<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		S1028 - Land at Netherhampton Road			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	i am certainly not a NIMBY! I do not even live in Wiltshire anymore but am dismayed about the further building of houses on essentially an unspoilt prehistoric landscape and green belt. The country needs its green fields for multiple reasons such as farming, wildlife, and also land soaks up rainfall. Concrete does not. Also Salisbury just does not have the infrastructure, schools and healthcare to support these large scale developments. In essence stop ruining a beautiful county i.e. the whole of beautiful Wiltshire, consider looking at brownfield sites. Otherwise future generations are going to have nothing but concrete to look at which is certainly a horrific thought. Look at brownfield sites, not green belt or ancient landscapes. Consider heavily taxing second homes, looking at empty properties etc. Do not support.

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

<b>Comment ID:</b>	4	<b>Consultee</b> Mr Edward Owen	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1105335		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Bratton 321 Court Orchard/Cassways			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>My initial reaction is that the designated area (Court Orchard/.Cassways) is rather small for 40 homes and the access is very poor and will be dangerous if the development goes ahead.</p> <p>In the mornings there will be some 40 cars all trying to get onto the Westbury Road through a single road access. Perhaps half the cars will want to go to Trowbridge and so will turn left. From that direction turning into the Trowbridge Road is difficult and the road then becomes narrow and steeply descending.</p> <p>Would it not be better to have the development along the Lower Westbury Road and have, say, 10 points of access to Lower Westbury Road and also a new access onto the Trowbridge road. One could develop far more than 40 homes in this way and, if designed correctly, it should not spoil the view for any of the existing residents of Lower Westbury Road. A new link to the Trowbridge Road would mean that the new residents need not drive pass the existing residents.</p> <p>The cost of upgrading Lower Westbury Road and improving the link to the Trowbridge road could be a condition of the tender. If the number of houses were to be increased to, say, 50 or more, then the developer would be willing to fund the cost of the road building.</p> <p>My suggestion would improve the draft site allocations plan because the proposed site would not be an eye-saw to people entering Bratton from Westbury.</p> <p>It would not cause congestion, which the existing proposed plan would with only one access onto the Westbury Road.</p> <p>It would not create two accident risk points, one where the residents of Court Orchard/Cassways would be trying to turn onto the Westbury Road and one where increased traffic would be trying to pass down the Trowbridge Road which is narrow and steep.</p> <p>It would open up a new area for further development which should not be detrimental to existing home owners in Lower Westbury Road.</p> <p>The extra costs implied by my suggestion would not be a burden to the Council because the cost of the proposed road improvements could be part of the tender conditions to developers.</p>

		Mr Alex Lawless	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Table 4.5			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Why are we looking to build new houses in the ever decreasing green areas of Trowbridge when we have a number of sites around the town that could do with development; for example the old Bowyers site? This just seems that the developers recognize they can make more money in the green areas but it will forever lose these for future generations while a site like Bowyers is just an eyesore.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.50		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan does not make enough of the opportunity to improve Trowbridge through-traffic by creating a new North-South link via other new road developments to the North and East of the town.</p> <p>The suggested redevelopment of the Woodmarsh / A363 roundabout needs substantial thought given to the demands of local traffic, bearing in mind the retail park one-way exit, and huge amounts of Saturday traffic caused by the shopping outlets and food drive-thoughts.</p> <p>This site could provide part of a strategic North to South Trowbridge bypass, if the Drynham Lane were to be rebuilt and linked to the Leap Gate road at the roundabout with West Ashton Road. Ultimately this bypass route should connect to the Frome Road either North or South of Southwick, and could then even extend West around to the Bradford Road, taking huge amounts of through traffic away from Newtown and Wingfield Road past the schools.</p> <p>A change in the Woodmarsh / A363 roundabout by the Spitfire Retail Park is required as the present system is subject to high traffic exiting the retail park one-way system.</p> <p>Any developments in Trowbridge should provide improved traffic links to decrease through-traffic in the town, and provide additional resources for the town such as schools, surgeries, parks, play areas, walking routes and areas for employment such as small retail units and light industrial units.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This site is part of the Southwick Country Park, and no building should be allowed here at all. No building should be allowed here at all - the park accesses should be enhanced to allow walkers to cross the stream. However, if building is to be allowed, this area is overlooked by properties on Church Lane and Whiterow Park, and any new buildings on this site should not be allowed to obstruct any views of the Country Park. Therefore any buildings should have a restriction on roof height to preserve existing views.</p>				
<b>Attached files (Please see Objective)</b>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	13	<b>Consultee</b> Ms Rachel Hunt  <b>Person ID:</b> 1102653	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Contradictions with National Policy                      A core strategy or local plan is considered “sound” when it is consistent with national policy. Paragraphs 17,111, 72, 156 and 157 of The National Planning Framework and Planning Guidance documents contain planning guidelines which have been contradicted in the way that Wiltshire Council have applied them to the Housing Sites Allocation Plan. I have taken some examples from paragraph 17 of the National strategy below:</p> <p>1. proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth</p> <p>The core strategy fails to follow this objective as delays at the West Ashton development mean that the extra schools planned for increased housing in Trowbridge will not be completed by the time that the other sites indicated in the site allocations plans are in place. Also, although improved road networks have been planned for the south east of Trowbridge, there is no such allowance for coping with the traffic generated at the A361 by the 265 houses allocated to this side of town. In fact, the Trowbridge Traffic Model concludes that there would be increased pollution, congestion, noise and journey times as a result of the proposed development. The Councils’ answer to this appears to be that since all development will be within a 2km boundary of the centre people will choose to walk or cycle. The walk into town is neither, pleasant or particularly safe and increased traffic would make walking into town less attractive.                      The A361 is a blackspot for accidents both “in the dip” where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. The Country Park is also used for running and parking along the A361 between Southwick and Trowbridge is a common cause of delays.                      In fact my husband was knocked off his bike when cycling along the Frome Road. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour.</p> <p>I would like to invite the County Councillors, none of whom live in Trowbridge, to walk or cycle into town along the Frome Road to see how inviting it is not! On this basis alone, development at Church lane, OldBrick Fields and Southwick Court should not be considered.</p> <p>2. promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;                      The core strategy fails to meet this objective as there is no evidence that the centre of Trowbridge will be full of “vitality.” Housing should be built on the Brownfield sites, including Bowyers and the Old Library site in the town and the council needs to focus on a genuine redevelopment of the</p>			

Appendix Q - Schedule of representations

	<p>central pedestrian area of Trowbridge so that the centre is inviting and truly accessible by foot or bike by its' new residents. By doing this, rather than holding back sites within the existing settlement boundary, the beauty of the countryside on the outskirts of Trowbridge would be maintained..</p>
<p><b>Attached files (Please see Objective)</b></p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The methodology is faulty in this report in that the site history was not included in the report. Previous Inspectors in their earlier reports have strongly noted the gradual/gentle transformation from urban into country that this site provides. The present report reads as if there has been no history nor trail of reviews/planning applications and meetings and earlier reports by ministry inspectors. When in fact any application to build on this site has always been vigorously contested by the local residents of the whole estate of Pauls Dene</p> <p>For a "relatively small number of dwellings" the honesty of this review has been compromised. It is to be hoped that the integrity of this report will not be sacrificed in the desire to achieve the desire for a few single story affordable dwellings</p> <p>A planning review by a ministry inspector has taken place on 27 July 2017 whilst this democratic process is in train. there is a positive democratic deficit if the appeal by Pearce is agreed</p> <p>Remain with the status quo and not permit building on this peripheral site</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Maintaining the rural and ecological environment                  National Planning Policy States:                  112 - Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality.</p> <p>113 - Local planning authorities should set criteria based policies against which proposals for any development on or affecting protected wildlife or geodiversity sites or landscape areas will be judged.</p> <p>As well as offering a rural setting for the heritage assets here, the land between Church Lane and Southwick Country Park provides a part of the buffer between Southwick and Trowbridge and is well used by local people. Both fields have had the same hedge line since at least 1890 as shown by the OS maps below. (dated 1890). Similar maps from the 1920's and 1940's show the exact same hedge line.</p> <p>In the more recent past, the first field has been used for grazing animals for at least the last 30 years and the larger field behind Framfield offers wide ranging views across the countryside and is home to pairs of deer as well as bats, rabbits, voles and a range of birds.                  In 1989 there was an application (w89/0140) to build 2 dwellings on the field behind Church Cottage, Church Lane. This planning proposal was refused on the basis that "the proposed development (of just 2 dwellings) would extend the built up area into open countryside, detrimental to the character of the area," (Extract from the decision notice)                  Also, the Secretary of State further notes (in the appeal document) that "the proposal would harm the rural character of the area" and that "the site is outside the limits of Trowbridge" which is still the case.                  Thirdly, the appeal document notes that the Plan "seeks to maintain a rural buffer between Trowbridge and Southwick. The proposal would encroach on open rural land and harmfully effect it's appearance.... The appeal site, which is part of a pasture field on the south side of Church lane, is in the pleasant open countryside between Trowbridge and Southwick"</p> <p>If this is the case for 2 dwellings, 40 dwellings would be extremely detrimental to the rural nature of this area. In fact, the addition of Southwick Country Park since this application would further promote the maintenance of this area as rural, alongside maintaining the setting of St Johns Church, former school houses and Church Cottage.                  There was also a historic application (ref APP/F3925/A/02/1082021) regarding an agricultural access off the A361 to the field to the south of Church Lane. This is the proposed site of access to the new dwelling on the Housing Site Allocation Plan. However, when this planning application went to appeal, the Inspector specifically states that there need to be considerations as part of the appeal success. Paragraph 12</p>				

Appendix Q - Schedule of representations

states “In the future, for economic reasons, they would expect to lease or rent this land to a local farmer” On this basis the inspector goes on to say that this purpose “seems to be reasonable and therefore agricultural machinery and transport would require access to the field....tending of livestock would require a small number of visits by light vehicles.....Arable use may well involve particularly large vehicles and plant but only during more restricted periods”

Since this application the field in question has not been rented or used for agricultural purposes. The field was ploughed about three years ago, not for arable purposes or to grow crops but seemingly to prevent dog walkers and locals from enjoying the site and countryside. Also, it is clear from the above evidence that the access was granted ONLY for limited agricultural use NOT for construction or residential traffic which would clearly change the local area.

Finally, when purchasing 344 Frome Road in 2014 we contacted planning regarding future building on the fields that directly backs onto the Grade II listed cottage. In the reply they were informed that “the land that backs onto 344 is outside the development policy boundary for housing and therefore any application to develop the land is likely to be refused by the council.”

Protection of bats

The consultation document states that Bechstein Bats (and others) use the sites behind Church Lane and OldBrick Fields. The document states that bat corridors should be built into any proposed development. In fact the current owners of the larger field cut a large gap in the hedge some years ago (presumably to allow vehicles through).

I would request to see evidence that permission was given to the owners to make this gap in the historic hedgerow, and if so, evidence that an assessment of the impact on local wildlife was undertaken.

The defra document “ Habitat management for bats A guide for land managers, land owners and their advisors” states that “even gaps as small as 10 m may prevent bats – especially the smaller species – from using hedgerows as a route to fly between roosts and foraging areas.” And that “Gaps should be replanted to ensure that the hedge can be used as a flight route.” Further gaps, which would inevitably be needed to develop the site, would affect the bats and other ecology of the site.

LPA’s are a competent authority under regulation 7 of theConservation of habitats and Species Regulations 2010(as amended)

The Bat Conservation Trust extract from “Bats and the Planning System” states that:  
A protected species survey and report is required with the application when:

Having contacted a senior ecologist at Wiltshire Council on 18th July 2017, and requested information about bat surveys for the Church lane and Oldbrickfields sites she told me that she had no knowledge of surveys that had been carried out for these sites. In fact, I am still waiting for the head of department to contact me to confirm this.

Also there is concern that, the inevitable cutting back of historic hedgerows would impact upon the bats. In addition, extra lighting within 50m of bat habitats and development within 200m of the Lambrok requires a survey and licence to be given.

Residents regularly see bats in their gardens and flying over the paddock at the Church Lane sites as well as volunteers at Southwick Country Park confirming that there is a roost in the oak trees at the bottom of the larger field.

The present proposed development suggests mitigation of a bat corridor which is just 10-16m wide. I would suggest that the width of this corridor needs to be widened and needs to include a boundary along the edge of the Lambrok, existing hedgerows in the field, along Church lane as well as houses that back onto the paddock.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The consideration of access roads has not been properly considered. For example, the Hilltop Way proposed development of 10 dwellings does not consider the need to improve the road that is Hilltop Way which was designed when there were significantly less dwellings than now let alone with 10 new ones, is too narrow and has poor sight lines for the amount of traffic it currently has, let alone any more traffic. Furthermore, consideration of the impact the development will have on the skyline in the area and of the cathedral have been ignored. This has not been thought through properly. Better consideration of access roads and the need to improve them if any further developments are allowed. Better consideration of the impact new dwellings will have on the city and in particular views of the cathedral which is what makes the city of Salisbury unique. .

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Settlement Boundary Review for Hilperton			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I have several comments I wish to make about the plan which I will make separately. This particular comment relates to the settlement boundary for Hilperton and in particular the revision to the boundary for houses along Devizes Road. The existing boundary runs along the Northern edge of my property (number 181) and several of the neighbouring properties. The new boundary runs halfway through my garden leaving part of the property within the new settlement boundary and a large chunk of my garden outside the boundary.</p> <p>My house along with my immediate neighbours was built in the 1930s with their respective garden settings. I can see no good reason why 80 years later it is suddenly necessary to adjust the settlement boundary to remove part of my property. This is all the more frustrating when I note that some properties in the village, including some in Devizes Road, have had their settlement boundaries extended even though they are of a similar age to mine.</p> <p>I would respectfully ask that the boundary for my property and by definition that of my immediate neighbours remain as currently defined with the northern end of my garden forming edge of the settlement boundary.</p> <p>Leave the settlement boundary for number 181 Devizes Road and at least its immediate neighbours as currently defined and not adjusted as to remove part of the properties as proposed in the 2017 review.</p> <p>I have comments about other parts of the Plan which will be made separately</p>

Comment ID:	24	Consultee Mr KB Purnell	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1115782	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I appreciate there is a need for new housing within the County. However it seems unreasonable that the majority of the required new homes are apparently to be built in the Trowbridge area with the resultant strain this will put on (already struggling) local services, especially schools. The recent development on the Hilperton side of the town has already seen that village become part of Trowbridge in all but name. The opening up of land beyond Drynham Lane (parcel nos. 613/248 &amp; 298 on the Proposed housing allocation plan) for development will have the effect of virtually joining North Bradley to Trowbridge.</p> <p>While development of parcel no. 3565 on the Plan would not, at this point in time, connect Southwick with Trowbridge any permitted development would almost certainly prove to be 'the thin end of the wedge' as far as any developer is concerned, and it will be only a matter of time before the remaining green fields are built upon.</p> <p>In short Trowbridge will become one massive urban 'sprawl', undistinguishable from the adjoining villages.</p> <p>I sincerely hope that the Council's officers and the elected Councillors responsible for planning in Wiltshire will seek to safeguard the remaining countryside around Trowbridge, and indeed the other towns in what is still regarded as a rural County.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I believe that planning permissions have already been granted for over 5,000 homes, yet to be built, within the County. It is my further understanding that Government policy states that 'sites with planning permission should be considered deliverable'. Consequently there would appear to be no present need for more green fields to be earmarked for development.</p> <p>While I appreciate the Council cannot force developers to build, a decision not to allocate more land for housing would hopefully 'encourage' development of sites for which permission has already been granted, particularly brownfield sites.</p> <p>I sincerely hope that the Council's officers and the elected Councillors responsible for planning in Wiltshire will seek to safeguard the remaining countryside around Trowbridge, and indeed the other towns in what is still regarded as a rural County.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>i am certainly not a NIMBY! I do not even live in Wiltshire anymore but am dismayed about the further building of houses on essentially an unspoilt prehistoric landscape and green belt. The country needs its green fields for multiple reasons such as farming, wildlife, and also land soaks up rainfall. Concrete does not.</p> <p>Also Salisbury just does not have the infrastructure, schools and healthcare to support these large scale developments. In essence stop ruining a beautiful county i.e. the whole of beautiful Wiltshire, consider looking at brownfield sites. Otherwise future generations are going to have nothing but concrete to look at which is certainly a horrific thought.</p> <p>Look at brownfield sites, not green belt or ancient landscapes.</p> <p>Consider heavily taxing second homes, looking at empty properties etc.</p> <p>Do not support.</p>

Comment ID:	<a href="#">27</a>	<b>Consultee</b> Ms Rachel Hunt  <b>Person ID:</b> 1102653	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Contradictions with National Policy                  A core strategy or local plan is considered “sound” when it is consistent with national policy. Paragraphs 17,111, 72, 156 and 157 of The National Planning Framework and Planning Guidance documents contain planning guidelines which have been contradicted in the way that Wiltshire Council have applied them to the Housing Sites Allocation Plan. I have taken some examples from paragraph 17 of the National strategy below:</p> <ol style="list-style-type: none"> <li>proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth</li> </ol> <p>The core strategy fails to follow this objective as delays at the West Ashton development mean that the extra schools planned for increased housing in Trowbridge will not be completed by the time that the other sites indicated in the site allocations plans are in place. Also, although improved road networks have been planned for the south east of Trowbridge, there is no such allowance for coping with the traffic generated at the A361 by the 265 houses allocated to this side of town. In fact, the Trowbridge Traffic Model concludes that there would be increased pollution, congestion, noise and journey times as a result of the proposed development. The Councils’ answer to this appears to be that since all development will be within a 2km boundary of the centre people will choose to walk or cycle. The walk into town is neither, pleasant or particularly safe and increased traffic would make walking into town less attractive.</p> <p>The A361 is a blackspot for accidents both “in the dip” where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. The Country Park is also used for running and parking along the A361 between Southwick and Trowbridge is a common cause of delays.</p> <p>In fact my husband was knocked off his bike when cycling along the Frome Road. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour.</p> <p>I would like to invite the County Councillors, none of whom live in Trowbridge, to walk or cycle into town along the Frome Road to see how inviting it is not! On this basis alone, development at Church lane, OldBrick Fields and Southwick Court should not be considered.</p> <ol style="list-style-type: none"> <li>promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;</li> </ol>				

#### Appendix Q - Schedule of representations

The core strategy fails to meet this objective as there is no evidence that the centre of Trowbridge will be full of “vitality.” Housing should be built on the Brownfield sites, including Bowyers and the Old Library site in the town and the council needs to focus on a genuine redevelopment of the central pedestrian area of Trowbridge so that the centre is inviting and truly accessible by foot or bike by its’ new residents. By doing this, rather than holding back sites within the existing settlement boundary, the beauty of the countryside on the outskirts of Trowbridge would be maintained.

3. support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings

The sites at Church lane, Southwick Court and OldBrickfields (all identified in the Site Allocations Document) are all susceptible to flooding and construction here will further exacerbate flooding in Southwick Country Park which is a public Amenity. The Environment Agency’s website under the Flood Map for Planning tool has been interrogated (28th June 2017). It shows that the lower end of the proposed development site registers as a category flood zone 2 or 3 which requires the developer to carry out a Comprehensive Flood Risk Assessment.

The outline planning application that Trowbridge Town Council was consulted on identifies the Church Lane site as the whole field right down to the Lambrok Stream. This area includes the floodplain zone 2/3 section of the field. The Trowbridge Town Clerk advises, however, that when the planning application progresses he expects the developer only to include the upper two-thirds of the field, the section above the floodplain (flood zone 1) which does not normally require any flood risk assessment. However, given that any run-off of water from the development would pass straight into the flood zone 2/3 area and into the Lambrok Stream with all the associated risks outlined above to the immediate neighbourhood as well as elsewhere up and downstream I believe the development should still be disallowed on flooding grounds. Therefore the core strategy does not support the objective above.

4. contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework; encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value;

There is a complete contradiction in the core strategy to this objective. As stated above, pollution will increase due to increased traffic, the council shown that they will effectively use brownfield sites, opting for developer led/friendly sites on the outskirts of town. The site at Church Lane, OldBrickfields and Southwick Court would be an unwarranted encroachment of the open countryside, the very reason given by the council for refusing a planning application in Southwick at Blind lane.

5. promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production);

Once again, Councillors have stated that there should not be a mix of residential and commercial land on one site. This directly contradicts national planning policy. The lack of inclusion in developing the Bowyers site as part of the planned housing in Trowbridge does not comply with National Planning Policy paragraph 111.

There is no reason why the Bowyers site, Old Library site and others cannot be used for affordable housing as well as being used to improve the vitality of the town centre. In fact, I would argue that, young people attempting to get onto the housing ladder would prefer to be in the centre where they can access cafes, shops and entertainment as well as the train station which provides direct access for commuting to Bath. The outskirts of town should be used for the open land functions stated in the objective above.

6. conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;

Appendix Q - Schedule of representations

	<p>The Housing Site Allocations Document has failed to include all heritage sites at the three sites off Frome Road. Whilst it has identified Southwick Court and St John's Church it has not made reference to the following Grade II listed buildings:</p> <ul style="list-style-type: none"> <li>- St Johns Church School and Hall masters dwellings comprising 4 dwellings. (UID1021593)</li> <li>- Church of St Johns (UID 1364192)</li> <li>- 344 Frome Road (UID 1364193)</li> <li>- Rose Villa (UID 1021594) .</li> </ul> <p>It has also neglected to protect the ancient watermeadows: MWI73579 Water Meadow, West of Upper Studley. Maintaining the setting of historic features is identified in the core strategy and yet seems to have been neglected when considering sites to develop, priority being given to developer friendly land.</p> <p>In conclusion, it appears that Wiltshire Councillors, none of whom live in Trowbridge, have arbitrarily set a 2km radius from St James's Church as the allowable developable area for the town without taking account of the value of this land to the people of Trowbridge. The clear contradictions within the strategy itself and against national planning policy mean that Wiltshire Council will need to revisit how they plan to develop Trowbridge in a more sustainable way than that outlined in the current Strategy.</p>

In fact, the Trowbridge Traffic Model concludes that there would be increased pollution, congestion, noise and journey times as a result of the proposed development. The Councils’ answer to this appears to be that since all development will be within a 2km boundary of the centre people will choose to walk or cycle. The walk into town is neither, pleasant or particularly safe and increased traffic would make walking into town less attractive.</p> <p>The A361 is a blackspot for accidents both “in the dip” where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. The Country Park is also used for running and parking along the A361 between Southwick and Trowbridge is a common cause of delays.</p> <p>In fact my husband was knocked off his bike when cycling along the Frome Road. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour.</p> <p>I would like to invite the County Councillors, none of whom live in Trowbridge, to walk or cycle into town along the Frome Road to see how inviting it is not! On this basis alone, development at Church lane, OldBrick Fields and Southwick Court should not be considered.</p> <ol style="list-style-type: none"> <li>promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;</li> </ol>				

#### Appendix Q - Schedule of representations

The core strategy fails to meet this objective as there is no evidence that the centre of Trowbridge will be full of “vitality.” Housing should be built on the Brownfield sites, including Bowyers and the Old Library site in the town and the council needs to focus on a genuine redevelopment of the central pedestrian area of Trowbridge so that the centre is inviting and truly accessible by foot or bike by its’ new residents. By doing this, rather than holding back sites within the existing settlement boundary, the beauty of the countryside on the outskirts of Trowbridge would be maintained.

3. support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings

The sites at Church lane, Southwick Court and OldBrickfields (all identified in the Site Allocations Document) are all susceptible to flooding and construction here will further exacerbate flooding in Southwick Country Park which is a public Amenity. The Environment Agency’s website under the Flood Map for Planning tool has been interrogated (28th June 2017). It shows that the lower end of the proposed development site registers as a category flood zone 2 or 3 which requires the developer to carry out a Comprehensive Flood Risk Assessment.

The outline planning application that Trowbridge Town Council was consulted on identifies the Church Lane site as the whole field right down to the Lambrok Stream. This area includes the floodplain zone 2/3 section of the field. The Trowbridge Town Clerk advises, however, that when the planning application progresses he expects the developer only to include the upper two-thirds of the field, the section above the floodplain (flood zone 1) which does not normally require any flood risk assessment. However, given that any run-off of water from the development would pass straight into the flood zone 2/3 area and into the Lambrok Stream with all the associated risks outlined above to the immediate neighbourhood as well as elsewhere up and downstream I believe the development should still be disallowed on flooding grounds. Therefore the core strategy does not support the objective above.

4. contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework; encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value;

There is a complete contradiction in the core strategy to this objective. As stated above, pollution will increase due to increased traffic, the council shown that they will effectively use brownfield sites, opting for developer led/friendly sites on the outskirts of town. The site at Church Lane, OldBrickfields and Southwick Court would be an unwarranted encroachment of the open countryside, the very reason given by the council for refusing a planning application in Southwick at Blind lane.

5. promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production);

Once again, Councillors have stated that there should not be a mix of residential and commercial land on one site. This directly contradicts national planning policy. The lack of inclusion in developing the Bowyers site as part of the planned housing in Trowbridge does not comply with National Planning Policy paragraph 111.

There is no reason why the Bowyers site, Old Library site and others cannot be used for affordable housing as well as being used to improve the vitality of the town centre. In fact, I would argue that, young people attempting to get onto the housing ladder would prefer to be in the centre where they can access cafes, shops and entertainment as well as the train station which provides direct access for commuting to Bath. The outskirts of town should be used for the open land functions stated in the objective above.

6. conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;

Appendix Q - Schedule of representations

	<p>The Housing Site Allocations Document has failed to include all heritage sites at the three sites off Frome Road. Whilst it has identified Southwick Court and St John's Church it has not made reference to the following Grade II listed buildings:</p> <ul style="list-style-type: none"> <li>- St Johns Church School and Hall masters dwellings comprising 4 dwellings. (UID1021593)</li> <li>- Church of St Johns (UID 1364192)</li> <li>- 344 Frome Road (UID 1364193)</li> <li>- Rose Villa (UID 1021594) .</li> </ul> <p>It has also neglected to protect the ancient watermeadows: MWI73579 Water Meadow, West of Upper Studley. Maintaining the setting of historic features is identified in the core strategy and yet seems to have been neglected when considering sites to develop, priority being given to developer friendly land.</p> <p>In conclusion, it appears that Wiltshire Councillors, none of whom live in Trowbridge, have arbitrarily set a 2km radius from St James's Church as the allowable developable area for the town without taking account of the value of this land to the people of Trowbridge. The clear contradictions within the strategy itself and against national planning policy mean that Wiltshire Council will need to revisit how they plan to develop Trowbridge in a more sustainable way than that outlined in the current Strategy.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		How on earth do you think the Netherhampton Road can sustain the extra traffic that an additional 840 dwellings would bring? The traffic is already terrible in the rush hours and there is no scope to change the road layout to accommodate extra traffic. There are already long traffic queues tailing back from Harnham Junction, where the traffic lights barely stay green for long enough to allow no more than maybe 8 cars through at a time. Also there is no infrastructure in place in the locality. There is currently no bus route that goes that far along Netherhampton Road. There is no supermarket. There are no doctors surgeries. There is no provision for a school, junior or senior. The closest grocery store we can get to is Tesco, which located on Southampton Road, is more often than not gridlocked and a real chore to get into and out of. You must consider the detrimental impact such a development would have on the people that already live here. This is not being a NIMBY, it is being realistic that this would saturate our roads. If road improvements could be made, then I could see the sense in the development - but you cannot change anything here. Find somewhere more sensible where you would not inflict misery on the existing residents.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. Review of Atkins “Wiltshire Housing Site Allocations Plan”</p> <p>Atkins were employed to review the six key sites identified by Wiltshire council for housing:</p> <p>Elizabeth Way – 205 houses</p> <p>White Horse Business Park – 150 houses (67% negative impact vs 33%positive)</p> <p>Elm Grove Farm – 200 houses</p> <p>Church Lane – 45 houses (83% negative impact to 17% positive)</p> <p>Upper Studley – 20 houses (80 % negative impact vs 20% positive)</p> <p>Southwick Court – 180 houses (71% negative impact vs 29% positive)</p> <p>Each site was assessed against the following headings Bio-diversity, Water, Historic Environment, Landscape, Accessibility, Education and Housing/ Employment provision. They were given a rating against each objectives (negative impact or positive impact.)</p> <p>The land at Church Lane was the least attractive site of all six.</p> <p>In addition, the sites at Elizabeth Way, White Horse Business Park and Elm Grove farm provide infill between existing developed sites whereas the other three sites would impinge on open countryside.</p> <p>In fact, the recent planning application for 100 plus houses off Blind lane was refused on the basis that it provided “an unwarranted encroachment of the open countryside”. This is also the case at the Church Lane, Southwick Court and Upper Studley sites. This was rejected based on paragraph 17 of the National Planning Framework:</p> <p>Core planning principles 17.</p> <p>Within the overarching roles that the planning system ought to play, a set of core land-use planning principles should underpin both plan-making and decision-taking. These 12 principles are that planning should:</p>			

## Appendix Q - Schedule of representations

- be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area. Plans should be kept up-to-date, and be based on joint working and co-operation to address larger than local issues. They should provide a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency;
- not simply be about scrutiny, but instead be a creative exercise in finding ways to enhance and improve the places in which people live their lives;
- proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities;
- always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings;
  - take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;
  - support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy);
  - contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework;
  - encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value;
  - promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production);
  - conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;
  - actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable; and
  - take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.

The Church Lane (site 1021) and Upper Studley (site 3620) proposed sites in Trowbridge form the outer boundary of the town and lead into beautiful, unspoilt countryside which forms the buffer between Trowbridge and Southwick. Provision of new housing in Trowbridge should make use of sites which do not extend into open countryside before rural sites. This paragraph will put forward other sites within the current settlement boundary which would provide the same housing capacity whilst maintaining the Wiltshire Countryside.

The Church lane and Upper Studley sites offer 6ha of developable land. Wiltshire Council could easily offer this land using a variety of sites which are within the town. The following sites should be used before encroaching on our countryside:

Site 645,646 and 647 – Land to the rear of Trowbridge Road (over 2 ha)

Whilst this land is currently agricultural, it provides an infill between two residential areas and should therefore be used before open countryside.

Site 1018 – District Council Offices (2.46ha)

Seen as windfall by the council but should be offset against open countryside.

Site 198 – Land and Buildings (0.33ha)

Site 200 – Trowbridge Garden Centre (1.33ha)

This land is ripe for development and again provides infill between residential areas

Site 247 – The Stables (0.7ha)

Site 248 - Dryhnam Lane (1.68 ha not yet accounted for)

Appendix Q - Schedule of representations

	<p>This site is ideal for development as it would complement development which is already planned for this part of town          These sites alone would provide 8.5ha of land for development which would mean that none of the open land between Southwick and Trowbridge need be touched. All of these sites could be developed within the next 10 years. In addition to this there is:          Site 613 – Land off the A363 White Horse Business Park to....(5.7ha)          Although agricultural land, this site provides infill between existing development as opposed to open countryside.          In addition to these, other sites were dismissed as part of the SHLAA, the reason given for this was that they were within the current settlement boundary. The National Planning Policy states, “planning policies and decisions should encourage the effective use of land by re-using land.” It appears that Wiltshire Council have decided that developing infill sites would be less attractive to developers and have therefore chosen open sites which do not need to be built on to fulfil their housing quota. Surely Wiltshire Council should not opt for the easy, developer led option to the detriment of our countryside, wellbeing and wildlife.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Whilst I fully understand and support the need for additional housing (particularly affordable housing in what is an expensive area), without a bypass, Salisbury will grind to a halt. The road infrastructure already does not cope with the volume of traffic, and that's on a normal day. On weekends and during holiday periods, it is a disaster. What's more, I believe this plan is either very close to a proposed bypass route, or actually on it, which means that we are running out of options to solve the traffic problem. Don't underestimate how much of a problem it is. I know Wiltshire Council seems to treat Salisbury (the only city in Wiltshire!) as a low priority, but enough is enough, time to solve the problem properly, and in conjunction with a major building project seems to be exactly the right time (beyond time actually!) to address it. I know the bypass was cancelled due to political reasons rather than practical, for point scoring at the time, but the politicians need to get real. You can't simply keep squeezing houses into an area without properly addressing infrastructure, and the road system is by far already the worst in the area by a long long way!

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am writing to air my concerns about the choice of site 1021 (Church Lane) at a site for the proposed development of at least 40 dwellings. Planning policy states that councils should maintain the setting of Heritage Sites. Whilst the Draft Housing sites Allocations Plan does acknowledge St Johns Church and Southwick Court, it fails to mention the other listed buildings that surround this site. The sites at the back of Church Lane provide a rural setting for 6 Grade II Listed buildings as follows: - St Johns Church School and Hall masters dwellings comprising 4 dwellings. (UID1021593)</p> <ul style="list-style-type: none"> <li>- Church of St Johns (UID 1364192)</li> <li>- 344 Frome Road (UID 1364193)</li> <li>- Rose Villa (UID 1021594) .</li> </ul> <p>National policy states that:</p> <p>129 - Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this assessment into account when considering the impact of a proposal on a heritage asset, to avoid or minimise conflict between the heritage asset's conservation and any aspect of the proposal.</p> <p>132 - When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation. The more important the asset, the greater the weight should be. Significance can be harmed or lost through alteration or destruction of the heritage asset or development within its setting. As heritage assets are irreplaceable, any harm or loss should require clear and convincing justification. Substantial harm to or loss of a grade II listed building, park or garden should be exceptional. Substantial harm to or loss of designated heritage assets of the highest significance, notably scheduled monuments, protected wreck sites, battlefields, grade I and II* listed buildings, grade I and II* registered parks and gardens, and World Heritage Sites, should be wholly exceptional.</p> <p>The photographs below clearly show that current development on this side of town has enabled these buildings to maintain their historic setting. Taken from Southwick Court Drive 2017 Taken from Southwick Country Park 2017</p> <p>Taken from the bottom of Southwick Country Park</p> <p>Taken from Church Lane In addition to the listed buildings at this site there is also an ancient water meadow:</p>			

Appendix Q - Schedule of representations

	<p>MWI73579 Water Meadow, West of Upper Studley</p> <p>Summary A post medieval water meadow is visible as earthworks on air photographs.</p> <p>References National Monuments Record, ST 85 NW 95 English Heritage Archives, 1577543</p> <p>Grid reference ST 8403 5643 (map quarter sheet ST85NW)</p> <p>The site at Church lane should be maintained as open countryside to uphold the setting of these heritage buildings. Building in any of the current paddock would dramatically affect their setting, but also development of the larger field would impact on the open countryside that these buildings have shared for over 200 hundred years.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The settlement boundary has not been updated to represent the approval of planning permission on SHLAA site 684 located on the eastern approach of the village. Planning 16/04578/FUL was approved in August 2016 for 4 houses. Please update the Oaksey settlement boundary to include what was SHLAA site 684. Have any checks been done with the land owner to confirm that SHLAA site 3128 (Wick Road) in Oaksey is still available. The SHLAA application was submitted along time ago and the land has subsequently been sold to a new owner. SHLAA site 3128 (Wick Road) in Oaksey is clearly not capable of delivering 11 houses; the document “planning-shlaa-appendix-3-malmesbury” recorded a maximum allocation for SHLAA site 3128 of 7 back in 2014. Therefore there is a lack of consistency between policies/documents. A site must be confirmed as deliverable before it can be considered to be allocated and that clearly is not the case, at present, with SHLAA site 3128. An additional, deliverable, site in Oaksey needs to be identified to meet the minimum requirement of 11 houses.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I've taken a look at the Site Allocations Plan and note that Farrells Field is identified as a site for further expansion. Please find my comments below:</p> <p>1) I would want any development to be affordable for young families and for older people. I would also want it to incorporate environmentally sound construction and energy management (e.g. solar, rainwater storage, etc); to encourage physical recreation through the provision of access to the village on foot and by bicycle. The appearance would need to develop, rather than damage, the village landscape.</p> <p>2) Access to the site is a particular concern. Should the development occur, I would be in favour of separate access from B4039 east of the existing Farrells Fields cul-de-sac.</p> <p>I would be explicitly against access from Blacksmith Close for reasons of:</p> <ul style="list-style-type: none"> <li>-- safety; both Farrells Field and Blacksmith Close are family dominated and increasing traffic would increase the likelihood of an accident; school traffic congestion would also increase (which is an issue at present)</li> <li>-- environment: there would be an impact on established trees and woodland which would be contrary to the aims of the sustainability report; this area is host to much wildlife which currently thrives in the area bordering the site and school.</li> <li>-- impact to the Blacksmith Close properties, which would be severe</li> </ul> <p>3) There is a broader question of floodwater control - the area between Blacksmith Close and the school and the fields behind are used as a soakaway which originally struggled to function as it should. Any further development would run the risk of compromise the drainage systems further.</p> <p>4) 31 properties sounds excessive given the smaller developments that have taken place over the last 10 years in the village - an increase in the village population of 10% and a potential for 60-70 extra cars within a small space.</p> <p>If you have any questions, don't hesitate to come back to me.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		S1027 North of Netherhampton Rd S1028 Netherhampton Rd			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write to object to the proposals outlined in your Draft Plan. S1027 and S1028</p> <p>It does not seem possible that anyone with knowledge of the traffic problems in Harnham has had any input into the formulation of this plan so far as these sites are concerned.</p> <p>The 740 houses, school, medical centre, industrial units etc. will generate a large amount of vehicular traffic. The only route options available to all these vehicles is Netherhampton Road, going east to the Harnham Gyratory, or west to Wilton, via Park Wall. Each of these choke points is already at, or certainly very near, full capacity.</p> <p>Your document states "The site does not generate pupil numbers sufficient to justify a new school", which will inevitably mean that car journeys will be made to the school from other parts of the city, increasing the problem.</p> <p>The document also states "fairly accessible locations for the city centre that could reduce the need to travel and/or reliance on the private car". This is nonsense; there is little within easy walking distance. Also "contribute to the local economy through use of local shops". Harnham has a small "One Stop", fish bar, In Excess, and garden centre. For the majority of shopping it is necessary to travel, either to Salisbury or Wilton.</p> <p>You refer to "A refresh of the Salisbury Transport Strategy can occur alongside a detailed Transport Assessment to address the site's traffic impacts". Surely this should have been done before these sites were considered for inclusion in the plan. It shouldn't take any traffic analyst long to conclude that the volumes likely will be unacceptable. Netherhampton Road is already busy with HGVs, agricultural vehicles (especially on Tuesdays), coaches (often tourist), delivery vans (thanks to on-line shopping), in addition to private cars. Cyclists generally avoid the roadway and use the pavement, to the detriment of pedestrians.</p> <p>The plan suggests that there could be improved public transport, but this is by no means certain. Bus companies are reliant on generating profit, so will only consider changing routes if the accountants can see justification. One only has to look at the Wellworthy Drive development adjoining the proposed sites to see that Wiltshire Council allowed the developer to cram too many dwellings and insufficient parking with the result that buses could not serve the estate (and emergency services must hope that their vehicles are never needed during evenings and weekends!).</p> <p>In conclusion, I do hope that sense will prevail and that the Netherhampton Road sites are removed from the plan without further public money being wasted.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Land Ownership</p> <p>Where land is currently designated as "Agricultural" it seems to me that any land owner should not enjoy a windfall if Wiltshire Council decide to change the category. It seems only fair that compulsory purchase powers be used to purchase the land at a fair rate for agricultural land, so that the community (via the Council) benefits from the profit.</p> <p>Wiltshire Council has a poor record in standing up to developers and making them fulfil their obligations for community project work on large developments (Old Sarum being an example). Controlling the "land profit" would empower the Council.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There has not been a public consultation about the change in the scale of development proposed on this site which was previously a 'reserve' site for a smaller number of houses. There were thousands of objections to development there, even on a smaller scale, at the time of the Core Strategy.</p> <p>Carry out a meaningful public consultation on the issues involved.</p> <p>Insufficient public consultation.</p> <p>More effective public consultation.</p> <p>Since this high-quality agricultural land has already (misguidedly, in my opinion) been designated a 'reserve' site for housing, I accept that some development is inevitable.</p> <p>However, on the scale proposed it is not possible to argue that it is sustainable.</p> <p>740 homes can be expected to generate at least 1,000 and possibly as many as 1,500 extra vehicle movements at the beginning and end of each working day, plus delivery and service vehicle movements at all times.</p> <p>This traffic will have to pass along Netherhampton Road, either to Harnham Gyratory or to the Park Wall junction, both of which were acknowledged in the council's 2012 Salisbury Transport Strategy to be operating at or close to capacity. (The Strategy warned that improving the Park Wall junction and turning the Gyratory into a T junction could attract even more traffic through Harnham.)</p> <p>Since there are few employment opportunities locally, many of these additional residents will then commute out of Salisbury, exacerbating in particular the problems on the A36.</p> <p>An experiment by Harnham Neighbourhood Association a few years ago, reported in the Salisbury Journal, showed that just two dozen extra cars driving along Netherhampton Road, through Harnham Gyratory, down to the Exeter Street roundabout and back again four or five times at 8.30 one Tuesday morning could cause chaos, with tailbacks from the roundabout to the cattle market lasting for an hour and a half.</p> <p>A primary school designed to take in pupils from other parts of the city as well as the local area will add still further to the traffic using this route, whilst an employment site designed with the hope of enticing Churchfields businesses to move will, if successful, bring in hundreds of vans, lorries, transporters etc all day long, five days a week.</p> <p>Churchfields businesses have hitherto been unwilling to relocate, preferring to stay together on one site. If they do not take up the new employment site (and existing employment land alongside Netherhampton Road has remained vacant for many years), there will be obvious and irresistible pressure to use it instead for yet more housing, adding still further to the traffic chaos. If experience at Bishopdown is anything to go by, such housing, not masterplanned as part of the original development, would be at even higher density.</p> <p>I see that there are references to a total of 1,195 dwellings on the site in some of the supporting Atkins paperwork. Is this more realistically what we can expect?</p>				

Appendix Q - Schedule of representations

	<p>Either way, thousands of extra vehicles will be using a relatively narrow residential road, which is incapable of being widened. Householders will face constant jams, noise and fumes. Air quality will be appalling.</p> <p>Yet all that is proposed to solve this is an unspecified 'refresh' of a strategy which has hitherto spectacularly failed to solve the city's transport problems.</p> <p>This site is a long walk away from the city centre. There is no way that a redesign of the Gyrotray, a couple of foot/cycle paths and a couple of extra buses a day will reduce traffic to an acceptable level.</p> <p>Another proposed development site, at Britford Lane, was rightly rejected, in part because it would feed on to New Bridge Road, which is already deemed to be at capacity. Traffic from this site will do exactly the same thing.</p> <p>At the very least, the public should be consulted upon and allowed to see the updated transport strategy before any decision on this site's future is taken.</p> <p>And it needs to be considered in conjunction with the proposal to designate land for another 100 houses on the opposite site of the road, as there will be a cumulative effect.</p> <p>I note, too, the concerns expressed about potential impact on the River Avon SAC, with mitigation measures considered to be 'problematic'.</p> <p>Finally, I would like to say that this consultation will not be accessible to a large number of people who might wish to express an opinion. I have spoken to numerous residents who were unaware of the proposal or who do not understand the concept of 'soundness' when asked to comment. Further, the volume of documentation to scroll through online is deterring many.</p> <p>To date Wiltshire Council has organised only a one-day public exhibition about proposed development sites in and around Salisbury, which offered scant detail. Surely it should be the role of local councillors to at least notify people in their wards about something this important.</p> <p>Once something on this scale has been approved in principle it will be too late at planning application stage for the citizens of Salisbury to say it is too big, and in the wrong place, on the wrong side of the city from the A303.</p> <p>With no bypass in prospect, and no money to pay for one even if an environmentally acceptable route could be found, I would urge the council to reconsider.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The examination needs to take into account the views of local residents - if not myself, then others who may be better qualified. However, I would wish to be present, at least.</p>

Comment ID:	47	<b>Consultee</b> Mr Christopher Menheneott  <b>Person ID:</b> 1118224	<b>Agent</b>  <b>Person ID:</b>	Do you consider the draft WHSAP is legally compliant?  Do you consider the draft WHSAP is sound?	No
		To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:	
Please identify the policy, paragraph, table, figure or site to which you are referring.	Trowbridge housing sites section				
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	We have been residents at this address for 21 years in which time we have been increasingly concerned at the way Trowbridge town centre has been going downhill, and at the increase in traffic on a road system that is just becoming totally inadequate for the population and often becomes grid-locked. Current planning proposals and sites identified in the Land Availability Assessment appear to ignore 2 fundamental facts: Availability and development of existing Brownfield sites in Trowbridge; Increase in infrastructure that would be required BEFORE planning is approved for more housing; Lack of employment for the anticipated increase in population; As the County town of Wiltshire the centre of Trowbridge sets a poor example of concerted development. - See attached list of points describing why proposed Plan is incomplete and unsound: (letter dated 28 July 2017) Summary: - Requires visibility of proposals to develop road traffic system BEFORE approving housing plan. - Requires visibility of sites to be made available for industrial development - eg: new industrial estates. - Should insist on development of brown-field sites in Trowbridge: BEFORE green-field sites. These should be added to the numerical proposal to offset requirement. - Should demonstrate how sites proposed for use maintain the buffer zones between town and villages. - Should show where new schools are to be built or land allocated/reserved. - Should show where new retail outlets are proposed. Without the above it is impossible to prove the soundness and legality of the proposals.

		<b>Do you consider the draft WHSAP is sound?</b>	No		
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Other	Trowbridge Brownfield sites	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
Please identify the policy, paragraph, table, figure or site to which you are referring.					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Brownfield Sites: 5. We feel that the Council should be insisting on development of existing sites in the town, before allowing houses to be built on green field areas, that inevitably leads to just absorbing the villages such as North Bradley, Southwick etc into the town. The green buffer areas should be maintained as a matter of Council policy. 6. Former Bowyers site: as eloquently pointed out in the Wiltshire Times recently, this is a huge site where redevelopment could place housing in the centre of the town, close to transport links including the railway and would give a golden opportunity to improve facilities in the centre. a. This site could include the now abandoned garage showroom which is an eyesore; b. Developers should be incentivised by the Council to include the older buildings into their plans, even if they are listed. It is accepted that development costs may be higher being a legacy industrial site, however we feel there should be some government funds that could be found for the redevelopment of such sites. The Council could assist potential developers to access these. (It is noted that the 2 former Ushers brewery sites – also legacy industrial sites - were developed successfully); 7. Other Brownfield sites: has the Council investigated whether other Companies in the town might be encouraged to move out of the town centre to one of the several industrial estates? This could improve access for such companies, would reduce heavy lorry traffic in the town, and provide a lot of housing where it is most needed. There are vacant spaces on industrial estates at White Horse and the new one at Hawke Ridge. There does not appear to be any statement in the Plan that explains how availability of land for housing has been judged ; 8. Former Council offices site on Bradley Road: this has remained empty for a long time – as an existing Brownfield site it should be a preferred development, yet it is not mentioned in the SHLAA so presumably is not included in the figures. It is understood from a Council officer on 26 July, that “planning approval for housing on this site is now delayed”. This development should feature in the plan thereby reducing the total housing required by the number of proposed dwellings ;

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Buffer Zones</p> <p>9. It is appreciated that there is no law protecting green spaces and the countryside except the formal Green Belt. However, there is a strong determination from residents in the villages outside Trowbridge to maintain the green buffer areas. These are important to people for recreation, for walking and for exercising dogs and horses, to families so that children can learn about the countryside and enjoy it. Also the green spaces between villages and town are an essential contrast to the busy urban life and mean that people do not have to get into their cars and drive to relax in the countryside.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">50</a>	<b>Consultee</b> Mr Christopher Menheneott	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1118224	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge SHLAA sites assessed			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Planning proposals</p> <p>10. 3247 + 257 + 259 + 260: these sites appear to equal potential for some 2,800 homes. All these will inevitably add to pressure on roads, require more places in schools (existing schools are already over-capacity), and will require more shops and more jobs.</p> <p>11. 3565 Southwick Court AND 298 Woodmarsh: both these, especially the Woodmarsh proposal, would be a cynical further destruction of the buffer between villages and the town. It would also add considerably to the traffic trying to use the main Bradley Road into Trowbridge – this road is already impossibly congested at peak times by traffic to and from the White Horse Business Park, into the Spitfire Park shopping area, and down to the centre of the town.</p> <p>a. 298 Woodmarsh: it became apparent at the Consultation on 26 July that maybe not all landowners have given permission for development of their land. This site should be rejected also in order to preserve the separate identity of North Bradley.;</p> <p>b. It is understood that plans have already been approved for former office sites in the Business Park (Virgin and Vodafone) to be converted to housing – 140 homes. This does not feature in the SHLAA figures and plan which would reduce the total required ;</p> <p>c. 261, 252, 256, 292: a Council officer has said that these sites have been rejected as “not to be considered further” for housing. However, when asked where the new Secondary School will be built, we were told that it will be on one of these sites, previously rejected because they are in a flood plain area. If true, this illustrates that the Council is not being open about the complete development plan. It is also understood that there is to be another industrial estate in this area;</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">51</a>	<b>Consultee</b> Mr Christopher Menheneott	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1118224	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge transport concerns		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>12. Traffic:</p> <p>a. There does not appear to be any plan for the development of road transport to support</p> <p>b. There is a very urgent need for a proper bypass to take traffic approaching Yarnbrook from the east along the A350, out past the White Horse Industrial Estate, bypassing Westbury and further west to gain access to the A36. This would enable traffic to travel north and south on the A36, and west to the A303 and M5.</p> <p>c. By adding more housing, and another industrial estate, at Ashton Park the traffic will be increased considerably on all routes. This will all increase the weight of traffic and congestion at choke points such as Yarnbrook (even on the new proposed roundabout), at the Rising Sun roundabout and through North Bradley, and on the narrow Wynsome Street through Southwick.</p> <p>d. The heavy weight of traffic, especially HGV lorries, transiting on the minor roads through Yarnbrook, North Bradley and Southwick, has already made these roads extremely dangerous. For instance, at peak times it is almost impossible to turn safely out of The Rank and other local roads. The centre white lines have been removed which allows vehicles to stray across the road, and the road and pavements are simply not wide enough for the traffic and pedestrians including families and children gaining access to schools. Watch the HGV lorries trying to pass within inches of each other in the centre of these villages.</p> <p>e. There are virtually no shops in out-of-town villages, so more housing in the proposed sites can only increase use of vehicles, exacerbate the existing problems and make the roads UNSAFE.</p> <p>f. New primary schools and doctors surgeries will be required urgently.</p> <p>g. Finally, the Council should appreciate that the only recycling centre for Trowbridge is on Canal Road. This requires everyone to use their cars, a great proportion of the population need to travel through the town to reach the Tip – this increases traffic and pollution even further.</p> <p>At the Consultation on 26 July the public were given no visibility of a transport plan to support proposed developments, nor was there any visibility of industrial development. Is there any such transport plan?</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge Principal Settlement		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The SHLAA talks about Trowbridge being a “Principal Settlement” and primary focus for development. There is no mention of how “The role of the town as a significant employment and strategic services centre” is actually to be achieved.</p> <p>It would appear that contrary to Council policy and legal requirement, maybe not all landowners have been consulted on inclusion of their land in the SHLAA.</p> <p>Existing infrastructure facilities in this town are already stretched: the proposed housing will inevitably bring more traffic into an already congested centre. At the same time existing sites in the town, where people could walk to the shops, surgeries etc, and catch the trains for work in Bristol, Bath, Warminster and Salisbury etc, would seem to be available and yet are ignored by the Council in their town plan.</p> <p>The Trowbridge Community Area Strategy – part of the Wiltshire Core Strategy – describes lots of plans and proposals, but does not appear to say anything about infrastructure development apart from one secondary school, and there is no mention of developing the road network.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to protest about the proposed building of houses on fields in and around Trowbridge.</p> <p>I am not against houses being built, particularly affordable housing, however to build on these meadows which will encroach or envelope the surrounding villages will create urban sprawl, which I am very much against.</p> <p>The houses in my opinion, should be built on brown field sites within Trowbridge itself. There are several acres of such sites many of which have already been cleared and levelled. This will help regenerate the town which is in decline and has been ranked the fifth worst in the South West. Deplorable for a county town.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Trowbridge has provided more than its fair share in meeting the demands placed upon Wiltshire by the government directive to provide more housing. Why are the council not providing more vigour to pursue the development and building on the approved brown sites that have lain dormant for so long? These must surely take precedence over farm land that is still in daily use.</p> <p>That Wiltshire cabinet members are so eager to sacrifice these beautiful and productive fields to the south of the boundary brook and turn their Core Strategy on its head, is nothing short of scandalous. The allocation should be shared more fairly with surrounding towns and in particular Chippenham, as at present, it is biased against Trowbridge. It is interesting to note, is it not, that none of the cabinet members reside in Trowbridge!</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Settlement Boundary Review			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Draft Wiltshire Housing Sites Allocations Plan relies heavily on information in the Chippenham Community Area Remainder Topic Paper. Which includes the following statements:</p> <p>Page 7 states that Christian Malford NDP 'is not reviewing the current settlement boundaries'. This is untrue (see the submitted NDP which includes a review of the settlement boundaries.)</p> <p>Page 8 states: "No settlements in the Chippenham Community Area Remainder are considered to have had their settlement boundaries reviewed through a sufficiently advanced neighbourhood planning process. Therefore, all settlements with currently adopted settlement boundaries within this community area have been considered through the settlement boundary review."</p> <p>This is untrue and in contradiction to the statement on Page 12:</p> <p>Page 12 states that Christian Malford will not be taken forward to the next stage of assessment of site allocations because it has "Advanced neighbourhood plan allocating approximately 38 dwellings." This statement is in apparent contradiction to the statement made on Page 19:</p> <p>Page 19 states that "No settlements in the Chippenham Community Area Remainder are considered to have had their settlement boundaries reviewed through a sufficiently advanced neighbourhood planning process.</p> <p>Therefore, all settlements with currently adopted settlement boundaries within this community area have been considered through the settlement boundary review."</p> <p>The submitted Neighbourhood Plan states (page 38):</p> <p>Christian Malford is identified as a Large Village in Wiltshire Core Strategy Policies 1 and 10. Core Policy 2 says within the limits of development, as defined on the policies map, there is a presumption in favour of sustainable development at the Large Villages. It also says that</p> <p>"Other than in circumstances as permitted by other policies within this plan, identified in paragraph 4.25, development will not be permitted outside the limits of development, as defined on the policies map. The limits of development may only be altered through the identification of sites for development through subsequent Site Allocations Development Plan Documents and neighbourhood plans"</p>			

Appendix Q - Schedule of representations

	<p>In order to ensure that proposals coming forward on those sites are in accordance with Core Strategy Core Policy 2, the settlement boundary had been amended to include the new sites. The revised settlement boundary is shown In Map 10."</p> <p>(my emphasis)</p> <p>(please see attached original rep with table)</p> <p>The Plan does not take into account the very advanced state of the Christian Malford Neighbourhood Plan, which was put out for public consultation between 5th June and 18th July, at which point it will be passed to an independent examiner. It should more properly not have been put forward for boundary review, much is the same way as other villages such as Great Somerford have been excluded. Further to this, it should be noted that the revised boundaries included in the Christian Malford Neighbourhood plan were approved by Economic Development and Planning, and it is incomprehensible why this revised boundary was not therefore acknowledged in the Wiltshire Housing Site Allocations Plan</p> <p>Proposed changes are therefore:          Page 24: Chippenham section. REMOVE Christian Malford from the left-hand column, and include Christian Malford into the right-hand column          Page 108 Paragraph A.34: Remove Christian Malford          Map of Christian Malford immediately following Page 108 : Remove</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6; Table 5.10			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Though it will cut no ice with respect to planning consent or refusal, the proposed land for development is a picture perfect setting outlined by trees along the brook boundary with expansive views of the Westbury hills and White Horse to the south. This land provides a recreational area for walkers of all age groups, many of whom pass our house to cross the stile nearby. The well trodden paths are testament to its use by so many, who like ourselves walk the various footpaths with children and grandchildren, often to neighbouring villages. Quality of life that includes exercise, is beneficial, lifts the spirit and imbues one with a sense of wellbeing, but these values, clearly count for nothing among those cabinet members eager to concrete over an area so valued by the community. Wiltshire council must work on behalf and for all residents in a more robust manner to preserve our green fields and not against us to our detriment.

Appendix Q - Schedule of representations

Comment ID:	57	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Paul Elphick	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6; Table 5.10			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Appendix G, Assessment criteria and output from stage 4a of site selection process (page 27.) states: Site 3565 - Southwark Court - Accessibility - "Potential vehicle, pedestrian &amp; cycling routes through existing routes to the immediate north on to Silver Street Lane". If it is the intention of planners for vehicular traffic to access Silver Street Lane from the proposed development via either Balmoral or Sandringham Road, then those planners must be made aware of the folly of making our quiet cul-de-sacs into 30mph drive-throughs. It becomes very cluttered at the lower end of Sandringham Road, with various home improvement and service vehicles, to add to the overflow street parking.</p> <p>Each of the 180 proposed upmarket homes will have, maybe 3 cars per household. If each vehicle is driven twice a day, then this equates to 2,160 extra vehicles plus delivery vans and so on, that will be speeding up and down our once peaceful cul-de-sac. This must not happen and we will fight tooth and nail, any proposal that leaves us disadvantaged. Access to College Road and Silver Street Lane is off the Frome Road. So should Wiltshire council bulldoze this unnecessary development through, council members and planners should give serious consideration to access the proposed development at the eastern end where it would adjoin the Frome Road close to Firs Hollow between Trowbridge and Southwick. This would alleviate congestion at the end of Silver Street Lane which is already a nightmare at peak times. This will enable commuters to travel through Southwick to Bath or Bristol where many will work, without adding further to the congestion in Trowbridge.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6; Table 5.10			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Under appendix G, the attached map shows a red line to outline the proposed revised Trowbridge boundary. It would appear that you are handing over to Southwick the two recreational areas at Silver Meadows and Sandringham Road, or worse still, to the developers. Is this a disingenuous move by the council to sanction erosion or destruction of these valued spaces for commercial interests? If not, why will these areas not remain within the Trowbridge boundary?</p> <p>Our house, 28 Sandringham Road is in between the two recreational areas and is the only property that directly borders the brook. I am concerned that our garden and house will be overlooked by the proposed housing and that the developers will have free rein to remove the line of trees ( for whatever fabricated reason they dream up ) and even the brook itself.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>When we moved to this lovely quiet bungalow we were told it was unlikely any building would take place on the fields as it was agriculture land. The natural hedgerows are full of wildlife and many varieties of birds also lovely old trees and wild flowers. Fields are well used by walkers and dog walkers as there is very little of this type of area around here it is very valued. We are concious of how close to North Bradley and Southwick any building would take us so we would lose our boundaries if we are not careful. We are near to losing our natural hedges as well as the well established trees and there must be other land to build upon where this would not happen. Please consider this protest bearing in mind the number of senior citizens who appreciate being able to walk in the field and admire the beauty without inhaling so many fumes.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan for the development in Harnham is dependent upon a major review of the road network to accommodate the increased traffic. It is difficult if not impossible to see where these road improvements could be made. It is putting the cart before the horse. Details of the plans for the road network need to be put alongside the proposed housing plans so that it is then possible to make a judgement. At the moment it is impossible to see how the road network can be improved to accommodate the increased traffic. The Harnham Road is already gridlocked at peak times. This will only exacerbate the situation especially as most houses have at least two cars. This will cause increased problems in entering the City. If the cars have to then have to get to the Southampton Road this will cause absolute chaos to an already chaotic road network. Whoever drew up the plans appears to have no knowledge of the area. It would seem that because Churchfields is proving difficult to implement you have opted for Harnham without thinking through the consequences.</p> <p>Despite your reassurances the increased number of cars is bound to cause an increase in pollution. Traffic queues will only make this worse. I also have concerns about the ability of the area to cope with the increased drainage that will be needed especially the impact of surface water on the Netherhampton Road.</p> <p>All of the above problems could be avoided by the building of a new market town in the north of the county. This would not only resolve the problems with the development in Salisbury but would also satisfy the Council's requirement to build a number of new homes.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to object to the settlement boundary changes at Oaksey.</p> <p>My objections are as follows:</p> <ol style="list-style-type: none"> <li>1. The house, gardens and outbuildings of Woodfolds Farm, The Green, Oaksey have been included in the settlement boundary, and yet Greenacres Farm including redundant farm buildings has not, yet the latter is closer to the main populous of the village.</li> <li>2. Woodfolds is a listed site - so any additional inclusion in the settlement boundary and likely development - would be difficult to attain due to this status.</li> <li>3. Planning Officers have previously supported residential development at Greenacres Farm (yard) and affordable housing close to Bendy Bow in the field area.</li> <li>4. The proposed site at Wick Road for 11 houses has a road that is generally narrower than The Green and is within proximity of a conservation area. Greenacres Farm is not in a conservation area.</li> <li>5. I understand plans are at an initial stage to redevelop part of the Bendy Bow estate. It would make sense the field area at Greenacres Farm is included within this scope or additionally to the activity. The field at Greenacres Farm and the Bendy Bow estate were one of the same prior to the latter being built.</li> </ol> <p>In summary, I would like to see:</p> <ol style="list-style-type: none"> <li>a) The redundant farm buildings at Greenacres Farm (as shown in the attached) within the scope of the settlement boundary, and subsequent residential development allowed.</li> <li>b) The field area between Bendy Bow and the farm buildings in (a) above to be allocated for housing/affordable housing.</li> </ol> <p>Please see attached site information. If you require further clarity please contact me.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.5 and H3.6		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Draft WHSAP fails to identify sufficient land to meet the 5 Year Supply of Housing land. To comply with the need for housing the WHSAP should allocate more suitable, available and viable land, including land adjacent to H3.5 known as Site S98 at Hackthorne / Durrington Manor (see Plan 1).</p> <p>Land to the rear of the Vets at Larkhill Road, Durrington should be added to Site H3.6 (see Plan 2). Representations by land owners of part of Site H3.5 (the S98 part) and all of Site H3.6 at Durrington Pre-submission draft Wiltshire Housing Site Allocations Plan (WHSAP) This is an objection to the draft WHSAP and we would be grateful if you could acknowledge safe receipt of this email and provide us with an Objector reference number, by return. We are likely to write again with a full objection and we will cross-reference with the same objector reference number (to avoid confusion). Briefly, our objection is that:</p> <ol style="list-style-type: none"> <li>1. All of S98 at Hackthorne / Clover Lane should be allocated for housing to meet local housing need and provide adequate land for the 5 years housing land supply to 2026.</li> <li>2. Part of the land to the rear of Vets at Durrington should be included with Site H3.6 (see title plan).</li> <li>3. Our detailed objections (to follow) will include information on the suitability, availability and viability of our objections (for sites H3.5 and H3.6) and set out why the draft WHSAP is not sound currently but would be, if amendments are accepted and included within the WHSAP, and all relevant planning matters.</li> </ol> <p>Before the draft WHSAP was issued we did request by email and 'phone a meeting with Officers, but alas no offer of a meeting was made by Officers. We also submitted a Statement (enc) dated 14/06/17 to Wiltshire Council for the Cabinet meeting on 20/06/17. We attended that Cabinet meeting and our Statement was referred to, but not discussed as it was not the purpose of the meeting to discuss individual sites. We are currently reading through the draft WHSAP and consider that there are matters we would like to discuss with Officers at a face to face meeting well before the deadline of Friday 22nd September, so we can better understand Officers' thinking behind the proposed allocations. We are happy to either meet you at your office in Trowbridge or on site, to suit you.</p> <p>By allocating further land the WHSAP will be more likely to meet the 5 Years Housing Supply for the Amesbury Community Area to the end of the period (2026) and housing need generally in this area during the Plan period.</p>			

Appendix Q - Schedule of representations

	<p>Further more detailed objections will be submitted before the deadline of 5pm on Friday 22nd September 2017.            3 attachments:            1. 1119095 Rep 66 Objection form Land at Durrington 3.5 and 3.6 submitted 08.08.17            2. 1119095 Rep 66 STATEMENT ON BEHALF OF LANDOWNERS (14.06.17) re Wilts Housing Site Plan            3. 1119095 Rep 66 Stonehenge Veterinary Car Park Area20170504_10575228</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	West Lavington and Littleton Pannell Settlement Boundary Review				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Please see original representation for full details (plans, etc.)                      The proposed settlement boundary changes to West Lavington and Littleton Pannell appear to include a number of anomalies and errors.</p> <p>1. Area behind 67-69 High Street, West Lavington SN10 4JB and adjacent properties                      It is proposed that an area currently within the boundary should be excluded, as shown below:                      Only one part of this area, at the northern end, may be described as comprising “a farm building and farm yard at the edge of a large village”. The remainder comprises domestic buildings or gardens. Structures are clearly shown on the map below, with the only agricultural building shown by the arrow. The large building at the south is West Lavington Manor.                      The built form of the area is also clearly shown in the aerial photo below:                      I believe it is incorrect to exclude West Lavington Manor and incorrect to divide the rear garden of 67-69 High Street.</p> <p>2. Area behind 109 High Street, Littleton Pannell                      It is proposed that an area currently within the boundary should be excluded, as shown below:                      I assume that the exclusion is proposed on the assumption that the area comprises “The extended curtilage of a property that relates more closely to the open countryside (e.g. a field or a paddock) or has the capacity to substantially extend the built form of the settlement in terms of scale or location”.                      I surmise that the assessment had regard to the map below, in which the area appears to be a field:                      In fact, the greater part of this area is an extensive rustic garden associated with 109 High Street. It is divided into several sections where the owners have generously hosted numerous community events. It is not agricultural in any way, nor does it relate to the open countryside. The map is misleading in that respect.                      The section highlighted here is part of the garden of 115 High Street                      The character of the area is better illustrated by the aerial photo below:                      In summary, the area does not relate more closely to the open countryside, nor does it extend the built form of the settlement as it is within the line of the former burgage plots which form the existing settlement boundary in this area. It is, however, “The curtilage of a property that relates more closely to the built environment (e.g. a garden)” and “has limited capacity to extend the built form of the settlement in terms of scale and location”.                      In my view, it is anomalous to exclude this area.</p> <p>3. Area of High Street, Littleton Pannell SN10 4ES                      It is proposed to amend the boundary to exclude the highway A360 and adjacent lanes as shown below:                      This amendment has no basis on any of the defined criteria and appears bizarre.</p> <p>4. The village playing field adjacent to Sandfield SN10 4HL                      It is proposed to amend the boundaries adjacent to the village playing field as illustrated below:</p>			

Appendix Q - Schedule of representations

	<p>These amendments have no basis on any of the defined criteria.          Given that the playing field is bounded on the north by houses, on the east by the primary school, on the west by the village hall and on part of the south by sheltered housing, it would be more logical to include the field on the basis that it is "Recreational or amenity space at the edge of a settlement that relates more closely to the built environment".</p> <p>5. New Pavilion at Dauntsey's School          The extension of the settlement boundary at Dauntsey's School includes Evans House but does not include the newly built Pavilion. The Pavilion is not shown on the Wiltshire Council maps used above, nor on satellite images, but is outlined on the SBR map below:          I believe this building should be included within the new boundary to comply with the criteria, which states "Built and commenced residential and community facilities development such as religious buildings, schools and community halls, that is physically related to the settlement".          I suggest the settlement boundary proposals should be amended to reflect all the points above.          I am copying this to the Chairman and the Clerk of West Lavington Parish Council. Please do not hesitate to contact me if you wish to discuss any matters.          I will be writing separately in due course about the proposed Housing Site Allocations in Market Lavington.</p> <p>From email 19/09/17:          I refer to the response of Worton Parish Council to the Settlement Boundary Review (as outlined in the attached document) and wish to record my support for their request for no change to the existing boundary without direct consultation and consideration.          The existing boundary is long established and reflects in many respects the historic settlement as defined by burgage plots etc. In addition, many of the proposed changes fail to accurately reflect the criteria defined in the settlement boundary review methodology document. For example, the school grounds (G6) and gardens (H6, I6 and J6) are certainly not "more related to the open countryside". It would appear that the compiler was unfamiliar with the location and may not even have examined the aerial photography.          Worton is in the process of preparing a Neighbourhood Plan and I have no doubt that responsible proposals will be made regarding the settlement boundary in due course if that is appropriate.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I understand there is a proposal for building on the fields adjacent to Boundary Walk which is just a few metres from my house. I am appalled at this proposal, obviously I am concerned how this is going to affect myself and my family. My other concern is for the detrimental effect this will have on the wildlife:Deer, squirrels, bats all the different species of birds to name but a few.I understand there are other areas in Trowbridge where planning permission has already been passed. I know you have a target to reach so surely these areas could be used instead.It would be good to know that a rich property developer waving cash can't get what it wants

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Having lived at the above address for the past 47 yrs looking out onto the fields I wish to oppose the proposal to build. There is no-end of brown land which could tidy up Trowbridge. Over the years I have seen not only (dog walkers) but wellbeing for all ages which became important to every-one, especially elderly on their own who would walk in the field to (talk to some-body) I could mention quite a few. All this will be an impact on their mental health.</p> <p>The other issue is the wildlife. I have seen five deer, 3 foxes early mornings, hedgehogs, newts, bats, newts squirrels all this would have a terrible impact on their habitat, so I strongly ask you to put forward these points and to understand what this will do to us all.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1) Traffic chaos At peak times it already takes up to 30 minutes to travel around the Harnham Gytratory. The building of such a large number of houses off Netherhampton Road will inevitably bring chaos in both directions and also delay emergency service response times.</p> <p>2) Effects on the environment, particularly for development proposed for Netherhampton Road (North) The area proposed for development is crucial for flood defence and the building of houses would therefore have a devastating impact on the surrounding environment, both wildlife and human habitat. Following consultation planning has already been rejected below Harnham Bridge. The same concerns would apply to this current proposal. If flood plains are built on, the flood defences would be unable to cope. In 2013 - 14 they were already close to bursting and the proposed site was deeply covered in water for several weeks. It is alarming and a cause of concern that the proposal has got this far, and amounts to an extreme waste of public money. Who will be held to account?</p> <p>3) Affordable housing How will this be managed? Whilst there is no doubt that affordable housing is much needed, it must be managed transparently and fairly to give real opportunities to local families, and all the infrastructure to support it must be in place at an early stage. There will be areas much more suitable for development that are not near to valuable water courses.</p> <p>4) Impact on services. Infrastructure affected by large population increases extends to all current Health, Education and Social Care Services. Despite all the housing developments already underway there has been no extra funding available to Services which continue to have cost savings imposed year on year.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Greenfield development in Trowbridge.</p> <p>We should like to pass comment on the proposed use of greenfield sites for housing development, in particular land within the so-called 'Hilperton Gap'. It would seem that further reduction in our countryside is proposed without giving priority to brownfield sites. The road across Hilperton Gap was constructed despite strong opposition and to the detriment of countryside amenity. We understand that the land adjacent to Elizabeth Way and Trowbridge is under threat of housing development, which was contrary (and still is) to the wishes of the Gap Road opposition. We strongly object to this further attack on green land and public amenity space.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road housing developments		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I feel the housing development is unsound due to the traffic density and increase in potential volume of traffic along Netherhampton road. At rush hour the roads are unbearable and around the Harham triangle junction, it is not unusual for traffic to be backed up to the One Stop convenience store, about 1 mile in length. Traffic can not move now, but by adding another potential 1000 cars to the area would destroy the area. The roads just cannot cope now, nevermind with an extra 1000 cars. The plan also gives no details of shops to the plan or health services, the area copes now, but with 700 + houses extra local services can not cope. This side of Salisbury has no shopping facilities there is no supermarket, just one small shop, how is this sustainable for the people in Harham, you offer schools but no services for food and medical provisions for all the people in Harham. How can a housing plan be developed with no plan for food, medical or the road infrastructure.</p> <p>i also have concerns about the land north of Netherhampton Road, is this flood plain land ? If it is flood plain land, that is just irresponsible planning, if fact it is no planning. The worlds climate is heating up = more rain = more flooding, do you Wiltshire Council even care about people's homes being built on flood plains ? From the plans no you do not.</p> <p>You should be building on brown sites, no green field sites, yes it might be more expensive for developers, it's called urban regeneration, not destroying our precious countryside.</p> <p>if houses are to be built, then proper services for a supermarket and petrol station, medical services, parking and need to be provided. The plan is for far to many houses 700+ houses is far to many and on green on green field sites. The Booker site has had no other building on it since I have lived here (5 years), empty land with nothing on it for years. We should be keeping our green belt not building on it, a maximum of 300 houses should be built on Netherhampton Road. The plans are irresponsible and greedy.</p> <p>a maximum housing of 300 houses around Netherhampton Road, not building on flood plains, a supermarket and medical services. I have no children, so you offer nothing to people like me, hard working professional people who own their own home, you offer the bare minimum and schools only. What irresponsible council offer building housing on green fields with no thought of infrastructure for roads, traffic, food/shops and medical services.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge sites			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>HOUSING DEVELOPMENT ON GREEN FIELDS SITE AT END OF BALMORAL ROAD</p> <p>As you see I live in Hazel Grove. I have a number of friends who live in Balmoral Road. My attention has been drawn to the proposed building of quite a large number of houses on the green fields beyond Balmoral Road and outwards towards Southwick. Many people use these fields to walk their dogs. I watch them as they proceed along Hazel Grove and down Balmoral Road to the fields. Such facilities are important to the people who live in this area.</p> <p>I wish to register my objection to such a development. There are a number of 'brownfield' sites in Trowbridge which could be used to accommodate more houses without using land such as this. It amounts to urban sprawl linking Trowbridge to Southwick.</p> <p>What provisions will be made for extra schools and other necessary facilities? Grove School is already causing parking problems in Hazel Grove. If access is allowed through Balmoral Road to Silver Street Lane this would cause even more problems. Why here?</p> <p>Please register this letter as a strong objection to granting planning permission for the building of a large number of homes in the area specified above. (GREEN FIELDS near Balmoral Road).</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This is not consistent with previous use of high grade farmland.                  The combined allocation is massive and would dominate the local community.                  Massive increase in traffic on a busy route for lorries, commercial vehicles and local circulation to schools, and routes around city. Little options for pedestrian routes to the city, train station and centres of employment.                  Local school and nurseries already over subscribed.                  Lack of any local infrastructure, employment, within walking distances or bus routes                  Loss of visual quality of views of the Cathedral and city from Harnham slope.                  Impact on local drainage and water capacity.                  Severely reduce the number of houses, improve transport and alternative routes for existing traffic. Consult in a more effective way, one day in city notified a week of so before, nothing locally.                  Absence of supporting infrastructure and record of failure to deliver planning reserved matters and considerable burden on existing local community with no benefits.                  Revitalise Churchfield industrial relocation plan thus using brown sites before farmland and deal with chronic existing traffic and transport issues.                  South Wiltshire has taken a huge burden of housing mostly taken up by people from outside the county thus not addressing actual housing shortfall, creating dormitory city and chronic traffic jams.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Re: The regional spatial strategy housing needs Housing needs between Trowbridge and Westbury I refer to my telephone call to you on the 21st July 2017. Please find enclosed a Land Registry survey map to identify the land at Hawkeridge for Title Number WT77067 (OS 1683). I would like you to put this forward to be added to the mix. The land is adjoining Hawkeridge village houses which consist of approximately 45 mixed properties i.e. houses, bungalows and council houses which are new and old. The land has all main services on site: Main sewer/water and electricity supply. Facilities nearby:- (1/2 mile approximately) Two trading estates for business and work including a night club namely Club Ice Two convenient stores one which has a Post Office and a petrol station/general stores The village also has a local pub and a Methodist Church/train station is nearby Hawkeridge Road B3097 Hawkeridge Road is controlled by traffic lights and speed restrictions the entrance/exit could be a 2 way system It has a good bus service with bus stops very close-by There are also public footpaths which can be used to reach the local amenities The village and surrounding areas is in very urgent need for low costs housing along with private houses to accommodate local families and the work force for the employees of the two Trading Estates. This site has also been put forward as to the district plan. There is also a brand new store to be opened in the future at the new Hawk Ridge Park which will be nearest to Hawkeridge village. Please add this to the agenda. See the attached for supporting documents (download pdf for link).</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.4 Land at Rowbarrow, Salisbury		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Plans to build on land at Rowbarrow H3.4 are unsound because:                      Infrastructure requirements cannot be met. Increased traffic would be a major problem for the Harnham gyratory which is already often gridlocked, as is the A338, the hospital road and Newbridge road.                      The parish of Harnham of which H3.4 would be a part is already over-developed from a village south of the river Avon, to an urban sprawl as a large and increasing suburb of Salisbury                      Pollution levels are already dangerously high in the roads around this area                      Green lungs are essential for good physical and mental health. Development on this land, a greenfield site used for recreation, would be detrimental                      Very important – building on H3.4 would contravene the 40’ building line with regard to the cathedral                      The site is full of sky larks and wild flowers and with stunning views over many miles. Don’t wreck it!                      Withdraw the plan to build H3.4 as it contravenes the building line re the cathedral                      Recognise the traffic problems and build in other parts of the county. Expand Swindon instead                      Recognise the need to keep Salisbury and its rural environs as unspoilt as possible to maintain its medieval market town and cathedral town set in a rural landscape which will attract visitors.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">88</a>	<b>Consultee</b> P R Purnell  <b>Person ID:</b> 1119601	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Proposed land for the Development of Houses at Southwick Court</p> <p>This letter remonstrates the proposed building of houses on the land north of Southwick Court and puts forwards a few issues which may arise should the construction of the houses proceed. The first problem presented here is the existing transport infrastructure. A road for the use of the new houses has been proposed to join Balmoral road, and therefore traffic from the new houses will use Silver Street Lane to travel to either Bradley Road or Frome Road. However Bradley Road is already a very heavily used road, as is Frome Road, whilst Silver Street Lane is becoming increasingly busy, Therefore any new traffic from Balmoral road, will lead to severe congestion of Bradley and Frome road respectively. A second problem that will evidently arise from new houses, is the need for new schools and the requisite parking for parents on the school run. The two primary schools likely to be used by new residents of the proposed houses are Southwick Primary and the Grove Primary school respectively; of which the latter school has already met its carrying capacity. Regarding the parking issue, there is a paucity of parking for parent's cars at the Grove Primary School such that the parents park their cars as far down as Silver Street Lane. This issue of the parking of cars by parents can only be exacerbated by the new traffic resulting from the new houses.</p> <p>Apart from the necessity for parents from the new houses to park their cars when collecting/dropping off their children to the Grove Primary School, there is the additionally problem of cars travelling along Silver Street Lane and having to negotiate a large number of these parents' cars, whilst simultaneously having to avoid traffic coming the opposite side of the road. This will quite possibly lead to much congestion and even accidents along Silver Street Lane.</p> <p>Another problem that will arise from the new houses is their close proximity to the solar farm in the field next to Knapp's Cottage. As new families and no doubt their adventurous children will move into some of the new houses, it is quite foreseeable that the solar farm will present a very real danger to any child daring enough to enter the fence behind which are the solar panels.</p> <p>A last issue is that the fields on the proposed sight of development are prone to flooding during periods of heavy rainfall, this can be verified as a problem by residents close to the proposed development site, such as those who own Bramble Farm. As I am sure you are aware, concrete, being a non-porous material is far for likely to promote flooding than the present soil and plants of the fields that aid in reducing flooding.</p> <p>Finally on Southwick Court itself, as a Grade II listed building and with features of historic interest, such as its double storey gatehouse, it makes a farce out of the grade listing system to build so many new houses so close to Southwick Court's house and grounds.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">89</a>	<b>Consultee</b> Mr Timothy John-Garrett Purnell  <b>Person ID:</b> 1119640	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Proposed land for the Development of Houses at Southwick Court</p> <p>The following presents a few points in expostulation of the proposed development of land belonging to Southwick Court (Trowbridge, Wiltshire) for houses (yellow area in Fig. 1 p.4).</p> <p>Two species protected by law have been seen within the aforementioned land proposed for development and on the peripherals respectively of said land. One seen regularly by the author and other residents near to the proposed development site is the Kingfisher (<i>Alcedo atthis</i>), which is protected under Schedule 1 of the Wildlife and Countryside Act 1981. This species has been seen on both the brook running parallel to the first field bordering Boundary Walk (and to the east of Boundary Walk), and at the moat surrounding Southwick Court. As the Kingfisher is a species sensitive to disturbance, any anthropogenic development in the vicinity of where the species occurs should be in sympathy to the bird's habitat requirements (RSPB, 2015) to minimise disturbance to the species.</p> <p>The Second species is the Water Vole (<i>Arvicola amphibious</i>), identified by the Author as distinct from the Brown rat, which it is often mistaken for, by its blunter head, smaller ears and shorter tail, and distinguished by other UK vole species by its considerably larger size. This species is protected under Section 9, Schedule 5 of the Wildlife and Countryside Act 1981. The Water Vole is in steep decline in the UK and is another species sensitive to anthropogenic disturbance, as I am sure you are aware, it is illegal to harm areas that the this species uses for shelter and protection.</p> <p>Therefore it is law to carry out a survey before any building can take place, to ensure that places where these species inhabit are not damaged by human development.</p> <p>The building of houses on the land proposed for development may destroy the hedgerow (highlighted in part approximately between two purple arrows in fig. 2 p.5) that borders the brook running parallel to Boundary Walk and other houses to the east of Boundary Walk along which the brook and hedge forms a border. This hedgerow meets one criterion that defines it as a hedgerow by law, namely that it is over 20 metres, additionally that this Hedgerow is over 30 years old (digimap, 2017) and near a public footpath, it is protected under the Hedgerow Regulations 1997 (Gov.UK, 2016).</p> <p>This hedgerow could be labelled an 'Important Hedgerow' under the Hedgerows Regulations 1997 as it meets at least one criterion for that legal status (Gov.UK, 2016). This criterion being that the hedgerow is part of a field system that existed before the Enclosures Act 1845 (Wiltshire County Records, residing in Chippenham).</p>			

Appendix Q - Schedule of representations

	<p>Furthermore, if the hedgerow marked by the purple arrows, can be construed as being related to Southwick Court House and said house's Moat, it could meet a second criterion for 'Important' status. This criterion is that if a hedgerow related to an Estate or Manor that marks the boundary of an estate or manor or looks to be related to any building or other feature that's part of the estate or manor that existed before 1600 (Gov.UK, 2016). Southwick Court is an Estate that existed before 1600 (Crittall, 1965), along with a section of the present Southwick Court house (Wiltshire Council, 2011), additionally the moat and the Gatehouse, which can be construed as features of Southwick Court, also predates 1600 (Mee, 1950; Crittall, 1965). If this hedgerow, or a section of the hedgerow, does carry 'Important' status then the local planning association (presumably Wiltshire planning association) by law should refuse the hedgerow's removal.</p> <p>Finally while the land of proposed development is technically termed 'Green Field' as opposed to 'Green Belt', these terms appear to be applied to land in an arbitrary manner. In reality, once the proposed houses are built, there will be very little land left between Southwick and Trowbridge - when looking at it from the Boundary Walk area to those houses South of Bridge Breach Lane (fig 1.) - that can be called 'Green Belt'. Therefore Southwick and Trowbridge, for all practical purposes, are one and the same human settlement and pitifully and insistently differentiated solely by name.</p>

The Commission does not have the resources to respond to all consultations, and it is not our practice to respond to consultations on local plans or infrastructure projects unless they raise a clear or significant equality or human rights concern. Local, Parish and Town Councils and other public authorities have obligations under the Public Sector Equality Duty (PSED) in the Equality Act 2010 to consider the effect of their policies and decisions on people sharing particular protected characteristics. We provide advice for public authorities on how to apply the PSED, which is the mechanism through which public authorities involved in the planning process should consider the potential for planning proposals to have an impact on equality for different groups of people. To assist, you will find our technical guidance here.

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">101</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Ms L MacDermott	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>We live at Church Lane, Upper Studley BA14 OEH. Along with our neighbours our property is grade 2 listed. According to the listing guidelines and development pertaining to such properties, any development has to fit certain criteria. This is not simply the structure of the listed building but location, context and surrounding. Any development that is obviously visible from the said listed buildings is detrimental to the buildings themselves which have been listed intrinsically with the location.</p> <p>Our address is Church Lane. It is not Off the M4 next to a housing estate. The setting is the lane, the church, and the extent thereof being the parish boundary. Any development affecting this setting is contrary to policy: local government, town and national planning. Section 66 of the Listed Buildings Act states that in planning the Council must pay particular regard to protecting the setting of listed buildings.</p> <p>Whilst we appreciate planning and development are necessary, it is fairly obvious that the council gets it wrong sometimes. As an example whoever gave planning for the "lead bunkers" to be stuck on the side of St John's Church in 1980 obviously was either mad or had no idea of what a Victorian gothic church was or is.</p> <p>So, in conclusion, to avoid incorrect planning decisions, any development in the fields (marked X and Y on the Historic England page included) along Church Lane would be inappropriate from a town development point of view (the buffer zone between villages being taken up, the apparent attempt to change parish boundaries ie. Church Lane, the destruction of a setting that has been unchanged since the church and associated buildings were erected in the mid 19th century). There is no justification in planning law to ignore the legal standing of a listed building when it has been listed for very specific reasons.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">102</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1120337	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my views and objections to the proposed housing development plan in Trowbridge, North Bradley and Southwick. In a general sense I object to some 700 houses, the majority being planned in Wiltshire being build in such a confined area, all on green belt land when there are huge areas of undeveloped land in and around towns, brown field believe it is referred to. Why the need to destroy more countryside?</p> <p>Also, in a general sense, the 700 new homes (plus I believe planning permission has been granted for the old West Wiltshire Council site on Bradley Road, a mere stone throw away from north Bradley and Southwick) will result in a huge increase of traffic, putting pressure on an already busy part of Trowbridge. Bradley Road, near to spitfire retail park is already a traffic nightmare due to McDonalds and associated businesses. Adding 700 new homes and likely twice the amount of cars will bring the area to a halt! There is also insufficient infrastructure to meet the needs of these new families. Trowbridge schools are already woefully oversubscribed and the planned building of a new secondary school on the new Hilperton Castle Mead estate will only serve the masses of children in that area, another 700 families' needs will not be met by just the building of one more secondary school. There will also clearly be a knock on affect to primary schools, doctors' surges, dentists and a host of other, seriously neglected services in the area.</p> <p>all this being said, I am not naïve enough to think that no housing will be built. Clearly, new homes must be built and at least one of the three sites (A363 white horse business park, Elm Grove Farm and Southwick Court) will have to be built, but common sense must prevail and a stop to at least one (ideally two) must be made.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">103</a>	Consultee Dave Brown	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1120337	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Figure	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.2			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>looking at all three sites, the A363 White Horse Business Park is clearly the least sensible: a capacity of 338, reduced to 150 due to 'mitigating factors'. This site will not solve the housing issue in Trowbridge; compared to the other two proposed sites it offers really poor value in respect to what the plan sets out to achieve. The location of the site also begs questions about access to it, as Woodmarsh is a residential road which already suffers from speeding (Councillor Prickett is campaigning for speeding measures due to the already excessive use of the road); as already noted the build up of traffic on Bradley Road is already bad and the use of Southwick Road going to the A36 is overused by heavy goods vehicles that speed into the village. The access to Yarnbrook is, and has been problematic for years, and is often queuing back to North Bradley as things stand. This proposed site will only add to the already problematic traffic congestion.</p> <p>Perhaps the most pertinent point against the development though, which is based on a precedent made by Wiltshire Council at the Paxcroft development, is that the building on the fields behind Woodmarsh will result in the joining up of Trowbridge and North Bradley, meaning that North Bradley will ultimately lose its independent village status. When the Paxcroft estate was built some years ago, it was only granted due to an agreed plan to leave a strip of fields between the village and the new estate, therefore ensuring that the Village of Hilperton remained separate to Trowbridge. I would like to think that this policy would extend to all villages surrounding Trowbridge and not just to villages that have influential Wiltshire Councillors in them.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Of course, the Elm Grove development does have the best housing ratio, but would suffer with significant (almost as much as the white horse development) access and traffic concerns. Drynham road is essentially one way due to only being able to turn left at the end onto county way. The multiple 'rat runs' up onto Bradley road are already dangerous due to the amount of traffic on Bradley Road and the inability of drivers to see, resulting in people pulling out of roads. As already noted Bradley road is already under pressure by the new build off of Wiltshire Drive. The train track that runs between Longfield (and surrounding area) and Drynham road means there will never be easy access out of Trowbridge in that direction, resulting in the traffic either coming directly onto Bradley Road (see earlier Spitfire retail Park note) or onto the trading estate, therefore looking to access Yarnbrook which simply cannot handle more cars.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to object to the amount of building which is being proposed for the North Bradley area. My family and I live at The Rank North Bradley and we bought the house because we wanted to live in a village not in Trowbridge.</p> <p>There are various reasons why this amount of development in this one village is outrageous. I have also been informed by our Mr Prickett that we are over our allocation for Wiltshire so why this amount more in one village. Wiltshire is a large county it does not all need to be in this small area, we will be left with no green fields between the villages and Trowbridge.</p> <p>Reasons against</p> <p>The villages of North Bradley, Yarnbrook, West Ashton and Southwick will become part of Trowbridge this is outright wrong.</p> <p>Loss of green fields for all forms of wildlife especially the Bat community.</p> <p>Loss of green fields for farming which at this point for the UK is crucial as due to people voting for Brexit we will be having to rely on the UK to feed the country as imports will cost too much.</p> <p>I don't suppose any councils have even thought this far ahead.</p> <p>Destroying the heritage of the area.</p> <p>Lack of infrastructure for this amount of people and no decent facilities or public transport.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	As a formal response I would like to request that the land to the east of Ball Road Pewsey is removed from the Pewsey Plan as land with the potential for development. The new development line has already been proposed by Wiltshire Council (attached) and I believe it was only due to a lack of communication between County and Parish that has prevented this being agreed already. The primary reason for the redrawing of the LoD is that over 2014-16 a proposal for housing was rejected by Pewsey Parish Council on 3 occasions, rejected by Wiltshire County Council on 3 occasions; and finally rejected by the independent assessor from Bristol. I believe it will save a good deal of time and effort if the LoD was put back to pre 1985.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.136			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This paragraph provides grossly insufficient information regarding how the road network can/will be modified to manage what is recognised will be very sufficient increases in road traffic. In the absence of a detailed road traffic plan and costings the overall plan is flawed. A fully detailed road traffic plan is required to prove that the local road network can be adapted to cope - it is not sufficient to articulate this significant barrier without a detailed, costed plan within the draft plan.

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan for the development in Harnham is dependent on a major review of the road network to accommodate the increased traffic, but this major review has not yet been done. A holistic approach to this housing development is critical and must be undertaken. Detailed proposals for the improved road network must be prepared and considered alongside the proposed housing development, so that informed decisions can be made. At the moment it is difficult, if not impossible, to see how and where improvements could be made to the road network to accommodate the significant increase in traffic that would inevitably arise from a housing development of this size (likely a minimum of two cars per house, plus delivery lorries/vans etc). The Harnham Road is already gridlocked at certain times of the day, and recent chaos caused by the bridge repairs only serves to reinforce the huge transport difficulties that already exist on this side of the City. Those wishing to enter the City from this side will struggle more than they currently do, which cannot be good for the City, with e.g. local businesses and the City's tourism offer being adversely affected, with people and goods stuck in huge traffic jams. There is also often a backlog of traffic from the Exeter Street roundabout wanting to enter Southampton Road, and this will be exacerbated by the additional traffic coming from Harnham.</p> <p>Just because housing on Churchfields is proving more difficult than hoped to bring to fruition does not mean that the seemingly softer option of Netherhampton and Harnham should be brought forward instead. The huge adverse consequences of these proposals have not been thoroughly considered.</p> <p>Despite reassurances, the increased traffic, especially if stuck in jams for long periods of time in a largely residential area, must result in an increase in pollution, with a significant detrimental effect on the health of the residents.</p> <p>I also have concerns over the ability of the area to cope with the increased drainage that will be needed to support the significant development and also the impact of additional surface water on the Netherhampton Road.</p> <p>I suggest building a small new market town in the north of the county. This would avoid all the issues and problems highlighted above, that will affect not only the immediate areas of Netherhampton and Harnham, but also the centre of the City as well, with the likely loss of visitors and business, deterred by the difficulties of getting into the City itself. The new market town would resolve the difficulties of trying to find places to build in the already congested Salisbury City area, and would also easily satisfy Wiltshire Council's requirement to build new homes.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	We would like to confirm that, in regards to this site (SHLAA site 1089) we find the Wiltshire Housing Site Allocations Plan to be legally compliant and sound. We have considered the references to this site in the DPD and agree that the site should be brought forward. The site owner has already commissioned both a tree survey and a landscape and visual report to address the issues raised in the DPD and these have shown that there are no landscape reasons to preclude development on this site. Finally we can advise that the owner of the site is willing and able to deliver the site immediately.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I feel I must object in the strongest terms about the following.</p> <p>Building permission has been granted for 5892 new homes in Trowbridge and yet not one has been built. Yet planners are now looking at green field sites to locate yet more houses. Tell the developers to get on with the sites they have been given permission for. Or is it because the bats are holding up building work. Planners and developers knew of the bats, if it's such a difficult thing to put all the procedures in place to protect the bats why was permission given in the first place. This is no excuse to look at other sites before you have dealt with the ones you have.</p> <p>I as well as others have noted that a number of traffic counts have been placed around Trowbridge, notably Frome Road at least two, New Town, Country Way at least two, Wingfield Road, but not Bradley Road. You have placed two either side of the roundabout for the White Horse Business park on the A363. I fail to see how this is going to tell you how much traffic uses Bradley Road.</p> <p>This was noted on the 8th July. I live on Bradley Road and know only too well how busy it gets during school terms. Yet the traffic counts have been placed during the summer and school holidays. I suggest if you really want to get an idea of traffic in Trowbridge you place these counts during the autumn in school term time. If housing goes ahead at North Bradley site 298, Drynham Lane site 613 and 248, and Southwick Court site 3565 and don't forget the old council office site on Bradley Road all this extra traffic will use Bradley Road.</p> <p>I do feel that the planners are letting Trowbridge down, I know we need new houses and the fact that Trowbridge has been told to find sites for a further 700 does not put the country council in a good light. The population of Trowbridge is approx 40000 and with all this new housing it will increase by approx 25 per cent. So allowances must be made for schools and medical facilities along with extra emergency services.</p> <p>I feel at the moment that Trowbridge a lovely small town is being badly let down by its council.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I noted that you intend to change the boundary to accommodate the new housing estate, on what you are calling Southwick Court. If you do so this estate won't be in Southwick so can't really be called Southwick Court. Then you will have Southwick Country Park facing a Trowbridge housing estate, it all seems muddled and confusing. I don't think you have thought the change of boundary through properly.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I do, however, have two suggestions which might help to mitigate the problem:</p> <p>1. There is an existing brownfield site in Trowbridge, at the old Bowyers factory. I understand there are proposals to develop this site for leisure purposes- a cinema, and shops and restaurants. I think this could be more sensibly developed in much the same way as the former Ushers site. The listed warehouse buildings could be converted into flats, and the rest used for housing. This has the advantage that the train station is within easy reach.</p> <p>An alternative use for this site could be for the owners to offer it or lease it to the University of Bath, to build a hall of residence and student flats. Both of these developments could help to persuade GWR to provide a better train service between Westbury and Bristol, which would benefit everyone.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Policy appears to be ignoring the requirement in the core strategy to maintain an effective buffer between Trowbridge and North Bradley. There are also sites available that are not even mentioned in the document. Why has the old Bowyers site not been considered as a brownfield site for future housing, the document seems to only have identified greenfield sites. There is no mention in the document of the old Virgin building, where 100+ dwellings are planned. Also there is no mention of the ex West Wilts Council site, again where there is a planning application in for 100+ houses. North Bradley appears to be penalised for the fact that the Ashton Park development is behind schedule.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Until the traffic problems are resolved in the West and East Harnham areas of Salisbury, the proposal to build 840 houses (Netherhampton Road and Rowbarrow sites) is nonsensical and will make the lives of all existing and potential new residents a nightmare. The Newbridge Road, which is the only logical route in and out of Salisbury City or east of the city for local residents in Harnham, is already at capacity. This road also serves thousands of day-trippers and holiday-makers heading for the South Coast and all residents from the south and many who live west of the city too, who travel daily to work in the city. The proposals for a Harnham Relief Road / Brunel Link Road were unsupported and unfunded; there is no public transport available and the proposed new locations for housing in West Harnham (740 - Netherhampton Road) are too far to walk into the city and there is no cycle route either. If the proposals are approved, traffic movements will increase exponentially. The road network in and around Harnham, Salisbury must be significantly improved before any new housing can even be considered.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Refer to attachment SHLAA Proposal H2.6 – Site 3565 Land East of the A361 at Southwick Court</p> <p>I have read Wiltshire Housing Site Allocations Plan: Sustainability Appraisal Report together with Sustainability Appraisal – Summary of Assessment – (Trowbridge Community Area Topic Paper- Cabinet Version) as they relate to this site. Please find attached my consideration of these papers (support document) which shows my observations regarding development of this site. I am very concerned that the detrimental impact upon residential and leisure amenities together with potential visual impact of future development has been understated particularly regarding the eastern side of the proposed site. The proposed site is presented as having the ability to deliver 280 dwellings. Sustainability Appraisal Report tends to concentrate on area west of Lambrok stream but this is immediately discounted as Note H on attached support document. Capacity is thus immediately reduced to 180 dwellings. Wiltshire And Swindon Historic Environment Record MWI70093 shows Post-Medieval Water Meadows exist east of Lambrok stream. Note D of support document shows that east side of site is subject to water retention. If no appropriate mitigation measures have been put in place for the eastern area then capacity must be further reduced and viability of site questioned. Development is being loaded towards eastern part of the site and northern boundary will adjoin current settlement along Boundary Walk and further west. I refer to image of bungalows situated near top right corner of site shown on Note D of support document. The image was taken at a distance of around 160m at SE boundary of the field and centred on 17 Boundary Walk which is dwelling behind kissing gate. Windows seen are living room and kitchen and front elevation is within 7m of boundary made up by 4m front garden and 3m public footpath/verge. It may be assumed that a developer would want to maximise the available site which must lead to increased density and probability of three storey houses. The detrimental visual impact of such a development would be enormous and completely change the character of the area. Loss of privacy and overlooking of existing single storey dwellings is inevitable.</p> <p>The word mitigation appears frequently throughout both Sustainability Appraisal Reports and in essence reveals that the proposal is flawed. Suggested access would require an existing dwelling approach road to become, in effect, a through road with its inherent dangers. There are also too many natural and man-made obstacles that require mitigation or holistic planning to make this an obvious planning choice. There must be other suitable sites within the County that would not exhibit such encumbrances and would therefore be more acceptable to help meet the Council's housing quota</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I refer to my attendance at the Exhibition regarding the above which was held in the Guildhall, Salisbury on 19th July 2017. At this Exhibition I spent a long time speaking with David Waye and Tracy Smith together with looking at the displays on offer. I was disappointed that there were no other representatives of Wiltshire Council on hand to discuss matters arising from these allocations. I am in receipt of several of the documents handed out at this Exhibition and would comment that these are actually in a confusing form to the layman who may wish to comment as they do not actually address the issues in plain and simple terms. For instance they refer constantly to “yes”/“no” answers asking if things are Legally compliant. This may well lead a layman to not understand that they can comment regardless of whether the answer is “yes or “no”.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">138</a>	<b>Consultee</b> Mrs Pauline Cridland  <b>Person ID:</b> 466628	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I object to the allocation of land at Parcels s1027 and s1028 for the following reasons:</p> <ol style="list-style-type: none"> <li>1. The traffic currently using the A3094 (Harnham Road/Netherhampton Road) is constantly at gridlock at certain times of the day with its present load. The past few weeks with the bridge works would demonstrate this with long delays (sometimes in excess of 25-30 minutes) being a regular occurrence.</li> <li>2. The Harnham Gyratory experiences severe hold ups at all times of the year, particularly during working hours and with school traffic.</li> <li>3. The general area on to the A3094 is at bursting capacity for traffic and access to West Harnham, and in particular the Essex Square housing estate and the housing in Upper, Middle and Lower Street together with the housing estate there can only be achieved by using Netherhampton Road. The A3094 can only be accessed at either end from the Harnham gyratory or via Wilton or the narrow roads of Quidhampton. Any accident occurring on the roads at either end is attended by emergency vehicles travelling along this road. There are frequent occasions when traffic is diverted along Netherhampton Road following accidents or blockages. Any further traffic will make this road even more heavily overloaded and could slow access for emergency vehicles in an already well populated area.</li> <li>6. The current bus route does not even cover the Wellworthy Estate and most residents there do not use the bus services but instead drive. To state that there are sufficient bus services nearby is very much stretching the truth.</li> <li>11. I asked at the exhibition about traffic during the building of any homes, i.e. additional traffic for lorries, cement mixers, workers vans etc. There was no detail about how many extra traffic movements were anticipated during the building period, or indeed how long the building period was envisaged to be going to take. As stated above Harnham already suffers severe traffic problems so any added heavy, dirty traffic travelling along this road will impact severely during the building period for those residents who live on Harnham/Netherhampton Road and also for those trying to gain access to this road from the Essex Square estate using Norfolk Road, Folkestone Road (already severely impacted by the school traffic), Hollows Close (school traffic again), Upper Street and Lower Street and the various smaller roads coming on to the road. If this heavy traffic travels from the gyratory to the sites allocated they will pass along a single track road close to people's homes with all the incumbent problems of pollution, dirty air, filthy roads and noise. Unless there is to be provision for this traffic to somehow enter the building sites without causing deterioration to those residents along these roads I object strongly. The provision of new homes should not be at the expense of those already living in an area and paying into the local economy via tax and spending. Whilst provision of new homes to ease the housing crisis is welcomed by me it should not be into an area with no proper infrastructure or facilities. Harnham put simply cannot cope with what it has now, let alone another couple of thousand traffic movements a week.</li> <li>12. There are currently large numbers of HGV's using the A3094 as a shortcut. Many of these lorries are articulated 44 tons and start moving along Harnham/Netherhampton Roads at 3.30 a.m. Shortly after I moved to my home in 2005 following a major crash outside my home, my local Councillor Mr Brian Dalton, undertook research into traffic along the Netherhampton Road. One of the things ascertained was that most of these vehicles which start travelling in the early hours have no business in Wiltshire but are merely passing through to head to the Bristol area and beyond and use the route through Harnham to avoid the ringroad and A36. The second thing discovered was that in excess of 50% of the traffic</li> </ol>			

Appendix Q - Schedule of representations

at all times of day was breaking the speed limit of 30 mph by a third or more. However according to Wiltshire Council when they were approached as there had been no deaths on the road this is perfectly acceptable. When I undertook a survey of my home it was noted by my mortgage lender that my bungalow along with other properties along this road was at risk of damage from the large lorries passing. As my home shakes violently when these lorries thunder past I can well understand the reasons for noting this Any invitation for additional lorries carrying building materials etc. will exacerbate an already bad situation. Put simply the A3094 (which older local residents inform me was actually the B3094 until bridge works at the Skew Bridge occurred) is lined by properties whose residents suffer severe congestion, noise and pollution and any additional traffic, both heavy and residential may well take a toll on their health. I object to these proposals on the grounds that the Council/Police have failed to find a solution to the current speeding problem and any further increase in vehicle movements will put residents at risk of health problems, pollution and property damage.

13. When leaving my home at 5.30 a.m. to drive to work my husband is often unable to pull off our drive for the weight of traffic (particularly HGV's) passing our door. If we are unable to have access in and out of our home at that time of day currently we will have hardly any at all if these houses are built.

14. In the time my family have lived in Salisbury the A3094 has been dug up consistently for long period repairs caused by the weight of traffic on an unsuitable road. Gas mains were constantly rupturing and drains sink. When the entire road was closed on two occasions for weeks on end part of the reason was to attempt to stop the mains being damaged by the traffic. Only this Summer repairs have been undertaken in three places to raise and repair sunken drains. I have been prevented on 4 occasions from having access to my property during the day while long period rebuilding works of the road have been undertaken. When I raised the question of road repairs due to damage by traffic with Mr Waye he informed me that the Traffic Department has not passed any information of this nature to him and his team when they examined the area for suitable sites. I draw your attention to this issue now to enable you to obtain the details of this damage to the road and its inability to cope with the weight of the traffic sent this way. Might I suggest once more you discuss this issue with Mr Brian Dalton who has been the local Councillor for Harnham for as long as I have lived here and is fully conversant with the road repairs, gas main collapses etc. as he is a resident of the area as well and has experienced these situations in person. I do not believe that the actual road structure in its present state can cope with either (a) the heavy traffic required during the building period, or (b) any increase in normal daily traffic movements. The situation is not helped by the location of the lorry park and cattle market in Netherhampton Road, although my suggestion to Mr Waye and Ms Smith that traffic for the proposed sites could be barred from using the Harnham Gyratory end (where there is heavy density of housing) and directed to only use the access via Wilton House end was met with derision as apparently Wiltshire Council considers it impossible to bar traffic from certain areas at certain times. I did find this somewhat puzzling as I am aware of even areas of Central London where time bars operate to allow residents to sleep peacefully.

To round up, I object to these schemes on the grounds of current traffic levels, traffic chaos from building, pollution, effects on the existing community of Harnham's health, lack of medical facilities in the local area, the type of housing and affordability being proposed, lack of availability of transport facilities other than road, lack of mid-range jobs (salaried at £30,000 and above) within the immediate Salisbury area for the residents of these homes to work at without distance commuting by car, the provision of a large housing estate with no local shopping or religious facilities and overall national trends towards rental rather than house buying.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>My address is High Street West Lavington, and have lived here for the past 25 years or so. In all that time, to my knowledge, the settlement boundary has always been to the North East end of my property and followed on South East then South West around the next door, which I also note has now been placed in the proposed exclusion zone. Both my property, High Street and the next door are quite clearly domestic buildings / gardens and I would therefor ask that you reconsider the proposals put forward and revert back to the original settlement boundary for both of the afore mentioned properties.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>WILTSHIRE COUNCIL'S PROPOSED NEW 740 HOUSES ON NETHERHAMPTON ROAD SALISBURY</p> <p>I have seen the Draft Plan on the proposal to build new houses on the Netherhampton Road, Salisbury and submit my comments below:                  The impact on people living in the Netherhampton Road area will be devastating.                  The volume of traffic in Netherhampton Road has already reached maximum capacity with commuter cars to and from the City centre, delivery vans, school runs, HGV vehicles using the route from Southampton Docks to the West Country, all needing to use the Harnham gyratory which often brings traffic to a standstill. The noise, the fumes and the inability to actually get on to the road from side roads is a very genuine concern. With another 740 houses using another 1000+ vehicles, a new school and the possible redevelopment of Churchfields this Plan cannot go ahead without a complete review of the infrastructure.                  Netherhampton Road cannot take more vehicles and for this reason I do not support the proposals.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Potential development on Netherhampton Road</p> <p>I am deeply concerned about any further large scale development along the Netherhampton Road in Harnham, Salisbury. A much smaller scheme of 470 houses was rejected some 3 years ago citing traffic issues. A planning application off Newbridge Road was also rejected because Newbridge Road was already deemed to be at capacity and there is no access to Netherhampton Road except by driving up Newbridge Road or approaching from Wilton. The Harnham gyratory is an accident waiting to happen as people constantly “jump” the lights, even bus drivers are known to charge the junction in order to catch the lights and just keep going if they change. Drivers, often lorries, block the junction from Downton Road because they do not want to stop but are still caught on the roundabout. This is very worrying as the Ambulance Station and Hospital are only accessed through this junction. If a school and trading park were added to the mix then the traffic movements would be greatly magnified and would probably be far worse than the congestion along the Southampton Road.</p> <p>Studies have shown that a very large proportion of the people who live in Salisbury do not work here it therefore stands to reason that more housing would increase traffic from all directions without contribution to the local economy. Why should Harnham suffer the loss of open space for the benefit of other towns?</p> <p>Such a huge scale development would harm the ambience of a quietly pleasant residential area not only with traffic, noise and pollution but road safety for elderly residents and the schoolchildren. There is only one convenience store and a fish and chip shop in the whole area and an hourly bus service.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Re: Boundary Walk Proposals                      This letter is to lodge a formal complaint about the proposed new builds along Boundary Walk. We have lived here for over 40 years, enjoying the peace and countryside. One of the main reasons for purchasing our Bungalow was because of it's idyllic location, quiet and peaceful. My husband has suffered with Dementia for many years and it's the calmness of looking out onto the green fields that help his condition as he can get easily agitated. I fear that seeing lorries, men with drills, new homes appearing and more people, will really upset his condition and will make my family's life very hard. Surely there must be other sites for you to build on?</p> <p>There will be no countryside left soon as it seems you make no consideration for anyone else as I suppose it really doesn't effect you personally. I hope the council reconsiders it's plans to build here, and I hope you read this letter to other council members as I'm sure I'm not the only resident to write to you.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	5.136 The “comprehensive improvements to the local and strategic road network” will cause considerable disruption to Harnham and will not be able to cope with the extra traffic created by this development. The A3094 is already unable to cope with existing traffic. Salisbury is a small city, already spoilt by overdevelopment and excessive traffic. Probably a 1000 more cars will result from 650 houses and this is unsustainable on Salisbury roads.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I went to a special meeting to hear of proposed planning in Durrington .</p> <p>As you are aware. The MOD have extensive plans at the School of artillery Larkhill</p> <p>Part of our Parish together with internal services. The housing content is 445 units with even Bulford camp increasing its size to the East. In consideration of that, it is generally thought that there should be special consideration of any intentions to increase housing in the Village/Town area. Until it can be seen just how the expansion will effect the area.</p> <p>You are also possibly aware that the increased number of all kinds of vehicles travelling both East and West has increased considerably through a 'Rat Run' of all size vehicles from coaches, lorries and cars from the A303 turn off at 'Solstice Park' using a classified 'B' road up Telegraph hill through Bulford Village, Durrington, Larkhill and Shrewton. All</p> <p>To avoid the inefficient Countess Roundabout junction. At present this also includes many kinds of Road works opening and closing with little notice to all locals.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The idea that a large field to the south of Larkhill road should be built on will cause or bring many problems to Durrington as there would have to be a Junction made there! English Heritage would no doubt object because it is adjacent to the Historic Durrington Walls site, braking that faith of protection if this were to come about, it would destroy much wild life and the atmosphere and views of the Avon. It would also end up being increased in size over the years once a president had been set. The peace also of 'Watergate lane Bulford, where no improvement to its state can ever be undertaken.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I asked about the large number of brown-fill sites within Trowbridge, somewhere in the region of 750 I understand. Why are these not included in the site allocation? Again when I queried this I was told they were already included. Is this correct? There was no indication of this. I understand that the Bowyers site is again on the cards for development, but likely to be another cinema complex. I feel that the Council should be insisting on brown field sites being developed before the use of greenfield sites. Information on these should be available at consultations as well.</p> <p>There is also the old garage site by Bowyers that should also be included. This whole site is an eyesore and is a disgrace to any town never mind Trowbridge which is the county town.</p> <p>Developers should be given incentives by the Council to include the older buildings into their plans. It is accepted that development costs may be higher being a legacy industrial site.</p> <p>The SHLAA talks about Trowbridge being a "Principal Settlement" and ripe for development. It is stated that "The role of the town as a significant employment and strategic services centre" is actually to be achieved. As already mentioned we have numerous vacant buildings and sites on trading estates.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Chapter 4. Housing Delivery Strategy. Settlement strategy / location of development			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Please accept this attachment as an objection to housing sites 263, 297, 298, 613, 1021, 3260 and 3565. Thank you Trowbridge Community Area 1.1 The area around Trowbridge seems a very overdeveloped area and I have tried to put some figures on it. In the Trowbridge Community Area, ie in Trowbridge and the villages around it, the population density is about 1000 per square kilometre. The other Community Areas in Wiltshire are nowhere near as developed. For example Chippenham, the next densest, is only about a third of Trowbridge's. 1.2 The difference will be compounded by the growth proposals already approved in the Wiltshire Core Strategy. By 2026 the Trowbridge Community Area is expected to grow by a third, whilst Chippenham is expected to grow by a quarter. 1.3 Examining a plan of Trowbridge Community Area it can be seen that the developed areas (shown in blue) nearly fill the area (bounded by red). Surely it is time to put a hold on population expansion and come to a sensible agreement on what the Trowbridge Community Area should finally look like? The population needs green spaces for its physical and mental health as well as wildlife. People need to have homes in an area where they would enjoy living, rather than just existing. 2 Villages 2.1 Village life has changed dramatically over the past few decades. Village shops, post offices and pubs have gone, traffic has increased and village schools are only supported by children from far outside, often from local towns. Effectively the villages are becoming just residential satellites of the towns – if they are not so already. 2.2 My village, North Bradley is a good example. We have lost our shops and post office and the last pub is struggling to survive. We have had difficulty in maintaining a youth club and football and cricket clubs, possibly due to a considerable shift in the age profile of the village. The two village halls seem to exist because of usage by organisations outside the village. I believe that church congregations are also very low. 2.3 A village needs new life continually refreshing its age spectrum. The difficulty of affording homes must be a serious detriment. I believe that new housing in villages might be the key to helping villages keep their identity., rather than lose it. 2.4 I recently visited Martock, a village in Somerset. This is a large village which has retained its pub and some shops with a post office facility. From admittedly a limited visit, it seemed to have a strong village identity and community spirit. 2.5 I suggest that there must be an optimum size for a village population to support all the activities that make a collection of houses into a "village". This will vary according to the distance it might be from a town facilities and possibly the difficulty in getting into the town due to congestion and poor bus services. There may well be research into this subject and I would ask the Planning Department to pursue this.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	2.6 In many cases new housing could help achieve by-passes for villages stressed by traffic. My idea of using development to achieve village by-passes has come as I have been involved in developing the Neighbourhood Plan for North Bradley. It seemed to me that a by-pass could be built as a development access road to the south of North Bradley to connect Southwick Road and Phillips Way. A similar road could be built to the south of Southwick. Both villages lie effectively on A361 and have been plagued by development proposals that offer no infrastructure benefits and could exacerbate some problems. It is time that some new approach was employed. Downton has accommodated a great amount of housing but the opportunity of building in a A338 by-pass was lost, a great shame.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	COMMENTS ON BEHALF OF MR TONY OSWIN OF 39 STAVERTON I wish to support the allocation of land for development adjacent to 39 Staverton BA14 6PA on behalf of Mr T Oswin who resides at number 39 Staverton. I am not his agent but a person who represents him in respect of planning matters. The proposed red line settlement boundary as drawn on figure A.48 shows a rounding off of land between the Staverton Club and number 39 Staverton. This would enable the sustainable development of a single dwelling which would then fall within the defined limits of Staverton in compliance with CP1 ( defined limits) It would comply with CP2 Delivery Strategy creating a sustainable development which is within easy reach of the employment site to the East. The site would be adjacent to the B3105 and is within walking distance of Staverton C of E School, Canal Road Employment site and to public transport links.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SHLAA ref. s1028 land by Netherhampton Road, Farnham, Salisbury This a a very large amount of land allocated for housing and the proposed 640 houses would add to the traffic congestion on the Harnham Rd. It would significantly impact on the highway network and would create a 'bottleneck' of traffic at peak periods coming to already existing development of Harnham, where the road cannot be altered. The fact that the developer is not be burdened with costs to ameliorate the effect of increased traffic most probably will result in no meaningful infrastructure improvements and a large number of extra vehicles using an already busy and congested road adding to the pollution and traffic nuisance of Salisbury. The scale of the number of the development is too large for the site.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Site 1021 Church lane			Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The A361 is a blackspot for accidents both “in the dip” where cars currently turn into the country park as well as in the 30mph limit zone further up the hill.</p> <p>Further access points, even with tightened speed restrictions would only make matters worse.</p> <p>The Country Park is also used for running and parking along the A361 between Southwick and Trowbridge is a common cause of delays. Also, the original access to these sites seems to be under review. Whereas the original strategy documents suggest that the Southwick Court site would be accessed from Silver Street Lane (thus sharing incoming traffic between Frome Road and Bradford Road, it now appears that access will be entirely off Frome Road. In addition, if the Church lane site is to be used for affordable housing, then it would seem appropriate for access to be from the end of Studley Green for the extra 40 houses.</p> <p>The Trowbridge Traffic Model which was carried out by PFA Consulting looked in detail at projected traffic for differing sites. It concludes that: Furthermore, the council states that sites at Church lane, Upper Studley and Southwick Court are being considered as they would reduce traffic as residents would walk into Trowbridge rather than using their own vehicles (as opposed to development in nearby villages where cars would need to be used. No evidence has been provided that this would be the case.</p> <p>The walk into town is neither pleasant or particularly safe and increased traffic would make walking into town less attractive. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour.</p> <p>In conclusion, there is not sufficient capacity in place for the, already busy Frome Road to take more traffic, causing additional pollution, noise and disruption to the environment and local listed buildings.</p> <p>The Councils view that they can justify development here as opposed to local villages on the basis that it provides sustainable development is clearly in question.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This plan does not pay heed to the people of trowbridge, embodied in their Town Council, who oppose the plan. The planners consistently have kept growth in Chippenham to a very low level by taking advantage of their position on the planning committee. During the consultation not one member present was from Trowbridge!</p> <p>The number of houses has not been allocated fairly. From the attached charts it can be readily seen that Chippenham has grown little since the beginning of this century. This can only be laid at the door of WWC planners, allocating just 80 homes to Chippenham and 800 to Trowbridge. Chippenham is just a few miles from the M4 and Trowbridge has poor communication. It takes nearly 1 hour to travel from Trowbridge to the M4 at rush hours and just 10 minutes from Chippenham. It is no surprise to learn that a number of our planners live in Chippenham (did they invent NIMBY?).</p> <p>The plan, as proposed today, takes no account of traffic, schools and other amenities. Policing is practically non-existent and traffic speeds in my road are well in excess of 40mph (I was a member of speed watch scheme). Traffic into Trowbridge from the A361 and A365 is already extremely high at rush hour causing jams on the main roads and very high speed on the one communicating road (mine) which has become a rat-run. This can only get worse.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The current road set up cannot cope with an extra 1000+ vehicles.                  Netherhampton Road &amp; Harnham Road are consistently grid locked at rush hours and or school pick up times. These properties will only add to this congestion. Also during the building process there will be an increase in lorries etc which this residential area can barely cope with currently. We have only just had a death on this road involving a lorry.                  At busy times it is impossible to pull out onto these roads from either side roads or residents drives.                  Harnham Gyratory does not flow and clogs up other roads crossing Salisbury as it cannot cope with the volume of cars already using it. Extra vehicles will only cause more delays.                  There are not enough public facilities (local shops/community facilities) within Harnham and this proposal does not address this.                  Why when so much public money is put on an extensive park and ride system are the new properties being built within the boundary of these car parks. It would be better if the proposed properties were built outside of the current town boundary increasing use of this public transport option.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Despite the assertion in paragraph 5.136 on infrastructure improvement, I believe that the level of traffic which would be generated by the development proposed has not been fully realised. The number of vehicles attempting to use the Netherhampton Road between 0800 and 1000 during the working week already leads to long queues at the round about on the ????. This development would extend the standing traffic right out to the Market site without the road construction I suggest in the paragraph below. Flows along New Bridge Road would lead to major back-ups on the Downton and Blanford Roads further exacerbated by traffic from the proposed development at Rowbarton. No mention is made of additional cycle traffic on the Town Path which would be created by the development where the risk of injury by accidents with cycles is already high. The creation of a southern arc bypass round Salisbury picking up the Southampton, Bournemouth, Blanford and Netherhampton Roads and linking onwards towards the A303, would relieve the Netherhampton road of through traffic and so make the proposed development and so the Plan, sound.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The land should be used for some affordable and social housing but no more that 300 because of the increased amount of traffic on the Netherhampton and Harnham Roads. The partial closure of the river bridge this summer shows how the roads soon get extremely busy and traffic backs up along Harnham Road and Netherhampton Road. The cars, lorries and buses were stationary with their engines idling for up to 10 minutes. The amount of extra houses proposed will increase traffic considerably (most will have one car and some two) and increase air pollution along these roads where school children walk twice a day. The noise will effect the houses along these roads and there will be extra danger for pedestrians.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>no public consultation, on change of scale of change on this site previously a reserve site with a smaller number of houses. proper public consultation on issues conducted by planners who know this area . Consideration of traffic and flooding implications not researched. Feasible infrastructure changes need to be proposed and discussed before this plan could be considered .Currently the Harnham /Netherhampton Road is not capable of taking more traffic at peak times, and a development on this scale will add at least another 1000 vehicles. The main road fronting this proposed development was already identified in the 2012 transport strategy as being at capacity. I cannot envisage anything you could do with a road already developed at the "city end" with house on both sides to make this situation different. The high water table in this area is already acknowledged as making significant improvements to the sewerage system very difficult and the surface water "run off " from this site would be directly onto a flood plain (H3.3), which you are also proposing to build on!.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">179</a>	<b>Consultee</b> Joan Jones Chair  Friends of Southwick Country Park  <b>Person ID:</b> 1122693	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1 Summary</p> <p>1.1 The Friends of Southwick Country Park (FoSCP) are concerned about two aspects</p> <p>a) A general increase in the Trowbridge Community Area population leading to increased usage and wear and tear</p> <p>b) Specific effects of and to the three nearby proposed housing sites at Upper Studley, Southwick Court and Church Lane. [Note from officer: - these are detailed in separate representations, numbered 180, 181 and 182, and are not repeated here]</p> <p>1.2 The proposed developments do offer the opportunity of mitigating the adverse effects of the general development and possible improvements are put forward.</p> <p>2 Introduction</p> <p>2.1 Southwick Country Park is an essential part of the recreational facilities in and around Trowbridge. It is used daily by many people for exercise, for social intercourse or for dog walking. Even the latter is beneficial to the health of the dog walker.</p> <p>2.2 On Saturday mornings the main ring path is used by over 300 runners in a Parkrun activity. The number attracted is indicative of the quality of the Country Park environment.</p> <p>2.3 Southwick Country Park is also important to the wildlife of the area. It has become a repository for wildlife relocated from development areas. In particular, hundreds of slow worms have been given a new home there.</p> <p>2.4 An application is under way to redesignate the Country park as a Local Nature Reserve. The indications are that this application will be successful.</p> <p>2.5 It should be noted that the Country Park is an effective "green" buffer between Trowbridge Town and Southwick village</p> <p>3 Park Usage</p> <p>3.1 A survey of some aspects of usage has been carried out by Wiltshire Council on a Saturday in July 2013 . Overall usage was not counted but the results of a sample questionnaire show why people visit the park. Dog walking was the most common activity with just over half. The next common reason was running at just under a third of the total. The Parkrun is held every Saturday morning and now attracts over 300. Other reasons were just walking and visiting the Hope Nature Centre. Lesser reasons were observing wildlife, picnicking and playing games.</p> <p>3.2 If usage by runners is 30% and we have 300 runners every Saturday then other usage is running at around 700 people per day.</p> <p>4 Current Problems</p> <p>4.1 The park is so popular, it is under considerable stress. The main surfaced ring path is deteriorating under increased usage and FoSCoP is to seek funds to upgrade it.</p> <p>4.2 Parking is a problem. The main car park off Frome Road (A362) is surfaced with unbound material and it needs regular attention to deal with potholes.</p> <p>4.3 Parking for the Hope Centre frequently exceeds the capacity of the tarmacked surface and the grass in the field in front suffers from serious rutting in wet weather. A solution to this problem has not yet been identified. However, the problem cannot be ignored.</p>				

Appendix Q - Schedule of representations

	<p>4.4 On Saturday mornings, for around 2 hours, the parking situation is exacerbated by the cars of those attending Parkrun. Parking lines the A362 Frome Road in the area of the Country Park. It has been brought to the attention of the police. Yellow lines may be required in due course.</p> <p>5 Wildlife Considerations</p> <p>5.1 An application is being progressed to achieve "Local Nature Reserve" status for the park. Currently the size of the park is around 140 acres. Although there is a considerable presence of dogs, it is considered that the park will continue to provide good habitat for a wide range of wildlife.</p> <p>5.2 A fear is that increasing human and dog usage will make it less attractive to some species. A considerable amount of help by the planning authority and others will be needed to keep this marvellous resource in good condition.</p> <p>6 Trowbridge Development</p> <p>6.1 It is estimated that Trowbridge population will increase by around 30% from present levels. Clearly, this is going to greatly exacerbate existing problems, particularly as three of the proposed housing sites are next to the Country Park. These proposed housing areas are sites 1021 Church Lane, 3260 Upper Studley and 3565 Southwick Court.</p> <p>There should be no argument that Southwick Country Park will have increasing usage because of the increase in population of Trowbridge Community Area. All the developments should be expected to contribute towards measures to alleviate this increased usage and keep the Country Park as an attraction for the benefit of the residents of Trowbridge and the surrounding areas.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.5			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>3 Park Usage</p> <p>3.1 A survey of some aspects of usage has been carried out by Wiltshire Council on a Saturday in July 2013 . Overall usage was not counted but the results of a sample questionnaire show why people visit the park. Dog walking was the most common activity with just over half. The next common reason was running at just under a third of the total. The Parkrun is held every Saturday morning and now attracts over 300. Other reasons were just walking and visiting the Hope Nature Centre. Lesser reasons were observing wildlife, picnicking and playing games.</p> <p>3.2 If usage by runners is 30% and we have 300 runners every Saturday then other usage is running at around 700 people per day.</p> <p>4 Current Problems</p> <p>4.1 The park is so popular, it is under considerable stress. The main surfaced ring path is deteriorating under increased usage and FoSCoP is to seek funds to upgrade it.</p> <p>4.2 Parking is a problem. The main car park off Frome Road (A362) is surfaced with unbound material and it needs regular attention to deal with potholes.</p> <p>4.3 Parking for the Hope Centre frequently exceeds the capacity of the tarmacked surface and the grass in the field in front suffers from serious rutting in wet weather. A solution to this problem has not yet been identified. However, the problem cannot be ignored.</p> <p>4.4 On Saturday mornings, for around 2 hours, the parking situation is exacerbated by the cars of those attending Parkrun. Parking lines the A362 Frome Road in the area of the Country Park. It has been brought to the attention of the police. Yellow lines may be required in due course.</p> <p>6 Trowbridge Development</p> <p>6.1 It is estimated that Trowbridge population will increase by around 30% from present levels. Clearly, this is going to greatly exacerbate existing problems, particularly as three of the proposed housing sites are next to the Country Park. These proposed housing areas are sites 1021 Church Lane, 3260 Upper Studley and 3565 Southwick Court.</p> <p>Development 3260 Upper Studley and 3565 Southwick Court</p> <p>6.2.1 Both of these are on the East side of A361, Frome Road, opposite the Country Park.</p> <p>6.2.2 There have been calls for waiting restrictions on A361 and if the developments go ahead it is highly likely that restrictions will be included. In which case runners attending Parkrun will most likely park inside the new developments. In such a location they should be less obstructive and dangerous than on the main road. The developments should be designed to accommodate this Saturday morning parking without inconveniencing the residents and attracting calls for more yellow lines.</p> <p>6.2.3 At least one of the development accesses should be a roundabout to control traffic speeds on the A361. In addition a pedestrian and cycle crossing facility should be included on A361.</p> <p>6.2.4 Everything possible should be done to reduce car travel to the Country Park and a landscaped walk and cycle route should be included through the Southwick Court scheme to connect with North Bradley via Axe and Cleaver Lane. A link with Silver Street Lane should be included. The aim should be to make these routes feel like an extension of the Country Park.</p>			

Appendix Q - Schedule of representations

	There should be no argument that Southwick Country Park will have increasing usage because of the increase in population of Trowbridge Community Area. All the developments should be expected to contribute towards measures to alleviate this increased usage and keep the Country Park as an attraction for the benefit of the residents of Trowbridge and the surrounding areas.

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This proposal has not been objectively developed. It makes the assumption that because Salisbury is a principal settlement it can absorb the development which is proposed. This has been done without considering the geography of Salisbury which is severely constrained by being sited at the confluence of 4 rivers and surrounded by quite steep slopes. The City of Salisbury is built entirely to the north of the river Avon. The only crossing points on the river Avon are the bridges on Newbridge Road and at Wilton. Salisbury north of the river Avon is full otherwise this plan would have identified sites there for development.</p> <p>The Core Strategy makes the rather odd decision only to consider development within existing settlement boundaries. This means that the only option is to shoehorn the development for South Wiltshire into Salisbury. The Plan takes the easy way out by adjusting the boundaries to include a site to the south of the City, which is not part of Salisbury at all but is a greenfield site in open country between the villages of West Harnham and Netherhampton. The plan cannot be considered to be justified because it has not considered reasonable alternatives such as a new settlement to the north of Salisbury close to good roads and railways and close to developing industry (Porton/Middle Wallop etc) . The Plan cannot be considered effective because it probably cannot be delivered. It is linked to the plan to decant business from Churchfields. This has been ongoing for some time with no sign of any progress at all. The Harnham Business Park remains empty and little wonder. There can be few reasons why a business would want to move from a site close to the city centre to a site over 2 miles from the city separated by a poor transport link. There seems little prospect of this part of the plan coming to fruition within the timescales envisaged. The Core Strategy should be revised to allow consideration of development outside defined settlement boundaries. This would allow an alternative proposal of a new settlement to the north of Salisbury to be considered.</p> <p>The whole of this consultation process has been opaque. It has been difficult to wade through the large amount of documentation to find the relevant bits. Is it cynical of me to suggest that the public consultation in Salisbury was held in the middle of the summer holidays in a deliberate attempt to reduce attendance?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I object to the land to Trowbridge side of Elizabeth Way being allocated for Housing. this would cause adverse environmental impacts, and loss of recreational areas, as well increased traffic flow on Elizabeth Way to such an extent to render the "Elizabeth Way" by-pass ineffective. Instead I believe that housing should be allocated to the former Bowyers site in Trowbridge, an empty brown field site near to the railway station.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site S1028 - Land at Netherhampton Road, Salisbury (pages 93-111), SA objective 2, SA objective 7, SA objective 10, SA objective 11,			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Site S1028 - Land at Netherhampton Road, Salisbury (pages 93-111)</p> <p>In response to the Wiltshire Housing Site Allocations Plan I would like to raise the following objections to the development proposals: SA objective 2. Ensure efficient and effective use of land and the use of suitably located previously developed land and buildings. Given that the Government has declared that 'brown field sites' should be used in preference to 'green field sites' for future housing developments, the adjacent Harnham Business Park has remained undeveloped for some years. The proposed site is a similar size to the one developed some years ago on the Netherhampton Road between Harnham Business Park and Montague Road. This type of limited development targeted at local requirements using a 'brownfield' location would be far more acceptable. The proposal for the proposed site to be a mixture of housing and industrial accommodations fails to recognise that the adjacent brownfield Harnham Business Park has still not been developed despite being vacant for many years.</p> <p>The need for additional housing is well recognised however, the key requirement is to meet local needs by building affordable housing in the right place. A large development on the south of the Netherhampton Road on the outskirts of Harnham does not meet these requirements and is not supported by the local residents. Salisbury's future housing should be built on a combination of existing 'brownfield' sites close to trading/business parks/estates and where there is ongoing industrial and housing developments. For a large scale housing requirements, consideration should be given to enhancing current development sites, possibly under the guise of a new 'Garden City' status, where supporting infrastructure can be created without adversely impacting on local residents. The existing Salisbury North Development strategy (Old Sarum/Porton Down/Boscombe Down) already goes a considerable way to meet these requirements without having to readdress old and cancelled road bypass plans and the associated prospects of building infill to new perceived boundary's created by the roads.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I feel I must object in the strongest terms about the following....</p> <p>Building permissions have been given for a number of sites totalling 5892 new homes in Trowbridge, and not one has been built. Yet planners are now looking at green field sites to locate more houses. Why are the developers not using the sites they have already been given permission for, or is it because bats are holding up building work! Planners and developers knew of the bats, if it's so difficult to put all the procedures in place to protect the bats why was permission given in the first place. This is no excuse to look at other sites before you have dealt with the ones you have.</p> <p>I do feel that the planners are letting Trowbridge down, I know we need new homes and the fact that Wiltshire county council has told Trowbridge to find sites for a further 700 does not put them in a good light. The population of Trowbridge is approx 40000 and with all this new housing it will increase by approx 25 per cent. So allowances must be made for schools and medical facilities along with the emergency services.</p> <p>At the moment that Trowbridge a lovely small town is being badly let down by its council.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I noted that you intend to change the boundary to accommodate the new housing estate on what you are calling Southwick Court. If you do so then this site won't be in Southwick so can't really be called Southwick Court. Then you will have Southwick Country Park facing a Trowbridge housing estate, it all seems muddled and confusing. I don't think you have thought the change of boundary through properly.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I as well as others have noted a number of traffic counts have been placed around Trowbridge, along Frome Road, New Town, County Way and Wingfield Road, but not on Bradley Road. You have placed two either side of the roundabout for the White Horse Business Park on the A363. I fail to see how this is going to tell you how much traffic uses Bradley Road. This noted on the 8th July. I live on Bradley Road and know only too well how busy it can get. Yet traffic counts have been in place during the summer and school holidays. I suggest if you really want to get an idea of traffic in Trowbridge you place the counts during the autumn in school term time. If housing goes ahead at North Bradley site 298, Drynham Lane site 613 and 248 and on Southwick Court site 3565, and don't forget the old council site on Bradley Road all this extra traffic will use Bradley Road. Bradley Road is already extremely busy, getting off our drives is a nightmare, and with all the extra traffic you intend to pass through it is only going to get much worse. The houses are old along Bradley Road, with more traffic passing through who knows what damage this could do to our houses!

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Regarding the proposed development on the Netherhampton Road:                      Our main concern regarding this development is the impact on traffic flow and the subsequent environmental impact from the inevitable increased traffic congestion on the Netherhampton,, Harnham and Newbridge Roads which are already at capacity at certain times of the day. Any development in the Salisbury area will always be constrained by the cancellation of the Salisbury bypass and the lack of any further investment to improve the road infrastructure, despite the increase in the city's population in the subsequent years. Even without any further new build many roads and junctions are beyond capacity at different times of the day eg the ring road St Marks to College Roundabout, ring road Exeter Street roundabout to College roundabout, and the A36T Southampton Road is often more blocked than free flowing and not just during 'rush hours'.</p> <p>Netherhampton and Harnham Roads feed onto the Harnham gyratory, another bottleneck, which feeds onto Newbridge Road, which feeds on to the ring road. Newbridge Road, is by your own admission from a planning application of 45 houses ( Planning Application 3435) on the flood plain at Britford "unable to take additional traffic". How then can the additional traffic from the proposed application for 640 houses (S1028) and 100 houses (S1027) in the Netherhampton Road be acceptable and be assumed to have no impact? Also, if the Salisbury Transport Strategy 2012 reported that the Harnham gyratory was already working close to or at capacity how can it now be acceptable to approve the increased traffic flow from 740 houses even if they only have one extra car each? In the same report it was also noted that the Park Wall junction, at the other end of Netherhampton Road was also operating at or close to capacity in 2012.</p> <p>The consultation says that Transport network improvements will be necessary to accommodate the scale of the development. Without MAJOR road infrastructure development before the housing proposals are considered the Netherhampton Road and Harnham Road (A3094) will become a polluting nightmare for its residents, especially as more lorries are using the A3094 as a through route instead of the A36 Wilton Road. Councils are being urged by Government to improve the flow of traffic to avoid air pollution so tinkering at the edges promoting cycle tracks and footpaths is not a solution. The road traffic needs to be reduced or removed, not increased causing yet more traffic jams and air pollution.</p> <p>The Netherhampton and Harnham Roads through Harnham cannot be widened for a major part of their length so the only possible alleviation measures would have to increase the throughput of traffic, remove the bottlenecks at both ends of the road and the bottle neck that is the College roundabout.</p> <p>We know that many Harnham residents like us already use the buses, cycle or walk into the city centre and we agree that this should be encouraged but Harnham has no major facilities, no supermarket, leisure facilities, park and ride. All the supermarkets, tennis courts, leisure facilities are to the north or east of the city. The majority of the new homeowners will need to drive.</p> <p>The residents of Salisbury deserve better infrastructure or their quality of life and health will diminish even more. Baroness Scott is reported as saying "if you tell developers we want more money for infrastructure they will walk away and there will be no housing". There should be no housing in inappropriate areas if the impact is so detrimental . Housing at any price is not the answer.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.2		Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express concerns about and object to site 298 being included as part of the Wiltshire Council Housing Allocations. I do not believe the use of this site for development is a sound decision when referring to section 182 of the National Planning Policy Framework (NPPF), it is not justified or consistent with national planning policy. Specifically I do not consider the use of this site can be justified against sections 109, 110 and 111 of the NPPF.</p> <p>I would like to focus on SA objective 1. Protect and enhance all biodiversity and geological features and avoid irreversible losses.</p> <p>The details contained in this section of the Annex for site 298 begin to evidence what I and other local residents already know. This patch of land is vital for the biodiversity of the local area. This patch of green is a haven for wildlife in the sprawling town of Trowbridge which seems to be absorbing rural villages like North Bradley. Notwithstanding the protected species (slow worms, grass snakes and great crested newts, Bechstein's bats); other bat species, a vast array of insect life, hedgehogs, green woodpecker and a significant range of birds use this area for habitat and food. Building on this site, even if the hedgerows and trees are preserved, will fragment populations and destroy the majority of the food available in the ecosystem. The wildlife will move away from any area populated by people with the associated noise and lights. Despite having White Horse Business Park on one side and Woodmarsh on the other the area is, in the main, protected from artificial light and is therefore a haven for wildlife at night time. On this note, as it is already known that Bechstein's bats are using the site it would seem pertinent for a full bat survey carried out before the site is allocated for housing. It is clear that this area of land is used as a corridor by wildlife to travel from the Axe and Cleaver Lane area to the South of Trowbridge where Biss and Green Lane woods lie. Loosing this area will result in pushing the urban environment of Trowbridge all the way out to the A350 and wildlife would have go around the whole village of North Bradley and cross the A350 to move between the sites.</p> <p>What is extremely concerning is this this site is being considered when, due to constraints, it will only be able to contain 150 houses when an area of land this size can take 338 properties. The habitat will be destroyed so that the land can be used for houses at half the density other sites.</p> <p>It is accepted that some land does need to be used for residential development and that the NPPF needs to be considered in context as a whole document, not isolated sections. However, I do not consider the use of this site for development consistent with the NPPF, specifically Section 11: Conserving and enhancing the natural environment.</p> <p>The use of the site is not justified under policy 109 because a large area of land (big enough for 338 dwellings) with high ecological value, containing a significant amount of ecosystem services would be destroyed for the benefit of only 150 homes. There are other sites where housing at a more appropriate density can be installed without such a significant amount of damage to the biodiversity. The government is committed to halting the decline in biodiversity but the use of this site will destroy this valuable area which provides food and habitat for a complex ecosystem struggling to survive around the urban sprawl of Trowbridge.</p> <p>Policy 110 states that plans to meet development needs should allocate land with the least environmental or amenity value. Given the protected species identified and ecosystem services being provided this area of land should not be allocated for development. Some of the site has been</p>				

Appendix Q - Schedule of representations

	<p>used as agricultural paddocks since medieval times. It does not appear that the land has been given over to intensive arable farming in recent history; without regular ploughing and compression with large agricultural vehicles the soil structure, microorganisms, insects and other fauna will have established, complex interactions that have developed over hundreds of years. This quality of soil habitat is not found on land that has been intensively farmed and forms the basis for the rest of the flora and fauna that thrive on the land. There are alternative sites, with less environmental value where a higher density of housing can be implemented. The use of this land is not compliant with policy 110 of the NPPF. Remove site 298 from the housing allocations document.</p>

		<p>I oppose the plans for the following reasons  <b>NOT FAIR OR PROPORTIONATE</b>                  There is no “nimbyism” behind our objection. The constructive manner in which all residents of Netherhampton have engaged in the discussion with the Wilton Estate regarding the planning application for development at Netherhampton Farm demonstrates that there is acceptance of the need for new housing provided that its scale is in keeping with the existing settlement and can be sustained by the local infrastructure. Netherhampton has approximately 60 dwellings and this new development at Netherhampton Farm will increase that number by over 30%. This feels like a fair share of the overall commitment facing South Wilshire and Wiltshire generally.                  The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury.                  The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary?                  The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible.                  Consider the transport, Green Infrastructure and all other issues properly BEFORE making housing allocations</p>			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		<p>The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Further to our objection emails sent on 16 February 2016 and 16 September 2016 (copies of emails below). We wish to make our objection to the fact that so many greenfield sites are included within the Housing Site Allocations Plan.</p> <p>This objection email relates specifically to the land known as the 'Hilperton Gap' (Land west of Elizabeth Way) being included within the Housing Site Allocations Plan for housing development, covering the land in its entirety from the Elizabeth Way road through to Horse Road, Wyke Road and Victoria Road.</p> <p>We are writing to object and our comments are made below:</p> <p>Wiltshire Housing Sites Allocations Plan: A high percentage of proposed housing for the county appears to have been allocated to the Trowbridge and Southwick areas. It is also noted that for proposed housing mainly greenfield sites rather than brownfield sites are listed - this really is not acceptable. The 'Bowyers' site lies derelict. This space could well be used for a high percentage of the allocated housing requirement referred to for the Trowbridge area. Rather than the site being listed as a mixed site for residential and commercial opportunities, it would be better placed for 100% housing reducing the need to build on greenfield sites. The site has excellent rail routes for commuting (and reduces the need for people to own their own transport), it is within walking distance to the town's facilities with good access to the canal tow paths for people's health &amp; wellbeing. We cannot understand why the Bowyers site isn't the first site that Wiltshire Council looks at to fulfil its housing requirements for the Trowbridge area.</p> <p>The need to safeguard the countryside and the need to conserve trees and open land: The countryside surrounding Trowbridge, including Southwick are the last remaining green spaces to act as a buffer – without making Trowbridge one huge town encompassing many of our surrounding villages.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing in opposition to the proposal to build houses on land adjacent to Southwick Court. The use of fields to walk in is not only good exercise but offers a wide open space away from cars and fumes - a place to get away for a while from the often busy and stressful lives so many people live now. Not everyone owns a car or can afford to travel away from the built up areas which they inhabit. How enriching it is for many people to watch birds fly across the fields at low level.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I believe that: the Plan is not consistent with national policy because Wiltshire County Council has failed to give proper weight to brown field sites. Wiltshire County Council 's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes Wiltshire County Council should re-assess the requirement for new housing stock, particularly where this would impinge on greenfield sites and overload existing infrastructure. In addition, all suitable brownfield sites should be fully utilised before any new development is permitted on greenfield sites.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to protest most strongly to the council committee considering the proposal to build 840 new homes on Rowbarrow estate &amp; in Netherhampton.</p> <p>I've lived at 119 Harnham Road for about 30 years and during that time have experienced a threefold increase in the volume of traffic using Harnham Road &amp; the gyratory junction. If approved, Harnham Road, leading to Salisbury, would take a huge amount of extra traffic from the homes in Netherhampton, as Salisbury has so many more amenities than Wilton. Harnham Road already has difficulty absorbing the current volume of vehicles, let alone a possible 840 additional cars. There would be many more journeys and deliveries in the neighbourhood and there is simply not the space for this increase in activity. Already there are times when the traffic comes to a standstill and any accidents, blockages or road closures already cause great difficulty to residents, commuters and delivery/goods vehicles. (As was the case on Tuesday August 15th. when a severe accident occurred.)</p> <p>Please be sure to register this protest. Unfortunately I cannot attend the public meeting on Sep. 6th. in Harnham but hope that many people support it and that their/our feelings are acknowledged.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.40 Seend Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The former Bell Inn, at Appendix 3 grid squares G8 and F8, is a Grade II listed building. The extended western car park of this property has been included within the settlement as part of the proposed boundary change. If the proposed boundary change was to stand this would facilitate future unnecessary and unwanted housing development of the car park in proximity to a Grade II historical asset. This would be in opposition to the policies of Seend's emerging neighbourhood plan. Within that plan this land relates to, and facilitates, a designated significant view within a landscape gap from Seend to the open countryside to the south west of the Seend settlement. The Seend Parish Neighbourhood Plan Landscape Analysis Map shows the identified view in that landscape gap. Public consultation on the landscape element of the Seend neighbourhood plan has already taken place. Allowing the proposed change to stand will undermine the value of neighbourhood planning and create unnecessary boundary amendment work for both Wiltshire Council and the neighbourhood plan steering group. The extended area of the former Bell Inn car western park should be excluded from the proposed boundary change and the existing boundary line retained. Boundaries will remain subject to review and parishioner support within the ongoing process of the Seend neighbourhood plan. Local engagement from people who know the settlement supersedes the weak desktop methodology for determining the built environment of Seend. In the case of Seend, doing nothing in terms of boundary change will keep the site allocations plan compliant.</p>

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

Trowbridge Town Council wishes to participate in the oral part of the examination because as a town council we have a long term policy of supporting housing growth and sustainable development for our community, we have fully supported the Core Strategy throughout its development and adoption and we now believe that Wiltshire Council is failing to implement the Core Strategy through their proposals, which will result in unsustainable development around Trowbridge and damage to the growth of Trowbridge and the economic development of the town.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>An independent Inspector of a previous Core Strategy(?) supported local information concerning a proposal for about 400 new dwellings in Harnham for reasons including the lack of capacity on highways access. Salisbury's main roads and our five rivers have not changed, nor have the bridges that cross them since since that decision. However many more houses have been developed on higher ground since then. However the highways which were considered at capacity then, are now regularly congested and are often at a standstill. The nod to maintaining a healthy environment in this draft plan is hopelessly inadequate. The provision of medical services is also inadequate to cope. The flood plain that is Fig 5.21 H3.3 will continue to concern present residents adjacent to Waldrons Farm Building will only take place above the level of flood plains. Infrastructure and highways improvements will precede any planning consents. New towns will be considered to meet our housing crisis.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I feel I must object in the strongest terms about the following....</p> <p>I as well as others have noted a number of traffic counts have been placed around Trowbridge, along Frome Road, New Town, County Way and Wingfield Road, but not on Bradley Road. You have placed two either side of the roundabout for the White Horse Business Park on the A363. I fail to see how this is going to tell you how much traffic uses Bradley Road. This noted on the 8th July. I live on Bradley Road and know only too well how busy it can get. Yet traffic counts have been in place during the summer and school holidays. I suggest if you really want to get an idea of traffic in Trowbridge you place the counts during the autumn in school term time. If housing goes ahead at North Bradley site 298, Drynham Lane site 613 and 248 and on Southwick Court site 3565, and don't forget the old council site on Bradley Road all this extra traffic will use Bradley Road. Bradley Road is already extremely busy, getting off our drives is a nightmare, and with all the extra traffic you intend to pass through it is only going to get much worse. The houses are old along Bradley Road, with more traffic passing through who knows what damage this could do to our houses!</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">216</a>	<b>Consultee</b> Mrs Lynne Greenhalgh  <b>Person ID:</b> 1123223	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 H3.3 H3.4			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Until the traffic problems are resolved in the East and West Harnham areas of Salisbury (i.e. Remodel the Harnham Gyrotory, Downton Road, Newbridge Road , Coombe Road. And A3084 Harnham and Netherhampton Road) the proposal to build 840 houses on Netherhampton Road and Rowbarrow sites) is nonsensical and will make the lives of alof existing and potential new Harnham and Netherhampton residents a nightmare. These roads are already at capacity and in peak times in themorning , after the Harnham schools have finished and the evening less than 10 vehicles get through the traffic lights at The Harnham gyrotory from the A3094 road before the lights change leading to very long queues on the A3094 Harnham and netherhampton road during Wiltshire schools term time and on market day (Tuesdays). This road also serves thousands HGVS, vans, day-trippers and holiday-makers heading for the West Country and the South Coast. The abandoned proposals for a Harnham Relief Road / Brunel Link Road are in my opinion s tragedy and were unsupported and unfunded by the former Wiltshire County Council. Since then the traffic build up on the A3094 and 338 Downton and Newbridge roads has got progressively worse. Therevis currently no public transport to the Netherhampton Road sites and the proposed new locations for housing in West Harnham (740 - Netherham Road) are too far to walk into the city and there is no cycle route either. If the proposals are approved, traffic movements will increase exponentially. Improvement of the cycle paths and local road network in east and west Harnham first before these new houses are built, remodelling of the A3094/A338 Harnham gyrotory junction to make it safer for pedestrians, cyclists and passing vehicle drivers, and building the Harnham relief road. Building a secondary school in Harnham and including space in your plans for the combined doctors surgery ( St Ann street. Endless Street and Three Swans surgeries) to avoid them building their super surgery on the designated wildlife field off Odstock Road and Lime Kiln Way, which was gifted to the local community , and is heavily used by families, dog walkers and runners for recreational use Whilst I support holding new homes for local people, the piecemeal nature of developments ,often won on appeal that occurs in in south Wiltshire results in developers getting out of funding or building the necessary infrastructure (e.g. pavements, cycle routes and improvement of the local road network in and around Salisbury , which is ruining Salisbury as a place to live and work. More joined up consultation with the local schools, hospital and Gp surgeries, netherhampton parish and Salisbury city council would go a long way to make sure we get the right housing developments in the right locations and with the necessary infrastructure for a vibrant community where families want to come and live.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Do the inspector hears first hand from local residents, not officers and councillors working or living elsewhere in Wiltshire (Trowbridge)who have inaccurate information or have no first hand knowledge about the extreme traffic congestion that blights our community in Harnham

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The plan to build 640 houses on the Netherhampton Road and 100 houses on the north of the road are unsound as the infrastructure for such a build is not there in context of schools, shops and health requirements. The main concern is the effect on the increased amount of traffic leading onto the Netherhampton Road, Harnham Road and Harnham Gyrotory is unsustainable, already there are large tailbacks in the area and the risk of hampering access to the hospitals for emergency vehicles is greatly increased. The area designated north of the Netherhampton is frequently flooded and both of the developments have substantial environmental issues in respect of drainage. Lastly I do not believe that one session of consultation in the holiday month of July counts as a full consultation.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 and H3.3		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am not a lawyer and so cannot give details but would be surprised whether something so ill thought out could be legal. I have copied the response put together by the parish council. I was involved in the discussion, agree with it all and feel I could not better it. NOT FAIR OR PROPORTIONATE There is no “nimbyism” behind our objection. The constructive manner in which all residents of Netherhampton have engaged in the discussion with the Wilton Estate regarding the planning application for development at Netherhampton Farm demonstrates that there is acceptance of the need for new housing provided that its scale is in keeping with the existing settlement and can be sustained by the local infrastructure. Netherhampton has approximately 60 dwellings and this new development at Netherhampton Farm will increase that number by over 30%. This feels like a fair share of the overall commitment facing South Wilshire and Wiltshire generally. The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury. The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary? The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible.			
<b>Attached files (Please see Objective)</b>				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury H3.1, H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In the Atkins report – Salisbury Transport Strategy 2009, it was stated that the traffic capacity during morning and evening peak times exceeds 70% at both the Harnham Gyratory and Park Wall junction and that by 2026 Highway congestion is forecast to increase by approximately 50% and delays are forecast to more than double in the morning and evening peaks. Currently at peak times there are long tailbacks on the Netherhampton Road to the Park Wall junction and from the Netherhampton Road from the junction with the Harnham Road and beyond to the Harnham Gyratory. 740 new houses on the Netherhampton Road will only add to this gridlock – potentially this could be an additional 1,480 cars.</p> <p>There are no transport links to this area and the proposed developments are too far away from the town centre to walk into town so everyone living in the new development will be driving cars to go to work, get to shops and supermarkets and local amenities.</p> <p>There would not be enough work in Salisbury so over 700 additional people could be driving to work at peak times.</p> <p>Added to this, if a new primary school is built there will be parents driving children to school from other parts of Salisbury which will add to the congestion.</p> <p>This development would be of no benefit to the local community in Harnham – it would only cause more traffic misery and air pollution.</p> <p>I was told at the public exhibition held at the Guildhall, Salisbury on 19th July that traffic improvements would be made, but there was no plan available to show what these improvements might be. It is difficult to see what improvements could be made that would mitigate the traffic gridlock. Unless there is a sensible plan to reduce the traffic, or at least not add to the congestion, any housing development along the Netherhampton Road is not sound.</p> <p>Any housing development along the Netherhampton Road should only be considered in conjunction with a sustainable and workable traffic plan. The development should not be considered and definitely not approved until a realistic plan has been formulated to mitigate the additional traffic problems that would be caused by a large housing development on a road that already has significant traffic congestion.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Community Topic Paper Marlborough			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Community Topic Paper Marlborough Paragraph 2.5 refers to the Infrastructure Delivery Plan. Bullet point 1 suggests 'a new site for Preshute Primary School'</p> <p>This requirement is out of date and misleading.</p> <p>A new school has just been built to replace St Peter's and St Mary's. The new school, called St Mary's has capacity for 420 pupils plus 20 special need places. This is 120 more places than the combined roll of St Peter's and the previous St Mary's. There is no need for any additional places in Marlborough, and the additional places will accomodate many pupils who currently attend Preshute.</p> <p>If all the pupils who attend Preshute cannot attend the new school then Preshute can be reduced in size and a new school built on the current Preshute site.</p> <p>The Infrastructure Delivery Plan is out of date. It says that existing school sites cannot expand to meet needs of new housing. This fails to take account of the new school which clearly has capacity for new pupils. The reference to a new site for Preshute is iut of date and unjustified.</p> <p>The Infrastructure Delivery Plan confirms that there is no Government funding for a new school for Preshute and indeed no funding has been identified from anywhere. The proposal is therefore not sound.</p> <p>The IDP suggests that funfding can come from developer contributions.This too is out of date as it ignores the fact that Wiltshire Council has adopted CIL and no new school is included in the Regulation 123 schemes for developer funding. The IDP is out of date and unsound and the Area Topic Paper that refers to it is also unsound.</p> <p>The School Places Strategy confirms a falling birth rate in Marlborough and shows that there are surplus places in Primary Schools up to 2025 even after taking account of the planned new homes. Even this is flawed as the School places strategy wrongly assumes that the housing requirement for Marlborough is 920, whereas in fact it is 680. The 920 is the requirement for the whole community area which includes several other schools in the other 18 parishes in the community area.</p> <p>The Capital Assets Committee meeting in January 2017 approved the Schools Capital Investment Programme. Not surprisingly there is no provision for another new school in Marlborough to replace Preshute.</p> <p>For all these reasons the reference in the Marlborough Area Topic Paper to a new school site for Preshute is misleading, unnecessary, unfunded , out of date and unsound and should be deleted as a new school will not be delivered in the plan period and may never be required.</p> <p>Finally in the next Core Strategy post 2026 it is clear from the Strategic Housing Land Availability Assessment that the next phase of growth will be along the Kennet Valley to the East as an extension to the housing at the old St John's school site on Elcot Lane and Chopping Knife Lane. Ultimately if the town continues to expand at the current unprecedented rate a new primary school will be necessary and this should be in the east where the new houses are sugested in the SHLAA</p>

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

My comments refer to a number of Council documents which the Inspector may not have to hand and may not be aware of as they are not part of the Site Allocation documents. These additional documents referred above, however demonstrate that the reference s in the Marlborough Area Topic Paper to a new school is flawed unsound and unjustified. It will also be clear by the time of the Inquiry how many pupils from Marlborough actually attend Preshute.and how many travel long distances from elsewhere.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury. • The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary? • The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	INSUFFICIENT TRANSPORT & GREEN INFRASTRUCTURE • Para 5.128 of the Draft Allocation Plan says: "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS". This is simply not true. • The "Salisbury Transport Strategy" (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed. • Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: • "Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy." • It should also be noted that such "Salisbury Transport Strategy" as exists is not detailed and has never been subject to public consultation or formal adoption. • Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end. • We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague "solutions" should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through. • There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess. • We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all. • Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>FLAWED PROCESS</p> <ul style="list-style-type: none"> <li>• We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</li> <li>• The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</li> <li>• The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</li> <li>• The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</li> </ul>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	INSUFFICIENT TRANSPORT & GREEN INFRASTRUCTURE • Para 5.128 of the Draft Allocation Plan says: “The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS”. This is simply not true. • The “Salisbury Transport Strategy” (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed. • Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: • “Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy.” • It should also be noted that such “Salisbury Transport Strategy” as exists is not detailed and has never been subject to public consultation or formal adoption. • Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end. • We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague “solutions” should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through. • There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess. • We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all. • Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I am not a lawyer and so cannot give details but would be surprised whether something so ill thought out could be legal. CONTRARY TO HOUSING DELIVERY STRATEGY The Housing Delivery Strategy describes the proposed allocations as being “in Salisbury”, whereas the locations lie within Netherhampton Parish. These allocations are therefore contrary to the stated policy of focusing on higher tier settlements in the pursuit of “sustainable development”. Para 4.16 of the Draft Allocation Plan: “Housing development at Small Villages is required to take the form purely of limited infill. House building will be small in scale, for sites of single figures, and the Plan does not seek to identify such sites.”

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Similarly, the only road supporting this development is not capable of handling the additional 1000 or so vehicles that it would bring. It is already acknowledged that Netherhampton Road, Newbridge Road and the Harnham Gyratory are close to capacity. Indeed, as one of the organisers of the demonstration when about a dozen or so of us drove backwards and forwards between the Harnham Business park and round the Gyratory causing delays at the Gyratory of over an hour. So I am well aware of how small an increase of traffic is needed to bring the Gyratory to an almost complete stand still. It must also be borne in mind that this is the chokepoint through which most of the traffic to the District Hospital must pass. Because of the difficulties at the Wilton end, most of this new traffic must pass through the gyratory.</p> <p>Paragraph 5.136 has some woolly words about local and strategic roads, but they amount to very little, apparently putting the onus on the developer to do the work. This is simply not good enough. If this development must go ahead, then it must only be allowed after the road improvements have been made. A cycle track and a couple of extra busses are not going to solve the problem.</p> <p>If the plan for the development on Netherhampton Road is to go ahead it must be firmly linked to the necessary road improvement. There must be the clear undertaking that no development will be allowed until after the road improvements have been undertaken.</p> <p>The whole of this consultation process has been opaque. It has been difficult to wade through the large amount of documentation to find the relevant bits. Is it cynical of me to suggest that the public consultation in Salisbury was held in the middle of the summer holidays in a deliberate attempt to reduce attendance?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	A few final points. Why does the author of this plan consider that the new inhabitants will only have primary school children? All the secondary schools in Salisbury are north of the river Avon, putting further pressure on the Gyrotory and Newbridge road. Only 1 of these, Bishop Wordsworths, is within 3 miles of the development, and then only just, so lots of free school transport is needed. The whole of this consultation process has been opaque. It has been difficult to wade through the large amount of documentation to find the relevant bits. Is it cynical of me to suggest that the public consultation in Salisbury was held in the middle of the summer holidays in a deliberate attempt to reduce attendance?

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As a very recent former school governor at Harnham Junior School, I know that both the current Harnham primary schools are at maximum capacity, and whilst building a second 2 form primary school will help relieve capacity for the new Rowbarrow homes, why is no thought being given to including a new secondary school in your plans for the Harnham area as with the exception of Wyvern boys school which is under subscribed, St Edmunds Girls school (Laverstock), Trafalgar School (Downton) and Burgate school (Fordingbridge), where the majority of Harnham children not going to grammar school go to, are over subscribed, are too far to walk to or cycle safely to. The contracted Wiltshire school bus service (route 650) to get to the designated Laverstock schools for children living in Harnham, especially in east Harnham is poor, expensive, unreliable, there are not enough seats on the school bus so children have to sit on other children's laps, and the bus dorstnt serve any of the east Harnham estates including Rowbartow in the mornings. As a result many parents drive them to school in the mornings adding to the congestion on the A3004 Netherhampton and A348 Downton and Newbridge Roads.</p> <p>Improvement of the cycle paths and local road network in east and west Harnham first before these new houses are built, remodelling of the A3094/A338 Harnham gyratory junction to make it safer for pedestrians, cyclists and passing vehicle drivers, and building the Harnham relief road. Building a secondary school in Harnham and including space in your plans for the combined doctors surgery ( St Ann street. Endless Street and Three Swans surgeries) to avoid them building their super surgery on the designated wildlife field off Odstock Road and Lime Kiln Way, which was gifted to the local community , and is heavily used by families, dog walkers and runners for recreational use</p> <p>Whilst I support holding new homes for local people, the piecemeal nature of developments ,often won on appeal that occurs in in south Wiltshire results in developers getting out of funding or building the necessary infrastructure (e.g. pavements, cycle routes and improvement of the local road network in and around Salisbury , which is ruining Salisbury as a place to live and work. More joined up consultation with the local schools, hospital and Gp surgeries, netherhampton parish and Salisbury city council would go a long way to make sure we get the right housing developments in the right locations and with the necessary infrastructure for a vibrant community where families want to come and live.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Do the inspector hears first hand from local residents, not officers and councillors working or living elsewhere in Wiltshire (Trowbridge)who have inaccurate information or have no first hand knowledge about the extreme traffic congestion that blights our community in Harnham

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Site S1028 - Land at Netherhampton Road, Salisbury (pages 93-111)</p> <p>In response to the Wiltshire Housing Site Allocations Plan I would like to raise the following objections to the development proposals: SA objective 7. Conserve and enhance the character and quality of Wiltshire's rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place.</p> <p>A development on this site would blight the character of Harnham which provides a significant rural backdrop vista to the cathedral and an important countryside image for the South West approaches to the City. There is no requirement to build housing in an area that does not have sufficient employment opportunities. A development of the size proposed is likely to require significant enhancements to the local infrastructure. In particular, roads which are already at maximum capacity; bridges over the River Eble and the Water meadows. Given that the bypass ring road and 'Brunell Link' around Salisbury were cancelled some time ago, are they likely to be reinstated under the guise of infrastructure enhancements in future? In which case, the issue of in-fill between new road systems and existing housing boundaries would become a further major issue.</p> <p>The need for additional housing is well recognised however, the key requirement is to meet local needs by building affordable housing in the right place. A large development on the south of the Netherhampton Road on the outskirts of Harnham does not meet these requirements and is not supported by the local residents. Salisbury's future housing should be built on a combination of existing 'brownfield' sites close to trading/business parks/estates and where there is ongoing industrial and housing developments. For a large scale housing requirements, consideration should be given to enhancing current development sites, possibly under the guise of a new 'Garden City' status, where supporting infrastructure can be created without adversely impacting on local residents. The existing Salisbury North Development strategy (Old Sarum/Porton Down/Boscombe Down) already goes a considerable way to meet these requirements without having to readdress old and cancelled road bypass plans and the associated prospects of building infill to new perceived boundary's created by the roads.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site S1028 - Land at Netherhampton Road, Salisbury (pages 93-111),SA objective 2,SA objective 7,SA objective 10,SA objective 11,			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Site S1028 - Land at Netherhampton Road, Salisbury (pages 93-111)</p> <p>In response to the Wiltshire Housing Site Allocations Plan I would like to raise the following objections to the development proposals:  SA objective 10. Reduce the need to travel and promote more sustainable transport choices  The Harnham Road is already at maximum capacity and without the prospect of widening this development will make it intolerable for locals. At present in rush hour and at peak times of traffic through put, the Harnham Gyratory rapidly becomes gridlocked with vehicle backed-up along the Netherhampton and Coombe Bissitt Roads. One of the effects of this congestion is for traffic to use short-cuts in an attempt to avoid the bottlenecks. In particular, traffic coming from or going towards Coombe Bissitt is using the Old Blandford Road across Harnham Hill and traffic travelling from the Netherhampton direction and heading towards Salisbury and the Churchill Way ring road will use the Old Netherhampton Road through Harnham Village. Both of these roads are minor and designed for local resident use and not heavy industrial traffic. Furthermore, the Old Blandford Road is used as a drop-off and pick-up point for Harnham Primary School. The prospect of an additional 1,000 vehicles accessing the Netherhampton Road will have significant adverse impact on local congestion, air quality, noise, the use of short-cuts (rat runs) and access to the City for many residents. Salisbury's transport problems already require solutions to the Southampton Road and Churchill Way links including the not insignificant issue of bridges and crossing water meadows. To add to these difficulties by building a large housing estate in Harnham is creating more pressure on an already overloaded road system which is both unnecessary and unwanted.  The need for additional housing is well recognised however, the key requirement is to meet local needs by building affordable housing in the right place. A large development on the south of the Netherhampton Road on the outskirts of Harnham does not meet these requirements and is not supported by the local residents. Salisbury's future housing should be built on a combination of existing 'brownfield' sites close to trading/business parks/estates and where there is ongoing industrial and housing developments. For a large scale housing requirements, consideration should be given to enhancing current development sites, possibly under the guise of a new 'Garden City' status, where supporting infrastructure can be created without adversely impacting on local residents. The existing Salisbury North Development strategy (Old Sarum/Porton Down/Boscombe Down) already goes a considerable way to meet these requirements without having to readdress old and cancelled road bypass plans and the associated prospects of building infill to new perceived boundary's created by the roads.</p>

Encourage a vibrant and diversified economy and provide for long-term sustainable economic growth. The need for local housing would be better met by fewer houses built on brown field sites closer to work places which are generally north of the City (e.g. business parks in Churchfields, Sarum and Porton Down). A development of the size proposed in this location would have the effect of providing dormitory facilities for centres of employment further afield (e.g. London and Southampton). The proposal to build a significant housing site on the south of the city boundary runs contrary to the north of Salisbury development plan that is already on-going between Old Sarum and Boscombe Down.</p> <p>The need for additional housing is well recognised however, the key requirement is to meet local needs by building affordable housing in the right place. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>no public consultation, on change of scale of change on this site previously a reserve site with a smaller number of houses. proper public consultation on issues conducted by planners who know this area . Consideration of traffic and flooding implications not researched. Feasible infrastructure changes need to be proposed and discussed before this plan could be considered .Currently the Harnham /Netherhampton Road is not capable of taking more traffic at peak times, and a development on this scale will add at least another 1000 vehicles. The main road fronting this proposed development was already identified in the 2012 transport strategy as being at capacity. I cannot envisage anything you could do with a road already developed at the "city end" with house on both sides to make this situation different. The high water table in this area is already acknowledged as making significant improvements to the sewerage system very difficult and the surface water "run off " from this site would be directly onto a flood plain (H3.3), which you are also proposing to build on!.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site Nos H3.1 and H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The sites H3.1 and H3.3 are referred to as 'in Salisbury' and as part of 'the Salisbury Community area'. Neither statements are correct as the sites are in the parish of Netherhampton which is a village. It would appear insufficient care was taken to check this basic fact and as a result the proposal for these sites should be considered as unsound.</p> <p>Because Netherhampton is a village of about 60 dwellings the addition of potentially 740 dwellings would swamp this small community. The village has already accepted a plan for some 22 dwellings on the site of Netherhampton Farm which can be absorbed into the community and is not considered as overdevelopment which H3.1 and H3.3 are undoubtedly are. It is believed additional housing in small villages should be of an infill nature.</p> <p>The above comments refer to the specific sites in Netherhampton Parish and not to the full plan for Wiltshire. Therefore addressing the above concerns would help in respect of Netherhampton.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">265</a>	<b>Consultee</b> Mr Ian Goddard	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1124133	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road, Salisbury		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Development of the land on Netherhampton Road on this scale is not sustainable. Bearing in mind that the site is not considered to be in walking or cycling distance of the City Centre (as acknowledged in the Sustainability appraisal report), the development will cause a significant increase in traffic along the Netherhampton Road and the Harnham Road towards the Harnham Junction and the Park Wall Junction which are already congested and operating at capacity. The road is not capable of widening and there is very little scope for improvement of traffic flow and at these junctions to alleviate the problem that exists already. I don't believe a refresh of the Salisbury Transport Strategy will be able to address this.</p> <p>Whilst the plan includes a primary school, this is likely to increase the volume of traffic further if it is to take pupils from other parts of Salisbury. The plan does not include provision of a secondary school, so this will require travel across Salisbury to Laverstock or Downton. Otherwise, the plan seems to largely rely on facilities already existing in Salisbury. Use of many of the facilities in Salisbury will require travel into the City Centre which is likely to require the use of a private vehicle. A large proportion of Salisbury residents have to travel outside of Salisbury for work. For residents at the new development this would likely require travelling into the City Centre, to use train or buses, or travel through one of the junctions mentioned above to reach the A36 or the A338. It would make more sense to concentrate efforts on delivering the original project at Churchfields, which is closer to the City Centre and to public transport links.</p> <p>The development in Netherhampton Road should be removed from the plan or significantly scaled back. The original plans for Churchfields should proceed and other, more suitable sites across Wiltshire should be found to make up any shortfall if it arises.</p> <p>More generally, the plan provides for a surplus of 937 houses in South Wiltshire and 577 in Salisbury, compared with the indicative requirement. It is not justified to provide a surplus against this target if that involves development of greenfield sites. Once this agricultural land is lost, it cannot be replaced. One of the reasons given for using Salisbury as a primary focus for development is that it will provide significant levels of jobs. I would argue that this logic is flawed. Salisbury does not appear to have attracted new employers and we have seen some larger employers leave the City in recent years. The ring-road round Salisbury is the meeting point of many major A-roads and is frequently congested. An increase in housing will increase this traffic and Salisbury does not have the capacity for more traffic on these roads.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.70 Downton settlement boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The changes proposed to Downton's settlement boundary are a somewhat muddled but major revision to Downton's settlement boundary that could be improved.</p> <p>As a member of the Neighbourhood Plan steering committee I have submitted detailed comments to the Downton Parish Council for consideration in their response.</p> <p>As a resident I consider the removal of certain recreational or amenity spaces from the settlement to be contrary to the methodology as they relate to the settlement, rather than open countryside. In particular in Moot Lane the Playing Field, Moot Garden and part of Moot House's garden should remain within the settlement boundary and in the Borough the Memorial Garden and Cricket Field should also remain.</p> <p>Downton's housing is planned to expand to the west of the A338 and whilst the revised settlement boundary adds existing properties in Mesh Pond and The Hamlet and adds the Business Centre and Leisure Centre, it excludes the Charles Church development that is under construction, possibly part of the Scott's House development and the tennis courts and Downton FC pitch so the resulting boundary is irregular and difficult to follow on the ground. The boundary needs improvement and should be made consistent with Downton's Neighbourhood Plan.</p> <p>There are inconsistencies in car parking areas that should be resolved:</p> <p>The doctor's surgery remains but the adjoining Moot Garden car park has been removed.</p> <p>The White Horse's has been extended behind the Co-op.</p> <p>Trafalgar School's has been added.</p> <p>The Leisure Centre's has been added.</p> <p>Downton Baptist Church's has been removed.</p> <p>The Catholic Church's has not been added.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Other Sites                  There are other sites for housing within Trowbridge what about the amount of empty buildings on the White Horse business park. I believe the Virgin building was supposed to be made into housing, the Council have messed that up too I have been told.                  The Bowyers site which is right next to the station is an excellent site where people could commute by train, and could be made into affordable housing for young people who would not want to be stuck out of the town where there are no shops, facilities and poor public transport. This would offer an enviromentally friendly solution as people would then not need to have a car so less traffic on the roads. It would improve the look of this area of Trowbridge which at present looks dreadful, we do not need another cinema there.                  Just remember this.                  If you allow this building to go ahead you will have ruined this area forever that is not something to be proud of.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>All residents of Netherhampton have engaged in the discussion with the Wilton Estate regarding the planning application for development at Netherhampton Farm and the lack of nimbyism shown there demonstrates that there is acceptance of the need for new housing provided that its scale is in keeping with the existing settlement and can be sustained by the local infrastructure. Netherhampton has approximately 60 dwellings and this new development at Netherhampton Farm will increase that number by over 30%. This feels like a fair share of the overall commitment facing South Wiltshire and Wiltshire generally. I do not object to developments per se themselves and have resigned myself to the considerable impact of the Netherhampton farm development that is very near to my home despite the many effects that it will have during construction and resulting multiplier in traffic in a village which already has severe speeding problems. We have accepted with good grace what will be the maximum we could cope with on the farm site with all the traffic resulting. However these developments on the Netherhampton Road would have a drastic and detrimental effect on the local area in the ways outlines here and by the Netherhampton Parish Council and other local representative bodies. This could become a hugely unpopular site with residents throughout the Salisbury area. People who travel here socially may finally be deterred by the increased traffic congestion in addition to the existing congestion issues and on top of the already-deterring parking prices and it would have a very negative social impact. It could become as notorious as the Southampton Road traffic issues. I don't want Salisbury, a city of history and beauty shared happily with visitors from around the world to become known more for traffic than its many wonderful attributes. Pollution from the additional traffic will be another factor. Please clarify how levels are monitored now and what impact would be expected from the longer queues.</p> <p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. It would give a better environment for the residents of these houses too. It would not have the economies of scale nor the disadvantages and would enhance the country not be to its detriment.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations that I and others have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE deciding whether to adopt this Housing Site Allocation Plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The A3094 is a busy road that many vehicles use exceeding the 30mph speed limit. Placing more houses down this road will inevitably cause more traffic with the same outcome. I use and cross this road daily using the zebra crossing located by the on-stop shop, with this I take my life in my hands and I am lucky to cross without three/four cars speeding over the crossing. The extra population this will bring to already full local schools is also concerning. Too many parents already transport their children to the schools via car making it unsafe for parents who walk adding extra students will enhance this issue. There is simply no way of adding more houses to this community without making it more unsafe.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object to the allocation of land at Parcels s1027 and s1028 for the following reasons:</p> <p>4. I am informed the plans for Parcel s1028 includes the provision of a new Infants and Primary School for the Harnham area. I am also told that some of the overflow from the existing Harnham School will be directed here and as the law states parents may choose a school to send their children to rather than having one allocated, this clearly would increase by some degree the amount of traffic entering the already severely congested and overloaded A3094. The school, I am informed, would not by law be just for people living in the Harnham area and my experience of new schools in other areas away from Salisbury is that parents rush to choose the new school as they envisage it having better facilities.</p> <p>5. Harnham offers no local facilities apart from the One Stop on the corner of Norfolk Road and Netherhampton Road. I understand there are no plans to add any shopping or religious facilities to any new housing site which once more will mean traffic movements for any residents to go about this normal daily activities.</p> <p>15. I asked Mr Waye about the proposed "Super Doctor Surgery" reported to have been interested in part of this site. He confirmed that no purchase of land had been made by anyone for this but this did not mean it would not go ahead. This being the case the land would appear to be being earmarked for two purposes. With doctor's surgeries in Salisbury struggling to provide access to GP's and the wait at Salisbury District Hospital running into months for many departments there would not appear to be any provision for health facilities for these proposed Salisbury developments (the overall package not just the s1028, s1027 and 3272 options in Harnham. If the land is to be used for development without any additional health facilities there will naturally be an increase in delays for medical attention to all in the region. An example would be Orthopaedic services at Salisbury where the delay is a minimum three months and the only viable other option is in Winchester at a hospital which offers very limited parking facilities and is almost impossible to reach by public transport. Any new housing will impact these services.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft WHSAP is sound?</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I object to the allocation of land at Parcels s1027 and s1028 for the following reasons:</p> <p>7. I asked about the type of housing envisaged for these sites and was informed that they would be private builds with about 30% affordable housing. When pushed on this issue Mr Waye stated he could not sell a house on a site for say £85,000 if the going local rate was £250,000. A search on Rightmove today shows the following:                      “Most of the sales in Salisbury over the past year were terraced properties which on average sold for £248,822. Semi-detached properties had an average sold price of £273,567 and flats averaged at £176,790”                      A comparable site at Wilton currently has properties ranging from 2 bedroom semis to 5 bedroom detached in the range £249,500 to £645,000. Assuming as Mr Waye stated this would be the quality of property being sought to be built they are far from being for the local people of the Harnham area currently on the Council waiting list.</p> <p>8. In recent times, the main mass wealth employers such as Capita and Aviva (formerly Friends Life) have closed their offices in the centre of Salisbury leaving very little employment which is not in the retail or public sector arena. These were relatively highly paid jobs for local people, many of whom moved here in the Government drive in the 1980’s to relocate large financial institutions to non metropolitan rural centres to assist with spreading jobs countryside. This was a major policy of the Tory government under Baroness Thatcher and people and companies embraced it with enthusiasm. Those moved and relocated have consequently made lives in Wiltshire and raised their children here in Salisbury. However they still require work now that these businesses have closed and moved on and no effort has been made by Wiltshire or Salisbury Councils to replace these midrange jobs. Indeed most of the vacated office blocks are being earmarked for retired persons homes. This short sighted desire will mean fewer well paid jobs for the young and middle aged of the area with the knock on effect that they will not be able to afford any of these new homes and will also have to travel to find work. Surely rather than turning these sites into retirement homes they should be considered for homes if it really is impossible to persuade decent employers to offer work in the City Centre.</p> <p>9. I was told by Mr Waye that “no one builds Council houses anymore”. Whilst I agree that this is the case, it does not need to be the norm – are not housing associations allowed to build homes for affordable rent. If, as I was told by Mr Waye and Ms Smith, the central government is directing them to look at their waiting lists to make provision for future housing, should not any planning and building be for local people and at a cost (be it rented if necessary) that the local average salary will allow them to pay. It is pointless to allocate swathes of virgin green land to build houses for people to move to because Wiltshire is a nice place to live if we are not doing anything to assist those who are currently awaiting housing. These allocations go no way whatsoever to removing people from Salisbury/Wiltshire’s housing list.</p> <p>10. The average salary in Salisbury today is £23,610 according to Payscale.com. Allowing for a lender advancing 3 x joint salary for a couple (and this is being very generous in today’s mortgage market) the most a couple could borrow would be £141,660 meaning they would require a deposit of some £107,162 to purchase the smallest of the properties currently on offer in Wilton. Even allowing for the complex allowances explained to me by Ms Smith the 30% affordable housing would be way out of the pocket of most young residents of Harnham. I therefore object to these homes on the grounds that they would go no way whatsoever to easing the current shortage of affordable housing in the area.</p>			

Appendix Q - Schedule of representations

	<p>16. The actual need for these new private sale houses should be called to question in general. I would point all readers to Private Eye, Issue No. 1449 28 July-10 August 2017, Page 11 "Housing News" (if anyone reading this cannot access the article please let me know and I will happily send you a copy!). This article states as follows: "Latest government figures show the owner-occupation rate in England fell to 63 per cent in 2015-16 – that compares with a peak of 71 per cent in 2003 and takes the rate back to levels last seen in the mid 1980's, when Margaret Thatcher's drive for a home-owning democracy was at its peak". The article then goes on to state that the figures conceal even bigger declines for younger families. Although outright ownership is still rising as pensioners pay off their mortgages, the rate of mortgaged ownership has fallen from 43 per cent in the early 1990's to just 29 per cent in 2015-16. The article quotes Sajid Javid as declaring war on Conservative councils in the Home Counties. Might I suggest looking at these figures and the cost of housing in this area and the lack of affordable rentable housing, let alone purchasing, that Wiltshire Council wishes to be seen to be "doing its bit" to meet the communities secretary's demands but without actually addressing those in the local area requiring proper affordable homes on the local salaries available? One other "grey" area I wish to mention is the help provided by the "bank of Mum and Dad" or the "bank of Grandma/Grandpa". I personally know many people in my own age group and above who have taken equity from their own homes (often purchased through the Right to Buy) to provide deposits to help their children and grandchildren on to the housing ladder. With the suggestion in the Tory manifesto that those requiring social service help in their own homes have the value of their homes taken into account surely there is a very real risk that these "banks" may have to close in the very near future! Perhaps the Council/Government should consider this policy at this stage rather than years down the line when the houses are actually being built.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.2			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>looking at all three sites, the A363 White Horse Business Park is clearly the least sensible: a capacity of 338, reduced to 150 due to 'mitigating factors'. This site will not solve the housing issue in Trowbridge; compared to the other two proposed sites it offers really poor value in respect to what the plan sets out to achieve. The location of the site also begs questions about access to it, as Woodmarsh is a residential road which already suffers from speeding (Councillor Prickett is campaigning for speeding measures due to the already excessive use of the road); as already noted the build up of traffic on Bradley Road is already bad and the use of Southwick Road going to the A36 is overused by heavy goods vehicles that speed into the village. The access to Yarnbrook is, and has been problematic for years, and is often queuing back to North Bradley as things stand. This proposed site will only add to the already problematic traffic congestion.</p> <p>Perhaps the most pertinent point against the development though, which is based on a precedent made by Wiltshire Council at the Paxcroft development, is that the building on the fields behind Woodmarsh will result in the joining up of Trowbridge and North Bradley, meaning that North Bradley will ultimately lose its independent village status. When the Paxcroft estate was built some years ago, it was only granted due to an agreed plan to leave a strip of fields between the village and the new estate, therefore ensuring that the Village of Hilperton remained separate to Trowbridge. I would like to think that this policy would extend to all villages surrounding Trowbridge and not just to villages that have influential Wiltshire Councillors in them.</p>

<b>Comment ID:</b>	<a href="#">283</a>	<b>Consultee</b> Mrs Carol Hackett Clerk	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Market Lavington Parish Council		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.3 Market Lavington			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>[Attached submission sets out representation in full.]                  2.0 Boundary Changes                  Generally, the boundary review seems to be sensible. However, the PC has the following comments. Numbers refer to those on the sketch map below.                  [see map in attachment]                  2.1 Specific comments:                  1. Keep to existing settlement boundary line. Councillors felt that as it was sited behind the current 'ribbon' development line of the village – not well attached to the urban framework, and was therefore not suitable for any possible future development, and as such should not be included within the settlement boundary.                  2. Keep to existing settlement boundary line - The Fiddington Nursery site – Councillors wanted to retain the potential employment uses for this site to keep the settlement sustainable and not encourage re-development / not well attached to the urban framework.                  3. The Wiltshire Council proposal encompasses the 'Southcliffe' site, as proposed in the Neighbourhood Plan, as well as some industrial units at the end. Councilors do not want the area highlighted in green to be included in the settlement boundary i.e. the industrial units (to retain the potential employment uses for this site to keep the settlement sustainable and not encourage redevelopment / not well attached to the urban framework).                  4. Keep to existing settlement boundary line – There are no residential properties on this site, rather just disused farm buildings - barns and sheds.                  5. Keep to existing settlement boundary line – Commercial yard operation - Councillors wanted to retain the potential employment uses for this site to keep the settlement sustainable and not encourage re-development / not well attached to the urban framework.                  2.2 Regarding sites proposed in the Market Lavington NDP (see map below), the Neighbourhood Pan has the power to amend the settlement boundary de facto by allocating such sites. It is up to Wiltshire Council whether they chose to revise the settlement boundary to accommodate these or let the NDP do it.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>[Attached submission sets out representation in full.]</p> <p>3.0 DPD and NDP Sites</p> <p>It is unfortunate that the site selection methodology used by the DPD did not include consultation prior to draft allocation of all possible sites with the neighbourhood planning groups that Wiltshire Council knew were emerging at the time. In the view of the Parish Council, this is a serious error that could bring into question the soundness of the DPD, in particular in relation to its Duty to Co-Operate. While Parish Councils were consulted, NDP steering groups are often semi-autonomous sub-groups that may not necessarily receive a consultation sent to the PC. There was no specific attempt that we are aware of to co-ordinate site selection in NDP's and the DPD. This and the role of the Link Officer (who could have fulfilled this function) are discussed later in this response. However it is worth quoting the NPPF here. This says: 155. Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made. It is felt that the early engagement of the DPD team with the Neighbourhood Plan Steering Group in Market Lavington did not reach the standard set by the NPPF.</p> <p>3.1 The Market Lavington NDP has in fact been growing and developing for some three years. Prior to the formal decision being made to produce a Neighbourhood Plan, information was provided by the Parish Council, and the views sought from members of the community at various events. The Public Open Meeting held on the 6th of May 2014 led to the formation of the Neighbourhood Planning Steering Group, made up of representatives from the Parish Council and the local community. The first Steering Group meeting was held on the 23rd June 2014, and meetings have been held on a monthly basis throughout the process. The Draft Consultation Statement (Extract as Appendix 2) indicates the very extensive community involvement so far, as does the ENACT report (Extract Appendix 5). This includes a whole programme of events as well as a detailed questionnaire which was professionally analysed.</p> <p>3.2 In addition to the fact that the sites selected for the NDP reflect the wishes of the community, extensive objective research was also undertaken and incorporated within a Scoping Report. This includes an expert report from consultants 'AECOM' which rigorously assessed the sites, a Housing Needs Survey (HNS) produced by Wiltshire Council in February 2017, and further assessment in the sites section of the NDP itself (see Appendix 3).</p> <p>3.3 The Parish Council is therefore extremely confident that the sites selected in the draft NDP are soundly selected, are suitable, viable and available and will meet the needs of the area as identified in the Wiltshire Core Strategy.</p> <p>3.4 In Market Lavington's case, early consultation would therefore have revealed that an extensive (and expensive) site selection process had already generated a series of preferred sites and that moreover these reflected not only practical evidence such as expert reports and Wiltshire Council's own HNS and SHLAA, but also the wishes of the community.</p>				

Appendix Q - Schedule of representations

	<p>3.5 However the Parish is now faced with a list of proposed DPD sites which do not completely agree with those in the emerging neighbourhood plan, which is close to beginning its Regulation 14 consultation.</p> <p>4.0 General Comments on the DPD and Neighbourhood Planning Process The publication of the DPD consultation has brought to a head some concerns that the Parish Council has regarding the management of neighbourhood planning in Wiltshire.</p> <p>4.1 In terms of the Sites DPD, it is regrettable that there has been little direct effort to co-ordinate the DPD with evolving NDP's. In the case of Market Lavington for example, our link officer kindly provided us with site maps for our plan back in March, yet this activity does not seem to have been fed back to the DPD team at Wiltshire Council – in any event no one contacted us to discuss the implications of having two separate sets of proposals.</p> <p>4.2 More worryingly, one of our plan team who spoke to Sophie in your Spatial Planning Team was recently informed that; 'Wiltshire Council could only take into account the recommendation of a Neighbourhood Plan, regarding assessment of sites, once it had reached the 'Regulation 16 stage' . If this does indeed indicate the attitude of Wiltshire Council to the role of neighbourhood planning then it is most concerning. As you will know, Annex 1. Paragraph 216 of the NPPF says: From the day of publication, decision-takers may also give weight to relevant policies in emerging plans according to: the stage of preparation of the emerging plan (the more advanced the preparation, the greater the weight that may be given); the extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given); and the degree of consistency of the relevant policies in the emerging plan to the policies in this Framework (the closer the policies in the emerging plan to the policies in the Framework, the greater the weight that may be given).</p> <p>4.3 Planning Practice Guidance Neighbourhood Planning para 07 adds: 'An emerging neighbourhood plan may be a material consideration. .... Factors to consider include the stage of preparation of the plan and the extent to which there are unresolved objections to relevant policies.... Decision makers should respect evidence of local support prior to referendum when seeking to apply weight to an emerging neighbourhood plan. ....It is for the decision maker in each case to determine what a material consideration is and what weight to give it.'</p> <p>4.4 It seems as if Wiltshire Council's view differs somewhat from that of the Government and we would seek assurances that this is not the case and specifically that the advice given by a staff member (above) that a neighbourhood plan was effectively irrelevant prior to the Reg 16 stage is incorrect. In terms of creating DPD documents, an emerging neighbourhood plan should be taken account of from the moment it is created and weight duly attached according to its stage of progress. We would like this also to be made clear to all Wiltshire Council planners.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4704133</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>On 6th September I attended a meeting by Harnham Neighbourhood Association to hear about plans to build 640 homes south of the Netherhampton Road (on the Livestock Market side) and 100 on the north side. The probable requirement for a new doctors' surgery, primary school and shops was also mentioned.</p> <p>I was concerned at the impact such a development would have on the local infrastructure including the feeder links (mainly the Harnham/Netherhampton Roads) and the bridge choke points the capacity of which cannot, realistically, be increased. I was given sight of the Wiltshire Housing Site Allocations Plan dated 22st August which acknowledges that the impact of such a large development on transport capacity and general infrastructure has not yet been fully assessed. For example, a document called the Salisbury Transport Strategy states that, at present,;</p> <p>the Harnham Gyratory (is) in the 'red' category – operating over 70% of capacity (or with two or more arms operating in excess of 90% of capacity).</p> <p>There has been no effective monitoring of the transport impacts arising from those proposed developments around Salisbury.</p> <p>As a resident of Harnham I daily experience the holdups which occur on the Harnham/Netherhampton road under normal circumstances and the long holdups which occur when there is even the slightest blockage to traffic flow. There are houses along either side of much of its length so widening of the road would not be possible. I conclude that the development as proposed is utterly impracticable.</p> <p>The proposed development will only work if a supporting traffic system is constructed to take some of the pressure off the narrow Harnham/Netherhampton Road. Otherwise there will be daily gridlock.</p> <p>Please also consider the impact of large expanses of concrete and tarmac in a new built up area across much of the valley in the Netherhampton area. The river Nadder is prone to flooding. A large amount of extra water flowing directly into it will make it more likely to break its banks and flood downstream - including lower Harnham</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	In the 2015 core plan it is recognized that the villages surrounding Trowbridge have a separate and distinct identities as villages. Open countryside should be maintained to protect the character. Also the regeneration of central Trowbridge should be a priority. As far as I can see this goes against this plan and make North Bradley part of Trowbridge. It states that the housing number will be limited to 150 on this site, but what guarantee is there for this and also stated are the benefits of affordable housing. There is no guarantee of this either. It says it boosts public open space and biodiversity. What is better than open countryside for open space and wild life. There are plenty of brown field sites in Trowbridge to cater for the extra allocation if required

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury.</p> <p>The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary?</p> <p>The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 1277 dwellings that the planners have suggested would be possible.</p> <p><b>CONTRARY TO HOUSING DELIVERY STRATEGY</b></p> <p>The Housing Delivery Strategy describes the proposed allocations as being “in Salisbury”, whereas the locations lie within Netherhampton Parish. These allocations are therefore contrary to the stated policy of focusing on higher tier settlements in the pursuit of “sustainable development”.</p> <p>Para 4.16 of the Draft Allocation Plan: “Housing development at Small Villages is required to take the form purely of limited infill. House building will be small in scale, for sites of single figures, and the Plan does not seek to identify such sites.”</p> <p>No other small village has been swamped in this way.</p> <p>There is no way that such a large number of dwellings could become part of the parish community in the way that I hope the farm development residents would.</p> <p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. It would give a better environment for the residents of these houses too. It would not have the economies of scale nor the disadvantages and would enhance the country not be to its detriment.</p>			
<b>Attached files (Please see Objective)</b>				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations that I and others have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE deciding whether to adopt this Housing Site Allocation Plan.			

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">299</a>	<b>Consultee</b> Mrs Alison Edward-Smithson  <b>Person ID:</b> 1124180	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p><b>INSUFFICIENT TRANSPORT &amp; GREEN INFRASTRUCTURE</b></p> <p>Para 5.128 of the Draft Allocation Plan says: "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS". This is simply not true.</p> <p>The "Salisbury Transport Strategy" (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</p> <p>Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: "Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy."</p> <p>It should also be noted that such "Salisbury Transport Strategy" as exists is not detailed and has never been subject to public consultation or formal adoption.</p> <p>Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</p> <p>We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague "solutions" should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</p> <p>There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</p> <p>We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</p> <p>Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</p> <p>There is an extremely likely outcome that these issues will be described as 'noted' and that the authorities 'are aware' but in reality they will be submergered by the desire to build and we will all regret the consequences.</p>				

Appendix Q - Schedule of representations

	<p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. It would give a better environment for the residents of these houses too. It would not have the economies of scale nor the disadvantages and would enhance the country not be to its detriment.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p><b>FLOOD &amp; SEWAGE IMPACT</b></p> <p>Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the problem is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites.</p> <p>Site S1027 is well known locally for having standing water regularly during the winter.</p> <p>There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. The existing sewage pumping infrastructure is already operating at capacity.</p> <p>This is another hazard and consequence that must not be ignored. In addition, does the sewerage system from the area pass under the sites in question ?</p> <p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. It would give a better environment for the residents of these houses too. It would not have the economies of scale nor the disadvantages and would enhance the country not be to its detriment.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>NOISE</p> <p>A much smaller proposal in 2014 for around 70 houses plus a pub/hotel on a site along the Netherhampton Road was withdrawn after it was proved that vehicle noise from the A3094 would exceed Government guidelines. There is no evidence that consideration has been given to the much greater impact from 740 or more dwellings.</p> <p>It is already very difficult to hear someone in my garden due to the road noise. I accept that has always been the case but it would be significantly worse if the number of cars increase on this scale.</p> <p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There is no consistent pavement from the village to any bus stop in Harnham.          Has a bus been considered now?          My daughter has to walk to Harnham to get a bus to Salisbury to get a connecting bus to school in Fordingbridge. She has to cross the Netherhampton Road at a few points to avoid walking through muddy verge. The risk of this will increase with higher volume of speeding cars in the non-rush hour daytime hours. I am concerned about this.          A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>FLAWED PROCESS</p> <p>We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</p> <p>The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</p> <p>The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</p> <p>The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</p> <p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. It would give a better environment for the residents of these houses too. It would not have the economies of scale nor the disadvantages and would enhance the country not be to its detriment.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>VISUAL AMENITY / HERITAGE LANDSCAPE The proposed sites along the Netherhampton Road were previously removed from consideration in the Wiltshire Core Strategy, at least partly because of the negative impact on the unique view of the city and the cathedral spire from the south and west. In assessing the propose sites the planners have given no serious consideration to the severe impact that the proposed development would have on what is a priceless landscape and heritage asset.</p> <p>GENERALLY ILLOGICAL No thought appears to have been given to the possibility of expanding the Britford School instead of building a new school. The Core Strategy acknowledges that the key employment sites in Salisbury are to the North. We are completely perplexed as to how, in that case, locating up to 740 new houses in a rural village to the south of the city, in locations which are stuck between intractable traffic points and which are subject to all of the above perfectly reasonable grounds for objection, can make any sense at all. The comments here are serious and well-considered. Please respect that and take them onboard.</p> <p>A smaller number of dwellings with a definite low limit which is sustainable within the village parish and the infrastructure, prevented from being expanded piecemeal over time when the sustainable first stage has been forgotten and other small developments added to other areas of South Wiltshire that can equally sustain a few houses. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Harnham already has a site of employment land in front of Bookers which has not attracted development for many years. The inclusion of land for employment on this new site seems unnecessary given the lack of interest that has clearly been demonstrated. The development in Netherhampton Road should be removed from the plan or significantly scaled back. The original plans for Churchfields should proceed and other, more suitable sites across Wiltshire should be found to make up any shortfall if it arises. More generally, the plan provides for a surplus of 937 houses in South Wiltshire and 577 in Salisbury, compared with the indicative requirement. It is not justified to provide a surplus against this target if that involves development of greenfield sites. Once this agricultural land is lost, it cannot be replaced. One of the reasons given for using Salisbury as a primary focus for development is that it will provide significant levels of jobs. I would argue that this logic is flawed. Salisbury does not appear to have attracted new employers and we have seen some larger employers leave the City in recent years. The ring-road round Salisbury is the meeting point of many major A-roads and is frequently congested. An increase in housing will increase this traffic and Salisbury does not have the capacity for more traffic on these roads.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Having received notification of the proposed development along Netherhampton road I have to object in the most strongest of terms on the following grounds.</p> <p>1. The first consideration is of course the addition of 1000+ extra vehicles using the Netherhampton Road on a daily basis, the majority of which will be in the rush hours morning (schools and commuting) afternoon schools again and then the return from work in the evening. The Harnham Gyratory cannot cope now and in the morning the queue can extend back to Parsonage Green and beyond, try putting another 1000 vehicles on that same stretch of road at the same time of the morning.</p> <p>7. There is no real bus service beyond Upper Street, Harnham apart from the twice daily service currently run by Wheelers.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There is concern over the transport strategy for the A3094 which is the sole road through Harnham and Netherhampton. This road is already very busy with the 2 constriction points at the Harnham gyratory and at the traffic lights at the junction with A36. An earlier report from 2012 stated that both junctions were nearly at full capacity, but there is nothing in the proposals to suggest that is going to be addressed. The above comments refer to the specific sites in Netherhampton Parish and not to the full plan for Wiltshire. Therefore addressing the above concerns would help in respect of Netherhampton.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Finally land to the north of the A3094 is prone to flooding in the winter months. The addition of housing on that side of the road will impede the downward flow of water down the valley and could have implications for dwellings further up the valley, namely Netherhampton village itself. Coupled with the increased run off of surface water from the larger settlement proposed for the south side of the A3094 flooding could become a major issue. Currently water on the fields is absorbed into the soil down to the water table and causes little problem. Again no reference is made to how this is to be addressed.</p> <p>The above comments refer to the specific sites in Netherhampton Parish and not to the full plan for Wiltshire. Therefore addressing the above concerns would help in respect of Netherhampton.</p>

Also on the Boundary Walk site/Southwick Court in the wetter months there has be extensive flooding, which I myself have witnessed, one year it was so bad it was like a lake had been put there, I do have photos, as my children enjoyed playing in it. I've noticed that recently tests have been carried out there and that the soil sample trenches have been logged with OS coordinates and at least one is placed ON TOP of one of the post-medieval earthworks. Given that the brief for soil-sampling is to discover whether there is one metre of unsaturated topsoil to allow soak-away this does not seem to be a solid data point!

		<p><b>INSUFFICIENT TRANSPORT &amp; GREEN INFRASTRUCTURE</b></p> <p>Para 5.128 of the Draft Allocation Plan says: "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS". This is simply not true.</p> <p>The "Salisbury Transport Strategy" (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</p> <p>Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: "Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy."</p> <p>It should also be noted that such "Salisbury Transport Strategy" as exists is not detailed and has never been subject to public consultation or formal adoption.</p> <p>Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</p> <p>We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague "solutions" should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</p> <p>There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</p> <p>We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</p> <p>Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</p> <p>Consider the Transport, GI and other impacts carefully BEFORE making housing allocations.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I do feel that the planners are letting Trowbridge down, I know we need new homes and the fact that Wiltshire county council has told Trowbridge to find sites for a further 700 does not put them in a good light. The population of Trowbridge is approx. 40000 and with all this new housing it will increase by approx. 25 per cent. So allowances must be made for schools and medical facilities along with the emergency services.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p><b>FLOOD &amp; SEWAGE IMPACT</b>  Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the problem is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites.  Site S1027 is well known locally for having standing water regularly during the winter.  There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. The existing sewage pumping infrastructure is already operating at capacity.  Consider the Transport, GI and other impacts carefully BEFORE making housing allocations.</p>			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		As Chair of the parish in which huge allocations are proposed it would seem unreasonable to say the least for me not to be able to participate in any oral part of the examination in order to represent the very strongly held view of our residents.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>FLAWED PROCESS</p> <p>We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</p> <p>The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</p> <p>The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</p> <p>The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</p> <p>Consider the Transport, GI and other impacts carefully BEFORE making housing allocations.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site allocations are taken from the starting point of the SHLAA and are reactive to proposals put forward by landowners. The LPA has not sought to identify sites that could best utilise existing infrastructure, minimise impact on the landscape setting of Salisbury or relate to the location of employment.</p> <p>It should be set out on a site by site basis how the key challenges of the Wiltshire Core Strategy have been met .</p> <p>The plan seeks to concentrate development in the principal settlements but in the Salisbury area, employment patterns are more dispersed. (these range from large employers such as Porton Down to the numerous conversions of farm buildings to business purposes) Also modern lifestyles with an increase in remote working and internet shopping reduces the need for development to be concentrated in large sites on the edge of towns. A more dispersed pattern allowing more development in villages would have less landscape impact and make better use of existing resources. The Community Infrastructure Levy facilitates such an approach and reduces the need for large sites .</p> <p>The configuration of Salisbury as a convergence of routes at the confluence of several rivers and enclosed by hills makes any expansion of the settlement difficult without significant impacts in terms of landscape setting and heritage , traffic congestion and reduction in air quality , flood risk and drainage . A more thorough appraisal of existing infrastructure should be undertaken and a detailed updated transport strategy should be published before greenfield sites with no existing infrastructure outside the city boundary are allocated . The existence of a ring of park and ride sites lends itself to satellite development leaving green space around the city.</p> <p>The comprehensive improvements to the local and strategic road network referred to in para. 5.136 should be put forward in detail before this site is allocated as there is local opinion (as demonstrated by the comments at the meeting on 6 September ) that the scale of improvements required to accommodate additional traffic that will be generated from this site are neither achievable nor deliverable.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>INSUFFICIENT TRANSPORT &amp; GREEN INFRASTRUCTURE</p> <p>Para 5.128 of the Draft Allocation Plan says: "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS". This is simply not true.</p> <p>The "Salisbury Transport Strategy" (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</p> <p>Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: "Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy."</p> <p>It should also be noted that such "Salisbury Transport Strategy" as exists is not detailed and has never been subject to public consultation or formal adoption.</p> <p>Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</p> <p>We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague "solutions" should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</p> <p>There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</p> <p>We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</p> <p>Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</p> <p>Consider the transport, Green Infrastructure and all other issues properly BEFORE making housing allocations</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p><b>FLOOD &amp; SEWAGE IMPACT</b></p> <p>Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the problem is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites.</p> <p>Site S1027 is well known locally for having standing water regularly during the winter.</p> <p>There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. The existing sewage pumping infrastructure is already operating at capacity.</p> <p>Consider the transport, Green Infrastructure and all other issues properly BEFORE making housing allocations</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>FLAWED PROCESS</p> <p>We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</p> <p>The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</p> <p>The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</p> <p>The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</p> <p>Consider the transport, Green Infrastructure and all other issues properly BEFORE making housing allocations</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1 Netherhampton Road Salisbury			Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In relation to this site, there is insufficient detail provided to demonstrate how the road infrastructure could be modified to accommodate the volume of traffic that will be generated by the scale of development proposed, given the lack of capacity at the junctions either end of the A3094. Without this detail it is impossible to say for certain that the development can be delivered without resulting in significant adverse effects. There may be more appropriate sites, better related to existing infrastructure that do not appear to have been considered. e.g. close to Britford Park and Ride.</p> <p>The proposed site is not sustainable owing to the lack of adequate infrastructure. It will encourage car use out of necessity (contrary to the objectives of the transport strategy) as it is not within reasonable walking distance of town, it is not served by buses, it relates poorly to the location of existing primary and secondary schools and there are no shops, community facilities and little employment within walking distance. Therefore the site does not meet the key challenges of the Wiltshire Core Strategy set out in para. 2.5.</p> <p>It should be set out on a site by site basis how the key challenges of the Wiltshire Core Strategy have been met.</p> <p>The configuration of Salisbury as a convergence of routes at the confluence of several rivers and enclosed by hills makes any expansion of the settlement difficult without significant impacts in terms of landscape setting and heritage, traffic congestion and reduction in air quality, flood risk and drainage. A more thorough appraisal of existing infrastructure should be undertaken and a detailed updated transport strategy should be published before greenfield sites with no existing infrastructure outside the city boundary are allocated. The existence of a ring of park and ride sites lends itself to satellite development leaving green space around the city.</p> <p>The comprehensive improvements to the local and strategic road network referred to in para. 5.136 should be put forward in detail before this site is allocated as there is local opinion (as demonstrated by the comments at the meeting on 6 September) that the scale of improvements required to accommodate additional traffic that will be generated from this site are neither achievable nor deliverable.</p> <p>This site at the scale proposed could only be justified if it delivered the Brunel Link/Harnham Relief Road. However, I was advised at the Guildhall consultation session that this proposal is no longer included in the transport strategy.</p> <p>If there is to be no relief road, this site is in the wrong place. Salisbury is ringed by Park and Ride sites that are under utilised. Recent developments, e.g. Old Sarum, Hampton Park, Erskine Barracks Wilton, have fed into these, giving residents of the new homes a frequent bus service into town and establishing a satellite pattern of development linked to infrastructure.</p> <p>On the south side of Salisbury there is land close to Britford Park and Ride and the Hospital (a major employer which benefits from a 10 min frequency bus service) which should be considered in preference; an area which would also be more suitable for a new school as at present children from the E Harnham estates have to cross 2 main roads to walk to school.</p> <p>The sustainability appraisal site s1028 underestimates the adverse effects of the traffic that will be generated by this proposal. The adverse effect along the A3094 and the Harnham Gyratory will not be minor.</p> <p>5.136. What are these improvements? There is no detail and it may not be possible to deliver them without significant harm. For example, there will be a deterioration in air quality along the A3094 from additional traffic. This impacts not only upon residents of the road but children and</p>				

Appendix Q - Schedule of representations

	<p>families walking to school, adversely affecting their health. With an increase in traffic comes an increase in the risk of road traffic accidents. There was an accident leading to a fatality on the A3094 in August. The sustainability appraisal is flawed in its assessment of the magnitude of both positive and negative impacts.</p> <p>5.137 . As above. The site is not well located in relation to the city centre. It too far to reasonably access on foot, it is not served by public transport and the cycle path along the A3094 is on the south side of the road. The Shaftesbury Drove leads away from town towards the racecourse.</p> <p>The route of the former Harnham Relief Road should be safeguarded from any development to enable it to be resurrected in the future.</p>
<p><b>Attached files (Please see Objective)</b></p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		It overestimates the beneficial effects in that it is only the 'affordable' element of the housing that will help meet local needs, and a site which lacks infrastructure and facilities puts extra financial strain on low income households and is therefore unlikely to reduce poverty and deprivation in the wider community. Salisbury has a low average wage with average house prices around 10 times it's average wage. 640 houses will put a strain on existing health and social care services and secondary education which is a negative rather than positive effect.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	A country park is a waste of good agricultural land. A nation must feed itself as well as house itself. Country parks are better suited to marginal land where there is often more biodiversity. The strategic landscaping should form a westward continuation of the existing tree belt along the A3094 . 5.130 The site was previously rejected. To conclude, this site is poorly related to the historic settlement pattern of Salisbury and its existing infrastructure. Sites which can make use of the infrastructure that exists should be put forward in preference. It is too large a site, too great a loss of good agricultural land and extends too far southwards to fit into the landscape setting of Salisbury without harming its character. If, despite strong local objection the allocation prevails, the existing tree belt along the southern boundary of Netherhampton Road should be continued westward and planted in advance of the construction of any buildings.

Comment ID:	<a href="#">345</a>	<b>Consultee</b> Joan Jones Chair  Friends of Southwick Country Park  <b>Person ID:</b> 1122693	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.5			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1.1 The Friends of Southwick Country Park (FoSCP) are concerned about two aspects</p> <p>a) A general increase in the Trowbridge Community Area population leading to increased usage and wear and tear</p> <p>b) Specific effects of and to the three nearby proposed housing sites at Upper Studley, Southwick Court and Church Lane.</p> <p>1.2 The proposed developments do offer the opportunity of mitigating the adverse effects of the general development and possible improvements are put forward.</p> <p>2.3 Southwick Country Park is also important to the wildlife of the area. It has become a repository for wildlife relocated from development areas. In particular, hundreds of slow worms have been given a new home there.</p> <p>2.4 An application is under way to redesignate the Country park as a Local Nature Reserve. The indications are that this application will be successful.</p> <p>2.5 It should be noted that the Country Park is an effective "green" buffer between Trowbridge Town and Southwick village</p> <p>3 Park Usage</p> <p>3.1 A survey of some aspects of usage has been carried out by Wiltshire Council on a Saturday in July 2013 . Overall usage was not counted but the results of a sample questionnaire show why people visit the park. Dog walking was the most common activity with just over half. The next common reason was running at just under a third of the total. The Parkrun is held every Saturday morning and now attracts over 300. Other reasons were just walking and visiting the Hope Nature Centre. Lesser reasons were observing wildlife, picnicking and playing games.</p> <p>3.2 If usage by runners is 30% and we have 300 runners every Saturday then other usage is running at around 700 people per day.</p> <p>5 Wildlife Considerations</p> <p>5.1 An application is being progressed to achieve "Local Nature Reserve" status for the park. Currently the size of the park is around 140 acres. Although there is a considerable presence of dogs, it is considered that the park will continue to provide good habitat for a wide range of wildlife.</p> <p>5.2 A fear is that increasing human and dog usage will make it less attractive to some species. A considerable amount of help by the planning authority and others will be needed to keep this marvellous resource in good condition.</p> <p>6 Trowbridge Development</p> <p>6.1 It is estimated that Trowbridge population will increase by around 30% from present levels. Clearly, this is going to greatly exacerbate existing problems, particularly as three of the proposed housing sites are next to the Country Park. These proposed housing areas are sites 1021 Church Lane, 3260 Upper Studley and 3565 Southwick Court.</p> <p>6.3 Development 3260 Upper Studley</p> <p>6.2.5 Deciduous trees should be included in the landscaping to afford opportunities to bats to roam into and out of the Country Park by extending their habitat.</p> <p>7 Conclusions</p>			

Appendix Q - Schedule of representations

	7.1 There should be no argument that Southwick Country Park will have increasing usage because of the increase in population of Trowbridge Community Area. All the developments should be expected to contribute towards measures to alleviate this increased usage and keep the Country Park as an attraction for the benefit of the residents of Trowbridge and the surrounding areas.

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">348</a>	<b>Consultee</b> Joan Jones Chair	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Friends of Southwick Country Park		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>2 Introduction</p> <p>2.1 Southwick Country Park is an essential part of the recreational facilities in and around Trowbridge. It is used daily by many people for exercise, for social intercourse or for dog walking. Even the latter is beneficial to the health of the dog walker.</p> <p>2.2 On Saturday mornings the main ring path is used by over 300 runners in a Parkrun activity. The number attracted is indicative of the quality of the Country Park environment.</p> <p>4 Current Problems</p> <p>4.1 The park is so popular, it is under considerable stress. The main surfaced ring path is deteriorating under increased usage and FoSCoP is to seek funds to upgrade it.</p> <p>4.2 Parking is a problem. The main car park off Frome Road (A362) is surfaced with unbound material and it needs regular attention to deal with potholes.</p> <p>4.3 Parking for the Hope Centre frequently exceeds the capacity of the tarmacked surface and the grass in the field in front suffers from serious rutting in wet weather. A solution to this problem has not yet been identified. However, the problem cannot be ignored.</p> <p>4.4 On Saturday mornings, for around 2 hours, the parking situation is exacerbated by the cars of those attending Parkrun. Parking lines the A362 Frome Road in the area of the Country Park. It has been brought to the attention of the police. Yellow lines may be required in due course.</p> <p>6 Trowbridge Development</p> <p>6.1 It is estimated that Trowbridge population will increase by around 30% from present levels. Clearly, this is going to greatly exacerbate existing problems, particularly as three of the proposed housing sites are next to the Country Park. These proposed housing areas are sites 1021 Church Lane, 3260 Upper Studley and 3565 Southwick Court.</p> <p>6.3 Development 1021 Church Lane</p> <p>6.3.1 The proposals suggest that access should be directly off A361 to avoid extra traffic on Church Lane.</p> <p>6.3.2 The same considerations apply here about Parkrun parking.</p> <p>The development should provide a small car park for Country Park users and a footbridge over the Lambrok stream to provide pedestrian and wheelchair access to the Park.</p> <p>There should be no argument that Southwick Country Park will have increasing usage because of the increase in population of Trowbridge Community Area. All the developments should be expected to contribute towards measures to alleviate this increased usage and keep the Country Park as an attraction for the benefit of the residents of Trowbridge and the surrounding areas.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	As a resident of North Bradley much of my concern was the proposed allocation of land around the Parish of North Bradley. Buffer Zone - There is a strong determination from residents in the villages outside Trowbridge to maintain the green buffer areas. These are important, the green spaces between villages and town are essential and were recognized in Wiltshire's Core Strategy that these areas were essential to villages such as North Bradley, Southwick, Hilperton and West Ashton for retaining their 'village identity'. Something the present site allocations seem to have completely ignored. 3565 Southwick Court AND 298 Woodmarsh: both these, especially the Woodmarsh proposal, would be a cynical further destruction of the buffer between villages and the town. 298 Woodmarsh: it became apparent at the Consultation on 26 July that maybe not all landowners have given permission for development of their land. This site should be rejected also in order to preserve the separate identity of North Bradley. More consideration for the villages around Trowbridge of which North Bradley is one. To retain its village status and not become part of a greater Trowbridge.

		Ann Lee	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally complaint / sound.		<p>Following my visit to the consultation at Trowbridge on 26 July I would like to make the following comments regarding what would seem to be huge swaths of the Wiltshire countryside being allocated for development. While I, like everyone else, recognise the need for housing the huge swaths of land you had allocated was just unbelievable, never mind distressing. When I asked a member of the consultation team why such huge areas of land were allocated around Wiltshire villages and did the Council not have a duty to protect the countryside as well. I was sharply asked by the young women 'don't you think people have a right to houses'. Well yes I do as it happens but I think Wiltshire Council has a duty to also protect its countryside as well.</p> <p>I feel the following observations should be considered</p> <p>I have been increasingly concerned at the way Trowbridge town centre has been going downhill, and at the increase in traffic on a road system that is just becoming totally inadequate for the existing population.</p> <p>Lack of employment for the increase in population. Trowbridge and surrounding area seem doomed to become nothing but a satellite area, housing but no soul or community.</p> <p>I also understand that there is to be another industrial estate in this area? Why? When there are empty buildings on White Horse Business Park. As already mentioned the Pavilion building has already been approved to be turned from commercial into residential. Plus there is a large industrial estate being built on greenfield sites opposite West Wilts Trading Estate</p> <p>There does not appear to be any plan for the development of road transport. By adding more housing, and another industrial estate, traffic will be increased considerably on all routes. This will all increase congestion at Yarnbrook ,at the Rising Sun roundabout and through North Bradley along the Southwick Road and on the narrow Wynsome Street through Southwick. The heavy weight of traffic, especially HGV lorries through, North Bradley and Southwick, has already made these roads extremely dangerous. Making turning in Malthouse Estate, Church Lane and the Rank almost impossible and during school times the road is nothing but lethal for children walking to school.</p> <p>The Trowbridge Community Area Strategy - part of the Wiltshire Core Strategy - describes lots of plans and proposals, but does not appear to say anything about infrastructure development apart from one secondary school, and there is no mention of developing the road network.</p> <p>At the consultation I asked if any of the land was already in the ownership of developers and was told that that information was not to hand. I am surprised that such large areas of land are being considered for development when there has been no attempt to consult owners of said land.</p> <p>While I understand that the need for additional houses is a, necessary, requirement from central government I feel Wiltshire Council has presented a very cobbled together list of proposed sites. No thought for villages, existing residents, infrastructure and especially protecting our greatly dwindling countryside and green areas. There has to be a way that suits everyone.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Regarding the consultation process itself: It was noticeable that, despite the assistance of the staff present, it was not always easy to glean information as there was often only one copy of the most important documents, and often nigh impossible to find the relevant information on specific areas of concern when one finally got a chance to look at a document. A clear index and key were missing. As this was a public consultation it was obvious that members of the public would wish to read those documents pertaining to their area of concern. One copy of a complex document and multi area document was never going to satisfy that need. There being only one copy we had to wait over 45 minutes to view the document dealing in part with the Netherhampton Road proposed development.

We cannot cross the roads now down by the Spitfire Retail Park, so this certainly wouldn't be any easier. Will the parking for the football field be sorted out before any houses are built, as Woodmarsh is currently used for parking making it very difficult to access our properties now. Where will heavy goods vehicles go. through the new houses or back down Woodmarsh .

Appendix Q - Schedule of representations

Comment ID:	<a href="#">362</a>	<b>Consultee</b> Mrs Victoria Brown  <b>Person ID:</b> 1106487	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.2			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express concerns about and object to site 298 being included as part of the Wiltshire Council Housing Allocations. I do not believe the use of this site for development is a sound decision when referring to section 182 of the National Planning Policy Framework (NPPF), it is not justified or consistent with national planning policy. Specifically I do not consider the use of this site can be justified against sections 109, 110 and 111 of the NPPF.</p> <p>Building houses on this green field site does not seem like a sensible or logical option. There are numerous brown field sites around the town which are sitting unused and yet the Council deems it necessary to allocate green fields some of which have been in agricultural use for hundreds of years and have protected species living in them.</p> <p>What is extremely concerning is this this site is being considered when, due to constraints, it will only be able to contain 150 houses when an area of land this size can take 338 properties. The habitat will be destroyed so that the land can be used for houses at half the density other sites.</p> <p>It is accepted that some land does need to be used for residential development and that the NPPF needs to be considered in context as a whole document, not isolated sections. However, I do not consider the use of this site for development consistent with the NPPF, specifically Section 11: Conserving and enhancing the natural environment.</p> <p>The use of the site is not justified under policy 109 because a large area of land (big enough for 338 dwellings) with high ecological value, containing a significant amount of ecosystem services would be destroyed for the benefit of only 150 homes. There are other sites where housing at a more appropriate density can be installed without such a significant amount of damage to the biodiversity. The government is committed to halting the decline in biodiversity but the use of this site will destroy this valuable area which provides food and habitat for a complex ecosystem struggling to survive around the urban sprawl of Trowbridge.</p> <p>Policy 111 states that the planning system should encourage effective use of land by re-using land that has been previously developed (brownfield land). Trowbridge has a significant amount of brownfield sites available, many of which, such as the old Bowyers site, has been sitting empty for a number of years. There are also many empty shops and office buildings. Policy 111 indicates these sites should be used rather than building on greenfield sites like site 298.</p> <p>Remove site 298 from the housing allocations document.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Wildlife                      In the last 3mths alone we have had a vast amount of wildlife in our gardens including rabbits, squirrels, hedgehogs, bats, deer, foxes and badgers, we also have owls, woodpeckers and buzzard. When the Whitehorse Bussiness Park was built the numbers of all the above dropped, if these plans go ahead I would imagine we will loose all that. As this was one reason for buying here that would personally be heartbreaking. This is called Woodmarsh for a reason, being very wet at times.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The regular traffic congestions at Harnham Giratory, Downton road, Newbridge road, Coombe road and the A3084 Harnham/Netherhapmton road is already causing considerable traffic problems which need to be resolved before any further building developments take place. A further estimated 1000 vehicles using the A3084 on a daily basis is beyond imagination. There is further considerable build up of traffic congestion on Salisbury Race Days and on Tuesdays from the Livestock Market. Only very recently there has been a fatal pedestrian accident involving a vehicle carrying livestock. I have lived in Harnham since 1977 when the population was 8000. -Schools, roads, emergency services, community facilities etc remain the same. Schools are oversubscribed and running at full capacity. Secondary schools, apart from the boys Grammar school, are out of the area and difficult for travel/access. Non residents use side roads for car parking when working/shopping/travelling to and from the Railway Station causing havoc for buses and emergency services, particularly in Upper and Middle Streets, which are also used as a "rat run" when Netherhampton road is congested. In the past 40 years Harnham has grown from a village to an over extended suburb without any real change or improvements to the basic infrastructure. . The link road between Netherhampton and Churchfields was abandoned because of its harmful effect on the adjacent Water Meadows.</p> <p>A Relief road around Harnham needs to be considered before any further development takes place, Consideration needs to be given to a proposed new Secondary School as well as the proposed primary school. Facilities such as community spaces, a superstore on the west side of Salisbury, along with a doctor's surgery before the plans for the Lime Kiln site takes place.</p> <p>A cycle path from the proposed new development into Salisbury would be a necessity to alleviate some of the traffic. Further investigation is needed into the environmental effects on the flood plain. Flood defences have already been built in Harnham which are not perfect for keeping the river water at bay. The river still bursts its banks and has to go somewhere.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	On a personal note I am dismayed at the prospect of even more traffic along Silver Street Lane, the main route to the nearby Grove Primary School. The provision of speed humps in College Road has already resulted in a big increase in vehicles using the road, where in places the surface is in very poor condition. While I know highways are not the responsibility of the Planning Department I cannot understand why little used roads such as The Croft, Charlotte Street, Woodmarsh, etc. have been completely resurfaced in recent years while busier routes like Silver Street Lane have been allowed to deteriorate.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Please accept this attachment as an objection to housing sites 263, 297, 298, 613, 1021, 3260 and 3565. A number of windfall schemes will shortly be coming to fruition on "brownfield sites" in Trowbridge. The ex- Bowyers site, ex East Wing site, Ex WWDC office site, St Georges Works site are ones I am aware of. I recommend that, because of this, and my submission above, sites 263, 297, 298, 613, 1021, 3260 and 3565 be withdrawn from the current DPD and be subject to re-consideration within a new Trowbridge Community Area Plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Settlement Boundary Review 2017 Further to the Councils letter of 15th August 2017, I have been asked to write again to strongly emphasise the point below: Within E8 & F8 that all the gardens should be included and a rationalization of the line would be that it follows the line of large Conifer trees (E8). The line would join Monmouth Road at west end cottage but carry on down the road to the conifer trees and head off in a straight line until it gets to the gardens at the back of Mount Pleasant then turning at a right angle to join the current line. A site visit by some Members of the Council has now taken place and the area that the Council would like to see included are a mature garden + other gardens that are currently included. I have emailed 3 photos for your convenience.

		Insufficient public consultation Wider public consultation The plan puts forward two development sites in Harnham on opposite sides of Netherhampton Road but does not consider, or provide a clear opportunity for public comment on, their combined impact. This needs to take account not only of traffic congestion but of the increased risk of flooding, not only on the lower site, but further downstream in Harnham. H3.1 and H3.3 cannot be considered in isolation. H3.1 and H3.3 must be considered in terms of their combined impact. If site H3.1 is developed with 640, let alone 1,100 homes as the topic paper suggests, water will run off, not least onto site H3.3 which is already prone to flooding. The loss of natural drainage means that this surface water is first likely to collect on Netherhampton Road, worsening the traffic problems. Any loss of floodplain land such as H3.3 is likely to have an impact on homes further downstream in Harnham. My garden in St Mary's Road has flooded several times in the last 26 years, sometimes for weeks at a time. Indeed, a BBC news team has filmed the 'lake' that stretches from St Mary's Road to Queen Elizabeth Gardens in a bad year, as illustrated in the attached photo. Can the planners prove that development upstream will not increase the likelihood of such flooding occurring more frequently?

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">378</a>	Consultee Mr Ian Scaife	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 473545	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Figure	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		A.75			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Whiteparish Settlement Boundary</p> <p>The Whiteparish settlement boundary has not been updated to reflect the residential status of land to the rear and in the curtilage of 'The Banks, Common Road, Whiteparish' as approved by extant planning consent reference S/07/1416 dated 27 February 2008 (as attached);</p> <p>The planning consent S/07/1416 dated 27 February 2008 provides confirmation of the extent to which Salisbury District Council believed the curtilage of The Banks to be in residential use. With reference to the wording of the consent and its supporting schedules, notes and red and blue line boundaries, it confirms that the full extent of the SHLAA submission reference s181 (approximately 1.34 hectares) was in residential use for at least a ten year period up to 2008. This land is therefore overdue for inclusion in the Whiteparish settlement boundary.</p> <p>This being the case as stated in writing by the Council and as confirmed by recent legal advice, we respectfully request that the Council revise the Whiteparish Settlement boundary to reflect the full spatial extent of the decision (refer attached copy of S/07/1416 dated 27 February 2008). This is the most recent decision relating to this land and therefore supersedes any prior decision.</p> <p>The above referenced land is contiguous to the current Whiteparish village boundary. There is planning precedent set by a number of properties along Common Road further south of The Banks in the current Whiteparish Settlement boundary review for the inclusion of land subject to a planning application for continuing lawful use as residential land (previously agricultural land). Further details can be provided if needed.</p> <p>There is also some confusion on our part as to why the Whiteparish Church is shown as being within a revised settlement boundary. The citation relating to this amendment (coordinates H7 of the map) appears to reflect a misunderstanding of the nature of the site, its sensitivity and existing use as a Grade 1 listed church. Likewise it is unclear as to why the recently completed property 'Church Barn' adjacent to Whiteparish Surgery, The Banks and the Memorial Ground has been excluded.</p>

Comment ID:	379	Consultee Mr Ian Scaife  Person ID: 473545	Agent  Person ID:	Do you consider the draft WHSAP is legally compliant?	
				Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Table	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		2.3 Indicative Requirements			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>There is no evidence available within the draft document and supporting information that provides a robust assessment of need in the South Wiltshire Community Area or indeed the settlement of Whiteparish itself.</p> <p>The draft allocation plan dismisses any need for land within the South Wiltshire CA showing residual housing requirement dropping drastically from the 2006-2026 requirements to 2014 and 2015, with no requirement beyond. The documentation does not provide details of the 78 dwelling developable commitments 2017-2026 and therefore does not allow analysis of the likelihood of the expressed housing numbers coming forward. Relying on windfall housing is not a reliable delivery method when there is clear housing need.</p> <p>The residual South Wiltshire CA requirements rely on strategic commitments in the South Wiltshire CA area which appear ambitious in yield and delivery timing. The Churchfields site in particular is subject to site constraints such as contamination and significant land fragmentation across over the 200 separate plots registered with the Land Registry.</p> <p>Strategic supply aside, the only evidence available referencing housing need in the village appears to come from Whiteparish Parish Council. While this group may be representative of the sentiment of the vocal minority in the village, they are not qualified to gauge the level of housing need. This is pertinent when considering the positive benefits that a supply of the right kind of housing can have on the viability of the village as a local service centre, but also allowing the community to continue and thrive.</p> <p>Whiteparish would benefit from the allocation of appropriate land for the right kind of housing development and it the responsibility of Wiltshire Council to ensure that this evidence base is robust. For example, further investigation would reveal that there is extremely limited potential remaining for infill development within the proposed Whiteparish village boundary.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Draft Wiltshire Housing Site Allocations Plan                      Formal Pre-Submission Consultation on the Draft Plan                      I wish to draw your attention to what appears to be an error on the plan of revised settlement boundaries in Winterslow (Figure A.76) of the consultation documents (see attachment 1). On your plan, the revised settlement boundary is drawn arbitrarily across the middle of SHLAA Site 3408, Beechwood, whereas we feel it should have been drawn around the perimeter of this site, as shown on attachment 1 where I have drawn in the site boundary using green cross hatching, and as shown on my original plan which was submitted in 2007 (see attachment 2).                      There are number of reasons to support this contention as follows;</p> <ol style="list-style-type: none"> <li>1. The current draft of the Winterslow Neighbourhood Plan (see attachment 3) recommends the whole of SHLAA Site 3408 for residential development, as Primary Site WNP01, on the basis of planning criteria identified on page 1 of the document, and according to comprehensive community consultation carried out by the Neighbourhood Plan Steering Group.</li> <li>2. Development of this site would be sustainable, because Winterslow is identified as a Large Village within the Southern Wiltshire Community Area in the current adopted development plan - the Wiltshire Core Strategy (WCS) in Core Policies 1 and 24. The positive presumption in favour of sustainable development in plan-making is supported by National Planning Policy (NPPF Paragraphs 14 and 182) and by Core Policy 2 of the WCS in order to help meet the housing needs of settlements in Large Villages and to contribute to delivering the strategic housing requirements and objectives of the development plan (ensuring the delivery of housing land across the plan period in order to maintain a 5 year land supply at each HMA).</li> <li>3. SHLAA Site 3408 is very well positioned on the eastern boundary of Middle Winterslow, yet it is very close to all village amenities such as the shop and post office, bus routes, pub, village school and recreation ground, and within 1km on hard surfaced pedestrian routes from the village hall and doctor's surgery. Road vehicles can access the site without passing through the village or going past the school and there would be no difficulty (in principle) in accessing main services from the road outside.</li> <li>4. SHLAA Site 3408 as shown on the attached plans is fully compliant with the criteria set out in Table 2 of the consultation draft document (see attachment 4). The curtilage of the property at present is a large garden used for recreational and amenity space with outbuildings and established planting, particularly around the perimeter. SHLAA Site 3408 is on the western edge of the settlement, but nevertheless forms part of the built up area of the village. These are all reasons why the site was chosen by the Neighbourhood Plan Steering Group as Primary Site WNP01 and subsequently endorsed in comprehensive community consultation.</li> <li>5. And finally, there are no landscape features or planning considerations which could be used to justify what appears to be an entirely arbitrary division across the middle of the site.</li> </ol> <p>I would therefore be grateful if you would either correct this error in all future versions of this document, or alternatively, if there is some reason for what appears to be an arbitrary division across the middle of the site, then I would be grateful for an explanation.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Wiltshire Housing Site Allocation Plan –Pre-submission draft representationslandbetween206and208CorshamRoad,Whitley I write on behalf of our client, Mr W Bollen, to set out representations to the pre-submission Wiltshire Housing Site Allocations Plan in relation to land within his ownership between 206 and 208 Corsham Road, Whitley. This representation relates specifically to the proposed revised settlement boundary for Whitley. In undertaking the task of revising the settlement boundaries of the towns in Wiltshire, the Council has recognised that the existing settlement boundaries are out of date and do not reflect changes which have taken place since they were first established. The Council has acknowledged that houses and building along the eastern side Corsham Road form part of the settlement of Whitley and should be included in the settlement boundary. This includes Mr Bollen’s house at 208 Corsham Road and is supported. However, the proposed revision does not include all the land within Mr Bollen’s ownership. The land in question is shown in the attached aerial photo. It is a mown area of grass used as part of the garden to 208 Corsham Road for many years and clearly forms part of the village, as opposed to the open fields beyond. Its inclusion within the settlement boundary of Whitley would make logical sense as it would provide a consistent line with the rear of other properties already included with the revised HSAP boundary. The sites inclusion as proposed would be consistent with the settlement boundary review methodology as set out the relevant Topic Paper (Topic Paper 1) and would be consistent with the inclusion of other sites on the edge of Whitley.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I wish to strongly protest against the proposal to build 840 new houses in Harnham. There simply isn't the infrastructure to support such a plan. Anyone who has to use the Netherhampton/Harnham Road will already know that the volume of traffic is horrendous. The Harnham gyratory is a nightmare at all times of the day. Ambulances have difficulty getting through the traffic queues on their route to the hospital. Crossing the Harnham Road is almost impossible at times and extremely dangerous for old people and children. Indeed, there was a fatality only last week. I acknowledge the need for more housing, but please, let's think this through sensibly. Build the houses where the roads can cope with the huge amount of extra traffic which will be generated by 840 families travelling to and fro to work, school and the city.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Wiltshire Council Site Allocations Plan – Ridgeway Farm, Crudwell</p> <p>I am concerned about the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell. The Plan notes that housing sites will only be allocated by the Council where there is a strategic priority. I understand from others that the Plan results in an oversupply of homes in the Malmesbury Community Area and therefore, within its' own terms, there is no strategic priority in Crudwell. The needs of Crudwell are a separate issue and I comment as follows.</p> <p>I readily acknowledge that the Site Allocation Plan proposal was developed without the benefit of a Crudwell Neighbourhood Plan. Crudwell residents will soon produce our Neighbourhood Plan and I would expect it to reflect issues such as schooling, flooding, road capacity and safety, and infrastructure. Our views have not yet been expressed and therefore references to further development in Crudwell should be deleted pending the publication of our Neighbourhood Plan.</p> <p>I am not anti-growth. Despite the fact we love our current almost idyllic location I raised no objection to the current modest development at Ridgeway Farm. The County and Country have needs that must be met. The issue now is that any decisions should not be made without the benefit of local expression, no matter how imperfect our efforts in delivering those expressions.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>H11, I11, I12, I13, J13, J12, K12, K13 Amend boundary to include area of built residential and community facility development physically related to the settlement.</p> <p>Melksham Without Parish Council queries the inconsistencies in the criteria applied to farm buildings and farmyards at the edge of large villages. The methodology document (Topic Paper 1 Settlement Boundary Review Methodology 8. Revised settlement boundary review methodology) states that these will be excluded*, and farms have been excluded in both the settlement boundaries for Shaw &amp; Whitley and Melksham &amp; Bowerhill in the parish, with the exception of Woolmore Farm. It is noted that Woolmore Farm is owned by Wiltshire Council and currently being marketed for sale with a local estate agent. It is therefore queried why this farm is the exception to Wiltshire Council's own methodology criteria.</p> <p>* The settlement boundaries define the built form of the settlement by, where practicable..... Areas which have been excluded are: Employment development, farm buildings and farmyards, at the edge of large villages.</p> <p>Your inclusion of Woolmore Farm in the settlement boundary for Bowerhill is not consistent with your own methodology, therefore Woolmore Farm should be removed from the proposed settlement boundary for Bowerhill to be consistent.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 H3.3		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The road infrastructure is inadequate to support this development, and there is not enough detail in the Plan to explain how the road infrastructure would be sufficiently improved to accommodate the increased volume of traffic, given the lack of capacity at the junctions at either end of the A3094.</p> <p>The A3094 is heavily congested at times, with the consequential increase in air pollution during rush hour periods. The congestion coincides with school start and finish times, when there are high numbers of children and adult pedestrians walking along the Harnham and Netherhampton Roads breathing in the fumes. The pollution can only worsen.</p> <p>I did not support the previous plans for the Brunel Link/Harnham Relief Road several years ago, but for a development of this size, I do not see any viable alternative and think a version of the previous proposal needs to be considered prior to building a large scale housing development.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This objection email relates specifically to the land known as the 'Hilperton Gap' (Land west of Elizabeth Way) being included within the Housing Site Allocations Plan for housing development, covering the land in its entirety from the Elizabeth Way road through to Horse Road, Wyke Road and Victoria Road.</p> <p>We are writing to object and our comments are made below:</p> <p>The need to safeguard the countryside and the need to conserve trees and open land: The countryside surrounding Trowbridge, including Southwick are the last remaining green spaces to act as a buffer – without making Trowbridge one huge town encompassing many of our surrounding villages. During our 24 years living at Wyke Road in Trowbridge the surrounding area has changed enormously, unfortunately not always for the better. Countryside which ran from Staverton, Hilperton, the Wyke Road edge of Trowbridge through to West Ashton was open and unbuilt upon, over the last 20 years thousands of houses have now been built. We appreciate the need for Local Authorities to meet the Government's housing allocations for new builds, but surely there must come a point when the safeguarding of the last remaining countryside in an area which has seen extensive building must become of a higher importance than building a further housing development. The 'Hilperton gap' is greatly valued by local residents as a vital green lung for the North East of Trowbridge and the open space that preserves the two separate communities of Trowbridge town and Hilperton village. At a Trowbridge Town Council meeting which took place in 2015, which local residents attended, the Trowbridge Town Council's minuted conclusion was that the land known as 'the Hilperton Gap' should be safeguarded as a valued area of green space and should not be subject to building. I am sure the countryside surrounding Southwick is equally valued by local residents as much as the Hilperton Gap area is.</p>

This winter has been drier than past winters, yet since the Hilperton relief road has opened the land known as 'the Hilperton Gap' has been far wetter and more marshy than we have ever known it previously. Gateways are totally underwater, the stream which runs through the land overflows regularly now and floods the land. The 'pond' area dug out when the road was built does not stop the land from flooding. Our concern is if this land is built upon, the old cottages and properties which were built over a hundred years ago, with no history of flooding, will then be subject to future flooding.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing in opposition to the proposal to build houses on land adjacent to Southwick Court.                      With the ever growing population it is without a doubt that more housing will be needed but why does it have to be on green fields?                      The use of fields to walk in is not only good exercise but offers a wide open space away from cars and fumes - a place to get away for a while from the often busy and stressful lives so many people live now. Not everyone owns a car or can afford to travel away from the built up areas which they inhabit. How enriching it is for many people to watch birds fly across the fields at low level.                      Wildlife is already under threat and with the loss of more shrubs, trees and hedges, many of the latter having been there for decades and some of the trees being over a century old (such as the oak tree by the moat belonging to Southwick Court); this will surely have a knock on effect within the food chain and the eco system</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I am writing to clarify a matter that came up at the display yesterday at county hall, regarding planning and revised settlement boundaries. You are planning a revised boundary between Sandringham Road and Balmoral Road in Trowbridge. This boundary is running along the 3565 site. Please can you explain why, the answer given by your representative yesterday was inadequate and evasive, I as well as others thought so. It worries me that access to this site via one of these roads is planned. These roads were built as cul-de-sacs. My other concern is the boundary hedge which is protected by law. If you change the boundary as you intend then it will no longer form the boundary. So access can be obtained via your new boundary. If this is the case then I feel it is an abuse your power in a very underhanded way. So can you please explain why you deem it necessary to change the boundary at this location.

		DURRINGTON TOWN COUNCIL		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Amesbury Topic Paper and associated main document relating to Durrington		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Durrington Town Council has submitted its formal response outlining the areas where it feels the Plan is unsound, specifically relating to Durrington. This response can be found in the attached documents listed as Durrington Town Council Response to Wiltshire Council Draft Housing Site Allocations Plan 2017.</p> <p>Following the publication of the Draft Housing Site Allocations Plan (the Plan), Durrington Town Council set up a Task Group to deliver its response about the Plan (specifically relating to Durrington) to Wiltshire Council. Throughout the 10 week consultation period the Task Group has discussed the Plan with Wiltshire Council Spatial Department representatives at the Consultation events, conducted its own survey within Durrington, conducted fact finding, reviewed the Plan and other Wiltshire Council documents and held a Public Meeting for its residents on the 17th of August. As a result of the Task Group's work, the Town Council sat an Extraordinary Meeting on the 12th of September to approve the following response in relation to the Plan.</p> <p>The Town Council believes that the Plan (specifically relating to Durrington) is unsound because it is not Positively Prepared, Justified or Effective based on the following evidence: [see following reps]</p> <p>Summary Durrington should be recognised by Wiltshire Council as the unique, self-contained and sustainable larger village that it is, not be grouped with Amesbury and Bulford as a Market Town. Whilst there is an understanding and a need for affordable homes in the local area there are serious concerns about these being located in Durrington. It is felt that the current infrastructure (roads, medical services, parking) could not sustain these additional homes. Further developing the village would increase the reliance on services outside of the village, threatening the sustainability of Durrington as a village, especially with the additional 440 homes as part of Army Re-basing. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]</p>

				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.4 Church Lane Trowbridge				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to air my concerns about the choice of site 1021 (Church Lane) at a site for the proposed development of at least 40 dwellings. Planning policy states that councils should maintain the setting of Heritage Sites. Whilst the Draft Housing sites Allocations Plan does acknowledge St Johns Church and Southwick Court, it fails to mention the other listed buildings that surround this site. The sites at the back of Church Lane provide a rural setting for 6 Grade II Listed buildings as follows: -</p> <ul style="list-style-type: none"> <li>- St Johns Church School and Hall masters dwellings comprising 4 dwellings. (UID1021593)</li> <li>- Church of St Johns (UID 1364192)</li> <li>- 344 Frome Road (UID 1364193)</li> <li>- Rose Villa (UID 1021594) .</li> </ul> <p>National policy states that:</p> <p>129 - Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this assessment into account when considering the impact of a proposal on a heritage asset, to avoid or minimise conflict between the heritage asset's conservation and any aspect of the proposal.</p> <p>132 - When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation. The more important the asset, the greater the weight should be. Significance can be harmed or lost through alteration or destruction of the heritage asset or development within its setting. As heritage assets are irreplaceable, any harm or loss should require clear and convincing justification. Substantial harm to or loss of a grade II listed building, park or garden should be exceptional. Substantial harm to or loss of designated heritage assets of the highest significance, notably scheduled monuments, protected wreck sites, battlefields, grade I and II* listed buildings, grade I and II* registered parks and gardens, and World Heritage Sites, should be wholly exceptional. The photographs below clearly show that current development on this side of town has enabled these buildings to maintain their historic setting. In addition to the listed buildings at this site there is also an ancient water meadow:                      MWI73S79 Water Meadow, West of Upper Studley                      Summary                      A post medieval water meadow is visible as earthworks on air photographs.                      References                      National Monuments Record, ST 85 NW 95                      English Heritage Archives, 1577543                      Grid reference ST 8403 5643 (map quarter sheet ST85NW)</p>				

Appendix Q - Schedule of representations

	The site at Church lane should be maintained as open countryside to uphold the setting of these heritage buildings. Building in any of the current paddock would dramatically affect their setting, but also development of the larger field would impact on the open countryside that these buildings have shared for over 200 hundred years.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my concern about the inclusion of farmland at Southwick Court in Wiltshire Council's Draft Housing Site Allocation Plan (HSAP) to fulfil the Government's target housing figures for Wiltshire. The HSAP reference for this farmland is 3565 (Land east of the A361 at Southwick Court). My concerns for site 3565 are:</p> <p>1. Southwick Court lies outside the boundary of the town of Trowbridge. The outer limit of the town at this point is along the hedgerow and water course known as Lambrok Stream which runs beside the properties and public footpath on Boundary Walk (hence the name). Including Southwick Court fields in the housing allocation land would require redrawing the town boundary and removing the green buffer between the villages of North Bradley &amp; Southwick and the town of Trowbridge. Incorporating these villages into the town would remove their separate identity and community structure.</p>

The HSAP reference for this farmland is 3565 (Land east of the A361 at Southwick Court). My concerns for site 3565 are:</p> <p>2. The fields at Southwick Court are bounded by ancient hedgerows which form part of an historic parish boundary. There are maps dated 1890 (OS revision) and 1793 (Anderson &amp; Drury) which show these ancient hedgerow boundaries. These hedgerows would be classed as "important" under the terms of the 1997 Hedgerow Act as they meet the relevant criteria set out in the Act, ie the hedge must have a variety of broad leafed plants and trees, must run alongside a bridleway or footpath, and must be associated with a pre-1600 building associated with land management (Southwick Court is Grade 2 listed and was built in the 1500s).</p>

The HSAP reference for this farmland is 3565 (Land east of the A361 at Southwick Court).</p> <p>My concerns for site 3565 are:                  The proposed site at Southwick Court is subject to serious flooding. I understand that the inspection pits and test drillings recently carried out on this site show that the water table in these fields is less than one metre below the surface. It is also on a "clay belt" which makes surface drainage problematic. Having lived in this area for more than 40 years, I know that these fields flood on a regular basis after heavy rains, sometimes to a considerable depth. There has also been an issue with sewage waste from the drains crossing the fields in the local area where waste matter has backed up into gardens at the lower end of Sandringham Road</p>

The HSAP reference for this farmland is 3565 (Land east of the A361 at Southwick Court).</p> <p>My concerns for site 3565 are:</p> <p>4. The HSAP does not appear to have taken into consideration how a housing development on this site would be accessed. Any plans to access Southwick Court fields via one or more of the residential roads adjoining this site, ie Sandringham Road, Balmoral Road, Spring Meadows or Marston Road would have a severe environmental impact. These roads are not suited to the high volumes of vehicle movements that such a development would generate as, in the case of Sandringham Rd, Balmoral Road and Spring Meadows, these are narrow cul-de-sacs. Creating access roads through the "important" protected hedgerows would contravene the Hedgerows Act (see Point 2) and have a detrimental ecological effect by destroying the habitats of birds, bats and other wildlife that nest and feed in them.</p> <p>5. Entrance and egress at Southwick Court fields using the very busy A361 Frome Road would be dangerous because of impaired visibility. A similar argument would apply to the A363 North Bradley/Westbury Road. In addition, both the A361 and A363 are very heavily used by traffic entering and leaving the town, especially in the mornings, at the beginning and end of the school day (there are 3 senior schools, Trowbridge College, and 5 junior schools in the immediate area) and in the early evening. There are also considerable traffic movements on Bradley Road at other times of the day with vehicles going to and coming from the two Retail Parks situated there and the White Horse Business Park.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I would also comment in general terms on the HSAP:</p> <p>a) There is a disproportionate allocation of housing to the town of Trowbridge when compared with other towns in North and West Wiltshire (section 4.44 of the Draft Housing Site Allocations Plan identifies the Housing Market areas and proposed levels of growth). Almost 7,000 new dwellings are proposed for the town in the indicative requirement for 2006-2026, compared with 4,510 for Chippenham, 2,240 for Melksham, and 1,920 for Warminster.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I would also comment in general terms on the HSAP:</p> <p>b) Although Trowbridge is the County Town of Wiltshire, there has been a lack of infrastructure investment over many years, so it has limited industrial, business and commercial employment opportunities. A once vibrant shopping centre now has many empty retail premises and even the covered areas of Castle Place and the Shires have many unused shops. Building several thousand new homes in Trowbridge will simply make it a dormitory town for people working in places such as Bath, Bristol, Swindon and Chippenham, with the resultant negative environmental impact caused by substantial increases in traffic flow on the already narrow and congested roads in and around the town.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">417</a>	<b>Consultee</b> Sue Holt  <b>Person ID:</b> 1124853	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I would also comment in general terms on the HSAP:</p> <p>c) New regulations were proposed in April 2017 to encourage local authorities to speed up the development of derelict and under used land for new houses by creating Brownfield Registers. On 3rd April 2017 the government website quoted the Rt Hon Gavin Barwell, who was then the Housing and Planning Minister, as follows                  “The regulations implementing brownfield registers and permission in principle through brownfield registers have been laid in Parliament as part of secondary legislation relating to the Housing and Planning Act. They will come into force 21 days after being laid”.</p> <p>Wiltshire Council does not appear willing to take these requirements into consideration for the HSAP. Their response to questions submitted to Wiltshire Council’s Strategic Planning Committee by Cllr Ernie Clark, prior to their meeting on 13th September 2017, about the progress of the Town &amp; Country Planning (Brownfield Land Register) Regulations 2017 and asking which sites are anticipated to be listed under Part 2 of the Register has brought the following response:                  “The Government did not release the data standards that they require Councils to use in the compilation of the Registers and the Planning Practice Guidance on its preparation until July 28th 2017”.</p> <p>Wiltshire Council’s response includes the statement that training would take place during August so that the Register can be compiled by the end of the year. It also states that “it is not envisaged that any (brownfield) sites will be listed in Part 2 of the Register in the first publication”. Therefore because no sites are envisaged for listing “the publication of the Brownfield Register will not require any changes to the draft Wiltshire Sites Housing Allocation Plan (sic)”.</p> <p>Please note: I have passed on the questions raised by Cllr Ernie Clark, and Wiltshire Council’s response, to the Rt Hon Alok Sharma, MP who has taken over from Gavin Barwell as the Government’s Housing &amp; Planning Minister. I have requested clarification of the implementation of the Housing &amp; Planning Act with specific reference to the Brownfield site register.</p> <p>d) In Trowbridge there are a number of Brownfield and Windfall sites which are all within the existing town boundary and could potentially yield building land for more than the number of houses proposed for three extremely controversial green field sites in the draft HSAP. These three green field sites are: Southwick Court fields (HSAP reference 3565), Land at the “Hilpertown Gap” (HSAP reference 263/297); and the buffer land between the village of North Bradley and town of Trowbridge (HSAP reference 298).                  Brownfield/windfall sites which could - and should - be considered are the Bowyers factory, the West Wilts District Council offices at Bradley Road, the East Wing at County Hall, the Ashton Street Centre, the Virgin Media Pavilions on the White Horse Park, and Margaret Stancomb school/the area around Trowbridge Hospital. Most have been standing unused and/or derelict for many years, and are either Wiltshire Council owned or have been purchased by developers who have made no attempt to build on them, even though some sites already have at least outline planning approval. Less than half of the indicative requirement for housing in Trowbridge for the period 2006-2026 has been built to date which would seem to indicate a lack of interest in fulfilling this requirement on the part of developers [6,810 dwellings proposed, 2,625 built]. I would urge you to consider these issues when the draft HSAP is placed before the</p>				

Appendix Q - Schedule of representations

	<p>relevant committees and cabinet so that the three green field sites identified in section d) above are removed from the Plan and available brownfield sites within the town of Trowbridge are utilised. Removing the eyesores of derelict buildings and also areas which are cleared, but surrounded by high wooden fencing such as the Bowyers and West Wilts District Council office sites, would bring a dramatic improvement to the visual appearance of the town and maybe encourage outside investors to consider it for future business development purposes.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Our objections in part relate to the methodology applied to determine settlement boundaries. This needed to be explored and has not been justified by the evidence base. Further, the Council's assessment appears subjective and is not borne out by the detailed characteristics of the individual sites in question.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Contradictions in the Strategy  A core strategy or local plan is considered "sound" when it is consistent with national policy.  Paragraphs 72, 111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide :  The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), Identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.  I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.  The councils view that they can justify development here as opposed to local villages on the basis that it provides sustainable development is clearly in question. There is neither the infrastructure or setting for development on this side of town.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows: Contradictions in the Strategy</p> <p>A core strategy or local plan is considered "sound" when it is consistent with national policy.</p> <p>Paragraphs 72, 111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide :</p> <p>The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), Identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.</p> <p>I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p> <p>Accessibility from sites 3620</p> <p>The A361 is a blackspot for accidents both "in the dip" where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. Also, sites at Church lane, Southwick Court and Old Brickfields are being considered as they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles) No evidence has been provided that this would be the case. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour. The Councils view that they can justify development here as opposed to local villages on the basis that it provides sustainable development is clearly in question. There is neither the infrastructure or setting for development on this side of town.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Rowde is identified in the Wiltshire Core Strategy (WCS) as a sustainable "Large Village" in Core Policy 1 Settlement Strategy, which has a very good range of community and businesses which is assessed as suitable for some sustainable growth. However, in the East Wiltshire HMA there has been a blanket approach to restrict new housing in the large villages which is loosely justified because of the strength and supply overall in the HMA. The proposed village settlement boundary has been drawn tightly around the existing built area and provides few opportunities for future development. Almost all infilling has been taken up within the previous decade(s) within Rowde and consequently the village has had a low level of housing completions and commitments since 2006 (estimated at about 8 -10 dwellings in total) and there are now few suitable and available housing sites for sustaining the Village up to 2026. In the absence of a Neighbourhood Plan Wiltshire Council are required to ensure that suitable housing sites are available.</p> <p>There is no evidence that any site survey analysis has been carried out by Wiltshire Council within Rowde and the sites rejected on the basis of the limited informal consultation with the Parish Council. The "Report on the Informal Consultation on the Approach to Large Villages January 2016" states that site ref 3367 has infrastructure drainage and flooding issues and highway constraints. This is attributed to the Rowde Parish Council but this is not verified and the comments/opinions are not substantiated. The landowner has not previously been given the opportunity to respond to these assertions despite a submission in the previous consultation round in 2015. The land is already raised above the flood zone and highway analysis and initial consultation with Wiltshire Council states that there are no technical impediment to development (supporting document attached). The site can accommodate 6-8 small dwellings which will assist in delivering local housing needs.</p> <p>Settlement boundary proposal should be adjusted to include land adjacent to the existing settlement boundary to allow some sustainable development within the plan period. To include site 3367</p>

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other			<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>  Positively prepared  Justified  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	[NB all Figures, Tables and Plans referred to within this representation can be found within the attached document] THE RELEVANT POLICY TO WHICH THIS REPRESENTATION RELATES 1.1 This objection centres on the following parts of the document; 6. Settlement boundary review (and its supporting text) Table 6.2; Appendix A –Warminster Community Area, A.70 Sutton Veny proposals for revised settlement boundaries. Particular regard is focussed on Sutton Veny but the representation also questions the validity of the policy approach as a whole, in terms of its wording and construct. 1.2 This representation is structured to firstly consider the rationale underpinning the requirement for the settlement review before considering the housing supply position within the North West Housing Market Area (NW HMA) and the Warminster Community Area (WMCA). It goes on then to consider my Client’s land in Sutton Veny and the case for its inclusion within the revised settlement boundary. An assessment of other development options within Sutton Veny is undertaken and thereafter the requested change to the WHSAP is outlined before concluding remarks are drawn. 2 EVOLUTION OF THE REQUIREMENT FOR SETTLEMENT BOUNDARY REVIEW 2.1 The Wiltshire Core Strategy, Inspector’s Report December 2014 noted (at paragraph 36) that ‘the Council has not reviewed the extent of the boundaries to inform the CS; instead relying upon the pre-existing development plan documents. Some of these were adopted several years ago, for example the Kennet Local Plan (2004), and it cannot be argued with great strength that the settlement boundaries contained therein are up to date for the purposes of the CS plan period’. 3 2.2 The Inspector went on ‘to review boundaries, the CS identifies community led planning as the vehicle to deliver the necessary updates. However, there remains a considerable risk that, for example, Neighbourhood Plans will not be delivered across the county in a comprehensive or timely fashion. Such an outcome would, in the context of the CS settlement and delivery strategy, potentially preclude development initiatives on the basis of an unjustified evidence base and therefore not represent a positive form of planning’. 2.3 The Inspector suggested main modification 5 to the Core Strategy noting that ‘there is scope to advance a timely review through a separate Development Plan Document’. At paragraph 41 the Inspector concluded that ‘CP2 therefore relies heavily on the existence of settlement boundaries to manage growth. Whilst the principle of such an approach may be justified in terms of providing plan led clarity to what development may go where, the efficacy of the plan is partially undermined by the absence of particularly robust evidence in support of the identified limits for each settlement...the effectiveness of CP2 in combination with CP1 is dependent upon a timely review of settlement limits as described in paragraph 37 above’. 2.4 Topic Paper 3: Settlement Strategy (one of the topic papers which form the evidence base for the Core Strategy) advises (on page 45) ‘existing boundaries offer protection to the countryside and guard against urban sprawl ribbon development. However given that existing boundaries are out of date and do not reflect the current urban form there are development pressures along the boundaries’.				

#### Appendix Q - Schedule of representations

2.5 Paragraph 3.34 of the same document guides that at large villages 'the majority of development will take the form of small housing and employment sites within existing settlement boundaries, although some limited development may be appropriate adjacent to current settlement boundaries'.

2.6 Paragraph 3.40 goes on to note that in settlements where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'.

2.7 The current position then is that the settlement boundaries are out of date. In the case of the settlement boundaries in the former West Wiltshire area these were drafted in the early 2000s prior to the west Wiltshire District Plan 1st Alteration being adopted in 2004. The settlement boundary of the large village of Sutton Veny has not been reviewed in at least 15 years and as the CS Inspector highlights the settlement boundaries should be considered to be out of date. This fact was also accepted by the Council in CS Topic Paper 3: Settlement Strategy (pg. 45).

2.8 The speedy review, update and enlargement of settlement boundaries which the Inspector explicitly sought has not happened. It has been two and a half years since the CS was adopted and we have only just received a pre-submission draft plan for the Site Allocations DPD. In this case despite the acceptance in Topic Paper 3: Settlement Strategy that some growth should be allowed outside of the existing settlement the draft boundary for Sutton Veny does not facilitate this. The only areas of expansion encompass existing developed sites with no prospect of intensification.

2.9 Within Wiltshire progress on Neighbourhood Plans has also been limited. So far only 14 have been made and none have been made in 'large villages' which was one of the intended vehicles for further development to be brought forward. Sutton Veny Parish is not designated as a 'Neighbourhood Planning Area' so there is no prospect at present for the further development needs of the village to be met through Neighbourhood Planning.

2.10 The fears expressed by the CS Inspector have come to pass, to repeat, that there is 'considerable risk that, for example, Neighbourhood Plans will not be delivered across the county in a comprehensive or timely fashion. Such an outcome would, in the context of the CS settlement and delivery strategy, potentially preclude development initiatives on the basis of an unjustified evidence base'. The Site Allocations DPD is only in draft format but this threatens to further stifle growth in Sutton Veny and in the absence of a Neighbourhood Plan housing delivery will be frustrated.

4.3 The WHSAP attempts to deal with the housing shortfall and proposes allocations within Warminster totalling 200 dwellings and a further allocation in Chapmanslade of 35 dwellings. Even if one presumes that these allocations are deliverable the strategy is not planning for enough housing to meet the objectively assessed need (OAN). The settlement boundary review has followed a process designed to regularise existing areas of development which sit outside the boundary rather than to seek to support additional windfall developments at the large village.

5.2 The existing settlement boundaries have limited development opportunities within the large villages and this is borne out in the limited level of supply outlined above. It is then all the more critical that the review of the settlement boundaries be used to boost supply. The settlement boundary review has though been undertaken with the rationale being that the review should seek to update and accurately reflect circumstances on the ground since they were first established. In practical terms this has resulted in the large villages settlement boundaries being expanded to include some areas of the villages which should hitherto have been incorporated but also potentially developable areas have been removed as the boundaries have been tightened up in other places.

5.5 The CS Inspector was clear that the existing settlement boundaries were out of date and the CS was found sound on the basis that these would be swiftly updated. He noted that where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'.

7.3 Turning then to the revised boundary, it has been acknowledged by WC that the amendments have been made to regularise existing developments which sit outside of the settlement boundary rather than to identify new sites where windfall development may occur. An examination of the revised boundary very much confirms this as the approach. The only potential plot for development which I have been able to identify is a small parcel of land adjacent to No.5 Bests Lane which might accommodate one dwelling.

#### Appendix Q - Schedule of representations

7.4 Other pieces of land of sufficient size to accommodate further residential development only include the grounds of the church of St John (on the High Street) or the grounds of The Manor House, Duck Street. However both of these are listed buildings and development within their grounds would result in substantial harm to the setting of these heritage assets and so would not be countenanced for development.

7.5 The conclusion of this exercise is that only one new dwelling could potentially be brought forward within Sutton Veny as a result of the settlement boundary review in its current form.

The revised settlement boundary for Sutton Veny should be expanded to include my Client's garden in full which is depicted at (Fig 1) and (Appendix 2). This will contribute to the plan in seeking to meet the as yet unmet housing need in the WMCA and achieving the 6 year housing land supply which the plan should be designed to deliver.

6.15 The land put forward here is located on the High Street relatively central to the core of the village with key facilities like the school and church directly opposite it. The proposed widened inclusion of land would not extend the form of the village which clearly extends further to the south east which has been recognised in that the settlement boundary has been extended significantly. The site is well screened with the existing treed boundary and the adjoining land to the south east is a field as can be seen on Figs 6, 7 and 8. There is no risk therefore that development might leap frog if the settlement boundary is widened.

6.16 It is important to have regard to the purpose of the settlement boundary review in considering whether my Client's land should be included in full. The CS Inspector noted that where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'. Indeed, the CS was only found sound on the basis that the settlement boundary review would be positively prepared. By including my Client's land this would allow for a small development to come forward to assist in meeting local housing need in Sutton Veny which to date has only delivered 2 dwellings during the CS period from 2006.

#### 9 OVERALL CONCLUSIONS

9.1 The adoption of the CS was predicated upon a swift review of the 'out of date' settlement boundaries which was to be delivered through a separate DPD taking place quickly and the review of settlement boundaries was required to provide additional opportunities for residential development. Sutton Veny is not undertaking a NP so this is all the more important.

9.2 The WHSAP has been drafted on the basis of an estimated supply of 7,446 dwellings over the 5 years 2016-2021 within the NWHMA (Wiltshire Housing Land Supply Statement - March 2017). Subsequent planning appeals including most recently the development of up to 60 dwellings near Lyneham by Gleeson Developments Limited has reduced the agreed deliverable supply over this period to 6,891 dwellings. In this context the plan needs to be reconsidered to provide additional housing.

9.3 The latest position on housing land supply is that there is very limited flexibility within the NWHMA with a currently agreed supply of only 74 dwellings over the minimum housing level required. This fails to meet the WHSAP requirement for a 6 year supply to be deliverable.

9.4 Within the WMCA the housing land supply is particularly constrained. Even taking into account the proposed allocations through the WHSAP this still leaves a residual requirement for 259 dwellings to be identified just to meet the minimum requirement for the WMCA. The forecast rates of housing delivery likewise require a step change in supply with only 693 delivered in the first 11 years of the plan period and 1,367 completions required in the remaining 8 years which is a significant risk to delivery.

9.5 Against this backdrop of unmet housing need the settlement boundaries of the large villages have been reviewed to regularise existing areas of the settlements but no expansions have been identified to meet the minimum level of housing need. Sutton Veny has only delivered 2 dwelling in the CS period so far and is failing to meet identified need.

9.6 Under the auspices of the revised settlement boundary review methodology my Client's land as outlined in (Fig 1) and (Appendix 2) should be included in its entirety. The land is part of the residential garden of Prospect House and whilst the proposed amendment to the settlement boundary includes part of the land, recognising that it forms residential land physically related to the settlement, the same is true of the remainder of the garden so this should be included. This is particularly important because the revised methodology for settlement boundary review specifically excludes the prospect of subdividing gardens with the boundary which was strongly opposed during the informal consultation on the emerging methodology.

Appendix Q - Schedule of representations

	<p>9.7 The revised methodology is clear that gardens should be included within the settlement boundary with the earlier iteration of the methodology, which sought to exclude large gardens, being removed from the revised methodology.</p> <p>9.8 Whilst not a policy requirement for garden land in large villages under the revised methodology it is clear that the inclusion of my Client's land will not extend the settlement which has been acknowledged in the revised methodology to extend the length of the High Street to the south east. The site likewise has a strong well treed boundary to the south east running the length of the site and this is the appropriate 'physical feature on the ground' to mark the edge of this part of the village.</p> <p>9.9 The existing methodology for settlement boundary review should thus include my Client's land. The housing shortage and lack of available supply to meet demand in Sutton Veny lend further significant weight to the land being included prior to examination of the WHSAP.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>[NB all Figures, Tables and Plans referred to within this representation can be found within the attached document]</p> <p>6 MY CLIENT'S LAND IN SUTTON VENY AND THE CASE FOR ITS INCLUSION WITHIN THE SETTLEMENT BOUNDARY OF THE VILLAGE</p> <p>6.1 My Client's residential curtilage is shown in the below (Fig 1) and as a scaled drawing in (Appendix 2). The suggested amended settlement boundary is reproduced at (Fig 2) and the rationale for proposed amendments to the settlement boundary at (Fig 3). Fig 2 shows that a portion of my Client's curtilage has been included within the revised settlement boundary however the majority of the land has been excluded.</p> <p>6.2 The indicated rationale for the partial inclusion of the land is explained by referring to the corresponding grid reference note which is J8 which notes that the boundary has been amended to include residential development that is physically related to the settlement. This trend is repeated to the south west of the site with the inclusion of Springhead and Duck Street within the boundary.</p> <p>Fig 1 – Residential curtilage of Prospect House, Sutton Veny                  Fig 2 – Extract from indicative revised settlement boundary High Street, Sutton Veny                  Fig 3 – The rationale for amendments to the settlement boundary</p> <p>6.3 The revised settlement boundaries underpinning the WHSAP should reflect WC's methodology for reviewing the boundaries which is outlined in WHSAP Topic Paper 1. The boundary review methodology was put out for 'informal consultation' to the Parishes and the consultation feedback has been summarised at paragraph 6.5 of that document. One of the key conclusions was that respondents 'disagreed that the settlement boundary should exclude large gardens and particularly objected to the line being drawn through the middle of the curtilage of properties'. It was also 'argued that there was less opportunity to meet NPPF and Wiltshire Core Strategy housing targets on land within the settlement boundary because the proposed changes removed land with only minor additions. This resulted in tightly constrained settlements, excluding large gardens'.</p> <p>6.4 As a result of the 'informal consultation' exercise WC note at 7.20 of the Topic Paper that 'the revised settlement boundary review methodology will include the curtilage of a property that relates more closely to the built environment, e.g. a garden), or has limited capacity to extend the built form of the settlement in terms of scale and location'. The revised settlement boundary review methodology is thereafter produced at 8.2 of the Topic Paper and reproduced at (Fig 4) here for convenience.</p> <p>Fig 4 – Settlement boundary review methodology</p> <p>6.5 The qualifying criteria are clear that areas of garden should be included because these are uses which relate more closely to the built environment. The policy specifically allows for this and also allows for developments which have limited capacity to extend the built form of the settlement. The policy does not require a site to comply with both of these criteria because the policy wording uses the word or rather than and.</p> <p>6.6 The policy guards against large parcels of land coming forward by deliberately excluding areas which are more closely related to the open countryside (e.g. a field or paddock) from being included within the settlement boundary. It is important to highlight that there was a change between the draft methodology and the revised methodology regarding the definition of sites which should be excluded from the settlement</p>				

## Appendix Q - Schedule of representations

boundaries. At the draft methodology stage the plan sought to exclude 'the curtilage of properties that have the capacity to extend the built form of the development. This includes large gardens'.

6.7 The revised methodology removed any reference to garden land being excluded which was in response to the 'informal consultation' exercise. It now excludes those uses which relate more closely to the open countryside e.g. fields or paddocks. There can in this context be no question that the revised methodology excludes areas of garden from being located within the settlement boundary. As has been reported, WC accept that the splitting of curtilages with the settlement boundary should not occur in any case following strong consultee input to this effect.

6.8 The settlement boundary has, as referenced above, been extended to include a further portion of my Client's domestic garden but it has not though included the whole of the garden and therefore at present splits the curtilage. WC acknowledge that the positioning of the boundary is a desk top exercise and this would appear to be the reason for the misunderstanding in this case. Fig 5 is an extract from WC's mapping system which may help to explain this. On WC's mapping system the area of garden to the south east of the house is given a different colour and is annotated with trees. The practical situation on the ground is very different and aerial photography in (Fig 6) and (Fig 7) serve to illustrate this.

Fig 5 – Extract from Wiltshire Council mapping system

Fig 6 – Extract from BING maps (Birds eye view)

Fig 7 – Extract from BING maps (aerial view)

6.9 The aerial photography clearly shows the distinction between the well mown area of grass which comprises the garden of the property and the agricultural land beyond to the south west and south east. The edge of the curtilage at the south eastern end of the garden is marked by a strong linear row of trees which extend the length of the boundary and beyond. This is a strong physical marker which distinguishes the end of the residential garden land from the agricultural field beyond see (Fig 8).

Fig 8 – Photo of the boundary of the garden of Prospect House with the agricultural land beyond

6.10 The garden itself can be seen from the High Street only from the south eastern corner. Fig 9, Fig 10 and 11 are photos taken from within the site of the garden area which has been excluded from within the boundary. These photos clearly demonstrate the residential use and domestic appearance of the land, in common with the aerial imagery.

Fig 9 – View of the garden of Prospect House from the western boundary

Fig 10 – Photo from within the site showing ornamental planting and grassed lawn area.

Fig 11 – View back towards Prospect House from within the garden being put forward for inclusion within the settlement boundary

6.11 Fig 11 shows that the garden is not subdivided i.e. there is no logical barrier splitting the garden. It has always been and continues to be used as one garden space in this regard with free passage between each part of the garden.

6.12 The existing settlement boundary has been recognised by WC as splitting the residential garden of the property. As outlined above the justification for extending the settlement boundary in box J8 (which includes part of my Client's land) is given to include residential development that is physically well related to the village. The area of garden which we now seek inclusion within the settlement boundary should be included when adopting the 'revised methodology' which underpins the WHSAP because the guidance is explicit that the curtilage of property that relate more closely to the built environment (e.g. a garden) will be included. 23

6.13 The policy test does not require garden land to have limited potential to extend the built form of the settlement rather this test is applicable for land which relates more to the open countryside and in those cases a proposal would need to have the capacity to substantially extend the built form. In the case of my Client's land it would not extend the built form of the settlement. The land is in residential use already and there is a strong well treed boundary to the south east which would prevent development sprawling outside of the land already in residential use.

6.14 WC have accepted in producing this revised methodology that the settlement of Sutton Veny was not properly enclosed within the existing settlement boundary. This has resulted in the draft suggested settlement boundary being expanded significantly in a south easterly direction. My Client's land is directly opposite the village school and church which clearly form part of the heart of the village. These community assets have been included within the settlement boundary. Likewise the further ribbon development along the High Street to the south east and the cul de sac of Springhead and the residential development along Duck Street has been included. The revised settlement boundary in this regard better reflects the extent of the settlement.

6.15 The land put forward here is located on the High Street relatively central to the core of the village with key facilities like the school and church directly opposite it. The proposed widened inclusion of land would not extend the form of the village which clearly extends further to the south east which has been recognised in that the settlement boundary has been extended significantly. The site is well screened with the

## Appendix Q - Schedule of representations

existing treed boundary and the adjoining land to the south east is a field as can be seen on Figs 6, 7 and 8. There is no risk therefore that development might leap frog if the settlement boundary is widened.

6.16 It is important to have regard to the purpose of the settlement boundary review in considering whether my Client's land should be included in full. The CS Inspector noted that where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'. Indeed, the CS was only found sound on the basis that the settlement boundary review would be positively prepared. By including my Client's land this would allow for a small development to come forward to assist in meeting local housing need in Sutton Veny which to date has only delivered 2 dwellings during the CS period from 2006.

The revised settlement boundary for Sutton Veny should be expanded to include my Client's garden in full which is depicted at (Fig 1) and (Appendix 2). This will contribute to the plan in seeking to meet the as yet unmet housing need in the WMCA and achieving the 6 year housing land supply which the plan should be designed to deliver.

### OVERALL CONCLUSIONS

9.1 The adoption of the CS was predicated upon a swift review of the 'out of date' settlement boundaries which was to be delivered through a separate DPD taking place quickly and the review of settlement boundaries was required to provide additional opportunities for residential development. Sutton Veny is not undertaking a NP so this is all the more important.

9.2 The WHSAP has been drafted on the basis of an estimated supply of 7,446 dwellings over the 5 years 2016-2021 within the NWHMA (Wiltshire Housing Land Supply Statement - March 2017). Subsequent planning appeals including most recently the development of up to 60 dwellings near Lyneham by Gleeson Developments Limited has reduced the agreed deliverable supply over this period to 6,891 dwellings. In this context the plan needs to be reconsidered to provide additional housing.

9.3 The latest position on housing land supply is that there is very limited flexibility within the NWHMA with a currently agreed supply of only 74 dwellings over the minimum housing level required. This fails to meet the WHSAP requirement for a 6 year supply to be deliverable.

9.4 Within the WMCA the housing land supply is particularly constrained. Even taking into account the proposed allocations through the WHSAP this still leaves a residual requirement for 259 dwellings to be identified just to meet the minimum requirement for the WMCA. The forecast rates of housing delivery likewise require a step change in supply with only 693 delivered in the first 11 years of the plan period and 1,367 completions required in the remaining 8 years which is a significant risk to delivery.

9.5 Against this backdrop of unmet housing need the settlement boundaries of the large villages have been reviewed to regularise existing areas of the settlements but no expansions have been identified to meet the minimum level of housing need. Sutton Veny has only delivered 2 dwelling in the CS period so far and is failing to meet identified need.

9.6 Under the auspices of the revised settlement boundary review methodology my Client's land as outlined in (Fig 1) and (Appendix 2) should be included in its entirety. The land is part of the residential garden of Prospect House and whilst the proposed amendment to the settlement boundary includes part of the land, recognising that it forms residential land physically related to the settlement, the same is true of the remainder of the garden so this should be included. This is particularly important because the revised methodology for settlement boundary review specifically excludes the prospect of subdividing gardens with the boundary which was strongly opposed during the informal consultation on the emerging methodology.

9.7 The revised methodology is clear that gardens should be included within the settlement boundary with the earlier iteration of the methodology, which sought to exclude large gardens, being removed from the revised methodology.

Appendix Q - Schedule of representations

	<p>9.8 Whilst not a policy requirement for garden land in large villages under the revised methodology it is clear that the inclusion of my Client's land will not extend the settlement which has been acknowledged in the revised methodology to extend the length of the High Street to the south east. The site likewise has a strong well treed boundary to the south east running the length of the site and this is the appropriate 'physical feature on the ground' to mark the edge of this part of the village.</p> <p>9.9 The existing methodology for settlement boundary review should thus include my Client's land. The housing shortage and lack of available supply to meet demand in Sutton Veny lend further significant weight to the land being included prior to examination of the WHSAP.</p>

The Inspector in reaching his decision considered the latest position in terms of the Council's ability to demonstrate a 5 year land supply in the North and West Housing Market Area (NW HMA). The Inspector concluded in the period 2016-2021 the minimum target is 6,817 dwellings (which includes a 5% buffer) and that the Council's supply would be 6,891 as opposed to the 7,033 which was alleged by the Council. The agreed supply figure for housing only marginally therefore exceeds the required level of housing by a projected 74 dwellings over the next 5 years. 3.2 This calculation presumes also that the Council will continue to be required to demonstrate only a 5% buffer above the 5 year housing target. The Inspector in this appeal concluded that a 5% buffer was appropriate despite an earlier Inspector ruling in a Malmesbury appeal that persistent under-delivery had taken place. The Inspector did however sound a cautionary note in concluding 'overall whilst I acknowledge performance is not strong in housing delivery and there are worrying signs that the Council need to address, particularly in the more recent years since adoption of the WCS where delivery has not met requirements, I do not conclude that under delivery at this point has been persistent in the context of the framework'. 3.3 The Government White Paper 'fixing the broken housing market' published a consultation response to a proposed Housing Delivery Test. This proposes an assessment of delivery against the housing requirement in the past 3 monitoring years, beginning in November 2017. In cases where delivery over this time period falls behind then a 20% buffer may be required. This measure is likely to increase the risk of Wiltshire Council having to apply a 20% buffer which would immediately in the NW HMA result in a lack of a five year land supply. 3.4 The review of the need for site allocations and of the settlement boundaries which underpins the WHSAP was predicated on a very different understanding of the housing trajectory coming forward over the 5 year period 2016-21. Hitherto the Council identified a supply of 7,446 dwellings against a target of 6,817 dwellings. The Inspector in the Lyneham appeal referred to above concluded that the supply was actually 6,891 dwellings against a target of 6,817. 3.5 Delivery rates have failed to meet the Council's expectations and in the months since the publication of the Land Supply Statement (March 2017) 555 dwellings have fallen away from the projected deliverable 5 year land supply. The published WHSAP has clearly been superseded by events and the appeal conclusions clearly indicate there is a need to increase supply within the NW HMA to avoid the risk of a lack of 5 year housing land supply occurring. The plan is un-sound in this regard because it is not positively prepared and it is not justified because it needs to be reviewed in terms of the material change in circumstances which the Lyneham appeal has yielded. 3.6 The WHSAP recognises the uncertainties inherent in housing delivery. Paragraph 2.3 of Topic Paper 4: Developing Plan Proposals advises that WC's strategy is 'to be sure of maintaining a five year housing land supply over each of the remaining years of the plan period, annual				

## Appendix Q - Schedule of representations

supply should exceed the five years and buffer required by planning policy. Any target level will be arbitrary but the Plan might look to provide at least six years of supply in each of the remaining years of the Plan period (to allow for any possibility of under-delivery in the future)'.  
3.7 The 5 year housing land supply trajectory as published in the NW HMA purports to demonstrate that this is achievable in the HMA. This assessment is however based upon the now out of date projected deliverable supply. Whilst a delay in supply might bolster housing delivery at the end of the plan period, this becomes more uncertain when looking towards the end of the plan period. Based upon the Inspector's conclusions on housing land supply in the Lyneham appeal it is clear that WC will be unable to demonstrate a 6 year supply over the forthcoming 5 years (2017-22). The WHSAP therefore needs to be fundamentally looked at in respect of the NW HMA in order to boost supply if it is going to achieve its own stated goal of at least a 6 year supply being projected in each of the remaining Core Strategy years to 2026. Given the required step change in delivery rates and the recent under-delivery of housing it is argued that a 6 year supply is an entirely reasonable and necessary target.

#### 4 HOUSING SUPPLY IN WARMINSTER AND ITS ASSOCIATED COMMUNITY AREA

4.1 The position is significantly worsened when looking at the housing position for Warminster and its associated community area. Evidence base Topic Paper 3 to the WHSAP table 2.2 reproduced below evidences the position;  
4.2 The Council's evidence shows a residual requirement of 494 dwellings. This represents nearly 25% of the required supply needing to be found through the WHSAP by a combination of settlement boundary review and site allocations. Against this challenging housing target it is important to also recognise that at present only 693 completions have taken place in the first 11 years of the plan period averaging 63 completions per annum leaving 1,367 completions required over the last 9 years of the plan period at a delivery rate of 151 dwellings per annum. This requires a real step change in housing delivery in the area and any delays in bringing the West of Warminster housing allocation for 900 forward to be delivering housing from 2018 will make the situation much worse. This lack of contingency and reliance on one large site puts the already inadequate levels of housing being projected at risk of slippage.  
4.3 The WHSAP attempts to deal with the housing shortfall and proposes allocations within Warminster totalling 200 dwellings and a further allocation in Chapmanslade of 35 dwellings. Even if one presumes that these allocations are deliverable the strategy is not planning for enough housing to meet the objectively assessed need (OAN). The settlement boundary review has followed a process designed to regularise existing areas of development which sit outside the boundary rather than to seek to support additional windfall developments at the large village.  
4.4 The WHSAP recognises as did the CS that area based targets for housing need not be overly prescriptive indeed they should not be recognised as maximum levels of appropriate development. There are some instances of settlements and community areas which WC consider will not be capable of delivering their required levels of development. Core Policy 31 of the CS (paragraph 5.158) outlines the specific issues related to the WMCA but at paragraph 2.6 of the WMCA Topic Paper it is noted that 'neither the WCS or the IDP identify insurmountable issues to the extent that they would restrict delivery of the level of housing proposed over the plan period'. There is then no reason articulated by WC to explain development not meeting the target outlined in the WMCA. Whilst there will be an element of windfall development within the WMCA this alone will be insufficient to meet the residual requirement of 259 dwellings.  
4.5 As outlined above at 3.6 and 3.7 the stated approach of the Council is to seek to deliver a 6 year supply of housing for each of the remaining years of the plan period. In the case of the WMCA this level of housing has not been planned for. Indeed it seems highly unlikely given the existing shortfalls within the WMCA that the required levels of housing are achievable. The plan is not in this regard sound because it has not been positively prepared and is failing to meet the objectively assessed need without any strong environmental reason for not doing so.

#### 5 THE APPROACH TO LARGE VILLAGES WITHIN THE WMCA WITH A PARTICULAR FOCUS ON SUTTON VENY

5.1 The below table has been extracted from the WMCA Topic Paper. It illustrates that housing completions within the large villages in the WMCA have not been very high at 61 and this is particularly the case in respect of Sutton Veny where only 2 completions have been reported in a 10 year period.  
Table 1 – Housing delivery in the large villages [table can be seen in the attached document]  
5.2 The existing settlement boundaries have limited development opportunities within the large villages and this is borne out in the limited level of supply outlined above. It is then all the more critical that the review of the settlement boundaries be used to boost supply. The settlement boundary review has though been undertaken with the rationale being that the review should seek to update and accurately reflect circumstances on the ground since they were first established. In practical terms this has resulted in the large villages settlement boundaries

## Appendix Q - Schedule of representations

being expanded to include some areas of the villages which should hitherto have been incorporated but also potentially developable areas have been removed as the boundaries have been tightened up in other places.

5.3 The strategy for the WMCA is to make one allocation at Chapmanslade for 35 dwellings and stop growth in the other large villages, despite a shortfall in the WMCA and precarious housing land supply position more generally.

5.4 This approach to dealing with housing in the large villages fails the test of being consistent with national policy. The NPPG includes a section on rural housing and within this the Government make clear that 'rural housing is essential to ensure viable use of local facilities'. It goes on to note that 'all settlements can play a role in delivering sustainable development in rural areas – and so blanket policies restricting housing development in some settlements and preventing other settlements from expanding should be avoided unless their use can be supported by robust evidence'. Sutton Veny is a larger village than Chapmanslade which is to receive an allocation of 35 dwellings and yet Sutton Veny is projected to deliver less than 10 dwellings.

5.5 The CS Inspector was clear that the existing settlement boundaries were out of date and the CS was found sound on the basis that these would be swiftly updated. He noted that where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'.

5.6 The evidence on housing need indicates a shortage of available housing and the CS Inspector clearly envisaged further growth outside of settlements. This is in line with the NPPF and NPPG which both seek thriving rural communities.

5.7 In order to begin to rectify these problems the settlement boundaries need to be reconsidered to allow for small scale increases through windfall developments allied to the larger site allocations process. At present WC's projected delivery is 143 dwellings in the remainder of WMCA (outside of Warminster) over the plan period this does not cater for the 6 years supply which is the stated objective of the plan, it likewise will not assist with meeting the housing shortfall in Warminster. The community area serving Warminster is the most logical area to search for further housing sites to meet this need and through settlement boundary reviews but the WHSAP fails to achieve this and is not therefore positively prepared.

5.8 The most recent evidence regarding housing need within Sutton Veny can be found in the November 2014 Sutton Veny Parish Housing Needs Survey. The survey was focussed on affordable housing need but it did also highlight the need for market housing. There were 111 respondents to the survey (32.5% of the village) and the key findings of the report were that 72% of respondents were in favour of some new housing in Sutton Veny. The most commonly option was for between 4-10 dwellings. In July 2014 there were 12 households on the WC Housing Register seeking affordable accommodation in Sutton Veny. Likewise those who were able to meet their own housing need on the open market also described a lack of suitable accommodation in Sutton Veny.

### 8 AMENDMENTS SOUGHT TO THE WHSAP

8.1 The revised settlement boundary for Sutton Veny should be expanded to include my Client's garden in full which is depicted at (Fig 1) and (Appendix 2). This will contribute to the plan in seeking to meet the as yet unmet housing need in the WMCA and achieving the 6 year housing land supply which the plan should be designed to deliver.

### 9 OVERALL CONCLUSIONS

9.1 The adoption of the CS was predicated upon a swift review of the 'out of date' settlement boundaries which was to be delivered through a separate DPD taking place quickly and the review of settlement boundaries was required to provide additional opportunities for residential development. Sutton Veny is not undertaking a NP so this is all the more important.

9.2 The WHSAP has been drafted on the basis of an estimated supply of 7,446 dwellings over the 5 years 2016-2021 within the NWHMA (Wiltshire Housing Land Supply Statement - March 2017). Subsequent planning appeals including most recently the development of up to 60 dwellings near Lyneham by Gleeson Developments Limited has reduced the agreed deliverable supply over this period to 6,891 dwellings. In this context the plan needs to be reconsidered to provide additional housing.

9.3 The latest position on housing land supply is that there is very limited flexibility within the NWHMA with a currently agreed supply of only 74 dwellings over the minimum housing level required. This fails to meet the WHSAP requirement for a 6 year supply to be deliverable.

Appendix Q - Schedule of representations

	<p>9.4 Within the WMCA the housing land supply is particularly constrained. Even taking into account the proposed allocations through the WHSAP this still leaves a residual requirement for 259 dwellings to be identified just to meet the minimum requirement for the WMCA. The forecast rates of housing delivery likewise require a step change in supply with only 693 delivered in the first 11 years of the plan period and 1,367 completions required in the remaining 8 years which is a significant risk to delivery.</p> <p>9.5 Against this backdrop of unmet housing need the settlement boundaries of the large villages have been reviewed to regularise existing areas of the settlements but no expansions have been identified to meet the minimum level of housing need. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	It is a relief to see that the over development of Sutton Benger appears to have been recognised. I fully concur with the comments of that Parish Council and compliment you on the draft. However, I do not expect many of our Parishioners will waste as much time as it has taken me to register and find this form. Please make commenting easier if we are to feel valued. You may even get the odd compliment, if we can find the way here!

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Community Area Topic Paper-Chippenham Community Area: Yatton Keynell Revised Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Yatton Keynell is identified in the Wiltshire Core Strategy (WCS) as a sustainable "Large Village" in Core Policy 1 Settlement Strategy. The village has a very good range of community facilities and businesses. Yatton Keynell is assessed as suitable for some sustainable growth and at present does not have an advanced Neighbourhood Plan. It is proposed in the Settlement Boundary Review that the allocation of a single large site east of Farrells Farm will accommodate all the growth within Yatton Keynell for approximately 30 dwellings. The proposed Yatton Keynell village settlement boundary has elsewhere been drawn tightly around the existing built form and provides little opportunities for small scale future development. Almost all infilling has been taken up within the previous decade(s) within Yatton Keynell and there will be no small suitable and available housing sites within the Village up to 2026. The proposed development of one large site east of Farrells Farm will create a major visual impact at the beginning of the village and a reduction of landscape quality as well as a significant loss of countryside. A selection of smaller sites would be more in keeping with the village character and could be accommodated where they would have little adverse landscape impact.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.40			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The former Bell Inn, at Appendix 3 grid squares G8 and F8, is a Grade II listed building. The extended western car park of this property has been included within the settlement as part of the proposed boundary change. If the proposed boundary change was to stand this would facilitate future unnecessary and unwanted housing development of the car park in proximity to a Grade II historical asset. This would be in opposition to the policies of Seend's emerging neighbourhood plan. Within that plan this land relates to, and facilitates, a designated significant view within a landscape gap from Seend to the open countryside to the south west of the Seend settlement. The Seend Parish Neighbourhood Plan Landscape Analysis Map shows the identified view in that landscape gap. Public consultation on the landscape element of the Seend neighbourhood plan has already taken place. Allowing the proposed change to stand will undermine the value of neighbourhood planning and create unnecessary boundary amendment work for both Wiltshire Council and the neighbourhood plan steering group. The extended area of the former Bell Inn car western park should be excluded from the proposed boundary change and the existing boundary line retained. Boundaries will remain subject to review and parishioner support within the ongoing process of the Seend neighbourhood plan. Local engagement from people who know the settlement supercedes the weak desktop methodology for determining the built environment of Seend. In the case of Seend, doing nothing in terms of boundary change will keep the site allocations plan compliant.

Please identify the policy, paragraph, table, figure or site to which you are referring.		Netherhampton Road, Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I wish to express my concern at the proposal to build 840 new homes in Harnham, Salisbury but particularly the development of 740 houses on both sides of the Netherhampton road.</p> <p>I fully recognise the need for more affordable housing for first time buyers, social and the more expensive properties so beloved of the builders/developers as well as the pressure on County and Local Councils to achieve Governmental house building targets. People need housing but any development must address the complex issues of infrastructure or else the impact on the quality of the lives of the current and established residents becomes even more unbearable.</p> <p>My family has lived in Harnham for 41 years and for the last 25 years actually on the Harnham road. We have experienced, first hand, the impact the upgrade of the 3094 to an 'A' road has made. We have witnessed the enormous increase in traffic, particularly the heavy lorry and van traffic, which effectively uses this road as a southern Salisbury bypass/'rat run'. Every week day morning we experience the traffic queues to the Harnham Gyratory which has been failing for many years now. We experience, at first hand, the difficulty of the emergency services (particularly ambulances) trying to navigate the queues and the increase in accidents.</p> <p>So my comment would be if you build the houses then build the appropriate infrastructure to cope with both the potential new and the existing traffic. I also strongly believe that if you have established plans then County Council Officials should be presenting these to residents of Harnham and Netherhampton at specific meetings so there are sensible and planned discussions.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Contradictions in the Strategy                      A core strategy or local plan is considered "sound" when it is consistent with national policy.                      Paragraphs 72,111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide:                      The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.                      I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Accessibility from sites 3565, 3620 and 1021 The A361 is a blackspot for accidents both "In the dip" where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. Also, sites at Church lane, Southwick Court and Old Brickfields are being considered as they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles) No evidence has been provided that this would be the case. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour. The Councils view that they can justify development here as opposed to local villages on the basis that it provides sustainable development is clearly in question. There is neither the infrastructure or setting for development on this side of town.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.40			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In the case of the WI allotments, in Appendix 3 map grid H6, the well-used allotments are bounded on west, east and south sides by the built environment. To the north, half the boundary consists of an open field and the built environment to the east extends well north of that northern boundary. There is a sense that one is on land within the settlement and not on land more related to the open countryside. The boundary change methodology therefore does not stand scrutiny</p> <p>The Seend Lye Recreation Field (SLRF), now excluded from the Seend large village settlement by the proposed boundary change, has been part of the settlement since the 1960s. The SLRF is enclosed on three sides by the built environment of the settlement. The SLRF has constructed upon it a cricket pitch, 2 tennis courts, a children's play area, an equipment store and a concrete pad for cricket net practice. All of these features are said, by the methodology, to be "more related to the open countryside" than the settlement. This is patently not the case due to the very recreational nature and physical location of these facilities. Furthermore, when standing on the SLRF one has the sense of being in the settlement and not in the open countryside or anywhere related to the open countryside. The Seend WI considers that both recreational areas, the WI Allotments and the SLRF, must be retained as part of the Seend settlement, within the settlement boundary. The change necessary to achieve consistency and accuracy is to do nothing and leave the Seend settlement boundary unchanged but subject to review by the forthcoming Seend Neighbourhood Plan.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Para 5.128 and Policy H3.1 say that this development would depend on sufficient improvements being made to the transport network serving the development. This presupposes that such improvements are possible. It is my view, from the position of someone living on Harnham Road, that until Wiltshire Council and the Highways Agency demonstrate that sufficient improvements can be made to make this scale of development viable, it cannot be said to be sound. The A3094 is already at capacity at peak times. Traffic is heavy throughout most weekdays. Adding up to 750 more households, perhaps 1500 additional cars, would provide an impossible burden. This would be exacerbated if a new school is built within this site, partly to absorb children from other parts of Salisbury, so further increasing the traffic load. There is already a major problem at the beginning and end of the school day with parents coming by car to the two Harnham Schools.</p> <p>These transport questions are important for four reasons:</p> <p>a) The economic cost and frustration caused by lengthy delays would be immense;</p> <p>b) There is a major danger to health from ambulances being delayed (this being a major route for ambulances between Odstock Hospital and Wilton/South Wilts). Delays have already been caused by the works on Harnham Bridge.</p> <p>c) The road is already very dangerous for cyclists. It would be essential for there to be separate provision for cyclists all the way from the roundabout at the end of New Harnham Road to the new development, if there were to be any chance of encouraging people to cycle rather than use their cars for local travel. (I realise there is some provision at each end, but this by itself is quite inadequate).</p> <p>d) However improved cycling provision must not be made at the expense of safety for pedestrians, as the footpaths are heavily used both by parents and children, and others. In fact there was a pedestrian fatality outside our house in Harnham Road just the other day. Given the width of the current road, and the position of the existing housing, I think the onus must be on the Council to show how the needs of drivers, cyclists, pedestrians and bus passengers could be met within the existing road structure before development on this scale on this site could be considered sound.</p> <p>In other words, I believe this plan is putting the cart before the horse. 'The robust and comprehensive transport assessment' that is proposed once development proposals are put forward is too late. The Council and the Highways Agency need to undertake such an assessment now, based on existing traffic loads, so as to put in place a more viable long-term transport strategy, before housing allocation sites of this scale are considered.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I also believe this site allocation is not justified, compared to the proposal already mooted for relocating the Churchfields industrial sites, and developing that area for housing. Such a development would provide housing near the city centre (and the Water Meadows), and particularly the station, thus much reducing car use in favour of cycling, walking and bus travel. Why is priority not being given to expediting that plan?				
<b>Attached files (Please see Objective)</b>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Regarding H3.3, I believe the proposals underestimate the potential flood risk on this site (which is evident to passers by in the winter). If there is a major risk of flooding on the site, surely it is not a suitable site for development?

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Para 5.128 and Policy H3.1 say that this development would depend on sufficient improvements being made to the transport network serving the development. This presupposes that such improvements are possible. It is my view, from the position of someone living on Harnham Road, that until Wiltshire Council and the Highways Agency demonstrate that sufficient improvements can be made to make this scale of development viable, it cannot be said to be sound. The A3094 is already at capacity at peak times. Traffic is heavy throughout most weekdays. Adding up to 750 more households, perhaps 1500 additional cars, would provide an impossible burden. This would be exacerbated if a new school is built within this site, partly to absorb children from other parts of Salisbury, so further increasing the traffic load. There is already a major problem at the beginning and end of the school day with parents coming by car to the two Harnham Schools.</p> <p>These transport questions are important for four reasons:</p> <p>a) The economic cost and frustration caused by lengthy delays would be immense;</p> <p>b) There is a major danger to health from ambulances being delayed (this being a major route for ambulances between Odstock Hospital and Wilton/South Wilts). Delays have already been caused by the works on Harnham Bridge.</p> <p>c) The road is already very dangerous for cyclists. It would be essential for there to be separate provision for cyclists all the way from the roundabout at the end of New Harnham Road to the new development, if there were to be any chance of encouraging people to cycle rather than use their cars for local travel. (I realise there is some provision at each end, but this by itself is quite inadequate).</p> <p>d) However improved cycling provision must not be made at the expense of safety for pedestrians, as the footpaths are heavily used both by parents and children, and others. In fact there was a pedestrian fatality outside our house in Harnham Road just the other day. Given the width of the current road, and the position of the existing housing, I think the onus must be on the Council to show how the needs of drivers, cyclists, pedestrians and bus passengers could be met within the existing road structure before development on this scale on this site could be considered sound.</p> <p>In other words, I believe this plan is putting the cart before the horse. 'The robust and comprehensive transport assessment' that is proposed once development proposals are put forward is too late. The Council and the Highways Agency need to undertake such an assessment now, based on existing traffic loads, so as to put in place a more viable long-term transport strategy, before housing allocation sites of this scale are considered.</p>

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">461</a>	<b>Consultee</b> Mr Sam Gompels	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 400077	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I welcome the publication of the long-awaited Wiltshire Housing Site Allocation DPD and formal pre-submission consultation on the draft plan. This is a significant step in meeting the objectives set out in the Wiltshire Core Strategy and in the development of Wiltshire to 2026 and beyond. I note that Melksham has met its housing requirements as set out in the Wiltshire Core Strategy and hence no allocation is made within the DPD. However, as a sustainable Market Town within Wiltshire, on a main route through the county, I believe Melksham should still be considered for allocation within the plan. There is a need and desire for additional housing within Melksham as shown through the initial scoping consultation carried as part of the Neighbourhood Plan.</p> <p>It is also noted that there is a shortfall in the allocation at the Principle Settlement of Trowbridge in addition to severe question marks over the building out of the Core Strategy strategic allocation at Ashton Park, with it being highly unlikely to be completed before the end of the Core Strategy period. In light of this, quick wins within other nearby Market Towns in the North and West Housing Market Area should be considered in order to meet demand in the local area as well as the Core Strategy requirements for the HMA. This will ensure a good 5-year housing land supply, avoiding damaging speculative developments that are a consequence of not having a secure 5-year land supply.</p> <p>Melksham is on the main strategic A350 route through Wiltshire and does not have the constraints that Trowbridge is under, most notably the Bath and Bradford on Avon Bat SAC to the South and the West Wiltshire Green Belt to the North. Melksham does not have these constraints and is a highly sustainable location, currently welcoming significant investment, including the market place redevelopments and community campus project.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	462	Consultee Mr Sam Gompels  Person ID: 400077	Agent  Person ID:	Do you consider the draft WHSAP is legally compliant?	
				Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I wish to promote SHLAA site 3331 for potential allocation of approximately 200 dwellings. It is anticipated that the site could be brought forward alongside site 3345 to the west. It is recognised that the site lies approximately 2km from the town centre however, it can no longer be considered to be located at an unsustainable distance. The site lies less than 300 meters to the east of the Melksham Oak School and the Hornchurch Road development opposite. It is therefore within reasonable walking distance of the school, as well as a less than 150 meters from the bus stop at Old Loves Farm serviced by the 271 Bath to Urchfont service, the SB2 Seend Shuttle to Melksham and the X72 service. Footpaths are already in place up to the site at Old Loves Farm and the development would facilitate further footways to the site to ensure a safe walking route to the centre of the town.</p> <p>Initial surveys and records indicate no archaeological interests within the vicinity of the site, nor does the site suffer from any ground or surface water flooding issues. There are no ecological constraints within or surrounding the site. Hedgerows form the boundary of the site and these can be retained and enhanced through the development. The site abuts the existing linear development on Carnation Lane to the east but a suitable landscape buffer has been allowed for in the indicative site layout plan. Old Loves Farmhouse is a grade II listed building on the northern boundary of site 3345 which is adjacent to site 3331. However, a landscape buffer and screening could be provided through site 3345 as well as on the north-western corner of site 3331. This would significantly reduce any adverse effects on the listed building.</p> <p>The site would form part of the western edge of Melksham and it is envisaged that the site could help facilitate the much-discussed Eastern Bypass that would greatly reduce the traffic pressures on the main routes including the A350 through Melksham and Beanacre. The site would fall inside of the new bypass which could pass from the A350 at the Littleton Roundabout around the site and on to the A350 North of Beanacre. It is noted a neighbourhood plan is in preparation in Melksham, but it is still at the very early scoping stage. It is felt that this site, with significant opportunities to facilitate the Eastern Bypass, would be much better delivered through allocation in the Wiltshire Housing Site Allocation DPD.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The desktop methodology for determining necessary boundary changes in Seend is understood but there are inconsistencies in application and an apparent lack of knowledge on actual land use. The Seend Lye Recreation Field (SLRF), now excluded from the Seend large village settlement by the proposed boundary change, has been part of the settlement since the 1960s. The SLRF is enclosed on three sides by the built environment of the settlement. The SLRF has constructed upon it a cricket pitch, 2 x tennis courts, a children's play area, an equipment store and a concrete pad for cricket net practice. All of these features are said, by the methodology, to be "more related to the open countryside" than the settlement. This is patently not the case due to the very recreational nature and physical location of these facilities. Furthermore, when standing on the SLRF one has the sense of being in the settlement and not in the open countryside or anywhere related to the open countryside. The Seend Lye Recreation Field charity insists that the SLRF be retained as part of the Seend settlement, within the settlement boundary.</p> <p>Similarly, in the case of the WI allotments, in Appendix 3 map grid H6, the well-used allotments are bounded on west, east and south sides by the built environment. To the north, about half the boundary abuts an open field and the built environment to the east extends well north of that northern boundary. Again, there is a sense that one is on land within the settlement and not on land more related to the open countryside. The change necessary to achieve consistency and accuracy is to do nothing and leave the Seend settlement boundary unchanged but subject to review by the forthcoming Seend Neighbourhood Plan.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The former Bell Inn, at Appendix 3 grid squares G8 and F8, is a Grade II listed building. The extended western car park of this property has been included within the settlement as part of the proposed boundary change. If the proposed boundary change was to stand this would facilitate future unnecessary and unwanted housing development of the car park in proximity to a Grade II historical asset. This would be in opposition to the policies of Seend's emerging neighbourhood plan. Within that plan this land relates to, and facilitates, a designated significant view within a landscape gap from Seend to the open countryside to the south west of the Seend settlement. The Seend Parish Neighbourhood Plan Landscape Analysis Map shows the identified view in that landscape gap. Public consultation on the landscape element of the Seend neighbourhood plan has already taken place. Allowing the proposed change to stand will undermine the value of neighbourhood planning and create unnecessary boundary amendment work for both Wiltshire Council and the neighbourhood plan steering group. The extended area of the former Bell Inn car western park should be excluded from the proposed boundary change and the existing boundary line retained. Boundaries will remain subject to review and parishioner support within the ongoing process of the Seend neighbourhood plan. Local engagement from people who know the settlement supersedes the weak desktop methodology for determining the built environment of Seend. In the case of Seend, doing nothing in terms of boundary change will keep the site allocations plan compliant.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		This has now become a serious matter regarding the use of greenfield sites around Trowbridge. We have sat and watched the Paxcroft Mead estate expand to Ashton Road, now they want to plunder the Hilperton Gap. I have noticed all these are sites are prime Virgin land so easy to build on without the complications that a brown site could though up. I do think Trowbridge has provided its obligation to provide available land, is it because this land is easier to develop?

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The former Bell Inn, at Appendix 3 grid squares G8 and F8, is a Grade II listed building. The extended western car park of this property has been included within the settlement as part of the proposed boundary change. If the proposed boundary change was to stand this would facilitate future unnecessary and unwanted housing development of the car park in proximity to a Grade II historical asset. This would be in opposition to the policies of Seend's emerging neighbourhood plan. Within that plan this land relates to, and facilitates, a designated significant view within a landscape gap from Seend to the open countryside to the south west of the Seend settlement. The Seend Parish Neighbourhood Plan Landscape Analysis Map shows the identified view in that landscape gap. Public consultation on the landscape element of the Seend neighbourhood plan has already taken place. Allowing the proposed change to stand will undermine the value of neighbourhood planning and create unnecessary boundary amendment work for both Wiltshire Council and the neighbourhood plan steering group.</p> <p>The extended area of the former Bell Inn car western park should be excluded from the proposed boundary change and the existing boundary line retained. Boundaries will remain subject to review and parishioner support within the ongoing process of the Seend neighbourhood plan. Local engagement from people who know the settlement supersedes the weak desktop methodology for determining the built environment of Seend. In the case of Seend, doing nothing in terms of boundary change will keep the site allocations plan compliant.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The proposal to create 640 new dwellings on this site will undoubtedly lead to a huge increase in the number of vehicles using Netherhampton Road, the majority of which will travel east toward the Harnham Gyratory as the main hub for access to the city centre and other destinations beyond. At peak times the current road network cannot cope with the existing amount of traffic using it and long delays on all roads into the Harnham Gyratory are now the norm rather than the exception. This proposal can only make matters worse.</p> <p>Whilst there is mention of the Salisbury Transport Strategy being the solution to all the traffic problems associated with the proposed developments, the specific problems and solutions as to how they will be overcome are not mentioned. It is imperative that the traffic issues are fully addressed and solutions agreed in advance of development being approved.</p> <p>The concerns regarding traffic mentioned above also apply to H3.3, which will see 100 new dwellings to the north of Netherhampton Road and H3.4, which will see 100 new dwellings on Rowbarrow.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As the plans begin to be fine tuned for housing in my area may I make a plea for allotment provision to be included specific to this area. At present housing has been in the nature of house with very little garden. As a result I perceive that allotment provision by yourselves should be given heed to as it has been understood that allotments can be part of the gel that all communities benefit from. Our pursuit for housing must also be balanced with the human need to cultivate not only plants but respect and understanding between each other such as can be obtained when partaking in the running of an allotment area. See allotment benefits as held by the allotment association.</p> <p>I hope to become more involved in this as I find I am more able to – through age restrictions at work – as well as my desire to see greater involvement between the different bodies who are already concerned with the welfare of our community.</p> <p>With this in mind I have approached my parish council who can see no available land other than owned by Wiltshire County Council. The land in question at present being rented out to a local farmer – Mr T Rossiter – adjoining land that is occupied by the Grove Arms Pub (along A30). Suggesting that some party of this field, my desires and possibly ignorance of all facts showing here, may be used in this manner. I hope that all considerations are given to my request.</p> <p>I look forward to seeing this come to fruition in my time spent in this parish and included in the DPD plans of the area.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The development would increase traffic levels on Lower Road Quidhampton as people try to avoid traffic queues on Wilton Road and Netherhampton Road leading to the Wilton Wall lights. These can be quite severe. Lower Road has a 20mph speed restriction and traffic calming measures at the two ends of the village, it does not therefore have a high capacity.</p> <p>The Netherhampton Road has been acknowledged to be at its capacity in "The Salisbury Transport Strategy" and a significant increase in housing between the Wilton Wall Lights and Harnham is going to further increase demand on this road.</p> <p>Runoff will increase massively in the floodplains and valley catchment between Quidhampton and Netherhampton and Salisbury. This would increase flood levels and risks. There are low lying properties in Quidhampton that could be more significantly at risk according to the flood predictions from the Environment Agency.</p> <p>The proposed sites are greenfield sites.</p> <p>Not go ahead with proposed additional housing in Netherhampton.</p> <p>Review transport strategy for Salisbury</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph H3.5 and Figure 5.23 Clover Lane, Durrington			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan shown is inaccurate and incomplete, and consequently wholly misleading; no decision on planning can safely be made from it.</p> <p>The following comments relate solely to the Eastern part of Figure 5.23 (Clover Lane).</p> <p>Referring first to the 2 properties in the NE segment. The footprint of the Western most of these (the inverted L) is inaccurately shown; it is out of date and does not show an extension built in 2002. Furthermore the mature and established garden of this property extends to the West, through the black line into what appears to be, but is not, a separate paddock. The small building at the South-Centre of the garden is the garage belonging to the property. The whole garden area is enclosed by mature hedging. Thus the existing settlement already includes this area to the West of the black line and, therefore, the proposed settlement boundary should definitely be amended so that it too includes the garden.</p> <p>The plan shown is also incomplete because it does not show the Conservation Area which the proposed housing allocation would conjoin. The Conservation Area follows the existing settlement area described above (ie to the West of the proposed settlement boundary shown). If this Conservation Area was marked on the plan it could clearly be seen that that any housing allocation in the area to the East of the hatched area would dominate and overwhelm the Conservation Area; it would negate any purpose of retaining the space as a Conservation Area. I believe that approval for the Conservation Area to be annulled must be given before this housing allocation can be approved. For that reason I have marked this plan as being legally non-compliant.</p> <p>To remove totally from the Proposed Housing Allocation the whole area to the East of the hatched area.                  Because Figure 5.23 is inaccurate and incomplete, and consequently wholly misleading; no decision on planning can safely be made from it.                  To remove totally from the Proposed Housing Allocation the whole area to the East of the hatched area.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Because the impact that the Proposed housing allocation has on the Conservation Area that it would join up with. Do not proceed with the area to the East of the hatched area.</p> <p>In addition to the fundamental objection about the housing allocation East of the hatched area which would ruin the Conservation Area and make it meaningless, I feel very strongly that Wiltshire Council should disallow the whole of the housing allocation in Figure 5.23. Durrington is a rural village, albeit now a large one. It has grown from being a cluster of farms and agricultural dwellings into a kilometre square of architecturally impoverished development. The area to which Figure 5.23 relates is the very last pasture in the village. All the other green spaces in Durrington are now gardens or residential areas; this is the only area where livestock are still able to graze; it provides the last vestige of a rural scene. It would be wholly wrong to destroy the final link to its agricultural heritage by building yet more houses on the edge of this already uncharacteristically over-populated village. Let common sense prevail and the last few green fields in the village be preserved. Do not approve this housing allocation at Clover lane, Durrington.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The proposed sites for 640 houses and 100 houses along Netherhampton Road will change the character of our village of Netherhampton and potentially turn it into a "suburb" of Salisbury, the scale of the development is inappropriate for this site. The Harnham Gyratory and Wilton Wall Lights junctions are already working to near capacity and the significant increase in traffic has not been addressed in any detail so I cannot see how this allocation can proceed without further information. Drainage is also a major concern. The drainage infrastructure is already substandard and the additional run off from such a major development is concerning.</p> <p>The impact of this development (completely out of proportion with its surroundings) needs significantly more thought.</p>			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I think the Council should give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Objective 3 Spatial Strategy North and West Wiltshire Housing Market Area		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Plan appears to be rigidly structured to exclude areas where targets are considered achieved thereby weighting development into those remaining. Trowbridge is deemed to require 700 dwellings and green field sites adjacent to existing settlement boundary seem to be target of choice.</p> <p>Paragraph 4.48 states: "Indicative levels of housing for Market Towns are not a ceiling and variations would not seem to present new or significant issues for local infrastructure and environmental capacity".</p> <p>I consider the Wiltshire Housing Site Allocations Plan to be unsound because it fails to consider the North and West Housing Market as a whole and is biased towards expanding Trowbridge and Salisbury.</p> <p>In my Representation 135 dated 16/08/17, Proposal H2.6 - Site 3565 Land East of the A361 at Southwick Court, I stated " there are also too many natural and man-made obstacles that require mitigation or holistic planning to make this an obvious planning choice. There must be other suitable sites within the County that would not exhibit such encumbrances and would therefore be more acceptable to help meet the Council's housing quota".</p> <p>Mr. S. Gompels' Representation 462 dated 29/08/17 seeks to promote SHLAA site 3331 in Melksham. This site appears capable of sustaining a greater number of dwellings and require few, if any, mitigation measures.</p> <p>Site 3331 should replace 3565 in the Draft Wiltshire Housing Site Allocations Plan because it is more sustainable and should be worthy of consideration as supported by Objective 3 Spatial Strategy North and West Wiltshire Housing Market Paragraph 4.48</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Bratton 321 Court Orchard/Cassways			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I would like to add my comments to the Wiltshire Housing Site Allocation plan, specifically with regards to SHLAA Reference 321 – Bratton, Court Orchard/Cassways which has been identified to provide 40 dwellings. The Sustainability Appraisal Report PSCONS09N states that the site provides capacity for 32 residential units but I would like to point out that the site in question has had numerous planning applications refused for less than the amount currently proposed. W/92/00217/FUL was submitted for construction of 23 dwellings and was refused. W/93/00507/FUL was submitted for construction of 23 dwellings and was refused. W/78/01201/HIS was submitted for construction of a farmhouse and was refused. W/74/00979/HIS was submitted for six houses to the north of the current proposed development site and was refused. I believe that Bratton would not be able to support nor requires the amount of housing proposed and that the infrastructure, transport and amenities do not support the Site Allocation Plan. Housing needs to be placed in an appropriate location with good transport links and job opportunities. The current draft proposal for Bratton 321 Court Orchard/Cassways largely relies on dwelling residents having access to private vehicles. The area to the south east of Trowbridge along West Ashton Road is currently registered for up to 2,500 dwellings, employment, two local centres, two schools, public open space and associated highway works.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This is in relation to Site 3260 – Land at Upper Studley only. Points raised are quoted directly from: WHSA PSCONS09K Wiltshire Housing Site Allocations Plan SA Rpt Annex 1 - A.9. _ Trowbridge CAR June 2017 supplemented by my comments in italics: Impact on Wildlife The stream corridor, Poplar trees and hedgerows are likely to support commuting/foraging bat species such as Greater Horsehoe ... records indicate the presence of Greater Horsehoe and other bat species which use the Country Park and Lambrok Stream as foraging and roosting habitat. Development of the site for housing would inevitably lead to a loss of greenfield land I can add that we have discovered grass snakes and frogs and there is at least one nesting owl amongst the poplar trees. The proposed number of dwellings at site 3260 will have to be reduced, as noted by the report. So there is very little to gain and much to lose in the construction of property on this site. Inclusion of this site plan is neither justified (too small, not cost effective) or effective (more detrimental to natural surroundings, expensive to mitigate against risk of flooding) and puts pressure on local services and transport system.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I am a resident of Woodmarsh, North Bradley and see from these new revised proposed boundary that if this is approved my address will actually be Trowbridge and I will no longer be a part of North Bradley. Myself and others in my street have paid a premium on our houses for a village location, how can you propose to remove the village location from our address just because we live on the side of the road which you wish to develop with a housing estate - this no doubt is the reason behind the proposed change to boundary! This will have a dramatic effect on our house price and the feel of being part of a village community. I am appalled that this can be done and had I not have looked would not have known about. My reasons for opposing this are those I have noted above. I do not believe it to be right that one side of a street can be classed as 'North Bradley' and the other side not! Therefore one side of Woodmarsh would be in a village location and the other side in Trowbridge.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	No clear explanation why no further housing allocations are assigned to Westbury, adopting a position of 'consolidating growth'. This is not based on any assessment of need for housing in Westbury or reflection of investment in community services and provision of excellent transport links - thereby ideally suited to further growth. Housing for the Westbury area should not be allocated to the small or large village locations as allocations for Bratton should be removed and allocated to Westbury, where adequate land, opportunities, facilities and transport links are easily obtainable. The case to exclude housing from Westbury is not made with any assessment of housing need, employment opportunities, facilities and transport links. The conclusion that Westbury should be consolidated is based only on an assessment of having had an increase in housing and therefore other areas should be looked at. This does not reflect need and is unsubstantiated. The WCS should include growth at Westbury and plan to include a level of housing growth based on demand reflecting the facilities, services, employment and transport links provided/ No justification for consolidating housing for Westbury - not based on demand, facilities or employment afforded in this community area. Instead growth is pushed to small/large village location (Bratton) where there is no investment in such facilities exist. Inclusion of housing allocation for Westbury, removal of allocation for small/large village Bratton

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The houses on Woodmarsh would bought for a premium as they are in a prime village location within North Bradley, before this proposal was made. How will these people be compensated when they can no longer sell their houses for the price they were bought? Especially as not only are they at risk of losing their village status, they will also have a housing estate at the bottom of their gardens!

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Why does North Bradley have to take the brunt of the housing need in this area? The roads are already dangerous, busy and very fast (as shown in figures produced by the council) we have been promised lots of solutions but nothing has ever been done, who will help when even more cars are using the roads, especially Woodmarsh and Westbury road? What reassurances will we be given that traffic calming will be put in? This is a village where crossing the road is already dangerous and at times frightening especially for children and the elderly residents. We do not have the road structure to support these new houses - nor should we have to! This proposal means people will lose money on their properties as they will no longer be in a village and be left living on an even busier road than they already do, without any offers of help.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. The Plan is not positively prepared because it does not meet objectively assessed development requirements. WC propose to increase the size of Trowbridge by one quarter during the Plan period (and more after that) which exceeds the requirement for a five year supply.</p> <p>2. The Plan is not justified because WC have failed to explain how and when the jobs, schools, roads and other services and infrastructure will be provided to support this huge expansion.</p> <p>3. The Plan is not effective because WC's examination of 'windfall', which is expected to provide 60% of new housing, is grossly inadequate – comprising one page out of 4,500 pages of the Plan documents.</p> <p>4. The Plan is not consistent with national policy because WC has failed to give proper weight to brown field sites. WC's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes Look to build on brown field sites within the town boundaries.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Site Nos. H3.1 and H3.3 at Netherhampton on the A3094				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Not proven feasible by integrated planning for jobs, housing and mobility. See below.                  Carry out appropriate holistic planning - see below after question: "Please set out what change(s) you consider necessary to make the draft Wiltshire Housing Site Allocations Plan sound".                  Comments seen as a resident of Quidhampton.</p> <p>Traffic</p> <p>The developments H3.1 and H3.3 would mean much more traffic on local roads, including Lower Road, Quidhampton on the other side of the valley, as people seek to avoid Wilton Wall traffic lights and Harnham gyratory.</p> <p>Quidhampton residents have observed that the A3094/Lower Road junction has recently been the site of several road accidents.</p> <p>Quidhampton has particular problems with long sections of road without pavements that have to be used by parents with young children walking to and from school. Increasing the already significant traffic and risks is unacceptable.</p> <p>The "Salisbury Transport Strategy" (a summary was produced in November 2012, but it was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Five years later the situation is even worse – how can it cope with the traffic that would be generated by this development?                  The serious traffic congestion in the Salisbury area results from traffic from the main routes (A36, A30, A354, A338) all having to pass through the conurbation including via the A3094. An outer ring road has not been feasible historically owing largely to the geography of the five river valleys, and attractive rural setting extending well into the city.                  As a result of the obvious existing congestion, I consider that a major survey and integrated planning study should be undertaken to provide feasible scenarios for the Salisbury area for jobs, housing and mobility (public transport, traffic, walking and cycling) and the associated infrastructure.                  Only then would the feasibility be known for any additional housing together with the infrastructure implications. Innovative solutions for mobility would certainly be required given the geographical and other constraints.                  Until such work is undertaken and any implications addressed, I believe that housing development H3.1 and H3.3 should not be planned. The existing business and private traffic congestion experienced on the routes affected on both sides of the valley would be increased, as would the safety risks to people, more notably pedestrians and cyclists.</p>

<b>Comment ID:</b>	<a href="#">519</a>	<b>Consultee</b> Feltham Properties	<b>Agent</b> Mr Steven Smallman Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1125376	Pro Vision <b>Person ID:</b> 1125375	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.22-5.37		Justified Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Market Lavington Neighbourhood Development Plan (NDP) is under preparation. The Neighbourhood Area was designated in 2015 and public consultation has taken place. The pre-submission Draft Plan is expected to be published within the next few weeks. The draft NDP will recognise that Market Lavington is the only Local Service Centre in the Community Area and it will propose to make housing allocations in accordance with Core Policy12. There is therefore no justification for the HSAP to usurp the NDP. To do so, emasculates the emerging NDP, rendering it effectively obsolete, and would be entirely inconsistent with national planning policy which is to encourage and support local communities to engage in neighbourhood planning. The draft HSAP is therefore inconsistent with Paragraph 185 of the NPPF which confirms that "Local planning authorities should avoid duplicating planning processes for non-strategic policies where a neighbourhood plan is in preparation". It fails to conform to the adopted Core Strategy which at Paragraph 1.5 confirms that site allocation plans should "complement neighbourhood planning".</p> <p>Delete Paragraphs 5.22 to 5.37 - including proposed housing allocations H1.2 (Underhill Nursery), H1.3 (Southcliffe), and H1.4 (East of Lavington School).</p> <p>Replace with: "In the event that the Market Lavington Neighbourhood Development Plan is not adopted by the end of 2018, the LPA will consider whether it is expedient to bring forward housing allocations at the Village as part of the review of the Core Strategy or the HSAP."</p>				
<b>Attached files (Please see Objective)</b>	4707551				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The omission of Land at The Spring, Market Lavington, raises substantial doubt about the soundness of the HSAP, because of serious deficiencies with the Site Selection Process, the relationship of the Plan with the emerging Neighbourhood Plan and the adequacy of the Plan's housing provision (as it relates to the Devizes Community Area).

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		2.2 Devizes Community Area Topic Paper			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Notwithstanding and without prejudice to the above [Comment 519], the draft HSAP has not been positively prepared. The three proposed allocations at Market Lavington are said to have the potential to delivery 80 dwellings. Therefore, if each of the proposed allocations delivers the amount of housing proposed (which we doubt will be achieved), the HSAP would still have to rely on windfall sites coming forward to meet even the minimum requirements of the Core Strategy. This is not acceptable when the "indicative residual requirement" (see table below -[in document attached to this comment]) of 102 dwellings must be regarded as an absolute minimum (as the Plan acknowledges at Paragraph 4.2) given that:</p> <p>the NPPF's objective is to boost significantly the supply of housing (Paragraph 47) and the adopted Core Strategy's overall requirement of 42,000 dwellings is based on an outdated SHMA. This was recognised by the Core Strategy's Inspector when he concluded "that at this time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more" (Paragraph 81 of Inspector's Report). Whilst the updated SHMA has yet to be published, it is understood to confirm that the latest Objectively Assessed Need is greater than the Core Strategy provides for.</p> <p>The Plan has not therefore been positively prepared.</p> <p>Allocate sufficient sites to accommodate at least 100 dwellings at Market Lavington. [Reference to Table 2.2 of the draft Wiltshire Housing Site Allocations Plan, as shown in attached document.]</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The omission at Land at The Spring, Market Lavington, raises substantial doubt about the soundness of the HSAP, because of serious deficiencies with the Site Selection Process, the relationship of the Plan with the emerging Neighbourhood Plan and the adequacy of the Plan's housing provision (as it relates to the Devizes Community Area).				

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">521</a>	<b>Consultee</b> Feltham Properties  <b>Person ID:</b> 1125376	<b>Agent</b> Mr Steven Smallman Director  Pro Vision  <b>Person ID:</b> 1125375	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Notwithstanding, and without prejudice to, the above [comment 519 and 520], the draft HSAP is not justified because the allocation of land at Fiddington Hill / Underhill Nursery to accommodate 50 dwellings is not the most appropriate strategy when considered against the reasonable alternative of allocating that site for significantly less dwellings (circa 20) and allocating Land at the Spring for 30 dwellings. development of Land at the Spring in the manner proposed is entirely logical and appropriate because:                  It would represent a logical completion of the existing settlement pattern by “infilling” the linear development along the B3098                  The site is visually and physically contained so that development will not have an adverse impact on the landscape setting of the village                  The site is in a highly sustainable and accessible location on the edge of the village centre                  The site is not subject to any significant constraints. Its development would have no unacceptable impact in terms of highways, heritage, ecology, trees, flood risk or landscape and visual impact.                  The site is deliverable.                  Land at the Spring is acknowledged to be potentially developable in the SHLAA and is proposed to be allocated in the emerging NDP. The site was however rejected after Stage 3 of the Site Selection Process (Sustainability Appraisal) on the grounds that it was of “high archaeological potential” and that therefore its development would have a “major adverse effect” (see below extract from Wiltshire Housing Site Allocations Plan Pre-submission draft plan Community Area Topic Paper – Devizes June 2017).                  [Comment references Table 6.4 of the Devizes Community Area Topic Paper, and this table is reproduced in the document attached to this comment.]                  That assessment was without foundation and entirely erroneous. As the Call for Sites Submission Statement submitted on the 10th November 2016 made clear, a full Archaeological Trench Evaluation was undertaken by Absoute Archaeology in May 2016 (this followed an earlier desk based assessment carried in Decemenber 2015 by HPS Archaeological Services) which has been reviewed by the Council’s Archaeologist. That evaluation Report concluded:                  “An archaeological trench evaluation was carried out from the 9th – 11th May 2016. The results revealed evidence of extensive 19th century clay extraction across the Project Site. Early 19th century pancheon and red brick, along with evidence of the relocation of the stream that defines the southern boundary of the site, suggest an early 19th century date for the activity. As a result, the Project Site has been severely truncated, which has significantly reduced the potential for earlier archaeological deposits to survive.”                  The Call for Sites Submission Statement also confirmed that a detailed Hydrological Study has been undertaken which demonstrated that the site is not at risk from fluvial flooding and an Extended Phase 1 Protected Species Assessment and subsequent Bat survey were undertaken which confirm, that subject to the implementation of a suitable Ecological Mitigation Plan, the development of the site in ecology terms is acceptable.</p>			

Appendix Q - Schedule of representations

	<p>More recently, a full Flood Risk Assessment has been completed which confirms that the site is not subject to flood risk and a Heritage Impact Assessment confirms that the development of the site would not harm the significance of the Conservation Area (or any other designated or un-designated heritage asset).</p> <p>Land at the Spring is a site that the emerging Neighbourhood Plan will propose to allocate as part of a strategy of dispersed growth. There was no reasonable basis for rejecting the Site during the HSAP's site selection process. To fail to allocate Land at the Spring and instead to allocate the Land at Fiddington Hill / Underhill Nursery for 50 dwellings, is demonstrably not the most appropriate strategy for delivering the requirements of the Core Strategy. The HSAP is therefore not justified.</p> <p>Allocate Land at the Spring for "about 30 dwellings" and reduce the allocation of Underhill Nursery to "up to 20 dwellings".</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4707551</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The omission of Land at The Spring, Market Lavington, raises substantial doubt about the soundness of the HSAP, because of serious deficiencies with the Site Selection Process, the relationship of the Plan with the emerging Neighbourhood Plan and the adequacy of the Plan's housing provision (as it relates to the Devizes Community Area).</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">522</a>	<b>Consultee</b> Feltham Properties	<b>Agent</b> Mr Steven Smallman Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1125376	Pro Vision <b>Person ID:</b> 1125375	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H1.2			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Notwithstanding, and without prejudice to, the above [comment 519 and 520], the draft HSAP is not justified because the allocation of land at Fiddington Hill / Underhill Nursery to accommodate 50 dwellings is not the most appropriate strategy when considered against the reasonable alternative of allocating that site for significantly less dwellings (circa 20) and allocating Land at the Spring for 30 dwellings. Land at Fiddington Hill / Underhill Nursery is an illogical and unsuitable site to accommodate the amount of housing proposed, for the following reasons [each reason is included in a separate comment]:</p> <p>The allocation would result in a further incongruous and uncharacteristic accretion on the eastern side of the village.</p> <p>The existing access to the site from Fiddington Hill is unsuitable to serve the amount of development proposed. This is a narrow rural lane that extends as a bridle way to provide an important recreational route to the Wessex Ridgeway and the Salisbury Plain SSSI / SPA. Road widening (even if that could be achieved) would result in the loss of a mature hedgerow (likely to be of ecological significance) and generally would have a serious adverse impact on the character and appearance of the area.</p> <p>The site has little visual or physical containment. It is in a sensitive location on the outer edge of the village and open to views from the adjoining countryside. Development would have a severe visual impact on the landscape setting of the village.</p> <p>It may be that a smaller scheme, restricted to the western corner of the site (the area currently occupied by glasshouses, hardstanding and car parking and an existing house) could be sensitively developed to address the substantial constraints identified above - although that has yet to be proven.</p> <p>Allocate Land at the Spring for “about 30 dwellings” and reduce the allocation of Underhill Nursery to “up to 20 dwellings”.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		The omission of Land at The Spring, Market Lavington, raises substantial doubt about the soundness of the HSAP, because of serious deficiencies with the Site Selection Process, the relationship of the Plan with the emerging Neighbourhood Plan and the adequacy of the Plan's housing provision (as it relates to the Devizes Community Area).			

Appendix Q - Schedule of representations

Comment ID:	<a href="#">523</a>	<b>Consultee</b> Ms Rachel Hunt  <b>Person ID:</b> 1102653	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Residents Comments on The Wiltshire Core Strategy and Housing Allocations                      This document has been written to strongly oppose the allocation of housing on fields behind Church Lane. There are six main areas of objection to the proposals set out in the core strategy:                      Contradictions between the core strategy and national Planning policy regarding Brownfield vs Green fields sites                      Flooding                      Maintaining the Setting of Heritage sites (omission of listed buildings when proposing housing sites)                      Maintaining the rural and ecological environment                      Accessibility                      Suitability of the Church Lane site when assessed by Atkins Section 7 of this objection will outline viable alternative sites.                      Section 7 of this objection will outline viable alternative sites.</p> <p>1. Contradictions in the Strategy                      A core strategy or local plan is considered "sound" when it is consistent with national policy.                      Paragraphs 111, 72, 156 and 157 of The National Planning Framework and Planning Guidance documents are as follows:                      111 - Planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value. Local planning authorities may continue to consider the case for setting a locally appropriate target for the use of brownfield land.                      72 - The Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Local planning authorities should take a proactive, positive and collaborative approach to meeting this requirement, and to development that will widen choice in education.                      156 - Local planning authorities should set out the strategic priorities for the area in the local Plan. This should include strategic policies to deliver:                      the homes and jobs needed in the area;                      the provision of retail, leisure and other commercial development;                      the provision of infrastructure for transport, telecommunications, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);                      the provision of health, security, community and cultural infrastructure and other local facilities; and                      climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape.                      157 - Local Plans should:                      plan positively for the development and infrastructure required in the area to meet the objectives, principles and policies of this Framework;                      be drawn up over an appropriate time scale, preferably a 15-year time horizon, take account of longer term requirements, and be kept up to date;</p>			

Appendix Q - Schedule of representations

identify areas where it may be necessary to limit freedom to change the uses of buildings, and support such restrictions with a clear explanation; identify land where development would be inappropriate, for instance because of its environmental or historic significance; and contain a clear strategy for enhancing the natural, built and historic environment, and supporting Nature Improvement Areas where they have been identified.

In addition to this the Wiltshire Local Development Framework states:  
 "the preferred option comprises a collection of sites that could deliver a coherent sustainable urban extension to the South East of Trowbridge and a town centre strategic site"

There are clear contradictions to these statements in the core strategy as follows:

- Infrastructure - The plan is for 6,000 new homes for the Trowbridge area. Ashton Park has 2,000 already built and a further 2,600 are to be built there by 2026. However there has been a two year delay at the Ashton Park site caused by a debate regarding bats in the woods meaning the 2,600 houses will not be built by the 2026 deadline. The new sites named in the core strategy are designed to meet this shortfall, however the sites chosen are not large enough to require the developer to provide increases in infrastructure (schools and healthcare). This crucial provision of additional school places and healthcare will not be met unless the West Ashton Site is fully developed. This site already has a new road and would fulfil all these requirements - smaller sites cannot be used as a replacement.
- The Core strategy appears to have been written with developers, not the local communities in mind and it would appear that it has opted for smaller "developer friendly" sites in which developers are not required to provide affordable housing and infrastructure as opposed to one larger site which could clearly provide the needs of the whole of Trowbridge.
- Brownfield sites - Potential (windfall) housing on Brownfield sites including Bowyers, the old library site on Bythesea Road and many others have not been included in Wiltshire Council's housing allocations, which if they were we would not need the proposed new Greenfield sites to be developed;
- A further 82 homes are going to pre-application on Bradley Road (West Wilts site). These appear not to have been included in the allocation and are simply seen as windfall sites.
- Several sites were ruled out during the SHLAA process, the reason given being that they were inside the existing town boundary. Why are these sites not being fully developed BEFORE open countryside is touched? Other towns (Melksham and Westbury) are better able, and indeed in the case of Melksham possibly keen to take more housing development, and that such alternative locations should be considered in preference to yet more Trowbridge development;
- The strategy does not identify and offer protection to all listed buildings and has not offered protection to areas of historical significance
- The lack of inclusion in developing the Bowyers site as part of the planned housing in Trowbridge does not comply with National Planning Policy paragraph 111above.

In conclusion, it appears that Wiltshire Councillors, none of whom live in Trowbridge, have arbitrarily set a 2km radius from St James's Church as the allowable developable area for the town without taking account of the value of this land to the people of Trowbridge. A perfectly circular boundary would appear to be a means of developing easier greenfield sites rather than more difficult brownfield sites.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.4				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Residents Comments on The Wiltshire Core Strategy and Housing Allocations                      This document has been written to strongly oppose the allocation of housing on fields behind Church Lane. There are six main areas of objection to the proposals set out in the core strategy:                      Contradictions between the core strategy and national Planning policy regarding Brownfield vs Green fields sites                      Flooding                      Maintaining the Setting of Heritage sites (omission of listed buildings when proposing housing sites)                      Maintaining the rural and ecological environment                      Accessibility                      Suitability of the Church Lane site when assessed by Atkins Section 7 of this objection will outline viable alternative sites.                      Section 7 of this objection will outline viable alternative sites.</p> <p>2. Flood Risk at the Church Lane site                      The area of land identified for proposed development of some 45 houses is an area already known to be prone to flooding, particularly during winter months.                      The southern edge of the proposed development is skirted by Lambrok Stream. Local residents, and anyone who walks in the Southwick Country Park know that in the winter months the landscape around the stream is waterlogged and some paths at the northern end of the Country Park will flood, sometimes for weeks.                      The gradual progression of global warming and climate change means the trend is towards warmer and wetter winters, and indeed warmer and wetter summers and ever-increasing levels of precipitation.                      A fluvial flood event was recorded at the proposed development site on 2th December 1979 when for several days the main river flooded when the channel capacity was exceeded. A considerable area of land each side of the stream was flooded.                      There are many other recorded issues and concerns regarding flooding and flood risk in areas of Trowbridge and nearby hamlets adjacent to the Lambrok Stream, a few of which are quoted below:                      Heart Radio website reported on 3rd November 2011 that people at risk of flooding from Lambrok Stream in Trowbridge will benefit from improvements to the Environment Agency's free flood warning service. "We know that certain parts of the River Biss, Paxcroft Brook and Lambrok Stream will flood earlier while other areas will flood later and only when the levels continue to rise," said Paul Hardy for the Environment Agency.                      On 23rd November 2012 the Environment Agency issued flood warnings for Lambrok Stream.                      3rd March 2015. Twelve neighbours living at Acacia Crescent, Trowbridge raised concerns about flooding relating to Lambrok Stream and planning application 14/06917/OUT for a development of some 30 properties. Their comments included the incidence of recent flood events associated with high water levels in the River Biss, flood water backing up very quickly in the Lambrok stream, rapidly affecting the land to the</p>				

#### Appendix Q - Schedule of representations

rear of Acacia Crescent, and threatening the flooding of those properties. Water routinely enters gardens. The Environment Agency issues warnings to these properties as they are in their declared flood zone. The residents stated that one thing they knew for certain was that the Lambrok stream floods after short periods of heavy rain.

14th February 2017. The Save Our Southwick campaign group have voiced many objections to the Outline Planning Application 16/12279/OUT by Redrow Homes to build 100 homes on Blind Lane in Southwick village. Aspects relating to flooding and Lambrok Stream relevant to the proposed Church Lane development include: the development is partially on a flood zone 1 and extremely close to flood zones 2 and 3. This area of land is on clay and the water table level is always very close to the surface. When the water flows from the attenuation pond it will feed into the Lambrok stream at a single point and this will increase the volume of water being carried off towards Trowbridge. (This suggests that if the Redrow development is approved it could lead to greater flows in Lambrok Stream further increasing the risk of flooding in the vicinity of the proposed Church Lane development, as well as to other residential areas near to the Lambrok Stream throughout Trowbridge). Lambrok stream hasn't been able to cope with the water volume and has flooded the gardens south of Blind Lane in Southwick. This has happened on three occasions since 2012 which shows that the flood zone models used for these flood calculations are out of date. The Lambrok Stream on the site runs in three directions and the site is on a well-known floodplain. Flooding has been frequently witnessed in these fields and within some of the housing surrounding them, especially during autumn winter and spring. Application 13/02007/OUT being a property on the corner of Blind Lane/Wynsome Street was recently refused planning permission by Wiltshire Council, due to the level of existing flooding in the area. The campaign group also state that if development proceeds despite the concerns of local people the developers and/or existing landowners should be required to set aside funds in order to compensate future flood victims in the neighbourhood.

The River Levels independent website [www.riverlevels.uk/floodwarning](http://www.riverlevels.uk/floodwarning) has identified land alongside the full length of Lambrok Stream from Acacia Road in the centre of Trowbridge all along the line of its flow to Southwick Village for flood alerts and warnings.

Flooding at the bottom of the Old Brickfields Fields 2016 taken from the main road

[Attached photo - attachment 1]

Whilst the Church Lane proposed development area currently comprises green fields, rough grasslands and paddocks the land acts like a sponge in the wet winter months absorbing rainfall over the whole area of the site and sending much of it down to the water table below, with a much lesser volume of water draining gradually into the Lambrok Stream. This means surface water run-off is minimised and flooding in the area is less than it would otherwise be.

However, if the proposed development site were to be approved it would lead to the area being covered by highway tarmac, pavement and houses. Instead of rainfall soaking into the land the incidence of 'run-off' of water would increase significantly causing excessive and concentrated rain flow into the Lambrok Stream. This would severely threaten the new homes, as well as existing nearby properties and the adjacent Southwick Country Park with surface water flooding.

Furthermore, the consequentially raised water table in the area of the new and existing properties could also undermine their physical structure and increase the risk of heave and subsidence. It is common knowledge that clay soils that are repeatedly waterlogged in wet winter months and then dried in dry summers will expand, shrink and crack greatly. The Environment Agency website [www.gov.uk/check-flood-risk](http://www.gov.uk/check-flood-risk) identifies the land 100-200m all along either side of this section of the Lambrok Stream to be at HIGH RISK of flooding (21st June 2017).

The Environment Agency's concerns about increased levels of irresponsible building development in floodplain areas in the UK in recent years are well-known. The lower section of the earmarked field at Church Lane is classified as floodplain, and it seems foolish to consider it for development when it is bordered by a stream and known for local flooding and waterlogging, whilst many other potential development sites have been identified in Wiltshire, as well as a number of available large 'Brownfield' sites, which do not have the same proximity to streams and rivers with the associated flood risks.

National Planning policy states:

156 - Local planning authorities should set out the strategic priorities for the area in the Local Plan. This should include strategic policies to deliver:

the provision of infrastructure for transport, telecommunications, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

the provision of health, security, community and cultural infrastructure and other local facilities; and

climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape.

Appendix Q - Schedule of representations

	<p>The Government's Planning Portal Planning Policy Statement 15: Planning and Flood Risk Annex B: Development and Flood Risk says:          B11 New development can increase indirect flood risk in locations beyond the development site simply by increasing the amount of run-off from the developed area. This may occur where permeable surface areas are reduced by construction work leading to increases in the volume and speed of water transported through a catchment.          B12 Where development, for example, a poorly located bridge across a river, restricts the capacity of the drainage system to convey water through an area, this will increase the flood risk adjacent to and upstream of that development. This will create the potential for flooding to occur more often and to greater depths. Development that impairs the conveying capacity of the flood plain can also exacerbate risk by encouraging the gathering of water borne debris that may further restrict floodwater flows.          B13 Buildings and the construction of other hard surfaces also have the potential to increase downstream flood risk by decreasing flood plain storage and increasing the scale or speed of run-off.          So, development at Church Lane, in addition to exacerbating flooding and the other identified risks at this site, could also increase flooding issues anywhere along the line of the Lambrok Stream which ribbons its way across Trowbridge, through Wingfield, North Bradley, Southwick and beyond. If development causes additional water flow or blockage or obstruction at any point along the stream this could impact upon properties near to the stream anywhere along its line. Development anywhere along the line of the stream should therefore be investigated very thoroughly to assess the potential detrimental flooding consequences all the way along the line of the stream.          The Environment Agency's website under the Flood Map for Planning tool has been interrogated (28th June 2017). It shows that the lower end of the proposed development site registers as a category flood zone 2 or 3 which requires the developer to carry out a Comprehensive Flood Risk Assessment.          The outline planning application that Trowbridge Town Council was consulted on identifies the Church Lane site as the whole field right down to the Lambrok Stream. This area includes the floodplain zone 2/3 section of the field. The Trowbridge Town Clerk advises, however, that when the planning application progresses he expects the developer only to include the upper two-thirds of the field, the section above the floodplain (flood zone 1) which does not normally require any flood risk assessment. However, given that any run-off of water from the development would pass straight into the flood zone 2/3 area and into the Lambrok Stream with all the associated risks outlined above to the immediate neighbourhood as well as elsewhere up and downstream I believe the development should still be disallowed on flooding grounds.          I once worked in a large city council Engineering Department. One of our fully qualified engineers told me his house was built on clay and that he spent his summer evenings not spraying the plants in his garden but instead he sprayed the foundations of his house to prevent the clay beneath drying out to try to reduce the risk of subsidence. Wiltshire Council should take heed - it would be far better to build houses on a level and stable site, preferably a tried and tested Brownfield one than to build on a virgin Greenfield slope of clay, on a gradient and alongside a stream that has a history of flooding and ground saturation every winter. The costs of flooding and/or subsidence are always high.          Local hearsay...one of our neighbours has said she was recently walking in the area in question when she stumbled upon a Wiltshire Council officer and asked him if the Council was planning to develop the land. He apparently answered on the lines of, 'Not a chance. We wouldn't build on floodplain'.          Photos of flooding on the site:          [Attached photos - attachment 2]          In conclusion, flooding remains a risk for new homes and increased run-off will impact on Southwick Country Park.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Residents Comments on The Wiltshire Core Strategy and Housing Allocations                      This document has been written to strongly oppose the allocation of housing on fields behind Church Lane. There are six main areas of objection to the proposals set out in the core strategy:                      Contradictions between the core strategy and national Planning policy regarding Brownfield vs Green fields sites                      Flooding                      Maintaining the Setting of Heritage sites (omission of listed buildings when proposing housing sites)                      Maintaining the rural and ecological environment                      Accessibility                      Suitability of the Church Lane site when assessed by Atkins Section 7 of this objection will outline viable alternative sites.                      Section 7 of this objection will outline viable alternative sites.                      3. Maintaining the Setting of Heritage Sites                      Listed Buildings                      The sites at the back of Church Lane provide a rural setting for 7 Grade II Listed buildings as follows: - St Johns Church School and Hall masters dwellings comprising 4 dwellings. (UID1021593)                      - Church of St Johns (UID 1364192)                      - 344 Frome Road (UID 1364193)                      - Rose Villa (UID 1021594).                      National policy states that:                      129 - Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this assessment into account when considering the impact of a proposal on a heritage asset, to avoid or minimise conflict between the heritage asset's conservation and any aspect of the proposal.                      132 - When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation. The more important the asset, the greater the weight should be. Significance can be harmed or lost through alteration or destruction of the heritage asset or development within its setting. As heritage assets are irreplaceable, any harm or loss should require clear and convincing justification. Substantial harm to or loss of a grade II listed building, park or garden should be exceptional. Substantial harm to or loss of designated heritage assets of the highest significance, notably scheduled monuments, protected wreck sites, battlefields, grade I and II* listed buildings, grade I and II* registered parks and gardens, and World Heritage Sites, should be wholly exceptional. The photographs below clearly show that current development on this side of town has enabled these buildings to maintain their historic setting.                      [Attached photos - attachment 1]</p>			

Appendix Q - Schedule of representations

	<p>Also, when purchasing 344 Frome Road we contacted the Wiltshire Planning Department regarding future building on the fields that directly backs onto the Grade II listed cottage. In the reply they were informed that "the land that backs onto 344 is outside the development policy boundary for housing and therefore any application to develop the land is likely to be refused by the council.</p> <p>In addition to the listed buildings at this site there is also an ancient water meadow:  MWI73579 Water Meadow, West of Upper Studley</p> <p>Summary  A post medieval water meadow is visible as earthworks on air photographs.</p> <p>References  National Monuments Record, ST 85 NW 95  English Heritage Archives, 1577543</p> <p>Grid reference  ST 8403 5643 (map quarter sheet ST85NW)</p> <p>In conclusion, development will inevitably affect the historical setting of this area.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Residents Comments on The Wiltshire Core Strategy and Housing Allocations                      This document has been written to strongly oppose the allocation of housing on fields behind Church Lane. There are six main areas of objection to the proposals set out in the core strategy:                      Contradictions between the core strategy and national Planning policy regarding Brownfield vs Green fields sites                      Flooding                      Maintaining the Setting of Heritage sites (omission of listed buildings when proposing housing sites)                      Maintaining the rural and ecological environment                      Accessibility                      Suitability of the Church Lane site when assessed by Atkins Section 7 of this objection will outline viable alternative sites.                      Section 7 of this objection will outline viable alternative sites.                      Maintaining the rural landscape of the area                      National Planning Policy States:                      112 - Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality.                      113 - Local planning authorities should set criteria based policies against which proposals for any development on or affecting protected wildlife or geodiversity sites or landscape areas will be judged.                      As well as offering a rural setting for the heritage assets here, the land between Church Lane and Southwick Country Park provides a part of the buffer between Southwick and Trowbridge and is well used wildlife. Both fields have had the same hedge line since at least 1890 and 1790-1874 as shown by the OS map below. (dated 1890) Similar maps from the 1920's and 1940's show the exact same hedge line.                      [Attachment 1]                      The Hedgerow Act 1997 states that a hedgerow is historic if:                      1. The hedgerow marks the boundary, or part of the boundary, of at least one historic parish or township; and for this purpose "historic" means existing before 1850.                      3. The hedgerow-                      (a) is situated wholly or partly within an archaeological site included or recorded as mentioned in paragraph 2 or on land adjacent to and associated with such a site; and                      (b) is associated with any monument or feature on that site.                      Countryside hedgerows: protection and management                      (Extract from Land Management, Natural England 11 September 2014, Last updated: 16 August 2017) states that:</p>			

#### Appendix Q - Schedule of representations

A countryside hedgerow is protected if it meets the following criteria for:  
Length - "more than 20m long with gaps of 20m or less in its length"  
Location - "next to a local nature reserve (Southwick Country Park)"  
'importance' - "is completely or partly in or next to an archaeological site listed on a Historic Environment Record (HER), (formerly a Sites and Monuments Record)"

The hedgerow surrounding the Site 1021 is recorded on the OS 1890 map and the OS Old Series 1791-1874 (published 1805-18740). It also provides the boundary for the Ancient Monument scheduled above and is therefore considered "Important"

The hedgerow around the site meets all three criteria and therefore needs to be protected.

In the more recent past, the first field has been used for grazing animals for at least the last 30 years and the larger field behind Framfield offers wide ranging views across the countryside and is home to pairs of deer as well as bats, rabbits, voles and a range of birds.

The WCS states that Bechstein Bats (and others) use the sites behind Church Lane and Old Brick Fields. The document states that bat corridors should be built into any proposed development. In fact the current owners of the larger field cut a large gap in the hedge some years ago (presumably to allow vehicles through). The defra document "Habitat management for bats A guide for land managers, land owners and their advisors" states that "even gaps as small as 10 m may prevent bats - especially the smaller species - from using hedgerows as a route to fly between roosts and foraging areas." And that "Gaps should be replanted to ensure that the hedge can be used as a flight route." Further gaps, which would inevitably be needed to develop the site, would affect the bats and other ecology of the site.

When contacting the council regarding the reasons for delay of the West Ashton site, the reason given was "The application has been delayed because the applicant is addressing ecology objections relating to a colony of bats in nearby Biss Wood. It is anticipated that a revised masterplan and environmental statement will be submitted by the applicant to address the objection in the near future, at which time all interested parties will be notified and given a further opportunity to make representations. All things being equal, the application may then be presented to the Council's Planning Committee for determination towards the end of the year."

In August 2017, bats were monitored over two 12 hour periods at "Framfield" Church Lane. During this time, 12 breeds of bats were recorded including Bechstein Bats. Details of this monitoring exercise have been passed onto Wiltshire County Council and Wiltshire Wildlife. The bats were tracked crossing the fields from the Country Park to the hedge line in Church Lane.

This presence provides another reason why development should not take place on site 1021.

In 1989 there was an application (w89/0140) to build 2 dwellings on the field behind Church Cottage, Church Lane. This planning proposal was refused on the basis that "the proposed development (of just 2 dwellings) would extend the built up area into open countryside, detrimental to the character of the area," (Extract from the decision notice)

Also, the Secretary of State further notes (in the appeal document) that "the proposal would harm the rural character of the area" and that "the site is outside the limits of Trowbridge" which is still the case.

Thirdly, the appeal document notes that the Plan "seeks to maintain a rural buffer between Trowbridge and Southwick. The proposal would encroach on open rural land and harmfully effect it's appearance ....The appeal site, which is part of a pasture field on the south side of Church lane, is in the pleasant open countryside between Trowbridge and Southwick"

If this is the case for 2 dwellings, 40 dwellings would be extremely detrimental to the rural nature of this area. In fact, the addition of Southwick Country Park since this application would further promote the maintenance of this area as rural, alongside maintaining the setting of St Johns Church, former school houses and Church Cottage.

There was also a historic application (ref APP/F3925/A/02/1082021) regarding an agricultural access off the A361 to the field to the south of Church Lane. This is the proposed site of access to the new dwelling on the Housing Site Allocation Plan. However, when this planning application went to appeal, the Inspector specifically states that there need to be considerations as part of the appeal success. Paragraph 12 states "In the future, for economic reasons, they would expect to lease or rent this land to a local farmer" On this basis the inspector goes on to say that this purpose "seems to be reasonable and therefore agricultural machinery and transport would require access to the field ....tending of livestock would require a small number of visits by light vehicles .....Arable use may well involve particularly large vehicles and plant but only during more restricted periods"

Since this application the field in question has not been rented or used for agricultural purposes. The only use is that the field was ploughed once about three years ago, not for arable purposes or to grow crops but seemingly to prevent dog walkers and locals from enjoying the site and

Appendix Q - Schedule of representations

	<p>countryside. Also, it is clear from the above evidence that the access was granted ONLY for limited agricultural use NOT for construction or residential traffic which would clearly change the local area.</p> <p>Conclusion, development would be detrimental to protected species of bats and would contradict the Hedgerow Act 1997.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Residents Comments on The Wiltshire Core Strategy and Housing Allocations                      This document has been written to strongly oppose the allocation of housing on fields behind Church Lane. There are six main areas of objection to the proposals set out in the core strategy:                      Contradictions between the core strategy and national Planning policy regarding Brownfield vs Green fields sites                      Flooding                      Maintaining the Setting of Heritage sites (omission of listed buildings when proposing housing sites)                      Maintaining the rural and ecological environment                      Accessibility                      Suitability of the Church Lane site when assessed by Atkins Section 7 of this objection will outline viable alternative sites.                      Section 7 of this objection will outline viable alternative sites.                      5. Review of Atkins "Wiltshire Housing Site Allocations Plan"                      Atkins were employed to review the six key sites identified by Wiltshire council for housing:                      Elizabeth Way - 205 houses                      White Horse Business Park - 150 houses (67% negative impact vs 33%positive)                      Elm Grove Farm - 200 houses                      Church Lane - 45 houses (83% negative impact to 17% positive)                      Upper Studley - 20 houses (80 % negative impact vs 20% positive) Southwick Court - 180 houses (71% negative impact vs 29% positive)                      Each site was assessed against the following headings Bio-diversity, Water, Historic Environment, Landscape, Accessibility, Education and Housing/ Employment provision. They were given a rating against each objectives (negative impact or positive impact.)                      The land at Church Lane was the least attractive site of all six.                      In addition, the sites at Elizabeth Way, White Horse Business Park and Elm Grove farm provide infill between existing developed sites whereas the other three sites would impinge on open countryside.                      In fact, the recent planning application for 100 plus houses off Blind lane was refused on the basis that it provided "an unwarranted encroachment of the open countryside". This is also the case at the Church Lane, Boundary Walk and Old Brick fields sites. This was rejected based on paragraph 17 of the National Planning Framework:                      Core planning principles 17:                      Within the overarching roles that the planning system ought to play, a set of core land-use planning principles should underpin both plan-making and decision-taking. These 12 principles are that planning should:                      be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area. Plans should be kept up-to-date, and be based on joint working and co-operation to address larger than local</p>			

Appendix Q - Schedule of representations

	<p>issues. They should provide a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency;  not simply be about scrutiny, but instead be a creative exercise in finding ways to enhance and improve the places in which people live their lives;  proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities;  always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings;  take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;  support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy);  contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework;  encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value;  promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production);  conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;  actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable; and  take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		In addition to these, other sites were dismissed as part of the SHLAA, the reason given for this was that they were within the current settlement boundary. The National Planning Policy states, "planning policies and decisions should encourage the effective use of land by re-using land." It appears that Wiltshire Council have decided that developing infill sites would be less attractive to developers and have therefore chosen open sites which do not need to be built on to fulfil their housing quota. Surely Wiltshire Council should not opt for the easy, developer led option to the detriment of our countryside, wellbeing and wildlife.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am writing as part of the public consultation into the possibility of developing 280 homes on Site 3565 known as 'Land east of A361 at Southwick Court'.</p> <p>As a local resident, I believe that building on Site 3565 would be detrimental to the local community, landscape and biodiversity. Site 3565 has been deemed to be 'less sustainable' than other sites in Trowbridge in the Sustainability Appraisals and it's my belief that the proposals to develop on this site are contrary to multiple Core Policies that are outlined in Wiltshire Council's Core Strategy and contrary to the Trowbridge Area Strategy. Moreover, I believe that there are inconsistencies in the Sustainability Appraisals carried out for Site 3565 in comparison with other sites within Wiltshire. Therefore, as you will read in my letter, I believe that Site 3565 should 'not be considered further'.</p> <p>Commitment to not building between Trowbridge, North Bradley and Southwick</p> <p>In Wiltshire Council's Core Strategy document released in 2015, in the section headed Trowbridge Area Strategy, it was clearly stated that "it is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick, North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities." However, developing 280 homes on Site 3565 clearly goes against Wiltshire Council's strategy to leave the land between Trowbridge, Southwick and North Bradley untouched. Not only will this plan go against Core Policies 50, 51 and 58, but it will also disrupt the character and identities of the small villages that you want to maintain, which will no doubt cause social unrest.</p> <p>How has Site 3565 even made it to Stage 3 of the Housing Site Selection process? It is evident that the strategy for the Trowbridge area has not been taken seriously. Wiltshire Council have made it clear that they want to ensure that they "protect the character and identity" of villages such as North Bradley and Southwick. Building 280 new homes in-between these villages will achieve exactly the opposite. If development on Site 3565 goes ahead, this would set a precedent to other developers that this policy can be overlooked, not just at land close to Site 3565, but at other sites throughout the county. If this happens, it won't be long until Southwick and North Bradley just become suburbs of Trowbridge in the same way Hilperton has, thus making a mockery of Wiltshire Council's commitment to not developing between Trowbridge, Southwick and North Bradley. How many other commitments in the Core Strategy are Wiltshire Council happy to backtrack on?</p> <p>It is baffling that Wiltshire Council entertain the idea of building on Site 3565, carrying out Sustainability Appraisals and assessing its suitability to be developed upon, when it not only opposes to multiple Core Policies, but it also undeniably and plainly goes against one of the first issues and considerations it has for the Trowbridge area.</p> <p>Developing on Site 3565 is contrary to Core Policy 50 Landscape which states that "there is a need to protect the distinct character and identity of the villages and settlements in Wiltshire." I'm unsure how building on Site 3565 protects the character or identity of nearby settlements. The fields on Site 3565 are a fundamental part of the rural character and identity of the area surrounding Southwick, North Bradley and Trowbridge. Developing Site 3565 will remove this character. Furthermore, developing upon Site 3565 would go against Core Policy 51 when it states "Development should protect, conserve and where possible enhance landscape character and must not have a harmful impact upon</p>			

Appendix Q - Schedule of representations

	<p>landscape character.” Building 280 homes on Site 3565 will not protect, conserve nor enhance the landscape and its character that is deeply treasured by those in the community.</p> <p>Conclusion</p> <p>Overall, it’s perfectly clear that there are inconsistencies with the Sustainability Appraisals that have been carried out in Wiltshire. Developing on Site 3565 is contrary to multiple Core Policies and clearly contradicts Wiltshire Council’s commitment to not build on land between North Bradley, Southwick and Trowbridge. As mentioned, if building on Site 3565 takes place despite the commitment Wiltshire Council made not to just two years ago, this sets a scary precedent for further developments which will see developers rubbing their hands as they look to sites that they previously thought would be out of question. Wiltshire Council developing on Site 3565 would show nothing more than a lack of integrity and a lack of commitment to the residents that it stands for.</p> <p>The fact that Site 3565 has made it this far also just begs the question what is the point of a Core Strategy if Wiltshire Council backtrack on key promises so soon after making them in important documents. This breeds a lack of confidence in the institution that residents are supposed to have confidence in. This lack of confidence will not just remain with development proposals, but will also spread into other work that Wiltshire Council does and documents that they release.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">532</a>	<b>Consultee</b> Dan Noutch  <b>Person ID:</b> 1125418	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Core Policy 58                      Site 3565 isn't suitable for the construction of 280 homes as it does not align with Core Policy 58 of the Wiltshire Core Strategy which outlines "that Wiltshire's important monuments, sites and landscapes and areas of historic and built heritage significance are protected and enhanced in order that they continue to make an important contribution to Wiltshire's environment and quality of life."                      The open countryside around Southwick Court Farmhouse, which is located by Site 3565, contributes largely to this heritage asset being Grade II* listed. This setting would be lost if Site 3565 is developed. If the effects on the heritage asset are mitigated by screening as outlined in the Sustainability Appraisal assessment outcome, the rural setting that is a fundamental part of it being a Listed Building will be lost. Mitigation in the form of screening wouldn't be suitable mitigation due to the loss of setting. Because of this, I believe that Site 3565 should be assessed to have major adverse effects in terms of SA Objective 6 rather than moderate adverse effects.                      There are numerous sites in Wiltshire that have been deemed to have major adverse effects in terms of SA Objective 6 that won't be pursued further. Site 3554a in Salisbury was deemed unsuitable for development and will not be taken further to Stage 4a. In the Sustainability Appraisal for Site 3554a, it says: "Given the proximity of designated and undesignated heritage assets and a strong rural character to the area, development of this site for housing is likely to result in major adverse effects that cannot be mitigated." Furthermore, it says: "The bridge, the farm and the house in part derive their interest from being located in a rural setting. Development in the eastern part of the site is likely to harm the setting of Milford House." This shows that the historical assets close to Site 3554a pride themselves on their setting and being in a rural area. It is my belief that the same applies to Southwick Court Farmhouse close to Site 3565. As already mentioned, Southwick Court Farmhouse will lose its definition once it is 'screened'. This building should be celebrated and be shown off, not hidden away behind trees.                      While the Milford Bridge at Site 3554a is Grade I listed, I don't believe that Grade I listed buildings are given any more protection than a Grade II* or a Grade II listed building. The setting of these historical assets should be protected and where possible enhanced. The assessments of Site 3565 and 3554a for Objective 6 is inconsistent. All sites must be assessed in equal weighting.                      Site 3565 should be reassessed to have major adverse effects for SA Objective 6 and the Council shouldn't consider the site for development any further.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p><b>Flood Risk</b>                      Part of Site 3565 also falls under the Environment Agency's Flood Zone 2 and Flood Zone 3 in its flood map for planning. Whilst the majority of Site 3565 falls under Flood Zone 1, it is concerning that homes could be built on and close to this area that is at a high risk of flooding. If development commences on Site 3565, this land will be concreted over, increasing surface run off. Developing homes close to these areas that are at high risk of flooding will mean that some form of attenuation scheme will be implemented. However, this will lead to the surface run-off to be put back into Lambrok Stream elsewhere which will lead to other homes to be at risk of flooding, in places such as Wynsome Street and Chantry Gardens in Southwick.</p> <p>Having looked into other sites in Wiltshire that will not be taken forward to Stage 4, there are sites that are entirely in Flood Zone 1. For example, in one of Wiltshire's other principal settlements, Salisbury, the Old Sarum site (site S80) is entirely in Flood Zone 1. It will not be taken further into Stage 4 but in its Sustainability Appraisal Report was not assessed to have any major adverse effects and is fit for 254 dwellings. Furthermore, site S159 which is completely in Flood Zone 1 and in the principal settlement of Salisbury will not progress to Stage 4. Site 3421 is another site in Salisbury that will not be considered for Stage 4 despite having no major adverse effects yet is completely in Flood Zone 1 unlike Site 3565. These are just three sites that are not to be developed upon further yet are at less risk of flooding than Site 3565 and have similar, if not better, outcomes in the Sustainability Appraisal Report.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Core Policy 50                      Developing on Site 3565 would be contrary to Core Policy 50 which states that “All development proposals shall incorporate appropriate measures to avoid and reduce disturbance of sensitive wildlife species and habitats throughout the lifetime of the development.” Developing on Site 3565 would be detrimental to the many animal species that live in and around Site 3565.                      As with many sites in Trowbridge, the hedgerows along streets such as Boundary Walk provide the perfect habitat for bats as well as many other animals. Bats are a protected species and Site 3565 is a part of the Bath and Bradford-on-Avon Bat SAC (Special Areas of Conservation). At the Ashton Park site within Trowbridge, it has been said that “Applications will be screened for potential impacts on the Bath and Bradford on Avon Bats SAC. Any appropriate assessment must conclude ‘no adverse effects’”. This approach should be taken for Site 3565 and the habitats of the birds, bats and other animals that inhabit the hedgerows and watercourse must be protected, conserved and enhanced. Many sites within Trowbridge have been deemed not to be developed upon due to there being Bechstein bats inhabiting trees and hedgerows. Is there any evidence to prove that the bats that live in hedgerows and trees around Site 3565 are the same rare bat species that have led other sites to not being considered for development?</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I understand there is to be built a roundabout hereabouts to allow cars into the proposed new house builds. This will certainly slow the traffic flow as it is always congested at peak times mornings and evenings. As this will be very close to the entrance of Southwick Country Park and considering the Saturday run held there every week, traffic congests here due to the amount of runners who park on the main road due to the carpark being too small. There are around 150 - 200 runners there every week. They have been advised to park in the College. Lorries using this route into Trowbridge find it extremely difficult to pass the amount of parked cars, having to wait for a large enough suitable gap to get through.

If these new proposed houses join onto Balmoral and Sandringham Roads, this will increase the volume of traffic that Silver Street Lane has to contend with. It had increased over the years now. With new houses will bring more families into the area. The local school, The Grove Primary school has already endured local residence complaining about traffic parked around school times. I know this as my son attended there!!!! The local residence have now put in an 'unofficial' one way system at school times. As most parents have cars these days to drop their children off and go to work, if they can't park near the school, they park a short distance away. This is now on Silver Street Lane.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Many people living in our community think that:</p> <ol style="list-style-type: none"> <li>1. The Plan is not positively prepared because it does not meet objectively assessed development requirements. WC proposes to increase the size of Trowbridge by one quarter during the Plan period (and more after that) which exceeds the requirement for a five year supply.</li> <li>2. The Plan is not justified because WC have failed to explain how and when the jobs, schools, roads and other services and infrastructure will be provided to support this huge expansion.</li> <li>3. The Plan is not effective because WC's examination of 'windfall', which is expected to provide 60% of new housing, is grossly inadequate – comprising one page out of 4,500 pages of the Plan documents.</li> <li>4. The Plan is not consistent with national policy because WC has failed to give proper weight to brown field sites. WC's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes</li> </ol> <p>1. There seem to be several 'brownfield' sites in Trowbridge which would be ideal for housing but are standing idle and also creating a 'blot' on the landscape of the town. These could be developed to make the County Town more attractive.</p> <p>2. Where is the evidence that doctor's surgeries and schools etc. will not be crowded beyond capacity? Local services will not cope with such an influx of people requiring medical services, education, social services etc.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H5.3 Clover Lane Durrington			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I support the inclusion of Site 3154 Piece Meadow, Durrington within the Wiltshire Site Allocations Plan. Inclusion within the plan means that this packet of land would no longer be a windfall site thus allowing efficient and effective use of the land for housing development. Development of Site 3154 with Site S98 and the adjacent land which is already subject to planning permission S/2006/1698 would allow for a holistic approach to any development plan for the three sites. In addition, vehicle, cycle and pedestrian access via the already existing Clover Lane network would logically provide links with the village and to open spaces and amenities. Development of the site should cause no major ecological or topographical impact and would fit well with the area strategy, linking in with the recently developed Avon Fields. Site 3154 and the land subject to planning permission S/2006/1698 are available and under single ownership. Site 3154 has been shown to be an available, achievable and deliverable site with moderate sustainability benefits and as such I support its adoption within the Wiltshire Housing Site Allocation Plan.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Figure: 5.18 H2.14			Justified
				Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocation Plan fails to adhere to the results of its own assessments. For example, site 321 scored negatively in 9 of the 12 (75%) criteria of the Stage 3 Sustainability Assessment, but the document concludes that the site is "more sustainable". I am questioning how this conclusion was drawn.</p> <p>Appendix F in the Wiltshire Council Site Allocation Plan contains the assessment criteria from Stage 3 of the site selection process, which is referred to as the Sustainability Appraisal. The Sustainability Appraisal assesses how suitable the area is for development against 12 subjective sustainability objectives. These objectives are qualitative objectives and are therefore down to the interpretation of the scorer.</p> <p>Scoring:                  Of the sustainability objectives, the site (321) on the B3098 scored negatively in 9 of the 12 (75%) categories.                  Of the three categories where site 321 did score positively, the scoring can be considered questionable in two categories, as below:                  Objective 12: Ensure adequate provision of high quality employment land and diverse employment opportunities to meet the needs of local businesses and a changing workforce. Score: + Minor positive effect                  My response to objective 12: There is no evidence to reinforce this statement – building houses in a village does not create diverse employment opportunities. This should not score a positive response.                  Objective 8: Provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwelling sizes, types and tenures. Score: +++ Major positive effect.                  My response to objective 8: Any site will achieve a positive score, therefore removing its value when making comparisons. Every single site in Wiltshire Council's Sustainability Appraisal scores a positive score in this category, therefore completely removing its effectiveness.                  Looking at the evidence presented here, I question how it was concluded that the site was "more sustainable". The conclusion has completely ignored the results of the study.                  The plan would be acceptable if it developed conclusions that adhere to the results of its own assessments - not conclusions that ignore the results. It would be more sound if the results were not 'engineered' to conveniently find a site that could house 40 of the target 47 dwellings, as set out in the report. It would be more sound if the conclusions of the report reflected the results of the assessments carried out.</p>

Appendix Q - Schedule of representations

Comment ID:	546	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		MR Geoff Turner Clerk	Person ID:	Do you consider the draft WHSAP is sound?	
		Calne Without Parish Council			
		Person ID: 1125505			
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		A.23 SBR Studely and Derry Hill			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Calne Without Parish Council met on the 4th Sept and considered the Draft Wiltshire Housing Allocation Plan and voted unanimously to object to the settlement boundary for Derry Hill and Studley which it considers to be inconsistent. The council considered that the proposed revised settlement boundaries around the two main village areas of Derry Hill and Studley were broadly acceptable. However it considered the settlement boundary around the outlying group of houses on Old Road, Studley was inconsistent with other outlying housing and should be removed.</p> <p>Derry Hill and Studley has three outlying areas of housing on Devizes Road, Norley Lane and Old Road. North Wilts DC originally drew a settlement boundary around 21 houses on Old Road which were somewhat remote from the villages. Boundaries were not drawn around similar clusters of 15 houses on Devizes Road and 28 houses on Norley Lane, this is considered highly inconsistent. All three areas are very similar in that they are all small areas of linear housing, predominately along one side of roads leading to and from the villages. The Devizes Road housing is actually contiguous to Derry Hill, the Old Road housing is about 200m outside the nearest village boundary and the Norley Lane settlement about 350m from the Studley boundary</p> <p>The Parish Council believes that either all three areas should have settlement boundaries or preferably and more logically none of them should be within the settlement boundary as they are effectively in countryside outside the villages. The Old Road area should certainly not be extended across the A4 to include isolated and unrelated houses on the opposite side of this major road.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I believe the plan is unsound as the transport infrastructure has not been properly considered in any depth. The Netherampton Road cannot sustain any increase in traffic, let alone over 1000+ additional vehicles using it. The road cannot be widened due to existing developments and rivers. The location of sites H3.1 and H3.3 are not on any current bus routes meaning that more people will turn to using their cars. The plan needs to re-address the location of such a large proposed development to find somewhere that the current roads can have their capacity increased, infrastructure improved or a new location where such new infrastructure can be put in place. The addition of new developments will also have more of an affect on the environment that I feel has been considered in the plan. The large number of extra vehicles on the Netherhampton Road will produce a lot of harmful emissions to pedestrians, wildlife and the current ecosystems. The inevitable increased traffic jams will have running car engines queued up alongside dwellings, a school, businesses and pedestrians including children using the school emitting CO2 and other toxic fumes which have a negative impact. I believe the plan needs to consider this further. I also think that the plan does not consider the impact of construction traffic on the Netherhampton Road and the environment, wildlife and current residents and pedestrians in this area as outlined above. In addition to the increased traffic jams and exhaust fumes it will cause, the plan needs to consider the noise pollution it will create on current residents, businesses and pedestrians. The main road and surrounding access roads are not able to cope with large trucks, lorries and other construction traffic as the infrastructure is not in place and has not been considered. The plan needs to consider and address this.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Community Area Topic Paper-Chippenham Community Area: Yatton Keynell Revised Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Yatton Keynell is identified in the Wiltshire Core Strategy (WCS) as a sustainable "Large Village" in Core Policy 1 Settlement Strategy. The village has a very good range of community facilities and businesses. Yatton Keynell is assessed as suitable for some sustainable growth and at present does not have an advanced Neighbourhood Plan.</p> <p>It is proposed in the Settlement Boundary Review that the allocation of a single large site east of Farrells Farm will accommodate all the growth within Yatton Keynell for approximately 30 dwellings.</p> <p>The proposed Yatton Keynell village settlement boundary has elsewhere been drawn tightly around the existing built form and provides little opportunities for small scale future development. Almost all infilling has been taken up within the previous decade(s) within Yatton Keynell and there will be no small suitable and available housing sites within the Village up to 2026.</p> <p>The proposed development of one large site east of Farrells Farm will create a major visual impact at the beginning of the village and a reduction of landscape quality as well as a significant loss of countryside.</p> <p>A selection of smaller sites would be more in keeping with the village character and could be accommodated where they would have little adverse landscape impact.</p> <p>Expansion of the village by selection smaller sites including land opposite the existing built up area of Tiddleywink. Which has been proposed by the landowner under application 17/044648/OUT (Site Area document attached). This site is relatively contained site and well screened by vegetation with an existing access. The site which forms no agricultural purpose and already developed for parking and garaging.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Draft Wiltshire Site Allocation Plan makes no provision for Self or Custom Build properties. The Council has a responsibility for keeping a self and custom housebuilding register as set out in Section 1 of the Self-build and Custom Housing Act 2015. The National Policy Planning Guidance (NPPG) states that this should form a key part of a relevant authority's evidence base of demand for this type of housing. There is no statement that this is allowed for the draft Plan. By implication self build or custom build for a group of dwellings are only likely to be delivered through small sites rather than a large housing site allocation. This will require some space within existing villages rather than a tightly drawn restrictive boundary.

Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge Principal Settlement			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Although I agree that more housing is required due to the national housing shortage, why do we always have to look at green field sites. Around Trowbridge there are at least 2 sites that could have change of use and therefore be used for housing. The Bowyers site is an eyesore and surely could provide enough space for a reasonable amount of housing. Virgin's old building on White Horse Business Park could be demolished and used for housing. This building has been empty for at least 3 years and surely the land would be better used for housing than waiting for a potential tenant. At least the Council would receive some revenue through Council Tax as opposed to no revenue through Business Rates. Housing Association's should also play their part for providing housing for people in need. Why are they selling perfectly good 3 bedroomed homes rather than renting them to people on the housing list. Green Square is currently proposing to sell off houses in Heddington and I believe Compton Bassett. Surely this shouldn't be allowed. These are affordable rented homes which is what is needed as not everyone can afford to purchase 'affordable homes'. These affordable homes, can you guarantee they will go to people who intend to live in them and not to private landlords for the buy to let market.</p> <p>I really hope you take people's comments and concerns on board, as on previous experience I feel that when the Council makes up their mind to do something it doesn't really matter what the general public think.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The land is also subject to a large amount flooding as is the site of H3.1 to a slightly lesser degree. I feel this needs to be reassessed along with sewerage capacity and the river and water meadows which are currently part of the flood plain. Any new developments will affect these flood plains which are affected several times a year after heavy rain. The site of H3.1 is on a hill and flood water runs down off it onto the site of H.3.3 which floods across the current farm land. The water has nowhere else to go due to the location of the surrounding rivers and their contributories. I do not think that the plan has fully considered this and feel that the new developments would be subject to substantial flooding. I think that the plan could avoid this by finding an alternative location for such developments which is not on a flood plain.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H1.2			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Notwithstanding, and without prejudice to, the above [comment 519 and 520], the draft HSAP is not justified because the allocation of land at Fiddington Hill / Underhill Nursery to accommodate 50 dwellings is not the most appropriate strategy when considered against the reasonable alternative of allocating that site for significantly less dwellings (circa 20) and allocating Land at the Spring for 30 dwellings. Land at Fiddington Hill / Underhill Nursery is an illogical and unsuitable site to accommodate the amount of housing proposed, for the following reasons:</p> <p>The allocation of such a large site (relative to the size of the village) is contrary to the clearly expressed views of the Village. The Village Survey undertaken in the initial stages of preparing the emerging Neighbourhood Plan showed a strong resistance to the allocation of a large site on the grounds of social integration.</p> <p>The Site is relatively remote from the village centre and local services and amenities.</p> <p>It may be that a smaller scheme, restricted to the western corner of the site (the area currently occupied by glasshouses, hardstanding and car parking and an existing house) could be sensitively developed to address the substantial constraints identified above - although that has yet to be proven.</p> <p>Allocate Land at the Spring for “about 30 dwellings” and reduce the allocation of Underhill Nursery to “up to 20 dwellings”.</p>			
<b>Attached files (Please see Objective)</b>		4707551			
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		The omission of Land at The Spring, Market Lavington, raises substantial doubt about the soundness of the HSAP, because of serious deficiencies with the Site Selection Process, the relationship of the Plan with the emerging Neighbourhood Plan and the adequacy of the Plan's housing provision (as it relates to the Devizes Community Area).

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Notwithstanding, and without prejudice to, the above [comment 519 and 520], the draft HSAP is not justified because the allocation of land at Fiddington Hill / Underhill Nursery to accommodate 50 dwellings is not the most appropriate strategy when considered against the reasonable alternative of allocating that site for significantly less dwellings (circa 20) and allocating Land at the Spring for 30 dwellings. Land at Fiddington Hill / Underhill Nursery is an illogical and unsuitable site to accommodate the amount of housing proposed, for the following reasons:</p> <p>The existing access to the site from Fiddington Hill is unsuitable to serve the amount of development proposed. This is a narrow rural lane that extends as a bridle way to provide an important recreational route to the Wessex Ridgeway and the Salisbury Plain SSSI / SPA. Road widening (even if that could be achieved) would result in the loss of a mature hedgerow (likely to be of ecological significance) and generally would have a serious adverse impact on the character and appearance of the area.</p> <p>There is local concern that development of this site would increase traffic congestion in the village centre.</p> <p>It may be that a smaller scheme, restricted to the western corner of the site (the area currently occupied by glasshouses, hardstanding and car parking and an existing house) could be sensitively developed to address the substantial constraints identified above - although that has yet to be proven.</p> <p>Allocate Land at the Spring for “about 30 dwellings” and reduce the allocation of Underhill Nursery to “up to 20 dwellings”.</p>			
<b>Attached files (Please see Objective)</b>		4707551			
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		The omission of Land at The Spring, Market Lavington, raises substantial doubt about the soundness of the HSAP, because of serious deficiencies with the Site Selection Process, the relationship of the Plan with the emerging Neighbourhood Plan and the adequacy of the Plan's housing provision (as it relates to the Devizes Community Area).

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Para 5.128 and Policy H3.1 say that this development would depend on sufficient improvements being made to the transport network serving the development. This assumes that such improvements are possible. It is my opinion, from the position of someone living on Harnham Road, that until Wiltshire Council and the Highways Agency demonstrate that sufficient improvements can be made to make this scale of development viable, it cannot be said to be sound. The A3094 is already at capacity at peak times. Traffic is heavy throughout most weekdays. Adding up to 750 more households, perhaps 1500 additional cars, would provide an impossible burden. This would be exacerbated if a new school is built within this site, partly to absorb children from other parts of Salisbury, so further increasing the traffic load. There is already a major problem at the beginning and end of the school day with parents coming by car to the two Harnham Schools.</p> <p>These transport questions are important for four reasons:</p> <p>a) There is a major danger to health from ambulances being delayed (this being a major route for ambulances between Odstock Hospital and Wilton/South Wilts). EG severe delays have already been caused by the recent works on Harnham Bridge.</p> <p>b) The road is already very dangerous for cyclists. It would be essential for there to be separate provision for cyclists all the way from the roundabout at the end of New Harnham Road to the new development, if there were to be any chance of encouraging people to cycle rather than use their cars for local travel. (I know that there is some provision at each end, but this by itself is quite inadequate).</p> <p>c) However improved cycling provision must not be made at the expense of safety for pedestrians, as the footpaths are heavily used both by parents and children, and others. In fact there was a pedestrian fatality outside our house in Harnham Road just the other day. Given the width of the current road, and the position of the existing housing along Harnham and Netherhampton Roads, it must be for the Council to show how the needs of drivers, cyclists, pedestrians and bus passengers could be met within the existing road structure before development on this scale could be considered sound.</p> <p>d) The economic cost and frustration caused by lengthy delays would be immense;</p> <p>In other words, I believe this plan has got things the wrong way round. 'The robust and comprehensive transport assessment' that is proposed once development proposals are put forward is too late. The Council and the Highways Agency need to undertake such an assessment now, based on existing traffic loads, so as to put in place a more viable long-term transport strategy, before housing allocation sites of this scale are considered. The pressure on Exeter Street going into the city, and on Southampton Road much of the time is already unacceptable.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Bratton 321 Court Orchard/Cassways			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Infrastructure and Transport</p> <p>Buses are busy and infrequent at peak times with the route itself being one that Wiltshire Council themselves have already reduced subsidies for. Although gas and electricity are currently fit for purpose, telephone/broadband services are inadequate as they already are in rural areas. This development will be at the furthest point away from the Bratton telephone exchange and will dramatically affect the capacity/speeds for the surrounding properties. Water pressure is an existing issue for some villagers so any additional dwellings will add to the already overburdened services.</p> <p>With a development of 40 houses being proposed, this does flag a number of issues with the site, highway infrastructure and impact on local residents. Census data for 2011 shows that the average number of cars/vans per household sits at 1.3. This figure would indicate that an additional 52 vehicles would be brought into the village plus any visitors, etc. The road quality of the B3098 is already questionable throughout the village with subsiding edges of the pavement. The proposed turn off into the new development is at a pinch point within the width of the existing carriageway with no site lines towards the village for those wanting to exit the proposed development. Any entrance or exit would not meet the minimum standards for a clear envelope of visibility in accordance with the Highways Agency document TD41/95 based on the design speed of the road. The proposed development would also introduce noise pollution, air pollution and light pollution to the west of the village. Housing needs to be placed in an appropriate location with good transport links and job opportunities. The current draft proposal for Bratton 321 Court Orchard/Cassways largely relies on dwelling residents having access to private vehicles. The area to the south east of Trowbridge along West Ashton Road is currently registered for up to 2,500 dwellings, employment, two local centres, two schools, public open space and associated highway works.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Employment and Amenities</p> <p>There are little employment opportunities within the boundaries of the village as there are few employers outside of small scale agriculture, retail and hospitality businesses. There are few amenities within the village so there would be a necessity to commute daily to and from again adding to the stress on the underlying transport infrastructure.</p> <p>Housing needs to be placed in an appropriate location with good transport links and job opportunities. The current draft proposal for Bratton 321 Court Orchard/Cassways largely relies on dwelling residents having access to private vehicles. Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1 Netherhampton Road Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Please direct this email to the relevant person/s regarding the development plans for hundreds of houses off Netherhampton Road. As a resident of Harnham, I am already highly concerned with the volume of traffic on roads in Harnham. They are frequently at a stand still, regardless to the work being under taken on New Bridge Road and there are limited options to bypass any traffic jams or road closures here or on Netherhampton Road. In addition traffic jams are often seen along Coombe Road. What needs to happen is another bridge over the river needs to be build before any additional housing as the roads in and around Salisbury can not take any additional traffic, they are at bursting point. Has an analysis on the traffic been undertaken?</p> <p>Furthermore, I am not in favour of building on green belt land. I believe there are many unique animals that live in this area. I often see red-legged partridges, Mistle thrush and long-tailed tits on Harnham Hill. Has a report been done on the impact this development will have on the local wildlife?</p> <p>I look forward to hearing from you,</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Why does North Bradley have to take the brunt of the housing need in this area? There is plenty of places around the county that are better suited to housing developments - not to mention the brown sites in Trowbridge itself which would be much better being built on. This proposal means people will lose money on their properties as they will no longer be in a village and be left living on an even busier road than they already do, without any offers of help.

Such a development would provide housing near the city centre (and the Water Meadows), and particularly the station, thus much reducing car use in favour of cycling, walking and bus travel. Why is priority not being given to expediting that plan?

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Paragraph 5.69 says that development will need to enhance the urban edge of town and the character of Southwick Country Park. This will not be achieved by building houses on land which currently provides a habitat for deer to rear their young. The Church Lane site is an ancient water meadow (see national policy paragraphs 129 and 132, English Heritage and the National Monuments Record) and will not be enhanced by covering it in concrete. This plan should acknowledge that building houses on this site will negatively affect the character of Southwick Country Park. The review document "Wiltshire Housing Site Allocations Plan" prepared by Atkins assessed this site as being the most detrimental when compared to other sites.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site 1021 Church Lane		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		There is no mention of this site being located on a floodplain. This area is on clay soil and the water table is close to the surface. The number of houses will be restricted by this problem but it is likely that the access road will have to cut across the land which floods. This will further increase flooding in the Country Park.			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Paragraph 5.68 says that access will be provided by a new junction off the A361. This section of road has had many accidents. The proposed development will increase the number of vehicles on this road and the plan seems to ignore the 2026 Trowbridge Traffic Model (PFA Consulting).

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Thank you for consulting Gloucestershire County Council (GCC) on the above matter. I have the following officer comments to make. I note that the Malmesbury housing allocations at the villages of Oaksey and Crudwell come close to the Gloucestershire border. If development is designed well here with green open space, retention of trees/hedgerows then an adverse significant impact on biodiversity and in particular the Cotswold Water Park and North Meadow &amp; Clattinger SAC is unlikely. I am therefore in agreement with the SA (Biodiversity theme) and the HRA conclusions.</p> <p>If you would like to discuss any of the points raised above please do not hesitate to contact me. Please ignore my earlier response.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Infrastructure in Calne			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Whilst appreciating that most of this is being imposed on you by central government, we feel that builders are being allowed to exploit the situation and suspect you have run out of public money to fight the Appeals. You are looking after a beautiful county. A lot of people come on holiday to Wiltshire, and the beauty of the county must not be destroyed with ill-considered housing - for the sake of it. Your consultation sessions are welcomed but the window was way too tight fort hose at work.</p> <p>1. The current boundaries should remain the same to ensure more housing cannot be exploited through boundary changes.</p> <p>2. We understand that builders must put money to aid the existing local community. (Section 106). This money should be allocated and should factor infrastructure. We know of at least new three housing estates being built of less than 300 houses, which in total will overload current roads. The people making the most profit from the houses should upgrade all the roads in the area.</p> <p>3. Can Wiltshire Council PLEASE remove the traffic lights from the Town Hall in Calne and replace them with a roundabout which was on the original plan. Use Section 106 money from Calne new housing to pay for this. Traffic backs up badly in Calne at rush hour as the traffic lights work against the pelican crossing and the interaction of the A4/A3102. This infrastructure issue will only get worse as new houses are built.</p>

Carry out appropriate holistic planning - see below after question: "Please set out what change(s) you consider necessary to make the draft Wiltshire Housing Site Allocations Plan sound".                  Comments seen as a resident of Quidhampton.                  Flooding                  Runoff will increase in the floodplains and valley catchment between Quidhampton and Netherhampton and Salisbury. These developments would increase flood levels and risks. There are low lying properties in the whole valley down into to Salisbury and up to Quidhampton that could be more significantly at risk given the current flood predictions of the Environment Agency.</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">598</a>	<b>Consultee</b> Mr Neville BURNE  <b>Person ID:</b> 894625	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.37				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Representations were made to Wiltshire Council's 'Spatial Planning' section and the Sherston Parish Council in 2015, pointing out that the boundary on the southern outskirts of Sherston village on the then current proposed Neighbourhood Plan, was drawn tightly along the rear of houses in Grove Road excluding the rear gardens of these properties, which were located some 140 yards to the north of No. 15 Thompsons Hill.</p> <p>It was pointed out that the exclusion of land at the rear of these properties (which could be any property, but with particular reference to Grove Road) was not consistent with the ownership or definition of that property, which should comprise the entire curtilages.</p> <p>Additionally the position of this line tight on the building did not accord with Wiltshire Council's planning requirements which stated that: "where practical the draft settlement boundaries follow clearly defined physical features, such as, walls, fences, hedgerows, roads and water courses in order to define the built area of the settlement".</p> <p>It was also pointed out that the 2015 plan line also excluded residential houses in Tanners Hill, Thompsons Hill, and Hustlers Hill, some 28 residences, most of which are part of the original settlement of Sherston.</p> <p>Part of the representation was heeded and the present proposed plan has been drawn up to include at least some of the properties indicated in para 4, but inexplicably the new boundary has been drawn across the lawn of the garden of 15 Thompsons Hill on a line having no regard to any physical feature or boundary.</p> <p>It is submitted that by drawing this line in the proposed position it is (a) disregarding Wiltshire Council's own guidelines (see para 7.7 of the Draft) quote ".....Therefore, the revised settlement boundary review methodology will make it clear that the settlement boundary will follow but not include clearly defined physical features. ...." (b) disregarding the accepted definition of curtilage i.e. land encompassing a building,, (c) thereby excluding buildings which are listed and forming part of the curtilage.</p> <p>The curtilage of 15 Thompsons Hill includes the whole of the garden as shown on the attached plan by yellow colouring. The property, which includes the garden, is assessed for Council Tax purposes on the purchase price of the whole property included within the curtilage. It is iniquitous that Wiltshire Council arbitrarily and inaccurately redefines the extent of the property to suit its whim.</p> <p>Having regard to para 7.20. of the Draft, a revised and again arbitrary definition, i.e., Conclusion. Quote: ".....Therefore the revised settlement boundary review methodology will include the curtilage of a property that relates more closely to the built environment, e.g. a garden, or has limited capacity to extend the built form of the settlement in terms of scale and location. However, it will exclude the curtilage of a property that relates more closely to the open countryside, e.g. a field or paddock, or has the capacity to substantially extend the built form of the settlement in terms of scale and location".</p> <p>The garden of No.15 is not related to the open countryside, as there are some 9 residential properties extending 200 yards further to the south on the same road, extraordinarily not included in the Neighbourhood area, is not a field or paddock and is set virtually in a gully or valley, and clearly part of the village of Sherston.</p>				

Appendix Q - Schedule of representations

	It is submitted that to accord with the common and legal understanding of 'curtilage' the Neighbourhood boundary line , certainly in so far as No 15 is concerned, should be located around the curtilage of No.15 as shown by a dotted red line on the attached plan.
<b>Attached files (Please see Objective)</b>	4709096
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	I consider that my representation is self-explanatory and straightforward and unnecessary to attend an oral presentation, however, I would be pleased to attend should the Inspector deem it necessary.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Joining North and West Wiltshire HMA results in an inappropriate and extremely large market area with enormous differences. It has created a negative effect due to some areas in the HMA failing to deliver sites which then have repercussions on areas that have more housing forced on them by default through the 5 year land supply requirement. To put Warminster in the same social, economic or environmental category as Malmesbury or Calne is wrong. The result is an ineffective HMA, and site allocation s, since the numbers are constantly challenged in areas whose quotas are met and then exceeded by invocation of the NPPF.</p> <p>There were at one time two separate HMAs – under the former council areas – North and West.</p> <p>This was fair, balanced and equitable.</p> <p>[Officer correction: The form states that this representation relates to Table 1. It is assumed the comment relates to Figure 2.1]</p> <p>Return to separation of North and West Wiltshire Areas</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Unless Wiltshire Council can give justification for continuing the present arrangements, we would put the case to the inspector.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Figure A.6 Proposed amendments to the settlement boundary for Worton			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>With reference to the Proposed amendments to the settlement boundary of our village, as detailed on the Wiltshire website. As a parish council we are concerned by a number of aspects of the proposed changes. Having consulted our county councillor, Richard Gamble, with regard to the proposed changes, we are given to understand that those members of our community whose properties would be affected by the proposed changes have not been or consulted individually and may well be unaware of the implications of how the proposed changes to could affect them. We have attempted to draw the attention of the community to the nature of the proposed changes but are far from satisfied that this has been successful.</p> <p>We also understand that no on-site assessments and judgments have been made. The result is a complex picture which seems both illogical and careless. As a Parish Council, it is a very difficult task to consult /inform on a property by property basis. Indeed we feel that this is not within our remit and could, indeed, give rise to justified complaint if this took place on a piece meal basis.</p> <p>We would respectfully suggest that any changes are deferred until those directly impacted on have been properly informed. As this has not taken place so far, we must take the view that no changes should take place and the status quo be maintained and any proposal should be re-submitted after a more satisfactory attempt has been made to communicate with those most affected.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Worton Parish Council wish to ensure that any changes are deferred until those directly impacted on have been properly informed. We wish to ensure that a more satisfactory attempt has been made to communicate with those most affected.

		James F Prain	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Netherhampton Road, Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Draft Wiltshire Housing Site Allocations Plan References:  <a href="http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap">http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap</a>  Salisbury Transport Strategy for Wiltshire Council by Atkins August 2011  Reference A relates to the proposal to build 640 new homes along south side of Netherhampton Road, Salisbury, and 100 houses on the north side, and seeks comments by 22 September 2017.  I am a resident of Harnham and seek to lodge my objection to this proposal due to the following reasons.</p> <ol style="list-style-type: none"> <li>Current roads at maximum capacity  My house is on the Harnham Road within 100m of the traffic lights with Saxon Road. Traffic backs up my house from the Harnham Gyratory Roundabout (some 750m to the east) every morning from 08:00 -09:15 hours. This causes noise and pollution so that I have to keep all my road facing windows shut.  This traffic situation is compounded when children are delivered and collected from the Harnham Primary School and Harnham Infants Schools at the end of Hollows Close which is opposite my house.  The traffic capacity of the road from the Harnham Road into Salisbury is already at maximum capacity (as reported in Reference B) and this was cited as a reason to reject the recent proposed development of the Britford Meadows (North of Britford Road (East)).  There were plans for a relief road or even a by-pass reflecting the existing traffic congestion in Salisbury. However, these plans were shelved when the 'park-and-ride' sites were set up. These were designed to support shoppers and visitors from outside Salisbury. New houses should therefore be located close to or outside these sites.  There are a number of elderly residents between Hollows Close and the Harnham Gyratory including the Salisbury City Almshouses and Welfare Charity site and the BUPA residential home opposite. This will only increase the likelihood of accident and death. Sadly, there was a death of a pedestrian outside my house on 15 August 2017.  As well as the impact of the traffic of the new residents there will be the added problems caused by the heavy vehicles during the construction period.</li> </ol>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Draft Wiltshire Housing Site Allocations Plan References:  <a href="http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap">http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap</a>  Salisbury Transport Strategy for Wiltshire Council by Atkins August 2011  Reference A relates to the proposal to build 640 new homes along south side of Netherhampton Road, Salisbury, and 100 houses on the north side, and seeks comments by 22 September 2017.  I am a resident of Harnham and seek to lodge my objection to this proposal due to the following reasons.</p> <ol style="list-style-type: none"> <li>Current roads at maximum capacity  My house is on the Harnham Road within 100m of the traffic lights with Saxon Road. Traffic backs up my house from the Harnham Gyratory Roundabout (some 750m to the east) every morning from 08:00 -09:15 hours. This causes noise and pollution so that I have to keep all my road facing windows shut.  This traffic situation is compounded when children are delivered and collected from the Harnham Primary School and Harnham Infants Schools at the end of Hollows Close which is opposite my house.  The traffic capacity of the road from the Harnham Road into Salisbury is already at maximum capacity (as reported in Reference B) and this was cited as a reason to reject the recent proposed development of the Britford Meadows (North of Britford Road (East)).  There were plans for a relief road or even a by-pass reflecting the existing traffic congestion in Salisbury. However, these plans were shelved when the 'park-and-ride' sites were set up. These were designed to support shoppers and visitors from outside Salisbury. New houses should therefore be located close to or outside these sites.  There are a number of elderly residents between Hollows Close and the Harnham Gyratory including the Salisbury City Almshouses and Welfare Charity site and the BUPA residential home opposite. This will only increase the likelihood of accident and death. Sadly, there was a death of a pedestrian outside my house on 15 August 2017.  As well as the impact of the traffic of the new residents there will be the added problems caused by the heavy vehicles during the construction period.</li> </ol>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I have been asked to respond to you with regards to The Spring, Market Lavington (draft planning policy site 3268). I note that the site may be scheduled to be rejected for development on the grounds of an old designation. Following a trench evaluation of the site in 2016 the site was shown to have low archaeological potential. There is no evidence of Medieval fishponds or Post -Medieval meadows. Instead significant evidence of quarry / clay extraction was noted. I have consulted with Rachel Foster, Wiltshire Planning Archaeologist who has confirmed that the designated area is not recognised as having a high archaeological potential and having visited the site during the trench evaluation she was happy that there is no significant archaeology.</p> <p>I have included a link to the report below and a reference to the old designation. In my considered opinion the site does not have a high archaeological potential and I would ask that the old designation be disregarded in view of the new information supplied by the programme of archaeological investigation.</p> <p><a href="https://www.dropbox.com/s/ch2orkfmlht51q/Results%20of%20a%20Programme%20of%20Archaeological%20Investigation%20The%20Spring%20C%20Market%20Lavington.pdf?dl=0">https://www.dropbox.com/s/ch2orkfmlht51q/Results%20of%20a%20Programme%20of%20Archaeological%20Investigation%20The%20Spring%20C%20Market%20Lavington.pdf?dl=0</a></p> <p>I would be grateful if you could amend the recommendation to object to development of this site on the grounds of archaeology. Please let me know if you need any further information at this stage?</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Crudwell				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Wiltshire Housing Site Allocation Plan Crudwell proposals - Ridgeway Farm</p> <p>I am writing to comment on the draft Wiltshire Housing Site Allocation Plan (WHSAP) and specifically in relation to the village of Crudwell where I live. I have lived in the village with my wife for the past six years, and am some 200m from where existing development has started (10 houses) and where a proposed allocation of a further 40 dwellings are planned. I am extremely concerned about the proposed allocation of the additional 40 dwellings for the reasons set out below.</p> <p><b>General policy issues</b></p> <p>The Site Allocation Plan notes that housing will only be allocated by Wiltshire Council where there is a strategic priority to do so. Whilst I fully understand that Wiltshire Council needs to ensure an adequate five-year housing supply across each housing market area, the Site Allocation Plan would result in an over-supply of 4,284 dwellings to 2026 once past completions, deliverable commitments and windfall sites are taken into account. Even if one were to assume (unlikely) that there would be no windfall sites, the over-supply would still be 2, 198. The Site Allocation Plan further results in an over-supply of homes in the Malmesbury Community Area, even without windfalls. It is clear, therefore, that there is no strategic need to identify any new homes in Crudwell.</p> <p><b>Crudwell specific issues</b></p> <p>I acknowledge that Crudwell has been late in producing a Neighbourhood Plan, due in part to a Parish Council which was struggling to attract members and to function adequately. This has now been addressed, and the village has started to work on a Neighbourhood Plan. As part of this we will be undertaking a survey to determine the extent of local need for housing and other land uses. This local need will be considered in the context of other constraints to determine where and how any identified local need can be met.</p> <p>Crudwell is unsuitable for large-scale development for a number of reasons. New homes will require additional space at the CE Primary School. I understand that the Council's Education Department considers that at least one new classroom will be required. The school is on a constrained site and lies in a conservation area, so its ability to expand is not guaranteed. The village has severe flooding problems. A large proportion of the village is at risk of flooding from waterways , surface water, or both. the road capacity is already constrained, with dangerous speeding both along the A429 and Tetbury Lane. The proposed development is in a conservation area and little attention has been paid to the environmental and ecological impacts of this.</p> <p><b>Our house specific issues</b></p> <p>The noise and disturbance from the existing development of 10 new houses is already very intrusive. A large-scale development site lasting several years will be unbearable to live with. Views across open farmland (in a conservation area) will be lost forever. The public right of way leading from the development runs right past our house. There will be increased footfall, noise, loss of privacy, dog-fouling and littering.</p> <p>Overall</p>			

Appendix Q - Schedule of representations

	<p>As there is no strategic need for large-scale development in Crudwell, I consider that it would be more appropriate for the Neighbourhood Plan to determine the level of local housing need, to consider how the existing infrastructure might be expanded to accommodate any needs and to consider the wider issues identified above.</p> <p>Crudwell is not anti-growth . However, I believe that small pockets of individual development, in keeping with the existing infrastructure is far more suitable and sustainable, and would have a far less negative impact on the village. Just because an opportunistic land owner and developer have offered up a single site does not mean that this is the right solution for the needs of Crudwell and the wider Wiltshire housing need.</p> <p>I trust that Wiltshire Council will work constructively and sympathetically with the village of Crudwell to determine the most appropriate solution for all concerned.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Brownfield sites and Windfalls</p> <p>In the HSAP Wiltshire Council appears to ignore the number of homes which can be delivered from brownfield sites, either discounting them as being 'in the Settlement boundary' or including them in the overall North &amp; West HMA Windfall figure.</p> <p>An analysis of the sites which have been removed due to them being located in the Settlement Boundary shows that some 250 homes are identified against such sites in Trowbridge including 55 at the District Council Offices, which was subject of a public consultation by Newland Homes for 80 homes.</p> <p>Other sites are not even identified, even though Wiltshire Council are the owners or have been in discussion with the owners about proposals for residential development. The One Public Estate Bid from Wiltshire Council includes the following:</p> <p>"Work Stream 1: Trowbridge</p> <p>Overview: As a result of the programme of work supported by OPE Round 3, high level master planning and analysis of the site show that the East Wing site of developed in conjunction with the current hospital site has the potential to deliver 300 new homes;"</p> <p>The document identifies "The Outputs by 2020: 300 new homes," and also notes that this site "would act as a catalyst for the transformation other key sites in Trowbridge such as: . . . Bowyers . . ."</p> <p>The masterplan for Innox Mills (Bowyers) indicates that at least 100 new homes are likely to be provided on that site.</p> <p>The National Planning Policy Framework (NPPF) identifies Windfalls as follows: Sites which have not been specifically identified as available in the Local Plan process. They normally comprise previously-developed sites that have unexpectedly become available. It can therefore be concluded that on the basis that the Former District Council Offices has been specifically identified by Wiltshire Council and the East Wing site has been specifically identified by Wiltshire Council and that the Bowyers site has been specifically identified by Wiltshire Council they should all be included in the preferred sites list with minimal risk that they would not be delivered by 2026.</p> <p>Resolution: Trowbridge Town Council supports the inclusion of specifically identified sites, which as such are not defined by the NPPF as Windfalls and are located within the Trowbridge Settlement Boundary: Former District Council Offices, Bradley Road 70 dwellings</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Other Towns and Villages</p> <p>So if Ashton Park is not delivering soon enough why is Trowbridge still bearing the brunt of the additional allocations for the North and West HMA when other towns are finding it much easier to meet their targets? Wiltshire Council has recognised difficulties in meeting the target for Trowbridge for some time.</p> <p>Q - There is a significant shortage of dwellings / capacity in Trowbridge, will the Council look at other areas to help address supply in the local area. For example, is there merit in seeking to identify more land / SHLAA sites in Warminster? In other words, how will you settle the Trowbridge supply problem? Will it result in a further decant of housing numbers to other areas?</p> <p>A - We will test SHLAA capacity at Trowbridge against the overall indicative requirement. This process is ongoing and involving: transport modelling / assessments and other disciplines. We have to test the projected quanta in other areas and see whether there is an opportunity for identifying additional development sites at other settlements in the same HMA. However, the process of flexing supply requirements within HMAs will nonetheless need to examine and assess the individual geography of places as some settlements may (or may not) have opportunity to grow. Warminster has a strategic allocation and planning issues to address - e.g. flood risk. Therefore, as part of the process of testing the ability for Trowbridge to accommodate the uplift in housing numbers, consideration may need to be given to other Market Towns and local Large Villages.</p> <p>It is now clear that evidence clearly indicates that Trowbridge cannot meet the requirement and that towns such as Melksham and Westbury are being denied the opportunity to grow and develop to sustain services.</p> <p>Resolution: That Trowbridge Town Council supports the reallocation by Wiltshire Council of the remaining 475 houses within the North and West HMA from Trowbridge to other towns and villages which have demonstrated an ability to deliver higher than planned completions up to 2017 and can offer sustainable development sites in the plan period</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4 Church Lane H2.6 Southwick Ct			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Contradictions In the Strategy</p> <p>A core strategy or local plan is considered "sound" when it is consistent with national policy. Paragraphs 72, 111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide :</p> <p>The infrastructure required in the area, be drawn up over an appropriate timescale {15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.</p> <p>I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	NOT FAIR OR PROPORTIONATE The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it - destroying it's character The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council's estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary? The Draft Allocation Plan is unsound since, regarding Site H3.1/S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible. The Core Strategy acknowledges that the key employment sites in Salisbury are to the North. We are completely perplexed as to how, in that case, locating up to 740 new houses in a rural village to the south of the city, in locations which are stuck between intractable traffic points and which are subject to all of the above perfectly reasonable grounds for objection, can make any sense at all. We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around "critical mass". A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not "sustain" a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process. Find several different sites, near park & rides, not on a B road, bounded at both ends by flood plain and river.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>CONTRARY TO HOUSING DELIVERY STRATEGY</p> <p>The Housing Delivery Strategy describes the proposed allocations as being "in Salisbury", "Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy."</p> <p>It should also be noted that such "Salisbury Transport Strategy" as exists is not detailed and has never been subject to public consultation or formal adoption.</p> <p>Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end, the bridges over the Avon.</p> <p>We have heard talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague "solutions" should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</p> <p>Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</p> <p>Find several different sites, near park &amp; rides, not on a B road, bounded at both ends by flood plain and river.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the problem is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites.</p> <p>Site S1027 is well known locally for having standing water regularly during the winter.</p> <p>Find several different sites, near park &amp; rides, not on a B road, bounded at both ends by flood plain and river.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Accessibility from sites 3565, 3620 and 1021</p> <p>The A361 is a blackspot for accidents both "in the dip" where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. Also, sites at Church lane, Southwick Court and Old Brickfields are being considered as they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles). No evidence has been provided that this would be the case. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Freme Road at rush hour. The Councils view that they can justify development here as opposed to local villages on the basis that it provides sustainable development is clearly in question. There is neither the infrastructure or setting for development on this side of town.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Westbury Community Area Remainder		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		In accordance with the NFF the plan should "be genuinely plan-led, empowering local people to shape their surroundings,". The site allocated for the Westbury Community Area is allocated to a location to which the Parish Council has on a number of previous occasions stated as unsuitable and representing a substantial intrusion into the rural landscape (primarily from the iconic ridge leading to the White Horse and the main approach to the village). The NFF specifically refers to "recognising the intrinsic character and beauty of the countryside" which the proposed development appears to ignore. Whilst the Atkins assessment does suggest mitigation, this is unlikely to be fully effective even in the summer months and will be ineffective in the winter months.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		We have concerns for wildlife and have seen deer, just recently a stag and two does. Also bats fly around at night and we have heard owls. We keep bees and have an apiary at the bottom of our garden for the bees to fly out over the fields, housing will reduce their forage. There is a large oak tree in the field which looks perfectly healthy and should not be removed. We have concerns over our wellbeing, I suffer from asthma and we moved from a built-up area to Woodmarsh so that we could benefit from a small village community and enjoy the countryside on our doorstep. If we have wanted to be part of a large housing estate we would have moved to one.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Amesbury Topic Paper and associated main document relating to Durrington			Justified Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Market Town versus Large Village The draft plan and Wiltshire Core Strategy list Durrington along with Bulford and Amesbury as a Market Town, based on geographical boundaries and obvious transportation links to Amesbury. It makes little mention of Larkhill, which is part of the Parish (Durrington and Larkhill). Durrington should be seen as the unique large village it is, no more linked to Amesbury than perhaps the smaller villages of Cholderton or Newton Tony. Durrington is currently self-contained and sustainable. The Plan and Wiltshire Core Strategy should therefore reflect Durrington as a Large Village, not the Market Town of Amesbury including Bulford and Durrington. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SUSTAINABILITY</p> <p>Services</p> <p>The Town Council acknowledges that there may be a positive impact on local businesses in the village, this was highlighted in the recent survey it conducted and is recognised in the Plan. It does not however believe it could be any more sustainable than it already is. This is a statement that the Plan often quotes 'making Durrington more sustainable'. With a plethora of facilities; 3 x Mini Supermarkets (including a Post Office), 3 x Schools covering all age groups, along with pre-schools, 6 x Take Aways, Hairdressers and Barbers shops, 2 x Doctors Surgeries, a Chemist, a DIY shop, a Flower shop, a Carpet shop, a Petrol Station, 2 x MOT/Repairs garages, a Swimming Pool, Fitness Centre, Dance Studio and Vets. The only real service missing in the village is a Dentist, but with Dentists in Tidworth and Amesbury at capacity and not taking on new patients either on the NHS or through Private Dental Providers any new residents would have to seek this service outside the immediate area.</p> <p>At present there are two doctors surgeries in the village, one of which will close in early 2019. Its patients will potentially be relocated to new facilities at Larkhill once they are built. We therefore see a reduced capacity within Durrington.</p> <p>There is a known issue with availability of pre-school places, where will the pre-school aged children of the additional service families along with those of the 60 new families go, particularly given insufficient places at Larkhill? Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Employment The Plan makes assumptions that 60 more homes will bring employment to the village to help make Durrington more sustainable. The Town Council does not believe that there is significant employment opportunities within the village, 60 more homes will not bring more employment. It will have the opposite effect and will likely increase the carbon footprint of the village with residents travelling outside of the village for employment, impacting more on the roads. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Infrastructure</p> <p>The Plan allocates two sites for Durrington, both sites will negatively impact on the roads, parking and public safety in the village.</p> <p>The proposed 45 homes off Clover Lane are intended to be linked into the current road structure on Clover Lane through two access roads that were built during the original build phase of the Avon Fields development in 2012. These roads were built to link to an extra 15 homes where planning had been approved but not taken place. Notwithstanding the 15 homes for which planning has been granted, an additional 30 homes are now being planned. This would bring into question the Design and Access Statement of Avon Fields which was for a total of 156 homes and whether the current access roads and road structure within the estate could sustain an additional 30 homes.</p> <p>Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Army Rebasing – Larkhill</p> <p>The Core Strategy and Plan do not fully consider the impact of Army Rebasing in Larkhill on Durrington. Not only are in excess of 440 homes being built at Larkhill for service personnel and their families, but there will also be an increase in approximately 1500 single service personnel arriving in Larkhill. Given the facilities and services that Durrington has, the Town Council believes there will be a significant increase in traffic to and from Durrington. How can Wiltshire Council have thoroughly considered the potential impact of Army Rebasing on Durrington given there is little evidence or mention of it in the Plan? The Town Council believes a common sense approach should be adopted in relation to the development of the sites allocated in the Plan until post Army Rebasing and the full impact on Durrington's infrastructure, self-containment and sustainability can be fully assessed.</p> <p>Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Roads An increase of 60 homes in Durrington plus Army Rebasing at Larkhill will have a detrimental impact on public safety, our roads and parking, which the Town Council believe to be at full capacity. This was the main concern of residents in the survey responses submitted and at the Public Meeting held. There is serious congestion in the village for high percentages of the day when navigating the narrow village streets. It is also potentially dangerous due to the levels of traffic including HGVs, buses, school pick up and drop off locations due to access issues at schools. The Town Council also foresees the impact of Army Rebasing as mentioned above on the village's roads. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Conservation  Durrington is unique in where it sits in Wiltshire and how it shares its tight boundary with Conservation areas, SSSIs, the River Avon and of course Salisbury Plain, there is therefore concern over how these areas will be affected through further development. Durrington is already acknowledged via the Wiltshire Council's Draft Open Spaces 2015-2026 document as being under resourced in recreational and open space. It is therefore important to protect the limited green space and woodland available in the village. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Affordability  The Town Council understands that there is a need for land supply and houses and that some of those houses need to be affordable (rent/purchase). The Wiltshire Housing Needs Survey of 2015 (page 13) states that given the annual median income in Wiltshire (£19,254 in 2013) it would be unlikely that a current Durrington resident wanting to buy or rent a home in Durrington would be able to afford to do so. This potentially means that any new homes built as part of the Plan in Durrington, whilst meeting Wiltshire Council quotas won't necessarily assist in getting those Durrington residents who want to buy or rent in the village a home to live in. This will result in more residents from outside of Durrington moving to live in Durrington, whilst Durrington residents wanting to buy or rent locally may have to move elsewhere to more affordable homes. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Amesbury Topic Paper and associated main document relating to Durrington		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Boundary Settlement Review  The Town Council objects to the expansion of the current settlement boundary to fulfil the Plan, overturning what was considered in the Salisbury District Local Plan a 'safe' plan. The village has positively contributed to conducting infill in line with its Village Design Statement recognised by Wiltshire Council. Over 40 infill developments have taken place in the past 5 years, in addition to the 140 homes built at Avon Fields. With the increase of 440 homes in Larkhill, the Parish will see a 34% increase in homes over an 8-10 year period, potentially making Durrington less sustainable. There is concern that once the settlement boundary is expanded to include new sites for development under the Plan the boundary will potentially be expanded again and again to include other sites outside the current and/or projected boundary post the delivery of the Plan. Please refer to the attached documents [the content is summarised in reps 409, 661, 662, 663, 664, 665, 667, 668, 669, 670 and 672]

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Church of the Good Shepherd, Barford Lane, Downton has been excluded from the revised Settlement boundary (locations L3 and M3 on the Revised Settlement Plan at Figure 70).                  The building and surrounding site is shown as beyond the Settlement Boundary Downton which is designated as a Principle Service Centre. The proposed boundary in this location is inconsistent with other locations on the plan where the Settlement Boundary has been amended to include buildings and sites that are physically related to the settlement.                  The proposed Settlement Boundary in this location is not consistent with the Boundary Review Methodology set out in Part 2 of Topic Paper 1: Settlement Boundary Review Methodology.                  The Settlement Boundary should be amended so that it includes the church and land as identified by red outline on the attached Plan No. 1                  The amendment would be in keeping with other amendments to the Settlement Boundary.                  The amendment would be consistent with the Boundary Review Methodology as detailed in Part 2 of Topic Paper 1: Settlement Boundary Review Methodology.                  The site is integral to the Principle Service Centre and should be included within the Settlement Boundary.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There needs to be a thorough review of the 'actual' housing numbers which are used in this document since as it currently stands the Housing Allocations does not appear to be 'positively prepared' - i.e. not based on objectively assessed development and infrastructure requirements. As a specific example, the Old Manor Hospital (site ref 3/LPA/11 in the Housing Land Supply Statement published in March 2017 indicates that the Old Manor Site has 80 dwellings outstanding at April 2016 and 71 planned to be delivered in 2018/19. However the Old Manor Site has been the subject of successful planning applications in respect of 4 different phases of development, the figure of 71 appears to refer only to the dwellings proposed in the first Phase of development. The total number of dwellings to be delivered over the course of all 4 phases is approximately 200. We need to be assured that the actual housing numbers are based on sound facts, checks and corrections are needed.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		S1027, S1028		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1) Extra traffic:- It is obvious to everyone that Netherhampton Road cannot take the extra traffic generated by the houses once built on sites 1027 and 1028 nor the construction traffic in the building process.. Already, even without this huge development, the road is getting busier and busier. We live on the Netherhampton Road and have noticed the increase in traffic in the 6 years we have lived here. Significant traffic jams already arise because large lorries, tractors/farm vehicles and double-carriage livestock transport use this road as well as domestic traffic and emergency vehicles . Bottlenecks happen already. There is no way of widening the road because of houses from the junction with Upper Street right up to the Harnham Gyratory. The Harnham Gyratory itself can't take any more traffic. This also means that site 3272 at Woodbarrow should not happen either. In emergency situations ambulances very frequently come racing along Netherhampton Road with sirens screaming. It is completely crazy to suggest adding approximately 1000 cars per day to this mix. The roads simply can't take it, and can't be widened. There are immovable pinch-points because of the river systems, for example the newly-repaired New Bridge at Harnham. The traffic getting to Southampton is already dire. The Netherhampton Road, the A3094, is the major route taken by traffic wanting to get to and from Bournemouth or the south to Bath or Bristol. It is not suited to that task already, and cannot possibly accommodate such a huge and sudden increase in volume. The gyratory deals with traffic getting to Bournemouth and Southampton and is already at full capacity. The Southampton Road roundabout by Wiltshire College is a notorious gridlock already. It does not make any sense to propose any more housing developments in Salisbury without a thorough, holistic review of the transport systems.</p> <p>1) Justified/Not justified: We understand that more housing is needed. People need decent places to live, and affordable places to live. We need more socially-affordable housing. However we doubt very much whether developers are the people to deliver this. We also have to live for ever with the consequences of ill-thought-out changes or decisions based on cost-cutting or corporate money-making considerations. These far-reaching decisions must be based upon consideration of what is really needed. I personally believe that the policy of adding house-building to preexisting urbanised areas, especially in a beautiful county such as Wiltshire, needs to be re-examined.</p> <p>2) Effective/Not effective: We believe this is a piecemeal proposal where a holistic planning strategy is needed. No more houses can be built until this is done. There needs to be a thorough review of the transport infrastructure around Salisbury before any more housebuilding can take place. There should also be a better analysis of the flood risks when building new houses on S1027 and S1028.</p> <p>3) Positively prepared/Not positively prepared: We believe there is a real case for creating a new market town for example, on the garden city lines, where the infrastructure would be able to cope because it was planned for; where there would be doctors' surgeries and schools as well as roads and houses, efficient transport links to other centres, rather than overwhelming existing infrastructures that simply cannot cope because they are already overburdened.</p> <p>4) National policy: We have not had time to study the national policy and so cannot comment as to whether this proposal is in line with it. However, river systems and the facts of physical geography have to be taken into account whether or not national policy aligns with it.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		7.6			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Monitoring Framework                  The Wiltshire Monitoring Framework which has been published is inadequate in terms of checking the effectiveness of policies within the WCS. Looking specifically at the Transport policies, the targets and indicators all need to be revisited, but to give a specific example of the current inadequacies:                  Core Policy 63, Transport Strategies, among the important criteria for the Salisbury Transport Strategy is to deliver in terms of the modal shift which is aspired to. Indicators like 'number of cycle schemes' (is this a dropped kerb, a cycle parking stand or 10 km of cycleway?) and 'completed key bus routes upgrades' (more buses? Or a bus stop repaint?) are unclear and do not measure the required goals.                  Wiltshire Monitoring Framework needs updating to make it effective - i.e. it needs to reflect targets which are set in the WCS policies</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>If aspects of the Wiltshire Monitoring Framework are being reviewed these must be considered as an integral part of the development process and it is important that this contains appropriate measures</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I write to object most strongly to the proposed development of 650 houses on Netherhampton Road, Salisbury. I object on the grounds that it is not sound and not effective. I am a regular user of the A3094, firstly to take and fetch children to and from Harnham Schools, and secondly to get myself to work. It is already almost impossible to achieve this in a sensible time because of the sheer volume of traffic using the Harnham Gyratory and the A3094. The proposal to add approximately another 1000 cars on this bottleneck is ineffective. It will not be possible to widen the approach to the Harnham Gyratory without major disruption to local residents and homes. The newly built cycle lane will have to be abandoned.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		While I agree that there is in Trowbridge a desperate need for more housing. It is the affordable and assisted type that are lacking. The Southwick site does not offer very good public transport to the town centre/train station, local shops and doctors surgery are not in comfortable walking distance for most people. This site would offer exclusive housing as its next to the Southwick Country Park, green fields around with distant views of Westbury White Horse and Salisbury Plain. This type of housing would not bring much if any economic wealth to Trowbridge.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		The Southwick site does not offer very good public transport to the town centre/train station, local shops and doctors surgery are not in comfortable walking distance for most people. It is quite likely that the residents living here would not be working or shopping in Trowbridge. It would become a commuter estate for larger towns and cities nearby. This would put extra pressure on the roads, possibly the schools and doctors, but not give much back.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>My one and only concern is that my back garden is NOT considered as undeveloped, unowned, green belt or free for the building on of houses. I have documentation that clearly states that my back plot of land was legally bought in 1969 by a previous owner of No.115 High Street, Littleton Panell.</p> <p>Our Deeds clearly show that when we purchased the property in 1984, the back plot of land was part of it.</p> <p>I am deeply concerned that anyone should think they have the right to put forward plans to build housing of any kind on it, when it clearly belongs to me.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live locally near the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are:</p> <p>Contradictions in the Strategy  A core strategy or local plan is considered "sound" when it is consistent with national policy.  Paragraphs 72,111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide:  The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.  I don't feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for allowing Thames Water Utilities Ltd (Thames Water) to comment on the above. As you will be aware, Thames Water are the statutory sewerage undertaker for the North West part of the Wiltshire authority area and are hence a “specificconsultationbody”in accordance with the Town &amp; Country Planning (Local Planning) Regulations 2012. We have the following comments on the consultation document:</p> <p>Development Sites                  Specific Water Supply and Sewerage/Wastewater Infrastructure Comments:                  We have reviewed the proposed sites and they all appear to be located outside of the Thames Water area. They appear to be located within the Wessex Water area and therefore we have no site specific comments. However, if any new sites are proposed within the Thames Water area we have the following general comments:</p> <p>Development Guidelines - Water Supply and Sewerage Infrastructure                  Thames Water seeks to work closely with the local planning authority to plan for the necessary water supply and wastewater infrastructure to service development in its area in accordance with the National Planning Policy Framework and the National Planning Practice Guidance. A key sustainability objective for the preparation of Local Plans and Neighbourhood Plans should be for new development to be co-ordinated with the infrastructure it demands and to take into account the capacity of existing infrastructure. New development should be co-ordinated with the infrastructure it demands and to take into account the capacity of existing infrastructure. Paragraph 156 of the National Planning Policy Framework (NPPF), March 2012, states: “Local planning authorities should set out strategic policies for the area in the Local Plan. This should include strategic policies to deliver:.....the provision of infrastructure for water supply and wastewater....”                  Paragraph 162 of the NPPF relates to infrastructure and states: “Local planning authorities should work with other authorities to: assess the quality and capacity of infrastructure for water supply and wastewater and its treatment.....take account of the need for strategic infrastructure including nationally significant infrastructure within their areas.”                  The web based National Planning Practice Guidance (NPPG) published in March 2014 includes a section on ‘water supply, wastewater and water quality’ and sets out that Local Plans should be the focus for ensuring that investment plans of water and sewerage/wastewater companies align with development needs. The introduction to this section also sets out that “Adequate water and wastewater infrastructure is needed to support sustainable development” (Paragraph: 001, Reference ID: 34-001-20140306).                  Notwithstanding Core Policy 3 – Infrastructure Requirements of the adopted Core Strategy which support in principle, we consider it is important that the Allocations Plan considers the net increase in water and wastewater demand to serve the development and also any impact that developments may have off site, further down the network.                  Thames Water consider that text along the lines of the following should be added to the AAP to support the general Development Guideline:                  “Water Supply, Wastewater &amp; Sewerage Infrastructure</p>				

Appendix Q - Schedule of representations

	<p>Developers will be required to demonstrate that there is adequate water supply, waste water capacity and surface water drainage both on and off the site to serve the development and that it would not lead to problems for existing or new users. In some circumstances it may be necessary for developers to fund studies to ascertain whether the proposed development will lead to overloading of existing water and/or waste water infrastructure.</p> <p>Drainage on the site must maintain separation of foul and surface flows.</p> <p>Where there is an infrastructure capacity constraint the Council will require the developer to set out what appropriate improvements are required and how they will be delivered.</p> <p>Further information on Developers on water supply and sewerage infrastructure can be found on Thames Water's website at:  <a href="https://developers.thameswater.co.uk/">https://developers.thameswater.co.uk/</a></p>

<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>		<p>Paragraph</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>	<p><b>Do you consider the draft WHSAP is sound?</b></p>	<p>No</p>
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>4.48</p>			<p>Positively prepared</p> <p>Consistent with national policy</p>	
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Core Policy 8 requires approximately 1,605 new homes to be provided in the Calne Community Area, of which about 1,440 homes should be at Calne. This reflects the spatial strategy set out in Core Policy 1 and the role and function of Calne as the only designated Market Town in the Community Area. Growth is to be concentrated at Calne to support a sustainable pattern of development and in recognition of the capacity of the Town to accommodate further strategic development.</p> <p>Table 2.2 of the Calne Community Area Topic Paper indicates that there is no "indicative residual requirement" for either Calne or the Remainder of the area. For Calne the table indicates an over-supply (completions plus commitments) of 328 dwellings. Since then, planning permission has been granted for 165 dwellings at Low Lane, Calne.</p> <p>The draft Neighbourhood Plan makes only one housing allocation (Land north of Low Lane) which is an existing commitment (July 2017). Whilst the Core Strategy disaggregates growth by Community Area, it also makes it clear that the assessment of the adequacy of Housing Land Supply (HLS) should be based on Market Housing Areas (HMA). Core Policy 2 provides that the minimum housing requirement for North and West Wiltshire is 24,740 for the period 2006 to 2026. Objective 2 of the HSAP is to "help demonstrate a rolling five year supply of deliverable land for housing development"</p> <p>The Council's latest Housing Land Supply Statement (Update) published in March 2017 (baseline April 2016) indicates a 5.73 HLS for the North and West Wiltshire HMA against a requirement of 5.25 years (allowing a 5% buffer). In July 2017 whilst allowing an appeal at Boreham Road Warminster, the Secretary of State, indicated that he accepted the Council's updated assessment of HLS. He did however comment that "In line with paragraph 47 of the Framework which requires local authorities to boost significantly the supply of housing, he takes the view that the five year requirement is a minimum and not a cap"</p> <p>In the light of the above, it could be argued that there is no need to allocate further land at Calne at this time. This was the Council's position when the draft HSAP was prepared. The draft Plan confirms at Paragraph 4.48:</p> <p>"Indicative levels of housing for Market Towns are not a ceiling and variations would not seem to present new or significant issues for local infrastructure and environmental capacity. A/locations made in the Plan are made to support the spatial strategy. It is not however practical for the Plan to completely re-dress imbalances in the distribution of development from what the spatial strategy envisaged. A review of the WCS is also the appropriate means to properly consider the performance and longer term prospects of settlements".</p> <p>However, this approach is not acceptable for the following reasons:</p> <p>the "indicative residual requirement" (see table below) of 1,440 dwellings must be regarded as an absolute minimum (as the Plan acknowledges).</p> <p>the adopted Core Strategy's overall requirement of 42,000 dwellings is based on an outdated SHMA. This was recognised by the Core Strategy's Inspector when he concluded "that at this current time the minimum housing figure within the CS should reasonably equate to at least 42 000 homes over the plan period with the flexibility to deliver more"(Paragraph 81 of the Inspector's Report). Whilst the updated SHMA has yet to be published, it is understood to confirm that the latest Objectively Assessed Need is greater than the Core Strategy provides for.</p>				

Appendix Q - Schedule of representations

	<p>the NPPF's objective is to boost significantly the supply of housing (Paragraph 47), as the Boreham Road, Warminster decision reiterates. The HLS position in the HMA is only marginally positive.</p> <p>A review of the Core Strategy is not programmed in the latest LDS (Dec 2016). It is therefore difficult to see how a comprehensive review based on the latest OAN for housing can be put in place before 2020 at the earliest. Given the marginality of the 5 year HLS position, if no further housing allocations are made by the HASP, it is very likely that a HLS shortfall in the HMA will again occur before additional sites can be allocated through the review of the Core Strategy (or otherwise)</p> <p>The Neighbourhood Plan cannot be relied on to deliver the additional housing sites that are needed.</p> <p>Therefore, if the "plan-led" system is to operate within this HMA, the HSAP must provide sufficient flexibility to maintain an adequate supply of housing land pending the review of the Core Strategy. There is no reason why this should not be done. The Core Strategy emphasises that the housing requirements are minimum figures and that the indicative requirement figures for the market Towns are not ceilings. It also confirms that variations would not present new or significant issues for local infrastructure and environmental capacity . Whilst it may be right that it would be impractical to completely re-dress imbalances in the distribution of development - certainly between HMA's, we can see no reason why additional housing should not be provided by the HSAP at a Market Town (such as Calne) to provide flexibility to support the maintenance of an adequate HLS within the HMA.</p> <p>Calne has demonstrated that it can effectively accommodate growth and there is clear potential for further expansion to take place on the Town's eastern flank .</p> <p>The Plan has not therefore been positively prepared.</p> <p>A contingency allocation (reserve site) should be made at Calne to provide the necessary flexibility to assist in maintaining a 5-year HLS in the HMA during the period pending a review of the Core Strategy. Land north of Low Lane, the location and extent of which is shown edged red on the attached plan, would represent a logical and sustainable site which would complete the eastern expansion of the Town. The site should be confirmed as a Contingency Allocation for release should the HLS position in the HMA deteriorate (i.e. fall below 5.73 years).</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Plan is not positively prepared because it does not meet objectively assessed development requirements. WC propose to increase the size of Trowbridge by one quarter during the Plan period (and more after that) which exceeds the requirement for a five year supply. The Town Council have resolved to opposed this development as as being contrary to the WCS aim to maintain open countryside so as to protect the identity and charactor of Hilperton as a separate community.</p> <p>The Plan is not justified because WC have failed to explain how and when the jobs, schools, roads and other services and infrastructure will be provided to support this huge expansion. As with the development of near by Staverton and Paxcroft estates no new jobs or substantial infrastructure improvements have materialised as were promised. All it will bring is added road congestion and further pressure on local services.</p> <p>The Plan is not effective because WC's examination of 'windfall', which is expected to provide 60% of new housing, is grossly inadequate – comprising one page out of 4,500 pages of the Plan documents.</p> <p>The Plan is not consistent with national policy because WC has failed to give proper weight to brown field sites. WC's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes. It may be cheaper and easier to build and destroy green field sites but by doing so Trowbridge town centre is withering away. By repopulating the central Brown field sites you will help rejuvenate the town and save the countryside.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Netherhampton residents oppose the plans for the following reasons</p> <p>NOT FAIR OR PROPORTIONATE • There is no “nimbyism” behind our objection. The constructive manner in which all residents of Netherhampton have engaged in the discussion with the Wilton Estate regarding the planning application for development at Netherhampton Farm demonstrates that there is acceptance of the need for new housing provided that its scale is in keeping with the existing settlement and can be sustained by the local infrastructure. Netherhampton has approximately 60 dwellings and this new development at Netherhampton Farm will increase that number by over 30%. This feels like a fair share of the overall commitment facing South Wilshire and Wiltshire generally. • The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury. • The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary? • The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I cannot believe that it is legally compliant when all the facts are not available. No transport strategy has been proposed. Insufficient information available.</p> <p>There is insufficient information for any decision to be made. The A3094 is merely a link road so will funnel any additional traffic onto either the A36 Wilton Road or the Harnham Gyratory which handles substantial traffic from A36 Southampton Road, A354 and A338. Every Tuesday additional traffic passes along the A3094 to the Livestock Market. On race days, additional traffic passes along A3094 and on occasions is backed up to the junction with the A36 Wilton Road. The proposed development would add approximately 1500 additional vehicles as most households have two vehicles. On most mornings the traffic backed up from the Harnham Gyratory, sometimes as far back as the junction with Norfolk Road. A substantial number of vehicles are HGVs. Increasingly the route from A36 Wilton Road, via A3094 and then Race Plain Road, is used as a short cut to the A338 to avoid the Harnham Gyratory. Any additional development will add to this traffic - are there proposals to upgrade this narrow, minor road? Also the nearest P&amp;R facilities are either Britford (having to negotiate the traffic to the Harnham Gyratory and beyond) or at Wilton. Due to the pinch point in Wilton centre, queues often build at the roundabout - A36 Wilton Road, The Avenue and Minster Street. Further massive development will have a detrimental affect on surrounding villages as drivers seek alternative routes to avoid traffic congestion.</p> <p>It is also suggested that this site becomes an alternative for some of the commercial premises currently on the Churchfields Industrial Estate. This will cause further congestion with additional delivery vehicles as well as staff vehicles. As it is planned to build a substantial number of residential houses on the Churchfields Estate, this surely would ensure the quota for Salisbury would be satisfied. The traffic from the proposed development at Churchfields could be far less as there is good access to the city centre and train station plus the site is within cycle and walking distance. The proposed cycle and walking access from H3.1/S1028 would prove too far for most people as providing satisfactory access to the town centre. Cycling maybe but walking is not really a viable option, especially in poor weather. The current bus service would need to be substantially expanded with further vehicles adding to the congestion. Most people would consider taking their car as the current options are not clear.</p> <p>South Wiltshire is projected to have a surplus of 937 accommodation units so the planned development of Harnham should not be considered and further work should be undertaken to provide residential accommodation with the use of the Churchfields Industrial Estate.</p> <p>Expand the current proposal for Rowbarrow or consider further development at the junction of The Avenue and A360 Devizes Road where some development has already taken place. Houses and businesses would have access to the A303 via A360 or A36 Wilton Road, plus P&amp;R plus bus services. Consider moving industrial and business units from Churchfields Industrial Estate as more of a priority, freeing up suitable land for residential development. This should be at locations accessible for supply/delivery vehicles such as Amesbury or at the junction of The Avenue and A360 giving options for additional traffic.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Trowbridge area with it's inadequate road infrastructure cannot attract and retain employment opportunities, therefore it should not be expected to accommodate the disproportionate number of houses currently proposed by WC. River crossings in the area are both inadequate and subject to annual flooding. Within it's town boundaries there are a considerable number of large brownfield sites eg Bowyer's, former mill sites etc - which, if developed would enhance the ambiance of the County Town and provide residential premises particularly close to the railway station, thereby relieving road usage to and from major centres of employment particularly Bath and Bristol. The plan should be drastically amended to enable building in locations that will allow residents to travel if required, in particular near mainline railways and major roads i.e M4 corridor. The centre of Trowbridge (County Town!) is a disgrace and an eyesore. Re-development of former industrial sites, as carried out in much of the Midlands and the North of the country, should be a priority.

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">714</a></p>	<p><b>Consultee</b> R D Horton</p> <p><b>Person ID:</b> 1125714</p>	<p><b>Agent</b> Mr Nathan McLoughlin Director</p> <p>McLoughlin Planning</p> <p><b>Person ID:</b> 404491</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>					
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Representations on behalf of R D Horton and Son McLoughlin Planning has been instructed on behalf of R D Horton and Son to submit representations on the Draft Housing Site Allocations Plan June 2017, in respect of its land interests in the village of Broad Hinton. This representation is structured as follows: • Representations on the Allocations Plan The proposed housing site <b>REPRESENTATIONS ON THE ALLOCATION PLAN</b> In general, the respondents are concerned that the approach set out in the Plan is unsound in respect of the approach adopted towards new housing allocations. The respondent's position is that the Council's approach to the DPD is unsound. The commentary below sets out the reasons why. The respondents wish to have the opportunity to participate in the Oral Examination. Paragraph 4.3 The paragraph sets out that there is a "priority" for housing land allocation to be located at the higher tier settlements (excluding Large Villages) that meets objective 2 of the plan. The respondent's position is that this is contrary to the general approach set out in the Core Strategy for the following reasons. Core Strategy Core Policy 1 sets out the Settlement Strategy, identifying the various tiers of settlements across the County. Whilst the Policy sets out different requirements for each tier, the Policy does not set out any "priority" for where new development should be focused. This is further evidenced by Paragraph 4.15 of the Core Strategy which sets out that the HSA DPD will review settlement boundaries to allow new housing to come forward. In contrast, paragraph 4.3 of the HSA resembles a quasi-sequential approach to housing site allocations. In addition to the above concern, the blanket exclusion of housing allocation at large villages does not reflect the fact that in the case of some community areas in the East Wiltshire Housing Market Area (EWHMA), there is only one higher tier location. For example, the Marlborough Community Area has Marlborough as a "Market Town", no "Local Service Centres" and then a series of Large Villages. This blanket approach is counter-intuitive to the aims of the Core Strategy Strategic Objective 3, bullet point 4 at the foot of page 29, which seeks, as a key outcome: "The flexible approach will have allowed the council, for example through the preparation of the Site Allocations DPD ... to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach" Paragraph 4.5 The approach of the DPD is effectively set out in paragraph 4.5 This paragraph makes it clear that there are no allocations in the large villages in the EWHMA. This is on the basis that there is: "No strategic priority to do so due to the level of completions and supply committed within the HMA."</p>				

## Appendix Q - Schedule of representations

It is the respondent's position that whilst there is clearly a need for the Council to maintain a 5-year supply of housing land, this should not be confused with the need to meet Core Strategy housing targets by making site allocations as necessary and the reasons behind this are set out below.

CS Core Policy 2 sets out the plan's housing target of "at least" 42,000 new homes and requires the East Wiltshire HMA to provide a minimum of 5940 dwellings. As this figure is set as a minimum, there is some flexibility in the CS to allow an additional amount of new development to come forward in excess of the figures published in the plan.

Whilst the HSA is right in allocating sufficient sites to meet a 5-year housing land supply requirement, this is not the only requirement placed on the DPD. Table 4.9 of the DPD shows that the level of housing supply in the Marlborough Community Area (remainder) is as follows:

Target – 240 dwellings  
Completions – 160  
Commitments – 46  
Shortfall – 36

As a result, the DPD is failing in its duty to meet the requirements of the first bullet point of Framework paragraph 47. The respondents recognise that the allocation of its site at Broad Hinton does not meet the overall outstanding housing requirement for the County, but it is a critical part of the overall approach set out in the Core Strategy, that large villages will deliver development. The allocation of land at Broad Hinton can account for the shortfall in such a way, which is consistent with the approach of the Core Strategy.

**Objective 1: Definition of built-up areas**  
The respondents support the aim of the objective. However, for the reasons set out below, see a need for the boundary of Broad Hinton to be amended to accommodate additional development.

**Objective 2: Housing Land Supply**  
The respondents object to Objective 2 because the approach is inconsistent with the requirements of the Core Strategy. Table 4.7 shows the East Wiltshire HMA as having an oversupply of 862 dwellings. However, this figure is based on surplus being provided in locations outside of the Marlborough Community Area. There is a requirement for the HSA to fulfil the requirements of Table 5.8 of the Core Strategy and provide the requisite level of housing in the Community Area.

**Objective 3: Spatial Strategy**  
The respondent's object to the approach of objective 3 on the basis that the HSA is allowing for flexibility to under-deliver on housing in certain community areas, without any soundly based evidence for doing so. As demonstrated in the Marlborough Community Area, there is an under-supply of 34 dwellings. As the supporting text makes it clear that these are neither minimums or maximums, it necessarily follows that without a sound evidence base to do so, why should the HSA be promoting a lower level of development? Such an approach is contrary to the need in the Framework to "boost" housing land supply and the need for a plan-led system.

**Soundness of the HSADPD**  
Aside from the lack of consistency with the Core Strategy and cited policies; the approach adopted by the HSA is also contrary to national guidance. The starting point for finding a plan sound is paragraph 182 of the Framework, which requires the following:

- Positively prepared – which requires inter alia for a plan to meet objectively assessed needs.
- Justified – most appropriate strategy, based on reasonable alternative.
- Effective
- Consistent with national policy

In terms of whether the Plan is positively prepared, given the shortfall in housing identified above, it is clear, that in the respect of the Marlborough CA remainder, it is not meeting its requirements, there should not be a shortfall, especially as the CS housing target is expressed as a minimum (see above commentary on Core Policy 2). Furthermore, the reliance placed on Neighbourhood Planning as a means of delivering housing creates considerable uncertainty. The Marlborough CA Topic Paper makes it clear that of the two Neighbourhood Plans in the Community Area, neither are anywhere near an advanced stage.

**Effective?**  
For the reasons set out above, as the plan does not ensure the delivery of the housing requirement for the Marlborough CA Remainder over the plan period, it cannot be considered effective.

Appendix Q - Schedule of representations

	<p>Consistent with National Policy?</p> <p>In addition to the concerns expressed above, regarding the general approach to automatically discounting additional allocations in this community area, the lack of a housing allocation is inconsistent with national policy. Both paragraph 55 of the Framework and Paragraph 001 of Rural Housing on the NPPG set out a principle broadly supporting new housing in rural areas. In the NPPG, there is the open recognition that “All settlements can play a role in delivering sustainable development in rural areas”</p> <p>By not making allocations in the community area, the Plan is failing Broad Hinton by not providing additional housing to support this rural community and the on-going vitality/viability of services and facilities in the village.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">715</a>	<b>Consultee</b> R D Horton	<b>Agent</b> Mr Nathan McLoughlin Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1125714	McLoughlin Planning <b>Person ID:</b> 404491	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Justified?</p> <p>It is considered that the Plan is not justified in respect of its approach to the Marlborough Community Area, when based on reasonable alternatives. The NPPG and Section 19 of the 2004 Act requires an LPA to carry out a sustainability appraisal. Guidance provided at paragraph 18 of the NPPG section titled “strategic environmental assessment and sustainability appraisal” sets out a requirement that the SA needs to: “Compare all reasonable alternatives”</p> <p>The emphasis here is the consideration of alternatives. As set out in paragraph 4.5 of the HSAP and the accompanying Topic Paper, it is clear that a decision has been made not to allocate housing sites in the EWHMA. However, this decision and an alternative strategy of making allocations in this area has not been considered by the SA. This is evidenced by the fact that the terms of reference are to discount those locations already discounted by the Council in the relevant Community Area topic paper. The SA does not appraise the validity of the decision of the Topic Paper.</p> <p>As a result, the plan has been prepared without a proper consideration of the alternatives.</p>

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">716</a>	<b>Consultee</b> R D Horton	<b>Agent</b> Mr Nathan McLoughlin Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1125714	McLoughlin Planning <b>Person ID:</b> 404491	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>THE PROPOSED HOUSING SITE</p> <p>In light of the above, there is a need to make an additional allocation in the Plan at Broad Hinton in conformity with the Core Strategy and Marlborough Community Area development policy. This site has previously been the subject of pre-application discussions between McLoughlin Planning and the Council as well as representations on the Informal HSADPD consultation in 2015. Whilst pre-app discussions were on the basis of a 5-year housing land supply, some of the technical considerations are still relevant in 2017 as they were in 2014. To this end, land at Broad Hinton is proposed for such development for a development of circa 40 units. The proposed development has a number of benefits in that:</p> <p>It provides a range of housing (both open market and affordable).</p> <p>Additional development in the village will support village vitality and the existing services and facilities there. In particular, the village school has a declining school roll and needs additional pupils.</p> <p>Development in landscape (AONB) terms is acceptable.</p> <p>The site is not subject to any ecological designations that would preclude its development.</p> <p>A proposed masterplan is attached, based on previous works undertaken by Linden Homes, this shows how the site could be developed for circa 40 dwellings.</p> <p>The respondents are disappointed following these previous efforts that the HSADPD does not allocate the site for some level of housing development, despite clear demonstrable benefits to the local community.</p> <p>In promoting the site for development the respondents have historically undertaken village wide consultation where there has been consistent support for new housing in the village to support existing services and facilities. The last consultation was undertaken in February 2015 and out of 87 responses received 72% were in favour of new housing and only 16% were directly opposed.</p> <p>As a result, the respondents would like to see the site allocated for housing development.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Reading today's Salisbury Journal I am amazed to see plans have been submitted to build 840 homes on land just off the Harnham/Netherhampton Roads between Inexcess and the Cattle Market.</p> <p>Can't think any member of Wiltshire Planning Officer has ever done a survey on the horrendous traffic problems in this location and extra homes would make it ten times worse you would know then extra traffic would cause problems just not suitable or right to build a housing estate that is proposed or any housing estate.</p> <p>Along the Harnham and Netherhampton roads the traffic day and night is continuous which increases on cattle market days everything goes along this route huge transporters, lorries, cars all forms of transport. The new large housing estate would cause even more congestion it's just madness to even think about it above all causing more misery for the people whose homes along the main road and getting across the roads would be so much more difficult than it is already.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Salisbury - Netherhampton Road				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It is rare that I put down in writing my concerns about local or politics in general - not that I do not care but usually I think my thoughts will be dismissed but on this subject I am horrified that the "powers that be" do not have the memories or experience that my husband and I have about this area. We have both lived in the Salisbury area since the early 1960's and remember gentler times but we are forward looking and know more houses mean more cars, more people and more access to the council services. We have transport issues now. How we deal with these issues is essential for the well-being of the residents and the tourists of the area. The A303 past Stonehenge is a joke. We are on the radio every week for all the wrong reasons. A tunnel is not the answer. We need relief roads now before even contemplating more development. There are so many accidents on the roads. Every accident is an upset for a family not just a statistic.</p> <p>When we heard about the amount of houses proposed on Netherhampton road and Rowbarrow we were shocked because of what the plans did not mention and not what it did. This is NOT "not in my backyard" because in principal I am in favour of new housing - we all need to live somewhere but this area of our beautiful city Salisbury needs infrastructure whether that is the dismissed ring road to be on the agenda again (I was in favour of the "red route") or new roads, but we also need schools, doctors, dentists, the lists are endless. We must have a sensible discussion about this area. It floods. It has five rivers. It has a unique country feel which is why it is so loved by those of us who live here.</p> <p>My husband used to go to work at 6.30am and get home at 8.00pm before he retired in April. He was shocked when he saw the amount of traffic all around Salisbury at any time of the day. We only use our car when we have to and are lucky enough to be able to walk to town but there are many people who are not so fortunate - the elderly, the disabled and those who must park in the town because it will be quicker to drive in than to wait for the park and ride bus which has got caught in the traffic. We saw the chaos caused when the lorry wanted to turn around on the Harnham road a few years ago. The whole of Salisbury and the surrounding area ground to a halt for hours and that is not unusual. Please note the disruption being caused by the road works on the Newbridge Road bridge at the moment. I, as a pedestrian have had to change my walk to work! I will not even attempt to shop along the Southampton road on a Friday morning. We got caught there more than once when my elderly parents were alive and when we helped them to stay independent by taking them shopping but we had to go back in to the shop's restaurant with them rather than queue in the grid lock that is Salisbury's Southampton road.</p> <p>Apart from being a resident of this area I am also a doctors receptionist who lives near to the hospital and I hear all the ambulances that cannot get through the traffic now. What will happen if all these houses are built? Lives will be at risk and I am not usually so morbid. I know now the waiting times of the ambulances I am asked to order for our patients.</p> <p>Please get this right with the infrastructure. You have the chance now. Please do not throw your responsibility away. We, and you, have the answer and knowledge. Listen to us. Please.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. The Plan is not positively prepared because it does not meet objectively assessed development requirements. WC propose to increase the size of Trowbridge by one quarter during the Plan period (and more after that) which exceeds the requirement for a five year supply.</p> <p>2. The Plan is not justified because WC have failed to explain how and when the jobs, schools, roads and other services and infrastructure will be provided to support this huge expansion.</p> <p>3. The Plan is not effective because WC's examination of 'windfall', which is expected to provide 60% of new housing, is grossly inadequate – comprising one page out of 4,500 pages of the Plan documents.</p> <p>4. The Plan is not consistent with national policy because WC has failed to give proper weight to brown field sites. WC's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes build on brown land sites.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The worst part for myself and neighbours on my side of the Netherhampton Road is the great increase in the probability of being flooded again. If you build anything else on the flood plain, water dispersment will end up over the existing houses and having to try to get house insurance, even after the Environment Agency's work in the field behind Upper Street, is very difficult. I have been refused on several occasions because of my post code, even though my house narrowly avoided being flooded in 1990. Please rethink the plan – especially the houses to be built on the flat flood plain.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		South Wiltshire Housing Market Area			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The indicative housing requirement for South Wiltshire HMA is identified as 10,420 for the period until 2026. This is a minimum requirement. Proposed allocations require significant works pre-planning with already identified infrastructure improvements needed pre-commencement. Larger scale sites, if found tenable, are expected to contribute to housing delivery only at the latter stages of the plan period. Such a delay to delivery is inflexible and potentially ineffective. Land at Rivermead, Braemore Road, Downton is immediately available. The contribution of 36 dwellings to land supply is both achievable and deliverable within the initial plan period, proposals have been found sustainable. The considerations of transport, education and biodiversity, those identified within this document as needing to be addressed in order for housing development to be accommodated, have been subject to the consideration of the Planning Inspectorate and found sound.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Westbury Community Area Remainder		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Apparently the plan does not seem to agree with the Wiltshire Core Strategy:  It will increase and not decrease the level of out commuting  The proposal does not safeguard the environment  the proposed development is outside the Settlement Boundary which according to 2.8 which is 'is with limited exceptions, not acceptable  The Council's own survey clearly states that there is no economic growth in the village requiring additional housing  The plan is inconsistent with the Council's own assessment of the housing need of Bratton which concludes a requirement for 8 houses and not 40  The Council's own assessment raises the issue of water and foul water being an existing problem in the village without any additional houses.  On a number of previous occasions the Parish Council has stated that the site location is unsuitable for housing development.  A single site development for 40 houses in Bratton is completely unreasonable considering the finite resources available in the village to support a substantial number of additional families, vehicles and social requirements.  The village will not be able to absorb the excessive number of adults and children that a housing development of 40 houses will bring. The B 3098 passing through the central of the village which will be adjacent to the proposed development already carries an increasing number of vehicles between Westbury and Eddington. At peak hour these exceed 400 per hour as recorded by or Speed Watch team. An additional 40 houses with perhaps between two and three cars per family will dramatically increase congestion in the centre of the village.  In a village where amenities such as the shop, doctors surgery, pre-school and primary school are already overburdened, the additional pressures created by the occupants of 40 additional houses would bring major disruption and pressures to the whole community.  The Council should address the sustainability issues raised in the Atkins survey and consider smaller units to be integrated into the existing infrastructure reducing the impact on the village and its community and preserving the beauty of the White Horse ridge.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Apparently the plan does not seem to agree with the Wiltshire Core Strategy:  It will increase and not decrease the level of out commuting  The proposal does not safeguard the environment  the proposed development is outside the Settlement Boundary which according to 2.8 which is 'is with limited exceptions, not acceptable  The Council's own survey clearly states that there is no economic growth in the village requiring additional housing  The plan is inconsistent with the Council's own assessment of the housing need of Bratton which concludes a requirement for 8 houses and not 40  The Council's own assessment raises the issue of water and foul water being an existing problem in the village without any additional houses.  On a number of previous occasions the Parish Council has stated that the site location is unsuitable for housing development.  A single site development for 40 houses in Bratton is completely unreasonable considering the finite resources available in the village to support a substantial number of additional families, vehicles and social requirements.  The village will not be able to absorb the excessive number of adults and children that a housing development of 40 houses will bring. The B 3098 passing through the central of the village which will be adjacent to the proposed development already carries an increasing number of vehicles between Westbury and Eddington. Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Site at J7, K7, J8 and K8 – site on corner of A350 Trowbridge Road and Bitham Park            Suggest inclusion of this site in the settlement boundary            Outline planning permission ref: 14/09262/OUT for the erection of 300 dwellings associated infrastructure, parking landscaping, public open space and a play area was granted at appeal on 05/06/16 with reserved matters approval 17/01643/REM granted on 18/09/17.            We believe that this planning permission either has been implemented or will be very shortly. This would mean that the currently undeveloped site on the corner of the A350 Trowbridge Road and Bitham Park which is known as Gas House Farm would be surrounded on all sides by built development and would therefore relate more closely to the built environment than the open countryside and it's inclusion would not result in the extension of the built form of the settlement of Westbury            We consider that the site covered by planning permission 14/09262/OUT should be included within the settlement boundary and following the inclusion of this, the land to the south and west lying adjacent to the roundabout should also be included.</p>

## Appendix Q - Schedule of representations

Comment ID:	747	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mrs Joanna Throp	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Netherhampton Road, Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Flooding and sewerage management</p> <p>My fathers house backs onto the Salisbury flood defence embankment with water meadows beyond.</p> <p>About 4/5 years ago he was employed by SSE and working on various aspects of the electricity network. At this time there was an increase in prolonged heavy and sustained rainfall for over a month and over the winter as a whole, which resulted the two water meadow fields to the rear of his property being flooded to a height of approximately 6" from the top of the farmers fields barbed wire fence. This flooding encompassed the low- lying land along the Wylve valley and the Avon river valley through Braemore, Fordingbridge, Ringwood and Christchurch. During the early hours of one morning as a result of being recalled to work, my father was checking the various sub-station sites around Salisbury as a result of an Environment Agency Warning that, unless they could control the rising waters downstream near Fordingbridge, Salisbury had less than 8 hours before the whole of city became flooded. Several of our sites were well under water including Wessex Water</p> <p>Sewerage treatment works on Southampton Road with the water only 2" short (to any one who knows about electricity) of the 'Buzz Bars'.</p> <p>During this time my fathers property experienced a foul water blockage. He does posses a set of drain rods but this failed to clear the problem and he resorted to telephoning Wessex Water who duly sent out an operative to attempt to clear the issue. After a period of time he returned and informed me that the issue was not of my making. He said that the whole of Harnham was complete overwhelmed by not only surface water but with foul water also. This he blamed partially on the new homes built on the old Wellworthy site on Netherhampton Road together with an old sewer mains pipe that was not fit to accommodate the increased volume of raw sewage produced.</p> <p>Now we know that winters are getting wetter with prolonged periods of heavy rain. My objection to this site being used is that there is no plan that I am aware of that will accommodate the increase of foul water flow produced by some 1000+ people who are going to live in these properties. This does not take into account the school of over 400 pupils and staff or, workers who work on the proposed industrial site nearby.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">748</a>	<b>Consultee</b> Mrs Joanna Throp  <b>Person ID:</b> 1123135	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Roads infrastructure in and around Salisbury As you may or may not know, Salisbury is the central hub for a number of roads. They include, A30 from Shaftesbury, A36 from Warminster, A360 from Devizes, A345 from Amesbury, A338 from Swindon, A30 from Andover, A36 from Southampton, A338 from Bournemouth and the A354 from Blandford. Travellers have two alternatives in negotiating this central hub, either via Wilton Road from the west and the inner ring road or the A3094 via Park Wall, Netherhampton and Harnham. All traffic whether north/south or east/west has to negotiate New Bridge Road. On normal days when the schools are closed for holidays, Southampton Road regularly stacks up with traffic as far as the commencement of the Alderbury by pass. I have even known it go as far back as the commencement of the by pass some 4/5 miles out from the College roundabout when there has been an incident due to road works, a breakdown or worse. The latter problem also has a knock on and affects all the other roads feeding past the site of the incident. On the other roads into the central hub the A338 south backs up as far as Bodenham, the A30 to St Thomas's Bridge and beyond, the A30 to Wilton at the old whitening works, the A345 to the Old Castle and Devizes Road to Roman Road and beyond. When schools are in session the problems are even worse with the addition of parents driving their children to and from the school. Dealing with the A3094 traffic is usually static/slow moving from Harnham gyratory to Norfolk Road and beyond (depending on the time of day and year with school holidays etc.). With the addition of up to 1100 new properties with each property owning lets say one car, there will be a possible 1000+ extra car journeys a day, for school runs, shopping and work, that has to negotiate Harnham gyratory, and the A3094 through Harnham and Netherhampton to Park Wall traffic lights. This is going to put an unbearable strain on the entire road network through Salisbury. In relation to jobs there is almost full employment in Salisbury, which means that the occupants of any new development will have to travel by car to their work place. It was mentioned at a recent Harnham Association meeting that maybe the inner ring road and Southampton Road could be improved to accommodate more traffic. That only applies to the duel carriageway. What happens where the two ends of the ring roads meet the A36, A338 and the various other intersections along its route? For instant, think about Newbridge Road, which already operates to capacity at most times of the day. Before any more development takes place in or around Salisbury the entire roads network needs to be addressed and for that reason I object to any future development within and around Harnham or Netherhampton unless there can be direct access via a relief road from Salisbury to all the surrounding major roads.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	We believe that these sites [Upper Studley [near Church Lane and The Poplars), Southwick Court, and Elm Grove Farm] must be protected for the sake of retaining shared green space that is of significant benefit to many people and families locally. We take our dogs and children into these fields nearly every weekend, and losing these fields would be heart breaking for us. This green space is also home to many animals, mature trees, and mature hedges - all of which would be lost if developed.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>We believe Wiltshire Council must investigate the redevelopment of existing brownfield sites first - for instance, the Bowyers site. Redevelopment of dangerous, derelict sites should be a priority, as it is beneficial to all residents, with little downside for those living nearby.</p> <p>Conversely, developing on these green spaces comes at a high cost - it will destroy the local villages, steal precious wild green space from all of us, increase traffic and associated dangers, and strain local services.</p> <p>We strongly urge Wiltshire Council to reject housing development on these sites, to consider brownfield development, and to look for towns/villages that have better infrastructure in place to support additional residents.</p>

In</p>				

Appendix Q - Schedule of representations

	<p>addition to this there is no Park &amp; Ride situated on the A3094. One only has to look at the abject failure of our 5 other sites around the city. They are completely underused and most of the time when I see them there are only a handful of passengers on board. We were promised a Salisbury By Pass and work on this was about to commence in 1999 but thanks to the Labour Party and John Prescott who pulled the plug we are now no longer going to get it. On another note I recently saw that Chichester is about to get one, which only has the A27 running nearby. So before we start building these properties or assigning this plot to future building then we need to address the road system in and around Salisbury.</p> <p>It was mentioned at a recent Harnham Association meeting that maybe the inner ring road and Southampton Road could be improved to accommodate more traffic. That only applies to the duel carriageway. What happens where the two ends of the ring roads meet the A36, A338 and the various other intersections along its route? For instant, think about Newbridge Road, which already operates to capacity at most times of the day. A saying 'you cannot get a quart into a pint pot' comes to mind.</p> <p>Before any more development takes place in or around Salisbury the entire roads network needs to be addressed and for that reason I object to any future development within and around Harnham or Netherhampton unless there can be direct access via a relief road from Salisbury to all the surrounding major roads.</p> <p>We do need housing as set out by the government, but they need to be relative to those who need and can afford them. As far as I can see the only people who are going to benefit from this land being designated as development land, are the landowners, who no doubt don't live anywhere near Salisbury or have to use our roads and the developers who will be selling 3/4 and 5 bedroom houses with rabbit hut patches of green lawn which they will call gardens and garage that no one can park their car in because it is to small for offers in excess of £350k +. The people who will suffer will be the residents of Hamham, their children, and their children's, children for years to come on the decisions that are made now.</p> <p>I am prepared to change my views on this and accept housing in the Harnham/Netherhampton area provided that the previous points can be addressed and fully implemented.</p> <p>I look forward to hearing from you in due course and hope that my views on this are taken into consideration.</p>

At this time there was an increase in prolonged heavy and sustained rainfall for over a month and over the winter as a whole, which resulted the two water meadow fields to the rear of my property being flooded to a height of approximately 6" from the top of the farmers fields barbed wire fence. This flooding encompassed the low-lying land along the Wylve valley and the Avon river valley through Braemore, Fordingbridge, Ringwood and Christchurch. You may ask what has this to do with my work, well during the early hours of one morning as a result of being recalled to work, I was checking the various sub-station sites around Salisbury as a result of an Environment Agency Warning that, unless they could control the rising waters downstream near Fordingbridge, Salisbury had less than 8 hours before the whole of city became flooded. Several of our sites were well under water including Wessex Water Sewerage treatment works on Southampton Road with the water only 2" short (to any one who knows about electricity) of the 'Buzz Bars'.</p> <p>During this time my property experienced a foul water blockage. I do possess a set of drain rods but this failed to clear the problem and I resorted to telephoning Wessex Water who duly sent out an operative to attempt to clear the issue. After a period of time he returned and informed me that the issue was not of my making. He said that the whole of Harnham was complete overwhelmed by not only surface water but with foul water also. This he blamed partially on the new homes built on the old Wellworthy site on Netherhampton Road together with an old sewer mains pipe that was not fit to accommodate the increased volume of raw sewage produced.</p> <p>Now we know that winters are getting wetter with prolonged periods of heavy rain. My objection to this site being used is that there is no plan that I am aware of that will accommodate the increase of foul water flow produced by some 1000+ people who are going to live in these properties. This does not take into account the school of over 400 pupils and staff children or, workers who work on the proposed industrial site nearby.</p> <p>The people who will suffer will be the residents of Hamham, their children, and their children's, children for years to come on the decisions that are made now.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am writing in response to the above and ask that my views on this be considered prior to any approval. I am not a NIMBY and do not oppose development provided it is properly thought through and given due consideration. I am well aware that there is a need for housing for people of different needs and if there are insufficient brown field sites then green field sites will have to be used.</p> <p>It is envisaged that some 840 private dwellings, a 420 place infant school are to be built on this site which may be increased to approximately 1100 private dwellings if the proposed industrial site is not taken on board and developed. In that respect I do feel that this site is inappropriate for that amount of properties and I give my reasons for that.</p> <p>I have lived at various properties in Salisbury since 1969 and at my current address for 15 years.</p> <p>My first concern with this site being used for development of private dwellings etc., relate to the extra demand that will be placed on the main sewer system. I say this for the following reason.</p> <p>My house backs onto the Salisbury flood defence embankment with water meadows beyond.</p> <p>About 4/5 years ago I was employed by SSE and working on various aspects of the electricity network. At this time there was an increase in prolonged heavy and sustained rainfall for over a month and over the winter as a whole, which resulted the two water meadow fields to the rear of my property being flooded to a height of approximately 6" from the top of the farmers fields barbed wire fence. This flooding encompassed the low-lying land along the Wylve valley and the Avon river valley through Braemore, Fordingbridge, Ringwood and Christchurch. You may ask what has this to do with my work, well during the early hours of one morning as a result of being recalled to work, I was checking the various sub-station sites around Salisbury as a result of an Environment Agency Warning that, unless they could control the rising waters downstream near Fordingbridge, Salisbury had less than 8 hours before the whole of city became flooded. To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>This is going to put an unbearable strain on the entire road network through Salisbury. In relation to jobs there is almost full employment in Salisbury, which means that the occupants of any new development will have to travel by car to their work place.</p> <p>This will also have health implications to the residents from the increased toxic gasses produced by vehicles as they slowly crawl through the already congested roads putting an additional strain on our already beleaguered NHS. This at a time when the government is trying to reduce the emissions in towns and cities.</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">760</a>	<b>Consultee</b> Mr Drue Steele	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1126008	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.14 Court Orchard/Crossways, Bratton		Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am a local Chartered Architectural Technologist and this Housing Site Allocation Plan is unsound due to the following:</p> <p>The proposed development of new homes to the West of Bratton presents a significant threat to and intrusion into the local rural landscape and will present a totally unnecessary visual eyesore and disrupt local transportation and services.</p> <p>The proposals represent significant over construction and extension beyond the development boundary of Bratton and will result in almost 13% village dwelling growth over the last 15 years when using correct data to assess the current size and density of Bratton. The surcharge in growth to such a small village within a protected greenbelt landscape and conservation area is simply unacceptable.</p> <p>It is unsurprising given the above and given the over burdening strain that any development would force upon the local road networks, local traffic safety, local rural amenity, and local services, that previous applications to the same effect have been rejected not once, but twice, and that the current plan has received the unanimous rebuttal of the Parish Council and those living within and around the village.</p> <p>Given such clear and unarguable reasons against such proposals, no Community Infrastructure Levy (see: bribe) shall justify such a ruinous development.</p> <p>The near by town of Westbury is perfectly suited for new build, high density housing and expansion and provides better local transport to near by places of work; Trowbridge, Bradford and Bath and has the infrastructure and organisational capability to support such new development.</p> <p>For the reasons outlined above, the developments should clearly be denied indefinitely.</p> <p>New build housing should be proposed in and around Westbury, Trowbridge and other towns - not villages. Both of which have the infrastructure and organisational capability to grow and accommodate new dwellings.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		We do need housing as set out by the government, but they need to be relative to those who need and can afford them. As far as I can see the only people who are going to benefit from this land being designated as development land are the landowners, who no doubt don't live anywhere near Salisbury or have to use our roads and the developers who will be selling 3/4 & 5 bedroom houses with rabbit hut patches of green lawn which they will call gardens and garage that no one can park their car in because it is too small for offers in excess of £350k +.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I would like to register my anger, frustration and rejection at Wiltshire Councils planning proposal to develop the green field sites 263 &amp; 297 Hilperton Gap, for housing before prioritising brown field sites first.</p> <p>The ex-Bowyer site next to Trowbridge station must take priority. This site would provide anything up to 200 dwellings. These would most probably be flats &amp; town houses which, given the current high house prices would provide a more affordable home ownership option to young first time buyers.</p> <p>The abandoned / unused site on the corner of Wiltshire Drive &amp; Bradley Road has laid dormant for the past two years or more and should be considered before any green field site. Wiltshire Council - think again! IGNORE developers wishes and put your residents wishes FIRST.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The Hilperton Gap sites 263 & 297 are frequently used by walkers and dog owners. I use this area for regular walking exercise and always meet dog owners doing the same. It's important to keep a recreational area as there are none close by. Developing the Hilperton Gap would further extend the urban sprawl expanding Trowbridges already large housing footprint.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>These comments apply to to the combined effect of policies H3.1, H3.3 and H3.4 which propose a total of 840 homes in Harnham, and which will substantially increase road traffic.</p> <p>These policies are not positively prepared because the infrastructure requirements have not been assessed and the resulting traffic congestion would be inconsistent with achieving sustainable development. The policies will not be effective as they will negatively affect strategic economic and health priorities, and they cannot be justified and shown to be appropriate, without assessing the transport infrastructure requirements.</p> <p>My fundamental point is that roads in the Harnham area are already at or close to full capacity, with lengthy queues forming at peak times. Once a road network reaches full capacity adding further significant demand, or any restrictions will dramatically increase queueing times. For example, breakdowns, accidents or roadworks in the vicinity of the Harnham Gyratory, Newbridge Road, or the College Roundabout, have resulted in massive traffic jams, stretching back along the A36 dual carriageway, on the A338 towards Bodenham, and on the Oddstock Road back to Salisbury District Hospital.</p> <p>Most people in these new developments will need to drive to work through Salisbury or Wilton significantly increasing traffic flows. Harnham is also poorly served with shops, secondary schools, and leisure facilities. This will inevitably generate further traffic.</p> <p>The consequences of significantly increased traffic queues are: damage to the local economy as time is wasted unproductively queueing, missed appointments, increased stress with negative implications for health, and increased pollution for those living near these roads.</p> <p>If the housing site allocation plan is approved without a detailed, costed plan for improving the road network, then we are most unlikely to see major improvements to the road network. This will make Salisbury an increasingly unattractive city in which to live and do business.</p> <p>For 30 years Salisbury has seen increased development but no major improvements to its road infrastructure. This approach of building and ignoring the consequences is not sustainable development.</p> <p>A detailed, fully costed and resourced transport development plan must be developed for Harnham. Policies H3.1, H3.3 and H3.4 should only be approved after this has been done.</p>

Comment ID:	<a href="#">773</a>	<b>Consultee</b> Andrew Fleming Associates Ltd  <b>Person ID:</b> 1124863	<b>Agent</b> mr david stirling Director  Simul Consultants Ltd  <b>Person ID:</b> 549147	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Figure A.6 Proposed amendments to the settlement boundary for Worton			Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Worton is a “large village” as identified in the Wiltshire Core Strategy (WCS); Core Policy CP1 “Settlement Strategy “. The village has a good range of community facilities and local businesses and is assessed in the WCS as suitable for some sustainable growth. However, in the East Wiltshire HMA there has been a blanket exclusion of new site allocations in large villages which is loosely justified because of the strength and supply overall in the HMA. The proposed village settlement boundary has been drawn tightly around the existing built area and provides few opportunities for future development.</p> <p>Almost all infilling has been taken up within the previous decade(s) within Worton and consequently the village has had a low level of housing completions and commitments in recent years and there are now few suitable and available housing sites for sustaining the Village up to 2026. Whilst a Neighbourhood Plan is in preparation it is not sufficiently advanced to have any materiality and in the absence of a submitted draft Neighbourhood Plan, Wiltshire Council are required to ensure that suitable housing sites are available.</p> <p>This blanket approach is counter-intuitive to the aims of the Core Strategy Strategic Objective 3, bullet point 4 which seeks, as a key outcome:“The flexible approach will have allowed the council, for example through the preparation of the Site Allocations DPD ...and to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach”</p> <p>Both paragraph 55 of the Framework and Paragraph 001 or Rural Housing on the NPPG set out a principle broadly supporting new housing in rural areas. In the NPPG, there is the open recognition that “All settlements can play a role in delivering sustainable development in rural areas”</p> <p>There is no evidence that any site survey analysis has been carried out by Wiltshire Council of available development sites in Worton. By not making allocations in the community area, the Plan is failing by not providing additional housing to support this rural community and the on-going vitality/viability of services and facilities in the village.</p> <p>Settlement boundary proposal should be adjusted to include land adjacent to the existing settlement</p> <p>The. Settlement boundary proposal should be adjusted to include land adjacent to the existing settlement boundary to the west to allow some sustainable development within the plan period. To include site in the ownership of Worton and Marston Charities shown in the attached submitted document. This will allow the additional of around 8 houses to meet local housing needs,</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">774</a>	<b>Consultee</b> Ms Margaret Willmot  <b>Person ID:</b> 378123	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph 2.17, Table 2.3 and elsewhere		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Wiltshire Core Strategy (WCS) is "a strategy that is based on an understanding of the Community Areas in Wiltshire" (WCS, heading on p.9) and Community Area Boards "provide opportunities for people to help shape the future of their local area" (WCS, para 1.15). Para 5.112 of the WCS identifies that one of the specific issues which needs to be addressed in relation to Salisbury Community Area is that "the administrative boundaries around the city have led to a large proportion of the development allocations in this Core Strategy being located outside of the boundary of the city. Some are, for example, located on new greenfield sites in the adjoining parishes which are within the Southern Wiltshire and Wilton Community Areas. These allocations are, however, considered to contribute towards the requirement for housing and employment for Salisbury and are included within this Salisbury Area Strategy".</p> <p>There has been no attempt to quantify or address this issue, which calls into question the effectiveness of the Core Strategy allocations and particularly the additional allocations for Salisbury proposed in the draft Housing Site Allocations plan, since these largely fall outside Salisbury Community Area.</p> <p>The Wiltshire Core Strategy does touch on the point that a 'settlement' can potentially extend across more than one community area - in para 5.2 : "... there are places, notably Chippenham, Salisbury and Trowbridge, where the continuous extent of their existing urban areas and/or proposed urban extensions, fall within more than one Community Area. In such circumstances, the Community Area in which the majority of the settlement sits includes the policy relating to that settlement in full."</p> <p>However, the situation around Salisbury is that large parts of the new housing fall outside Salisbury Community Area, and not all this housing is continuous with Salisbury. Longhedge for example has some 673 houses outstanding at April 2016 [source Housing Land Supply Statement Update April 2016], this is in addition to new housing already built at Old Sarum. The settlement boundary around Old Sarum does not touch Salisbury's settlement boundary and is contained within Laverstock &amp; Ford parish and the Southern Community Area. Housing being built at Longhedge does not appear to be within any settlement boundary (see also representation re Appendix A Settlement Boundary).</p> <p>The housing proposed at Netherhampton Road is not in Salisbury parish or Community Area, but in Netherhampton parish and South West Wiltshire Community Area.</p> <p>There are no formal links between the Community Area boards, and many difficulties in organising Neighbourhood Planning across multiple parishes.</p> <p>The draft Wiltshire Housing Site Allocations plan is unsound because it does not give due attention to the cross boundary issues which affect the development of the Settlement of Salisbury. There needs to be effective joint working on cross-boundary strategic priorities (e.g. Transport, Green Infrastructure, other infrastructure needed for development) and Wiltshire Council do not appear to have put in place the structures and mechanisms to facilitate effective cross-boundary working.</p> <p>To highlight the extent of the problem, the indicative housing requirements for the Community Areas of Salisbury and Wilton should not be combined in Table 2.3, and if "Salisbury's" housing is in Southern or South Western Community Areas this needs to be made explicit, as does the mechanism for addressing the problems which this raises.</p>			

Appendix Q - Schedule of representations

	<p>There needs to be an acknowledgement of the actual community areas where it is proposed to site the 'Salisbury' housing allocation, wherever this is mentioned, and there should be an additional section to explain how cross-boundary working to ensure strategic issues which affect the Salisbury Settlement area are to be taken into account.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.3 Netherhampton Road Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		My comments refer only to the proposal on the North side (city side of Netherhampton Road). I consider the allocation of land on the North side unsound on the basis of impact on the Cathedral view. Aesthetics of how any housing development will impact on the land here, with Waddon Farm being a natural boundary. I am concerned about any potential flooding. I am concerned about the increased level of traffic this side of the city. Removal of the land on the North side of this site would go some way to making the allocation plan sound. It is important for so many reasons to protect green spaces such as this, this green space nestles alongside the water meadows, provides a stunning, historical view of the cathedral, for which Salisbury is famous for its cathedral views. This land on the north side should be protected and perhaps nurtured as an environmental asset for the area.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I believe the site is unsound because the site is not big enough to gain the necessary infrastructure needed, for what is basically a new village. Therefore, it should be of a smaller scale, minimising effect on traffic. I believe the northern side should not be developed at all because of its setting with the cathedral, the close proximity to the flood plain and because there needs to be a strategic gap between Harnham and Netherhampton and the logical place for this is to start at Waldrons Farm. There are serious concerns around traffic in Harnham now, and any increase in traffic will only be detrimental to those who live along the roads in Harnham and Netherhaption and Quidhampton. To make this allocation plan sound, I believe the following should be done. No development on the northern side and a much reduced in numbers development along the southern side.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The draft consultation delineates some of the redundant agricultural buildings to the west of the village at Malthouse Farm and excludes them from the latest pre-consultation draft. The Community Topic Paper for Devizes states that the proposed boundary revision is to :          “Amend boundary to remove built employment development at the edge of the large village and to exclude curtilages of properties that more closely relate to the countryside.          There is no evidence that any site survey analysis has been carried out by Wiltshire Council of this site in Rowde. The change to the boundary also appears to be a desk top site analysis and fails to recognise that the farm buildings are both redundant and severed from an agricultural holding and most of the larger steel frames storage barns not viable or suitable for employment purposes or other alternative practical or economic uses. Most of the buildings are in poor condition and require extensive repairs and alterations for business use. Furthermore, the scale of the buildings if used for employment or business purposes would generate considerable traffic generation much greater than generated from residential development and conversion; and will have a substantial and adverse impact on the local highway network.          Adjust the proposed draft boundary to include the redundant farm buildings within the settlement boundary.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The proposed revised settlement boundary for Salisbury seems to include the housing which has been built at Old Sarum. IF this is part of the settlement of Salisbury this conflicts with paragraph 5.2 of the Wiltshire Core Strategy where it is stated that : "Where Principal Settlements and Market Towns are referred to, it should be noted that reference is being made to their continuous urban areas that may be within more than one parish area. Similarly, there are places, notably Chippenham, Salisbury and Trowbridge, where the continuous extent of their existing urban areas and/ or proposed urban extensions, fall within more than one Community Area."</p> <p>This area is clearly not continuous with Salisbury so fails to comply with the above.</p> <p>IF this is part of the 'settlement' of Laverstock and Ford Parish, in the Southern Community Area, it fails to comply with the general rule in the Wiltshire Core strategy that a 'small village' (which is what Laverstock and Ford is defined as) will not have a settlement boundary - see Wiltshire Core Strategy appendix F.</p> <p>There is no explanation given as to why the Longhedge strategic housing allocation which is now being built alongside Old Sarum housing, albeit with no links to it, is not included within a settlement boundary when Old Sarum housing is included.</p> <p>Clarification is needed over whether Old Sarum forms part of the Settlement of Salisbury, and the Core Strategy definition which relates to continuous urban areas will need amendment if it does.</p> <p>Clarification is also required re the position of the development of Longhedge and whether the Settlement Boundary should encompass this development.</p> <p>The difficulties regarding cross boundary issues for a settlement which crosses multiple area boards and parishes are referred to in a separate representation and this matter also needs to be addressed.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Complexities of Salisbury's settlement boundary in relation to issues which cross multiple community areas need to be properly and fully addressed.				

Appendix Q - Schedule of representations

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.66-4.67			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There are policies in place within the NPPF to prioritise the development of brown field sites, paragraph 111 says that “Planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value.”</p> <p>There are also policies to protect the re-development of high quality agricultural land. The SA indicates that part of site S1028 is unclassified but also a mixture of both Grade 3a and Grade 2 Agricultural Land, which are among the classifications defined as ‘best and most versatile’. The NPPF indicates at para 112 that “Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality.”</p> <p>In light of these policies, there needs to be further explanation regarding the delays in bringing forward housing in Central Car Park and at Churchfields, specifically on the Engine Shed site. Both of these are owned by Wiltshire Council and efforts should be made to bring these sites forward in preference to less sustainable greenfield sites on the edge of the City.</p> <p>Time frames for redevelopment of brown field strategic sites are needed, to include detailed explanations of the rationale for any delays in bringing these forward.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Topic Paper 4 Developing Plan Proposals			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Draft Wiltshire Site Allocation Plan makes no provision for Self or Custom Build properties. The Council has a responsibility for keeping a self and custom house building register as set out in Section 1 of the Self-build and Custom Housing Act 2015. The National Policy Planning Guidance (NPPG) states that this should form a key part of a relevant authority's evidence base of demand for this type of housing and further in the NPPF to provide a wide choice of homes its its housing allocations.</p> <p>There is no statement in the proposals which support self build and how this has been allowed for the draft plan nor in the development of the proposals. By implication self build or custom build for a group of dwellings are only likely to be delivered through small sites rather than a large housing site allocation. This will require some space within existing large villages rather than a tightly drawn restrictive boundary and an acknowledgement that they can also be accommodated with small settlements which can accommodate infill (which is accepted can be up to 4 dwellings).</p> <p>Self Build can contribute to the local vitality of the community.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The main reason I consider the plan unsound is due to the additional impact that extra vehicles from a development of this size, particularly that proposed on Netherhampton Road, would have on the existing road infrastructure. They would be forced to travel mainly along the A3094 towards the Harnham gyratory and Newbridge Road to get to other parts of the city or further a field. It only takes a jack-knifed lorry to bring those roads to a complete standstill for several hours, as happened almost two years ago. The economic cost and frustration would be immense. More recently a pedestrian was killed on the Netherhampton Road after being struck by a cattle-truck. Overloading the roads in this area would cause potentially detrimental safety risks for all road users especially at peak time on school runs.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I would like to make an official objection to the inclusion of site 3565 in the Trowbridge Site Allocation plan. I intend to organise my objection into a number of factually based and referenced categories. I shall make reference to documents and illustrations in the course of my objection and quote from them. Full copies and/or supporting material to which I make reference will be included in annotated appendices at the conclusion of this document. This is not meant to be a full and complete documented objection, as a number of my neighbours have raised a rich and varied collection of arguments, but just a statement of the facts that I have been able to gather in support of specific arguments.</p> <p>Premise I intend to prove through evidence-based arguments that the proposal to build on land designated as 3565 is flawed, under-researched and in one specific instance illegal. I intend to divide my argument into the following categories:</p> <ul style="list-style-type: none"> <li>Environmental</li> <li>Historical</li> <li>Access</li> <li>Ecological</li> <li>Unacceptable peril</li> <li>Infrastructure</li> <li>Unwarranted destruction of green space</li> <li>Procedural anomalies</li> <li>Economic hardship</li> </ul> <p>Although evidence for one category will be referenced in another if applicable.</p> <p>Environmental Many strong arguments exist that this site holds an important place in the regional environment. In addition to acting as an area of great natural beauty used by locals with the historical blessing of the landowner it acts as a safety valve for the egress of the Lambrok Stream. In the proposal document there is a recognition that a part of the land acts as a floodplain.</p> <p>The proposal assumes that this can be easily worked around, and that an engineering 'fix' is possible. This may well be the case, however, I intend to present evidence demonstrating beyond doubt that such a 'fix' would not be cost-effective and would wantonly destroy elements of the natural and historical landscape in order to build unsustainable housing on an unsuitable site.</p>			

Appendix Q - Schedule of representations

1. The extent of the floodplain and seasonal flooding is greater than that notified by or to the Environment Agency. The photograph below evidences this assertion :

[refer to photographs within attached representation documents]

In appendix A I attach further photographic evidence of the spread of the floodwater.

The notified height differential between this point and the lowest point on the floodplain is approximately two metres. Given the spread of the flood water beyond the notified level 2 &3 floodplain this is clearly a far greater risk to property and the public than has heretofore been recognised or acknowledged officially.

2. Surface water from The Sandringham Road, Windsor Drive, Holyrood Close, Balmoral Road and Boundary walk area currently drains into the ditch connecting the Lambrok. I have suspicions that some surface water drainage from Silver Street Lane also enters the system at this point.

Currently, during times of extended rainfall, this system backs up and drains in Sandringham Road cease to drain and begin to expel water from the system into roads and gardens. Any additional water entering the system, whether it be from site 3565 or from further upstream will exacerbate this situation. Whilst I am aware that any scheme must take this into consideration, it must be nigh on impossible to guarantee that all additional drainage including runoff from additional impermeable surfaces such as concrete and tarmac is dealt with.

Further complicating this situation is the underlying geology of the area, most notably the solid clay substrate. I understand that current regulations require a minimum of one metre of unsaturated soil for any soak away, and that any additional heavy flow be kept separate from current drainage by means of storage ponds. Whilst such a solution may be possible it underlines the fundamental unsuitability of the site and raises questions about its sustainability in relation to the current built form. Appendix F contains photographs taken on the day in which the drainage pits were dug (18/07/17) and pictures of the same pits two days later (20/07/17). These images clearly show that very little if any soak-away has occurred, fractionally lower water levels could be at least partly due to evaporation given the dates and prevailing weather conditions. They also clearly demonstrate the quantity of clay in the underlying earth.

3. Site 3565 is also home to post-medieval earthworks. I will address their value below, but their nature is pertinent to this discussion. Their function, going back many hundreds of years, was to trap and hold surface water. The fact that these constructs were successful for many years without the addition of any additional material such as stone, brick or concrete attests to the impermeability of the underlying clay. Disturbingly at least one of the soil test pits has been dug into these earthworks, not only causing damage, but creating erroneous data about the nature of the ground. I have reported this (email attached in Appendix B).

4. Even in dry periods there are many areas of the site which are subject to pooling surface water. Notably one situated around the area of the second drainage test ditch to the South of the site (I assume that the function of the ditches must be to assess either BRE 157 or 365) and one in the centre of the lower part of the field. This picture was taken in August of this year:

[refer to photograph within attached representation documents]

5. The National Planning Policy framework clearly states that :

The identification of functional floodplain should take account of local circumstances and not be defined solely on rigid probability parameters. However, land which would naturally flood with an annual probability of 1 in 20 (5%) or greater in any year, or is designed to flood (such as a flood attenuation scheme) in an extreme (0.1% annual probability) flood, should provide a starting point for consideration and discussions to identify the functional floodplain.

Evidence presented here clearly demonstrates the extent of the floodplain and the impact that it has on the existing environment and should be included in the applicants environmental statement or in an amendment made by the Council Planning body (full text included in Appendix H).

## Unacceptable peril

The development of Sandringham Road, Windsor Drive, Holyrood Close and Balmoral Road was built in 1972/3. At the time of its construction national considerations relating to flood plains was limited. As a consequence many of the properties on both Balmoral Road and Sandringham Road are currently adjudged to be at risk of flooding. This flooding is brought about by the abstraction of surface water from the built environment into a stream feeding the Lambrok which, in addition to natural and man-made drainage from fields between Trowbridge and Southwick, brings about regular flooding.

A consequence of this flooding is to be seen on Sandringham Road, where brown water is forced back through the drainage pipes to be expelled in properties and their gardens. This is a situation which happens on a regular basis at the current time. Any disturbance of current drainage patterns cannot but further this flooding. In their letter to planning dated 16th May 2017 hotlink:  
<http://unidoc.wiltshire.gov.uk/UniDoc/Document/File/MTYvMTIyNzkvT1VULDK3OTEzMg==>

Leachfields make a case that all surface water generated by the proposed development off Blind Lane in Southwick will be abstracted before reaching the Lambrok Stream. Unless this is absolutely 100% successful with no drain off into arable land and with sufficient contingency to counteract the loss of drainage into unsaturated land the situation further downstream will be worsened.

Should any other built form be introduced to the current drained environment without the capacity to hold and disperse significantly above 100% of current capacity this situation will also be exacerbated. Drainage plans will allow for surface dispersal but additional runoff is an inevitable consequence of replacing a semi-permeable landscape with one which is impermeable. As stated in the Environmental section of this objection, test pits and professionals alike have attested to the superficial nature of the soil in this area. The underlying clay is impermeable and the smallest percentage of unforeseen water entering the current drainage system will overwhelm a system which regularly fails.

Current guidelines relating to building in flood affected areas require a lifetime certainty that flooding will not occur, this expectation is nominally 100 years:

“Residential development should be considered for a minimum of 100 years, unless there is specific justification for considering a shorter period. For example; the time in which flood risk or coastal change is anticipated to impact on it, where a development is controlled by a time-limited planning condition.

The lifetime of a non-residential development depends on the characteristics of that development. Planners should use their experience within their locality to assess how long they anticipate the development being present for. Developers would be expected to justify why they have adopted a given lifetime for the development, for example, when they are preparing a site-specific flood risk assessment. The impact of climate change needs to be taken into account in a realistic way and developers, the local planning authority and Environment Agency should discuss and agree what allowances are acceptable.”

Paragraph: 026 Reference ID: 7-026-20140306

Revision date: 06 03 2014

Not only is this not possible to apply to potential building on this field due to disturbances upstream but it actively infringes this recognised guidelines for the current built form. Houses built less than fifty years ago are currently at annual risk of flood events. Any development on land upstream will worsen this situation and remove the right to lifetime certainty as set out above.

A report by Sky News ran as follows:

“Councils are no longer forced to take other local authorities' housing allocations if it conflicts with national policy. That would mean less pressure to build on flood plains for planners, who have long been expected to help town halls meet house-building targets. Many hope the new guidelines will also ensure experts' advice plays a greater role in the planning process....Environment Agency figures given to Sky News show that is not

Appendix Q - Schedule of representations

	<p>always the case. In 2012-13, applications for 560 residential properties across England and Wales were approved in areas of flood risk, against the agency's advice. “</p> <p>Summary The land suffers from serious flooding already currently impacting severely on the built form around it. Any further water entering the drainage system will exacerbate this and will break the Environment Agency ‘Lifetime surety’ to be free of flooding for at least 100 years for homes already existing. Photographic evidence (Appendix F) clearly illustrates the quantity of clay underlying the site and the innate inability of the geology to safely remove current surface water without the addition of additional surface run-off. Location in relation to the current built form will create unacceptable peril for existing and incoming residents.</p> <p>ADDENDUM On the 12th of September 2017 I contacted the Environment Agency to thank the planning case officer for 3565 for her assistance in preparing my objection. During the course of our conversation she informed me that a fresh flood map for the site had been prepared in the light of more complete evidence. A significant portion of my initial objection was that the notified floodplain for the area (estimate below) was far less than the actual. I presented the same evidence as documented in my objection. [refer to aerial image in attached representation document] The areas in blue indicate the level two floodplain whilst the areas marked in red are level three. As a consequence of changes in the new flood map the total area of floodplain has increased dramatically and the problematic surface water in the central part of the site has now been recognised. The size and positioning of the new notified area further supports evidence provided in the main body of my submission and specifically relates to: Access to the site – any direct access from the A360 must surely now be impossible due to the size and spread of the level 3 notification. The exacerbation of existing flooding and unacceptable peril – a part of Sandringham Road is now notified as level 2 floodplain and ANY development impacting on that is precluded. Unsuitability of the site – Excess surface water and absence of options for acceptable drainage in the central part of the site should render it unfit for development. Environment Agency current flood map [refer to flood map extract in attached representation document] Additionally this confirms that much of the test work completed by geoconsulting.eng took place either within the margins of the level three floodplain or entirely beyond the affected area of surface water. This would serve to further invalidate the accumulated data that they have collected in submission of any application.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Paragraph 5.3 makes reference to the relevance of Core Policies 52 in the WCS (Green Infrastructure). However this policy is essentially incomplete because it refers in both the supporting text and the policy itself to an important key document, namely the "Wiltshire Green Infrastructure Strategy" which has not yet been produced. A development cannot be deemed to be in compliance with this policy in the absence of such an important underlying strategy. A Green Infrastructure Strategy is needed as a high priority. This needs to build on the useful work which has been undertaken locally in and around Salisbury by the Salisbury Area Greenspace Partnership.

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">786</a></p>	<p><b>Consultee</b> Graham Hill</p> <p><b>Person ID:</b> 1126137</p>	<p><b>Agent</b></p> <p><b>Person ID:</b></p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>		
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>		<p>Site</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>		<p>H2.6 Southwick Court</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>		<p>Historical</p> <p>As mentioned above, site 3565 is home to post-medieval earthworks. These have had only superficial exploration and cataloguing and are therefore covered in section 169 of the National Planning and Policy Framework (full text in appendix G).</p> <p>In an email dated 21/6/17 the County Planning archaeologist confirms that only superficial and preliminary work has taken place on either the known features or in search of any other potential archaeological features. A possible consequence of this further study would be to have a PPG16 order enacted as outlined in the NPPF 2016.</p> <p>These earthworks are materially connected with the Grade II* listed Southwick Court farm and can be argued to be integral to its place in the natural and developed landscape. This additionally impacts on the listing of the property itself and the context in which it sits. In addition to their relevance to the site as included in the proposal their importance is compounded by their relative rarity and by the permanent loss that would result from their destruction.</p> <p>As the County Planning Archaeologist said in an email dated 21st June 2017:</p> <p>“I have previously provided screening opinion advice for this site to the planning team. I highlighted that The Wiltshire and Swindon Historic Environment Record shows that a number of features have been plotted within the proposed development site which relate to a post-medieval water meadow system. Southwick Court Farm lies immediately south of the proposed development site and contains a number of important heritage assets including a medieval moated site with a medieval farmstead of which the farmhouse is a Grade II* Listed Building (national ref. 1194818) dating from 1567 to 1599. I therefore raised the need to have a full assessment of the impacts on the heritage assets in particular on the water meadows and Grade II* Listed Building.</p> <p>Without further assessment I cannot advise on the appropriateness of the development but I would say that putting 180 houses will have an impact on a number of heritage assets.”</p> <p>To the best of my knowledge such an assessment has not yet been carried out and at the time of writing the deadline for submissions to the consultation period expires in three weeks.</p>				

Appendix Q - Schedule of representations

	<p>Summary  Extremely rare post-medieval earthworks will be destroyed (earthworks which have already suffered damage from ill-informed exploratory work).  The field system and managed landscape associated with a grade two listed building will be destroyed.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">787</a>	<b>Consultee</b> Graham Hill  <b>Person ID:</b> 1126137	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Access</p> <p>Access to the site appears to be unclear. The initial Proposal document included, in appendix G, the suggestion that access should be through the current built form. Conversations with the teams both surveying and conducting groundworks on behalf of the potential developer and the omission of that phrase from the documents shown publicly during the exhibition on 26th July 2017 in County Hall would suggest that this element has been dropped. However, should this have been an oversight I would like to present the following evidence:</p> <ol style="list-style-type: none"> <li>To 'break through the current built form' would require building across a 'ransom strip' put in place to prevent such a move when the current housing was built. This would require compulsory purchase from the owner and in the words of Councillor Berry: "There is no compulsion to develop"</li> <li>To access the site from Silver Street Lane would require cutting through the existing hedgerow. The 1997 Hedgerow act make this illegal. The act confers the status of 'important' for a number of criteria See appendix D. This hedgerow meets those criteria in the following ways: It appears on the Ordinance Survey revision map of 1890 (below) as an historic Parish Boundary, and in the Andrews and Dury's map of 1793 (also below; detail only) dividing as it did and still does Trowbridge and Southwick. The original can be found in Wiltshire and Swindon History Centre and is reproduced in Appendix C. [refer to map extracts within attached representation document] It therefore marks a pre-1850 parish or township boundary (criterion a) It incorporates an archaeological feature (post medieval earthworks) as noted in the Proposal and confirmed by the Planning Archaeologist (email in appendix C) (criterion 2/3). The hedgerow is associated with a pre-1600 estate or manor (criterion 4)</li> <li>Any vehicular access via Silver Street Lane would significantly increase traffic around the sensitive area of The Grove School (c.f. Unacceptable Peril).</li> </ol> <p>If, as has been suggested by surveyors and ground workers employed by Barratt Homes, this option no longer features I understand that the alternative solution is to access the site from the A361. According to both the survey team and ground workers (photo in appendix F) this would involve building a road and culvert directly across the notified flood plain which would serve not only the proposed housing, but the satellite educational facility. In objection to this I would like to present the following evidence:</p> <ol style="list-style-type: none"> <li>The size and severity of the existing floodplain has been significantly underestimated as can be seen in this photograph: [refer to photograph within attached representation document]</li> </ol> <p>Further evidence of this is to be found in appendix A.</p>				

Appendix Q - Schedule of representations

	<p>This would render the required size and scale of the road and culvert to be disproportionate. In order to meet planning and environmental requirements relating to lifetime security from flooding this access point would perform to be over engineered to a staggering extent. This further underlines the unsuitability of the site.</p> <p>As seen in the satellite photo below the proposed cut-through and associated grubbing out of the hedgerow would take place as illustrated : [refer to aerial image within attached representation document]</p> <p>Not only does this potential access drive across the floodplain and major waterway (The Lambrok) but through the same Important Hedgerow. As can clearly be seen, not only is the hedgerow one and the same as the previously identified protected and Important hedgerow, it has further protection by its direct association with the Listed building. By extension this association further protects the entire run of hedgerow as laid down in the 1997 Hedgerow Act (see appendix D).</p> <p>In addition to the inelegance of the access, the following direction is included in Guidance for developing on notified flood plains: Wherever possible, safe access routes should be provided that are located above design flood levels and avoiding flow paths. Where this is not possible, limited depths of flooding may be acceptable, provided that the proposed access is designed with appropriate signage etc to make it safe. The acceptable flood depth for safe access will vary depending on flood velocities and the risk of debris within the flood water. Even low levels of flooding can pose a risk to people in situ (because of, for example, the presence of unseen hazards and contaminants in floodwater, or the risk that people remaining may require medical attention).</p> <p>Paragraph: 039 Reference ID: 7-039-20140306 Revision date: 06 03 2014</p> <p>Access to the site is therefore limited to either locating a suitable existing break in the hedgerow further to the South, possibly mirroring the trackway leading to Southwick Court or cutting through private property belonging to Bramble Farm. These restrictions further illustrate the unsuitability of the site for development.</p> <p>Summary Access to the potential site cannot be through the Important and protected hedgerow. Access can only be from the A361 directly past the grade two star listed building.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4710670 / 4710667 / 4710669 / 4710671 / 4710673 / 4710666 / 4710672 / 4710668 / 4710674</p>

Comment ID:	788	<b>Consultee</b> Graham Hill  <b>Person ID:</b> 1126137	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Ecological                      Site 3565 currently acts as a habitat for a number of species which are notified. They include confirmed populations of Bechsteins bat, water voles and Red Kites. Furthermore the associated ecosystem serves to support and maintain those species. The removal of any significant component of this integrated ecosystem would inevitably lead to the unsustainability of many others.                      In addition, the existence of this 'green corridor' acts as a vital element of the connectivity of the surrounding countryside. Regular sightings are made of animal species using this throughway from foxes to Red Deer. Taken into account with the habitats of the more endangered species such as the bats this natural corridor both supports and sustains many species in both a local and transitional context.                      In the Natural England reply to the initial planning enquiry by Wiltshire Council it is stated that:                      "Natural England does not hold information on the location of significant populations of protected species, so is unable to advise whether this proposal is likely to affect such populations to an extent sufficient to require an EIA. It remains the case, however, that the developer must provide information supporting this application sufficient for your authority to assess whether protected species are likely to be affected and, if they are, whether sufficient mitigation, avoidance or compensation measures be put into place."                      Any information provided by the developer is not yet in the public domain, however, I believe that information provided in this letter and those of many other individuals should be included in the process of commissioning an EIA.</p> <p>Contains certain categories of species of bird, animals or plants listed in the Wildlife and Countryside Act or Joint Nature Conservation Committee (JNCC) publications.                      Runs alongside a bridleway, footpath, road used as a public path, or a byway open to all traffic and includes at least 4 woody species, on average, in a 30m length and has at least 2 of the associated features listed at (i) or (v) below. The associated features are:                      A bank or wall supporting the hedgerow.                      Less than 10% gaps.                      On average, at least one tree per 50m.                      At least 3 species from a list of 57 woodland plants.                      A ditch.                      A number of connections with other hedgerows, ponds or woodland.                      A parallel hedge within 15m.                      The act states that the hedgerow cannot be removed and can only be temporarily broken through if the work is for defence of the realm or for public safety reasons and only if there is no other access. If a breakthrough has to occur it must be no wider than 20 metres and replaced as soon as the work is complete.                      Furthermore it is clearly stated that:</p>				

Appendix Q - Schedule of representations

	<p>“The presumption is in favour of protecting and retaining important hedgerows” (The hedgerow regulations 1997 1.7)                  The explanation of the document can be found in its entirety in appendix D.</p> <p>Summary                  Bird and animal species will be denied an ecological niche which has been in existence for a documented 100+ years.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4710670 / 4710667 / 4710669 / 4710671 / 4710673 / 4710666 / 4710672 / 4710668 / 4710674</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Any development on site 3565 will bring families with children. As developed in detail in the sections relating to environment, access and infrastructure, schooling is an issue which will require significant forward planning. Currently Southwick School and North Bradley School are full. Leachfields in their letter regarding the development of land off Blind Lane in Southwick (as above) recognise this tacitly by their offer to give money to Walwayne Court School. I am certain that to make this offer they have completed all of their due diligence on the availability of school places in the area and that the only available option is to work with a school four miles away (creating a round trip total of sixteen miles by car for every family).</p> <p>The only other option for schooling will be The Grove School. This school currently has some spaces, but would necessitate either a significant car journey, or a walk on existing footpaths. The area around the school has significant parking restrictions which are being toughened. Already parents line Silver Street Lane and Balmoral Road with their vehicles as evidenced below: [refer to photograph within attached representation document]</p> <p>And this situation will be exacerbated when the restrictions change. A major road safety issue is building without the influx of a greater number of children and vehicles either passing through Silver Street Lane or ‘ferrying’ students to and fro.</p> <p>Building on site 3565 will create traffic, parking and most importantly child safety issues. In terms of the criteria of sustainability this is surely a significant negative which must be considered.</p> <p><b>Infrastructure</b></p> <p>The topic of infrastructure is a challenge for all involved. During the Cabinet meeting of 20/6/17 the question was specifically raised and the answer was simple, if developers are asked to commit to infrastructure development before the building of houses they will not build the houses. Whilst this appears to contradict the publicly stated policy that building should not be developer-led, crucially the outcome is inevitably poorer service for all. Without going into great detail on a case-by-case basis, the example of the Health Centre on Paxcroft Mead is exemplary. Developers had permission to build granted on the premise that a Health Centre be provided, this then became a supermarket and local health resources were stretched that little bit further. With the stipulation that Local Government cannot control Health Services many infrastructure elements render this site less than optimal.</p> <p>As mentioned in unacceptable peril, a significant infrastructure requirement is education. Trowbridge is currently running with a slight surplus of primary school places and less so with secondary. After a career in education I understand the management of school funding. Schools will not receive funding for pupils until they walk through the door. Local Authorities are reticent about building more schools or extensions thereto due to the inexorable rise of Academies and the prospect that the significant financial commitment involved in building a new school is at risk of being taken out of public ownership.</p> <p>I understand from the surveyors from Waddington Homes who have already been at work on the proposed site that their outline plan involves the building of a satellite school, to be managed by The Grove School on the adjacent field. This presupposes both vehicular access and significant service access to the proposed site and the funding of the build and on costs of staff and resources. This is notoriously uneconomic as a process</p>				

Appendix Q - Schedule of representations

	<p>and the likelihood here is that such an enterprise is more readily managed by The Mead cluster who can bring economies of scale to the process. The drawback here being that The Mead cluster is not under LA control and any public investment would be irrevocably lost in double-quick time.</p> <p>Accessible education for anyone living on the proposed development would therefore be a major issue.</p> <p>Access to transport links is another feature which renders this site unsuitable for development. According to sustainability criteria an optimal walking distance of 1.0 kilometres to the nearest railway station is to be desired. This site is significantly beyond that distance and will as a consequence add to traffic congestion both inside the town and on its main transport arteries, not to mention the additional demands on parking near the station.</p> <p>Summary Public services and access to significant public transport hubs are out of specified range of this development. Traffic and education will be specifically impacted.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4710670 / 4710667 / 4710669 / 4710671 / 4710673 / 4710666 / 4710672 / 4710668 / 4710674</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Unwarranted destruction of green space Despite the proposal splitting site 3260 from site 3565 to create two entities of 17.6 hectares and just over 4 hectares the total developed land within the proposal is significantly above the 20 hectares stipulation for certain requirements in planning law. I have had assurances that the Governmental and NGO's will be viewing the sites in the proposal as a single entity. With restrictions imposed upon the proposed site(s) in terms referenced in Environment, Historical and Ecology sections. The site will be a mish-mash of access, building and ancillary systems. In terms of the loss of a single, continuous buffer at the junction of village and town the loss is catastrophic. A significant piece of land with social, historical and economic value is potentially being carved up. Summary Public access to land which has been used as a public resource with the support of the landowner and on which residents have had their ashes scattered for a minimum of 40 years will be removed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Procedural anomalies</p> <p>As documented in appendix B I have sent a number of emails requesting information and confirmation of contacts. Many of these mails have been a significant length of time in the system before any response. Some have been left unanswered and some have not addressed the questions raised. In recognition of this, which I presume to be a mixture of time and work pressure during a time of significant annual leave, I wrote to Councillor Sturgis and requested an extension of time to gather information and fact from Council sources. I have re-sent this request and am still to receive a reply (mails attached in appendix B). Sadly I feel that I have no alternative but to air this one-way conversation publicly and raise the following procedural queries:</p> <p>If, as committed during the Cabinet meeting of 20/6/17 by Baroness Scott, Council resources are to be committed to independently verify data presented by developers what is this and when is it to be gathered? Surely in order to fully consider all information in a proposal such as this the information must be gathered in advance of any decision? At the time of writing, the consultation process is more than half way complete and, to the best of my knowledge not a single Council officer has visited the site, let alone performed any physical works.</p> <p>In a series of emails (Appendix B) I have proved that geoconsulting.eng, acting as agents for potential developers, and themselves based in Devon have placed soil sample trenches on top of historical earthworks. I have submitted to planning a series of OS coordinates and altitude readings for all of the test pits. With the underlying geology comprising thick clay, the placing of these sampling trenches on top of man-made features will inevitably create erroneous data, Drainage rules clearly state that any soak-away must be into a minimum of one metre of unsaturated soil. To take these samples from what is effectively piled-up topsoil, which would itself be levelled for any development, is meaningless. I have attempted to have this recognised with little success. I have attached approximations of the wells, drainage pits and soil sample pits along with indicative public footpaths and byways in Appendix E along with the closest OS coordinates and altitudes along with dated photographs of the drainage progress in these pits.</p> <p>Given the commitment made publicly in the Cabinet meeting of 20/6/17 that the process would be transparent and not developer-led not a single Council groundwork has been attempted. In contrast sub-contractors for Barratt Homes (geoconsulting.eng and Waddington Homes) have made at least five in-depth works on site 3565 and adjacent fields (see photos in appendix F). Whilst the landowner has the perfect right to commission any fieldworks that she wishes any uncontested data could only be developer-led and totally reliant on a developer vested interest. If this process is not to be developer-led it would be reassuring for this data to be ruled inadmissible in anything relating to decision-making in this process.</p> <p>In their letter to Wiltshire Council in January 2017 in response to an enquiry Natural England concluded that this site is marginal. This response was, in part, informed by a lack of information provided to them. They have been interested to learn of the nature of the Important hedgerow, the extent and rarity of the post-medieval earthworks and the far greater extent of the notified floodplain. Is there no requirement for Council officers to pass on this information rather than leaving this to members of the public?</p>				

Appendix Q - Schedule of representations

	<p>Procedural anomalies relating to the process itself are rife. The indications being that this parcel of land has been added in a rushed manner to the Proposal without due diligence on its suitability having been performed. Furthermore all attempts to activate the commitments made by Councillors by County Officers have been met with negativity and inaction.</p> <p>There is no active support for this site from either, Local Council, Environment Agency, Natural England, Historic England or the County Planning Archaeologist despite such active support being voiced for other sites within the Proposal. In fact in a response from Natural England the case officer said :</p> <p>“I have briefly looked at the conclusions/recommendations in the Trowbridge Community Area Topic Paper and have noted that Site 3565 (Land east of the A361 at Southwick Court), is considered to be a less sustainable options for development, and that five moderate adverse effects have been identified in relation to this site.”</p> <p>As NPPF demands:          “If a planning application fails to score positively against the aims and objectives of the Local Plan Sustainability Appraisal or Local Plan policies..... planning permission should be refused.”</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4710670 / 4710667 / 4710669 / 4710671 / 4710673 / 4710666 / 4710672 / 4710668 / 4710674</p>

Comment ID:	<a href="#">793</a>	<b>Consultee</b> Graham Hill  <b>Person ID:</b> 1126137	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In relation to the standpoint of the Council being adamant that any building work relating to housing not be developer-led is there any justification for advertisements such as this:</p> <p>“Land Requirements                      Top of Form                      Ashford Homes are currently developing.                      If you have land in either a greenfield or brownfield location, with or without planning permission, which you are thinking of selling, please do not hesitate to contact us.                      Our Management team will be pleased to offer advice on any planning related and technical matters.”</p> <p>This would appear to indicate that much activity cannot be anything but developer-led. In the Officer’s report relating to the development of the nearby solar farm (15/04570/FUL) the final paragraph reads:                      “A question was asked by a member of the public as to why the applicant put a notice in the paper advising landowners to come forward and not the public which is a procedural matter for submitting applications.”</p> <p>This remains a question hanging in the air some two years later.                      National Planning Policy Framework provides the following instructions:</p> <p>155. Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <ul style="list-style-type: none"> <li>· Infrastructure</li> </ul> <p>162. Local planning authorities should work with other authorities and providers to:                      assess the quality and capacity of infrastructure for transport, water supply, wastewater and its treatment, energy (including heat), telecommunications, utilities, waste, health, social care, education, flood risk and coastal change management, and its ability to meet forecast demands                      take account of the need for strategic infrastructure including nationally significant infrastructure within their area</p> <p>166. Local Plans may require a variety of other environmental assessments, including under the Habitats Regulations where there is a likely significant effect on a European wildlife site (which may not necessarily be within the same local authority area), Strategic Flood Risk Assessment and assessments of the physical constraints on land use<sup>4</sup>. Wherever possible, assessments should share the same evidence base and be conducted over similar timescales, but local authorities should take care to ensure that the purposes and statutory requirements of different assessment processes are respected.</p> <ul style="list-style-type: none"> <li>· Historic Environment</li> </ul>				

Appendix Q - Schedule of representations

	<p>169. Local planning authorities should have up-to-date evidence about the historic environment in their area and use it to assess the significance of heritage assets and the contribution they make to their environment. They should also use it to predict the likelihood that currently unidentified heritage assets, particularly sites of historic and archaeological interest, will be discovered in the future. Local planning authorities should either maintain or have access to a historic environment record.</p> <p>170. Where appropriate, landscape character assessments should also be prepared, integrated with assessment of historic landscape character, and for areas where there are major expansion options assessments of landscape sensitivity.</p> <p>A functional floodplain is a very important planning tool in making space for flood waters when flooding occurs. Generally, development should be directed away from these areas using the Environment Agency's catchment flood management plans, shoreline management plans and local flood risk management strategies produced by lead local flood authorities.</p> <p>The area identified as functional floodplain should take into account the effects of defences and other flood risk management infrastructure. Areas which would naturally flood, but which are prevented from doing so by existing defences and infrastructure or solid buildings, will not normally be identified as functional floodplain. If an area is intended to flood, eg an upstream flood storage area designed to protect communities further downstream, then this should be safeguarded from development and identified as functional floodplain, even though it might not flood very often.</p> <p>Paragraph: 015 Reference ID: 7-015-20140306</p> <p>Highlighted references serve to further prove that the site nominated as 3565 is unsuitable for development of any nature. A complete set of requirements relevant to this objection can be found in Appendix G.</p> <p>Poorly informed exploratory work will inevitably lead to erroneous data in support of the application.</p> <p>Bottom of Form</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Economic Hardship</p> <p>I am very clear that the devaluation of property is not an issue which the Council can concern itself about. However, Mr Marshall, the tenant farmer based at Bramble farm, has made no secret of the fact that the loss of this field designated 3565 would put him out of business. The field is used for the grazing of his cattle for a part of the year and is harvested for hay during the summer months. Without this hay his business would not be viable.</p> <p>Whilst this may appear to be acceptable collateral damage as a price for the housing it must be taken into the wider context of the proposal. The proposal suggests that all other fields between Southwick and Trowbridge be retained as a 'green buffer'. There is no mention of the ongoing costs of the County Council funding the upkeep of this buffer by which I can only draw the conclusion that they expect the current regime to continue. However, no farming means no maintenance of the land without a significant open-ended financial commitment from the Council.</p> <p>The loss of this managed landscape in its entirety does mitigate against the sustainability of any development on this site.</p> <p>Summary Short and medium term economic impacts will render the entire managed field system derelict.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.128		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I would take issue with the statement that “The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS” for the following reasons:</p> <p>a) The ‘Salisbury Transport Strategy’ has never been completed, some points regarding the deficiencies in the consultation process, completion and adoption process are covered in an email which I sent to Cllr John Thomson, then WC Cabinet member for Highways in January 2014 (see attached). There has been no response to this email.</p> <p>b) There can be limited credibility in respect of ‘Salisbury Transport Strategy Summary’ [STSS] dated Nov 2012. Measures proposed have never been the subject of a consultation (see (a) above), there is no indication of what exactly this summarises, and there is no author or authorisation given.</p> <p>c) There are a number of instances where the STSS is at variance with what has actually happened, for example:</p> <ul style="list-style-type: none"> <li>- The STSS (para 1.3) indicates there will be 1300 new homes at Churchfields and Central Car Park. The June 2017 Pre-submission Draft Wiltshire Housing Sites Allocation Plan indicates (para 4.66) that much less housing than this will be delivered on these sites before 2026.</li> <li>- The STSS (Figure 1.1) stated there would be 450 dwellings at Longhedge, but this has now been increased to 673 (Option A, planning application 13/00673/OUT)</li> </ul> <p>d) STSS makes the statement (para 5.3) that “Implementing the transport strategy could ensure that 45% of these new trips to the city centre are made by sustainable modes in 2026. If the Salisbury Transport Strategy was not adopted (the business as usual approach), the forecasts show that only 20% would be by sustainable modes.” However there would appear to have been no monitoring of the STSS or the percentage of new trips to the city centre being made by sustainable modes. It is relevant in this context to note the following:</p> <ul style="list-style-type: none"> <li>- When the Planning Inspector reported on the Wiltshire Core Strategy (WCS) he placed particular emphasis on monitoring criteria, which it was noted have been removed from the WCS and placed in the Monitoring Framework. (see Inspector’s report on the WCS, 1.12.2014, para 421). The Monitoring Framework does not incorporate targets relevant to the goals of the STSS (see separate representation re paragraph 7.6)</li> <li>- Annual Monitoring Reports have not been published other than in respect of Housing Land Supply (see separate representation re paragraph 7.7).</li> </ul> <p>Considerable work will be necessary using current traffic data and reworking the traffic models in the light of current and proposed developments in order to produce a current and complete Salisbury Transport Strategy. There also needs to be a review, and widespread understanding, of the radical nature of the transport interventions which may be needed to enable Salisbury to cope with increased development. A Salisbury Transport Strategy is a key underlying document which is fundamental to delivering sustainable development (as is a Green Infrastructure Strategy) and these are urgently needed to underpin and inform any development proposals</p>

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

It is to be hoped that there will be progress towards a Salisbury Transport Strategy prior to the public examination of this Housing Allocations document. However past experience has shown that transport issues may be inadequately addressed and I feel discussion of these matters at the oral examination is therefore necessary.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">797</a>	<b>Consultee</b> Ms Helen Down	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Person ID: 1126119		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Figure 5.19 H3.1 South of Netherhampton Road, Salisbury, Figure 5.21 H3.3 North of Netherhampton Road, Salisbury, and Figure 5.22 H3.4 Land at Rowbarrow, Salisbury		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The principle reason I consider the draft plan unsound is because of the additional traffic that a development of this size would have on the existing road infrastructure, particularly that on Netherhampton Road. Most of the traffic would be forced towards the Harnham gyratory and Newbridge Road to get around the city and beyond.</p> <p>It only takes a jack knifed lorry to bring the existing road network to a complete standstill for several hours, as happened almost two year ago. More recently a pedestrian was killed after being knocked down by a cattle truck on the Netherhampton Road.</p> <p>There is also a risk that ambulance response times will be affected, as this is a major route for vehicles between the ambulance station near Salisbury District Hospital and Wilton and other parts of south Wiltshire.</p> <p>Overall the impact is likely to have a significant detrimental affect both in economic terms and the safety of all road users particularly during peak times.</p> <p>The plan does not provide sufficient detail on what transport measures would need to be adopted to make a development of this size viable. While there is mention of the Salisbury Transport Strategy being the solution to all of the developments proposed, the specific problems and solutions on how they will be overcome are not outline at all.</p> <p>An extensive road traffic review and subsequent plan needs to be put in place, along with full costings and implications. Without a proven road traffic plan the proposed draft housing allocation is cannot be considered viable.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site Nos. H3.1 and H3.3		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>NOT FAIR OR PROPORTIONATE</p> <p>There is no “nimbyism” behind our objection. The constructive manner in which all residents of Netherhampton have engaged in the discussion with the Wilton Estate regarding the planning application for development at Netherhampton Farm demonstrates that there is acceptance of the need for new housing provided that its scale is in keeping with the existing settlement and can be sustained by the local infrastructure. Netherhampton has approximately 60 dwellings and this new development at Netherhampton Farm will increase that number by over 30%. This feels like a fair share of the overall commitment facing South Wilshire and Wiltshire generally.</p> <p>The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on this small village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury.</p> <p>The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary?</p> <p>The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		South Wiltshire housing Market Area-Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The NPPF emphasises the principles of sustainable development and within this, section 4 (p9) describes the need to promote sustainable transport. Para 35 states                  “Plans should protect and exploit opportunities for the use of sustainable transport modes for the movement of goods or people. Therefore, developments should be located and designed where practical to .....</p> <ul style="list-style-type: none"> <li>● give priority to pedestrian and cycle movements, and have access to high quality public transport facilities;</li> <li>● create safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians, avoiding street clutter and where appropriate establishing home zones; .....</li> <li>● consider the needs of people with disabilities by all modes of transport.”</li> </ul> <p>Regard for these principles seems to be lacking in the Pre-submission draft Wiltshire Housing Site Allocations Plan for Salisbury, where little consideration is given to mitigating a potential increase in traffic movements through Harnham and ring road junctions. Strategic transport and planning decision-making in Salisbury is hampered by the need for local decisions to be made using the Area Board system that splits the populated area into three separate Boards, plus Amesbury to the north, and a Salisbury City Council area that excludes many of the major housing developments and other traffic generators (hospital, schools), but has to deal with the consequences, such as deterioration of air quality and conditions for walking and cycling, and demand for parking. The NPPF stresses that planning strategically across local boundaries is essential and a local system that fragments decision making where borders are crossed mitigates against implementing a city wide network of Green Infrastructure and walking and cycling routes. The final Housing Site Allocation Plan needs to deal effectively with these issues. Our main concerns centre generally around the lack of implementation of the Salisbury Transport Strategy (adopted 2012 without public consultation) and are specifically related to the current housing allocation sites in Harnham. Whilst the housing allocation numbers are largely unchanged from when the Strategy was formulated, the shift from Churchfields to Harnham significantly alters the impact of traffic generated towards the Harnham Gyratory, Exeter Street and College roundabouts, and potentially Park Wall, all junctions modelled as operating at 70-90% of capacity by 2026 on a “business as usual” basis (Salisbury Transport Strategy Summary, 2012, Fig 3.2). We are already 9 years away from the base measurements (2008) and only 9 years from the 21% increase in traffic by 2026 predicted on the “business as usual “ basis. None of the “do something” plan has yet been implemented or even planned so the “business as usual” option remains in force. We are not aware of the results of any survey work that has been undertaken since 2008 or what it might reveal about the actual growth in traffic in the intervening years. A refresh of the Transport Strategy is long overdue, but has been constantly delayed over the last 12-18 months, and the recently released housing allocations make the refresh and implementation of the Strategy even more urgent. The Plan states (para 5.128) that "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS. Plan allocations crystallise the pattern growth takes up to 2026 and refreshing the Salisbury Transport Strategy will allow the effectiveness of existing measures to be reviewed and propose new ones to accommodate growth." No implementation prior to development seems to be envisaged</p>				

Appendix Q - Schedule of representations

The Salisbury Cycling Strategy is quoted by developers in support of planning applications, but the network as described in maps (<http://www.wiltshire.gov.uk/transport-town-cycle-networks>) is largely at best incomplete and at worst merely aspirational. The feasibility of retrofitting modern cycling infrastructure where major roads are narrow is a significant problem. Much of the major road network delivers direct and reasonably graded access to the city centre, but heavy traffic acts as a deterrent to a shift to cycling and walking. Alternative routes on quiet roads and making use of Green Infrastructure have been identified, but require considerable investment to form a comprehensive, coherent, convenient and signed network. Green Infrastructure has been mapped and routes identified that would make attractive walking and cycling routes for commuting and leisure, but as yet any Green Infrastructure Strategy has not been consulted on or adopted. Traffic and lack of comprehensive cycling and walking facilities act as deterrents to a shift to sustainable modes. In the case of Harnham, further increases in traffic between Netherhampton and the ring road where cycling facilities have yet to be completed will deter more people from accessing Salisbury City centre, education and employment by bike.

Public transport can assist in modal shift towards sustainable transport, but bus services in Salisbury do not currently reflect where people need to go from housing developments to schools, colleges, employment, shops and other transport hubs like the railway station. In relation to the housing allocations under consultation, there is no bus service to Netherhampton, neither is there a Park and Ride site serving Harnham. Potential housing developments on Netherhampton Road and Rowbarrow (H3.1, 3.3 and 3.4) are on roads that lead into Harnham Gyratory and Exeter St roundabout and subsequently College roundabout and St Marks roundabout on the ring road. All these junctions, as noted above are predicted by modelling to be at or near capacity by 2026 without modification or improved facilities for pedestrians and cyclists (Fig 3.2, Salisbury Transport Strategy Summary 2012). Additionally Netherhampton Road (and Harnham Road) are narrow, passing through residential areas to reach the ring road. The alternative for traffic joining Netherhampton Road is to use Park Wall, also identified as approaching capacity by 2026. Netherhampton Road has no bus or Park and Ride service and cycling and walking routes are incomplete towards the ring road. Rowbarrow is somewhat better served at present with a cycle and pedestrian crossing over Downton Road allowing access to the local cycle network and City centre, as well as shared use facilities to Salisbury Hospital. We propose the following facilities are essential to provide comprehensive, coherent, high quality cycle and walking networks from Harnham to education, employment, shopping and leisure. The Plan needs amenment to include these alongside implementation of a refreshed Salisbury Transport Strategy before the commencement of any developments

- Complete cycle and walking routes along Netherhampton and Harnham Roads to the gyratory (Schools, employment)
- Complete redesign of Harnham Gyratory to include facilities for pedestrians and cyclists to cross safely, directly and conveniently (Schools, employment at the hospital and Wiltshire College, shopping on Southampton Road, City centre)
- Shared use path on the west side of New Bridge Road as on the east side to avoid cyclists having to cross to the other side to access the Grammar School and Cathedral Close
- Links from new housing to Middle Street (crossing needed) to access Town Path (to City centre, railway station) and Broken Bridges (employment at Churchfields, railway station)
- Improvements to both Town Path (increased use will require widening to accommodate more cyclists and pedestrians) and Broken Bridges (surface and bridge improvements to accommodate cycling safely)
- Complete cycle and walking route westwards along Netherhampton Road past the Garden Centre to access Netherhampton village (crossing needed), and improve the agricultural underpass and its accesses to provide cycling and walking links to the Wiltshire Cycleway
- New bus services for the development

The proposed development at Hilltop Way (H3.2) is stated to be outside cycling distance of the City centre (p77, Salisbury Community Area Topic Paper, Accessibility) "The site is situated to the north of Salisbury. The city centre is approximately 2km away. The site is not considered to be within a reasonable walking/cycling distance to the city centre, although there is access to local bus routes."

This statement needs modification. Two km is a short distance to cycle and is quite walkable for a reasonably healthy person. In planning terms cycle commuting or utility trip distances of 5-8km are typical (DfT Local Transport Note, 2/08 Cycle Infrastructure Design) and considered to be quite reasonable (Wiltshire LTP3 Cycling Strategy, section 2.7). In the case of this site, the Golden Way cycle and walking route passes to the north and gives traffic-free access to Castle Road for the City centre and Bishopdown for schools there and in Laverstock, and also shopping on London Road.

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">802</a>	<b>Consultee</b> Mr Robert Quarm  <b>Person ID:</b> 1126187	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Site Nos. H3.1 at Netherhampton on the A3094				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan to site 640 houses on the Netherhampton Road seems to me to be unfeasible. The implication that businesses from Churchfields would compound the issue.</p> <p>Strategically the site is poorly placed. There is minimal local employment so residents would have to travel through Salisbury to access local jobs or commute elsewhere, access secondary schools or other of the City's amenities. The proposed site is not within walking distance of the City Centre which would also increase traffic.</p> <p>Most of the recent developments have been placed to access the Park and Rides – this development does not and would significantly increase traffic along the Harnham Road and Gyrotory which is already at capacity and is not conducive to sufficient alteration to ameliorate the problem. This would result in an increase in noise pollution, air pollution and a decrease in safety.</p> <p>I doubt development could be successful without a proper relief road for the whole of Harnham.</p> <p>5.130 Note: The site was previously rejected.</p> <p>5.132 indicates that 'The site has a strategic role as a possible destination for the relocation of businesses to allow the redevelopment of the Churchfields strategic allocation of the WCS'</p> <p>It is unclear how much of Churchfields Industrial Estate might be incorporated in or near the new development. What assurances could be given that this would not eventually constitute the whole of Churchfields? Heavy traffic would further disrupt the Netherhampton and Harnham Road and gyrotory and lead to an increase in HGV's, traffic fumes and noise for the residents on top of that from the extra residential quota. There must be figures for the traffic requirement of the current Churchfields site – it would be interesting to know what this is in terms of volume, type of vehicle and peak timings as well as the original source locations of the service traffic.</p> <p>I agree with a previous correspondent that there is potential for some housing near to the Britford Park and Ride and the Hospital which should be considered in preference; this area would also benefit from a new School.</p> <p>Alternatively it might be sensible to move the Churchfields development and some housing nearer the A303 as it now looks as though plans to widen the A303 (including Stonehenge tunnel) will come to fruition. Locating Churchfields on the North side of Salisbury would likely decrease traffic coming into Salisbury residential areas, improve access for the site and allow for future expansion, which would be to Salisbury's benefit.</p> <p>5.136. It would be useful to know what improvements could be made that could ameliorate the cumulative impacts of the proposal.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Sutton Benger			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I have lived in Sutton Benger since 1992 and have seen many changes to the village and the surrounding area over that time. Many improvements have been made and I understand that inevitably expansion and increased housing are required. I feel the village has expanded if anything too quickly in recent years and is now such a size that we need a period of consolidation to enable the support services to catch up. I feel Sutton Benger has done its fair share of expansion up until now.</p> <p>Roads, traffic management, broadband internet, parking and the primary school are all working at full capacity.</p> <p>The main point I wish to emphasise is regarding the Primary School. It is in a central position within the village such that any further expansion would have a detrimental effect. The only further space available would be for the school to re-build two storey buildings and expand somewhat onto our recreation ground. That would have a massive detrimental effect on the life and vibe of the village, as well as going against the wishes of the benefactor who gifted the Rec to the village.</p> <p>Already local residents are losing the battle against school parking traffic, and it is a matter of time before a child is injured due to the amount of traffic and the speed of driving in the 20mph zone around the school and in Chestnut Road. The school itself is in an awkward position; as a business it wants to expand but at the same time has to be seen to be doing something in case there is an accident during pick up and drop off of the kids. The publication of cardboard signs warning about parking has limited effect. The reason for the current problem is that the school was allowed to expand and build on (or use for other purposes) the staff parking area within the fenced boundary. Now we are in a situation where we have on average 14 or more visitors / staff cars parked on the residential street all day (8am-5pm). This prevents the parents finding a safe drop off area when taking the children to school. This in turn leads to parents parking inappropriately or taking risks or parking further away in local streets. If you add in the school bus having to navigate down Chestnut Road it is all very hazardous at times. The congestion is considerable at peak times; actually the problem is that the school being the size it is, is actually in the wrong place.</p> <p>If and when new housing is forced upon us here in Sutton Benger, the school should be relocated as part of the plan. It should be something the developers are required to include in the plan. It would make sense to integrate this essential asset into any further expansion plans. These plans should include a dedicated staff car park and an area designed for the safe pickup and drop off of the children. This joined-up thinking would actually provide an asset to the village and many residents would then maybe support the expansion and building of some extra housing.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Context. Table 2.2 Settlement Hierarchy Levels of Development		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p><b>CONTRARY TO HOUSING DELIVERY STRATEGY &amp; NOT CONSISTENT WITH NATIONAL POLICY</b></p> <p>Salisbury H3.1 (Netherhampton Road - 640 houses) and Salisbury H3.3 (North of Netherhampton Road - 100 houses) both appear to fall within the small village and civil parish of Netherhampton, (population 493 in 2011) not within the boundary of Salisbury.</p> <p>The Wiltshire Core Strategy states:                  Small Village - Some modest development may be appropriate to respond to local needs and contribute to the vitality of rural communities, but limited to infill.                  740 houses is very far removed from modest development, limited to infill.</p> <p>One of the core principles of the National Planning Policy Framework is, "empowering local people to shape their surroundings". The opportunity to do this has been spectacularly overlooked with just one local public consultation meeting during the summer holiday period being totally inadequate.</p> <p>A site the size of that proposed in Salisbury H3.1 needs to be within the boundary of a principle settlement not a small village.</p> <p>As stated above, the size of the proposed site is totally unsuited to the small village of Netherhampton. Perhaps if the Officers of Wiltshire Council, left their offices in Trowbridge, Devizes and Chippenham and actually spent some time visiting the the south of the county, they would be in a better position to make sensible decisions with regard to future Housing Allocation for the county.</p> <p>A site the size of that proposed in Salisbury H3.1 needs to be within the boundary of a principle settlement not a small village like Netherhampton.</p> <p>In January 2009, 40 years after the Churchfields Industrial Estate began in Salisbury, there were talks to relocate many of the businesses to the Netherhampton Road. The plan was to build housing at Churchfields; a perfect solution to the local shortage and easy access to both amenities in the city and all transportation for the new residents. The business owners had been promised the opportunity to relocate over many years and yet, once the offer became a reality, they chose not to go. Whether this was due to the failure of the Harnham Brunel Link Road or perhaps an increase in rates/rent to Wiltshire Council I do not know but Bookers still stands alone on the new industrial/business park, while the surrounding land stands empty. Wiltshire Council has failed miserably in delivering what was proposed for both Churchfields and the Netherhampton Road; the Salisbury Vision disappeared in a cloud and now, the local residents are being asked to pay the price for these failures. There will be little to attract new residents to Salisbury with the traffic congestion, resultant pollution and lack of beautiful views on approach to the city which will surely be the result of these proposals. Very few of the large businesses based here in Salisbury remain now, with both HPI and Friends Life having shut their offices. What Salisbury does best is Tourism - our beautiful Cathedral, Stonehenge, our Markets all attract visitors but unless new residents want to work within the NHS, the caring profession, retail or hospitality industries, there is little employment available. This means that many more car journeys will be required by new residents to get to their place of work, with many already commuting to London daily; the knock -on effect for the Harnham Gyratory will be nothing short of a nightmare.</p>			

Appendix Q - Schedule of representations

	<p>There is no mention about whether proper consideration has been given to bringing back long term empty dwellings into the housing market or what proportion will be Starter Homes and Social Housing which are surely the most necessary for the hard-working but underpaid local residents. Neither is there an explanation covering when adequate transport provision will be made, where new jobs will come from, what secondary education and medical provision, retail and infrastructure may be included in the plans.</p> <p>What I find most risible is the suggestion that a country park (H3.1 Netherhampton Road) might somehow make the proposals more attractive, when the proposed location is already in an area of existing beautiful and natural countryside!</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>I believe that initial agreement for building in Salisbury, particularly H3.1 Netherhampton Road has already been made and that Wiltshire Council is merely paying lip service to allowing local people to have a say in future housing strategy.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">811</a>	<b>Consultee</b> Mr Andrew Martin	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1126224	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Figure 5.18 H2.14 Court Orchard/ Cassways, Bratton		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I do not have the detailed legal knowledge to be able to say that this plan is legal. I have therefore declined to check the legal box. However likewise I am not able to say that is not legal. There should be the option to check a 'don't know' box.</p> <p>p5.115 there is no evidence presented how the proposal will " improve employment opportunities, services and facilities" . There are very few local employment opportunities and the new residents are likely to become commuters to larger towns, including by train from Westbury to places as far away as Bristol and London. This will add an unsustainable traffic burden on local roads given the very limited public transport to Bratton.</p> <p>The only way this plan could potentially be made sound is by halving the number of dwellings, making provision for green space, a childrens' play area, significant woodland screening, and by having road access from both the southern and northern ends of the field..</p> <ol style="list-style-type: none"> <li>1. The inclusion of this many dwellings and at such a density in this location will have a really damaging impact on the special landscape value of the area and the conservation of Bratton's heritage and history.</li> <li>2. The proposed development is completely out of place in the location proposed and more appropriate to a town centre setting.</li> <li>3. The local planning authority has already twice rejected development plans for the site in question and considered that "the edge of the existing village is well defined and that the housing development proposed, together with the access road thereto across the field in front, would be a substantial intrusion into the rural landscape, and would therefore be detrimental to the character and scenic quality of the area." Nothing else has changed in the area so these decisions should still stand.</li> <li>4) If the plan should be adopted (in any form) then measures must be put in place to restrict HGV and construction traffic from using Court Lane, and attempting the dangerous junction onto the B3098 at Tollgate House.</li> </ol>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.128			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The document refers to a transport strategy, but there is no evidence of an effective strategy to increase the transport infrastructure to meet the inevitable congestion caused by the increase in vehicles from the proposed 840 houses and new primary school on the Netherhampton Road site. It is not feasible to widen the existing road or increase capacity on the crossing points of the River Avon at Aylewade Road or Newbridge road. Provision of a southern Salisbury by-pass allowing traffic from the A36 and A338 to by-pass Harnham would make the Wiltshire Housing Site Allocations plan for Netherhampton Road area sound by relieving the congestion from increased local traffic.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.136		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Vague platitudes about a revision of the strategic road network without specific proposals to increase capacity do nothing to cope with the inevitable increase in traffic from the 640 households and new primary school. Existing roads suffer from regular congestion at peak times, particularly at the beginning and end of the school day for the existing schools. The construction of a southern Salisbury by-pass to take through traffic away from the A36 and A338 past Harnham would allow the current roads to cope with local traffic.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		The Whole Plan especially in relation to Trowbridge and surrounding villages		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Plan is not positively prepared because it does not meet objectively assessed development requirements. WC propose to increase the size of Trowbridge by one quarter during the Plan period (and more after that) which exceeds the requirement for a five year supply.</p> <p>The Plan is not justified because WC have failed to explain how and when the jobs, schools, roads and other services and infrastructure will be provided to support this huge expansion.</p> <p>The Plan is not effective because WC's examination of 'windfall', which is expected to provide 60% of new housing, is grossly inadequate – comprising one page out of 4,500 pages of the Plan documents.</p> <p>The Plan is not consistent with national policy because WC has failed to give proper weight to brown field sites. WC's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes</p> <p>The changes that are necessary to the plan are set out precisely in the submissions made by the Trowbridge Town Council (Mr Lance Allan - 06/09/2017) and the Hilperton Gap Action Group (Mr George Bundy - 19/09/2017)</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. Not fair or proportional. Netherhampton village has 60 dwellings about to expand to 80, so to have another 740 houses is totally out of proportion.</p> <p>2. Transport. The A3094 plus the Harnham gyratory and the Wilton Wall lights are already working at full capacity. A development of this size would cause traffic chaos.</p> <p>3. Flooding and sewerage. The massive runoff from a development of this size, already on a hill, would cause serious flooding in this area, even more than already occurs.</p> <p>4. Jobs. There are no jobs to the south of the city, so who will live in the houses.</p> <p>5. Noise pollution. In 2014 a smaller proposal of 70 houses/pub/hotel was withdrawn after it was proved that vehicle noise from the A3094 would exceed government guidelines.</p> <p>Unless the above issues (in particular the infrastructure, roads etc) are fully addressed there is no way this proposal should happen.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my deep concerns regarding the Draft Wiltshire Housing Sites Allocation Plan in Trowbridge. I live on Frome road near the country park next to the Church Lane and Southwick Court sites. I understand these two sites have been put forward as preferred sites within the housing allocation plan. I would like to raise the following concerns:</p> <p>Contradictions in the Strategy  A core strategy or local plan is considered "sound" when it is consistent with national policy.  Paragraphs 72, 111,156 and 157 of The National Planning Framework and Planning Guidance documents state that the local policy should provide:  The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environment and historic interest and look to enhance the natural, built and historic environment.  I do not believe the current strategy delivers on either the development or infrastructure required by Trowbridge.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		The council appears to have completely ignored the many brownfield sites available in the town centre. If the mission is to attract more people to live in the town surely the rejuvenation of the available brownfield sites would be the priority? Areas on the town centre are an absolute eyesore, but could so easily be knocked down or converted into wonderful living accommodation. Building on the proposed sites strikes me as just being a short-sighted fix to a long term problem and is not sustainable. I am of the understanding a private individual has applied at least twice in the past to build on the site boarding Frome Road, Southwick country park and Church Lane but has been refused the permission. It strikes me as outrageous this greenfield site which has had planning permission previously denied is now a site proposed by the council!

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Accessibility from the sites 3565, 3620 and 1021</p> <p>The A361 is an accident blackspot and already at capacity during 'rush hours'. The proposed access point will only make the matter worse. The road will not be able to support the extra traffic and will be extremely dangerous! The sites at Church lane, Southwick court and Old Brickfields are being considered as it is believed they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles). Surely the most logical way to reduce traffic is to develop the previously mentioned brownfield sites already in the town centre! No evidence has been provided to support the theory (as it is just a theory) that people will walk into town rather than driving. In fact, I can tell you many people who live in the area drive into town as they generally go in for food shopping etc and would rather drive than carry all the bags home.</p> <p>The distance from the property I live in is over 1.5 miles to the town centre, that is a 3-mile round trip, this is too far for many members of the aging population to consider a walkable distance. With the number of new houses you are proposing in the area, if you work off the estimate that each house has two cars there could easily be an addition 400 cars travelling on the already congested Frome Road. The Council's view that this is justified as it provides sustainable development is clearly in question. There is not the infrastructure in place for a development of this size.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>  Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1 and H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>H3.3 is on the flood plain of the river Nadder and has a boundary on a housing area already liable to flooding despite 2008 flood protection reinforcements.</p> <p>The size of the development of H3.1 on the hilly higher ground across the road will impact on the valley water table of H3.3. I do not believe that the Environment Agency could have been properly consulted and agree to such developments. I would like to see the report of the Environment Agency and their views on mitigating the flood risks at H3.1 and H3.3. I understand that housing development on a floodplain or in areas liable to flooding can only be considered if there are no other sites suitable for development.</p> <p>I see no reference to exploring further development on the north side of the city at Old Sarum where there is no flood risk. We need more housing in Wiltshire but I note that H3.1 and H3.3 developments total far more houses than is being considered for any housing development elsewhere in Wiltshire so this is not justified.</p> <p>I see no considerations of other sites for housing development in Salisbury eg at Old Sarum, or brownfield sites at Churchfields, at the Maltings. The Environment Agency has already assessed the flood risk at the latter 2.</p> <p>I do not agree that there is employment or that this can be created in Salisbury on the south side of the city. Thus the residents of the developments will need to commute to the north of Salisbury or to Southampton adding to the traffic saturation already present on the Nethampton Rd. The Salisbury transport plan has not delivered improvements to date on this.</p> <p>The plans for H3.3 and H3.1 cannot be justified until there is clear reporting from the Environment Agency on these being the preferable sites in Salisbury for housing development.</p> <p>Highways for England needs to report on the traffic implications so that Salisbury Transport Plan can be re examined</p> <p>I have lived on the floodplain of the river Nadder for 23 yrs. I would like a full assessment from the Environment Agency about the flood risks. Surface water flows and flooding has been improved with the Environment agency flood defence work in 2008, but we continue to have drainage problems when water levels in the River Nadder and ground water levels are high. This has been exacerbated by the small housing development of Buttercup Close, Middle Street, which occurred without improvement to the drains so that these have to be pumped out by a tanker on a regular basis.</p> <p>The H3.3 site suffers regularly from surface water logging with heavy rainfall, and I cannot believe that the Environment Agency have been properly consulted and agreed to the proposal for 100 houses there against the principles stated in Wiltshire Core strategy to prevent development on our flood plains.</p>

		<b>Person ID:</b> 1126249		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge area			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The plan is unsound as Trowbridge does not have the infrastructure for the increased traffic. The traffic into Trowbridge as it is now is more than the system can cope with.</p> <p>The local villages will become part of a greater Trowbridge and lose their identity. Local schools in these villages are already over subscribed.</p> <p>The fields surrounding North Bradley has numerous colonies of bats which will be disturbed and move on.</p> <p>The fields between Trowbridge and North Bradley flood regularly.</p> <p>There are many commercial property sites within the town that could be changed to housing. Eg The ex Bowyers site is derelict and has had several plans for sports and social building either rejected or not taken up. Shops in the town are closing at an alarming rate, the shires has quite a few premises empty. There is out of town shopping so perhaps the time has come to build housing within the town and replace these un-used commercial properties. Rather than building on green field sites.</p> <p>Use brown field sites for housing within and surrounding areas of Trowbridge.</p> <p>White horse business park empty buildings. The old Virgin building, the Bowyers site.</p> <p>Why building has stopped at Leap Gate. This was in the main Structure Plan and has been stopped!!</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site 3260 – Land at Upper Studley		Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This is in relation to Site 3260 – Land at Upper Studley only.</p> <p>Points raised are quoted directly from:</p> <p>WHSA PSCONS09K Wiltshire Housing Site Allocations Plan SA Rpt Annex 1 - A.9. _ Trowbridge CAR June 2017</p> <p>supplemented by my comments in italics:</p> <p>Archaeological</p> <p>Records indicate that the land has medium/high archaeological potential, with possible medieval remains within the vicinity of the site.</p> <p>The landscape type is characterised by former post-medieval water meadows which are partially legible in modernity. Water meadows are rare and can be locally significant contributors to landscape character.</p> <p>The landscape type is described as meadows/water meadows which are rare. In combination with other constraints, the developable area of the site would need to be reduced.</p> <p>The proposed number of dwellings at site 3260 will have to be reduced, as noted by the report. So there is very little to gain and much to lose in the construction of property on this site. Inclusion of this site plan is neither justified (too small, not cost effective) or effective (more detrimental to natural surroundings, expensive to mitigate against risk of flooding) and puts pressure on local services and transport system.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site 3260 – Land at Upper Studley		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		This is in relation to Site 3260 – Land at Upper Studley only.  Points raised are quoted directly from:  WHSA PSCONS09K Wiltshire Housing Site Allocations Plan SA Rpt Annex 1 - A.9. _ Trowbridge CAR June 2017  supplemented by my comments in italics:  Flooding risk  Existing foul water infrastructure crosses the site and there would be limited space to divert sewers.  The sloping nature of the site could make surface water attenuation challenging  (NOTE : the soil is predominantly clay and so drains very slowly. Significant flooding occurred where the Lambrok Stream meets 44-45 Spring Meadows after a storm hit during the final phases of construction of Spring Meadows. The water persisted for several days. There is also evidence of ground water having affected properties along Boundary Walk)  Due to the presence of the Lambrok Stream and its floodplain, consideration should be given to the inclusion of a sustainable drainage system within any subsequent planning application process to control the risk of surface water flooding from impermeable surfaces.  The site is situated in Flood Zones 1, 2 and 3. Surface water drainage patterns are such that the development of the site would need to consider potential impacts on the areal extent of flood zones associated with Lambrok Stream.  In addition, as the site slopes down to the Lambrok Stream, achieving suitable surface water attenuation measures, particularly at greenfield infiltration rates may be challenging.  Whilst challenging to achieve, the site would nonetheless need to positively manage surface water. To achieve such works it is likely that the net developable area would need to be reduced.			

Appendix Q - Schedule of representations

	The proposed number of dwellings at site 3260 will have to be reduced, as noted by the report. So there is very little to gain and much to lose in the construction of property on this site. Inclusion of this site plan is neither justified (too small, not cost effective) or effective (more detrimental to natural surroundings, expensive to mitigate against risk of flooding) and puts pressure on local services and transport system.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		We wish to object very strongly to the proposal to build on the land to the South and West of Elizabeth Way on what is known as the Hilperton Gap. Building on this site will make Hilperton just a suburb of Trowbridge rather than a village in it's own right and will set a precedent for completely closing off the green space that surrounds the town.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.3 site north of Netherhampton Road			Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The plan has not sought to identify sites which best utilise existing infrastructure. It has not justified the selection of this site given the lack of capacity of the A3094 to accommodate additional traffic and the sustainability appraisal is flawed in its assessment of the magnitude of positive and adverse effects of developing this site. The site is not sustainable owing to the lack of adequate infrastructure and the potential to increase flood risk. It will encourage car use as it is not well served by public transport. The plan seeks to concentrate development in the principal settlements but in the Salisbury area, employment patterns are more dispersed. (these range from large employers such as Porton Down to the numerous conversions of farm buildings to business purposes) Also modern lifestyles with an increase in remote working and internet shopping reduces the need for development to be concentrated in large sites on the edge of towns. A more dispersed pattern allowing more development in villages would have less landscape impact and make better use of existing resources. The configuration of Salisbury as a convergence of routes at the confluence of several rivers and enclosed by hills makes any expansion of the settlement difficult without significant impacts in terms of landscape setting and heritage, traffic congestion and reduction in air quality, flood risk and drainage. A more thorough appraisal of existing infrastructure should be undertaken and a detailed updated transport strategy should be published before greenfield sites with no existing infrastructure are allocated. The existence of a ring of park and ride sites lends itself to satellite development leaving green space around the city. Together with the proposed allocation at H3.1 it will have a significant impact upon the A3094 in terms of traffic volumes, congestion and air quality during both the construction phase and when development is completed.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Possibly - to challenge the assumptions that have been made unless further detail of drainage and highway improvements are provided prior to the Examination.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site nos H3.1 and H3.3		Positively prepared	Justified
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>INSUFFICIENT TRANSPORT &amp; GREENINFRASTRUCTURE</p> <ul style="list-style-type: none"> <li>• Para 5.128 of the Draft Allocation Plan says: “The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS”. This is simply not true.</li> <li>• The “Salisbury Transport Strategy” (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</li> <li>• Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations:</li> <li>• “Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy.”</li> <li>• It should also be noted that such “Salisbury Transport Strategy” as exists is not detailed and has never been subject to public consultation or formal adoption.</li> <li>• Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</li> <li>• We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague “solutions” should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</li> <li>• There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</li> </ul>			

Appendix Q - Schedule of representations

	<ul style="list-style-type: none"> <li>• We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</li> <li>• Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</li> </ul>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>"The consultation has been drawn up without proper regard for the many considerations I have outlined. 				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>FLAWED PROCESS</p> <ul style="list-style-type: none"> <li>• We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</li> <li>• The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</li> <li>• The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</li> <li>• The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</li> </ul>			
<b>Attached files (Please see Objective)</b>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.40	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am a member of the Neighbourhood Plan Steering Group and a Resident of Seend. We have recently been asked to respond to your proposed changes to our settlement boundary. The Parish Council and the NP Steering Group have written a response with which I do not agree on some points, so am sending you this as my personal response. As you will see from the document below, I would appreciate answers to the queries I raise about the rationale behind the changes.(in blue).</p> <p>Changes to Settlement Boundaries in Seend Village from Carola Thorpe, July 2017.</p> <p>To the south east: here the new boundary moves to the north of the A361, leaving all of Seend Park outside the settlement boundary. What is the rationale for this and for excluding the other houses going east along the A361? K6</p> <p>Beech House and all the houses and buildings to the west have been newly included in the settlement boundary. Half the gardens of three houses are excluded from the settlement area. This is presumably to prevent the popular practice of selling garden areas for house building. If this is so I look on this as a favorable protective change. Is this correct? J7</p> <p>As the new boundary progresses west it remains close to the buildings excluding the land that belongs to them, again I imagine with a similar aim.</p> <p>As the new boundary reaches the end of the Manor walled gardens and reaches Church Lane, it deviates to exclude the walled area owned by the Clarkes of Saltwood. (Not the present owners of the Manor, also called Clark!) Is this to prevent infill? I8</p> <p>It then progresses west, surrounding the churchyard and Seend House and the garden to the south, but then excludes the wooded area and lodge to the north of the house. This also seems a protective measure to an area of possible development if left within the settlement boundary. Is this so? H8</p> <p>The last significant change at the west end of the A361, is to include the car park at the Bell Inn within the settlement boundary. This will presumably make it easier to obtain planning permission, which I am not against in principle in this location, as the corner is already built on. G&amp;F8</p> <p>The new boundary then follows the line of the existing one north across the A361 towards Bollands Hill.</p> <p>It turns east at the top of School Lane, with a very small deviation before heading east along the footpath at the back of Somerset Close, but soon leaves the footpath.</p> <p>It continues east to the north of Dial Close, with the length of those gardens cut in half as at present. Again I assume the rationale is as on the south side, to prevent folk selling a portion for house building. Is this so?</p> <p>Then a change occurs which means the WI allotments are excluded from the settlement, thereby preventing it being used for housing and protecting the allotments. Is this assumption correct? H6</p> <p>The final significant change is the exclusion of the Lye Field, including the tennis courts. Why has this change been made? I6&amp;7</p>			

Appendix Q - Schedule of representations

	In conclusion: If the rationale behind all these changes is to protect the rural character of this part of the Parish, they would seem broadly helpful. The other 2 settlements do not have settlement boundaries.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">849</a>	<b>Consultee</b> Lisa Dent Crudwell Parish Council  <b>Person ID:</b> 1126295	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Ridgeway Farm Crudwell				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It is important to differentiate between the village of Crudwell and the designated area for the Neighbourhood plan which is the Parish. The Parish Council believes the village has been described as Large because it has two Hotels, two Pubs, a large lorry haulage yard, a car sales and servicing facility and a School. Many farms surround the Village farms. The village has about 250 dwellings</p> <p>Crudwell Parish Council has in the past supported the introduction of new build housing projects as a means of sustaining the viability of the village and will continue to do so in the future. With the introduction of small estates every few years the character of the village has not been spoilt and the Conservation area has not been threatened. The centre of the village has been developed from the A429 and the rural feel of the village has been maintained. Ridgeway Farm had been submitted to Wiltshire Council back in 2014. That application drew much local opposition from local people, principally on the grounds of the scale of the development, it being outside the designated red line settlement boundary, and its likely impact on the local infrastructure, specifically: the likely increased traffic on Tetbury Lane; impacts on already overburdened drainage and sewerage systems and oversubscription of Crudwell Primary School.</p> <p>It is clear there is a lot of local opposition to having a site allocation plan forced on the village. Over a hundred parishioners turned up at the last Area Board meeting to voice their opinion and over £5000 was raised in a fortnight to engage a consultant to put the villages case to an Inspector. 2</p> <p>Whilst it is understood that Wiltshire Council needs to ensure an adequate five year housing land supply across each housing market area, the Site Allocations Plan would result in an oversupply of 4,284 dwellings to 2026 when past completions are combined with deliverable commitments, and windfall sites are included. Even when windfalls are excluded, the oversupply is still 2,198 dwellings across the Housing Market Area.</p> <p>The Site Allocations Plan also results in an oversupply of homes in the Malmesbury Community Area, even without windfalls. Wiltshire Council has a history of oversupply of homes in the former North Wilts area excluding Chippenham. In eight of the last ten years more homes have been built than planned, in the other two years targets were virtually met. In fact over the last ten years the average oversupply has been 143% higher than planned.</p> <p>On this basis, there is no strategic need to identify any new homes at Crudwell, so the Wiltshire Site Allocations Plan should not do so. This Parish Council believes that this plan if adopted will set a planning precedent that will be impossible to manage, it being outside the designated red line settlement boundary.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	A major concern to Parishioners is the risk of flooding which happens to properties around the Swillbrook which runs through the centre of the village. Significant damage has occurred to many houses in the village in recent years both through surface water and raw sewerage. Surface water from the proposed site would make this situation far worse. We must not overlook the fact that many properties around the school and(former) post office green as far up the A429 as The Butts estate already need non-return valves to stay safe from sewerage flooding until the excess over capacity subsides. In addition, sewerage frequently exudes from all the manhole covers around the PO Green in Tuners Lane due to the lack of Pumping Station capacity , even during only moderate rainfall. The Council have been contacted by Hankerton Parish Council expressing their concern over the increase in Sewerage this plan would bring to their own pumping station as it barely copes at present. In Conclusion Crudwell Parish Council is surprised a Development as large as this is proposed in a small village with a significant conservation area which already has a School which is full, an identified Sewerage and Drainage problem, has no shop and a bus service which at best is poor and is planned to be reduced. We believe the village has the opportunity through its emerging Neighbourhood Plan to define its own future.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site Nos. H3.1 and H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>INSUFFICIENT TRANSPORT &amp; GREEN INFRASTRUCTURE</p> <p>Para 5.128 of the Draft Allocation Plan says: "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS". This is simply not true.</p> <p>The "Salisbury Transport Strategy" (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</p> <p>Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: "Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy."</p> <p>It should also be noted that such "Salisbury Transport Strategy" as exists is not detailed and has never been subject to public consultation or formal adoption.</p> <p>Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</p> <p>We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague "solutions" should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</p> <p>There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</p> <p>We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</p> <p>Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p><b>FLOOD &amp; SEWAGE IMPACT</b>  Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the problem is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites.  Site S1027 is well known locally for having standing water regularly during the winter.  There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. The existing sewage pumping infrastructure is already operating at capacity.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>FLAWED PROCESS</p> <p>We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</p> <p>The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</p> <p>The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</p> <p>The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>The consultation has been drawn up without proper regard for the many considerations I have outlined. <b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.53 Proposed amendments to the settlement boundary for Chapmanslade			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The proposed amendment to the settlement boundary of Chapmanslade should include Green Farm Industrial Estate and an associated plot because this land forms a functional, physical, visual and contiguous part of the village, and is located on the High Street at the geographical centre of the village. The omission of this site, based on the methodology in Topic Paper 1, is unjustified. The methodology, which omits employment sites on the edge of larger villages, is considered to be flawed and at odds with the NPPF. In any event, the site is not located at the edge of the village. Please see attached detailed representations. Green Farm Industrial Estate and an associated plot should be included within the amended settlement boundary of Chapmanslade because this previously developed land forms a functional, physical, visual and contiguous part of the village. As a result of this amendment, the settlement boundary would properly reflect the established developed extent of this part of the village. Please see attached detailed representations.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>H3.1 &amp; H 3.3 Netherhampton Road - both sites                  It does not fully consider the implications of additional traffic in the Harnham area: pollution and congestion. It acknowledges that further investigations would be needed but Netherhampton Road could not be widened effectively in the urban sections because of the number of houses that would be affected.                  The long-term impact of more vehicles and more loss of rural land would be harmful to the approaches to the area and the distinctive cathedral views.                  Flooding in the area, especially North of Netherhampton Road, would be a problem.                  H.3.1                  Reduce the number of houses planned and the area designated to under 200 houses.                  H 3.3 -North of Netherhampton Road                  Remove this option completely.                  Overall, I can see that the authority is attempting to comply with government dictats, but I am unsure about the need for so many houses in the Salisbury area. Many new residents would have to commute elsewhere for work and this too would contribute to congested roads. Aesthetics also need to be considered. The removal of so much rural land and open spaces would be detrimental - in particular, altering the approach to Salisbury along Netherhampton Road.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.19			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The housing proposed is in Netherhampton Parish and in the South Western Wiltshire Community Area. There is no apparent link with Salisbury (other than geographical proximity) which cannot be effective.</p> <p>There is no proposal to extend the settlement boundary for Salisbury to include this proposed housing area and para 4.15 of the WCS indicates that development outside the settlement boundary will be strictly controlled. There has been insufficient thought given to the implications of increasing the scale of housing in Netherhampton Parish, and outside Salisbury's settlement boundary, in the manner proposed.</p> <p>There is reference in WCS para 4.15 to a community-led Neighbourhood planning process which might review the settlement boundary, but no indication how this might work when the community is Netherhampton parish and the settlement is (presumably) Salisbury.</p> <p>There needs to be a major rethink regarding how the development of a settlement (such as Salisbury) which spans multiple parishes and multiple Community Areas can be effectively managed at a community and city level. As they stand the housing proposals suggested in Fig 5.19 and Policy H3.1 are not justified and not effective.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>There needs to be the opportunity for this major proposal to be examined in the public arena to take account of many concerns which will be raised - the relationship to Salisbury and the village of Netherhampton is considered above, but there are others including Transport, Green Infrastructure, Landscape, Education, Drainage, Health &amp; Retail/Leisure infrastructure etc which need to be addressed.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>My wife and I have lived in Crudwell for 19 happy years with our daughter being born 2 weeks after we moved into the village. So we do count ourselves now as being local with a real understanding and passion for the village life of Crudwell. During this time we have seen many changes, which include the closure of the village shop, the move of the village Post Office to the local pub with a restricted service being open just 2.5 days per week. The village school is a lovely community school and our daughter enjoyed her education there. With it now being at full capacity with no room we understand for expansion, where would the children from these additional houses go?</p> <p>There are many dog owners within the village and unfortunately the dog fouling issue has become worse with irresponsible owners leaving the dog mess on public paths. Currently there are not enough dog bins around the village (2 in total), with new houses will come new dogs, so at least an extra 3 bins would need to be positioned around the village to encourage owners new and current to discard of their dogs mess.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We are aware of and have no opposition to the 10 new houses being built at Ridgeway Farm however we have now been informed of the new plans to add an additional 40 houses to this development, which we do strongly oppose. This would equate to an increase of 20% in dwellings to Crudwell and we list below a number of the reasons why we oppose this increase below.</p> <p>We are not opposed to village development, however we do feel strongly that new houses should be positioned at more suitable locations and in smaller numbers. Crudwell has begun, as you may know the process of producing a Neighbourhood Plan, which we fully support to determine what local needs for housing exist and how they should be met.</p> <p>We do hope our opposition to this additional development is read, shared and indeed considered before any further steps are taken in a hope that it will be over turned.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Tetbury Lane is already a busy narrow lane with cars often speeding up and down whilst children, horse riders, cyclists and other pedestrians travel up to the village park and fields; with an additional 50 to 100 cars (minimum) on this road, much of it without a pathway, the increased dangers to many would be high, with a serious accident just waiting to happen</p> <p>The main village through road the A429 is again a busy road and is often very difficult to get onto, especially in the mornings. With the additional cars in Tetbury Lane this would cause more problems and congestion.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The proposal is not in line with the Wiltshire strategic plan for housing. It does not address the needs of Bratton as identified in the Housing Survey of 2014. This development would require substantial modification to the B3098, in order to provide a safe and workable access. Access from the lower, Northern, end of the site would be preferable, but still increase traffic flow considerably on very narrow lanes. There is no public footpath running from the Court Orchard area to this site, alongside the North of the B3098. The B3098 is narrow in this location, and any pedestrian traffic would be hazardous in the extreme. We do not want to encourage the use of cars for short journeys to shop and schools.
