line and odour from the pig farm. We therefore consider that in the case of Site S90 there is no reason for this site, with a stated capacity of 103 dwellings, to be rejected. No major, moderate and or minor negative effects have been disclosed and or identified.</p> <p>Tables F.17 and F.18 pages 108, 109 and 110. In each instance the reason each site should not be considered further in the site selection process is stated as follows "Given the major adverse effects associated with air quality, specifically regarding odour from the nearby pig farm, the site should not be considered further in the site selection process.". No reference is made to noise from the railway and in the case of air quality the only identified/disclosed issue is the odour from the pig farm. In the case of Table F.17, S91, the Assessment Result states "One major beneficial effect has been identified. Development on the site would help to meet local housing needs in accordance with the policies of the Core Strategy (SA Obj.8). A moderate beneficial effect has been identified as the development will increase the local population and could have a major contribution to the local economy through use of local shops and services (SA Obj. 11) and a minor positive effect is anticipated through the site generating direct and indirect construction employment, and helping to stimulate the local economy once built (SA Obj. 12)". In similar vein Table F.18, Site S92, the Assessment Results states "One moderate beneficial effect has been identified. Development on the Site would help to meet local housing needs in accordance with the policies of the core strategy (SA Obj.8). Two minor beneficial effects have been identified. Development of the Site will increase the local population and could have a major contribution to the local economy through use of local shops and services (SA Obj. 11) and generate direct and indirect construction employment, and helping to stimulate the local economy once built (SA Obj.12)."</p> <p>As stated at 1 above a major adverse effect is one "with no satisfactory mitigation possible".</p>				

Appendix Q - Schedule of representations

	<p>The pig farm in question is Manor Farm Pig Unit operated by Harvey. Farms (Winterbourne) Limited (Registered Number 04198240). According to the latest filings at Companies House this Company is controlled by Mr Philip Nicholas· Baker Harvey.</p> <p>The freehold land and buildings on and from which the Manor Farm Pig Unit is currently operated form part of a far larger area of agricultural land comprised in Land Registry Title Number WT163983 of which Mr Harvey is the sole registered proprietor at the Land Registry.</p> <p>On the 26th May 2017 Mr Harvey, subject to appropriate financial reimbursement, entered into a contractual commitment with our clients to facilitate residential development on Sites S90 and S91. Upon receipt of confirmation this documentation will not be released into the public domain copies can be supplied.</p> <p>As a result of the contractual commitment referred to in 4.3 above and the extent of Mr Harvey's land ownership referred to in 4.2 above satisfactory mitigation is possible.</p> <p>We understand the Environment Agency's approach to be as follows "We do not object to the development on Sites S90 and S92, but we provide a recommendation that these Sites are not used for housing developments on the basis that residents could be subject to some odours from the site, beyond the remit of the permit condition compliance". Accordingly there is not an outright objection on the part of the Environment Agency but a recommendation which needs to be seen in the context of the considerable benefits accruing were residential development to be permitted.</p> <p>We submit that there is an overwhelming case for the Sites to be allocated for housing. There is only one substantive issue at stake namely the alleged odour of the pig farm as currently operated. As identified in 4 above satisfactory mitigation is possible. The Council can therefore deliver a potential 179 additional dwelling houses with the concomitant benefits for the neighbouring school and the identified policies of the Core Strategy namely (SA Obj.8, SA Obj. 11 and SA Obj.12).</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3068</a>		<b>Consultee</b> Minton Group Ltd  <b>Person ID:</b> 1136804	<b>Agent</b> Jenny Henderson Hunter Page Planning Ltd  <b>Person ID:</b> 836252	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This representation has been prepared on behalf of my client, Minton Group Limited, regarding the Wiltshire Housing Site Allocations Plan: Pre-submission draft plan. My client is the long standing owner of Minton Distribution Park, Amesbury, which is an employment site accommodating a mix of uses including B1, B2 and B8 uses.</p> <p>However, the site unfortunately now has an ageing building stock that does not come up to modern building standards and all buildings are in need of renewal. As such, there is a need for the site to be redeveloped and it is suggested that it would represent a suitable site for mixed use development within the Allocations Plan. This letter sets out the site and policy context before reviewing the Allocations Plan and suggesting potential amendments.</p> <p><b>Site Context</b></p> <p>The site is situated to the north-east of the town of Amesbury, and is a mixed-use warehouse, industrial and office complex. The units on the site are of a considerable age and recent reports prepared to assess the current condition of the buildings indicate that they are extremely dilapidated and not fit for modern business purposes. Significant investment would be required to modernise the existing buildings in order to ensure that the site meets the required standards and legislation. Nevertheless, the current design of the buildings is also outdated and the configuration of most of the internal spaces is not suited to most modern business use.</p> <p>As a result, much of the site is currently vacant, with other larger occupiers recently giving notice that they are also vacating the site. The site is now significantly under-utilised despite positive marketing and low rents. It is therefore apparent that the building stock will need to be renewed which will require significant investment.</p> <p>There are a number of modern employment opportunities in the immediate vicinity of the site, namely to the south of the site and at Solstice Park. Solstice Park includes 64 ha industrial and distribution space, as well as trade and roadside uses including hotels, petrol station, public houses and fast food outlets. The Minton Distribution Park cannot compete with Solstice Park as they are able to provide modern purpose built buildings or simply provide employment land. The availability of employment land and buildings at Solstice Park has effectively made the Minton Distribution Park moribund and consequently redevelopment is inevitable.</p> <p>It is evident that the site currently provides low quality employment space, which needs significant investment in order to bring the site up to standard. In order to aid its redevelopment, it is suggested that the site should be considered for mixed use development within the Allocations Plan. There will be a need to provide higher value uses within this mix, to stimulate the sites demolition and clearance and to facilitate the other employment uses in this competitive market.</p>				

## Planning Policy Context

### Core Strategy

Core Policy 1 sets out the settlement strategy for Wiltshire and identifies four tiers of settlements namely Principle Settlements, Market Towns, Local Service Centres and Large and Small Villages. Amesbury is identified as a Market Town. The Policy highlights that Market Towns are settlements that have the ability to support sustainable patterns of living in Wiltshire through their current levels of facilities, services and employment opportunities. 'Market Towns have the potential for significant development that will increase the jobs and homes in each town in order to help sustain and where necessary enhance their services and facilities and promote better levels of selfcontainment and viable sustainable communities.'

Core Policy 2 sets out the delivery strategy which highlights that between 2006 and 2026, provision will be made for at least 178ha of new employment land and at least 42,000 homes. Core Policy 4 sets out the spatial strategy for Amesbury and identifies that Principle Employment Areas will be supported in line with Core Policy 35. The site is identified as a Principle Employment Area known as 'London Road'. It goes on to state that over the plan period (2006 to 2026), 17 ha of new employment land and approximately 2,785 new homes will be provided. The new employment land will be delivered at Boscombe Down and Porton Down, and the housing through the strategic housing allocation at Kings Gate (1,300 dwellings), as well as additional allocations to be set out through the Allocations Plan.

### Commentary

The NPPF is clear at Paragraph 47 that LPA's should significantly boost the supply of housing. The figures set out in the Local Plan are a minimum target and by not allocating sufficient housing within the Amesbury Community Area, this means that the area will not be able to meet its housing need.

It is suggested that the land at Minton Distribution Park is allocated for mixed use development in order to help meet the above housing requirement, as well as enable the redevelopment of the site which is required given the context set out above.

The Amesbury Community Area Topic Paper assesses a number of sites in Amesbury, and the land north of London Road (opposite Minton Distribution Park) was taken forward to a late stage of the assessment process, but discounted because there were more sustainable options available.

However, Minton Distribution Park would represent a more sustainable option than land to the north, given the brownfield nature of the site, surrounding built form, and because its development would not extend the built form of Amesbury over the A303. As such, it is considered a suitable site which would pass the assessment criteria to enable an allocation.

### Status of the Land

The NPPF states that for sites to be considered 'deliverable' means they will be available now, in a suitable location now and achievable within five years and viable, as per footnote 11 of paragraph 47.

### Available

Despite being an allocated employment site, much of the site is currently vacant, with other larger occupiers recently giving notice that they are also vacating the site. The site is in single ownership, and is being promoted by the landowner. There are no legal or ownership problems which could limit development. It can, therefore, be considered to be available now.

### Suitable

The site is less than 1 mile from Amesbury High Street and there are buses along London Road providing services to the town centre, as well as

Appendix Q - Schedule of representations

	<p>Salisbury, Swindon, Marlborough as well as a number of smaller settlements. Amesbury is a sustainable town with many services and facilities, including sports and community uses, education, healthcare, employment opportunities, supermarkets as well as several shops, banks, cafes within the town centre. MOD Boscombe Down is situated to the south-east of the town.</p> <p>The site is suitably and sustainably located for residential development with good accessibility to local services, as above. There are no physical constraints that would prevent or delay development coming forward. Furthermore, the site is brownfield land. The recently published Housing White Paper (Fixing our Broken Housing Market) supports the redevelopment of brownfield land, and it is clear at 1.25 that “brownfield land is suitable for housing unless there are clear and specific reasons to the contrary (such as flood risk)”.</p> <p>The area immediately adjacent to the site mainly comprises commercial/retail space; however, beyond Tesco to the south west is residential development. As such, the redevelopment of the site for a mix of uses would reflect the uses within the immediate vicinity. Accordingly, the site is clearly a suitable location for mixed use development.</p> <p><b>Achievable</b> This site is located within a location that developers find attractive to bring forward for development. Mixed use development represents a viable future use for the site. As above, higher value uses are required on the site in order to bring it up to standard. A mixed use development of the site, containing higher value uses, is considered achievable.</p> <p><b>Conclusion</b> The Allocations Plan as drafted does not meet the housing requirement identified within the Amesbury Community Area and therefore it is considered that additional sites need to be considered for housing, particularly in light of the need to ‘boost significantly the supply of housing’. Minton Distribution Park is an ageing employment site which requires significant investment. However, in light of the availability of employment land locally at Solstice Park, it is considered that the site would be more suitable for a mixed use development (including residential) which would stimulate the sites regeneration, and contribute to meeting the outstanding housing need identified. It is therefore requested that the LPA consider the allocation of the site for mixed use development within the Allocations Plan.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.61				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Plan is not considered to be sound due to failings in the evidence base that underpins it. Please see attached [Text has been copied into comments 3069 as follows; and comments 3071 and 3072].</p> <p>GE's interests relate to the long-term development of land north of Royal Wootton Bassett (RWB) and full details of the land and the initial technical case for development are set out in the attached Vision Document. In making the observations below, GE is fully aware of the role of the HSADPD and its need to be in conformity with the Core Strategy.</p> <p>Objective 1: To ensure there is a clear definition to the extent of the built up areas at Principal Settlements, Market Towns, Local Service Centres and Large Villages</p> <p>GE supports the objective of the DPD in defining the clear extent of the Market Town of RWB. This addresses an existing deficiency highlighted in the Core Strategy Inspector's Report, which considered the settlement boundaries (as then concurrent with the North Wiltshire Local Plan) to be out of date. By updating the boundaries, it ensures that the extent of the Market Town is defined and that decisions about the future direction of growth can be made in a coordinated manner, through the Wiltshire Local Plan Review.</p> <p>In addition, the definition of such a boundary ensures that there is no dispute between where development can and cannot be provided in the RWB Community Area specifically in respect of the town. As set out in Core Strategy Policy CP19 and the Topic Paper that accompanies the HSADPD, there is no numerical need for additional allocations at RWB in the context of the Core Strategy housing target. This means that a subsequent Neighbourhood Plan cannot allocate additional housing land at the town, as it would be contrary to the DPD. Furthermore, it ensures that future discussions about the growth of the town can be made in a comprehensive manner through the Wiltshire Local Plan Review, unencumbered by the difficulties of administrative boundaries associated with Neighbourhood Planning.</p> <p>It is also acknowledged that the HSADPD is a 'daughter document' to the Core Strategy and its scope is limited to identifying the remaining outstanding balance of housing from the Core Strategy. However, if circumstances dictate and there is a need to identify further housing sites as a result of the Wiltshire Local Plan Review, this could be achieved through a further Site Allocations Development Plan Document as set out in the Core Strategy.</p> <p>Given the following:</p> <ul style="list-style-type: none"> <li>Well documented difficulties Swindon Borough is experiencing with 5-year housing land supply;</li> <li>The initial findings of the SHMA; and</li> <li>The proposed re-drawing of the Housing Market Areas to create a new Swindon HMA, which may be cross-boundary</li> </ul> <p>GE's site should be considered as an option for a strategic urban extension to assist both LPAs in meeting their respective housing requirements and timely plan preparation. There are a number of precedents in other LPAs, with the South Worcestershire and Joint Core Strategy for Cheltenham, Gloucester and Tewkesbury demonstrating how an overall strategic target can be disaggregated to individual LPAs.</p> <p>In terms of future development at RWB, accompanying this plan is a Vision Document promoting land north of Swindon Road as a long-term strategic allocation. The prospective allocation incorporates circa 400 open market and affordable dwellings; a local hub area to include a</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>GE's interests relate to the long-term development of land north of Royal Wootton Bassett (RWB) and full details of the land and the initial technical case for development are set out in the attached Vision Document. In making the observations below, GE is fully aware of the role of the HSADPD and its need to be in conformity with the Core Strategy.</p> <p>Objective 2: To help demonstrate a rolling five year supply of deliverable land for housing development</p> <p>GE strongly supports the need for the Council to maintain a 5-year housing land supply. This is critical in light of the fact that the Core Strategy Inspector recognised the Council commitment to undertaking an early review of the CS.</p> <p>However, the context for preparing the HSADPD is the Core Strategy, which is based on a housing target that is in need of immediate review. Therefore, whilst the DPD is clearly assisting the Council in maintaining a 5-year housing land supply figure, the level of provision conflicts with the requirements of Framework Paragraph 47 that requires LPA to ensure that the Local Plan meets the "full objectively assessed needs for market and affordable housing".</p> <p>The risks associated with under-delivery of units and the lower housing target can be highlighted in the Council's approach to the determination of the Land at Marsh Farm Application (14/08060/OUT) which saw an outline planning application for up to 320 dwellings and other uses being recommended for approval on the basis of the Council not having a 5-year supply of housing land. Whilst the application was subsequently refused at the following strategic committee, it underlines a concern that the lack of progress on the Local Plan Review and the constrained nature of the housing policy in RWB mean that situations could arise which could see major decisions about the future of RWB being made via the planning application/appeal route. Therefore, the emphasis is on the Council to quickly resolve the HSADPD and proceed with the Local Plan Review.</p> <p>Given the following:</p> <ul style="list-style-type: none"> <li>Well documented difficulties Swindon Borough is experiencing with 5-year housing land supply;</li> <li>The initial findings of the SHMA; and</li> <li>The proposed re-drawing of the Housing Market Areas to create a new Swindon HMA, which may be cross-boundary</li> </ul> <p>GE's site should be considered as an option for a strategic urban extension to assist both LPAs in meeting their respective housing requirements and timely plan preparation. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>GE's interests relate to the long-term development of land north of Royal Wootton Bassett (RWB) and full details of the land and the initial technical case for development are set out in the attached Vision Document. In making the observations below, GE is fully aware of the role of the HSADPD and its need to be in conformity with the Core Strategy.</p> <p>Objective 3: To allocate sites at the settlements in the County that supports the spatial strategy of the Wiltshire Core Strategy.</p> <p>GE supports the approach of the HSADPD in making allocations concurrent with the requirements of the Core Strategy. To do otherwise would risk the HSADPD not in conformity with the Core Strategy and would otherwise be unsound. GE still wishes to express its concerns about the lack of additional housing at RWB and meeting the requirements of Framework paragraph 47, but accepts the limitations being placed on the DPD.</p> <p>Other Matters</p> <p>GE is concerned that the drive to prepare the DPD presents an unnecessary burden on the Council in undertaking a review of the Wiltshire Core Strategy.</p> <p>It is already clear from the Cabinet papers of the 12 September meeting that there is a clear commitment to review the Core Strategy. Whilst the details of the emerging Local Plan housing target remain confidential, the papers make reference to the fact that the housing market areas will be subject to change, with the potential introduction of a Swindon Housing Market Area. The introduction of such an approach is a positive move as it will look to address one of the concerns highlighted by the Core Strategy Inspector (paragraph 68 of his report) which saw the delineation of the HMAs concurrent with the County boundary as being "artificial".</p> <p>On-going work between Wiltshire Council and Swindon Borough through the JSEC has identified that the OAN for housing between the two LPAs over a 20 year period from 2016 to 2036 is 72,000 dwellings or 3,600 per annum. It is understood that the exact means by how this is to be delivered is yet to be finalised, but is understood to be in the region of an additional 50 dwellings per annum for Wiltshire.</p> <p>Given the following:</p> <ul style="list-style-type: none"> <li>Well documented difficulties Swindon Borough is experiencing with 5-year housing land supply;</li> <li>The initial findings of the SHMA; and</li> <li>The proposed re-drawing of the Housing Market Areas to create a new Swindon HMA, which may be cross-boundary</li> </ul> <p>GE's site should be considered as an option for a strategic urban extension to assist both LPAs in meeting their respective housing requirements and timely plan preparation. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Allocations Plan</p> <p>The Allocations Plan Pre-Submission Draft and its evidence base, namely 'Community Area Topic Paper – Amesbury June 2017' looks at the overall housing requirement for the Community Area, the residual housing requirement and allocates sites for development. The Topic Paper assessed a number of sites within the Community Area and only two sites have been taken forward for residential development: Clover Lane, Durrington (45 dwellings) and Larkhill Road, Durrington (15 dwellings).</p> <p>However, the evidence base identifies a residual requirement of 181 dwellings within the Community Area (as set out at p8 of the Amesbury Community Area Topic Paper), of which 73 should be identified within the market towns of Amesbury, Bulford and Durrington, and 108 across the remainder of the community area.</p> <p>The Allocations Plan allocates 60 dwellings in Durrington. In respect of the wider community area, the made Idmiston Neighbourhood Plan is proposing to allocate 32 dwellings in Porton. Consequently, the overall residual housing requirement for the Amesbury Community Area Remainder can be adjusted to 76 dwellings. However, none of the sites assessed within the Topic Paper for the wider Community Area have been taken forward as allocations. As such, the housing requirement for the Amesbury Community Area is not met, with a shortfall of 89 dwellings remaining across the Community Area.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.2 Land off the A363 at White Horse Business Park		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write on behalf of our client Linden Homes to provide representations to the pre-submission version of the Wiltshire Housing site Allocations Plan (HSAP). The representation below is made in relation to proposed allocation H2.2 Land off the A363 at White Horse Business Park, Trowbridge.</p> <p>The publication of the HSAP is long overdue. Since the adoption of the Wiltshire Core Strategy in January 2015, the timetable for the production of the HSAP has been revised a number of times. The delay in adoption of this document has had serious consequences on the supply of houses in Wiltshire and in particular the ability of the Council to demonstrate a five year supply of housing. It is therefore critical that the HSAP is adopted as soon as possible to ensure the minimum housing requirements of Wiltshire are met in accordance with the development Strategy. There is still a requirement for the Council to undertake a review of the Core Strategy and the overall housing numbers, as was highlighted by the Core Strategy Inspector on adoption. However, this should be undertaken independently of the HSAP process rather than in its stead, to ensure there is no policy void and that development accords with the approved Strategy in the short and medium term.</p> <p>The HSAP is being prepared in accordance with the Core Strategy and this is supported. The adopted Core Strategy approach to the distribution of housing, based around a focus of development towards a number of principal settlements is a sound strategy.</p> <p>Trowbridge is a principle location for growth within Wiltshire and has one of the highest indicative requirements for housing of any town in Wiltshire within the Plan period (2006-2026). However, as noted in the HSAP delivery of housing within Trowbridge is significantly below the indicative requirement. Due to the delay in the HSAP and the availability of land for development, there has been an over reliance on delivery from the Strategic site at Ashton Park. This has experienced significant delays to the extent that 1000 dwellings allocated for this site within the plan period are now expected to be delivered post 2026. It is therefore essential that sufficient allocations and number of dwellings are identified within Trowbridge within the HSAP to make up for this shortfall in delivery, and ensure that these can be delivered within the plan period.</p> <p>There is a discrepancy between the HSAP document and the Trowbridge Community Area Topic Paper in relation to the residual requirement for Trowbridge (between 1,220 and 2,020). Clarity is needed on which is the correct figure and the number of dwelling allocations should reflect this. However, it is also important that in identifying allocations and housing targets within these allocations, that these are seen in the context of the “minimum” housing requirement in the Core Strategy; the fact that the housing requirement will need to be reviewed shortly; and the Government’s objective to boost housing supply.</p> <p>It is also noted that the Council has included a windfall allowance to help meet the overall housing requirement. Windfalls are by definition not planned for, and inclusion of this element to help meet requirements does not amount to planning positively, as required by the NPPF. In this context, the Council should be looking to meet the full remaining requirement through planned allocations.</p> <p>H2.2 Land off the A363 at White Horse Business Park, Trowbridge</p> <p>The Council has undertaken a thorough review of available sites to inform the site selection process and this is considered robust. The process enables the most appropriate and sustainable sites to be identified.</p>		

Appendix Q - Schedule of representations

	<p>Ordinarily, in accordance with the Council’s methodology, the site sifting process results in only sites assessed as being “more sustainable” through the Sustainability Appraisal being considered as preferred site allocations. However, because of the remaining residual need in Trowbridge “less sustainable” sites have also been considered. This is even before deductions have been made to site capacity from numbers considered in the SHLAA.</p> <p>The result in Trowbridge is the preferred allocations would provide a total of 800 dwellings (as proposed). 180 dwellings would come from a site (Southwick Court) which is considered to be ‘less sustainable’ (as assessed in the Councils SA). The allocations therefore fall well short of the required number of housing identified for Trowbridge (whichever residual figure is used).</p> <p>The inclusion of Land off the A363 at White Horse Business Park, Trowbridge as one of the preferred allocations is supported. As assessed by the Council, the site represents a sustainable and appropriate housing site, which will be able to deliver a large number of housing within the plan period. It is considered however, that the Council have vastly underestimated the amount of dwellings that could be delivered on this site.</p> <p>The site in total measures some 25.26ha. It is accepted that the whole site will not be available for development as, noted by the Council, there will need maintain a visual separation between North Bradley and Trowbridge, a need to retain hedgerows, and respect surrounding listed buildings. However, the proposed allocation of 150 dwellings is considered to be too low and would equate to a density of less than 6dw/ha. It is not clear how this very low figure has been reached.</p> <p>This clearly would not make the most efficient use of the site. As an identified sustainable site, the opportunity to maximise the amount of development (whilst respecting constraints, as discussed) should be embraced, to either avoid the need to allocate less sustainable sites or increase the overall allocation figures to help to achieve the indicative residual requirement for Trowbridge.</p> <p>The site clearly has capacity to achieve far greater numbers than the 150 currently allocated for the site. The site is available for development now, with a range of accesses into the site which would enable different parts of the site to be developed simultaneously to speed up delivery. Linden Homes are a bespoke national housebuilder and are an ideal development partner to ensure the Council’s housing requirements are deliverable and will look to develop this site in accordance with the Council’s housing need requirement.</p> <p>Linden Homes have already commenced studies to inform development of the site, meaning housing could be delivered on the site in the short term. Care would have to be taken to ensure the Grade II listed monuments in the burial ground of the former Baptist church and neighbouring farmhouse are respected, and existing hedgerows and trees are maintained. However, it is considered that the allocation could conceivably supply in excess of 300 dwellings.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To provide further information on the capacity of allocation H2.2</p>

<b>Comment ID:</b>	<a href="#">3075</a>	<b>Consultee</b> Miss Emma Powell Land and Planning Manager	<b>Agent</b> Mr Tristan Dewhurst Senior Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Redrow Homes  <b>Person ID:</b> 840359	Lichfields  <b>Person ID:</b> 443671	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph 4.3-4.5; 4.6-4.27; Table 4.2 and 4.3		Justified Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Paragraph 4.3-4.5; Tables 4.2 and 4.3</p> <p>This section of the Wiltshire Housing Site Allocations Plan (HSAP) identifies the areas where site allocations have been made. It suggests that the priority for housing land allocations is on higher tier settlements that have not yet met or contributed towards indicative levels of provision, which includes Trowbridge. We support a focus of the strategy on those community areas that have under-delivered. Read alongside the Site Selection Process Methodology (Topic Paper 2) and the Trowbridge Community Area Topic Paper, the Plan clearly excludes the whole of the Trowbridge Community Area Remainder from consideration, and no SHLAA sites were considered around any of the Large Villages. This approach is particularly inconsistent noting the proximity of proposed allocations to the Large Villages, notably North Bradley.</p> <p>Paragraph 4.5 and Table 4.3 indicate that housing site allocations were also made in at Large Villages in the Chippenham, Malmesbury, Warminster and Westbury Community Area Remainers. This is despite the indicative Core Strategy requirements being in some cases wholly met for these Community Area Remainers, suggesting further inconsistencies in the Council's approach.</p> <p>There is no objective reason to positively consider the role of the Chippenham CA remainder and the Large Villages around it and to discount the wider area around the Trowbridge where under delivery is a more significant problem.</p> <p>We object to the approach set out in the Plan, which is inconsistent and unjustified. The Plan should consider all available, deliverable and sustainable sites for development in the Trowbridge Community Area to ensure a flexible and deliverable response to the significant identified housing shortfall.</p> <p>A reliance on sites in proximity to the Ashton Park strategic allocation, notably those contingent on significant infrastructure works to be able to come forward, risks compounding the delays which have caused the housing shortfall in the Trowbridge Community Area. As has been noted in the HSAP, the housing requirements for each settlement are indicative as is the disaggregation and should not therefore preclude consideration of sites in the Large Villages, including Southwick. The disaggregation is not a set bar and to not consider the wider area is inappropriate. This has led to the proposed allocation of some sites with more significant constraints such as landscape and heritage.</p> <p>The exclusion of Southwick and the Trowbridge Community Area Remainder from consideration in identifying and assessing sites for allocation is therefore not justified, and we object to the Plan as currently prepared.</p> <p>Site Selection Process – 4.6-4.27</p> <p>As highlighted above, our client's site has not been considered through the HSAP allocations due to the Site Selection Process Methodology. This is due to the approach at the first stage which defines the 'Area of Search' and excludes the Trowbridge Community Area Remainder from consideration. As stressed, our view is that the indicative divide between Trowbridge and the Remainder Area is not justified in light of the significant and strategic housing shortfall at one of the Principal Settlements in Wiltshire. The Council cannot rely on the requirements being indicative for each community area and then rely on the subdivision between town and the remainder as an absolute. There must be flexibility both ways.</p>				

#### Appendix Q - Schedule of representations

Had sites from the whole of the Trowbridge Community Area been considered within the 'Area of Search', then our client's site at Blind Lane, Southwick would have been formally considered as a prospective location for housing. Considering the characteristics and merits of the site against the site selection criteria, we consider that the site clearly presents itself as an available, sustainable and deliverable location for development:

The site does not meet any of the 'exclusory criteria' set out at Stage 2a of the process:  
It is not an existing allocation, commitment, and is situated adjacent to a defined settlement boundary.  
The site is not fully or partly within the settlement boundary.  
The site is not fully or partly within any of the specified environmental designations (SAC, SPA, Ramsar sites, National Nature Reserve, Ancient woodland, SSSI).  
The site is not within the Green Belt.  
The developable extent of the site is within Flood zone 1.  
The site is not fully or partly within any internationally or nationally designated heritage assets.  
Stage 2B indicates that the SHLAA sites at some Large Villages and Local Service Centres will be removed because previous and committed development already meets those villages' local needs, or they are in an AONB and alternatives are available, or a Neighbourhood Plan for the settlement has already reached an advanced stage.  
The latter two criteria do not apply to our site in this instance. It is not located in an AONB, and the Neighbourhood Plan is at a very early stage of preparation. Whilst the indicative requirement for the Trowbridge Community Area Remainder has now been met, the significant identified shortfall of housing in Trowbridge itself, coupled with the environmental and development constraints at the town, mean that this approach is untenable in the Trowbridge Community Area. The methodology should therefore allow consideration of sites at the Large Villages close to Trowbridge.

Stage 3 comprises the Sustainability Appraisal of the sites proposed. There is an extensive evidence base in relation to our client's site with a suite of supporting technical reports. As part of the planning application (16/12279/OUT) it was concluded that there were no technical constraints to site delivery. The site is a more appropriate option than a number of the proposed site allocations in Trowbridge some of which have clear development constraints.

Stage 4a takes the assessment of prospective sites further. It indicates that more detailed proposals for the sites passing stages 1-3 were prepared and consulted upon, with a further assessment of the relative sustainability, benefits and opportunities of each site. Our client's site at Southwick has been shown to be a sustainable, deliverable and suitable location for development. The outline application submitted on the site presents a masterplan which demonstrates that residential development can be accommodated within a sympathetic scheme which protects the ecological and environmental assets of the site. The site's sustainable location, with close access to the local primary school and public transport links, also counts in favour of the site. There are also substantial additional benefits to the site, which it has been demonstrated could deliver a policy compliant contribution to affordable housing, new public open space, a contribution towards a new foot link in Southwick and an improved landscape interface between the village and the countryside.

The site therefore, represents a sustainable pattern of development and has the opportunity to meet housing need within the Trowbridge Community Area and to deliver local benefits for the community in line with local policy objectives.

Paragraph 4.3-4.5; Tables 4.2 and 4.3

A fundamental review to the Site Selection Process Methodology is required to ensure that the significant and strategic shortfall of housing in the Trowbridge Community Area gives full consideration to all opportunities across the Community Area. This will ensure that the Plan is able to consider and allocate a range of sites which are available, sustainable and deliverable, noting the unanticipated constraints which have already been identified on many sites at the edge of Trowbridge.

Site Selection Process – 4.6-4.27

The approach to the housing methodology at the initial stages must include the whole Trowbridge Community Area to enable all sustainable, available and deliverable sites to be considered through the HSAP. Our client's site presents a clear opportunity to further meet the housing shortfall in the Trowbridge Community Area.

On behalf of our client, Redrow Homes (South West) Ltd, please find enclosed representations to the Regulation 19 Consultation on the Wiltshire Housing site Allocations Plan (HSAP) Pre-Submission Document.

## Appendix Q - Schedule of representations

We set out below a summary of the enclosed representations:

The HSAP must make clear that where there are significant housing shortfalls identified that the LPA will review the spatial strategy flexibly. For the Trowbridge Community Area, where there is a significant housing shortfall, this will require consideration of sites across the whole community area to ensure that the Plan considers all sustainable, available and deliverable sites to meet this shortfall in the short-to-medium term.

The extent of the housing shortfall identified is significant and presents a risk to the strategic role and function of Trowbridge as one of the Principal settlements in the District. Furthermore, it should be noted that the Wiltshire Core Strategy sets out the overall housing requirement for Trowbridge to be met as a minimum. The HSAP should therefore seek to allocate sites to meet the full identified housing shortfall in Trowbridge. The HSAP must respond to the joint SHMA update by Wiltshire and Swindon to ensure that it allocates housing to meet the full objectively assessed housing need in the District.

We object to the exclusion of the Trowbridge Community Area Remainder from consideration in the site selection process to meet the significant identified housing shortfall. Given the acknowledged environmental and infrastructure constraints around the town it is imperative that the LPA fully considers all options in the Community Area. The Council cannot apply flexibility to the target Core Strategy Community Area housing requirements and then treat the disaggregation between the Principal Town and the remainder area as a fix.

The HSAP elects to allocate development to Large Villages in other locations, including adjacent to North Bradley and also where the indicative 'Remainder' requirement is met. To exclude Large Villages around Trowbridge, including Southwick, to address some of the housing need is untenable in light of the significant housing shortfall.

The site allocations proposed in Trowbridge are subject to constraints which have serious potential to delay delivery or otherwise limit development capacity e.g. all sites will be affected by Habitat Regulations Assessments and the requirement to implement the Trowbridge Recreation Management Mitigation Strategy which is yet to be agreed. Some sites are noted to require significant transport and social infrastructure to support development, or else have landscape and heritage sensitivities. Noting these factors, we consider there is a real risk of further delay to delivering the housing in Trowbridge. This compounds the decision not to meet the full identified housing shortfall.

There is a clear need to make further housing allocations within the Trowbridge Community Area with the contribution from the whole Community Area given detailed consideration.

Our client's site at Blind Lane, Southwick, presents a logical and sustainable opportunity to meet this need. The recent outline planning application demonstrated that there are no technical constraints to delivering housing within the short-to-medium term. We have enclosed a site location plan (reference R0416\_05A Rev A) and the proposed site masterplan (reference R0416\_06 Rev G) to illustrate the opportunity this site presents to accommodate part of Trowbridge's housing requirement.

There are numerous merits to allocating this site including:

The site is not subject to any international, national or local environmental designations, including AONB, biodiversity and Green Belt.

The site is defensible and enclosed and a logical extension of Southwick, without risking coalescence with Trowbridge.

The site is in a sustainable location due to the proximity of key local services, its proximity to the centre of Trowbridge and the availability of public transport links.

The site is majority Flood Zone 1, and therefore sequentially preferable as a location for development.

Suitable vehicular and pedestrian access can be provided to and from Blind Lane, and transport assessments have confirmed that the proposals will not give rise to unacceptable traffic impacts.

The site is not in the context of any designated heritage assets or landscapes, and it has been shown that the site could provide an improved interface for Southwick with the countryside.

Following detailed surveys, the ecological interests of the site have been identified and a masterplan proposed which the Council's ecology officer confirms will be unlikely to have adverse impacts on biodiversity interests.

The majority of the mature trees and hedgerows on the site can be retained and incorporated into the scheme, with landscaping and replacement planting to compensate where a small amount of hedgerow is removed for the site access.

A list of the documents upon which the planning application was determined has been included at the end of this letter. These are available on Wiltshire Council's online register, and form an up-to-date evidence base which demonstrates that the site is technically deliverable and appropriate. We reserve the right to refer to these documents to support our participation in the Examination of this Plan.

Appendix Q - Schedule of representations

	<p>We urge the Council to review this information in light of our comments and concerns regarding the HSAP strategy and proposed allocations, and to positively allocate our clients site for residential development to support the delivery of housing in the Trowbridge Community Area. We trust that the enclosed representations will be considered in detail. Since this is the first published full iteration of the Wiltshire Housing Site Allocations Plan, we would urge the local authority to reconsider the strategy proposed within the plan, and to favourably consider our client's site for allocation to meet Trowbridge's housing needs in the current plan period.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">3077</a>	<b>Consultee</b> Miss Emma Powell Land and Planning Manager	<b>Agent</b> Mr Tristan Dewhurst Senior Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Redrow Homes  <b>Person ID:</b> 840359	Lichfields  <b>Person ID:</b> 443671	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Policy H2 (North and West Wiltshire Housing Market Area), Policy H2.1 (Elm Grove Farm); H2.2 Land of the A363 a White Horse Business Park; H2.3 Elizabeth Way; H2.4 Church Lane; H2.5 Upper Studley; H2.6 Southwick Court</p> <p>We set out below our client's strong concerns about the approach to the housing strategy and proposed allocations in Trowbridge.</p> <p>Meeting the identified housing shortfall</p> <p>Though the allocations proposed will provide up to 800 units for the Trowbridge Community Area, the Plan notes that there is a significant housing shortfall of 1,220 units across the town (see paragraph 4.52).</p> <p>The timescales for development at Ashton Park still remain uncertain and subject to conjecture. There remains a risk that delivery will slip further during the plan period. The identified shortfall will therefore not be remedied unless the Council robustly and fundamentally reviews all site opportunities to sustainably deliver housing across the Trowbridge Community Area.</p> <p>Trowbridge is identified as one of the Principal Settlements in the Core Strategy. This is the primary settlement tier, with only two other settlements identified (Chippenham and Salisbury). The town has a critical strategic role as a primary focus for employment, residential and other related development. Core Policy 1 in the Core Strategy seeks to safeguard and enhance their strategic roles as employment and service centres. The proposition within the HSAP to allocate only 800 units, rather than for the identified shortfall in full, does not support the objectives of the Core Strategy and will undermine the role and function of Trowbridge.</p> <p>We consider therefore that there is an urgent need for additional sites to meet the full identified housing shortfall in the Trowbridge Community Area.</p> <p>Deliverability and Risk of Delay</p> <p>Noting the unanticipated delays to bringing forward the Ashton Park strategic site, there is a clear risk to the proposed concentration of new allocations at the south of Trowbridge.</p> <p>A key objective of the HSAP is to ensure an adequate supply of housing land to realise the spatial strategy set out in the Wiltshire Core Strategy and deliver sites quickly. At Trowbridge, it is acknowledged that the Ashton Park strategic site will not deliver the level of housing originally projected within the Core Strategy. The two significant factors causing the ongoing delays are the issues relating to Habitats Regulations Assessment (HRA) and protected bat populations and the requirement to provide significant new infrastructure to support the new development. The focus of the HSAP must be on allocating suitable and sustainable sites which are both available and deliverable, in order to secure a credible short-to-medium term supply of housing in Trowbridge whilst the strategic sites are delayed in coming forward.</p> <p>Paragraph 5.44 notes that there are significant constraints limiting the choice of available sites across Trowbridge. These constraints include ecological designations and habitats (notably the populations of bats associated with the Bradford-on-Avon SAC), landscape and Green Belt designations and highways and service infrastructure limitations. The decision of the Council to allocate majority of the new sites at the south of the town, with much adjacent to the Ashton Park strategic site, risks exposing the new allocations to the same development delays and constraints which have caused the housing shortfall in Trowbridge.</p>				

## Appendix Q - Schedule of representations

In particular, we note that the LPA considers each proposed allocation has the potential to be used by Betchstein bats associated with the Bradford-on-Avon SAC. The proposed allocations are not supported by any site surveys which seek to quantify or assess the potential for these sites to affect the Bradford-on-Avon SAC.

The HRA HSAP suggests that the Trowbridge Recreation Management Mitigation Strategy will need to be produced and implemented before development comes forward to address 'residual uncertainty, particularly due to effects of growth at a landscape scale' (Wiltshire Housing Site Allocations Plan: Habitat Regulations Assessment June 2017). The document suggests that this is currently being prepared, with discussions ongoing with Natural England, though there is no clear timescale for when this will be completed, what works will need to be implemented prior to development coming forward. The potential for this to adversely impact timescales and delivery is therefore unknown. It is imperative that such work is prepared and agreed now as part of the HSAP and fully tested in agreeing the proposed site allocations. To leave this until after the Plan is agreed will provide sufficient uncertainty and potentially continue to exacerbate the lack of recent housing delivery.

The proposed allocation at Elm Grove Farm (ref. H2.1) is also contingent on securing and implementing significant infrastructure works in the form of upgrades to Drynham Lane and a connection to the A363. The site is also required to accommodate a new primary school to serve the local area and provide additional school place capacity. These are significant infrastructure requirements which have the potential to delay delivery. This risks a further delay to a proposed site allocation, which contrary to the purpose of allocating sites to meet a short-to-medium term housing shortfall at Trowbridge.

### Impact on Capacity

Until such time as the strategy is finalised, it is unclear how the requirements of the Trowbridge Recreation Management Mitigation Strategy might impact the capacity of these sites to accommodate the quantum of development proposed in these allocations. Any reduction in the sites' developable capacity will further reduce the capacity for the site to meet the unmet housing requirement in Trowbridge. It is imperative that the mitigation strategy is prepared alongside the plan so that the impacts are known and in order to avoid the same problems as experienced with Ashton Park.

Other sites which have been identified have potential for landscape and heritage impacts, due to their proximity to the setting of designated heritage assets and their exposure to the rural hinterland around Trowbridge. These issues do not inherently preclude development at these locations, though they underscore the local sensitivities of the site, which has further potential to delay delivery or constrain site capacity as acceptable masterplan approaches are agreed.

For example, site allocation H2.6 (Southwick Court) is considered within the Landscape Assessment supporting this consultation as being an 'attractive' and 'integral part of the settlement setting'. It further concludes that the site has a 'low' capacity to accommodate change with a 'high' overall magnitude of effect on landscape character. This does not account for impact upon the setting of Southwick Court, as a significant Grade II\* listed manor house.

We question whether these sites necessarily present the best option to accommodate new development. Our client's site at Blind Lane, Southwick, for example, has been demonstrated to be of a low sensitivity considering landscape, ecology and heritage matters. Had the site search included the wider Trowbridge Community Area, a greater choice of sites would have been available for consideration, including our client's site at Blind Lane, Southwick.

The site at Blind Lane Southwick (see plan attached reference: R0416\_05 Rev A and illustrative masterplan reference: R0416\_06 Rev G) presents an available, deliverable and sustainable location to help meet the housing need in the Trowbridge Community Area. The outline planning application (reference: 16/12279/OUT) submitted in December 2016 has demonstrated that the site is not environmentally sensitive, and that there are no technical constraints which would prohibit development in the short term.

It is worth summarising the merits of this site in more detail:

Our client's site is not subject to any international, national or local environmental designations.

The site is located at the edge of the settlement in Southwick, adjoining existing residences along its northern boundaries. The southern boundaries are clearly defensible with hedgerows and a watercourse which provides a natural physical containment to the site. It is situated to the south-east of the village, and would therefore preserve Southwick's separate identity and not contribute to the coalescence of Southwick with Trowbridge.

The site is in a sustainable location, with access to key local services including a primary school a short walk from the site, local convenience store, two churches, community hall and other local retail. There are public transport links between Southwick and the centre of Trowbridge,

#### Appendix Q - Schedule of representations

which is situated 2.3 miles from the site. Wiltshire Council's highways officers confirmed their view that the site represented a 'reasonably sustainable' location in transport terms when responding to the proposals through our outline planning application.

The site falls outside of the Green Belt, which places a significant constraint upon development to the north and north-west of Trowbridge. It therefore presents an available, sustainable and deliverable site for development ahead of requiring the release of any Green Belt land (a review of which is referenced in the HSAP-Paragraph 4.58).

The majority of the site falls within Flood Zone 1, and is therefore sequentially preferable from a Flood Risk perspective. The Flood Risk Assessment and associated drainage details submitted with the outline application have shown that the site can be developed to sustainably manage foul and surface water drainage without increasing risk of flooding on the site or elsewhere. Wiltshire Council's drainage team confirmed that they had only comments on the application, subject to the application of conditions.

The application site is not on or within the vicinity of any local, national or international biodiversity or geophysical designations. The surveys undertaken to support the application identified the habitats and species of interest on the site, and shown that the site can be developed whilst protecting and enhancing protected and important species on the site. Wiltshire Council's ecology officer has confirmed that the proposals identified all sensitive ecological receptors and that, subject to appropriate conditions, sufficient mitigation was included so that harmful impacts on protected sites and species would be very unlikely. This is significant in the context of the known ecological and HRA constraints around Trowbridge. There are no Habitat Regulation issues regarding its potential development.

The site falls outside of any designated landscape constraints, including any AONBs. The site is otherwise level and visually contained, with a low landscape value and sensitivity. Wiltshire Council's landscape officer commented on the outline application, indicating that the proposals would not be uncharacteristic to the area and that the scheme would provide an improved interface with the surrounding countryside.

Suitable access to and from the site can be provided, including pedestrian, cycling and vehicular links, as demonstrated through the application. The transport assessment submitted with the application also confirmed that there would be no severe or unacceptable traffic impacts arising from the proposed development. These points were agreed with Wiltshire Council's highways officer, as well as agreeing that the site constituted a reasonably sustainable location for development in transport terms.

There are no designated heritage assets within the site, including Listed Buildings, Conservation Areas or Scheduled Ancient Monuments. The application site is also not located in the near setting of any designated heritage assets, and can therefore be developed without harm to the historic environment. Additionally, survey work undertaken as part of the application confirmed that there is a very low potential for significant archaeological remains at the site.

The site could be developed without requiring significant removal of mature trees or hedgerows. A small amount of hedgerow would need to be removed or reduced to create an appropriate access, though compensatory planting could mitigate the limited impacts that this would have.

The impacts of development at this site have therefore been fully considered and evidence base submitted to support this planning application demonstrates that there are no technical constraints prohibiting the site from accommodating residential development. The draft heads of terms, which have been agreed in principle, have shown that the site-specific impacts of the development can be appropriately mitigated through policy compliant on-site contributions for affordable housing and public open space, as well as providing contributions to off-site improvements and infrastructure. The sole reason for refusal given on the application relates to the principle of development and the development plan strategy.

Policy H2 (North and West Wiltshire Housing Market Area), Policy H2.1 (Elm Grove Farm); H2.2 Land of the A363 a White Horse Business Park; H2.3 Elizabeth Way; H2.4 Church Lane; H2.5 Upper Studley; H2.6 Southwick Court

The Council must fundamentally revisit the site selection process to ensure that the outcomes identify sustainable, available and deliverable sites to provide a flexible approach to meeting the housing need of the Trowbridge Community Area. It is essential to ensure that there is an adequate supply of housing to support the growth of the town as one of the Principal Settlements in Wiltshire. The full identified housing shortfall must therefore be met in full, and it will be necessary to consider additional sites for allocation.

The site selection process methodology must, from the outset, consider the overall Trowbridge Community Area to maximise opportunities for sustainable development, and not exclusively consider the constrained and sensitive perimeters of Trowbridge town. Priority for new allocations should be given to sites which are accessible and sustainably located, and which have been proven to be available, deliverable and not technically constrained.

#### Appendix Q - Schedule of representations

We urge the Council to consider our client's site favourably and allocate it for residential development, in order to ensure that there is a sufficient choice of housing sites to address local affordable housing needs and to ensure sufficient flexibility to the plan, and to provide certainty of delivery.

On behalf of our client, Redrow Homes (South West) Ltd, please find enclosed representations to the Regulation 19 Consultation on the Wiltshire Housing site Allocations Plan (HSAP) Pre-Submission Document.

We set out below a summary of the enclosed representations:

The HSAP must make clear that where there are significant housing shortfalls identified that the LPA will review the spatial strategy flexibly. For the Trowbridge Community Area, where there is a significant housing shortfall, this will require consideration of sites across the whole community area to ensure that the Plan considers all sustainable, available and deliverable sites to meet this shortfall in the short-to- medium term.

The extent of the housing shortfall identified is significant and presents a risk to the strategic role and function of Trowbridge as one of the Principal settlements in the District. Furthermore, it should be noted that the Wiltshire Core Strategy sets out the overall housing requirement for Trowbridge to be met as a minimum. The HSAP should therefore seek to allocate sites to meet the full identified housing shortfall in Trowbridge. The HSAP must respond to the joint SHMA update by Wiltshire and Swindon to ensure that it allocates housing to meet the full objectively assessed housing need in the District.

We object to the exclusion of the Trowbridge Community Area Remainder from consideration in the site selection process to meet the significant identified housing shortfall. Given the acknowledged environmental and infrastructure constraints around the town it is imperative that the LPA fully considers all options in the Community Area. The Council cannot apply flexibility to the target Core Strategy Community Area housing requirements and then treat the disaggregation between the Principal Town and the remainder area as a fix.

The HSAP elects to allocate development to Large Villages in other locations, including adjacent to North Bradley and also where the indicative 'Remainder' requirement is met. To exclude Large Villages around Trowbridge, including Southwick, to address some of the housing need is untenable in light of the significant housing shortfall.

The site allocations proposed in Trowbridge are subject to constraints which have serious potential to delay delivery or otherwise limit development capacity e.g. all sites will be affected by Habitat Regulations Assessments and the requirement to implement the Trowbridge Recreation Management Mitigation Strategy which is yet to be agreed. Some sites are noted to require significant transport and social infrastructure to support development, or else have landscape and heritage sensitivities. Noting these factors, we consider there is a real risk of further delay to delivering the housing in Trowbridge. This compounds the decision not to meet the full identified housing shortfall.

There is a clear need to make further housing allocations within the Trowbridge Community Area with the contribution from the whole Community Area given detailed consideration.

Our client's site at Blind Lane, Southwick, presents a logical and sustainable opportunity to meet this need. The recent outline planning application demonstrated that there are no technical constraints to delivering housing within the short-to-medium term. We have enclosed a site location plan (reference R0416\_05A Rev A) and the proposed site masterplan (reference R0416\_06 Rev G) to illustrate the opportunity this site presents to accommodate part of Trowbridge's housing requirement.

There are numerous merits to allocating this site including:

- The site is not subject to any international, national or local environmental designations, including AONB, biodiversity and Green Belt.
- The site is defensible and enclosed and a logical extension of Southwick, without risking coalescence with Trowbridge.
- The site is in a sustainable location due to the proximity of key local services, its proximity to the centre of Trowbridge and the availability of public transport links.
- The site is majority Flood Zone 1, and therefore sequentially preferable as a location for development.

Suitable vehicular and pedestrian access can be provided to and from Blind Lane, and transport assessments have confirmed that the proposals will not give rise to unacceptable traffic impacts.

The site is not in the context of any designated heritage assets or landscapes, and it has been shown that the site could provide an improved interface for Southwick with the countryside.

Following detailed surveys, the ecological interests of the site have been identified and a masterplan proposed which the Council's ecology officer confirms will be unlikely to have adverse impacts on biodiversity interests.

Appendix Q - Schedule of representations

	<p>The majority of the mature trees and hedgerows on the site can be retained and incorporated into the scheme, with landscaping and replacement planting to compensate where a small amount of hedgerow is removed for the site access.</p> <p>A list of the documents upon which the planning application was determined has been included at the end of this letter. These are available on Wiltshire Council's online register, and form an up-to-date evidence base which demonstrates that the site is technically deliverable and appropriate. We reserve the right to refer to these documents to support our participation in the Examination of this Plan.</p> <p>We urge the Council to review this information in light of our comments and concerns regarding the HSAP strategy and proposed allocations, and to positively allocate our clients site for residential development to support the delivery of housing in the Trowbridge Community Area.</p> <p>We trust that the enclosed representations will be considered in detail. Since this is the first published full iteration of the Wiltshire Housing Site Allocations Plan, we would urge the local authority to reconsider the strategy proposed within the plan, and to favourably consider our client's site for allocation to meet Trowbridge's housing needs in the current plan period.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To enable a detailed review of these representations and to assist the Inspector's thorough examination of the draft plan.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3078</a>	<b>Consultee</b> Miss Emma Powell Land and Planning Manager	<b>Agent</b> Mr Tristan Dewhurst Senior Planner	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		Redrow Homes	Lichfields	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Person ID:</b> 840359			<b>Person ID:</b> 443671		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Sustainability Appraisal, TEP and Trowbridge / H2.6			Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Our client has concerns regarding the robustness of the Sustainability Appraisal supporting the Site Allocations Document and in particular its methodology in assessing the proposed plan strategy and whether it has considered all reasonable alternatives for the accommodation of housing growth around the district.</p> <p>The SA appears to only assess the selected options for growth shortlisted at the outset by the Council. As a result, it does not consider the reasonable alternative of providing more growth within the Trowbridge remainder area to assist in addressing the local need for housing in the community area. The SA should provide a transparent assessment of the Council's strategy choice alongside the other reasonable alternatives and assess the environmental effects of each. In addition, the impact of not achieving the housing growth anticipated by the Core Strategy at Trowbridge (under delivery by 1,220 dwellings) and the subsequent impacts on affordability and a lack of housing choice should also have been considered so that the socio economic and environmental effects can be fully understood. The SA is therefore deficient in its consideration of reasonable alternatives.</p> <p>There are also concerns over the robustness of how the SA has interpreted the evidence base in assessing how the sites perform against the various SA objectives. For example, site allocation H2.6 (Southwick Court) is considered within the TEP Landscape Assessment as being an 'attractive' and 'integral part of the settlement setting'. The TEP assessment concludes that the allocation will have a 'high' overall magnitude of effect on landscape character and has a 'low' capacity for change following the implementation of mitigation measures. This is then translated as only a medium adverse effect within the SA.</p> <p>According to the methodology of the TEP landscape report the site allocation cannot have a greater impact in terms of the magnitude of effect which is 'high' or have a lower capacity to accept change. As a result, it cannot follow that the SA can determine the landscape effects as only a moderate adverse impact. The effects cannot be fully mitigated i.e. there is low potential to achieve this. The effects should therefore be major adverse according to SA methodology (SA Table 2.3). Mitigation is not just problematic it is not possible to mitigate the effect and there would be significant residual landscape effects.</p> <p>As a result we are concerned that there is a lack of consistency in the selection of the proposed sites at Trowbridge and the method in which they have been assessed through the community area topic papers and the associated SA.</p> <p>The SA needs a thorough review to consider the policy choices of the Council in preparing this plan and the reasonable alternatives for considering how the required housing growth can be accommodated. It also needs to assess in greater detail the proposed allocations around Trowbridge including their deliverability particularly with regard to the HRA, landscape and heritage issues.</p> <p>The SA should also be updated to assess additional sites within the wider Trowbridge remainder area so that all the available options in the community area to achieve the CS housing target are considered transparently rather than the remainder area being excluded at the outset of the process</p> <p>On behalf of our client, Redrow Homes (South West) Ltd, please find enclosed representations to the Regulation 19 Consultation on the Wiltshire Housing site Allocations Plan (HSAP) Pre-Submission Document.</p>				

## Appendix Q - Schedule of representations

We set out below a summary of the enclosed representations:

The HSAP must make clear that where there are significant housing shortfalls identified that the LPA will review the spatial strategy flexibly. For the Trowbridge Community Area, where there is a significant housing shortfall, this will require consideration of sites across the whole community area to ensure that the Plan considers all sustainable, available and deliverable sites to meet this shortfall in the short-to- medium term.

The extent of the housing shortfall identified is significant and presents a risk to the strategic role and function of Trowbridge as one of the Principal settlements in the District. Furthermore, it should be noted that the Wiltshire Core Strategy sets out the overall housing requirement for Trowbridge to be met as a minimum. The HSAP should therefore seek to allocate sites to meet the full identified housing shortfall in Trowbridge. The HSAP must respond to the joint SHMA update by Wiltshire and Swindon to ensure that it allocates housing to meet the full objectively assessed housing need in the District.

We object to the exclusion of the Trowbridge Community Area Remainder from consideration in the site selection process to meet the significant identified housing shortfall. Given the acknowledged environmental and infrastructure constraints around the town it is imperative that the LPA fully considers all options in the Community Area. The Council cannot apply flexibility to the target Core Strategy Community Area housing requirements and then treat the disaggregation between the Principal Town and the remainder area as a fix.

The HSAP elects to allocate development to Large Villages in other locations, including adjacent to North Bradley and also where the indicative 'Remainder' requirement is met. To exclude Large Villages around Trowbridge, including Southwick, to address some of the housing need is untenable in light of the significant housing shortfall.

The site allocations proposed in Trowbridge are subject to constraints which have serious potential to delay delivery or otherwise limit development capacity e.g. all sites will be affected by Habitat Regulations Assessments and the requirement to implement the Trowbridge Recreation Management Mitigation Strategy which is yet to be agreed. Some sites are noted to require significant transport and social infrastructure to support development, or else have landscape and heritage sensitivities. Noting these factors, we consider there is a real risk of further delay to delivering the housing in Trowbridge. This compounds the decision not to meet the full identified housing shortfall.

There is a clear need to make further housing allocations within the Trowbridge Community Area with the contribution from the whole Community Area given detailed consideration.

Our client's site at Blind Lane, Southwick, presents a logical and sustainable opportunity to meet this need. The recent outline planning application demonstrated that there are no technical constraints to delivering housing within the short-to-medium term. We have enclosed a site location plan (reference R0416\_05A Rev A) and the proposed site masterplan (reference R0416\_06 Rev G) to illustrate the opportunity this site presents to accommodate part of Trowbridge's housing requirement.

There are numerous merits to allocating this site including:

The site is not subject to any international, national or local environmental designations, including AONB, biodiversity and Green Belt.

The site is defensible and enclosed and a logical extension of Southwick, without risking coalescence with Trowbridge.

The site is in a sustainable location due to the proximity of key local services, its proximity to the centre of Trowbridge and the availability of public transport links.

The site is majority Flood Zone 1, and therefore sequentially preferable as a location for development.

Suitable vehicular and pedestrian access can be provided to and from Blind Lane, and transport assessments have confirmed that the proposals will not give rise to unacceptable traffic impacts.

The site is not in the context of any designated heritage assets or landscapes, and it has been shown that the site could provide an improved interface for Southwick with the countryside.

Following detailed surveys, the ecological interests of the site have been identified and a masterplan proposed which the Council's ecology officer confirms will be unlikely to have adverse impacts on biodiversity interests.

The majority of the mature trees and hedgerows on the site can be retained and incorporated into the scheme, with landscaping and replacement planting to compensate where a small amount of hedgerow is removed for the site access.

A list of the documents upon which the planning application was determined has been included at the end of this letter. These are available on Wiltshire Council's online register, and form an up-to-date evidence base which demonstrates that the site is technically deliverable and appropriate. We reserve the right to refer to these documents to support our participation in the Examination of this Plan.
