	<p>We urge the Council to review this information in light of our comments and concerns regarding the HSAP strategy and proposed allocations, and to positively allocate our clients site for residential development to support the delivery of housing in the Trowbridge Community Area. We trust that the enclosed representations will be considered in detail. Since this is the first published full iteration of the Wiltshire Housing Site Allocations Plan, we would urge the local authority to reconsider the strategy proposed within the plan, and to favourably consider our client's site for allocation to meet Trowbridge's housing needs in the current plan period.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraphs 2.3; 2.16-2.18; 2.21-23		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Paragraph 2.13 Paragraph 2.13 sets out the overall minimum housing requirements for each of the Housing Market Areas in Wiltshire. Including the homes proposed West of Swindon (see Core Policy 2 of the Core Strategy) this totals a minimum housing requirement of 42,000 homes. This figure is based upon the Strategic Housing Market Assessment (SHMA) (December 2011). Wiltshire Council has now jointly reviewed its SHMA with Swindon Borough Council. Though at the time of writing this has not been published for review, it is understood this will happen in the coming months. The revised SHMA indicates an uplift in the housing requirement across Wiltshire, and the committee report to the June meeting of the Joint Strategic Economic Committee indicated that a further review could take place to respond to the Government's proposed standardised housing need methodology (which has now been published for consultation). The housing requirement given within the Core Strategy cannot, therefore, be considered to be the most up-to-date evidence. It is incumbent on the LPA to ensure that the HSAP responds to the latest evidence to ensure that it is allocating land to meet the full objectively assessed housing needs of the District. Other local authorities such as Mendip are having due regard to such new evidence and are updating their Part 2 plan to respond to such changes and this should be the approach in Wiltshire.</p> <p>Paragraphs 2.16-2.18 The Council states that the focus of the HSAP will be to allocate sites for housing in areas where there has been an undersupply of housing against the targets in the Core Strategy which we support. This is particularly pertinent to Trowbridge (as noted later in the Plan and within the Trowbridge Community Topic Paper) as there has been a significant shortfall of housing in this Community Area. This amounts to a total of 1,220 units. This problem is exacerbated given that Trowbridge is one of Wiltshire's Principal Settlements where major housing growth was anticipated in the Core Strategy but it stands as the worst performing Community Area across the district against its indicative requirement (Table 4.10). The HSAP states that the disaggregated requirements for each settlement are indicative. However, where the projected undersupply of housing is as substantial as has been projected for Trowbridge, it is incumbent on the Council to take significant action in reviewing and addressing the shortcomings of the spatial strategy within the HSAP. Unfortunately our client considers that the Council has not sufficiently addressed this issue for Trowbridge. We note the reference at paragraph 2.18 highlights the reference within the WCS (para 4.30) which states: "The disaggregation to Community Areas set out above is not intended to be so prescriptive as to be inflexible and potentially ineffective in delivering the identified level of housing for each market area" It cannot therefore follow that the disaggregation between Trowbridge and the Trowbridge Community Area is an absolute bar and that the wider Trowbridge Community Area should be discounted from meeting an element of the undersupply. The decision by the Council within the HSAP to not fully explore the wider Trowbridge Community Area is not justified and effective.</p>				

#### Appendix Q - Schedule of representations

Noting that a clear objective of the HSAP is to ensure flexibility in the delivery of the WCS and indicative requirements the Council must flexibly consider all sustainable and deliverable options in the relevant Community Areas to meet the housing shortfall in particular within the Trowbridge Community Area where the shortfall is acute.

The role of the Large Villages surrounding Trowbridge needs to be acknowledged and differentiated given their close proximity to the principal town which is a 'primary focus for development'. There is no harm in the close outlying Large Villages to Trowbridge (a short distance from the town centre) taking an element of growth to meet the needs of the whole community area particularly where supply is so constrained and past housing delivery performance has been poor.

Paragraphs 2.21-2.23

The Plan states that Neighbourhood Plans have a role in meeting the District's housing requirement. We recognise that some parishes and neighbourhood forums may seek to include housing allocations within their Neighbourhood Plan; however, it should be noted that there is no statutory or policy obligation or imperative for them to do so. The responsibility to ensure that housing requirements are met therefore remains with the Local Planning Authority (LPA) and the HSAP must ensure that it makes sufficient provision to meet current needs. There is some acknowledgement of this within paragraph 2.23; however, the strategic imperative to meet housing requirements rests with the local planning authority and to support the delivery spatial strategy in areas where there is a significant undersupply of housing. Reliance on future Neighbourhood Plans to address any future shortfall creates considerable uncertainty.

Paragraph 2.13

The HSAP must plan for the full identified housing requirement in Wiltshire, and should therefore respond to the latest evidence on housing need to ensure that it positively plans for housing growth. This includes taking account of the Government's proposed standardised housing need methodology in due course.

Paragraphs 2.16-2.18

The HSAP must make clear from its outset that in Community Areas where there is a projected housing shortfall, that the LPA will review the spatial strategy openly and flexibly to consider all sustainable and deliverable options in those Community Areas and in particularly the Trowbridge CA. The Plan should also consider sustainably located sites within the Community Area which are proven to be available, deliverable and suitable, particularly where larger, more complex and constrained allocations have failed to deliver housing. This necessitates a review of the site selection methodology to not exclude the remainder of the Trowbridge Community Area at the outset and to properly consider the role of Large Villages within close proximity to a Principal Settlement.

Paragraphs 2.21-2.23

The Plan must acknowledge here that the Council retains a responsibility to meet its overall housing need, and that in areas where a significant housing shortfall is projected that the Council will review the delivery strategy flexibly and positively consider all available, deliverable and sustainable options to meet identified housing needs.

On behalf of our client, Redrow Homes (South West) Ltd, please find enclosed representations to the Regulation 19 Consultation on the Wiltshire Housing site Allocations Plan (HSAP) Pre-Submission Document.

We set out below a summary of the enclosed representations:

The HSAP must make clear that where there are significant housing shortfalls identified that the LPA will review the spatial strategy flexibly. For the Trowbridge Community Area, where there is a significant housing shortfall, this will require consideration of sites across the whole community area to ensure that the Plan considers all sustainable, available and deliverable sites to meet this shortfall in the short-to- medium term.

The extent of the housing shortfall identified is significant and presents a risk to the strategic role and function of Trowbridge as one of the Principal settlements in the District. Furthermore, it should be noted that the Wiltshire Core Strategy sets out the overall housing requirement for Trowbridge to be met as a minimum. The HSAP should therefore seek to allocate sites to meet the full identified housing shortfall in Trowbridge. The HSAP must respond to the joint SHMA update by Wiltshire and Swindon to ensure that it allocates housing to meet the full objectively assessed housing need in the District.

We object to the exclusion of the Trowbridge Community Area Remainder from consideration in the site selection process to meet the significant identified housing shortfall. Given the acknowledged environmental and infrastructure constraints around the town it is imperative that the LPA fully considers all options in the Community Area. The Council cannot apply flexibility to the target Core Strategy Community Area housing requirements and then treat the disaggregation between the Principal Town and the remainder area as a fix.

Appendix Q - Schedule of representations

	<p>The HSAP elects to allocate development to Large Villages in other locations, including adjacent to North Bradley and also where the indicative 'Remainder' requirement is met. To exclude Large Villages around Trowbridge, including Southwick, to address some of the housing need is untenable in light of the significant housing shortfall.</p> <p>The site allocations proposed in Trowbridge are subject to constraints which have serious potential to delay delivery or otherwise limit development capacity e.g. all sites will be affected by Habitat Regulations Assessments and the requirement to implement the Trowbridge Recreation Management Mitigation Strategy which is yet to be agreed. Some sites are noted to require significant transport and social infrastructure to support development, or else have landscape and heritage sensitivities. Noting these factors, we consider there is a real risk of further delay to delivering the housing in Trowbridge. This compounds the decision not to meet the full identified housing shortfall.</p> <p>There is a clear need to make further housing allocations within the Trowbridge Community Area with the contribution from the whole Community Area given detailed consideration.</p> <p>Our client's site at Blind Lane, Southwick, presents a logical and sustainable opportunity to meet this need. The recent outline planning application demonstrated that there are no technical constraints to delivering housing within the short-to-medium term. We have enclosed a site location plan (reference R0416_05A Rev A) and the proposed site masterplan (reference R0416_06 Rev G) to illustrate the opportunity this site presents to accommodate part of Trowbridge's housing requirement.</p> <p>There are numerous merits to allocating this site including:</p> <p>The site is not subject to any international, national or local environmental designations, including AONB, biodiversity and Green Belt.</p> <p>The site is defensible and enclosed and a logical extension of Southwick, without risking coalescence with Trowbridge.</p> <p>The site is in a sustainable location due to the proximity of key local services, its proximity to the centre of Trowbridge and the availability of public transport links.</p> <p>The site is majority Flood Zone 1, and therefore sequentially preferable as a location for development.</p> <p>Suitable vehicular and pedestrian access can be provided to and from Blind Lane, and transport assessments have confirmed that the proposals will not give rise to unacceptable traffic impacts.</p> <p>The site is not in the context of any designated heritage assets or landscapes, and it has been shown that the site could provide an improved interface for Southwick with the countryside.</p> <p>Following detailed surveys, the ecological interests of the site have been identified and a masterplan proposed which the Council's ecology officer confirms will be unlikely to have adverse impacts on biodiversity interests.</p> <p>The majority of the mature trees and hedgerows on the site can be retained and incorporated into the scheme, with landscaping and replacement planting to compensate where a small amount of hedgerow is removed for the site access.</p> <p>A list of the documents upon which the planning application was determined has been included at the end of this letter. These are available on Wiltshire Council's online register, and form an up-to-date evidence base which demonstrates that the site is technically deliverable and appropriate. We reserve the right to refer to these documents to support our participation in the Examination of this Plan.</p> <p>We urge the Council to review this information in light of our comments and concerns regarding the HSAP strategy and proposed allocations, and to positively allocate our clients site for residential development to support the delivery of housing in the Trowbridge Community Area.</p> <p>We trust that the enclosed representations will be considered in detail. Since this is the first published full iteration of the Wiltshire Housing Site Allocations Plan, we would urge the local authority to reconsider the strategy proposed within the plan, and to favourably consider our client's site for allocation to meet Trowbridge's housing needs in the current plan period.</p>

<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Wiltshire Housing Site Allocations DPD Consultation Response - The Heytesbury Estate                  This consultation response is prepared by Savills (UK) Ltd on behalf of The Heytesbury Estate. The submission has been prepared following an invitation by Wiltshire Council to comment on the draft Wiltshire Housing Site Allocations (HSAP) DPD.                  The response makes specific comments on particular sections of the HSAP DPD, clearly outlining whether they are considered to be sound or unsound with reference to the tests of soundness outlined in paragraph 182 of the National Planning Policy Framework (NPPF).                  The submission also identifies land at Heytesbury as a suitable site for allocation in the HSAP DPD and indicative plans are submitted with this letter to illustrate how this site might be developed. The local planning authority is encouraged to consider this site for allocation in the Plan.                  Tables 4.4, 4.5 and 4.6 - The approach taken to identifying sites for allocation  <b>UN SOUND</b>                  Tables 4.4, 4.5 and 4.6 of the draft HSAP DPD provide a summary of those sites which are currently favoured for allocation. It is considered that the approach taken by Wiltshire Council, as presented in these tables, is not the most appropriate strategy when considered against reasonable alternatives and it will not be effective in delivering the housing development that Wiltshire needs over the plan period. Therefore, in accordance with paragraph 182 of the NPPF, the draft HSAP is unjustified, ineffective and is thus unsound. Justification for these conclusions is set out below.                  The sites currently identified within the draft HSAP, when considered together, show far too much reliance upon large housing developments, which are to be provided almost exclusively at Wiltshire's larger settlements (i.e. Principal Settlements and Market Towns. Indeed this was also the approach applied when selecting sites for allocation in the Wiltshire Core Strategy. The table below provides a summary of all the sites allocated in the Core Strategy and those currently proposed for allocation in the draft HSAP DPD.</p> <p>Core Strategy Allocations</p> <table border="0" data-bbox="450 1177 2181 1465"> <thead> <tr> <th data-bbox="450 1177 593 1209">&gt;100 units</th> <th data-bbox="1016 1177 1144 1209">&lt;100 units</th> <th data-bbox="1391 1177 1644 1209">Settlement Hierarchy</th> </tr> </thead> <tbody> <tr> <td data-bbox="450 1241 510 1273">150</td> <td data-bbox="696 1241 904 1273">Bradford on Tone</td> <td data-bbox="1391 1241 1547 1273">Market Town</td> </tr> <tr> <td data-bbox="450 1305 510 1337">475</td> <td data-bbox="696 1305 837 1337">Ludqershall</td> <td data-bbox="1391 1305 1547 1337">Market Town</td> </tr> <tr> <td data-bbox="450 1369 510 1401">220</td> <td data-bbox="696 1369 853 1401">Marlborough</td> <td data-bbox="1391 1369 1547 1401">Market Town</td> </tr> <tr> <td data-bbox="450 1433 533 1465">2,600</td> <td data-bbox="696 1433 837 1465">Trowbridge</td> <td data-bbox="1391 1433 1637 1465">Principal Settlement</td> </tr> </tbody> </table>					>100 units	<100 units	Settlement Hierarchy	150	Bradford on Tone	Market Town	475	Ludqershall	Market Town	220	Marlborough	Market Town	2,600	Trowbridge	Principal Settlement

40	Bratton	Large Village
45	Durrington	Market Town
15	Durrington	Market Town
10	Salisbury	Principal Settlement

The information from the above table has been condensed into a summary table below which provides a clear breakdown of the balance of new homes to be provided on larger/smaller sites and at the larger/smaller settlements.

Summary Table

Total homes delivered on sites >100 units	11,790	95.8%
Total homes delivered on sites <100 units	520	4.2%
Total homes delivered at Principal Settlements and Market Towns.	11,755	95.5%
Total homes delivered at Local Service Centres and Large Village	555	4.5%

The table above illustrates a significant imbalance in terms of where Wiltshire Council is seeking to locate new homes over the coming plan period. It shows that 95.8% of new homes will be delivered on sites of 100 units or more, with only 4.2% on sites of fewer than 100 units. It also shows that 95.5% of new homes will be focussed at the Principal Settlements and Market Towns, compared to only 4.5% at the Local Service Centres and Large Villages. This approach is unsound for various reasons. For example:

Appendix Q - Schedule of representations

The housing needs of Wiltshire's smaller rural communities will continue to go unmet. This approach will constrain the supply of new homes (including affordable homes) at the Rural Service Centres, Large Villages and other smaller settlements. The effect of this will be that local people, particularly the young and family households will not be able to afford to live in the communities they grew up in and will be forced to leave.

Wiltshire Council are effectively seeking to place far too many eggs in too few baskets. If even a small number of sites allocated in the Core Strategy, or proposed to be allocated in the draft HSAP DPD fails to deliver new homes within the Council's optimistic timeframes, the county will fall behind on its housing delivery targets. This would mean that the Council again is unable to demonstrate a five year supply of housing sites and would again be vulnerable to speculative development proposals in unfavourable locations.

Larger sites inevitably have long lead in times before development can commence and before new homes can be delivered due to the substantial costs involved and the time required to deliver supporting infrastructure. It is therefore very likely that certain sites will suffer delays as a result.

The larger sites at the higher order settlements are generally all controlled by a small number of volume housebuilders. It is not in the interests of these housebuilders to deliver new homes at the rate anticipated by Wiltshire Council, rather they will inevitably control the rate of delivery so as to maximise the returns on each unit provided. This is a problem currently facing North Dorset District Council and South Somerset District Council, where the slow rate of delivery at the larger allocated sites has resulted in both authorities falling behind on their five year supply targets.

The proposed approach of relying so heavily on larger sites at the higher order settlements has therefore been demonstrated to be flawed. Instead, it is strongly recommended that Wiltshire Council seeks to use the HSAP DPD as an opportunity to redress this balance by allocating a greater proportion of new homes on smaller sites at the Rural Service Centres, Large Villages and even smaller settlements where appropriate. This approach will result in the following benefits:

The development needs of all Wiltshire's communities (including its rural communities) will be met over the coming years.

Allocating more smaller sites will create opportunities for small and medium sized builders who are able to deliver new homes quickly, thus maintaining sufficient levels of overall delivery across the county. This will also help to address the current over-reliance on a small number of volume housebuilders who currently control the Wiltshire housing market.

By allocating a greater number of smaller sites across a greater number of settlements, Wiltshire Council would not be so heavily reliant on any one allocation to meet its delivery targets.

In light of the factors discussed above it is considered that the approach taken to the HSAP DPD should be amended to rebalance the types of sites to be allocated and the location of those sites. In order to meet the Council's challenging housing delivery targets it is considered that at least 25% of the new homes allocated in the HSAP DPD should be provided on sites of fewer than 100 dwellings and at least 25% should be provided at the lower order settlements including Rural Service Centres and Large Villages . This would make the HSAP DPD sound.

Policy H2 - Allocations in the North and West Wiltshire Housing Market Area  
**UNSOUND**

Policy H2 lists the draft site allocations for the North and West Wiltshire Housing Market Area. It is considered that the strategy for this area is far too reliant upon allocations at the Principal Settlements and Market Towns, with too few new homes allocated at the Rural Service Centres and Large Villages. It is therefore considered that the approach taken by Wiltshire Council is not the most appropriate strategy, when judged against reasonable alternatives and it will not be effective in delivering the housing development that Wiltshire needs over the plan period. Therefore, in accordance with paragraph 182 of the NPPF, the draft HSAP is unjustified, ineffective and is thus unsound.

The risks and adverse effects of allocating such a significant proportion of new homes to the Principal Settlements and Market Towns, with so few allocated at the smaller settlements has already been set out above and so is not repeated here. In short, this approach will further exacerbate problems of undersupply and affordability at the smaller settlements and is very unlikely to achieve the rates of overall delivery required to allow Wiltshire Council to meet its housing targets over the coming plan period. A more appropriate approach would be to direct a greater proportion of new homes to the Rural Service Centres and Large Villages. Such sites will inevitably be subject to fewer constraints and could be delivered in a timely manner.

<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>Warminster CA</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Land West of Greenlands, Heytesbury</p> <p>The Heytesbury Estate would like to formally promote land at the village of Heytesbury for allocation in the emerging HSAP DPD. Enclosed with this submission is a site location plan along with a concept masterplan which illustrates how development could be delivered at the site. Heytesbury is defined as a 'Large Village' in the Wiltshire Core Strategy. Core Policy 1 states that development should be allowed to come forward at the Large Villages to help meet their housing needs and to improve employment opportunities, services and facilities. On this basis, the allocation of sites at Large Villages such as Heytesbury is entirely consistent with Core Policy 1 of the Core Strategy. This point is further supported by the fact that Wiltshire Council is proposing to allocate land for development at Chapmanslade, which is also defined as a Large Village.</p> <p>Heytesbury village is located approximately 3.5km south east of Warminster. The village provides a good range of services and facilities including a primary school, pubs, post office, a church and football and cricket pitch facilities. Heytesbury also benefits from a regular bus service which provides access to Warminster, Trowbridge, Bradford-on-Avon, Salisbury, Bath and many other settlements. Heytesbury is therefore considered to be a sustainable village and an appropriate location for housing development to meet local needs.</p> <p>In promoting the land west of Greenlands for allocation in the emerging HSAP DPD, the following site points are considered to be most relevant: The site is situated at the edge of the village but is physically well related to existing development, with the homes at Greenlands to the east, South View to the south east and the Westlands and Little London housing areas to the north east. To the north west of the site, on the opposite side of High Street, Westover House provides a Bed and Breakfast business.</p> <p>The site fronts on to two roads including High Street along its northern border and Greenlands to the east. High Street is a long and relatively straight road, which allows for excellent visibility when looking in both directions along the highway. The submitted Concept Masterplan illustrates how an acceptable access junction to the site can be designed to serve a new residential development at the site.</p> <p>The site boundaries are generally defined by fairly sparse hedges, interspersed with mature trees. The submitted concept masterplan for the site illustrates how these boundaries can be strengthened through planting of native hedgerows and trees, which will have landscape and ecological benefits.</p> <p>Heytesbury is a village with a Conservation Area, which is generally focussed around the more historic parts of the village. At its nearest point, the site is around 85 metres from the edge of the Conservation Area and it is not considered that the site forms an important part of the setting to the Conservation Area.</p> <p>There are no listed buildings, Scheduled Ancient Monuments or World Heritage sites located within or in the vicinity of the appraisal site.</p> <p>There are no public rights of way crossing the site or running along its boundaries.</p> <p>The site comprises generally flat land, currently used for the grazing of horses. There are no significant physical constraints to development at the site and so it could be delivered in the short term.</p>				

Appendix Q - Schedule of representations

	<p>There is an opportunity to deliver community benefits at the site in addition to the delivery of open market and affordable homes to meet local needs. The landowner is committed to engaging in a process of meaningful community consultation to establish what form this might take, but it could for example include the provision of public open space, children's play facilities, a community orchard, allotments or even land for a new community facility if so required.</p> <p>A development at the site would provide an appropriate allowance of affordable homes on-site to meet local needs.</p> <p>The River Wylde flows past the south eastern corner of the site. Although much of the land to the south of Heytesbury is identified as 'flood zone', this does not extend into the appraisal site itself. As such, the site is not constrained by flood risk.</p> <p>The River Wylde is designated as a SSSI and Special Area of Conservation (SAC). It is not anticipated that development at the site would impact the ecological value of the river due to the presence of existing development between the site and the river. That said, the landowner will work closely with Wiltshire Council and Natural England to ensure that development at the site safeguards (and where possible enhances) the ecological value of the River Wylde. The submitted indicative proposals show how the south east corner of the site could potentially remain undeveloped, if required to avoid causing harm to the ecological designation.</p> <p>In considering for how the site could be developed there are considered to be two options as follows:</p> <ol style="list-style-type: none"> <li>1) One option would be to deliver a smaller development focussed in the eastern part of the site (approximately 0.9ha). Allowing for an appropriate provision of open space (or other community benefits) as part of the development it is considered the site would have potential to provide approximately 33 dwellings.</li> <li>2) An alternative option would be to develop the entirety of the site (approximately 2.5ha). Allowing for an appropriate provision of open space (or other community benefits) as part of the development it is considered the site would have potential to provide approximately 61 dwellings.</li> </ol> <p>I trust you will agree that the land west of Greenlands represents an appropriate location for future housing development to meet local needs. This written submission, along with the submitted indicative proposals for the site illustrate how an appropriate form of development can be delivered at the site which responds to the local character of the village and which delivers significant benefits to the village as a whole. Wiltshire Council is therefore respectfully requested to consider this site for allocation in the emerging Housing Site Allocation Plan DPD.</p> <p>Should you require any further information in respect of the points raised in this submission then I would invite you to contact me using the details provided above.</p>

Our client supports the allocation of 'land at Empress Way, Ludgershall' under Policy H1.1 of the DPD. The inclusion of the allocation is a sound component upon which the Council should submit the DPD for examination at the earliest opportunity.

Detail of the allocation

6.14 The PPG at ID: 12-010-20140306 states:

“Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interests about the nature and scale of development (addressing the ‘what, where, when and how’ questions).

The policies map should illustrate geographically the policies in the Local Plan and be reproduced from, or based on, an Ordnance Survey map. If the adoption of a Local Plan would result in changes to a previously adopted policies map, when the plan is submitted to the Planning Inspectorate for examination an up to date submission policies map should also be submitted, showing how the adopted policies map would be changed as a result of the new plan.”

6.15 In response to the policy text, Mr S H Crook would comment changes are required to provide clarity, as follows in red text:

“Land at Empress Way, as identified on the Policies Map, is proposed for mixed use development comprising the following elements:

- approximately 270 dwellings;
- an extension to Empress Way to distributor road standard to facilitate an unhindered future eastward connection to the A342;
- future connections to the land to the south and east (not counting the Empress Way extension);
- a connecting highways link between Empress Way and Simonds Road/New Drove, via the adjoining development at the former Granby Gardens site;
- 1.8ha of land reserved for a two form entry primary school.
- A strong landscape framework including significant screening to the southern and eastern boundaries of the site

Development will take place in accordance with a masterplan for the site approved by the Council as part of the planning application process.”

The matters introduced above are in response to the advice from Mark Wiltshire (Major Projects Officer) dated 4 August 2016.

6.17 In response to paragraphs 5.17 to 5.21, Mr S H Crook would comment changes are required to the supporting text of H1.1 to add clarity, as follows in red text:

5.17 Approximately 16.5ha of land at Empress Way, as shown on the policies map, are allocated for development. The proposal is to extend land already with permission(17) for housing development to allow for a further approximately 1601 dwellings. The total amount of development will therefore be approximately 270 dwellings. The treatment and design of the site will be one comprehensive development proposal.

5.18 The site is formed of agricultural land on the southern edge of the town including land that has been previously approved for use as a garden centre [K/59593/O] later replaced with a permission for housing development. It is a logical extension to the town in an accessible location with regard to local services and facilities but there are limited established natural boundaries that help to enclose the site. There are no

Appendix Q - Schedule of representations

	<p>field boundaries on the site's southern and eastern edges, although there is limited screening on the boundaries adjoining the railway line and existing residential development.</p> <p>5.19 Vehicular access to the site would be required from Empress Way and via the Granby Gardens development site from Simonds Road. The trigger point for the delivery of the access via Simonds Road will be determined by transport assessment. Development of the site will include a connecting link road through the site to the two points of access. Historically development to the south of the railway line was envisaged to be connected to the road network further east. The long term opportunity to provide this southern link road should not be closed. Hence, the extension to Empress Way should be constructed to the relevant standard to facilitate future unhindered connection eastwards across the railway line to the A432. In addition, connections to the land to the south and east should be delivered to not preclude future extension of the site. Transport assessment will inform detailed measures to mitigate impacts on the local road network, including the A342 Andover Road, Memorial Junction and the capacity of the signals on the nearby railway bridge.</p> <p>5.20 Development of the site will include 1.8ha reserved for a 2 form entry primary school. Based on current estimates local primary school capacity will be absorbed by committed development elsewhere in the town. The period and need to retain the reserved land for a school will be determined as part of the application process based on projected demand for primary school places at that time. In the event the land is not required within the period then the reserved land will be returned.</p> <p>5.21 The site design will be led by a strong landscape framework. Significant additional screening at the southern and eastern site boundaries would be required, along with landscaping and green infrastructure throughout the site as there are middle and long distance views of the site from the south. The final design and layout should be informed by a Landscape and Visual Impact Assessment.</p> <p>The suggested revisions at paragraph 5.17 clarify the approximate nature of the amount of development consistent with the wording of the policy.</p> <p>6.19 The suggested revisions at paragraph 5.18 clarify that while the land use is arable, a section of the site has a history of planning permission for urbanising land uses.</p> <p>6.20 The suggested revisions at paragraph 5.19 clarifies that a trigger will be informed by transport assessment as to when the second point of access via Simonds Road will need to be delivered. At the time of writing, the Transport Assessment for 16/10907/OUT stated:          "Planning consent reference E/2013/0234/OUT allows 109 of the 269 units currently proposed to be accessed directly from Empress Way. The Transport Assessment supporting that application identified the Tidworth Road / Astor Crescent traffic signals as operating at 88.2% in this scenario. ... with development of the full 269 residential units, the Primary School and provision of the link road through to Simonds Road the traffic signals will operate at 93.1%. If this second value is considered acceptable in the long term (full development) then it should also be acceptable in the short term (partial development) in the Empress Way / Astor Crescent only access scenario.          As such, additional residential development over and above the 109 previously consented can be accessed via Empress Way alone before reaching the 93.1% capacity tipping point. It is considered that the difference between the 88.2% and 93.1% capacity values equates to approximately 40 residential units therefore 149 of the 269 units the subject of this report could be accessed via Empress Way only before the need for the connection through to Simonds Road is triggered".</p> <p>6.21 In addition, other changes at 5.19 emphasise the strategic importance to not close the opportunity to extend Empress Way eastwards over the railway line to the A342. This would provide a new distributor road to the south of Ludgershall. This remains a clearly stated aspiration within Kennet Local Plan Saved Policy HC16 and accompanying paragraph 2.32 – Appendix C. Any development of this allocation should not preclude that southern link road from being delivered.</p> <p>6.22 The suggested revisions at paragraph 5.20 seek clarity that the determination of the need for the primary land will also determine the period of any reservation. The judgement will also be based on projected demand for school places. Furthermore, that the reserved land will not be held in perpetuity by the Council (if not needed) and provisions are to be made for its return after the period.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Delivery Strategy			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the consultation papers for the aforementioned document. As the market leader in the provision of sheltered housing for sale to the elderly, McCarthy and Stone Retirement Lifestyles Ltd considers that with its extensive experience in providing development of this nature it is well placed to provide informed comments on the Housing Site Allocations Plan consultation, insofar as it affects or relates to housing for the elderly.</p> <p>The National Planning Policy Framework stipulates that the planning system should be ‘supporting strong, vibrant and healthy communities’ and highlights the need to ‘deliver a wide choice of high quality homes, widen opportunities for home ownership and create sustainable, inclusive mixed communities. Local Planning Authorities should plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community... such as... older people’ (emphasis added).</p> <p>The National Planning Practice Guidance reaffirms this in the guidance for assessing housing need in the plan making process entitled “How should the needs for all types of housing be addressed? (Paragraph: 021 Reference ID: 2a-021-20140306) and a separate subsection is provided for “Housing for older people”. This stipulates that “the need to provide housing for older people is critical given the projected increase in the number of households aged 65 and over accounts for over half of the new households (Department for Communities and Local Government Household Projections 2013). Plan makers will need to consider the size, location and quality of dwellings needed in the future for older people in order to allow them to move. This could free up houses that are under-occupied. The age profile of the population can be drawn from Census data. Projections of population and households by age group should also be used. The future need for older persons housing broken down by tenure and type (e.g. Sheltered, enhanced sheltered, extra care, registered care) should be assessed and can be obtained from a number of online tool kits provided by the sector. The assessment should set out the level of need for residential institutions (use class C2). But identifying the need for particular types of general housing, such as bungalows, is equally important” (My emphasis).</p> <p>The ‘Housing White Paper: Fixing our broken housing market’ clearly signals that greater consideration must be given to meeting the needs of older persons’ in Local Plans stipulating that ‘Offering older people a better choice of accommodation can help them to live independently for longer and help reduce costs to the social care and health systems. We have already put in place a framework linking planning policy and building regulations to improve delivery of accessible housing. To ensure that there is more consistent delivery of accessible housing, the Government is introducing a new statutory duty through the Neighbourhood Planning Bill on the Secretary of State to produce guidance for local planning authorities on how their local development documents should meet the housing needs of older and disabled people. Guidance produced under this duty will place clearer expectations about planning to meet the needs of older people, including supporting the development of such homes near local services<sup>82</sup>. It will also set a clear expectation that all planning authorities should set policies using the Optional Building Regulations to bring forward an adequate supply of accessible housing to meet local need. In addition, we will explore ways to stimulate the market to deliver new homes for older people.’ (Para 4.42) (My emphasis).</p>			

## Appendix Q - Schedule of representations

The adopted Wiltshire Core Strategy identifies that Wiltshire has an ageing population, and states that this is more so than the national average. Paragraph 2.14 states that “by 2026 there will be a higher proportion of the older age groups, including the over 85s. This part of the population is predicted to grow the fastest, by 89.4%, over the next 15 years”. Core Strategy Policy 46 identifies the importance of meeting the needs of Wiltshire’s vulnerable and older people.

In line with the rest of the country, this demonstrates an acceptance that the demographic profile of the Authority is projected to age. The largest proportional increases in the older population are expected to be of the ‘frail’ elderly, those aged 85 and over, who are more likely to require specialist care and accommodation provided by Extra Care accommodation. It is therefore clear that the provision of adequate support and accommodation for the increasingly ageing demographic profile of the Borough is a significant challenge.

We note that there are no allocations for the delivery of older persons’ accommodation in the Housing Site Allocations Plan, nor is there consideration of the suitability of the sites detailed for such developments.

Unless properly planned for, there is likely to be a serious shortfall in specialist accommodation for the older population in Wiltshire, which will have a knock on effect in meeting the housing needs of the whole area and wider policy objectives. Specialist accommodation for the elderly, such as that provided by McCarthy and Stone, will therefore have a vital role in meeting the areas housing needs.

We would advocate that the Council take a positive approach in seeking to provide appropriate accommodation to meet the needs of its ageing population within the Housing Site Allocations consultation document. There is an opportunity to facilitate the delivery of Specialist accommodation by identifying locations for the delivery of Older Persons Accommodation within existing or new Housing Site Allocations.

We consider that the best approach towards meeting the diverse housing needs of older people is one that encourages both the delivery of specialist forms of accommodation such as sheltered / retirement housing and Extra Care accommodation.

When selecting sites for elderly persons’ accommodation careful consideration is given to locational criteria including: Topography, Environment (including safety and security), Mobility, Services and Community Facilities. As such, suitable sites for specialist accommodation for the elderly are difficult to find and tend to be located within, or adjacent to town or local centres. It is therefore highly unlikely that the majority of development sites will be suitable for specialist accommodation for the elderly, particularly on urban extension sites where access to goods and services may be limited. Having said that, when new local centres are being created these may also provide an appropriate location for retirement housing developments.

Specialist accommodation for the elderly also usually provides an element of care and communal facilities at an additional cost to the developer. This requires a critical mass of residents in order to be feasible and small scale developments of specialist housing for the elderly could not be realistically asked to provide or maintain such facilities. It is therefore unlikely to expect the provision of specialist accommodation for the elderly to be met piecemeal in general needs housing developments.

We would like to highlight the advice provide in the Housing in Later Life: Planning Ahead for Specialist Housing for Older People toolkit. This toolkit was developed by a consortium of private and public organisations with an interest in housing for the elderly and encourages a joined up approach to planning, housing and social care policy both in the collection of evidence and the development of specialist accommodation for the elderly. A copy of this document has been appended for your convenience. Whilst we appreciate that no one planning approach will be appropriate for all areas, an example policy is provided that, we hope, will provide a useful reference for the Council:

“The Council will encourage the provision of specialist housing for older people across all tenures in sustainable locations.

The Council aims to ensure that older people are able to secure and sustain independence in a home appropriate to their circumstances and to actively encourage developers to build new homes to the ‘Lifetime Homes’ standard so that they can be readily adapted to meet the needs of those with disabilities and the elderly as well as assisting independent living at home.

The Council will, through the identification of sites, allowing for windfall developments, and / or granting of planning consents in sustainable locations, provide for the development of retirement accommodation, residential care homes, close care, Extra Care and assisted care housing and Continuing Care Retirement Communities.”

Well located and designed specialist housing for older home owners is a highly sustainable form of housing. Given the critical need for older persons accommodation in Wiltshire there should be a presumption in favour of sustainable housing and in particular specialist housing which is being proposed on suitable sites. It is recommended that greater weight is attached to this approach alongside the desire to release residential land within strategic allocations or indeed a separate policy within the document to cover the housing need for the ageing population. This accommodation will come from a number of sources both public and private and with varying levels of care and shelter provision enabling

Appendix Q - Schedule of representations

	<p>individual people to remain in their own home with independence and security. In effect there should be more of a positive policy supporting older people's accommodation in the same way that affordable housing is given a high priority.</p> <p>I trust that the above comments will be considered in the evolution of any emerging consultation document and that we will continue to be invited to comment as the document progresses.</p> <p>We would advocate that the Council take a positive approach in seeking to provide appropriate accommodation to meet the needs of its ageing population within the Housing Site Allocations consultation document. There is an opportunity to facilitate the delivery of Specialist accommodation by identifying locations for the delivery of Older Persons Accommodation within existing or new Housing Site Allocations.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The draft document assumes that there will be no additional housing in Melksham and therefore makes no allocations for development. The representations submitted in respect of the Draft Wiltshire Housing Site Allocations Plan confirm that such an approach is not appropriate and would not be in accordance with the Framework. Melksham is clearly a sustainable location for further development and there is no evidence to demonstrate that it could not accommodate further growth during and beyond the plan period. In order to make the plan robust and sound (by allocating above minimum housing requirements), the settlement boundary should be extended to accommodate the land North of Woodrow Road that was promoted for development under planning application reference 16/05644/OUT and shown on the attached red line plan. Whilst the application was refused earlier this year, the only reason was because it represented development beyond the outdated settlement boundaries. There are no other constraints to development and it is clear that it can come forward in the short term, deliver a full range of planning obligations and make a valuable contribution to the future land supply without any detrimental impacts.

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	In order to present the case in the most effective manner and to outline the changes needed to make the plan sound.				

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3085</a>	<b>Consultee</b> Gerry Keay Waddeton Park Limited	<b>Agent</b> Mr Mark Scoot Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1137312	Maypool Estates  <b>Person ID:</b> 1137310	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Woodrow Road, Melksham		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In our opinion, the emerging plan is seeking to interpret minimum housing requirements as maximum targets and this approach will mean that the full housing need for the area will neither be planned for or delivered. This is clearly in breach of the core Framework objectives to boost housing land supply and maintain at all times a deliverable five year land supply.</p> <p>The Core Strategy Inspectors Report (December 2014) confirmed that the housing figures are minimum figures rather than maximum targets and therefore in the context of the need to boost housing land supply the planning system should be seeking to demonstrably exceed these minima. Despite these being minima the Council has failed to maintain a five year land supply in the relevant policy area for most of the period since the Inspectors Report was issued and despite the comments in Paragraph 80 of the Inspectors Report (below) has not reviewed the objectively assessed housing need (for example a new SHMNA has not been prepared despite having received guidance that one should):</p> <p>80. Nonetheless, the Framework calls for a significant boost to housing supply. Achieving an average delivery rate of 2,100 over the entire plan period, not merely the pre-recession period, would be significantly above recent annual performance and the longer term historic average as a whole; it would equate to some 42,000 homes. Whilst the achievement of such a figure should be subject to careful monitoring, the evidence indicates the fluctuations that can occur in the delivery of housing but does not conclusively indicate that such a delivery rate cannot be met during the course of the plan period to deliver the significant boost in housing required to go some considerable way to meeting needs. Against this context and mindful of the content of the LDS (partial CS Review), the subsequent intended early review of the CS, the Sites DPD, the Chippenham Site Allocation DPD and the neighbourhood planning processes will enable the Council to proactively seek to meet, and if necessary reassess, its objectively assessed housing need and plan for its provision accordingly.</p> <p>The emerging DPD should plan to deliver in excess of the minimum requirements to ensure a five year supply and meet the full housing need of the plan area. The Core Strategy Inspectors Report gave specific consideration to Melksham and future housing requirements and raised specific concerns about future shortfalls that are not addressed in the emerging DPD:</p> <p>285. The submitted CS indicated at least 2,040 new homes would be provided over the life of the plan of which 1,930 should be accommodated at Melksham. No strategic sites were identified and the Council had an expectation that the neighbourhood planning process would provide a basis for delivering the remaining housing required. Subsequent to its consideration of the overall housing provision for the county and its disaggregation across the three HMAs, the Council has proposed a revised and indicative amount of housing for this Community Area. Consequently, the level of indicative housing contained in Core Policy 15 is proposed to be 2,370 homes, of which some 2,240 would be at Melksham and 130 in the remainder of the Community Area. With due regard to the updated evidence base, including the SA, the SHMA and the Council's Topic Papers I have no specific evidence to suggest that such an approach would not deliver suitable levels of sustainable development and is not justified adequately. I recommend accordingly (MM 47).</p> <p>286. The principle of Core Policy 15 is consistent with the objectives of the Core Strategy as a whole. The volume of intended housing is expressed indicatively and appropriately which provides some flexibility for the overall level of provision and I am mindful that the Council's SA sets out the process which has led to the absence of any strategic site allocation for the town.</p>				

Appendix Q - Schedule of representations

	<p>287.The CS as proposed to be changed would enable the Sites DPD and the neighbourhood planning process to facilitate the provision of the required level of housing albeit, notwithstanding the early work between Melksham Town Council and Melksham Without Parish Council, there is some current uncertainty as to when any neighbourhood plan may emerge and what it may 115 Topic Paper 3 et al Wiltshire Core Strategy, Inspector's Report December 2014 - 66 - specifically address. In such a context the absence of a strategic allocation does not aid the certainty of the Plan in delivering the housing required; indeed, the provision of a housing allocation capable of delivering, for example, in excess of 400 homes would contribute to the strategic objectives of the CS in terms of housing land supply and potentially, in the event of a mixed use scheme, a more balanced economy.</p> <p>288.Whilst, in the shorter term, there appears to be sufficient commitments to ensure an adequate supply of housing land for the town, there is a notable degree of uncertainty for the latter part of the plan period. The Council acknowledged in its Position Statement the scope for a Sites DPD to assist in delivering such housing which, given my earlier comments in relation to overall housing numbers for the county, seems to be the most pragmatic and efficient way of complementing the neighbourhood planning process to ensure the provision of sufficient housing to meet identified needs in a timely fashion. Such an approach may also provide an opportunity to facilitate the appropriate provision of smaller sites for the Large Villages within the community area in order to ensure the delivery of adequate housing to meet the needs of the area in a sustainable fashion. By such means it will be feasible to deliver the housing numbers shown within modified Core Policy 15 as necessary. Notwithstanding the potential availability of land as promoted by submissions to the Examination, the Council's decision to not identify a strategic allocation for Melksham at this time is, on balance, warranted.</p> <p>Given that a number of the emerging Neighbourhood Plans have made very limited progress (and certainly will not deliver housing land in the short term) and the concerns raised by the Core Strategy Inspector above, the emerging DPD should make further allocations for housing land in sustainable locations such as Melksham.</p> <p>Table 4.44 of the emerging DPD highlights that the plan will only deliver at most 1% more than the minimum housing requirement for the North and West Wilts Policy area. Such an approach gives rise to a significant risk that an adequate land supply will not be maintained. For example, schemes may be delayed / not come forward or detailed consents may not deliver the quantum of growth anticipated at the outline stage. Further to this, the target of 22,190 is a minimum not a maximum and in no scenario can it be robust to plan to exceed minimum growth by only 1% if every single unit of 11,871 is delivered.</p> <p>In order to ensure the maintenance of a 5 year land supply and to plan for more than the absolute minimum level of housing the plan should be modified by making additional allocations including land at Woodrow Road, Melksham as set out in the attached representation.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In order to present the case in the most effective manner and to outline the changes needed to make the plan sound.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Wiltshire Housing Site Allocations Plan is not properly justified as it has failed to account for the potential to contribute much-needed housing through the development of SHLAA site 738 (Land Adjacent Danes Lye). Site 738 was discounted from the site selection process at stage 2a, due to an 'insufficient access point', however, further examination has found that safe and suitable access can be achieved onto the B3098 and the site should therefore be re-considered for allocation within the DPD. Please see the attached document for further details regarding the access point and appraisal of site 738. [refer to attached full supporting statement] The allocation of site 738 for residential development within the emerging Allocations Plan would help the LPA deliver the most appropriate strategy for housing development within Wiltshire. Presently, the site selection process has not fully considered the reasonable alternative sites within the Westbury Community Area based upon the evidence available and as such, the plan is not justified.

<b>Comment ID:</b> <a href="#">3087</a>	<b>Consultee</b> Hill Homes Hill Homes Development Ltd  <b>Person ID:</b> 900566	<b>Agent</b> Mr Stephen Young Senior Planning Consultant  Pro Vision  <b>Person ID:</b> 902049	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.22. Cells G4-6 & H4-6		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Table 8.1 of the Wiltshire Housing Site Allocations Plan (W HSAP) Topic Paper 1 (Settlement Boundary Review Methodology) indicates that the proposed settlement boundaries are now intended to include:                      "commenced residential and community facilities ... that is physically related to the settlement";                      "built ... employment development in principal settlements, market towns, and local service centres that is physically related to the settlement";                      but to exclude allocations or unimplemented planning permissions.                      Calne is a "market town". Thus commenced permissions and/or existing employment sites should be included within the proposed boundaries. There is, however, significant inconsistency regarding how the principles of Table 8.1 have been applied to the proposed settlement boundaries. For example:</p> <p>a) Fugglestone Red has commenced and is under construction. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area of outline permission S/ 2012/ 0814 and Phase 1A RM permission 15/ 05120 / REM lies outside the proposed settlement boundary for Salisbury (Cells E3- 4 and F3- 5).</p> <p>b) Longhedges, approved by 13/ 00 673/ OUT and 15/ 07253/ REM, has also commenced. A number of properties have been sold. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area lies outside the proposed settlement boundary for Old Sarum (Cells J1- 2, K1- 2 &amp; L1).</p> <p>c) A 200 unit scheme on the NE of Calne, approved by N/ 11/ 03524/ OUT and 15/ 05831/ REM, has also commenced. Many of the properties have been allocated postal addresses by the Council. By virtue of the criteria in Table 8.1, the site should be within a settlement. However, the area lies outside the proposed settlement boundary for Calne (Cells G4- 6, H4- 6).</p> <p>d) A 12 unit scheme, in close proximity to (c) and approved by 14/ 03053/ OUT and 15/ 07282/ REM, has also commenced. Some of the properties have been allocated postal addresses by the Council. By virtue of the criteria in Table 8.1, this site should be within a settlement. However, the area lies outside the proposed settlement boundary for Calne (Cell J6).</p> <p>The proposed alterations to a number of settlement boundaries are therefore not correctly related to the criteria by which they should be drawn. This error applies to a number of very significant developments within Wiltshire. There should therefore be a complete revisit of all the settlement boundaries to ensure that the criteria of Table 8.1 are being correctly applied.                      There should therefore be a complete revisit of all the settlement boundaries to ensure that the criteria of Table 8.1 are being correctly applied. For the avoidance of doubt these representations seek the following, as part of the reassessment of all the settlement boundaries to ensure correct application of the principles in Table 8.1 of the Housing Topic Paper on settlement boundaries:                      the inclusion of the Land East of Oxford Road, Calne (SN118GRat SU 00 6 722; see plan 1726- P01 [within attached document) within the revised settlement boundary for Calne. This represents an objection to the boundary as proposed on the grounds that the development is commenced, and that the principles of Table 8.1 of the Settlement Boundary Topic Paper have been incorrectly applied (Cells G4- 6, H4- 6);</p>			

Appendix Q - Schedule of representations

	<p>the inclusion of Land North of 270 Oxford Road, Calne (SN118AP at SU 00 4 719; see plan 2062- 100 Rev B [within attached document]) within the revised settlement boundary for Calne. This represents an objection to the boundary as proposed (Cells G6, H6). The grounds for this objection are this site is surrounded by commenced development (under permissions N/ 11/ 03524/ OUT &amp; 15/ 05831/ REM and 14/ 03053/ OUT &amp; 15/ 07282/ REM) that should already be included in the settlement by virtue of the criteria in Table 8.1 of the Settlement Boundary Topic Paper. The site itself has recently been granted permission for residential development (16/ 05334/ FUL) and it would now be illogical to exclude the site from the revised settlement.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The proposed new settlement boundary for Amesbury seeks to include built and commenced residential development that is physically related to the settlement, but which excludes areas of open space. However, the boundary that has been drawn is historic and fails to consider construction at King's Gate that has commenced pursuant to planning permissions granted in 2016 and 2017. Unless this boundary is brought up to date so that it is accurate, the plan will not form a sound basis against which to assess future planning applications.</p> <p>The proposed new settlement boundary for Amesbury needs to be updated so that it reflects the full extent of built and commenced residential development that is physically related to the settlement of Amesbury.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	It is essential for the examining planning inspector to understand the full extent of development that has been permitted and taken place at King's Gate, Amesbury.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Policy H3 identifies the allocation of two sites at Durrington for a total of 60 units to assist with delivering the housing requirements of the Amesbury Community Area and the South Wiltshire Housing Market Area. However, as the Amesbury Community Topic Paper (which forms part of the evidence base underpinning the draft Wiltshire Site Allocations Plan) fails to consider the potential for the existing Wiltshire Core Strategy strategic allocation at King's Gate, Amesbury, to accommodate additional development, it cannot be concluded that the plan's strategy represents the most appropriate strategy, which is a requirement of paragraph 182 of the NPPF. Consequently, policy H3 of the plan has not been justified and is unsound.</p> <p>The Amesbury Community Topic Paper demonstrates that SHLAA site S1013 was excluded from further consideration at stage 2a of the site assessment process because it had been permitted / completed.</p> <p>However, whilst it is true that SHLAA site S1013 has been the subject of an outline planning permission, the potential of SHLAA site S1013 site to accommodate additional dwellings has not been considered or assessed. Consequently, the sustainability merits of accommodating additional development at an under-construction strategic allocation and the sustainability merits of accommodating additional development here relative to the allocations at Durrington (and other settlements) in the draft Plan, have not been considered. In the absence of such consideration, it cannot be concluded that policy H3 of the draft Plan represents the most appropriate strategy, and so the plan has not been justified and is unsound. Policy H3 should be amended to include an allocation of up to 75 units at King's Gate, Amesbury.</p>			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		It is essential for the examining planning inspector to understand and consider the additional development potential that exists at one of the strategic allocations within the Wiltshire Core Strategy, how this potential can assist with the delivery of Wiltshire's housing requirements and how the sustainability merits of this option compares to the options being pursued by the Council through the draft plan.			

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3091</a>	<b>Consultee</b> Mr and Mrs Dallas	<b>Agent</b> Mr Ian Woodward-Court Plainview Planning Ltd	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1137549	<b>Person ID:</b> 1137554	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		2.8		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Paragraph 2.8 and 3.2; and section 6 of the WHSAP sets out the rationale for using settlement boundaries.          “TheWCS [Wiltshire Core Strategy] uses settlement boundaries as a policy tool for managing how development should take place.”          Whilst we appreciate that the WCS has been found previously sound and adopted we do have concerns over the use of settlement boundaries if the development plan is to be flexible and respond to rapid change (NPPF 14).          Settlement boundaries are a blunt instrument. It is important to note that the phrase “settlement boundary” (or derivatives) are not found at all in the NPPF.          Part of the problem of settlement boundaries is that it is a binary approach to an issue that is generally subjective and open to interpretation. An example of this is apparent in Wood v Secretary of State for Communities and Local Government [2015] EWCA Civ 195 (09 February 2015):          “thesettlement boundary as defined did not accord with the inspector's assessment of the extent of the village on the ground”(para 12);          “the inspector had misdirected himself because he had wrongly treated the boundary of the village as defined in the Local Plan as being determinative of the issue whether the proposed development was in the village” (para 19).          That particular case was about infilling in the green belt, but nevertheless it highlights the common disparity between an arbitrary settlement boundary and facts on the ground.          To ensure that the WHSAP is effective and sound we seek an acknowledgement about the subjective nature of a settlement boundary:          After paragraph6.2 insert:          “The Council acknowledge that the settlement boundary methodology involves an element of subjective assessment. This can lead to occasional anomalies which could impact upon future planning applications and neighbourhood plans. In such cases we invite additional evidence to inform a more detailed local review as part of a planning application or neighbourhood plan process. Such a review will be carried out in accordance with the agreed methodology and assess whether a site or property adjacent to a settlement boundary should have reasonably been included”.          Such a change will ensure that the WHSAP remains responsive and accurate.</p>

		<b>Person ID:</b> 1137549	<b>Person ID:</b> 1137554	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Topic Paper 1		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Section 3 - "Best Practice Review" of Topic Paper 1: Settlement Boundary Review Methodology is a sensible approach. Learning from the successes or failures of other authorities is sensible.</p> <p>The first cited case study is Winchester City Council. The Topic Paper notes that Winchester draws the boundary "tightly around built form". However, no reasoning is given for choosing Winchester and no real assessment is made whether their approach is effective. This lack of rationale and reasoning means that the methodology is not justified and the WPAS is unsound.</p> <p>It is worth noting that statistics from PINS between April 2016 to March 2017 show that Winchester City Council lost 47% of planning appeals. This is significantly above the national average of 30% and suggests that the LPA are struggling to defend or correctly interpret their own development plan. A tightly draw settlement boundary could reasonably be part of the issue.</p> <p>It is a similar case with Kettering. 54% of appeals were allowed between April 2016 and March 2017. This council too is described as having a "boundary drawn tightly around built form".</p> <p>Interestingly, the Purbeck case study notes that the "boundary must be logical, easily identifiable and (normally) follow property boundaries and permanent features". This is seemingly a more flexible approach. Purbeck only have 38% of appeals allowed.</p> <p>To ensure the WHSAP is sound we ask that:</p> <p>a. A further review of other LPA settlement boundaries is undertaken with a clear selection and performance criteria set with a view to establishing a more robust methodology; or</p> <p>b. The Purbeck approach is followed ensuring that the settlement boundary is logical, easily identifiable and applied flexibly.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Table 4.7 notes that 3,633 “windfall” homes will be provided as part of the housing supply. There is a concern that drawing settlement boundaries so tightly will strangle towns and villages. In turn, this will stop small-scale infill and backland development proposals. Such development is vital to ensure windfall targets are met. To ensure the WHSAP is justified, we ask that the Inspector has before him a list of historic windfall sites and whether such sites were inside or outside the historic settlement boundary.</p>

		<b>Person ID:</b> 1137549	<b>Person ID:</b> 1137554	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		8.4		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>At paragraph 8.4 an acknowledgement is made that no formal site visits have been made in the preparation of the settlement boundaries. As already set out in the Wood v SoS case above there has to be some subjective, on-the-ground assessment of settlement boundaries. Otherwise anomalies will arise.</p> <p>The lack of definition, resolution and width of the proposed settlement boundary line and the WHSAP maps makes it very difficult to undertake any precise review or apply the line consistently. The proposed blue line is wider than many homes. See attached Sheet A.</p> <p>Paragraph 7.20 acknowledges that there was some debate on what extent of garden and curtilage to include.</p> <p>“...the revised settlement boundary review methodology will include the curtilage of a property that relates more closely to the built environment, e.g. a garden), or has limited capacity to extend the built form of the settlement in terms of scale and location”</p> <p>However, this revised approach has not been applied consistently.</p> <p>By way of an example we would like to draw the Inspector’s attention to Appendix A: Amended settlement boundaries / Marlborough Community Area / Ramsbury.</p> <p>We have undertaken an analysis of a snapshot of Ramsbury to demonstrate that the methodology is not being applied consistently and results in anomalies. See attached Sheet A.</p> <p>It is clear that the currently excluded properties do not represent “Isolated development that is physically detached from the settlement”. Indeed, several of the excluded properties form an intrinsic part of the historic settlement. This is evidenced on Sheet A</p> <p>1) Weconsider that the WHSAP is not justified until a formal, on-the-ground sense check of the settlement boundaries is made.</p> <p>2) Weconsider that a high resolution map is released or an online mapping portal made available to allow a closer examination of the settlement boundary line. Without this the WHSAP is not justified.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3095</a>	<b>Consultee</b> Mr D Lohfink CG Fry & Son Builders  <b>Person ID:</b> 449489	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Settlement Boundary Review				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>[See attached representation on the settlement boundary review and land in Hindon]</p> <p>I am writing on the Company's behalf, to provide representations on your authority's draft Housing Site Allocations Plan, now subject to formal consultation. As you may know, CG Fry &amp; Son is an award winning, well-regarded, family-owned regional house-builder, with a current pipeline of development across the south west.</p> <p>In Wiltshire, we are active at two sites located at Kingston Farm, Bradford-on-Avon and the former Hill Brush Company site in Mere. We are soon to start up another site at Silver Street, Caine, have recently completed our Hindon Lane, Tisbury site and have an interest in land in Hindon (known as Chicklade Road or East Street).</p> <p>Regarding the Hindon site, we are currently progressing an intended development scheme of new homes and community facilities In the village (one of only 3 higher-order village settlements within the Tisbury Community Area flagged for new housing development in the adopted Core Strategy (beyond infill windfalls and such like) and within this part of the Housing Market Area. Over the past few years, we have had meetings and discussions with your Officers including Andrew Bidwell, Sarah Hughes and (more recently) Lucy Minting. Ms Minting is the Link Officer for Hindon village where the community is reasonably well advanced in work on a "preferred options" consultation draft of its Neighbourhood Plan. CG Fry is working closely with Hindon's Neighbourhood Plan Group (NPG) in order to bring forward the site in which we have an interest (an Option Agreement). The site is located between East Street and the Chicklade and Chilmark Roads and is known either as "East Street" or "Chicklade Road". It lies immediately south of (and bordering) the Wessex Ridgeway public footpath network. The site is known to your authority as SHLAA site number 3157 and it is illustrated on the LPA's maps as a potential housing site along with two other SH LAA sites in the village. It is understood that, following its previous round of consultation, the two other sites have been dropped as potential sites by the NPG.</p> <p>CG Fry takes a close interest, as you would expect, in strategic planning, neighbourhood planning and development housing land supply issues, alongside economic, demographic and market issues. At the heart of what the LPA is seeking to achieve with the draft Site Allocations DPD lies the primary need to ensure that housing is delivered across the county in accordance with the Core Strategy and to ensure an appropriate level of housing delivery.</p> <p>Just this week, you will be aware that Central Government has once again highlighted its frustration with housing delivery and the way housing supply and demand figures are derived and used by local planning authorities. The Rt. Hon Sajid Javid MP's statement for DCLG last week described the way (housing) numbers work as simply not good enough.</p> <p>Turning to the LPA's draft Site Allocations DPD, it is noted that proposals revise existing settlement boundaries across the county to ensure the delivery of homes across the plan period in order to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas, over the period to 2026. CG Fry is, however, concerned that:</p> <p>there is an underlying tension between the adopted Core Strategy and the consultation draft Site Allocations DPD insofar as the draft DPD proposes comparatively minor, and at times almost inconsequential settlement boundary changes for the Local Service Centres and Large</p>			

Appendix Q - Schedule of representations

	<p>Villages. In our view, this approach is too shy, too restrictive and tightly-drawn resulting in inevitable constraint to and frustration of much-needed housing delivery right across the region;</p> <p>It needs to be borne clearly in mind that the adopted Core Strategy contains a settlement and housing strategy based on good evidence that was tested at public examination and, following all of that, maintained a green field housing requirement for the Tisbury Community Area (excluding Tisbury town). Much of that identified and tested need has yet to be fulfilled and there remains a significant residual requirement for the rural Tisbury area (that can realistically only be directed to Hindon, Ludwell and/or Fovant). That identified need cannot simply have evaporated and opportunities need to be explored more fully at Hindon and the other higher order settlements;</p> <p>there is a need for the document to take a bolder approach in general- it is too timid and conservative in its approach;</p> <p>if the settlements across the Housing Market Areas are constrained by an approach of tight preservation of existing settlement boundaries (effectively, 'development limits'), especially in the rural villages and swathes of the region affected by AONB designation, then much-needed and evidenced new housing of any meaningful quantum, will be stymied, and potentially redirected to larger settlements, to the detriment of the rural area;</p> <p>Paragraph 3.6 states that the Plan must identify a number of greenfield sites involving the loss of countryside in order to achieve Plan objectives. Land within settlements, in particular previously developed land, is acceptable for housing redevelopment, in principle. A realistic allowance is included for this source of new housing when calculating the scale of land supply. However, within a predominantly rural area, there is a limited amount of previously developed land (especially in more sustainable locations). Not only are such opportunities limited, they can also be difficult to rely on as a large proportion of overall supply. In our view, that position needs to be taken into account by a more emboldened approach to accommodating housing in the Local Service Centres and Large Villages; and</p> <p>Paragraph 6.7 states that neighbourhood plans submitted subsequently to the Site Allocations DPD will still be able to consider their own settlement boundary through the neighbourhood planning process. Your draft document states that once a future neighbourhood plan is 'made', its settlement boundaries will then supersede those in the Plan. In our view, that approach is too timid and comes as something of an after-thought in the way the consultation draft is worded. The important role that neighbourhood plans may have in ensuring housing delivery in the county ought to be highlighted at the core of the document - and it is certainly a key plank of planning for new housing, delivering housing numbers, driving growth and maintaining and promoting a thriving regional economy. The Housing Market Areas may well need to focus and rely upon neighbourhood planning, if new housing is to be achieved at anything like the numbers required.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The draft Wiltshire Housing Allocations Plan Wiltshire seeks to allocate new sites for housing across Wiltshire to ensure sufficient housing supply over the period to 2026. The plan has been developed in conformity with the Wiltshire Core Strategy (WCS) which requires Wiltshire to accommodate a minimum of 42,000 additional dwellings over the twenty year plan period.</p> <p>In Wiltshire, three separate housing market areas (HMAs) exist with housing delivery divided into the East Wiltshire HMA, North and West Wiltshire HMA and South Wiltshire HMA. Within these areas, the majority of growth is proposed at the defined principle settlements, market towns and local service centres, as set out at the Settlement Hierarchy at Table 2.2 of the draft plan. The next category below this is "large villages" where the proposed level of development is defined as "development limited to that needed to help meet the housing needs of settlements and improve housing opportunities, services and facilities".</p> <p>This draft plan contains an indicative distribution of housing requirements for the Community Areas at Table 2.3, and whilst it is stated that the vast proportion of housing needed over the plan period has already been built or is committed, the draft plan proposes a number of policies to allocate additional housing land. The level of housing proposed is not in excess of the minimum housing required in Wiltshire and allows for no buffer to ensure a flexible and competitive housing land market.</p> <p>A clear objective set out in the NPPF is that the planning system should significantly boost the supply of housing (Paragraph 47), however, the draft Wiltshire Housing Site Allocations Plan is not seeking to deliver in excess of its minimum housing requirements and includes no buffer in relation to housing land supply. In this respect, the plan is not fulfilling these requirements and hence is not considered to have been positively prepared. Furthermore, it should be highlighted that the Inspector in his report into the examination of the WCS allowed the plan to proceed to adoption but this was on the basis of an early review of the Core Strategy so as to re-assess housing requirements. To date, there has been no progress by the Council on a review of the WCS.</p> <p>As previously identified, this emerging plan states that the level of development at large villages should be enough to meet the housing needs of settlements and improve housing opportunities, services and facilities. The previously published Wiltshire Housing Site Allocations Development Plan Document (DPD) Initial Site Options, published in February 2015, had identified a housing requirement of 91 dwellings for the Marlborough Community Area (Eastern HMA) which comprises the large villages of Aldbourne, Baydon, Broad Hinton and Ramsbury. However, in the draft Site Allocations Plan no housing is proposed for allocation at these settlements despite in the case of the village of Ramsbury, an identified housing need exists.</p> <p>A Housing Needs Survey was undertaken by Ramsbury and Axford Parish in 2015 and the survey acknowledged that there had been no significant new development since the 1970s and hence the vitality and viability of the village is suffering as a result. The survey results confirmed that the majority of respondents (92%) are in support of new housing in Ramsbury and Axford whilst the most popular level of new homes to be provided in the Parish is for between 11-20 homes (36.1%). It also identified a need for housing of all tenures within the Parish with the need considered greatest in relation to affordable homes for young people (76.3%) and family homes for rent (48.1%), in the format of both</p>			

Appendix Q - Schedule of representations

	<p>detached and semidetached housing. The survey showed that of the 22 households in need of housing, 18 would require public assistance in order to achieve their required housing and are therefore considered in 'housing need'.</p> <p>Since this survey has been undertaken, there have been no significant development proposals at Ramsbury and the Council's most up to date Housing Land Supply Statement (March 2017) identifies only 4 dwellings to come forwards at Ramsbury in the 5 year period 2016 - 2021, none of which would be affordable. The failure to identify any housing provision at Ramsbury in this emerging plan is therefore contrary to its identified settlement strategy in providing for development to meet their housing needs. This position is also at odds with provisions of the NPPF which states at paragraph 55 that "to promote sustainable development in rural areas, housing should be located where it will enhance or maintain rural areas". A continued policy approach of severe housing restraint will only continue to serve to challenge the vitality and viability of existing services and facilities at the village. The plan is not therefore considered consistent with national policy is not sound.</p> <p>Rectory Homes previously submitted a planning application for land at Newton Road, Ramsbury, which proposed 25 residential dwellings and included 40% (10 units) affordable housing provision. The application was refused by the Local Planning Authority and was the subject of an appeal (Ref: APP/Y3940/W/16/3156940) in 2017. Although dismissed, this was effectively due to the Council currently maintaining a 5 year housing land supply whilst the Inspector did not identify any adverse impacts that would preclude development on this site. This site (see attached accompanying plan) remains available, suitable and achievable for residential development and has been assessed by the Council in its evidence base (Site 1087 - Land rear of Penllyne) as suitable for residential development, subject to potential constraints. Its development offers the opportunity to deliver a high quality residential scheme that will make an important contribution towards Ramsbury's identified local housing need.</p> <p>In light of the above, we would respectfully request that it is considered for inclusion as an allocation in this pre-submission draft plan given the absence of any intention at the local level to prepare a Neighbourhood Plan, and so that it can ensure fulfilment of its own identified settlement strategy and to be consistent with National Policy so that the plan can be consider sound.</p> <p>As previously identified, the plan needs to aim to increase housing provision overall to ensure delivery of more than the minimum housing requirement in Wiltshire as a whole to provide a buffer and thus provide for competition in the market. The proposed growth strategy is wholly reliant upon the principal settlements but growth should be distributed to benefit all settlements and ensure their continued vitality. This includes making provision of housing sites at large settlements such as Ramsbury, where there is an identified housing need which can only be delivered through the development of larger sites if affordable housing is to be secured.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Trowbridge				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This is my response to the Consultation Document relating to the Draft Wiltshire Housing Site Allocations Plan.</p> <p>COMMUNITY AREA TOPIC PLAN FOR TROWBRIDGE – JUNE 2017</p> <p>A. GENERAL COMMENTS</p> <p>Wiltshire Council’s guide to the consultation process states that a Government appointed Planning Inspector will be required to consider whether the plan is:-</p> <p>“Legally compliant,” to which I say I am not suggesting that it is unlawful; and</p> <p>To assess whether the Local Plan is “sound”, namely that it is (inter alia):-</p> <p>(i) “Positively prepared” – i.e. does it seek “to meet objectively assessed development and infrastructure requirements”. I believe the Planning Authority has sought to do that objectively, but I believe it has failed to achieve that outcome, as detailed below;</p> <p>(ii) “Justified – i.e. the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence.” I also believe that the Planning Authority has failed on this test, as detailed below.</p> <p>B. EFFECT OF BREXIT</p> <p>The Wiltshire Core Strategy requirement of at least 42,000 new homes to be built between 2006 and 2026 has obviously been determined by reference to expected population trends over that period, based on projected births and deaths, and also net immigration predicted over that period. Just prior to the start date of the Core Strategy period eight new countries joined the EU in 2004, and the number of immigrants soared, with about half of the net total number coming from the EU at the time of the referendum.</p> <p>The UK is now in the process of leaving the EU, and a government White Paper has indicated that we will leave the single market, and freedom of movement will cease from March 2019. As a result net immigration from the EU of EU citizens coming to the UK to settle should reduce considerably, and the projected figures for house building will also start to reduce over the remainder of the period of the Core Strategy.</p> <p>I hope the Government will now start to consider this point and amend its planning policy relating to the expected figures for house completions by 2026 to reduce the figures over the whole country, including those for Wiltshire. I think it is a matter that Wiltshire Council should raise with Central Government of its own accord, before ever more green fields are paved over for housing which will not be required over the next 9 year period.</p> <p>C. BROWNFIELD SITES WITHIN TROWBRIDGE</p> <p>It is clearly unfortunate and misleading that the Community Area Topic Paper for Trowbridge makes no mention of brownfield sites within Trowbridge, particularly the former Bowyers site in view of its size, and the former West Wilts Council Offices.</p> <p>I note that the Wiltshire Council (June 2017) Topic Paper 2 – Site Selection Process Methodology mentions “In principle, brownfield sites carry a presumption in favour of development and establishing an allocation for development is unnecessary. Higher priority is accorded to developing brownfield sites.”</p>				

#### Appendix Q - Schedule of representations

However, in practice this is not very helpful, because, as with any other prospective building site, the owner of the brownfield site must wish to develop the land, but often with higher associated costs to remove industrial and toxic waste for example. I accept that the owner of a brownfield site cannot legally be forced to develop his land for house building if he does not wish to do so, or if he does, at a time to suit any Council timetable. He might wish to have commercial premises on his land, which obviously makes it difficult to add a figure for house building on brownfield sites in total.

There is also a problem relating to a Victorian sewage system at the Bowyers site, a further possible costly deterrent to development until a full assessment of the potential of the site can be established, which may or may not include housing.

I understand it might be possible for the owner or the Council to seek a government grant for development of the former Bowyers site, but I have been informed by a Planning Officer that such grants are not very substantial, which obviously might lessen the incentive to build at the moment. Thus, I accept it is difficult to count on development of this site soon, however much the public of Trowbridge wish to see it developed. Nevertheless I still think it is remiss of the Council not to refer to brownfield sites in the Community Area Topic Paper for Trowbridge, because of the expectations of the general public noted in the press.

However, there is an application pending for housing on the former West Wilts Council offices, which might add to the quota required for Trowbridge.

#### D. INCLUSION OF SITES IN THE HOUSING SITE ALLOCATIONS PLAN

The Formal Pre-Submission document indicates that the Draft Plan proposes 800 dwellings in the Trowbridge area of its Housing Market Area (HMA), but only 80 in the Chippenham area. There is no explanation of this huge differential between these two Community Areas, despite the fact that they are both Principle Settlements in the joint North and West Housing Market Area. I presume these figures are the reason for the reference by the Wiltshire Times on 28/7/17 to the Site Allocation Plan choosing land that builds on greenfields and for putting 700 of the 900 houses planned for North and West Wiltshire in Trowbridge.

I will go into more detail about the selection criteria and the methodology of deciding whether sites are more sustainable, less sustainable or should be rejected later, but I would remind the Council that Trowbridge does have two particular problems which have an impact on whether land is suitable to build on. The first is a large Green Belt area to the whole of the north-west of Trowbridge to protect land between Trowbridge and Bradford-on-Avon. The other is a large bat population with roosting grounds in Biss Wood and Green Lane Wood, which has excluded building on three potential sites, covering a large area.

This means a lot of greenfield potential sites around Trowbridge cannot be used for housing. Building requirements therefore need to be reviewed for the Trowbridge Community Area. If the allotted quota of housing cannot reasonably be met in Trowbridge, Wiltshire Council has the power to redistribute the requirement to say Chippenham or other areas of Wiltshire, because it is a county plan which needs to deliver 42,000 new homes between 2006 and 2026, or perhaps less due to Brexit, over the whole county.

I would point out that it is not a reasonable response to the above difficulty for the Council to confirm the draft plan with sites that break the golden rule of the Core Strategy to keep Trowbridge and its satellite villages separated by open countryside, to protect the character and identity of these villages. Two of the six sites put forward would break that principle, namely Site 613 and Site 298. Site 3565 severely restricts the area of open country between Southwick and Trowbridge, but on a very rare heritage landscape which must not be lost. (Please see below)

If other areas of the county cannot fulfil Trowbridge's shortfall at present, the further identification of sites could be delayed because the Core Strategy still has until 2026 to run. The Council should also lobby the government regarding the likely effect of Brexit.

#### E. METHODOLOGY OF SELECTION OF PREFERRED SITES

The Consultation Document on the Draft Plan set out the process for selecting sites at settlements, which is derived from Wiltshire Council (June 2017) – Topic Paper 2: Site Selection Process Methodology. This sets out the various stages of the process of selection, which includes references to 12 sustainability objectives against which each site appraisal is set, to divide the sites into "more" or "less" sustainable site options. The objectives are set out in full in the Topic 2 Paper on the selection methodology.

I accept that the above part of the selection methodology is a reasonable way to assist the decision making process for the purpose of trying to achieve a standard objective approach to the assessment of the information relating to the various possible sites. It is likely to sustain objectivity between the various Planning Officers involved in the process.

However, the next part of the process, i.e. to score the various aspects of each site, I am not happy with, because of lack of transparency in some of the detailed analysis expected under the Topic Paper on the methodology. Under the heading "5. Stage 3: Sustainability Appraisal", the

## Appendix Q - Schedule of representations

paper states at 5.2 “The sustainability appraisal framework contains 12 objectives that cover the likely environmental, social and economic effects of development.” Under that is Table 5.1 Sustainability objectives, which lists the 12 objectives.

5.3 states – “The performance of each site has been assessed against each of the objectives using a set of decision aiding questions. Each option was then scored under each objective based on a generic assessment scale from major positive to a major adverse effect.” However, the set of decision aiding questions is not included in the Paper. This is a major omission because those questions are an important part of the decision making process for assessing examination of each of the objectives, which are themselves the main reason for the Sustainability Appraisal, which determines the outcome of whether the site is “more sustainable” or “less sustainable”. This leaves a lot of scope for an individual subjective assessment, which would not be transparent regarding the decision.

Under paragraph 5.3 the Generic Assessment Scale is set out. The Generic Assessment Scale refers to various options available to determine if the site option is likely to have an adverse effect or a positive effect. For instance it shows that a “major adverse effect” means “Option likely to have a major adverse effect on the objective with no satisfactory mitigation possible. Option may be inappropriate for mixed use development”. However, there are no examples on the face of the document of factors which might constitute a major adverse effect, or indeed, examples of what could amount to satisfactory mitigation.” Further scope for individual subjective assessments as a result.

Under “moderate adverse effect” as a further example, the scale states “Option likely to have a moderate adverse effect on the objective with difficult or problematic mitigation”, but again no assistance in defining what “difficult or problematic mitigation” could amount to in the balancing of the evidence available. The scale also deals with positive effects in a similar fashion.

The weight given to each item of information is crucial to the outcome of the decision, but not enough guidance is given to assist in the task at each step of Sustainability Appraisal which goes to the very heart of the final decision whether to include the site in the preferred sites for Trowbridge, but equally for any other site in Wiltshire to be added to the local plan. As a result each assessment is, in fact, subjective, depending upon which Planning Officer applies the Assessment Scale, and the weight he gives to each part of the information available.

On page 9 of the Wiltshire Housing Site Allocations Plan – Sustainability Appraisal Report there is some further advice under Assessment of Sites in relation to the use of the Generic Assessment Scale. It states “As a general rule of thumb, site options with five or more moderate adverse effects result in a site being considered ‘less sustainable’; and site options with four or less moderate adverse effects are considered ‘more sustainable’”. That is clearly aimed at reaching decisions objectively, but that did not save Site 3565 at Southwick Court from being chosen as a site for development, when it had five moderate adverse effects, together with a “range of minor effects”, and was considered ‘less sustainable’. The Council, through its officers, took a subjective view to ignore its own policy advice because the site would support the building of a large number of houses, identified as a major beneficial effect. That trumped the multitude of moderate and minor adverse effects completely.

This is clearly wrong in principle, and permits decisions inconsistent with the general methodology described in the Council document Topic Paper 2: Site Selection Process Methodology at 5.4, which claims “the appraisals used common evidence and the process therefore ensured a transparent, consistent and equitable comparison of all reasonable alternatives”.

The above points demonstrate the Draft Plan submitted is not “sound”, because it is not “positively prepared” or “justified”. It should not therefore be adopted.

### F. COMMENTS RELATING TO FOUR OF TROWBRIDGE SITES INCLUDED FOR DEVELOPMENT

I would say at this point again that the Core Strategy states that open countryside should be maintained between Trowbridge and its satellite villages to protect the separate and distinct identities of the villages as separate communities, yet at three of the sites listed below this Core Strategy principle has been ignored.

#### SITE 3565 – LAND EAST OF THE A361 AT SOUTHWICK COURT

I have already referred to this application in paragraphs D4 and E8 above, in relation to matters of principle and the use of the Appraisal Methodology, but more information is needed to show that Site 3565 is categorically a glaring example of where not to build.

(a) The Assessment Results from the Sustainability Appraisal states there are five “moderate” adverse effects which have been identified. No explanation is given of why they are considered ‘moderate’, a deficiency of the appraisal methodology. In summary they are:-

(i) loss of habitat and disturbance to bats in the area; site options further than walking distance of Biss/Green Land Woods are a lower risk to bat activity, but require some mitigation (no information is given about what the mitigation would be);

Appendix Q - Schedule of representations

- (ii) loss of best and most versatile agricultural land, “which would likely be problematic to mitigate” (It would be if you build on it!)
- (iii) The need to build a local primary school and possibly secondary schools.
- (iv) Southwick Court lies immediately to the south of the site which contains a number of important heritage assets (my emphasise) including a medieval moat, Grade II\* listed farmhouse and a post-medieval water meadow system. The fields are open in character and exhibit a strong relationship with Lambrok Stream and Southwick Court.
- (v) The site functions as a green infrastructure corridor (my emphasis throughout). Development would lead to an urbanising effect. Mitigation of landscape and visual impacts could be problematic.
- (b) Most people would think the above points were sufficient to ring alarm bells at the Sustainability Appraisal stage, especially the admission that the site contains a number of important heritage assets, which includes the water meadow system associated with Southwick Court, the loss of which would be problematic to mitigate in relation to the landscape and visual impacts. There is reference to the need for a Heritage Impact Assessment and an archaeological assessment to be obtained. Bearing in mind that the Council was aware of the obvious heritage importance of this site, you might think these reports would have been obtained at that stage and included with the Sustainability Appraisal rather than wait until a building application eventually is made if the site is included in the plan.
- (c) To add to the above problems the Assessment identifies a range of what were assessed as minor adverse effects, amongst which is a flood risk at flood level Zone 1. A Flood Risk Assessment would also be required because of the inter-relationship between surface water/fluviial flows into the River Biss Catchment. I would not consider this a minor adverse effect, because Lambrok Stream has overflowed on several occasions in recent years, with some gardens in Southwick flooded. I also know from my own experience of walking my dog on these water meadows both from the Southwick side and the Trowbridge side on an almost daily basis that all the fields very quickly become saturated because they are on clay and have poor drainage qualities, particularly the fields adjacent to Boundary Walk, Trowbridge which would be on the proposed site.
- (d) Not surprisingly the end result of the appraisal was a finding that the site is less sustainable in this area of search. Yet it was pushed forward to the next stage in the face of all the above problems/adverse effects because it would yield a large number of houses as a building site, despite contrary advice in the Housing Site Allocations Plan – Sustainability Appraisal Report, and it was added to the final list of sites.
- (e) The final assessment shown in Appendix G of the Community Area Topic Paper for Trowbridge.
- (i) This has alot more comments about the Historic Environment under that heading. The Council has obviously accepted the significance of this site, as it states “The Grade II\* Listed Southwick Court Farmstead (and its setting) would need to be appropriately protected. A HIA would be needed in order to support and inform any subsequent development proposals. Bearing in mind the significance of this asset and the surrounding historic water meadows, the net development area of the site would likely need to be significantly reduced in order to accommodate appropriate mitigation measures..... The character of the area will therefore help to retain the high significance of this heritage asset”. This contradicts the Sustainability Appraisal Appraisal, where it states “mitigation of landscape and visual impacts could be problematic.” So the final assessment report is saying that mitigation is possible, even though the original report did not, and says the site would need to be significantly reduced to accommodate mitigation, without explaining what the measures of mitigation are, but is relying on the character of the site itself to retain the high significance of the site, which presumably means alot of mitigation measures are needed, but the beauty of the area will mask the damage to this heritages site which is going to occur. It is a bizarre argument, which I do not accept as reasonable.
- (ii) Under the heading of “Landscape” it is stated “The site functions as a green infrastructure corridor, The fields are large and open in character and exhibit a strong relationship with Lambrok Stream (and its flood plain/Southwick Court/ ... In a wider sense, the site should be considered within the context of surrounding farmland and the Southwick Country Park which serve as a buffer between the Town and village of Southwick. Development of the land would therefore alter the area in terms of historic landscape character as the site of medium sensitivity to change. The land exhibits surviving and legible post-medieval water meadow features. Such features are considered to be rare and are often significant contributors to local landscape character.” (my emphasis)
- (iii) Comment
  - (a) To which I would say – Is nothing sacred, as long as the Council can obtain a large area of building land! They are quite prepared to damage the historic character of this landscape, even though it is sensitive to change and rare at that. This is the outcome, even in the Council’s own words. Furthermore the character of Southwick Hall would be altered because of the altered landscape.
  - (b) Although no Heritage Impact Assessment has been produced by the Council in relation to Southwick Court and the surrounding landscape, the advice of Historic England(South West) Office was sought by the Planning Officer involved in a pending Panning Application

Appendix Q - Schedule of representations

(17/03269/OUT) relating to land on the other side of these water meadows linked to Southwick Court, adjacent to Wynsome Street at Southwick. From Historic England's reply dated 26th April 2017 I have summarised their advice/comments regarding Southwick Hall and its environs. The author of the letter states that within the historic buildings list the buildings are referred to as "Southwick Court Farmhouse and Gatehouse and Bridge, a late 16th and early 17th century farmhouse and moated manorial farmstead" and referred to in the description as "of considerable importance", and that "the wider setting incorporates water meadows". The list adds "This connection of the manorial site and wider countryside context remains intact and is highly significant." (my emphasis). Historic England's reply adds "The significance of the water meadows, in my view, is partly supported by its landscape and visual relationship to the manorial centre. This relationship works both ways. The significance of the II\* buildings is partly supported by their relationship with the historic landscape elements noted above. Encroachment by development upon the water meadows would result in an adverse change in setting to the manorial centre, leading to a loss of significance to the II\* buildings. Essentially you would be losing some of their context". (my emphasis)

(c) THE IMPACT OF THE FLAWED APPRAISAL METHODOLOGY ON THIS SITE

(i) It is not possible to see from the appraisal reports why the five moderate adverse effects and range of minor adverse effects were labelled "moderate" and "minor" respectively. The methodology topic paper does not show how the hierarchy of adverse and beneficial effects has been calculated from the facts available to reach a conclusion, or a method of approach to establishing that aim, which is a crucial part of the appraisal system applicable to all sites.

(ii) Even if the Council did not have access to the letter from Historic England regarding this site (produced for another planning application), it is clear from the final assessment that this site is in a rare and significant historic landscape, which the Council has acknowledged, and would be altered in terms of its historical context, i.e. damaged, by any development on it, which cannot be mitigated by appropriate measures according to the Sustainability Appraisal (although the final assessment suggests it might be – another mystery of the methodology approach). In any event I would deem the heritage aspect of this particular site to be a major adverse effect on the objective, with no satisfactory mitigation possible, which would mean its removal from the list of possible sites. I also note here that the Council failed to follow its own advice outlined above in paragraph E8, by failing to acknowledge that by their assessment of a site option with five or more moderate adverse effects normally results in a site being considered "less sustainable".

(iii) The Council's decision is illogical, but I would suggest it is also irresponsible in view of the damage which they know will be inflicted on this historic and rare landscape, which is termed "highly significant" in the list relating to historic buildings. Such rare landscapes should be preserved intact, in much the same way as old trees are preserved under Tree Preservation Orders, for the benefit of future generations.

(d) My own perspective of Site 3565

(i) The Core Strategy principle of maintaining open countryside between Trowbridge and Southwick would be further eroded by this site being developed. The gap between the two on the A361 would be reduced to about 150 yards from the edge of the proposed site to the first houses on the ribbon development just within the boundary of Southwick.

(ii) There is already a 12.5 hectare Solar Park adjoining a proposed housing development on land adjacent to Wynsome Street, Southwick. There would only be a very thin strip of land left between the pending application off Wynsome Street, if granted, and the solar park combined, before reaching the southern border of site 3565. That border would come extremely close to Southwick Court, destroying its open aspect in the surrounding water meadows and seriously impacting on the historical context of the Grade II\* listed manorial centre, as observed by Historic England. Any screening by tree planting along the southern border of site 3565 would take years to grow, and would not diminish the loss of land so close to Southwick Court in any event. Site 3565 is a large parcel of land, which, even if it were not an historic and rare landscape, would be a large area of open countryside to be lost between Trowbridge and Southwick, to the detriment of the principle of separation of Southwick and Trowbridge, but also North Bradley as well.

(iii) I would add that access, for public use, to open countryside in agricultural use, closely adjoining villages and towns, which is easily accessible via existing ancient footpaths, is a community benefit which is essential for local residents' mental and physical wellbeing. This is well documented fact, which fits with the principle of open countryside between settlements being maintained. There are lots of footpaths over these water meadows, which are very well used by dog owners, including my wife and I, and families with children, and people walk between Southwick and Trowbridge over the footpaths rain or shine on a regular daily basis, as well as connecting North Bradley to this open area in the same way. The area serves three communities, and any further loss of this attractive open water meadow landscape would be a great loss to a lot of people. This rare landscape should be preserved for future generations and not be developed for housing.

Appendix Q - Schedule of representations

- (iv) The Council's cavalier decision does not stand up to common sense scrutiny, or to scrutiny under the unsound appraisal system relating to sustainability. It demonstrates the misuse of the appraisal methodology, which in turn demonstrates that the draft plan is not sound. This site should be rejected for future development.
2. SITE 3260 – UPPER STUDLEY
- (a) This site is clearly part of the water meadows associated with Lambrok Stream and Southwick Court, from the description in the final appraisal document in Appendix G of the Trowbridge Topic Paper.
- (b) All that I have said about Site 3565 i.e land at Southwick Court applies equally to Site 3260. It is part of the open field system and water meadows surrounding Southwick Court, and should also have been rejected during the selection process for the same reasons applicable to Site 3565.
- (c) It is also part of the rural buffer zone between Trowbridge and Southwick, one of the main principles of the Core Strategy. It should remain part of that rural buffer, as part of the greater heritage landscape surrounding Southwick Court, which is very rare, and increases its significance.
3. SITE 613 – ELM GROVE FARM (INCORPORATING SITE 248)
- (a) Site 613 is at present a rural buffer zone between Trowbridge and North Bradley, and Drynham Lane which adjoins it is a quiet rural country lane, bordered by mature hedgerows on both sides, containing numerous mature trees. There are two fields about halfway along its length, with trimmed hedgerows completely enclosing them, which are sometimes used for grazing of sheep, opposite a small enclave of houses on the opposite side of Drynham Lane with back gardens up to the boundary of one edge of White Horse Business Park. Part of the lane is bordered by the railway line, which acts as a natural boundary to the area, with its own hedgerow area. Also site 248 (now incorporated into site 613) has frequently been used to graze cows, which can be seen through the gateway.
- (b) Consequently, the whole of Drynham Lane has a rural feel to it; partly because of the rural setting of hedgerows, but also because around two sides of one of the fields used for sheep the road, which is single track, has not been formally adopted, and is unsurfaced. This means there is very little through traffic to and from the A363. As a result the road is very quiet, with very little traffic other than vehicles very occasionally driving to and from the small housing enclave of about 7 houses, from the Dursley Road end of Drynham Lane. There are also occasional lorries from the same direction taking materials to a reclamation yard just beyond and under the railway bridge.
- (c) As a consequence of the above conditions many local people use Drynham Lane as a safe place to cycle, road run, walk their dogs and walk along Drynham Lane to the footpath along the edge of the railway line to White Horse Business Park (presumably to work and home). This is why it serves so well as a rural buffer zone on the edge of Trowbridge and between Trowbridge and North Bradley.
- (d) This is why I take issue with the description the Sustainability Appraisal uses, stated to be a "minor" adverse effect, namely "Whilst the loss of greenfield land would alter the character and appearance of the site and introduce a moderate urbanising effect to the south-west of Trowbridge, such impacts would be tempered through appropriate mitigation measures designed to bolster greenspace/habitat connectivity", whatever the mitigation measures mean in plain English, rather than "planning speak". Any documents used for consultative purposes should be understood by the man the street, with explanations if the purpose is unclear.
- (e) The results of using this site for development would certainly not be a moderate urbanising effect. Once again the methodology of the appraisal scheme calls into doubt the description of "moderate", and how that "urbanising effect" could be considered a "minor adverse effect" in relation to this particular site again calls the appraisal methodology into doubt.
- (f) The loss of the two fields to housing opposite the small existing enclave, where sheep are sometimes grazed, would completely destroy the rural aspect of Drynham Lane because of the loss of the open area behind the trimmed hedgerow at that point, especially if as mentioned in the final Appendix G assessment that "upgrades", presumably meaning widening of the road and adoption of the unsurfaced section, would be required to Drynham Lane for a new access onto the A363, and that a bus lane should be included. To allow two buses to pass on Drynham Lane would require considerable widening of this single track road, which would mean the destruction of large sections of hedgerows down its whole length, or most of it, depending where access to the A363 is gained.
- (g) As stated in (d) above the loss of greenfield land would definitely alter the character and appearance of the site, but to call this "a moderate urbanising effect to the south-west of Trowbridge" is a complete misnomer. The area around Drynham Lane would lose its rural aspect by the loss of land, but also the loss of a lot of hedgerow for widening, and would cease to be a country lane i.e Drynham Lane itself, and the activities for which it is now used would be impossible, because it would become much busier. This aspect of the change in use would be exacerbated,

#### Appendix Q - Schedule of representations

because Drynham Lane would be used as a regular shortcut from County Way to the roundabout at Spitfire Retail Park, via Dursley Road, to miss heavy traffic on Bradley Road, which is bolstered by vehicles using the B+Q site and Spitfield Retail Park itself.

(h) I would again call into question the appraisal methodology regarding this being defined as a “minor adverse effect”. It would completely change this quiet rural corner of Trowbridge into a major road, with loss of a lot of hedgerows and loss of its present non-vehicular use, as well as destroying a lot of greenfields.

(i) I also fear for the protected wildlife species mentioned in the final Appendix G assessment, namely Great Crested Newts, Grass Snakes and various species of protected bats. The Sustainability Appraisal states that hedgerows and trees are significant in the landscape, and provide wildlife corridors linking habitat features within White Horse Business Park and neighbouring land, should be retained, protected and enhanced. If Drynham Lane is widened considerable areas of hedgerow along the length of the road will be destroyed, and to replace it elsewhere on the site with the equivalent mature growth including trees, would take years of growth. Meanwhile what is the effect upon the wildlife?

(j) Another very important issue, which has been ignored by the Council in the Draft Plan, is the first guiding principle of Core Policy 29 that the villages around Trowbridge, which all have separate and distinct identities, must be protected by maintaining open countryside between them. This principle has been ignored because Site 613 joins North Bradley to Trowbridge on the A363 Bradley Road at the Spitfire Retail Park roundabout, as shown by road signs each side of the roundabout, one stating North Bradley and the other Trowbridge. Site 613 is also outside the Trowbridge Settlement Boundary.

(k) This situation is exacerbated further by the inclusion of Site 298 in the Draft Plan as a more sustainable site, which immediately abuts Site 613 across the A363 at White Horse Business Park, and on its western edge also, immediately abuts the settlement boundary of North Bradley. That would therefore leave no open countryside at all between Trowbridge and North Bradley.

(l) I will say more about Site 298 below, but Site 613 ie Elm Grove Farm should be rejected as a site for development in the Draft Plan for the reasons stated above.

#### 4. SITE 298 – LAND OFF A363 – WHITE HORSE BUSINESS PARK

(a) This site once again breaks the principle under the Core Strategy of leaving open countryside between Trowbridge and its satellite villages, but worse still seems to be a cynical attempt to artificially move the existing boundary of Trowbridge along its southern edge.

(b) The Sustainability Appraisal Assessment states “(this site) Although essentially situated on the very edge of the town, access to local/town centre services and facilities would be achievable via bus services available along the A363/Bradley Road.” In the final assessment under Appendix G that has become “The site is situated in an accessible location on the edge of the town.” These statements are not correct because, using a 2 ½ inch Ordinance Survey map, at present the southern edge of Trowbridge follows the civil parish boundary of Trowbridge, which abuts Boundary Walk in Trowbridge (not surprisingly), next to Site 3565, and continues east along the northern edge of site 613. So even site 613 is beyond the edge of the present town and settlement boundary of Trowbridge. The impression given is that Site 298 is within Trowbridge town itself ie inside the settlement boundary, but right up to the outer edge of it, yet still inside the settlement boundary.

(c) In fact Site 298 is completely outside Trowbridge settlement, within the civil parish of North Bradley (still using the Ordinance Survey map) and is directly adjoining North Bradley and the settlement boundary of North Bradley. It would be joined onto North Bradley village and, to all intents and purposes, would be part of North Bradley village. The allocation of this site in the Plan is despite paragraph 2.10 of the Community Area Topic Paper for Trowbridge, which states as follows. “When considered in the light of Table 2.2, the issues relating to the supply of housing are focused on the town itself.” (meaning Trowbridge). The Large Villages in the Community Area have already delivered more than was expected and hence there is no need to look at these areas for the purpose of allocating land for housing.”

(d) So, North Bradley has already delivered its share of building land, yet site 298 is really being added to North Bradley, not Trowbridge, since the site is in the civil parish of North Bradley and is joined directly onto North Bradley village, and it is certainly not part of Trowbridge as matters stand at present. In other words the boundary of Trowbridge has been artificially moved by the Council to allow building in an area where there is not expected to be any more house building, namely North Bradley.

(e) The final Assessment in Appendix G confirms the reality of the situation by stating under the heading “Landscape” – “The site is characterised in landscape terms by a distinctive pattern of mature and semi mature hedgerows and trees. The land also helps provide a setting for the village of North Bradley. Any subsequent layout should retain these important features and provide additional landscape scale planting with mature species to ensure the identity of North Bradley, as a separate village is strengthened”. But it will not be strengthened because this will not be open countryside as deemed by the Core Strategy, and will be associated with North Bradley, because in reality it will be part of North

Appendix Q - Schedule of representations

	<p>Bradley. The identity of North Bradley as a separate village would not have been an issue if the Council had not added Site 298 to its Draft Plan. This is adding building to North Bradley by the back door.</p> <p>(f) Thus Site 298 should also be rejected for the reasons stated above. In addition, it follows that if Site 613 is rejected then Site 298 should also automatically be rejected, because of what is stated in the Consultation document on the Draft Plan about the Core Strategy regarding settlement boundaries. It states: - "In simple terms a "settlement boundary" is the dividing line or boundary between areas of built/urban development (the settlement) and non-urban or rural development – the countryside. In general, development within the boundary is in principle acceptable, whereas development outside the boundary with limited exceptions, is not acceptable."</p> <p>(g) Site 298 is outside the settlement area of Trowbridge, and should therefore expect to be rejected in the above circumstances. This applies equally to Site 613, but the juxtaposition of both these sites exacerbates the problem, and completely closes the gap or buffer between Trowbridge and North Bradley. This demonstrates that Wiltshire Council is getting more and more desperate in its search for areas to build on around Trowbridge, and making unacceptable decisions to achieve it. There should now be a pause, to give time to think more rationally about the issue, because the Plan period does not expire until 2026.</p> <p><b>G. SUMMARY OF CONCLUSIONS</b></p> <p>I believe four out of the six draft allocations for Trowbridge should be rejected and removed from the list of sites for the various reasons given above, but also in particular, because the methodology process used for the allocation is not "sound". It is not sound because it is not "positively prepared" because the strategy fails to meet objectively assessed development and infrastructure requirements. It also cannot be "justified" because it has failed to produce the most appropriate strategy when considered against the reasonable alternatives.</p> <p>I believe it has been shown that Trowbridge cannot justifiably provide the number of building sites required to provide the housing allocation given within the Wiltshire Core Strategy. In these circumstances the Planning Authority should look elsewhere in the county for extra provision to comply with the central government requirement of 42,000 new homes, since it is operating on a county basis.</p> <p>In addition Wiltshire Council should lobby the Government now, to consider a reduction of national quotas for each county because of the likely reduction in requirements for housing as a result of Brexit.</p> <p>There should also be a pause in relation to the planning allocation for Trowbridge regarding the short fall in sites at present, to see what transpires on the Ashton Court Urban Extension strategic site regarding further planning permissions, because the Plan period does not expire until 2026.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Housing Need and Delivery: Approach of the HSAP</p> <p>The adopted Core Strategy (CS) requires the delivery of 24,740 dwellings within the North West HMA over the plan period to 2026. As confirmed by Core Policy 2, and the CS Inspector, these numbers are minimum housing requirements, and provide a flexible and positive basis to provide for the needs of the area (#40, IR December 2014).</p> <p>Topic Paper 4 – Developing Plan Proposals (June 2017) ('TP4') confirms that given the difficulty in predicting rates of development with a high degree of certainty, and the current issues with delivery on large mixed use sites within Wiltshire, that the Council feel "it is prudent to look beyond the required minimum to achieve a five year housing land supply and ensure a continuity of housing supply, as well to help ensure choice and competition in the market" (#1.5). Whilst this principle is agreed, it is important to consider this alongside the fact that the requirements are minimums, and thus even if a five year housing land supply (5HLS) was secure, this should not preclude the identification of additional housing allocations where this would result in sustainable development and meet the broad objectives of the Framework to boost housing delivery (#497) and provide flexibility to adapt to rapid change (#74).</p> <p>In this respect, it is material to note that the recently published consultation, 'Planning for the right homes in the right places', proposes a national methodology for the calculation of housing need. Wiltshire's Local Plan Review has commenced, and this will be captured by the changing national guidance. This indicates that the annual housing requirement for Wiltshire is likely to increase from 2,100 dwellings per annum; to 2,227 dwellings per annum<sup>1</sup>. The Local Plan Review should therefore allow for an increase in housing delivery above the minimum CS requirements over the remaining plan period, and as such, the inclusion of a housing land supply buffer represents an effective way of ensuring that the Council is able to transition smoothly to the anticipated increased requirement and to continue to demonstrate a deliverable housing land supply moving into the Local Plan Review.</p> <p>The North West HMA has been unable to consistently demonstrate a 5HLS since adoption of the Core Strategy; with the supply fluctuating regularly. This is emphasised by the reliance upon large strategic sites to meet the housing requirements, and the delay in a number of these coming forward in a timely manner. The shortfall in delivery over the plan period to date is demonstrated by the simple analysis of the housing requirement versus completions: (See attached Table 1)</p> <p>Over the first ten years of the plan period, the North West HMA has a 614 unit shortfall. This is significant, both in respect to absolute housing delivery, but also as a result of the associated failure to deliver affordable housing.</p> <p>In terms of housing land supply moving forward, TP4 confirms that against the Council's current housing land supply assessment, that the North West HMA will fail to demonstrate an adequate housing land supply (referenced by 5HLS) from 2024/25 (see Table 2.3); with a progressive decrease in supply from the Council's current estimate of 6.62years.</p> <p>It is important to note that the Council's purported housing land supply is being challenged, with detailed evidence recently made to a conjoined s78 public inquiry contending that the actual housing land supply for the North West HMA falls between 3.29-4.35 years<sup>2</sup>. The outcome of this</p>			

#### Appendix Q - Schedule of representations

Inquiry, and the publication of the Council's fully updated (to 2017 base date) housing land supply evidence, will be available prior to the Examination of the dHSAP, and as such, we do not undertake a detailed 5HLS assessment for the purposes of these representations. However, in light of the above, this adds emphasis to the need to ensure that draft allocations are identified to be delivered in the short/medium term. The 'resilience testing' undertaken by the Council, as set out at #2.11 TP4, and the recognition that there have been, and continue to be issues with delivery of larger strategic sites within the plan area is supported. The delay with the delivery from large sites is an important component identified in the current challenges to the 5HLS, and as such, the identification of sites which are able to come forward with minimal 'obstacles' to delivery will provide a crucial element in maintaining supply moving forward. This is also evident when reviewing the Council's trajectory (p26, TP4), which requires a significant increase in delivery of units from 2019-2022:

(See attached Figure 2)

Trowbridge is the 'Principal Settlement' within the North West HMA, and identified as the key location for growth over the plan period. The adopted CS is based upon a vision predicated upon sustainable patterns of development focussing on the settlement hierarchy (IR, #16). Trowbridge is identified as a location to support the delivery of 6,810 dwellings over the plan period; which as identified by Core Policy 29 seeks to strengthen its role as the principal service centre, whilst delivering a balance of housing and employment opportunities in association with improved infrastructure.

The dHSAP confirms that the only CS strategic allocation within Trowbridge, Ashton Park, is failing to deliver the quantum of development initially anticipated within the CS. Ashton Park was previously anticipated to deliver 2,600 dwellings by 2026; however, this has fallen to 1,600 within the plan period (#5.24, TP4). However, it is noted that this number is predicated on delivery commencing in 2019/20, which is unlikely given that the outline planning application is still pending.

Trowbridge's housing land supply is identified below:

(See attached Table 3)

This results in a requirement to identify additional site allocations for the town of 2,020 units to meet the adopted CS requirement. The dHSAP identifies six draft allocations providing for an indicative 800 units (draft Policy H2).

This results in a shortfall in housing delivery within Trowbridge of 1,220 units; which at the adopted CS Policy 43, would include 366 affordable units.

This shortfall is significant and, when considered against Trowbridge's role as the Principal Settlement, emphasises the importance of the six draft allocations in delivering the needs of the town, and that the allocated land should be efficiently delivered to increase delivery of units as appropriate based upon the site specific constraints.

Waddeton Park disagree with the Council's Sustainability Appraisal in relation to Site 3565, discussed further below, but in principle support the Council's position that the identified housing need and the scale of the shortfall within Trowbridge is exceptional.

1 CLG: Application of Proposed Formula for Assessing Housing Need, with contextual data (published 14th September 2017)

2 APP/16/3162997: 3.29 utilizing Sedgfield+20% and 4.35 utilizing Liverpool+5%

Introduction

These representations have been prepared and submitted by Savills on behalf of Waddeton Park Ltd ('Waddeton Park') in response to Wiltshire's draft Housing Site Allocation Plan (dHSAP) and supporting evidence base.

Waddeton Park support the production of the dHSAP, and the Council's proactive approach to identifying housing sites to meet the housing needs and associated infrastructure of the area over the remaining plan period. The allocation of sites represents the most effective strategy in ensuring the delivery of long term sustainable development across the plan area.

The adopted Core Strategy sets the overriding framework for the HSAP; identifying the requirement to deliver 42,000 homes over the plan period 2006-2026. These are disaggregated into three housing market areas (HMA), and subsequently to individual settlements or rural areas within the local area strategies. This representation relates to the 'North West HMA', and specifically the settlement of Trowbridge.

Waddeton Park are bringing forward proposals on Land South of Trowbridge; which is identified as a draft allocation under Policy H2.6 (Southwick Court). The area is shown on the plan attached at Appendix 1. The allocation of the site under Policy H2.6 is supported.

In bringing forward proposals, a substantive evidence base is being compiled; including a full suite of ecology surveys, geotechnical surveys, geophysics, heritage impact assessment, landscape and visual assessment and transport assessment. These emerging documents inform this

Appendix Q - Schedule of representations

	<p>representation, and provide further detail beyond the Council’s site assessment, to confirm with greater certainty the impacts and benefits of development on the draft allocation site.</p> <p>The emerging development proposal for the draft allocation site includes around 180 dwellings, a new primary school, open space, sustainable drainage and strategic landscaping. The most up to date draft Concept Plan is enclosed at Appendix 2 for reference.</p> <p>The production of an effective, deliverable and positively prepared HSAP will not only provide a solid foundation for tackling the housing crisis but it will also ensure a planned and coordinated delivery of development alongside the necessary supporting infrastructure. This is only achievable if the HSAP submitted for examination is sound. Consistent with the National Planning Policy Framework (the “Framework”) (March 2012), to be sound, the HSAP must be:</p> <p>Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements;</p> <p>Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;</p> <p>Effective– the plan should be deliverable over its period and based on effective joint working on cross- boundary strategic priorities; and</p> <p>Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.</p> <p>It is recognised that as part two of Wiltshire’s Local Plan that elements of soundness were examined as part of the Core Strategy; for example the identification of the housing requirement, the spatial strategy, settlement hierarchy and disaggregation of the housing requirement to community areas and settlements. These are therefore only considered as appropriate within this representation.</p> <p>Conclusions and recommendations</p> <p>Waddeton Park support the allocation of site H2.6 within the dHSAP, and are committed to bringing forward a comprehensive, high quality development on the site to provide a short-medium term opportunity to meet the housing needs of Trowbridge, and Wiltshire; alongside meeting the urgent need for primary school provision within the town.</p> <p>The emerging Concept Plan is informed by a detailed evidence base, and as such, this Representation seeks to provide greater certainty in respect to the impacts and benefits of development on the allocation site, than is provided within the dHSAP evidence base.</p> <p>Notwithstanding the ‘ranking’ of the sites, the significant residual housing requirement for Trowbridge, combined with its role as a Principal Settlement, alongside the inclusion of a primary school to meet an identified urgent need, demonstrates the exceptional circumstances currently pressing on the need for development sites within the town; and demonstrates that the public benefits of development on the allocation site are significant for the purposes of paragraph 134.</p> <p>It is recognised that the Council are intending to submit the dHSAP to Examination in early 2018, and the intention to proceed with the Plan expediently is supported. Should the Council wish for a greater degree of certainty in respect to the development proposals discussed within this Representation, we would welcome the opportunity to discuss the drafting of a Statement of Common Ground for submission to the Examination process, identifying potential modifications to the draft allocation policy, for the Inspector to consider.</p> <p>These could include the allocation policy identifying the requirement to deliver a primary school on site and a new pedestrian access to Southwick Country Park. It would also provide an opportunity to provide a greater level of detail on the allocation plan; for example, identifying the location of woodland planting along the southern and western edges, the extent of the northern wildlife corridor, and the extent of the area on the western side (as demarcated by the former water meadows) which should be identified as informal or formal green space.</p>

Appendix Q - Schedule of representations

representation, and provide further detail beyond the Council’s site assessment, to confirm with greater certainty the impacts and benefits of development on the draft allocation site.

The emerging development proposal for the draft allocation site includes around 180 dwellings, a new primary school, open space, sustainable drainage and strategic landscaping. The most up to date draft Concept Plan is enclosed at Appendix 2 for reference.

The production of an effective, deliverable and positively prepared HSAP will not only provide a solid foundation for tackling the housing crisis but it will also ensure a planned and coordinated delivery of development alongside the necessary supporting infrastructure. This is only achievable if the HSAP submitted for examination is sound. Consistent with the National Planning Policy Framework (the “Framework”) (March 2012), to be sound, the HSAP must be:

Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements;

Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

Effective – the plan should be deliverable over its period and based on effective joint working on cross- boundary strategic priorities; and

Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

It is recognised that as part two of Wiltshire’s Local Plan that elements of soundness were examined as part of the Core Strategy; for example the identification of the housing requirement, the spatial strategy, settlement hierarchy and disaggregation of the housing requirement to community areas and settlements. These are therefore only considered as appropriate within this representation.

Conclusions and recommendations

Waddeton Park support the allocation of site H2.6 within the dHSAP, and are committed to bringing forward a comprehensive, high quality development on the site to provide a short-medium term opportunity to meet the housing needs of Trowbridge, and Wiltshire; alongside meeting the urgent need for primary school provision within the town.

The emerging Concept Plan is informed by a detailed evidence base, and as such, this Representation seeks to provide greater certainty in respect to the impacts and benefits of development on the allocation site, than is provided within the dHSAP evidence base.

Sections 2 and 3 have considered the range of matters which have been considered as part of the site allocation process. The sustainable location of the site, and the accessibility of local services and facilities is clear; and the ability of the site to deliver housing to meet the significant residual shortfall within Trowbridge, a Principal Settlement, is acknowledged.

Waddeton Park’s emerging evidence base on the site’s ecological, landscape and heritage baseline, and the ability to further refine development proposals for the site has enabled a more comprehensive assessment of the potential impacts and enhancement opportunities of development on the site.

Accessibility: the site is sustainably located on the edge of Trowbridge, a Principal Settlement, and has a significant range of local services and facilities within walking and cycling distance. In addition, the existing public transport services available for future residents provides regular and frequent bus services around Trowbridge, and to the key destinations of Bath, Frome, Chippenham, Salisbury and Warminster. There are a significant number of opportunities to enhance existing pedestrian linkages into the residential area to the north, and as identified on the Concept Plan, opportunities for creation of a new pedestrian crossing to Southwick Country Park.

It is recognised that the Council are intending to submit the dHSAP to Examination in early 2018, and the intention to proceed with the Plan expediently is supported. Should the Council wish for a greater degree of certainty in respect to the development proposals discussed within this Representation, we would welcome the opportunity to discuss the drafting of a Statement of Common Ground for submission to the Examination process, identifying potential modifications to the draft allocation policy, for the Inspector to consider.

These could include the allocation policy identifying the requirement to deliver a primary school on site and a new pedestrian access to Southwick Country Park. It would also provide an opportunity to provide a greater level of detail on the allocation plan; for example, identifying the location of woodland planting along the southern and western edges, the extent of the northern wildlife corridor, and the extent of the area on the western side (as demarcated by the former water meadows) which should be identified as informal or formal green space.

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Assessment: Site 3565                  The draft allocation, H2.6 is supported by a site assessment (Table G.9, Trowbridge Community Area Topic Paper) and the Sustainability Appraisal (Table F.15, <i>ibid</i>).</p> <p>The site assessment represents the starting point for the allocation process, and as such, we comment on this below. These comments are informed by our emerging evidence base for the development site, and the draft Concept Plan (Appendix 2).</p> <p><b>Biodiversity</b></p> <p>A full suite of ecology surveys have been undertaken on the allocation site, including: Phase 1 Habitat Survey, bat activity surveys and static detector surveys alongside systematic surveys for badgers, otters and water voles. These surveys have confirmed that there are no ecological features or protected habitats which would preclude development of the allocation site.</p> <p>It is recognised that consideration must be given as to how development on the allocation site responds to the potential for housing developments within the area to have adverse effects on the Bath and Bradford on Avon Bats Special Area of Conservation (SAC).</p> <p>The draft Habitats Regulations Assessment (dHRA) of the dHSAP has determined that the allocation site would not have likely significant effects on its own, but could have an in-combination effect with other housing sites through increased recreational pressure on more sensitive woodland to the east of Trowbridge: where the SAC bats' roost.</p> <p>The allocation site is outside of any recognised Core Areas (which are defined in the Wiltshire Council's guidance note on planning applications and the SAC), but recent evidence shows there is a possibility of them being used by Bechstein's bats. A tree roost has recently been discovered in a tree on the northern edge of Southwick Country Park, and they are likely to forage and commute through the landscape around their roosts. Habitats within and around the allocation site that are potentially important for SAC bats include streams and hedges around field boundaries, mature trees with roosting potential, the moat and buildings within the Southwick Court complex, and Axe and Cleaver Lane on the eastern boundary.</p> <p>The emerging development proposals, illustrated on the Concept Plan, have been informed by a full season of bat surveys carried out between April and October. Whilst the surveys did not detect Myotis bats in large quantities (relative to the other bat species that were recorded), it is possible that some of these recordings were of Bechstein's bats. The surveys included walked routes across the fields as well as routes along the boundaries. As might be expected, the vast majority of activity was recorded along field boundaries, with relatively little activity recorded over open fields. Where there was activity over open fields it was mostly of the larger bat species (noctules and serotines). There are several mature trees with potential roosting features, but no tree roosts were recorded (although it is acknowledged that bats can move between tree roosts frequently and seemingly unoccupied sites may support a roost).</p> <p>The field boundaries are largely tall hedgerows with mature trees, which provide high quality foraging and commuting habitat for bats. A lighting survey of the allocation site showed that there is little light pollution, except in locations along the site's northern boundary where it adjoins the</p>				

## Appendix Q - Schedule of representations

existing adjacent development and a streetlit road. The open fields are species-poor and agriculturally improved, but the fact that they are grazed by cattle enhances their quality for foraging bats.

One of the first principles embedded into the design strategy was the provision of dark, landscaped buffers along the retained hedgerows and field boundaries. These are at least 10-16 m wide and cover all of the important features identified in the SCOPS and through field surveys. Where the main access road passes through hedgerows, it has been sited to minimise habitat loss and the emerging lighting strategy avoids illumination at these sensitive points by street lights. In addition to the landscaped buffers, the emerging development design offers large areas of habitat creation to the south to benefit bats and other wildlife. This area includes provision for woodland planting, open grassland and ponds. The emerging proposals include significant areas of green recreational space, above the Council's usual policy standards. This ensures that the allocation site provides additional opportunities to support recreational activities. The Concept Plan confirms the opportunities to link with existing PROWs and informal recreation routes within the locality, and confirms the provision of a new pedestrian link across the A361, providing a direct link into Southwick Country Park. As confirmed in the dHRA, these measures represents a key objective in directing recreational pressure to Southwick Country Park, with the proposals on the allocation site providing an opportunity to improve a number of the elements identified as opportunities for improvement within Figure 6 of the dHRA.

The design responds appropriately to the constraints and opportunities related to bats and meets the requirements set out for the dHRA presented in the dHSAP). The full set of technical information to be submitted with the application will enable the Council to complete their Habitats Regulations Assessment of the planning application.

Introduction

The adopted Core Strategy sets the overriding framework for the HSAP; identifying the requirement to deliver 42,000 homes over the plan period 2006-2026. These are disaggregated into three housing market areas (HMA), and subsequently to individual settlements or rural areas within the local area strategies. This representation relates to the 'North West HMA', and specifically the settlement of Trowbridge.

Waddeton Park are bringing forward proposals on Land South of Trowbridge; which is identified as a draft allocation under Policy H2.6 (Southwick Court). The area is shown on the plan attached at Appendix 1. The allocation of the site under Policy H2.6 is supported.

In bringing forward proposals, a substantive evidence base is being compiled; including a full suite of ecology surveys, geotechnical surveys, geophysics, heritage impact assessment, landscape and visual assessment and transport assessment. These emerging documents inform this representation, and provide further detail beyond the Council's site assessment, to confirm with greater certainty the impacts and benefits of development on the draft allocation site.

The emerging development proposal for the draft allocation site includes around 180 dwellings, a new primary school, open space, sustainable drainage and strategic landscaping. The most up to date draft Concept Plan is enclosed at Appendix 2 for reference.

The production of an effective, deliverable and positively prepared HSAP will not only provide a solid foundation for tackling the housing crisis but it will also ensure a planned and coordinated delivery of development alongside the necessary supporting infrastructure. This is only achievable if the HSAP submitted for examination is sound. Consistent with the National Planning Policy Framework (the "Framework") (March 2012), to be sound, the HSAP must be:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross- boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

It is recognised that as part two of Wiltshire's Local Plan that elements of soundness were examined as part of the Core Strategy; for example the identification of the housing requirement, the spatial strategy, settlement hierarchy and disaggregation of the housing requirement to community areas and settlements. These are therefore only considered as appropriate within this representation.

Conclusion and recommendations

Appendix Q - Schedule of representations

	<p>Waddeton Park support the allocation of site H2.6 within the dHSAP, and are committed to bringing forward a comprehensive, high quality development on the site to provide a short-medium term opportunity to meet the housing needs of Trowbridge, and Wiltshire; alongside meeting the urgent need for primary school provision within the town.</p> <p>The emerging Concept Plan is informed by a detailed evidence base, and as such, this Representation seeks to provide greater certainty in respect to the impacts and benefits of development on the allocation site, than is provided within the dHSAP evidence base.</p> <p>Sections 2 and 3 have considered the range of matters which have been considered as part of the site allocation process. The sustainable location of the site, and the accessibility of local services and facilities is clear; and the ability of the site to deliver housing to meet the significant residual shortfall within Trowbridge, a Principal Settlement, is acknowledged.</p> <p>Waddeton Park's emerging evidence base on the site's ecological, landscape and heritage baseline, and the ability to further refine development proposals for the site has enabled a more comprehensive assessment of the potential impacts and enhancement opportunities of development on the site.</p> <p>Ecology: a full suite of ecological surveys have been conducted, and these have raised no significant constraints to development on the allocation site. The emerging Concept Plan confirms that the mitigation measures identified within the dHRA can be accommodated on the allocation site.</p> <p>It is recognised that the Council are intending to submit the dHSAP to Examination in early 2018, and the intention to proceed with the Plan expediently is supported. Should the Council wish for a greater degree of certainty in respect to the development proposals discussed within this Representation, we would welcome the opportunity to discuss the drafting of a Statement of Common Ground for submission to the Examination process, identifying potential modifications to the draft allocation policy, for the Inspector to consider.</p> <p>These could include the allocation policy identifying the requirement to deliver a primary school on site and a new pedestrian access to Southwick Country Park. It would also provide an opportunity to provide a greater level of detail on the allocation plan; for example, identifying the location of woodland planting along the southern and western edges, the extent of the northern wildlife corridor, and the extent of the area on the western side (as demarcated by the former water meadows) which should be identified as informal or formal green space.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Assessment: Site 3565                  The draft allocation, H2.6 is supported by a site assessment (Table G.9, Trowbridge Community Area Topic Paper) and the Sustainability Appraisal (Table F.15, <i>ibid</i>).</p> <p>The site assessment represents the starting point for the allocation process, and as such, we comment on this below. These comments are informed by our emerging evidence base for the development site, and the draft Concept Plan (Appendix 2).</p> <p><b>Historic Environment</b></p> <p>The site assessment identifies two key heritage assets one within, and one near to the allocation site. The undesignated former water meadows lie within the western part of the allocation site, and the Grade II* Listed Southwick Court farmhouse, and the separately listed gatehouse and bridge lie outside of the allocation site. The site assessment correctly takes a precautionary approach to development on the draft allocation in light of these heritage assets, and requires a Heritage Impact Assessment (HIA) to be undertaken to inform any subsequent development proposals. Waddeton Park has commissioned a HIA, and this emerging document has informed the Concept Plan.</p> <p>First, to inform the HIA, LiDAR analysis and a geophysical survey (Appendix 4) have been undertaken which confirms the extent of the remnant earthworks of the former water meadows within the allocation site. This confirmed that the remnant features are limited to the western third of the allocation site; bordering the A361 (see p.19, Appendix 4). These remaining earthworks are very highly eroded and in poor condition, with little remaining visible to the naked eye. Their significance as a heritage asset is identified as low both in their own right and in the contribution they make to the architectural and historical interest of Southwick Court.</p> <p>Notwithstanding this, the Concept Plan proposes no built development upon the former water meadows, with these areas identified within formal and informal open space, and as such, retained in situ. The access road will need to cross the feature, and a programme of archaeological mitigation will be appropriately implemented. Opportunities to provide enhancements, for example, through the provision of signage to better reveal the presence of the remnant features, could be included within development proposals.</p> <p>Secondly, a detailed assessment of the setting of Southwick Court farmhouse, gatehouse and bridge has been undertaken, and this has been a key influence on the design proposals for the site. This confirmed that the key setting of the listed buildings comprises their location within the historic moated enclosure, which is very insular in its setting with very limited views of the historic buildings from beyond. The main frontage of the house faces to the south-east, across its garden and away from the development. The key setting of the listed buildings will not be harmed by development as set out in the Concept Plan.</p> <p>In respect to the wider setting, the farmhouse was not designed within a parkland setting (its location is due to the former medieval moated manor), and its current agricultural setting is heavily influenced by the post-war development at Trowbridge and Southwick.</p> <p>The emerging proposals ensure appropriate consideration is given to the listed buildings and their setting. When considering the degree of harm which would arise as a result of the proposals shown on the Concept Plan, the following are material:                  A large majority of the land held within the landowner's control will remain in agricultural use;</p>				

## Appendix Q - Schedule of representations

The insular setting of the listed buildings, their enclosure and limited views between the proposed development site and the buildings;  
The clear presence of post-war development in the wider setting;  
The sensitive design of the access road, with siting, construction and lighting all designed to minimise the visual impact of the highway; and  
The opportunities for targeted mitigation; including structural landscaping to the eastern side of the allocation site, and retention of the open setting to the Southwick Court outbuildings to the west.

The detailed design of mitigation can be considered as the proposals for the allocation site come forward, however, as demonstrated on the Concept Plan, there are a range of opportunities for suitable and appropriate mitigation to be identified.

In considering the above issues, the emerging HIA concludes that development in accordance with the Concept Plan, will result in no more than a very small degree of harm to the heritage significance of the Grade II\* Listed Southwick Court farm house and the associated gatehouse and bridge. This level of harm would fall very much at the lower end of “less than substantial harm” as defined by paragraph 134 of the National Planning Policy Framework (NPPF).

In line with paragraph 134, this harm should be weighed against the public benefits of the proposal. As confirmed in Section 1 above, there is a clear and pressing need for additional housing within Trowbridge. In addition, there is an urgent need for additional primary school provision within this area of the town, and as highlighted by the site assessment summary (Step 4), as a result of the ability of the site to “deliver a solution to address deficiencies in local primary school provision and address constraints, then the overall sustainability benefits of development at this location would be significant”.

**Introduction**

The adopted Core Strategy sets the overriding framework for the HSAP; identifying the requirement to deliver 42,000 homes over the plan period 2006-2026. These are disaggregated into three housing market areas (HMA), and subsequently to individual settlements or rural areas within the local area strategies. This representation relates to the ‘North West HMA’, and specifically the settlement of Trowbridge.

Waddeton Park are bringing forward proposals on Land South of Trowbridge; which is identified as a draft allocation under Policy H2.6 (Southwick Court). The area is shown on the plan attached at Appendix 1. The allocation of the site under Policy H2.6 is supported.

In bringing forward proposals, a substantive evidence base is being compiled; including a full suite of ecology surveys, geotechnical surveys, geophysics, heritage impact assessment, landscape and visual assessment and transport assessment. These emerging documents inform this representation, and provide further detail beyond the Council’s site assessment, to confirm with greater certainty the impacts and benefits of development on the draft allocation site.

The emerging development proposal for the draft allocation site includes around 180 dwellings, a new primary school, open space, sustainable drainage and strategic landscaping. The most up to date draft Concept Plan is enclosed at Appendix 2 for reference.

The production of an effective, deliverable and positively prepared HSAP will not only provide a solid foundation for tackling the housing crisis but it will also ensure a planned and coordinated delivery of development alongside the necessary supporting infrastructure. This is only achievable if the HSAP submitted for examination is sound. Consistent with the National Planning Policy Framework (the “Framework”) (March 2012), to be sound, the HSAP must be:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross- boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

It is recognised that as part two of Wiltshire’s Local Plan that elements of soundness were examined as part of the Core Strategy; for example the identification of the housing requirement, the spatial strategy, settlement hierarchy and disaggregation of the housing requirement to community areas and settlements. These are therefore only considered as appropriate within this representation.

**Conclusions and recommendations**

Appendix Q - Schedule of representations

	<p>Waddeton Park support the allocation of site H2.6 within the dHSAP, and are committed to bringing forward a comprehensive, high quality development on the site to provide a short-medium term opportunity to meet the housing needs of Trowbridge, and Wiltshire; alongside meeting the urgent need for primary school provision within the town.</p> <p>The emerging Concept Plan is informed by a detailed evidence base, and as such, this Representation seeks to provide greater certainty in respect to the impacts and benefits of development on the allocation site, than is provided within the dHSAP evidence base.</p> <p>Sections 2 and 3 have considered the range of matters which have been considered as part of the site allocation process. The sustainable location of the site, and the accessibility of local services and facilities is clear; and the ability of the site to deliver housing to meet the significant residual shortfall within Trowbridge, a Principal Settlement, is acknowledged.</p> <p>Waddeton Park's emerging evidence base on the site's ecological, landscape and heritage baseline, and the ability to further refine development proposals for the site has enabled a more comprehensive assessment of the potential impacts and enhancement opportunities of development on the site.</p> <p>Heritage: a geophysical survey undertaken on the allocation site has enabled the extent of the remnant earthworks of the former water meadows to be identified, and subsequently, the Concept Plan confirms that these can be retained in situ. A detailed assessment of the setting of the listed buildings to the south of the site, has confirmed that by virtue of their enclosed nature, visual relationship to the allocation site, separation of the proposed built form from the assets and identified mitigation measures, that the heritage harm falls at the lower end of the "less than substantial" definition set out in the Framework.</p> <p>It is recognised that the Council are intending to submit the dHSAP to Examination in early 2018, and the intention to proceed with the Plan expediently is supported. Should the Council wish for a greater degree of certainty in respect to the development proposals discussed within this Representation, we would welcome the opportunity to discuss the drafting of a Statement of Common Ground for submission to the Examination process, identifying potential modifications to the draft allocation policy, for the Inspector to consider.</p> <p>These could include the allocation policy identifying the requirement to deliver a primary school on site and a new pedestrian access to Southwick Country Park. <b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Assessment: Site 3565                  The draft allocation, H2.6 is supported by a site assessment (Table G.9, Trowbridge Community Area Topic Paper) and the Sustainability Appraisal (Table F.15, <i>ibid</i>).</p> <p>The site assessment represents the starting point for the allocation process, and as such, we comment on this below. These comments are informed by our emerging evidence base for the development site, and the draft Concept Plan (Appendix 2).</p> <p><b>Landscape</b>                  The landscape commentary in the site assessment represents a summary of the 'Site Landscape Assessment' published as part of the Council's evidence base. The commentary makes reference to the remnant earthworks associated with the water meadows. In this respect, we would reference the heritage commentary above, which has been informed by the emerging HIA and associated geophysical report.</p> <p>This confirms that the extent of these features, and as such presents a more detailed understanding of the allocation site for the purposes of the site allocation assessment.</p> <p>In addition to the HIA, a Landscape and Visual Impact Assessment (LVIA) is being prepared to support the emerging development proposals on the draft allocation site. The LVIA provides a robust and detailed assessment of the allocation site to a level of detail which will enable a decision to be taken on the planning application. As such, it provides a greater degree of clarity on the assessment of potential harm and the opportunities for mitigation.</p> <p>Appendix 3 includes a Note produced by Chris Britton Landscape Associates in response to the Council's Site Landscape Assessment. First, it is noted with concern that the Council's assessment has not taken into account its own most recent landscape analysis, West Wiltshire Landscape Character Assessment (March 2007), which provides a more recent and localised analysis than the County Landscape Character Assessment (2005). The 2007 Assessment provides a more site specific appraisal of the existing baseline contribution that the site makes to the local character, and in association with this, the influence that the existing built form of Trowbridge's urban area has on the character of the site, and thus the impact of development. It is also noted that the viewpoint locations shown on the map included within the Site Landscape Assessment are incorrect, and an amended version is included for clarification.</p> <p>The emerging LVIA has identified a significant number of opportunities for landscape mitigation; including enhancement of existing landscape features, such as the northern landscape corridor, a substantial new landscape corridor along the southern and eastern edges of the proposed housing area, retention of the open character of the western side of the allocation site, and creation of a network of pedestrian links throughout the site contained within the green infrastructure. These are illustrated on the Concept Plan.</p> <p>The Council's assessment has not taken into account the potential for mitigation measures to be incorporated into future proposals on the allocation site, and therefore overstates the potential landscape impacts of developing on the allocation site. In contrast to the Council's assessment, the emerging LVIA (as confirmed on the attached noted) concludes that the emerging proposals would not give rise to any</p>				

## Appendix Q - Schedule of representations

unacceptable landscape or visual impacts and that, subject to the incorporation of the proposed mitigation measures, there is no landscape or visual justification as to why the proposed allocation of the site is unsound.

### Introduction

The adopted Core Strategy sets the overriding framework for the HSAP; identifying the requirement to deliver 42,000 homes over the plan period 2006-2026. These are disaggregated into three housing market areas (HMA), and subsequently to individual settlements or rural areas within the local area strategies. This representation relates to the 'North West HMA', and specifically the settlement of Trowbridge.

Waddeton Park are bringing forward proposals on Land South of Trowbridge; which is identified as a draft allocation under Policy H2.6 (Southwick Court). The area is shown on the plan attached at Appendix 1. The allocation of the site under Policy H2.6 is supported.

In bringing forward proposals, a substantive evidence base is being compiled; including a full suite of ecology surveys, geotechnical surveys, geophysics, heritage impact assessment, landscape and visual assessment and transport assessment. These emerging documents inform this representation, and provide further detail beyond the Council's site assessment, to confirm with greater certainty the impacts and benefits of development on the draft allocation site.

The emerging development proposal for the draft allocation site includes around 180 dwellings, a new primary school, open space, sustainable drainage and strategic landscaping. The most up to date draft Concept Plan is enclosed at Appendix 2 for reference.

The production of an effective, deliverable and positively prepared HSAP will not only provide a solid foundation for tackling the housing crisis but it will also ensure a planned and coordinated delivery of development alongside the necessary supporting infrastructure. This is only achievable if the HSAP submitted for examination is sound. Consistent with the National Planning Policy Framework (the "Framework") (March 2012), to be sound, the HSAP must be:

Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements;

Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

Effective – the plan should be deliverable over its period and based on effective joint working on cross- boundary strategic priorities; and

Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

It is recognised that as part two of Wiltshire's Local Plan that elements of soundness were examined as part of the Core Strategy; for example the identification of the housing requirement, the spatial strategy, settlement hierarchy and disaggregation of the housing requirement to community areas and settlements. These are therefore only considered as appropriate within this representation.

### Conclusions and recommendations

Waddeton Park support the allocation of site H2.6 within the dHSAP, and are committed to bringing forward a comprehensive, high quality development on the site to provide a short-medium term opportunity to meet the housing needs of Trowbridge, and Wiltshire; alongside meeting the urgent need for primary school provision within the town.

The emerging Concept Plan is informed by a detailed evidence base, and as such, this Representation seeks to provide greater certainty in respect to the impacts and benefits of development on the allocation site, than is provided within the dHSAP evidence base.

Sections 2 and 3 have considered the range of matters which have been considered as part of the site allocation process. The sustainable location of the site, and the accessibility of local services and facilities is clear; and the ability of the site to deliver housing to meet the significant residual shortfall within Trowbridge, a Principal Settlement, is acknowledged.

Waddeton Park's emerging evidence base on the site's ecological, landscape and heritage baseline, and the ability to further refine development proposals for the site has enabled a more comprehensive assessment of the potential impacts and enhancement opportunities of development on the site.

Landscape: a more detailed, site specific landscape assessment has confirmed that, subject to the identified mitigation and enhancement opportunities being delivered, development on the allocation site would not give rise to unacceptable landscape or visual impacts.

It is recognised that the Council are intending to submit the dHSAP to Examination in early 2018, and the intention to proceed with the Plan expediently is supported. Should the Council wish for a greater degree of certainty in respect to the development proposals discussed within this

Appendix Q - Schedule of representations

	<p>Representation, we would welcome the opportunity to discuss the drafting of a Statement of Common Ground for submission to the Examination process, identifying potential modifications to the draft allocation policy, for the Inspector to consider.</p> <p>These could include the allocation policy identifying the requirement to deliver a primary school on site and a new pedestrian access to Southwick Country Park. It would also provide an opportunity to provide a greater level of detail on the allocation plan; for example, identifying the location of woodland planting along the southern and western edges, the extent of the northern wildlife corridor, and the extent of the area on the western side (as demarcated by the former water meadows) which should be identified as informal or formal green space</p>

<b>Comment ID:</b> <a href="#">3106</a>	<b>Consultee</b> Waddeton Park Ltd  <b>Person ID:</b> 1137560	<b>Agent</b> Miss Felicity Tozer Senior Planner  Savills  <b>Person ID:</b> 1137556	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Sustainability Appraisal: Site 3565 The Site Assessment, discussed above, has been used to inform the Sustainability Appraisal's assessment of the site, and this was used to inform the 'ranking' of the sites as 'more sustainable' and 'less sustainable'. The Sustainability Appraisal, p12, indicates that those sites with five or more moderate adverse effects resulted in the site being considered 'less sustainable' as opposed to a site with four or less moderate adverse effects being identified as 'more sustainable'. It further notes that the distinction between moderate adverse and minor adverse relates to the ability to mitigate against any adverse impacts. Site 3565 scored five moderate adverse impacts, five minor adverse impacts, one minor positive, one moderate positive and one major positive. However, in light of the further evidence compiled by Waddeton Park and the confirmation of the detailed proposals in relation to the allocation site, as set out in Section 2 above, it is clear that the Sustainability Appraisal fails to appropriately consider the mitigation and benefits which can be secured within the allocation site, and the inclusion of a new primary school within the development proposals. It is noted that in order to assess the mitigation and enhancement opportunities which have been identified, that there is a need to provide a degree of certainty in respect to their provision. As such, the final paragraph in Section 4 of this Representation identifies where the draft allocation policy should be amended to provide further certainty in respect to the mitigation identified to address the potential impacts of development on the allocation site. In this respect, attention is drawn to other draft allocations within the dHSAP where a more detailed policy is provided. The table overleaf incorporates a number of amendments to the Sustainability Appraisal for the site, in line with the criteria set out in Table 2.3 of the Council's Sustainability Appraisal. These amendments confirm that against the Council's Sustainability Appraisal Criteria, the site should be identified as resulting in eight minor adverse impacts, one minor positive impact, two moderate positive impacts and two major positive impacts. As a result, the site would be classified as 'more sustainable' within the ranking of the potential development sites. (See attached Table 4)			
	Introduction The adopted Core Strategy sets the overriding framework for the HSAP; identifying the requirement to deliver 42,000 homes over the plan period 2006-2026. These are disaggregated into three housing market areas (HMA), and subsequently to individual settlements or rural areas within the local area strategies. This representation relates to the 'North West HMA', and specifically the settlement of Trowbridge. Waddeton Park are bringing forward proposals on Land South of Trowbridge; which is identified as a draft allocation under Policy H2.6 (Southwick Court). The area is shown on the plan attached at Appendix 1. The allocation of the site under Policy H2.6 is supported. In bringing forward proposals, a substantive evidence base is being compiled; including a full suite of ecology surveys, geotechnical surveys, geophysics, heritage impact assessment, landscape and visual assessment and transport assessment. These emerging documents inform this representation, and provide further detail beyond the Council's site assessment, to confirm with greater certainty the impacts and benefits of development on the draft allocation site.			

Appendix Q - Schedule of representations

	<p>The emerging development proposal for the draft allocation site includes around 180 dwellings, a new primary school, open space, sustainable drainage and strategic landscaping. The most up to date draft Concept Plan is enclosed at Appendix 2 for reference.</p> <p>The production of an effective, deliverable and positively prepared HSAP will not only provide a solid foundation for tackling the housing crisis but it will also ensure a planned and coordinated delivery of development alongside the necessary supporting infrastructure. This is only achievable if the HSAP submitted for examination is sound. Consistent with the National Planning Policy Framework (the “Framework”) (March 2012), to be sound, the HSAP must be:</p> <p>Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements;</p> <p>Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;</p> <p>Effective– the plan should be deliverable over its period and based on effective joint working on cross- boundary strategic priorities; and</p> <p>Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.</p> <p>It is recognised that as part two of Wiltshire’s Local Plan that elements of soundness were examined as part of the Core Strategy; for example the identification of the housing requirement, the spatial strategy, settlement hierarchy and disaggregation of the housing requirement to community areas and settlements. These are therefore only considered as appropriate within this representation.</p> <p>Conclusions and recommendations</p> <p>Waddeton Park support the allocation of site H2.6 within the dHSAP, and are committed to bringing forward a comprehensive, high quality development on the site to provide a short-medium term opportunity to meet the housing needs of Trowbridge, and Wiltshire; alongside meeting the urgent need for primary school provision within the town.</p> <p>The emerging Concept Plan is informed by a detailed evidence base, and as such, this Representation seeks to provide greater certainty in respect to the impacts and benefits of development on the allocation site, than is provided within the dHSAP evidence base.</p> <p>Sections 2 and 3 have considered the range of matters which have been considered as part of the site allocation process. The sustainable location of the site, and the accessibility of local services and facilities is clear; and the ability of the site to deliver housing to meet the significant residual shortfall within Trowbridge, a Principal Settlement, is acknowledged.</p> <p>Waddeton Park’s emerging evidence base on the site’s ecological, landscape and heritage baseline, and the ability to further refine development proposals for the site has enabled a more comprehensive assessment of the potential impacts and enhancement opportunities of development on the site.</p> <p>The more informed site assessment results in the opportunity to clarify the Sustainability Appraisal underpinning the site allocation process. This confirms that in line with the Council’s methodology and criteria, that the site is incorrectly classified as ‘less sustainable’; and as such, should be amended to ‘more sustainable’.</p> <p>It is recognised that the Council are intending to submit the dHSAP to Examination in early 2018, and the intention to proceed with the Plan expediently is supported. Should the Council wish for a greater degree of certainty in respect to the development proposals discussed within this Representation, we would welcome the opportunity to discuss the drafting of a Statement of Common Ground for submission to the Examination process, identifying potential modifications to the draft allocation policy, for the Inspector to consider.</p> <p>These could include the allocation policy identifying the requirement to deliver a primary school on site and a new pedestrian access to Southwick Country Park. It would also provide an opportunity to provide a greater level of detail on the allocation plan; for example, identifying the location of woodland planting along the southern and western edges, the extent of the northern wildlife corridor, and the extent of the area on the western side (as demarcated by the former water meadows) which should be identified as informal or formal green space.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3108</a>	<b>Consultee</b> Bovis Homes Limited  <b>Person ID:</b> 841393	<b>Agent</b> Mr Desmond Dunlop Managing Director  D2 Planning Limited  <b>Person ID:</b> 558013	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.3 North of Netherhampton Road		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Policy H3.3 North of Netherhampton Road, Salisbury Bovis Homes support the Council's decision to allocate land under their control to the north of Netherhampton Road, Salisbury for circa 100 dwellings. They consider that the site is ideally placed to meet part of the additional housing and/or employment requirement in the South Wiltshire Housing Market Area. Indeed Bovis Homes control additional land to the west of the proposed allocation which could provide additional residential or employment development. The extent of this land is shown on the attached plans. These plans demonstrate how by incorporating this land the proposals provide a better gateway to Salisbury in this location.			
	A high-level study of the technical and environmental site constraints and opportunities detailed existing site knowledge and supplemented by visual walk-over survey to confirm key assumptions. Therefore, whilst proposals will be subject to further investigation and survey, the proposed scheme can be considered as both achievable and deliverable.			
Inclusion of additional land north of Netherhampton Road has the potential to create a number of benefits:-				
1. Opportunity to create a new consolidated Gateway to Salisbury on approach from the west - through a controlled enclosure of built form which logically extends the existing settlement as a series of streets and spaces, rather than simply driving past a new estate on the approach to the City.				
2. To naturally reduce traffic speeds on Netherhampton Road - by taking in land on either side of Netherhampton Road the route can be designed as a series of new, human scale spaces which together create a pedestrian friendly streetscape to encourage walking and cycling, linking new and existing communities.				
3. The ability to deliver a larger quantum of development - for employment or residential uses as necessary.				
4. Create a series of publicly accessible open spaces from which previously glimpsed views (when considered primarily from the vantage point of the motorist) to the City and Cathedral can be more fully experienced.				
5. Opportunity to logically site community and retail uses on the primary route into the City whilst still occupying a central location within a wider residential area – and in doing so, improve the commercial viability of any proposed retail outlets.				

Appendix Q - Schedule of representations

	<p>The site is available with only one landowner and can be delivered as it is under the control of an experienced national housebuilders. There are no constraints to the development of the site as follow:-</p> <p>The site comprises intensively farmed arable land that is in one ownership. The farmland is 'in hand' and is not subject to any agricultural tenancies. It is therefore available for development in the short term and is achievable with a realistic prospect for delivery as the land is controlled by an experienced developer in Bovis Homes.</p> <p>The site can be satisfactorily accessed through the introduction of a junction to the requisite standards in the A3094 Netherhampton Road this has been confirmed by Bovis Home's retained highway consultant.</p> <p>The site is well located to a range of services and facilities which would include strategic and local employment areas, as well as shops and other facilities.</p> <p>The site is not within any valued landscape as defined within paragraph 109 of the NPPF.</p> <p>The landscape has the capacity to accommodate development whilst retaining views of Salisbury Cathedral. The initial Landscape and Visual Impact Assessment has been undertaken and confirms the sites capacity to absorb the quantum of development proposed.</p> <p>The site is not the subject of any ecological designation or designated sites of importance for biodiversity (eg SPA, SSSI).</p> <p>The site is in arable use. It has been substantially managed and regularly ploughed. Hedgerows are sparse and there are virtually no trees (apart from isolated trees close to the Netherhampton Road) on the site. There is therefore little opportunity for protected species to establish themselves on the site. The proposals would provide an opportunity to provide biodiversity enhancement measures, including the introduction of a wider variety of habitats than currently present across the agricultural land.</p> <p>The entirety of the site is located within Flood Zone 1 and there are no flooding issues.</p> <p>Surface water would be capable of being discharged to the ground via infiltration techniques</p> <p>The nearby Petersfield Sewage Treatment Works has satisfactory hydraulic capacity to accommodate predicted foul water drainage from the proposed development.</p> <p>There are no statutorily designated heritage assets within the site or in proximity of the site.</p> <p>In view of the above, the site is available and deliverable and there are no constraints to the development moving forward.</p> <p>Recommendations Bovis consider that the additional land that they control to the west of the proposed allocation, as shown on the attached plans, should also be identified for residential/employment development.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">3109</a>	<b>Consultee</b> Unknown The Crown Estate  <b>Person ID:</b> 549444	<b>Agent</b> Mr David Fovargue Principal Consultant  AMEC  <b>Person ID:</b> 549441	<b>Do you consider the draft WHSAP is legally compliant?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.1-4.72; approach to the HSAP			Positively prepared	Justified  Effective  Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>A. Summary                      Wiltshire Council's (WC) Wiltshire Housing Site Allocations Plan (HSAP) pre-submission draft fails the tests of soundness set in National Planning Policy Framework (NPPF, Department for Communities and Local Government, March 2012) (NPPF) (NPPF182). Fundamentally, the HSAP is not 'positively prepared' because it fails to address the critical affordability issues facing Wiltshire's rural communities. This is demonstrated in the East HMA where the HSAP leaves the HMA's 18 'large villages' without any site allocations whatsoever. This hinders WC's ability to meet rural housing needs over nine year plan period. Site allocations are central to the delivery of affordable housing, with sites in Wiltshire required to deliver 30-40% provision.</p> <p>WC's approach to the HSAP also conflicts with the Wiltshire Core Strategy (VVCS). Paragraph 4.15 of the WCS states that settlement boundaries at large villages will be 'formally reviewed' via a site allocations plan or neighbourhood plans "to identify new developable land to help meet the housing and employment needs of that community". This dual mechanism for boundary reviews (via HSAP or neighbourhood plans) was a result of a main modification to the WCS required by the WCS plan Inspector to overcome the 'considerable risk' of a sole reliance on neighbourhood plans (IR36 (Paragraph 36, Wiltshire Core Strategy Inspector's Report (Inspector Andrew Seaman), December 2014)). The HSAP's approach to large villages in the East HMA is therefore entirely contrary to paragraph 4.15 and not what the WCS Inspector envisaged. The HSAP suggests that no site allocations are necessary at large villages in the East HMA because local needs have already been met, however this is not the case and cannot be justified. The community area housing requirements do not reflect local needs (i.e. the affordable housing needs of specific towns and villages) and are, in any case, 'minimum' housing requirements which do not reflect the Full Objectively Assessed Housing Needs (FOAHN) for Wiltshire. This flawed use of the community area requirements not only affects large villages in the East HMA but also the market town of Marlborough, where no new allocations are proposed despite the conclusions of the town's latest housing needs study (Marlborough Housing Needs and Requirements Study, Cobweb Consulting, 2017).</p> <p>B. Detailed Justification                      Context                      The government has recognised the significant issue of housing delivery with the NPPF setting out how plans should 'boost supply' (NPPF47) and the Housing White Paper setting out proposals to 'fix our broken housing market'.                      "This country doesn't have enough homes. That's not a personal opinion or a political calculation. It's a simple statement of fact."                      Secretary of State for Community and Local Government, Sajid Javid (Forward to the Housing White Paper, 2017).                      At the local level, Wiltshire Council's evidence highlights the specific issue of providing affordable housing to support rural communities:                      'The main policy issue in rural areas is greater provision of affordable housing. It was noted above, under housing need, that there is a very low supply of rural affordable housing to meet the rural need.'                      (Paragraph 10.12 of the 2011 SHMA).</p>				

#### Appendix Q - Schedule of representations

Under the heading 'Key Sustainability Issues' the SA supporting the HSAP identifies that:

"There are a number of challenges faced by rural areas in Wiltshire. These include lack of affordable housing, an ageing population, rural isolation, and lesser accessibility as well as a decline in basic facilities... New development should be designed to enhance a sense of community through the provision of public/ community spaces and facilities, with the provision of appropriate levels of good quality affordable housing to meet local need."

(Sustainability Appraisal, page 11, emphasis added).

"Affordability: In Wiltshire there is a key issue of affordability, particularly in rural areas meaning that many people cannot afford to live where they grew up or where they work. This results in households settling for inadequate conditions, living in houses that are too small or in poor conditions. Rural areas also show the strongest polarity of incomes being home to both relatively low income households and high income ones typically involving long distance commuters. This is combined with a larger older population. Rural households register much greater difficulty in accessing services, a common pattern throughout the country."

(SA, page 80, emphasis added).

SA Objective 8 is therefore concerned with the need to "Provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwelling sizes, types and tenures."(SA, page 11).

At present, the HSAP does not address these needs, particularly in the East HMA where no allocations are proposed to the HMA's 18 large villages nor market town of Marlborough despite identified local housing needs. Combined with a poor track record of affordable housing delivery in the East HMA (affordable housing completions total just 23% of the total number of completions 2009-2017 against a policy requirement for 30-40% under CP43 - see Appendix B for details) rural affordability risks being further exacerbated.

The HSAP can clearly address this issue if a positive approach was taken to plan allocations - there would be no harm to the WCS spatial strategy by doing this.

WC's approach to the HSAP conflicts with the WCS (paragraph 4.15)

Paragraph 4.15 states the following.

"...Relaxation of the boundaries [at large villages] will only be supported where it has been formally reviewed through a subsequent DPD or a community-led neighbourhood plan, which includes a review of the settlement boundary to identify new developable land to help meet the housing and employment needs of that community..."

(Emphasis added).

The HSAP does not do this with large villages in the East HMA having been wholly excluded from consideration.

Not only is this contrary to paragraph 4.15 of the WCS but it also fails to plan positively for the critical affordability issues facing rural communities highlighted in both the SHMA and SA and poor track record of affordable housing delivery (Appendix B).

Any suggestion that neighbourhood plans can ensure that local needs are met, instead of via the HSAP, conflicts with both paragraph 4.15 and the 'considerable risk' of a sole reliance on neighbourhood plans identified by the WCS Inspector (Paragraph 36, Wiltshire Core Strategy Inspector's Report (Inspector Andrew Seaman), December 2014).

In IR36 the WCS Inspector also highlights how out-of-date boundaries in the East HMA are (formerly Kennet District):

"...it cannot be argued with great strength that the settlement boundaries contained therein are up to date for the purposes of the CS plan period. Indeed, the Council concedes in Topic Paper 3 'Settlement Strategy' that whilst existing boundaries offer protection to the countryside and guard against urban sprawl/ribbon development they are out of date, do not reflect current urban form and require review and updating ... a new boundary would be the ideal solution..."

It is apparent that the HSAP excludes large villages in the East HMA from consideration for two main reasons (as explained in 4.14-4.15 of the HSAP).

That 'local needs' have already been met via the achievement of community area requirements.

That going beyond these local needs will be in conflict with CP1.

The CP2 community area requirements are therefore taken as a ceiling to resist further allocations to large villages in the East HMA. However, this approach cannot be justified for the following reasons.

Appendix Q - Schedule of representations

CP2 housing requirements (including community area requirements) have always been a 'minimum' requiring "at least 42,000 dwellings". For the words 'at least' to have any meaning, other housing therefore needs to come forward for development but this is entirely at odds with the approach taken to the draft HSAP.

CP2 housing requirements (including community area requirements) do not reflect the FOAHN required by NPPF47. The WCS Inspector identified a FOAHN of 44,000 dwellings (2,200dpa), with the government's more recent evidence suggesting 44,540 (2,227dpa) (Planning for the right homes in the right places: Consultation, DCLG, September 2017). It is therefore clear that the housing requirement in the WCS is not a ceiling and should not be treated as such for the purposes of preparing the HSAP.

CP2 community area requirements do not reflect local needs for affordable housing, contrary to the approach taken in the HSAP and supporting SA. Table 1, for example, identifies evidence of local housing needs at settlements where The Crown Estate has land interests and is keen to work with local communities to address their affordable housing needs, facilitated by market homes, and deliver local benefits.

Table 1 Evidence of local needs in the Eastern HMA (Marlborough, Bromham, Burbage and Great Bedwyn)

Settlement	Local housing needs
Marlborough	<p>The Marlborough Housing Needs and Requirements Study (2017) (Cobweb Consulting, May 2017) was prepared in support of the Town Council's emerging Marlborough Area Neighbourhood Plan (MANP).</p> <p>The Study identifies a need for affordable homes, inferring that 64 households need social or other affordable housing (para. 1.5.9):</p> <p>"At least 107 households, 60% of whom [i.e. 64 households] are newly forming households seeking independence from the family or other existing household and hoping to move into their own accommodation in the next five years would require social or other forms of affordable housing."</p> <p>The Study notes that the AONB designation, presence of SSSI and proximity to the World Heritage Site act as a constraint to development and frustrate the ambitions of housing associations to develop more shared ownership homes (para. 1.2.7).</p>
Bromham	<p>Bromham Parish Council has identified the need for 19 additional residential properties, including bungalows for elderly residents. This reflects their own housing needs evidence and is reported on page 12 of Report on the Informal Consultation on the approach to Large Villages (Wiltshire Council, January 2016) which forms part of the Council's HSA Plan evidence base.</p> <p>As part of this report the Parish Council expresses specific support for SHLAA Site 668 for 15 dwellings.</p> <p>With respect to neighbourhood planning the Parish Council notes that "This is still up for discussions. We have been advised that a NP would assist our input with regard to local development, however, we have no volunteers to undertake this work as yet. We have identified a suitable site as you will note in our response to the final section. This is in addition to infill properties."</p>

Appendix Q - Schedule of representations

	<p>Burbage</p>	<p>Burbage Parish Council have submitted a draft NP to WC, with consultation on the draft NP open until 13th October 2017. Paragraph 9.18 of the draft NP notes the following:</p> <p>"The Wiltshire Council Housing Needs Survey Recommends 17 houses are urgently required to meet current need for either subsidised rented housing or shared/low cost home ownership".</p>	
	<p>Great Bedwyn</p>	<p>Great Bedwyn Parish Council undertook a questionnaire as part of preparing its Neighbourhood Plan and highlighted an "overwhelming support for affordable housing" (Record of meeting with Wiltshire Council, Place Studio and GBNDPWG, 13TH January 2017, at WCHQ in Trowbridge).</p> <p>In WC's Report on the Informal Consultation on the approach to Large Villages (Wiltshire Council, January 2016) Browns Lane (SHLAA site 552) is highlighted as a "potential site but questions remain about the sewage infrastructure and whether the additional number of houses in the area would be suitable".</p> <p>Further evidence is of course required to understand the scale of the housing need at Great Bedwyn which will need to be undertaken by either the parish council or WC.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.1-4.72; approach to the HSAP		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Sustainability Appraisal (SA) underpinning the HSAP is also unjustified and contrary to section 12 of the SEA Regulations (The Environmental Assessment of Plans and Programmes Regulations 2004) and National Planning Practice Guidance (NPPG), which are both predicated on testing reasonable alternatives to ensure the 'most appropriate' strategy to addressing sustainability issues affecting the plan area. On this basis the SA needs to test the potentially negative social consequences of not addressing identified rural housing needs and reasonable alternatives whereby additional site allocations are proposed to meet identified needs in the East HMA.</p> <p>The SA is contrary to the SEA Regulations and NPPG 001</p> <p>The social consequences of not addressing the needs of large villages across the East HMA need to be considered as part of a robust SA process. In addition, an assessment of the effect of additional allocations to settlements with identified needs (i.e. large villages and Marlborough) should also be undertaken as part of an appraisal of 'reasonable alternatives' (as required by Regulation 12(2) of the SEA Regulations (The Environmental Assessment of Plans and Programmes Regulations 2004). Assessing reasonable alternatives through the SA is central to ensuring that the HSAP's proposals are the 'most appropriate' in response to the sustainability challenges facing the plan area (NPPG paragraph 001(NPPG, Paragraph 001 Reference ID: 11-001-20140306). Rural affordability is clearly one of the key sustainability challenges facing the area as identified in the SA and SHMA.</p> <p>The reasonable alternatives to be tested would go beyond the 'do-minimum' scenario currently pursued in the HSAP, a scenario which is predicated on achieving the community area requirements and no further. It would also need to test an alternative to the 'local service centre only' scenario in the East HMA, whereby only Market Lavington, Tidworth and Ludgershall are proposed for allocation. In testing this, regard should also be had to deliverability, and the potential over reliance on Tidworth and Ludgershall, particularly given that 44% of the East HMA's commitments are already proposed here.</p> <p>The reliance on windfalls should also be tested as part of an assessment of reasonable alternatives, for example, what level of affordable housing is likely to come forward alongside the 811 windfalls estimated in the East HMA? The lack of allocations and past reliance on windfalls could be one of the reasons why the track record of affordable housing completions in the East HMA has been so poor (see Appendix B). The allocation of sites - which are required to deliver 30-40% affordable housing provision in response to WCS CP43 - is surely a more appropriate strategy that should at least be considered.</p> <p>Providing a greater range and choice of sites and delivering further market and affordable homes is one of the ways to ensure a greater response to SA Objective 8 and the effectiveness of the HSAP in meeting the needs of rural communities. At the very least the allocation of additional sites should be tested to consider whether the HSAP is the most appropriate strategy for responding to one of the fundamental issues facing the plan area: rural affordability. Ensuring the most appropriate strategy is central to both the SEA Regulations and NPPG.</p> <p>Changes required to the HSAP</p> <p>The following changes are therefore required to the HSAP and its supporting evidence.</p> <p>Undertake a formal review of settlement boundaries to meet the future needs of large villages in accordance with WCS paragraph 4.15.</p>			

Appendix Q - Schedule of representations

	<p>Test 'reasonable alternatives' as part of the SA to ensure compliance with Regulation 12(2) of the SEA Regulations and NPPG 001 to ensure that the HSAP is the 'most appropriate' strategy. For the East HMA reasonable alternatives include:          Going beyond the 'minimum' community area requirements to address local housing needs through the allocation of additional sites at large villages (Bromham, Great Bedwyn and Burbage) and the market town of Marlborough;          A reduced reliance on windfalls, with further allocations to boost affordable housing delivery on planned sites; and          An alternative to the 'local service centre only' strategy currently being pursued whereby delivery in the East HMA is overly dependent on Tidworth and Ludgershall.          Consider the allocation of The Crown Estate's sites (listed in Table 2 with site plans in Appendix A).</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>These representations set out The Crown Estate's fundamental concerns regarding the approach the HSAP as a whole and its ability to address rural affordability in the East HMA.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3111</a>	<b>Consultee</b> Unknown The Crown Estate	<b>Agent</b> Mr David Fovargue Principal Consultant	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 549444	AMEC  <b>Person ID:</b> 549441	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.1-4.72; approach to the HSAP		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	In considering and assessing additional site allocations as part of the SA it is important to highlight The Crown Estate's sites that have been submitted to all previous stages of the planmaking process, including sustainable and deliverable sites at Marlborough, Bromham, Great Bedwyn and Burbage (see Part B. Detailed Justification for further details, and Appendix A for site plans). There would be no harm to the WCS spatial strategy if these sites were allocated and, in responding to identified local needs, their allocation would help to plan positively to address the key issue of rural affordability facing the plan area.				
	Opportunities on The Crown Estate's sites Table 2 identifies sites on The Crown Estate's land which could contribute towards local needs for affordable housing as part of the HSAP and considered as part of a reasonable alternative to the current HSAP strategy for the East HMA. There would be no harm or conflict with the WCS spatial strategy if these sites were to be allocated as part of positive plan-making to address rural housing needs.				
	Table 2 Opportunities on The Crown Estate's Landholding (see Appendix A for site plans)				
	Site	Opportunity			
	Elcot Lane, Marlborough (SHLAA site 660)  Appendix A Figure 1	At the time the WCS was being prepared two options were tested for a 'strategic site' allocation to Marlborough: the Salisbury Road site (which was ultimately allocated and is now being delivered) and Elect Lane (SHLAA site 660) (this is set out in WC's Strategic Sites Background Paper, 2009).  The Crown Estate's site at Elcot Lane has therefore always been seen as the alternative to Salisbury Road and now that that site is coming forward, Elcot Lane can have a key role to play in meeting the town's future housing needs, particularly in light of the conclusions of the Marlborough housing needs study (see Table 1). The study highlights how the town's constraints (AONB,SSSI and WHS) are affecting the ability of RSLs to deliver affordable homes, but this scheme is an opportunity to overcome these issues and meet local needs (64 households) ,including the need for smaller homes.			

Appendix Q - Schedule of representations

		<p>Appendix D includes an indicative masterplan for a discrete scheme on a well-contained site which sits well below the sensitive 160m AOD contours in the town, helping to minimise views from the wider AONB. As well as being sensitive to the AONB, this opportunity is not affected by the SSSI or the WHS.</p> <p>The setting of the listed buildings to the north can be respected, public rights of way retained and a new landscape boundary provided along the site's eastern boundary.</p> <p>The scheme can provide up to 50 units with access via Crest Nicholson scheme to south (agreement already in place with them).</p> <p>Technical work is already underway, including Phase 1 Ecology survey completed last year and no significant constraints are envisaged.</p>	
	<p>Breach Close, Bromham (SHLAA site 668)  Appendix A Figure 4</p>	<p>Two masterplan options have been identified to deliver between 30 and 50 dwellings comprising SHLAA sites 668 and part of 671 (see Appendix C). With a WCS policy requirement to provide 30% affordable housing this opportunity can help the parish council respond to the need for 19 affordable homes in the village and their support for this SHLAA site. As well as helping to meet local housing needs, the proposals would improve connectivity (highways, PRoW and lighting) between Horsepool and the High Street.</p> <p>If a neighbourhood plan is not forthcoming (as the parish council have potentially flagged), the allocation of the site via the HSAP is a positive approach to addressing the needs of the village.</p>	
	<p>Saddlers Way, Burbage (SHLAA site 665)  Appendix A Figure 2</p>	<p>This site adjoins the recent Persimmon scheme and is bounded by development on three sides, with the A338 on its southern boundary. The site has capacity for up to 50 units with access via Saddlers Way (previously agreed with WC's highways officer). There is an identified local need for 27 affordable homes and parish council support for this specific site, who are proposing to allocate it as part of their neighbourhood plan.</p> <p>Longer term options are also identified on Figure 2 (SHLAA sites 666 &amp; 667) albeit the Saddlers Way site is prioritised at this stage in accordance with the parish council's approach.</p>	
	<p>Browns Lane, Great Bedwyn (SHLAA site 552)  Appendix A Figure 3</p>	<p>This is a well screened and contained site in the village with potential for 15-20 units.</p> <p>The parish council have highlighted the potential of this site (against other options in the village), albeit flag concerns regarding the capacity of the foul drainage network. The Crown Estate can liaise with Thames Water to identify what works would need to take place as part of</p>	

Appendix Q - Schedule of representations

	<div data-bbox="465 97 2002 204" style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>any future development to both meet local housing needs and deliver utility improvements if required.</p> </div> <p>Changes required to the HSAP  The following changes are therefore required to the HSAP and its supporting evidence.  Undertake a formal review of settlement boundaries to meet the future needs of large villages in accordance with WCS paragraph 4.15.  Test 'reasonable alternatives' as part of the SA to ensure compliance with Regulation 12(2) of the SEA Regulations and NPPG 001 to ensure that the HSAP is the 'most appropriate' strategy. For the East HMA reasonable alternatives include:  Going beyond the 'minimum' community area requirements to address local housing needs through the allocation of additional sites at large villages (Bromham, Great Bedwyn and Burbage) and the market town of Marlborough;  A reduced reliance on windfalls, with further allocations to boost affordable housing delivery on planned sites; and  An alternative to the 'local service centre only' strategy currently being pursued whereby delivery in the East HMA is overly dependent on Tidworth and Ludgershall.  Consider the allocation of The Crown Estate's sites (listed in Table 2 with site plans in Appendix A).</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>These representations set out The Crown Estate's fundamental concerns regarding the approach the HSAP as a whole and its ability to address rural affordability in the East HMA.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">3112</a>	<b>Consultee</b> Mr George Smith  <b>Person ID:</b> 835920	<b>Agent</b> Mrs Janet Montgomery Brimble, Lea and Partners  <b>Person ID:</b> 438199	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This representation should be treated as an objection to Shrewton being discounted as a location for housing site allocations and, in particular SHLAA Site S146.</p> <p>It has been noted from the Amesbury Community Area Topic Paper June 2017 that SHLAA Sites in Shrewton were rejected at the Stage 3 of the site selection process with the stated reasons in table 6.5 as mainly being because of major adverse effects associated with River Avon SAC and water and sewer constraints (with some minor variations between sites).</p> <p>On this basis, the Habitat Regulations Assessment (HRA) June 2017 has been reviewed to provide an insight for these summary reasons for rejecting the sites at Stage 3. In the case of Shrewton, the settlement level screening assessment (Table 4) identifies the Likely Significant Effects (LSE) which are addressed below.</p> <p>Salisbury Plain Special Protection Area (SPA) – Criterion R1                  Shrewton has been discounted at Stage 3 on the basis that the settlement is within 6.4km of the Salisbury Plain SPA, being the distance where the majority of visitors to the SPA originate. However, this reason cannot be substantiated on the basis that Warminster is also within 6.4km of the SPA where a significant amount of new development is being focused. This will have a much greater impact than the level of development that could be achieved in Shrewton, and analysis elsewhere in the HRA and the Sustainability Appraisal demonstrates that there is scope to mitigate the impact of any additional recreational pressure upon the SPA. There is no evidence to suggest that the Stone Curlew Mitigation Strategy identified in the Core Strategy, which was developed for the established housing requirements and is not changing as a result of this Site Allocation Plan, would be ineffective. As such, development in Shrewton as a matter of principle will not have a LSE on this SPA.</p> <p>River Avon Special Area for Conservation (SAC) – Criterion H2                  The identified LSE of development in Shrewton on this SAC is flawed on the basis that Policy CP69 of the Core Strategy states that impacts are most likely to occur on developments within 20m of the river but the Stage 3 assessment then incorrectly assumes that development at settlements within 20m of the River Avon SAC could lead to LSE. This incorrect assumption is confirmed in the summary of screening assessment results where it states that the potential impacts of development in such settlements would be entirely site specific.</p> <p>Again, Warminster (and Salisbury) are settlements within 20m of this SAC but have not been discounted at Stage 3, and it is unreasonable to cherry pick the inclusion or exclusion of settlements for the purposes of the HRA.</p> <p>Water Abstraction – River Avon SAC – Criterion W1                  The likely significant effect has identified a number of settlements but singles out any development in Shrewton as it is likely to contribute towards reduced flows which would consequently cause an unfavourable condition of the River Till.</p> <p>The HRA acknowledges that the impact on flows is based on Wessex Basin Ground Water Model (2016) which was based on an assumption of full uptake of private water supply licensed abstractions, but this does not reflect the recent actual abstraction rates in the area. Mitigation can be achieved to the local water supply network if necessary, as being applied to the allocation at Durrington. It is therefore inappropriate to discount Shrewton as a location for some development owing to potential mitigation if necessary to prevent any LSE.</p>			

Appendix Q - Schedule of representations

	<p>At present, the absence of any housing site allocations in Shrewton is unjustified. For the above reasons, there is no justified basis to discount Shrewton for housing site allocations and there are no likely significant effects. As such, the Council should re-assess their pre-submission position regarding Shrewton and re-run Stages 3 and 4 of the site selection process within the Amesbury Community Area.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>There should be an opportunity to present expert evidence to challenge the Council's conclusion on LSE and alleged major adverse impacts.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3113</a>	<b>Consultee</b> Mr George Smith	<b>Agent</b> Mrs Janet Montgomery Brimble, Lea and Partners	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 835920	<b>Person ID:</b> 438199	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Specific Assessment of S146 (Land to the West of Tanner's Lane and South of The Hollow)</p> <p>Before turning to the site-specific assessment of S146, it should be noted that The Parish of Shrewton has published a Draft Neighbourhood Plan on their website (dated August 2016). This includes the results of a housing need survey which revealed that 89.1% of those who responded to the survey support the provision of new housing, and states that a development of 53 dwellings would be expected to deliver the identified need for affordable housing. Even more housing may be required to deliver some of the Parish's other objectives in the Draft Plan (i.e. redevelopment of the village hall and enhanced recreational facilities). As such, Wiltshire Council's decision to discount any development in Shrewton through the Site Allocations Plan is unreasonable and unsustainable. The analysis further above demonstrates that development of this site in Shrewton will not have any LSE on the River Avon SAC and that water abstraction can be mitigated if necessary. A suitable drainage scheme would ensure that there would not be any pollution.</p> <p>At present, the absence of any housing site allocations in Shrewton is unjustified. For the above reasons, there is no justified basis to discount Shrewton for housing site allocations and there are no likely significant effects. As such, the Council should re-assess their pre-submission position regarding Shrewton and re-run Stages 3 and 4 of the site selection process within the Amesbury Community Area.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>This representation should be treated as an objection to Shrewton being discounted as a location for housing site allocations and, in particular SHLAA Site S150.</p> <p>It has been noted from the Amesbury Community Area Topic Paper June 2017 that SHLAA Sites in Shrewton were rejected at the Stage 3 of the site selection process with the stated reasons in table 6.5 as mainly being because of major adverse effects associated with River Avon SAC and water and sewer constraints (with some minor variations between sites).</p> <p>On this basis, the Habitat Regulations Assessment (HRA) June 2017 has been reviewed to provide an insight for these summary reasons for rejecting the sites at Stage 3. In the case of Shrewton, the settlement level screening assessment (Table 4) identifies the Likely Significant Effects (LSE) which are addressed below.</p> <p>Salisbury Plain Special Protection Area (SPA) – Criterion R1                  Shrewton has been discounted at Stage 3 on the basis that the settlement is within 6.4km of the Salisbury Plain SPA, being the distance where the majority of visitors to the SPA originate. However, this reason cannot be substantiated on the basis that Warminster is also within 6.4km of the SPA where a significant amount of new development is being focused. This will have a much greater impact than the level of development that could be achieved in Shrewton, and analysis elsewhere in the HRA and the Sustainability Appraisal demonstrates that there is scope to mitigate the impact of any additional recreational pressure upon the SPA. There is no evidence to suggest that the Stone Curlew Mitigation Strategy identified in the Core Strategy, which was developed for the established housing requirements and is not changing as a result of this Site Allocation Plan, would be ineffective. As such, development in Shrewton as a matter of principle will not have a LSE on this SPA.</p> <p>River Avon Special Area for Conservation (SAC) – Criterion H2                  The identified LSE of development in Shrewton on this SAC is flawed on the basis that Policy CP69 of the Core Strategy states that impacts are most likely to occur on developments within 20m of the river but the Stage 3 assessment then incorrectly assumes that development at settlements within 20m of the River Avon SAC could lead to LSE. This incorrect assumption is confirmed in the summary of screening assessment results where it states that the potential impacts of development in such settlements would be entirely site specific. Again, Warminster (and Salisbury) are settlements within 20m of this SAC but have not been discounted at Stage 3, and it is unreasonable to cherry pick the inclusion or exclusion of settlements for the purposes of the HRA.</p> <p>Water Abstraction – River Avon SAC – Criterion W1                  The likely significant effect has identified a number of settlements but singles out any development in Shrewton as it is likely to contribute towards reduced flows which would consequently cause an unfavourable condition of the River Till.</p> <p>The HRA acknowledges that the impact on flows is based on Wessex Basin Ground Water Model (2016) which was based on an assumption of full uptake of private water supply licensed abstractions, but this does not reflect the recent actual abstraction rates in the area. Mitigation can be achieved to the local water supply network if necessary, as being applied to the allocation at Durrington. It is therefore inappropriate to discount Shrewton as a location for some development owing to potential mitigation if necessary to prevent any LSE.</p>			

Appendix Q - Schedule of representations

	<p>At present, the absence of any housing site allocations in Shrewton is unjustified. For the above reasons, there is no justified basis to discount Shrewton for housing site allocations and there are no likely significant effects. As such, the Council should re-assess their pre-submission position regarding Shrewton and re-run Stages 3 and 4 of the site selection process within the Amesbury Community Area.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>There should be an opportunity to present expert evidence to challenge the Council's conclusion on LSE and alleged major adverse impacts.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>[Representation which sets out argument for allocation of Land at London Road, Amesbury (SHLAA site 3379) - refer to attached submission statement. and summarised below]</p> <p>This document is prepared on behalf of Lincoln College (Oxford), the freehold owner of land at Amesbury. It is prepared in response to Wiltshire Council's (WC's) consultation on a draft of the Wiltshire Housing Site Allocations Plan, summer 2017. It proposes that the Allocations Plan formally allocates land between London Road and the A303 at Amesbury (the 'College land'), for either;</p> <p>Mixed-use development comprising circa up to 73 dwellings and 24,000m2 B1 employment, or;</p> <p>Residential-only development for up to 100 dwellings. These proposals are justified for the following inter-related reasons:</p> <p>The location is acknowledged by WC as sustainable, due to its relationship with the existing built-up area, and its proximity to a wide range of services and facilities;</p> <p>The site is capable of delivering the full housing requirement for the Amesbury Community Area. In contrast, WC's proposed allocations will underprovide, and on more sensitive land.</p> <p>The site can also deliver a significant element of B1 employment, complementing Amesbury's role as a key economic hub in the County, which is set to expand with the expansion of Boeing at Boscombe Down;</p> <p>Contrary to the incomplete analysis undertaken by WC, environmental, technical and land constraints on the site are all capable of being overcome.</p> <p>Under the DCLG's new approach to calculating housing need, Wiltshire needs to increase supply by circa 6% annually. It should also, under the NPPF, plan for up to 15 years ahead whereas the draft Allocations plan extends only to 2026. Positive consideration must therefore be given to sustainable sites such as this.</p> <p>1. Site context and planning background</p> <p>1. Site characteristics</p> <p>1.1. The College site at London Road measures approximately 4.5 hectares and comprises an undeveloped agricultural field, pictured below: [see attachment]</p> <p>1.2 There are currently no structures, buildings or other developed features on the site. However, the following points are of note: there is a vehicular access to London Road at the eastern end of the site;</p> <p>the site contains changes in level, from 90m in height on its southern corner to c.75m beside the A303. However, much of this change in level occurs by means of embankments close to the southern boundary, with most of the remainder of the site being of a developable gradient. A topographical survey has been undertaken on behalf of the College and this is included as Appendix 1.</p> <p>boundaries of the site primarily comprise mature trees and hedgerows, with further wooden and/or mesh stock-proof fencing.</p> <p>Site context</p>			

## Appendix Q - Schedule of representations

- 1.3 The site comprises an undeveloped agricultural field, and in policy terms is positioned outside of any Settlement Boundary or site-specific allocation. It is, however, positioned within an active, urbanised environment being entirely surrounded by large buildings, roads and structures which exert such a significant urbanising influence, that the site is not perceived as 'countryside' in any meaningful sense. Key features immediately adjoining the site include the A303, retail and industrial development, and residential uses, as identified in the figure below. [see attachment]
- 1.4. Nonetheless the character of the area is by no means unpleasant or overly industrial. This is due to a number of factors including the presence of substantial mature trees and hedgerows, the reasonably unobtrusive architectural treatment of larger buildings, and the existence of distant views between the site and London Road towards surrounding hills and countryside, made possible by local topography.
- Previous planning applications
- 1.5. In the late 1960s, the College entered into an agreement allowing the large scale quarrying of chalk from this area, which it is understood is likely to have been in connection with the construction of the A303. However, the extent to which this in fact proceeded is not certain.
- 1.6. The only planning application identifiable from Wiltshire Council's records available online is a scheme submitted in 1994 (reference S/94/0630) for a 30,000 sq. ft foodstore, with circa 300 parking spaces, accessed from a new roundabout to the east of the site, as shown below. [see attachment]
- 1.7. There are a number of notable points from this application. Firstly, it was refused on a single refusal reason, which related solely to the impact of the proposed foodstore on the viability of Amesbury Town Centre, in combination with a separate application at Butterfield Down. In turn the proposals were taken to appeal, but dismissed, for the same reason. The decision notice is included as an Appendix.
- 1.8. Conversely, officer's report to committee indicated that there was no objection in terms of landscape, archaeology, ecology or any other technical or environmental issue subject to the appropriate controls by means of condition. Notable excerpts from the officer's report are shown below: [see attachment]
- 1.9. Equally there was no objection from the Highways England in relation to the A303, subject to no direct access from the A303 and light sources being screened.
- 1.10 Overall despite the passage of time, the previous application indicates that the site is physically and environmentally capable of accommodating major development.
2. Previous consideration by WC for residential development
- 2.1. The Council has reviewed the land at London Road several times, as part of the production of the Wiltshire Core Strategy, South Wiltshire Core Strategy, and now the Site Allocations DPD. On each occasion the College's land has been assessed highly in terms of sustainability and accessibility.
- Topic Paper 19 to the South Wiltshire Core Strategy (2008)
- 2.2. This considered a number of options for housing around Amesbury, on a 360-degree search basis around the town's edge. From this assessment, shown in part below, it was shown that the site has 'potential scope for strategic growth', sequentially preferable to alternatives north, east and west of the town.
- 2.3 Topic Paper 19 was accompanied by site-specific assessment tables reviewing key environmental, landscape, transport and other sustainability factors affecting each of the possible development sites around Amesbury. The table below provides an excerpt from this process [see attachment]
- 2.4 Emerging from this assessment, therefore, was the view that the College's land is a clear suitable opportunity for housing Sustainability Appraisal Report by Enfusion and Nicholas Pearson Associates on behalf of WC (2009)
- 2.5 This review considered a range of possible sites in terms of 23 separate Sustainability Appraisal Objectives, providing a score against each of these. As the table below shows, the assessment identified that development of the Lincoln College site would be broadly positive in sustainability terms, with 17 of the 23 criteria receiving a positive or neutral rating.
- 2.6. The following findings from the 2009 Sustainability Appraisal Report are of particular note:
- Objective 1: Social inclusion for all
- "The site is on the northern edge of Amesbury and contained by the A303. Good access to existing facilities."
- Objective 9: Improve air quality and reduce greenhouse gas emissions

## Appendix Q - Schedule of representations

“Although all development inevitably increases car use; the site is within reasonable walking distance of facilities.”

- Objective 10: Promote sustainable transport by improving affordable and accessible solutions particularly in rural areas

“A development of this scale is unlikely to bring forward any public transport improvements. However good bus service exists.”

- Objective 15: Conserve and enhance biodiversity and geodiversity

“The site is contained by development to the south and the A303 to the north. No significant impact”

- Objective 16: Conserve and enhance the District’s landscapes

“The site is contained by development to the south and the A303 to the north. No significant impact as any biodiversity value unlikely.

2.7. The assessment concluded overall in relation to the College land site that :

“This small site performs well against the Sustainability Framework criteria being a well contained site with good access to facilities. There may be potential for employment development given the strategic location but this will be dependent on the use class proposed. As with most sites in, or adjacent to, Amesbury an archaeological evaluation will be required. Although not of a scale to take a strategic level of development could count towards the overall housing requirement.”

Wiltshire Housing Site Allocations Plan - Sustainability Appraisal, 2017 (Atkins)

2.8. Accompanying the current consultation on the Site Allocations DPD is this detailed appraisal of each of the candidate sites for allocation against the following criteria:

- 1: Protect and enhance all biodiversity and geological features and avoid irreversible losses
- 2: Ensure efficient and effective use of land and the use of suitably located previously developed land and buildings
- 3: Use and manage water resources in a sustainable manner
- 4: Improve air quality throughout Wiltshire and minimise all sources of environmental pollution
- 5a: Minimise our impacts on climate change – through reducing greenhouse gas emissions
- 5b: Minimise our impacts on climate change – through reducing our vulnerability to future climate change effects
- 6: Protect, maintain and enhance the historic environment
- 7: Conserve and enhance the character and quality of Wiltshire’s rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place
- 8: Provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwelling sizes, types and tenures
- 9: Reduce poverty and deprivation and promote more inclusive and self-contained communities
- 10: Reduce the need to travel and promote more sustainable transport choices
- 11: Encourage a vibrant and diversified economy and provide for long-term sustainable economic growth
- 12: Ensure adequate provision of high quality employment land and diverse employment opportunities to meet the needs of local business and a changing workforce

2.9. For the College land (referred to as site 3379), paragraph 7.3.22 notes that “no major adverse effects have been identified for this site.”

Five ‘moderate adverse’ effects are noted, on which we comment in turn:

Potential for impacts on the Salisbury Plain SPA and River Avon SAC (SA objective 1) This is acknowledged as a consideration, albeit in this respect the College site is no different to either of the other two sites proposed by WC for allocation.

Potential for impacts on River Avon SAC due to abstraction (SA objective 3). Again, the College site is in the same position as the two proposed allocation sites.

Impacts relating to A303 (SA objective 4). Paragraph 7.3.23 states that:

“there are likely to be adverse effects arising from development due to the likely increase in vehicular trips. Such issues could relate inter alia to noise, dust and lighting. Furthermore, topographical issues may make mitigation of noise impacts from the adjacent A303, through provision of a landscape buffer, problematic to achieve”

Attached to this representation are two deliverable masterplans for the site, underpinned by a noise assessment which demonstrates that an appropriate layout can be achieved with suitable noise mitigation, meaning that the above concerns are misplaced.

Flood risk assessment (SA objective 5b). The assessment has commented that:

## Appendix Q - Schedule of representations

“There is potential to increase flood risk off site through increased surface water runoff development. Ground conditions may influence the choice of surface water management techniques to address increased flood risk from development of the site and this may result in a reduced area for housing. A flood risk assessment would be required”

Again, this is not a site-specific concern; rather drainage is a matter relevant to all development proposals, and the masterplans for the College land, submitted with this statement include appropriate Sustainable Urban Drainage measures.

Archaeology (SA objective 6). The assessment has commented that :

“There are known archaeological assets on and adjacent to the site, including barrows and burials. The site also has high archaeological potential. An archaeological assessment would be required however mitigation could be problematic to achieve”

The Amesbury area is indeed known for its high archaeological potential, but again this is in common with the wider area including Durrington where the allocations are proposed. More importantly though, much of the site was quarried in the 1960s in association with the A303, which is likely to have disturbed any buried archaeology. This is not the case in the other proposed allocated sites.

2.10. A summary of how the College land has been assessed in comparison to the two allocated sites, is included overleaf. From this it is apparent that across the majority of criteria, the College site is assessed to have the same overall effect as either of the 2 sites in Durrington proposed for allocation. In only one case is the College site assessed to have a more negative effect than both of the other sites (criterion 4, relating to air quality).

2.11. Conversely, in two cases the College site is assessed to have a more positive effect. These are criterion 8, relating to the provision of housing, and criterion 10, relating to reducing the need to travel and promoting more sustainable transport choices.

2.12 Overall, and for reasons explored in more detail in the following sections, it does not logically follow from the SA assessment that the College land at Amesbury should be excluded from the Allocations plan. [see figure in attachment]

Site Landscape Assessment (The Environment Partnership / WC, June 2017)

2.13. Alongside the current draft Allocations Plan, the Council has published a detailed landscape appraisal of the sites considered, from which it is found that the College land:

is ‘pleasant’ but not ‘attractive’ in landscape character terms;

does not contribute to the settlement setting of Amesbury;

has ‘low sensitivity’ in terms of public access;

has ‘no important views’;

has ‘high mitigation potential’;

has a ‘moderate-high capacity to accommodate change’

2.14. In the assessment, it is apparent that the College land has landscape advantages over the two selected sites in Durrington, stemming from its already urban (as opposed to rural) location. The assessment comments:

“The site is well contained along its northern boundary by tree planting and by the mature hedgerow along the south western boundary. Effects on receptors to the south could be partly mitigated by appropriate landscape treatment along London Road. Some views from the south across the site towards Salisbury Plain East should be maintained through the arrangement of development. The hedgerow along the south west boundary should be reinforced with appropriate additional planting. Tree planting should be proposed throughout the development and along the access roads to help provide softening in views from the wider countryside to the north. Overall the site has a moderate-high capacity to accommodate change.”

Amesbury Community Area topic paper (WC, 2017)

2.15. The assessment which ultimately informs the Allocations Plan is a topic paper produced by Wiltshire Council in June 2017. This identifies a number of benefits to the site, but also contains a number of major inaccuracies that it is incumbent upon us to correct. In the interest of clarity and completeness, the table below comments on each element of the assessment in turn.

Appendix Q - Schedule of representations

Quote from Topic Paper	Response
<p>“The site is likely to be affected significantly by noise and particulate matter pollution emanating from traffic on the A303 and potentially from industrial uses to the south and east of the site.”</p>	<p>The A303 is a consideration however a noise assessment has been undertaken which identifies that suitable levels can be achieved (detailed below). An air quality assessment has not been undertaken as yet, and it is therefore not possible to conclude whether air quality is a significant concern. We would note however that the prevailing winds are away from the site towards the A303, and that adjoining uses are mainly retail and, light commercial (e.g. automotive services), not heavy industry.</p>
<p>“Bearing in mind the juxtaposition of the site and the A303, it is considered unlikely that an appropriate noise attenuation scheme could be achieved due to the topography of the site.”</p>	<p>WC base this on no evidence whatsoever. Lincoln College’s consultants have, however, identified appropriate noise mitigation measures based on actual monitoring data, as set out in the accompanying report.</p>
<p>“An area of Ancient Woodland would need to be protected in totality and protected by a buffer of additional planting within the site.”</p>	<p>This is entirely incorrect. There is no area of Ancient Woodland either on or adjacent to the site.</p>
<p>“There are known barrows and burials on the site and adjacent to the site. Bearing in mind the significance of these archaeological assets further assessment would be required in order to support and inform any subsequent planning application. This may result in the developable area of the site being reduced significantly</p>	<p>This is again incorrect. Whilst there are known barrows to the north of the A303 we are aware of no remains on the site and none were raised during the previous applications. WC do not furnish this assessment with any evidence, and the commentary relating to development area is entirely conjecture.</p>
<p>“Extensive tree planting would be necessary throughout the site in order to soften views from and to the wider countryside. This would be additional to planting needed to enhance existing hedgerows and protect Ancient Woodland. Additional screening may also be required between any new</p>	<p>The need for tree planting is accepted although this commentary significantly overstates the matter of landscape sensitivity, compared with the TEP assessment referred to above. Again, the matter of Ancient Woodland is factually incorrect.</p> <p>The submitted concept plans address landscape matters effectively and positively.</p>

Appendix Q - Schedule of representations

<p>development and the adjacent industrial uses.”</p> <p>“The site is a relatively accessible location and within close proximity to employment, retail, education and services within Amesbury town centre, which can also be accessed by public transport”</p>	<p>This is common ground and one of the major advantages of the College site over the two alternatives at Durrington.</p>
<p>Quote from Topic Paper</p>	<p>Response</p>
<p>“This is an opportunity that should be maximised”</p>	<p>We agree with this sentiment and it is therefore unfortunate that WC fail to plan positively and enable this site to come forward and fulfil this potential.</p>
<p>“The site has an existing vehicular access from London Road at its north eastern corner, but limited cycle connectivity. Development could contribute towards the Wiltshire Council’s proposed - Amesbury Cycle Network and deliver improved pedestrian access to local amenities.”</p>	<p>As suggested, the site is capable of contributing to network improvements and benefit the wider population of Amesbury. The potential for this site to promote sustainable modes of travel is significantly higher than both of the alternatives at Durrington.</p>
<p>“Development at this site would have the potential to exacerbate major accident clusters at Countess Roundabout and A345/High St (within 1km of site) and to exacerbate congestion around Countess Roundabout, Countess Road/The Centre, and Solstice Park junctions.”</p>	<p>This is an exaggerated and wrongheaded assessment. The site is close to these locations, however, any allocations of development land at Amesbury/Bulford/Durrington will be within comparably close distance of the same junctions. On the other hand, the College site is far more accessible to services, facilities and employment and is therefore likely to create less vehicular movement overall by encouraging non-car modes of transport. If local highway improvements are necessary to accommodate growth, WC should address this appropriately through their Community Infrastructure Levy. As regards the Countess Roundabout, Highways England proposes a flyover which in the long term would address this issue.</p>

Appendix Q - Schedule of representations

<p>“The site would require extensive landscaping reducing its developable area”.</p>	<p>This is only partially true. The submitted masterplans demonstrate that good use of the site can be made, accommodating the entire target for Amesbury/Durrington/Bulford with additional scope to deliver employment uses.</p>
<p>“It is [a] reasonably well-located site in relation to Amesbury town with the potential to improve cycle/pedestrian links.”</p>	<p>This is correct, but underplays the significant advantage that the site has in terms of accessing retail, services, jobs, public transport and all the other amenities of Amesbury.</p>
<p>“Fundamentally, however, the site is not considered suitable for housing development. Following further consultation and examination of evidence, it is clear that this site has a number of key constraints that ultimately make it inappropriate. The impact of noise from the A303 is not considered possible to mitigate.”</p>	<p>The assessment is unclear here as to what ‘evidence’ has been ‘examined’ in arriving at this assessment. The College presents evidence in this submission that demonstrate noise is capable of being overcome. It is not clear what the other ‘key constraints’ are, however as regards heritage, ecology, and landscape this submission demonstrates that concerns are unfounded.</p>
<p>“In addition this site is likely to be included in plans to widen the A303 and therefore should not be allocated for housing development.”</p>	<p>This is incorrect. There is no proposal to widen the A303 into the College land itself. The A303 is already dualled in this location, and the improvements proposed by Highways England are some distance to the west, relating to the Countess Flyover and tunnel at Stonehenge. Whilst the College, as landowner, has been notified of the adjacent proposals, we have been advised that, as indicated in Figure 2.2 below, there is unlikely to be any requirement for permanent land-take.</p>
<p>2.16. The Topic Paper concludes with the statement that:  ‘Based on the evidence gathered to date, particularly in relation to the proposed dualling of the A303, development of this site is not considered suitable. Moreover, environmental effects associated with proximity to the A303 (e.g. noise and air quality impacts) would be highly problematic to mitigate successfully. After further assessment, this site has marginal sustainability benefit, it is not certain that the site is developable, and should not be a preferred site.’</p> <p>2.17 For all the reasons given above this is an inaccurate and incomplete assessment, not based on evidence properly reviewed. [see figure in attachment]</p> <p>3. Proposals for the site</p> <p>3.1. Lincoln College has appointed consultants to undertake a series of technical reviews on the site in order to identify a suitable, sustainable and deliverable masterplan for the site. This has encompassed:  Topographical survey (see Appendix);  Noise assessment (see Appendix)  Urban design assessment;</p>	

Highways / access assessment.

3.2. The starting point for configuring proposed development is to factor in the key opportunities and constraints of the site, which include the following:  
 a well-located site in terms of containment between built-up features;  
 proximity /connectivity to key services and facilities of Amesbury;  
 views to open countryside from site;  
 potential increased planting on site;  
 provision of employment to reinforce existing economy of Amesbury;  
 topography – sloping site;  
 proximity to A303 to the north with noise effects;  
 large commercial/industrial buildings to the south;  
 need to deal with surface water / drainage issues.

3.3 This exercise has culminated in two potential scenarios, summarised below and shown overleaf

	Option A: Mixed-use	Option B: Residential only
Total site area	4.48ha	4.48ha
Net developable area	2.15ha	2.77ha
Indicative residential units (34 dph)	73	94
Indicative total footprint of B1 units	24,000 sq. ft	-

3.4. In both scenarios, the layout of the proposed development is influenced particularly by the elongated shape of the site (east-west) with topographic contours running roughly in parallel to this. Key features of the proposed layout include:  
 set-back distances from London Road to accommodate access;  
 buffer from the A303, incorporating acoustic fencing  
 provision of a suitable access  
 inclusion of attenuation areas for surface water  
 substantial tree planting in the relatively inaccessible eastern corner;  
 the use of split-level units to accommodate level changes in certain locations;  
 use of perimeter blocks to encourage a ‘permeable’ layout  
 [see figures 3.1 and 3.2 in attachment]

3.5. Access to the site is proposed roughly halfway along the frontage to London Road; this being the safest and most deliverable alternative, and preferable in safety terms to the existing field access at the far eastern corner. An initial access drawing is shown below, with a detailed drawing to A1 scale provided as an Appendix.

3.6. Access design has encompassed a number of considerations:  
 securing suitable visibility lines in both directions;  
 topographic levels and the desire to minimise embankment works;  
 deliverability within Lincoln College land (this has been confirmed with the current plans being based on a formal enquiry with Wiltshire Council in respect of where Highway Land is located, in addition to recent Land Registry searches)  
 pedestrian connectivity, with a link to connect in with the existing crossing at the Tesco Roundabout and a new pedestrian refuge to the east of the site.  
 [see figure 3.3 in attachment]

Consideration of noise

## Appendix Q - Schedule of representations

- 3.7. Through the Sustainability Appraisal undertaken on the site, adverse noise impacts from the A303 have been identified as a key consideration. Lincoln College therefore commissioned Clarke Saunders Associates to undertake an assessment of the current environmental noise impact on the site, in accordance with the NPPF, the recently published ProPG: Planning and Noise for new residential developments and the relevant guidance set out in BS8233: 2014 Guidance on sound Insulation and noise reduction for buildings and the World Health Organisation Guidelines for Community Noise.
- 3.8. An initial Stage 1 Risk Assessment (including noise monitoring) has identified the site as a low/medium to medium/high risk area in terms of noise impact during daytime and night-time respectively, following which a Stage 2 Acoustic Design Statement has considered noise impacts in detail, and addresses the requirement for any outline mitigation measures as appropriate for a proposed residential development.
- 3.9. Appropriate measures have been accommodated in the provisional masterplan to ensure good acoustic design. Consideration has also been made of London Road to the southeast of the site, and the light industrial & commercial units to the southwest. These include:  
The potential for acoustic fencing on the northern boundary between the site and the A303;  
Plots to the north of the site closest to the A303 have been set back to increase the separation distance from the A303. This buffer zone includes a mix of access road, green spaces, runoff attenuation features, and pedestrian routes.  
Plots on the northern side of the site are arranged in terraces or with linked building frontages to provide acoustic screening to private amenity spaces and the rest of the site, reducing the potential impact of road traffic noise from the A303.  
Non-glazed building elements of suitable materials and mass have been proposed;  
Facades are of a traditional solid construction, with solid roof tiles employed throughout.  
Public open space is proposed within the centre and on the southern boundary of the site, where noise levels are expected to be less affected by road traffic noise.
- 3.10. Overall the assessment has demonstrated that by the use of suitable mitigation measures and careful design of facade performance, layout of the site and internal layout of the dwellings, acceptable noise levels can be achieved both internally and externally. These measures are incorporated directly into the proposed illustrative masterplans, and the acoustic survey reports are included as an Appendix to this submission.
- 3.11. Wiltshire Council had previously indicated in correspondence that the sloping topography of the land renders it inappropriate for further consideration. It is acknowledged that parts of the site are too steep to be developed; certain areas (particularly adjoining London Road) take the form of an embankment. However, the majority of the site is of a gradient that would be developable, and a small number of simple measures would enable the changes in levels to be appropriately accommodated. These include:  
retaining the steeper embankment areas (where much of the level changes take place) as greenspace, either as open amenity land or with additional planting. This would further contribute to wildlife connectivity and the amenity of residents, whilst also providing some mitigation against noise and disturbance, particularly from London Road;  
arranging streets to follow contour lines;  
considering split-level dwellings, i.e. where there are a greater number of storeys on the 'downhill' side than on the 'uphill'.
- 3.12. Wiltshire Council has routinely granted planning permission for residential developments on sites steeper than the College site; an example being application 14/02043/FUL (Chalk House, Porton), on a site with an average gradient of 1 in 9. This scheme incorporated several split-level dwellings. Redrow Homes' "Wilton Hill" development at The Avenue, Wilton (Salisbury, an allocated site) is a further recent example of a major hillside development.
- 3.13. In summary, topography is not a defensible basis for excluding this site from consideration in the DPD. An appropriate design solution is capable of being configured, as has been shown.
4. Rationale for allocation
- 4.1 As noted in the preceding sections, the College land at can be designed and delivered appropriately, and with technical issues overcome. Beyond this, however, are several key strategic factors indicating that the site should be favourably considered in order to achieve social and economic aims  
Opportunity to deliver employment
- 4.14. Uniquely amongst the potential allocation sites in Amesbury/Bulford/Durrington, the College site offers the possibility of delivering a major new area of employment land in an accessible location as part of a mixed-use allocation.

Appendix Q - Schedule of representations

	<p>4.15. Amesbury is already a key centre of economic activity, being strategically placed on the A303 corridor, with Boscombe Down and Solstice Park being two of the largest employment sites in Wiltshire. However, the majority of allocated employment land in Amesbury has now been built out, and although Solstice Park has been successful to some degree it has not delivered employee-intensive end users. The announcement earlier in 2017 of a major new operational base for Boeing at Amesbury is significant; whilst the majority of the expected 1,500 jobs will be at Boscombe Down itself, there is the potential for a range of spin-off activity which may require business space locally.</p> <p>4.16. By allocating the College site for mixed-use, the opportunity arises to provide up to 24,000 sq. ft of new business space within the current plan period, without awaiting a future Core Strategy review. This will be important in order to achieve early progress against several of the key objectives of the Swindon and Wiltshire Local Enterprise Partnership, whose Strategic Economic Plan prioritises “Using our pivotal location in southern England to create wealth, jobs and new business opportunities”, in part by accommodating growth and stimulate the economy in sustainable locations including market towns<sup>3</sup>.</p> <p>4.17. Mixed-use development on the College site would balance housing growth in a manner that cannot be replicated on either of the alternatives considered, and in addition, the positioning of larger employment buildings close to the A303 could augment noise mitigation for residents further to the south.</p> <p>5. Conclusion</p> <p>5.1. The allocation of the College land for residential-led development would contribute to the social, economic and environmental ‘dimensions’ of sustainability demanded by national and local planning policy.</p> <p>5.2. The Council’s rationale for omitting the site from further consideration is weak, and not supported by evidence. As set out in this document the site is deliverable, and also preferable in many respects to the alternatives identified by Wiltshire Council.</p> <p>5.3. The opportunity should therefore be taken in this Allocations Plan to proactively bring this site forward.</p> <p>The Housing Site Allocations plan should include the allocation of the College’s land at London Road, Amesbury (site 3379), because: The location is acknowledged by WC as sustainable, due to its relationship with the existing built-up area, and its proximity to a wide range of services and facilities; The site is capable of delivering the full housing requirement for the Amesbury Community Area. In contrast, WC’s proposed allocations will underprovide, and on more sensitive land. The site can also deliver a significant element of B1 employment, complementing Amesbury’s role as a key economic hub in the County, which is set to expand with the expansion of Boeing at Boscombe Down; Contrary to the incomplete analysis undertaken by WC, environmental, technical and land constraints on the site are all capable of being overcome. Under the DCLG’s new approach to calculating housing need, Wiltshire needs to increase supply by circa 6% annually. It should also, under the NPPF, plan for up to 15 years ahead whereas the draft Allocations plan extends only to 2026. Positive consideration must therefore be given to sustainable sites such as this. Please refer to the accompanying statement and appendices.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4744390 / 4744387 / 4744385 / 4744389 / 4744386 / 4744392 / 4744388 / 4744391</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In order to adequately put forward the case for the proposed allocation of my client’s site by exploring the weaknesses of the submission draft document and discussing the benefits of including the Lincoln College site as an ‘omission’ site.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Amesbury, Bulford and Durrington				Justified  Effective  Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Ability to deliver the full housing requirement</p> <p>4.2. Table 2.2 of the draft Allocations Plan, confirms that there is a residual requirement at April 2017 for at least 73 dwellings in the Amesbury/Bulford/Durrington grouping. Against this requirement, the plan underprovides with the two proposed allocations totalling only 60 units.</p> <p>4.3. This underprovision is a major flaw in the draft Plan and directly contradicts planning policy at the national level (and within the Wiltshire Core Strategy) which seeks to significantly boost the delivery of housing. For a draft plan to allocate lower than the required level is a fundamental error which exposes the Council to significant risk in terms of its overall soundness.</p> <p>4.4. In contrast the College site offers the opportunity to deliver at least the full requirement of 73 units. As well as being in line with the WCS and National Planning Policy Framework this would have a number of advantages:                  development could be comprehensively planned and phased;                  a larger development would enable a mix of types to be brought forward together, including starter homes, family homes, and elderly accommodation;                  it will be possible to ensure through the application process that designs and styles are high quality, integrated and suited to the area. This is preferable to an ad-hoc approach on many different, unrelated sites;                  infrastructure, services and improvements can be co-ordinated;                  the right balance of affordable tenures, dwelling types, and numbers of bedrooms can be provided to specifically meet local needs</p> <p>Requirement for WC to allocate further housing land</p> <p>4.5. The draft Allocations plan has an intended end-date of March 2026, and thus by the time it is adopted (late 2018 at the earliest) it will have an effective period of only around 7½ years. This directly contradicts the NPPF's requirement for authorities to identify a supply of specific, developable sites or broad locations for growth up to years 11-15.</p> <p>4.6. In addition, under the new methodology for calculating housing need, announced by the Secretary of State for Communities and Local Government in September 2017, Wiltshire will in due course be required to plan for a total of 2,227 dwellings per annum, reflecting an uplift of around 6% from the current position.</p> <p>4.7. Wiltshire Council must therefore plan positively, and include within this Allocations Plan a range of deliverable sites that will enable housing needs to be fulfilled, aiming to boost supply. As currently drafted, particularly in Amesbury, the plan would not achieve this. The Housing Site Allocations plan should include the allocation of the College's land at London Road, Amesbury (site 3379), because:                  The location is acknowledged by WC as sustainable, due to its relationship with the existing built-up area, and its proximity to a wide range of services and facilities;                  The site is capable of delivering the full housing requirement for the Amesbury Community Area. In contrast, WC's proposed allocations will underprovide, and on more sensitive land.</p>				

Appendix Q - Schedule of representations

	<p>The site can also deliver a significant element of B1 employment, complementing Amesbury's role as a key economic hub in the County, which is set to expand with the expansion of Boeing at Boscombe Down;</p> <p>Contrary to the incomplete analysis undertaken by WC, environmental, technical and land constraints on the site are all capable of being overcome.</p> <p>Under the DCLG's new approach to calculating housing need, Wiltshire needs to increase supply by circa 6% annually. It should also, under the NPPF, plan for up to 15 years ahead whereas the draft Allocations plan extends only to 2026. Positive consideration must therefore be given to sustainable sites such as this.</p> <p>Please refer to the accompanying statement and appendices.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4744389</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In order to adequately put forward the case for the proposed allocation of my client's site by exploring the weaknesses of the submission draft document and discussing the benefits of including the Lincoln College site as an 'omission' site.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3124</a>	<b>Consultee</b> Lincoln College Oxford  <b>Person ID:</b> 393560	<b>Agent</b> Mr Jon Gateley Associate Director  <b>Person ID:</b> 1131505	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Amesbury, Bulford and Durrington				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Pre-eminence of Amesbury compared with Durrington</p> <p>4.8. The proposed approach in the draft Allocations Plan, to allocate two sites at Durrington but none at Amesbury, runs counter to any rational assessment of the respective roles of the two settlements. Whilst Amesbury, Durrington and Bulford are combined for the purpose of housing targets (Wiltshire Core Strategy, Core Policy 4), the WCS recognises that the three settlements are distinct and play substantially different roles. Paragraph 5.16 of the WCS gives the following description (highlighting added):                  [refer to extract in attached full representations]</p> <p>4.9. With regards to Durrington, the above extract acknowledges that it is a large settlement that, relatively speaking, lacks identity. In large measure this is due to the evolution of the settlement through the 20th Century, with successive suburban estates having been added to what was originally a very small village with no commercial/service centre. Population figures published by Wiltshire Council indicate that Durrington grew over seventeen-fold between 1901 and 2011, from 427 to 7,379. The above extract also acknowledges Bulford's reliance on the other settlements.</p> <p>4.10. At the 2011 Census, the respective populations of the three settlements were as shown below:                  [refer to graph in attached full representations]</p> <p>4.11. Arising from these characteristics, paragraph 5.19 of the WCS refers to the following issues that require addressing during the plan period:                  1st bullet point – the need for ‘balanced growth focussed around Amesbury’;                  5th bullet point – ‘the need to make Durrington and Bulford more self-contained. They will have more local services and facilities to meet their own needs, meaning that functionally these settlements are less reliant on Amesbury</p> <p>4.12. Both of these strongly imply that of the three settlements under the ‘Market Town’ cluster, Amesbury is better placed to deliver residential development in a sustainable manner, since a diverse range of higher-order services, facilities, and economic opportunities are available in the town. These notably include:                  substantial areas of allocated employment land (Solstice Park and Boscombe Down), in comparison with none at either Durrington or Bulford;                  substantial high street frontage with range of specialist shops as well as professional services including banks/building societies;                  several major supermarkets (whereas Durrington and Bulford have only local convenience stores)                  major public library, police and fire stations, and greater range of schools                  greater range of locations accessible by public transport.</p> <p>4.13. Overall, Amesbury is plainly the pre-eminent settlement of the grouping with Durrington and Bulford; and as such in fulfilling Core Strategy housing development targets it should be the first priority.                  The Housing Site Allocations plan should include the allocation of the College's land at London Road, Amesbury (site 3379), because:</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Proposed Land for the Development of Houses at Southwick Court</p> <p>This letter briefly highlights a few points in opposition of the development of land for houses at Southwick Court; firstly presenting the insufficient transport infrastructure. A road for the use of the new houses has been proposed to join Balmoral Road, and therefore traffic from the new houses will use Silver Street Lane to travel to either Bradley Road or Frome Road. However as Bradley Road is already a very heavily used road, as is Frome Road, with Silver Street Lane becoming increasingly busy, any new traffic from Balmoral Road, will lead to severe congestion of Bradley and Frome Road respectively. A second problem that will inevitably arise from new houses, due to more traffic and people, is the need for new schools and the requisite parking for parents on the school run. The two primary schools likely to be used by new residents of the proposed houses are Southwick and the Grove Primary school respectively; of which the latter school has already met its carrying capacity. Regarding the parking issue, there is a paucity of parking for parent's cars at the Grove primary school such that the parent's park their cars as far down as along Silver Street Lane. The parking of more cars by parents can only exacerbate an existing problem of this parking of cars along Silver Street Lane. This problem being that cars travelling along Silver Street Lane have to negotiated a large number of these parents' cars, whilst simultaneously having to avoid traffic coming from the opposite side of the road; this will lead to much congestion along Silver Street Lane.</p> <p>Another problem that may arise from the new houses is their close proximity, and therefore the house's residents, to the solar farm in the field next to Knapp's Cottage. As new families will move into some of the new houses, it is quite foreseeable that the solar farm will present a very real danger to anyone daring enough to enter the fence behind which are the solar panels.</p> <p>A last issue is that the fields on the proposed sight of development are prone to flooding during periods of heavy rainfall, this can be verified as a problem by residents close to the proposed development site, such as those who own Bramble Farm. As concrete, being a non-porous material, is far for likely to promote flooding than the present soil and plants of the fields that aid in reducing flooding, any development has the potential to invite flooding.</p> <p>Finally, Southwick Court is a grade II listed building, and it is all very well grade listing a building, but constructing new houses so close to the Court will make a farce out of the grade listing system. This is especially true when considering some of the features belonging to Southwick Court, such as the double storey gatehouse and the moat; which will be directly next to any new houses.</p>

<b>Comment ID:</b> <a href="#">3138</a>	<b>Consultee</b> Mr J Stratton Land at Codford  <b>Person ID:</b> 1137830	<b>Agent</b> Mr Diccon Carpendale Brimble Lea and Partners  <b>Person ID:</b> 1122261	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	SHLAA Site 612 Codford, Warminster Community Area Topic Paper		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Within the Warminster community area topic paper SHLAA site 612 (Chitterne Road) was positively assessed against the exclusionary criteria and recommended to be taken forward for further consideration.			
	Under the next stages the site was carried forward to stage 3. This representation should be treated as an objection to Codford being discounted as a location for housing site allocations and, in particular SHLAA Site 612 (Chitterne Road). It has been noted from the Warminster Community Area Topic Paper June 2017 that SHLAA Sites in Codford were rejected at Stage 3 of the site selection process with the stated reasons in Table 6.5 being because of major adverse effects associated with River Avon SAC. On this basis, the Habitat Regulations Assessment June 2017 has been reviewed to provide an insight for these summary reasons for rejecting the sites at Stage 3. In the case of Codford, the settlement level screening assessment (Table 4) identifies the Likely Significant Effects (LSE) which are addressed below. Table 4 identifies a LSE for criterion W1 (Water Extraction – River Avon SAC) although the assessment results only identify potential problems in the village of Shrewton. As such, Table 4 should be modified accordingly for Codford by being coloured green with the capital letter N. Otherwise, Warminster also fails on this LSE.			
Salisbury Plain Special Protection Area (SPA) – Criterion R1 Codford has been discounted at Stage 3 on the basis that the settlement is within 6.4km of the Salisbury Plain SPA, being the distance where the majority of visitors to the SPA originate. However, this reason cannot be substantiated on the basis that Warminster is also within 6.4km of the SPA where a significant amount of new development is being focused. This will have a much greater impact than the level of development that could be achieved in Codford, and analysis elsewhere in the Habitat Regulations Assessment and the Sustainability Appraisal demonstrates that there is scope to mitigate the impact of any additional recreational pressure upon the SPA. There is no evidence to suggest that the Stone Curlew Mitigation Strategy identified in the Core Strategy, which was developed for the established housing requirements and are not changing as a result of this Site Allocation Plan, would be ineffective. As such, development in Codford as a matter of principle will not have any LSE on this SPA.				
Phosphate – River Avon SAC – Criterion P1 Codford has been discounted at Stage 3 on the basis that there is no mains sewage infrastructure, and would therefore expect any new development to have a package treatment plant which, according to the assessment, would typically discharge to the river at much higher phosphate concentrations than main sewage treatment works. There is no evidence that a package treatment plant would typically discharge to the river at much higher or, importantly, unacceptable Phosphate concentrations than mains sewerage treatment works. This is confirmed in the “Phosphorous in Package Treatment Plant Effluents” report by May & Woods in 2016, which was commissioned by Natural England (Number 221). This research was inconclusive regarding pollution from package treatment plants and concluded that a better understanding is required. Package treatment plants are subject to strict environmental permitting controls by The Environment Agency and this LSE on the SAC, which is assessed as being high risk, has therefore				

Appendix Q - Schedule of representations

	<p>been wildly exaggerated at this plan-making stage. Mitigation would be a site specific consideration through the decision-making process, with evidence accordingly.</p> <p>On this basis, it is considered that the plan is unsound and has not been positively prepared with a proper/proportionate consideration of the evidence base. A further review/assessment should be undertaken recognising that having addressed the issue of impact upon the SAC (this should not be considered a reason for opposing any further growth at Codford which would effectively stifle the future growth and sustainability of services within the village. Also, it will be noted within the site specific assessment for site 612 that any other impacts are assessed as being capable of being satisfactorily mitigated. Overall the site is extremely well related to existing built form and would comprise a modest (as in favoured within the supporting documentation) sized site and a logical rounding off of development within this part of the village.</p> <p>There is an additional site (as yet unassessed) as marked edged red on the Codford inset map attached which should also be given favourable consideration under the review process.</p> <p>The evidence base advanced in support of the plan (and in this instance the Warminster community area topic paper) is flawed and needs to be reassessed with proper/ proportionate consideration being given to those sites carried forward to stage 3. Of these site 612 is modest and well related to the existing settlement and capable of on site mitigation in relation to site specific matters identified through the process.</p> <p>Unless the plan is reappraised, it is clearly subject to challenge of being unsound in this regard.</p> <p>Throughout the plan (and in relation to other settlements not subject to this objection) a similar approach has been taken where a single issue (potentially capable of resolution with further careful Consideration or mitigation) has been used as a reason to exclude any further growth at a large village. Clearly this will have major and adverse impact upon the future sustainability of that settlement.</p> <p>Through this inappropriate application of evidence/data there are significant failings within the assessment process. The plan (and in this instance the part relating to the Warminster community area and, more specifically, the village of Codford) will need to be reappraised. Having done so it will become clear that site 612 is ideal for being recommended for allocation for a modest housing development.</p> <p>There is an additional site (as yet unassessed) as marked edged red on the Codford inset map attached which should also be given favourable consideration under the review process.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H1		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The forms indicate that the Plan is considered to be both unsound and not legally compliant. The reasons for reaching this conclusion are as follows:</p> <p>Legal Compliance and Soundness          Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment and the Environmental Assessment of Plans and Programmes Regulations 2004 (SI 2004 No. 1633) require the consideration of 'Reasonable Alternatives' in determining which sites to allocate in a Plan.</p> <p>In this case land at Fyfield (see enclosed Location Plan) is demonstrably a reasonable alternative to those considered by the Council and should have been assessed as part of the Sustainability Appraisal process. Furthermore, it is contended that the consideration of this site as a reasonable alternative should have led to the allocation of the site for residential development. These omissions mean that the Plan is legally non-compliant and it is not sound because there has been a failure to consider reasonable alternatives, with the effect that the Plan fails to deliver the most appropriate strategy when considered against reasonable alternatives.</p> <p>To remedy this significant flaw in the process, the Council must re-consider its approach to meeting the needs of the Marlborough Community Area, including the assessment of land at Fyfield as a reasonable alternative to the options already identified and assessed. Allowing a small-scale site to be allocated for local (market and affordable) housing needs at Fyfield would be consistent with Core Strategy Core Policy 1 which states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." As such it would therefore also be consistent with the principles of sustainable development.</p> <p>In addition to the above concerns, the Plan is also considered to be unsound because it fails to properly consider the most sustainable approach to meeting the objectively assessed needs of the Marlborough Community Area (CA). There is a projected under-provision of houses in the Remainder of the Marlborough CA (-14.1%). The Plan fails to make provision for this under-supply, thus undermining the delivery of the Plan's strategy and putting at risk the proposals to meet the Planning Authority's and the CA's objectively assessed needs. The justification for not allocating any sites is set out in the Marlborough Community Area Topic Paper that supports the emerging Site Allocations Plan. It states (7.2): "There is an indicative residual requirement of 34 dwellings for the Marlborough Community Area Remainder to be delivered during the Plan period. However, a main purpose of the Plan is to ensure a surety of housing land supply. To a significant degree this objective is already met for the East Wiltshire HMA. There is therefore no strategic priority to allocate sites for housing land at Large Villages where scales of housing are intended to only meet local needs. The priority for planning control to pass to the local communities to develop their own vision for the future of their area takes precedence. Local needs can be addressed through neighbourhood planning. Large Villages in the East Wiltshire HMA are therefore removed from 'areas of search'. Therefore, the Plan will not need to allocate additional land to help meet an indicative residual requirement. It is proposed that housing sites will not be identified for allocation within the Marlborough Community Area Remainder and the site selection process ends after Stage 1."</p>				

Appendix Q - Schedule of representations

	<p>This is a significant failure to properly plan for meeting the objectively assessed needs of the Plan and the Community Area. Aiming to 'only just' achieve the target figures set out in the Core Strategy is not boosting significantly the supply of housing (NPPF para. 47) and risks longer term problems in maintaining a five year supply of housing land with little or no margin for error. In order to remedy this failing, the Plan should provide for the allocation of additional sites, to ensure that the Plan is based upon a strategy that is capable of meeting objectively assessed needs of the Plan area and the CA of Marlborough. Land at Fyfield should be allocated as a housing allocation in order to assist in meeting the Council's objectively assessed needs. Land at Fyfield is available, deliverable, and its development would help to consolidate existing dispersed development at Fyfield. It is a site which can be assimilated well into the edge of the settlement with appropriate landscaping. A suitable access into the site can be achieved via the road through the village, without giving rise to harm to highway safety. See attached rep for map of omission site land at Riverdell Farm, Fyfield</p>

					Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The purpose of the Plan is set out at paragraph 1.1. In summary, the objective is to i) allocate new sites for housing to ensure delivery across the Plan period up to 2026;; and, ii) revise settlement boundaries. We are aware that the Plan builds upon the strategic framework provided by the Core Strategy which was adopted in January 2015 and it should be read in conjunction with that document and the Chippenham Site Allocations Plan. At paragraph 1.6 it states that “ Housing allocations have been made in general conformity with the settlement strategy outlined in Core Policy 1”.</p> <p>In the context of land being allocated for housing, this representation focuses on land at North Bradley. The site has not been the subject of representations by our Client previously (or by the relevant landowner as far as we are aware) in relation to previous versions of the Plan and/or any Call for Sites as part of the compilation of the Council’s Strategic Housing Land Availability Assessment. We are therefore submitting representations in relation to the site with the intention that it be included within the Plan as an allocation for housing.</p> <p>a) The Proposals</p> <p>In support of the representation we attach a copy of a pre-application enquiry to the Council. dated 1st September 2017. Accompanying the letter is a Masterplan, reference 7783 L 05. The letter and plan propose a scheme comprising, in the main, of residential development of up to 95 units together with a small scale local shopping facility. Appropriate supporting infrastructure is also proposed. The site is very well related to North Bradley and has access to local services and facilities. There is an opportunity for this scheme to create a sustainable development.</p> <p>The pre-application enquiry information confirms the nature and extent of the proposed development;; the position regarding the availability of the site and the fact that it is deliverable (a key consideration in establishing which sites should be brought forward as housing allocations). It provides information in support of our representation. Further, there is an explanation of how the scheme could be brought forward in the context of any site constraints and opportunities. The examination of relevant technical issues and how they can be addressed as part of the delivery of the scheme is important as it will give confidence that the site can be allocated.</p> <p>Therefore, we consider that the site should be included within the Site Allocations Plan. It can contribute towards meeting Wiltshire’s housing requirement as set out in the Core Strategy and a five year supply of deliverable sites over the Plan period. Its exclusion from the Plan means that we raise objection to it as it stands at present.</p> <p>Planning Justification</p> <p>Before making comments in respect of the site and its attributes we wish to make brief representations regarding the strategy for the delivery of sites within the Plan. [see other representations]</p> <p>As stated earlier, the Council has identified sites through a process of evaluation. The selection process is set out in Topic Paper 2. Each site as part of its evaluation has been assessed against agreed sustainability criteria (Stage 3). The ‘Sustainability Objectives’ are set out in Table 5.1 of Topic Paper 2. We have reviewed the objection site against those criteria. As we have yet to complete our final technical assessment of the site we have been unable to complete a full evaluation against the criteria (nos. 1 to 12) as set out. However, from the work undertaken so far and</p>				

Appendix Q - Schedule of representations

	<p>having regard to the information provided in the pre- application enquiry letter (submitted with this representation) [see attached and other representations] we consider that in general terms the site performs as well and in some cases better than those sites proposed for allocation. We have reviewed the allocations proposed in terms of their suitability to come forward. It is noted that:</p> <p>The sites being on the edge of the built up area of Trowbridge have reasonably good access to services and facilities;;</p> <p>All involve the development of greenfield sites;;</p> <p>A number of the sites have a collection of potentially difficult technical issues to deal with in terms of ensuring that the development results, overall, in no significant adverse impact. Heritage, ecological, drainage and access issues affect most sites;;</p> <p>Five of the six sites are on the southern side of Trowbridge. If brought forward they would significantly close the 'gap' between the town and the villages to the south of Trowbridge, in particular, North Bradley;;</p> <p>In allocating the sites reference has been made to the number of units/density being reduced. Has that reduction been agreed with the relevant landowner/promoter? and,</p> <p>Four of the sites have a capacity (for the purposes of the allocation) of over 150 units. Should any one of those sites not come forward that leaves a significant deficit regarding delivery and meeting local needs in and around Trowbridge.</p> <p>By contrast the site at North Bradley offers the following:</p> <p>Providing development that will address ongoing local housing needs over the Plan period;;</p> <p>Provide a scheme of circa. 95 units residential units;;</p> <p>Providing a local retail facility that would improve local shopping provision with added community benefits;;</p> <p>Providing development that has access to local services and facilities by bus, cycling and walking;;</p> <p>Provide development on a flat greenfield site that is free from any significant constraint. There are technical issues/constraints that need to be addressed as set out in the pre-application enquiry letter dated 1st September 2017. However, none of these issues are out of the ordinary and are 'typical' of a development of this nature;; and,</p> <p>Development on the south western side of the village avoids encroachment towards Trowbridge so avoiding a potential for merging (at a later date) of the two settlements.</p> <p>Having regard to the fact that the site is not allocated then objection is raised to Policy H2 of the Plan. The site should be included in the list of allocated sites, given its own reference no. and description.</p> <p>Conclusion</p> <p>We consider it appropriate to bring the site forward within the Plan. The allocation of this site would represent sustainable development in the context of the NPPF. We consider that for the reasons as set out in this letter it offers both a viable alternative to other sites identified in the Plan at Trowbridge or noting the desire of the Council to apply a robust approach to providing a five year supply of deliverable sites throughout the Plan period, it would be an appropriate addition.</p> <p>As stated earlier we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 182 on the NPPF. In respect of the test as to whether the Plan is justified then we consider that it fails and is unsound as the Plan has not adopted the most appropriate suitable strategy for the distribution of housing when considering the reasonable alternatives. It cannot therefore be considered to be neither justified or effective.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4746726 / 4746728 / 4746741 / 4746727 / 4746729</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We wish to be kept informed of the progress of the Plan and support our objections at the forthcoming Examination into the Plan. The Plan as presented (under regulation 19) does not present the most effective strategy to deliver development to meet the needs of Wiltshire. We need to present our representation orally to fully explain why this is the case and proposed changes to make the Plan sound.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As stated earlier, paragraph 1.6 of the Plan states that it is in general conformity with the Core Strategy. It needs to be in terms of providing sufficient land to meet the agreed housing requirement (as set out in the Core Strategy) and, most importantly, in order to provide a five year supply of housing land as set out in the NPPF.</p> <p>In terms of the spatial strategy of the Core Strategy and in establishing how the overall housing requirement may be met and in seeking to achieve a five year housing land supply the Plan refers, in Chapter 4, to the minimum amount of housing to be allocated (Table 4.1). It states at paragraph 4.2 that a surplus is needed “to maintain five years supply of housing land in each HMA and to surpass the buffer in excess of five years required by the NPPF.” This is re-iterated in Topic Paper 4, paragraph 1.5. We support this strategy but highlight the need for the Council to be robust in its approach so that sufficient land is indeed allocated. This is important noting that the Council has a history of being unable to achieve a five year housing land supply, at least in the North and West Wiltshire NMA.</p> <p>The different components of supply are set out at Table 4.7. The North and West Wiltshire HMA has, by far, the biggest housing apportionment. The number of units to be allocated in the Plan result, in part, from understanding the amount remaining to be identified including completions, commitments and a windfall allowance. As stated in Topic Paper 3, paragraph 3.10, the latest confirmed housing land supply position is presented in the update to the 2016 Housing Land Supply Statement (March 2017). The Council go on to say they have estimated the 2017 base date housing land supply position to inform the Plan.</p> <p>In our view, it is important to understand the most up to date position on confirmed evidence and would expect an update to be published before the Plan is actually examined. With that in mind we do not intend examining figures in great detail at this stage except to say that whilst we understand that the housing requirement has been established through the Core Strategy and therefore remains unaltered (understandably) through the process of allocating sites through the Plan, the number of commitments and windfalls may alter.</p> <p>The supporting evidence to the Plan examines the contribution commitments and windfalls make to meeting the housing requirement. Notwithstanding the fact that some resilience testing has been undertaken, we urge caution in terms of placing too much reliance on these components of supply. As stated earlier, the Council has recently not been able to achieve a five year housing land supply in the North and West Wiltshire HMA in recent years. The figures for commitments and windfall sites are significant and we have concern that there is potential for a significant proportion of those sites not to come forward. Further it is acknowledged that in Wiltshire a number of large, mixed use sites make up a significant component of supply in each HMA (Topic Paper 4, paragraph 1.5). Our experience of these sites is that they are slow to deliver. They are affected by commercial considerations and minor fluctuations in the economy. That being the case, it gives weight to the justification for giving priority to allocating sites that are known to comprise, in the main, housing.</p> <p>The introduction of a series of Community Areas within the Core Strategy ensures local needs are met which is important given the geographical extent of Wiltshire. In our opinion, delivery and meeting local needs should be the key considerations when identifying sites (housing allocations) for development in the Plan.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In terms of the identification of sites, there is much discussion in the evidence regarding exactly where sites should be located in terms of the size/characteristics of settlements. In respect of Large Villages (of interest to our Client given the status of North Bradley) Topic Paper 4 states that resilience testing has established development at large villages should be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. (Topic Paper 4, paragraph 2.16). It goes on to say that the Neighbourhood Plan process is the most appropriate means of assessing local needs and plan growth at Large Villages.</p> <p>North Bradley sits in the Trowbridge Community Area remainder. The Trowbridge Community Area Topic Paper at paragraph 2.10 states that as there has been more delivery than expected no further allocations are necessary. We have concerns regarding this approach which should be treated as objections to the Plan.</p> <p>First, a failure to deliver any further housing in a remaining part of a Community Area ignores the fact that housing needs will continue to evolve. Whilst purely in quantitative terms sufficient housing may have been delivered such that housing targets are met, there will be an ongoing need, particularly for affordable housing. The indicative residual requirement of 23 units to be provided between 2017 and 2026 is unlikely to meet any significant needs.</p> <p>Whilst the Council rely on the Neighbourhood Plan process to deliver future housing in recognition of ongoing local housing needs, there is no certainty that a Neighbourhood Plan is going to come forward. In Table 2.3 of the Community Area Topic Paper it provides the latest position regarding the North Bradley Neighbourhood Plan. There is no evidence to suggest that it is going to be delivered in the short or medium term. That is not, in any way, a criticism of the progression of the Plan as there are many factors that can influence its delivery. However, we are concerned that no future housing (up to 2026) in the form of site allocations within which, in our view, there is the greatest opportunity to provide affordable housing have been identified. With no allocations being provided then this will potentially not lead to local needs being met.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>We wish to be kept informed of the progress of the Plan and support our objections at the forthcoming Examination into the Plan. 				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Second, there seems to be a lack of recognition in the Plan of the relationship of Trowbridge to surrounding settlements and in particular North Bradley. North Bradley is a short distance from the built up area of Trowbridge and there is potential for a site (or sites) around the village to i) assist in meeting Trowbridge's needs and ii) perform as well as those that simply sit on the edge of the town.</p> <p>The sites to be allocated are identified in the Plan. The evidence supporting their allocation is contained within a number of documents but of particular relevance is the Trowbridge Community Area Topic Paper. In terms of site selection, all sites under consideration have been through the process set out on the diagram after P.11. There has been a reliance on SHLAA sites to identify appropriate sites for allocation however the site at North Bradley has not been the subject of a SHLAA submission as stated earlier. Through a 'sifting' site selection process (set out in Topic Paper 2) the allocated sites are confirmed in Table 5.7 of the Community Area Topic Paper.</p> <p>The justification for including these sites is set out in the remainder of the document including appendices. It is relevant to note that in the Conclusions at P.107 it states "Whilst they i.e.seven sites considered in the final stage of the selection process would not be capable of delivering all the indicative housing requirements for the town, they would nonetheless positively contribute towards meeting some of the indicative shortfall." We are therefore concerned that in not meeting the shortfall, the delivery of sites does not deal with the fully assessed needs of Trowbridge. Not enough housing is identified as being capable of being delivered with any great certainty. Whilst windfall sites may be relied upon to make up the shortfall it is better for the windfall allowance to create that extra supply (on top of the housing requirement being met through confirmed commitments including housing allocations) particularly as it sees the housing requirement as being a minimum.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It is absolutely fundamental that the Housing Site Allocations Plan assists the Government's Objective, as set out in paragraph 47 of the National Planning Policy Framework to "boost significantly the supply of housing".</p> <p>Core Policy 2 of the Wiltshire Core Strategy requires that a minimum of 42,000 dwellings is provided for within the period 2006 and 2026. Furthermore, when the Core Strategy was adopted in 2015 a key element of the housing delivery strategy was the provision of a significant amount of the minimum 42,000 through the Housing Site Allocations Plan.</p> <p>It is clear that new housing should be located in sustainable locations. In this respect it is highly material to note that as part of the preparation for the Core Strategy the Council undertook a Strategic Housing Land Availability Assessment (SHLAA). The land at The Grange (as shown on the enclosed Location Plan) is identified as Site Reference 291 in the SHLAA where under the detailed assessments of the SHLAA analysis, "Potential Suitability Constraints" show no prohibitive factors and under "Suitability" the assessment is suitable.</p> <p>The land at The Grange was also subject to a recent planning application (Ref: 16/01633/OUT) for the erection of up to 26 dwellings. Following as decision by the Council to refuse planning permission the decision was appealed and a decision issued in August of this year. (NB, it should be stressed that this decision is subject to a current legal challenge).</p> <p>The Inspector assessed the suitability of the location for new residential development and concluded that it was indeed in a suitable location. This was the same judgment as an Inspector who allowed an Appeal in December 2014 (Ref: 13/06879/OUT) for the erection of 15 dwellings on land immediately to the east of the land at The Grange.</p> <p>The Appeal for the land at The Grange was dismissed due to the Inspector's concerns about the "less than substantial" harm to the character of the Hilperton Conservation Area due to the loss of the gap on the south side of Devizes Road. This concern, however, should not negate the potential for some form of development on the land (which in my view can be suitably designed in terms of its layout, form and landscaping to ensure that the character of the Conservation Area is not harmed.).</p> <p>Enclosed with this submission is a document titled, "Proposed Settlement Boundary Alteration". Plan 1 shows the context of the land at The Grange, the land immediately to the east which has planning permission for the erection of 15 dwellings, the current Settlement Boundary and the minor revisions which are currently being proposed.</p> <p>The land at The Grange is readily deliverable and there are no site constraints to prevent it coming forward immediately for development. It is unquestionable that it's sustainable credentials score highly, as recognised by the Council's appraisal of the site during the SHLAA process leading to the adoption of the Core Strategy, the Appeal decision in December 2014 on the land to the east, and the appraisal by the Inspector in the recent August decision relating to the site.</p> <p>For the Housing Site Allocations Plan to be sound it is only right that land which is in a sustainable location, and deliverable / achievable, should be brought forward for development.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Entire Plan / Overarching comment			Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Principal Concerns</p> <p>Terence O'Rourke Ltd has been appointed by Gleeson Development's Ltd (Gleeson) to respond to the current consultation on the draft Wiltshire Site Allocations DPD (the draft DPD). Gleeson retains land interests in a number of sites at different settlements across Wiltshire, which offer the opportunity to secure sustainable plan led development.</p> <p>This representation deals with a number of concerns principally:</p> <p>The DPD has not been brought forward in the way envisaged when the Core Strategy inspector found the Core Strategy to be sound, particularly with respect to meeting the objective assessment of housing need (OAN). This is inconsistent with the NPPF.</p> <p>The evidence base is insufficient, in particular the sustainability appraisal and the topic papers have not been positively prepared because the Council started from a point of not assessing all of the opportunities for sustainable development across Wiltshire as part of the process.</p> <p>The output is that reasonable alternatives have not been considered.</p> <p>Also, that the plan will not be resilient and will be ineffective in meeting housing need, including addressing affordability issues.</p> <p>Overall the plan cannot be considered sound as it is not positively prepared, justified or consistent with national policy.</p> <p>Site-specific representations, and the justification as to why various sites should be allocated in the draft DPD, have been provided separately.</p> <p>Positively prepared</p> <p>Paragraph 47 of the Framework states that a Local Plan should meet the full objectively assessed needs for market and affordable housing in the relevant HMA as far as is consistent with the other policies of the Framework. There has been no attempt in the draft plan to meet the objectively assessed need (OAN) as set out below.</p> <p>The Wiltshire Core Strategy Inspectors report at paragraph 78 identified the OAN as around 44,000 and later in paragraph 80 stated "... the sites DPD, the Chippenham Site Allocation DPD and the neighbourhood planning processes will enable the Council to proactively seek to meet, and if necessary reassess, its objectively assessed housing need and plan for its provision accordingly".</p> <p>The inspectors report goes on to state "Indeed, I am particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes. Consequently I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more".</p> <p>As stated this was the 'minimum housing figure' and is not the OAN. The Inspector was expecting a revised SHMA with a new OAN in early 2016 and clearly set an expectation that Wiltshire Council should be planning, through subsequent DPDs, to meet this OAN as well as the 'Swindon allowance' (900 homes) because the latter does not meet the housing needs Wiltshire. No updated SHMA with revised OAN has been published to date. Nevertheless, the most recent evidence, as reported to the Swindon Wiltshire Local Enterprise Partnership on 14 February 2017 and correlating with the Government's recently published OAN figures using a standard methodology (currently subject to consultation), is that the OAN remains at or above 44,000 homes across a 20 year period.</p>				

## Appendix Q - Schedule of representations

It is surprising that the consultation document makes no mention of these requirements, set by the Core Strategy Inspector. Further, whilst it is noted that the Site Allocations DPD proposes to allocate more than the minimum requirement, the additional provision, only amounts to 996 dwellings (above the minimum requirement) which falls significantly short of meeting the OAN and making up for the Swindon allowance. If these OAN/Swindon allowance requirements are to be met, in accordance with the NPPF and Government imperative to boost the supply of housing, a further circa 2,500 homes should be identified/allocated across Wiltshire within the DPD. A positive approach must be taken, looking for opportunities to accommodate the homes needed.

In recognition of the need, the Wiltshire Core Strategy distributed the indicative minimum across each community area, with this only being an indicative minimum due to the lack of a comprehensive evidence base of available sites and their sustainability. Flexibility to deliver more in any one Community Area was fundamental to the soundness of the Core Strategy and to its consistency with the NPPF.

In this context, the council's insufficient response to the overall numbers through the Site Allocations DPD, as set out above, creates a fundamental lack of soundness within the plan. Further its approach, as put forward in Topic Paper 2, of only assessing opportunities to allocate housing in community areas where the indicative minimum housing requirement has not been met is fundamentally flawed. The approach responds only to appeal success (resulting from sites being released over the last two years through s78 appeals given the presiding shortfall in housing land supply over that period) and fails to provide a positive approach by failing to consider and allow opportunities for sustainable plan led development which could assist settlements in meeting their own housing (market and affordable) and economic / community needs and assist more widely in meeting the full OAN across Wiltshire, as required by national policy.

In addition, the objective for the plan to "demonstrate a rolling five year supply" and to "allocate sites at the settlements in the County that support the spatial strategy of the Wiltshire Core Strategy" does not go far enough. An objective of the DPD should be to meet the OAN, and the DPD should be allocating sufficient sites to meet the OAN, not the minimum housing figure, in order to be consistent with National Policy.

In the preparation of the site allocations plan, the council should have firstly understood the capacity of all promoted sites in each community area (which should have formed the evidence base) to undertake a full sustainability appraisal to determine which are most sustainable to allocate in each housing market area in order to fully meet the OAN.

The approach that has been taken conflicts with one of the key outcomes set by the core strategy, with an outcome of Objective 3 being: 'providing everyone with access to a decent, affordable home'.

Paragraph 4.22 of the Core Strategy states that:

"The indicative figures also allow a flexible approach which will allow the council, including through the preparation of the Site Allocations DPD, and local communities preparing neighbourhood plans, to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach which might otherwise prevent sustainable development proposals that can contribute to delivering the strategic objectives of the plan".

By restricting allocations only to those community areas and settlements that haven't met their indicative requirements, a rigid and negative approach is taken, frustrating sustainable development, contrary to the core strategy and contrary to national policy.

The plan is not sound in its current form as it is not positively prepared and inconsistent with national policy.

Justified

The NPPF requires the plan to be "the most appropriate strategy when assessed against the alternatives".

The plan process has not assessed reasonable alternatives. Sustainable sites across housing market areas have not been assessed as reasonable alternatives, as the area of search for sites has been artificially restricted. We consider that this is contrary to national policy.

It may at times be more sustainable to meet a housing requirement in a different settlement or community area, than where the need arises (which is the fundamental justification for the Wiltshire Core Strategy approach to the settlement hierarchy). The DPD evidence has not assessed whether this is the case, and therefore cannot be considered to be 'the most appropriate strategy' for Wiltshire, as required by paragraph 182 of the NPPF. The indicative requirements allowed for this flexibility, yet no flexibility and no resilience have been tolerated in the approach to the DPD. As a consequence, it is not justified.

Effective

To be effective the NPPF states that the plan should be deliverable over its period, including being based on effective joint working on cross-boundary strategic priorities. One concern is that Wiltshire Council has agreed to work with Swindon Borough Council on housing needs. A revised SHMA was available to the Council 12 months ago, yet the Council has failed to date to publish or take positive action to address the

Appendix Q - Schedule of representations

	<p>output. We still expect the SHMA to be published imminently, but at this stage it is unclear as to how 'effective joint working' has been undertaken.</p> <p>It is of concern that by only allocating development in community areas where the indicative Core Strategy (non OAN) housing requirement has not been met does not allow for a positive response to the findings of the new SHMA, including any re-drawing of housing market areas, does not respond to the considerable housing land supply shortfall in Swindon Borough, does not allow for the OAN to be met and does not allow flexibility and resilience should any of the sites relied upon not deliver as expected. If the Council become a 20% buffer authority the DPD position will become indefensible.</p> <p>To be effective, the plan should take a more flexible approach, allowed for by the Core Strategy and expected by the Core Strategy Inspector when he found that plan sound, and allocate additional sites.</p> <p>Consistent with national policy</p> <p>As set out above, there are a number of elements of national policy that the draft DPD is not compliant with. In particular the requirement to significantly boost the supply of housing set out in paragraph 47 of the NPPF. This is a Government imperative, supported by the recent Ministerial Statement made alongside publication of the draft standard methodology to calculate OAN. Furthermore the requirement at NPPF paragraph 28 to support economic growth in rural areas. The DPD Fails to take a positive approach to sustainable new development, as one of the starting points to achieve sustainable development (the OAN) has been ignored and the full potential to identify sustainable new housing sites has not been assessed.</p> <p>Summary</p> <p>In conclusion, the Wiltshire Site Allocations Plan is required to meet four tests to be considered 'sound', as set out in paragraph 182 of the NPPF. It is considered that none of these have been met / demonstrated. The plan is not sound in its current form.</p> <p>As established at the core strategy examination and supported by more recent evidence, the OAN for Wiltshire is 'around 44,000 dwellings. To be compliant with National Policy, Wiltshire Council should be positively seeking opportunities to allocate sufficient sustainable sites to meet the OAN. Yet, this is not part of the objective of the plan. The plan cannot be considered to be positively prepared or consistent with national policy. It is not sound.</p> <p>The NPPF requires the plan to be "the most appropriate strategy when assessed against the reasonable alternatives". Allocating development in Community Areas or settlements which have already met their indicative minimums (particularly given the process from which those requirements have been met – which has released sites on their own merits rather than against reasonable alternatives) is clearly a 'reasonable alternative'. The council should have taken a more flexible approach, as allowed for by the Core Strategy and expected by the Core Strategy Inspector, to ensure the most appropriate strategy is proposed. Without having assessed this, the plan cannot be considered justified and is not sound.</p> <p>There is concern over the effectiveness of the policy, as it is not clear how work with Swindon has been integrated into the proposed plan and how the plan has responded to the redefined Housing Market Areas and difficulty that Swindon has with meeting its own OAN and five-year housing land supply. The Plan, particularly at this stage in its preparation, must respond positively to the most up to date evidence base in order to be effective. This is a key requirement of the NPPF.</p> <p>It is also of concern that there is no allowance for non-delivery or under delivery in community areas.</p> <p>The NPPF requires that the plan should "enable the delivery of sustainable development in accordance with the policies in the framework". The plan does not enable the delivery of sustainable development, with opportunities for sustainable development precluded. It is not in accordance with the NPPF requirement to 'significantly boost the supply of housing'.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Gleeson Developments Ltd controls land in the Wiltshire area that is capable of making a sustainable contribution towards Wiltshire's future housing supply, it is therefore important we are able to participate orally to expand on the comments we have made within this representation.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		1.20			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	At paragraph 1.20, the draft WSAP purports to quote the four tests of soundness set out in paragraph 182 of the NPPF. However, the test for a plan being justified has not been identified correctly, inaccurately stating that a plan should be “an appropriate strategy”, whereas the correct test is that the plan should be “the most appropriate strategy”. The difference between “an appropriate strategy” and “the most appropriate strategy” is hugely significant and will fundamentally affect the soundness of a plan. Paragraph 1.20 must be reworded such that it correctly reflects the tests for soundness set out in paragraph 182 of the NPPF.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The difference between a plan having “an appropriate strategy” and “the most appropriate strategy” is potentially huge and fundamental to the question of whether a plan is sound. It is essential that this matter is drawn to the examining inspector’s attention, unless the plan is amended in advance.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	N & W HMA. Housing delivery strategy. Lyneham			Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Land at Pound Farm, Lyneham The following response should be read in the context of the overarching response we have submitted on behalf of Gleeson Developments Limited to the DPD that deals with a number of principal concerns with the approach. [Officer note: The 'overarching response' is contained in the comment with ID 3150] The council's approach of only allocating housing in community areas and settlements where the indicative housing requirement has not been met is flawed, and does not allow sustainable plan led development which could otherwise assist settlements in meeting housing needs (market and affordable) housing and other needs of settlements. The WCS states as a key outcome of Objective 3: 'providing everyone with access to a decent, affordable home' and that paragraph 4.22 of the Core Strategy states that: "The indicative figures also allow a flexible approach which will allow the council, including through the preparation of the Site Allocations DPD, and local communities preparing neighbourhood plans, to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach which might otherwise prevent sustainable development proposals that can contribute to delivering the strategic objectives of the plan". By restricting allocations only to those areas which haven't met their indicative requirements is taking a rigid approach preventing sustainable development proposals, and the plan cannot therefore be considered to be positively prepared. An indicative requirement of 1,455 dwellings in Royal Wootton Bassett, and 1,070 dwellings for the remainder of the community area provided in the Core Strategy. In the adoption of the Core Strategy the inspectors report in recommending adoption of the Core Strategy, commented upon the indicative housing requirements for the community area, and stated in paragraph 325: "Consequently, the level of indicative housing contained in Core Policy 19 is proposed to be 1,455 homes, of which some 1,070 would be at Royal Wootton Bassett and 385 in the remainder of the Community Area. Given the levels of need across the wider county, I consider that these are relatively low figures". Further the Inspector's report goes on to state in paragraph 326 in dismissing the view that WC should be making a strategic allocation in the community area stated: "the Council's strategy towards this community area is cogent, consistent with the objectives of the CS as a whole, is supported by evidence and the housing volumes are expressed Indicatively thus not precluding additional provision". The approach taken by the council of ruling out development because the indicative housing requirement has been met is thus contrary to the approach intended at the adoption of the Core Strategy, and the approach advocated in the Inspector report. In paragraph 327 the Inspector in fact considered that: "The Sites DPD will provide an opportune moment, working alongside any neighbourhood planning processes, to review the need for additional housing land in Royal Wootton Bassett and the Community Area as a whole".				

Appendix Q - Schedule of representations

	<p>In this Site Allocations DPD WC should be taking this 'opportune moment' to review the need for additional housing land in the community area. The approach WC are taking is in direct conflict of that envisaged when the Core Strategy was recommended for adoption, and in direct conflict with the government's objective to 'significantly boost the supply of housing'.</p> <p>It also conflicts with the evidence base, which informed the core strategy. Appendix 4 of Topic paper 15 states in relation to the community area that</p> <p>"The need to ensure flexibility to enable local communities to deliver growth in response to local needs and aspirations should be part of the long-term strategy for the Community Area. It is not considered necessary to revise the scales of growth proposed in Wiltshire (of 1,250 homes). In rural areas the appropriate scale of growth should be determined locally through engagement with localities in the preparation of a site allocation Development Plan Document and/or through local Neighbourhood Plans".</p> <p>This is clearly not happening and therefore the plan is unsound in this regard, and not positively prepared.</p> <p>In Lyneham, the primary school has surplus capacity, there is an urgent need for affordable dwellings, and there is a deficit in open space for the village. The recent appeal decision in relation to Pound Farm accepted that development of the promoted site would deliver substantial benefits including a better landscaped edge to the village, affordable homes and the impact of the proposed development on the listed rectory in close proximity to the site would be outweighed by the public benefits of the proposal. The site benefits from a frequent bus service in close proximity, providing three buses an hour to Chippenham and Swindon. There are a range of employment opportunities in the village, and services and facilities.</p> <p>Residential development will assist in sustaining the facilities in the village, whilst the future of the MOD site is considered.</p> <p>In other large villages, including Bratton, the draft DPD is proposing to allocate sites which will then exceed the community area indicative minimums with justification that there is a local need. There is a clear local need in Lyneham, both due to the affordable housing need, and the need to support local services including the presence of a primary school with surplus capacity.</p> <p>This site should have been considered for allocation, and is a suitable, available and deliverable. Whilst Gleeson has a land interest as shown in the attached plan, it is considered that part of the site can accommodate up to 50 dwellings, and be in accordance with the Wiltshire spatial strategy.</p> <p>The draft DPD is unsound, and needs to go beyond solely allocating sites to enable community areas to meet their indicative requirements, but to proactively embrace opportunities for sustainable development across Wiltshire.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4747322</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Gleeson Developments Ltd controls land in the Wiltshire area that is capable of making a sustainable contribution towards Wiltshire's future housing supply, it is therefore important we are able to participate orally to expand on the comments we have made within this representation.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3153</a>	<b>Consultee</b> Gleeson Developments Ltd  <b>Person ID:</b> 817896	<b>Agent</b> Mr Martin Miller Technical Director  Terence O'Rourke  <b>Person ID:</b> 817881	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		East HMA. Housing delivery strategy. Pewsey		Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Pewsey Old Hospital Phase III The following response should be read in the context of the overarching response we have submitted on behalf of Gleeson Developments Limited to the DPD that deals with a number of principal concerns with the approach. [Officer note: The 'overarching response' is contained in the comment with ID 3150] Gleeson Development's Limited owns the freehold of land at the former Pewsey Hospital, part of which has been developed for residential uses. The site, which would provide an extension of the existing housing development, provides a suitable and sustainable location for additional housing. If allocated, it would be deliverable with reference to NPPF footnote 11. The Made Neighbourhood Plan for Pewsey (June 2015) states in Policy 1 that development outside the limits of development may be brought forward through a sites allocations development plan document, reflecting the examining report when considering the limits of development and potential that these might change through the District Council's review of settlement boundaries and allocation of non-strategic housing sites in the Site Allocations DPD, that: "Furthermore, the second criterion of the policy recognizes that in certain circumstances, described in the policy as "exceptional", there are occasions when development outside the LoD [limits of development] may be acceptable. This will be brought forward through a site allocation DPD, a community planning document or as an exceptions site. Therefore whilst the policy steers development it also has sufficient inbuilt flexibility as it does not preclude development outside the LoD and therefore helps to plan positively for the area." (Independent Examiners Report paragraph 75, dated 17 April 2015) There is no reason as to why a sustainable site should not be allocated at Pewsey in the Site Allocations DPD. Whilst the outstanding indicative housing requirement for the Community Area has been met, Pewsey is a local service centre, which is intended in the Wiltshire Core Strategy Policy CP1 to "provide for modest levels of development in order to safeguard their role and to deliver affordable housing". These figures are also minimums. The fact that there is a made neighbourhood plan, or the fact that the latest monitoring data indicates that the indicative requirement has been met, should not form the basis for precluding the allocation of housing sites at Pewsey. Such sites could contribute to sustainable development through the plan led process. The neighbourhood plan currently allocates two sites, 'Malborough Road' and 'Old Hospital Phase III site' for 49 and 9 dwellings respectively. There remains doubt that the Marlborough Road site is in fact deliverable as it is not being progressed in terms of a planning application despite the allocation having been confirmed two years ago. In any event, this scale of allocation (58 dwellings) is very low for a Local Service Centre, noting that a number of large villages, which are a step down in the settlement hierarchy, are allocated to receive an additional 50 dwellings each.			

Appendix Q - Schedule of representations

	<p>The promoted site in Pewsey benefits from many sustainability credentials, including the location in proximity to Pewsey Train Station (10 minute walk, under 0.5 mile), and the village centre (12 minute walk, 0.6 mile), less than half a mile from Pewsey Vale School, Pewsey Primary School and 0.2 miles from Pewsey Swimming and Sports Centre.</p> <p>Previous work has demonstrated that the development of the site would have no negative impact of the AONB. This was confirmed by the publication of the 'Landscape Sensitivity of Sites within the North Wessex Downs AONB' undertaken by Land Management Services Limited in 2012. At that time, this (together with a much smaller site on the north-eastern edge of the settlement) was the only site put forward in the SHLAA, located outside the settlement boundary at Pewsey, considered to have potential for some development. Nothing has changed in this respect since that time.</p> <p>The capacity of the site is in the region of 40 dwellings, which would also respond positively to site context and the settlement boundary/character, enable the provision of green space and footpath links through the site, as well as the retention of important trees, and retain a significant buffer to the adjacent health care use.</p> <p>The flawed methodology adopted by the council, has resulted in sustainable sites such as this site being discounted, and not assessed as reasonable alternatives. Therefore the plan cannot be considered sound.</p> <p>To be sound, the evidence base needs to assess all sites available and promoted for development, within each housing market area and assess those through the Sustainability Appraisal. At the Core Strategy stage, there was not enough detailed evidence base to understand the capacity of each settlement, it is for the Site Allocations plan to do this.</p> <p>The site at Pewsey is available, and can assist Wiltshire Council in 'significantly boosting the supply of housing' in accordance with the NPPF.</p>

<b>Comment ID:</b> <a href="#">3154</a>	<b>Consultee</b> Gleeson Developments Ltd  <b>Person ID:</b> 817896	<b>Agent</b> Mr Martin Miller Technical Director  Terence O'Rourke  <b>Person ID:</b> 817881	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	N & W HMA. Housing delivery strategy. Malmesbury.			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Malmesbury The following response should be read in the context of the overarching response we have submitted on behalf of Gleeson Developments Limited to the DPD that deals with a number of principal concerns with the approach. [Officer note: The 'overarching response' is contained in the comment with ID 3150] Malmesbury is a sustainable market town, identified in the Core Strategy as a second order settlement. It contains a local primary and secondary school, has a significant employment base, as well as a range of community, leisure and retail facilities. As a consequence of the range of employment opportunities in the town, coupled with too few homes and affordability issues, there is an established pattern of in-commuting for work, particular as for the town's major employer, Dyson, the majority of the workforce live outside the Malmesbury Community Area. The level of in-commuting for work will undoubtedly increase as Dyson expands and because the level of housing growth planned for the town does not match the job growth that is happening. As such, Malmesbury should delivery additional housing growth beyond those already planned. Whilst we acknowledge the Malmesbury Neighbourhood Plan has allocated sufficient sites to meet indicative housing requirement set out in the Core Strategy this indicative requirement should not be seen as a minimum or a ceiling to development. This is particularly the case as whilst the Backbridge site has a live planning application, to date it has failed to delivery a key link to the town centre that is a requirement of the neighbourhood plan in order to make the site sustainable. The Core Strategy Inspector was clear that the total housing requirement of 42,000 should be seen as a minimum as the objectively assessed housing need at the time was in fact 44,000. As a sustainable location, Malmesbury should be delivering more development, over and above the indicative requirement to help meet this need and reduce the level of in-commuting to the town. The evidence base is flawed as it fails to consider all locations by excluding areas where there is an adopted Neighbourhood Plan, such as Malmesbury. As a market town, Malmesbury is the most sustainable location and should be considered for additional growth. The adopted Neighbourhood Plan does not mean Malmesbury should not be considered in terms of its ability to accommodate more growth. By means of examples, the Farnham Neighbourhood Plan was made on the 28 July 2017. Following its adoption modifications to the Waverley Local Plan Part 1 have been considered by the Council, increasing Farnham's overall housing requirement, with additional sites to be allocated over and above those allocated in the made Neighbourhood Plan. Waverley Borough Council has sought legal advice on this approach which has confirmed it is appropriate and that full weight can still be attributed to the Neighbourhood Plan in these circumstances. The Sustainability Appraisal has only assessed sites in the remainder of the Malmesbury Community Area, the assessment process should have also considered sites within the Malmesbury Neighbourhood Plan area, their sustainability credentials and the benefits they may deliver. Gleeson has a long-term option in respect of land to the northern edge of Malmesbury, known as Whychurch Farm to the south of Filands, see attached site location plan.			

Appendix Q - Schedule of representations

	<p>The site is a sustainable site that is abutting the settlement boundary of the town. It is suitable, sustainable and deliverable and could deliver circa 300 dwellings, additional employment space, and a considerable amount of public open space.</p> <p>There is also land that has outline planning permission in place to deliver a primary school if required. The suitability and sustainability of this area of the town was accepted when planning permission was granted at appeal for the land to the south of Filands, now know as Filands View.</p> <p>There are no major constraints to development on the site. The land is on the other side of the town to the Cotswold AONB and is located away from environmental and flood risk constraints to the south of the town. Development can be developed to retain views of the Abbey. This area is well located in terms of its proximity to existing employment opportunities, such as Dyson Campus and is well related to the built form of Malmesbury.</p> <p>Development in this location can integrate well into the landscape and provide a natural edge to the town. It would benefit from the retention of mature trees and hedgerows. There are no technical constraints to development.</p> <p>There is a wide variety of community facilities within reasonable walking and cycling distance:</p> <p>Dyson, a key local employment that is delivery a major programme of expansion expected to provide up to an additional 3,000 jobs in the town.</p> <p>Gloucester Road and Park Road Industrial Estate  Malmesbury town centre  Malmesbury Church of England Primary School  Malmesbury Secondary School  Waitrose</p> <p>The site is also accessible to a range of bus services providing links into the town centre, to Cirencester and Swindon.</p> <p>The site is deliverable, available and offers a suitable location to deliver new housing with a realistic prospect that housing will be delivered on site within the plan period.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	N & W HMA. Housing delivery strategy. Westbury			Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Land at Westbury Leigh</p> <p>The following response should be read in the context of the overarching response we have submitted on behalf of Gleeson Developments Limited to the DPD that deals with a number of principal concerns with the approach. [Officer note: The 'overarching response' is contained in the comment with ID 3150]</p> <p>Gleeson Developments Limited has an option at Westbury Leigh, which provides a suitable and sustainable site for housing development. If allocated, it would be deliverable with reference to NPPF footnote 11.</p> <p>The council's approach of only allocating housing in community areas / settlements where the indicative housing requirement has not been met is fundamentally flawed. It responds only to the release of sites through the s78 appeal process over the last few years and fails to respond positively to the opportunity for sustainable plan led development, which could assist settlements in meeting housing needs (market and affordable) and other economic and community needs of the settlement.</p> <p>The WCS states as a key outcome of Objective 3: 'providing everyone with access to a decent, affordable home' and that paragraph 4.22 of the Core Strategy states that:</p> <p>"The indicative figures also allow a flexible approach which will allow the council, including through the preparation of the Site Allocations DPD, and local communities preparing neighbourhood plans, to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach which might otherwise prevent sustainable development proposals that can contribute to delivering the strategic objectives of the plan".</p> <p>By restricting allocations only to those areas that have not met their indicative requirement is taking a too rigid approach, preventing sustainable development, the plan cannot be considered to be positively prepared.</p> <p>Westbury is designated as a market town in the Wiltshire Core Strategy, with respect to which Policy CP1 identifies as having "potential for significant development that will increase jobs and homes in each town in order to help sustain and where necessary enhance their services and facilities and promote better levels of self containment and viable sustainable communities".</p> <p>Whilst the indicative minimum has been met for Westbury town itself, in light of the need to significantly boost the supply of housing, and that the OAN for Wiltshire needs to be met, all available suitable sites at sustainable settlements should be considered. This would represent positive planning aimed at meeting the requirements of NPPF paragraph 47.</p> <p>The promoted site is sustainably located, within 800m of Dilton Marsh Railway station (with the entire site within 1.3km of the Railway station). The town centre is also within 1.3km, with access to services, shops and facilities all within easy walking and cycling distance. The site area is 8.2 hectares, and therefore this site could accommodate a range of uses including residential development.</p> <p>It should also be noted that the Westbury CA Remainder figure has not been met with a shortfall of 7 dwellings. The council is therefore allocating 40 dwellings to Bratton, a large village, to meet this shortfall. This would exceed the indicative requirement. It is not clear, and</p>				

Appendix Q - Schedule of representations

	<p>therefore unjustified, as to why exceeding the indicative requirement in Bratton but not in Westbury has been precluded from the start of the process and not therefore assessed as a reasonable alternative. The plan is not sound in this regard. To be considered sound the evidence base needs to robustly assess the various opportunities for sustainable development in Wiltshire, including in those areas that have already met the indicative requirements.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		1.5			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Site Allocations Plan excludes the area covered by the Chippenham Site Allocations Plan, which was adopted in May 2017 and only includes “strategic allocations”. The exclusion of the CSAP area from the Wiltshire Site Allocations Plan means that:                  The WSAP has not considered the potential for non-strategic allocations at Chippenham to contribute to the county’s future housing requirements, and the sustainability merits of non-strategic developments at one of the county’s three principal settlements has not been assessed against the sustainability merits of delivering housing at lower order settlements.                  In the absence of any assessment of the potential for non-strategic developments at Chippenham to form part of the county’s future development strategy, it cannot be concluded that “the most appropriate” development strategy is being pursued. Consequently, the plan is unsound because the “justified” test is not satisfied.                  For the plan to be justified, the Wiltshire Site Allocations Plan must consider the development potential of non-strategic sites in and around Chippenham to contribute towards the county’s future development requirements, in the same way that policy H2 considers the potential for nonstrategic sites around Trowbridge.</p>				
<b>Attached files (Please see Objective)</b>	4747312				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>Gleeson Developments Ltd controls land in the Chippenham area that is capable of making a sustainable contribution towards Wiltshire’s future housing supply (see attached map). However, as a non-strategic site that it is not allocated in the Chippenham Site Allocations Plan, in the absence of a neighbourhood plan for Chippenham, the preparation of the draft Wiltshire Site Allocations Plan represents the only development plan that can consider the development potential of non-strategic sites. The council's decision to exclude the development potential of non-strategic sites around Chippenham yet to consider the potential for non-strategic sites around Trowbridge needs to be discussed before the examination inspector.</p>

<b>Comment ID:</b> <a href="#">3158</a>		<b>Consultee</b>  <b>Person ID:</b> 1138132	<b>Agent</b> Tom Wright Planner  Origin3  <b>Person ID:</b> 1126888	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Housing Land Supply			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This letter is submitted by Origin3 on behalf of McLaren (Swindon) Limited and Primegate Properties (Hooksouth) Ltd with regards to the pre-submission version of the Wiltshire Housing Site Allocations Plan (SAP) and the wider Wiltshire planning strategy as a whole. Whilst we understand the Council's focus for this consultation period is on specific policies within the draft SAP, we consider there to be a wider issue in hand with the Council's planning strategy moving forwards that needs to be addressed relating to soundness and consistency with the NPPF (paragraph 182).</p> <p>Given the circumstances set out below, we consider that the only way the Council can deliver a sound development plan is through undertaking a more holistic review of the housing requirement and growth strategy now. Unless addressed now, the Council's planning strategy leaves the following deficiencies:</p> <p>The Council is unable to demonstrate a deliverable supply of sites for years 6-10, required by the NPPF (paragraph 47), as the Core Strategy (CS) (adopted in January 2015) did not provide for the preferable 15 year horizon advised by the NPPF (paragraph 157). There has been no "Early CS Review" as committed during the CS Examination. As such, by the time the SAP is adopted in Q4 2018 (at the earliest), there will be less than 8 years of the plan period remaining (up until 2026).</p> <p>The Council's evidence base suggests that Wiltshire will not be able to demonstrate a five year housing land supply in each of the three Housing Market Areas (HMAs) for year 8 (2025/26) (at best) meaning a more holistic planning review assessing the housing requirement would be appropriate now (see table 3.4 below).</p> <p>At a minimum, the Council should be allocating significantly more dwellings to ensure that there is a sufficient, robust rolling five year supply until the end of the plan period.</p> <p>Topic Paper 3 (Housing Land Supply), published in June 2017 as part of the Council's evidence base to support the SAP, suggests that when applying the most up to date completions data, the current planning strategy leaves the Council without a demonstrable five year supply in each of the three HMAs. Particularly in the South HMA where there is only a marginal five year supply. This does not account for any under or non-delivery.</p> <p>[Refer to table in attached full representation document]</p> <p>This is more concerning in light of recent Government announcements (DCLG Planning for the right homes in the right places: consultation proposals, 12 September 2017) suggesting that the Objectively Assessed Need (OAN) for Wiltshire will be uplifted significantly (1,270 dwellings more than the CS and SAP accounts for over the period 2016-2026) and applied to plans that have not been submitted for Examination by the 31st March 2018.</p> <p>At present, the Council anticipates the SAP being submitted for Examination beyond this date. In our view this suggests the Council should be addressing this additional need as part of this process here and now.</p>				

Appendix Q - Schedule of representations

	<p>This can only be done properly through a more substantial Local Plan Review. We understand from the Council's draft Local Development Scheme (LDS) currently under review that the strategy is to progress with a Joint Spatial Framework in partnership with Swindon Borough Council over the timeframe Q3 2017 – Q3 2019 and a subsequent Wiltshire Local Plan Review over the period Q3 2019 – Q1 2021. We support this process in principle to take account of additional housing need and to assist Swindon in delivering its housing requirement (acknowledging Swindon's current housing supply of less than 2.5 years). This would also be aligned with recent Government guidance to improve cross boundary matters, looking at housing need within cross boundary areas and planning to meet neighbouring shortfalls. However in light of the above and with regard to the points set out page 1 of this letter, we consider the Council should be progressing with this wider Local Plan review now rather than seeking a temporary fix through the SAP which cannot provide a sufficient planning strategy for the required 6-10 year period.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Environment  This corner of North Bradley not only supports Bechstein Bats, but offers sufficient bio diversity to support Great Crested Newts, Toads, Frogs, Grass Snakes, Adders, Owls and various other birds of prey and wild deer  This lane serves as public amenity used by local people walking dogs or simply enjoying a family walk in what is a rural oasis in an already built up surrounding area. Cyclists, joggers, horse riders, take advantage of the lack of cars and people also gather blackberries, sloes, rosehips, elderflowers and elderberries in the old hedgerows. The people living in the planned Ashton Park will doubtless also be making use of this facility whilst strolling through to the Spitfire Retail Park, as the workers from the White Horse Business Park already currently do.  Any road widening at either end of Drynham Lane will totally spoil the nature of this much appreciated local resource. (We actually produced a petition when objecting to the boundary review - which was just a snapshot of how people use and enjoy this lane.)</p>

## Appendix Q - Schedule of representations

Comment ID:	3164	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr and Mrs Adrian and Jannette Robinson	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Traffic</p> <p>Despite the draft plan stating that Trowbridge is within walking and cycling distance (we haven't noticed any properly 'joined up' cycle lanes within this busy county town of Wiltshire) it must be appreciated in this modern age that the majority of houses will use upwards of two cars for 'school runs' and transportation to a place of work. In addition to the people living on the estate, the traffic to and from the proposed school will just exacerbate this problem.</p> <p>Any road that joins up to the roundabout near KFC will only exacerbate the gridlock that frequently occurs with the link in roads. Extra traffic along Wiltshire Drive will have a similar effect further along Bradley Road.</p> <p>However, the worst aspect of having such an increased number of cars along the very limited capacity within Drynham Road and Dursley Road will create problems because the road, at the quietest times, is like a slalom run where you have to weave in and out of parked cars which frequently causes frustration with motorists.</p> <p>It would be interesting to see how you would solve the problem at the end of Dursley Road where, with the exception of taxis and buses, you are not allowed to turn right onto County Road. Cars are often tempted to illegally turn right across two lanes of traffic or, as we do, drive to the top and then do a very risky u-turn on the roundabout at the top. I frequently have to stop on the roundabout because other vehicles have misinterpreted my indications and assumed I was just turning right - increased traffic doing this can only increase the likelihood of an accident.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge Brownfield			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Assumptions Your draft plan believes that green spaces could be protected and enhanced albeit you are taking a lot and giving little in return yet not looking at your brown sites. You believe that it would create employment in the local building trade - we suggest it might mean more cars driving to and from the area and any construction would be temporary anyway once the houses were built. These proposals believe that local shops would benefit from more houses whereas we truly think that the local shops won't necessarily gain from more houses in and around Trowbridge, maybe with the exception of the revitalised Odeon area, because in our experience local people prefer to visit 'nicer' towns with better facilities. In our opinion despite Trowbridge being the county town of Wiltshire it is very sadly lacking - you should be looking to building it up inside out and not making it into a big conurbation with no character or heart.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Land Supply				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This representation deals with a number of concerns principally:                      The DPD has not been brought forward in the way envisaged when the Core Strategy inspector found the Core Strategy to be sound, particularly with respect to meeting the objective assessment of housing need (OAN). This is inconsistent with the NPPF.                      Also, that the plan will not be resilient and will be ineffective in meeting housing need, including addressing affordability issues.                      Overall the plan cannot be considered sound as it is not positively prepared, justified or consistent with national policy.</p> <p>Positively prepared                      Paragraph 47 of the Framework states that a Local Plan should meet the full objectively assessed needs for market and affordable housing in the relevant HMA as far as is consistent with the other policies of the Framework. There has been no attempt in the draft plan to meet the objectively assessed need (OAN) as set out below.                      The Wiltshire Core Strategy Inspectors report at paragraph 78 identified the OAN as around 44,000 and later in paragraph 80 stated "... the sites DPD, the Chippenham Site Allocation DPD and the neighbourhood planning processes will enable the Council to proactively seek to meet, and if necessary reassess, its objectively assessed housing need and plan for its provision accordingly".                      The inspectors report goes on to state "Indeed, I am particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes. Consequently I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more".                      As stated this was the 'minimum housing figure' and is not the OAN. The Inspector was expecting a revised SHMA with a new OAN in early 2016 and clearly set an expectation that Wiltshire Council should be planning, through subsequent DPDs, to meet this OAN as well as the 'Swindon allowance' (900 homes) because the latter does not meet the housing needs Wiltshire. No updated SHMA with revised OAN has been published to date. Nevertheless, the most recent evidence, as reported to the Swindon Wiltshire Local Enterprise Partnership on 14 February 2017 and correlating with the Government's recently published OAN figures using a standard methodology (currently subject to consultation), is that the OAN remains at or above 44,000 homes across a 20 year period.                      It is surprising that the consultation document makes no mention of these requirements, set by the Core Strategy Inspector. Further, whilst it is noted that the Site Allocations DPD proposes to allocate more than the minimum requirement, the additional provision, only amounts to 996 dwellings (above the minimum requirement) which falls significantly short of meeting the OAN and making up for the Swindon allowance. If these OAN/Swindon allowance requirements are to be met, in accordance with the NPPF and Government imperative to boost the supply of housing, a further circa 2,500 homes should be identified/allocated across Wiltshire within the DPD. A positive approach must be taken, looking for opportunities to accommodate the homes needed.</p>				

#### Appendix Q - Schedule of representations

In recognition of the need, the Wiltshire Core Strategy distributed the indicative minimum across each community area, with this only being an indicative minimum due to the lack of a comprehensive evidence base of available sites and their sustainability. Flexibility to deliver more in any one Community Area was fundamental to the soundness of the Core Strategy and to its consistency with the NPPF.

In this context, the council's insufficient response to the overall numbers through the Site Allocations DPD, as set out above, creates a fundamental lack of soundness within the plan.

Further its approach, as put forward in Topic Paper 2, of only assessing opportunities to allocate housing in community areas where the indicative minimum housing requirement has not been met is fundamentally flawed. The approach responds only to appeal success (resulting from sites being released over the last two years through s78 appeals given the presiding shortfall in housing land supply over that period) and fails to provide a positive approach by failing to consider and allow opportunities for sustainable plan led development which could assist settlements in meeting their own housing (market and affordable) and economic / community needs and assist more widely in meeting the full OAN across Wiltshire, as required by national policy.

In addition, the objective for the plan to "demonstrate a rolling five year supply" and to "allocate sites at the settlements in the County that support the spatial strategy of the Wiltshire Core Strategy" does not go far enough. An objective of the DPD should be to meet the OAN, and the DPD should be allocating sufficient sites to meet the OAN, not the minimum housing figure, in order to be consistent with National Policy.

In the preparation of the site allocations plan, the council should have firstly understood the capacity of all promoted sites in each community area (which should have formed the evidence base) to undertake a full sustainability appraisal to determine which are most sustainable to allocate in each housing market area in order to fully meet the OAN.

#### Effective

To be effective the NPPF states that the plan should be deliverable over its period, including being based on effective joint working on cross-boundary strategic priorities. One concern is that Wiltshire Council has agreed to work with Swindon Borough Council on housing needs. A revised SHMA was available to the Council 12 months ago, yet the Council has failed to date to publish or take positive action to address the output. We still expect the SHMA to be published imminently, but at this stage it is unclear as to how 'effective joint working' has been undertaken.

It is of concern that by only allocating development in community areas where the indicative Core Strategy (non OAN) housing requirement has not been met does not allow for a positive response to the findings of the new SHMA, including any re-drawing of housing market areas, does not respond to the considerable housing land supply shortfall in Swindon Borough, does not allow for the OAN to be met and does not allow flexibility and resilience should any of the sites relied upon not deliver as expected. If the Council become a 20% buffer authority the DPD position will become indefensible.

To be effective, the plan should take a more flexible approach, allowed for by the Core Strategy and expected by the Core Strategy Inspector when he found that plan sound, and allocate additional sites.

#### Consistent with national policy

As set out above, there are a number of elements of national policy that the draft DPD is not compliant with. In particular the requirement to significantly boost the supply of housing set out in paragraph 47 of the NPPF. This is a Government imperative, supported by the recent Ministerial Statement made alongside publication of the draft standard methodology to calculate OAN. Furthermore the requirement at NPPF paragraph 28 to support economic growth in rural areas. The DPD Fails to take a positive approach to sustainable new development, as one of the starting points to achieve sustainable development (the OAN) has been ignored and the full potential to identify sustainable new housing sites has not been assessed.

#### Summary

In conclusion, the Wiltshire Site Allocations Plan is required to meet four tests to be considered 'sound', as set out in paragraph 182 of the NPPF. It is considered that none of these have been met / demonstrated. The plan is not sound in its current form.

As established at the core strategy examination and supported by more recent evidence, the OAN for Wiltshire is 'around 44,000 dwellings. To be compliant with National Policy, Wiltshire Council should be positively seeking opportunities to allocate sufficient sustainable sites to meet the OAN. Yet, this is not part of the objective of the plan. The plan cannot be considered to be positively prepared or consistent with national policy. It is not sound.

Appendix Q - Schedule of representations

	<p>There is concern over the effectiveness of the policy, as it is not clear how work with Swindon has been integrated into the proposed plan and how the plan has responded to the redefined Housing Market Areas and difficulty that Swindon has with meeting its own OAN and five-year housing land supply. The Plan, particularly at this stage in its preparation, must respond positively to the most up to date evidence base in order to be effective. This is a key requirement of the NPPF.</p> <p>It is also of concern that there is no allowance for non-delivery or under delivery in community areas.</p> <p>The NPPF requires that the plan should “enable the delivery of sustainable development in accordance with the policies in the framework”. The plan does not enable the delivery of sustainable development, with opportunities for sustainable development precluded. It is not in accordance with the NPPF requirement to ‘significantly boost the supply of housing’.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The evidence base is insufficient, in particular the sustainability appraisal and the topic papers have not been positively prepared because the Council started from a point of not assessing all of the opportunities for sustainable development across Wiltshire as part of the process. The output is that reasonable alternatives have not been considered.</p> <p>Justified</p> <p>The NPPF requires the plan to be “the most appropriate strategy when assessed against the alternatives”.</p> <p>The plan process has not assessed reasonable alternatives. Sustainable sites across housing market areas have not been assessed as reasonable alternatives, as the area of search for sites has been artificially restricted. We consider that this is contrary to national policy. It may at times be more sustainable to meet a housing requirement in a different settlement or community area, than where the need arises (which is the fundamental justification for the Wiltshire Core Strategy approach to the settlement hierarchy). The DPD evidence has not assessed whether this is the case, and therefore cannot be considered to be ‘the most appropriate strategy’ for Wiltshire, as required by paragraph 182 of the NPPF. The indicative requirements allowed for this flexibility, yet no flexibility and no resilience have been tolerated in the approach to the DPD. As a consequence, it is not justified.</p> <p>The NPPF requires the plan to be “the most appropriate strategy when assessed against the reasonable alternatives”. Allocating development in Community Areas or settlements which have already met their indicative minimums (particularly given the process from which those requirements have been met – which has released sites on their own merits rather than against reasonable alternatives) is clearly a ‘reasonable alternative’. The council should have taken a more flexible approach, as allowed for by the Core Strategy and expected by the Core Strategy Inspector, to ensure the most appropriate strategy is proposed. Without having assessed this, the plan cannot be considered justified and is not sound.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Great Somerford Gleeson controls the land edged red on the enclosed site plan. Part of the site is proposed for allocation in the emerging Neighbourhood Plan – examiner’s report dated 21 August 2017. Gleeson maintains that its wider landholding would provide an extension of the existing and proposed housing development that is both suitable and sustainable. If allocated, it would be deliverable with reference to the NPPF footnote 11. With reference to the above, there is no reason as to why a sustainable development should not be allocated at Great Somerford in the Site Allocations DPD. Whilst we acknowledge that the Great Somerford Neighbourhood Plan has allocated sufficient sites to meet indicative housing requirements set out in the Wiltshire Core Strategy this indicative requirement should not be seen as a minimum or a ceiling to development. The Core Strategy Inspector was clear that the total housing requirement of 42,000 should be seen as a minimum as the objectively assessed housing need at the time was in fact 44,000. As a larger village within the Malmesbury Community Area, Great Somerford is a sustainable location and should be delivering more development, over and above the indicative requirement to help meet this need. Furthermore, the Council’s evidence base is flawed as it fails to consider all locations by excluding areas where there are neighbourhoods in play. As a larger villages Great Somerford is one of the most sustainable locations within the Malmesbury Community Area and should be considered for additional growth. The existence of a neighbourhood plan does not meet that Great Somerford should not be considered in terms of its ability to accommodate more growth. By means of examples, the Farnham Neighbourhood Plan was made on the 28 July 2017. Following its adoption modifications to the Waverley Local Plan Part 1 have been considered by the Council, increasing Farnham’s overall housing requirement, with additional sites to be allocated over and above those allocated in the made Neighbourhood Plan. Waverley Borough Council has sought legal advice on this approach which has confirmed it is appropriate and that full weight can still be attributed to the Neighbourhood Plan in these circumstances. The Council’s Sustainability Appraisal has excluded sites at Great Somerford from the assessment process should have considered them in Gleeson’s opinion together with their sustainability credentials and the benefits they may deliver. There are no major constraints to development on the site. The land is located away from environmental and flood risk constraints to the north and east of the village. This area is well contained within the wider landscape and there are no technical constraints to development. It is submitted that the site is deliverable, available and offers a suitable location to deliver new housing with a realistic prospect that housing will be delivered on site within the Plan period.

A new bridge into Salisbury is urgently needed. The chaos recently at New Bridge road during repairs show how unacceptable it is for Salisbury to have only one bridge from the south, plus the ancient and narrow old Harnham bridge. New Bridge Road is effectively the only access to the hospital from the city, and such a restricted access is surely unacceptable in times of terrorist activity. There is a road to the north of the river in Churchfields which should be linked to Harnham as was original planned. Building on the proposed site cannot be allowed to block this potential new route.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Boyer has been appointed by DWS to act on their behalf in respect of the promotion of their land interest at 'Land to the East of Royal Wootton Bassett'. A site location plan is attached at Appendix 1.</p> <p>The site is approximately 26.7 hectares and lies on the eastern of Royal Wootton Bassett and is approximately 1.8km to the east of the town centre. To the north of the site lies the A3102 Swindon Road, whilst to the west lies the Eastern Distributor Road beyond which is a significant amount of residential development. To the south and to the east lie unnamed rural lanes.</p> <p>The site has the capacity to accommodate c.600 dwellings. In addition to the contribution to Wiltshire's housing supply in a sustainable location, the site is also capable of delivering improved infrastructure which will benefit the wider community as well as the site.</p> <p>Distribution of housing</p> <p>Notwithstanding the objection that the HADPD has not been positively prepared, our client DWS notes that the housing distribution through Core Policies 4, 7, 8, 10-15, 17-20, 23, 26-27, 29 and 31- 33 reflect the indicative distribution in table 1 (page 48) associated with Core Policy 2. As acknowledged by Wiltshire in the preparation of the HADPD, additional housing can be allocated in areas where theoretically the indicating requirement has been met. Consequently, although the Royal Wootton Bassett Community Areas has fulfilled the indicative requirement in Core Policy 19, this does not prevent the authority allocating additional sites such as that controlled by DWS.</p> <p>Additionally, although a Neighbourhood Plan is being prepared for Royal Wootton Bassett, the examination of the Submitted Plan (March 2017) has yet to occur. Given the representations submitted in response to the Regulation 16 public consultation undertaken by Wiltshire Council following the formal submission of the Royal Wootton Bassett Neighbourhood Plan by Royal Wootton Bassett Town Council (including the response on behalf of DWS attached at Appendix 3), there is no certainty that the document as prepared will be endorsed by the Examiner. Consequently, it is appropriate for the Inspector examining the HSADPD to consider the suitability of the land controlled by DWS (east of Royal Wootton Bassett).</p> <p>Whilst the Core Strategy Partial Review must ensure that the Council has an up-to-date housing need position and sufficient sites to meet this identified housing need, pending its preparation the HSADPD should include additional sites (including land controlled by DWS east of Royal Wootton Bassett). This will ensure that Wiltshire will be able to demonstrate a 5 year supply of housing against a robust objective assessment of its needs.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The attached letter details why the DPD is not considered to be sound and we would welcome the opportunity to discuss housing numbers and the emerging evidence base as part of the Examination.				

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3182</a>	<b>Consultee</b> Mr Graham Ritchie  <b>Person ID:</b> 933220	<b>Agent</b> Miss Julia Mountford Associate Director  Boyer Planning  <b>Person ID:</b> 1138250	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Land Supply		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	These representations have been prepared on behalf of David Wilson Homes Southern (DWS) in respect of the pre-submission draft Wiltshire Site Allocation Plan, 2017. Planning policy position Core Strategy In January 2015 the Wiltshire Core Strategy was adopted. A significant requirement of the Examination in Public (EiP) Inspector was that the Council must commit to partially reviewing the Core Strategy to enable an adequate development plan basis for decision making over the plan period to 2026(Wiltshire Core Strategy, Inspector’s Report December 2014 – Non-Technical Summary). Notwithstanding this commitment the plan was found sound with Main Modifications requiring a commitment to an early review. The plan makes provision for a ‘minimum housing requirement (dwellings)’ of 42,000 new homes in the plan period from 2006 to 2026 (Core Policy 2). The plan seeks to ensure that there is a continuous supply of housing over the plan period. Royal Wootton Bassett was identified in the Core Strategy as being capable of accommodating 1,070 dwellings (Core Policy 19). On the matter of the housing requirement the Inspector concluded in the EiP report (Paragraph 20 Wiltshire Core Strategy, Inspector’s Report, December 2014) that: ‘Whilst this is not the preferable 15 year horizon advised by the Framework, such a period is specifically supported by the available evidence and, on balance, is sufficient to be considered appropriate and does not run counter to the PPG. Simple extrapolation of growth rates to extend the CS period would be a crude means to simply meet a 15 year aspiration; such an approach is not warranted in light of the Council’s intention to monitor the effect of the CS and to ensure it is subject to partial review at an early date. Indeed, the Council has clarified that it will be undertaking a planned early review of the CS to ensure the development provision looks to an appropriately long term end date which will be supported by an updated Strategic Housing Market Assessment (SHMA)’. At paragraph 81 of the Inspector’s report the Inspector reconfirms the Council’s intention to produce a new SHMA ‘by early 2016’ which could revise the objectively assessed housing need for the HMAs and will inform the plan making process. Instead, the Council has to date concentrated upon the short to medium term housing requirement identified by the Core Strategy by preparing the Housing Allocations Development Plan Document (HADPD). Strategic Housing Market Assessment/ Housing Need Evidence Base A Strategic Housing Market Assessment (SHMA) and Functional Economic Market Assessment (FEMA) has been prepared jointly by Wiltshire Council and Swindon Council. Whilst they have to date still not been made public, an update on these documents was originally provided to the Swindon and Wiltshire Local Enterprise Partnership (SWLEP) Joint Strategic Economic Committee on 14th February 2017. It was acknowledged at that time that there would be some concern about ‘opening the floodgates’ to the market/ development industry upon publication. Given this statement, it is anticipated that the SHMA will identify an increase in objectively assessed need across Wiltshire.			
	Effective  Consistent with national policy			

#### Appendix Q - Schedule of representations

This conclusion is supported by the fact that the Wiltshire Core Strategy currently makes provision for, 'at least 42,000 new homes in Wiltshire in the plan period from 2006 to 2026...' This equates to 2,100 dwellings per annum. Whilst the Core Strategy Inspector accepted that at least 42,000 new homes was an appropriate figure for the Core Strategy pending its review, he nevertheless stated (paragraph 78) that "Overall, the balance of evidence suggests that the objectively assessed housing need, to be disaggregated across the three Wiltshire HMAs, is currently in the region of 44,000 dwellings over the plan period [2006-26]." The adopted Swindon Borough Local Plan sets out that 'not less than 22,000 dwellings between 2011 and 2026' will be provided.

Whilst the breakdown for the two authorities has not to date been published, the report to the Joint Strategic Economic committee meeting of 28 June 2017 then indicated that the new SHMA required 3,650 dwellings per annum across the two authorities (as compared to 3,600 in their existing plans).

It is also noteworthy that there is currently a consultation on the standardised methodology for calculating housing need taking place until 9th November 2017. Whilst clearly a consultation document, using the standardised methodology approach the new housing need for 2016 to 2026 for Wiltshire would be 2,227 dwellings per annum. This represents a notable increase from the existing Core Strategy figures and would be above that assessed by the Core Strategy Inspector as being the objectively assessed housing need.

#### Local Development Scheme

In addition to the commitment to undertake an early partial review, Wiltshire Council's January 2015 Local Development Scheme (LDS), set out that the Core Strategy was to be supported by four further Development Plan Documents (DPDs). One of these documents is the Wiltshire Housing Site Allocations Development Plan Document (HSADPD).

The January 2015 LDS set out that this DPD (the subject of these representations) was originally intended to be adopted in June 2016. The LDS reflects Paragraph 1.3 of the Core Strategy which states that the Council is committed to bringing forward a suite of plans designed to support the Core Strategy that collectively deliver the Council's aspirations for growth across Wiltshire.

The updated Local Development Scheme for Wiltshire Council considered at Cabinet on 12th September sets out a consultation on the scope of the Partial Review will be undertaken at the end of this year, with an options consultation at the end of 2018 and adoption anticipated early 2021.

#### Maintaining a supply of housing

One of the identified purposes of the plan set out in paragraph 1.1 of the HSADPD is to, 'Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three HMAs over the period to 2026.'

Paragraph 49 of the NPPF is clear that, 'Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites.'

The delays in the progression of the HSADPD mean that the Council has new evidence regarding their objectively assessed housing needs, i.e. the SHMA together with the Government's consultation on planning for housing. Whilst the former document is currently not publically available, from the information that has been published, there is substantial weight given to the fact that the Council's housing numbers have increased, thereby rendering the Core Strategy policies regarding the supply of housing, out-of-date. This view is supported by the information published alongside the Government's planning for housing consultation.

Given the new evidence base available to the Council, it is not clear how it is possible to consider that this emerging plan (the HADPD) has been positively prepared. To be 'positively prepared', the plan 'should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so...'

The publication of the relevant and currently available evidence base would allow consideration of whether the plan is the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence, i.e. whether it is justified. Without the publication of the SHMA, this assessment is not possible to make, although the Government's planning for housing consultation enables an informed decision to be made. However, given that the indications are that the housing need is increasing in Wiltshire, other strategies now require consideration.

Given the inter-relationship of Wiltshire and Swindon Council's, it is imperative that the available up- to-date information on the HMAs is published to enable consideration of whether the emerging plan is based on effective joint working on cross-boundary strategic priorities, i.e. whether it is 'effective' and accords with national policy. This is especially important given the conclusions (14 July 2017) of the Secretary of State in the recovered appeal (APP/U3935/W/16/3147902) on land east of Marlborough Road, Wroughton, Swindon that Swindon Borough had less than a 2.5 years supply (paragraph 16), decision attached at Appendix 2.

Appendix Q - Schedule of representations

	<p>In conclusion, it is not possible to conclude that the HSADPD plan is sound and prepared in accordance with the duty to cooperate, without the publication of the SHMA. It is anticipated that were this available piece of evidence published, it would demonstrate that the objectively assessed housing needs of Wiltshire were not being met. Subsequently, in accordance with paragraph 49 of the NPPF, relevant policies for the supply of housing within the Core Strategy would then not be considered up-to-date. Given that the HSADPD is one of a suite of plans to support the Core Strategy, the housing policies in this document would then also be rendered out-to-date as it would not be able to demonstrate the necessary 5 year supply of housing against a robustly calculated objective assessment of needs.</p> <p>In accordance with Wiltshire Council's original commitment, the early Partial Review should therefore be progressed without delay. This should be based on an up-to-date evidence base that seeks to inter alia meet objectively assessed need and is prepared in accordance with the Duty-to- Cooperate.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3183</a>	<b>Consultee</b> Neston Park Estate  <b>Person ID:</b> 1138214	<b>Agent</b> Mr Geraint Jones Savills (UK) Ltd  <b>Person ID:</b> 1095360	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.39		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>These representations have been prepared by Savills on behalf of Neston Park Estate, in response to Wiltshire's draft Housing Site Allocations Plan (dHSAP).</p> <p>The representations set out our concerns with the Council's approach to housing delivery within the villages of Atworth and Whitley, and specifically the review of settlement boundaries and the need for additional land to be allocated to ensure the objectively assessed need for the villages is met within the plan period. As set out within these representations, land under the ownership of Neston Park Estate falls within the built form of Whitley and Atworth and the settlement boundaries should be revised to reflect this.</p> <p>These representations specifically comment upon the approach to the review of settlement boundaries set out in Chapter 6 and Appendix A of the dHSAP, with revised plans of the two villages set out in the Appendices of the representation.</p> <p>[Officer note: the appendices referred to are set out below in this Comment, and two other Comments with ID 3184 (Appendix 2) and 3185 (Appendix 3).]</p> <p>Appendix 1: West Farm, Atworth</p> <p>Atworth is identified in the Wiltshire Core Strategy as a 'Large Village' within the Melksham Community Area. Chapter 6 of the dHSAP states that settlement boundaries have been reviewed as part of the plan with the objective of ensuring there is a clear definition of the extent of the built up areas within Large Villages. However, West Farm, which falls under the ownership of Neston Park Estate incorrectly remains outside the settlement boundary of Atworth.</p> <p>The plan attached at Appendix 1 shows the revised settlement boundary and location of the land at West Farm, Atworth. The site is located in the western area of Atworth, along the A365; the primary road which runs east/west through the village. West Farm is within close proximity to the centre of the village and is highly accessible, with a bus stop approximately 100m to the west of the site.</p> <p>The existing settlement boundary of Atworth extends to include the built form to the west of the site, including the Bear Garage Petrol Station and dwellings off Bradford Road and has been reviewed to include the land to the south east of West Farm, however excludes West Farm. The site comprises predominantly built form which runs continuously within the settlement, and as such, in accordance with Chapter 6's objective, the land should be included within the settlement boundary of Atworth. The dHSAP should be amended to reflect this.</p> <p>Conclusion</p> <p>Overall, we are concerned with the robustness of the Council's approach in relation to reviewing settlement boundaries, in particular at Atworth and Whitley, both of which are classified as Large Villages and fall within the Melksham Community Area. In our view, the Council has not taken into consideration the built form of the three sites highlighted in this representation and the revised settlement boundaries do not reflect the existing composition of the two settlements; contrary to the Council's objective.</p> <p>The review of Atworth's settlement boundary fails to include West Farm which is located on the main road through the village and Atworth Business Park, a key employment site in the village. In our view, should Atworth be required to deliver housing, land to the east of Atworth</p>			

Appendix Q - Schedule of representations

	Business Park is suitable, available and achievable, in accordance with the requirements of the NPPF and is well placed to deliver small scale residential development. The settlement boundaries of Atworth and Whitley should be extended to include the land at West Farm, Atworth Business Park and Whitley Farm.

<b>Comment ID:</b> <a href="#">3184</a>	<b>Consultee</b> Neston Park Estate  <b>Person ID:</b> 1138214	<b>Agent</b> Mr Geraint Jones Savills (UK) Ltd  <b>Person ID:</b> 1095360	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.39			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>These representations have been prepared by Savills on behalf of Neston Park Estate, in response to Wiltshire's draft Housing Site Allocations Plan (dHSAP).</p> <p>The representations set out our concerns with the Council's approach to housing delivery within the villages of Atworth and Whitley, and specifically the review of settlement boundaries and the need for additional land to be allocated to ensure the objectively assessed need for the villages is met within the plan period. As set out within these representations, land under the ownership of Neston Park Estate falls within the built form of Whitley and Atworth and the settlement boundaries should be revised to reflect this.</p> <p>These representations specifically comment upon the approach to the review of settlement boundaries set out in Chapter 6 and Appendix A of the dHSAP, with revised plans of the two villages set out in the Appendices of the representation.</p> <p>[Officer note: the appendices referred to are set out below in this Comment, and in two other Comments with ID 3183 (Appendix 1) and 3185 (Appendix 3).]</p> <p>Appendix 2: Land to the east of Atworth Business Park, Atworth Amendment to settlement boundary</p> <p>The dHSAP proposes alterations to the settlement boundary to include dwellings which are located to the north of the main settlement of Atworth off Purlpit, however it excludes Atworth Business Park. As shown in Appendix 2, Atworth Business Park falls within the south eastern area of the village and comprises a number of industrial units and associated land to the east. The site comprises a significant proportion of built form, and provides important employment space to Atworth and Wiltshire, with a number of companies including Bristol Soap and Interconics located in the park.</p> <p>In comparison to the land off Purlpit, the site is located within close proximity to the A365 and local facilities within Atworth. In addition, Atworth Youth Club falls within the northern area of the land, and given the services it provides, including Babies and Toddlers Group, Brownies and Guides, it is considered to fall within the settlement boundary of Atworth and the emerging dHSAP should be amended to reflect this to follow the existing built form of the village.</p> <p>Potential site to deliver small scale residential development</p> <p>Given the site's context, with built development surrounding the site, the land to the east of Atworth Business Park is considered to be suitable, available and achievable (deliverable and developable) in accordance with the requirements of the NPPF. Should housing need to be delivered in Atworth to meet Melksham Community Area's housing target, the site is extremely well placed to accommodate the delivery of small scale residential development. The site is sustainably located with local facilities within walking distance.</p> <p>An initial feasibility study has indicated that there is capacity for approximately 30 dwellings, with the retention and improvement of Atworth Youth Club, landscaping and provision of a multi use games area (MUGA). Access to the site is already provided through the existing Atworth Business Park and would provide a logical, small scale extension to Atworth. The development of the site would allow for the enhancement of youth facilities within the village, and ensure an appropriate relationship to the existing employment use at Atworth Business Park is maintained.</p>			

Appendix Q - Schedule of representations

	<p><b>Conclusion</b>  Overall, we are concerned with the robustness of the Council's approach in relation to reviewing settlement boundaries, in particular at Atworth and Whitley, both of which are classified as Large Villages and fall within the Melksham Community Area. In our view, the Council has not taken into consideration the built form of the three sites highlighted in this representation and the revised settlement boundaries do not reflect the existing composition of the two settlements; contrary to the Council's objective.  The review of Atworth's settlement boundary fails to include West Farm which is located on the main road through the village and Atworth Business Park, a key employment site in the village. In our view, should Atworth be required to deliver housing, land to the east of Atworth Business Park is suitable, available and achievable, in accordance with the requirements of the NPPF and is well placed to deliver small scale residential development.  The settlement boundaries of Atworth and Whitley should be extended to include the land at West Farm, Atworth Business Park and Whitley Farm.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		The whole document		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Please accept this e-mail as my duly made response.</p> <p>I do not consider that the Plan is sound because it is not positively prepared, not justified, not effective and not consistent with national policy. In respect of the proposed allocations, I do not think it is consistent with or justified by the Wiltshire Core Strategy.</p> <p>Core Policy 1 of the WCS identifies the Settlement Strategy/hierarchy and the Principal Settlements of Chippenham, Trowbridge and Salisbury. Core Policy 2 (Delivery Strategy) requires that 24,740 new dwellings are completed in the Plan period (2006-2026) in the North and West Wiltshire Housing Market Area, but the breakdown of that figure within the HMA, including Trowbridge 6,810 and Chippenham 4,510, is only indicative, and it is now clear that those indicative figures are not sound or sustainable, and should be amended to 5,660 for each of the Principal Settlements within that HMA (viz. Chippenham and Trowbridge).</p> <p>In planning terms, Trowbridge is much more constrained than Chippenham and the existing figures ought to have taken account of that, but for purely political reasons did not.</p> <p>Hence the Plan is unsound in seeking to remain with and implement the indicative figures.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	I wish to attend the Examination in Public on all of the above issues.				

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3187</a>	<b>Consultee</b> Mr Francis Morland	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 397159	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Housing Delivery Strategy		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The Plan is also unsound in its assessment of the current 5 Year Housing Land Supply position because although it includes an allowance (of 925 units) for brownfield windfall completions, it omits any allowance for greenfield windfall completions. The evidence of Table 3 in the recent HLS Statements demonstrates that greenfield windfall completions in the remainder of the Plan period will be very substantial (and will far exceed brownfield windfall completions), so the omission of an appropriate allowance for them is irrational and unsound. The NPPF does not preclude the inclusion of such an allowance in the computation of the 5YHLS.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>With these changes, there can be no justification for the many proposed allocations around Trowbridge (see H2.1 to HH2.6) totalling 800 dwellings, and in particular for the "less sustainable option for development" at Southwick Court (H2.6 - SHLAA 3565) of 180 dwellings. I concur with the many site specific objections to this site detailed in other consultation responses, including those of Historic England on the heritage setting of Southwick Court itself (Grade ii* listed) and of the Environment Agency against development within areas of Flood Zones 2 and 3 within the site and in close proximity to the Lambrook watercourse.</p> <p>As a matter of principle, both for this allocation site and the others around Trowbridge, I also regard it as wholly unsound to draw the red line boundaries larger than what is required for the stipulated number of dwellings themselves. Various numbers are quoted in the supporting papers about the capacity of the Southwick Court allocation site (viz. c.280, 273 and 237) and it is also suggested that no houses will be located between Frome Road (A361) and the Lambrook. The clear lesson that Spatial Planning should already have learned from the grossly oversized Warminster West allocation in the WCS is that developers will always seek to maximise the number of dwellings within the allocation red line regardless of the number stated for it. So the only safe and sound approach is to restrict the red line precisely to that required for the number of dwellings stated in the Plan.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Turning to the Warminster Community Area Remainder, I object to the allocation H2.10 Barters Farm Nurseries Chapmanslade of 35 dwellings, both because no allocation is required to meet the indicative figure for that area - the existing figures indicate that it will be fully met in the remainder of the Plan period by windfall development - and because I consider it unreasonable and unfair to the other large villages within the area (viz, Corsley, Sutton Veny, Heytesbury and Codford) not to spread the number required more evenly over the area. The LPA's assessment of the relevant sustainability factors is entirely unsound - for example, bus services to all the other large villages are much better than Chapmanslade's.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Land b/w Winterbourne Earls Village School & Railway			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan is not properly justified as it has failed to account for the potential to contribute much-needed housing through the development of SH LAA sites 90, 91 and 92 (Land between Winterbourne Earls Village School and the Railway Line, Winterbourne Earls).</p> <p>Sites 90 91 and 92 was discounted from the site selection process at stage 3 due to the major adverse effects associated with air quality specifically regarding odour from the nearby pig farm". However, it is considered that there are material considerations which demonstrate that future development will not be affected by odours from the Manor Farm Pig Unit. A planning balance demonstrates that the impact of infrequent odours will be demonstrably outweighed by the benefits the development can provide. The site should therefore be re-considered. Please see attached document and letter for futher details.</p> <p>The allocation of sites 90, 91 and 92 for residential development with the emerging Allocations Plan would help the LPA deliver the most appropriate strategy for housing development within Wiltshire.</p> <p>Presently, the site selection process has idenitified no suitable alternative sites for Winterbourne Earls and as such, the plan is not justified.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3196</a>	<b>Consultee</b> Mctaggart & Mickel  <b>Person ID:</b> 861027	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Housing delivery strategy. East HMA.			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Introduction 1.1.1 These representations have been prepared by Walsingham Planning Ltd (WP) on behalf of Mctaggart & Mickel Homes Ltd (MMH) and relate to Wiltshire Council's (WC) consultation on the Pre-Submission Site Allocations Development Plan Document 'SADPD' (June 2017). 1.1.2 MMH have a general interest in Wiltshire Council's forward planning but specifically in relation to Land off Coate Road in Devizes, as edged red on the attached site location plan (Appendix1). Notably the site has been assessed as part of a slightly larger area of land in the Strategic Housing Land Availability Assessment (SHLAA) 2012 as a suitable site, available for development now, and capable of accommodating 495 dwellings (Ref: Site 693). 1.1.3 A planning application was submitted for up to 350 dwellings and retail uses on this land in January 2013 (LPA Ref: 2013/0083/OUT) which was subsequently refused by Wiltshire Council. This application was then subject to a planning appeal (PINS Ref: 2206963). 1.1.4 Whilst the site was ultimately dismissed at appeal by the Secretary of State following a positive recommendation from the Inspector, its suitability and sustainable credentials have been firmly established. The only reason the site was dismissed was due to the status of the emerging Devizes neighbourhood plan at the time. The site was deemed acceptable in all other regards with no technical issues outstanding. 1.1.5 The site was previously proposed by WC as a refined option for development in the informal consultation on the SADPD in February 2015 (Site Ref: 693a). Representations were made by RPS on behalf of MMH during this process. 1.1.6 The Wiltshire Core Strategy (WCS) was adopted in January 2015 and sets out the strategic vision for delivering sustainable growth over the period up to 2026. 1.1.7 A Neighbourhood Plan (NP) has also been made in Devizes (July 2015) which covers Devizes Town, Bishops Cannings and Roundway. The NP allocates sites of up to 65 dwellings for development in the area and has revised the limits of development around Devizes to accommodate the allocations. 1.1.8 The purpose of the Wiltshire SADPD is to: Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages; and Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three HMAs over the period to 2026. 1.1.9 It is noted that the draft SADPD only proposes site specific allocation policies which will supplement the strategic policies in the Wiltshire Core Strategy. 1.1.10 In accordance with the Council's Questionnaire these representations will consider the soundness of the SADPD and set out changes where appropriate which we consider necessary to make the Plan sound. Reference to the Council's evidence base is also made within these representations where appropriate.				

## Appendix Q - Schedule of representations

1.1.11 The National Planning Policy Framework (NPPF) makes it clear at Paragraph 182 that to be sound, a Local Plan should be positively prepared, justified, effective, and consistent with National Policy. In accordance with the Council's Questionnaire we have given consideration to the following points:

General Matters; [Officer note: These are discussed in Comment 3197]

Core Strategy Partial Review and SHMA; [Officer note: Discussed in Comment 3198]

Overall housing requirement in the East HMA; [Officer note: Discussed in Comment 3199]

Suitability of proposed allocations in the East HMA; [Officer note: Discussed in Comment 3200, 3201, 3202, 3203, 3204 and 3205]

The addition of Land off Coate Road as an Allocation in the SADPD. [Officer note: This is outlined below.]

1.1.12 Overall MMH raise concerns with the draft SADPD and consider that the Plan is unsound as currently drafted as it is not justified or consistent with national policy. To make the Plan sound further sites should be allocated to ensure a flexible supply of deliverable sites are available in the plan period.

1.1.13 This is particularly the case for the East HMA which includes Devizes, a sustainable Market Town (the largest in Wiltshire). As set out in the following sections [Officer note: This is set out below, within this Comment] Land off Coate Road in Devizes can accommodate a residential development which can significantly contribute to the housing supply in the East HMA. These representations are supported by a masterplan (Appendix 2), land use plan (Appendix 3) and appeal decisions for the site which help to confirm the sites overall acceptability (Appendix 4 and 5).

6.0 The addition of Land off Coate Road as an Allocation in the SADPD

6.1.1 As set out in the previous sections [Officer note: See comments 3197-3205] MMH consider that further sites should be allocated in the SADPD for the following reasons:

The status of the new SHMA and partial WCS review which could have implications on the OAHN in Wiltshire;

The flexible approach endorsed in the adopted WCS which suggests the overall housing requirement is a 'minimum' with 'indicative' requirements for each Community Area;

The doubts about the delivery of some sites in the East HMA and their build out rates;

Concerns regarding the suitability of sites proposed as allocations in Market Lavington.

6.1.2 Based on these points MMH consider that the plan is not justified and not consistent with national policy, therefore is not sound.

6.1.1 At a very minimum reserve sites should be allocated now in the event that the OAHN significantly increases when the SHMA is published/partial review of WCS takes place, but it would be prudent to allocate sites for development now which are available and can be delivered quickly to ensure the Council does not encounter problems in the future.

6.1.2 For the Plan to be considered sound the Council will also need to update its evidence base to include up to date Housing Trajectories (with a base date in March 2017).

In particular we draw the Council's attention to Land off Coate Road, Devizes which is a sustainable site capable of delivering significant housing development. The site is edged red on the attached site location plan (Appendix 1) and has previously been promoted for development. The site comprises a parcel of agricultural land immediately to the east of Windsor Drive on the edge and to the east of Devizes.

6.1.1 This site has been subject to planning applications and appeals in the past which help to confirm the sites overall suitability for development. Importantly the sites acceptability and sustainable credentials have been firmly established.

6.1.2 Notably the site has been assessed as part of a slightly larger area of land in the Strategic Housing Land Availability Assessment (SHLAA) 2012 as a suitable site, available for development now, and capable of accommodating 495 dwellings (ref: 693).

6.1.3 The site was subject to an outline planning application in 2013 for up to 350 dwellings and retail uses (LPA Ref: 2013/0083/OUT). This application identified that the site was suitable for development. The land still represents an opportunity for development and could make an important contribution to meeting future market and affordable housing needs. The site is available now and previous baseline assessments

#### Appendix Q - Schedule of representations

have not identified any insurmountable constraints which would prevent development from coming forward. The planning application was supported by a suite of baseline assessments including a Landscape Visual and Impact Assessment (LVIA). The LVIA was considered by Wiltshire Council and no objections were received from the Landscape Architect.

6.1.4 The outline proposals included a number of significant infrastructure improvements in the local area. In particular this included a contribution to fund a new traffic signal controlled junction at the London Road/Windsor Drive roundabout along with other highway improvements along London Road identified as part of the Devizes strategy at the time. Additionally, the Applicant agreed to contribute to improve a roundabout further north at the Hopton Road/London Road junction and to improve connections to the canal along Windsor Drive Bridge. Thus, all the improvements which were proposed would contribute significantly to improving the traffic situation in Devizes and were agreed with Wiltshire Highways.

6.1.1 A number of the improvements proposed in the outline planning application are identified as essential sustainable transport infrastructure required in Devizes in the Wiltshire Infrastructure Delivery Plan 3 2011 – 2026 Appendix 1: Devizes Community Area (December 2016). Therefore, development on the Coate Road site would make an important contribution to the delivery of essential infrastructure required in Devizes in a timely manner.

6.1.2 The excellent and undisputed sustainability credentials of the site have been established in the Secretary of State's decision in October 2014 in relation to a proposal for up to 350 new homes (Appendix 4). This decision followed a planning appeal and public inquiry that considered all relevant issues in detail. Whilst the appeal was dismissed, despite a positive inspector's recommendation, because the site was not proposed to be allocated for housing in an emerging Neighbourhood Plan, the site is a suitable location for meeting future housing need in the form of a sustainable urban extension. The Inspector for the Coate Road appeal (Ref: 2206963) noted at Paragraph 218:

“Overall, it seems to me that housing development at the appeal site would relate well to the town and its facilities, and would contribute positively to the sustainability of the development pattern in this part of Wiltshire.”

The site went back to appeal following a high court challenge and again whilst it was ultimately dismissed by the Secretary of State in September 2016 (decision attached at Appendix 5), the proposals were considered as sustainable development based on assessment against the three dimensions set out in the Framework. At Paragraph 13 of his decision the Secretary of State noted:

“Having regard to the three dimensions of sustainable development (IR235-236), the Secretary of State agrees with the Inspector at IR237 that the potential economic benefits can be given significant positive weight. He also agrees with the Inspector (IR238) that that the scheme's substantial boost to housing supply is a significant positive aspect of the social dimension of sustainability, despite the fact that there is not an established current shortfall in the five-year housing land supply for the housing market area; and that the new open space, canal-side improvements and the availability of the local centre would provide further social benefits. For the reasons given at IR239, the Secretary of State agrees with the Inspector that these would also be environmental benefits to be placed in the balance alongside improvements to a cycle route and bus services; but that there would be a degree of harm to the countryside as a result of the extension of urbanisation beyond the existing edge of the built-up area.”

6.1.1 The site was also proposed as a refined option for development in the previous version of the SADPD (relating to the informal consultation in February 2015).

6.1.2 The land lies outside but immediately adjacent to the limits of development of Devizes and could be easily linked with existing services and infrastructure. Development at the site would also provide opportunities for delivering significant improvements to community infrastructure as well as appropriate employment opportunities for local people. For reference an illustrative masterplan is submitted in support of these representations to demonstrate how development on the site can be accommodated (Appendix 2). A Land Use Plan has also been submitted

Appendix Q - Schedule of representations

	<p>which shows the different aspects of the scheme including a proposed woodland and vast multi functional green space and corridors around the site (Appendix 3).</p> <p>6.1.3 Further proposals on land off Coate Road would be subject to a robust Community Engagement Programme which would provide residents, councillors and key stakeholders with the opportunity to discuss, comment, and leave feedback on the proposed new homes plans after the land was allocated, helping to shape any future planning application. A Public Exhibition would be held and Workshops/Seminars would be planned to gain key community input to the new homes proposals, and to enable plans to come forward for land off Coate Road which would benefit Devizes and have widespread public support. A website would support the draft allocation/new homes plans providing Devizes residents with clear, up to date and transparent information as the consultation progresses.</p> <p>6.1.1 Overall MMH consider that this site should be allocated in the SADPD now to provide flexibility in the housing supply to support future housing requirements for the East HMA.</p> <p>Suggested Changes to SADPD</p> <p>6.1.2 To make the plan sound further consideration should be given to allocation of suitable sites in sustainable locations and further policies added. A policy should be included in the SADPD to reflect the allocation of Land off Coate Road, Devizes. This land should be included as an allocation for the following reasons:</p> <p>The site is sustainable and has no technical constraints;  The sites suitability has been assessed and considered by both the Council and the Planning Inspectorate;  Market Towns such as Devizes (which is considered the largest in the whole of Wiltshire) have a significant role to play to deliver the 'minimum' Wiltshire housing requirement in the plan period;  The Wiltshire housing requirement is flexible and is not a cap on further development but is intended to encourage sustainable development on suitable sites;  The Devizes Neighbourhood Plan allocates site for up to 65 dwellings but the SADPD will ensure strategic sites can also come forward in sustainable locations in accordance with the WCS.  The East HMA is likely to require further housing in the near future once the new OAHN is known and for the period up to 2036 (including on land outside the limits of development) and therefore large strategic sites should be considered in the SADPD process now as they will make a significant contribution to meeting future needs.</p> <p>6.1.2 The additional policy in the SADPD should include the following text:  "Policy X  Land off Coate Road, Devizes, as identified on the Policies Map, is proposed for residential development comprising the following elements:  Up to 350 dwellings;  Some retail uses;  Development will take place in accordance with a masterplan for the site approved by the Council as part of the planning application process."</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4748103 / 4748107 / 4748104 / 4748106 / 4748105</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>As set out in the attached representations a number of issues are raised regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3197</a>	<b>Consultee</b> Mctaggart & Mickel  <b>Person ID:</b> 861027	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No

Please identify the policy, paragraph, table, figure or site to which you are referring.		Housing supply / Evidence base			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		2.1.1 This section does not relate to a specific part of the site allocations document but raises general concerns. Housing Trajectories 2.1.2 A Housing Trajectory is not included in the Plan or as an evidence base document. MMH consider it is very important for an up to date trajectory to be included in the Plan so that it is clear how many dwellings each site is expected to yield and at what point in the Plan period. 2.1.3 We note that the latest trajectory available for public viewing is from the Wiltshire Housing Land Supply Statement dated November 2016. The Council have referred us to the 2016 Housing Land Availability Report showing the most up to date housing delivery figures (with a base date of April 2016), however no detailed housing trajectory is provided in this document. 2.1.4 The draft SADPD is supported by a Five Year Land Supply Document – Topic Paper 3 (June 2017) which sets out Wiltshire’s housing land supply position, but this includes no detailed trajectory illustrating the expected delivery of housing sites over the plan period. Trajectories are essential for the testing of the deliverability of the housing land supply proposed to meet the housing requirement for the period of the SADPD. 2.1.5 On this basis the Plan cannot be considered sound as it is not justified based on the most available evidence. Therefore, the evidence base needs to be updated for us to fully be able to consider the delivery of sites in Wiltshire and make the Plan sound. This will ensure the SADPD is up to date as required by Paragraph 17 of the NPPF. 2.1.6 Should this evidence be provided in future versions of the Plan we reserve the right to provide further comment on the soundness of the Plan.			
Attached files (Please see Objective)					
If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?		As set out in the attached representations a number of issues are raised regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Core Strategy Partial Review & SHMA		Justified  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>3.1.1 It is noted that since the WCS was adopted (in January 2015) the Council has committed to the preparation of a new joint Strategic Housing Market Assessment (SHMA) with Swindon Borough Council, in collaboration with other local authorities as necessary, to inform the need for a further review of Core Strategy policies in particular in relation to the housing market areas and levels of growth to extend the plan periods. The SHMA will inform the partial review of the Core Strategy and extend the plan period by 10 years until 2036.</p> <p>3.1.2 The commitment of the Council to provide a new SHMA is noted in the Inspectors Report for the WCS (dated 1st December 2014) in a number of paragraphs and has been a long standing item in previous versions of the Wiltshire Local Development Framework (LDF) but has been significantly delayed each time a new LDF is published. At the time the WCS was adopted it was anticipated the new SHMA would be ready by early 2016. The Inspector notes at Paragraph 81 of his Inspector report (December 2014):                  “Indeed, I am particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes.”</p> <p>3.1.3 The latest LDF for Wiltshire dated December 2016 suggests that the new SHMA would be published in early 2017.</p> <p>3.1.4 The previous Wiltshire SHMA was published in December 2011 and provides the Objectively Assessed Housing Need (OAHN) for Wiltshire which was endorsed by the adopted Core Strategy and this also set out how the housing requirement has been disaggregated between the 3 HMA's and west of Swindon. This SHMA is now almost 6 years old.</p> <p>3.1.5 The reasoning behind the early review of the WCS is explained further in paragraphs 86 and 87 of the WCS Inspectors report in terms of the inclusion of 900 homes to the west of Swindon in Wiltshire's overall supply and the planned early review of the SHMA being the mechanism to review Wiltshire's relationship with Swindon in more detail.</p> <p>3.1.6 Paragraph 159 of the NPPF states the Local Planning Authorities should:                  "prepare a Strategic Housing Market Assessment to assess their full housing needs, working with neighbouring authorities where housing market areas cross administrative boundaries. The Strategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period "</p> <p>3.1.7 MMH are concerned with the timing of the proposed submission consultation on the SADPD (which allocates sites until 2026) and the fact it takes no account of the potentially imminent review of the WCS (which will allocate sites until 2036).</p> <p>3.1.8 Without the partial WCS review in place there is a risk that the SADPD (scheduled for adoption in winter 2018) along with any made Neighbourhood Plans in Wiltshire will become out of date very quickly. This is especially concerning considering the significant delays which have taken place with production of the SHMA (initially anticipated for early 2016).</p> <p>3.1.9 It is also important to note the further measures to boost housing supply in England set out in the governments recently published consultation 'Planning for the right homes in the right places: consultation proposals' (September 2017) which follows the publishing of the 'Housing White Paper' in February 2017. The consultation sets out proposals for a standard method for calculating local authority's housing need. The standard methodology approach suggests that LPA's may require a significant boost in housing in the future, this including Wiltshire</p>			

Appendix Q - Schedule of representations

	<p>which is one of the larger LPA areas in the country. The new methodology proposes household projections as the starting point for each LPA area. It is important to note that the household projections figure simply shows the bare minimum that will be required in order to stand still and 'to boost significantly the supply of housing' for many LPA's including Wiltshire this number may raise significantly once further factors are taken into account.</p> <p>3.1.10 Based on the above and the uncertainty regarding the future OAHN for Wiltshire when details of the SHMA are still unknown, MMH consider Wiltshire have the following options:          Delay further production of the SADPD until the new SHMA is published and details of the new OAHN are known;          Allocate more sites in the SADPD now in the event that the OAHN is significantly increased when the SHMA is published;          Allocate reserve sites in the SADPD now which can easily come forward should further sites be required when the SHMA is published.          Continue work on the SADPD with a risk that it could become out of date very quickly once a new OAHN is known.</p> <p>3.1.11 MMH's preference would be for the allocation of more sites in the SADPD now which will provide certainty and flexibility to Wiltshire and will avoid the risk of having to restart this process again when the SHMA is available and the partial review of the WCS takes place. Indeed the adopted WCS housing requirement was identified as a 'minimum' to ensure opportunities for residential development can come forward in a sustainable manner without comprising the Plan, which ensures a flexible approach can be followed.</p> <p>3.1.12 As a minimum MMH consider that the SADPD must seek to identify reserve sites now relating to housing requirements to be included in the WCS review, including those extending beyond 2026. If it does not then there is a danger that there will be a significant housing shortage in the area in the future.</p> <p>3.1.13 The sites which the Council should be considering for allocation now should be the most sustainable sites in settlements which can accommodate a significant quantum of housing quickly, with a particular emphasis on available sites in Market Towns such as Devizes.</p> <p>3.1.14 Obviously the Council can continue preparing the SADPD to meet the requirements in the adopted WCS, however there is a risk that the result will be further work to find additional sites in the future when these sites could be considered now as part of this process.</p> <p>3.1.15 MMH will be monitoring the publishing of new evidence (such as the SHMA) from Wiltshire Council and reserve the right to provide further comment should this become available.</p> <p>3.1.16 The next sections [Comments 3199 and 3200] will consider the detail of the draft SADPD as currently proposed.</p> <p>Conclusion</p> <p>3.1.17 Based on the above MMH do not consider that the SADPD is sound as currently drafted as it is not the most appropriate strategy when considered against reasonable alternatives.          For the Plan to be sound MMH would urge the Council to allocate more sites for residential development now to provide certainty and flexibility.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>As set out in the attached representations a number of issues are raised regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.</p>

				<p><b>Do you consider the draft WHSAP is sound?</b></p>	<p>No</p>
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>		<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>	<p>Justified</p> <p>Consistent with national policy</p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>Overall housing requirements in East HMA</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Introduction</p> <p>4.1.1 This section considers the overall housing requirements in the East HMA, the SADPD relationship with the Core Strategy and Neighbourhood Plans, and the delivery of sites in the East HMA.</p> <p>4.1.2 Overall MMH consider that there is a need to allocate further sites for development in the East HMA to ensure a flexible approach to housing supply is followed.</p> <p>Site Allocations relation to the Core Strategy</p> <p>4.1.3 Core Policy 1 of the adopted Core Strategy (WCS) sets out the settlement strategy for Wiltshire and identifies Devizes as a Market Town which are considered to have potential for significant development in the plan period. Core Policy 2 sets a 'minimum' housing requirement of 42,000 dwellings in Wiltshire between 2006 and 2026 which is distributed between three Housing Market Areas (HMA) in Wiltshire and the West of Swindon.</p> <p>4.1.4 Paragraph 4.20 of the WCS summarises the Council's flexible approach to housing to ensure sustainable development can come forward without being restricted by policies in the plan. It states: "Wiltshire's proposed strategic housing requirement is set out against defined subcounty areas as identified within the Wiltshire Strategic Housing Market Assessment (SHMA). However, in order to support the most sustainable pattern of growth, in line with the principles defined in Core Policy 1, indicative requirements are provided for each Principal Settlement, Market Town and by Community Area within paragraph 4.26 below. The indicative figures also allow a flexible approach which will allow the council including through the preparation of the Site Allocations DPD and local communities preparing neighbourhood plans to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach which might otherwise prevent sustainable development proposals that can contribute to delivering the strategic objectives of the plan."</p> <p>4.1.5 This approach will ensure that there is flexibility to deliver more housing than the 42,000 proposed, and particularly as a new OAHN was envisaged at the time of the WCS adoption once the new SHMA was to become available (originally envisaged in early 2016 at the time). The Inspector stated at Paragraph 81 of his WCS Inspectors report: "Indeed, I am particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes. Consequently I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more."</p> <p>4.1.6 Core Policy 2 of the WCS sets out that sites for development will be identified through subsequent Site Allocations DPDs and by supporting communities to identify sites through neighbourhood planning. Therefore, the SADPD is the vehicle (along with neighbourhood plans) to allocate sites to meet the 'minimum' WCS housing requirement of 42,000 between 2006 and 2026.</p>				

## Appendix Q - Schedule of representations

- 4.1.7 The 'indicative' housing requirements for each community area in the East Housing HMA derived from the draft SADPD are set out in Figure 4: Community Area Indicative Requirements [Officer note: It is assumed this is referring to Table 2.3 of the draft WHSAP]. This proposes an overall requirement of 5,940 in the plan period with 2,010 to be delivered in Devizes and 490 in the Devizes Community Area Remainder.
- 4.1.8 At paragraph 2.18 it states:  
"There is no requirement for each individual Community Area or settlement to have five years supply of land for housing."
- 4.1.9 This is welcomed and reflects the flexible approach put forward in the WCS and will ensure that housing need can be met in different locations across each HMA without being fixed by a specific community area. This will ensure that sites in settlements which are identified as constrained and undeliverable can be swapped for sites in more sustainable areas which have capacity to accommodate further housing, should this be required. As explained further below, the 'indicative' requirement put forward in each Community Area allows this flexible approach.
- 4.1.10 Figure 5 [Officer note: It is assumed this refers to Table 4.1 of the draft WHSAP] of the draft SADPD suggests that 3,497 completions have taken place in the East HMA between 2006-2017 with 2,273 developable commitments available for the remainder of the plan period, leaving only a requirement of 170 dwellings. Importantly figure 5 [Officer note: assumed this refers to para 4.2] states this as 'minimum to be allocated' and is not a cap on further development which is consistent with Core Policy 2 of the adopted Core Strategy and reflects the aims of Paragraph 47 of the NPPF to 'boost significantly the supply of housing'.
- 4.1.11 MMH welcome that the requirement for each HMA has been expressed as a minimum. It will be important that the draft SADPD fully embraces this to ensure that sufficient sites which are suitable for development in sustainable locations can come forward in addition to the allocations proposed.
- 4.1.12 This will ensure a flexible approach to housing in Wiltshire and it is especially important to allocate enough sites now to reflect future requirements which may be required once further evidence is published relating to the OAHN.
- 4.1.13 On this basis MMH consider that additional site allocations over and above the 'minimum figures' specified in the plan should be set out in the SADPD now to ensure that there is greater certainty in the future. At the very least the Council should be allocating reserve sites to provide flexibility in the event further evidence is published relating to the OAHN.
- Relationship to Neighbourhood Plans
- 4.1.14 It is acknowledged that neighbourhood plans have an important role to play in delivering housing requirements in Wiltshire in the plan period. At paragraph 2.22 of the draft SADPD it states:  
"The work being done on Neighbourhood Plans influences the selection of sites<sup>6</sup> and where Neighbourhood Plans have been 'made' or are well advanced the Plan leaves decisions on the scale and locations for growth in settlements to the communities concerned."
- 4.1.15 This is the correct approach, but it should be noted that 'made' Neighbourhood Plans should not be used as a mechanism to restrict development and constrain the delivery of strategic sites which can be brought forward through the SADPD process.
- 4.1.16 The situation in Devizes is exemplary of this point. Devizes is an area which was designated as a Market Town in the adopted WCS (January 2015). Core Policy 1 notes that:  
"Market Towns have the potential for significant development that will increase the jobs and homes in each town in order to help sustain and where necessary enhance their services and facilities and promote better levels of self containment and viable sustainable communities."
- 4.1.17 The Core Strategy Inspector noted at Paragraph 32 of his Report on the WCS (December 2014) that future development may occur in a potentially significant manner in Market Towns through means such as allocations in the Sites DPD.
- 4.1.18 In the WCS, Devizes town is allocated an 'indicative' requirement of 2,010 dwellings in the plan period. It should be noted that this requirement has never been intended as a cap on further development but will provide flexibility for the Council to advance additional housing development in suitable locations if there are sustainable sites available. Paragraph 4.40 of the draft SADPD states:  
"Indicative levels of housing for Market Towns are not a ceiling and a variance would not seem to present new or significant issues for local infrastructure and environmental capacity."
- 4.1.19 This suggests that there is potential for further development in Market Towns beyond 'indicative requirements' and reflects the adopted WCS.
- 4.1.20 As set out above Core Policy 2 of the WCS sets out that sites for development in Wiltshire can come forward through a site allocations DPD and neighbourhood planning.

## Appendix Q - Schedule of representations

4.1.21 The made Neighbourhood Plan for Devizes proposes housing numbers to meet the 2,010 'indicative' requirement, however it should be noted that this appears to be not shown as 'indicative' or 'minimum'. In addition the Neighbourhood Plan only allocates sites of up to 65 dwellings.

4.1.22 The Topic Paper 3 – Housing Land Supply (June 2017) which is part of the evidence base for the draft SADPD suggests at table 4.2 that there is a remaining indicative requirement in Devizes Town (part of the Devizes Community Area as a whole) of 0 dwellings. As set out before the requirement is indicative and this should not be seen as a sign that further housing in sustainable locations should be resisted in Devizes. The Inspector for the Coate Road appeal (Ref: 2206963) which related to a scheme for up to 350 dwellings on the edge of Devizes noted at Paragraph 231 of his decision:

"...it is worthwhile being in mind that the main aim of the NPPF is to facilitate sustainable development, not to prevent it. And by the same token, it seems to me that the DANP is about much more than just resisting development at the appeal site. Granting approval to the appeal scheme therefore need not stop the neighbourhood plan from promoting other sustainable developments as well, especially as the Devizes housing requirement is not meant to be a fixed ceiling."

4.1.23 The draft SADPD therefore provides an opportunity to allocate additional sites in suitable locations in Devizes/on the edge of Devizes such as strategic sites above 65 dwellings. The adopted WCS focus on 'indicative' and 'minimum' requirements provides the assurances for this approach.

4.1.24 The Examiner to the made Neighbourhood Plan for Devizes noted in his report (dated July 2014) at Paragraph 3.33 that 'there is also the possibility that site allocations, and indeed, the limits of development might be reviewed by Wiltshire Council through the forthcoming Site Allocations Development Plan Document'.

4.1.25 Overall the fact that a neighbourhood plan is 'made' should not result in the Council ruling out the allocation of sites in sustainable locations in the SADPD which accord with the principles of the Core Strategy as the Devizes housing requirement is by no means a fixed ceiling.

4.1.26 However, it is also important that development comes forward in a manner which is acceptable to the type of settlement. As market towns are ranked as settlements where substantial housing development is expected in the plan period, the Council should be considering additional sites as part of the SADPD process, if sustainable sites are available for development.

### Deliverability of Sites in the East HMA

4.1.27 This section will consider the delivery of sites in the East HMA based on available evidence and the estimated delivery rates of the sites which contribute to the five year housing land supply.

### Deliverability of sites in trajectory

4.1.28 To boost significantly the supply of housing (Paragraph 47 of the NPPF), LPA's are required to identify and update annually a supply of specific deliverable sites sufficient to provide five year's worth of housing against their housing requirements. Footnote 11 of Para 47 clarifies the meaning of deliverability as:

"achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable"

4.1.29 The Council's Topic Paper 3 - Five Year Land Supply Statement (June 2017) suggests Wiltshire are currently able to demonstrate a five year housing supply of 9.18 years (5% buffer) and (tbc) years (20% buffer).

4.1.30 As set out in Section 2 [Officer note: See Comment 3197] of these representations it is important that the Council updates its evidence base to include a housing trajectory to demonstrate how each site will be delivered.

4.1.31 The latest available trajectory is from the Housing Land Supply Statement (dated November 2016) which has an April 2016 base date. As there is nothing more recent relating to the latest housing land supply position in the evidence (which should have a April 2017 base date) for the draft SADPD we have considered the sites in the November 2016 trajectory. Should further evidence become available we reserve the right to provide further comment.

4.1.32 The November 2016 trajectory includes figures for the sites which are allocated in the made Neighbourhood Plan for Devizes and sets out the years they are expected to deliver housing development. It is important to note that a number of the figures in the trajectory are different from the allocated numbers in the Neighbourhood Plan. This suggests the Neighbourhood Plan may not deliver as expected. For instance Land at end of Hillworth Road (site 532) is shown to deliver 42 dwellings in the trajectory but is allocated for 47 dwellings in the Neighbourhood Plan.

#### Appendix Q - Schedule of representations

4.1.33 In addition other sites allocated in the Neighbourhood Plan which are subject to planning applications may not deliver as expected. For instance a full application for 55 extra care dwellings on Land at Brofort Way, Bath Road (site 4003) was approved in December 2016 (ref:16/04371/FUL). However, the trajectory suggests this site is capable of delivering 60 dwellings in the plan period. This does not mean that another application will not be submitted for 5 dwellings in the future but it seems illogical for this to occur.

4.1.34 As set out above the requirement for development in Devizes is 'indicative' which provides flexibility for further sites to be allocated in the SADPD which will assist in providing further housing in sustainable locations. The further allocations will also assist in making up numbers for any sites which may not deliver as expected, particularly sites allocated in the made Neighbourhood Plan.

Delivery rates

4.1.35 In accordance with Paragraph 47 of the NPPF it is important that the Council considers whether there is a realistic prospect of the sites identified in the five year requirement coming forward at the expected rates, which in turn could impact on the number of sites which need to be allocated in the SADPD. Having reviewed the evidence, it is not clear whether the council have fully undertaken this exercise.

4.1.36 It is important that housing trajectories provide accurate delivery rates, especially for the larger sites which make a significant contribution to housing land supply. MMH raise concerns with the build out rates suggested in the housing trajectory with a significant number of dwellings anticipated to be delivered, particularly for major sites in Devizes, Ludgershall and Tidworth and Marlborough in both the 2016/2017 period and the current 2017/2018 period.

4.1.37 However, MMH raise more fundamental concerns with the delivery rates put forward on Land at Lay Wood south of Horton Road (site E13.1243) and Riverbourne Fields in Tidworth, Wiltshire (site S15.5084). These make a substantial contribution to the East HMA five year land supply.

4.1.38 The 2016 trajectory predicts that 80 dwellings will delivered in the 2019/2020 period for the Horton Road site. For the Riverbourne Fields site the trajectory predicts delivery of 83 in the 2019/2020 period and a substantial 156 dwellings in the 2018/2019 period. In later years for this site (2020/21 and 2021/22) the trajectory predicts that the site will only deliver 18 dwellings in each year. MMH consider that these figures are too high and would urge the Council to provide evidence justifying these significant rates as it is not clear this has been provided. As set out above the Council will firstly need to prepare a new trajectory for the 2017/2018 base year.

4.1.39 MMH also raise concerns with sites which are expected to deliver housing in the period 2017/2018 (i.e by end of March 2018) with some sites not delivering as quickly as expected and some which have not yet even started construction.

4.1.40 The trajectory suggests that a large proportion of the five year land supply of sites will come from large allocations. One of the largest allocations which is expected to deliver a significant quantum of housing in the next five years is 'Land West of Salisbury Road in Marlborough' (site E15.2026).

4.1.41 In this trajectory Wiltshire Council have indicated that 175 dwellings will be delivered on this site by 2021/22. An outline application for 175 dwellings was approved on July 2016 (LPA Ref: 15/02026/OUT). The trajectory suggests 55 dwellings will be delivered on this site in 2017/2018 (i.e. by end of March 2018). A reserved matters application for 168 dwellings on the same land was live at the time of writing, however, there is still likely to be a need to discharge relevant planning conditions. With this in mind it is unlikely whether the site will come forward as quickly as suggested. Based on a site visit to date we can confirm construction is yet to begin on this site with no obvious signs this will begin in the near future.

4.1.42 Based on this the SADPD provides an opportunity for the Council to allocate additional sites to provide flexibility in their housing supply and reflecting the status of sites which are not delivering as expected.

Conclusion

4.1.43 Overall whilst Wiltshire Council maintain that they can demonstrate a significant five year land supply in the East HMA, MMH consider that the level of provision is still too low, for the following reasons:  
The flexible approach put forward in the adopted WCS encourages further sites to come forward in sustainable locations over and above the 'minimum' and 'indicative' requirements;  
The housing requirements in made Neighbourhood Plans should not be considered as a cap on delivering housing requirements but the SADPP provides an opportunity for the Council to allocate further sites in sustainable locations in line with the adopted WCS;  
There are doubts regarding the delivery of some sites in the East HMA and the rates at which they will be built out;

Appendix Q - Schedule of representations

	<p>4.1.44 On this basis MMH consider further sites should be allocated in the SADPD. Unless a proactive approach to delivering sustainable development is adopted in the SADPD the Plan will fail to meet the NPPF objective of significantly boosting the supply of housing. On this basis the Plan cannot be considered sound as it is not justified or consistent with national policy.</p> <p>4.1.45 The next section [Officer note: Comment 3200] will consider the site specific policies in the draft SADPD for the East HMA which are intended to deliver the 170 'minimum requirement' for the remainder of the plan period.</p> <p>On this basis MMH consider further sites should be allocated in the SADPD. Unless a proactive approach to delivering sustainable development is adopted in the SADPD the Plan will fail to meet the NPPF objective of significantly boosting the supply of housing. On this basis the Plan cannot be considered sound as it is not justified or consistent with national policy.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>As set out in the attached representations a number of issues are raised regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.</p>

Appendix Q - Schedule of representations

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Justified
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H1				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Site Allocations in the East HMA 5.1.1 This section considers the policies proposed in the draft SADPD for the East HMA and whether the sites proposed are suitable for residential development, and thus whether the plan is sound. 5.1.2 As set out in the previous section [Officer note: as set out in Comment 3199], Figure 5 [Officer note: it is assumed this refers to Table 4.1] of the draft SADPD suggests that 3,497 completions have taken place in the East HMA between 2006-2017 with 2,273 developable commitments available, leaving only a requirement of 170 dwellings to be delivered in the remainder of the plan period. 5.1.3 Policy H1 of the draft SADPD proposes land allocated for residential development on a number of sites in the East HMA. 5.1.4 One of the chosen sites is Land at Empress Way, Ludgershall (Tidworth Community Area) which is allocated a total of 270 dwellings under Policy H1.1 of the draft SADPD. Paragraph 5.17 suggests that 109 dwellings have been approved with planning permission under LPA Ref E/2013/0234/OUT and that a further 160 can be developed on land next to the site. 5.1.5 The three other sites are allocated for housing in Market Lavington (Devizes Community Area) under the following references: H1.2 (Underhill Nursery) H1.3 (Southcliffe) H1.4 (East of Lavington School) 5.1.6 We have considered each of the sites in turn below: Land at Empress Way, Ludgershall(PolicyH1.1) 5.1.7 We note that an outline application for 109 dwellings was approved on this site on 15thJune2015under LPA Reference E/2013/0234/OUT. 5.1.8 We note that a further outline application for 269 dwellings (including land covered by the previous application) was refused on 15th February 2017 under LPA reference 16/10907/OUT. One of the reasons for its refusal was because of the sites location on agricultural land with an Agricultural Land classification of 'grade 3a'. According to the National Planning Policy Framework land in grades 1, 2 and 3a is the best and most versatile. 5.1.9 In addition whilst not specified in the decision notice for this application, the Council's Sustainability Appraisal (SA) which underpins policies in the draft SADPD suggests that development on this site is likely to have moderate adverse effects on the Sustainability objective to use and manage water resources in a sustainable manner (objective 3) and the objective to protect and enhance all biodiversity and geological features and avoid irreversible losses. 5.1.10 This suggests there are constraints which could prevent development on the site and potentially affect the developable area. H1.2 – H1.4 5.1.11 The three Market Lavington sites proposed as allocations can be summarised as follows: H1.2: Underhill Nursery – approximately 2.6 hectares of land on the edge of the settlement allocated for approximately 50 dwellings; H1.3: Southcliffe – approximately 0.9 hectares of land on the edge of the settlement allocated for approximately 15 dwellings;			

Appendix Q - Schedule of representations

H1.4: East of Lavington School – approximately 0.6 hectares of land allocated on the edge of the settlement for approximately 15 dwellings.

5.1.12 Market Lavington was designated as Local Service Centre in Core Policy 2 of the adopted WCS (3rd out of 5 in the settlement hierarchy). Core Policy 2 states:  
 “Local Service Centres will provide for modest levels of development in order to safeguard their role and to deliver affordable housing”

5.1.13 Paragraph 5.23 of the draft SADPD notes that Market Lavington is an area affected by flooding, it states:  
 “Surface water management and flood risk: parts of Market Lavington are affected by surface water flooding during extreme weather events. In part this is due to the village’s proximity to the chalk escarpment associated with the Salisbury Plain”

5.1.14 Furthermore, all three sites are shown in the SA to have a moderate adverse effect on the objective to use and manage water resources in a sustainable manner (objective 3) and to minimise impacts on climate change through reducing vulnerability to future climate change effects. We have concerns regarding the allocation of sites located in areas at risk to flooding which should be discounted unless it can be demonstrated that there are no other reasonable options available.

5.1.15 Paragraph 100 of the NPPF is clear that:  
 “Local Plans should be supported by Strategic Flood Risk Assessment and develop policies to manage flood risk from all sources, taking account of advice from the Environment Agency and other relevant flood risk management bodies, such as lead local flood authorities and internal drainage boards. Local Plans should apply a sequential, risk based approach to the location of development to avoid where possible flood risk to people and property and manage any residual risk, taking account of the impacts of climate change.”

5.1.16 Paragraph 101 goes on to clarify that ‘The aim of the Sequential Test is to steer new development to areas with the lowest probability of flooding. Development should not be allocated or permitted if there are reasonably available site appropriate for the proposed development in areas with a lower probability of flooding.’

5.1.17 Whilst in principle it may be considered appropriate to locate some development in lower tiered settlements such as Local Service Centres to safeguard their role (in accordance with Core Policy 1 of the adopted WCS) and deliver housing (in accordance with Core Policy 2), the significant risk of flooding now and in the future, together with the implications of climate change suggest that a more appropriate strategy which seeks to avoid areas of flood risk should be considered preferable. This does not mean that development adjacent to Market Lavington is not acceptable. However, in appropriate cases more sustainable settlements should be identified for increasing levels of growth as an alternative to building in areas at risk to flooding. The fact that the WCS proposes ‘indicative’ requirements provides flexibility to locate housing in more sustainable locations should this be required.

5.1.18 As set out in the previous section [Comment 3199] Devizes is identified as a Market Town which is expected to accommodate significant growth in the plan period.

5.1.19 MMH consider that locating further growth in Devizes should be considered as a reasonable alternative to sites located in floodplains. It is important to note that the SA has not considered sites outside of Market Lavington.

Conclusion

5.1.20 Based on the above MMH consider the Plan is not sound as it has not considered all reasonable alternatives and has based its strategy on allocating sites with doubts regarding their suitability without consideration of other sites which are less constrained and located in more sustainable locations.

5.1.21 For the Plan to be considered sound further sites should be considered in sustainable locations including in larger settlements where substantial development is expected.

5.1.21 A particular emphasis should be given to sites which have already been confirmed as acceptable, are not technically constrained and are in sustainable locations. Land off Coate Road, Devizes is a site which meets this criteria. This site is considered further in the next section.  
 [The details of the site are considered in Comment 3196]

**Attached files (Please see Objective)**

**If your representation is seeking a change, do you consider it necessary to**

As set out in the attached representations a number of issues are raised regarding soundness of the plan. Therefore, we consider it will be necessary to participate at the oral part of the examination to ensure we have the opportunity to speak on behalf of our client.

<b>participate at the oral part of the examination?</b>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3201</a>	<b>Consultee</b> Mctaggart & Mickel  <b>Person ID:</b> 861027	<b>Agent</b> Mr Jonathan Chick Planner  Walsingham Planning  <b>Person ID:</b> 1136403	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H1.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		5.1.7 We note that an outline application for 109 dwellings was approved on this site on 15th June 2015 under LPA Reference E/2013/0234/OUT. 5.1.8 We note that a further outline application for 269 dwellings (including land covered by the previous application) was refused on 15th February 2017 under LPA reference 16/10907/OUT. One of the reasons for its refusal was because of the sites location on agricultural land with an Agricultural Land classification of 'grade 3a'. According to the National Planning Policy Framework land in grades 1, 2 and 3a is the best and most versatile. 5.1.9 In addition whilst not specified in the decision notice for this application, the Council's Sustainability Appraisal (SA) which underpins policies in the draft SADPD suggests that development on this site is likely to have moderate adverse effects on the Sustainability objective to use and manage water resources in a sustainable manner (objective 3) and the objective to protect and enhance all biodiversity and geological features and avoid irreversible losses. 5.1.10 This suggests there are constraints which could prevent development on the site and potentially affect the developable area.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3206</a>	<b>Consultee</b> Mr Conor Lee Hannick Homes & Developments Ltd  <b>Person ID:</b> 863519	<b>Agent</b> Mrs Louise Follett Principle Planner  Pegasus Group  <b>Person ID:</b> 1128217	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
Please identify the policy, paragraph, table, figure or site to which you are referring.		H1		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		See attached rep for detailed comments on policy H1. It is submitted that Policy 1of the WHSAP is not sound as; 1. It fails to plan positively in accordance with the paragraph 17 of the NPPF to identify sites to meet the Marlborough Remainder Housing need identified in the WCS and instead relies on existing committed supply within the HMA, but outside the Marlborough Community Area remainder, to meet that locally specific minimum need. Paragraph 17 of the NPPF states that, ‘Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth’. 2. The WHSAP also fails to allocate sites in accordance with spatial strategy of the WCS, as in this instance, after the Market Town of Marlborough, (which had a large strategic allocation adopted through the WCS (Core Policy 14 Land to West of Salisbury Road – 220 dwellings)), the next tier of settlement to accommodate housing growth to meet housing need are the four Large Villages described above. 3. The WHSAP is inconsistent as it allocates sites in Large Villages in the North and West Housing Market Area but does not adopt the same approach for the East Wiltshire HMA. 4. The WHSAP relies on the delivery of housing to meet local need at Large Villages through Neighbourhood Plans, however of the four Large Villages in the Malborough Community Area only one has a Neighbourhood area identified. Given the WHSAP is in the process of being prepared now it is incumbent upon the Council to identify sites for development in the Marlborough Community Area Large Villages in order to provide certainty over housing delivery for the plan period in the absence of substantive neighbourhood plan preparation across the four large villages in the Community Area. 5. The Sustainability Appraisal (June 2017) states that there may be cumulative effects as a result of Policy H1 with land identified for housing development at Drummond Park (MSA) Depot, Ludgershall in the Core Strategy (Core Policy 26 for 475 dwellings). 6. Potential development sites in the Marlborough Community Area, including sites submitted to the Wiltshire Strategic Housing Land Availability Assessment process, have not been assessed in the Sustainability Appraisal (June 2017) as the WHSAP states that development in the Large Villages in the East Wiltshire HMA should come forward through Neighbourhood Plans, not through allocations in the WHSAP. There is therefore no way of comparing the relative sustainability credentials of our client’s site against those sites allocated at the Market Towns in Policy H1. See attached rep for detailed changes to policy H1 and supporting text. The suggested change to Policy H1 is to include the following sites at Large Villages in the Marlborough Community Area as allocations to address the identified unmet housing requirement in the Community Area Remainder of 34 dwellings. Land at Lottage Farm, Lottage Road, Aldbourne – See Appendix 1 (SHLAA ref 3485) Land at Russley Green, Baydon – See Appendix 2 (SHLAA ref 3188)

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	To be able to explain to the Inspector the relative merits of my client's sites for the delivery of housing in accordance with the Council's published spatial strategy and to meet the local housing needs of the Marlborough Community Area remainder as identified in the Draft Wiltshire Housing Site Allocations Plan (June 2017) and its supporting evidence.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3207</a>	<b>Consultee</b> Mr Conor Lee Hannick Homes & Developments Ltd  <b>Person ID:</b> 863519	<b>Agent</b> Mrs Louise Follett Principle Planner  Pegasus Group  <b>Person ID:</b> 1128217	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H1		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Housing Land Supply evidence for the Wiltshire Sites Allocation Plan is provided in Topic Paper 3 Housing Land Supply (June 2017) which will be informed by the Wiltshire Housing Land Supply Statement Update (March 2017). The published Topic Paper 3 data does not provide the detailed sources of supply across the HMA on a site by site basis and my client reserves the right to comment on this in the future as and when it is published. However, Table 3.1 of Topic Paper 3 points to the residual requirements of each Housing Market Area and each community area for the remainder of the plan period up to 2026. It is noted that Footnote 7 clearly states that the residual indicative requirement for 2017 has been estimated and paragraphs 3.10 - 3.12 apply. Table 3.1 of Topic Paper 3 states that a residual requirement of 170 dwellings exists for the whole East Wiltshire Housing Market Area, more specifically a residual requirement of 51 dwellings is identified for the Marlborough Community Area (of which 34 dwellings are in the Community Area remainder). Existing Neighbourhood Plan Allocations Is submitted however that delivery from the Neighbourhood Plans in the HMA is questionable. The Housing Land Supply Update Statement (March 2017) identifies delivery of 142 units from allocations in the Devizes Neighbourhood Plan at the end of the plan period in the 2025/2026 monitoring year. It is contended that if these allocations were truly 'deliverable' in the five-year housing land supply sense then they would be showing in the Council's trajectory as delivering earlier in the plan period. The local authority must have some considerable doubt over the delivery of the Devizes Neighbourhood Plan allocations for them to be shown as delivering so late in the plan period. Indeed the rigour that is applied to the examination of neighbourhood plan allocations is less than the rigour applied to Local Plan allocations and therefore there is some doubt over whether these particular neighbourhood plan allocations will indeed contribute to housing land supply by 2026. The same argument can be made for the planned supply of dwellings through the Pewsey Neighbourhood Plan for the HMA housing land supply total, although these units are shown as delivering earlier in the plan period during 2021/22 and 2022/23. When added together the allocations from Devizes and Pewsey total some 200 dwellings, the delivery of which in the plan period is not at all certain. It is submitted therefore that the deliverable total for the East Wiltshire Housing Market Area for the plan period should be reduced by at least 142 units to account for the uncertain source of supply from Devizes Neighbourhood Plan but this figure could be as high as 200 if the allocations from the Pewsey Neighbourhood Plan are also included. This in turn would increase the residual indicative requirement for the East Wiltshire Housing Market Area by at least 142 dwellings from 170 to 312 dwellings, or more pessimistically from 170 to 370 dwellings. Table 3.3 of Topic Paper 3 indicates that the East Wiltshire HMA has 8.47 years of housing land supply, however closer inspection of the Housing Land Supply Update (March 2017) reveals an optimistic approach to housing delivery for the WCS Strategic Allocation at Land West of Salisbury in Marlborough. While outline planning permission has been granted at the site the reserved matters application is still to be			

Appendix Q - Schedule of representations

	<p>determined therefore the delivery of 55 dwellings from the site in the 2017/18 monitoring year is unlikely to be achieved. While access was approved as part of the outline application all ground works still need to be undertaken at the site before any dwellings can commence construction.</p> <p>It is more likely that a phased delivery will take place at the site with, for example, 25 dwellings delivering in the first delivery year, which realistically may be 2019/20, with increased annual delivery numbers thereafter. This would reduce deliverable capacity in the five-year supply by 50 dwellings in Marlborough Community Area.</p> <ol style="list-style-type: none"> <li>1. That the housing land supply for the East Wiltshire Housing Market Area be discounted by the capacity of allocations identified in the Devizes Neighbourhood Plan where the Council have concerns over the delivery of the made allocations in the plan period before 2026.</li> <li>2. That careful consideration be given to the estimated delivery trajectory of dwellings from allocations in the Pewsey Neighbourhood Plan</li> <li>3. That the anticipated housing delivery from the WCS strategic allocation at Land West of Salisbury Road Marlborough be amended to reflect the fact that there are currently no starts on dwelling construction at the site, and the delivery trajectory be amended accordingly to reflect this.</li> <li>4. Once these matters have been taken into consideration the Indicative Remainder for both the East Wiltshire Housing Market Area and the Marlborough Community Area will require amendment where they appear in the WHSAP.</li> </ol>

				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocations Plan (June 2017) (WHSAP) states at Paragraph 1.1 that one of its purposes is to: 'Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages;'</p> <p>The methodology for the review of settlement boundaries is described in Topic Paper 1 – Settlement Boundary Review Methodology (June 2017) (SBRM).</p> <p>The outcomes of the settlement boundary review are reported in each Community Area Topic Paper. (It is noted that the Chippenham Settlement boundary was reviewed and adopted through the Chippenham Site Allocations Plan.)</p> <p>The SBRM states at paragraph 1.2 that the Wiltshire Core Strategy (2015) (WCS) did not review settlement boundaries but instead carried forward the settlement boundaries adopted in each of the former local district adopted Local Plans, prior to the County becoming an unitary authority.</p> <p>The Policy of the WCS is that sites outside a settlement boundary will generally be considered unsuitable for development, Core Policy 2 states; 'Other than in circumstances as permitted by other policies within this plan, identified in paragraph 4.25, development will not be permitted outside the limits of development, as defined on the policies map. The limits of development may only be altered through the identification of sites for development through subsequent Site Allocations Development Plan Documents and neighbourhood plans.'</p> <p>The WHSAP identifies at Table 4.9 that within the Marlborough Community Area there is a minus 14.1% difference between the indicative dwelling requirement 2006-2026 and the sum of completions and developable commitments 2017-2026. The Marlborough Community Area Topic Paper (MCATP) states an indicative residual requirement for 34 additional dwellings to deliver in the plan period in the Marlborough Community Area Remainder, however the SBRM does not include sites with the potential for the delivery of dwellings, including site allocations or extant planning permissions within its revised settlement boundaries.</p> <p>It is noted that the WCS provides the opportunity in the last sentence of paragraph 4.13 for neighbourhood plans to review settlement boundaries;</p> <p>'It will also be the prerogative of the community to review settlement boundaries through a neighbourhood plan.'</p> <p>It is therefore unclear how the additional indicative requirement of 34 dwellings will be provided in the Marlborough Community Area as the settlement boundary reviews of Marlborough and its associated four large villages do not include sites for the delivery of this quantum of development. It is unlikely that such a quantum of development would come forward in the plan period through windfall development within the settlement boundaries of the Marlborough Community Area.</p> <p>Aldbourn Large Village</p> <p>The settlement boundary for Aldbourn is extended to the north by the settlement review to include land parcels in I3; J2 and J3. These proposed amendments are described in Table A.2 on page 19 of the MCATP as;</p> <p>'Extension of boundary to take into account built residential development that is physically related to the settlement'.</p>			

Appendix Q - Schedule of representations

	<p>The proposed extension of the settlement boundary to the north of the village of Aldbourne is supported by our client. Land at Lottage Farm is situated at map reference J3 and J2 adjacent to both the north of the existing settlement boundary and the proposed extension to the settlement boundary which would be situated to the west of the site. Appendix 1 clearly shows the location of our clients site. It is submitted that the settlement boundaries in Marlborough Community Area should be amended to allow for the indicative residual requirement for the Community Area to be met in the plan period, to allow the Community Area Remainder to be delivered in accordance with Core Policy 2 of the WCS.</p> <p>Inclusion of our client's sites at Lottage Farm Aldbourne and Land at Russley Green, Baydon as identified in Appendices 1 and 2, within the settlement boundaries of each of the Large Villages of Aldbourne and Baydon would ensure that sufficient land was identified within settlements to allow for the Marlborough Community Area Remainder to be delivered in a way that complies with the existing polices of the WCS and emerging WHSAP.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. Introduction</p> <p>1.1 This representation is submitted to the draft Wiltshire Housing Site Allocations Pre Submission Plan (June 2017) to promote land off Calne Road, Lyneham.</p> <p>1.2 The site is approximately 7.12 ha and is located on the south western edge of Lyneham, comprising two flat fields accessed off the A3102 (Calne Road) which forms the main road running through Lyneham, including to its centre which is located to the north.</p> <p>1.3 To the north west of the site is MOD Lyneham albeit a number of large military hangars bound the north and north eastern part of the site. A field bounds the site immediately to the south, with a poultry farm further to the south of that. Fields also bound the site immediately to the south east, with Freegrove Farm further to the east of those. Immediately to the west, the site is bound by Calne Road with housing on the other side of that. Further to the west is MOD Lyneham.</p> <p>1.4 The site is located adjacent to Lyneham's existing built form and is considered to be suitable, available and achievable for residential development. It is anticipated that the site can deliver much needed homes for Wiltshire within 5 years.</p> <p>1.5 Early investigations into various technical matters suggest that there would be no significant adverse impacts as a result of residential development of this site. Any potential adverse impacts are minor and can be readily mitigated through the development management process.</p> <p>Site Location: Land off Calne Road, Lyneham [refer to site location plan in attached full representation]</p> <p>3.11 With the above in mind, the site off Calne Road, Lyneham should be allocated for residential development. It represents a logical extension to Lyneham and forms a sustainable development proposal that can contribute towards Wiltshire's and Lyneham's housing needs going forward. Any potential adverse impacts are minor and can be readily mitigated through the development management process.</p>			
<b>Attached files (Please see Objective)</b>		4749570			
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		Planning Prospects represent the landowner in promoting land off Calne Road, Lyneham for residential development and have detailed comments with regard to the delivery of that site and with respect to the approach to be taken for the emerging Housing Site Allocations Plan generally.			

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">3213</a>	<b>Consultee</b> Mr Chris Dodds Associate Director  <b>Person ID:</b> 1138508	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No

			Effective	
			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>2. Development Plan Context: Meeting Housing Needs</p> <p>2.1 Lyneham is designated as a 'Large Village' and has a wide range of facilities including those associated with the growth of MOD Lyneham (formerly RAF Lyneham) throughout the previous century.</p> <p>2.2 The adopted Core Strategy, requires Wiltshire to accommodate at least 42,000 additional dwellings over the period 2006 to 2026, but this represents a minimum requirement and not a capped target. The Inspector who conducted the Core Strategy's Examination in Public (EiP) made clear that the balance of evidence suggested that the objectively assessed need for the three Wiltshire Housing Market Areas (HMAs) was somewhere in the region of 44,000 new homes over the Plan period (Inspector's Report - paragraph 78).</p> <p>2.3 The Core Strategy Inspector also expressed a clear understanding that Wiltshire was obliged to meet the full Objectively Assessed Need (OAN) through the Allocations Plan, Neighbourhood Plans and Chippenham Site Allocations Plan (Inspector's Report - paragraph) and where the Council intended to produce a new Strategic Housing Market Assessment (SHMA) in 2016 which may revise the OAN again (Inspector's Report - paragraph 81), the Core Strategy figure of 42,000 must not be seen as a ceiling in the delivery of housing for the purposes of identifying an appropriate scale of housing site allocations.</p> <p>2.4 Moreover, the Council is required by the National Planning Policy Framework (NPPF) to use its evidence base to ensure that its Local Plan meets the full OAN for market and affordable housing in the HMA. The true full OAN for Wiltshire is likely to be subject of further scrutiny and debate as the Allocations Plan progresses.</p> <p>2.5 It is also becoming increasingly likely that as a result of the publication of the Government's Housing White Paper (February 2017) and subsequent consultation (September 2017) the method of how the Government expects the housing needs of local authorities to be assessed through their local plan making will be subject to change prior to the emerging Housing Allocations Plan being examined. It is expected that a standardised approach (a draft of which is subject to consultation between September and November 2017) will be applicable to local plans that are submitted for examination after 31st March 2018, making it relevant here. The consultation is a draft itself and therefore subject to debate and change but it nonetheless continues to suggest that the OAN figure for Wiltshire is higher than that provided in the adopted Core Strategy.</p> <p>3. Emerging Housing Site Allocations Pre-Submission Draft</p> <p>3.1 In the case of Wiltshire, the OAN is known to be higher than the minimum requirement set out in the adopted Core Strategy. The proposed scale of site allocations in the emerging Housing Site Allocations Plan is inadequate to satisfactorily demonstrate that Wiltshire's full OAN will be met and a rolling five year housing land supply can be maintained.</p> <p>3.2 When allocating land for new development, local plans must be suitably pragmatic in order to ensure they are an effective tool to manage and deliver development. To achieve this, they should provide sufficient flexibility to respond to changes in circumstances over the plan period. It is important that the emerging Plan does not introduce an approach that places unreasonable restrictions upon sustainable development opportunities. However, we note that a number of sustainable development opportunities do exist across the settlement hierarchy that can support delivery of Wiltshire's full development needs but those have not been adequately considered.</p>

<b>Comment ID:</b> <a href="#">3214</a>	<b>Consultee</b> Mr Chris Dodds Associate Director  <b>Person ID:</b> 1138508	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			Justified	
			Effective	
			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>3.3 The National Planning Policy Framework (NPPF) requires that for a local plan to be found sound (in order to be adopted), it must be positively prepared (meet Objectively Assessed Needs), justified (provide the most appropriate strategy), effective (deliverable over its period) and consistent with national policy.</p> <p>3.4 In preparing its Housing Site Allocations Plan, the Council must take into account that the Core Strategy's proposed distribution of housing below the Housing Market Areas is indicative (Core Strategy - paragraph 28) and that all sustainable settlements, large or small, can play a role in meeting Wiltshire's housing needs. It should therefore take a flexible and positive approach to allocating land for development across its settlement hierarchy, recognising that the level of development considered acceptable in lower order villages should take account of their needs and ability to support further sustainable growth.</p> <p>3.5 It is also essential that sustainable settlements across the hierarchy are enabled to deliver in a manner that will support and expand the range of services and facilities to meet their day-to-day needs. Paragraph 55 of the NPPF seeks to promote sustainable development in rural areas to maintain and enhance rural vitality and viability. We therefore suggest that the site at Calne Road, Lyneham should be allocated where it represents a sustainable location for the growth of Lyneham.</p> <p>3.6 We object to the proposed Housing Delivery Strategy, which introduces a number of restrictions to the growth of sustainable settlements. Paragraph 4.14, for example, indicates that opportunities in some Large Villages have not been explored as allocations in the emerging Housing Site Allocations Plan because Core Strategy housing needs have already been accommodated for the wider Community Area, either through development that has already taken place or that is planned. The draft Allocations Plan suggests that further development brought about by Plan allocations would be in excess of meeting local needs would result in conflict with WCS Core Strategy Policy 1. As a result SHLAA sites from the Large Villages were not considered as reasonable alternatives going forward.</p> <p>3.7 The adopted Core Strategy sets out an indicative number of homes for the Royal Wootton Bassett and Cricklade Community Area but as set out above, that figure is indicative and represents a minimum requirement meaning there should not be an in-principle restriction to development in excess of that figure. Table 4.5 suggests that no allocations are provided for Lyneham which is by far the largest and most sustainable Large Village in the North and West Wiltshire HMA. Lyneham is a settlement capable of accommodating growth, and growth is needed if its services and facilities are to be maintained and enhanced. Development that has taken place elsewhere in the Royal Wootton Bassett and Cricklade Community Area already, will not support services and amenities in Lyneham, nor provide new houses for existing and future residents in the village.</p> <p>3.9 The unnecessarily restrictive approach proposed would result in a Plan that is not positively prepared, not effective and ultimately fails to deliver the housing needed in Wiltshire. It is essential that the site selection process acknowledges that the Core Strategy requirement is flexible and provides only an indicative approach which should ultimately not seek to restrain or restrict Wiltshire's ability to deliver the homes it needs and to maintain a five year housing land supply.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Plan stage 2/3. Legally compliant. This is assumed as I have no easy access as a member of the public to relevant documentation.</p> <p>Plan Stage 2 assessment. Accepted, no comments.</p> <p>Plan Stage 3. Assessment is UNSOUND for S1027. Comments:</p> <p>a) SA obj 2. Despite being adjacent to housing, the site with 127 houses proposed, this is a greenfield development with significant BMV removal.</p> <p>b) SA obj 3. Similar to the adverse impact on S1027, existing water/sewage facilities and capacity are inadequate. A Wessex Water capacity assessment is vital, with funded effective recommendations. Currently no local sewage work is planned until 2020.</p> <p>c) SA obj 5b. Being in flood zone 1, site S1027 is subjected to partial surface flooding annually and since 1989 has suffered complete flooding 3 times. A Flood Risk Assessment with effective funded recommendations is essential for the security of 127 households.</p> <p>d) SA obj 7. No effective risk reduction measures are detailed that manage the site development to ensure recommendation measures are implemented to maintain green/visual connectivity features.</p> <p>e) SA obj 9. As highlighted by the WCCG, the site needs additional educational/NHS/community services as existing local facilities have no capacity or are too distant, ns S1028.</p> <p>f) SA obj 10. With the introduction of some 100+ cars/vans, a MAJOR adverse impact on the existing Harnham Gyrotory, and local traffic density will occur. An updated Salisbury Traffic Management Strategy with the associated Traffic Assessment with funded and effective remedial action is essential.</p> <p>Recommended changes for S1027 stage 3 assessment to be SOUND are:</p> <p>a) SA obj 2. The proposed site is a SIGNIFICANT greenfield development with BMV removal on the local area. Change assessment to MODERATE adverse impact (ie--).</p> <p>b) SA obj 3. The water supply/sewage existing capacity is clearly inadequate. Until the necessary Wessex Water facilities assessment is completed for the proposed 127 households, the assessment has to be a MAJOR adverse impact (ie---).</p> <p>c) SA obj 5b. with clear evidence of flood zone 1 surface flooding on an annual basis and a major flood zone2/3 every ? 10 years, until a Flood Risk Assessment with funded effective recommendations, the assessment is changed to MAJOR adverse impact (ie---).</p> <p>d) SA obj 7. Until effective risk reduction measures are detailed that will successfully manage site development to ensure green channel/visual connectivity features, the assessment is changed to MODERATE adverse impact (ie--).</p> <p>e) SA obj 9. Until effective and funded measures are identified to ensure adequate educational/NHS/community services are available, the assessment is changed to MAJOR adverse impact (ie---).</p> <p>f) SA obj 10. Until an updated Salisbury Traffic Management Strategy/local Traffic Assessment with effective and funded remedial action identified, the assessment is changed to MAJOR adverse impact (ie---).</p> <p>Conclusion: Site 1027 should not proceed to stage 4a due to MAJOR adverse impacts at SA obj's 3, 5b, 9 and 10.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Devizes			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Whilst we do not consider that the Plan is unsound, we would recommend that the Council identify reserve sites and include a policy mechanism to release reserve sites to respond to changed circumstances. This would make the Plan more robust. See Covering Letter for more information. Paragraph 52 of the NPPF confirms that the supply of new homes can sometimes be best achieved through planning for larger scale development, such as extensions to existing towns. The SMV's land at Roundway Park is immediately adjacent to the built-up area of Devizes and identified with the Council's SHLAA as 'suitable' for residential development for up to 396 dwellings. We consider that all or part of the Site (i.e. the eastern part of the site and development of c.4 hectares for around 100 - 120 dwellings) should be identified as a reserve site for the following reasons:</p> <ul style="list-style-type: none"> <li>a) The land between White Horse Way residential development and the Hopton business/industrial park would form a natural rounding off of development in this locality and would not appear as an incursion into the countryside.</li> <li>b) The sites have positive sustainable attributes including easy access to bus stops and a frequent bus service, excellent access to employment opportunities by means other than the private car and good access to services and facilities.</li> <li>c) There are no planning history or policy constraints which would prevent the sites coming forward for housing.</li> <li>d) There are no environmental or physical constraints to the sites.</li> <li>e) The scale of dwellings proposed is capable of delivering housing in line with local objectives, such as need for affordable housing.</li> <li>f) The sites are within the sole control of SMV which will facilitate its timely development.</li> </ul> <p>The above demonstrates that the site is suitable, available and achievable for residential development. Moreover there are no constraints which will prevent development on the site.</p>

<b>Comment ID:</b> <a href="#">3229</a>	<b>Consultee</b> Richborough Estates  <b>Person ID:</b> 1138546	<b>Agent</b> Mr Darren Parker Operational Director  RPS Planning & Development  <b>Person ID:</b> 1133715	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Delivery Strategy		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The LPA's most up-to-date evidence on housing need is provided by Wiltshire Council's Housing Land Supply Statement, which was published in November 2016 (updated in March 2017) with a base date of April 2016. It is not conceded that this comprises the up to date full objectively assessed need for the area.</p> <p>There has been no subsequent review of the HLS position of the SWHMA and while the LPA's Annual Monitoring Report (AMR) for 2017 is in preparation, no additional information has yet been published. The LPA has not published a complete AMR since 2010/11. Further no Partial Review of the Core Strategy has been commenced, let alone completed.</p> <p>As noted within the Council's latest HLS Statement, as of April 2016, 122 dwellings had been completed at Mere with another 33 dwellings delivered within the rest of the CA. There are also 'developable commitments' for a further 143 dwellings at the former, and nine additional dwellings in the latter.</p> <p>In respect of the SWHMA, the Council's most recent HLS Statement was published in November 2016 (update March 2017) with a base date of April 2016. Accordingly, it gives a five-year requirement of 2,912 dwellings between 2016 and 2021. Against this requirement, the Council claims a deliverable supply of 3,316 dwellings or 5.69 years can be demonstrated within the SWHMA Housing Land Supply.</p> <p>However, it is important to note that this does not take into account any buffer, which the Council considers to be 5%. On the basis of a five-year requirement (including 5% buffer) of 3,058 dwellings, this would equate to a HLS in the SWHMA of 5.4 years.</p> <p>Moreover, the above is based on the 'Liverpool approach', whereby shortfall is spread over the Plan period. The Council's reasoning for applying the 5% buffer relies on the conclusions of the WCS Examination Inspector, who considered that there was not a record of persistent under-delivery in the county as a whole at the time of his report. However, the Inspector added that, whilst his conclusions remained the same in terms of most of the individual HMAs, he specifically noted South Wiltshire as an exception, which had seen completions within only 10% of requirements on five separate occasions.</p> <p>Furthermore, the Council's Housing Trajectory illustrates that annual housing delivery within the SWHMA since the start of the plan period has been below the annual requirement every year apart from 2014/15 and 2015/16. In this regard, as of April 2016, there had been a shortfall of 614 dwellings.</p> <p>It is therefore considered that a 20% buffer should be applied to the requirement. Using this, along with the 'Sedgefield approach' (i.e. dealing with any shortfall within the first five years), which is consistent with Planning Practice Guidance, the Council would be able to demonstrate, at best, a five-year HLS of just 4.29 years against a five-year requirement of 3,863 dwellings. Increased objectively assessed need would reduce this figure further to 3.7 years. The NPPF acknowledges that reducing the risk of failing to meet the minimum housing requirement will 'boost significantly the supply of housing' (NPPF para 47) and as a result the plan would only be considered to be positively prepared and effective if it relied upon sites that have not already been identified within the plan. The application of a 20% buffer to SWHMA requirements will provide more certainty that the minimum housing requirement can be reached, rather than relying on minimal builds to come forward.</p>			

Appendix Q - Schedule of representations

	<p>As a consequence of the Council's unwillingness to acknowledge the shortfall, the housing delivery strategy has taken account of limited areas within the South Wiltshire market area and has therefore failed to adequately provide an effective plan in accordance with objective 1. Table 4.6 demonstrates the summary of allocations within the south market area and it is quite clear that Mere is not included. Similarly, table 4.11 demonstrates that with specific regard to Mere, the scale of development does not match the intention of the overall strategy with a percentage variation of -15.</p> <p>Moving back to the overall delivery strategy momentarily, the strategic assessment Stage 2b explains that opportunities for expansion of large villages have not been explored due to the claim that local housing need within the area has been accommodated through planned development (in this instance). SHLAA sites within these areas were not considered to be 'reasonable' and it was deemed that due to the production of neighbourhood plans, settlement specific housing need has already been determined. However, Mere does not benefit from a neighbourhood plan and as per the above has not been considered in terms of the scope for future development. As a result the plan has not been prepared on a strategy that seeks to meet objectively assessed development, is not based on proportionate evidence base and is ineffective in as far as its deliverability due to an anticipated failure to deliver the housing level required.</p> <p>Interestingly, within other settlements and where it suits, it is stated that the indicative levels of housing are not a ceiling and that variations do not present significant issues. This should also be the case for some other tiers of settlement as there is no justification for preventing development over the target figure, within reason. For example, para 440 with regard to the East Wiltshire HMA and Market Towns within the North and West HMA are stated to not have a ceiling figure (para 4.48).</p> <p>Apply a 20% buffer to allow more certainty that the minimum housing requirement will be reached</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Participation within the oral examination will be necessary due to the complexities of the matters concerned in order to adequately convey the necessary arguments against the lack of soundness evident.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">3230</a>	<b>Consultee</b> Richborough Estates  <b>Person ID:</b> 1138546	<b>Agent</b> Mr Darren Parker Operational Director  RPS Planning & Development  <b>Person ID:</b> 1133715	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>A very cursory review has taken place with regard to Mere as a result of the assumption that some consented housing sites will be implemented in the near future and a reliance of some windfall development. National Policy requires LPAs to produce plans capable of demonstrating a proactive approach to identifying sites that can be met, rather than awaiting windfall development within each HMA. The topic paper is therefore considered to form an inadequate evidence base due to being contrary to national policy in this regard.</p> <p>Core Policy 17 covers the spatial strategy for the Mere Community Area and states that it should be in accordance with the strategy as set out in Core Policy 1. More specifically and as referred to above, Policy E12 states that from 2006 to 2026 approximately (RPS emphasis) 285 new homes will be provided, of which 235 should occur at Mere and approximately 50 to be provided to the rest of the community area. From this it states that growth in the Mere Community Area may (RPS emphasis) consist of a range of sites in accordance with Core Policies 1 and 2.</p> <p>The above strategy is clearly not intended to provide a development ceiling which renders settlements incapable of further expansion. Indeed, where sustainable and necessary surely the stance should be taken of accepting further development where there is a clear wider need and the benefits of such development outweigh any negativities. Interestingly, paragraph 4.30 of the WCS makes clear that:</p> <p>“The disaggregation to Community Areas set out above is not intended to be so prescriptive as to be inflexible and potentially ineffective in delivering the identified level of housing for each market area. It clarifies the council’s intentions in the knowledge of likely constraints in terms of market realism, infrastructure and environmental capacity. They provide a strategic context for the preparation of the Housing Sites Allocation DPD and in order to plan for appropriate infrastructure provision.”</p> <p>The stipulated figures therefore show a minimum to be allocated, but a surplus is necessary to maintain five year supply of housing land in each HMA and to surpass the buffer in excess of five years required by para 47 of the NPPF. Due to the council having elected to fail to take into account new sites and rely on currently consented sites with no guaranteed prospect of such sites coming forward, it is contended that an inadequate housing supply will remain. In order for CP17 to be considered effective therefore, the Richborough Estates site at Castle Street, Mere should be included within the development boundary. As it stands, the failure to have any regard to any additional sites at Mere entails that there is little justification for the way in which the review has taken place.</p> <p>The Issues and Considerations section of the Topic Paper states that the outcomes stipulated by CP17 are to be addressed within the Mere Community Area include a future growth balance and to address the shortage of affordable homes. As no alternative sites have been considered, the plan should be deemed ineffective in terms of its failure to adhere to Policy CP17.</p> <p>In addition to the above, reference is made to the Wiltshire Infrastructure Delivery Plan (IDP) that identifies specific infrastructure requirements to be addressed within the community areas. In particular, two of the requirements are:</p> <ul style="list-style-type: none"> <li>• Primary and Secondary School extensions; and</li> <li>• To support the development of local primary care facilities, as most practises are at capacity.</li> </ul> <p>These requirements are caveated with the statement that they should not restrict the delivery of housing proposed over the plan period. So essentially, developments that do not contribute to these things will remain to be considered. In that regard, it does not seem logical to discount a</p>				

Appendix Q - Schedule of representations

site that would provide a primary care facility in totality and contributions towards necessary school enhancements. Which leads to the conclusion that given the ideal location of the site, coupled with the multiple stipulated requirements being met, its lack of inclusion within the settlement boundary is therefore completely contrary to both national and local objectives.

Core Policy 17 also acknowledges that there is a risk that Mere will become a dormitory settlement unless future growth includes adequate housing and employment provision. It is not specifically stated, but this is partly due to the aging population which encourages less economic output and housing movement. The provision of further sites will attract younger, prosperous generations to the area which will in turn enhance economic activity and as such have a positive impact on the settlement and the wider area.

Policy H3 refers to land allocated for residential development at sites within the South Wiltshire HMA, which correlate with the settlement boundary extensions as set out in the Community Topic Paper. The site at land at Castle Street, Mere is not included within the South Wiltshire Housing Allocation and has not been considered. This is set out in further detail below.

**4. Settlement Boundary Review**

Paragraph 47 of the NPPF looks at specific policy areas with regard to delivering a wide choice of high quality homes. It states that to boost the supply of housing, Local Authorities should:

- ‘Make use of their evidence base to ensure that plans meet the full objectively assessed needs for market housing and affordable housing within housing market areas, as far as consistent with framework policy, identifying key sites critical to housing delivery over the plan period;
- Annually identify a supply of deliverable sites sufficient to provide a five-year supply of housing; and
- Identify a supply of specific, deliverable sites or broad locations for growth.’

The council have made the assumption that current figures for Mere are sufficient to meet need and thus the settlement boundary review has predominantly taken account of consented developments and areas that should have formed part of the settlement boundary previously. This is contrary to general goals of the NPPF that are centred around encouraging housing provision and it would appear that not only has there been no regard to alternative sites, but also a Sustainability Appraisal has not been undertaken for Mere in order to establish what scale of development could realistically be accommodated. A rigorous assessment has therefore not been undertaken.

The settlement boundary review was informed by the site selection process as outlined in Topic Paper 2: Site Selection Process Methodology. Stage 1 of the site selection process focusses on community areas where housing land supply requires supplementing from 2006-2026. By adopting this approach and assuming that housing need for Mere is sufficient, it eradicates any further sites that could come forward in the short-term to meet housing need. Not to mention that the stipulated requirements should not form a ceiling and where possible and appropriate, the required housing provision should be exceeded in order to ensure that housing need is met without a heavy reliance on windfall sites. It is clear from this that the strategy is flawed and therefore unjustified and ineffective in terms of seeking to accommodate housing need within the Southern HMA.

Table 2.2 dictates that the indicative (RPS emphasis) residual requirement for Mere to be delivered has been met and as a result it is claimed that the plan will not need to allocate additional land. The site selection process therefore ends at stage 1 as explained above. As a result of this, a Strategic Assessment has not been undertaken and SHLAA sites have not been considered. Further, a viability assessment has not been undertaken. In this vein, Land at Castle Street, Mere is completely viable and this has been demonstrated by the fact that an application has been submitted proposing the development of the site and its promotion prior to the application submission. In terms of viability, the site is situated within a 30% Affordable Housing Zone, where a net, on-site provision of at least 30% affordable housing is required.

It is apparent that no further options/alternatives have been considered for Mere and the lack of a sustainability appraisal should be unsupported in terms of determining the acceptability of a sites inclusion.

In terms of the physical boundary review that has taken place, it should be noted that it has included additional consented sites that wrap around the site to a further extent. Given that the council are confident about the additional sites coming forward, the area of land in question forms a logical boundary extension to a further extent that ties the two sides of the settlement together either side of Castle Street.

**Attached files (Please see Objective)**

**If your representation is seeking a change, do you consider it necessary to**

Participation within the oral examination will be necessary due to the complexities of the matters concerned in order to adequately convey the necessary arguments against the lack of soundness evident.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Housing Site Allocations		Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>5. Land at Castle Street, Mere</p> <p>As the Council is aware an outline application for residential-led development on the site was refused on 26th May 2017 (ref. 16/12217/OUT). The full description of development for the application is:                  'Outline planning application for residential development (including affordable housing) and GP surgery, in addition to associated open space, infrastructure and attenuation features with all matters reserved, except access.'</p> <p>The site is situated within a sustainable location that has the capability of providing an attractive 'soft' landscape buffer in order to serve as a distinctive gateway feature to the southern approach to Mere via Mapperton Hill. The site would therefore fully integrate with the existing settlement and form a well thought-out urban extension that does not cause undue harm to the current form of the settlement edge. In recognition of this, the pre-application landscape input included the point that the site is located well within the 'Urban Gateway'. That being the area whereby the character of the approach to Mere becomes built-up, but prior to the 'distinctive historic core that marks the traveller's arrival'. The inclusion of the additional sites surrounding the site in question entails that it constitutes a logical extension to a further degree. The inclusion of the site will assist with economic growth and boost the supply of housing by providing a mix of high quality family homes including an element of affordable housing (30%) for those on lower incomes as required by Core Policy 17. The development would generate spend on construction and related jobs (approximately £15 million estimated on construction of the proposed development). Once completed the development would generate an additional expenditure of £2.17 million, a £1.25 million uplift in annual leisure expenditure. This would equate to 41 FTE jobs in supporting retail and leisure related jobs annually. Some 150 person of working age. As well as housing delivery in Mere, Core Policy 17 of the Wiltshire Core Strategy identifies specific issues required to be addressed through the planning system. This includes the strengthening of Mere as a village, improved access and a good mix of uses. The proposed site is adjacent to employment land and the provision of land for a new GP surgery will assist in improving local accessibility to medical services and positively contribute towards the health and wellbeing of the local community. Environmental benefits include retaining the hedgerows and existing mature trees (where possible), which will be complemented with new native hedgerow planting along the existing field boundaries. New pedestrian connections with existing communities would be established and natural areas provided to improve access to the countryside. Adequate contributions will be made towards the maintenance and enhancement of existing public infrastructure, including leisure and education facilities, where appropriate. The provision of improved community facilities and infrastructure are a stipulated requirement for Mere whilst also protecting the built and natural heritage. The proposal is compliant with these requirements and therefore should be viewed as a necessary settlement extension, capable of satisfying the needs that have been disregarded within the plan. Paragraph 49 of the NPPF expresses the government ambition to 'boost significantly the supply of housing'. It is contended that the failure to consider additional sites for Mere, over and above a perceived and incorrectly applied 'cap' is contrary to this pertinent government objective.</p>			

Appendix Q - Schedule of representations

	Extend the settlement boundary to include Land at Castle Street, Mere (app. Ref 16/12217/OUT) and allocate the site for the development proposed by Richborough Estates

<b>Comment ID:</b>	<a href="#">3232</a>	<b>Consultee</b> Richborough Estates	<b>Agent</b> Mr Darren Parker Operational Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1138546	RPS Planning & Development <b>Person ID:</b> 1133715	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Plan objectives		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There are three objectives to the DPD and these comprise of the settlement boundary reviews, a demonstration of an 'adequate' Housing Land Supply and sufficient site allocations.</p> <p>Objective 1, which considers the settlement boundary review, has been stated to apply a consistent methodology for the County to replace the varying methodologies formerly applied by the District Councils. In short, a policy review, followed by the application of principles applied by other LPAs and the consideration of issues raised in feedback with the Regulation 18 Consultation has taken place.</p> <p>Objective 2 concerns the requirement to demonstrate a rolling five-year housing land supply of deliverable land. Within the plan this acknowledges that some greenfield sites must be identified, involving the loss of countryside in order to achieve this objective. It is further stated that a 'realistic allowance' is included for the source of new housing when calculating the scale of land supply.</p> <p>Objective 3 refers to site allocations to support the spatial strategy set out within the Core Strategy. To fulfil this requirement a hierarchical settlement approach has been adopted in which Local Service Centres have been identified as having a level of facilities and services that provide the best opportunities outside of Market Towns for Sustainable Development.</p> <p>In terms of Objective 1 and 2, it is contended that the plan has not reviewed settlement boundaries to the degree that is necessary and neither has it provided a succinct account of the HLS situation so as to properly inform the plan. By virtue of this it is deemed to be ineffective, unjustified and fails to have been prepared in a positive manner. It follows that objective 3 fails to be satisfied also, as a result of the lack of acknowledgement of an insufficient supply which in turn leads to inadequate allocation.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	1. Introduction These representations have been prepared by Savills on behalf of Hallam Land Management (HLM), in response to the Wiltshire Housing Site Allocations Plan Pre-Submission Draft Plan. HLM control an area of land approximately 11.05 hectares in size adjacent to the eastern edge of Warminster, a proportion of which is allocated within the Draft Plan under Policy H2.7 (East of the Dene, Warminster) for residential development. The land has previously been promoted through the Wiltshire Core Strategy, and throughout the Site Allocations DPD process, seeking an allocation for residential development. The site has also been submitted previously to the SHLAA. A copy of the Site Location Plan is attached at Appendix 1. In addition, an outline planning application was submitted in October 2016 for the development of the site for up to 135 residential dwellings. This application is currently pending a decision. A significant amount of technical work has been prepared to support the application proposals, all of which concludes that there are no technical or environmental matters which would preclude development and that appropriate design and mitigation measures can be readily implemented to create an attractive high-quality development. Indeed, the proposals have evolved to respond to the technical evidence prepared as well as comments provided by officers at Wiltshire Council, local interested parties, and Warminster Town Council. It is therefore considered that the development of the site would be technically sound and is entirely deliverable and achievable. Furthermore, HLM have control of all the land outlined in the plan attached at Appendix 1, which is considered a significant benefit. The suitability and sustainability credentials of the land strongly support its allocation for development through the emerging Housing Site Allocations Plan, and the allocation of this site would enable a positive and balanced spread of development across the town. There are a number of further benefits to the proposed allocation, including: The delivery of housing and affordable housing for the local community, in accordance with the identified need set out in the Council's Strategic Housing Market Assessment; The locational sustainability merits of the site, including the excellent pedestrian and cycling connectivity; Balanced delivery of housing across Warminster; Integration of development with the existing urban form so that the development will be observed within the context of the adjacent built edge; The delivery of a high quality residential environment that can embrace local character and vernacular; The lack any significant technical or environmental constraints to development; The potential to deliver high quality green infrastructure that can provide biodiversity and recreational benefits. This includes considerable areas of open space on the site, over and above adopted policy requirements, in the form of formal sports and informal provision including children's play space, allotments and a community orchard; Support for the development of the site from Warminster Town Council, including a letter of support for the pending outline planning application (see Appendix 2); and			

## Appendix Q - Schedule of representations

Financial benefits derived from the development including but not limited to employment creation.

These Representations focus on the draft allocation of the site, and the evidence supporting the draft Housing Allocations Plan. Overall, whilst we fully support the allocation of the site in principle and welcome the Council's recognition that the site is suitable for development, we are concerned that the current wording and allocation boundary for Policy H2.7 will unnecessarily restrict the delivery of development upon the site, and stifle the masterplanning process. This includes the allocation of the site for 100 dwellings which is considered an underprovision given that the outline planning application demonstrates that a higher figure can be readily accommodated and the draft wording "2ha of undeveloped land to be located in the south west part of the site" is overly prohibitive in masterplanning terms.

We have therefore proposed, within the final section of these representations, changes to draft Policy H2.7 to address these concerns and ensure that the policy is sound and that a well-planned and well-designed residential development can come forward.

These representations are structured as follows:

Section 1: Introduction and Update on Outline Planning Application;

Section 2: Overview of Evidence Supporting the Allocation of Land East of the Dene, Warminster;

Section 3: Response to draft Policy H2.7 (East of the Dene, Warminster);

Section 4: Conclusion

Outline Planning Application – Latest Position

An outline planning application was submitted in October 2016, for the land outlined on the plan attached at Appendix A.

The application was registered under reference number 16/10502/OUT, with the following description of development:

Outline application for the demolition of existing agricultural building, removal of a section of boundary wall, and residential development of up to 135 dwellings with associated access, landscaping and open space (Reserved matters: Access)

The outline planning application was submitted following pre-application discussions with Wiltshire Council. In particular, a pre-application enquiry was submitted to Wiltshire Council in February 2016, and a formal written response received on 14 March 2016 (ref: 16/01612/PREAPP).

The applicant comprehensively reviewed the pre-application response from Wiltshire Council and made positive changes to the draft proposals to address the various comments received, including:

Enlarging the site area so that it encompasses the northern field (i.e. the field north of Grange Farmhouse) to provide a comprehensive masterplan which provides greater social and environmental benefits;

Providing a deeper set back of the proposed building line from the Conservation Area near the Home Farm track, and adopting a wider area of greenspace and planting to include a Community Park along the eastern edge of the site to create an appropriate landscape edge;

Locating new housing away from Home Farm and Bishopstrow Court;

Ensuring that new housing is well-designed and has regard to local character and vernacular, particularly near the Conservation Area where lower-density building groups are adopted;

Introducing wider corridors of green space and landscape planting around the perimeter of the site, to include the interface with properties on Grange Lane;

Providing a greater amount of accessible green space that will provide wider community benefits, this includes a Community Park in the north eastern part of the site that can accommodate new planting, community orchards, space for play and recreation, along with walking and cycling routes;

A reduction in the average density across the site from 35dph to 33dph and ensuring that new housing will be no more than 2 storeys in height.

During the determination period, comments were received from statutory consultees and members of the public, and, as a result, further modest changes were made to some of the application plans to address the outstanding matters. On 11 May 2017, revised material was submitted to Wiltshire Council to address matters relating to highways, heritage, drainage and ecology.

Overall, of the statutory consultees who have commented on the planning application, the following support the proposals:

Wiltshire Council Highways Officer;

Wiltshire Council Drainage Officer;

Wiltshire Council Housing Officer;

Wiltshire Council Environmental Health Officer;

Appendix Q - Schedule of representations

Wiltshire Council Play & Leisure Strategy Officer;  
 Wiltshire Council Waste Collection Team;  
 Wiltshire Council Rights of Way Officer;  
 Wiltshire Council Arts Service;  
 Department Of Children Services;  
 County Archaeologist;  
 Environmental Control and Protection Officer;  
 Environment Agency;  
 Wessex Water;  
 Warminster Town Council;  
 Ministry of Defence

Therefore, the only outstanding matters relating to the outline planning application relate to HRA, conservation and landscape. Although there is no objection from the Council's Landscape Officer on landscape and visual issues, the officer's concerns are instead in relation to the masterplan's approach to conservation issues. These are matters however for which the applicant has provided a significant amount of evidence to demonstrate that the development would sensitively respond to the identified heritage and landscape constraints. Furthermore, given that the Housing Site Allocations evidence base underpinning the proposed allocation of the site, supports the development of the site in principle from a heritage and landscape perspective, it is considered that these outstanding matters on the planning application are capable of being addressed. It is important to note the support of the Town Council, who, having been through the Neighbourhood Plan process, still considered the site to be appropriate to support.

2. Overview of Evidence Supporting the Allocation of Land East of the Dene, Warminster

Having reviewed the evidence base supporting the Housing Site Allocations Plan, it is considered important to provide an overview of, and response to, the relevant evidence which confirms the suitability of the land East of the Dene, under Policy H2.7. The documents covered in this section include the following:

Sustainability Appraisal  
 Sustainability Appraisal Annex 1 A.11 Warminster Market Town  
 Stage 4a Site Landscape Assessment  
 Habitat Regulation Assessment.

The relevant evidence is outlined below, including extracts which support the suitability of the site for development. This is also supplemented with technical evidence which has been prepared to support the current outline planning application, which demonstrates the suitability of the site on a variety of sustainability grounds.

3. Policy H2.7 (East of the Dene, Warminster)

We strongly support the allocation of the Land East of the Dene as an entirely appropriate and suitable option for future development. The evidence demonstrates that the development of the site would be technically sound and that the suitability and sustainability credentials of the land strongly support its allocation for development.

However, we have significant concerns over the scope and form of draft Policy H2.7, which, in its current form is considered to have the potential to unnecessarily restrict the delivery of the site and stifle the masterplanning and placemaking process. The main areas of concern are:

Reference to "2ha of undeveloped land to be located in the south west part of the site";

Draft site allocation boundary;

Site capacity of 100 dwellings;

Firstly, there is considered to be no reasoned justification to support a 'buffer' of 2 hectares in size. Not only is this not justified by the evidence but it would unnecessarily limit the developable area, resulting in the loss of potentially 66 homes (if one applies a density of 33dph as shown by the planning application).

The draft Plan, at paragraph 5.89 states that "the south west part of the site is considered to be unsuited to built development because of its sensitivity in heritage and landscape terms". This is contrary to the Council's own evidence, which highlights the general heritage and landscape constraints which exist and would need to be carefully considered as part of any future application proposals, but specifically concludes that the

#### Appendix Q - Schedule of representations

south west and north west parts of the site are less constrained. Indeed, the evidence suggests that mitigation may be necessary in the southern and eastern parts of the site given proximity to the Conservation Area and heritage assets, not the south western parts of the site. As already outlined, the current outline application proposals have been sensitively designed to be sympathetic to, and compatible with, the Conservation Area and heritage assets. In particular, the proposals incorporate a significant green corridor along the eastern boundary of the site, and the proposed development area has been 'pulled away' from Boreham Road along the southern boundary of the site, to respond to the nearby heritage assets.

The application proposals incorporate approximately 66,600 sqm of multi functional green space across the site, resulting in a significant overprovision when compared to a requirement of 8,140 sqm required by the Council's Leisure and Recreation Development Plan Document. With a significant over-provision of open space, and a sensitive response to the constraints, the site has the potential to deliver a quantum of development in excess of 100 dwellings which will help to address the diminishing housing supply as confirmed in the Housing Land Supply Paper June 2017 which will fall below the required five year supply in the N&W HMA in years 2024/25 and 2025/26 (Table 3.4). Importantly, the application proposals respond to the constraints without the need to exclude a significant element of the site closest to the eastern boundary, as currently shown in the draft allocation boundary. We have significant concerns with the extent of land excluded by this draft allocation boundary, when compared to the site boundary for the application site.

In our view, there are significant benefits to including all of the land currently included as part of the outline planning application, and shown at Appendix 1 within a future allocation. Most importantly, the ability to provide quality and useable green space for the benefit of the local community. By unnecessarily restricting the eastern part of the site, the draft policy reduces the ability of development proposals to plan for a high quality environment for future and existing residents. Such a constraint also unnecessarily restricts the ability of the site to introduce appropriate mitigation to overcome the identified heritage constraints, as required by the draft Plan, and highlighted through the supporting evidence.

Overall, it is considered that there is no justification for reducing the extent of the site with the site boundary as currently drafted within Policy H2.7, as well as a lack of justification for designating an area of land within the site as 'undeveloped'. We consider the draft policy in its current form to be too prescriptive and should be revised to instead cover the key principles and development requirements for the site.

In this respect, we recommend the policy be re-worded as follows:

#### Policy H2.7

Land east of The Dene, as identified on the policies map, is allocated for residential development, comprising approximately 135 dwellings.

Development will be subject to the following requirements:

Delivery of approximately 135 dwellings, with a target of 30% affordable homes;

Suitable vehicular access via Boreham Road, along with pedestrian connections to create permeable routes to the surrounding area;

Surface water management that achieves equivalent or less than current Greenfield rates of run-off;

Sensitive design which responds to the adjacent Bishopstrow Conservation Area and designated heritage assets, including the potential for a strategic landscaping along the eastern site boundary to provide a 'development buffer';

The provision of areas of greenspace for play and recreation, including areas of equipped play, playing pitches, parks, and the potential for allotments.

appropriate areas of green infrastructure providing opportunities for biodiversity enhancement, recreation, cycle and pedestrian routes and local food production;

It is not entirely clear from the draft Plan how the Council would approach the requirement for a masterplan as part of development, and we consider this should be clarified. There are a number of inconsistencies within the draft Plan where masterplans are required for some draft allocations, but not all. From a review of the plan it would appear that a supporting masterplan is required for only 5 of the 24 draft allocations, for a scale of development ranging from 50 dwellings to 640 dwellings. This current approach taken is considered to be unjustified and onerous.

In our view, a masterplan which supports a planning application, as is the case with the current outline planning application, should be sufficient. Indeed, the outline planning application is supported by a Development Framework Plan and Indicative Layout Plan which demonstrate how the site is capable of accommodating up to 135 residential dwellings, along with the required supporting infrastructure and services.

We have therefore recommended that the current requirement for a masterplan to be prepared is removed from Policy H2.7.

4. Conclusion

Appendix Q - Schedule of representations

	<p>For the reasons outlined in these representations, whilst we strongly support the allocation of the land East of the Dene, Warminster, given the highly sustainable nature of the site, we are concerned with the policy wording of draft Policy H2.7. The policy, as currently drafted will unnecessarily restrict the delivery of the site through the designation of 2ha of undeveloped land in the south west part of the site, the site allocation boundary and by limiting development to 100 dwellings.</p> <p>In order to ensure the Housing Site Allocations Plan is sound, we have proposed changes to Policy H2.7 to ensure that the policy includes the key principles and development requirements for the site, as specified through the available evidence.</p> <p>The revisions to the policy will ensure that development is not unnecessarily restricted and that sufficient flexibility exists to ensure that proposals for the site have the opportunity to promote development which responds in the most effective manner to the site constraints whilst ensuring such development is deliverable.</p> <p>The outline planning application for the site (16/10502/OUT), which is currently being determined by Wiltshire Council, is already supported by the necessary design and technical information to demonstrate the suitability of the site. In particular, a Development Framework Plan and Indicative Layout Plan show that the site is capable of delivering up to 135 residential dwellings alongside a significant provision of multi functional open space. Furthermore, with the exception of heritage and landscaping, all technical aspects of the planning application have been found acceptable by officers.</p> <p>Overall, we strongly support the allocation of the site with the changes proposed to Policy H2.7 set out within these representations. Given the potential significant implications for the site as a result of the current policy wording, we would welcome the chance to discuss the site with the Council's Planning Policy Team at the earliest opportunity, and to provide assistance where required.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Sustainability Appraisal</p> <p>This section expands upon the Sustainability Appraisal and provides a summary under each objective.</p> <p>SA objective 1. Protect and enhance all biodiversity and geological features and avoid irreversible losses</p> <p>The SA provides the following summary in relation to the site:</p> <p>“The site comprises arable fields bordered by hedgerows with trees, scrub and small areas of grassland. Mitigation to offset the potential effects of development on local ecological features is likely to be possible, which would need to be determined by an ecological assessment in support of a planning application to inform mitigation, compensation and enhancement measures. Due to the relationship of the site with the SAC and SPA, likely significant effects are triggered based on a settlement level HRA screening. An appropriate assessment is required if the site is taken forward into any subsequent stage of the selection process. Overall it is considered that the effects would be moderate adverse given mitigation associated with the River Avon SAC is likely to be problematic”.</p> <p>As outlined in the previous section of these representations, an outline planning application has already been submitted to Wiltshire Council, and is currently being determined. This application is supported by an Ecological Appraisal, prepared by FPCR.</p> <p>The Ecological Appraisal is based upon a number of surveys undertaken over several years including an Extended Phase I Habitat Survey and various further species specific surveys completed between 2008 and August 2016. The report concludes that the impact upon the Salisbury Plain SPA/SAC can be adequately mitigated in line with the conclusions of the Core Strategy HRA and that there are no anticipated adverse impacts upon non-statutory designated sites. Therefore, with appropriate mitigation, including a significant level of green infrastructure provided, the development and the application proposals would have no significant adverse impact upon protected species or habitats.</p> <p>In addition, the site itself is considered to have limited habitat value. It comprises predominantly species poor semi-improved grassland, arable land and tall ruderal vegetation which is commonplace and supports a low diversity of species. Similarly, the hedgerows, whilst protected under the NERC Act (2006), exhibit restricted diversity. As part of the ‘ground up’ approach to masterplanning all of the mature trees and hedgerows on the boundary of the site have been retained and located within areas of green space as part of the application proposals and there will therefore be no harmful impact upon these features. In addition, the veteran trees within the site have been retained and protected as part of the scheme.</p> <p>The Ecological Surveys identified no badger setts within or immediately adjacent to the site and no records of badger setts within the vicinity, the site is considered to have only limited value as a habitat for breeding birds, and the protection and retention of boundary hedgerows and trees will ensure no harmful impact. There are no water bodies within or adjacent to the site suitable for Great Crested Newts. The site is considered to have low potential for invertebrates as it is relatively small and lacks floristic diversity.</p> <p>Overall, the Report concludes there are no reasons on ecological grounds to restrict development of the site. Mitigation measures required for the protection of hedgerows, trees within the site and along the site boundaries and species specific mitigation measures can be addressed through suitably worded conditions. This is a position supported by the Council’s Ecology Officer, who, in a consultation response to the application on 17 November 2016 stated:</p>			

Appendix Q - Schedule of representations

	<p>“Over half of the site is designed as open space and I expect that the Council can be confident that the development will be capable of delivering a net gain for biodiversity in accordance with Core Policy 50. Few ecological features are of any more than local value and I expect it will be possible to retain the range and abundance of species within the indicative layout which provides a significant amount of new planting and wide buffers to existing planting”.</p> <p>Indeed, the development’s Green Infrastructure proposals would enhance biodiversity with a range of new habitats such as broadleaved trees and species rich hedgerows, grassland that can be designed and managed for biodiversity benefits, and the introduction of wetland planting and grassland mixes as part of the drainage strategy. The consultation response also recommended conditions requiring the submission of a Landscape and Ecological Management Plan (LEMP) and Construction Environmental Management Plan (CEMP) prior to the commencement of development.</p> <p>A copy of the consultation response is attached at Appendix 3.</p> <p>We therefore do not agree that the effects on Objective 1 would be ‘moderate adverse’.</p> <p>Habitat Regulation Assessment</p> <p>The Council has commissioned an updated Habitat Regulation Assessment (HRA) to support the emerging Housing Site Allocations Plan. This supports the ability of the site, along with the other sites identified in the draft Plan for Warminster, to deliver residential development to meet the identified need without resulting in significant impacts.</p> <p>In particular, the Assessment, on page 46, states that</p> <p>“Planned housing growth including the DPD policies, extant permissions, pending applications and recent delivery (2006-16) is still within the Core Strategy indicative housing targets for the vast majority of settlements and community areas within the visitor catchment of Salisbury Plain. The only exception is at Warminster town, where a masterplan has been approved by the Council which would see the Core Strategy allocation deliver approximately 650 more houses than the Core Strategy had allocated. However based on planned housing trajectories, the majority of this planned housing would not be delivered until well after the end of the current plan period (i.e. post-2026), indeed even when all the in-combination growth is considered there is still expected to be an under delivery of 292 dwellings at Warminster at the end of the current plan period compared with the Core Strategy indicative requirements. Therefore the in-combination effects of growth are arguably still lower than was anticipated in the Salisbury Plain Mitigation Strategy”.</p> <p>Furthermore, on page 55 of the Assessment, it is stated that “the three allocations at Warminster will deliver an estimated 200 dwellings. Wessex Water’s forecasts used in the NMP took account of a population increase of 1,563 residents between 2010/11 and 2020/21, equivalent to 689 dwellings (@2.2 persons / dwelling). The allocations are therefore well within the NMP growth scenario (assuming that all dwellings were completed by 2021), and as such it is concluded that the plan would not compromise the delivery of the NMP target reductions through phosphate loading from increased sewage discharges of these dwellings alone”.</p> <p>Indeed, it is now clear that all planned development at Warminster, including the proposed allocation for Land East of the Dene, has been assessed as part of an updated HRA which supports the draft Housing Site Allocations Plan. This confirms that such development proposals would be within the headroom of the HRA assessment, and therefore would not result in any adverse impacts.</p> <p>Therefore, whilst we have yet to receive the Council’s HRA for the current outline planning application, the updated HRA which supports the draft Housing Site Allocations Plan confirms that this matter can be addressed</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To provide clarification relating to changes required to Policy H2.7 (East of the Dene, Warminster) to ensure the Plan is sound and to assist the Inspector with any additional information which may be relevant.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">3243</a>	<b>Consultee</b> C/O Agent  Hallam Land Management  <b>Person ID:</b> 645345	<b>Agent</b> Mr Nick Matthews Director  Savills  <b>Person ID:</b> 1138525	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.7		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SA objective 2. Ensure efficient and effective use of land and the use of suitably located previously developed land and buildings</p> <p>The SA provides the following summary in relation to the site:                      “The site comprises greenfield land not previously developed land. The site is on the edge of the settlement, some distance from the services and facilities in the town centre. Future residents are likely to rely on the private vehicle to access some of these services which are not within walking or cycling distance. There are bus stops at Boreham Road and Woodcock Road which serve the regular 265 Bath – Salisbury route. The site would involve the permanent loss of BMV land which would be problematic to mitigate given the location of the 3b land and its relationship with the settlement edge. Overall it is considered that the effects on this objective would be moderate adverse”.</p> <p>Whilst the site is not classified as previously developed land, the site benefits from being located on the edge of a sustainable market town, close to many of the services and facilities available in Warminster.</p> <p>The locational suitability and sustainability of the site was clearly acknowledged by the Inspector in his Report on the West Wiltshire District Plan First Alterations when he previously considered the site. Indeed he noted that the site is within maximum desirable walking distances for many of the facilities in the town and commented positively on the proximity to the secondary school, leisure centre and employment opportunities. He recognised that these are destinations that often attract visitors arriving by private car and thus their close proximity to the site has considerable highways and sustainability advantages.</p> <p>In addition, the Council's SHLAA confirms that the site is suitable for development. The site, referred to within the SHLAA as ‘Site 603-Land East of the Dene’ (Appendix 4), is considered deliverable within five years for up to 256 dwellings overall.</p> <p>There are bus stops within 200m of the site on Boreham Road and Woodcock Road, from which there are buses available that provide direct services to the centre of Warminster and Salisbury. The bus stops and shelters on Boreham Road will be improved as a result of a financial contribution that has been agreed between Wiltshire Council and Hallam Land Management. There are regular services between Warminster and Salisbury which stop at ‘Boreham Fields, The Dene’ in both directions and a link with the 264/265 service which provides services to Trowbridge, Bradford-on-Avon and Winsley en route into the centre of Bath. Warminster train station is a walk or short cycle ride of 1.24 miles from the site, from which there are direct services to Bath Spa, Bristol Temple Meads, Salisbury, Trowbridge and London Waterloo. There are therefore considerable benefits in locating development near to the train station where maximum advantage can be made of this attribute.</p> <p>Given its location, the range of services and facilities available within walking and cycling distance, and the opportunities for public transport, the site is considered to represent a suitable and sustainable location for residential development.</p> <p>In response to the ‘assumed’ best and most versatile categorisation of the land by the SA, the pending outline planning application is supported by a Soils and Agricultural Use and Quality Report, which confirms that the agricultural land quality of the site varies between Grades 3a and 3b. However, it should be noted that the land around Warminster generally varies between Grades 1 and 4, although the Grade 4 land is primarily limited by high flood risk which is likely to restrict the potential of those areas for development.</p>			

Appendix Q - Schedule of representations

	Overall, we do not agree that the effects on Objective 2 would be 'moderate adverse'. Given the location of the site, on the edge of the town, with limited brownfield sites available in Warminster to meet the identified housing requirement, we consider that the site is suitably located. We therefore consider a more positive effect as an appropriate conclusion.
<b>Attached files (Please see Objective)</b>	4749818
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	To provide clarification relating to changes required to Policy H2.7 (East of the Dene, Warminster) to ensure the Plan is sound and to assist the Inspector with any additional information which may be relevant.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">3244</a>	<b>Consultee</b> C/O Agent  Hallam Land Management  <b>Person ID:</b> 645345	<b>Agent</b> Mr Nick Matthews Director  Savills  <b>Person ID:</b> 1138525	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site			Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.7		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SA objective 3. Use and manage water resources in a sustainable manner</p> <p>The SA provides the following summary in relation to the site:</p> <p>“A capacity appraisal of water supply would be needed to confirm the scope of network reinforcement to serve development proposals. In relation to sewerage, foul water flows to Boreham Road SPS and capacity appraisal would be needed to confirm the scope of any necessary network reinforcement to serve development proposals. Any such appraisal work would need to be tailored to the number of homes proposed on the site. Foul drainage capacity may be an issue in this location. There are also records of complaints of surface water flooding in the area of Grange Road, which is likely to be an issue for this site and would need detailed investigation as part of any planning application. Storm water disposal is also likely to be an issue as soakaways will not work in this location. A connection to the main river to the south may be possible but would require access over third party land. There may be significant additional infrastructure works required to bring this site or part of it forward, which would need to be determined through further appraisal work. Due to the relationship of the site with the SAC, likely significant effects are triggered based on a settlement level HRA screening. Appropriate assessment would be required if the site is taken forward into any subsequent stage of the selection process. Overall it is considered that the effects on this objective would be moderate adverse given that mitigation measures associated with the River Avon SAC as well as the use of soakaways and storm water disposal would be problematic to achieve”.</p> <p>Following the submission of the outline planning application, which was supported by a Flood Risk Assessment and Drainage Strategy, ongoing discussions have been held with Wessex Water and the Lead Local Flood Authority (LLFA) to agree a suitable approach to the drainage of the site.</p> <p>In discussions with the LLFA, the drainage proposals have been revised. The agreed approach comprises a SuDS scheme consistent with local and national policy at the proposed development, including an attenuation pond, along with additional measures such as permeable paving, ditches and swales.</p> <p>The attenuation pond is intended to mimic the greenfield nature of the surface water regime with the new outfall of the site adjacent to the existing access to Home Farm and Bishopstrow Court. From this point, the site currently drains onto Boreham Road southwards, via fields into the River Wylye, and westwards along the Boreham Road to outfall into the River Wylye in the vicinity of Boreham Mill. It is proposed that, a surface water sewer connection will be made to collect the surface water from the site and discharge to the River Wylye through the fields south of Boreham Road.</p> <p>This approach has been agreed with the LLFA given that the River Wylye to the south of the site is the most appropriate receptor of storm water from the site, having the potential to employ source control measures and detention features to control peak discharges to no greater than the baseline conditions. As the site lies above the River Wylye flood plain, there will be no incidents of back flow into the development.</p> <p>The implementation of source control measures through the use of SuDS can provide a 59% betterment in peak run-off from the site. This is a significant positive benefit given the existing baseline conditions, and demonstrates the ability of development to make a significant improvement</p>				

Appendix Q - Schedule of representations

	through mitigation measures. As a result, we do not agree that the effects on Objective 3 would be 'moderate adverse'. On the contrary, we consider that the measures proposed through development of the site would result in a major positive impact. Copies of the relevant consultation responses, confirming agreement to this approach, are attached at Appendix 5.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SA objective 5a. Minimise our impacts on climate change – through reducing greenhouse gas emissions</p> <p>The SA provides the following summary in relation to the site:  “Minimising the impacts of climate change through reducing greenhouse gas emissions will be possible through the implementation of measures outlined in ‘Delivering strategic objective 2: to address climate change’ and the related ‘Core Policy 41: Sustainable construction and low carbon energy’ of the Wiltshire Core Strategy. These measures will ensure the incorporation of design measures to reduce energy demand and increase energy efficiency, as well as the promotion of low carbon energy sources and encouragement of sustainable building practices. However, the effect of the development of this site will be to increase greenhouse gas emissions overall and on balance this site is considered to have a minor adverse impact in relation this SA objective”.</p> <p>We question the conclusions reached under Objective 5a. As already stated above, the site is situated in a sustainable location, as confirmed by the SA. Given the pressing need to deliver additional housing at Warminster, and the lack of available sites within the town itself, it would follow that the draft Plan should look to identify suitable sites on the edge of the town to accommodate the identified housing need. Locating development on the edge of the town, with good access to services and facilities, is likely to be far more sustainable than the allocation of sites further afield.</p> <p>With regards to the built fabric, we agree that a number of measures can be explored through the development of the site to ensure the incorporation of design measures to reduce energy demand and increase energy efficiency, as well as the promotion of low carbon energy sources and encouragement of sustainable building practices. The adoption of comprehensive and extensive Green Infrastructure will have benefits for climate change.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SA objective 5b. Minimise our impacts on climate change – through reducing our vulnerability to future climate change effects</p> <p>The SA provides the following summary in relation to the site:          “The site is located in Flood Zone 1, although there is an area within the site that is at risk of surface water flooding, which would need to be investigated and resolved through any subsequent planning application process and informed by a Flood Risk Assessment. Due to the size of the site it is likely that the parts of the site that are vulnerable to surface water flooding could remain undeveloped, or that suitable mitigation could be achieved. Conventional soakaways are unlikely to work effectively in this part of the site, and ground investigations would be required to support and subsequent planning application. Storm water drainage to the River Wylde to the south may also be an issue due to levels, and there may be a need to look at surface attenuation methods which would reduce developable area. Overall it is that the effects on this objective are minor adverse”.</p> <p>As already stated under our response to Objective 3 above, a drainage strategy for the site has already been agreed as part of the current outline planning application, and the proposals have been found acceptable by the LLFA. Copies of the relevant consultation responses demonstrating this are attached at Appendix 5.</p> <p>Not only will the surface water strategy reduce runoff rates, but it will reduce it considerably below existing levels. Indeed, there is anticipated to be a 59% decrease in runoff water. Furthermore, the development proposals would result in the planned discharge of the (reduced) residual runoff through off-site drainage improvements. In contrast to the conclusions of the SA, it is considered that the development would result in a major positive impact.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7		Effective	
		<p>SA objective 6. Protect, maintain and enhance the historic environment</p> <p>The SA provides the following summary in relation to the site:</p> <p>“The site adjoins the Bishopstrow Conservation Area on its east and south sides, and there are also a number of Listed Buildings within proximity to the site, including the Grade II Listed Bishopstrow House Hotel to the east. A Historic Impact Assessment would be required as part of any future planning application to determine the impacts of development on the heritage assets of the area to avoid harm to the significance of heritage assets from adverse impacts on their settings and in particular to maintain as much as possible of the character of the approach to the town along Boreham Road which is a particular local feature. Overall it is considered that the effects on this objective would be moderate adverse and mitigation would be problematic”.</p> <p>Ongoing discussions have been held with the Council in relation to potential heritage impacts of the outline application proposals. Comments were received from the Council’s Archaeological Officer on 9 December 2016, stating that given the significance of heritage assets, archaeological trial trench evaluation work is necessary. As a result, trial trenching has been undertaken and a summary report submitted to the Council. Following this, the Council’s Archaeological Officer (Rachel Foster) confirmed on 28 April 2017 and 30 May 2017 that the content of the report is acceptable and that there is no evidence to indicate significant remains (of national importance) which would preclude development of the site, and that necessary mitigation measures can be secured by condition. A copy of the confirmation is attached at Appendix 6.</p> <p>It is acknowledged that the Council’s Conservation Officer has expressed concerns with the perceived impact of the outline application proposals on heritage assets. However, whilst there is agreement that the potential harm to the heritage assets falls within the ‘less than substantial range’, we remain of the opinion that this harm is ‘low’ within the less than substantial range.</p> <p>The application plans have followed an iterative design process, evolving over a considerable period of time and have sensitively responded to comments received during pre-application discussions, including a public consultation event. Furthermore, the submitted layout has been designed to be sympathetic to, and compatible with, the heritage assets. The principles are that built development would be located some distance from the Conservation Area and that new housing would be set back behind new green space and planting. Along with the adoption of well-designed locally distinct new housing this would create a sensitive and attractive interface between the development and the Conservation Area. It should also be noted that future Reserved Matters applications covering layout, scale, appearance and landscape can develop these principles further to ensure a positive integration with the site’s setting. This is recognised in the SA which itself confirms that “there may be adverse effects but some aspects would seem capable of mitigation”.</p> <p>In direct response to the potential heritage impacts set out within the SA, it should be noted that visibility towards the site from Bishopstrow House is restricted by extensive mature woodland around the perimeter of the house and within the gardens. For much of the landscape around Bishopstrow House, views of the site are prevented and obscured by the intervening woodland within the curtilage of the building. Where there are occasional views, such as from the car park, these are restricted to the southern parts of the site and include views of properties at Grange Lane. The existing mature tree cover within the grounds of the house, coupled with proposed new planting along the eastern edge of the site as</p>			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>					

Appendix Q - Schedule of representations

	<p>part of the application proposals would filter and 'soften' views of the built form where glimpsed views remain, thereby minimising the visual impact on the setting. The magnitude of the impact on setting and significance would further reduce over time as a result of additional green infrastructure and the maturing of habitats as part of application proposals.</p> <p>In addition, the outline application proposals incorporate a significant green corridor along the eastern boundary of the site and the proposed development area has been 'pulled away' from Boreham Road along the southern boundary of the site to respond to the adjacent Conservation Area (See Landscape Framework Plan attached at Appendix 7).</p> <p>Overall, we are of the view that the development of the site has been designed to be sympathetic to, and compatible with, the Conservation Area and adjacent heritage assets. Furthermore, the benefits associated with the development outweigh any potential harm to the heritage assets in accordance with NPPF paragraphs 134 and 135.</p> <p>We therefore disagree with the SA conclusion that the effects of this objective would be moderate adverse and that mitigation would be problematic. Further details of our justification for the development of the site on heritage grounds is contained within Appendix 8, comprising the Heritage Impact Assessment and subsequent statement from Orion Heritage on 19 December 2016 in connection with the outline planning application. Consistent with these reports, we consider that the impact would be minor adverse at worst.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SA objective 7. Conserve and enhance the character and quality of Wiltshire’s rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place</p> <p>The SA provides the following summary in relation to the site:                      “The site comprises a number of fields which are open in character with limited boundary screening. The site is a strong visual setting for this part of Warminster, and there are issues that development would erode the gap between Warminster and Bishopstrow. A substantial buffer would be required to Bishopstrow House, with only western parts of the site capable of delivering development without likely significant effects on the landscape setting on this part of the town. The level of effect of development would depend on design and employment of appropriate mitigation such as the retention of hedgerows and mature vegetation where possible, and to what degree the site was developed. The site contains and adjoins public footpaths WARM40 and WARM41 which would need to be protected and enhanced through any future development of the site. Given the size of the site, a degree of mitigation or reduction in developable area to address landscape impacts is likely to be achievable, although the development area may be limited to the western parts of the site. With regard to SA Objective 7 the effects are judged to be minor adverse”.</p> <p>It is considered that the current outline planning application proposals respond to the objectives of the SA in relation to landscape and built character and have full regard to the sites setting.</p> <p>The site and the local landscape is not subject to any landscape quality designation at either national and local level. The site has the benefit of being located within the context of the existing settlement edge such that new development would be observed within that context. The site’s landscape features such as the veteran trees, mature trees and hedgerows and rights of way are all conserved within areas of green space and form key elements of the design. Additional planting, green space and habitat creation around the perimeter of the site will strengthen these habitats and would successfully assimilate the built form within its landscape and built context. In particular, the application proposals incorporate a significant green corridor along the northern and eastern boundaries of the site, and development has been ‘pulled away’ from Boreham Road along the southern boundary of the site to respond to the adjacent Conservation Area (See Development Framework Plan attached at Appendix 9).</p> <p>With regards to the degree of ‘buffer’ required to Bishopstrow House, the application proposals incorporate a significant area of green infrastructure, along with retention of hedgerows and mature vegetation, that would create an attractive well-designed gateway and a sympathetic response to the surrounding context of Bishopstrow House.</p> <p>The Design &amp; Access Statement supporting the outline planning application provides the overarching design principles for the development. These respond to local distinctiveness and aim to develop a sense of place through the placemaking process. This includes:</p> <p>1) Creating a high quality residential development that is well related to its setting in terms of scale, appearance, materials and colours, and to have regard to the setting of surrounding properties, the adjacent Conservation Area and Battlesbury Hill; and</p>			

#### Appendix Q - Schedule of representations

2) To take reference from examples of good urban design, as well as taking inspiration from local character and vernacular that can be found within and around Boreham, Bishopstrow and Warminster.  
These can be developed further, with the Council, through reserved matters applications.  
In relation to the perceived potential impacts of development in 'eroding a gap' between Warminster and Bishopstrow, when entering or exiting Warminster, the distinction between the two settlements in heritage terms is not readily legible. It is considered that the distinction between the settlements is already blurred, especially as the main village at Bishopstrow is to the south rather north of the B3414. Any sense of separation between Warminster and Bishopstrow can only be experienced when the site is viewed from the high ground in the vicinity of Battlesbury Hill to the north. Looking back towards the settlement, this is restricted to a small and rather inconsequential 'gap' between the housing surrounding the military base and Bishopstrow House. However, what is plainly apparent is that the site forms a small part of the more extensive panorama of the wider urban area of Warminster that is visible within the valley, and that built development would be seen within that context.  
We consider that the conclusions reached by the Inspector, and supported by the Secretary of State, in the appeal decision for Land at Boreham Road, Warminster, BA12 9JP (APP/Y3940/W/16/3150774), are directly comparable to the Land East of the Dene, given the proximity to the appeal site and similar circumstances. It is important to note that the appeal decision states:  
"The degree of physical separation of the appeal site from Bishopstrow and the level of screening that would be afforded to the proposed development would prevent any unacceptable impression of coalescence between it and Warminster. The proposed development would be so well removed and screened from Bishopstrow College as to have no significant impact on it and there is no reason why a sensitively designed development would have any adverse impact on Boreham Mill from which it would be well screened".  
"there would be no harm to the character and appearance of the area generally or through creating unacceptable coalescence between Warminster and Bishopstrow".  
A copy of the appeal decision is attached at Appendix 10.  
Further evidence on landscape can be found in the Council's own Site Landscape Assessment, which provides a positive summary on the potential for development on the site. Furthermore, the planning application proposals incorporate a significant level of open space and green infrastructure, over and above that required by the Council's planning policies, this demonstrates the potential of the site to deliver the benefits outlined under objective 7.  
In conclusion, we consider that the SA overstates the degree of harm resulting from the allocation and that the combination of the proposed mitigation and considerable landscape and open space enhancements that can be delivered provide benefits for the community that result in a neutral impact overall.  
Stage 4a Site Landscape Assessment - Part 2: Salisbury, Tidworth, Trowbridge, Warminster and Westbury Community Areas  
The Council's Stage 4a Landscape Assessment provides a positive summary on the potential for development on the site, referred to within the Assessment as 'Site: 603 Land East of The Dene'.  
Firstly, in relation to 'remoteness and tranquillity judgement', the Assessment confirms that the site is considered to be located in an area considered as "Some interruption", as opposed to remote or peaceful. In addition, the Assessment confirms that the site benefits from a level of screening given that "the site is enclosed to the west, east and south by built form and vegetation".  
In relation to 'mitigation measures and capacity to accommodate change', the Stage 4a Site Landscape Assessment provides a positive summary for the site, stating on page 60 that "however, proposed development would be less constrained in the north west and south west of the site due to the proximity of existing development and the lower sensitivity in terms of wider landscape setting and views. Boundaries to development could be planted with groups of trees, copses and individual specimen trees to help mitigate the effect on landscape character and views. The northern and eastern parts of the site would be more sensitive to development due to the proximity of the Conservation Area and views north towards Battlesbury Hill".  
The report clearly sets out the design and mitigation measures that need to be adopted, such as the planting of "groups of trees" around the site boundaries, which are embraced by the application proposals. The application shows that built development would be located alongside and within the context of existing housing and is set within a green infrastructure framework. This includes broad areas of open space and broadleaved planting around the northern and eastern parts of the site that would minimise effects on landscape character and visual amenity.

Appendix Q - Schedule of representations

	<p>The planning application included a Landscape &amp; Visual Appraisal (LVA). As recorded by the Council's Landscape Officer in her response: "...It is the appropriate level of assessment for this development and has been prepared to best practice and the guidelines published by the Landscape Institute". A copy of the consultation response is attached at Appendix 13.</p> <p>The LVA explored landscape character and visual amenity and assessed the resulting landscape and visual effects of the Proposed Development on the receiving landscape and visual receptors. The LVA states that:</p> <p>"In conclusion, it is assessed that the site's landscape character has the ability in which to absorb development of the scale and type proposed, as presented by the Framework Plan, without causing any unacceptable long term landscape and visual harm. The Proposed Development of well designed locally distinct new homes, attractive streets and a varied GI of open space and new planting is considered to be an appropriate design approach within this landscape context."</p> <p>The Officer concluded that: "On the whole I agree with the assessment judgements".</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SA objective 8. Provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwelling sizes, types and tenures</p> <p>The SA provides the following summary in relation to the site:          “The whole SHLAA site provides capacity for approximately 163 residential units (though this may be reduced through the mitigation set out in this assessment). Development of the would contribute towards Wiltshire’s housing supply as well as boost the local supply of affordable houses in accordance with national policy and local plan policy requirements. Other policies in the Core Strategy also require a mix of housing by affordability, tenure and size. Overall the effects on this objective are considered to be moderate positive”.</p> <p>We agree entirely that there would be a positive impact as a result of the provision of a mix of housing to meet the identified housing need for the town. This is particularly important given that the made Warminster Neighbourhood Plan does not allocate land, and therefore does not deliver certainty of supply in the local area to meet residual housing needs. Therefore it will be appropriate to allocate additional land for housing through the Housing Site Allocations Plan to meet requirements over the remainder of the Core Strategy plan period.</p> <p>We also agree that the provision of a mix of housing types, along with 30% affordable housing, should be considered a significant benefit. Indeed, providing a choice and range of housing sites at Warminster to meet future housing needs will not only increase certainty over the future delivery of growth but will also provide choice for house purchasers.</p> <p>In this context we consider the development would have a major, as opposed to moderate, positive impact.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SA objective 9. Reduce poverty and deprivation and promote more inclusive and self-contained communities</p> <p>Whilst we agree with the conclusions of Objective 9, that development of the site would reduce poverty, deprivation and promote more inclusive and self-containment within the community, we do not agree with the overall conclusions that the development would result in a moderate adverse effect.</p> <p>The SA states that “In terms of secondary education, there is no capacity to expand Kingdown on its existing site and no immediate prospect of an expansion site being secured and delivered since it is wholly dependent on other development in the town”.</p> <p>We strongly recommend the Council review the response provided by the School Places Planning Officer on 17 November 2017. This confirms that whilst the school currently has no spare capacity, “the Council intends to substantially expand the school”.</p> <p>The consultation response, attached at Appendix 11, goes on to state that “As Kingdown is effectively already full, we require a developer contribution towards the provision of the 27 places that this development requires. The contribution will be secured by S106 to which standard payment terms will apply, and subject to appropriate indexation, there are currently four S106s pooled towards the first phase of expansion at Kingdown Academy, with one in the process of being completed. However, a second phase of expansion at the school will also be needed to accommodate continuing demand from new housing, necessary, and so further S106s will be secured to fund it, and this site will be one of those Phase 2 contributors”.</p> <p>Therefore, contrary to the conclusions of the SA, we consider that the development of the site would provide a significant benefit in enabling contributions towards a Phase 2 expansion of the school which the Council itself has already identified. As a result, it is considered that the development would result in a positive impact.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SA objective 10. Reduce the need to travel and promote more sustainable transport choices</p> <p>The SA provides the following summary in relation to the site:</p> <p>“The site is in an edge of town location, and there are few shops and other facilities available nearby, although there are primary and secondary schools close to the site. The site is over 2km from the rail station and whilst within a reasonable cycling distance, it is not a reasonable walking distance. There are bus stops close to the site at Boreham Road and Woodcock Road serving the reasonably regular 265 Bath – Bradford on Avon – Trowbridge – Westbury – Warminster – Salisbury route. Future residents are still likely to rely on the private vehicle to access services and facilities from this location. It may be possible to provide pedestrian linkages to the local PROW network. Development in this location provides for reasonable accessibility to a range of services and facilities, and there is scope that some future residents will be able to make sustainable choices about their mode of travel. Overall it is considered that the effects on this objective are minor adverse”.</p> <p>In the same way as outlined for our response under objective 5a, we question the conclusions reached for this objective given the site is situated in a sustainable location. Indeed, given the pressing need to deliver additional housing at Warminster, and the lack of available sites within the town itself, it would follow that the draft Plan should look to identify suitable sites on the edge of the town to accommodate the identified housing need. The sustainable credentials of the site are supported by the consultation response to the outline planning application provided by the Council’s Highways Officer, dated 3 February 2017, which stated that:</p> <p>“Taking all these points into account together with the walking and cycling distances to local schools and retail facilities the development can be considered sufficiently sustainable in transport terms”.</p> <p>A copy of the consultation response is attached at Appendix 12. It is also important to note that the Council’s Highway Officer supports the application proposals, the consultation response for which is also attached at Appendix 12.</p> <p>In addition, the recent Secretary of State appeal decision for Land at Boreham Road, Warminster (APP/Y3940/W/16/3150774), confirms the sustainable credentials for this general location, by stating that “although it would not be on the side of Warminster where most new development is to occur it would be on a site reasonably well located in relation to existing development in the town and with reasonable non-car accessibility to the town centre”. With this in mind, we consider the SA should instead conclude that the allocation would have a minor positive impact on this objective as opposed to a minor negative.</p>

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.65				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This representation should be treated as an objection to Shrewton being discounted as a location for housing site allocations and, in particular the suitability and availability of an area of land off Elstone Lane in Shrewton outlined red on the plan enclosed with this representation (drawing no. 17146-1).</p> <p>It has been noted from the Amesbury Community Area Topic Paper June 2017 that SHLAA Sites in Shrewton were rejected at the Stage 3 of the site selection process with the stated reasons in table 6.5 as mainly being because of major adverse effects associated with River Avon SAC and water and sewer constraints (with some minor variations between sites).</p> <p>On this basis, the Habitat Regulations Assessment (HRA) June 2017 has been reviewed to provide an insight for these summary reasons for rejecting the sites at Stage 3. In the case of Shrewton, the settlement level screening assessment (Table 4) identifies the Likely Significant Effects (LSE) which are addressed below.</p> <p><b>Salisbury Plain Special Protection Area (SPA) – Criterion R1</b>                  Shrewton has been discounted at Stage 3 on the basis that the settlement is within 6.4km of the Salisbury Plain SPA, being the distance where the majority of visitors to the SPA originate. However, this reason cannot be substantiated on the basis that Warminster is also within 6.4km of the SPA where a significant amount of new development is being focused. This will have a much greater impact than the level of development that could be achieved in Shrewton, and analysis elsewhere in the HRA and the Sustainability Appraisal demonstrates that there is scope to mitigate the impact of any additional recreational pressure upon the SPA. There is no evidence to suggest that the Stone Curlew Mitigation Strategy identified in the Core Strategy, which was developed for the established housing requirements and is not changing as a result of this Site Allocation Plan, would be ineffective. As such, development in Shrewton as a matter of principle will not have a LSE on this SPA.</p> <p><b>River Avon Special Area for Conservation (SAC) – Criterion H2</b>                  The identified LSE of development in Shrewton on this SAC is flawed on the basis that Policy CP69 of the Core Strategy states that impacts are most likely to occur on developments within 20m of the river but the Stage 3 assessment then incorrectly assumes that development at settlements within 20m of the River Avon SAC could lead to LSE. This incorrect assumption is confirmed in the summary of screening assessment results where it states that the potential impacts of development in such settlements would be entirely site specific. Again, Warminster (and Salisbury) are settlements within 20m of this SAC but have not been discounted at Stage 3, and it is unreasonable to cherry pick the inclusion or exclusion of settlements for the purposes of the HRA.</p> <p><b>Water Abstraction – River Avon SAC – Criterion W1</b>                  The LSE has identified a number of settlements but singles out any development in Shrewton as it is likely to contribute towards reduced flows which would consequently cause an unfavourable condition of the River Till.                  The HRA acknowledges that the impact on flows is based on Wessex Basin Ground Water Model (2016) which was based on an assumption of full uptake of private water supply licensed abstractions, but this does not reflect the recent actual abstraction rates in the area. Mitigation can be</p>				

Appendix Q - Schedule of representations

	<p>achieved to the local water supply network if necessary, as being applied to the allocation at Durrington. It is therefore inappropriate to discount Shrewton as a location for some development owing to potential mitigation if necessary to prevent any LSE.</p> <p>Site Specific Assessment of Land at Elstone Lane</p> <p>In the first instance, it should be noted that The Parish of Shrewton has published a Draft Neighbourhood Plan on their website (dated August 2016). This includes the results of a housing need survey which revealed that 89.1% of those who responded to the survey support the provision of new housing, and states that a development of 53 dwellings would be expected to deliver the identified need for affordable housing. Even more housing may be required to deliver some of the Parish's other objectives in the Draft Plan (i.e. redevelopment of the village hall and enhanced recreational facilities). As such, Wiltshire Council's decision to discount any development in Shrewton through the Site Allocations Plan is unreasonable and unsustainable. The analysis further above demonstrates that development of this site in Shrewton will not have any LSE on the River Avon SAC and that water abstraction can be mitigated if necessary. A suitable drainage scheme would ensure that there would not be any pollution.</p> <p>The site is being made available by the landowner for housing development and it is suitable for housing on the basis that it relates well to the settlement and is in a sustainable rural location. Importantly, there are no specific policies in the Core Strategy or National Planning Policy Framework which indicate that development should be restricted on this site. The site is currently occupied by a private manage and therefore constitutes previously developed land. There is an existing vehicular access to the site which is safe and suitable for housing as a matter of principle although this would be demonstrated further during the decision-making process in respect of an application to develop the site.</p> <p>Any development proposal would be required by national and local planning policies to demonstrate with evidence that there is sufficient infrastructure in place (e.g. highways, education, health, sewerage, water supply ..... etc) and, if necessary, capacity can be secured through the planning process. This would be covered by specific criteria in a site allocation policy.</p> <p>Any potential adverse effects can be fully mitigated through detailed assessment and, where appropriate, the imposition of conditions and provision of planning obligations through the development management decision-making process.</p> <p>At present, the absence of any housing site allocations in Shrewton is unjustified. For the above reasons, there is no justified basis to discount Shrewton for housing site allocations and there are no likely significant effects. As such, the Council should re-assess their pre-submission position regarding Shrewton and re-run Stages 3 and 4 of the site selection process within the Amesbury Community Area, with this newly identified site included for consideration.</p>

<b>Comment ID:</b>  <a href="#">3256</a>	<b>Consultee</b> Robert Hitchens Ltd  <b>Person ID:</b> 841197	<b>Agent</b> Sarah Hamilton-Foyn Pegasus Planning Group  <b>Person ID:</b> 397761	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	2.12		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Pegasus on behalf of Robert Hitchins Limited do not support the Plan and consider that there are grounds to increase the housing requirement to reflect the OAN as since the Core Strategy Examination there is no longer the evidence to support the constrained housing requirement. At the Core Strategy Examination there was considerable debate over the OAN. The Inspector in examining the Wiltshire Core Strategy (Sept 2014) recommended :- An increase in the minimum number of houses to be provided over the plan period, from 37,000 to at least 42,000 and revisions to their distribution; A commitment to partially review the Core Strategy to enable an adequate development plan basis for decision making over the plan period to 2026; a commitment to produce additional Development Plan Documents to ensure the effective delivery of necessary development. Such documents will include a Housing Sites Allocation DPD, a Gypsy and Traveller DPD based upon updated needs evidence and a Chippenham Site Allocation DPD; The Inspector acknowledged that "Overall, the balance of evidence suggests that the objectively assessed housing need, to be disaggregated across the three Wiltshire HMAs, is currently in the region of 44,000 dwellings over the plan period." Paragraph 47 of the NPPF requires that the full objectively assessed needs for market and affordable housing (OAN) is met within the Housing Market Area (HMA) as far as is consistent with the policies set out in the NPPF. The Wiltshire Core Strategy Inspector issued a letter on 2nd December 2013 (large parts of which are maintained in his Final Report) which identified that the OAN was in the region of 44,000 dwellings over the plan period. Nevertheless, the Inspector went on to accept a housing requirement of 42,000 dwellings. The High Court Judgment of Jelson Limited vs Hinckley and Bosworth Borough Council et al [2016] EWHC 2979 (Admin), defines what is meant by the terms OAN and housing requirement in paragraph 41, as follows: "Full Objective Assessment of Need for Housing: This is the objectively assessed need for housing in an area, leaving aside policy considerations. It is therefore closely linked to the relevant household projection; but it is not necessarily the same. An objective assessment of housing need may result in a different figure from that based on purely demographics ... Housing Requirement: This is the figure which reflects, not only the assessed need for housing, but also any policy considerations that might require that figure to be manipulated to determine the actual housing target for an area. For example, built development in an area might be constrained by the extent of land which is the subject of policy protection, such as Green Belt or Areas of Outstanding Natural Beauty. Or it might be decided, as a matter of policy, to encourage or discourage particular migration reflected in demographic trends. Once these policy considerations have been applied to the figure for full objectively assessed need for housing in an area, the result is a "policy on" figure for housing requirement. Subject to it being determined by a proper process, the housing requirement figure will be the target against which housing supply will normally be measured."			
	Consistent with national policy			

Appendix Q - Schedule of representations

	<p>This identifies that a policy-on housing requirement can be different from the policy-off OAN to achieve particular policy objectives, such as protecting environmental assets or preventing unsustainable cross- boundary relationships. However, in Wiltshire no such policy objective was fulfilled through the adoption of a housing requirement below the OAN. The reasons were in effect that:</p> <ul style="list-style-type: none"> <li>the OAN could not be achieved;</li> <li>the Council could not demonstrate a five-year land supply against the OAN;</li> <li>the OAN was not assessed as being the preferred option through the Sustainability Appraisal; and</li> <li>the Council were committed to rapidly reviewing and responding to the OAN.</li> </ul> <p>However, none of these reasons can now be justified (as described below) and so there can be no reason for not meeting the full OAN as required by paragraph 47 of the NPPF</p> <p>The OAN could not be achieved</p> <p>Wiltshire delivered in excess of the annualised housing requirement in 2013/14 and in 2014/15, even in the absence of allocations prior to 2015. This clearly demonstrates that the adopted housing requirement can be sustainably exceeded. Indeed, now that the Strategic Allocations of the Core Strategy (and the Chippenham Site Allocations Plan and Neighbourhood Plans) are delivering it would be expected that these rates of delivery would increase significantly. This entirely undermines the previous evidence presented to the Inspector examining the Wiltshire Core Strategy that such rates of development were unachievable.</p> <p>2. The Council could not demonstrate a five-year land supply against the OAN</p> <p>Based on the Council's figures and method of calculation, the Council would currently be able to identify a five-year land supply against a housing requirement of 46,158 dwellings (7,440 in East Wiltshire HMA; 27,898 in North and West Wiltshire HMA; 10,820 in South Wiltshire HMA) in addition to the allowance for 900 dwellings at the West of Swindon. The adopted housing requirement can therefore be increased to reflect (or even exceed) the OAN in accordance with the NPPF.</p> <p>3. The OAN was not assessed as being the preferred option through the Sustainability Appraisal</p> <p>The Sustainability Appraisal (SA) has evolved since the adoption of the Core Strategy, and this has been used to inform the Housing Site Allocations Plan which proposes to deliver circa 46,600 dwellings.</p> <p>4. The Council were committed to rapidly reviewing and responding to the OAN</p> <p>The Inspectors Final Report relied upon the Council producing a new SHMA by early 2016 (see paragraph 81). This would have enabled the Council to respond positively to address the identified needs through the planned early review of the Core Strategy. However, in the intervening 3 years, no such SHMA has been produced and published and there has been no progress on the early review of the Core Strategy. In fact it is noted that the Council have recently considered a revised Local Development Scheme at the Cabinet meeting on 12th September and the partial review of the Core Strategy is replaced by the Wiltshire Local Plan Review. However, it remains self-evidently the case, that the Council have not re-assessed needs and responded appropriately. The continued reliance upon the commitments of the Council to identify and address the OAN should not be afforded weight, given that the previous commitments have not been fulfilled.</p> <p>Based on the preceding analysis, there is no evidence and no justification for not meeting the OAN in full in Wiltshire, as required by paragraph 47 of the NPPF. The Housing Site Allocations Plan should therefore seek to deliver the OAN of 44,000 dwellings. Such an approach would be wholly consistent with the housing requirement of the Core Strategy which requires the delivery of at least 42,000 dwellings.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		2.1		Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Pegasus on behalf of Robert Hitchins Limited do not support the Plan.</p> <p>Further to our representations in respect of paragraph 2.12 i.e.. that the Inspector should use the OAN of 44,000 dwellings because the housing requirement in the Core Strategy is phrased as “at least”; this would be consistent with national policy, and as evidenced in the recent documentation it is achievable because the difference between the OAN of 44,000 and the housing requirement is largely accounted for. It would only leave the opportunity for a few allocations in each of the HMAs in accordance with the settlement strategy. The OAN for the North and West Wiltshire HMA would be 25,918 assuming the same distribution between the HMAs i.e. <math>44,000/42,000 \times 24,740 = 25,918</math></p> <p>The supply for North and West Wiltshire HMA of 27,450 dwellings (Table 4.7) can be reduced by the following:</p> <ul style="list-style-type: none"> <li>Delete saved Local Plan allocations in the HMA i.e. 446 dwellings</li> <li>Delete the inclusion of the brownfield sites to avoid double counting (only one in the HMA is Warminster) 35 dwellings</li> <li>Recalculate windfalls (i.e. critique of WC methodology) reduce total number of windfalls in HMA by 977</li> <li>Delays to Ashton Park and a strategic site in Chippenham (this arose at the recent Lynham appeal) i.e. 385 dwellings</li> </ul> <p>Therefore, the supply of 27,450 is reduced by 1,843 (i.e. total from bullet points above) = supply equals 25,607 dwellings</p> <p>Therefore against the new housing requirement of 25,918 the supply is 25,607 and therefore there is a shortfall of 311 dwellings in the North and West Wiltshire HMA..</p> <p>Against the new housing requirement of 25,918 the supply is 25,607 and therefore there is a shortfall of 311 dwellings in the North and West Wiltshire HMA</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3258</a>	<b>Consultee</b> Robert Hitchens Ltd  <b>Person ID:</b> 841197	<b>Agent</b> Sarah Hamilton-Foy Pegasus Planning Group  <b>Person ID:</b> 397761	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	2.19			Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Pegasus on behalf of Robert Hitchins Limited do not support the Plan and have the following objections in respect of housing supply. Para 2.19 sets out the number of sources of supply to meet the new homes requirements of Core Policy 2. The Council have identified the developable supply in the CA Topic Papers and in Table 4.9 of the draft Plan. However, the Council have not identified the individual components that make up this supply and as such the total figures in Table 4.9 cannot be relied upon. The necessary evidence should have been made available for this consultation, and will be required prior to examination. Pegasus Group reserve the right to submit detailed representations on this when the necessary evidence is made available. The latest assessment of the developable supply which is available is contained in the Wiltshire Housing Land Supply Statement Update March 2017 (HLSS). It is useful to consider some of the components of supply identified in this report in order to assess the robustness of the Councils current unpublished assessment. However, there are a number of sources of supply in the HLSS which should not be relied upon to deliver as outlined below.</p> <p>Windfall allowance</p> <p>The Draft Plan includes a windfall allowance based on the previous delivery of previously developed sites. This source of supply is in itself uncertain, but it is useful as an indication of what would be delivered if previous rates of delivery were able to be maintained. There are however, two methodological flaws in the approach the Council take to calculating the windfall allowance. Firstly, the Council propose to allocate at least one previously developed site (at Chapmanslade) which would otherwise have been classified as windfall development. The inclusion of this site as an allocation as well as maintaining the windfall rates results in double counting. This makes only a minor difference of 35 dwellings. Secondly, the Council have changed their methodology for calculating the windfall allowance since the examination of the Wiltshire Core Strategy. At that time, the Council assumed that small sites would deliver circa 575 dwellings and that large sites would deliver circa 364 dwellings totalling 939 dwellings within five years. However, the Council now assume that there will be 1,611 windfall dwellings within five years. This has been calculated using a consistent methodology for calculating the small site allowance (although based on a different period) from which it can be calculated that the Council now assume that circa 1,036 dwellings will be delivered on previously developed large windfall sites. This is despite the fact that the Council do not have any evidence that there is sufficient capacity on such sites to deliver this level of housing. Indeed, at the time of the examination the Council identified a total potential capacity of only 364 dwellings (and some of these may have subsequently gained consent and so be included in the developable supply already). The approach of the Council in regards to the large windfall allowance relies upon the delivery of a level of dwellings for which there is no evidence that there is the requisite capacity. Indeed, the Council rely upon the trends of large windfall development in recent years, but this is inevitably hugely variable and a single large windfall development can have a disproportionate effect on the average.</p> <p>Saved Local Plan Allocations</p>			

Appendix Q - Schedule of representations

The Council continue to rely upon the delivery of saved Local Plan allocations in the HLSS. This includes sites which were allocated in the North Wiltshire Local Plan in June 2006, the Salisbury District Local Plan in June 2003, and the West Wiltshire District Plan 1st Alteration in June 2004. Despite the fact that these sites have been allocated for development for between 11 and 13 years, there has been no progress towards site delivery.

In the North Wiltshire Local Plan saved local plan allocations are:  
 Quemerford House and Mill {10 dwellings}  
 Foundary Lane, Chippenham Town {250 dwellings}  
 Works, Cocklebury Road, Chippenham Town {66 dwellings}  
 AB Haulage Contractors, 14 Happy Land, Ashton Keynes, Malmesbury Community Area remainder {5 dwellings}

In the West Wiltshire Local Plan saved local plan allocations are:  
 Land adjacent to Westbury Hospital, Westbury Town {25 dwellings}  
 Station Road, Westbury Town {90 dwellings}

The record of delivery of sites needs to be taken into account when assessing the availability of sites as set out in the NPPG (3-020). These saved allocations have an extensive record of non-implementation and against this background the certainty of any delivery from these sites is limited. Accordingly, in accordance with the NPPG these sites should not be relied upon to deliver.

Newly Arising Information

It is understood that new information in relation to the delivery of some sites has been made available to the Council, including through recent planning inquiries. By way of example, a new trajectory for Ashton Park was provided to the recent Lyneham inquiry since the publication of the Draft Plan. This identifies that this allocation will deliver 300 fewer homes during the plan period.

The Inspector in this case also considered that the trajectories for some other sites were overly optimistic and these should also be delayed, which is likely to further reduce the developable supply. The effects of these necessary adjustments to the identified supply cannot be identified in full until the supporting evidence is made available. Nevertheless, based solely on this analysis, it is clear that the supply relied upon by the Council is overly optimistic. Indeed, it is estimated that the above would reduce the developable supply by circa 3,734 dwellings. With a detailed site specific analysis, it is likely that the supply would be even lower. Table 4.7 of the Draft Plan identifies that with the proposed allocations and including an allowance for windfall, it is expected that 45,639 dwellings will be delivered across the plan period, although an additional 950 dwellings will be provided to the west of Swindon. However, with the removal of at least 3,734 dwellings this would amount to only 41,905 dwellings to meet the requirements of Wiltshire in addition to the 950 dwellings at the west of Swindon. This would marginally exceed the adopted housing requirement but would be over 1,000 short of meeting the OAN, even if every site delivered on schedule.

The effect of the above is that the plan cannot be justified and effective or consistent with National Policy and consequently does not satisfy the tests of soundness.

The supply for North and West Wiltshire HMA of 27,450 dwellings (Table 4.7) can be reduced by the following:  
 Delete saved Local Plan allocations in the HMA i.e. 446 dwellings  
 Delete the inclusion of the brownfield sites to avoid double counting (only one in the HMA is Warminster) 35 dwellings  
 Recalculate windfalls (i.e. critique of WC methodology) reduce total number of windfalls in HMA by 977  
 Delays to Ashton Park and a strategic site in Chippenham (this arose at the recent Lynham appeal) i.e. 385 dwellings  
 Therefore, the supply of 27,450 is reduced by 1,843 (i.e. total from bullet points above) = supply equals 25,607 dwellings  
 Therefore against the new housing requirement of 25,918 the supply is 25,607 and therefore there is a shortfall of 311 dwellings.  
 The text and tables relating to the housing land supply should be amended accordingly.

**Attached files (Please see Objective)**

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

Pegasus on behalf of Robert Hitchins Limited wish to participate at the Examination as we have raised issues which affect the soundness of the plan.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">3259</a>	<b>Consultee</b> Robert Hitchens Ltd  <b>Person ID:</b> 841197	<b>Agent</b> Sarah Hamilton-Foy Pegasus Planning Group  <b>Person ID:</b> 397761	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	3.1 - 3.4		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Pegasus on behalf of Robert Hitchins Limited do not support the Plan and have the following objections in respect of settlement boundaries. It is noted that the first Objective of the plan is to review the settlement boundaries. The following comments also relate to Section 6 Settlement Boundary Review. Paragraph 4.13 of the WCS allows for the review of the existing settlement boundaries through the Wiltshire Housing Site Allocations Plan. Paragraph 4.15 states that: ‘these settlement boundaries will also be reviewed as part of the Wiltshire Housing Site Allocations Plan as set out in the Council's Local Development Scheme, in order to ensure they remain up to date and properly(emphasis added) reflect building that has happened since they were first established ’ . (my emphasis). In some cases these are clearly out of date as they do not reflect recent planning permissions. Topic Paper 1 Settlement Boundary Review Methodology states that as the boundaries were not altered in the Wiltshire Core Strategy and they relied on the district local plan boundaries. Para 1.3 states that the “Council has undertaken a comprehensive review of the boundaries to ensure they are up-to-date and adequately reflect changes which have happened since they were first established. The Plan amends settlement boundaries where necessary. It is also the prerogative of local communities to review them through the preparation of neighbourhood plans.” It is noted that the three case studies referred to in Topic Paper 1 that Winchester City included in the settlement boundary “Built/ commenced allocations/ planning permissions”. Purbeck includes “Uses and buildings (including sites with unimplemented planning permission) that have a clear social or economic function.” Kettering Borough Council includes “Existing commitments for built developments.” It is noted that the Wiltshire Council draft settlement boundary methodology included “Both built and extant planning permissions for residential and employment uses for areas which are physically/ functionally related to the settlement.” However, following consultation with the Parish and Town Councils who disagreed that the settlement boundary should include allocations, development proposals and unimplemented planning permissions as those who objected to the inclusion of sites with planning permission considered that many planning permissions never get built out and that the final built form may differ substantially from the original permission; the methodology was changed. Only for those planning permissions that have commenced are included in the settlement boundary as they consider that there is much greater certainty. The Topic Paper concludes “Therefore, the revised settlement boundary review methodology will include within the settlement boundary built or commenced planning permissions but exclude all unimplemented planning permissions. Nevertheless, it is recognised that settlement boundaries represent a snapshot in time. Unimplemented planning permissions subsequently built out can be included within a future review.” The revised settlement boundaries proposed for Melksham, Westbury and Calne are not up to date and do not reflect recent planning permissions to RHL references 15/12454, 14/09262/OUT, 14/11179/OUT land at Prince Charles Drive, Calne respectively and also land at Low Lane Calne LPA reference 17/00679/OUT).			
	Consistent with national policy			

Appendix Q - Schedule of representations

	<p>The settlement boundary of Melksham should be revised to reflect planning permission 15/12454 land to the north of Sandridge Common, Sandridge Road, Melksham, where development has started.</p> <p>Likewise the settlement boundary of Westbury should be revised to reflect planning permission 14/09262 which was granted on appeal in July 2016 ( 300 dwellings, land north of Bitham Park, Trowbridge Road, Westbury) which has started. It is noted that the proposed new settlement boundary includes land to the west of Trowbridge Road which was granted permission and is under construction ( 220 dwellings 13/03568), but not land to the east of Trowbridge Road.</p> <p>It is noted that the settlement boundary is proposed to be altered to reflect earlier planning permissions at Calne, namely land off Sandpit Road and land south of Abberd Lane, which have been built and under construction; however recent planning permissions land at Prince Charles Drive ( 14/11179 for 130 dwellings) and land at Low Lane Calne (17/00679 for 165 dwellings) are not reflected in the changes to the settlement boundary. Building has commenced on Land at Prince Charles Drive.</p> <p>The issue is what harm would there be to the settlement strategy of updating the settlement boundary to reflect the recent planning permissions in addition to those under construction. These sites are after all considered against the housing supply and are consistent with the settlement strategy and are in some cases under construction.</p> <p>The comments above are also applicable to Chapter 6 and the Community Area Topic Papers.</p> <p>The issue is what harm would there be to the settlement strategy of updating the settlement boundary to reflect the recent planning permissions in addition to those under construction. These sites are after all considered against the housing supply and are consistent with the settlement strategy and are in some cases under construction.</p> <p>It is considered that the settlement boundaries should be amended to reflect allocations and sites with planning permissions.</p>

				Do you consider the draft WHSAP is sound?	No
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Table	4.7	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
Please identify the policy, paragraph, table, figure or site to which you are referring.				Effective	
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Pegasus on behalf of Robert Hitchins Limited do not support the Plan and have the following objections in respect of housing supply. Further to representations submitted in response to para 2.19, Table 4.7 The supply for North and West Wiltshire HMA of 27,450 dwellings (Table 4.7) can be reduced by the following: Delete saved Local Plan allocations in the HMA i.e. 446 dwellings Delete the inclusion of the brownfield sites to avoid double counting (only one in the HMA is Warminster) 35 dwellings Recalculate windfalls (i.e. critique of WC methodology) reduce total number of windfalls in HMA by 977 Delays to Ashton Park and a strategic site in Chippenham (this arose at the recent Lynham appeal) i.e. 385 dwellings Therefore, the supply of 27,450 is reduced by 1,843 (i.e. total from bullet points above) = supply equals 25,607 dwellings Therefore against the new housing requirement of 25,918 the supply is 25,607 and therefore there is a short fall of 311 dwellings as opposed to a surplus of 2,710. The text and tables relating to the housing land supply should be amended accordingly.				
Attached files (Please see Objective)					
If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?	Pegasus on behalf of Robert Hitchins Limited wish to participate at the Examination as we have raised issues which affect the soundness of the plan.				

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3261</a>	<b>Consultee</b> Robert Hitchens Ltd  <b>Person ID:</b> 841197	<b>Agent</b> Sarah Hamilton-Foy Pegasus Planning Group  <b>Person ID:</b> 397761	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.8		Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Pegasus on behalf of Robert Hitchins Limited do not support the Plan, there is a lack of transparency in the evidence base. It is noted that Table 4.8 HMA 5 year land supply estimate 2017 – 2018 indicates that there is in excess of a 5 year supply for the North and West HMA through to 2025/2026, however, in this year the housing supply is only 5.3 years. It is noted from Topic Paper 4 that the 5 year supply has been calculated on the basis that if a 20% buffer was required then a 5 year land supply could be met. Even in the year 2025/26 it would appear that the Council can demonstrate a 5 year land supply in the North and West HMA with a 5% buffer. However, what is not clear from Topic Paper 4 is the calculations behind these figures. Pegasus reserve the opportunity to comment on these figures when the information is made available. There is a lack of transparency in the figures presented. Consequently the plan is not sound as it is not justified. Detailed information on housing land supply should be made available in order to assess the soundness of the plan.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3262</a>	<b>Consultee</b> Robert Hitchens Ltd  <b>Person ID:</b> 841197	<b>Agent</b> Sarah Hamilton-Foy Pegasus Planning Group  <b>Person ID:</b> 397761	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.44 - 4.61		Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Pegasus on behalf of Robert Hitchins Limited do not support the Plan and consider that there are grounds to increase the housing requirement to reflect the OAN as since the Core Strategy Examination there is no longer the evidence to support the constrained housing requirement. Furthermore, Pegasus question the housing supply and also the deliverability of some of the sites.</p> <p>It is noted that within the North and West Wiltshire HMA that there are marked differences in the anticipated growth of Calne and Westbury compared to the two Principal Settlements of the HMA i.e. Chippenham and Trowbridge, where land has not come forward as the Council anticipated.</p> <p>The market towns of Calne and Melksham have exceeded anticipated rates over the first part of the plan period. However, it is noted that indicative levels of housing for market towns are not a ceiling and according to the plan variations would not seem to present new or significant issues for local infrastructure and environmental capacity, consequently there is further capacity at these settlements which is available, suitable and achievable.</p> <p>The Plan states that Chippenham has failed to meet anticipated growth rates and as a consequence land at Calne has come forward to meet housing needs over and above what was envisaged for Calne in the Plan period. However, the Plan now anticipates that as a result of the significant allocations for housing development made in the recently adopted Chippenham Site Allocations DPD that development will now come forward.</p> <p>Nevertheless, it is noted that the indicative housing requirement for Chippenham urban area is 4,510 dwellings, i.e. 225 per year. According to Table 4.10 only 1,204 dwellings have been completed in the period 2006 – 2017, half the plan period, leaving a significant amount to be delivered in the remaining plan period. It seems that the majority of dwellings are to come forward on strategic sites which have been delayed due to the Chippenham SADPD and other reasons. These sites have particular constraints to overcome before they can deliver e.g. North Chippenham which is a site for 750 homes and 2.7 hectares of employment land (12/00560/OUT) was permitted in February 2011, but still not achieved any completions. Consequently it is not clear when first completions will be delivered. Land at Hunters Moon is a site for 450 homes and 2.3 hectares of employment land (13/01747/FUL) and in para 4.6 of the Chippenham Site Allocations DPD states that “it has been approved subject to the signing of a section 106 agreement.”. According to the list of planning applications a full application for the first phase has been submitted. However the Housing Land Supply of March 2017 does not envisage any completions on site until 20/21.</p> <p>Rawlings Green site for 650 dwellings - Only up to 200 new homes can be accommodated before a new link road is needed to connect the site over a new railway bridge to the distributor road provided as part of the North Chippenham development in Area A). the Chippenham Site Allocations DPD states in par 4.19 that “It is an objective of this Plan that the route through North Chippenham connecting the B4069 with the A350 must be in place before any development commences beyond the first phase of 200 dwellings on the Rawlings Green allocation.”</p> <p>Patterdown and Rowden (South West Chippenham) is assumed to deliver in 2017/18 but has not started. Para 4.20 of the Chippenham Site Allocations DPD acknowledges that “...two sites can accommodate a total of approximately 2,050 homes although it is possible that not all this number will be built within the plan period to 2026. At a late point in the current plan period allocated land may contribute to meeting housing</p>			

## Appendix Q - Schedule of representations

requirements for the next plan period and reduce the potential for a fall off in housing supply while a new plan is emerging for the period beyond 2026. The scale of development recognises the additional complexity of ensuring deliverable land.”

The evidence indicates that the trajectory must still be uncertain for a number of the large sites at Chippenham which the plan relies upon. Within the HMA at Trowbridge, there have been significant delays to the delivery of housing, in particular the extensive delays to secure planning permission on the Strategic Allocation of Ashton Park. In addition there are significant ecological, landscape, Green Belt and infrastructure constraints that significantly limit the choice of available sites ( the plan acknowledges the constraints to development at Trowbridge).

The evidence indicates that three considerations to be addressed in order for housing development to be accommodated:

“Ecology:an interconnected pattern of priority Biodiversity Action Plan (BAP) habitats such as mature hedgerows, trees and water features, along with designated woodland features around the town support significant populations of protected bat species associated with the Bath and Bradford-on-Avon Bats Special Area of Conservation (SAC). Additional housing development will increase the population of the town and thereby amplify the risk of recreational pressure on bats”.

“Education: development will increase the number of pupils needing primary school places. A local lack of capacity across the town affects proposals allocated for development. With the majority of proposed housing being directed south/south-west of the town, the evidence points directly to the need for a new primary school in this area. Therefore, in addition to land reserved for one new school, funding contributions will be sought from developers to help provide adequate capacity.”

"Health Services: development will also increase demand for primary health care and funding contributions may also be sought to expand the capacity of GP services and dentistry. Contributions will be justified on a site by site basis in discussion with Clinical Commissioning Group and NHS England.”

Although the SADPD proposes to allocate six sites for development there remains a shortfall of 1,220 dwellings, which can only be exacerbated now that Ashton Park is not going to deliver in the plan period as envisaged. (The Council already acknowledge in para 4.52 that Aston Park will not deliver in the plan period and that 1,000 dwellings will be delayed post 2026. However, new evidence has come forward at the recent Lynham appeal and it is evident that this shortfall will increase by a further 300 dwellings.) Consequently the shortfall for Trowbridge could be increased by approximately 300 dwellings, giving a total shortfall of 1,520 dwellings.

On review of the proposed allocations e.g. in Trowbridge, some of these must be questionable. For example:

Reference H2.1 Elm Grove, Trowbridge,

It is concerning to note that SA repeats the earlier reference to the site being to the south west of Trowbridge.

Site includes recorded presence of Bechstein’s Bats associated with the Bradford-on-Avon Bats SAC, it is within easy walking distance of Biss/Green Lane Wood a core roosting area. Despite this the ecological effects are considered moderate.

There is no up-to-date assessment of the grade of agricultural land at this site and therefore it is difficult to know whether it accords with national policy.

It is noted that there is a shortfall in capacity of local primary schools and the location of the railway line means the pupils will not be able to access the planned school development at Ashton Park.

It is noted that cycling and other sustainable access to the town centre would need to be improved. Given the distance of the site from the centre of Trowbridge it is clear that car dependence will increase from the site given the lack of alternative options.

Reference H2.2 land off the A363 White Horse Business Park for 150 dwellings would lead to the coalescence of Trowbridge and North Bradley village. The SA states that the site (ref 298) is located in the town of Trowbridge, Whilst North Bradley does sit in close proximity to Trowbridge it does not form part of continuous urban area and is not included in the settlement boundary for Trowbridge and the Wiltshire Core Strategy defines North Bradley as a village. Therefore development of this site will erode the individual identity of North Bradley and lead to coalescence with Trowbridge.

The site includes recorded presence of Bechstein’s Bats associated with the Bradford-on-Avon Bats SAC, it is within easy walking distance of Biss/Green Lane Wood a core roosting area. Despite this the ecological effects are considered moderate.

There is no up-to-date assessment of the grade of agricultural land at this site and therefore it is difficult to know whether it accords with national policy.

It is noted that there is a shortfall in capacity of local primary schools and the location of the railway line means the pupils will not be able to access the planned school development at Ashton Park.

Appendix Q - Schedule of representations

	<p>It is noted that cycling and other sustainable access to the town centre would need to be improved. Given the distance of the site from the centre of Trowbridge it is clear that car dependence will increase from the site given the lack of alternative options.</p> <p>Reference H2.3 Elizabeth Way</p> <p>This site at Elizabeth Way ( H2.3) also reduces the gap between Trowbridge and Hilerpton, Hilperon is referred to as a large village.</p> <p>Coalescence issues at Trowbridge</p> <p>The site at White Horse Business Park (H2.2) together with Elm Grove Farm (H2.1) would result in the coalescence of North Bradley with Trowbridge. Particularly when the sites to the west i.e. land at Church Lane (H2.4) and land at Upper Studley (H2.5) and land at Southwick Court ( H2.6) are also considered. Page 179 Figure 7.15 does not include the sites H2.2, H2.5 and H2.6.</p> <p>It is clear that further allocations to the south and east of the town still have numerous ecological issues to overcome and would appear to be directly contradicting the key issues highlighted in paragraph 5.150 of the adopted Wiltshire Core Strategy.</p> <p>The HSAP further states that there are significant ecological, landscape and infrastructure constraints with the following issues needing to be addressed by housing and yet the HSAP allocates to areas directly affecting the key sites and species connect to the Bradford-on-Avon SAC.</p> <p>If there remains a shortfall after the consideration of other sites at Trowbridge which would be considered consistent with the settlement strategy, then sites elsewhere in the HMA should be brought forward to ensure housing is delivered, for example there are unconstrained opportunities at Calne and Melksham which are sustainable locations and the sites are available, suitable and achievable in accordance with the NPPF.</p> <p>The following sites are proposed if needs cannot be met in accordance with the strategy for the Trowbridge Community Area. Sites at Melksham and Calne are within the same HMA.</p> <p>Land to the north west of Melksham comprises 74.54 acres</p>

Therefore, in addition to land reserved for one new school, funding contributions will be sought from developers to help provide adequate capacity.”

"Health Services: development will also increase demand for primary health care and funding contributions may also be sought to expand the capacity of GP services and dentistry. Contributions will be justified on a site by site basis in discussion with Clinical Commissioning Group and NHS England.”

Although the SADPD proposes to allocate six sites for development there remains a shortfall of 1,220 dwellings, which can only be exacerbated now that Ashton Park is not going to deliver in the plan period as envisaged. (The Council already acknowledge in para 4.52 that Aston Park will not deliver in the plan period and that 1,000 dwellings will be delayed post 2026. However, new evidence has come forward at the recent Lynham appeal and it is evident that this shortfall will increase by a further 300 dwellings.) Consequently the shortfall for Trowbridge could be increased by approximately 300 dwellings, giving a total shortfall of 1,520 dwellings.

On review of the proposed allocations e.g. in Trowbridge, some of these must be questionable. For example:

Reference H2.1 Elm Grove, Trowbridge,

It is concerning to note that SA repeats the earlier reference to the site being to the south west of Trowbridge.

Site includes recorded presence of Bechstein’s Bats associated with the Bradford-on-Avon Bats SAC, it is within easy walking distance of Biss/Green Lane Wood a core roosting area. Despite this the ecological effects are considered moderate.

There is no up-to-date assessment of the grade of agricultural land at this site and therefore it is difficult to know whether it accords with national policy.

It is noted that there is a shortfall in capacity of local primary schools and the location of the railway line means the pupils will not be able to access the planned school development at Ashton Park.

It is noted that cycling and other sustainable access to the town centre would need to be improved. Given the distance of the site from the centre of Trowbridge it is clear that car dependence will increase from the site given the lack of alternative options.

Reference H2.2 land off the A363 White Horse Business Park for 150 dwellings would lead to the coalescence of Trowbridge and North Bradley village. The SA states that the site (ref 298) is located in the town of Trowbridge, Whilst North Bradley does sit in close proximity to Trowbridge it does not form part of continuous urban area and is not included in the settlement boundary for Trowbridge and the Wiltshire Core Strategy defines North Bradley as a village. Therefore development of this site will erode the individual identity of North Bradley and lead to coalescence with Trowbridge.

The site includes recorded presence of Bechstein’s Bats associated with the Bradford-on-Avon Bats SAC, it is within easy walking distance of Biss/Green Lane Wood a core roosting area. Despite this the ecological effects are considered moderate.

There is no up-to-date assessment of the grade of agricultural land at this site and therefore it is difficult to know whether it accords with national policy.

It is noted that there is a shortfall in capacity of local primary schools and the location of the railway line means the pupils will not be able to access the planned school development at Ashton Park.

Appendix Q - Schedule of representations

	<p>It is noted that cycling and other sustainable access to the town centre would need to be improved. Given the distance of the site from the centre of Trowbridge it is clear that car dependence will increase from the site given the lack of alternative options.</p> <p>Reference H2.3 Elizabeth Way</p> <p>This site at Elizabeth Way ( H2.3) also reduces the gap between Trowbridge and Hilerpton, Hilperon is referred to as a large village.</p> <p>Coalescence issues at Trowbridge</p> <p>The site at White Horse Business Park (H2.2) together with Elm Grove Farm (H2.1) would result in the coalescence of North Bradley with Trowbridge. Particularly when the sites to the west i.e. land at Church Lane (H2.4) and land at Upper Studley (H2.5) and land at Southwick Court ( H2.6) are also considered. Page 179 Figure 7.15 does not include the sites H2.2, H2.5 and H2.6.</p> <p>It is clear that further allocations to the south and east of the town still have numerous ecological issues to overcome and would appear to be directly contradicting the key issues highlighted in paragraph 5.150 of the adopted Wiltshire Core Strategy.</p> <p>The HSAP further states that there are significant ecological, landscape and infrastructure constraints with the following issues needing to be addressed by housing and yet the HSAP allocates to areas directly affecting the key sites and species connect to the Bradford-on-Avon SAC.</p> <p>If there remains a shortfall after the consideration of other sites at Trowbridge which would be considered consistent with the settlement strategy, then sites elsewhere in the HMA should be brought forward to ensure housing is delivered, for example there are unconstrained opportunities at Calne and Melksham which are sustainable locations and the sites are available, suitable and achievable in accordance with the NPPF.</p> <p>The following sites are proposed if needs cannot be met in accordance with the strategy for the Trowbridge Community Area. Sites at Melksham and Calne are within the same HMA.</p> <p>Land off Low lane Calne (indicative plan showing 25 dwellings and location plan); Location plans are attached.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Pegasus on behalf of Robert Hitchins Limited wish to participate at the Examination as we have raised issues which affect the soundness of the plan.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">3265</a>	<b>Consultee</b> Robert Hitchens Ltd  <b>Person ID:</b> 841197	<b>Agent</b> Sarah Hamilton-Foyn Pegasus Planning Group  <b>Person ID:</b> 397761	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Effective	
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Pegasus on behalf of Robert Hitchins Limited do not support the Plan. Para 2.16 refers to the Wiltshire Core Strategy which provides indicative levels of housing to each Community Area and includes indicative requirements for levels of housing for the Principal settlements, Market towns and in the South Wiltshire Housing Market Area, the local Service Centres; and their surrounding community areas. The distribution of development is in accordance with the strategy . The SADPD allocates land to support the distribution and in proposing allocations it focusses on those areas where land supply falls short of these indicative levels. Policy H2 proposes the housing allocations to meet the shortfall in the North and West Wiltshire Housing Market Area – set out in Table 5.3 by Community Area. There are some concerns about the sites identified to meet the shortfall at Trowbridge see representations to paragraphs 4.44-4.61 and para 5.43 – 5.44. If there remains a shortfall after the consideration of other sites at Trowbridge which would be consider consistent with the settlement strategy, then sites elsewhere in the HMA can be brought forward to ensure housing is delivered. Whilst there is no shortfall in the Melksham or Calne Community Area,( as evidenced in the respective Topic Papers even without taking into account windfalls) these market towns are both well placed to accommodate development that cannot be met in other areas in the HMA ( if there are no sites consistent with the settlement strategy in Trowbridge where there is a significant shortfall.). It is recognised that the SADPD must implement the settlement strategy set out in the adopted Wiltshire Core Strategy. Policy H2 proposes the housing allocations to meet the shortfall in the North and West Wiltshire Housing Market Area – set out in Table 5.3 by Community Area. There are some concerns about the sites identified to meet the shortfall at Trowbridge see representations to paragraphs 4.44-4.61 and para 5.43 – 5.44 and also about the delivery envisage at Chippenham. If there remains a shortfall after the consideration of other sites at Trowbridge which would be consider consistent with the settlement strategy, then sites elsewhere in the HMA can be brought forward to ensure housing is delivered.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The boundary with the existing housing is not just a line on the map. It is an historical and physical boundary marked on old maps. In 1840 it is shown with hedge, ditch and mature trees (some of which are still standing.) The hedgerow is filled with birds and small mammals which would be threatened. There is a well-used footpath along most of the boundary. The ditch follows the line of the boundary and runs into) the Lambrook stream. These features need to be retained in their entirety as they_ are an asset used by local residents, and reflect the history of the area.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write in regards to the proposed housing allocation near Upper Studley (near Church Lane and The Poplars), Southwick Court, and Elm Grove Farm, representing approximately 445 new homes.</p> <p>I have examined the published proposals and I know all three sites well, as I own property on Westmead Crescent and Church Fields. I wish to strongly object to the proposed housing allocations on these sites.</p> <p>Wiltshire Council has an obligation to the residents of Trowbridge, Southwick, and North Bradley to ensure that the benefits of new housing outweigh the costs. It seems that, in this case, rather than properly exploring other options and understanding what their proposal means to local residents, they have simply chosen the easiest targets.</p> <p>I call on Wiltshire Council to stay true to their core planning strategy, to think about the people who will be impacted by these lazy proposals, and to choose what is right rather than what is easy.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>These three sites [Upper Studley (near Church Lane and The Poplars), Southwick Court, and Elm Grove Farm], collectively, form the boundary gap between Trowbridge and the villages of Southwick and North Bradley. Development in these sites must be very carefully considered: infilling will ruin the character of these lovely villages, overwhelm local services, and will have a vast array of other undesirable side effects. It may be argued that infilling these boundaries is not in accordance with paragraph 64 of the national planning policy framework, which states that "permission should be refused for development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions" - I do not believe that any sort of new housing estate in these areas can possibly hope to achieve improvement in character and quality of these villages or the Bradley Gardens estate they border, and in no way will help to improve the way they function.</p> <p>I also believe that infilling these gaps is in direct contradiction to previous Wiltshire Council planning documents and decisions. Specifically, in a recent Wiltshire Times article, Councillor Geoff Whiffen said "Wiltshire Council go against their own core strategy. That document stated that developments should not be built where villages are swallowed up by towns, yet that is happening." This is an accurate way to describe the potential outcomes if these proposals are allowed through: it will be impossible to differentiate Southwick and North Bradley from Trowbridge. In this same article, Councillor Whiffen also referenced another recent planning decision that did pass: the erection of a solar farm off Axe and Cleaver Lane. Councillor Whiffen stated that the reason the solar farm was located in this position was specifically to avoid being near houses. Clearly, if housing is built around this development, that will no longer be true.</p> <p>Further, in addition to killing two beautiful, well-established, historic villages, the proposal is ill considered for a plethora of important reasons.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">3278</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Ms and Mr Britt and Chris Smith and Skinner	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Frome Road is already exceedingly busy at peak times of day, and the traffic is fast moving, with almost no drivers slowing to 30 miles per hour as they enter Trowbridge limits: many people drive through the dip on Frome Road at speeds approaching 50 miles per hour, and only ease up as they pass Church Fields and hit the stop light at College Road. I speak from experience when I say that turning out of Church Lane is dangerous – I lived at 4 Church Fields for 3 years, and I never got used to peeking the nose of my car out. If additional traffic is expected to enter and exit at Church Lane or at another narrow lane on either side of Frome Road, it is only a matter of time before there is a fatal accident. Since moving to Westmead Crescent, I have also experienced the flow of traffic off Silver Street Lane and down Marston Road, which is very steady, despite the road being difficult to navigate due to the significant number of cars that park on both sides of the road. Many student drivers are also brought down this road to teach them how to execute parking manoeuvres. Most worryingly, there are many children in the area and there are no zebra or pelican crossings for them to use. Increasing the flow of traffic here to access Southwick Court or Elm Grove Farm will surely increase the possibility of accidents. Someone will get hurt.</p> <p>On a less severe note, the increased traffic on Frome Road and down Marston Road/Silver Street Lane will prove a nuisance to all residents on these streets - particularly those close to junctions. The increased number of vehicles will contribute to increased noise pollution, increased light pollution at night, and, likely, increased insurance premiums.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Beyond the danger and irritation that the increased traffic and poor access routes will entail, we must consider that adding nearly 500 additional homes into this area will strain local services. This area is served by Grove Primary School, Studley Green Primary School, and the Southwick Primary School.</p> <p>According to a recent article in the Wiltshire Times, Clare Medland, Wiltshire Council's head of school place commissioning, stated that "if hundreds of homes are built in Trowbridge and the surrounding areas, the area would desperately need one or even two new primary schools to cater for incoming pupils".</p> <p>I do not believe the three currently sufficient primary schools would be sufficient in the event that the proposal goes through. There will not be enough places for local children, and as young families grow, the crisis will become even more dire. Many couples on these estates are just starting out - as they mature, they will start to have children and will need local places for them. Should we be forced to take our children to other areas of town or to enroll them in private primary schools so that they have the opportunity to attain a good quality education?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	In this same vein, I do not believe that the doctor's surgeries or the Trowbridge Hospital are equipped to support a significant population influx. It can be difficult to find a practice accepting new patients, and once you are accepted, you face lengthy wait times to be seen due to the high number of registered patients needing care. Visiting the Trowbridge Hospital shows a similar problem: lengthy wait times by an understaffed, poorly equipped facility that cannot cope with any sort of serious injury.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I would also suggest that, based on previously enacted pay freezes for emergency responders like fire fighters and police officers, Wiltshire Council is unable to support increased demands on emergency services for a significantly higher population. Council tax has been raised year on year, and yet these critical services have been unable to grow or to increase compensation for their employees, and other previously enjoyed services, like green waste, have been forced to be removed from the standard services supported by our council tax. Clearly, there is still significant budget pressure - adding more demands to this already strained budget will not result in good outcomes for any of us dependent on these services.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Additionally, it is a well-known fact that the area referred to as Southwick Court is seriously prone to flooding, and does so with regularity (some local residents who have been in Trowbridge for decades told me that it happens annually). In fact, after reviewing the Environment Agency Surface Flood Maps, I understand that some areas of these fields are actually classed as Flood Zone 3, which have a high probability of flooding. Likelihood of flooding will be further increased when development is executed within the catchment area of the water courses. It is unfair to build new properties on a site that is known to have such issues and expect the new home owners to deal with them when they inevitably occur. We can avoid the heartache and expense for them by simply choosing to build elsewhere. This issue is not at all addressed in your Housing Site Allocations plan, as far as I can tell. This is a serious oversight</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>On a communal note, I would also like to raise my objection to the destruction of our shared green space. Hundreds of people enjoy the green space that forms the boundary between Trowbridge and North Bradley and Southwick every day. Children play there. Families take their dogs on walks. People spend time in nature decompressing. The entire community of Trowbridge and all of those in the surrounding villages benefit from the preservation of this green space.</p> <p>I moved to Westmead Crescent at a very difficult time in my life, and I have found the Boundary Walk area to be exceedingly calming and good for my mental health. I would be heartbroken to lose the wide open spaces that have brought me such peace, and I know I am not alone in this. Destroying this green space will also mean the destruction of many mature trees and hedges, and will result in significant loss of wild life. Many birds, voles, mice, badgers, and foxes, amongst other things, make their homes in these fields. Stealing their homes for the benefit of complying with a top-down forced housing proposal is wrong.</p>

Stealing their homes for the benefit of complying with a top-down forced housing proposal is wrong.</p> <p>Specifically, though, we must call attention to the habitat requirements of Bechstein's bats. The Housing Allocation Plan identifies that there are Bechstein's bats in the area, but it fails to highlight the fragility of the species. According to the Bat Conservation Trust, this breed of bat is one of the rarest in the UK - in fact, there are only 6 breeding populations in all of the country. All bats and their roosts are protected by the law.</p> <p>Disturbing this field, even with sympathetic intentions, could mean the total destruction of this incredibly rare breeding population and must be avoided</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>If further housing really must be built in Trowbridge, I question why existing brownfield sites, such as the derelict Bowyers site, have not been first in line for redevelopment.</p> <p>These brownfield areas are closer to public transport and closer to local amenities. Their development will not harm the local environment or wildlife nor the character of the surrounding area (in fact, they will significantly improve the visual appeal of the town), will improve safety by removing abandoned and potentially unstable structures, and because they are already in areas with safe access routes and slower moving traffic, will not substantially increase risk of vehicle accidents.</p> <p>It is in the interest of all residents of Trowbridge to see the brownfield sites redeveloped - developers should be properly incentivized to utilize this available space first before setting their sights on green spaces, and Wiltshire Council needs to enact and enforce planning guidelines that effectively police developer greed to protect all of its residents' interests.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The role of the Neighbourhood Plan and Draft plan should be set out and the latter should not fetter or prejudice future development that is required or beneficial to Marlborough. Please see attached statement.</p> <p>Please refer to attached statement including Marlborough Settlement Boundary Review Schedule</p> <p>The Draft Plan acknowledges that relationship of the Draft Plan and Core Strategy with the Neighbourhood Plans. The Draft Plan responds to the Core Strategy. This was adopted in January 2015 but was submitted to the Secretary of State for examination on 10 July 2012; the evidence base that supported that overarching spatial strategy is therefore some 5 years old if not older. Housing needs and local needs will therefore have changed and evolved in that period and the Site Allocations DPD (the Draft Plan), predicated as it is on meeting the needs identified in the adopted Core Strategy cannot address these more recent and up to date needs of the community. In the case of Marlborough, the MANP is intended to identify and provide a platform for such needs to be identified and addressed.</p> <p>It is important therefore that the Draft Plan does not fetter nor prejudice future development that is required or beneficial to Marlborough. This includes the release of land to meet local needs, be it for social and community uses and housing.</p> <p>The role of the Neighbourhood Plan and its relationship with the Draft Plan should be expressly set out. In addition, in seeking to review the settlement boundaries, these should not be drawn so tight so as to eliminate any flexibility nor prejudice or fetter the continued vitality and sustainability of Marlborough. Indeed, we would suggest that the Draft Plan should expressly require or confirm the expectation that Neighbourhood Plans should fulfil the role of identifying local needs over and above those identified in the Core Strategy and related DPD based upon up to date evidence.</p>

<b>Comment ID:</b> <a href="#">3290</a>	<b>Consultee</b> Mr Peter Bryan Marlborough College  <b>Person ID:</b> 1138628	<b>Agent</b> Mr Andy Pearce Barton Willmore LLP  <b>Person ID:</b> 1103789	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Chapter 6 Settlement Boundary Review		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	(Text references refer to attached representation) Chapter 1, paragraph 1.5: The draft plan seeks to identify further land to meet the housing requirement as per the adopted Core Strategy. No additional land is proposed for release in Marlborough. In addition, the draft plan seeks to review the boundaries to settlements. This review is not confined to accommodating additional sites to meet the unmet needs identified in the Core Strategy but it is an attempt by the Council (as per the Council's justification) to introduce a standard methodology to underpin the setting of settlement boundaries across the County. Chapter 1, paragraph 1.6, bullet point 2: Settlement Boundaries: The proposed amendment to the boundaries is not justified. The College disputes the criteria employed and the application of that methodology. The amendments have not been positively prepared and setting the boundaries as proposed would unduly restrict and impinge upon the future development needs of the College, without justification. Chapter 3, paragraphs 3.22-3.26: It is important therefore that the Draft Plan does not fetter nor prejudice future development that is required or beneficial to Marlborough. This includes the release of land to meet local needs, be it for social and community uses and housing. The role of the Neighbourhood Plan and its relationship with the Draft Plan should be expressly set out. In addition, in seeking to review the settlement boundaries, these should not be drawn so tight so as to eliminate any flexibility nor prejudice or fetter the continued vitality and sustainability of Marlborough. Indeed, we would suggest that the Draft Plan should expressly require or confirm the expectation that Neighbourhood Plans should fulfil the role of identifying local needs over and above those identified in the Core Strategy and related DPD based upon up to date evidence. Settlement boundaries should in part reflect the development needs of the community over the plan period and also provide a sensible and robust platform for the development of the community. As stated in the Paragraph 001 (Reference ID: 50-001-20160519) of the Planning Practice Guidance <sup>21</sup> all settlements can play a role in delivering sustainable development in rural areas. We can understand the Council's desire for consistency but at the same time, the Core Strategy is predicated upon the existing settlement boundaries and further, the Council acknowledges that neighbourhood plans will or can amend those boundaries which presumably would be on the basis of up to date evidence and site specific assessment. There therefore seems little need to impose an amendment at this time save for that required to accommodate specific sites to meet the needs identified in the Core Strategy. In addition to the generality of the approach, we are concerned as to the application of the methodology. The methodology set out in Topic Paper 1: Settlement Boundary Review Methodology (June 2017) <sup>22</sup> requires careful application. We are not convinced that the tests or methodology are the appropriate basis and certainly from the basis our site visit, do not justify the proposals in respect of the College's land holdings and other land. We would question whether the Council has undertaken a site visit in association of its review as no request for access to the College has been received.			
	Effective  Consistent with national policy			

Appendix Q - Schedule of representations

	<p>Chapter 5, paragraph 5.1, bullet point 2:            Settlement Boundaries: The proposed amendment to the boundaries is not justified. The College disputes the criteria employed and the application of that methodology. The amendments have not been positively prepared and setting the boundaries as proposed would unduly restrict and impinge upon the future development needs of the College, without justification.            The plan is not therefore sound.            See attached representation including the Marlborough Settlement Boundary Review Schedule.</p>

<b>Comment ID:</b> <a href="#">3291</a>	<b>Consultee</b> Mr Peter Bryan Marlborough College  <b>Person ID:</b> 1138628	<b>Agent</b> Mr Andy Pearce Barton Willmore LLP  <b>Person ID:</b> 1103789	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.7		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	(Text references refer to attached representation) Chapter 4, paragraphs 4.1-4.9: The College needs to continue to grow and develop as does Marlborough as a town. For the College, the requires the continued replacement and provision of new facilities, educational, pastoral and sporting. The College aims to attract and retain the best staff and wishes for staff and pupils alike to play active role and contribute positively to the local community. Much of the College's landholdings lie outside of the settlement boundary although a significant area falls within the settlement. These areas within the existing settlement boundary are in use by the College, the use is urban and further, the land is essential to providing for the future development needs of the College. Removing such land now from the settlement, will harm the potential of the Collage to accommodate future needs. The draft plan proposes to amend the settlement boundary in relation to the College's land holdings. In some areas, the Council appears to seek to relocate the boundary from one side of a road to another, with the road itself forming the defined boundary to the settlement. This is an unnecessarily pedantic approach. However, in other instances, Council is proposing to remove land that is in active use by the College and forms part of what would logically be defined or appreciated as the College's main campus. Schedule 1 attached at Appendix 2 together with Plan 1 identifies the land holdings in question and identifies the basis of the College's objection. The principle area of concern relates to Parcel 2 as per Plan 1 and Schedule 1. The proposed amendment relates in practical terms to three core areas: The headmaster's garden and allotments; Sports pitches to the south between the Languages Centre and Millmead; The main carpark and sports pitch to the north. All three areas are urban in character and are physically and functionally related to the College. All three areas benefit from an existing and robust boundary either to the Kennet or a dense tree boundary. The Kennet forms a robust boundary and the vegetation associated with the river corridor encloses the headmaster's garden and allotments from the south, whilst to the east the grounds are enclosed by the boundary wall to the A345. The main car park is laid out with hard standing and to the north, between the car park and the A4 lie playing fields. The Boundary to the A4 is formed by railings atop a dwarf wall, with brick piers. As stated, the tree belt on the western boundary forms a strong means of enclosure. In addition to the College's land holdings, the College also wishes to object to the proposal removal of land at College Fields (Parcel 4). The land in question is the subject of a current claim to designate as a Village Green. This is resisted by the Council and the College. The land is laid out as open space as was transferred to Kennet District Council pursuant to a s52 agreement that accompanied the development of the College Fields site in the 1980s for residential purposes. The purpose of the land and hence justification for the transfer was to provide open space to meet the needs of the residential development. It is therefore to all intents ancillary to the residential development. It is bounded to the west and			
	Effective  Consistent with national policy			

Appendix Q - Schedule of representations

	<p>east by residential development and the main estate road to the south. The northern boundary is formed by a hedge and tree belt that divides the site from the open countryside. See attached representation of comments on the settlement boundary review for Marlborough.</p> <p>Chapter 5, paragraph 5.1, bullet point 2:</p> <p>Settlement Boundaries: The proposed amendment to the boundaries is not justified. The College disputes the criteria employed and the application of that methodology. The amendments have not been positively prepared and setting the boundaries as proposed would unduly restrict and impinge upon the future development needs of the College, without justification.</p> <p>The plan is not therefore sound.</p> <p>The amendments to the settlement boundary are not justified. See detailed comments and suggested changes to the settlement boundary in schedule 1 of the attached response. See detail in attached representation including the Marlborough Settlement Boundary Review Schedule.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.14			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>My name is Sophie Norcott and I am xx years old. I live at xx xx xx, Bratton and I am writing to you to raise a complaint about the proposed building of houses in the field behind my house.</p> <p>Too many houses! It's not a big field and 40 houses seems a lot to cram in to the space. They will have tiny gardens and not enough parking. The school is already too small and roads near the field are very dangerous to cross.</p> <p>Sunlight / being over looked: A few years ago, the family that lived at 10 Rosenheim Rise did the accurate calculations that the houses would get no direct sunlight if new houses were built behind them. This would mean our garden in the summer would be darker and colder, we wouldn't be able to enjoy our garden as much as we do now. If houses are built on the field behind my house we will be over looked because they will be so much higher than us, meaning they will be able to see directly into my sister's bedroom, invading her privacy.</p> <p>Sleep: It will be harder to sleep because of the noise of the new residents who will have cars pulling up around the clock. My sister who has Down syndrome sleeps at the back of the house where you can hear every sound from that field/road. She finds it very difficult to get to sleep and stay asleep she goes to bed at 7:00pm when lots of the cars may pull in.</p> <p>I hope you take your time to read this and understand that this proposed development will not benefit the village it will just spoil the lovely place I live in. Please look carefully and change you minds about this.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We would like to make comment on the consultation document regarding proposed allocation of housing site 102B.Harnham. On reading the Landscape Assessment section of the report. My Husband and I were convinced that all it contained with regard to the sensitivity would protect this site only to read further on in the report the suggestion that these sensitive issues could be mitigated by careful planning. We would like to disagree strongly with that suggestion. Once these historic sites like Harnham Hill and the views towards the Cathedral are gone they are gone forever.</p> <p>We live on Ayleswade Road SP28DR beside Swan Close and very near Harnham Road.This proposal would add considerably to the traffic and therefore increase the noise level and air pollution that we already suffer from.</p> <p>The sheer scale of the proposed development we feel could constitute overdevelopment and put great pressure on the surrounding area. Salisbury and the surrounding area are very special and is unique in the country. We need to keep it special for the thousands of visitors and local residents alike.</p> <p>Hopefully more appropriate sites can be found for much needed housing rather than using a sensitive site made up of good agricultural land.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Where are the new schools, doctors, dentists, and new or enlarged Hospital, the present one is already only barely coping. There have been no plans put forward for improvement to any of the above and nothing at all about improvements to the roads or even the repair of the existing ones.</p> <p>This housing expansion needs to be stopped, before it kills Salisbury stone dead, there is no one in the world with any knowledge of planning, who when looking at a housing expansion does not first put in place the required infrastructure, without this in place any expansion plan is going to fail in the long run. Members of the planning office would not need to look too hard to find many places where this has happened, and indeed to find many places where expansions are taking place where this priority has been dealt with first.</p> <p>It is time to wake up and notice what is happening and maybe look at who is making all the financial gain without putting anything of substance back!</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There was once a well considered planning rule that gave great consideration to maintaining the green belt, this was not some ill thought out way of stopping people building houses but a control measure to make planners stop and consider what they were allowing to happen, so that some common sense might prevail.</p> <p>The government may have one idea but they do not live here and they do not know the area, and no matter what they say the county planners should do what is best for our area every time. At the present time in Salisbury that is not to build more houses and someone at county hall should be bold enough to tell the government that we have had enough.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	We wish to register our strong concern about the proposed housing developments in Harnham - we live on the Netherhampton Road and are fully aware of the amount of traffic that has increased in the 43 years that we have lived here. The amount of houses being proposed would bring this road to a complete standstill in the rush hours and peak holiday times, causing even more problems for the Harnham Gyratory and particularly for the residents living on this road. There is very little employment in Harnham itself so new occupants are likely to be using their cars for work as public transport has been reduced greatly and with increased costs over the years.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	We write to object to the allocation of a further 40 houses on the Ridgeway site. There is no justification for this significant number of houses in the village they are not required in a local plan that seeks to provide an oversupply of houses. The village services especially the management of surface water and sewerage are already beyond capacity with no planned upgrade in the period this plan covers. We are not against expansion of the village but tetbury lane does not have a complete footpath to the village hall and children have been injured by cars in the past. It is therefore more likely with increased traffic this will happen again. Also it seems that this development is on farmland away from the centre of the village and whereas the original Ridgeway development had a planning gain to remove unnecessary and ugly buildings and was therefore justifiable this latest proposal has no such benefit. This development if allowed will threaten every acre of farmland in the village by the precedent it sets. Wcc will not be able to defend this threat

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">3307</a>	<b>Consultee</b> Ms Linda Roberts Interim clerk	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Broad Town Parish Council		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		North and West HMA			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Broad Town Parish Council welcome the opportunity to input to the Wiltshire Housing Site Allocations Consultation. Our main concern is to ensure that small rural communities, such as ours, remain properly protected by the Wiltshire Core Strategy which we endorse.</p> <p>Broad Town is a close knit, supportive and vibrant community. We are proud of our rural setting with its contingent “lack” of amenities. Indeed, this is what gives our community its character and what binds us together. As a newly elected Council (May 2017 Elections) we have been impressed but not surprised by the energy from the people in the parish to make the most of our rural features – we will be creating community working groups to restore and maintain our footpaths and our White Horse. These are things that the community feels passionately about. The people of the parish are also stoutly committed to “no street lights” which again is seen as an intrinsic part of our way of life. This is evidenced in the 2009 Parish Survey where the clear majority of the parish residents were in favour of no development in the village.</p> <p>However, we also need to actively address the challenges of living near to bigger conurbations, such as excessive speeding through the village. With bigger conurbations on our doorstep we are conscious of the threat of urban creep and how this could be used as rationale to permit development on the edges of the village. But, our community is precious and we believe rural communities like ours are in danger of becoming an increasingly rare part of our County’s cultural heritage.</p> <p>To ensure proper consideration of this small rural parish in the future Housing Strategy, we would like to request that Broad Town is reclassified as a rural settlement. We have reviewed the criteria for classification carefully and believe that with due consideration Broad Town would be classed as a “not identified settlement” (no development). The information in appendix 1 shows the detailed analysis that we have undertaken on this, which we feel is irrefutable.</p> <p>We would also like to formally note that there are two future “deliverable areas” located in Broad Town Parish which are documented in the Consultation. We would like to state that both of these areas would be against the Core Strategy and would be opposed by the Parish Council. See attached for Appendix 1</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Delivery Strategy																																												
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Housing Strategy</p> <p>Whilst we understand the Council's focus for this consultation period is on specific policies within the draft SAP, we consider there to be a wider issue in hand with the Council's planning strategy moving forwards that needs to be addressed relating to soundness and consistency with the NPPF (paragraph 182). Given the circumstances set out below, we consider that the only way the Council can deliver a sound Development Plan is by undertaking a more holistic review of the housing requirement and growth strategy now. Unless addressed now, the Council's planning strategy has the following deficiencies:</p> <p>The Council is unable to demonstrate a deliverable supply of sites for years 6-10, required by the NPPF (paragraph 47), as the Core Strategy (CS) (adopted in January 2015) did not provide for the preferable 15 year horizon advised by the NPPF (paragraph 157). There has been no "Early CS Review" as committed during the CS Examination. As such, by the time the SAP is adopted in Q4 2018 (at the earliest), there will be less than 8 years of the plan period remaining (up until 2026).</p> <p>The Council's evidence base suggests that Wiltshire will not be able to demonstrate a five year housing land supply in each of the three Housing Market Areas (HMAs) for year 8 (2025/26) (at best) meaning a more holistic planning review assessing the housing requirement would be appropriate now (see table 3.4 below).</p> <p>As a minimum, the Council should be allocating significantly more dwellings to ensure that there is a sufficient, robust rolling five year supply until the end of the plan period.</p> <p>Topic Paper 3 (Housing Land Supply), published in June 2017 as part of the Council's evidence base to support the SAP, suggests that when applying the most up to date completions data, the current planning strategy leaves the Council without a demonstrable five year supply in each of the three HMAs. Particularly in the South HMA where there is only a marginal five year supply. This does not account for any under or non-delivery.</p> <p>Table 3.4 of Topic Paper 3 – Housing Land Supply (2017-2026)</p> <table border="1" data-bbox="450 1241 1883 1369"> <thead> <tr> <th>HMA</th> <th>17/18</th> <th>18/19</th> <th>19/20</th> <th>20/21</th> <th>21/22</th> <th>22/23</th> <th>23/24</th> <th>24/25</th> <th>25/26</th> </tr> </thead> <tbody> <tr> <td>East</td> <td>8.47</td> <td>8.18</td> <td>8.32</td> <td>10.11</td> <td>13.64</td> <td>10.79</td> <td>8.21</td> <td>6.29</td> <td>4.94</td> </tr> <tr> <td>N &amp; W</td> <td>6.62</td> <td>6.80</td> <td>6.81</td> <td>6.55</td> <td>6.48</td> <td>6.11</td> <td>5.42</td> <td>4.60</td> <td>3.82</td> </tr> <tr> <td>South</td> <td>5.64</td> <td>5.57</td> <td>5.42</td> <td>5.35</td> <td>5.28</td> <td>5.13</td> <td>4.59</td> <td>3.83</td> <td>2.97</td> </tr> </tbody> </table> <p>This is more concerning in light of recent Government announcements (DCLG Planning for the right homes in the right places: consultation proposals, 12 September 2017) suggesting that the Objectively Assessed Need (OAN) for Wiltshire will be uplifted significantly (1,270 dwellings more than the CS and SAP accounts for over the period 2016-2026) and applied to plans that have not been submitted for Examination by the</p>					HMA	17/18	18/19	19/20	20/21	21/22	22/23	23/24	24/25	25/26	East	8.47	8.18	8.32	10.11	13.64	10.79	8.21	6.29	4.94	N & W	6.62	6.80	6.81	6.55	6.48	6.11	5.42	4.60	3.82	South	5.64	5.57	5.42	5.35	5.28	5.13	4.59	3.83	2.97

#### Appendix Q - Schedule of representations

31st March 2018. At present, the Council anticipates the SAP being submitted for Examination beyond this date. In our view this suggests the Council should be addressing this additional need as part of this process here and now.

This can only be done properly through a more substantial Local Plan Review. We understand from the Council's draft Local Development Scheme (LDS) currently under review that the strategy is to progress with a Joint Spatial Framework in partnership with Swindon Borough Council over the timeframe Q3 2017 – Q3 2019 and a subsequent Wiltshire Local Plan Review over the period Q3 2019 – Q1 2021.

We support this process. However in light of the above, we consider the Council should be progressing with this wider Local Plan review now rather than seeking a temporary fix through the SAP which cannot provide a sufficient planning strategy for the required 6-10 year period, contrary to the NPPF.

Lyneham: Policy Status

It is noted that the Wiltshire Core Strategy (WCS) identifies Lyneham as a 'Large Village' where only small scale housing to meet local needs is considered appropriate.

Lyneham has a good range of facilities including convenience food stores and a primary school, excellent existing public transport links to the wider region, and notably the highest "self-containment index" in the CA, in part owing to the MOD which remains a major regional employer. It should be noted in this context that during the CS Examination, Topic Paper 3 recognised that Lyneham had the potential to be a higher order settlement and was only overlooked due to its close proximity to other higher order settlements.

We consider Lyneham's location in close proximity to higher order settlements such as Royal Wootton Bassett, Chippenham and Calne to be advantageous given its good public transport links to a wider range of services (including secondary schools) and employment opportunities. Lyneham represents an appropriate location in which to direct proportionate further growth. It is a large village located less than 3 miles south-west of Royal Wootton Bassett, around 6 miles north-east of Chippenham and less than 4 miles north of Calne.

We will continue to seek the designation of Lyneham as a Service Centre through a Review of the WCS or a more comprehensive and wide ranging Site Allocations document.

Site Selection Criteria and Affordable Housing

The SAP is unsound in its approach to selecting settlements for allocations in that it fails to give any weight to affordable housing need, contrary to the NPPF.

The Evidence Base for the SAP and the Plan itself do not consider the scale of affordable housing need in the CAs or how this could be addressed through the Site Allocations. Instead the approach is simply based on the quantum of housing delivered or committed in each area. If a CA is already at or over provided for than that appears to be the end of the SAP process.

This is a blunt approach which fails to properly examine the characteristics of the supply in each area. Critically there is no consideration of the scale of affordable housing need and how, as required by the WCS and NPPF, this can be addressed.

The SAP does not propose to allocate sites at Lyneham due to the wider Royal Wootton Bassett and Cricklade CA having already exceeded its housing requirement of 385 dwellings set by the WCS. However it should be stressed that the WCS sets minimum housing requirements.

Where there is a strong market for growth such as the Royal Wootton Bassett and Cricklade CA, the Council should be seeking to positively plan to boost housing supply in these areas, particularly when there is a demonstrable need for affordable housing in the CA, understood to be at circa 188 households (Appeal Decision APP/Y3940/W/16/3162581, paragraph 107) in this case. Further development at Lyneham can go some way to addressing this immediate affordable housing need.

A closer examination of the current and predicted supply of sites in Lyneham shows that only a handful of additional houses are proposed expected to be delivered on very small sites, the majority of which will deliver no affordable homes.

The affects of a lack of supply of both market and affordable homes are well documented. In rural areas in particular where there is strong market demand this will lead to higher house prices further exacerbating the affordability gap that already exists.

Further, over a relatively short time frame the age profile of the population of villages in particular can change significantly, with the average age rising. The effect of this has again been highlighted in National studies: falling village school rolls; village school and other facilities closing and public transport services diminishing as demand for services reduces. Such outcomes are contrary to the advice for Policy makers in the NPPF.

The WCS and National Policy make reference to the affordable homes being delivered on exceptions sites in rural areas. In those Authority areas where there is monitoring of the delivery of such sites, long term evidence suggests that there is very little prospect of landowners 'giving away' land for effectively zero value for exceptions affordable housing.

Appendix Q - Schedule of representations

	The most effective way of delivering affordable homes in rural areas is by targeting housing allocations to settlements which have a good range of services and facilities and, where Developers can deliver affordable homes as part of a mixed housing scheme.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Cramming 40 houses on to a small site is not going to make it a pleasant place to live for the new residents – no doubt their gardens (necessary for wellbeing and wildlife) will be tiny. Building 40 new homes is too many for our village (not proportionate) of Bratton. Build 20 new homes (1/2) A variety of new homes gives people the opportunity to join the Bratton community. Less dense building will give the new residents space to breathe. It will keep the existing residents happy!

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Southwick Court lies outside the boundary of the town of Trowbridge. The outer limit of the town at this point is along the hedgerow and water course known as Lambrok Stream which runs beside the properties and public footpath on Boundary Walk (hence the name). Including Southwick Court fields in the housing allocation land would require redrawing the town boundary and removing the green buffer between the villages of North Bradley & Southwick and the town of Trowbridge. Incorporating these villages into the town would remove their separate identity and community structure.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The fields at Southwick Court are bounded by ancient hedgerows which form part of an historic parish boundary. There are maps dated 1890 (OS revision) and 1793 (Anderson & Drury) which show these ancient hedgerow boundaries. These hedgerows would be classed as "important" under the terms of the 1997 Hedgerow Act as they meet the relevant criteria set out in the Act, ie the hedge must have a variety of broad leafed plants and trees, must run alongside a bridleway or footpath, and must be associated with a pre-1600 building associated with land management (Southwick Court is Grade 2 listed and was built in the 1500s).

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The proposed site at Southwick Court is subject to serious flooding. I understand that the inspection pits and test drillings recently carried out on this site show that the water table in these fields is less than one metre below the surface. It is also on a "clay belt" which makes surface drainage problematic. Having lived in this area for more than 40 years, I know that these fields flood on a regular basis after heavy rains, sometimes to a considerable depth. There has also been an issue with sewage waste from the drains crossing the fields in the local area where waste matter has backed up into gardens at the lower end of Sandringham Road.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The HSAP does not appear to have taken into consideration how a housing development on this site would be accessed. Any plans to access Southwick Court fields via one or more of the residential roads adjoining this site, ie Sandringham Road, Balmoral Road, Spring Meadows or Marston Road would have a severe environmental impact. These roads are not suited to the high volumes of vehicle movements that such a development would generate as, in the case of Sandringham Rd, Balmoral Road and Spring Meadows, these are narrow cul-de-sacs.</p> <p>Creating access roads through the “important” protected hedgerows would contravene the Hedgerows Act (see Point 2) and have a detrimental ecological effect by destroying the habitats of birds, bats and other wildlife that nest and feed in them.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Entrance and egress at Southwick Court fields using the very busy A361 Frome Road would be dangerous because of impaired visibility. A similar argument would apply to the A363 North Bradley/Westbury Road. In addition, both the A361 and A363 are very heavily used by traffic entering and leaving the town, especially in the mornings, at the beginning and end of the school day (there are 3 senior schools, Trowbridge College, and 5 junior schools in the immediate area) and in the early evening. There are also considerable traffic movements on Bradley Road at other times of the day with vehicles going to and coming from the two Retail Parks situated there and the White Horse Business Park.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Although Trowbridge is the County Town of Wiltshire, there has been a lack of infrastructure investment over many years, so it has limited industrial, business and commercial employment opportunities. A once vibrant shopping centre now has many empty retail premises and even the covered areas of Castle Place and the Shires have many unused shops. Building several thousand new homes in Trowbridge will simply make it a dormitory town for people working in places such as Bath, Bristol, Swindon and Chippenham, with the resultant negative environmental impact caused by substantial increases in traffic flow on the already narrow and congested roads in and around the town.

Comment ID:	<a href="#">3322</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mrs Susan Holt	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Housing Delivery Strategy			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>New regulations were proposed in April 2017 to encourage local authorities to speed up the development of derelict and under used land for new houses by creating Brownfield Registers. On 3rd April 2017 the government website quoted the Rt Hon Gavin Barwell, who was then the Housing and Planning Minister, as follows "The regulations implementing brownfield registers and permission in principle through brownfield registers have been laid in Parliament as part of secondary legislation relating to the Housing and Planning Act. They will come into force 21 days after being laid".</p> <p>Wiltshire Council does not appear willing to take these requirements into consideration for the HSAP. Their response to questions submitted to Wiltshire Council's Strategic Planning Committee by Cllr Ernie Clark, prior to their meeting on 13th September 2017, about the progress of the Town &amp; Country Planning (Brownfield Land Register) Regulations 2017 and asking which sites are anticipated to be listed under Part 2 of the Register has brought the following response: "The Government did not release the data standards that they require Councils to use in the compilation of the Registers and the Planning Practice Guidance on its preparation until July 28th 2017". Wiltshire Council's response includes the statement that training would take place during August so that the Register can be compiled by the end of the year. It also states that "it is not envisaged that any (brownfield) sites will be listed in Part 2 of the Register in the first publication". Therefore because no sites are envisaged for listing "the publication of the Brownfield Register will not require any changes to the draft Wiltshire Sites Housing Allocation Plan (sic)".</p> <p>Please note: I have passed on the questions raised by Cllr Ernie Clark, and Wiltshire Council's response, to the Rt Hon Alok Sharma, MP who has taken over from Gavin Barwell as the Government's Housing &amp; Planning Minister. I have requested clarification of the implementation of the Housing &amp; Planning Act with specific reference to the Brownfield site register.</p>

		Person ID: 1138930	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>In Trowbridge there are a number of Brownfield and Windfall sites which are all within the existing town boundary and could potentially yield building land for more than the number of houses proposed for three extremely controversial green field sites in the draft HSAP. These three green field sites are: Southwick Court fields (HSAP reference 3565), Land at the "Hilperton Gap" (HSAP reference 263/297); and the buffer land between the village of North Bradley and town of Trowbridge (HSAP reference 298).</p> <p>Brownfield/windfall sites which could - and should - be considered are the Bowyers factory, the West Wilts District Council offices at Bradley Road, the East Wing at County Hall, the Ashton Street Centre, the Virgin Media Pavilions on the White Horse Park, and Margaret Stancomb school/the area around Trowbridge Hospital. Most have been standing unused and/or derelict for many years, and are either Wiltshire Council owned or have been purchased by developers who have made no attempt to build on them, even though some sites already have at least outline planning approval. Less than half of the indicative requirement for housing in Trowbridge for the period 2006-2026 has been built to date which would seem to indicate a lack of interest in fulfilling this requirement on the part of developers [6,810 dwellings proposed, 2,625 built].</p> <p>I would urge you to consider these issues when the draft HSAP is placed before the relevant committees and cabinet so that the three green field sites identified in section d) above are removed from the Plan and available brownfield sites within the town of Trowbridge are utilised. Removing the eyesores of derelict buildings and also areas which are cleared, but surrounded by high wooden fencing such as the Bowyers and West Wilts District Council office sites, would bring a dramatic improvement to the visual appearance of the town and maybe encourage outside investors to consider it for future business development purposes.</p>

Comment ID:	<a href="#">3324</a>	<b>Consultee</b> Miss Sue Wright  <b>Person ID:</b> 393855	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>(1) I consider the WHSAP is not positively prepared in relation to the sites listed above because the lack of a proper Salisbury Transport Strategy or any Wiltshire Green Infrastructure Strategy means that development and infrastructure requirements cannot be objectively assessed and it cannot be considered as being consistent with sustainable development. Wiltshire Council should have brought forward a proper full Salisbury Transport Strategy and Green Infrastructure Strategy first and then proceeded to a Housing Site Allocation Plan.</p> <p>(2) In the absence of a proper Salisbury Transport Strategy or a Wiltshire Green Infrastructure Strategy, it is not possible to tell whether the plan in relation to these sites can be justified or not. It may be that there are alternatives that would better meet the strategic objectives of the transport strategy and green infrastructure strategy that should but do not exist. The air quality impacts, both the individual and combined effects, of the three site allocations to the south of Salisbury do not appear to have been taken into consideration at all. In the absence of a proper transport strategy and green infrastructure strategy, and considering the likely adverse impacts on air quality and the health of the local population, a reasonable alternative would be to allocate sites only for the indicative residual requirement of 173 dwellings at Salisbury and Wilton and to wait until there is a proper strategy for transport, green infrastructure and air quality before allocating sites in excess of this figure.</p> <p>(3) The actual housing numbers may or may not be deliverable over the period but it cannot as it stands deliver sustainable housing development because of the likely transport and air quality impacts.</p> <p>(4) It is not consistent with national policy because, in the absence of a proper transport strategy and green infrastructure strategy for the Salisbury area, it is almost certain to adversely affect air quality in the city. Wiltshire Council needs to identify first how it can achieve and sustain improvements in air quality in its Air Quality Management Area in order to comply with EU limits and national guidance before bringing forward additional housing sites for consideration. Withdraw these sites from the plan.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3325</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1138955	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4 Church Lane			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We live at 2 Church Lane, Upper Studley BA14 OEH. Along with our neighbours at St John's Church and 344 Frome Rd and Rose Cottage, Frome Rd, our property is grade 2 listed. According to the listing guidelines and development pertaining to such properties, any development has to fit certain criteria. This is not simply the structure of the listed building but location, context and surrounding. Any development that is obviously visible from the said listed buildings is detrimental to the buildings themselves which have been listed intrinsically with the location.</p> <p>Our address is 2 Church Lane. It is not Off the M 4 next to a housing estate. The setting is the lane, the church, and the extent thereof being the parish boundary. Any development affecting this setting is contrary to policy: local government, town and national planning. Section 66 of the Listed Buildings Act states that in planning the Council must pay particular regard to protecting the setting of listed buildings. Whilst we appreciate planning and development are necessary, it is fairly obvious that the council gets it wrong sometimes. As an example whoever gave planning for the "lead bunkers" to be stuck on the side of St John's Church in 1980 obviously was either mad or had no idea of what a Victorian gothic church was or is.</p> <p>So, in conclusion, to avoid incorrect planning decisions, any development in the fields (marked X and Y on the Historic England page included) along Church Lane would be inappropriate from a town development point of view (the buffer zone between villages being taken up, the apparent attempt to change parish boundaries ie. Church Lane, the destruction of a setting that has been unchanged since the church and associated buildings were erected in the mid 19th century). There is no justification in planning law to ignore the legal standing of a listed building when it has been listed for very specific reasons.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">3327</a>	<b>Consultee</b> A Shodly  <b>Person ID:</b> 1138939	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Warminster		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the changes to the settlement boundaries for East of Dene and Boreham/Spurt Mead are not required and are illogical. In the case of the East of the Dene site this will allow developers the opportunity to further speculatively develop beyond the proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified- The draft plan for Warminster is not an appropriate strategy, when compared with other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire Council forces developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent- The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for spring 2018.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Housing on this site would not only contradict Government policy of building on Brownfield Sites in preference to Greenfield, but would cause massive problems in its creation and existence for current residents. Please can our pleas be taken seriously. There are plenty of other more suitable sites in the Trowbridge area, ie. Bowyers site which has been derelict for many years; the ex Virgin offices and car park, the old West Wiltshire District Council offices, to name but a few.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Given that much of the building would take place in an area of notified flooding and standing surface water, the existing residents would have their property seriously threatened by an increased risk of flooding. I personally have witnessed flooding in the field adjacent to Westmead Crescent every year, once flooded, tends to last for many months.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Harnham (both east and west) is already highly congested both morning and evening. The roundabout where A338 and A354 bring traffic into Salisbury is blocked already at rush hour times and 640 more dwellings would produce gridlock for all concerned. The phrase '@refresh the transport strategy' is meaningless if not spelt out as to what this would entail. Specific proposals for improving the transport network must be submitted for consideration and public consultation before any final site allocations plan can be approved.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	To add weight to the mass of opinion in Harnham that this development is unacceptable because of its size and the transport system in Salisbury.

In recent years the Park Wall junction was looked at and it was agreed that no change could be made to the existing layout in that all traffic must turn left and go around the roundabout at Wilton to proceed to Salisbury. This section of road is busy and frequently congested therefore any additional traffic will exacerbate the problem.</p> <p>There is already a serious problem of traffic using Quidhampton as a rat run to access Salisbury, to avoid using the Park Wall traffic lights and the congested A36, causing congestion and a risk to pedestrians due to the lack of pavement in half the village. Any development in Netherhampton must address this serious traffic issue for the parish of Quidhampton.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I wish to respond to the above draft plan, with specific reference to paragraphs 5.77-5.84, the "Southwick Court" proposed development, Ref H2.6. The main grounds for my objections are: The plan is not sound or effective. Most of the land included in this plan at Southwick Court is used extensively by the community for recreational purposes and legally the people should have the right to protect it. Local residents use this land on a daily basis to enjoy lawful sports and pastimes including dog walking, flying model aircraft, picnics, ball games and others. Thus, this area is qualifies as village green status and should be protected as such by Wiltshire Council. These lovely green fields act as a buffer zone from Southwick and have three public footpaths running across it.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		No vehicular access has been identified and if Frome Road is prevented by The Heritage Impact Assessment no other access is practical. One of the options with access from Silver St Lane is totally impractical. This road is a residential cul de sac that was never intended to accommodate further traffic. Silver St Lane itself has already been turned into a rat run as all traffic comes through to avoid speed humps on College Road. Hazel Grove residents have insisted that all of the Road will be restricted parking so parents are now using Silver St Lane and Balmoral Rd to park and drop off school children to Grove School. This is already causing problems traffic problems/ safety issues in this area and can not cope with anymore traffic at this junction. Traffic through any of the access options will destroy the peace and tranquility of the existing houses beyond measure.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Trowbridge acts as a base for people working in Bath, Bristol and Swindon who want cheaper accommodation. the County Council has successfully developed brownfield sites in Bradford on Avon and the Ushers site in Trowbridge for housing. Several brown fields sites are suitable for future development such as the former Bowyers site and land off Bythesea Rd.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H1.4 East of Lavington School			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	It seems to me that Market Lavington has already far exceeded the boundaries which it should naturally have kept to. A mistake was made as early as the 1930s (I think) when development was allowed along The Spring towards West Lavington, so that there is now almost no division between the two villages (and Littleton Pannell). Your proposals will compound this awful mistake. The idea of buiding on land to the east of Lavington School, with access via the school drive, is absolutely preposterous. I have never visited this bit of land, but it looks, from the top of The Plain, as though it has a number of fine, mature trees, so this would make the proposal doubly repugnant.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I live in Seend, and in particular, Seend House, High Street, Seend, Wilts SN12 6NR.</p> <p>I have reviewed the Seend settlement boundary map and I am surprised at how the boundary crosses my property. Historically a lot of the houses on the south of the ridge were outside the settlement boundary and under the recent review the boundary has been dropped south to include all the houses but not necessarily all the gardens, which in concept I can understand and do not have a strong view on. However, when it comes to my property although the house is included (and gardens to the south are excluded as with other houses) it seems odd that most of my garden to the north has been excluded, with what looks like a weird looping arrangement over my property, which seems at odds with how other houses have been treated.</p> <p>Can I ask you to review this looping boundary? I would have thought a more logical fit, consistent with how the other properties in the village have been treated, would be to continue the southern boundary west to join my neighbour, rather than an odd loop.</p> <p>I have no strong view whether you should or would want to exclude, or include my property. However, it looks like to be consistent with other properties, the boundary should continue along the southern edge of my house.</p> <p>Ideally could I ask someone to review the map and see if what I am saying makes sense and if so to change it to be more consistent with what looks like the same criteria as other properties?</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.12		Justified	Effective
		Ref: Wiltshire Housing Sites Allocation Plan I am writing to raise my concerns in relation to the above public consultation event. I would like to object to the allocation of housing site 482 adjacent to Farrells Field, Yatton Keynell, which is proposed for 30 houses. I consider the proposal unsustainable & will have a negative impact on the future of the village. I have the following concerns about how the selection process of the site has evolved. I believe the plan is unsound & not consistent with national Planning Policy for the following reasons. 1) No evidence of housing need in Yatton Keynell. (See para 158 of NPPF) Appendix E of the Chippenham Community Area topic paper confirms no local housing needs survey was undertaken as part of the plan. The proposed dwellings should be justified with evidence of a specific local need. 2) Lack of a Neighbourhood Plan (Para 159 of NPPF) At a Parish Council Meeting in 2014 there was a call for a Neighbourhood Plan so residents can engage in how many & where future housing may take place. 3) Site selection process unsound. (Para 159 of NPPF) Sutton Benger has an identified need & no housing has been allocated. Yatton Keynell has no identified need yet 30 houses have been allocated. 4) Infrastructure issues Drainage is considered to be a fundamental constraint on the land adjacent to Farrells Field. It is acknowledged in the Council's Sustainability appraisal that the moderate adverse effects related to limited drainage supply capacity in local distribution mains, & that there is a potential need to serve the site by pumped connection for foul water, & the site falls within a groundwater vulnerability area. 5) Poor Consultation (Para 155 of NPPF) None of the Parish Council's from 5 villages in the Chippenham Community Area responded to Wiltshire Council's consultation on the Site Allocations Plan & Settlement Boundary review. This raises the question about the quality of the consultation that has taken place in order to create the plan, & whether the Council has met the necessary requirements set out in its Statement of Community Involvement. 6) Proposal will have significant impact on the character of the area. A large scale development of 30 houses at the entrance to the village is not sustainable, & will have a negative impact on the character of the village. In light of the above, I urge Wiltshire Council to withdraw the allocation of land at Farrells Field and work together with the Parish Council to produce a Neighbourhood Plan for Yatton Keynell which will explore whether there is a specific housing need in the village. A Neighbourhood Plan will also enable the villagers to have more say in where future housing could go rather than one site being allocated at County level. Withdraw the land East of Farrells Field to allow a Neighbourhood Plan to be prepared, giving local residents opportunity to explore other site options in line with NPPF.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write with regard to the Wiltshire Housing Site Allocations draft plan and specifically the Land to the East of Farrells Field (Site 482). I am a resident of Farrells Field and we put our house on the market in July with the intention of moving to Bath. We have had 8 viewings since then. Three indicated that they really liked the house and garden, but did not proceed, giving the reason that they could not commit to purchase here with the uncertainty regarding future development on the land east of Farrells Field. Two other prospective viewers pulled out of viewing for the same reason. In particular prospective buyers have mentioned worries about proposed vehicular access via Farrell's Field. I wondered where prospective buyers were sourcing their information regarding access, as I understood that no firm decisions had been made regarding a preferred route because on page 81 of the Wiltshire Housing Site Allocations Plan Community Area Topic Paper –Chippenham Community Area published in June for the consultation, it states:</p> <p>“Direct vehicular access to this site is considered to be achievable either from the B4039 or through Farrells Field which has a footway. “</p> <p>Yet, when I looked at the Chippenham Community Area Remainder section of the Wiltshire Housing Site Allocations Plan on the council website, I note that under H2.12 East of Farrells Field, the wording pertaining to access is:</p> <p>“Access would be taken from Farrells Field and the possibility to link to adjacent footpaths should be explored”</p> <p>Please can the council explain the process that it has used to move from a position of noting two possible access routes to stating only one and why this wasn't made clear in the consultation document?</p> <p>Surely this should be decided through the eventual planning process in the event that the site is approved.</p> <p>I note too that responses to the consultation are now available for viewing on the council website and was concerned to see the response from Persimmon Homes (owner of the land proposed for development) which includes the statement:</p> <p>“The intention is to access the site from the existing development at Farrells Field” and includes a diagram to further emphasise this.</p> <p>Please can the council indicate why Persimmon appears to have been made aware of this new intention to access only via Farrells Field, yet the residents and those living locally have not.</p> <p>The Parish Council in its response to the consultation has also stated that it would not support direct access through Farrells Field, yet it too does not seem to have been made aware that this is now the intention.</p> <p>I spoke to somebody in the Spatial Planning office last Friday and was told that we are unlikely to have any clarity about the final agreed sites for development until Winter 2018. And so it will be beyond then when any plans are available for consideration or comment. For those trying to sell a home now this offers little comfort and is likely to result in the need to either sell well below market value or stay put. If access is confirmed via Farrells Field this will result in the developer gaining through lower access costs at the expense of the individuals who already live here.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Figure	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:	
Please identify the policy, paragraph, table, figure or site to which you are referring.		A.54		
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>		<p>Re: Late representation regards the proposed Codford policy boundary and Specifically Grid Reference F5                      We apologise for not responding within the allocated time for comments on “Wiltshire Housing Site Allocations Plan, Pre-submission draft plan, Community Area Topic Paper – Warminster June 2017” but we have been patiently waiting for the proposal of the revised Village policy limits to be brought into the published public domain, and were unaware that we should have made representation earlier.                      For 15 years we have been supporting the application of Mrs Jane MacFadyen and Mr.Tim Anderson regarding the proposed dwelling on land they own at the rear of our property, Codford Grid Reference F5.                      Their original application in 2002 had the wholehearted support of the neighbours, several villagers and the Parish Council when it went before the Southern Area Planning Committee and a number of the neighbours and Parish Councillors attended the meeting. It was stated at the beginning of the meeting that the then head of Planning recommended the rejection of the application, but after the proposal had been explained and support expressed by those attending the Southern Area Planning Committee unanimously approved the application, and requested that such approval be minuted.                      At this point the then planning officer raised a point of order that the approved application had to go before the ‘Regulatory Committee’ as the application was outside the village policy limits. Unfortunately this was unable to be ratified as this Committee was abolished before the approved application could be brought before it, and the approved application then had to be re-submitted to the full planning committee and despite supporters from the village attending this second meeting and speaking in its favour, it was refused in the form it had been presented. We were then informed that there was to be a revision of the Village Policy Limits and understood that the whole purpose of the revision of the Village Policy Limits was to enable the demarcation line to reflect the wishes of the Parish Council and the local community but were appalled when we were informed only a few days ago that the variation of the Village Policy Limits had been finalised but not as we had been led to believe.                      We had understood that the demarcation line was to be drawn in a manner that would be logical and easily identifiable, following the property boundaries and would include the land owned by Mrs MacFadyen (now Mrs Anderson), and that her proposal to build herself a family home on such land was going to be encouraged. But the amount of land as shown on the proposed policy boundary is not large enough for her to implement the building of a home. The barn which is currently situated on the site is very decayed and dilapidated and has become a very unpleasant eyesore, both to the immediate houses surrounding the plot and as one enters the village from the West. In addition the map of Codford referred to under A3 is at least 18 years out of date and shows features that are incorrect as a result of which wrong conclusions are drawn.                      The area upon which she proposes to build is bounded on the East by the house and garden of Little Ashton; on the South by an approximately 15ft high bund dropping down to the A36; on the West by a tiny piece of field owned by a villager; and on the North by the house numbered 124 High Street and our house, Moonrakers. The only vehicular access to the land owned by Mrs Anderson is the 10ft driveway between 124 High Street and our house, Moonrakers. There was a question of egressing vehicles and limited visibility splay, but these were addressed to assist</p>		

Appendix Q - Schedule of representations

	<p>Mrs Anderson. Because of the siting and size of the land, it has very limited use, is useless for agricultural purpose, too small for commercial use, but ideal for the proposed sympathetically built home. In addition it would only enhance the visual appearance of the western approach to the village.</p> <p>After this matter dragging on for 15 years we are now totally in despair that our lack of knowledge regarding the Pre-submission Draft may affect the outcome. We understood that the whole purpose of the revision of the Village Policy Limits was to enable the demarcation line to reflect the wishes of the Parish Council and the local community, which appears not to have been followed. After waiting 15 years for the planning policy of the community to be implemented the thought that apparently the wrong resolution is being offered is totally unacceptable and undemocratic. We have been advised that the information should have been received by the Parish Council and subsequently published in the Community Newsletters under the report of the Parish Council. This dissemination of information seems somewhat casual as it relies totally upon local parish council matters being sent out in a method that is not completely foolproof. In addition, there is a subscription charge for the Ashton Gifford Community News Magazine, serving Codford, which unless you subscribe you do not receive. Therefore the general community may not be aware of any parish news that might affect them, which as in this case has a very strong impact on them, which again is hardly democratic. We would therefore beg leave to have our late representation in respect of Grid Reference F5 regarding the proposed alteration to the policy boundary, to be adjusted in order that sufficient land is available for the proposed building of her family home and that full consideration to this proposal be given in a favourable manner.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">3365</a>	<b>Consultee</b> Jane & Tim Anderson  <b>Person ID:</b> 1143253	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.54			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Late Representation;- Codford Grid Reference F5</p> <p>Please accept our apologies for not responding within the time scale for comments on the “Wiltshire Housing Site Allocations Plan, Pre-submission draft plan, Community Area Topic Paper – Warminster June 2017”. While this is a private representation we understand the Codford Parish Council will be making their own Late Representation.</p> <p>The Codford Parish Council commented on the document titled “Draft Proposal for Revised Settlement Boundaries, Initial Informal Consultation with Parish and town Councils” The Parish Council advised the Spatial Planning team of the amendments to this document that would benefit the community and requested they be included in the revised Settlement Boundaries for Codford. The Parish Council were of the understanding that as they had advised the Spatial Planning team of the local requirements that was the end of the process. Assured by the Parish Council that the proposed settlement boundary was resolved we did not consider or were aware that the correct procedure had been overlooked.</p> <p>It was by chance we became aware of the variance between document Wiltshire Housing Site Allocations Plan Pre-submission draft plan Community Area Topic Paper – Warminster June 2017” and the settlement boundaries as discussed with the Parish Council through submitting a pre-advice application to Wiltshire Planning Department but unfortunately the results came after the close date of the 22nd September 2017. It should be noted that we are not alone in not being informed, there was no process in place to advise the community of Codford of the opportunity to engage with the proposals of WHSAP Pre-submission draft plan Community Area Topic Paper – Warminster June 2017.</p> <p><b>The Objection</b></p> <p>This representation concerns the failure of the policy boundary as published in “Wiltshire Housing Site Allocations Plan, Pre-submission draft plan, Community Area Topic Paper – Warminster, June 2017” to reflect the Codford Parish Councils specific requirements to include a section of land identified in their advised amendments of the “Draft Proposal for Revised Settlement Boundaries, Initial Informal Consultation with Parish and town Councils”. The location of the land is grid reference F5/6 with a SHLAA site ref 3114, please note this is not the whole area. We request you review this omission and find the community is best served with the inclusion of the boundary around F5/6 as requested by the Codford Parish Council.</p> <p><b>Matters For Consideration</b></p> <p>The basis for the Parish Council supporting the policy boundary being extended to include part of the site is to end a 20 year “blot” on the landscape by improving the visual impact when entering the village from the west by allowing the large degrading stone-oak barn and old dairy to be replaced with a family home. The current barn is in the north west corner of the site 1 to 3m from the garden of 124 High Street, Codford, is a prominent feature, the ground is elevated at this point and when approaching Codford from the West along the A36, the image portrayed is negative, a community that is unable to move on, an illustration of stagnation. The village maps used in the Spatial Planning proposal are at least 19 years old and do not represent the features that exist, the extent of the garden to 124 High Street are not shown, the width of the lane to the site includes the driveway of 124 and gives the impression that it could accommodate two lanes of traffic and the very large double garage belonging to the house Moonrakers is missing. The immediacy of the barn and old dairy have a demeaning relationship with the neighbouring</p>			

#### Appendix Q - Schedule of representations

five properties, the community and the Codford Parish Council using their local knowledge consider the buildings to be physically related to the settlement, not countryside and in need of change. This is further demonstrated by the public infrastructure, the site is bounded on three sides by roads, the A36 and 5m high earth bund on the south side, a house named Moonrakers and 124 High Street on the North, the High Street access road to the A36 on the West with Little Ashton on the East. This is not open countryside; the site is too small for agricultural purposes and has no desirable commercial application. The argument for equine use, generally the default is not a viable solution, the site does have 4 stables a legacy that predates the A36 bypass, over time the A36 has grown to present a very dangerous obstacle as grazing and prime riding requires crossing the road at a point where there have been many vehicle fatalities. These factors and the especially high cost of insurance and issues with waste management negate equestrian use of the land. The site does suit a single home, replacing the existing barn and old dairy with will have a minor extension to the settlement built form but will provide a positive change to the community with minimum impact.

It is also recognized that while improving the community's social wellbeing the inclusion would also compliment the AONB, provide some environmental improvements, directly help the economy of the village and make a small contribution to the housing requirements of the locality.

In summary: -

The site has large areas of concrete oversite which will be reduced improving water retention.

The site has an existing septic tank which would be replaced with a treatment plant that removes the phosphate risk

The residential unit would be circa 150m from the local shops, 20m from the bus stop.

The property would be constructed to minimize the carbon footprint through choice of materials, mitigate heat loss and carbon use by a high standard of fabric insulation and airtightness with the adoption of low carbon technologies to service the home.

Provide an additional property to the Wiltshire housing requirement plan

Provide additional revenue to the village

Support the village community in a positive but sympathetic manner putting the land in to sustainable use and visually improving the site line from the West and the immediate properties.

Owner's Intention and Brief History

The owner of the site is Jane Macfadyen now Jane Anderson, who has owned the property since 1990 and is still the owner and has an intention if permitted, to build and live in a property on the site. Jane applied for planning permission to convert the barn and old dairy in 2002, was supported by the Parish Council and circa 20 householders in the village whom wrote to the Planning Department in support of the application, there was no dissent from the Codford Community.

The original application went to the Southern area planning committee with the wholehearted support of the neighbours, several villagers and the Parish Council many of whom attended the meeting. There was a Highways objection, withdrawn after the two neighbouring properties confirmed in writing that they would make the adjustments to their front dwarf garden walls to increase visibility. This support is still provided by the same neighbours the owners of 124 High Street and Moonrakers.

It was stated at the beginning of the meeting by the then head of Planning that she recommended the rejection of the application, but after the proposal had been explained and support expressed by the neighbours, villagers, and Parish Councillors attending, the Southern Area Planning Committee unanimously approved the application, and it was requested that such approval be minuted.

At this point the then planning officer raised a point of order that the approved application had to go before the 'Regulatory Committee' as the application was outside the village policy limits. This Committee was abolished before the approved application could be brought before it, and the approved application then had to be re-submitted to the full planning committee and despite supporters from the village including parish councillors attending this second meeting and speaking in its favour, it was refused.

Brief Site Overview

The whole site is circa 1.25 acres, the southern boundary faces the A36, the site is protected along this boundary by an earth bund circa 5m high. The East boundary is the fence/wall to the house known as little Ashton which has garden that stretches from the High Street to the boundary fence of the A36. To the West boundary lies a small paddock, then the villages Western access road from the High Street to the A36. The sites Northern boundary follows the rear garden hedge line of the two properties 124 High Street and Moonraker's that sit either side of the 4m wide drive that connects the site to the High Street.

Appendix Q - Schedule of representations

	<p>The site topography slopes from North to South, in the North-West corner at the sites highest point is the stone-oak barn and old dairy and adjacent the earth bund and on the south boundary is a low-pitched barn with 4 old stables. The site is not support by land, isolated from grazing fields and hacking trails that lie South of the A36 village bypass.</p> <p>Appendices  Map ~ Draft Proposal for the Codford Revised Settlement Boundaries, Initial Informal Consultation with Parish and town Councils Sept 2014  Map ~ Doc A extract from item 1 overlaying Parish Council proposal for including the site within the settlement boundaries  Map ~ Codford Proposal for Revised Settlement Boundaries extracted from document Wiltshire Housing Site Allocations Plan, Pre-submission draft plan, Community Area Topic Paper – Warminster, June 2017  Map ~ Doc B extract from item 3 overlaying Parish Council proposal for including the site within the settlement boundaries</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Properties on Balmoral Road and Silver St Lane are going to be negatively impacted by the extra traffic which will inevitably accompany the new houses.</p> <p>The A631 (Frome Road) is the proposed access road for the new houses and school, despite this being an extremely busy road, and as such is an exceedingly unsafe, if expedient, choice for the access road. Furthermore while a new primary school is being proposed, it being a single form entry school means that pupils not of the age academically catered for there will have to study at the existing primary schools. Therefore a new school does not solve the current problem of primary schools in the vicinity being over crowded; extra pupils will contribute to this issue. Increased numbers of parents on the school run (for Grove primary school) will use Silver St. Lane as a parking area and in turn this will exacerbate the existing problem of too many cars parked on a busy road by parents.</p> <p>It is conceivable Waddeton Park Ltd may drop the school proposal and decide to either build more than circa 180 houses or spread the proposed number of houses over a larger area, however the same problems of a busy access road and inadequate educational facilities remain.</p> <p>One last concern is that building on the two fields at Southwick Court may be fobbed off as infill. However most existing houses are all to the north of the two fields (boundary Walk and the newer estate of Spring Meadows, The Poplars ect.), with open space (fields) to the south until met by Wynsome Street, Frome road and the fields to the West, with Axe and Cleaver Lane and a strip of fields along the east side. Therefore in all honesty for the constructing of houses or houses/school cannot be infill.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I am writing in order to express my concern as it would appear that the pedestrian and vehicular access into Treetops has now been excluded from the area that comprises the revised designated settlement boundary. It is clearly apparent that this is contrary to the settlement boundary review methodology which indicates that the settlement boundary has been adjusted so as to include the curtilage of a property; this is clearly not so in the case of Treetops. I attach a copy of the plan indicating the area of my concern.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Latton Village			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>APPLICATION FOR LATTON VILLAGE BOUNDARY ADJUSTMENT.</p> <p>I have been given permission to submit the enclosed application for consideration in the review next year.</p> <p>The application is to move the eastern boundary B to D on the plans of the 2 hectare field currently designated as open countryside to align with the Gosditch Road on the opposite side of the old A 419 as shown on Plan 2 of the enclosed plan.</p> <p>The object of the exercise is threefold. As labelled on the plan.</p> <p>Area 1. To provide a site for two pairs of semi-detached cottages facing the old A 419 An application for this to be made in the next 5 year plan.</p> <p>Area 2. To provide the land and to construct a village tennis court with parking.</p> <p>Area 3. To provide the land for the Parish Council to construct a new recreation hall with parking and services. The old village hall has recently been sold off.</p> <p>We have an agreement with Wiltshire Highways to reconstruct the degraded 175 meter verge shown as A to B on Plan 1. This will be at the applicants expense but with the Highways design and guidance. To be considered as Social Gain for the village.</p> <p>The applicant was responsible in 1998 for the instigation and funding of 160 meters of bund shown as C to D on plan 1 and shown on the enclosed photocopy .The bund is now fully matured and has had a dramatic impact on the village ambience.</p> <p>The new A 419 is now totally screened from the village road and housing on the old A 419. The road noise from the concrete surface of the new A 419 is reduced by at least sixty percent according to Messers RMG who constructed the road. Hopefully a length of some 300 meters will be tarmaced before Messers RMG 's contract expires. The noise residue is still a problem.</p> <p>Again, this should be considered as Social Gain for the village.</p> <p>Trusting that this application can meet with your approval next year.</p>

<p><b>Comment ID:</b></p>	<p><a href="#">3370</a></p>	<p><b>Consultee</b> Owners of Land off Manor Lane, Baydon</p> <p><b>Person ID:</b> 1157644</p>	<p><b>Agent</b> Lee Searles Enzygo Environmental Consultants</p> <p><b>Person ID:</b> 1157641</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Figure</p>		<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>	<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>A.9</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Following your recent consultation on the draft Wiltshire Housing Site Allocation Plan, please find enclosed representation to support a housing allocation at land off Manor Lane, Baydon, SN8 2JD. Figure 1 below shows the location of the site in orange, which is centred at Grid Reference SU 28066 77837. We seek to demonstrate that the site should be included within the settlement boundary, and should be allocated for housing development.</p> <p>In July 2007 permission was consented for 'Change of use from agricultural to residential hard surfacing and erection of garage extension' through application K/56453/F. This consent has been implemented. In 2008 consent was granted for 'Proposed lobby link, linking the sections of existing and approved garages together also replacing roof window with small dormer window in art studio' (ref K/58403/F). Therefore, the wider site currently benefits from a C3 allocation.</p> <p>Within the pre-submission consultation settlement boundary map (July 2017) the land is shown outside of the revised settlement boundary (figure 2). This is despite the distinct boundary around the site which clearly depicts its connection with the existing property and settlement, and shows a clear separation between the site and the open countryside (figure 3). This is further highlighted by the 'alternative' Public Right of Way which runs around the southern and eastern boundary of the site, clearly delineating the boundary between the village settlement and the open countryside (figure 4). We consider that the existing and proposed settlement boundary does not accurately reflect what is on the ground, and thus it should be amended to encompass the site.</p> <p>The site falls within East Wiltshire Housing Market Area. Within this area there is a requirement for 5,940 houses. Within the Housing Site Allocations Plan, allocations are only made within Principal Settlements, Market Towns and Local Service Centres. Baydon does not fall within one of these settlement tiers, and therefore no housing sites are allocated within the village. Instead, it is left for housing sites to be allocated through the Neighbourhood Plan process. However, no Neighbourhood Plan is being prepared for Baydon, and thus, in this instance, this approach is not appropriate. Therefore, given the site suitability (detailed within the following section), we consider that including the site within the settlement boundary would be the most appropriate approach at this point.</p> <p><b>Site suitability</b></p> <p>The site identified is suitable for approximately two bungalows or small properties, in keeping with the existing properties along Manor Lane. We would appreciate your input in terms of the size and style of housing which would be considered appropriate.</p> <p>The site benefits from an existing site access, and is served by water and electricity. The site is in a sustainable location, with a post office, church, school, pub and village shop within approximately 600m. In addition, the village is served by public transport, reducing dependency on private car ownership.</p> <p>In terms of national designations, the site lies within the North Wessex Downs AONB, along with the entire village and wider area. The site is not subject to, or adjacent to other designations. The site comprises grassland, with trees, scrub and hedge around the site. As part of any development, an ecological assessment and tree survey would be undertaken, and features of value would be retained where possible.</p> <p><b>Conclusion</b></p>				

Appendix Q - Schedule of representations

	We hope that the above information demonstrates that the site subject to this letter has significant potential for inclusion within the settlement boundary, and allocation for residential development.

Comment ID:	<a href="#">3371</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Dr Keith Rodger	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Figure	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>My wife and I own Elmfield House and its garden. As you will know, part of the garden was recently the subject of planning application 18/00152/OUT and that this was opposed by your department because the area falls outside the current settlement boundary for Wiltshire. We note that other responses do not offer any unconditional rejection and that the conditions they impose are of the kind that would be expected: sight lines, water treatment, ecological and archaeological surveys etc. We are confident that these can be met</p> <p>The response from your department states that the extent of the settlement area is under review and the purpose of this letter is to request that the area designated in the subject planning application is included within that boundary.</p> <p>The area is small and lies between the Park and Ride to the West, the A 36 to the South and Elmfield House to the North. This plot could be considered to be an infill. The trees in the orchard are old and not very productive, many of the other trees and shrubs could remain and the gardens to any houses would be quite large causing little if any loss of amenity. The remainder of Elmfield House garden would remain untouched apart from the connecting drive.</p> <p>We hope that you can include this area in the settlement area and thus add at least a small number of houses towards Wiltshire quota.</p>
