<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There is no evidence that transport network improvements can be undertaken which will accommodate the scale of development being proposed. It should be noted that the Salisbury Transport Strategy Summary (STSS) showed no strategic sites to the south of the river (STSS, Figure 1.1), and yet in the 2026 'Business as Usual' scenario the Harnham Gyratory was assessed as being category 'red' – operating over 70% capacity or with two or more arms operating in excess of 90% capacity (STSS Figures 3.2 &amp; 5.1). Exeter Street, College and St Marks roundabouts and Park Wall junction were similarly assessed as 'red' in this forecast, and all would be subject to extra traffic with the scale and location of developments being proposed. With additional housing south of the river there will inevitably be an increase in traffic and congestion at all these locations, compounded if there is a continuing reluctance to implement actions which are recommended in the Salisbury Transport Strategy Options Assessment Report.</p> <p>Without any evidence to the contrary it would seem that this development is unsound and not consistent with national policy, because the NPPF indicates that development should be “prevented or refused on transport grounds where the residual cumulative impacts of development are severe” (NPPF para 32).</p> <p>Salisbury is already an Air Quality Management Area (AQMA) with persistent exceedances of EU limits in respect of NO2 recorded at a number of locations. Any assessment of the combined traffic impact of the proposed sites south of the river will also need to be mindful of the impact on City Centre Air Quality. The latest report available on <a href="http://www.wiltshireairquality.org.uk/reports">http://www.wiltshireairquality.org.uk/reports</a> is the 2017 Air Quality Annual Status Report (ASR). This shows that an annual mean bias adjusted reading for NO2 at diffusion tube site P16/49 at 91 Exeter Street was 44 µg/m3, which is above the EU limit of 40 µg/m3. Developments to the south of the river which lead to a decrease in air quality on Exeter Street, and elsewhere in Salisbury, would be in breach of NPPF 124 which states that “Planning policies should sustain compliance with and contribute towards EU limit values or national objectives for pollutants, taking into account the presence of Air Quality Management Areas and the cumulative impacts on air quality from individual sites in local areas.”</p> <p>Any updated transport assessment will need to be mindful of the traffic impacts of proposed developments across a wide area, including Salisbury and the A36 corridor, Wilton, Quidhampton and Lower Road (since traffic may attempt to avoid congestion hot spots on the A36) and also through the New Forest National Park. With bottlenecks likely at Harnham gyratory and on the New Bridge Road it is likely that traffic heading south, commuting perhaps to Bournemouth or Southampton, will take minor roads through the New Forest, with adverse consequences felt there.</p> <p>Without an updated and effective Salisbury Transport Strategy this development is not consistent with national policy and will need to be removed.</p> <p>One cannot prejudge what might be in a 'refreshed' Salisbury Transport Strategy, so any judgement as to whether this could make the development 'sound' would need to be made as and when this has been delivered and evaluated.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan to put 840 houses together with additional housing possible on the Harnham Business Park which has been recategorised to mixed development could inflict 900 houses in an area separated from the city of Salisbury by 5 rivers and the water meadows with only one crossing point, New Bridge Road. This will result in a population in the region of 10,000, three major through routes, and the district hospital traffic, all reliant on the Harnham gyratory and one bridge. This route is already at close to capacity and short of building completely new infrastructure it is difficult to see how this can be improved</p> <p>Changes to public transport are unlikely to produce any significant change. Already the 10 minute service to the hospital is more an expression of hope over reality with the service regularly running 30 minutes late due to problems in the wider Salisbury area.</p> <p>Remove the plan to develop the sites in Harnham unless major new infrastructure is put in place.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">875</a>	<b>Consultee</b> Ms S Birdseye Hallam Land Management/Velcourt Limited  <b>Person ID:</b> 1126328	<b>Agent</b> Mr David Barnes Star Planning & Development  <b>Person ID:</b> 326118	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.67		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Positively prepared The strategy of the plan will not meet objectively assessed development requirements of Salisbury in a manner which is consistent with achieving sustainable development; Justified The plan has not been prepared based upon the most appropriate strategy when considered against the reasonable alternatives and the available evidence. Effective The plan will fail to deliver the require housing to meet the needs of Salisbury over the plan period. Consistent with national policy Some aspects of the plan will not deliver sustainable development in accordance with the policies in the Framework. Paragraph4.67 et seq Hallam Land Management (HLM) and Velcourt Limited object to any assumption that there will be a material contribution to the housing supply delivered at the Churchfields, Salisbury which is a strategic allocation for the city identified in the Wiltshire Core Strategy (Core Policy 20) (WCS). It is not HLM's or Velcourt's position that Churchfields should be deleted as an allocation because of its status in the WCS. However, reliance was placed on Churchfields as a strategic allocation to deliver a significant proportion of the housing and employment requirements of Salisbury during the period up-to 2026. If this strategic allocation fails to deliver then there is a need for the Wiltshire Housing Site Allocations Plan to satisfy the shortfall. The Allocations Plan recognises that it is unlikely that all the strategic sites allocated in the WCS for Salisbury would deliver sufficiently within the plan period to meet housing requirements and ensure supply. In part to address this matter a further strategic allocation at Netherhampton Road (Policy H3.1) is proposed and this is the subject of a separate objection from HLM and Velcourt. However, there is a complete lack of transparency in the submitted Allocations Plan and associated documents about what, as at July 2017, might be the likely number of dwellings which could be delivered by 2026 at Churchfields. This is important because the Allocations Plan acknowledges that the South Wiltshire Housing Market Area (HMA) has a slightly less generous housing land supply than elsewhere in Wiltshire. The WCS was adopted in January 2015. Within the WCS the expectation was that to expedite the delivery of development at Churchfields, the Council would work closely with the developers and landowners to facilitate delivery. It was envisaged that significant, tangible progress would be made towards a planning application being submitted within 18 months of the date of adoption of WCS. This has not happened. The WCS also identified a list of constraints which needed to be addressed to enable the development of Churchfields including: Poor access through narrow rail bridges and via residential areas. Potential land contamination (including former land fill site, abattoir and steam engine shed). Protection and proximity of the River Avon Special Area of Conservation.		Effective	
			Consistent with national policy	

Appendix Q - Schedule of representations

	<p>Salisbury city centre Air Quality Management Area.          Protection of views of Salisbury Cathedral.          Interdependencies with the Waste Site Specific Allocations DPD to find a suitable decant site for the Household Recycling Centre currently on site.          Flooding (some fluvial and surface water flooding).          Little obvious public progress has been made addressing these constraints.          6. Omitted from the list is land assembly which is complicated by the need to relocate the numerous businesses which currently operate at Churchfields. The Allocations Plan recognises that for Churchfields to be developed requires substantial employment uses to decant but this is now expected to commence later than envisaged in the WCS and much less land for new housing will be available before 2026.          7. A visit to Churchfields confirms that the area remains a busy industrial estate occupied with largely Class B2 and B8 uses and some B1 uses. There is a Household Recycling Centre in the south east corner of the estate and a Council depot. Decanting all these existing occupiers to new employment sites and premises does not appear to have started in earnest since the adoption of the WCS and even the Allocation Plan's comment about much less housing (albeit this is not defined) than envisaged being delivered by 2026 is open to considerable doubt.          8. The lack of progress in delivering housing at Churchfields is reinforced by the most recent Housing Land Supply Statement (April 2016) which suggested that 750 dwellings might be capable of being delivered between 2021 and 2026 (150 dwellings per annum). However, the same document confirms that there are legal constraints because the site is occupied; the site is assessed to be unavailable and there is no developer interest. The overall conclusion is that the site is not deliverable and this raises the question whether any reliance can be place don even 750 dwellings being delivered by 2026? HLM and Velcourt consider that no substantial delivery of new homes will be achieved at Churchfields by 2026.          9. Accordingly, it is correct for the Allocations Plan to seek to ensure that the housing requirement attributable to Salisbury and the wider Southern HMA is met through further residential allocations. It is, therefore, incumbent on this Allocations Plan to ensure that the housing need is met on suitable and appropriate sites at Salisbury as the principal settlement within the HMA whether within the confines of the city of on its periphery.          Little, if any, regard should be had to the artificially defined Community Areas to allocate deliverable housing sites in sustainable locations.</p>

<b>Comment ID:</b>  <a href="#">876</a>	<b>Consultee</b> Ms S Birdseye Hallam Land Management/Velcourt Limited  <b>Person ID:</b> 1126328	<b>Agent</b> Mr David Barnes Star Planning & Development  <b>Person ID:</b> 326118	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Positively prepared The strategy of the plan will not meet objectively assessed development requirements of Salisbury in a manner which is consistent with achieving sustainable development; Justified The plan has not been prepared based upon the most appropriate strategy when considered against the reasonable alternatives and the available evidence. Effective The plan will fail to deliver the require housing to meet the needs of Salisbury over the plan period. Consistent with national policy Some aspects of the plan will not deliver sustainable development in accordance with the policies in the Framework. PolicyH3.1NetherhamptonRoad, Salisbury Hallam Land Management (HLM) and Velcourt Limited object to the inclusion of land at Netherhampton Road, Salisbury (640 dwellings) as a housing allocation because it is not the most appropriate strategy when considered against the reasonable alternatives and the available evidence base. HLM and Velcourt welcome the acknowledgement that it is unlikely all the strategic sites allocated in the Wiltshire Core Strategy (WCS) for Salisbury would deliver sufficiently by 2026 to meet housing requirements and ensure supply. This comment particularly applies to Churchfields (Core Policy 20) which will be unable to deliver 1,100 dwellings (if any) by 2026. It is a complex regeneration project that will take time to deliver, if at all, and will require other sites to become available to enable existing businesses to relocate. HLM and Velcourt have submitted a separate representation concerning the implications of the lack of housing delivery at Churchfields. It is incumbent on the Wiltshire Housing Site Allocations Plan to ensure that the housing need is met on suitable and appropriate sites at Salisbury as the principal settlement, within the Southern Housing Market Area whether within the confines of the city of on its periphery. Little, if any, regard should be had to the artificially defined Community Areas to allocate deliverable housing sites in sustainable locations. HLM and Velcourt recognise that the WCS does refer to the circumstances where further housing land might be required then sites at Netherhampton and additional growth at Longhedge should be considered as part of the ongoing monitoring process. However, HLM and Velcourt question the appropriateness of this Allocations Plan including a 'strategic' scale allocation of circa 640 dwellings at Netherhampton Road rather than, as might reasonably be expected, this scale of growth coming forward via a review of the WCS Core. The scale of housing development proposed has profound strategic impacts which have not been properly tested, including the need to revisit the Salisbury Transport Strategy. There is no other allocation in this Allocations Plan is of the same scale at Netherhampton Road and which would have the same degree of environmental and technical impacts.		Effective  Consistent with national policy	

#### Appendix Q - Schedule of representations

Instead of a strategy of hoping a single strategic site will meet the majority of the outstanding housing need, this Allocations Plan should limit the size of any site being no more than 200-250 dwellings. Accordingly, the Allocations Plan should be seeking to identify at least 4 other sites at Salisbury in preference to a strategic scale allocation Netherhampton Road with its significant and widespread implications for Salisbury. Given the experience at Churchfields, there must be doubts about the delivery of the strategic site at Netherhampton Road. This site does not feature in the most recent Housing Land Supply Statement (April 2016). The Allocations Plan does, at least, recognise that the scale of the site requires a generous lead in time for the delivery and it is not expected to contribute to housing delivery for several years. However, and there is a lack of transparency in the Allocations Plan about how many new homes are expected to be delivered on this site by 2026.

A recent study undertaken by Nathaniel Lichfield and Partners Start to Finish How Quickly do Large-Scale Housing Sites Deliver (2016) identifies that large sites of 500 dwellings takes 5-years to deliver new homes. Utilising July 2017 as a base date the Netherhampton Road site would not start delivering new homes until July 2022 at the earliest assuming the technical and environmental constraints can be overcome.

Development of this site is of such a large scale that, according to the Wiltshire Housing Site Allocations Plan Sustainability Appraisal Report Annex 1 A.6 Salisbury Principal Settlement (including Wilton Town) (2017) (SA), it is likely to increase traffic on local roads which may impact on local air quality, particularly at the Exeter Street and College roundabouts. The edge of city location will mean that there will inevitably be a dependency on use of the private car for trips which will increase emissions within the City Centre Air Quality Management Area (AQMA), especially at the identified junctions. No assessment has been undertaken to determine what the change in the air quality would be in the AQMA from the traffic generated by vehicles from circa 640 dwellings (plus the cumulative effect of a further 100 dwellings to the south of Netherhampton Road).

The Allocations Plan is also very clear that comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. This implies to HLM and Velcourt that the scale of traffic growth associated with this site would lead to severe impacts and, accordingly, the site should not be allocated for development unless or until there is a clear means of addressing this unacceptable harm, including on the A36 the management for which resides with Highways England. Such work would also need to consider the cumulative impact of about 100 dwellings proposed to the north of Netherhampton Road.

The suggested refresh of the Salisbury Transport Strategy should already have been undertaken to identify, in principle, any mitigation or improvement measures rather than rely upon a transport assessment which would be submitted with a planning application.

A further technical issue which ought to have been considered before the allocation was suggested is identified in the SA. The Habitat Regulations Assessment screening has identified that development at Salisbury could contribute towards impacts upon the River Avon Special Area of Conservation (SAC) through increased phosphate loading, and habitat loss/damage. In the case of the land at Netherhampton Road, the SA identifies that significant in-combination effects may make mitigation for phosphate impacts on the SAC challenging at this location. Again, where is the evidence that, in principle, this challenge can be met?

The theme about an inadequate evidence base is equally raised in the Stage 4a Site Landscape Assessment Part 2: Salisbury, Tidworth, Trowbridge, Warminster and Westbury Community Area (2017) (LA). The LA records that the Salisbury District Settlement Setting Assessment (2008) (SSA) describes the approach along Netherhampton Road as distinctive and memorable and that it should be conserved and enhanced. In understanding this comment, it needs to be kept in mind that about 100 dwellings are also proposed to be developed to the north of the road which would have an individual and cumulative effect on the setting and approach to Salisbury.

The LA goes on to say that there are views from the Public Rights of Way (PRoW) network which crosses this site with the Cathedral spire appearing above the undulating landform. The site is highly visible from Netherhampton Road and from the nearby PRoW network. There are middle distance views from a PRoW that crosses the Avon Valley. Views from the south eastern edge of Salisbury towards the site are, however, more limited by the landform at Harnham Hill and the warehouses at Harnham Business Park.

The site is large, open and exposed and visible from several publicly accessible routes, it forms the backdrop to a number of important views towards Salisbury Cathedral's spire and it is an integral part of an important western approach to the city. Development will interrupt these views and it would be difficult to mitigate against this impact and, therefore, as recorded in the LA the overall mitigation potential of development on this site would be low. Further, the LA confirms that development of the site would adversely affect the settlement setting and western approach into Salisbury and would have localised adverse effects on the adjacent River Avon landscape character area. There would be a major alteration to characteristics of the existing landscape and a high adverse magnitude of effect.

Appendix Q - Schedule of representations

	<p>Due to the various concerns raised, the LA highlights that further detailed study should be undertaken to establish mitigation measures and the capacity of the site to accommodate change. This includes the preparation of a high-level conceptual masterplan with indicative areas of housing, open space and community infrastructure to help to establish development parameters and to enable a more accurate landscape and visual impact assessment. Although the policy requires built development to be kept below the 75-metre contour and for a country park to be located on the higher land to the south, a master plan has not been prepared as part of the evidence base to determine whether the identified adverse landscape and visual impacts raised can be effectively mitigated albeit the LA already acknowledges such prospects are low.</p> <p>The Allocations Plan recognises that the site includes prehistoric barrows, field systems and enclosures and has very high archaeological potential. The high risk of unknown archaeology on the site is recorded in the Salisbury Historic Assessment Report (2009) which also comments on the setting of the city by keeping built development off the higher slopes. Against this context, the SA is clear that further assessment of the high archaeological potential is required but this has not been undertaken to support the allocation, let alone the master planning suggested in the LA and Allocations Plan for this site. Despite the unknown location of any archaeological interests, the 'hope' in the Allocations Plan is that the scale of the site means any such interests could be retained in situ and an archaeological assessment supporting a planning application would address these matters.</p> <p>Leaving aside any master planning considerations, in the absence of further archaeological investigation of the type identified in the SA it cannot be said with any certainty that the site is deliverable and if so what its ultimate capacity might be.</p> <p>The site is located adjacent to the West Harnham Chalk Pit Site of Special Scientific Interest (SSSI) which is of geological interest. The Allocations Plan and the SA both recognise the need to protect the SSSI with a buffer created by the country park. However, the SA also highlights that informal recreational use of the chalk pit can be expected to significantly increase because of the development as the site is open and accessible. Apart from any possible risk to geological interests, there would be a significant health and safety risk for children using the site because of the sheer vertical drop which is accessible from the footpath. There must at least be question about the integrity of this geologically important SSSI from such an increase in use.</p> <p>The SA also notes that this site contains some best and most versatile agricultural land. Sequentially, either land of a lower quality should be developed in the first instance or land of a lower overall impact in relation to wider sustainability considerations.</p> <p>In addition to HLM and Velcourt questioning the appropriateness of this Allocations Plan identifying a strategic site of a scale more suited to the WCS, there is an obvious lack of transparency about assumed delivery rates and there is not a robust and cogent evidence base to support the development of around 640 dwellings at Netherhampton Road. There is no master plan to demonstrate that the site could be developed in a manner which would respect the known traffic, air quality, landscape, archaeological, heritage, setting and ecological constraints, including whether assessed individually or cumulatively with the 100 dwellings proposed north of Netherhampton Road.</p> <p>HLM and Velcourt note that the benefits relied upon to outweigh any identified harm, such as meeting the housing need or providing affordable housing, are applicable to every potential residential site at Salisbury and are not, therefore, unique to the proposed allocation.</p> <p>See attached representation</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Positively prepared The strategy of the plan will not meet objectively assessed development requirements of Salisbury in a manner which is consistent with achieving sustainable development;</p> <p>Justified The plan has not been prepared based upon the most appropriate strategy when considered against the reasonable alternatives and the available evidence.</p> <p>Effective The plan will fail to deliver the require housing to meet the needs of Salisbury over the plan period.</p> <p>Consistent with national policy Some aspects of the plan will not deliver sustainable development in accordance with the policies in the Framework. PolicyH3.3 Land North of Netherhampton Road Hallam Land Management (HLM) and Velcourt Limited object to the inclusion of land to the north of Netherhampton Road, Salsibury (100 dwellings) as a housing allocation because it is not the most appropriate strategy when considered against the reasonable alternatives and the available evidence base. HLM and Velcourt welcome the acknowledgement that it is unlikely all the strategic sites allocated in the Wiltshire Core Strategy (WCS) for Salisbury would deliver sufficiently by 2026 to meet housing requirements and ensure supply. This comment particularly applies to Churchfields (Core Policy 20) which will be unable to deliver 1,100 dwellings (if any) by 2026. It is a complex regeneration project that will take time to deliver, if at all, and will require other sites to become available to enable existing businesses to relocate. HLM and Velcourt have submitted a separate representation concerning the implications of the lack of housing delivery at Churchfields. It is incumbent on the Wiltshire Housing Site Allocations Plan to ensure that the housing need is met on suitable and appropriate sites at Salisbury as the principal settlement, within the Southern Housing Market Area whether within the confines of the city of on its periphery. Little, if any, regard should be had to the artificially defined Community Areas to allocate deliverable housing sites in sustainable locations. The landscape merits of the land north of Netherhampton Road were originally assessed in 1998 by the Derek Lovejoy Partnership (DLP) on behalf of the former Salisbury District Council. The assessment concluded that this site would have an unacceptable landscape impact, principally by reason of its open character, views towards Salisbury Cathedral and views of the site from the rising land south of the River Nadder. The Allocations Plan recognises the land North of Netherhampton Road and the surrounding area is sensitive in terms of the setting to Salisbury Cathedral and views towards it. Further, the Salisbury District Settlement Setting Assessment (2008) (SSA) describes the approach along Netherhampton Road as distinctive and memorable and that views should be conserved and enhanced. Indeed, the importance of this approach to Salisbury was reiterated in the Stage 4a Site Landscape Assessment Part 2: Salisbury, Tidworth, Trowbridge, Warminster and Westbury</p>			

Appendix Q - Schedule of representations

	<p>Community Area (2017) (LA). This LA does not mention the previous DLP assessment of the site and surprisingly suggests that the potential harm to the landscape interests and the approach to Salisbury could be mitigated by setting development back from the road.</p> <p>The Wiltshire Housing Site Allocations Plan Sustainability Appraisal Report Annex 1 A.6 Salisbury Principal Settlement (including Wilton Town) (2017) (SA) also raises concerns about landscape impact but, and in conflict with itself, then seeks to downplay the potential harm.</p> <p>The SA suggests development density would be fairly low because of the size of the site and also due to the fact that there would need to be a certain degree of landscape mitigation due to the site's fairly prominent location and views in/out of site (emphasis added). Such an assessment is consistent with the views of DLP and the SSA concerning the land north of Netherhampton Road. However, the SA also claims that any effects on the landscape are likely to be fairly well contained and linked to the existing site and surroundings (emphasis added). Overall, some minor adverse effects on the landscape are considered likely by the SA but there is potential for mitigation measures to reduce the extent of effects.</p> <p>Although there may well be scope for mitigation as suggested in the LA and SA, this does not get passed the site's fairly prominent location, views into/out of site, the unacceptable impacts DLP considered would arise from development and the importance of this approach to Salisbury as identified in the SSA. In reality, the evidence available does not support the proposition that the landscape and visual impacts of housing development on this site would be fairly well contained and nor would they be minor as suggested in the Community Area Topic Paper – Salisbury (2017) (CATP). Further, the assessment undertaken as part of the evidence base is thin in terms of the cumulative impacts of development both north and south of Netherhampton Road (Policy H3.1).</p> <p>Three other matters arise from the evidence base. Firstly, the SA also notes that this site contains some best and most versatile agricultural land. Sequentially, either land of a lower quality should be developed in the first instance or land of a lower overall impact in relation to wider sustainability considerations.</p> <p>Secondly, the future residents of the land north of Netherhampton Road would be heavily dependent on the proposed strategic scale allocation south of Netherhampton Road (Policy H3.1) to deliver social and community facilities (e.g. a primary school). If this strategic allocation were not found sound and progressed then the locational merits of the site would be adversely affected because it would have a higher degree of isolation from the other facilities within Salisbury. Indeed, the without additional primary school capacity the CATP acknowledges that the overall sustainability of the site is marginal.</p> <p>Thirdly, in respect of the land south of Netherhampton Road the Allocations Plan is also very clear that comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. This implies to HLM and Velcourt that the scale of traffic growth associated with the strategic site would lead to severe impacts and, accordingly, the site should not be allocated for development unless or until there is a clear means of addressing this unacceptable harm, including on the A36 the management for which resides with Highways England. Such work would also need to take into account the cumulative impact of the circa 100 dwellings proposed to the north of Netherhampton Road.</p> <p>The available evidence does not support the allocation of the land north of Netherhampton Road for housing purposes because the development of around 100 dwellings would have an adverse impact principally on the landscape and the setting of Salisbury. Further, the site's location is marginal in terms of sustainability.</p> <p>Accordingly, and for the reasons given, this site should not be taken forward as an allocation for landscape and sustainable location reasons. Other sites of lower landscape impact exist on the edge of Salisbury and such sites would have the same benefits relied upon to outweigh the identified harm for this proposed allocation (e.g. such as meeting the housing need or providing affordable housing).</p>

	Justified The plan has not been prepared based upon the most appropriate strategy when considered against the reasonable alternatives and the available evidence.		Consistent with national policy	
Effective The plan will fail to deliver the require housing to meet the needs of Salisbury over the plan period.		Consistent with national policy Some aspects of the plan will not deliver sustainable development in accordance with the policies in the Framework.		
PolicyH3.4 Rowbarrow Hallam Land Management (HLM) and Velcourt Limited object to the inclusion of land at Rowbarrow, Salisbury (100 dwellings) as a housing allocation because it is not the most appropriate strategy when considered against the reasonable alternatives and the available evidence base. HLM and Velcourt welcome the acknowledgement that it is unlikely all the strategic sites allocated in the Wiltshire Core Strategy (WCS) for Salisbury would deliver sufficiently by 2026 to meet housing requirements and ensure supply. This comment particularly applies to Churchfields (Core Policy 20) which will be unable to deliver 1,100 dwellings (if any) by 2026. It is a complex regeneration project that will take time to deliver, if at all, and will require other sites to become available to enable existing businesses to relocate. HLM and Velcourt have submitted a separate representation concerning the implications of the lack of housing delivery at Churchfields.		It is incumbent on the Wiltshire Housing Site Allocations Plan to ensure that the housing need is met on suitable and appropriate sites at Salisbury as the principal settlement, within the Southern Housing Market Area whether within the confines of the city of on its periphery. Little, if any, regard should be had to the artificially defined Community Areas to allocate deliverable housing sites in sustainable locations.		
The first debate about whether this site should be developed for housing was as part of the preparation of the Salisbury District Plan 2011 (SDP). At that time, the general extent of allocation H2F was being debated and a key issue was how far built development should encroach up the slope in to what was and remains) open countryside but is now proposed in this Allocations Plan for residential development (i.e. Rowbarrow). A key evidential base for the SDP debate was the landscape report prepared in 1998 Derek Lovejoy Partnership (DLP) on behalf of the former Salisbury District Council. Indeed, representatives of the Practice gave evidence at the Examination in Public to support the report's conclusions. For allocation H2F, DLP proposed that built development should be kept down from the higher ground (between 70 and 75 metre contours). This advice was accepted and formed the basis of the allocation. It is also relevant to note that the 75- metre contour is now being adopted in this Allocations Plan as the limit of housing development for the proposed allocation at Netherhampton Road (Policy H3.1).				

#### Appendix Q - Schedule of representations

The reason for keeping built development off the higher ground can usefully be found in the Downtown Road, Salisbury Development Brief (2005). One of the defining characteristics of Salisbury is its landscape setting with the city largely contained by landforms on all sides, namely by Salisbury Plain and the West Wiltshire Downs to the north and by the South Wessex Downs to the south. The vegetated and open skylines and ridgelines surrounding Salisbury are a distinctive part of the city's character and this setting of Salisbury is an important influencing factor on any development on the edge of the city.

The H2F allocation was located on rising ground with the highest ground to the south (i.e. what is now being proposed for housing at Rowbarrow) forming the skyline when viewed from several places within the city. These views include those out from the city towards surrounding countryside as well as views into and across the city, especially the view towards the Cathedral, focusing on the spire and Old Sarum. The more elevated areas to the south of the H2F allocation were also considered to form part of the landscape backdrop. Accordingly, the extent of built development for the H2F allocation was determined in the SDP to avoid siting buildings on the most prominent southern parts of the site thereby avoiding encroachment into the skyline in longer distance views.

The Brief is clear that built development being confined to the lower slopes rather than the elevated southern would avoid any significant impacts on the setting of Salisbury thus maintaining the landscape backdrop to the city and preserving the skyline. The same conclusion about the landscape and setting matters for the area within which the site sits was reached in the South Wiltshire Setting Assessment (2008) (SSA) where new development that disrupts key views to important landmarks and features within Salisbury and its setting should be resisted.

The Stage 4a Site Landscape Assessment Part 2: Salisbury, Tidworth, Trowbridge, Warminster and Westbury Community Area (2017) (LA) appears to ignore all the previous assessments (i.e. SDP, DLP, SSA and the Brief) about the determination of the extent of built development in this location and on the Rowbarrow site. This is despite the acknowledgement in the Allocations Plan that this is a sloping and quite prominent site.

What is now being proposed in the Allocations Plan is wholly contrary to the previous DLP assessment and the Brief and the SSA because housing would be erected on the higher ground above the 75 metre contour, it would mean the loss of an open area which is considered to be an important part of the backdrop of the city and is an area from which there are views towards the Cathedral, especially from the public right of way where the views would be lost because of around 100 dwellings in the foreground.

The Community Area Topic Paper – Salisbury (2017) (CATP) recognises the possible adverse impacts on the visual qualities of the wider countryside are a central concern but so are effects on heritage assets, especially the nationally designated heritage asset of the Woodbury Ancient Villages Scheduled Monument (SAM). The Wiltshire Housing Site Allocations Plan Sustainability Appraisal Report Annex 1 A.6 Salisbury Principal Settlement (including Wilton Town) (2017) (SA) specifically comments that there may be significant adverse impacts on the designated SAM from new housing development on this site (emphasis added). These adverse impacts are to the Iron Age settlement and the Palaeolithic site of international significance (emphasis added). Further, the site generally identified as having high archaeological potential.

The importance of the designated heritage asset is somewhat down played in the CATP which refers to the site being located adjacent to the SAM and that there may only be some moderate adverse impacts on its setting. The Allocations Plan is slightly more balanced requiring development to preserve the contribution made by the Rowbarrow site to the setting of the SAM and, if necessary, land would need to be set aside from development. The Allocations Plan goes on to say detailed design and layout will be guided by Heritage Impact Assessment and Scheduled Monument consent will be required.

However, this is a clear case where the Allocations Plan is 'hoping' that the impact on the designated heritage assets of international and national significance will be acceptable and that Schedule Monument consent will be granted. This hope is not supported or substantiated by the evidence. No proper heritage assessment has been undertaken as part of the Allocations Plan to confirm the degree of harm to the designated heritage assets and whether, at best, it would be less than substantial. The more important a heritage asset the greater the weight is given to its conservation and, reflecting the National Planning Policy Framework, causing substantial harm to a SAM should be wholly exceptional. Even if less than substantial harm is caused, there are other potential housing sites available at Salisbury where lesser or no harm would be caused to internationally and nationally significant heritage assets.

A further uncertainty around the suitability and deliverability of the site is the observation in the SA that if the site is comprised of calcareous grassland, this would be a constraint to development potentially requiring a significant offset. According to the SA a further ecological assessment of this site is required and this does not appear to have been undertaken. Alongside the lack of any proper heritage impact assessment, this yet another whole in the evidence base to support the allocation of Rowbarrow for housing development.

Appendix Q - Schedule of representations

	<p>Accordingly, and for the reasons given, the Rowbarrow site should not be taken forward as an allocation for landscape, heritage and, potentially, ecological reasons. Other sites of lower landscape, ecological and heritage value exist on the edge of Salisbury. HLM and Velcourt note that the benefits relied upon to outweigh any identified harm, such as meeting the housing need or providing affordable housing, are applicable to every potential residential site at Salisbury and are not, therefore, unique to this proposed allocation. See representation</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4711353</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>There is a need for the issues associated with the ability to deliver sites to be properly debated at the examination. Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">879</a>	<b>Consultee</b> Ms S Birdseye Hallam Land Management/Velcourt Limited  <b>Person ID:</b> 1126328	<b>Agent</b> Mr David Barnes Star Planning & Development  <b>Person ID:</b> 326118	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3 omission site		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Consistent with national policy Some aspects of the plan will not deliver sustainable development in accordance with the policies in the Framework.			
	PolicyH3 Omission Site  <ol style="list-style-type: none"> <li>Hallam Land Management (HLM) has an interest in land owned by Velcourt Limited (VL) at Church Road, Laverstock which abuts the urban area of Salisbury but is not identified in the Wiltshire Housing Site Allocations Plan as a housing allocation. HLM and Velcourt submit that the site should be included as an allocation in preference to those which are included in the draft Allocation Plan because it is more suitable for residential development and is, therefore, part of a more appropriate strategy to adopt.</li> <li>Wiltshire Housing Site Allocations Plan Pre-submission Draft Plan Community Area Topic Paper – Salisbury (June 2017) seeks to explain the basis of the choice of the preferred housing sites at Salisbury. However, HLM and Velcourt consider that the approach to the choice of the preferred sites is fundamentally flawed because it does not lead to the identification of the most sustainable locations for growth within and on the edge of the city.</li> <li>There is the artificial application of a site exclusion criterion based upon a boundary for the Salisbury/Wilton Principal Settlement rather than actually seeking to assess all the sites on the periphery of the urban area. Laverstock is physically and functionally part of the urban area of Salisbury. To suggest that Laverstock is a separate 'village' lacks credibility and is a somewhat crude policy approach to adopt. Laverstock is clearly physically part of the built-up area of Salisbury rather than being a divorced or isolated settlement. There is a high degree of functional inter-dependence between the residents of Laverstock and Salisbury which is not all one way. For example, the secondary schools in Laverstock principally draw their pupils from Salisbury.</li> <li>The application of this exclusion criterion means that the HLM and Velcourt site at Church Road (and potentially other sites) falls at the first hurdle rather than progressing to a proper staged assessment against the locational and sustainability criteria referred to in the remainder of the Topic Paper.</li> </ol>			

Appendix Q - Schedule of representations

5. Against this context it is also important to note that the Wiltshire Core Strategy (WCS) recognises:

*'The administrative boundaries around the city have led to a large proportion of the development allocations in this Core Strategy being located outside of the boundary of the city. Some are, for example, located on new greenfield sites in the adjoining parishes which are within the Southern Wiltshire and Wilton Community Areas. These allocations are however considered to contribute towards the requirement for housing and employment for Salisbury and are included within this Salisbury Area Strategy.'* (Core Strategy paragraph 5.109 – emphasis added)

Further,

*'Due to the highly constrained nature of Salisbury, it is inevitable that a significant proportion of the growth required to meet its long-term needs will be located on greenfield sites on the edge of the city. Because the administrative boundaries are drawn tightly around the city, this will result in growth in several neighbouring parishes.'* (Core Strategy paragraph 5.124 - emphasis added)

6. Accordingly, there is clear acknowledgement in the WCS that there is significant reliance on large strategic housing sites and that growth to meet the housing needs of Salisbury may well occur within neighbouring parishes, including Laverstock. Excluding sites on the edge of the built-up area of Salisbury from any assessment because they fall within the adjoining administrative parish should not have been applied to artificially preclude potentially more appropriate and suitable housing allocations when compared to those which are proposed in the Allocation Plan.

7. Ignoring the artificial application of the boundary, the HLM and Velcourt site at Church Road has been assessed against the Stage 2A criteria:

Table 1: Stage 2A Assessment for land at Church Road

Stage 4

9. A summary of the sustainability assessment for the site is:

Table 3: Stage 3 Sustainability Summary

**Sustainability Appraisal- Summary of Assessment Site S204 - Land at Church Road, Laverstock**

**Site Overview**

This site option is on the edge of the built-up area. The site has an area of 5.69 hectares. Allowing for some landscaping on the edge, the capacity would be around 130 dwellings

**Assessment**

No major adverse effects have been identified for this site.

One moderate adverse effect has been identified. The HRA screening assessment has identified that development at the settlement could contribute towards impacts upon the River Avon SAC through increased water abstraction, increased phosphate loading, and habitat loss/damage. Further assessment is required if for any sites at Salisbury if they are taken forward into any subsequent stage of the selection process (SA Obj. 1).

A range of minor adverse effects have been identified for this site. Development of the site will result in the inevitable loss of greenfield land (SA Obj. 2). Development would lead to a small increase in demand for water and there is a requirement for separate

foul and storm drainage disposal systems. Consideration should be given to the delivery of SuDS on site to control the risk of surface water flooding from impermeable surfaces. The site falls within the catchment of the Hampshire Avon and in a high risk catchment for phosphate loading and therefore further assessment would be required (SA Obj. 3). The site is not within a designated AQMA, but consideration would need to be given to the potential air quality impacts of construction and operation of the scheme. Such issues could relate inter alia to noise, dust and lighting. Whilst greenhouse gas emissions will inevitably be increased through development, this can be mitigated through incorporating into the design measures to reduce energy demand and increase energy efficiency, as well as promoting low carbon energy

Appendix Q - Schedule of representations

sources and encouraging sustainable building practices (SA Obj. 5a). Whilst the site is located in Flood Zone 1 and development of the site is unlikely to lead to an increased risk of fluvial flooding from main river and/or ordinary watercourses, the development should incorporate SuDS to minimise vulnerability to climate change. A Flood Risk Assessment would be required (SA Obj. 5b).

A detailed Heritage Impact Assessment would need to be undertaken to support any future development at this site. The site has medium archaeological potential and archaeological assessment would be required albeit a desk-top assessment has determined any finds would be of local interest only (SA Obj. 6). The site has low intervisibility and effects on the landscape character would be well contained through the implementation of green buffers to any mature trees and hedgerows within and adjacent to the site (SA Obj. 7).

The development of this site for housing will generate minor additional vehicle movements on the local road network, especially through private car use (SA Obj. 10). However, the site is well paced for local services, including shops and schools, and is situated on an existing bus and cycle route.

Beneficial effects are identified for this site. Development on the site would help to meet local housing needs in accordance with the policies of the Core Strategy (SA Obj. 8). Due to the size of the site there is considered to be a positive effect against SA Obj. 9 as it is considered that local junior schools would have capacity to accommodate the number of pupil expected from this site; options for secondary education in Salisbury are being reviewed, though it is considered that all existing secondary schools (including academies) are capable of being expanded to cater for additional pupil numbers (SA Obj. 9). Development of the site will increase the local population and could have a minor contribution to the local economy through use of local shops and services (SA Obj. 11). Minor positive effects are also anticipated through the site generating direct and indirect construction employment, and helping to stimulate the local economy once built (SA Obj. 12).

Notwithstanding the moderate adverse effect shared by other sites at Salisbury and some minor adverse effects that would need to be addressed, this site is assessed as being more sustainable within this area of search.

10. Based upon these criteria there are no reasons why the site should not progress to the Stage 4 assessment. Indeed, the Stage 3 assessment is better than the land at Rowbarrow which is included in the Allocation Plan (Policy H3.4) despite 4 moderate adverse effects.

Table 4: Stage 4 Assessment

SHLAA	SiteName
-------	----------

S204 Land at Church Road, Laverstock

[se4e map attached]

**SHLAA SiteName**

S204 Land at Church Road, Laverstock

**Step1**

**SA effects and mitigation measures BIODIVERSITY**

- The topography separates the site from Cockey Down which is a SSSI designated for its chalk down land characteristics, mainly plants, birds and butterflies. Based upon the ecological surveys which have been undertaken, the only known site specific issue is bats commuting along the hedgerows around the edge of the site which can be retained.

#### **AIRQUALITYAND ENVIRONMENTAL POLLUTION**

- There are commercial and residential premises in the vicinity but these are not particularly noisy uses. The site is not within or adjacent to the city's AQMAs. Construction impacts can be addressed by conditions.

#### **HISTORIC ENVIRONMENT**

- As with other sites it forms part of the setting of Salisbury and Wilton. It is not, however, within a key view on the approach to Salisbury, especially views towards the Cathedral spire. No obvious issues associated with cultural heritage of Salisbury. Sufficiently distant from key heritage locations including Salisbury Cathedral and Old Sarum so as not to substantially harm their settings.

#### **LANDSCAPE**

Appendix Q - Schedule of representations

- Not a distinctive landscape. Land rises to the east towards Cockey Down. Built development would extend to about the 65 metres contour which reflects the housing development which has occurred in depth to the south of the site. Proposed housing would respect and reflect the residential and other developments which have occurred in depth along Church Road.

**Accessibility**

Access from Church Road can be provided. Development is not of a scale which necessitates significant off-site highway works.

Adjacent to small scale employment site but ready access to Salisbury Town Centre and the employment areas at Churchfields and Southampton Road by cycle and bus.

Nearest shop within walking distance some 400 metres away. Access by bus within 15 minutes to the town centre.

Less than 5 minutes to walk Wyvern College, St Edmonds Girls School and St Joseph's Catholic School. St Andrews CofE School and Green Trees Primary School are also accessible on foot and cycle.

**Overall Suitability**

Mitigation measures to reduce the likely minor adverse effects of developing this site are considered to be reasonable and achievable.

Considering the effects noted above and taking account of required mitigation measures, the site capacity would be capable of delivering approximately 130 dwellings.

**Step2**

**Fit with area strategy**

This site would provide a proportion of the residual indicative requirement of 173 homes remaining to be met by 2026.

Development of this site would fit within the vision for the city. Salisbury is designated a Principal Settlement in the WCS. As such, it is a strategically important centre and primary focus for development in the South Wiltshire HMA.

**Step3**

**Large villagesitefi** N/A  
**twithCorePolicy1**

Appendix Q - Schedule of representations

	<p><b>Step4</b></p> <p><b>Summary</b></p> <p>The site is in an accessible and sustainable location capable of being served by existing highways infrastructure. The site is not of a size that will significantly add to pressures on local infrastructure, services and facilities. Access can be provided to this site from Church Road.</p> <p>All of the potential minor adverse effects associated with developing the site are considered to be capable of being addressed by straightforward mitigation measures. Given the relatively minor nature of effects, allied to the benefits in terms of the scale of residential development and scope for affordable housing, the site is assessed to be more sustainability benefits within the area of search.</p> <p><b>Conclusion</b></p> <p>11. Laverstock is physically and functionally part of the Salisbury/Wilton Principal Settlement notwithstanding its inclusion in the Southern Wiltshire Community Area. The WCS recognises that some of Salisbury's growth needs have to be accommodated within neighbouring parishes such as Laverstock.</p> <p>12. It is irrational to discount sustainable locations for growth on the edge of the built-up area of Salisbury because of the current inequitable application of a somewhat arbitrary boundary. The approach being adopted is leading to sites which have both greater impacts on the environment and less sustainability merits than the land at Church Road, Laverstock being brought forward for housing development. These sites are the subject of separate objections by HLM and Velcourt and should be deleted.</p> <p>13. HLM's and Velcourt's land interest at Church Road, Laverstock is situated adjacent to the built-up area of the Salisbury/Wilton Principal Settlement and should be taken forward as one of the replacements for the sites which have been identified in the Allocations Plan.</p> <p>See attached representation</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4711356</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>There is a need for the issues associated with the ability to deliver sites to be properly debated at the examination. 				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>There is a conflict between the statement in paragraph 5.137 which indicates that there is scope for walking and cycling and the statement in the Sustainability Appraisal for this site which indicates at SA objective 2 point 1 that “as the site is on the edge of the settlement it is not considered to be within a reasonable walking/cycling distance to the city centre” (also in the summary of SA objective 2).</p> <p>One could certainly take issue with the views of the Sustainability Appraisal, the Wiltshire Council LTP3 Cycling Strategy considers that journeys up to 5 miles can be done by bicycle (see Cycle Strategy para 2.7 “There is great potential to increase cycling in Wiltshire, particularly through replacing short car journeys. This is most feasible for trips under 5 miles (30 minutes), although it can also form a part of longer journeys”. The uptake of electric bicycles of course extends this range, and means that hills form even less of a challenge.</p> <p>Any review of transport options for this site needs to be mindful of the fact that optimum cycling and walking routes to the City may well be via the traffic-free Town Path, an option which is not available to motorists and one which makes the distance considerably shorter for non-car user compared to the car. The Broken Bridges path also provides a pleasant traffic free route which might particularly suit those travelling from south of the river to employment sites in Churchfields.</p> <p>The Sustainability Appraisal needs to be reviewed and brought into line with WHSAP where necessary</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1. THE RELEVANT POLICY TO WHICH THIS REPRESENTATION RELATES</p> <p>1.1 This objection centres on the following parts of the document; 6. Settlement boundary review (and its supporting text) Table 6.2; Appendix A – Warminster Community Area, A.70 Sutton Veny proposals for revised settlement boundaries.</p> <p>Particular regard is focussed on Sutton Veny but the representation also questions the validity of the policy approach to the settlement boundary review as a whole, in terms of its wording and construct.</p> <p>1.2 This representation is structured to firstly consider the rationale underpinning the requirement for the settlement review before considering the housing supply position within the North West Housing Market Area (NW HMA) and the Warminster Community Area (WMCA). It goes on then to consider my Client's land in Sutton Veny and the case for its inclusion within the revised settlement boundary. An assessment of other development options within Sutton Veny is undertaken and thereafter the requested change to the WHSAP is outlined before concluding remarks are drawn.</p> <p>2 EVOLUTION OF THE REQUIREMENT FOR SETTLEMENT BOUNDARY REVIEW</p> <p>2.1 The Wiltshire Core Strategy, Inspector's Report December 2014 noted (at paragraph 36) that 'the Council has not reviewed the extent of the boundaries to inform the CS; instead relying upon the pre-existing development plan documents. Some of these were adopted several years ago, for example the Kennet Local Plan (2004), and it cannot be argued with great strength that the settlement boundaries contained therein are up to date for the purposes of the CS plan period'.</p> <p>2.2 The Inspector went on 'to review boundaries, the CS identifies community led planning as the vehicle to deliver the necessary updates. However, there remains a considerable risk that, for example, Neighbourhood Plans will not be delivered across the county in a comprehensive or timely fashion. Such an outcome would, in the context of the CS settlement and delivery strategy, potentially preclude development initiatives on the basis of an unjustified evidence base and therefore not represent a positive form of planning'.</p> <p>2.3 The Inspector suggested main modification 5 to the Core Strategy noting that 'there is scope to advance a timely review through a separate Development Plan Document'. At paragraph 41 the Inspector concluded that 'CP2 therefore relies heavily on the existence of settlement boundaries to manage growth. Whilst the principle of such an approach may be justified in terms of providing plan led clarity to what development may go where, the efficacy of the plan is partially undermined by the absence of particularly robust evidence in support of the</p>				

#### Appendix Q - Schedule of representations

identified limits for each settlement...the effectiveness of CP2 in combination with CP1 is dependent upon a timely review of settlement limits as described in paragraph 37 above'.

2.4 Topic Paper 3: Settlement Strategy (one of the topic papers which form the evidence base for the Core Strategy) advises (on page 45) 'existing boundaries offer protection to the countryside and guard against urban sprawl ribbon development. However given that existing boundaries are out of date and do not reflect the current urban form there are development pressures along the boundaries'.

2.5 Paragraph 3.40 goes on to note that in settlements where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'.

2.6 The current position then is that the settlement boundaries are out of date. In the case of the settlement boundaries in the former West Wiltshire area these were drafted in the early 2000s prior to the west Wiltshire District Plan 1st Alteration being adopted in 2004. The settlement boundary of the large village of Sutton Veny has not been reviewed in at least 15 years and as the CS Inspector highlights the settlement boundaries should be considered to be out of date. This fact was also accepted by the Council in CS Topic Paper 3: Settlement Strategy (pg. 45).

2.7 Within Wiltshire progress on Neighbourhood Plans has also been limited. So far only 14 have been made and none have been made in 'large villages' which was one of the intended vehicles for further development to be brought forward. Sutton Veny Parish is not designated as a 'Neighbourhood Planning Area' so there is no prospect at present for the further development needs of the village to be met through Neighbourhood Planning.

In the event that the Council is unwilling to make the amendment sought through this representation it will be necessary to address the Inspector at the examination in public because the representation raises issues which question the soundness of the plan.

#### 7 THE ABILITY OF OTHER SITES TO DELIVER THE NECESSARY DEVELOPMENT WITHIN SUTTON VENY

7.1 The revised settlement boundary is reproduced in full at the below (Fig 10). The revised settlement boundary has been assessed to understand whether it will provide any opportunities to support the settlement's housing need. The existing settlement boundary has also been considered because sites may come forward within the settlement. In terms of existing opportunities for residential intensification these are very limited which explains the poor level of delivery within the village over the first 11 years of the CS period.

7.2 The largest site within the settlement boundary is a garden and Paddock area at land adjacent Mulberry House. This land has not come forward since it was included within the village policy limit under the West Wiltshire District Plan 1st Alteration 2004 and there are several obvious difficulties which restrict the site from coming forward. The access point to the garden would have nil visibility to the east because of the outbuilding which is situated in the north of the plot abutting the road. The site is also located on a bend meaning that creation of an access for residential development would present a severe threat to highway safety. Any access would likewise directly abut the residential flank walls of Mulberry House and with windows facing the plot there would be significant harm to the amenities of the existing occupiers. I have been unable to identify any other additional sites within the housing boundary that have not yet been identified as coming forward for development.

7.3 Turning then to the revised boundary, it has been acknowledged by WC that the amendments have been made to regularise existing developments which sit outside of the settlement boundary rather than to identify new sites where windfall development may occur. An examination of the revised boundary very much confirms this as the approach. The only potential plot for development which I have been able to identify is a small parcel of land adjacent to No.5 Bests Lane which might accommodate one dwelling.

Appendix Q - Schedule of representations

	<p>7.4 Other pieces of land of sufficient size to accommodate further residential development only include the grounds of the church of St John (on the High Street) or the grounds of The Manor House, Duck Street. However both of these are listed buildings and development within their grounds would result in substantial harm to the setting of these heritage assets and so would not be countenanced for development.</p> <p>7.5 The conclusion of this exercise is that only one new dwelling could potentially be brought forward within Sutton Veny as a result of the settlement boundary review in its current form.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">885</a>	<b>Consultee</b> Mr Philip Clark  <b>Person ID:</b> 424159	<b>Agent</b> Mark Reynolds  <b>Person ID:</b> 1124938	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.57		Justified	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>3 HOUSING SUPPLY IN THE NORTH AND WEST HOUSING MARKET AREA</p> <p>3.1 The Council on the 17th August 2017 received the Inspector's decision in respect of an appeal against a refusal of residential development of up to 60 dwellings near Lyneham by Gleeson Developments Limited (Appendix 1). The Inspector in reaching his decision considered the latest position in terms of the Council's ability to demonstrate a 5 year land supply in the North and West Housing Market Area (NW HMA). The Inspector concluded in the period 2016-2021 the minimum target is 6,817 dwellings (which includes a 5% buffer) and that the Council's supply would be 6,891 as opposed to the 7,033 which was alleged by the Council. The agreed supply figure for housing only marginally therefore exceeds the required level of housing by a projected 74 dwellings over the next 5 years.</p> <p>3.2 This calculation presumes also that the Council will continue to be required to demonstrate only a 5% buffer above the 5 year housing target. The Inspector in this appeal concluded that a 5% buffer was appropriate despite an earlier Inspector ruling in a Malmesbury appeal that persistent under-delivery had taken place. The Inspector did however sound a cautionary note in concluding 'overall whilst I acknowledge performance is not strong in housing delivery and there are worrying signs that the Council need to address, particularly in the more recent years since adoption of the WCS where delivery has not met requirements, I do not conclude that under delivery at this point has been persistent in the context of the framework'.</p> <p>3.3 The Government White Paper 'fixing the broken housing market' published a consultation response to a proposed Housing Delivery Test. This proposes an assessment of delivery against the housing requirement in the past 3 monitoring years, beginning in November 2017. In cases where delivery over this time period falls behind then a 20% buffer may be required. This measure is likely to increase the risk of Wiltshire Council having to apply a 20% buffer which would immediately in the NW HMA result in a lack of a five year land supply.</p> <p>3.4 The review of the need for site allocations and of the settlement boundaries which underpin the WHSAP was predicated on a very different understanding of the housing trajectory coming forward over the 5 year period 2016-21. Hitherto the Council identified a supply of 7,446 dwellings against a target of 6,817 dwellings. The Inspector in the Lyneham appeal referred to above concluded that the supply was actually 6,891 dwellings against a target of 6,817.</p> <p>3.5 Delivery rates have failed to meet the Council's expectations and in the months since the publication of the Land Supply Statement (March 2017) 555 dwellings have fallen away from the projected deliverable 5 year land supply. The published WHSAP has clearly been superseded by events and the appeal conclusions clearly indicate there is a need to increase supply within the NW HMA to avoid the risk of a lack of 5 year</p>			

#### Appendix Q - Schedule of representations

housing land supply occurring. The plan is un-sound in this regard because it is not positively prepared and it is not justified because it needs to be reviewed in terms of the material change in circumstances which the Lyneham appeal has yielded.

3.6 The WHSAP recognises the uncertainties inherent in housing delivery. Paragraph 2.3 of Topic Paper 4: Developing Plan Proposals advises that WC's strategy is 'to be sure of maintaining a five year housing land supply over each of the remaining years of the plan period, annual supply should exceed the five years and buffer required by planning policy. Any target level will be arbitrary but the Plan might look to provide at least six years of supply in each of the remaining years of the Plan period (to allow for any possibility of under-delivery in the future)'.

3.7 The 5 year housing land supply trajectory as published in the NW HMA purports to demonstrate that this is achievable in the HMA. This assessment is however based upon the now out of date projected deliverable supply. Whilst a delay in supply might bolster housing delivery at the end of the plan period, this becomes more uncertain when looking towards the end of the plan period.

3.8 Based upon the Inspector's conclusions on housing land supply in the Lyneham appeal it is clear that WC will be unable to demonstrate a 6 year supply over the forthcoming 5 years (2017-22). The WHSAP therefore needs to be fundamentally looked at in respect of the NW HMA in order to boost supply if it is going to achieve its own stated goal of at least a 6 year supply being projected in each of the remaining Core Strategy years to 2026. Given the required step change in delivery rates and the recent under-delivery of housing it is argued that a 6 year supply is an entirely reasonable and necessary target.

#### 4 HOUSING SUPPLY IN WARMINSTER AND ITS ASSOCIATED COMMUNITY AREA

4.1 The position is significantly worsened when looking at the housing position for Warminster and its associated community area. Evidence base Topic Paper 3 to the WHSAP table 2.2 reproduced below evidences the position;  
[refer to table in main report]

4.2 The Council's evidence shows a residual requirement of 494 dwellings. This represents nearly 25% of the required supply needing to be found through the WHSAP by a combination of settlement boundary review and site allocations. Against this challenging housing target it is important to also recognise that at present only 693 completions have taken place in the first 11 years of the plan period averaging 63 completions per annum leaving 1,367 completions required over the last 9 years of the plan period at a delivery rate of 151 dwellings per annum. This requires a real step change in housing delivery in the area and any delays in bringing the West of Warminster housing allocation for 900 forward to be delivering housing from 2018 will make the situation much worse. This lack of contingency and reliance on one large site puts the already inadequate levels of housing being projected at risk of slippage.

4.3 The WHSAP attempts to deal with the housing shortfall and proposes allocations within Warminster totalling 200 dwellings and a further allocation in Chapmanslade of 35 dwellings. Even if one presumes that these allocations are deliverable the strategy is not planning for enough housing to meet the objectively assessed need (OAN). The settlement boundary review has followed a process designed to regularise existing areas of development which sit outside the boundary rather than to seek to support additional windfall developments at the large village.

4.4 The WHSAP recognises as did the CS that area based targets for housing need not be overly prescriptive indeed they should not be recognised as maximum levels of appropriate development. There are some instances of settlements and community areas which WC consider will not be capable of delivering their required levels of development. Core Policy 31 of the CS (paragraph 5.158) outlines the specific issues related to the WMCA but at paragraph 2.6 of the WMCA Topic Paper it is noted that 'neither the WCS or the IDP identify insurmountable issues to the extent that they would restrict delivery of the level of housing proposed over the plan period'. There is then no reason articulated by WC to explain development not meeting the target outlined in the WMCA. Whilst there will be an element of windfall development within the WMCA this alone will be insufficient to meet the residual requirement of 259 dwellings.

## Appendix Q - Schedule of representations

4.5 As outlined above at 3.6 the stated approach of the Council is to seek to deliver a 6 year supply of housing for each of the remaining years of the plan period. In the case of the WMCA this level of housing has not been planned for. Indeed it seems highly unlikely given the existing shortfalls within the WMCA that the required levels of housing are achievable. The plan is not in this regard sound because it has not been positively prepared and is failing to meet the objectively assessed need without any strong environmental reason for not doing so.

### 5 THE APPROACH TO LARGE VILLAGES WITHIN THE WMCA WITH A PARTICULAR FOCUS ON SUTTON VENY

5.1 The below table has been extracted from the WMCA Topic Paper. It illustrates that housing completions within the large villages in the WMCA have not been very high at 61 and this is particularly the case in respect of Sutton Veny where only 2 completions have been reported in a 10 year period.

### 9 OVERALL CONCLUSIONS

9.1 The WHSAP has been drafted on the basis of an estimated supply of 7,446 dwellings over the 5 years 2016-2021 within the NWHMA (Wiltshire Housing Land Supply Statement - March 2017). Subsequent planning appeals including most recently the development of up to 60 dwellings near Lyneham by Gleeson Developments Limited has reduced the agreed deliverable supply over this period to 6,891 dwellings. In this context the plan needs to be reconsidered to provide additional housing.

9.2 The latest position on housing land supply is that there is very limited flexibility within the NWHMA with a currently agreed supply of only 74 dwellings over the minimum housing level required. This fails to meet the WHSAP requirement for a 6 year supply to be deliverable.

9.3 Within the WMCA the housing land supply is particularly constrained. Even taking into account the proposed allocations through the WHSAP this still leaves a residual requirement for 259 dwellings which have not been identified just to meet the minimum requirement for the WMCA. The forecast rates of housing delivery likewise require a step change in supply with only 693 delivered in the first 11 years of the plan period and 1,367 completions required in the remaining 8 years which is a significant risk to delivery.

9.4 Against this backdrop of unmet housing need the settlement boundaries of the large villages have been reviewed to regularise existing areas of the settlements but no expansions have been identified to meet the minimum level of housing need. Sutton Veny has only delivered 2 dwelling in the CS period so far and is failing to meet identified need.

In the event that the Council is unwilling to make the amendment sought through this representation it will be necessary to address the Inspector at the examination in public because the representation raises issues which question the soundness of the plan.

[refer to table in main report]

Table 1 – Housing delivery in the large villages

5.2 The existing settlement boundaries have limited development opportunities within the large villages and this is borne out in the limited level of supply outlined above. It is then all the more critical that the review of the settlement boundaries be used to boost supply. The settlement boundary review has though been undertaken with the rationale being that the review should seek to update and accurately reflect circumstances on the ground since they were first established. In practical terms this has resulted in the large villages settlement boundaries being expanded to include some areas of the villages which should hitherto have been incorporated but also potentially developable areas have been removed as the boundaries have been tightened up in other places.

5.3 The strategy for the WMCA is to make one allocation at Chapmanslade for 35 dwellings and stop growth in the other large villages, despite a shortfall in the WMCA and precarious housing land supply position more generally.

Appendix Q - Schedule of representations

	<p>5.4 This approach to dealing with housing in the large villages fails the test of being consistent with national policy. The NPPG includes a section on rural housing and within this the Government make clear that 'rural housing is essential to ensure viable use of local facilities'. It goes on to note that 'all settlements can play a role in delivering sustainable development in rural areas – and so blanket policies restricting housing development in some settlements and preventing other settlements from expanding should be avoided unless their use can be supported by robust evidence'. Sutton Veny is a larger village than Chapmanslade which is to receive an allocation of 35 dwellings and yet Sutton Veny is projected to deliver less than 10 dwellings.</p> <p>5.5 The evidence on housing need indicates a shortage of available housing and the CS Inspector clearly envisaged further growth outside of settlements. This is in line with the NPPF and NPPG which both seek thriving rural communities.</p> <p>5.6 In order to begin to rectify these problems the settlement boundaries need to be reconsidered to allow for small scale increases through windfall developments allied to the larger site allocations process. At present WC's projected delivery is 143 dwellings in the remainder of WMCA (outside of Warminster) over the plan period this does not cater for the 6 years supply which is the stated objective of the plan, it likewise will not assist with meeting the housing shortfall in Warminster. The community area serving Warminster is the most logical area to search for further housing sites to meet this need and through settlement boundary reviews but the WHSAP fails to achieve this and is not therefore positively prepared.</p> <p>5.7 The most recent evidence regarding housing need within Sutton Veny can be found in the November 2014 Sutton Veny Parish Housing Needs Survey. The survey was focussed on affordable housing need but it did also highlight the need for market housing. There were 111 respondents to the survey (32.5% of the village) and the key findings of the report were that 72% of respondents were in favour of some new housing in Sutton Veny. The most commonly chosen option was for between 4-10 dwellings. In July 2014 there were 12 households on the WC Housing Register seeking affordable accommodation in Sutton Veny. Likewise those who were able to meet their own housing need on the open market also described a lack of suitable accommodation in Sutton Veny.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>6 MY CLIENT'S LAND IN SUTTON VENY AND THE CASE FOR ITS INCLUSION WITHIN THE SETTLEMENT BOUNDARY OF THE VILLAGE</p> <p>6.1 My Client's residential curtilage is shown in the below (Fig 1) and as a scaled drawing in (Appendix 2). The Council's suggested amended settlement boundary is reproduced at (Fig 2).</p> <p>6.2 The revised settlement boundaries underpinning the WHSAP should reflect WC's methodology for reviewing the boundaries which is outlined in WHSAP Topic Paper 1. The boundary review methodology was put out for 'informal consultation' to the Parishes and the consultation feedback has been summarised at paragraph 6.5 of that document. One of the key conclusions was that respondents 'disagreed that the settlement boundary should exclude large gardens and particularly objected to the line being drawn through the middle of the curtilage of properties'. It was also 'argued that there was less opportunity to meet NPPF and Wiltshire Core Strategy housing targets on land within the settlement boundary because the proposed changes removed land with only minor additions. This resulted in tightly constrained settlements, excluding large gardens'.                  [refer to map extracts in main report]                  Fig 1 – Residential curtilage of No.44 High Street, Sutton Veny (comprising the land within both the red and blue line)                  Fig 2 – Extract from indicative revised settlement boundary High Street, Sutton Veny</p> <p>6.3 As a result of the 'informal consultation' exercise WC note at 7.20 of the Topic Paper that 'the revised settlement boundary review methodology will include the curtilage of a property that relates more closely to the built environment, e.g. a garden), or has limited capacity to extend the built form of the settlement in terms of scale and location'. The revised settlement boundary review methodology is thereafter produced at 8.2 of the Topic Paper and reproduced at (Fig 3) here for convenience.                  [refer to table in main report]                  Fig 3 – Settlement boundary review methodology</p> <p>6.4 The qualifying criteria are clear that areas of garden should be included because these are uses which relate more closely to the built environment. The policy specifically allows for this and also allows for developments which have limited capacity to extend the built form of the settlement. The policy does not require a site to comply with both of these criteria because the policy wording uses the word or rather than and.</p> <p>6.5 The policy guards against large parcels of land coming forward by deliberately excluding areas which are more closely related to the open countryside (e.g. a field or paddock) from being included within the settlement boundary. It is important to highlight that there was a change between the draft methodology and the revised methodology regarding the definition of sites which should be excluded from the settlement boundaries. At the draft methodology stage the plan sought to exclude 'the curtilage of properties that have the capacity to extend the built form of the development. This includes large gardens'.</p>				

6.6 The revised methodology removed any reference to garden land being excluded which was in response to the 'informal consultation' exercise. It now excludes those uses which relate more closely to the open countryside e.g. fields or paddocks. There can in this context be no question that the revised methodology seeks to exclude areas of garden from the settlement boundary. As has been reported, WC also accept that the splitting of curtilages with the settlement boundary should not occur in any case following strong consultee input to this effect.

6.7 The settlement boundary as presently consulted upon does not though include the full extent of my Client's domestic garden, at present the suggested position of the boundary splits the curtilage. WC acknowledge that the positioning of the boundary is a desk top exercise and this would appear to be in part the reason for the misunderstanding in this case.

6.8 The land we are seeking allocation of was granted a certificate of lawfulness for existing use as residential garden in 2004 (Appendix 3). The application (04/01153/EUD) was described as 'change of use from pasture land to residential garden'. The site to which the certificate of lawfulness applies was granted is the same as the extent of the site shown in (Fig 1). The Council accepted in granting the certificate that the land had been part of the garden of No.44 since 1990. The Case Officer's site inspection notes records that the land is 'obvious garden – lawn, ornamental trees, shed, veg patch'. The certificate was granted after the existing settlement boundary was drafted and so was not reflected as being within the settlement boundary at that point albeit it had already been in residential use for over 10 years at that point.

6.9 Fig 4 shows an aerial photograph of the site which clearly shows outbuildings, along with vegetable patches on the site and the well mown and manicured surface. This contrasts with the agricultural field to the west of the site. There is a hedgerow running down the length of the plot along the southern boundary which is set on a raised embankment which can be seen on the aerial photograph and Figs 5 and 9. Figs 5-9 are recent photos of the plot which confirm that the site is still in use as part of the garden of No.44.

[refer to photographs in main report]

Fig 4 – Extract from BING maps (aerial view)

Fig 5 – Entrance into the garden from the High Street

Fig 6 – View of the front of the garden area and hedged boundary

Fig 7 – Domestic shed and composting spaces on the garden

Fig 8 – View looking west up the garden

Fig 9 – Embankment and hedge above marking the southern boundary of the garden

6.10 The land has been recognised formally as being within the garden of No.44 already by WC. The garden has been used for a variety of purposes includes domestic vegetable growing and as an amenity space for sitting out in, playing games and as a location for a paddling pool. The examples of land that should be excluded from the settlement boundary include uses which do not relate to the built up area of the village such as paddocks and fields. A paddock is defined in the Oxford English Dictionary as 'a small field or enclosure where horses are kept or exercised'. The use as a domestic garden cannot be said to fall within the excluded category of uses outlined in Fig 3.

6.11 The area of garden which we now seek inclusion within the settlement boundary should be included when adopting the 'revised methodology' which underpins the WHSAP because the guidance is explicit that the curtilage of property that relate more closely to the built environment (e.g. a garden) will be included.

6.11 The policy test does not require garden land to have limited potential to extend the built form of the settlement rather this test is applicable for land which relates more to the open countryside and in those cases a proposal would need to have the capacity to substantially extend the built form. In the case of my Client's land it would not extend the built form of the settlement. The land is in residential use already and there is a strong boundary to the south east which would prevent development sprawling outside of the land already in residential use.

6.12 WC have accepted in producing this revised methodology that the settlement of Sutton Veny was not properly enclosed within the existing settlement boundary. This has resulted in the draft suggested settlement boundary being expanded significantly in a south easterly direction. My

#### Appendix Q - Schedule of representations

Client's land is located in the heart of the village. More centrally than the village school and church which have been included within the settlement boundary. Likewise, the further ribbon development along the High Street to the south east and the cul de sac of Springhead and the residential development along Duck Street have been included which are more peripheral.

6.13 The land put forward here is located on the High Street within the centre of the village with key facilities like the school and church directly adjacent and the Woolpack public house in close proximity. The proposed widened inclusion of land would not extend the form of the village which clearly extends further to the south east which has been recognised in that the settlement boundary has been extended significantly. The site is well screened with the embankment and hedgerow to the south and the wall and hedge at the frontage. The adjoining land to the south east is a field so there is no risk therefore that development might leap frog if the settlement boundary is widened.

6.14 It is important to have regard to the purpose of the settlement boundary review in considering whether my Client's land should be included in full. The CS Inspector noted that where 'existing boundaries are to be retained they serve as a useful point of reference as development is expected to take place beyond the current boundary. Where these are reviewed by a subsequent DPD or Neighbourhood Plan it is expected that the review would then provide for development beyond the current settlement and the new boundary would again form the limit of development'. Indeed, the CS was only found sound on the basis that the settlement boundary review would be positively prepared. By including my Client's land this would allow for a small development to come forward to assist in meeting local housing need in Sutton Veny which to date has only delivered 2 dwellings during the CS period from 2006.

9.5 Under the auspices of the revised settlement boundary review methodology my Client's land as outlined in (Fig 1) and (Appendix 2) should be included in its entirety. The land is part of the residential garden of No.44 High Street, as formally determined when the Council granted a certificate of lawfulness in 2004 recognising the land in question as part of the garden. As garden land it must be understood to be land which relates more closely to the built environment of Sutton Veny.

9.6 The revised methodology is clear that gardens should be included within the settlement boundary with the earlier iteration of the methodology, which sought to exclude large gardens, being removed from the revised methodology. Furthermore, the revised methodology for settlement boundary review specifically excludes the prospect of subdividing gardens with the settlement boundary which was strongly opposed during the informal consultation on the emerging methodology.

9.7 Whilst not a policy requirement for garden land in large villages under the revised methodology it is clear that the inclusion of my Client's land will not extend the settlement. The site likewise has a strong boundary comprising an embankment and hedgerow boundary to the south running the length of the site and this is the appropriate 'physical feature on the ground' to mark the edge of this land with the adjacent field.

9.8 The existing methodology for settlement boundary review should therefore have included my Client's land and an amendment is sought to regularise this discrepancy. The housing shortage and lack of available supply to meet demand in Sutton Veny lend further significant weight to the land being included prior to examination of the WHSAP.

#### 8 AMENDMENTS SOUGHT TO THE WHSAP

8.1 The revised settlement boundary for Sutton Veny should be expanded to include my Client's garden in full which is depicted at (Fig 1) and (Appendix 2). This will regularise the discrepancy between my Client's site not being included and the adopted methodology for determining the position of the settlement boundary which specifically advises that gardens will be included within settlement boundaries and domestic curtilages will not be bisected by the boundary. It will be able to contribute a dwelling towards meeting the, as yet unmet, housing need in the WMCA and go towards achieving the 6 year housing land supply which the plan should be designed to deliver.

In the event that the Council is unwilling to make the amendment sought through this representation it will be necessary to address the Inspector at the examination in public because the representation raises issues which question the soundness of the plan.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Too many houses in an area that already suffers traffic congestion. This will cause further pollution affecting local residents and children from the Infant & Primary School. Extra traffic congestion will impact on the safety of children attending the school. No local GP Surgeries or large supermarket, making residents having to travel across town for these services. Residents will need to use their cars for travel to work as not many local job opportunities within walking distance. Bus services unpredictable due to traffic congestion. The extra traffic will impact local residents, the lovely views of the Cathedral as you enter Salisbury and just make it another built up area. The fields near Netherhampton Road can flood, with extra housing this will create an extra burden or may move the flooding problem to another area within Harnham.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The road from the proposed site has no continuous paving down to the A429 and there is no space on Tetbury Lane to put this in place. Tetbury Lane is a busy road used by farming vehicles and heavy lorries to Tetbury and the industrial businesses further up the road, rather than travelling via Malmesbury. The road to Tetbury already needs work to repair large dangerous potholes for vehicles and cyclists and could not cope with the undoubted increase levels of traffic with the new development. As such the new residents in these houses would increase the risk by 20% of a pedestrian accident, particularly with children and vulnerable older residents. There are no village businesses recruiting so new residents in this housing will need to travel outside of the village on a regular basis for work and schools. The public transport from Crudwell is not regular enough to fit with working hours and so will require increased vehicle traffic which as already explained is not suitable at this site.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I live at the bottom of Tetbury Lane and can assure the planners that every time there is any moderate rainfall the bottom of the lane becomes a stream. By building on already stretched drainage capacity land further up the hill this will significantly increase the flood risk for existing residences. Additional drainage facilities on site cannot proportionately account for the loss of drainage land at the Ridgeway Farm site.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The proposed plan for development of the site would represent a 20% increase in the number of houses in Crudwell. This increase is completely out of proportion to the facilities available in the village. The village school for example is already running at stretched capacity and cannot facilitate an incremental increase on this scale without needing a major reconstruction of the existing highly respected school.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>In view of the proposed Ridgeway Farm plan for 40 additional houses in Crudwell I would like to raise serious objections on a number of grounds as a resident of the village.</p> <p>Most importantly there is no strategic need for a supply of housing in this area. There is already anticipated to have an oversupply of 100 houses in the Malmesbury Community Area so the building of additional housing in an outlying village is irresponsible and poorly thought through. The Crudwell Village Plan in progress will allow the villagers of Crudwell with experience of the area, amenities and site to plan the areas of development in a considered, sustainable way. The Plan will encourage development in a proportionate manner and protect the existing village whilst welcoming future villagers in a safe and sensible way.</p> <p>I am a young person looking to purchase affordable housing in the local area and I can say with great conviction that for the reasons above, housing at a site such as this is not suitable for people looking for affordable housing such as that specified as a strategic need in Wiltshire. All of the above points show why this Ridgeway Development Plan is not in keeping with consideration of the needs of the proposed new residents, the existing residents of Crudwell nor the wider needs of Wiltshire in the future. As such I strongly object to this development and would encourage the council to consider further developments in the Crudwell area in line with the Crudwell Village Plan.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Sutton Benger			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I have lived in Sutton Benger since 1992 and have seen many changes to the village and the surrounding area over that time. Many improvements have been made and I understand that inevitably expansion and increased housing are required. I feel the village has expanded if anything too quickly in recent years and is now such a size that we need a period of consolidation to enable the support services to catch up. I feel Sutton Benger has done its fair share of expansion up until now.</p> <p>Roads, traffic management, broadband internet, parking and the primary school are all working at full capacity.</p> <p>The main point I wish to emphasise is regarding the Primary School. It is in a central position within the village such that any further expansion would have a detrimental effect. The only further space available would be for the school to re-build two storey buildings and expand somewhat onto our recreation ground. That would have a massive detrimental effect on the life and vibe of the village, as well as going against the wishes of the benefactor who gifted the Rec to the village.</p> <p>Already local residents are losing the battle against school parking traffic, and it is a matter of time before a child is injured due to the amount of traffic and the speed of driving in the 20mph zone around the school and in Chestnut Road. The school itself is in an awkward position; as a business it wants to expand but at the same time has to be seen to be doing something in case there is an accident during pick up and drop off of the kids. The publication of cardboard signs warning about parking has limited effect. The reason for the current problem is that the school was allowed to expand and build on (or use for other purposes) the staff parking area within the fenced boundary. Now we are in a situation where we have on average 14 or more visitors / staff cars parked on the residential street all day (8am-5pm). This prevents the parents finding a safe drop off area when taking the children to school. This in turn leads to parents parking inappropriately or taking risks or parking further away in local streets. If you add in the school bus having to navigate down Chestnut Road it is all very hazardous at times. The congestion is considerable at peak times; actually the problem is that the school being the size it is, is actually in the wrong place.</p> <p>If and when new housing is forced upon us here in Sutton Benger, the school should be relocated as part of the plan. It should be something the developers are required to include in the plan. It would make sense to integrate this essential asset into any further expansion plans. These plans should include a dedicated staff car park and an area designed for the safe pickup and drop off of the children. This joined-up thinking would actually provide an asset to the village and many residents would then maybe support the expansion and building of some extra housing.</p>

Comment ID:	<a href="#">899</a>	<b>Consultee</b> Nicola Bridgeman  <b>Person ID:</b> 1126445	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.12				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Wiltshire Housing Sites Allocation Plan -                      I am writing to raise my concerns in relation to the above public consultation event.                      I would like to object to the allocation of housing site 482 adjacent to Farrells Field in Yatton Keynell which is proposed for 30 houses.                      As a resident of Yatton Keynell village I acknowledge the importance of sustainable housing growth in the village however, I consider the proposal to allocate one development of 30 houses at the edge of the Yatton Keynell village is unsustainable and will have a negative impact on the future of the village.                      I have the following concerns about how the selection process of this site has evolved. I believe the proposed housing sites allocation plan is unsound and is not consistent with national planning policy for the following reasons:</p> <p>Issue:                      No evidence of housing need for Yatton Keynell                      Details:                      Appendix E of the Chippenham Community Area topic paper) confirms that no local housing needs survey was undertaken as part of the plan. The proposed dwellings should be justified with evidence that there is a specific local need.                      Relevant National Policy in conflict with:                      paragraph 158 of the NPPF which states: 'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic , social and environmental characteristics and prospects of the area. Strategies for housing and other uses are integrated and they take into account relevant market and economic signals'.</p> <p>Issue:                      Lack of a Neighbourhood Plan                      Details:                      At a Parish Council meeting back in November 2014 there was a call for a Neighbourhood Plan to be made so that residents can engage in how many and where future housing might take place.                      Relevant National Policy in conflict with:                      Para 155 of NPPF</p> <p>Issue:                      Site selection process unsound                      Details:</p>			

Appendix Q - Schedule of representations

	Sutton Benger has an identified need and no housing has been allocated. Yatton Keynell has no identified need yet 30 houses are proposed Relevant National Policy in conflict with: Para 159 of the NPPF

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Figure 5.18 H2.14 Court Orchard/ Cassways, Bratton		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I do not have the detailed legal knowledge to be able to say that this plan is legal. I have therefore declined to check the legal box. However likewise I am not able to say that is not legal. There should be the option to check a 'don't know' box.</p> <p>p5.117 The proposal already notes that it is "within a Special Landscape Area. A part of the site also adjoins the Bratton Conservation Area." The proposal will most definitely impact on the landscape as viewed from the historic site of Bratton Camp and adjacent high ground. It will also damage the nature of the conservation area, notably by the increased traffic through it.</p> <p>The only way this plan could potentially be made sound is by halving the number of dwellings and making provision for green space, a childrens' play area, woodland, screening and by having dual access roads.</p> <ol style="list-style-type: none"> <li>1. The inclusion of this many dwellings and at such a density in this location will have a really damaging impact on the special landscape value of the area and the conservation of Bratton's heritage and history.</li> <li>2. The proposed development is completely out of place in the location proposed and more appropriate to a town centre setting.</li> <li>3. The local planning authority has already twice rejected development plans for the site in question and considered that "the edge of the existing village is well defined and that the housing development proposed, together with the access road thereto across the field in front, would be a substantial intrusion into the rural landscape, and would therefore be detrimental to the character and scenic quality of the area." Nothing else has changed in the area so these decisions should still stand.</li> <li>4) If the plan should be adopted (in any form) then measures MUST be put in place to restrict HGV and construction traffic from using Court Lane, and attempting the dangerous junction onto the B3098 at Tollgate House.</li> </ol>

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Figure 5.18 H2.14 Court Orchard/ Cassways, Bratton		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I do not have the detailed legal knowledge to be able to say that this plan is legal. I have therefore declined to check the legal box. However likewise I am not able to say that is not legal. There should be the option to check a 'don't know' box.  p5.119 The space for the proposed woodland planting has not been identified, and clearly cannot be accommodated within the area identified. A single row of trees would not constitute 'woodland' and will take years to provide any significant screening, especially from the B3098 and area of natural landscape towards Bratton camp. The only way this plan could potentially be made sound is by halving the number of dwellings and making provision for green space, a childrens' play area, woodland, screening and by having dual access roads. 1. The inclusion of this many dwellings and at such a density in this location will have a really damaging impact on the special landscape value of the area and the conservation of Bratton's heritage and history. 2. The proposed development is completely out of place in the location proposed and more appropriate to a town centre setting. 3. The local planning authority has already twice rejected development plans for the site in question and considered that "the edge of the existing village is well defined and that the housing development proposed, together with the access road thereto across the field in front, would be a substantial intrusion into the rural landscape, and would therefore be detrimental to the character and scenic quality of the area." Nothing else has changed in the area so these decisions should still stand. 4) If the plan should be adopted (in any form) then measures MUST be put in place to restrict HGV and construction traffic from using Court Lane, and attempting the dangerous junction onto the B3098 at Tollgate House.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I do not have the detailed legal knowledge to be able to say that this plan is legal. I have therefore declined to check the legal box. However likewise I am not able to say that is not legal. There should be the option to check a 'don't know' box.  p5.121 Even if the main access is to the B3098, there is no practical way of managing the impact of the additional traffic on properties in Court Lane and Trowbridge road. Court Lane in particular is winding, steep and narrow and lacks footways. There are already incidents where vehicles are damaged by passing traffic. Horseriders, pedestrians and cyclists are put at significant risk by vehicles travelling at excessive speed. Oversized vehicles get stuck. The resultant construction traffic will further damage the fragile road surfaces. The B3098 itself has serious accident black spots including one near the proposed junction. It carries a dangerous mix of road users, notably with many cyclists. Increasing the volume of traffic on this inadequate route will only make the situation worse. The only way this plan could potentially be made sound is by halving the number of dwellings and making provision for green space, a childrens' play area, woodland, screening and by having dual access roads. 1. The inclusion of this many dwellings and at such a density in this location will have a really damaging impact on the special landscape value of the area and the conservation of Bratton's heritage and history. 2. Appendix Q - Schedule of representations

Comment ID:	<a href="#">908</a>	<b>Consultee</b> Mr Robert Quarm  <b>Person ID:</b> 1126187	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Development H3.1		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan to site 640 houses on the Netherhampton Road seems to me to be unfeasible. Strategically the site is poorly placed. There is minimal local employment so residents would have to travel through Salisbury to access local jobs or commute elsewhere, access secondary schools or other of the City's amenities. The proposed site is not within walking distance of the City Centre which would also increase traffic.</p> <p>Most of the recent developments have been placed to access the Park and Rides – this development does not and would significantly increase traffic along the Harnham Road and Gyrotory which is already at capacity and is not conducive to sufficient alteration to ameliorate the problem. This would result in an increase in noise pollution, air pollution and a decrease in safety.</p> <p>I doubt development could be successful without a proper relief road for the whole of Harnham.</p> <p>5.130 Note: The site was previously rejected.</p> <p>5.132 indicates that 'The site has a strategic role as a possible destination for the relocation of businesses to allow the redevelopment of the Churchfields strategic allocation of the WCS'</p> <p>It is unclear how much of Churchfields Industrial Estate might be incorporated in or near the new development. What assurances could be given that this would not eventually constitute the whole of Churchfields? Heavy traffic would further disrupt the Netherhampton and Harnham Road and gyrotory and lead to an increase in HGV's, traffic fumes and noise for the residents on top of that from the extra residential quota. There must be figures for the traffic requirement of the current Churchfields site – it would be interesting to know what this is in terms of volume, type of vehicle and peak timings as well as the original source locations of the service traffic.</p> <p>I agree with a previous correspondent that there is potential for some housing near to the Britford Park and Ride and the Hospital which should be considered in preference; this area would also benefit from a new School.</p> <p>It might also be sensible to move the Churchfields development and some housing nearer the A303 as it now looks as though plans to widen the A303 (including Stonehenge tunnel) will come to fruition. Locating Churchfields on the North side of Salisbury would likely decrease traffic coming into Salisbury residential areas, improve access for the site and allow for future expansion, which would be to Salisbury's benefit.</p> <p>5.136. It would be useful to know what improvements could be made that could ameliorate the cumulative impacts of the proposal. Lack of prior planning in this area is not encouraging.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Having consulted the residents of the Parish and discussed the proposals with Baroness Jane Scott of Bybrook, Yatton Keynell Parish Council (YKPC) has the following comments on the inclusion of this site in the draft Housing Site Allocations Plan.</p> <p>Principle This site has a history of planning applications for commercial usage and currently, a beneficial interest is registered at HM Land Registry in the name of Charles Church Developments Limited.</p> <p>We considered the potential benefits that might accrue to the local economy from this development and we have discussed the proposal with representatives from the school governors and the GP practice. Both have indicated they would benefit from a manageable increase in numbers and It is therefore concluded that the development of this site with up to 30 houses will serve to maintain local commerce and services. YKPC is aware that many residents of Farrells Field object to the inclusion of site 482 in the SLHAA. We understand their concerns and agree that the issues they have raised will need to be fully addressed in the event that Planning Permission for a development is submitted. However, at this stage in the process, YKPC has no compelling objection to the principle of site 482 being included in the SLHAA</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Having consulted the residents of the Parish and discussed the proposals with Baroness Jane Scott of Bybrook, Yatton Keynell Parish Council (YKPC) has the following comments on the inclusion of this site in the draft Housing Site Allocations Plan. Sustainability Appraisal We consider that the Sustainability Appraisal may have understated the adverse effects associated with this site. Two have been included; the need to reinforce the local water network and the problems associated with surface water drainage. Both are rated as moderate. YKPC believes that the known surface water drainage problems in this area could pose a greater problem than is being suggested. In particular, should a SuDs system be contemplated, its long term management and associated cost would need to be considered. YKPC wishes to record that any detailed plans that are submitted for this site in the future must include a rigorous appraisal of these issues together with robust plans for the installation and management of any necessary amelioration schemes.

Sustainability Appraisal It is also our view, in the light of recent experience in the village, that the sewage system would need to be enhanced. Notwithstanding that a pumped system may be required for the development itself, we doubt that there is sufficient capacity in the current system to cope with an additional 30 dwellings. Again we would look to see that a proper appraisal of sewer capacity is conducted and any recommendations for improvement implemented.

## Appendix Q - Schedule of representations

Comment ID:	912	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1126488	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12 East of Farrells Field			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Having consulted the residents of the Parish and discussed the proposals with Baroness Jane Scott of Bybrook, Yatton Keynell Parish Council (YKPC) has the following comments on the inclusion of this site in the draft Housing Site Allocations Plan.</p> <p>Sustainability Appraisal</p> <p>We also note that two options have been set out for vehicular access; one directly from the B4039 and the alternative through Farrells Field. YKPC strongly prefers the creation of a new access directly from the B4039. In this regard, the Chairman spoke to Baroness Scott of Bybrook on 24 August 2017 and she too supported this option and agreed to notify officials accordingly. At the meeting of YKPC on 4 September 2017 she confirmed that this had been done.</p> <p>Wiltshire Council had no objection to such access when a previous application for a commercial development was lodged, (N/10/3160), and an email from the Development Control Engineer, Sustainable Development dated 31 August 2010 records that he simply wished to be consulted over the visibility splay. Both the Baroness Scott and the Chairman acknowledged that pedestrian access through Farrells Field might be beneficial as this would aid the partial separation of vehicular and pedestrian traffic.</p> <p>We therefore request that the draft SLHAA is amended to state that the preferred vehicular access to any new development is to be directly from the B4039. We would also wish to put on record that YKPC will object to any detailed plans that do not include provision for vehicular access directly from the B4039.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.12 East of Farrells Field			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Having consulted the residents of the Parish and discussed the proposals with Baroness Jane Scott of Bybrook, Yatton Keynell Parish Council (YKPC) has the following comments on the inclusion of this site in the draft Housing Site Allocations Plan.</p> <p>Sustainability Appraisal</p> <p>It should also be noted that according to Wiltshire Council's records, the track that runs from the B4039 between Blacksmith Close and the By Brook Valley Primary School does not appear to be a public right of way. YKPC recommends that this is regularised as by long standing custom this track is used as such. In addition the draft SHLAA describes site 157 as partially completed or committed. This site is Blacksmith Close and was completed as long ago as 2007. It might be appropriate to amend the record accordingly.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>3) Insufficient Transport Structure:                      Para 5.128 Draft Allocation Plan quotes: "The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS". There is absolutely no evidence to support this and it is misleading of the Council to suggest otherwise. The Salisbury Transport Strategy of November 2012, acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating near full capacity. Since then traffic has increased considerably (figs) and I see no new plans in place to accommodate the dramatic increase that would occur if the Netherhampton Road allocations were allowed. The Plan already acknowledges in Para 5.136 that the current Transport Strategy does not contain measures to support the proposed allocations:</p> <p>"Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy."</p> <p>As a daily user of the A3094 I see little scope to widen this road in many places as it is constrained by housing on both sides, has several busy junctions and critical traffic pinch points. No solution to the traffic problems that Netherhampton and Harnham residents suffer has been forthcoming in the 23 years I have lived here, and the likely implications of the proposed housing allocations are being woefully ignored. Page 161 of the South Wiltshire Core Strategy (covering S1027 and S1028) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". I can find no evidence that this has been carried out.</p> <p>Full consultation necessary with Environment Agency, Highways Agency, Wessex Water, Natural England, Heritage England.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Sites H3.1 and H3.3		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>4) Flooding and Drainage Impacts have not been addressed: I find it worrying that the Council is considering building on areas that have a well- documented flood risk. The flood warning alert area for the River Nadder at West Farnham is contiguous with S1027. By reducing the area of natural flood plain and increasing run off, this plan can only worsen the situation. Netherhampton and all of the fields to the north of the A3094 are routinely waterlogged and S1037 is often under water in wet periods. There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. I understand the existing sewage pumping infrastructure is already operating at near capacity. Full consultation necessary with Environment Agency, Highways Agency, Wessex Water, Natural England, Heritage England.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>5) Increased Noise &amp; Pollution                  A proposal in 2014 for around 70 houses, plus a public house or hotel, on a site in Netherhampton was withdrawn after it was proved that vehicle noise from the A3094 would exceed Government guidelines. There is no evidence that consideration has been given to the much greater impact from over 700 dwellings.                  The recent road works along Harnham New Bridge caused major traffic jams in Harnham, Netherhampton and Wilton because of increased traffic using the A3094 as a diversion. The increased noise and pollution, not to mention the risk to cyclists and pedestrians, was a major issue for Harnham and Netherhampton residents. I estimate at least 600 more vehicle journeys per day will be generated by the 1,600 (700 x 2.3 avg. household) dwellers.                  Full consultation necessary with Environment Agency, Highways Agency, Wessex Water, Natural England, Heritage England.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advise that Wiltshire proposes to: <ul style="list-style-type: none"> <li>• Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and</li> <li>• Allocate new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</li> </ul> I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster as I consider your draft plan is not sound for the following reasons: <ul style="list-style-type: none"> <li>• Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development and merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers, a site which is capable of significant expansion with provision of relevant infrastructure and suitable access.</li> <li>• Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after extremely careful and detailed analysis selected the Warminster West Urban Extension as the site for 1 development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and most importantly provide the supporting infrastructure that will make the site sustainable.</li> <li>• Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</li> </ul> For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.

		<b>Person ID:</b> 1126508	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Warminster site allocations			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Council's Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">923</a>	<b>Consultee</b> Partridge Homes (Cotswolds)Ltd  <b>Person ID:</b> 1037118	<b>Agent</b> Mr Paul Jenkins SF Planning Limited  <b>Person ID:</b> 1126480	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Partridge Homes (Cotswolds) Ltd Response to pre-submission draft Wiltshire Housing Site Allocations Plan September 2017 SF Planning Limited has been instructed by Partridge Homes (Cotswolds) Ltd ('Partridge Homes') to submit a response to Wiltshire Council's pre-submission draft Wiltshire Housing Site Allocations Plan ('HSAP'). This representation has been submitted in the backdrop of our Client's interest in land at Dairy Farm Bungalow, Ashton Keynes, which has a pending planning application (Reference: 17/06974/FUL) for additional housing to meet local needs as identified in the Ashton Keynes Neighbourhood Plan. The site at Dairy Farm Bungalow (SHLAA site 702) is currently not proposed to be allocated for housing within the HSAP, despite it being the only site within Ashton Keynes which made it through to Stage 2b of the assessment of large villages as detailed within the Malmesbury Community Area Topic Paper, Wiltshire Council (June 2017). There is no clear rational for not allocating this site within the Topic Paper Dairy Farm, Ashton Keynes should be considered alongside or instead of other "Large Village" allocations within the draft HSAP. Dairy Farm Bungalow, Ashton Keynes As the table overleaf demonstrates, Dairy Farm should be considered alongside and/or replace the site allocations within "Large Villages" detailed within Policy H2 and table 5.3 North and West Wiltshire Housing Market Area. All allocations detailed below are either all or part outside current settlement boundaries and are within settlements of comparable sizes. Indeed, all settlements proposed to be allocated housing within the HSAP are actually smaller in population. [REFER TO TABLE IN ORIGINAL REPRESENTATION REPORT] The Dairy Farm Bungalow site is currently agricultural land/fields in very close proximity to the village centre, the school and is adjacent to the existing developed area along Gosditch to the south of the site and the pumping station to the northwest. The site is very close to the services within Ashton Keynes including village hall, village shop, public house and bus routes through the village and beyond. Additional housing at this location is no more or less sustainably located than existing adjacent housing or any of the proposed allocations within the table above. This parcel of land is a logical and well-contained extension to the village. The site would preserve the settlement pattern and not result in development sprawl into open countryside. The site does have constraints including its location within a conservation area and its position adjacent to other heritage assets as well the very northern part of the site being located within a flood zone. These can be overcome through the detailed design and technical solutions within the final scheme (as demonstrated within the current planning application). Recommendation: These matters should not prevent the allocation of the site for housing which would deliver much needed affordable housing (as identified within the neighbourhood plan) in a sustainable location. All above matters have also been robustly addressed within the currently pending planning application for additional housing on the site.			
		Effective		Consistent with national policy

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It should be clearer within the HSAP housing numbers are indicative and are not maximum figures; Housing Need Core Policy 1, 2 and 13 of Wiltshire's Core Strategy relating to "indicative" housing numbers should be regarded as the minimum requirement. This is in accordance with paragraph 47 of the NPPF, which seeks to significantly boost the supply of housing. Our Client welcomes acknowledgement of this at paragraph 4.36 of the draft HSAP, which sets out that levels of housing development in settlements and rural areas are indicative levels of growth and are approximate further confirming these are neither minimum nor maximum figures. However, this fact needs to be made clearer throughout the site allocation policy tables. In addition, the Government are consulting on a number of proposals to reform the planning system to increase the supply of new homes including a standard method for calculating local authorities' housing need, which will need to be reflected within the HSAP as required. Recommendation: Within the site specific policy tables (i.e. H1 – H3) it should explicitly reference the fact that these "site allocations" for housing development in settlements and rural areas are "indicative levels" of growth and are approximate and not maximums, as the current wording is unclear. The updating of the methodology for calculating housing need should be incorporated as required.</p> <p>See accompanying cover letter.</p>

			Effective	
			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The general development boundary approach advocated in the HSAP is outdated and not sufficiently flexible to boost housing supply</p> <p>Development Boundary Approach</p> <p>It is clear the Core Strategy indicates housing requirements for settlements should be dealt with on a flexible basis, given the housing targets are a minimum requirement. It is difficult to see how an inflexible development boundary approach proposed within the draft HSAP could be considered to comply with the NPPF and minimum housing requirements within the Core Strategy. The inflexible approach will also result in the potential future housing which may be derived from the updating of housing need calculations, being impossible to meet.</p> <p>Recent appeal decisions have highlighted the failure by the Council to have regard to housing targets set out in the Core Strategy as a minimum requirement.</p> <p>In this regard, a recently allowed appeal decision on land at Boreham Road, Warminster (Appendix 1 - Appeal Ref: APP/Y3940/W/16/3150774) on the 20th July 2017 is relevant. This site was also outside the settlement boundary as defined within the 2006 NWLP and locally adopted NP but close to local services.</p> <p>This decision was called in by the Secretary of State (SoS) who concluded the Council at the time of the decision could demonstrate a 5 year supply of housing land but;</p> <p>“.....that this does not negate the benefits arising from the proposed development, particularly the contribution to custom built housing and affordable housing. In line with paragraph 47 of the Framework, which requires local authorities to boost significantly the supply of housing, he takes the view that the five-year requirement is a minimum and not a cap.” [Our emphasis] (Paragraph 17 – Appendix 1)</p> <p>The Secretary of State went further in the decision at Warminster and confirmed “significant weight” was attributed to affordable housing provision, the location of the development and proximity to services, provision of the new homes bonus and jobs during construction.</p> <p>This recent and highly relevant appeal decision and further highlights the need that housing requirements set out in the Core Strategy are indicative minimum figures and not a “cap” on further sustainable housing development. This decision further demonstrates the settlement boundary approach is outdated and will not help to boost housing supply.</p> <p>In summary, the general approach settlement boundary approach is likely to;</p> <ul style="list-style-type: none"> <li>Result in potentially harmful “infill” development within the settlements as every available area of land competes for development resulting in a potential reduction in the landscape quality and character of that village;</li> <li>Increase land values, which will result in the delivery of less on site affordable housing;</li> <li>Constrain housing supply as the approach is crude and inflexible;</li> <li>Restrict the supply of medium scale sites which provide the opportunity to secure on site affordable housing;</li> <li>Result in garden land development within houses within a settlement boundary.</li> </ul> <p>Recommendation: We would request that the need for the settlement boundary is reviewed to ensure development which cater for social needs (including affordable housing, and self-build housing) in sustainable locations are acceptable in principle and can be approved to help boost</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The development boundary more specifically proposed for Ashton Keynes is not sufficiently flexible to boost housing supply including the required affordable homes outlined in the adopted Neighbourhood Plan;</p> <p>Ashton Keynes Settlement Boundary</p> <p>As currently proposed within the draft Wiltshire Housing Site Allocations Plan, the “settlement boundary” around Ashton Keynes is proposed to shrink.</p> <p>This is despite a general national policy shift to seek to boost housing supply. More specifically, at a local level there is a clear need, as set out within the adopted Neighbourhood Plan (‘NP’) for the area, to provide more affordable homes, which are more likely to be delivered with open market housing cross-subsidy.</p> <p>The housing objectives within the NP place a high priority on the provision of affordable housing to meet the needs of the parish along with ensuring housing is available to meet local people’s needs as they change.</p> <p>Given the settlement boundary around Ashton Keynes is proposed to be reduced in size, there is very little prospect of a viable and deliverable site coming forward of a scale that will be able to provide onsite affordable housing.</p> <p>Recommendation: As above, we would request that the need for the settlement boundary is reviewed to ensure development which cater for social needs (including affordable housing, and self-build housing) in sustainable locations are acceptable in principle.</p> <p>See accompanying cover letter.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The capacity to accommodate 40 dwellings is unachievable and unsound. The existing 1970s Manor Fields estate, within Bratton, is on a plot of approx. 26057 m2 with 66 dwellings of mixed type (detached and semi-detached). Averaged, including open space and essential infrastructure, that's approx. 395 m2 per property.</p> <p>Site 321 is a plot of approx. 12090 m2. With 40 dwellings proposed, of mixed type, this averages at 302 m2 per property.</p> <p>Parking on the Manor Fields development is a significant problem, as vehicle ownership exceeds that planned for and expected in the 1970s. Effective parking, with a housing density 125% of that of Manor Fields, on Site 321, is unachievable. Parking conflicts at/around the site/B3098 interface will likely occur. Parking maybe forced onto the B3098 as there will be insufficient physical space available.</p> <p>Expressed alternatively, The Site 321 density proposal is equivalent to increasing Manor fields from 66 to 83 dwellings. To quote Table F4, Assessment Results, "The site is in a reasonably accessible distance from the limited services available in Bratton, but overall residents are likely to rely upon use of the private car to reach larger services and facilities (SA Obj. 10). "</p> <p>The Topic Paper acknowledges car use will be high and seeks to develop beyond an achievable density.</p> <p>Site 321 is not suitable for this density of housing. In the surrounding area there are no off-site options. Site 321 should not be developed. Site 321, if developed, cannot support 40 dwellings.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1.0 INTRODUCTION</p> <p>1.1 This representation is submitted on behalf of Barratt Homes in respect of their land interests to the south of Elizabeth Way, Trowbridge. It responds to the Pre-submission Consultation evidence base which includes; Topic Papers, Technical Reports and Consultation Statements, and in doing so, outlines how development of the Land at Elizabeth Way would contribute to the achievement of the proposed spatial and sustainability objectives. A location plan for the site has been attached to Appendix 1.</p> <p>1.2 The initial scoping exercise for the Wiltshire Housing Site Allocations DPD began in April 2014 with both formal, and informal consultations taking place with Town and Parish Councils. The main bulk of evidence gathering and plan preparation took place from January 2015, up until May 2017. On 20th June 2017, the pre-submission draft of the Wiltshire Housing Site Allocations DPD was submitted to Cabinet, and was subsequently approved.</p> <p>1.3 The Pre-submission Representation form requests feedback on whether it is commonly considered that the Site Allocations Plan is sound. There is much in the plan that we support, but at present, our response is that the draft Site Allocations Plan is unsound as it has not been positively prepared and is not justified. This is primarily due to the fact that the indicative housing requirement which has been set for Trowbridge has not been met through the proposed allocations. We have set out our justification for reaching this view in more detail in the following sections.</p> <p>2.0 SOUNDNESS OF THE PLAN</p> <p>2.1 This section of the representation seeks to review relevant planning policy relating to the provision for housing, and on this basis, whether the local planning authority has prepared a Local Plan that is sound.</p> <p>Delivering housing need</p> <p>2.2 The NPPF sets out 12 Core Principles which have been formed to underpin plan making, one of which is particularly relevant to making provision for housing. This states that planning should,</p> <p>“Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other</p>				

#### Appendix Q - Schedule of representations

development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities” (NPPF, para 17)

2.3 Further guidance on the delivery of housing is set out in Para 47 of the NPPF and states,

“To boost significantly the supply of housing, local planning authorities should: use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period; identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements...” (NPPF, para 47)

2.4 In terms of ‘Local Plan making’ it is critical to the success of a plan that the Local Planning Authority positively plan to deliver homes, whilst also allowing for some flexibility. Paragraph 157 of the NPPF states that,

“Crucially, Local Plans should:

Plan positively for the development and infrastructure required in the area to meet the objectives, principles and policies of this framework.” (Paragraph 157)

2.5 The NPPF is clear that Plans will need to ensure the delivery of their strategy for housing and the main way of doing so is the allocation of specific, sustainable and deliverable sites.

#### Soundness Test

2.6 When assessing whether a plan is considered to be sound, Paragraph 182 of the NPPF identifies the 4 main factors which the LPA need to consider:

“A local planning authority should submit a plan for examination which it considers is “sound” – namely that it is:

Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;

Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;

Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and

Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.” (NPPF, para 182)

2.7 The deliverability of a Plan features as one of the key tests of soundness and the PINS Procedural Practice in the Examination of Local Plans (June 2016, para 1.1) stresses this point:

...“the plan should focus relentlessly on the critical issues and the strategies to address them, paying careful attention to deliverability and viability. This approach may raise uncomfortable questions but the whole point of the plan is to address the critical issues as far as possible.” (Section 1: Pre-submission, Para. 1.1)

## Appendix Q - Schedule of representations

2.8 The Wiltshire Housing Site Allocations Plan is not sound as it is not positively prepared, justified, effective, nor consistent with national policy on housing delivery and plan making. This plan should be prepared based on the Wiltshire Core Strategy objectives which seeks to meet the objectively assessed housing need by the end of the plan period.

2.9 We set out the reasons why the draft plan is unsound in its current form below:

The plan is not positively prepared because less than half of the indicative housing requirement allocated for delivery within Trowbridge has not been met, proving that the draft proposals have not been consistently prepared using the evidence gathered.

The Plan is contradictory to, and does not reflect, the strategy which was set and approved by the Inspector of the Core Strategy in December 2014.

The plan is not justified as it does not propose to make efficient use of land to be allocated through the Site Allocations Plan.

### 3.0 INDICATIVE HOUSING REQUIREMENT FOR TROWBRIDGE

3.1 The six draft housing allocations identified within Trowbridge will provide land for approximately 800 dwellings. This figure falls significantly short of the indicative minimum requirement of 2,020 dwellings set for Trowbridge over the plan period, by around 1,220 dwellings. Topic Paper 4 'Developing Plan Proposals' of the Housing Site Allocations evidence base has identified two reasons for this under provision of housing within Trowbridge:

The delay of developing Ashton Park Urban Extension, which was allocated through the Wiltshire Core Strategy for 2,600 dwellings to be built on site within the plan period, up to 2026. It has now resulted in only 1,600 dwellings being built within the plan period and the remaining 1,000 dwellings will be built post 2026. This accounts for 1,000 dwellings out of the 1,220 dwellings shortfall;

Inability to identify land free from environmental constraints which could compensate for the consequences of the delay to the Ashton Park development.

3.2 The purpose of the Wiltshire Housing Site Allocations process is to address the shortfall of housing over the remainder of the plan period, up to 2026. Once adopted, the Plan will become an implementation mechanism to the Wiltshire Core Strategy (WCS) which should ensure that the housing requirements set by the WCS are met. It is important to note that Paragraphs 77-79 of the Inspector's Report for the Wiltshire Core Strategy (dated December 2014) refers to Wiltshire's Objectively Assessed Need (OAN) being significantly higher than planned for through the Core Strategy, being in the region of +44,000 dwellings,

"Whilst the achievement of such a figure should be subject to careful monitoring, the evidence indicates the fluctuations that can occur in the delivery of housing but does not conclusively indicate that such a delivery rate cannot be met during the course of the plan period to deliver the significant boost in housing required to go some considerable way to meeting needs. Against this context and mindful of the content of the LDS (partial CS Review), the subsequent intended early review of the CS, the Sites DPD, the Chippenham Site Allocation DPD and the neighbourhood planning processes will enable the Council to proactively seek to meet, and if necessary reassess, its objectively assessed housing need and plan for its provision accordingly." (Inspectors Report, Paragraph 80)

3.3 With this in mind, it is critical that the Wiltshire Housing Site Allocations Plan is positively prepared to allocate sufficient land as required to address the current undersupply of housing within Trowbridge that has arisen due to strategic site delays. The acknowledgement that 1,000 dwellings previously anticipated to be built at Ashton Park will now be delayed until the next plan period is reason to ensure that sufficient flexibility is included through the Site Allocations Plan,

"Consequently, I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more." (Inspectors Report, Paragraph 81)

Appendix Q - Schedule of representations

	<p>3.4 In accordance with Paragraph 47 (bullet point one) of the NPPF, in order for the plan to be sound it must use the baseline evidence gathered to ensure that the full objectively assessed housing needs set out in the Core Strategy are met. This is currently not the case, and is demonstrated by the 1,200 dwelling shortfall in Trowbridge.</p> <p>4.0 FIVE YEAR HOUSING LAND SUPPLY</p> <p>4.1 In order to make the plan sound, the Wiltshire Housing Site Allocations Plan should identify sufficient land to meet the overall housing requirement for Trowbridge.</p> <p>4.2 Wiltshire Council have previously stated that the ‘Liverpool Method’ appropriately reflects the delivery strategy set out within the Wiltshire Core Strategy for calculating housing supply. The ‘Liverpool method’ of calculating 5-year supply aims to spread the delivery of housing over the plan period, and not to front-load any under-provision to date. We are of the view that the ‘Sedgefield approach’ conforms more closely with the requirement to plan positively as it seeks to boost significantly the supply of land for housing in the early part of the plan period. In either method, in order to rectify the current housing shortfall over the remainder of the plan period (up to 2026) the Site Allocations Plan must maximise the identified sustainable development opportunities within Trowbridge, which will in turn help to bolster the housing supply in the area.</p> <p>4.3 Chapter 5 of ‘Topic Paper 4- Developing Plan Proposals’ of the evidence base focuses on the requirements set for the North and West Wiltshire Housing Market Area (HMA). Table 5.6 (below) has been included, which itemises the Councils projected level of housing supply from 2017–2026 for the North and West HMA. As you can see it is consistently above 7 years up to 2024, when supply drops to 5.3 years in 2025/2026. [refer to table in attached representation document]</p> <p>4.4 A housing trajectory has not been included within the evidence base, instead the Housing Land Supply Statement published in March 2017 is referred to, which identifies a 5.73 years supply (Appendix 2). This raises the question, are Wiltshire Councils updated housing supply projections realistic?</p> <p>4.5 Further to this, we refer to the appeal case at ‘Land to the West of A365 Shurnhold, Melksham’ (APP/Y3940/W/15/3132915), decided in October 2016, where the Inspector concluded a housing supply of 4.25 years within the North and West HMA. As such, it is difficult to understand how this level of delivery, set out in the table above, will be achieved within the North and West HMA.</p> <p>4.6 We have seen no justification to demonstrate how the stated level of housing provision will achieve the levels set out in the plans 2016 trajectory.</p> <p>4.7 In order to make the plan sound additional evidence needs to be provided as to how the Councils will maintain a 5-year supply. In order to assist them in doing so: Wiltshire Council need to maximise housing capacity within the identified proposed allocations; Ensure that the proposed Allocations are deliverable sites, and able to come forward soon after the adoption of the plan.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4711773 / 4711774</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To ensure that our reps can be expanded upon if necessary and to fully explain why we feel the current plan is unsound.</p> <p>6.2 The Housing Site Allocations Document is unsound as it has not been positively prepared and is not justified due to the fact that the indicative housing requirement which has been set for Trowbridge has not been met through the proposed allocations. The plan is not positively prepared because less than half of the indicative housing requirement allocated for delivery within Trowbridge has not been met, proving that the draft proposals have not been consistently prepared using the evidence gathered.</p>

Comment ID:	<a href="#">935</a>	<b>Consultee</b> Barratt Homes  <b>Person ID:</b> 392036	<b>Agent</b> Ms Robyn Nicholl Planning Officer  Barton Willmore  <b>Person ID:</b> 1126545	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.3 Elizabeth Way		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>5.0 TECHNICAL ISSUES</p> <p>5.1 The site at Elizabeth Way (SHLAA 263) encompasses approximately 16.33ha of land is proposed to be allocated for a total of 205 dwellings. It is acknowledged that due to the proximity of the site to Hilperton Gap, and the location of the Bradford and Bath Bats SAC to the south of Trowbridge, the site may have constraints which will need to be addressed prior to development. In order to gain a better understanding of these issues Barratt Homes have undertaken various technical assessments on the site, south of Elizabeth Way, which have proven that a higher quantity of housing is possible on the site.</p> <p>5.2 A Vision Document has been produced, submitted alongside this representation, which sets out the proposed design principles for the site and summarises the specialist technical input received to date. A summary of the key issues is set out below.</p> <p>Site Boundary</p> <p>5.3 In respect of the site boundary identified for the proposed allocation at Elizabeth Way set out within 'Policy H2.3' we would like to highlight a critical point, the site boundary identified on the plan does not align with Elizabeth Way Relief Road. We understand from discussions with Planning Policy Officers that this is an error that will be corrected prior to the submission stage, and will ensure that the site boundary for the proposed allocation meets the boundary of Elizabeth Way.</p> <p>5.4 Without this change the Plan is not sound as it does not make efficient use of land and is therefore not the most appropriate strategy when considered against all alternatives.</p> <p>Capacity of Site</p> <p>5.5 The site at Elizabeth Way (SHLAA 263) has been identified for the allocation of 205 dwellings, which is significantly lower than what the site could sustainably deliver. This raises the issue of major under-development of the site which, in combination with the required housing figures, highlights the fact that the current proposed allocation has not been positively prepared or justified.</p> <p>5.6 Using the evidence gathered by the technical assessments we have calculated that the site in question can sustainably accommodate approximately 175 dwellings, which in combination with the current planning application submitted to the west of the site (16/00672/OUT) would equate to 355 dwellings, prior to the eastern section of the site allocation coming forward.</p>				

Appendix Q - Schedule of representations

	<p>5.7 In order to make the plan sound, the allocation for the land at Elizabeth Way should be increased significantly to properly reflect the true capacity of the site.</p> <p>the Plan does not propose to make efficient use of land to be allocated by increasing numbers where possible, which is unsustainable and not consistent with National Policy. The Plan is not justified as it does not propose to make efficient use of land to be allocated.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4711773 / 4711774</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To ensure that our reps can be expanded upon if necessary and to fully explain why we feel the current plan is unsound.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Ecological Constraints</p> <p>5.8 The ecological investigations, including Badger and Bat surveys, carried out to date have not raised any detrimental issues which would affect the delivery of the site, or preclude the site from development. Walked transect surveys have been completed in May and July, with a final survey planned for September 2017. Automated detectors have been deployed for a period of five nights per month between May and August (inclusive), and these will be deployed again in September and October 2017.</p> <p>5.9 The below table presents the results of the automated detector surveys between April and August (inclusive). The table includes the total number of passes (B) recorded and average passes per night (B/n) for all species. [refer to table in attached representation document]</p> <p>5.10 Overall, activity appears to be fairly low with the exception of Serotine, which is higher than would be expected, but we do not consider that this matter acts as a constraint to the development of the site.</p> <p>5.11 The ecological work undertaken by BSG Ecology Ltd. has been used to inform the Concept Masterplan, and this is reflected through the design of open space on site. The Masterplan of the site is attached at Appendix 2.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The existing roads are totally inadequate to support the large quantity of housing proposed. Wiltshire Council wishes to encourage sustainable transport but as employment opportunities in the town have diminished since the Core Strategy was created, residents would need to use cars, often for considerable distances, for employment opportunities. There are insufficient school places for more children in this area. Netherhampton village is close to flood zones. Any further building towards Harnham would potentially add to the risk of flooding. Netherhampton village is already likely to increase substantially in size if the proposed farm development is approved (a site which is not even mentioned on the site allocation plans.) As a small village, only 'infill' development should be permitted. (core strategy 4.34). Core Strategy 4.34 also states that development should not be imposed in sensitive landscape areas. The approach to Salisbury from Netherhampton is at present a beautiful landscape area which would be spoiled. Increasing quantities of traffic on the A3094 already endanger the health of residents living near the road due to the hazard of toxic emissions from vehicles. (see Public Health Appendix 4 Salisbury 35). Idling traffic in queues at Park Wall and Harnham would be particularly dangerous.</p> <p>In order to be justified or effective the A3094 and the junctions at Park Wall and Harnham would have to be improved before any development took place. HGV traffic on the road should be diverted wherever possible using other routes and a lower speed limit imposed in order to improve air quality. The development should be considerably smaller and only on the southern side of the road. More local school places and employment opportunities would need to be in place. Bus transport and more cycle lanes would need to be available.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury		Effective	
		<p>Further to our previous comments.</p> <p>The residents of Harnham and Netherhampton organised a drive-by protest on Tuesday 19th September to raise awareness of the infrastructure impact of the proposed housing allocations in Harnham and Netherhampton. Our contention is stronger than ever that the implications for transport and other infrastructure need careful consideration and a clear plan put in place BEFORE any housing allocations are made in this area.</p> <p>Tuesday's protest saw roughly 20 cars more than double the usual time to drive from Wilton to Harnham. We didn't drive especially slowly and yet those few cars which, according to TRICS data, represent less than 10% of the daily journeys that would be generated by the proposed housing allocations, created huge delays. In other words, the proposed housing allocations would mean delays that are ten times greater every day without some brave and joined up thinking by Wiltshire Council. It is already acknowledged that Wilton Lights and Harnham Gyratory are operating over capacity. We believe that Wiltshire Council should agree to remove the allocations in Harnham and Netherhampton from their draft plan until such time as a coherent and comprehensive transport strategy for Salisbury has been consulted on and formally adopted. We believe that this morning's protest will have caused many people to realise that the impact of these housing allocations without sane infrastructure provisions will be devastating for all who live and work in Salisbury. We sincerely hope that Wiltshire Council will take notice of our concerns.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Request for Settlement Boundary amendment at East Marsh Farm, 29 Lower Road, Bratton BA13 4RG</p> <p><b>BACKGROUND INFORMATION</b></p> <p>1.0 Existing Village Boundary for Bratton, Wilts is shown in blue border on Map 1. New proposed village boundary in current consultation is shown in red border on Map 1.                      Source: <a href="http://www.wiltshire.gov.uk/planninganddevelopment/planningpolicy/planningpolicydocuments.htm?directory=Wiltshire%20Housing%20Site%20Allocations%20DPD/Pre-Submission%20Consultation%20July%202017/Settlement%20Boundary%20Maps">http://www.wiltshire.gov.uk/planninganddevelopment/planningpolicy/planningpolicydocuments.htm?directory=Wiltshire%20Housing%20Site%20Allocations%20DPD/Pre-Submission%20Consultation%20July%202017/Settlement%20Boundary%20Maps</a></p> <p>2.0 East Marsh Farm is currently owned by Mr and Mrs Pilz. The property has been split into three sections for the purpose of this application. Map 3 shows in green border all three sections.</p> <p>2.1 Section 1 comprises of Grade II listed East Marsh Farm, a garage, old barn, small outbuilding and mature garden.</p> <p>2.2 Section 2 comprises of woodlands</p> <p>2.3 Section 3 comprises of a paddock.</p> <p>3.0 Google map coordinates at:  <a href="https://www.google.co.uk/maps/place/Bratton/@51.2740577,-2.1235706,487m/data=!3m1!1e3!4m5!3m4!1s0x4873d710d3b2c945:0x59775b62d220d7fd!8m2!3d51.270719!4d-2.125232">https://www.google.co.uk/maps/place/Bratton/@51.2740577,-2.1235706,487m/data=!3m1!1e3!4m5!3m4!1s0x4873d710d3b2c945:0x59775b62d220d7fd!8m2!3d51.270719!4d-2.125232</a></p> <p><b>REQUESTED AMENDMENT</b></p> <p>4.0 Changes to the proposed village boundary are shown on Map 2 in yellow border. This shows an enlarged map of the north easterly corner of Bratton. The proposed amendment affects only Section 1, East Marsh Farm, and should be fully inside the proposed village boundary.</p> <p><b>RATIONALE FOR AMENDMENT</b></p> <p>5.0 Section 1 comprises of East Marsh Farm which belongs to a set of old historic houses in Bratton, hence its grade II listing. The village border should follow the historic outline of this old farmhouse and its mature garden and avoid splitting the garden from the house, they are one unit.</p> <p>New and Old ordnance survey maps document the clear and historic border of East Marsh Farm and its buildings and garden. Other properties in Bratton's set of old historic houses have their historic borders inclusive of garden respected.</p> <p>Examples are:</p>			

Appendix Q - Schedule of representations

	<p>5.1 Yew Tree Farm and the Old Courthouse both have their historic garden now included in the proposed boundary. Map 1 marked C.</p> <p>5.2 Map 4 shows an old ordnance survey map of 1887 clearly showing the historic border of East Marsh Farm.</p> <p>6.0 Westward to section 1 is a plot that had planning permission which subsequently elapsed when Lord Twiss, the previous owner, built a Tennis Court on it.</p> <p>6.1 Since Mr Pilz's purchase of the property in 2004 the tennis court has not been used and eroded into an unusable overgrown state with plans for its eventual removal. The tennis court is far beyond repair, use and fully decommissioned (inspection welcome).</p> <p>6.2 The plot is well integrated into the residential area of neighbouring bungalows.</p> <p>6.3 It does not primarily form part of the countryside like section 3 or 4 does.</p> <p>The proposed new village boundary (Map 1, red border) shows other boundary properties that had split plots and now made whole by enlargement. This is shown as hashed lines on Map 1.</p> <p>Examples are:</p> <p>6.4 numerous bungalows marked A on Map 1.</p> <p>6.5 recently build houses with extended gardens, marked B on Map 1,</p> <p>6.6 historic buildings with mature gardens combined, marked C on Map 1</p> <p>These expansions make sense as they constitute the natural growth of a village over time.</p> <p>7.0 Section 3 and Section 4 are rightly outside the boundary and constitute part of the countryside.</p> <p>AMENDED VILLAGE BOUNDARY</p> <p>8.0 Changes to the proposed village boundary (Map 2, yellow border) comply with the same rules and rationale that allows other similar bordering properties to have their plot combined and avoid splitting. Historic properties have been made whole in the proposed boundary changes so East Marsh Farm should be treated the same.</p>

<b>Comment ID:</b>  <a href="#">953</a>	<b>Consultee</b> Ms C Mayall Southern Water  <b>Person ID:</b> 1126553	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Policy H1.1 Land at Empress Way			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We are unable to support this policy as sound on the grounds that:</p> <p>1) it is not effective as it does not support delivery of necessary infrastructure, and</p> <p>2) it is not consistent with national policy.</p> <p>This site falls within Southern Water’s wastewater supply area.</p> <p>Southern Water has no objection in principle to the allocation of the site for development. However, a capacity check carried out in accordance with paragraph 162 of the National Planning Policy Framework (NPPF) has shown that the existing capacity of the local sewerage network is insufficient to meet the anticipated demand. This is not a constraint to development however, provided planning policy for this site ensures that proposed development makes a connection to the sewerage network at the nearest point of adequate capacity.</p> <p>If development is permitted to proceed without such policy provision where there is inadequate capacity in the sewerage network, Southern Water has limited powers to prevent connection and the system could become overloaded, leading to pollution of the environment. This situation would be contrary to paragraph 109 of the NPPF, which requires the planning system to prevent both new and existing development from contributing to pollution.</p> <p>Furthermore, there could be a risk that the necessary local sewerage infrastructure will not be delivered in time to service the proposed development, unless delivery is supported by planning policies and subsequently in planning conditions. This is supported by the core planning principles identified in the NPPF, notably to: ‘proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs’ and ensure that plans ‘provide a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency’ . Our approach is also supported by paragraph 21 of the NPPF, which requires that planning policies should recognise and seek to address any lack of infrastructure. The National Planning Practice Guidance specifies that ‘Adequate water and wastewater infrastructure is needed to support sustainable development’.</p> <p>In addition, we note that the site is approximately 300m from Ludgershall Wastewater Treatment Works (WTW), which is owned and operated by Southern Water.</p> <p>Southern Water endeavours to operate its sewage and sludge treatment works efficiently and in accordance with best practice to prevent pollution. However, unpleasant odours inevitably arise as a result of the treatment processes that occur. New development must be adequately separated from WTWs to safeguard the amenity of future occupiers.</p> <p>Southern Water believe that development that is sensitive to odour should only be permitted if the distance to the works is sufficient to allow adequate odour dispersion. We would expect an assessment to be carried out that would demonstrate that there would not be a detrimental impact on amenity by reason of odour. This is supported by paragraph 120 of the NPPF which states ‘To prevent unacceptable risks from pollution [...], planning policies and decisions should ensure that new development is appropriate to its location. The effects (including cumulative effects) of pollution on health, the natural environment or general amenity, and the potential sensitivity of the area or proposed development to adverse effects from pollution, should be taken into account’). Annex 2 of the NPPF establishes that pollution includes odour and noise.</p>			

Appendix Q - Schedule of representations

	<p>To ensure consistency with the NPPF and Planning Practice Guidance, we propose the following text (new text underlined) are added to the end of Policy H1.1:</p> <p>Development will take place in accordance with a masterplan for the site approved by the Council as part of the planning application process.</p> <p>Development will provide a connection to the nearest point of adequate capacity in the sewerage network, as advised by the service provider.</p> <p>Development layout should be informed by an odour assessment, to be undertaken in consultation with Southern Water.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Site Allocations Plan allocates a total of 50 houses to Ridgeway Farm Crudwell; the current 10 under construction and a further 40. I wish to register my objection to this. The reasons for that objection can be grouped under two main headings.</p> <p><b>Strategic need</b> The plan notes that housing sites will only be allocated by Wiltshire Council where there is a strategic priority to do so. While I appreciate that Wiltshire Council needs to ensure an adequate five year housing land supply across each housing market area, the Site Allocations Plan would result in an oversupply of 4,284 dwellings to year 2026 when past completions are combined with deliverable commitments, and windfall sites are included. Even when windfalls are excluded, the oversupply is still 2,198 dwellings across the Housing Market Area. The Site Allocations Plan also results in an oversupply of homes in the Malmesbury Community Area, even without windfalls. On this basis, there seems to me to be no strategic need to identify any new homes at Crudwell, so the Wiltshire Site Allocations Plan should not do so.</p> <p>Wiltshire's Core Strategy identifies Crudwell as a large village. Policy 1 of the Core Strategy notes that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." It is hard to see how more houses will help the village in these ways, as it has little or no organic employment opportunities and little basic supporting infrastructure. More houses will only add to the current "dormitory" feel of the place and to the already heavy morning traffic that takes people to work elsewhere, as well as loading further the existing infrastructure.</p> <p><b>Practical constraints and problems associated with the site</b> A planning application for the development of some 29 houses on Ridgeway Farm was submitted to Wiltshire Council in 2014. That application drew much local opposition, principally on the grounds of the scale of the development, and its likely impact on Crudwell's infrastructure. Specifically: the likely increased traffic on Tetbury Lane; impacts on already overburdened drainage and sewerage systems and oversubscription to Crudwell Primary School. That plan was withdrawn, and a revised plan for a reduced development of 10 houses was submitted and approved (subject to a number of conditions). All the issues and concerns relating to the original proposal for 29 houses remain and a further 21 houses clearly exacerbates them. To expand further on key points:- If the allocation in the Strategic Plan remains at 50 houses, I believe that number is sufficiently large to materially harm the village in ways such as those outlined above, but not large enough to attract the funding necessary to mitigate that harm properly.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.14 Figure 5.18 Court Orchard / Cassways, Bratton				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It is not justified owing to the inconsistency with the evidence base that is still relevant as set out in the Core Strategy.</p> <p>It is not consistent with national policy because it conflicts with the sustainable requirements of the NPPF and the protection of landscape. Proposed allocation H2.14</p> <p>It is surprising this greenfield site has been suggested by Wiltshire Council as appropriate given it is contrary to its own policies and does not conform with the NPPF in terms of sustainable development.</p> <p>The Wiltshire Core Strategy (2015) advises on page 440 that Policy C3 Special Landscape Areas is a saved policy from the West Wiltshire District Plan. The proposed site is within the C3 Special Landscape Area as defined in the interactive Proposals Map. Policy C3 states: Special Landscape Areas C3</p> <p>The landscape character of Special Landscape Areas will be conserved and enhanced and development will not be permitted which is considered to be detrimental to the high quality of these landscapes.</p> <p>Proposals for development essential to the social and economic well-being of the rural community or desirable for the enjoyment of its amenities will be permitted having regard to highways, access, scale, design, materials, location, siting, landscaping and other appropriate environmental considerations.</p> <p>The proposed development of an additional 40 estate houses on the edge of the village within this open landscape is considered detrimental and contrary to this saved policy. In addition it does not satisfy the high test of "essential" to the social and economic well-being of the rural community.</p> <p>The Core Strategy also directly mentions edge of town and village sites stating:                  Development on the edges of towns and villages will be broadly controlled in line with Core Policy 3 (Delivery Strategy).                  At paragraph 4.35: it acknowledges:                  The impact of development on local communities and the fabric of the existing built and natural environment is an important consideration.                  The Core strategy discusses paragraphs 115 and 116 of the NPPF and paragraph 14 (including footnote 9), which restricts the presumption in favour of sustainable development in certain areas. This site is not in such an identified area but at paragraph 6.82 the Core Strategy recognises the importance of adjacent high quality landscapes:                  However, Core Policy 51 also addresses development outside these areas which could affect the setting of these highly valued landscapes. Clearly then Core Policy 51 is also relevant in this case not least owing to the designation of the area as SLA C3.                  Core Policy 51 - Landscape                  Development should protect, conserve and where possible enhance landscape character and must not have a harmful impact upon landscape character, ...Proposals should be informed by and sympathetic to the distinctive character areas identified in the relevant Landscape Character Assessment(s) and any other relevant assessments and studies.</p>				

#### Appendix Q - Schedule of representations

As the development would be proposed within a defined Special Landscape Area it seems impossible to argue to would not have a harmful impact. Indeed the proposed mitigation within paragraph 5.119 which suggests “Additional screening at the site boundaries would be required” alludes to the fact that the development should not be visible but without screening it will be. For clarity it should be realised that it is not possible to screen away an inappropriate development within the landscape it is harming, it still remains within the landscape and it still causes harm to it and depletes it in size and quality. Screening is an admission of failure to safeguard and protect important landscapes. The safeguarded policy C3 stems from an evidence base document the West Wiltshire District Landscape Character Assessment which again is referred to in the adopted Core Strategy (paragraph 6.80). This Assessment identifies the proposed site within landscape character area G1. This is a linear landscape immediately adjacent to G2 and in the foreground of H1 the Chalk Downland Edge and I1 Salisbury Plain. The key Section of the Assessment in this regard is Section 4.0 – The Landscape Character of West Wiltshire. The Management and Strategy Objectives for G1 (Bratton and Eddington Chalk Terrace) include:

The overall strategy for the area is to conserve the generally intact landscape and settlement pattern, with small villages nestling at the bottom of the Chalk Downland and also to enhance/ repair the existing hedgerow network using species that reflect local landscape character. Specific management objectives are to:

- Seek to resist any development that would affect the open views across the terrace to the chalk uplands
- Conserve and enhance the current field pattern and hedgerows with careful management and restoration (where necessary) with species appropriate to local landscape character
- Conserve the existing small-scale settlement pattern and avoid larger developments that would be out of scale and character within the existing situation

The Inherent Landscape Sensitivities for the area G2 (Westbury Greensand and Chalk Terrace) in which the proposal site lies are listed as:

- Surviving hedgerow network
- Open views to dramatic Chalk Downland Edge
- Open views to Westbury White Horse as a dramatic landscape feature
- Rural character of series of minor roads connecting settlements-
- Strong sense of tranquillity throughout the character area.

Clearly development of this site within that landscape is at odds with the identified sensitivities of tranquillity and open views. The overall Management Strategy for G2 is stated as:

The overall strategy for the area is to conserve the existing landscape pattern and dramatic open views to the adjacent Chalk Downland Edge and enhance the landscape setting of Westbury.

Again development of this site, in this identified area is contrary to this. The Specific Management Objectives for G2 are listed (see below) as the first could not be plainer in terms of resistance of any development:

- Seek to resist any development that would affect the open views across the terrace to the chalk uplands
- Conserve open views to the Westbury White Horse as a distinctive landmark
- Conserve and enhance the current field pattern and hedgerows with careful management and restoration (where necessary) with species appropriate to local landscape character
- Conserve the existing sparse settlement pattern and avoid larger developments that would be out of scale and character within the existing situation

Finally within this Assessment the landscape Character of adjacent area H1 (Bratton Chalk Downland Edge) states in the Management Strategy and Objectives:

The overall strategy of the area is to conserve the intact landscape pattern and open nature of the Chalk Downland edge, ...

The Specific Management Objectives are to:

- Conserve and manage blocks and strips of woodland on the scarp slopes and limit further woodland planting within this area to maintain the generally open character of the scarps...
- Maintain the generally undeveloped, rural character of the area
- Maintain open, panoramic views from the scarp, across adjacent lowland landscapes.

Appendix Q - Schedule of representations

	<p>The proposal therefore to develop in this adjacent lowland landscape also has a potential detrimental impact on this important Chalkland Edge landscape. In addition the proposal to then “screen” the offending development with tree planting shows a lack of understanding of the landscapes in this area and is in direct conflict with the Management Objective of the adjacent H1 with seeks to limit further woodland planting within this area.</p> <p>The Wiltshire Landscape Character Assessment 2005 also notes: “Conserve the open character of the terrace and retain the concentrated character of the settlement by resisting linear growth along transport routes” This is precisely the type of development that is now being advocated by the Council.</p> <p>In allocating this greenfield site, has there been any assessment of the potential visual and landscape impact of the resultant development? This is surely essential to address the listed policy conflicts in relation to the special landscape area identified and afforded protection by the Core Strategy and NPPF.</p> <p>Proposing to develop in this protected area, on greenfield land before the brownfield sites put forward by the Parish, outside the already increased and revised settlement boundary (2015), in an area identified as a special landscape is unacceptable and unsustainable.</p> <p>Remove the proposed allocation that is outside the village boundary as re-defined by Wiltshire Council in 2015, that is on greenfield land, that is within an area of protected landscape (SLA), on the edge of the Chalk downland. Instead consider alternative brownfield sites within the village envelope closer to local amenities (school, Dr, shops). This would protect the landscape and score higher in sustainability criteria measurements.</p> <p>Has there been an assessment of the potential impact of developing this site such as views, landscape character impact assessment, ecological impacts and traffic assessments? And if so has, this been contrasted and weighed against the development of other more sustainable sites within the village?</p> <p>There is genuine concern locally about the road and the number of accidents that have already occurred. Encouraging additional traffic movements here and introducing another access may necessitate a highway engineered solution that further harms and causes deterioration to the protected landscape, blighting the entrance to the village. There may also be impacts to the other roads in the village as yet unthought of and again such interventions may be harmful to the village character.</p> <p>How has the number of potential units been arrived at? and how does this compare to the existing density and urban form of the village?</p> <p>Any harm must be mitigated by the greater public benefit. What is the overall impact vs public benefit analysis?</p> <p>Many thanks for your consideration.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">958</a>	<b>Consultee</b> Mr Jeremy Edwards	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Person ID: 1126683		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Transport along Harnham Road heading towards Salisbury, to the roundabout where New Bridge Road starts is already too congested. Many cars use a rat run over St Nicholas' Rd. I live on Harnham Road near the Rose &amp; Crown and have had my car &amp; my visitors cars scratched when too many cars use this rat run. Building more houses without improving the roads from Harnham Road onto the New Bridge Road adds to an already bad situation. Bad traffic jams are also bad for the environment, especially in winter as cars inch forward emitting exhaust gasses. In summary, more houses on Netherhampton Road just makes a bad, existing problem worse.</p> <p>Come up with a proposal to ease road traffic congestion along Harnham Road into Salisbury along New Bridge Road. Carry out that road improvement work in full then return with a plan to build houses according to the new, proven excess road capacity of the new road system. As far as I can see, such a road improvement plan does not exist. So, as Wiltshire has been ordered to build houses, spread smaller numbers of houses across villages nearby Salisbury instead, supporting village shops, schools and pubs.</p> <p>Improve the local road system to add car capacity before considering building any houses.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">959</a>	<b>Consultee</b> Councillor Ernie Clark  <b>Person ID:</b> 840630	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.3 Elizabeth Way, Hilperton.		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>You have ignored Planning Examination findings the basis for which have not changed relating to sites 263 and 297. Over ten years ago the Planning Inspector determined, in relation to the Hilperton Gap, in his West Wiltshire District Plan First Alteration Inspector's Report:-</p> <p>"2.2.47. This area so contained comprises a series of small fields, separated by hedges, and crossed by a number of public and other footpaths. From my visits to this locality I consider that at present this area appears as a reasonably homogenous tract of open land, although there are subtle differences in landscape character within it. It is partly in agricultural use and partly consists of unused grassland, but there are views of Hilperton and the edge of Trowbridge from within and across it. I consider that the properties in Wyke Road, Victoria Road and Albert Road form an obvious definition to the eastern edge of Trowbridge hereabouts...</p> <p>2.2.48. I appreciate that the proposed Hilperton Relief Road is intended to cross this land [the Gap] broadly from north-west to south-east. Although the precise alignment of the road is not formally before me, a draft scheme has been drawn up and was presented to the inquiry. From this and my own observations, I cannot imagine that substantial earthworks would be needed to accommodate the road, wherever its precise route lay, so that its impact in the landscape might not be great. In these circumstances I do not believe that it would, if built here, appear as a more convincing boundary to the town than the existing development...</p> <p>2.2.49. An alternative boundary to the town policy limit further to the east would enable development to take place on the land so enclosed. This would extend Trowbridge into open land having a reasonably pleasant appearance and would in my opinion harm the semi-rural character and appearance of the area as open fields were replaced by built development of one form or another. It would also erode the gap between Trowbridge and Hilperton..."</p> <p>You have made unrealistic and unsubstantiated assumptions on building density for sites 263 and 297.</p> <p>You have proposed sites 263 and 297 for housing stating that these would provide 205 dwellings after numerous mitigation measures. These sites have a combined area of approx. 20.5 ha and thus provide a net housing density of only 10 dwellings per hectare.</p> <p>This is only about one third of typical modern development density and indicates a highly wasteful use of precious green field space.</p> <p>A speculative developer has applied to develop houses on the northern part of site 263, an area of about 8.5ha partially in a flood zone. After over 18 months of negotiation with WC they are now asking for approval for 170 dwellings. This is a density of 20 dwellings per hectare which would provide, were it to be approved, 80% of the dwellings expected of site 263 on 40% (and the most difficult part) of the site.</p>				

Appendix Q - Schedule of representations

	<p>WC owns site 297 and has claimed (in Wiltshire SHLAA Appendix 3 for Trowbridge community area) that it alone could accommodate 74 dwellings.</p> <p>Your calculations are clearly unsound. Either only about one third of these sites is needed to provide the 205 dwellings you claim is required, or you have deliberately underestimated the number that will be built in an obvious attempt to assuage fierce local opposition to development in the Gap. This later argument can be sustained by the objection to the HSAP from Barratt Developments arguing that less mitigation but more housing should be allowed.</p> <p>You have failed to comply with your own Core Strategy. Section 5.150 recognises that the village of Hilperton has a separate and distinct identity compared to Trowbridge and that open countryside should be maintained between the two to protect Hilperton's character and identity as a separate community. Allocating sites 263 and 297 for housing singularly fails to do this - quite the opposite in fact.</p> <p>You have failed at any time to consult with the Hilperton Neighbourhood Plan Steering Group regarding sites 263 and 297.</p> <p>Your methodology is inadequate and you have failed in your 'Duty to Cooperate' as enshrined in the Localism Act 2011. The duty to cooperate requires additional consultation beyond existing statutory consultees. "The duty requires active and sustained engagement. Local planning authorities and other public bodies must work together constructively from the outset of plan preparation to maximise the effectiveness of strategic planning policies. It is unlikely that this could be satisfied by consultation alone. Local planning authorities that cannot demonstrate that they have complied with the duty will fail the independent examination process". (Paragraph: 009 Reference ID: 9-009-20140306. Revision date: 06 03 2014.) Sites 263 and 297 should be deleted as housing allocation sites. This will comply with your own Core Strategy and the other objections to the soundness of the HSAP made above.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>As the duly elected representative of the residents of Hilperton Division I feel it important that the opinion of 'the man on the Clapham omnibus' is heard and understood amongst the inevitable representations of planning lawyers, QCs, and planning agents.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The site is inappropriate for the allocation of 40 dwellings as previously smaller developments have already been rejected on this site. The site has a high potential for flooding from surface water and would have a negative effect on surrounding properties that rely on the current site to act as a flood barrier. The properties behind the site will have an increased flood risk leading to subsidence and damage to dwellings. Any development on this site will be higher than houses on Rosenheim rise, thus blocking out sunlight and having the potential of a sight line into bedrooms. Current services and amenities would be stretched offering no benefit to current resident or new . Other sites within the village boundaries need to be explored, and the size of any development be relevant to the needs of the village.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Its in Netherhampton!</p> <p>As an elderly ex-resident of Harnham I am writing to protest against the proposed development above. My concern is the impact on the infrastructure, services and amenities to the residents' of Harnham. In the late 1960's, 70's the Harnham Road, a minor road, was upgraded and became the outer ring road for southern Salisbury. This worked for many years although heavy traffic immediately increased and has continued to do so. Car and lorry fumes were a constant worry then, even more now. New building is not going to help. Harnham at present just copes. To take the north side of the Harnham Road for building of any sort would be nothing short of tragic, please leave it to agriculture, water meadows and an unspoilt view of the cathedral. Before long, but I pray not in my lifetime, all the outskirts of Salisbury will be built up and lovely Salisbury and outskirts will have been irretrievably lost forever. We cannot take more houses in Harnham and it would be criminal to even consider moving Churchfields Industrial site to what is a rural residential area. Enough is enough! Where is the green belt? I trust and hope that my comments will be taken into consideration with all the objections of those who attended a meeting at St George's Hall recently. Put 100 Houses where Bookers was, plus some behind Britford Park and Ride. The rest and the reallocation of Churchfields needs to go nearer the A303.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">967</a>	<b>Consultee</b> Mr Peter Fielding  <b>Person ID:</b> 1054315	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.3 Elizabeth Way (This land is in Hilperton, Not Trowbridge as stated)		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The whole basis of allocating additional building land in the Trowbridge area is based on unrealistic assessment of how much additional housing should be provided related to the prospects of providing employment in the local area. If there is a need for such a large increase it can only be justified on the basis of making this part of West Wiltshire a dormitory for other employment areas in the large conurbations such as Bath, Bristol and Swindon. In such a case it is hardly critical that the housing has to be provided in such a way as to expand Trowbridge into the surrounding villages effectively destroying their separate identity. There are more sufficient brownfield sites with Trowbridge itself to provide housing for any realistic local growth in demand or for those who need to be within easy reach of local services. Therefore the majority of occupants of housing on the scale proposed are likely to be newcomers to the area attracted by lower prices than found closer to the main centres of employment who will expect to have to travel some distance to their place of work. The exact location of the housing is unlikely to be that critical and there are other less contentious locations which would provide equally suitable housing land to complement the nearby villages rather than threaten their identity and remove precious green space providing landscape setting and recreational facility. Of far more importance to any substantial increase in the population of the Trowbridge community area would be better transport links. The local roads are already gridlocked at commuting time yet the plan provides for no significant improvements especially with regard to accessing Bath via Staverton.</p> <p>The above arguments apply to a number of the sites allocated in the Plan. However, as a resident of Hilperton my primary concern is of course Allocation H2.3, the whole of the area west of Elizabeth Way. Paragraph 5.150 of the Wiltshire Core Strategy states:</p> <p style="text-align: center;"><i>‘It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities. The local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning.’</i></p> <p>This suggestion was taken at face value by the Hilperton Neighbourhood Development Plan steering group (of which I am a member) and consolidating the position of the gap was one of its major policies fully supported by the majority of the residents. At a stroke and without any prior consultation or warning from Wiltshire Council officers a large proportion of the gap has been allocated in the HSAP which was issued shortly after the Hilperton NDP completed its Regulation 14 consultation period. However, the HSAP recognises that building houses on this land requires extensive mitigation both for wildlife and for any occupants of the new houses to the extent that it proposes a maximum of 205 houses across the whole site. It would be a travesty to build on this piece of open countryside in any event but especially so if it can only support 205 houses. If there really is a desperate need for a further 205 houses in the Trowbridge Community area then there are other better places to build them even within Hilperton itself without the same effect on the landscape and setting of Hilperton. Such development could well then benefit rather than threaten the village by improving public transport, schooling and infrastructure.</p>				

Appendix Q - Schedule of representations

	I would respectfully suggest that allocation H2.3 be deleted from the plan and that the land retains its green belt status pending some longer term protection.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This DPD is unsound for the following reasons</p> <ol style="list-style-type: none"> <li>1. Trowbridge is being asked to take unfair allocation of development Other market towns are willing to take more development</li> <li>2. You have failed to allocate brownfield site within Trowbridge namely The old West Wiltshire District Council Office Bowyer site near Trowbridge station Ashton Street Centre Land at East wing/Trowbridge hospital/Margaret Stancombe School</li> <li>3. You have failed to allocate the following sites 256 land south of Green Lane 292 land North of Green Lane 3247 Biss Farm All these sites are natural extensions to Trowbridge</li> <li>4. Open spaces between villages surrounding Trowbridge allows villages to keep their identity &amp; should not be developed In fact the planning inspector said 10 years ago of land known as the Hilperton Gap separating Hilperton from Trowbridge that development of this land would harm the semi-rural &amp; character of the area Allocate brownfield sites at the old Wiltshire District Council offices, Bowyers site near Trowbridge Station, Ashton Street Centre, land around Trowbridge Hospital &amp; Margaret Stancombe School. Allocate site 256 south of Green Lane, site 292 north of Green Lane, site 3247 Biss Farm. Allocate sites away from Trowbridge to other market towns</li> </ol> <p>This will alleviate the need to development land that acts as a buffer between the villages surrounding Trowbridge &amp; Trowbridge town so that the villages keep their individual identities</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>you have discriminated against the elderly and disabled who do not have computers and can not access the plan. There was no proper notification of this plan. We found out when a neighbour knocked on the door two days ago. The documentation is huge and your computer system keeps crashing. We have terrible problems with broadband not working for over the last three months here , and we have had great difficulty getting access to the plan. There should be a conservation study of the field and surrounding area .We have a lot of rare wildlife in our garden.No-one has done a proper survey which the conservation charities told me should be done.We have bats owls , swallows that nest in Rosnheim Rise.There are a lot of reptiles and lizzards in our garden as well as unusual orchids and butterflies.Not to mention the hedgehogs , and the badgers who come down the footpaths . I phoned the planning department in March 2011 before we moved here to check about building as we were moving to get away from developers.I was told they would never build on the field at the back of us. We would never have moved here if we thought they would build. We need a paper copy of the plan for Bratton development to be available . There needs to be a comprehensive conservation survey completed,</p> <p>It has information which is inaccurate such as the number of residents and the proportion development.. The development is outside the village boundary A smaller development was refused twice because the road was considered to dangerous and the buildings blocked out light on our houses. The site is very steep and what will happen to drainage it could cause landslide in to our garden.It is in a flood area. A paper copy of the plan made available to all. The whole village informed of plan A conservation survey Proper dialogue with residents.We only found out through a neighbour telling every-one.We should have had a letter informing us.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I believe this is inconsistent with: SA objective 11. Encourage a vibrant and diversified economy and provide for long-term sustainable economic growth Because the proposal to build a significant housing site on the south of the city boundary runs contrary to the north of Salisbury development plan that is already on-going between Old Sarum and Boscombe Down. People would need to travel out of this area to their places of employment as there is no real employment opportunities in this area. Salisbury's future housing should be built on a combination of existing 'brownfield' sites close to trading/business parks/estates and where there is ongoing industrial and housing developments. The existing Salisbury North Development strategy (Old Sarum/Porton Down/Boscombe Down) already goes a considerable way to meet these requirements without having to readdress old and cancelled road bypass plans and the associated prospects of building infill to new perceived boundary's created by the roads.  I do not believe this is the right area to build significant new housing. A further option would be to relocate Churchfields industrial estate and use this site for housing.

				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1. Traffic</p> <p>The A3094 is a well used cut through from the south to the west of the city and viceversa and it is controlled at the Harnham Gyratory and the Wilton Wall by traffic lights. The Salisbury Transport Strategy in Nov 2012 found that both of these junctions were operating very near or at capacity. The Harnham Gyratory lights only allow 4 to 5 cars through at a time towards Downton, Salisbury District Hospital and Blandford causing long tailbacks at peak times. Building 740 houses will significantly increase traffic movements in both directions as a) there is no significant employment locally in Harnham/Netherhampton, b) the proposed new school will also take children from outside the catchment area who will arrive by car and b) there is only one small convenience store in Harnham for shopping, so residents will have to drive elsewhere to shop.</p> <p>The noise pollution from this increase in traffic will far exceed that from a proposed development of a hotel and 70 houses on the Booker site on the A3094 which was rejected in 2014 for exceeding government guidelines on noise pollution. There is no evidence that consideration has been given to the greater impact of 740 houses. Increased pollution from traffic emissions, especially from queueing traffic will also be harmful to pedestrians (particularly children walking to the existing Harnham School), wildlife and ecosystems. Salisbury is already an Air Quality Management Area exceeding EU guidelines.</p> <p>Due to existing development along the A3094 Harnham Rd/Netherhampton Rd it is impossible in the future to widen the road and existing pinch points such as outside All Saints Church make the road unsuitable for heavy construction site vehicles and the proposed increase in vehicles. A suggestion in the WHSAP that new home owners will walk into Salisbury using Bridleway NHAM10 seems unlikely due to the distance involved and there are no recommendations to make the new development have roads wide enough for a bus route to operate. I understand the existing Wellworthy estate on the Netherhampton Road is too congested with parked vehicles to allow a bus to run around it.</p> <p>The increase in traffic will also make it more difficult for pedestrians to cross safely and for emergency services (especially ambulances heading west from the ambulance station) to safely and speedily use the A3094.</p> <p>As a city on 5 rivers traffic around Salisbury is dependent on bridges already built and the existing roads. Before any further large developments are given the go ahead a comprehensive analysis of traffic flow needs to be completed and new infrastructure put in place to service any new developments. At present there is no evidence that improvements to the transport network can be undertaken to accommodate the scale of the proposed development, making this plan unsound.</p> <p>As much of the traffic coming and going from this site on the Netherhampton Road will access work, shops and schools via the Newbridge Road it is also relevant that a smaller development adjacent to Britford Lane has recently been turned down because of the volume of traffic already using this road.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">978</a>	<b>Consultee</b> H Redford	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1126219	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.136		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The paragraph refers to contributions towards improving the road network likely to be sought. This is inadequate, it should be mandatory that substantial contributions are sought from any developer both for the assessment of and provision of any required changes. The residents of this area already face considerable difficulties, at certain times of the day, in travelling from Harnham to other areas of the city via the 'Harnham gyratory' and it is difficult to see that these could be remedied easily for current volumes of traffic, let alone traffic from the proposed extra housing.</p> <p>It is concerning that a great deal of money and resources may be spent for an outcome of either that it is not practical to accommodate a development of the proposed size or that any changes proposed and made, turn out to not avoid severe congestion in the area.</p> <p>It is not clear what the cost to the local authority will be to enable a private developer to build, possibly to the detriment of those wishing to move around and live in the Harnham area.</p> <p>'The paragraph needs to set out how the improvements to the road network would be funded, not merely that contributions are 'likely' to be sought. This would make the plans more positively prepared. The assessment, findings and subsequent plans need to be transparent and made public for comment, this would make the plans more justified as it should be required that plans and changes do actually meet the needs of the area if the development goes ahead. The above two measures would make the plan more effective as it would demonstrate more fully the appropriateness or not of the proposed plan.</p> <p>What consideration has been given for a much smaller development in this area?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Neighbourhood Planning Group of Worton wishes to question how the new DPD settlement boundary was decided for Worton, as we suspect it may be in error. The old Kennet boundary included all the housing along Mill Road from (which starts at the C20 and continues to the turning south at Norney Bridge) within the settlement boundary but the draft DPD reviewed boundary has no settlement boundary at all in this area. The NP Group suspects that when the consultation in 2015 was considered only the main settlement area of Worton was reviewed and the map sent by Worton parish council to Wilts council forgot to include the Mill Road area. We suggest that the Mill Road area, which is considered as part of the settlement of Worton, is included in the settlement boundary, there would likely be a gap between the 2 settlement areas but this would be iaw the Kennet plan which is what the boundaries are based on according to chapter 6.1.

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I oppose the plans for the following reasons:  NOT FAIR OR PROPORTIONATE  The proposed sites for 640 dwellings and 100 dwellings (and in principle, according to the assessment, a total of up to 1277 dwellings) along Netherhampton Road represent a vastly disproportionate burden on Netherhampton village and will in effect completely swamp it – moving the day much closer that the village will become just another anonymous suburb of a sprawling Salisbury. • The proposed allocations in Netherhampton alone would deliver a number of dwellings far in excess of the number required to meet the projected shortfall for the whole of South Wiltshire (Wiltshire Council’s estimate for this shortfall yet to be allocated is 594 dwellings). Why therefore are these huge allocations necessary?  The Draft Allocation Plan is unsound since, regarding Site H3.1 / S1028, it is not clear whether the draft plan is for the headline 640 dwellings or for the potential 117 dwellings that the planners have suggested would be possible.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>“The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.”</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Settlement Boundary review methodology and Revised proposals for Downton		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Because the proposed revision of the boundary in question has inconsistencies relating to properties on the perimeter of the settlement boundary. There are some gardens (as in grid reference I & J 4) which are now included within the boundary whilst others (L& M 8 & 7) have been excluded. It is understood that the methodology excludes the curtilage of a property that relates more closely to the open countryside, but in this case the site in question, though on the edge of the settlement, lies between two existing buildings, and should therefore be included. The garden referenced above (L&M 8&7) was defined as a SHLAA site (S1044), but was discounted in the Downton Parish Neighbourhood Plan, as the allocations had already been reached with other sites. This site is the garden of a house, developed some 10 years ago and lies between that property and another property (also shown to be outside the settlement boundary). Following the settlement boundary North of these properties, the boundary continues much further to the East, than the garden referenced here, therefore the proposal is inconsistent.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Planning Permission has previously been refused on two occasions to "preserve the character and scenic quality of the landscape". Why are Wiltshire Council reconsidering this?</p> <p>Planning permission has previously been sought from a private developer for the development of houses on the plot of land in question. Permission has twice been rejected by Wiltshire Council on the following grounds:</p> <p>"The site lies within a Special Landscape Area... (which) seeks to preserve the character and scenic quality of the landscape by generally restricting development to that which is essential to the rural economy.</p> <p>The local planning authority considers that the edge of the existing village is well defined and that the housing development proposed, together with the access road thereto across the field in front, would be a substantial intrusion into the rural landscape, and would therefore be detrimental to the character and scenic quality of the area."</p> <p>However, following the publication of the Draft Site Allocations Plan for the Westbury Area (2017), it appears that Wiltshire Council may be about to overlook these objections and sacrifice the area in order to comply with government-set targets.</p> <p>There were further reasons for rejection stated on both decision notices, but these refer to outdated policies that have been replaced and are no longer of relevance.</p> <p>5) The plan would be more sound if it didn't override the reasons cited in the two existing planning application refusals. The justification for refusal is still valid and therefore an estate of this nature should not be approved for the edge of the village.</p>

Comment ID:	<a href="#">991</a>	<b>Consultee</b> Mr Chris Joyce  <b>Person ID:</b> 1125408	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Specifically referring to site 321 (Bratton)		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>- Incorrect and non-factual information cited. This incorrect information has been used to justify decisions. For more details (to save repeating the same point twice) please see points 2 and 7 in the paragraph under the heading "Please give details of why you consider the draft Wiltshire Housing Site Allocations Plan is unsound."</p> <p>A recalculation of the relative growth of this development should be undertaken and published as fact using referenced data. Please refer to points 2 and 7 in the paragraph under the heading "Please give details of why you consider the draft Wiltshire Housing Site Allocations Plan is unsound."</p> <p>3) With reference to site 321 - the Housing Site Application overrides the results of a 2014 Bratton Parish Council Housing Needs survey, which identified a small requirement for housing in the village.</p> <p>In 2014, Wiltshire Council published the results of the Bratton Parish Housing Needs Survey. The aim of the survey was "to investigate the need for affordable housing among local people (or those who have a need to live in the parish or the locality) of Bratton." The survey recorded a "very good" response rate of 198 replies (35.9%).</p> <p>Of the 198 replies, very few respondents indicated their need for additional housing in Bratton. All declared a local connection to Bratton, and the most popular reason given for needing to move was in order to move on from living with families and achieve independence.</p> <p>A summary of the results of this survey is included in the Wiltshire Site Allocation Plan as follows:</p> <ul style="list-style-type: none"> <li>2x one bedroom homes</li> <li>1x two bedroom home</li> <li>2x three bedroom homes</li> <li>2x low cost two bedroom homes</li> <li>1x low cost four bedroom home</li> </ul> <p>The number of houses requested by members of the Parish is significantly less than the 40 houses allocated to the village by Wiltshire Council.</p> <p>Furthermore, the Parish Council identified in a meeting on 12th September 2017 that they have recently discovered they own adequate land to provide this housing in the Pear Tree Orchard area of Bratton. It was concluded in that meeting that 'infilling' the village is preferable to expanding the historic boundaries of the village in the near future.</p> <p>In addition, the Wiltshire Core Policy (2015) states that infilling is preferable to extending village boundaries.</p> <p>The bullet points below refer to the bullet points that are in my above text under the heading "Please give details of why you consider the draft Wiltshire Housing Site Allocations Plan is unsound."</p> <p>1) The plan would be acceptable if it developed conclusions that adhere to the results of its own assessments - not conclusions that ignore the results. It would more more sound if the results were not 'engineered' to conveniently find a site that could house 40 of the target 47 dwellings, as set out in the report. It would be more sound if the conclusions of the report reflected the results of the assessments carried out.</p>			

Appendix Q - Schedule of representations

	<p>2) The plan would be more sound if it did not draw important conclusions upon assumptions - for example the assumption that the B3098 is 'peaceful'. Drawing conclusions upon factual, quantified information will make the report sound.</p> <p>3) The plan would be more sound if it took into account the results of local studies that have identified the requirements and needs of local people. However, this report has identified these needs and then proceeded to ignore the results by allocating 5x the requirement identified by the research.</p> <p>4) The plan would be more sound if it accounted for the individualistic character of the village, and considered that a dense estate of this nature is out of this character. In addition, the report would be more sound if it considered the figures I have presented regarding housing density issues and the fact that, as acknowledged, car ownership will be essential and parking will be an issue as it is in many estates across the county.</p> <p>5) The plan would be more sound if it didn't override the reasons cited in the two existing planning application refusals. The justification for refusal is still valid and therefore an estate of this nature should not be approved for the edge of the village.</p> <p>6) A recalculation of the relative growth of this development should be undertaken and published as fact using referenced data.</p> <p>7) The plan would be more sound if it did not contradict the Wiltshire Core Policy (2015). Please advise which Policy (of the two discussed) has a greater power to override the other.</p> <p>Finally, the plan would benefit from local sensitivity. There is no mention of the character of the village of Bratton and the types of housing, the quantity of green space, the low density of housing etc.. The village is not a high-density housing estate. Bratton is a beautiful, individualistic village. Most houses are different, independent and unique. It is not an inner-city housing estate and the residents of the village will not accept their village being ruined by high-density housing that is unnecessary and will create an enormous eye-sore, parking problems and increased traffic on one of Wiltshire's most dangerous roads.</p> <p>As mentioned in my above comments, the site is unsuitable. The road is dangerous, the sustainability assessment scored the site negatively in 9 of the 12 criteria, planning has been refused twice to "preserve the character and scenic quality of the landscape", the development will remove two Public Rights of Way (footpaths dating to at least 1887), the site is classified as a Special Landscape Area, borders the Bratton Conversation Area, is a site of medium archaeological sensitivity and is overlooked by a Site of Special Scientific Interest (SSSI). The proposed development significantly exceeds the requirements identified in a local study.</p> <p>If development was to ever go ahead, I believe villagers would only accept a development if it was tastefully developed in a way that is sensitive to the existing housing in Bratton - sparsely populated, unobtrusive, unique housing with large gardens and lots of green space.</p> <p>Please see <a href="http://www.brattonhousing.com">www.brattonhousing.com</a> for more information.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>So that I have to opportunity to present my opinion face-to-face. This reduces the ability to ignore the concerns and comments submitted and gives me an opportunity to question the plans in person.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">992</a>	<b>Consultee</b> Mr Chris Joyce	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Site Allocation Plan (2017) for the Westbury Area incorrectly states that Bratton contains 819 dwellings (actual figure = 512). It then justifies the 40-dwelling development due to its small percentage increase in relation to total housing increase. Table E.1 in Appendix E (page 39) of the Wiltshire Council Site Allocation Plan it states that Bratton contains 819 dwellings. It then highlights that the village has experienced growth of 26 houses, or 3.2%, in the last 10 years.</p> <p>The data published and analysed by Wiltshire Council is not correct. According to data collected in the 2011 Census, Bratton actually contains 512 homes (307 fewer than stated in the Site Allocation Plan). The addition of 26 houses therefore actually represents a 5.1% increase in the number of dwellings in the village in the last ten years.</p> <p>The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. This is significant growth for a village of Bratton's size and will further increase strain on services such as the B3098, existing water pressure issues and the local GP surgery.</p> <p>6) A recalculation of the relative growth of this development should be undertaken and published as fact using referenced data.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The density of the estate (40 houses in 12,500m<sup>2</sup>) is far too high for a village like Bratton. Parking is a significant issue in high-density housing estates, and the Wiltshire Housing Site Allocation even acknowledges that car ownership will be essential for residents. Bratton has a housing estate named Manor Fields. It contains a mix of 66 affordable, small and large family homes over 26,057m<sup>2</sup>. This equates to 395m<sup>2</sup>/dwelling. Manor Fields has parking problems, with many households owning more than 2 cars and residents forced to park on the street.</p> <p>The proposed development at site 321 is for 40 dwellings over an area of 12,529m<sup>2</sup> - this equates to 313m<sup>2</sup>/dwelling. This is a significantly smaller area per household than in Manor Fields.</p> <p>In fact, this would be the equivalent of squeezing 17 additional houses into Manor Fields, which all residents of the village know is neither feasible nor acceptable. Bratton is a unique village - it is not an inner-city high-density housing estate.</p> <p>The proposed estate will be far, far too cramped, and parking will be a significant issue.</p> <p>The plan would be more sound if it accounted for the individualistic character of the village, and considered that a dense estate of this nature is out of character with the area. In addition, the report would be more sound if it considered the figures I have presented regarding housing density issues and the fact that, as acknowledged, car ownership will be essential and parking will be an issue.</p>

<b>Comment ID:</b>	<a href="#">995</a>	<b>Consultee</b> Mr Chris Joyce	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1125408	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Figure: 5.18 H2.14		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>In a number of locations, the document makes incorrect assumptions without factual evidence. It then cites these incorrect assumptions as evidence and justification for allowing development. For example:  Stage 4a (Site Landscape Assessment) of the Wiltshire Housing Site Allocation Plan (2017) states the following with regard to the B3098: "The B3098 Westbury Road does not appear to be a particularly busy road and the landscape at the western edge has an exposed and remote feel. Overall the site and immediate landscape context is peaceful."  The Wiltshire Housing Site Allocation Plan (2017) for the Westbury Area then uses this un-evidenced statement to justify the site as "achievable". In the absence of a quantified rush-hour traffic study, this statement regarding how busy the road is meaningless.  The road is very busy during peak times - as a resident that has to pull out directly onto the road daily at 07.30am, I can confirm that it often takes a minute or two for an adequate gap in traffic to appear. Adding an additional 40 homes will add at least 80 cars - all of which will also be trying to pull out onto the road at peak times. As a resident that has lived in the village since birth, I can confirm that I have a much better understanding of the traffic problem than the authors of this report do.  Data collected from the National Statistics Authority shows that between January 2000 and March 2017, there were 49 collisions on the 3-mile stretch of the B3098 between Bratton and Westbury, 11 of which were classified as serious. The total number of casualties was 77. This is not a suitable road for an additional 80+ cars every day.</p> <p>7) With reference to site 321. The Wiltshire Housing Site Allocation Plan for this area contradicts Wiltshire's Core Policy (2015) Wiltshire Council's Core Policy (2015) states that the Council does not wish to deliver strategic housing in Large or Small Villages in the county. As such, this proposal is contradictory to the Core Policy. The core policy is published and finalised.  The plan would be more sound if it did not draw important conclusions upon assumptions – for example the assumption that the B3098 is 'peaceful'. Drawing conclusions upon factual, quantified information will make the report sound.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.14 Bratton			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The housing plan will have an adverse impact on local amenities and represents over development within this, already large, village. Local facilities and services are currently failing to adequately support needs of residents, further development would have a disastrous impact on an already over burdened infrastructure, particularly in respect of health provision and highway usage.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Practical constraints and problems associated with the site</p> <p>A planning application for the development of some 29 houses on Ridgeway Farm was submitted to Wiltshire Council in 2014. That application drew much local opposition, principally on the grounds of the scale of the development, and its likely impact on Crudwell's infrastructure. Specifically: the likely increased traffic on Tetbury Lane; impacts on already overburdened drainage and sewerage systems and oversubscription to Crudwell Primary School. That plan was withdrawn, and a revised plan for a reduced development of 10 houses was submitted and approved (subject to a number of conditions). All the issues and concerns relating to the original proposal for 29 houses remain and a further 21 houses clearly exacerbates them. To expand further on key points:-</p> <p>The allocated 50 dwellings will cause a very significant increase in traffic along Tetbury Lane, which is narrow and has no footpaths. The lane is currently used regularly by pedestrians and school children, raising significant safety concerns. There is no room to install a footpath from Ridgeway to the main A429 without purchasing garden frontages. The condition of the road itself is already very poor. The junction with The Street (A429) will need improving to allow safe exit of rush hour traffic.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	To expand further on key points:- Crudwell suffers from long standing sewage and surface water drainage issues especially after prolonged periods of rain (the whole centre of the village flooded twice in 2008). The current infrastructure is demonstrably unable to cope with extreme conditions and this expanded development site will exacerbate the issue, without major additional infrastructure work which will need both careful development and significant funding.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>To expand further on key points:-  Crudwell CE Primary school is already full. I understand that Wiltshire Council's Education Department states that that new homes will require an additional classroom. This is on a constrained site and lies in a conservation area. Its ability to expand is not guaranteed.  If the allocation in the Strategic Plan remains at 50 houses, I believe that number is sufficiently large to materially harm the village in ways such as those outlined above, but not large enough to attract the funding necessary to mitigate that harm properly.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		One more general point: Wiltshire is effectively putting all of its eggs on one basket, with approaching 90% of the South Wiltshire shortfall being proposed on sites in Harnham and Netherhampton. With regard to the large site for 640 houses+ in Netherhampton they need to carefully consider whether this allocation will in effect meet their commitment to central government up to 2026 - recent research suggests that developments of 500+ houses take on average 11 years from allocation to build. If the allocation is confirmed next year they could take until 2029 to get built. Given the extraordinary obstacles with regard to water, roads, infrastructure and visual amenity, there is every chance that they would take longer. Think again, or it could get very embarrassing!!

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>We can only identify that the rejection of Shlaa 3129 at Stage 2 was because of "unknown availability" yet in a pre-planning application we were informed "that the Strategic Planning Team have clarified that no response was received from the landowners". As the landowners, we cannot recall having any correspondence from the planning team to respond too.</p> <p>Thus, we find the exclusionary criteria unsound.</p> <p>Being that the land was available and having not been consulted, we feel that you should reconsider our position and take Shlaa 3129 for further consideration in the future.</p> <p>The recent Hullavington Neighbourhood development Plan identified this piece of land for development and placed it second after Shlaa 690.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In principle, the development of a greenfield site for no other reason than that there have been delays in making a brownfield site available is entirely wrong. It would be far better to concentrate on freeing up and developing the brownfield site in question, rather than destroying permanently an important rural greenfield site on the edge of the city. To permit urban sprawl of this nature simply to overcome a short term planning glitch is completely ill- conceived, and is neither justifiable nor sustainable.</p> <p>This submission is made on behalf of the South Wiltshire Group of the Campaign to Protect Rural England (CPRE).</p>				
<b>Attached files (Please see Objective)</b>	4712016

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Policies H3.1 and H3.3 (Salisbury - Netherhampton Road)		Justified	
				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The impacts on transport are particularly serious, and there is no accurate basis for the assertion that they are capable of mitigation. The Salisbury Traffic Model is deeply flawed, and likely to lead to erroneous conclusions. It should be remembered that, at the time of the Examination in Public for the South Wiltshire Core Strategy, the Harnham Residents Association arranged a 'drive-in' during the morning rush hour to attempt to mimic the impact of the much smaller development then proposed for Netherhampton Road on the traffic situation. The result was chaotic, with enormous queues building up on and around the Harnham Gyratory.</p> <p>In order to make the Wiltshire Housing Site Allocations Plan sound, it will be necessary to abandon the proposed developments in Netherhampton Road.</p> <p>Transport Strategy</p> <p>2.1 The [Salisbury Transport] model, as evidenced by the Model Validation documents, was seriously flawed [May 2010]. There were various problems with the model, which, in summary, were:-</p> <ol style="list-style-type: none"> <li>1) The journey time surveys adopted arbitrary routes, diluting congestion points.</li> <li>2) The justification for augmenting the HGV responses was dubious.</li> <li>3) I agreed with Wiltshire Council's observation that movements within the roadside interview cordon were possibly underobserved.</li> <li>4) Observed and expected values for trip ends were significantly different.</li> <li>5) The link length validation indicated a minimum error rate of 27%.</li> <li>6) Model validation was largely confined to the A36.</li> <li>7) The model failed to consider the knock-on effects on surrounding areas.</li> <li>8) The impact of the errors on the model predictions should have been assessed by sensitivity analysis.</li> <li>9) The model predictions to 2026 should have been given as a range, determined by calculating 95% confidence intervals for the input variables, to reflect uncertainty.</li> <li>10) Parking. The so-called 'radical' option says that motorised traffic to the city centre in peak hours will not increase, but it is very clear from the revenue projections for parking (envisaging a nine-fold increased in revenues) that, overall, traffic will increase substantially (NB. Prices are due to rise by 50%, and short-stay parking is more expensive anyway, so probably a three to five-fold increase in traffic is indicated).</li> </ol> <p>2.2 Wiltshire Council's response failed to answer most of these points, i.e. :-</p> <ol style="list-style-type: none"> <li>(1) to (5): Not answered at all.</li> <li>(6) Accepted.</li> <li>(7) Not answered at all.</li> <li>(8) "Sensitivity tests will be undertaken as part of the transport strategy finalisation process." Since the whole point of this would be to assess the impact of the errors in the model on the predictions, it was not adequate to leave this to the final stages, after finalisation of the Core Strategy. which depended very much on these predictions.</li> </ol>			

Appendix Q - Schedule of representations

	<p>(9) Not answered.</p> <p>10) The parking question is referred to very briefly, but the statement "... the percentage increase in car park trips being relatively minor in contrast to the overall number of movements" is not consistent with the projected nine-fold increase in parking revenues, nor with the predicted changes in emissions.</p> <p>2.3 The preparation of a series of amendments to the DPD re the South Wilts. Core Strategy gave the Council another opportunity to address these problems, but they did not do so, and so they remained unresolved.</p> <p>2.4 In my commentary at the time, I concluded that "the main thrust of Wiltshire Council's response is that the model has been constructed according to an appropriate methodology. That is not in dispute. What is a matter of concern is the number of data errors and apparent distortions that have crept in, which must impact on the model outputs, the inadequacy of the validation, and the lack of sensitivity analysis. As a result, some of the assertions, re parking for example, or peak time flows at certain key locations, appear contradictory or frankly bizarre."</p> <p>2.5 The flaws in the model are of such seriousness that the so-called 'refresh' that the Council are proposing should take the form of a root-and-branch re-evaluation of the entire approach.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>We are writing to express our concerns regarding the draft Wiltshire Housing Sites Allocation Plan. We reside in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:-</p> <p>Contradictions in the strategy:                      A core strategy or local plan is considered to be 'sound' when it is consistent with National policy. Paragraphs 72, 111, 156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide:-                      The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.                      We do not believe that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site: however, these will not be completed in time. No reference has been made in respect of the much needed development of empty areas within Trowbridge town centre. This is not sustainable development, rather opting for developer friendly sites.                      Accessibility from Sites 3565, 3620 and 1021:                      The A361 is a notorious blackspot for accidents within the dip of the road (where cars currently turn into the Southwick Country Park) and also within the 30mph limit zone further up the hill. Further access points - even with tightened speed restrictions - would only exacerbate matters. Sites at Church Lane, Southwick Court and Old Brickfields are being considered as they would allegedly reduce traffic (if residents potentially walked into Trowbridge rather than using their own vehicles). However, no evidence has been offered to suggest that this would be the case. The majority of households have 2 cars; therefore, there could be an additional 400 vehicles travelling along the Frome Road which is always congested during peak rush hour times.                      The Local Authority's justification for the development here (as opposed to local villages) on the basis that it provides sustainable development, is patently brought into question. There is neither the infrastructure or setting for development on this side of Trowbridge town.</p> <p>Maintaining the local environment Sites 1021 and 3620:                       It is well known that the fields at the rear of Church Lane and Oldbrick Fields provide extensive views across the local countryside. The fields provide an ongoing habitat for deer, rare bats (some species of which are protected), Voles and a multitude of birds. Furthermore, ancient hedgerows and fields provide the setting for at least 5 listed buildings as well as an archaeological site of an ancient water meadow. These should be protected, as stated in the National Planning Framework and the Core Strategy itself.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing in support of the allocation, but wish to identify some items that should be considered in any development. My perspective is as a resident of a property that is nearly adjacent to the site.</p> <p>The B3098 is a high speed, low volume road. Traffic calming in the vicinity of the site could help improve safe access. A pedestrian crossing near the Castle Road bus stop and a pavement between Castle Road and Combe Lane, or a crossing at the Court Lane junction would improve safe pedestrian access between the site and rest of the village. The footpath to Court Lane is likely to become the other main pedestrian route between the site and the village. The point where the footpath meets Court Lane opposite Bury Lane can be a dangerous place to cross, as traffic comes down Court Lane at high speed. Traffic calming in the upper, wooded part of Court Lane should be considered.</p> <p>While the addition of much needed affordable housing is welcome, it must be ensured that the design is in keeping with the village, particularly if it is to be significantly higher density than other parts of the village.</p> <p>The CIL should be used to improve capacity of Bratton Surgery, Bratton Primary School and Bratton Preschool.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write with reference to the proposals to allocate sites to build 640 new dwellings on the South side of Netherhampton Road in Salisbury and 100 new dwellings on the North side of Netherhampton Road.</p> <p>I live in St Mary's Road in Harnham and I wish to record my objection to these proposals for the following reasons.</p> <p>The site allocation document states that the proposals will be subject to transport network improvements necessary to accommodate the scale of development envisaged. No such suggestions are made as to what these improvements could be.</p> <p>The Harnham Gyratory System is already operating at capacity and indeed at rush hours is backed up, either into or out of Salisbury. In the morning rush hour this means the traffic is backed up along the Netherhampton Road past the entrance to St Mary's Road, a distance of well over half a mile. In the evening, it is already the case that traffic is backed up into Salisbury.</p> <p>The future residents of these new dwellings will not be employed in the Netherhampton Road because there is no planned new employment; they will have to travel to work. There are no new shops envisaged in these proposals; the future residents will have to travel to shop. Most, if not all, of these journeys will have to include travelling along the Netherhampton Road to the Harnham Gyratory System.</p> <p>It is easy to state that improvements will be needed but it is difficult to see how improvements could be made to accommodate the increased traffic from a total of 740 dwellings.</p> <p>Those of us who live on or near the Netherhampton Road and the Harnham Road are already aware of the noise and the pollution of what is a major route around Salisbury. The speed limit is often exceeded and there are many heavy lorries using this route. Adding to this traffic will only make matters worse. The plan does not even make mention of this, let alone provide any solutions.</p> <p>I understand that plans in the past to ease traffic congestion in and around Salisbury were abandoned and park and ride sites were set up. It seems to me that any significant new housing developments should be built so as to encourage use of the park and ride sites. There is no such site on the Netherhampton Road available for these proposed developments.</p> <p>I am also concerned about the environmental consequences of further building up stream along the River Nadder. The proposed properties on the North side of the Netherhampton Road will be subject to flooding. My own property, and others in St Mary's Road, are at risk of flooding from the River Nadder and have indeed flooded in recent years. The impact of any measures taken to protect the proposed dwellings from flooding must be assessed for those of us who live downstream.</p> <p>I note on page 30 of the site allocation document that mention is made of the potential later in the plan period to provide "employment land" for Churchfields businesses to relocate to the Netherhampton Road site in order to free up land at Churchfields for housing development. This emphasises the need for careful consideration of the traffic and environmental issues because any such further development will only exacerbate the traffic and environmental issues outlined above.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The Hullavington Neighbourhood Plan Steering Group wish to comment on the Wiltshire Council DPD consultation document. This comment refers to the DPD proposed partial development of SHLAA site 690 (50 homes). The Steering Group put forward via the Neighbourhood Plan Questionnaire, all the known and available SHLAA sites on the Wiltshire Council SHLAA list for Hullavington. The community were asked which site/sites they would prefer to see developed over the plan period. The Hullavington community put forward SHLAA site 690 in its entirety as the 1st choice to provide new homes for the village. The Steering Group feel that the community should have the final say on whether all or part of any SHLAA site is put forward for development in the plan. The Steering Group will be presenting a Draft Plan to the community December 17.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		4. The Plan is not consistent with national policy because WC has failed to give proper weight to brown field sites. WC's method of calculating the potential contribution from brown field is inadequate, especially in Trowbridge where town centre derelict sites should provide hundreds of homes The centre of Trowbridge offers numerous opportunities to develop empty buildings and brown field land - if there are all these possibilities to breath life into the centre of the county town, do developers want to massacre precious green field sites. There are numerous alternatives to satisfy the need for housing and for developers to make a decent return.How can this be considered a 'sound plan'? Not at all on numerous levels.

The report includes a variety of other concerns which should be addressed prior to including the site in any draft strategy plan. In any case the assessment is for a maximum of 32 residential units (not 40) and even then indicates that this may have to be reduced to meet other reservations in the assessment..

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Westbury Community Area Remainder			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan is also inconsistent with the Council's own assessment of the housing needs for Bratton as being 8 houses instead of the 32 or 40 being proposed!</p> <p>Wiltshire Council should as a minimum address the issues in its own assessments and also show why the 40 houses it seeks to place on a single site in Bratton should all be grouped in such a concentrated manner on the single site it has identified; why it is proposing 40 when its own assessment is for 32 with the possible need for a reduction below this number as part of mitigation of other issues identified; and why even 32 are proposed when their own assessment is for 8; and also explain the discrepancies between the proposal for development at Bratton and their strategic objectives.</p> <p>It may be that after such a reassessment that the site might be suitable for a lesser number of housing. However, it is counter-intuitive for the Council, given the reservations in its own assessments, to rely on allocating a number of houses on the site when it knows from its own independent assessment that gaining planning agreement for such a large number is improbable.</p> <p>The plan appears to be based on a simplistic approach. It seeks to place a large number of houses in a location known to be available and indeed which was acquired by the owner, a builder, for development many years ago. Whilst there is some merit in using the site for development, even the Council's own contractor identified a maximum of 32 houses whilst noting that the number may have to be reduced. The Council's own assessment highlighted a number of sustainability problems,</p> <p>The assessment does not appear to have actively explored alternative sites. Presumption is meant to be given to infilling and there does appear to be council owned land available within the village. A site to the North of the village, previously used for mobile caravans would also suffer from fewer of the disadvantages of the current chosen site.</p> <p>In addition the number of houses proposed is significantly over the number as assessed by the Council's own recent Housing Survey and its recommendations and seems also to be based on a mis-appreciation of the number of houses in Bratton.</p> <p>The Council should explore the opportunity for infilling, using publicly owned land within Bratton, address the sustainability issues raised in their own (Atkins) survey and explore the potential for additional housing to be built to the North of the village which will not have an impact on the beauty etc of the adjoining White Horse ridge. ,</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The plan does not seem to be in accordance with the Wiltshire Core Strategy, and in particular: It is likely to increase and not reduce the levels of out-commuting There are no current proposals for economic growth in the village area that justifies the need for future additional housing, whilst the Councils own survey demonstrates there is no existing growing population needs for such a development. The proposals do not safeguard the environment, and although the Councils own independent report suggests mitigation for some of the adverse impacts, it highlights others where future study is required to identify if mitigation is possible. The proposed development is outside the Settlement Boundary which according to 2.8 is "with limited exceptions, not acceptable" ,

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The overall Wiltshire plan also appears to be arbitrary. It states that "no suitable sites were available at Large Villages in the South Wiltshire HMA", without demonstrating in detail why or how this conclusion is reached and suggests that allocation is based not on need but on some other unstated criteria, such as on the readiness of a landowner to make a site available. Evidence for this lies in 4.12 where it is stated that some large village sites were rejected (4.14) as "local housing needs for the plan period have already been accommodated". Just because Bratton has been assessed as needing 8 additional houses, proposing an additional 40 (or 32) is not consistent with excluding whole villages as their housing needs are less.</p> <p>The plan appears to be based on a simplistic approach. It seeks to place a large number of houses in a location known to be available and indeed which was acquired by the owner, a builder, for development many years ago. Whilst there is some merit in using the site for development, even the Council's own contractor identified a maximum of 32 houses whilst noting that the number may have to be reduced. <b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road; North of Netherhampton Road			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We are writing to lodge our objection to the building of 840 houses on Netherhampton Road.</p> <p>The only road leading into Salisbury is not able to take the traffic that is travelling along this road at present let alone over 1,000 extra cars. The Harnham Meadows was turned down and this was the correct decision because of extra traffic using the New Bridge Road, all this new traffic will be using the very same road.</p> <p>The proposed land that is going to be built on is water logged all winter.</p> <p>The present schools are full.</p> <p>The view into the city is of amazing beauty and once built on will be lost for ever.</p> <p>We do not need another Southampton road which is just a polluting traffic jam in and out of the city. Which is turning visitors and shoppers elsewhere, even with our park and rides, all this is not improving our wonderful city.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Salisbury site allocations general				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Introduction                  This document represents a formal response by Go South Coast, trading as Morebus, Salisbury Reds and Tourist Coaches within Wiltshire regarding the above consultation.                  Go South Coast operates across the south coast with its core networks based in Poole, Salisbury, Eastleigh, Swindon and the Isle of Wight with smaller depots at Bournemouth, Swanage, Ringwood and Totton. With a fleet of over 800 vehicles across all brands, we help our customers make over 47 million journeys every year.                  Bus services are provided primarily through the route networks of more bus, Salisbury Reds, Thamesdown and Bluestar serving the Dorset, Wiltshire, Swindon and Southampton areas and Southern Vectis on the Isle of Wight. These networks are in the majority commercially operated but there is significant involvement in the tendered local bus market, together with school and college movements. The prestigious contracts to operate bus services for the University of Southampton - Unilink &amp; Bournemouth University - UNIBUS are currently held, together with contracts for other higher education providers. We also have coaching operations running under the brands of Exelsior, Damory and Tourist Coaches as well as operating several National Express contracted services through Ringwood towards Gatwick, Heathrow and Central London.                  We aim to provide customers with the best experience possible when they travel with us. In order to achieve this we are constantly investing in our fleet and staying ahead of competitors with innovative onboard technology from free wifi to USB charging points, smart ticketing and cashless payments.</p> <p>Go South Coast have a history of working with the public and private sector partners on developing initiatives in new vehicle technology. Recently we have invested over £11.5m on 70 new vehicles with Clean Diesel VI engines reducing particulates from these vehicles significantly. We would make observations on the following policies:-</p> <p>Introduction                  We are keen to focus the quantum of development along existing transport corridors where possible or where development is concentrated where volumes can justify the provision of a bus service. Having higher concentrations in a place that already has established public transport links will allow this 'network' to grow for the benefit of all residents.</p> <p>Our main desire is to ensure that new developments are serviceable by all transport modes including the bus, and that developments are suitable for buses to access new development which can sustain viable commercial bus operation &amp; reduce reliance on public subsidy once "kick-start" funding for new development ceases. This will make developments overall more sustainable environmentally and economically.</p>			

Appendix Q - Schedule of representations

	<p>Existing congestion during extended AM and PM peaks mean network congestion is holding back the existing economy and the ability to build on this. Congestion is seen by business as a restrictor to growth. Surveys show that key indicators reveal that congestion is seen as an increasing issue by the population.</p> <p>In addition, over the last 50 years, bus journey times have increased by almost 50% in the more congested urban areas. If we had protected bus passengers from the growth in congestion there would arguably be between 48% and 70% more fare paying bus passenger journeys today. Already in London some buses on some routes run at close to walking speed. For the economy to flourish the bus needs to remain a viable alternative to the car for people accessing work and leisure and to penetrate main employment, leisure and shopping locations.</p> <p>Further, an independent report looked at the role of buses in contributing to economic growth, and quantifying the benefits bus services bring. ("Buses and Economic Growth", The Institute of Transport Studies, University of Leeds). The report, published in July 2012, shows:</p> <ul style="list-style-type: none"> <li>• 1. Bus commuters help generate £64bn of economic output every year;</li> <li>• 2. Of the five billion bus journeys are made in the UK each year, one billion are made to work;</li> <li>• 3. People use the bus to make shopping and leisure trips with an annual value of £27.2bn, of which £21.5bn is spent in towns or cities centres;</li> <li>• 4. 1 in 10 bus commuters would be forced to look for another job if they could no longer commute by bus;</li> <li>• 5. More than 50% of students are frequent bus users and depend on the bus to get to their education or training.</li> </ul>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1032</a>	<b>Consultee</b> Mr Paul Walker  <b>Person ID:</b> 1126797	<b>Agent</b>  <b>Person ID:</b>	Do you consider the draft WHSAP is legally compliant?  Do you consider the draft WHSAP is sound?	
		<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Salisbury sites S1027 S1028 Netherhampton				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We would comment on the following site allocations in South Wiltshire.</p> <p>Site S1027 – North of Netherhampton Road                  Site S1028 – Land at Netherhampton Road                  We SUPPORT the allocation with AMENDMENTS.</p> <p>These sites are close to Salisbury Reds Route 5. This service operates half hourly Monday-Saturday daytime and hourly evenings and Sundays. Some parts of these sites lie within DfT guidance of 400m from existing bus routes, however, the vast majority of the sites do not. We are therefore unconvinced this site can be sustainable in bus operation terms which we would like to discuss with the site promoters and Local Planning Authority. The circular nature of the service towards its terminus means that the service would need to be amended to accommodate any additional development. The nature of development on either side of the Netherhampton Road would mean that whilst we generally do not like to "call in" at new developments and prefer to pass extremely closely by we would need to be able to call in to the southern and northern site so as to create a terminus turning point for these services.</p> <p>The size of the allocation also makes it unlikely that it will support key local facilities, such as a substantial district centre. The result is that, to a very great extent, any bus route created to serve this site would have to rely only on the new demand generated by the development itself. A combined site of site of 740 dwellings in terms of bus service operation is poor for service enhancement – indeed the site would need to be nearly ten times larger to support an additional bus commercially. This site is by its very nature on the edge of the settlement and any proposals would need to ensure good walking distances to bus provision, infrastructure and service level. The proposed level of developer contributions at £1,000 per house suggested in the viability assessment (Page 13 table 3.10.1) would therefore only yield a strategic site specific contribution of £740,000. This would not sustain a bus service for the amount of time it would need for seed funding to enable it to be commercially viable. If the development(s) were large enough to justify an extension, the road layout is such that to serve them, buses could be forced to operate two-way along Netherhampton Road and not enter the existing estates - this would detract from the existing customer base. Whilst both existing estates within 400m of the main road, the Richards Way / Middle St area is particularly badly designed and laid out in terms of walking routes to Netherhampton Road – this will need to held in regard when considering the development of these sites and bus access.</p> <p>We note the statement at Para 5.37 (Community Area topic paper – Salisbury, page 20) that "A refresh of the Salisbury Transport Strategy can occur alongside a detailed Transport Assessment to address the sites traffic impacts. Measures in the current strategy may be brought forward and new ones identified. Measures necessary to enable development to go ahead appear capable of being delivered.....therefore a site specific viability assessment s necessary". We are concerned that the provision of school and highways works will mean the site is not catered for in terms of the delivery of sustainable transport initiatives. The current STS is silent on the issue of Netehrhampton Road but does point to improvements a Harnham gyratory. It is therefore hard to see how the plan can guide sustainable transport provision at this location.</p>				

Appendix Q - Schedule of representations

	<p>Indeed, it is noted within the Sustainability Appraisal (page P244/245) that the site will have an adverse effect on transport with measures that can be overcome – although no such measures are identified.</p> <p>Further, the sustainability appraisal text around transport states that the area is of high affluence with sites offering the potential for walking and cycling. The bus is not mentioned. This is surprising as within Salisbury there are pockets of deprivation and indeed the profile of elderly people (some of which may reside in this development) could be at risk of social isolation. In 2011, 19.5% of the population of Salisbury was of retirement ages (Source, Wiltshire Council, Census Data Tool, May 2013).</p> <p>The reference in this policy to prioritise education facilities and highway works further fetters the ability to the site to be sustainable in transport terms.</p> <p>It therefore seems appropriate that a suitable site specific S106 Developer Contribution to provide a service enhancement to the development would be appropriate to connect the residential area to locations accessible by bus. We would therefore welcome early discussions with the developer and LPA to look at how and over what timescale this development could come forward as the continued operation of commercial services in the area cannot be assured.</p> <p>In particular we would contend that the Policy should be AMENDED to include a reference to the development should provide a contribution to provide service enhancement for Salisbury Reds Service 5 and this should be reflected in a Site Specific Section 106 contribution for the site.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p><b>OBJECTION</b>                      The provisions of Table 4.7 over-estimate the available supply of housing land in the period to 2026.</p> <p>The five year housing land supply has been tested through recent Appeals, and found to be considerably less favourable than the Council's estimates set out in Table 3.3 of Topic Paper 31. In the most recent Appeal decision relating to a site at Lynham2, following an Inquiry held in July 2017 and therefore shortly after the publication of Topic Paper 3, whilst the Inspector concluded that the Council could demonstrate a five year supply of deliverable housing land, he found it to be much less than the estimated 6.62 years for the North and West Wiltshire Housing Market Area adduced in the topic paper. The Inspector concluded there to be a supply equating to 5.11 years, possibly reducing to 5.05 years if a further 80 units at risk at the Rawlings Green strategic site in Chippenham were deducted. Moreover, whilst the Inspector accepted that there was not currently evidence of persistent under-delivery, and therefore a 5% buffer should apply to the calculation of the five year supply for the purposes of that Appeal, he cautioned that "... performance is not strong and there are worrying signs that the Council needs to address, particularly in the more recent years since adoption of the WCS where delivery has not met requirements"<sup>3</sup>.</p> <p>The Council's five year land supply relies significantly on delivery from large strategic sites, not least at Chippenham. The Inspector in the Lynham Appeal gave weight to the fact that they were allocated in a very recently adopted Plan (the Chippenham Site Allocations Plan), and that the issues raised in terms of matters which may delay delivery, in particular of the strategic site at Rawlings Green, were considered at the Examination and there was no significant evidence that would lead him to a different conclusion from the Examination Inspector. However, given that there are land ownership and infrastructure delivery issues that could potentially delay the delivery trajectory from strategic sites, and particularly that at Rawlings Green, there is a realistic prospect of slippage against the delivery trajectory. Given that the Council's five year land supply is marginal, the five year supply found to exist in August 2017 could easily and quickly fall into deficit.</p> <p>The above scenario is foreshadowed in Topic Paper 44 in which the Council holds as follows:</p> <p>It is difficult to predict rates of development with a high level of certainty because a number of issues can affect construction. Also, in Wiltshire, large mixed use sites ('strategic sites') are a significant component of land supply in each HMA and they can be complex and time consuming to deliver. Consequently, it is prudent to look beyond the required minimum to achieve a five year housing land supply and ensure a continuity of housing supply, as well to help ensure choice and competition in the market. (para. 1.5)</p>		

#### Appendix Q - Schedule of representations

Levels of housing suggested for settlements and rural areas by the WCS are indicative in order to provide flexibility within each HMA. Figures are provided in the Area Strategy policies at the Community Area level as well as for the Principal Settlements, Market Towns and Local Service Centres in the South Wiltshire HMA. They are expressed as 'about' or 'approximate' figures and neither minimum nor maximums; instead they are an indication of the general scale of growth appropriate for each area and settlement during the plan period. (para. 1.7)

There are considerable uncertainties affecting the supply and development of housing. Forecasting supply over a decade cannot be exact. National policy anticipates that the Council will boost significantly the supply of housing and requires the Council to include an additional buffer over the need to demonstrate 5 years worth of housing land supply. The WCS sets requirements as a minimum amount of housing for each HMA. This all suggests planning for a generous supply of housing land, which is considered below. (para. 2.1)

The sustainable development of the County depends upon development being plan-led to manage environmental impacts, ensure economic growth and properly co-ordinate infrastructure provision. Developers commonly challenge the Council's approach to land supply in order to promote sites excluded from the development plan. This can create uncertainty around infrastructure provision and concern that less sustainable sites are being developed. (para. 2.2)

Therefore, to be sure of maintaining a five year housing land supply over each of the remaining years of the plan period, annual supply should exceed the five years and buffer required by planning policy. Any target level will be arbitrary but the Plan might look to provide at least six years of supply in each of the remaining years of the plan period (to allow for any possibility of under-delivery in future), but less where it can be safe to assume that reviews of the development plan will by then have brought forward additional site allocations to a point of sufficient certainty. (para. 2.3)

Whilst the Council contends in the topic paper that persistent under-delivery has not taken place in any of the County's HMAs and this view has been consistently supported at Planning Appeals, it accepts that it would be "... prudent to aim to have a 20% buffer"<sup>5</sup>.

It is therefore clear from the evidence base that the underlying strategy in preparing the WHSAP is to plan to exceed the WCS requirements at the most sustainable locations by up to 20%, and that this is not construed as being inconsistent with the WCS. It is an approach that has been endorsed in the preliminary findings of the Examination Inspector for the North Somerset Site Allocations Plan<sup>6</sup>. Following preliminary Examination Hearings in May 2017, the Inspector has advised the Council of the need to apply a 20% slippage allowance to the residual housing requirement having regard to the considerable reliance on large strategic sites which can fail to deliver at the anticipated rate, and in the context of less than ten years of the plan period (to 2026) remaining. In consequence, the Council has been required to allocate sites for an additional 2,500 dwellings beyond the housing requirement of the Core Strategy to provide greater certainty that the housing that is needed will actually be delivered during the residual plan period.

There are parallels in the current case given the Council's acknowledgement that large strategic sites are a significant component of the land supply, and in the context of a plan period that is more than half time expired at the time of preparation of a Plan that is to identify non-strategic housing allocations. Considered in the context of the above, and the parameters set for the WHSAP, its provisions are insufficient to meet its objectives.

In terms of the overall provisions for the North and West Wiltshire HMA, there is considerable reliance placed on unidentified windfall sites to deliver a substantial proportion (over 17%) of the residual requirement. This results in considerable uncertainty since there can be no assurances that sites will be brought forward to meet this element of supply. Past rates do not provide reliable evidence of future supply, particularly since settlement boundaries are only being adjusted to take into account commitments that have been commenced. This approach will not provide any additional windfall potential.

Appendix Q - Schedule of representations

	<p>The advice in paragraph 48 of the NPPF requires ‘compelling evidence’ to demonstrate not only that windfall sites have ‘consistently’ become available in the local area, but also ‘will continue to provide a reliable source of supply’. No such compelling evidence has been provided. If the reliance on windfalls is removed from the balance, then the surplus for the HMA currently identified in Table 4.7 of the submission draft WHSAP, reduces to 624 (5% of the residual requirement).</p> <p>However, the surplus assumes that all commitments and proposed plan allocations will be implemented and deliver their full capacity during the Plan period. This is unlikely to be the case, and is not supported by evidence. Indeed, evidence from the recent Housing White Paper<sup>7</sup> is that more than 30% of homes granted planning permission remain unbuilt after five years. If, as in North Somerset, a 20% non-implementation allowance is applied to the residual requirement to reduce the risks of the minimum requirement not being delivered during the short remaining term of the plan period, then the surplus turns into deficit of 1,804 homes in the North and West Wiltshire HMA. Even if a modest, and more realistic, windfall allowance of 5% of the residual requirement is permitted, then there remains a shortfall of more than 1,000 dwellings.</p> <p>The revised requirement for the North and West Wiltshire HMA incorporating the above adjustments is set out in revised Table 4.7 below: [refer to table in attached representation document]</p> <p>Therefore, following the Council’s own approach of applying a 20% buffer to increase land supply to a level at which delivery uncertainties can be accommodated, there is a need for additional site allocations to be made in the plan. Over-reliance on windfalls, as is currently the case with the Plan, simply compounds rather than accommodates uncertainties.</p> <p><b>REQUIRED CHANGES</b> The following changes should be made to the Plan: Amendment of Table 4.7 of the submission draft Plan (HMA housing land supply 2006-2026) in accordance with Table 4.7 (Revised) set out in the foregoing submissions. Allocation of additional sites to accommodate the deficit, including the omission site at Wenhill, Calne identified in the representations below.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4712056</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The matters set out in the accompanying submissions relate to the site allocation strategy of the Plan and the adequacy of its provisions to meet the requirements of the Core Strategy. The changes sought may require consequential changes to other policies and provisions of the plan that are not the specific focus of these representations as set out in Section 3 above. Since the changes sought involve material change to the provisions of the WHSAP, and challenge the soundness of the plan in terms of adequacy of its provisions and approach, it is considered necessary to attend the Examination to assist the Inspector with his / her inquisitorial testing of its provisions to ensure that the DPD is ‘sound’ and will deliver the necessary development requirements during the plan period.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1034</a>	<b>Consultee</b> Mr Paul Walker  <b>Person ID:</b> 1126797	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft WHSAP is sound?</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury site 3272 Land at Rowbarrow	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Site 3272 – Land at Rowbarrow, Odstock Road                      We SUPPORT the allocation with AMENDMENTS.                      This sites is close to Salisbury Reds Route 1 on Oddstock Road to the west and X3 and Park and Ride 9 on Downton Road to the East. Salisbury Reds 1 connects Bemerton Heath, City Centre and Salisbury District Hospital every 10 mins daytime and half hourly in the evening. PnR 9 connects Britford and Park and Ride to the City centre and X3 connects from close to the site the City Centre, Fordingbridge, Ringwood, Royal Bournemouth Hospital and Bournemouth.                      Some parts of these sites lie within DfT guidance of 400m from existing bus routes, however, the vast majority of the sites do not. We are therefore unconvinced this site can be sustainable in bus operation terms which we would like to discuss with the site promoters and Local Planning Authority.                      We would require good walking routes through to an improved bus stop and shelter infrastructure (as set out below) on both Odstock Road and Downton Road Services with suitable pedestrian crossing facilities on Odstock Road.                      Highway Layouts at Development &amp; Good Design                      Further, we would point to emerging guidance from CIHT which is currently being developed, and on which Go South Coast have been involved. The aim of the guidance is make development more bus friendly and support the development of commercially viable routes once a development is fully built out. Development should also promote quality development and quality bus provision that is attractive to users with improved access to main corridors, less deviations off route and that reduces potential delays with carriageway widths within new development a minimum of 6.75 metres.                      Moreover it is essential that if developments are to be made sustainable, public transport services are provided and funded from very early in the development to create transportation habits.                      We are keen to ensure a high quality bus stop with superior facilities that might be expected on a high quality bus corridor. A typical stop should be provided with: -</p> <ul style="list-style-type: none"> <li>• Good bus stop design including real time passenger information display as set out above, printed timetable and service information, local map and way finding;</li> <li>• High visibility bus stop flag and pole with appropriate and consistent branding;</li> <li>• Interactive audio help points;</li> <li>• A Wi-Fi hotspot if public transport bus stop departure times can be accessed via mobile phones;</li> <li>• An enhanced maintenance regime to maintain the quality feel of infrastructure investment;</li> <li>• A higher kerb to reduce the step height between the bus and the footway, minimum 125mm;</li> <li>• Higher quality footway and carriageway paving materials;</li> </ul>			

Appendix Q - Schedule of representations

	<ul style="list-style-type: none"> <li>• A stop cage marking of sufficient length to enable buses access close to the kerb. Minimum of 15m per bus if unobstructed (to cater for maximum likely vehicle lengths).</li> </ul> <p>It is critical that any new infrastructure introduced to facilitate housing and economic growth is mindful of the public transport network and any new infrastructure should be designed to enhance rather than impede this. Engagement with bus operators on each development as planning applications are made is absolutely essential and we are more than willing to help shape developments and thus what infrastructure is required to facilitate commercial bus operation in the medium to long term after initial 'pump priming' using section 106 funds.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1035</a>	<b>Consultee</b> Mr Marcus Lee Estate Manager	<b>Agent</b> Dr Thomas Roche Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Bowood Estate	Rocke Associates Ltd	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Person ID:</b> 1124796		<b>Person ID:</b> 1124792			
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.28-4.29, Table 4.5			Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The representations below set out the response of the Bowood Estate (BE) to the provisions of the Wiltshire Housing Site Allocations Plan (June 2017) (WHSAP). They set out the case for allocation of the omission site comprising land at Wenhill, South West Calne (SHLAA sites 709, 3311, 3312, 3251).</p> <p>The Bowood Estate has also made representations in response to the Regulation 16 Consultation on the Calne Community Neighbourhood Plan (CCNP). Given that the strategy of the latter plan is to allocate additional land beyond the requirements of the Wiltshire Core Strategy (WCS), the allocation of sites at Calne in the WHSAP to meet the requirements of the WCS would not conflict in any way with the provisions of the emerging CCNP since it is intended to exceed the 'indicative' 'minimum' provisions of the WCS for Calne.</p> <p><b>OBJECTION</b></p> <p>Objection is raised to the above provisions of the plan since they do not include the allocation of housing sites at Calne, and in particular the omission site at Wenhill, South-West Calne identified on the Plans at Annex 1, for housing and associated community benefits.</p> <p>For reasons set out in representations above, the Plan needs to make additional allocations to achieve its objectives to exceed the minimum housing requirements by a margin that will provide headroom for future under-delivery and therefore greater certainty of future supply. This is consistent with the NPPF objective to 'boost significantly' the supply of housing, and is also consistent with the WCS which identifies the housing requirement as a 'minimum'. It is also germane that the housing requirement in the WCS is below the Objectively Assessed Need for the area, as acknowledged by the Inspector in the recent Appeal decision at Lynham9.</p> <p>The additional requirement for the North and West Wiltshire HMA is for over 1,000 dwellings. Given that the WHSAP does not relate to Chippenham, the focus for the additional allocations must be at the other principal settlements within the HMA. Trowbridge is already the focus for non-strategic allocations in the WHSAP, in addition to the significant strategic allocations in the WCS. There is therefore a limit to which the market can accommodate and deliver additional housing beyond the existing allocations and commitments at that settlement.</p> <p>Aside from Chippenham and Trowbridge, Calne is one of the principal settlements in the North and West Wiltshire HMA. It is subject to neither strategic allocations, nor are non-strategic sites currently allocated in the submission draft WHSAP. Whilst a site of 250 dwellings is proposed in the emerging CCNP, the latter plan makes it clear that the allocations that it contains are 'in addition' to WCS requirements and will be brought forward where there are opportunities to deliver significant community benefits. Therefore, the allocation of a site, or sites, at Calne to meet WCS requirements is entirely consistent with both the WCS spatial strategy and the intentions of the CCNP to allocate sites beyond WCS requirements.</p> <p>As is acknowledged in the WHSAP evidence base<sup>10</sup>, WCS Core Policy 8 and supporting text identify specific issues to be addressed in planning for the Calne Community area, including, inter alia, "nonstrategic growth should be brought forward in accordance with Core Policy 2 and phased throughout the plan period to deliver homes in a balanced manner that will enable infrastructure and traffic congestion issues to be addressed"<sup>11</sup>. Moreover, the Wiltshire Infrastructure Delivery Plan identifies specific 'essential' requirements that will need to be addressed in planning for the community area, including "support development of local primary care health facilities, which are expected to exceed capacity by</p>				

## Appendix Q - Schedule of representations

the end of the plan period”<sup>12</sup>. Given that the WHSAP does not currently intend to allocate sites at Calne since it relies on existing commitments and windfalls, the ability to secure these ‘essential’ infrastructure requirements through the forward planning process is limited, particularly the development of local primary health care facilities.

The omission site at South West Calne is identified in the emerging CCNP as one of two sites that has the potential to offer community benefits. However, Land North of Low Lane is preferred in view of its perceived community benefit in terms of delivering a link road from Prince Charles Drive to Sand Pit Road. However, the preference for Land North of Low Lane did not take into account the very substantial community benefits that land to the south west can offer, and in particular the improvement to healthcare facilities through relocation of the Patford Street Surgery which is a recently identified requirement that can be accommodated on the omission site. Neither the requirement, nor the opportunity, were identified in the evidence base that supports the emerging CCNP.

The Community Benefits of Allocating the Omission Site at Wenhill, South West Calne

The full portfolio of community benefits that allocation of land at Wenhill, South West Calne can offer are summarised on the Concept Plan included at Annex 1 to these representations. They include:

**New Healthcare Facilities:** Provision of a new, expanded and comprehensive health care facilities incorporating relocation of the Patford Street Surgery and the District Nurses to bespoke, accessible accommodation supported by dedicated car parking.

**Local Link Road via Bentley Lane:** Creation of a potential new vehicular connection between Silver Street and the A4 via Bentley Lane which will ease congestion in the town centre at the existing Silver Street / London Road junction, in particular for traffic associated with the School and Leisure Centre.

**Sustainably Located Homes:** Delivery of up to 250 homes in a location that integrates well with the existing community and provides good accessibility on foot and by bicycle to the town centre, the town’s only Secondary School, the Leisure Centre and other key facilities, thereby easing traffic congestion.

**Delivery of Affordable Housing:** Delivery of much needed affordable housing / starter homes to meet high levels of demand. Further allocations of developable housing sites beyond the minimum WCS requirements are essential to addressing high levels of residual affordable housing needs.

**New Green Routes for Pedestrians and Cyclists:** Creation of green routes through the site and via a new permissive right of way for pedestrians and cyclists across Bowood Estate land connecting with Sustrans Cycle Route 403. This will provide new connections from Silver Street through the site and adjacent BE land, to the cycle route, thereby greatly enhancing connectivity for the new and existing communities on the south and south west sides of Calne. To the extent that it would encourage and facilitate travel by modes alternative to the car, it would further contribute to the strategic objective to ease congestion in Calne town centre.

**Enhancement of (on-and off-site) Green Infrastructure:** The proposed development will incorporate substantial new on-site green infrastructure. In particular, a substantial new open green space to the north west of Vernleaze, a Grade II\* Listed Building. This will enhance public appreciation of both the heritage asset and the elevated views to the countryside to the west and north west. A smaller green space is also proposed centrally within the development, together with substantial landscaped margins to provide a soft green edge to the development that will facilitate both informal recreation and biodiversity enhancement and appreciation. Off-site enhancement of green infrastructure will include both the creation of a circular riverside walk to the north of Station Road and extension of the Castlefields Town Park (both listed separately below).

**Circular Riverside Walk:** Opportunity to provide a circular riverside walk to the north of Station Road connecting with Sustrans Route 403.

**Extension of Castlefields Town Park:** Opportunity to extend the Castlefields Town Park.

**Wilts and Berks Canal Restoration:** Opportunity to contribute to reinstating part of the Wilts and Berks Canal, a restoration project that is valued and championed by the local community.

Allocation of the omission site at Wenhill, South West Calne is therefore necessary to deliver not only much needed housing and affordable housing pursuant to WCS requirements, but also to bring forward essential community infrastructure that is necessary to support already committed growth at the town, and which therefore provides no opportunity to secure it. It will make a significant contribution to addressing both traffic congestion and infrastructure issues at Calne in accordance with the objectives of WCS Core Policy 8.

There is no facility for CIL-funding to be allocated to delivering the essential new health care facilities given that provision is not made for it in the Council’s Regulation 123 List. Moreover, a site has been neither allocated nor acquired for the delivery of such facilities. Given that the new primary health care facilities are required to support development during the current plan period, absent an allocation that can both provide the

Appendix Q - Schedule of representations

	<p>necessary land and deliver them, there is little prospect of them being provided. This would fail to uphold the strategic objective of the WCS to bring forward development that will help secure the new community infrastructure.</p> <p>The allocation of the omission site at Wenhill, South West Calne is therefore in accordance with the WCS and would not prejudice the CCNP, the site allocation in which is intended to be additional to provisions that are required meet the strategic requirements. Moreover, the omission site was one of two preferred sites that emerged from several identified opportunities through the CCNP preparation process, albeit at that time the significant community benefits that could accompany its development, and in particular the delivery of new primary health care facilities, had not been identified.</p> <p>Given that the allocation of additional housing sites in the CCNP is premised on the delivery of community benefits, and that it is a strategic objective for new development at Calne to assist with delivering essential new health infrastructure associated with provisions for non-strategic growth, the potential to deliver comprehensive new healthcare facilities is a community benefit to which very substantial weight is properly given. It is an overarching strategic objective of the WCS to ensure that growth is accompanied by the provision of new healthcare facilities. Moreover, the need to expand the existing GP surgeries is a specific strategic objective for Calne that is identified in the WCS (para. 5.41) in recognition that existing surgeries are at or near capacity (para. 5.38).</p> <p>The WCS objective to deliver new healthcare facilities at Calne is reflected in the objectives set out for the CCNP, which include the encouragement of high quality and accessible, inter alia, medical provision for all residents in line with growth in the area (CCNP, para. 50). Notwithstanding the foregoing, the CCNP makes no provision for new healthcare facilities, and is therefore silent on where they should be accommodated. As such, the CCNP does not currently demonstrate how the strategic objectives of the Core Strategy are to be delivered. Given the requirement for additional housing land, and the WCS objectives to deliver new community infrastructure at Calne, and specifically new primary healthcare facilities, it is imperative that the WHSAP makes provision at Calne that can deliver the strategic community infrastructure requirements. Allocation of the omission site at Wenhill, South West Calne is therefore necessary both to meet housing requirements, and to deliver the specific strategic infrastructure requirements for the town that non-strategic housing allocations at Calne are intended to help secure.</p> <p><b>REQUIRED CHANGES</b></p> <p>Amend Policy H2 as follows:</p> <p>To include the allocation of the omission site at Wenhill, South West Calne, as identified on the Site and Concept Plans at Annex 1 to these representations, for residential development and new community infrastructure, to include provision of a new health centre with associated car parking.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4712056</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The matters set out in the accompanying submissions relate to the site allocation strategy of the Plan and the adequacy of its provisions to meet the requirements of the Core Strategy. The changes sought may require consequential changes to other policies and provisions of the plan that are not the specific focus of these representations as set out in Section 3 above. Since the changes sought involve material change to the provisions of the WHSAP, and challenge the soundness of the plan in terms of adequacy of its provisions and approach, it is considered necessary to attend the Examination to assist the Inspector with his / her inquisitorial testing of its provisions to ensure that the DPD is 'sound' and will deliver the necessary development requirements during the plan period.</p>

Appendix Q - Schedule of representations

Comment ID:	1036	<b>Consultee</b> Ms Lisa Bullock Town Planner (Western and Wales)  Network Rail  <b>Person ID:</b> 874600	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>		
				<b>Do you consider the draft WHSAP is sound?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H1.1 Empress Way					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>As Network Rail is a publicly funded organisation with a regulated remit it would not be reasonable to require Network Rail to fund rail improvements necessitated by commercial development. It is therefore appropriate to require developer contributions to fund such improvements. With this in mind I would strongly urge that when the council undertakes its viability testing for any proposed allocated site it considers the impact the proposal may have on the railway infrastructure. The cost of mitigating any impact may have a bearing on the viability and deliverability of any such proposed site. In particular the following allocated sites / policies will almost certainly have an impact on the level crossings listed below.</p> <p>Policy H1.1 Empress Way                      The following level crossings will be impacted: -                      Berrys – Public Footpath Crossing. This may be resolved by diverting the PROW over the proposed connecting highways link between Empress Way and Simonds Road. Details of the crossing can be found on our website <a href="http://archive.nr.co.uk/Transparency/LevelCrossingItemDetail.aspx?lcid=2354&amp;name=Berrys&amp;View=onList&amp;postcode=&amp;radius=">http://archive.nr.co.uk/Transparency/LevelCrossingItemDetail.aspx?lcid=2354&amp;name=Berrys&amp;View=onList&amp;postcode=&amp;radius=</a></p> <p>Network Rail is a statutory undertaker responsible for maintaining and operating the country's railway infrastructure and associated estate. Network Rail owns, operates, maintains and develops the main rail network. This includes the railway tracks, stations, signalling systems, bridges, tunnels, level crossings and viaducts. The preparation of development plan policy is important in relation to the protection and enhancement of Network Rail's infrastructure.</p> <p>Level Crossings                      The level crossings which appear to be affected are listed above and give detail of the type of crossing.</p> <p>Any development which would result in a material increase or significant change in the character of traffic using these rail crossings should be refused unless, in consultation with Network Rail, it can either be demonstrated that the safety will not be compromised, or where safety is compromised serious mitigation measures would be incorporated to prevent any increased safety risk as a requirement of any permission.</p> <p>Network Rail has a strong policy to guide and improve its management of level crossings, which aims to; reduce risk at level crossings, reduce the number and types of level crossings, ensure level crossings are fit for purpose, ensure Network Rail works with users / stakeholders and supports enforcement initiatives. Without significant consultation with Network Rail and if proved as required, approved mitigation measures, Network Rail would be extremely concerned by the impact the proposed site allocations would have on the safety and operation of the level crossings listed above. The safety of the operational railway and of those crossing it is of the highest importance to Network Rail.</p>				

Appendix Q - Schedule of representations

	<p>Councils are urged to take the view that level crossings can be impacted in a variety of ways by development proposals:</p> <ul style="list-style-type: none"> <li>By a proposal being directly next to a level crossing</li> <li>By the cumulative effect of development added over time</li> <li>By the type of crossing involved</li> <li>By the construction of large developments (commercial and residential) where road access to and from site includes a level crossing</li> <li>By developments that might impede pedestrians ability to hear approaching trains</li> <li>By proposals that may interfere with pedestrian and vehicle users' ability to see level crossing warning signs</li> <li>By any developments for schools, colleges or nurseries where minors in numbers may be using a level crossing.</li> </ul> <p>Councils are urged to take the view that level crossings can be impacted in a variety of ways by third party planning proposals which are further detailed in Appendix 1 attached to this email.</p> <p>It is Network Rail's and indeed the Office of Rail Regulation's (ORR) policy to reduce risk at level crossings, not to increase risk, as could be the case with an increase in usage at the level crossings in question. The Office of Rail Regulators, in their policy, hold Network Rail accountable under the Management of Health and Safety at Work Regulations 1999, and that risk control should, where practicable, be achieved through the elimination of level crossings in favour of bridges or diversions.</p> <p>The Council have a statutory responsibility under planning legislation to consult the statutory rail undertaker where a proposal for development is likely to result in a material increase in the rail volume or a material change in the character of traffic using a level crossing over a railway:-</p> <p>(Schedule 5 (f)(ii) of the Town &amp; Country Planning (Development Management Procedure) order, 2010) to requires that ... where a proposed development is likely to result in a material increase in the volume or a material change in the character of traffic using a level crossing over the railway (public footpath, public or private road) the Planning Authority's Highway Engineer must submit details to both Her Majesty's Railway Inspectorate and Network Rail for separate approval".</p> <p>We would urge that information is provided within each policy to identify the need to either close the crossing and divert the public right of way or to improve the crossing, i.e. provision of a bridge. Any future proposals must be supported by a detailed Transport Assessment which assesses any potential impacts on the railway and detail any mitigation proposed.</p> <p>We would appreciate the Council's providing Network Rail with an opportunity to comment on any future planning policy documents as we may have more specific comments to make (further to those above). Appendix Q - Schedule of representations

Comment ID:	1037	<b>Consultee</b> Mrs Cathy Titcombe Senior Admin Officer  Salisbury City Council  <b>Person ID:</b> 393725	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Salisbury City Council Planning and Transportation committee recognises the need for a Wiltshire strategic housing strategy. However, there is concern that without the fundamental infrastructure as described then there will be an addition burden to our local roads. Therefore, should the developments within the strategy be approved, then SCC would request under a section 106 funds to support our amenities in order for the developments to be acceptable and to comply with the planning terms. The scale of these developments would put a considerable additional burden on SCC's resources with regards to amenities and services to all residents.</p> <p>The lack of a detailed Salisbury Transport Strategy. To date there is only a Summary dated November 2012 while the Salisbury Transport Strategy Refresh, which was promised last year, has not taken place. This would have given the opportunity to assess the transport impact of developments which have already taken place around the city and to come up with new ideas.</p> <p>It was agreed in the Core Strategy that to cope with the significant growth planned for the city and surrounding parishes that a radical approach to transport must be adopted to avoid overwhelming pressure on the road network and an unacceptable increase in air pollution. In spite of this development is going ahead without an adopted Transport Strategy.</p> <p>Green Infrastructure is key to achieving a major shift to sustainable transport, including walking, cycling and public transport. As set out in the Wiltshire Core Strategy "The Council will use its planning and transport powers to help reduce the need to travel particularly by private car by promoting sustainable transport alternatives". Cycling and walking routes linking existing and new developments to key destinations like schools, employment areas, leisure facilities, greenspaces and the countryside and connecting communities with each other must be a priority at the planning stage. One of the core planning principles set out in the National Planning Policy Framework is that the planning system should actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in sustainable locations. The Department for Transport encourages Councils to develop Local Cycling and Walking Infrastructure Plans (LCWIPs) as part of the Planning process and incorporate these into Supplementary Planning Documents and Neighbourhood Plans.</p> <p>The large development of 740 houses on the Netherhampton Road in the draft plan can only be considered if the impact of traffic on the Harnham Gyratory is addressed and high quality GI is provided to encourage sustainable travel. SAGP have developed a plan for strategic routes around the city linking the major housing developments with key destinations, these routes, which follow desire lines, could be achieved by improving existing rights of way and creating some new traffic free routes. We believe this would provide the impetus needed for a shift in people's behaviour away from the private car and encourage active travel. We need a new approach to what is possible rather than retrofitting active travel onto an existing road network which is not fit for purpose. Consideration should not be given to further development on green field sites around the city without addressing the impact of traffic first.</p> <p>Access via Wilton Road will also be severely compromised particularly traffic travelling towards Wilton Town and Salisbury. In addition traffic will be further impacted during peak times as well as holiday traffic flowing through.</p> <p>Transport – the impact of further housing to the south of the city particularly on the Harnham gyratory needs to be assessed:</p>			

Appendix Q - Schedule of representations

There is a lack of detail in the current Salisbury Transport Strategy, and this document has not been subject to a public consultation or formal adoption process. Furthermore there have been some very significant changes in proposed developments since work was undertaken in relation to this transport strategy.

The 'Salisbury Transport Strategy Summary' dated November 2012 suggests that development of Churchfields and Central Car Park will provide 1300 homes within the existing urban area [STSSum para 1.3] and it now seems unlikely there will be anything like this number [WHASAP para 4.66]. The Transport Strategy also worked on the basis that there would be 450 dwellings at Longhedge [STSSum Fig 1.1] whereas permission has now been given for 673 houses on this site [Planning application 13/00673/OUT, Option A]. Given the changes in the quantum and location of development the assumptions made in the Salisbury Transport Strategy – e.g. that there will be an additional 5,100 trips to the city centre in 2026 compared with 2008 [STSSum, para 5.2] – needs to be revisited.

There needs to be some clarity over whether the developments being proposed are for the numbers given in the Policy statement [WHSAP, Policy H3], or the SHLAA capacity which may be considerably higher e.g. 1195 houses at the Netherhampton Road site rather than 640 [see e.g. Salisbury Community Area Topic Paper, Table F.9, p. 64]. This is significant difference which will have a major impact on traffic generation and other infrastructure requirements, as well as on landscape and environment.

Even without any strategic sites planned to the south of the river, the Salisbury Transport Strategy assessed the Harnham Gyratory as being in the 'red' category – operating over 70% of capacity (or with two or more arms operating in excess of 90% of capacity). [STSSum, para 3.2 and Figure 3.2].

There has been no effective monitoring of the transport impacts arising from those developments around Salisbury which have already been completed, so it is not known whether the aspirations expressed in the Salisbury Transport Strategy have been fulfilled: "Implementing the transport strategy could ensure that 45% of these new trips to the city centre are made by sustainable modes in 2026. If the Salisbury Transport Strategy was not adopted (the business as usual approach), the forecasts show that only 20% would be by sustainable modes." [STSSum, para 5.3]

It is acknowledged that the transport impacts of the proposed developments have not been properly investigated – e.g. Draft WHSAP para 5.6 "Transport impacts from a proposal will also need detailed assessment in order to accord, in particular, with Core Policy 62 (Development Impacts on the Transport Network)." It is stated that "refreshing the Salisbury Transport Strategy will allow the effectiveness of existing measures to be reviewed and propose new ones to accommodate growth." [WHASAP, para 5.128] Mitigation measures are mentioned [WHASAP, para 5.136] however it could be the case that the combined transport impact of the developments to the south of the City places an unacceptable burden on the road network. The National Planning Policy Framework states that development should be "prevented or refused on transport grounds where the residual cumulative impacts of development are severe" [NPPF, para 32] and that may be the case in this instance. Appropriate green infrastructure can provide pleasant walking and cycling routes away from traffic congestion on busy main roads. As Salisbury expands there needs to be a major shift from car dependent life styles towards more active travel modes and this can only be achieved if a comprehensive Green Infrastructure Strategy for the settlement is developed in parallel with a Salisbury Transport Strategy. These need to be seen as basic and necessary prerequisites linked to the development of strategic housing and employment sites.

Para. 5.136 This paragraph provides grossly insufficient information regarding how the road network can/will be modified to manage what is recognised will be significant increases in road traffic. In the absence of a road traffic plan and costings the overall plan is flawed.

A fully detailed road traffic plan is required prove that the local road network can be adapted to cope – it is not sufficient to articulate the significant barrier without a detailed, costed plan within the draft plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SCC would highly recommend all new developments within the Wiltshire Housing Site Allocation Plan to adopt The Healthy New Towns programme which aims to put health at the heart of new neighbourhoods and towns across the country. With Britain losing 140 million working days to ill-health each year and the cost to the NHS of diabetes already at £10billion a year, the programme can have a real health and financial impact while delivering on key aims set out in the Five Year Forward View. A minimum in supporting reducing Obesity and to improving health living would be the provision of a 'Trim Trail.'

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Lack of a green infrastructure strategy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The lack of a Green Infrastructure Strategy (GI). Although there are frequent references to a GI Strategy in Wiltshire Core Strategy, Core Policy 52 this 'remains in preparation' with, as far as we know, no progress towards consultation or formal adoption. Without these two fundamental and interlinked strategies it would seem impossible to assess the impact of further development as proposed in the Housing Site Allocation Plan. In view of the lack of a County wide GI Strategy SAGP have been working on developing a local GI Strategy for the Salisbury Area. The Connectivity Group have surveyed and mapped all linear routes – rights of way, tracks, roads without footways and desire lines. This has enabled us to identify the gaps and missing links.</p> <p>Much of the new housing, already built or proposed in the current Housing Allocations Plan, lies outside the Salisbury Community Area but greenspace and green infrastructure, the network of footpaths and cycle ways, must inevitably cross community boundaries; which highlights the importance of cross-boundary working. There appears to be no mention of how this issue will be addressed.</p> <p>Green Infrastructure is key to achieving a major shift to sustainable transport, including walking, cycling and public transport. As set out in the Wiltshire Core Strategy “The Council will use its planning and transport powers to help reduce the need to travel particularly by private car by promoting sustainable transport alternatives”. Cycling and walking routes linking existing and new developments to key destinations like schools, employment areas, leisure facilities, greenspaces and the countryside and connecting communities with each other must be a priority at the planning stage. One of the core planning principles set out in the National Planning Policy Framework is that the planning system should actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in sustainable locations. The Department for Transport encourages Councils to develop Local Cycling and Walking Infrastructure Plans (LCWIPs) as part of the Planning process and incorporate these into Supplementary Planning Documents and Neighbourhood Plans.</p> <p>Lack of a green infrastructure strategy</p> <p>A Wiltshire Green Infrastructure Strategy is considered fundamental to Core Policy 52 in the Wiltshire Core Strategy, see para 6.90 (&amp; others): 6.90 The Wiltshire Green Infrastructure Strategy will define Wiltshire’s existing green infrastructure network , and provide the long term vision, objectives, policy framework, and delivery plan for the enhancement of the network.... The strategy is currently in preparation and will be delivered through a partnership of key stakeholders and individuals (Wiltshire Green Infrastructure Partnership). The council will take a key role in the preparation and delivery of the strategy, and Core Policy 52 will be delivered in line with the emerging strategy.</p> <p>‘Core Policy 52 - Green infrastructure’ makes reference to the delivery of the Wiltshire Green Infrastructure Strategy as part of development, however progress towards producing a Green Infrastructure Strategy appears to have stalled. A 9-page “Wiltshire Green Infrastructure Strategy update” was produced (dated January 2012), however there is still no adopted Green Infrastructure Strategy. One of the questions being asked in the Wiltshire Housing Site Allocations Plan Sustainability Appraisal, in connection with SA objective 7 is “Will the development site... 2. Aid in the delivery of a network of multifunctional Green Infrastructure, in line with the Wiltshire Green Infrastructure Strategy?” It is hard to see what this question means if there is no adopted Green Infrastructure Strategy, and the answer in all cases seems to be that the site “could offer the</p>			

Appendix Q - Schedule of representations

	<p>potential to deliver Green Infrastructure”, which does not provide the specifics which are required for each individual site. [see Q&amp;A in Annex 1 A6 in respect of Salisbury sites] Appropriate green infrastructure can provide pleasant walking and cycling routes away from traffic congestion on busy main roads. As Salisbury expands there needs to be a major shift from car dependent life styles towards more active travel modes and this can only be achieved if a comprehensive Green Infrastructure Strategy for the settlement is developed in parallel with a Salisbury Transport Strategy. These need to be seen as basic and necessary prerequisites linked to the development of strategic housing and employment sites.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury Air Quality Management Area			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Air Quality – related to (1) above, the impact on the Air Quality Management Area (AQMA) in Salisbury needs to be assessed, given the additional traffic which will be generated particularly to and from the south of the City. One of the places where air quality monitoring within the Salisbury AQMA is undertaken is in Exeter Street. The latest published data for this and other sites is in Wiltshire’s Annual Status Report for 2016 available at <a href="http://www.wiltshireairquality.org.uk/assets/documents/council-reports/Wiltshire ASR final draft 22nd July.pdf">http://www.wiltshireairquality.org.uk/assets/documents/council-reports/Wiltshire ASR final draft 22nd July.pdf</a> This shows that the annual mean bias adjusted reading for diffusion tube site P15/49 at 91 Exeter Street was 41µg/m <sup>3</sup> , already above the EU limit of 40µg/m <sup>3</sup> without the additional traffic which is being proposed. Developments which resulted in further breaches of the EU limits in the AQMA would be contrary to national planning policy which states that “Planning policies should sustain compliance with and contribute towards EU limit values or national objectives for pollutants, taking into account the presence of Air Quality Management Areas and the cumulative impacts on air quality from individual sites in local areas.” [NPPF para 124]

		Salisbury City Council		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Green field rather than brown field sites – new green field sites to the south of Salisbury have become targets for major development due to delays in bringing forward more central, and more sustainable, brownfield sites in Salisbury. One of the core planning principles in the NPPF is to “encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value” [NPPF, para 17]. There is also protection in the NPPF for high quality agricultural land: “Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality.” [NPPF, para 112] There needs to be a better explanation as to why housing planned for brownfield sites such as the Maltings and the Engine Shed site is being delayed. The general decant issues which are mentioned for Churchfields do not apply to the Engine Shed location, which is already vacant and under the ownership of Wiltshire Council.

<b>Comment ID:</b>	<a href="#">1043</a>	<b>Consultee</b> Mrs Cathy Titcombe Senior Admin Officer  Salisbury City Council  <b>Person ID:</b> 393725	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Chapter 4				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Housing Site Allocations Plan cannot be effective because of the spread of a single settlement like Salisbury across multiple community areas and parishes. The fact that so many new houses in the ‘settlement’ of Salisbury are being built or planned outside the boundary of Salisbury Community Area is not fully explained, nor are the complexities of this situation adequately covered. Community Areas are considered fundamental to delivering the Wiltshire Core Strategy, with plenty of references to support this, e.g. “Coordinating strategies and plans around the established Community Areas is central to Wiltshire Council and its partners’ commitment to empowering local people to have a greater role in what happens in their local communities. The Core Strategy includes a strategy for each of the Community Areas of Wiltshire, setting out how it is expected that these areas will change by 2026, and how this change will be delivered. Aligning the Core Strategy with the Community Areas in this way offers the opportunity for place shaping to be embedded within the local community and the benefits of development to be realised at a local level.” [WCS 1.18]. The fact that Salisbury’s settlement is not aligned with the Community Area is raised as an issue in para 5.112 of the Wiltshire Core Strategy: “5.112 Specific issues to be addressed in planning for the Salisbury Community Area include: the administrative boundaries around the city have led to a large proportion of the development allocations in this Core Strategy being located outside of the boundary of the city. Some are, for example, located on new greenfield sites in the adjoining parishes which are within the Southern Wiltshire and Wilton Community Areas. These allocations are, however, considered to contribute towards the requirement for housing and employment for Salisbury and are included within this Salisbury Area Strategy.” However there is no mention of what is going to be done to address the issue which has been identified, and this issue can only get worse as the proportion of housing technically ‘inside’ the settlement of Salisbury but in reality outside the Community Area grows. It is suggested that whenever housing numbers for ‘Salisbury’ are quoted they should be disaggregated by Community Area so this issue is made explicit. e.g. Draft WHSAP Tables 2.3, 4.11, 5.4, para 5.127 etc Salisbury CA Topic Paper para 2.2, Table 2.2 etc Turning to a specific example – it is proposed that a Settlement boundary is being drawn around Old Sarum & Longhedge housing. This it seems is part of the settlement of Salisbury (going on housing figures quoted, and confirmed by officers at the public exhibition in Salisbury on 19/7). However this settlement is not continuous with Salisbury, which conflicts with Core Strategy para 5.2 – “Where Principal Settlements and Market Towns are referred to, it should be noted that reference is being made to their continuous urban areas that may be within more than one parish area. Similarly, there are places, notably Chippenham, Salisbury and Trowbridge, where the continuous extent of their existing urban areas and/or proposed urban extensions, fall within more than one Community Area.”

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>It is proposed that a Settlement boundary is being drawn around Old Sarum &amp; Longhedge housing. This it seems is part of the settlement of Salisbury (going on housing figures quoted, and confirmed by officers at the public exhibition in Salisbury on 19/7). However this settlement is not continuous with Salisbury, which conflicts with Core Strategy para 5.2 – “Where Principal Settlements and Market Towns are referred to, it should be noted that reference is being made to their continuous urban areas that may be within more than one parish area. Similarly, there are places, notably Chippenham, Salisbury and Trowbridge, where the continuous extent of their existing urban areas and/or proposed urban extensions, fall within more than one Community Area.”</p> <p>There also seems to be a conflict with Core Policy 3, Infrastructure requirements – which the policy says will be delivered by “...liaison through the area boards with town and parish councils and appropriate local stakeholders to identify community infrastructure requirements”</p> <p>Wiltshire Council’s Statement of Community Involvement encourages pre-application discussions, particularly for major applications, when it is suggested that Community Area boards may be an appropriate forum for discussion and that parish/town councils should be involved [SCI, para 5.27/5.28]. For the example of Longhedge, where 673 houses are being developed within the settlement of Salisbury but outside Salisbury community area and in the parish of Laverstock and Ford, the Statement of Community Involvement for planning application 13/00673/OUT mentions dialogue with the local WC member (who sits on WC Southern Area Board) and various discussions with Laverstock and Ford Parish Council. Pre-application discussions are not recorded as having involved Salisbury Area Board or Salisbury City Council despite the impact this development will have on the settlement of Salisbury. This is a major concern not least because the pre-application stage should provide the opportunity for necessary infrastructure, such as sustainable transport links between a development and the settlement of which it forms part, to be discussed and agreed.</p>

		Person ID: 1126811	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Ridgeway Farm, Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I strongly object to any further development of the Ridgeway Farm Site beyond the 10 houses already under construction.</p> <p>1) There have already been over 60 houses built in the village since 1980 with no improvement to any of the utilities.</p> <p>2) The access to Ridgeway Farm is dangerously narrow and the path to the Village Hall and plying field is clearly going to be very narrow and no help to getting to The Street (A429) where the buses run and the school is situated.</p> <p>3) The plan to use the public footpath across the fields is ridiculous as no-one is going to take their children to school across wet muddy fields occupied half the year by cattle with the inevitable mess they leave behind. Last summer the cattle were cows with calves at foot - potentially very dangerous and a bull.</p> <p>4) In the 36 years I have lived here there have been several incidences of flooding including one in 2007 when a large number of properties in several different parts of the village were under water.</p> <p>5) The foul drains are inadequate with raw sewage running down Tetbury Lane following heavy rain now. This is partly due to flow back from the main drain which runs along the A429. That drain flows back up the pipes to houses in the Butts so that house holders have had to have valves fitted. The engineer from Wessex Water said that the size of the main drain should be double its size to cope with the existing extra housing built since it was laid.</p> <p>6) The excellent school is already over-subscribed and has lost some of its green space to extra class-rooms so with Government campaigning to fight obesity in children by encouraging sport in school it would be a travesty to take any more field for building extensions.</p> <p>7) Policy 1 of Wiltshire's Core Strategy is that housing in villages will be built to meet need but there is no need in Crudwell as there is no employment and an inadequate public transport system to get to any.</p> <p>8) There is already 2,200 over supply in N Wiltshire.</p> <p>This is not NIMBY-ism but my objections are real and concrete. There is shortly to be published a Village Plan which must be adhered to.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1056</a>	<b>Consultee</b> Felicity Gilmour  <b>Person ID:</b> 1126818	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Church Lane				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to oppose the above development for the following reasons:</p> <p><b>Boundary issues</b>                      The Council is proposing to move the current town boundary from Church Lane to the Lambrok stream. This proposal aims to justify development on the above site. In 1996, as part of the West Wiltshire District Plan, this site was identified as part of the 'local rural buffer' between Trowbridge and Southwick. Development on this site was rejected and the land subsequently sold as agricultural land. The proposed boundary change is clearly 'developer-led' and simply aims to justify building on this land.</p> <p><b>Transport issues</b>                      Development on this land will require access from the A361, a very busy main road. This will add to the already heavy traffic into and out of Trowbridge on this route and increase the traffic congestion at peak times. Walking into town does not currently appear to be an option for most. I walk in occasionally and it is already an unpleasant experience. Heavy traffic causes pollution, particularly at crossings/traffic lights, and in queues, and there is an ever-increasing number of heavy lorries which appear to use the Frame Road as a route through the town. The distance of this proposed development from the centre of Trowbridge, and the limited public transport options, mean this development will result in increased traffic movements along the Frame Road and an increase in air and noise pollution. An increase in traffic flow will further deter walking and cycling modes of travel.</p> <p><b>Environmental and landscape issues</b>                      The proposed development is adjacent to Southwick Country Park. When the Country Park was initiated in 1996, part of its remit was as a Nature Reserve and the Park is currently applying to be redesignated as a Local Nature Reserve. Maintaining the 'rural buffer' would improve the overall environment for wildlife. It is difficult to see how homes built on this site can be integrated into the existing development as this would mean destroying ancient hedgerows and trees which the Council acknowledges need to be maintained and improved to provide areas for foraging bats and other wildlife.</p> <p><b>Infrastructure issues</b>                      There has been very little recent development on the south-west side of Trowbridge and the infrastructure is not in place to cope with increased urbanisation. Apart from roads which I have mentioned above, there are no doctors' surgeries in the vicinity and those we have in Trowbridge are very busy. There is a shortage of Secondary School places which is acknowledged by the Council but there seem to be no immediate plans to resolve this issue.</p>

<b>Comment ID:</b>	<a href="#">1057</a>	<b>Consultee</b> Mr G Gaiger Gaiger Bros  <b>Person ID:</b> 394670	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.5 West Lavington Settlement Boundary		Positively prepared	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>(1) Positively Prepared</p> <p>1.1 The 'remaining' objectively assessed development requirements are inaccurate- being based upon anticipated housing sites which will simply not deliver the required housing over the Plan period within the Devizes Community Area. Issues preventing the deliverability of sites which have been 'counted' as identified within the Devizes Area Neighbourhood Plan, are set out in (3) below. Consequently, the strategy, which seeks only to just about meet this need, is flawed.</p> <p>1.2 Paragraph 47 of the NPPF requires                  'To boost significantly the supply of housing, local planning authorities should:                  • use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period.'</p> <p>It promotes a positive presumption in favour of sustainable development as the 'golden thread' which runs throughout the document.</p> <p>1.3 The 2500 new homes required to be delivered over the Plan period in the Devizes Community Area are based on minimum housing targets. These figures were the eventual minimum housing figures after they were notably increased following scrutiny by the Inspector examining the Wiltshire Core Strategy. That Inspector made it clear that these were to be minimum housing targets, and that delivery of sustainable development over and above these figures was appropriate.</p> <p>1.4 Conversely, the draft WHSAP documents express the housing figures as 'about or approximate and neither minimums or maximums'. This does not represent positive preparation which will promote a presumption in favour of sustainable development nor will it significantly boost the supply of housing at these Large Villages. Settlements such as West Lavington and Littleton Panell offer a wide range of facilities and services and are a location where new housing sites of a suitable scale, should be identified in the interests of meeting the 'full, objectively assessed housing needs'.</p> <p>1.5 Moreover, the approach taken by Wiltshire Council, will not deliver the objectively assessed affordable housing needs. Indeed, in view of the current national thresholds for affordable housing, many villages avoid any housing sites with development below those thresholds. It will mean that very little if any affordable housing will be provided within the Large Villages and the affordable housing needs will not be met either within these villages or within the Devizes Community Area as a whole. Affordable housing being of course, a key issue in this area, especially within the desirable Large Villages, where house prices are at a premium and on average, are c. 9-10 times average incomes.</p> <p>1.6 The draft WHSAP suggests that delivery of affordable housing here will be achieved through the Neighbourhood Planning process (which seems unlikely due to the small scale of sites being identified as set out above) and through exceptions policy CP44. The latter has historically been an extremely poor mechanism for on site delivery, as many landowners simply bank their sites in the hope they will achieve open market housing in the future. It is clear that affordable housing need outside of the main settlements will not be delivered in this way and a planned approach is required through the allocation of some larger sites within the Large Villages.</p>			

Appendix Q - Schedule of representations

	<p>1.7 Specifically, we would suggest that sites, such as Land off Lavington Lane at West Lavington, which are well supported by the community, and are of a scale which will deliver the range of housing needed by the parish, together with other community benefits such as a second access and much needed parking to access the primary school should be given further consideration for inclusion by the Council, in order to help meet the objectively assessed housing and affordable housing need and help support the village's facilities and services.</p> <p>1.8 As set out at below at 1.10, sustainable sites within the Large Villages which have the propensity to deliver a range of community benefits including by making a meaningful contribution to both the OAHN (including affordable housing need) should not be disregarded simply because the Council may feel it has met its minimum duty. Effectively, by omitting such sites from the site allocations process, communities (and developers) are 'penalised' simply because the parish council are unable or unwilling to engage with the Neighbourhood Planning process or are not in a position to see it through to conclusion. We do not therefore agree that this is a robust approach to the requirement that such plans should be 'positively prepared'.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Ridgeway Farm, Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I hereby object to any increase in the number of houses to be built at the Ridgeway Farm site in Crudwell.</p> <p>Wiltshire Councils Core Strategy clearly states that development in villages will only be to meet need. There is no employment in Crudwell and no efficient transport to centers of employment so no "need".</p> <p>An increase of 50 dwellings in total would increase the size and needs of Crudwell by 20% and those needs could not be met. There is an over-supply in both Malmesbury Community Area and an over-supply of around 2,200 houses in North and West Wilts. These houses are clearly not needed.</p> <p>Crudwell is about to publish a Neighbourhood Plan where any potential for any further housing will be fully researched.</p> <p>There has been severe flooding in the area and there are continually problems with the inadequate main sewer with raw sewage running down Tetbury Lane after heavy rain and flow-back into houses along the Street making valves necessary.</p> <p>Crudwell Primary School is over-subscribed and there is no room for any further extension of the buildings without taking away large areas of vital playing field space.</p> <p>Tetbury Lane is narrow and there is no way of putting in a footpath down to the bus route on the Street and the school. The idea that anyone is going to use a muddy path across fields occupied by cattle to get their young children to school is ludicrous.</p> <p>There is clearly no need for that much housing increase in Crudwell and the Neighbourhood plan will look into this and find out the wishes of the community and environmental constraints to cover any small shortfall.</p>

<b>Comment ID:</b>  <a href="#">1059</a>	<b>Consultee</b> Mr G Gaiger Gaiger Bros  <b>Person ID:</b> 394670	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A5 West Lavington Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	(2) Justified  1.9 The strategy is not ‘the most appropriate’ as it leaves open to chance the delivery of any housing in the Large Villages. Only those parishes which can ‘agree’ and are sufficiently well resourced in terms of time, expertise and money will be in a position to deliver Neighbourhood Plans. This is unjust and does not support the objective to deliver the much needed and significant boost in housing supply advocated by the NPPF. 1.10 Many of these Large Villages are reliant upon growth to maintain their current level of facilities and services, including local schools, shops and public houses. West Lavington and Little Panell is no exception to this, having lost two public houses within the last 7 or so years. It is keen for a modest level of growth to support the remaining public house, doctor’s surgery, primary and secondary school (in neighbouring Market Lavington) and village shop and, having such easy links to adjacent Market Lavington, new housing here would inevitably also help support this Local Service Centre. The next two paragraphs are taken from West Lavington’s housing site allocations work relating to the NP ‘Need to support local schools and services  This is an important issue for local people. Wiltshire Council have informed us that Dauntseys Academy Primary School has spare places in a number of year groups and that the birth rate in the catchment area is declining. Their formula for estimating demand arising from new development suggests that some 50 new houses could generate demand for up to about 14 new primary school places which they believe could be accommodated. Demand for additional places at Lavington Secondary School may require contributions to fund a small expansion.  Local commercial services, shops and pubs, would undoubtedly benefit from an increase in local trade whilst the community would benefit from an increase in younger people into the village.  Need to provide suitable housing for growing families  A large number of houses in the village, including quite a large proportion of newly built housing on infill or small developments, are of a size and standard which attracts a price that is too high for most younger families. A mixed development that provides a choice of small to medium family housing at competitive prices is only likely to be achieved on a medium sized site.’ 1.11 As an alternative, we submit that site allocations should be considered and made in the Large Villages, especially where there is a strong level of community support such as the land off Lavington Lane site in West Lavington, which is well advanced through the site selection Neighbourhood Plan process. The NP had however, then stalled due to lack of finances. 1.12 In this respect, it is notable that of the 67 Large Villages consulted across Wiltshire, only 13 (of 39 responding parishes) said they were preparing NP’s which included housing development. It is likely that these responding parishes were also those which are more organised/ better			

Appendix Q - Schedule of representations

	resourced Parish Councils, thereby indicating a very high proportion of large villages will not be able to deliver any housing or affordable housing in this way.

Comment ID:	<a href="#">1060</a>	<b>Consultee</b> Mr G Gaiger Gaiger Bros  <b>Person ID:</b> 394670	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A5 West Lavington Settlement Boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		(3) Effective  1.13 The Draft WHSAP would not be deliverable over the Plan period. The following list identifies site allocations made within the Devizes Community Area which are those identified by the Devizes Area Neighbourhood Plan over which there are known major questions over their deliverability or discrepancies over the figures relied upon. These show that of the 364 new homes included for delivery over the period 2014-2026, at least 84 of these would be highly unlikely to be built and should not be included within the pipeline. Consequently, we submit that the evidence base for Devizes (and as a result, the Devizes Community Area) is significantly out of date; sufficient so as to call into question the deliverability of the OAHN. To rely on such a flawed evidence base, with an insufficient contingency even to cover the known issues with currently identified sites, results in a draft Plan which will not be effective as it will not deliver OAHN (including affordable housing).  1.14 Furthermore, it calls into question both the deliverability of other sites across other Community Areas, and the resulting 5 Year Housing Land Supply, which, again we would submit requires a greater contingency given the barriers already identified to delivery the identified site allocations. This issue is confirmed in 1.5 of Topic Paper 4 which sets out that 'It is difficult to predict rates of development with a high degree of certainty because a number of issues can affect construction...'. It would therefore be reasonable to include site allocations at the Large Villages to allow for a greater contingency and ensure delivery of sufficient housing rather than basing a site allocations on 'minimum' housing targets at sites which are unlikely to be delivered.  1.15 As such, we submit that it would be prudent to reconsider the deliverability of the 'existing' site allocations and to give consideration to site allocations at sustainable sites, such as those offered at Large Villages, like the Land off Lavington Lane site, to ensure that sufficient allocations are made to meet the OANH and ensure that the plan is Positively Prepared, Justified, Effective and in the spirit of the NPPF. Identified Issues Affecting Deliverability of Housing Site Allocations from Devizes Area Neighbourhood Plan  SEE TABLE ATTACHED - SUMMARISED BELOW  SHLAA number Site Name Issue with housing numbers allocated Suggested effect on housing numbers identified 362 Northgate Gardens Planning permission now granted for 4 dwellings – site not suitable for 8 - 4 713 Railway Cuttings Major ecological issues and potential access issues – serious doubt over any future development - 9			

Appendix Q - Schedule of representations

	<p>4004 Wadworth warehouse Now retained for employment use – remodelled as Gaigers premises (related planning permission granted in 2016) - 30</p> <p>4002 St Peters School Now marketed for an extensive period without success. Involves a difficult conversion of sensitive heritage asset which is deterring developers. Not changed but doubt as to deliverability and contribution to short- medium term HLS</p> <p>15 Stonebridge House This is a viable employment site in current use and protected by Core Policy 35 of the WCS. An extension to this business use was approved in 2016 so housing is highly unlikely to be delivered on this site within the Plan period - 14</p> <p>1088 Land Adj Elm Tree Gardens Permission granted for 6 dwellings on part of a recreation space (TR17 site under old Kennet Local Plan). NPPF para 74 would now not allow for this – therefore figure adjusted to reflect - 4</p> <p>approved numbers</p> <p>367 The Meadow, Hartmoor Rd In the 2011 SHLAA, this site was identified as being in multiple or unknown ownership No change but could call into question availability and deliverability of site</p> <p>361 Magistrates Court, Northgate Street Site recently marketed and included a pre-app which raised issues over the principle of the site for any housing development due to being in setting of a LB. When independently assessed by RCC Town Planning Consultancy, it was considered that c. 3 dwellings may be achievable. - 5</p> <p>4003 Browfort, Bath Road Planning permission now granted for 55 units (60 noted in the site allocation) - 5</p> <p>9 Bath Rd Business Centre Viable business units for employment uses. These are affordable, useful and popular small/ start up business units which are under-represented within the town, together with a successful auction room. The loss of this site for employment purposes would likely result in the loss of a number of smaller employers and for this reason, they should be discounted. - 13</p> <p>Total - 84</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1061</a>	<b>Consultee</b> Mr G Gaiger Gaiger Bros  <b>Person ID:</b> 394670	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A5 West Lavington Settlement Boundary				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>(4) Consistent with National policy</p> <p>1.16 The NPPF requires local planning authorities to positively prepare plans to significantly boost the supply of housing as outlined at paragraph 47. Many Large Villages, as noted above, including West Lavington and Littleton Panell are suffering from a lack of support for services etc.</p> <p>1.17 This approach, which utilises a site allocations approach only to secure the minimum number of houses needed, is not a positive approach to sustainable development. Moreover, the evidence base for calculating the 'remaining' objectively assessed housing need is flawed as demonstrated by the table above which explains why these figures are not valid. As such, the approach will not deliver the OAHN and we disagree with the statement provided in paragraph 4.2 of the draft WHSAP that says 'There is no strong strategic priority for allocating land at Large Villages in the HMA's and no sites are proposed due to strength of supply overall.'</p> <p>1.18 By utilising correct, up to date figures, it would be seen that in fact, there is a requirement to allocated sustainable sites for housing development at the Large Villages, such as the site at Land off Lavington Lane, West Lavington.</p> <p>1.19 Unless Parish Council's are motivated and are sufficiently resourced in terms of personnel, time and finance, the approach fails to take the opportunity to deliver appropriate housing in sustainable settlements. As noted in paragraph 1.4 above, this does not help to sustain and support the level of facilities and services within the Large Villages, nor does it provide the opportunity to provide more balanced communities by securing the type of housing required by the village.</p> <p>1.20 This approach is also flawed because it will not deliver the Council's objectively assessed affordable housing need. Indeed, it is doubtful whether any affordable housing will be achieved in the Large Village settlements as many which are successful in making a NP will favour smaller scale developments which are below the affordable housing threshold. Whilst the draft WHSAP infers that affordable housing can be brought forward as 'exceptions sites' under CP44 or through the preparation of Neighbourhood Plans, there has been a persistent lack of appetite for exceptions sites over many years and as mentioned above many sustainable communities will either not get a Neighbourhood Plan made, or will allocate small sites which are under the affordable housing thresholds.</p> <p>The housing site allocations figures utilised (taken from the Devizes Area Neighbourhood Plan) should be reviewed and updated. Any sites/ numbers which are unlikely to be deliverable over the Plan period should be discounted so as to reflect the comments set out within the table above. This will allow the remaining OAHN to be properly evidenced and will result in a shortfall below the 'approximate', (we would submit 'minimum') housing to be delivered by the Plan.</p>				

Appendix Q - Schedule of representations

	<p>Site Allocations should be made at the Large Villages to help support the sustainability of these communities, to make up the shortfall and to exceed this minimum amount to ensure a planned 5 year Housing Land Supply can be maintained over the Plan period and to reflect the fact that only 13 of the 67 Large Villages responded to the consultation saying that they were planning new housing as part of their NP work. Such site allocations should include some larger site allocations so as to ensure the delivery of affordable housing within the larger villages. These sites should be prioritised in terms of both their sustainability and support from the local community. In this instance the site at Land off Lavington Lane, West Lavington scores highly with strong NP support and a site allocation at this location should be supported.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I would like to comment as follows:</p> <p>I cannot believe that any more houses are really needed in this beautiful City.</p> <p>We seem to be building houses everywhere and the beautiful, medieval City is being swamped by new housing estates.</p> <p>I just cannot believe that you are proposing to allocate a further 850 dwellings just in this City.</p> <p>The documents suggest that in South Wiltshire CA there is a shortfall of only 594 dwellings – taking into account completions and existing commitments up until 2026. For the settlements of Salisbury and Wilton this shortfall equates to only 173 dwellings. Yet your document is purporting to allocate 850 dwellings in Salisbury alone! 840 of those are to be in Harnham. And 740 of those are to be in Netherhampton Road.</p> <p>I consider this to be a vast oversupply of housing and is absolutely unnecessary.</p> <p>I consider it to be unacceptable that the entire 'need' is to be provided in one part of the City</p> <p>Combined with the Churchfields allocation, this western side of Salisbury will be made to suffer the development of nearly 2000 houses!!</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">1063</a></p>	<p><b>Consultee</b> Miss Rachael Eldridge</p> <p><b>Person ID:</b> 898778</p>	<p><b>Agent</b></p> <p><b>Person ID:</b></p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>		
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>		<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>		<p>Salisbury</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>		<p>S159 (North of Downton Road): I think discounted site S159 is directly comparable with suggested site S1027. Both afford views of the Cathedral; are partly in Flood Zone 2; and cannot provide a school on their own. S159 is however on a cycle link; has footpaths leading to the City (including Britford Lane at the bottom of this very field); is on the main X3 bus route; and is opposite one of the City's Park &amp; Rides site. It also has numerous links to the hospital which is one of the City's main employers. S1027 has none of these links to the City or employment. S1027 is also adjacent to a conservation area, listed buildings a SAC and SSSI. I would suggest that out of the two, S159 is far more appropriate.</p> <p>Site 3435 (Land Off Britford Lane): You have discounted Site 3435, essentially because it is partly in Flood Zone 2 but also because 'the main road network is unable to take additional traffic'. This is the same road network that is to serve the three Harnham sites you have allocated! The same Harnham gyratory, that struggles at best to cope with the convergence of the three main routes into the City from the south and south west direction. The Harnham Roundabout cannot cope with the existing traffic load on it and regularly clogs up at weekends/bank holidays Adding 840 new households onto this road network is going to cause all sorts of issues in terms of tail backs, traffic jams, congestion, air pollution. The impact on this road network will be no different and probably significantly worse for 840 dwellings than if Site 3435 was allocated.</p> <p>Site 3421 (Land Adjacent A354): Why has Site 3421 been discounted? It is one of the most obvious places for a further expansion of the City, if it is truly needed. It would represent a natural extension to an existing modern estate. It is walkable to the City and is on a main bus route. It is also in very close proximity to the Hospital, which is one of the main employers in the City. This site is truly sustainable. You have discounted it because it 'could not accommodate enough houses to justify the necessary infrastructure improvements'. Why have you only suggested it can accommodate 330 houses? It is 21.9 hectare in size. Applying a modest 30 dwellings per hectare, would equate to 657 dwellings</p>				

Appendix Q - Schedule of representations

	<p>East Harnham needs its own school as currently most of the traffic generated at peak school times is from parents travelling from East Harnham to the school in West Harnham Allocating Site 3421 and providing a school here would reduce traffic congestion</p> <p>Other Sites: Why hasn't the Old Sarum airport site been allocated for housing? I believe that there is a planning application currently being considered by the LPA on this site which proposes a few hundred houses. Why aren't the fields around the hospital, previously identified in the SHLAA, being allocated?</p>
<p><b>Attached files (Please see Objective)</b></p>

Comment ID:	<a href="#">1064</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Miss Rachael Eldridge	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>This site is completely unsuitable.</p> <p>This site has no direct bus, pedestrian links to the City at all and is unsustainable</p> <p>You have recently removed a well used traffic lighted crossing across the Netherhampton Road (near the shop). Crossing this road is virtually impossible as it is, without addition a further 740 households and associated traffic to the mix.</p> <p>Netherhampton Road is insufficient to take any of the additional traffic that would be associated with such a development.</p> <p>Extra traffic congestion on this inferior road will cause highway safety issues.</p> <p>Harnham Road/Netherhampton Road is essentially a residential street and the majority of residents who live on Netherhampton Road, reverse onto the road when exiting their properties. It is not suitable for the additional traffic.</p> <p>The existing road network is poor for the existing traffic let alone an additional 640/740 dwellings and more B1, B2 and B8 developments.</p> <p>The Harnham Roundabout is unfit for its current purpose. The current convergence of three main routes into the City causes chaos and the existing road network cannot cope. It certainly will not cope with the additional traffic generated by such a mixed use scheme.</p> <p>The Wilton Road/A36 trunk road junction is also unfit for purpose with no right hand turn and a convoluted turning system to access the city in this direction.</p> <p>The A36 junction is framed by the Grade I listed Wilton House and its listed park and garden and listed garden wall. This junction cannot therefore be easily improved.</p> <p>I can't believe that this site has been allocated before traffic surveys, archaeological investigations and a masterplan has been drawn up, there are too many unknowns.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The site is adjacent to a conservation area and a number of listed buildings and therefore has potential to impact on important heritage assets. Most importantly the site affords very important views of the Cathedral from the west. No amount of Public Open Space or buffering will prevent the erosion of that view if housing is developed on this field.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site 3549 Land North of Queensfield Barns, Sutton Lane		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The site in question is identified by the SHLAA as site 3549 and as being suitable for around 22 dwellings. A site location plan is attached. Whilst the site passed states 2a and 2b of the selection criteria, it was eventually excluded due to the level of development in Sutton Benger in recent years.</p> <p>Having regard to the recent appeal decision on Land at Arms Farm (AP/T3940/W/15/3028953) for 28 dwellings, whilst this appeal was dismissed due to the impact on the Conservation Area and heritage assets. In respect of the scale of development, whilst noting the redevelopment of the former poultry factory for around 76 dwellings, the Inspector did not consider that this development for 28 dwellings would lead to a lack of cohesion (paragraph 35). The Appeal further goes on to state at Paragraph 37 that Sutton Benger is an appropriate location for residential development with the Inspector concluding that there was no evidence to demonstrate that an additional 28 dwellings would be detrimental. A further committee report (application ref: 16/11427) on land to the north of the application site concluded that Sutton Benger was an appropriate location for development. It is noted that this application is still pending consideration (August 2017) having been deferred by the Planning Committee.</p> <p>The Housing Needs Survey for the Parish carried out in 2015 identified that there was a need for new affordable housing in the Parish. It should be noted that these may underestimate the requirements needed as it only relates to those who responded to the survey. In conclusion, the report recommends that there is a requirement for at least 4 units of subsidised rented housing and 4 units for shared/ low cost home ownership. Sutton Benger is identified within the Core Strategy as a large village which policy CP1 describes as a settlement with a limited range of employment, services and facilities. The policy further states that development at large villages will be limited to that needed to help meet the housing needs of settlement and to improve employment opportunities, services and facilities.</p> <p>The Core Strategy at policy CP43 requires development in this location to provide 40% affordable housing. Development of the site to the north of Queensfield Barns for around 22 dwellings could go a long way to meeting the identified Housing Need within Sutton Benger.</p> <p>The NPPF sets out 4 requirements which Local Plans must meet. Taking each in turn, in summary, the Allocations Plans does not meet these for the following reasons.</p> <p>Positively prepared: In this instance, by not allocating a site at Sutton Benger, the Allocations Plan has not sought to meet an identified Local Need as identified in the Housing Needs Survey. Previous appeal decisions have identified Sutton Benger as a sustainable location for development.</p> <p>Justified: At stage 3 all sites in Sutton Benger appear to have been dismissed because of growth which the village has previously been seen. Sites do not appear to have been assessed on their individual merits.</p> <p>Effective: By dismissing sites within Sutton Benger on the basis on previous development, it means that the settlement is unable to meet identified housing need which is likely to further increase over the plan period.</p>			

Appendix Q - Schedule of representations

	<p>Consistent with National Policy: The NPPF seeks to significantly boost the supply of housing, and also seeks to plan for a mix of housing based on current and identified future trends. By not allocating sites for development in Sutton Benger, the Plan is not seeking to meet existing needs within the settlement, let alone future needs.</p> <p>Sutton Benger has been identified within both the Core Strategy and recent appeal decisions as a sustainable settlement for development. The Housing Needs Survey has identified a need for affordable housing within the village and the proposed development at Land North of Queensfield Barns, Sutton Lane would go a long way to meeting this need. Whilst outside of the settlement boundary, the site has clearly defined boundaries, it is located outside of the Conservation Area and is therefore considered a suitable site for development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Regarding the sites the A3094 traffic is my main concern. I have work colleagues who use this main road. Upon the demonstration (car convoy) operated with 25 vehicles through this area on Tuesday 19th September 2017 the nursing staff of the main hospital were delayed in their arrival. This was with just 25 extra vehicles not the expected 1,000 movement a day the housing would generate. I also work along the main road and have concerns for getting out of the driveway safely on a normal day. The road is at full capacity today without extra traffic. Build elsewhere with proper infrastructure and consultation with local residents of Salisbury, not a piecemeal allocation by Wiltshire Council who apparently have little or no knowledge of the proposed site and the traffic in the area. These sites are unsustainable. Expensive housing beyond the financial reach of local residents of Salisbury. The only justification for this volume of housing would be for houses at rents which meet the average local Salisbury salary.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">1076</a>	<b>Consultee</b> Councillor Ernie Clark  <b>Person ID:</b> 840630	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Trowbridge Community Area housing allocations		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	You have failed at any time to consult with the Hilperton Neighbourhood Plan (HNP) Steering Group. Your methodology is inadequate and you have failed in your 'Duty to Cooperate' as enshrined in the Localism Act 2011. The duty to cooperate requires additional consultation beyond existing statutory consultees. "The duty requires active and sustained engagement. Local planning authorities and other public bodies must work together constructively from the outset of plan preparation to maximise the effectiveness of strategic planning policies. It is unlikely that this could be satisfied by consultation alone. Local planning authorities that cannot demonstrate that they have complied with the duty will fail the independent examination process". (Paragraph: 009 Reference ID: 9-009-20140306. Revision date: 06 03 2014.)			
	Wiltshire Council must work together with other bodies constructively from the outset of plan preparation to maximise the effectiveness of strategic planning policies.			
This whole plan should be dismissed and Wiltshire Council instructed to comply with its duties under the 2011 Localism act. Your method of calculating housing requirements for Housing Market Areas (HMA) is improperly based and contains errors. It seems that WC is using this exercise to improperly avoid due democratic process, and to engineer objectives beyond those required of a housing site allocations plan. An example is the allocation of land for a further 800 homes to Trowbridge (in addition to the 4,790 completed and committed and a further 1,000 'delayed') despite these being in excess of HMA housing needs. This seems to be in pursuit of an ambition, unrelated to housing requirements, to create an ever larger 'Greater Trowbridge' urban settlement.		You have failed to encourage effective use of brownfield sites in accordance with NPPF Core Principle 8. NPPF Core Principle 8 requires planning authorities to "Encourage effective use of land by reusing Brownfield land." and in Topic Paper 3 you state "during the Wiltshire Core Strategy period (2006-2015) delivery of brownfield sites have contributed 29% of all housing completions". You go on to correctly note the much greater emphasis on brownfield in national policy, particularly in the Housing and Planning Act 2016 and the Housing White Paper of February 2017.		
However, beyond these token acknowledgements, your plan fails to consider any measures to encourage effective use of brownfield, especially in the principal settlement of Trowbridge which has acres of derelict former industrial land.		Key documents fail to address brownfield properly or at all. For example, Topic Paper 4 states that "There are significant brownfield opportunities that are a priority for redevelopment, although this source of housing land is ultimately a modest proportion of overall supply". You willingly fail to understand that, while this might be true of Wiltshire as a whole, it is far from true for the specific urban context of Trowbridge		

Appendix Q - Schedule of representations

You have failed to include specifically identified sites, which as such are not defined by the NPPF as 'windfall' and are located within the Trowbridge Settlement Boundary.

Namely:-	The former West Wiltshire District Council Offices, Bradley Road	70 dwellings
	East Wing/Trowbridge Hospital/Margaret Stancomb School	300 dwellings
	The 'Bowyers' site adjacent to Trowbridge railway station	250 dwellings
	Ashton Street Centre	70 dwellings
	Conversion of 'The Pavillions', White Horse Business Park	130 dwellings

You have failed to allocate site 256 south of Green Lane for 167 new dwellings.

This site is a logical extension of Trowbridge town which lies between the proposed Trowbridge settlement boundary and Green Lane Wood which acts as an appropriate natural barrier to the urban spread. Further mitigation measures to reduce recreational and other impacts on Bechstein and other bat species in line with existing development permissions and allocations can be satisfactorily achieved.

You have failed to allocate site 292 north of Green Lane for 170 new dwellings.

This site is a logical extension of Trowbridge town which lies between the proposed Trowbridge settlement boundary and Green Lane Wood which acts as an appropriate natural barrier to the urban spread. Further mitigation measures to reduce recreational and other impacts on Bechstein and other bat species in line with existing development permissions and allocations can be satisfactorily achieved.

You have failed to allocate site 3247 Biss Farm for 210 new dwellings.

This site is a logical extension of Trowbridge town which lies between the proposed Trowbridge settlement boundary and the Ashton Park allocation. Part of the Ashton Park development, closest to White Horse Business Park, could be reallocated for employment uses to compensate for the loss of this area as an employment allocation. This would also have the benefit of not reducing the build rate at Ashton Park within the plan period.

You have ignored Planning Examination findings the basis for which have not changed.

Over ten years ago the Planning Inspector determined, in relation to the Hilperton Gap, in his West Wiltshire District Plan First Alteration Inspector's Report:-

"2.2.47. This area so contained comprises a series of small fields, separated by hedges, and crossed by a number of public and other footpaths. From my visits to this locality I consider that at present this area appears as a reasonably homogenous tract of open land, although there are subtle differences in landscape character within it. It is partly in agricultural use and partly consists of unused grassland, but there are views of Hilperton and the edge of Trowbridge from within and across it. I consider that the properties in Wyke Road, Victoria Road and Albert Road form an obvious definition to the eastern edge of Trowbridge hereabouts...

2.2.48. I appreciate that the proposed Hilperton Relief Road is intended to cross this land [the Gap] broadly from north-west to south-east. Although the precise alignment of the road is not formally before me, a draft scheme has been drawn up and was presented to the inquiry. From this and my own observations, I cannot imagine that substantial earthworks would be needed to accommodate the road, wherever its precise route lay, so that its impact in the landscape might not be great. In these circumstances I do not believe that it would, if built here, appear as a more convincing boundary to the town than the existing development...

2.2.49. An alternative boundary to the town policy limit further to the east would enable development to take place on the land so enclosed. This would extend Trowbridge into open land having a reasonably pleasant appearance and would in my opinion harm the semi-rural character and appearance of the area as open fields were replaced by built development of one form or another. It would also erode the gap between Trowbridge and Hilperton..."

These comments relate specifically to sites 263 and 297.

You have made unrealistic and unsubstantiated assumptions on building density.

Appendix Q - Schedule of representations

	<p>You have proposed sites 263 and 297 for housing stating that these would provide 205 dwellings after numerous mitigation measures. These sites have a combined area of approx. 20.5 ha and thus provide a net housing density of only 10 dwellings per hectare. This is only about one third of typical modern development density and indicates a highly wasteful use of precious green field space. HGT Developments llp has applied to develop houses on the northern part of site 263, an area of about 8.5ha partially in a flood zone. After over 18 months of negotiation with WC they are now asking for approval for 170 dwellings. This is a density of 20 dwellings per hectare which would provide, were it to be approved, 80% of the dwellings expected of site 263 on 40% (and the most difficult part) of the site. WC owns site 297 and has claimed (in Wiltshire SHLAA Appendix 3 for Trowbridge community area) that it alone could accommodate 74 dwellings.</p> <p>Your calculations are clearly unsound. Either only about one third of these sites is needed to provide the 205 dwellings you claim is required, or you have deliberately underestimated the number that will be built in an obvious attempt to assuage fierce local opposition to development in the Gap.</p> <p>You have failed to reallocate housing figures within the North and West HMA from Trowbridge to other community areas. Other towns have demonstrated an ability to deliver higher than planned completions up to 2017 and can offer sustainable development sites in the plan period but you have failed to consider them. Rectification of the omissions and errors listed above.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>As an elected member of Wiltshire Council I wish to be able to explain my rationale to the Inspector if required to do so.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1077</a>	<b>Consultee</b> Mr Ian Scaife  <b>Person ID:</b> 473545	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.75	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Re: Draft Wiltshire Housing Site Allocations Plan/Settlement Boundary Review - The Banks, Common Road Whiteparish (Wiltshire SHLAA reference s181)                      Re: Supplementary comments to proposed amendments to Whiteparish Settlement Boundary Review – Your reference: 378 &amp; 379 (earlier correspondence attached below)                      (NB: this correspondence has also been sent to you by letter today).</p> <p>I write to provide further information regarding land to the rear of The Banks, Common Road, Whiteparish ("The Banks"), in particular its characteristics and physical relationship to the revised settlement boundary as proposed by the Council. These are observations that may not be readily achieved by using aerial photography alone and in the absence or benefit of an on- site visit.</p> <p>Comments are provided against the Council's settlement boundary review methodology.</p> <p>Built and commenced residential and community facilities development such as religious buildings schools and community halls, that is physically related to the settlement;</p> <p>The subject land lies immediately to the south of the Whiteparish Memorial Centre - a substantial community building in the south west corner of the Memorial Ground playing fields and at the eastern end of an established car park associated with Whiteparish Surgery. The Memorial Centre is arguably the centre of the village but with only two neighbouring properties, it is in relative isolation from residential development that would consolidate its role in the urban fabric of the village;</p> <p>A substantial storage and stable building is located at the eastern end of the garden curtilage of The Banks with a stone path providing continuous access to these buildings throughout the day;</p> <p>To the south of the garden curtilage of The Banks lies a professional standard schooling arena/menage with direct access from the garden curtilage of The Banks. This arena has permanently changed the character of this land away from agricultural paddocks to leisure uses associated with equine facilities. These uses have been in existence for a significant period of time, in excess of 15 years, and are visual separated from the open fields to the east (beyond the ownership boundary of land associated with The Banks by a mature hazel and hawthorn hedge rising over 3-4m along the southern boundary of the land.</p> <p>The curtilage of a property that relates more closely to the built environment (e.g. a garden) or has limited capacity to extend the built form of the settlement in terms of scale and location;</p> <p>the length of the Whiteparish Doctor's Surgery to the north but separated from The Banks by 2no relatively recent infill properties provides an appropriate guide to the extend of the built form settlement to the north of The Banks. This built form is extended by the inclusion of the Memorial Centre in the amended settlement boundary of Whiteparish;</p>			

Appendix Q - Schedule of representations

	<p>The immediate garden curtilage of The Banks itself does not extend further east than the memorial ground and as such does not in itself extend the settlement boundary beyond its pre-defined natural limits. The immediate garden curtilage of the Banks, as proposed to be extended, would provide a natural continuation of the settlement boundary from the south west corner of the Memorial Centre to the rear of Croft Heights as the settlement boundary continues south;</p> <p>The remaining land in the ownership of The Banks, as described in the extant planning consent reference S/07/1416 dated 27 February 2008 (as attached to email dated 5 September 2017 and referenced at the top of this email) lies immediately south of the Memorial Ground. This land now in continuous equine use albeit distinct in nature from the arena described above is visually separated from the open fields to the east by the mature hedge line to the south and east along its boundary.</p> <p>Including this land adjacent to the Memorial Ground and the Memorial Centre, now in the amended settlement boundary, would consolidate rather than extend the cultural and social heart of the village represented by these central village functions.</p> <p>The Council has within its discretion, the ability to include all or parts of the subject land made up of three elements:  the immediately residential curtilage that is well aligned with the existing building form of the village,  the equine arena that represents a minor but visually isolated parcel of land, and  the remaining land, which frames the Memorial Centre and playing fields, central village functions and the heart of the village, presents significant credentials for a sustainable pattern of development.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1078</a>	<b>Consultee</b> Mr Mike Wright  <b>Person ID:</b> 1126871	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>General Concerns:</p> <p>Firstly, I cannot believe that any more houses are really needed in this beautiful City. We seem to be building houses everywhere and the beautiful, medieval City is being swamped by a doughnut form of development. At the moment development is continuing a pace at Long Hedge, Old Sarum, Pearce Way, Rowbarrow, Fugglestone Red and Wilton Hill. Every side of the City is currently suffering the disruption and inconvenience of construction and yet more development is now being identified. Surely this existing development must be adding to your housing need in some way! How can we still need more! There must be a point where Salisbury has had all it can reasonably manage. It cannot go on indefinitely, can it?</p> <p>Having read the documents however I just cannot believe that you are proposing to allocate a further 850 dwellings just in this City. The residents of this City are the envy of larger cities such as London. Salisbury has often affectionately been entitled 'the City in the Countryside'. The fact that you can be in the middle of the busy hustle and bustle of the City Centre and still feel the countryside creeping in providing the lungs to our City is a characteristic that should be respected and protected not dissolved at every opportunity. The green fields that absorb the centre and the many green open spaces and the convergence of 5 rivers are integral parts of our City and should not be wantonly developed, at whim. We need to preserve this character as it not only enhances the historic core of our beautiful City but also provides an important and heralding setting for one of the most important listed buildings in the County if not the Country – Salisbury Cathedral. The fact that you can see the Cathedral from nearly all major routes into the City as if it rises from the fields/countryside should be lauded not eroded with the innocuous, vacuous brick box houses that we can look forward to with yet more modern housing estates being encouraged on every remaining green field.</p> <p>I fear that yet more development of even more lush green fields that make up this integral character and important setting for our City and the Cathedral is a travesty and should be seriously rethought.</p> <p>The documents suggest that in South Wiltshire CA there is a shortfall of only 594 dwellings – taking into account completions and existing commitments up until 2026. For the settlements of Salisbury and Wilton this shortfall equates to only 173 dwellings. Yet your document is purporting to allocate 850 dwellings in Salisbury alone! 840 of those are to be in Harnham. And 740 of those are to be in Netherhampton Road. I consider this to be a vast oversupply of housing and is absolutely unnecessary. I also consider it completely unacceptable that the entire 'need' is to be provided in one part of the City, disproportionately affecting one sector of the community. I think these proposals are completely unjustified and your documents do not go far enough to explain why or how this has come about. Indeed, the text seems to be written to explain your intentions rather than properly and pragmatically analyse the need or assess the various sites to establish what to allocate.</p> <p>You have stated that more than 173 dwellings need to be allocated to ensure that the supply continues to be met in the long run, especially as the main allocation in your adopted core strategy – Churchfields - has a number of complexities that will take time to resolve. You then however go on to confirm that the Netherhampton Road site/s are to come forward at the end of the plan period at the same time as the Churchfields development, not instead of. There is therefore no explanation as to why you are allocating nearly 400% more houses than is needed to meet</p>			

Appendix Q - Schedule of representations

	Salisbury's need as the Churchfields Development will meet this need. And if your grand plan does come together, this western side of Salisbury will be made to suffer the development of nearly 2000 houses!!
<b>Attached files (Please see Objective)</b>	
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1079</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Mike Wright	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		S159 (North of Downton Road)			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Discounted Sites:</p> <p>Having read the SHLAA and your assessment of the various sites that were presented, I am utterly bemused by your methodology and thought process. Has anyone in your department actually visited Salisbury or the sites you have looked at? Your methodology and conclusions are utterly spurious.</p> <p>Three sites that you have discounted at this early stage, are also in Harnham! But I feel they have very similar constraints to the sites you have allocated and therefore I do not understand how these have been discounted yet the allocation sites have not.</p> <p>S159 (North of Downton Road):</p> <p>For instance, with the S159 (North of Downton Road) site, you have claimed that this is an unsustainable site because it affords views of the Cathedral; is partly in Flood Zone 2; there are no links to the City; and it could not on its own provide a school. However S159 (North of Downton Road) is on a cycle link; has footpaths leading to the City (including Britford Lane at the bottom of this very field); it is on the main X3 bus route; and is opposite one of the City's Park &amp; Rides site. It also has numerous links to the hospital which is one of the City's main employers. It is hardly an unsustainable site.</p> <p>The so called constraints that you have highlighted for this site are however entirely comparable with the constraints that exist for S1027 (North of Netherhampton Road), but the latter has gone through to allocation. Like S159 (North of Downton Road), Site S1027 (North of Netherhampton Road) is also situated partly in Flood Zone 2; it's development with dwellings, has potential to harm the nearby Special Area for Conservation (SACs) and Site of Special Scientific Interest (SSSI); it is adjacent to a conservation area and a number of listed buildings; and it also affords important views of the Cathedral. It is however truly unsustainable in that it has NO links to the City. It is not an easy walk to the City and it has no bus links what so ever. And on its own it cannot justify infrastructure improvements or a school.</p> <p>I would suggest that based on your analysis and key criteria, neither site is suitable for development. BUT out of the two, S159 (North of Downton Road) would be a far more appropriate site for development and far more 'sustainable' than S1027 (North of Netherhampton Road).</p>

		Mr Mike Wright	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Site 3435 (Land off Britford Lane)			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Site 3435 (Land Off Britford Lane):            You have also discounted Site 3435 (Land Off Britford Lane), essentially because it is partly in Flood Zone 2 but also because ‘the main road network is unable to take additional traffic’. You do realise that the main road network that this alternative site feeds into is the same main road network that all three sites in Harnham that you have allocated feed into don’t you? The same Harnham gyratory, that struggles at best to cope with the convergence of the three main routes into the City from the south and south west direction, will serve both Netherhampton Road sites and the extension to the Rowbarrow site (site 3272 (Rowbarrow)). If this really is a constraint that prevents site 3435 (Land Off Britford Lane) from being allocated then I would suggest that it is a constraint that is equally applicable to S1027 (North of Netherhampton Road), S1028 (Land at Netherhampton Road) and 3272 (Rowbarrow).            Or has this site actually been discounted because it became a political hot potato with the ‘Save the Meadows’ campaign?</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Site 3421 (Land Adjacent A354)				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Discounted Sites</p> <p>Having read the SHLAA and your assessment of the various sites that were presented, I am utterly bemused by your methodology and thought process. Has anyone in your department actually visited Salisbury or the sites you have looked at? Your methodology and conclusions are utterly spurious.</p> <p>Three sites that you have discounted at this early stage, are also in Harnham! But I feel they have very similar constraints to the sites you have allocated and therefore I do not understand how these have been discounted yet the allocation sites have not.</p> <p>Site 3421 (Land Adjacent A354): You have also discounted site 3421 (Land Adjacent A354). This is unbelievable as I would suggest that this and the fields around the hospital are the most obvious place for a further expansion of the City, if it is truly needed. It would represent a natural extension to an existing modern estate. It is walkable to the City and is on a main bus route. It is also in very close proximity to the Hospital, which as I have said above, is one of the main employers in the City. This site is truly sustainable. However you have discounted it because it 'could not accommodate enough houses to justify the necessary infrastructure improvements'. This is crazy! The site is 21.9 hectare in size. Applying the government minimum of 30 dwellings per hectare, this site could accommodate well over 600 houses – 657 to be exact. Why then does your SHLAA document only suggest it can accommodate 330 dwellings? Applying an appropriate dph, this site would more than deliver what you have identified is necessary, in a far more sustainable location than the Netherhampton sites. It would also finally provide East Harnham with its own school, thereby reducing traffic congestion, rather than giving a second school to West Harnham thereby encouraging all of the local traffic to travel across the City, through the Harnham gyratory, along the insufficient Netherhampton Road to get to a school. I would suggest that proper planning would confirm that there would be far less impact to the local traffic network and the development would be far more sustainable if the development and new school were to be focussed in East Harnham. Site 3421 (Land Adjacent A354) represents one of the best options as it is close to the hospital - and jobs. It is on a bus route and has good links to the City. A school on this side of Harnham would also be beneficial without being built virtually on the doorstep of the existing school in West Harnham. I would also, again, suggest that there is little difference between the 'constraints' you have identified for site 3421 (Land Adjacent A354) compared with S1028 (Land at Netherhampton Road) and yet again the 'constraints' have ruled 3421 (Land Adjacent A354) out but not S1028 (Land at Netherhampton Road). It is a completely spurious methodology and does NOT represent good planning of my City.</p>

Comment ID:	<a href="#">1082</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Mike Wright	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Why has the Old Sarum airport site not been allocated for housing? I believe that there is a planning application currently being considered by the LPA on this site which proposes a few hundred houses. This isn't included in any of your calculations. Its allocation would serve to infill between the main built up area and the Old Sarum Housing Estate so must be considered to be sustainable and would serve to no doubt fulfil the actual surplus of 173 dwellings thereby negating the need to allocate any more sites.</p> <p>Also there are a number of vacant fields in and around the Long Hedge development that is currently under way. Surely infilling these areas and providing more linkages to the existing developments within our City would be a better approach than starting again with a new green field site that is very isolated.</p> <p>In a previous document and SHLAA I remember seeing that the fields that wrapped around the main hospital of the City were also being assessed for development, yet these have not made the cut. I haven't seen any information on these in the current raft of documents (perhaps I have missed your assessment of these) but to my mind this would make an ideal location for new development. There are already good bus links to the hospital from the City and as I have already said, the hospital is one of the main employers. It also has good footpath links to both the City and the Park and Ride and therefore, again would represent a natural expansion of the City and would be truly sustainable! It is not clear why this site has been omitted from the plan or plans for the future.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1083</a>	<b>Consultee</b> Mr Mike Wright  <b>Person ID:</b> 1126871	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	S1028 (Land at Netherhampton Road)				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Allocated Sites: S1028 (Land at Netherhampton Road): The fact that site S1028 (Land at Netherhampton Road) has made the cut is a real concern for a number of reasons as I believe that this site is totally unsuitable for new residential development. My reasoning is as follows: This site has no direct links to the City at all. It is a little isolated outside of the main built up area and will serve to merge the small village of Netherhampton into the main built up area of Salisbury. Netherhampton Road is insufficient to take any of the additional traffic that would be associated with such a development. Harnham Road/Netherhampton Road is essentially a residential street that is gradually turning into a bypass yet is not dual carriageway (and has no way of becoming a dual carriageway) and the majority of residents who live on Netherhampton Road, reverse onto the road when exiting their properties. The existing road network is poor for the existing traffic let alone an additional 640 dwellings and more B1, B2 and B8 developments. There is no need for another school to serve West Harnham. The existing school is only oversubscribed because it caters for the residents of East Harnham as well as Wilton, Bemerton Heath and elsewhere in the City. Pupils travel to the school from all over the City and as a result Netherhampton Road regularly clogs up from the Harnham Roundabout all the way up to the shop during school pick up/drop off times. West Harnham does not need another school, which will only serve to attract more traffic from across the City. The site has significant level changes across it with any existing built development in the area sitting on the lower levels not extending past the Harnham Hill chalk pit cutting. The site you have allocated extends well past this natural land level and over the hill which will have a significant and detrimental impact for this part of the countryside and views into the City/Cathedral. The policy (H.3.1) confirms that any development will be retained to the 75th contour but there is no notion of what that means on the ground and the red line site includes an entire site that according to the SHLAA can accommodate 1125 dwellings. To my mind only the very frontage of the site is suitable for any development and it should not extend past the natural built line and massing that is already created by the existing industrial units on the adjacent sites. This however does not provide a very large site and I therefore assume that more of the site is to be developed in order to accommodate the mixed use development that is outlined in the DPD including 640 dwellings, a school, a local entre and more! The site is sandwiched between industrial sites. B2, B8 and cattle market uses are not very compatible with residential uses and will create significant issues for residential amenity. I cannot see how the site can be effectively developed with residential development without significantly reducing the size of the site or resulting in an adverse impact for these existing businesses from noise nuisance and disturbance complaints. The site is well out of town and is virtually in Netherhampton. It has no direct pedestrian links into the City and is not on a bus route. I would say it is not at all sustainable and there are better, more sustainable options in the City.			

Appendix Q - Schedule of representations

	<p>The Harnham Roundabout is unfit for its current purpose. The current convergence of three main routes into the City causes chaos and the existing road network cannot cope. It certainly will not cope with the additional traffic generated by such a mixed use scheme. Harnham Road/Netherhampton Road being a residential street, cannot be increased width and cannot therefore be improved to increase its capacity. The other end of the road feeds into the busiest road in Salisbury – the A36 trunk road. This junction and part of the road is framed by the Grade I listed Wilton House and its listed park and garden and listed garden wall. This junction cannot therefore be easily improved. The road will and is insufficient for purpose and will not be able to accommodate the traffic movements that would be generated by a further 640 (possibly 740) households.</p> <p>S1028 (Land at Netherhampton Road) is close to a SAC and SSSI and the proposed development will have detrimental impact for the ecological value of the area.</p> <p>The allocation policy in the draft DPD suggests that this site is to be allocated for ‘approximately’ 640 dwellings. What does this mean? This is not precise enough and suggests it could be a lot more – especially as the SHLAA suggests that this site has capacity for 1124 dwellings. Your own policy also confirms that there are a lot of unknowns – such as archaeological importance and transport uncertainties – which will all need to be assessed to ‘inform a future development’. I am amazed that you can get so far with an allocation – your main allocation at that – without already having thoroughly assessed the constraints. What if the whole site is covered in archaeological remains and cannot be developed? Is this site really deliverable?</p> <p>My experience is that once a site is allocated it is virtually impossible to reduce the level of development, no matter what constraints are found after the fact. I would suggest that before this site can be allocated there has to be more certainty about its deliverability and the constraints in order to properly assess exactly what can be delivered on the site. A housing allocation figure should be based on facts and known impacts not plucked out of thin air!</p> <p>The policy for this and the northern site (S1027 (North of Netherhampton Road)) suggest that GP surgeries and healthcare improvements will be secured from the development. How? This is not normally a planning matter as it is governed by completely separate legislation and public bodies. You also have no policies in your adopted Core Strategy that seek to secure contributions towards GP surgeries or healthcare. This will not be achievable and the suggestion feels like it is just a sop to make the site’s allocation more palatable.</p> <p>The policy suggests that this site will provide a mixed use development including B1, B2 and B8 uses. The existing business park adjacent to the site is already under developed and empty. What will happen to the adjacent site? You should be encouraging such development there, not on a new greenfield site. In any event, as has been said above, such uses are incompatible with a residential use so is likely to cause future conflict for amenities of the businesses involved.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1084</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Mike Wright	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		S1027 (North of Netherhampton Road)			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>This site has been allocated as an extension to S1028 (Land at Netherhampton Road) and will aid the ability to secure an unnecessary school in this area. However it has a number of constraints which in my mind make it unsuitable for development – as alluded to above. These are as follows:</p> <p>Site S1027 (North of Netherhampton Road) is situated partly in Flood Zone 2. Harnham has suffered from significant flooding in the past and the development of this site will only reduce the flood plains and natural capacity for the area to cope when the river/s flood.</p> <p>This site's development has potential to harm the nearby SACs and SSSI and the ecological value of the area.</p> <p>The site is adjacent to a conservation area and a number of listed buildings and therefore has potential to impact on important heritage assets. Most importantly the site affords very important views of the Cathedral from the west. I note that the drafted policy H.3.3 suggests that an open space buffer will be created along there road boundary in order to secure continued views of the Cathedral. However this represents two problems. Firstly, the views of the Cathedral along Netherhampton Road from the west are both long distance and short distance views. No amount of Public Open Space or buffering will prevent the erosion of that view if housing is developed on this field. Secondly, this site is supposed to link up the south of Netherhampton Road site (S1028 (Land at Netherhampton Road)) and natural links between the two is required so that the school, local centre and businesses are fully accessible. The public open space/landscape buffer along this road boundary will only serve to isolate and sever this northern development from the southern development. It won't therefore achieve what you are expecting it to achieve. One of these factors will suffer and I suspect it will be the 'protected views' of the Cathedral rather than the viability of a school or local centre.</p> <p>This site is also truly unsustainable in that it has NO current links to the City. It is not an easy walk to the City and it has no bus links what so ever. There are far more appropriate sites for development.</p>

Comment ID:	<a href="#">1085</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Anna Treseder	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>With reference to the proposal to build 840 new properties on three sites in Harnham as a resident of the area since 1995 I wish to put forward my objections to the developments under the following headings:</p> <p>1) Roads/Traffic The Netherhampton Road is already very busy, with substantial queues at peak times. The route towards Wilton alongside the Wilton House wall and the roundabout is already very busy with queues at peak times. The bridge into Salisbury at Newbridge Road is very busy already and there are queues at peak times. The Harnham Gyratory roundabout is a very badly designed piece of road. It is already very busy, particularly at peak times, with traffic queuing back to the Radnor Hall on some days. The A36 to Southampton is a disgraceful entry to and exit from Salisbury with frequent congestion, as is the A36 along the Wyley Valley towards Warminster. The A30 out of Salisbury is already very busy with frequent congestion in both directions. Salisbury City centre is frequently gridlocked. Considering all these existing problems why do the planners think that south Salisbury is a suitable location for another 840 homes which will exacerbate them?</p> <p>2) Public transport There is little or no public transport along the areas of the Netherhampton  road.</p> <p>3) Schools What extra facilities will be available to the children who will inevitably come to live in these new houses if they are built? Schools in Salisbury are already under pressure.</p> <p>4) Doctors/Dentists What extra facilities will be available to the people who will come to live in these new houses if they are built? Doctors and dentists surgeries in Salisbury are already underpressure with people having to wait three weeks for GP appointments and failing to find NHS dentists.</p> <p>5) Hospital Services What extra facilities will be available to the people who will come to live in these new houses if they are built? The hospital is already underpressure with people having to wait many months for appointments/operations.</p> <p>6) Flooding With five rivers in the Salisbury area flooding is always a risk, particularly when the water meadows cannot cope with extra water. This endangers the City and its environs including the Close and the Cathedral itself. There have been previous investigations and reports on the effect of building in Harnham and the impact on the flood plain. Surely the potential developers are aware of this problem and should not be seeking to endanger the flood plain by building in Harnham?</p>			

Appendix Q - Schedule of representations

	<p>7) Jobs With shops and businesses closing down or relocating out of Salisbury what employment will be available locally for all the people in 840 new houses?</p> <p>8) Affordable Housing How many of the proposed houses will be low cost affordable homes for key workers and homeless families and how many will be expensive homes to maximise profit for the developers?</p> <p>I attended the consultation meeting in Harnham on 6 September 2017 and the consensus of opinion in the hall reflected my own concerns. We hope that this project will be quashed because the infrastructure to support another 840 homes in Harnham does not exist.</p>

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1086</a>	<b>Consultee</b> Mr Richard Deane vice-chairman	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Salisbury Civic Society		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.3, site N of Netherhampton Road			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Salisbury Civic Society opposes this site. Had it been in the original range of sites, the Society is highly likely to have opposed it in its 2015 response.</p> <p>The Society's view is that development here would potentially be damaging to the setting of the cathedral, and to the wider view of Salisbury on the approach from the west. The assessment of the site notes its location 'in an area which is sensitive in terms of the setting of the cathedral', but the only suggestion towards practical recognition of this issue is one for open space along the southern boundary. This is highly unlikely to be a sufficient answer.</p> <p>On the question of impact on views of the wider city, the assessment is silent. Currently the sharp boundary of the city to the north of the Netherhampton Road is mostly masked by mature trees, greatly reducing the impact of the built-up area as it is approached along that road. S1027 is to the west of that screen of trees, and development here is likely to complete change the whole perception of the city from this direction. It is hard to see how a screen of anything like comparable effectiveness could be achieved to the west of the new development. The Society believes that landscape considerations alone are sufficient to rule out S1027 as an appropriate location for development.</p> <p>Site S1027 N of the Netherhampton Road should be removed from the list of sites. If this means the shortfall has to be made up elsewhere, the Civic Society would point either to the possibility of greater capacity at S1028 (but only if the hopeful words in the consultation document about being able to address the site's traffic impacts are actually borne out), or to S80 at Old Sarum, which was a site supported by it in 2015. The Society believes that the scale of development to date at Old Sarum makes further housebuilding logical, provided that landscape impacts can be controlled. Further development, at S80, would not be ruled out by landscape considerations.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am very pleased to read that Wiltshire Council are proposing a mixed housing development of this site on the edge of Chapmanslade. It is a sensible place to build much-needed additional housing, being a site that is already partially developed, largely set back from the road and therefore not diminishing the look and feel of the existing village. The owners of the site seem sensitive to the needs and views of existing village residents and have gone to great lengths to take all preferences on board. In a recent village survey, I believe that 61% of the residents that took part said they wanted additional "affordable housing" in Chapmanslade - this development will be a good way to deliver on their wishes.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The Salisbury Civic Society would like to repeat a view it put at the outset of the S Wilts Core Strategy process in 2008. It strongly believes that the current pattern of endlessly seeking more housing sites of the periphery of Salisbury is not a sensible way of approaching the problem of ever-increasing demand for such sites, and prevents any coherent approach to infrastructure needs. The Society believes that a new settlement, somewhere in the eastern part of the district, should be given very serious consideration, as far and away the most sensible way of accommodating demand in the long term. It is not realistic at this stage of the plan process to expect a radical shift to an emphasis on a new settlement in order to meet current requirements. However a new settlement should be included in future thinking.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Plan Strategy			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>On behalf of our client Princeton Homes, please accept this letter setting out our representations to the pre-submission version of the Wiltshire Housing Site Allocations Plan (SAP).</p> <p>Whilst we understand this consultation period is principally to discuss policies within the emerging SAP, we consider there to be a wider issue in hand with the Council's planning strategy moving forwards that needs to be addressed relating to soundness and consistency with the NPPF. Wiltshire Planning Strategy</p> <p>When the adopted Wiltshire Core Strategy (CS) was examined in 2014, it was acknowledged by the CS Inspector that the plan period up to 2026 does not provide the preferable 15 year horizon advised by paragraph 157 of the NPPF (only 12 years of the plan period left at the time), which reads as follows:</p> <p>"Crucially, Local Plans should: (...) be drawn up over an appropriate time scale, preferably a 15-year time horizon, take account of longer term requirements, and be kept up to date".</p> <p>The CS Inspector did however consider this to be sufficient, so long as the Council undertook an early partial review of the CS, including an updated Strategic Housing Market Assessment (SHMA) (paragraph 20 of the Inspector's Report, December 2014).</p> <p>Three years on, and with only 8/9 years of the plan period remaining, the committed early CS review has not yet been undertaken.</p> <p>Whilst the emerging SAP seeks to complete the Development Plan it only seeks to allocate sites to meet the minimal residual housing requirement now left in the current plan period. This plan should be more comprehensive in addressing the housing requirement for Wiltshire beyond the current plan period moving forwards and should ideally be in the form of a CS review as required by the Inspector or an advance on a more substantial update to planning policy through a new local plan.</p> <p>At a minimum, the SAP should allocate for considerably more housing than the residual housing requirement set by the CS on the basis the early review has not come forward.</p> <p>At present, taking into account dwelling completions and commitments (referring to Table 4.1 of the SAP), there is only a fraction of the housing requirement for each HMA left to identify up until 2026 suggesting a more substantial review would be more appropriate. Using the figures provided in Table 4.1 of the SAP, the following residual requirements are to be found (which are minimal at best):</p> <p>East Wiltshire HMA – Only 2.9% of the minimum housing requirement left to identify;</p> <p>North &amp; West Wiltshire HMA – Only 2.3% of housing requirement left to identify; and</p> <p>South Wiltshire HMA – Only 5.7% of housing requirement left to identify (albeit, the SAP provides fractionally more than the minimum requirement for each HMA).</p> <p>Based on the above, alongside commitments made by the Council during the CS Examination in 2014 to undertake an early review, a more substantial review of the housing requirement and locations for growth should be progressed as part of this process. This would suggest strong delivery across all HMAs still with 8 years to go on the current plan period.</p> <p>The NPPF (paragraph 47) stipulates that to boost significantly the supply of housing, "local planning authorities should:</p>				

Appendix Q - Schedule of representations

	<p>identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15" [underlined for emphasis]</p> <p>However, as we are now a significant way through the plan period (2006-2026), the Council is unable to identify a sufficient supply of specific, deliverable sites for years 6-10 as required by the NPPF. It is understood that the Council anticipates the adoption of the SAP next year (2018). At this point, there would be less than 8 years of the plan period left. This is not consistent with the NPPF and as such cannot be considered "sound".</p> <p>At present the SAP refers to housing land supply figures with a base date of April 2016 (Table 4.8) and presents a scenario which suggests the Council can demonstrate a five year supply for the remainder of the plan period. However, this will need to be updated with more recent housing land supply figures by the time the plan is at examination. More up to date calculations by the Council itself suggests the Council cannot demonstrate such a comfortable rolling five year supply beyond the initial five year period.</p> <p>Topic Paper 3 (Table 3.4) which forms part of the evidence base to the SAP, estimates a more accurate up to date land supply position based on supply throughout 2017. This suggests that, based on current figures, the planning strategy leaves the Council without a demonstrable five year supply in any of the three HMAs towards the end of the plan period (2025/26), shown as follows: [refer to table in attached representation document]</p> <p>It is clear that the Council needs to plan for further growth to sustainable settlements in order to ensure that it maintains a rolling five year supply to the end of the plan period and indeed beyond.</p> <p>With reference to the Cabinet minutes<sup>1</sup> of the 12th September 2017, it is acknowledged that the Council no longer intends to undertake a "partial review of the CS", with a view to undertaking a "Swindon and Wiltshire Joint Spatial Framework" and subsequent "Wiltshire Local Plan Review". We support the Council's intentions to review the wider planning strategy to ensure there is a suitable growth strategy to support housing need moving forwards. If as it appears the Council no longer intends to undertake an early CS review as required, the SAP must do more to ensure that the Council can demonstrate a rolling five year supply until the end of the current plan period (2026). At present, any delays to the Wiltshire Local Plan Review scheduled for adoption in Q1 of 2021 runs the risk of leaving the Council without a demonstrable five years supply.</p> <p>Furthermore, there are no guarantees that the high numbers of "commitments" relied on across all three HMAs will deliver within the suggested time period and there appears to be no safety mechanism for under or non-delivery. In respect of Devizes for instance, we are of the opinion that at least one or two of the NP allocations are unlikely to come forward within the plan period.</p> <p>As set out above, the SAP therefore needs to ensure as a minimum there is a demonstrable five year supply across all three HMAs for the remainder of the plan period. This is particularly important if the Council does not address the requirements of a CS review now, given the lengthy time-scales that are involved in producing a new Joint Local Plan. The SAP should therefore look to include additional strategic allocations at the most sustainable settlements to ensure there is a sufficient buffer above the minimum housing requirement and to buffer against non-delivery. This is made even more important in light of the recent Government announcements<sup>2</sup> to simplify the calculation of Objectively Assessed Need (OAN) which, over the next year, we anticipate alongside the updated SHMA for Swindon and Wiltshire, will increase the housing requirement significantly.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Devizes represents an appropriate location in which to direct further growth. It is identified as a "Market Town" in the adopted CS, described as having "the potential for significant development that will increase the jobs and homes in each town in order to help sustain and where necessary enhance their services and facilities and promote better levels of self-containment and viable sustainable communities."</p> <p>There has been a strong market for growth in Devizes over the plan period to date which is shown through the high number of dwelling completions and commitments. Demand for more housing and employment at Devizes is expected to remain high and the Council should be actively promoting additional growth to support this.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The fact that settlement boundaries have been used by Wiltshire Council in the past does not automatically provide justification their continue use going forward. LD&PC Ltd consider that the removal of settlement boundaries from small villages was a positive step that enables a site by site approach to be taken to rural development according to the principles of sustainable development and material considerations. Identifying discrete boundaries to the limit of sustainable development unnecessarily stifles the organic development and, ultimately, the preservation of rural communities. The plan can be more effective in providing for rural development, both economic and residential, through the removal of settlement boundaries from both large and small villages. Such an approach would enable organic development well related to existing settlements and together with the neighbourhood planning process allow for larger allocations to meet identified needs of the community.

			Effective	
			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We consider the Wiltshire Site Allocations Plan (WSAP) to be unsound due to several key errors (identified in attached document) made during Stage 2 of the assessment. These errors have resulted in Site S113 being rejected without sound reason, leading us to believe the WSAP is unsound.</p> <p>The inaccuracy upon which the assessment of S113 was based means we must consider the WSAP to not be justified or effective; an error has resulted in an unjustified rejection of my site, demonstrating an ineffective assessment method.</p> <p>A positively prepared plan that is consistent with national policy should not allow errors in assessment, such as those made in the assessment of S113, to be made. Hence, we must consider WSAP unsound in all four categories specified at question 5.</p> <p>Due to key errors made at Assessment Stage 2, we believe our site was wrongly rejected, causing us to find Wiltshire Site Allocations Plan unsound. Our reasons for finding the plan unsound are as follows:</p> <p><b>1) Comments on unsoundness of Assessment Stage 2</b></p> <p>In the drafting of the Wiltshire Site Allocations Plan, Site S113 (Land to the rear of Hinde's Meadow) has been rejected at Assessment Stage 2A: Exclusionary Criteria, due to a consideration of accessibility. This decision has been made despite all other criteria being met, and has been based upon a consideration that has made several key errors;</p> <p>Access to the site has been incorrectly identified as a bridleway; it is actually a properly surfaced unrestricted byway open to all traffic.</p> <p>This byway is alike in character to the adjacent road, Elston Lane, and provides sufficient access to both Shrewton House and Shrewton Farm (indicating it can provide access to wide vehicles). Furthermore, the byway entrance is clearly visible from both approaches along Elston Road, allowing safe use.</p> <p>From the previously mentioned byway, a point of access (a double gated entry) to the site already exists.</p>			

## Appendix Q - Schedule of representations

The point of access along the sites North Eastern side, adjacent to its byway, has not been identified. The gated entry identifies an existing point of access to the site, confirming the suitability of the byway as a suitable route to and from the site.

It has been incorrectly stated that third party land is required to bring access to acceptable standards; the land immediately adjacent to the site is in fact the property of the same owner.

Should it be necessary, access to the site can be provided via the London Road, which sits adjacent to the land owner's boundary. There is potential to provide appropriate access points without damaging the integrity of the woodland.

In summary, considering the site met all specified exclusionary criteria at Assessment Stage 2A, and was rejected only after consideration of accessibility based on inaccurate information, there is no sound reason the site should not progress to Assessment Stage 3: Sustainability Appraisal.

We have therefore undertaken an evaluation against the Sustainability Appraisal Framework as follows:

(See attached document, S113 AS3)

### **2) Predicted result of Assessment Stage 3**

Using the Sustainability Appraisal Framework (found in the Sustainability Appraisal June 2017, p.90), we have assessed the site against the framework, and found it to satisfy most criteria.

Development at S113 will have a moderate positive effect upon Climatic Factors, Historic Environment, Population and Housing, and Economy and Enterprise. It will have a minor positive effect on Air Quality and Environmental Pollution, Landscapes, and Transport

Development will have a neutral impact upon both Water Resources and Healthy and Inclusive Communities.

The nature of the intended development (residential) means there will be a minor adverse effect upon Biodiversity and Land and Soil Resources.

It appears that development at the site will have a positive effect on the majority of Sustainability Topics, and only a minor adverse effect on two topics, it can be concluded that use of the site would allow Sustainable Development to contribute to growth in Shrewton.

### **3) Conclusion**

The projected result of Assessment Stage 3 demonstrates the sites suitability for development. Should it be re-assessed with amendment to the identified errors, it can be presumed the site would pass both stages 2 and 3, and successfully become part of the Wiltshire Site Allocations Plan. This re-assessment would allow us to find the plan sound, and allow us to support its publishing and delivery.

We are confident this representation will be fairly considered, and look forward to receiving your response.

The re-assessment of Site S113 is necessary to allow the WSAP to be considered sound; re-assessment will provide the opportunity to address the errors that resulted in accurate assessment of the site. Once these errors are addressed, and subsequent assessment is made in an

Appendix Q - Schedule of representations

	<p>effective and justified way, we shall be able to consider the WSAP positively prepared and consistent with national policy, and hence, find the WSAP sound.</p> <p>Please see attached document (S113 Rep) for suggestions to suitable changes at assessment stage 2, and predicted result of assessment stage 3 (S113 AS3).</p>

		Land Development & Planning Consultants Ltd		<b>Do you consider the draft WHSAP is sound?</b>	Yes
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.41			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The amended settlement boundary of Semmington is welcomed, reflecting the built form of the village as presently exists. Paragraph 1.1 of the Housing Site Allocations Plan suggests that the plan has been prepared to allocate new sites for housing to ensure delivery across the plan period, maintaining a five year housing land supply until 2026. However, focusing solely upon the obligation to meet an objectively assessed need up-to 2026 unhelpfully restricts the ability to plan for housings needs beyond the plan period. Effective future-proofing of the Housing Site Allocations Plan, and securing of the five year housing land supply, may be achieved through acknowledgement within the Plan of significant consents that have been granted, and not yet implemented, such as the 24no. dwellings at St Georges Road, Semmington (ref. 16/01678/OUT); together with sustainable sites that have been promoted through the SHLAA process, such as the former Sale Ground (SHLAA ref. 724). The two sites are shown on the attached drawing ref. LDC.2089_01. Development of these two sites at Semmington will assist in the preservation of the five year housing land supply, and result in a local and defensible settlement boundary to the village into the next plan period.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>CONSULTATION ON THE PRE-SUBMISSION DRAFT WILTSHIRE HOUSING SITE ALLOCATIONS PLAN DURRINGTON SITE 3410                  This representation is made by Durrington Square Limited, the owners of SHLAA site reference 3410 in the Wiltshire Housing Site Allocations Development Plan Document (WHSADPD). This representation is being made as part of the consultation process requiring submissions to be lodged by 22nd September 2017. The purpose of this representation is to demonstrate that site 3410 should be allocated for housing together with urgently required local facilities including a doctor's surgery and a public open space as part of a comprehensive use of the site.</p> <p>This submission is made up of the following elements:</p> <p>Demonstrating how the site can meet the two objectives of the WHSADPD                  Demonstrating that the exclusionary questions have been misapplied in the site selection process.                  Demonstrating the existing use of the site for recreation, which is already a deviation from the allocated use in the Salisbury District Local Plan 2011                  Comments upon the Pre-application submitted in 2015.                  Commentary on demand for uses.                  Appendices 1-5.</p> <p>DEMONSTRATING HOW THE SITE CAN MEET THE TWO OBJECTIVES OF THE WHSADPD.                  The two objectives of the WHSADPD outlined below are met by including site 3410.                  Objective 1: To ensure there is a clear definition to the extent of the built up areas at principal settlements, market towns, local service centres and large villages.                  Our comment – The existing housing to the south and eastern boundaries, together with the A345 road provide a very clear definition as is apparent from the plans in the pre-application and the Council's response.</p> <p>DEMONSTRATING THAT THE EXCLUSIONARY QUESTIONS HAVE BEEN MISAPPLIED IN THE SITE SELECTION PROCESS                  The questions in bold below are the exclusionary questions which were used as part of the site selection process. After each question, we have outlined our response.                  Is the SHLAA site fully or partly a commitment? Or is the site fully or partly within a Principal Employment Area, or other existing development plan allocation? The site is not an employment area, but it is allocated as 'open space' in the existing development plan allocation. However, as we shall demonstrate this allocation is now historic as another use, namely recreation, has been implemented via various planning consents. Or is the site isolated from the urban edge of the settlement i.e. not adjacent to the settlement boundary and not adjacent to a SHLAA site that</p>			

#### Appendix Q - Schedule of representations

is? No, it immediately abuts the existing settlement boundary and is naturally bounded to the west and south by roads and to the east and north by residential development.

Is the site fully or partly within the settlement boundary (31)? The site is not within the existing settlement boundary. However, as will be apparent from the plan the inclusion of the site is a natural extension of the boundary up to the A345 with the settlement boundaries already on the northern, eastern and southern boundaries. A settlement boundary has to be flexible to meet the new demands, otherwise, by definition, boundaries would never change which is untenable. The two new sites being brought forward are S98/3154 and 3179, both of which are outside the existing boundary.

Is the site fully or partly within one more of the following environmental designations of biodiversity or geological value (i.e. SAC, SPA, Ramsar sites, National Nature Reserve, Ancient Woodland, SSSI)? No, the site is not.

Is the site fully or partly within green belt? No.

Is the site fully or partly within flood risk areas, zones 2 or 3? No. See the Exclusionary Plan in Appendix 2.

Is the site fully or partly within areas involving any of the following internationally or nationally designated heritage asset (i.e. World Heritage Site, Scheduled Ancient Monument, Historic Park and Garden, Registered Park and Garden, Registered Battlefield)? No, the site is not. However, the site, along with all sites in Durrington, is in an area of significant archaeological interest, being near Stonehenge and Durrington Walls. This would need to be addressed in any planning application with an excavation report. However, this is a procedural issue, which has no bearing on the allocation of the site for housing and other uses.

**DEMONSTRATING THE EXISTING USE OF THE SITE FOR RECREATION, WHICH IS ALREADY A DEVIATION FROM THE ALLOCATED USE IN THE SALISBURY DISTRICT LOCAL PLAN 2011**

Site 3410 was excluded at stage 2 of the SHLAA process. We understand that this decision was made because the Salisbury District Local Plan of 2011, policy R10, has allocated the site as 'public open space'. This is a flawed approach because of the history of the site, the ownership and the current, planning consented, use.

The site has been let by Durrington Square Limited to Durrington Town council since December 2005, but their current lease is ending on 2nd December 2017. Historically the ownership of the site was fragmented and there were no submissions by the owners when the 2011 Plan was being prepared. As a result, we are informed that the site was allocated for the then apparent use by default. However, the allocation of the site as 'open space' is now historic and has been superseded by planning permissions since this allocation was first made. Consequently, the 'open space' use is no longer applicable in any event. The site is now in recreational use, including a BMX bicycle course and an associated building. Copies of the planning history decisions are in Appendix 3. The site is in private ownership and uses within the existing planning consents are being considered, none of which will be for 'public open space' yet all such uses will comply with the existing planning consents for recreation and BMX biking. Furthermore, the owners will have to make the site secure and stop any access on expiry of the lease, if/when the property is handed back purely from a security point of view. The open space use will, therefore, not be continuing long term in a public context.

**COMMENTS UPON THE PRE-APPLICATION SUBMITTED IN 2015.**

The owners submitted a pre-application in 2015 with a scheme. The pre-application, the scheme and the Response from Development Services South of Wiltshire Council is contained in Appendix 4.

The Response was thorough and, in general, supports the housing use were it not for the R10 open space designation. The pre-application Response highlights some misconceptions with regard to the R10 designation, which are answered in the paragraph on this page outlining the ownership and lease history. In particular, the impact of the ownership and lease on the historical zoning of the site for R10, open space use. The Response has comments in three categories. First, there is the pure planning view by reference to the National Planning Policy Framework (March 2012) and the Adopted Wiltshire Core Strategy. In essence, our site is designated Public Open Space by policy R10. There is also reference to the Durrington boundary. The boundary is inevitably a flexible line which needs to adapt to changing circumstances in the way that has the least impact. Our site is natural infill being bounded by existing housing and a road, which forms a sensible and clear boundary limit.

Appendix Q - Schedule of representations

	<p>The second category of Responses do not object to development but address requirements of any development, such as affordable housing and the works needed to connect utilities. These Responses are relevant once the principle of development is established, but would not be an impediment to development.</p> <p>The third category of responses relate to archaeological matters given the proximity of the site to Stonehenge and Durrington Walls. All of the issues raised in the Response can be addressed and dealt with as part of the normal planning process for Durrington and would not be an impediment to a housing use. The site is outside the World Heritage Sites zone (see the Exclusionary Plan in Appendix 2), however it is in an area where archaeology needs to be carefully considered.</p> <p>Excavations would be needed as part of any planning application, but again, this would not stop any development, but would merely need to be carried as part of the planning application and development process. All of Durrington has some relics and it is a question of managing the process. For example, we are not aware that thorough extensive excavations have occurred for those sites allocated (S98, 3154 and 3179), yet they will be needed.</p> <p>The Response refers to sight lines in the context of heritage sites. In fact, the site is bounded by houses on the south and eastern sides and is sloping which means that the site is hidden from view except from the A345 to the west.</p> <p>In summary, the grounds for a refusal would be the same as the reason the site was rejected at stage 2 in the SHLAA process. That is to say, the R10, public open space zoning under the existing Plan. As we have stated, we consider this to be misconceived.</p> <p><b>COMMENTARY ON DEMAND FOR USES</b></p> <p>There is a well-publicised shortage of housing in Great Britain. The WHSADPD has assessed housing requirements and how those are going to be met. The key issues which may not have been fully taken account include:</p> <ul style="list-style-type: none"> <li>a) There have been thousands of soldiers returning from Germany. (see articles in Appendix 5).</li> <li>b) Infrastructure is required in the form of schools and medical facilities to meet the influx as well as the existing population. We are exploring at a local level, which facilities are needed. These include a doctor's surgery as the current one is about to close and a dentist's surgery to cater for the growing population. We are actively investigating ways of incorporating these within our site.</li> <li>c) Durrington potentially offers less expensive housing than, say Salisbury, the main settlement in South Wilts, where house prices are some 30% higher. In the Page 349, para 3.6.3 of the BNP Paribas Report within the Draft Wiltshire House Allocations Plan dated 20th June 2017 submitted to Councillors it is stated that the average new build sale price of £3,205 per sq m for south Wiltshire. Whilst we agree this might be an average, the figure is less for Durrington and more for, say, Salisbury.</li> <li>d) We have marketed the site for residential use and the response has been positive, subject to the site being allocated for housing. This is indicative of demand.</li> </ul> <p><b>CONCLUSION AND SUBMISSION</b></p> <p>Based upon this information we consider that site 3410 should be allocated for housing with supporting infrastructure facilities to meet evident requirements in Durrington and the surrounding areas.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Objective 2: To help demonstrate a rolling five year supply of deliverable land for housing development - a duty on each Local Planning Authority required by the National Planning Policy Framework. Our comment – To have a five year supply in Durrington requires more planning than most areas because of the archaeological considerations. All sites will require detailed excavations which means that sites will not come on stream as quickly as perhaps envisaged. Surely it is better to err on the side of caution and allocate extra sites to overcome this problem. After all, the market will determine the demand and additional supply will, if anything, reduce house prices, making them more affordable, which must be a good thing.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4 Church Lane Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I wish to object to the proposed selection of Site1021 Church Lanein Trowbridge on the grounds that it will have a detrimental effect on the wellbeing of many local people.</p> <p>The area proposed for development is part of the green buffer between Trowbridge and Southwick, and lies alongside theSouthwickCountryPark. This is the first real piece of rural countryside when exiting Trowbridge southwards along the A361.Church Laneretains its aged rural nature, old trees and ancient hedgerow, drainage ditch – all populated by birds and wildlife and with paddocks to the south of Church lane occupied by horses and sheep. The lane remains unadopted and with minimal street lighting. As a no-through road it remains narrow and peaceful. The lane probably sees more foot traffic than motor vehicles as it is well used by local people getting toFrome Road, by dog-walkers and by cyclists. As a ‘green lung’ on the south side of the town of Trowbridge the ‘site’ is clearly visible to passers-by and by visitors to the Southwick Country Park, and much of it is accessible to the general public.Church Lane remains a quiet and safe route for horses and their riders, for mothers with prams and young children and other pedestrians. Site 1021 is currently recreational land and the views towards the Southwick Country Park are a very valuable asset to local residents, dog-walkers and all other passers-by. Local children play happily onChurch Laneand sometimes watch and talk to the horses in the paddocks.</p> <p>The area of Site 1021 is a particularly valuable landscape for a number of local groups that use the church hall including Scouts and Guides, play groups and groups of people with disabilities. The peaceful rural landscape and wealth of flora, fauna, birds and other wildlife including deer and the rare Bechstein’s Bats here are all of great educational and leisure benefit to such groups of local people.</p> <p>For one local man in particular Site 1021 is crucial. The man in question has severe physical disabilities and little speech. He can only get around by use of a wheelchair. Nevertheless, most days of the year he drags himself in his wheelchair several hundred metres alongFrome Roadat some considerable effort, despite the noise and polluted air on the very busy A361 all the way toChurch Lane. He then wheels himself 20 metres along the lane, turns off the road and up to the gate overlooking the paddocks that look towards Southwick Country Park.</p> <p>The man will sit here in his wheelchair enjoying the peace and quiet of this view, and soaking up the sun sometimes for 2 or 3 hours on a pleasant day. I have seen the horses in the paddock wander up to the gate to be near to him. How can you place a value on this locality and this daily experience for this man and others like him?</p> <p>For most local people the threat of turning this unique rural corner of Church Lane into just another modern housing estate represents a potential permanent loss of an ancient rural corner of Trowbridge, the loss of a tranquil lane where wildlife remains to enrich our lives, and a very welcome green relief to our hectic modern lives from the noise, dirt, traffic and tarmac of the busy town.</p> <p>For the man in the wheelchair the loss of this tranquil field, the view, the peace, and his friends – the horses, could be a devastating, morale-shattering personal tragedy.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>2) Flood risk and the high water table in Salisbury. –</p> <p>We attended the consultation meeting in the Guild Hall on 19th July. There were tables with the maps spread out. Although the proposed building sites were highlighted, the river systems were not, and the existing roads and pinch points were not. These pinch points consist of places where major roads are carried across the rivers, or points at which major roads pass under the railway. Of course by definition a map is a 2-dimensional representation, but these maps had nothing on them that made for real consultation. They did not show areas of question and concern, and they did not show any awareness on the part of the developers about the geographical limitations and realities raised by the proposed developments.</p> <p>There was a representative for the consultation at the table. We asked her about the flood risk for site 1027. She replied that the environment agency has it designated as a non-flood risk area. If you pass that field in the winter when it is wet, it is always flooded. If you walk across the field, what you will come to is the river (not highlighted in the maps) and it is a flood plain. The houses in the adjoining St George's close development arguably should not have been built there and people who live in that development have given anecdotal reporting about the problems.</p> <p>Building such a huge number of houses on site S1028 will significantly reduce the absorbency of these fields and hill slopes which will cause a great increase in run-off water down onto the Netherhampton Road and the already flood-prone S1027 towards the river.</p> <p>Another man who was looking at the maps as well, showed the representative how the Ring road which goes round the east and north sides of the city was abandoned at the point where it was supposed to join Churchfields to the west and south because concrete pillars would have had to have been built to get it across the very high water table.</p> <p>The representative seemed ignorant of these considerations. We pointed out to her on the developers' own maps where the river systems run. The were marked on the map but not highlighted and so did not make visible the challenge of the sites proposed.</p> <p>1) Justified/Not justified: We understand that more housing is needed. People need decent places to live, and affordable places to live. We need more socially-affordable housing. However we doubt very much whether developers are the people to deliver this. We also have to live for ever with the consequences of ill-thought-out changes or decisions based on cost-cutting or corporate money-making considerations. These far-reaching decisions must be based upon consideration of what is really needed. I personally believe that the policy of adding house-building to preexisting urbanised areas, especially in a beautiful county such as Wiltshire, needs to be re-examined.</p> <p>2) Effective/Not effective: We believe this is a piecemeal proposal where a holistic planning strategy is needed. No more houses can be built until this is done. There needs to be a thorough review of the transport infrastructure around Salisbury before any more housebuilding can take place. There should also be a better analysis of the flood risks when building new houses on S1027 and S1028.</p> <p>3) Positively prepared/Not positively prepared: We believe there is a real case for creating a new market town for example, on the garden city lines, where the infrastructure would be able to cope because it was planned for; where there would be doctors' surgeries and schools as well</p>				

Appendix Q - Schedule of representations

	<p>as roads and houses, efficient transport links to other centres, rather than overwhelming existing infrastructures that simply cannot cope because they are already overburdened.</p> <p>4) National policy: We have not had time to study the national policy and so cannot comment as to whether this proposal is in line with it. However, river systems and the facts of physical geography have to be taken into account whether or not national policy aligns with it.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Therefore: -</p> <p>3) Lack of confidence in the quality of the consultation: - Our concern at the lack of apparent awareness of issues by the developers. At the meeting in Harnham on Sept 6th we learned that when the MacDonald's Drive-Thru was being proposed on the Southampton Road, the Highways Agency turned out to have got their figures wrong on the traffic volumes. In this proposal we cannot even believe they have studied the matter. In this consultation we were told the Environment Agency does not define as a flood-risk area an area which we know for a fact floods frequently and is part of a flood plain. We have no confidence in the consultation. To have a one-day event on July 19th in the holiday period, when this issue is so extremely important to so many people, seems to suggest that the developers are not genuinely interested in a real consultation.</p> <p>1) Justified/Not justified: We understand that more housing is needed. People need decent places to live, and affordable places to live. We need more socially-affordable housing. However we doubt very much whether developers are the people to deliver this. We also have to live for ever with the consequences of ill-thought-out changes or decisions based on cost-cutting or corporate money-making considerations. These far-reaching decisions must be based upon consideration of what is really needed. I personally believe that the policy of adding house-building to pre-existing urbanised areas, especially in a beautiful county such as Wiltshire, needs to be re-examined.</p> <p>2) Effective/Not effective: We believe this is a piecemeal proposal where a holistic planning strategy is needed. No more houses can be built until this is done. There needs to be a thorough review of the transport infrastructure around Salisbury before any more housebuilding can take place. It just spoils places. These beautiful open spaces need to be preserved around the city. It is what Salisbury is known for, 'The City in the Country'- not 'The City in the Urban Sprawl becoming more like Croydon every day.' Wildlife habitats must be preserved and the open spaces which modulate our physical and mental health, leisure and breathing spaces are needed, not just optional extras. Many, many people enjoy walking along those fields and field edges. I am one of them.</p> <p>1) Justified/Not justified: We understand that more housing is needed. Comment ID:	1112	<b>Consultee</b> Mr Patrick Kinnersly White Horse Alliance  <b>Person ID:</b> 487991	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft WHSAP is sound?</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Preamble                      The White Horse Alliance is a coalition of national, regional and local environmental groups and parish councils campaigning for sustainable transport and spatial planning in West Wiltshire and along what Wiltshire Council calls the 'A350 economic growth corridor'. In view of the council's interest in developing a fast route from the M4 to the Channel Ports we also keep a watchful eye on transport and planning matters along the A350 through Dorset and along the A36 eastwards to Salisbury and the container port at Southampton.</p> <p>Summary                      We oppose the draft Housing Sites Allocation Plan because it cannot achieve sustainable development. The plan proposes further significant growth in housing numbers in the Trowbridge area without an overall spatial plan for dealing with the resulting impacts on transport systems, social infrastructure and the environment. The plan would locate a disproportionate burden of new development in communities around Trowbridge, shrinking the open space between town and villages and eroding natural habitats required for the conservation of European protected species.</p> <p>The council admits that the 'need' for most of these new homes - 1000 out of 1,220 – arises because the Ashton Park urban extension will not provide its full allocation of 2,600 dwellings before the end of the plan period in 2026. Sites for 1,000 homes therefore have to be found in the Trowbridge community area. The delay in construction of Ashton Park is blamed on the need to prevent the development and the A350 Yarnbrook-West Ashton relief road - an integral part of the scheme - harming the breeding colonies of Bechstein's bats that roost in ancient woodlands to the SE of the site. Harming the conservation of this European species would damage the integrity of the European site established for their protection, the Bath and Bradford on Avon Special Area of Conservation (SAC). That would be in breach of the European Habitats Directive and the UK's Habitats Regulations 2010. The development would then be unlawful and planning permission would have to be refused.</p> <p>While we can sympathise with the problems imposed on local authorities by the government's imposition of arbitrary but rigid housing quotas in each housing market area (in this case including Chippenham as well as Trowbridge), Wiltshire Council's difficulties at Ashton Park are entirely of its own making. The presence of breeding colonies of Bechstein's bat in woods to the SE of Trowbridge has been known since 2003. WC's predecessor, WCC, was warned at the time by its own ecologist that development in this area might be in breach of the Habitats Directive. Natural England repeated the warning in 2009 when WC published its first draft of the Core Strategy. At the Examination in Public of the Core Strategy in 2013 our ecological adviser Prof John Altringham predicted that the Ashton Park development could lead to the eventual extinction of these bat populations.</p> <p>The council and the developer appear to have ignored all these warnings until it was far too late to rethink its spatial strategy. It is now devising a new master plan for Ashton Park and a new mitigation strategy to reduce the ecological impact of the new section of A350. This calls into question the soundness of a plan based on creating a very large estate reliant on a very large road to handle the traffic problems that result from building massive car-dependent estates remote from towns and services. Did the council's ambition to build a new section of the A350 'growth</p>			

Appendix Q - Schedule of representations

	<p>corridor' drive it to create an urban extension large enough to yield an £11.5m contribution from the developer towards the £17m cost of the road? We think it did.</p> <p>The communities around Trowbridge will pay the price for this upside-down approach to spatial planning. After 2026 they will be accommodating not only the 1,000 extra 'AshtonPark' homes but also the delayed 1,600 originally planned for the large area of farmland allocated for housing and industrial development in the open countryside between Paxcroft Mead, West Ashton and Yarnbrook.</p> <p>The Bechstein's and other bat species will also pay a price in further habitat loss. As the council has acknowledged, most of the sites now proposed for development are used by foraging and commuting bats – see below.</p> <p>The framework documents that should guide and underpin the housing growth now proposed by the council are out-of-date and incomplete. Work on the Transport Plans that were supposedly integral to the Wiltshire Core Strategy appears to have stopped in 2012. Much the same applies to the equally central Green Infrastructure Strategy.</p> <p>In the absence of these tools for joined-up planning the council has inevitably failed to comply with sustainable development policies embodied in its own Core Strategy and in the National Planning Policy Framework (NPPF).</p> <p>As a result Wiltshire Council has undermined the Local Development Framework, rendering the Local Plan unsound and ineffective.</p> <p>Conclusions</p> <p>Wiltshire's transport and spatial planners and ecologists face an uphill struggle if they are to rescue a sustainable development plan from the mess that has resulted from ignoring early warnings about the environmental constraints facing any large-scale development in the area to the SE of Trowbridge. We doubt if that will be possible.</p>

## Appendix Q - Schedule of representations

Comment ID:	1113	<b>Consultee</b> Mr Patrick Kinnersly White Horse Alliance  <b>Person ID:</b> 487991	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Local Plan policies - Brown-field last?</p> <p>The proposed wave of new estates depositing 1,000 more homes on farmland round Trowbridge highlights the council's failure to achieve any prioritisation of brown-field sites, as envisaged in the Core Strategy and encouraged in Para 17 of the NPPF.</p> <p>The long-derelict Bowyers factory in Trowbridge stands as a monument to this absence of imagination and resolve in pursuing sustainable development. This massive site has for years presented the council with an opportunity to achieve several of its own objectives for sustainable development.</p> <p>The most obvious of these is transport integration. Core Policy T4 identifies the need for a Transport Strategy for Trowbridge. The strategy should identify a package of measures including 'Interchange enhancements that are accessible by all.'</p> <p>'Transforming Trowbridge – Scoping and Vision Study' (August 2010) recognises that 'The town has a below national average usage of public transport, exacerbated by the lack of a bus depot facility and poor bus terminus facilities' and admits that 'The rail station is poorly integrated with the town centre and other transport modes and there is low provision of safe pedestrian and cycle routes.'</p> <p>The 'emerging' Trowbridge Transport Strategy set out five 'components'. Under 'Public transport' it listed 'Improvements to Trowbridge rail station, including redesigned station forecourt and interchange area.'</p> <p>Why have the Bowyers site and adjacent railway land not been developed so as to provide not just a transport interchange but a multi-functional centre of the kind seen in small towns on the Continent? Instead of the present dismal prospect confronting travellers arriving in the county town, they could for a start find a welcoming café-bar. The site could also provide housing in the form of high-density affordable apartments (with limited remote parking). In pursuit of more skilled and more diverse employment opportunities, there could be a cluster of affordable small units for offices, start-up enterprises, workshops, craft studios and small shops. We suspect that the ongoing dereliction stems from councillors and planners relying on the usual template for off-the-peg economic growth - 'waiting for the Big Developer' to come up with the funding for a clone-town commercial centre with abundant parking for more chain-store brands and fast-food outlets. The redevelopment of Chippenham station seems to have fallen into this trap.</p> <p>LEP funding could have been sought for such a development, as at Chippenham station, had the council not been so determined to devote a total of £17m of LEP and developer funding to building another section of its A350 growth corridor, between Yarnbrook and West Ashton.</p>

Appendix Q - Schedule of representations

Comment ID:	1115	<b>Consultee</b> Mr Patrick Kinnersly White Horse Alliance  <b>Person ID:</b> 487991	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft WHSAP is sound?</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Green infrastructure (GI)                      There is no adopted green infrastructure plan. The current draft Wiltshire Sites Allocation Plan recognises that a GI strategy is 'essential' to realising the objectives of Core Policy 52. However no progress seems to have been made towards adoption of a plan in the five years since the council published a nine-page Green Infrastructure Strategy update in January 2012.</p> <p>This is a cause of special concern to our member groups. Green infrastructure is vital for any effective mitigation strategy for reducing the adverse impact of these developments on bat populations in an area where patches of natural habitat are shrinking and becoming ever more fragmented. GI strategy can protect and enhance natural features such as hedgerows that support existing flight lines and potential commuting routes between summer roosts and the hibernation roosts in the SAC areas of Bradford and Box.</p> <p>Since the Examination in Public of the Core Strategy in 2013 the WHA has consistently called for the council to promote the mapping of commuting routes between summer roosts and hibernation sites (as pioneered by Natural England when it mapped the strategic flyways serving the South Hams SAC for greater horseshoe bats in south Devon). Some mapping of flight lines has been done for the developer in the case of the Ashton Park development but the council has consistently resisted mapping and safeguarding – let alone creating - green corridors extending beyond the boundaries of individual sites and beyond the funding provided by the developers of those sites.</p> <p>The fresh wave of large housing sites now proposed in the heart of the SAC 'planning guidance zone' makes it even more urgent to add this as a requirement to the GI strategy and then complete the strategy without further delay. The council has acknowledged that the majority of proposed sites in villages around Trowbridge could impose adverse impacts on bat populations linked to the Bath and Bradford SAC:</p> <p>'In the face of the need to identify sites for additional housing at the town, there are significant ecological, landscape (Green Belt) and infrastructure constraints that significantly limit the choice of available sites. Assessment evidence demonstrates three considerations to be addressed in order for housing development to be accommodated: Ecology: an interconnected pattern of priority Biodiversity Action Plan (BAP) habitats such as mature hedgerows, trees and water features, along with designated woodland features around the town support significant populations of protected bat species associated with the Bath and Bradford-on-Avon Bats Special Area of Conservation (SAC). Additional housing development will increase the population of the town and thereby amplify the risk of recreational pressure on bats. To address this issue, the Habitats Regulations Assessment (HRA) for the Plan recommends developing a strategy for managing recreational pressure across the town. Detailed design and layout of schemes would need to consider additional planting and open space to protect and enhance these BAP priority habitats and thereby augment opportunities for bat foraging routes and roosting sites. This could include establishing dark corridors through sites to protect foraging routes and roosting areas for bats. Specific measures that will be required are explained for each site.</p>

Comment ID:	<a href="#">1121</a>	<b>Consultee</b> Mr Patrick Kinnersly White Horse Alliance  <b>Person ID:</b> 487991	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>It is worth noting that the total area of land occupied by the above sites represents a loss or deterioration of natural habitat amounting to more than 80 hectares. Such a loss cannot be made good by 'mitigation'. Much of the development now proposed falls within the 'consultation zones' laid down in 'Bat Special Areas of Conservation (SAC) Planning Guidance for Wiltshire' (See maps on pages 8 &amp; 9 of the September 2015 edition.) The guidance says that 'Mitigation strategies for European protected species cannot legally be obtained by condition.' It goes on to explain that 'All mitigation land should be transferred to a single responsible body and should be visible and accessible to facilitate effective compliance, monitoring and enforcement. It is not acceptable to rely on land in multiple and / or private ownerships e.g. private gardens, as appropriate management of such features cannot be secured for the long term – conditions would be unenforceable.'</p> <p>The Bats SAC planning guidance sets demanding standards if developments are to comply with European and UK biodiversity law. The WHSAP proposes that 'Development will be required to contribute towards the delivery of the Trowbridge Mitigation Strategy.' We look forward to studying this document and seeing if it meets the standards laid down in the planning guidance, eg by transferring bat commuting corridors and other GI infrastructure to a single 'responsible body' rather than leaving them scattered among commercial developers.</p> <p>All these matters will have to be finalised before finalising a rigorous Habitats Regulations Assessment of the sites plan. All new developments and associated infrastructure will have to be added to the list of plans and projects to be assessed for their in-combination effect on the integrity of the SAC.</p> <p>Because most new housing sites in the WHSAP could potentially threaten the conservation of European bat species and therefore the integrity of the Bath and Bradford bats SAC, they will also have to be added to the list of plans and projects to be assessed for in-combination effects on the SAC as part of the HRA of Ashton Park and the A350 relief road.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	GI and sustainable transport We welcome the way WC planners have seen the need to connect these new developments to Trowbridge or other settlements by footpaths and cycleways. Reliance on developer-funding leads to the risk that, as with the creation of green corridors for wildlife, this additional infrastructure will not actually materialise, negotiated away during bargaining over financial viability as it competes with affordable housing, new roads and extra provision for education and healthcare. Rapid completion of a GI Plan and a Transport Plan is now more urgent than ever so that these green corridors can be enshrined in policy and funded by the council as essential infrastructure.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>More traffic and air pollution The council's spatial planners are to be commended for recognising the traffic-generating potential of the proposed new housing estates and aspiring to connect them by walking and cycling routes. However, without the provision of much better bus services it is inevitable that these developments will add traffic to local and strategic road networks, increasing air pollution in the area.</p> <p>The environmental statement for the Ashton Park development acknowledged that traffic pollution from the development would pose a threat to several areas of ancient woodland in the area, including the Picket and Clanger woods SSSI. The developer's ecologists claim that the harmful effects of Nitrogen oxide emissions can be mitigated by sustainable transport provision. All the woods identified by modelling to be at risk from NO2 provide core roosts for the bats SAC.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1124</a>	<b>Consultee</b> Miss Rita P Molland  <b>Person ID:</b> 1128746	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I wish to lodge my objections to the above proposed development, believing the plan to be unsound.</p> <p>The main points that concern me are:</p> <p>The increased traffic that will be generated. Has this been investigated? If each house has even only one car (but many have 2 or more nowadays) that will be another 640 (or 1280 +++) cars on the road every morning. One assumes most of residents will be coming this way (not through Wilton) to get to work in Bournemouth, Southampton etc. or supermarkets. Recently it has been getting more and more difficult to exit St Mary's Road, as frequently the traffic is backed up from the gyratory past the road entrance and this can only get worse.</p> <p>All traffic coming along Harnham Road has to go through the Gyratory which is, I understand, already operating at almost maximum capacity. How can it cope with hundreds more vehicles?</p> <p>Apart from the traffic generated by the new residents there will be excavators, builders' lorries etc all that have to come through Harnham to reach the site. There are two schools as well as some old people's homes situated on or just off the road.</p> <p>Harnham Road is already a dangerous road with many HGVs including cattle lorries with live animals. Recently a man died as a result of a collision with such a lorry.</p> <p>Has provision been made in the plans for essential services such as doctors, schools, a church or a shop? if not then people will need to go elsewhere thus increasing the traffic flow even more.</p> <p>The fields on the north side of the road flood regularly in the winter - not a good place for houses. I have grave concerns that the northern development will have upon the flooding. I remember some years ago when a Link Road to Churchfields Trading Estate was mooted and it would have had to be built on stilts to avoid the flooding.</p> <p>I have lived in St Mary's Road since October 1970 and prior to this date knew someone who lived just round the corner in Harnham Road. I remember distinctly their garden being more than halved in size when the road was widened in the late sixties - to cope with all the additional traffic will really need a wider road - but there is just no more space to widen it. Also there was a beautiful line of mature trees further back along the road towards Folkestone Road, all of which were felled to achieve this so-called "progress".</p> <p>Finally. what a shame to spoil the only really delightful way to approach the city by building on beautiful, productive green fields, when an alternative brown field site could be sought for.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	A recent survey was undertaken on 21st July 2017. Trenches were dug prior to heavy rain that followed. These showed that the water table, even after a long dry spell was approximately as little as 30cm below the surface. One was on low ground and another further up the field. After rain, the water table rose to be level with the field grass. The fields either side of Lambrok stream often become flooded over a large area after heavy rain. Surely it can't sit well on the shoulders of cabinet members to willingly destroy part of Lambrok stream and also the partial or complete destruction of the tree lined brook that is hundreds of years old.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I wish to protest most strongly at Wiltshire Councils proposal to take a wrecking ball to its CORE STRATEGY adopted in 2015 to move the Trowbridge boundary to facilitate the building of a hundred and eighty homes on site 3565 at Southwick Court. It is sheer idiocy to proceed on this farmland and to do so is beyond my comprehension. Building on greenfield sites should only be undertaken when all brownfield sites are exhausted. Yet, this is clearly not the case.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		The proposed cost of these up market properties is likely to attract professionals, who may be less inclined to shop locally or benefit the local community. So why pursue the destruction of green farmland to cater for Bath and Bristol's overspill. Most are unlikely to work in Trowbridge, but will use the services, facilities and amenities. It is far better that Wiltshire Council build reasonably priced homes that are affordable on the abundant brown sites for those who are more likely to work and spend in Trowbridge. These are the very people who will create more demand and encourage the regeneration of the town centre. This is surely what is best for our county town and the cabinet members should be addressing these concerns.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I wish to protest most strongly at Wiltshire Councils proposal to take a wrecking ball to its CORE STRATEGY adopted in 2015 to move the Trowbridge boundary to facilitate the building of a hundred and eighty homes on site 3565 at Southwick Court.</p> <p>A recent survey was undertaken on 21st July 2017. Trenches were dug prior to heavy rain that followed. These showed that the water table, even after a long dry spell was approximately as little as 30cm below the surface. One was on low ground and another further up the field. After rain, the water table rose to be level with the field grass. The fields either side of Lambrok stream often become flooded over a large area after heavy rain. Surely it can't sit well on the shoulders of cabinet members to willingly destroy part of Lambrok stream and also the partial or complete destruction of the tree lined brook that is hundreds of years old. It is sheer idiocy to proceed on this farmland and to do so is beyond my comprehension. Building on greenfield sites should only be undertaken when all brownfield sites are exhausted. Yet, this is clearly not the case. One hundred and eighty homes will not support nor merit a new primary school or doctors surgery and will put an unbearable strain on the local community that is already at breaking point. Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4 Church Lane Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Maintaining the rural landscape of the area                      As well as offering a rural setting for the heritage assets here, the land between Church Lane and Southwick Country Park provides a part of the green buffer between Southwick and Trowbridge and is well used by local people. The first field has been used for grazing animals for at least the last 30 years and the larger field behind Framfield offers wide ranging views across the countryside, is used by local residents and is home to pairs of deer as well as bats.                      In 1989 there was an application (w89/0140) to build 2 dwellings on the field behind Church Cottage, Church Lane. This planning proposal was refused on the basis that “the proposed development (of just 2 dwellings) would extend the built-up area into open countryside, detrimental to the character of the area,” (Extract from the decision notice)                      Also, the Secretary of State further notes (in the appeal document) that “the proposal would harm the rural character of the area” and that “the site is outside the limits of Trowbridge”, which is still the case.                      Thirdly, the appeal document notes that the Plan “seeks to maintain a rural buffer between Trowbridge and Southwick. The proposal would encroach on open rural land and harmfully effect its appearance.... The appeal site, which is part of a pasture field on the south side of Church lane, is in the pleasant open countryside between Trowbridge and Southwick”                      If this is the case for 2 dwellings, 45 dwellings would be extremely detrimental to the rural nature of this area. In fact, the addition of Southwick Country Park since this application would further promote the maintenance of this area as rural, alongside maintaining the setting of St Johns Church, former school houses and Church Cottage.</p>

		Person ID: 1126922	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4 Church Lane Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>The consultation document states that there are Bechstein's Bats at the sites behind Church Lane and OldBrick Fields. The document states that bat corridors should be built into any proposed development.</p> <p>When contacting the council regarding the reasons for delay of the West Ashton site, the reason given was "The application has been delayed because the applicant is addressing ecology objections relating to a colony of bats in nearby Biss Wood. It is anticipated that a revised masterplan and environmental statement will be submitted by the applicant to address the objection in the near future, at which time all interested parties will be notified and given a further opportunity to make representations. All things being equal, the application may then be presented to the Council's Planning Committee for determination towards the end of the year."</p> <p>Since there are also bats at The Church Lane site, there is clearly a contradiction. As one of the rarest bats in the UK and Europe the Bechstein's Bat is one of the UK Biodiversity Action Plan species, which means that it is a conservation priority on both a local and national scale. Does Wiltshire Council want to be responsible for destroying the bat's habitat at Church Lane and further jeopardising its survival?</p> <p>National Policy also states:</p> <p>74 - Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless:</p> <ul style="list-style-type: none"> <li>• an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or</li> <li>• the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or</li> <li>• the development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss.</li> </ul> <p>75 - Planning policies should protect and enhance public rights of way and access. Local authorities should seek opportunities to provide better facilities for users, for example by adding links to existing rights of way networks including National Trails.</p> <p>156 - climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape.</p>

		Person ID: 1126922	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4 Church Lane Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>There was also a historic application (ref APP/F3925/A/02/1082021) regarding an agricultural access off the A361 to the field to the south of Church Lane. This is the proposed site of access to the new dwelling on the Housing Site Allocation Plan. However, when this planning application went to appeal, the Inspector specifically states that there need to be considerations as part of the appeal success. Paragraph 12 states "In the future, for economic reasons, they would expect to lease or rent this land to a local farmer". On this basis the inspector goes on to say that this purpose "seems to be reasonable and therefore agricultural machinery and transport would require access to the field....tending of livestock would require a small number of visits by light vehicles.....Arable use may well involve particularly large vehicles and plant but only during more restricted periods"</p> <p>Since this application the field in question has not been rented or used for agricultural purposes. The only use is that the field was ploughed once about three years ago, not for arable purposes or to grow crops but seemingly to prevent dog walkers and locals from enjoying the site and countryside. Also, it is clear from the above evidence that the access was granted ONLY for limited agricultural use NOT for construction or residential traffic which would clearly change the local area.</p> <p>Finally, when purchasing 344 Frome Road the new owners contacted the Planning Department at Wiltshire Council regarding future building on the fields that directly backs onto the Grade II listed cottage.</p> <p>In the reply they were informed that "the land that backs onto 344 is outside the development policy boundary for housing and therefore any application to develop the land is likely to be refused by the council.</p>

<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>		<p>H2.4 Church Lane Trowbridge</p>			
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>		<p>OBJECTION re: Flooding considerations Church Lane Site 1021 - Draft Wiltshire Housing Site Allocations Plan</p> <p>The area of land identified for proposed development of some 45 houses is an area already known to be prone to flooding, particularly during winter months.</p> <p>The southern edge of the proposed development is skirted by Lambrok Stream. Local residents, and anyone who walks in the Southwick Country Park know that in the winter months the landscape around the stream is waterlogged and some paths at the northern end of the Country Park will flood, sometimes for weeks.</p> <p>The gradual progression of global warming and climate change means the trend is towards warmer and wetter winters, and indeed warmer and wetter summers and ever-increasing levels of precipitation.</p> <p>A fluvial flood event was recorded at the proposed development site on 27th December 1979 when for several days the main river flooded when the channel capacity was exceeded. A considerable area of land each side of the stream was flooded.</p> <p>There are many other recorded issues and concerns regarding flooding and flood risk in areas of Trowbridge and nearby hamlets adjacent to the Lambrok Stream, a few of which are quoted below:</p> <p>Heart Radio website reported on 3rd November 2011 that people at risk of flooding from Lambrok Stream in Trowbridge will benefit from improvements to the Environment Agency's free flood warning service. "We know that certain parts of the River Biss, Paxcroft Brook and Lambrok Stream will flood earlier while other areas will flood later and only when the levels continue to rise," said Paul Hardy for the Environment Agency.</p> <p>On 23rd November 2012 the Environment Agency issued flood warnings for Lambrok Stream.</p> <p>3rd March 2015. Twelve neighbours living at Acacia Crescent, Trowbridge raised concerns about flooding relating to Lambrok Stream and planning application 14/06917/OUT for a development of some 30 properties. Their comments included the incidence of recent flood events associated with high water levels in the River Biss, flood water backing up very quickly in the Lambrok stream, rapidly affecting the land to the rear of Acacia Crescent, and threatening the flooding of those properties. Water routinely enters gardens. The Environment Agency issues warnings to these properties as they are in their declared flood zone. The residents stated that one thing they knew for certain was that the Lambrok stream floods after short periods of heavy rain.</p> <p>14th February 2017. The Save Our Southwick campaign group have voiced many objections to the Outline Planning Application 16/12279/OUT by Redrow Homes to build 100 homes on Blind Lane in Southwick village. Aspects relating to flooding and Lambrok Stream relevant to the proposed Church Lane development include: the development is partially on a flood zone 1 and extremely close to flood zones 2 and 3. This area of land is on clay and the water table level is always very close to the surface. When the water flows from the attenuation pond it will feed</p>			

#### Appendix Q - Schedule of representations

into the Lambrok stream at a single point and this will increase the volume of water being carried off towards Trowbridge. (This suggests that if the Redrow development is approved it could lead to greater flows in Lambrok Stream further increasing the risk of flooding in the vicinity of the proposed Church Lane development, as well as to other residential areas near to the Lambrok Stream throughout Trowbridge). Lambrok stream hasn't been able to cope with the water volume and has flooded the gardens south of Blind Lane in Southwick. This has happened on three occasions since 2012 which shows that the flood zone models used for these flood calculations are out of date. The Lambrok Stream on the site runs in three directions and the site is on a well-known floodplain. Flooding has been frequently witnessed in these fields and within some of the housing surrounding them, especially during autumn winter and spring. Application 13/02007/OUT being a property on the corner of Blind Lane/Wynsome Street was recently refused planning permission by Wiltshire Council, due to the level of existing flooding in the area. The campaign group also state that if development proceeds despite the concerns of local people the developers and/or existing landowners should be required to set aside funds in order to compensate future flood victims in the neighbourhood.

The River Levels independent website [www.riverlevels.uk/floodwarning](http://www.riverlevels.uk/floodwarning) has identified land alongside the full length of Lambrok Stream from Acacia Road in the centre of Trowbridge all along the line of its flow to Southwick Village for flood alerts and warnings. Whilst the Church Lane proposed development area currently comprises green fields, rough grasslands and paddocks the land acts like a sponge in the wet winter months absorbing rainfall over the whole area of the site and sending much of it down to the water table below, with a lesser volume of water flowing into the Lambrok Steam. This means surface water run-off is reduced and flooding in the area is less than it would otherwise be.

However, if the proposed development site were to be approved it would lead to the area being covered by highway tarmac, pavement and houses. Instead of rainfall soaking into the land the incidence of 'run-off' of water would increase significantly causing excessive and concentrated rainflow into the Lambrok Stream. This would severely threaten the new homes, as well as existing nearby properties and the adjacent Southwick Country Park with surface water flooding.

Furthermore, the consequentially raised water table in the area of the new and existing properties could also undermine their physical structure and increase the risk of heave and subsidence. It is common knowledge that clay soils that are repeatedly waterlogged in wet winter months and then dried in dry summers will expand, shrink and crack greatly. The Environment Agency website [www.gov.uk/check-flood-risk](http://www.gov.uk/check-flood-risk) identifies the land 100-200m all along either side of this section of the Lambrok Stream to be at HIGH RISK of flooding (27th June 2017).

The Environment Agency's concerns about increased levels of irresponsible building development in floodplain areas in the UK in recent years are well-known. The lower section of the earmarked field at Church Lane is classified as floodplain, and it seems foolish to consider it for development when it is bordered by a stream and known for local flooding and waterlogging, whilst many other potential development sites have been identified in Wiltshire, as well as a number of available large 'Brownfield' sites, which do not have the same proximity to streams and rivers with the associated flood risks.

The Government's Planning Portal Planning Policy Statement 15: Planning and Flood Risk Annex B: Development and Flood Risk says:

B11 New development can increase indirect flood risk in locations beyond the development site simply by increasing the amount of run-off from the developed area. This may occur where permeable surface areas are reduced by construction work leading to increases in the volume and speed of water transported through a catchment.

B12 Where development, for example, a poorly located bridge across a river, restricts the capacity of the drainage system to convey water through an area, this will increase the flood risk adjacent to and upstream of that development. This will create the potential for flooding to occur more often and to greater depths. Development that impairs the conveying capacity of the flood plain can also exacerbate risk by encouraging the gathering of water borne debris that may further restrict floodwater flows.

B13 Buildings and the construction of other hard surfaces also have the potential to increase downstream flood risk by decreasing flood plain storage and increasing the scale or speed of run-off.

So, development at Church Lane, in addition to exacerbating flooding and the other identified risks at this site, could also increase flooding issues anywhere along the line of the Lambrok Stream which ribbons its way across Trowbridge, through Wingfield, North Bradley, Southwick and beyond. If development causes additional water flow or blockage or obstruction at any point along the stream this could impact upon properties near to the stream anywhere along its line. Development anywhere along the line of the stream should therefore be investigated very thoroughly to assess the potential detrimental flooding consequences all the way along the line of the stream.

Appendix Q - Schedule of representations

	<p>The Environment Agency's website under the Flood Map for Planning tool has been interrogated (28th June 2017). It shows that the lower end of the proposed development site registers as a category flood zone 2 or 3 which requires the developer to carry out a Comprehensive Flood Risk Assessment.</p> <p>The outline planning application that Trowbridge Town Council was consulted on identifies the Church Lane site as the whole field right down to the Lambrok Stream. This area includes the floodplain zone 2/3 section of the field. The Trowbridge Town Clerk advises, however, that when the planning application progresses he expects the developer only to include the upper two-thirds of the field, the section above the floodplain (flood zone 1) which does not normally require any flood risk assessment. However, given that any run-off of water from the development would pass straight into the flood zone 2/3 area and into the Lambrok Stream with all the associated risks outlined above to the immediate neighbourhood as well as elsewhere up and downstream I believe the development should still be disallowed on flooding grounds.</p> <p>I once worked in a large city council Engineering Department. One of our fully qualified engineers told me his house was built on clay and that he spent his summer evenings not spraying the plants in his garden but instead he sprayed the foundations of his house to prevent the clay beneath drying out to try to reduce the risk of subsidence. Wiltshire Council should take heed – it would be far better to build houses on a level and stable site, preferably a tried and tested Brownfield one than to build on a virgin Greenfield slope of clay, on a gradient and alongside a stream that has a history of flooding and ground saturation every winter. The costs of flooding and/or subsidence are always high.</p> <p>Local hearsay...one of our neighbours has said she was recently walking in the area in question when she stumbled upon a Wiltshire Council officer and asked him if the Council was planning to develop the land. He apparently answered on the lines of, 'Not a chance. We wouldn't build on floodplain'.</p> <p>And now...here we go.</p> <p>Wiltshire Council - 'where everybody matters'</p> <p>Let's hope the views and wishes of the people of the Church Lane area matter.</p> <p>P.S. Another representative of the developers was seen making bore holes in the adjacent fields Sites 3260 and 3265 during August 2017, apparently to check the level of the water table. If this is the only time these inspections have been carried out (i.e. in August after one or two of the driest months of the year) then it is particularly foolish.</p> <p>If development is allowed to take place at Site 1021 Church Lane or the other nearby sites those unfortunate new residents will not have the luxury of only living in their houses in the summer months. They will have to live here all year round. That said, I suppose they may only be able to live there in summer if their properties flood every winter, and they may well have to pay colossal annual home insurance premiums for the 'pleasure' of living on a flood plain.</p> <p>Residents who have lived in the Church Lane vicinity for much longer than me report that flooding in the area is a frequent occurrence. The following photographs evidence this:</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4 Church Lane Trowbridge	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>OBJECTION re: Accessibility/Highways considerations Church Lane Site 1021 - Draft Wiltshire Housing Site Allocations Plan</p> <p>Highways issues/Accessibility</p> <p>The A361 is a blackspot for accidents both “in the dip” where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. There have been a number of serious road traffic accidents and one dead deer on the A361 in the last 6 months in the vicinity of the Church Lane and Oldbrick Road junctions (local Police will have full details).</p> <p>I witnessed one of those ‘boy racers’ in a silver car accelerate from around the junction of The Poplars southwards down the A361 at dusk on the evening of Thursday 7th September 2017 at a colossal speed. I am not exaggerating with an estimation of 60-70mph. Notwithstanding the failing light, reading the number plate at that speed was quite out of the question.</p> <p>Further access points onto the A361, even with tightened speed restrictions would only make matters worse. The Country Park is also used for regular ‘park runs’ where running and parking along the A361 between Southwick and Trowbridge is a common cause of delays.</p> <p>In contrast, the West Ashton site, for which the planning is well progressed, already has a new road, one new school and plans for two others. Sites at Church lane, Boundary Walk and Old Brickfields are being considered as Wiltshire Council states they would reduce traffic as residents would walk into Trowbridge rather than using their own vehicles (as opposed to development in nearby villages where cars would need to be used).</p> <p>PFA Consulting report for Wiltshire Council                      Trowbridge Traffic Model 2026 Model Forecasting ‘Problems and Issues’                      Dated 30th June 2011</p> <p>This report was commissioned by Wiltshire Council to advise on impacts on traffic and highways of the development proposals in its Core Strategy for 2006-2026. The report was written in the context of a planned 6,000 new homes in Trowbridge during this 20-year period.</p> <p>Para 2.6 required that 40% of the new homes should be affordable. Will they be?</p> <p>Para 2.7 stated that there would need to be improved public transport, pedestrian and cycling linkages to the town centre. What improvements in this regard are to be made affecting sustainable commuting from the proposed Church Lane, Southwick Court, and Upper Studley developments?</p> <p>Para 5.1 says TEMPRO guidance advises where development proposal is likely to have significant impact it should be explicitly modelled. Has such modelling been carried out for proposed development sites 1021, 3260 and 3265?</p> <p>Para 7.8 says average journey times were estimated to rise by 30-40% between the base year 2009 and 2026. It also states that this is unacceptable.</p>			

Appendix Q - Schedule of representations

Para 8.4 The Conclusions section of the report states:  
The traffic modelling has demonstrated that the performance of the highway network would suffer from increased levels of congestion with the planned future developments in Trowbridge resulting in the following:

- Reduced reliability for both motorists and bus passengers (given that public transport has no priority over cars);
- Increased journey times and journey distances;
- Reduced traffic speeds;
- Increased car borne pollution (since this report was compiled the Government has in 2017 reluctantly released the damning findings of its plan to tackle air pollution, much of it from motor vehicles, which is now quoted as causing up to 40,000 premature deaths p.a. in the UK).

Para 8.5. Further conclusions state that increased traffic volumes and congestion will likely result in:  
increased noise;  
increased visual intrusion;  
discouragement of walking and cycling as modes of travel;  
It will also reduce the economic viability and attractiveness of Trowbridge as a place in which to live, work or visit.

Traffic and travel survey A361 in the vicinity of Church Lane  
The number of vehicles on the UK's roads rises daily, leading to more road traffic accidents, ever greater levels of congestion and vehicle emission pollution, and more directly attributed illnesses and deaths due to this pollution. Outdoor air pollution is contributing to about 40,000 early deaths a year in the UK, say the Royal Colleges of Physicians and of Paediatrics and Child Health – February 2016.  
Vehicle pollution and adverse effects on health are greatest where there are the highest densities of heavy slow-moving traffic in built-up residential areas. Therefore planning more housing developments which will bring more motorised traffic into areas which are already suffering from traffic congestion and pollution are irresponsible, and those people deciding on those developments will be responsible for the increased respiratory illness and deaths caused as a consequence.  
I have carried out a traffic survey of residents living very close to the proposed Church Lane Site 1021, Upper Studley Site 3260, and Southwick Court Site 3565 during August 2017 to try to gauge the local impact of developing some 250 houses on these 3 sites all feeding traffic onto the A361.  
The scope of the travel survey were residents living in Church Lane, Church Fields, The Nestings, Oldbrick Fields, The Poplars, Spring Meadows, and Frome Road (from the Nestings to the junction of Silver Street Lane) – i.e. existing homes nearest to the proposed development site 1021 Church Lane.  
Purpose of the survey –  
INDICATOR 1: to get an indication of the extent to which building some 250 new houses on the green buffer zone off the A361 (sites 1021, 3260, 3565) would regenerate Trowbridge Town centre.  
(Ref: Atkins Sustainability Appraisal Report June 2017 page 158 - A marginal increase in population will help support and bolster the town as a principal settlement and thereby increase opportunities for inward investment.)  
INDICATOR 2: to get an indication of the extent to which residents of these 3 proposed housing development sites would use sustainable transportation modes (walk/cycle/bus) to go into Trowbridge town centre.  
(Ref: Atkins Sustainability Appraisal Report June 2017 page 147 – Improve air quality; it is recognised..that the development is within 2km of key facilities in Trowbridge which are therefore accessible by foot, cycle and buses. This could limit the extent of additional traffic using the A361 to access the town.)  
Survey results –  
62 people completed the travel survey.  
INDICATOR 1: Town Centre regeneration.  
20 respondents said they use the town centre facilities less than 5 times per month.  
The average number of visits per month to the town centre by the remaining 42 survey respondents (68% of the total) was 12.5.  
This indicates a relatively low usage of Trowbridge town centre facilities including its shops, restaurants, and entertainment facilities by residents of this outer fringe of the town. Indeed, a significant number of these visits to the town are by people who work there or attend school, rather than people visiting the town to spend money in the shops or other establishments.

Appendix Q - Schedule of representations

If more new homes were instead built on vacant brown field sites in the centre of Trowbridge the new residents there would be truly within easy walking distance of the town centre facilities. Residents there would be likely to bring much greater demand for town centre services and facilities and to generate more trade for town centre businesses.

INDICATOR 2: Increased incidence of sustainable commuting to the town centre – i.e. walk/cycle/bus.

Of the 58 respondents who said they go into the town centre the mode of transport they mostly used was:

Mode	Number of people	%
Walk	9	15
Cycle	3	5
Bus	1	2
Private car/motorbike	44	76
Taxi	1	2
Other	0	0
Totals	58	100

Conclusions from the local travel survey:

There is no evidence to support the contention that building houses on the outer green fringes of the town will have any significant regeneration effect on Trowbridge town centre businesses.

There is no evidence to support the contention that either existing or new residents in the vicinity of Church Lane will use sustainable modes of transport to reach the town centre.

Conversely, it is highly likely that people living in the proposed 250 new houses, spilling perhaps 500 additional motor vehicles every day onto the A361 will have a significant effect on local road congestion, air pollution, and would increase the likelihood for increased road traffic accidents. Many of these motor vehicles would head into the town centre congestion even though a large number of them may be passing through towards other towns, M4 etc and therefore spending no time or money in Trowbridge town centre itself.

Conservative extrapolation of the impact on Trowbridge of 250 new houses, with an average of 2 cars per household, where 68% of those cars go into town along the A361, on an average of 12.5 occasions per month, and then come home again, x 12 months of the year, would mean... 102,000 extra car journeys into Trowbridge town centre p.a. causing additional road accidents, air pollution and traffic congestion.

Other points

It is difficult to justify any development at the present time that leads to greater density of traffic on already built-up and congested town and city roads given the issues of congestion, commuter delay and its impact on British industry, and traffic pollution induced ill-health. Electric cars are touted as the way forward to replace the most polluting diesel and petrol vehicles, but the technology for producing cost-viable electric cars and the charging technology and infrastructure is as yet years away.

Britain's highways are in chronic disrepair and in no shape to handle the volumes of traffic coming their way. An article in The Times on 1st August reported, 'A report by the Asphalt Industry Alliance earlier this year found that local roads had a £12 billion backlog of repairs that would take a decade to clear at present rates.'

The main traffic artery into Trowbridge the A361 is a classic example of this. The route was clearly established long before the invention of motor vehicles being narrow, having many bends, some of them very sharp as well as some fairly steep gradients in places. As you get nearer to the

Appendix Q - Schedule of representations

town centre (from Manor Road onwards) it is apparent the rows of terraced houses were built before people owned motor cars as there are no driveways and vehicles are parked in a continuous line along one side of Frome Road, making the route even narrower. Frome Road (A361) has a continuous convoy of motor vehicles travelling along it all day long. Long queues of stationary idling vehicles build up during the morning and evening 'rush-hours'. During the daytime when these vehicles are actually moving many of them travel too fast given the pedestrians, the many side roads, the bends in the road, junctions, the poor visibility due to all the parked vehicles, and the gradients. There are also a huge number of very large lorries and buses on this route that find it a challenge to navigate the route into town.

The Atkins report Wiltshire Housing Site Allocations Plan Sustainability Appraisal Report Annex 1 A.9 Trowbridge Principal Settlement June 2017 at Page 147 under the Church Lane site 1021 section says of development at Church Lane: 'It is recognised, however, that the development is within 2km of key facilities in Trowbridge which are therefore accessible by foot, cycle and buses. This could limit the extent of additional traffic using the A361 to access the town'.

This is a fantasyland statement. The A361 is the only direct route into town from here. As proved by the results of my recent traffic survey few people are prepared to walk into town from here. Who would want to walk 2km immediately alongside the continuous din of the 'A' road, breathing in deadly vehicle emissions, and risking a drenching from vehicles charging through puddles in the road on a wet day? Any health benefit derived from the exercise would be negated by the harmful effect of the noxious poisons emitting from the passing vehicles. Still less likely are ordinary people to choose to cycle to town, and it would be an absolute 'no-no' to allow children to risk cycling. I am an experienced cyclist and I can assure you that this must be one of the most dangerous cycle routes that I have ever experienced. The risks include:

- Many side roads and vehicles entering the A361;
- Cross-roads and mini-roundabouts;
- Pedestrians crossing the A361, which as well as being an 'A' road is also a residential street;
- Narrow pavements, pedestrians, and cats and dogs (and deer) sometimes step onto the carriageway without looking first;
- Narrow carriageway with numerous bends and some considerable gradients in places;
- Many parked cars. These hamper visibility of pedestrians and of vehicles emerging from side streets. Parked cars provide a further specific hazard for cyclists. Drivers and passengers frequently emerge suddenly from them, opening car doors into the traffic without looking. Many cyclists are injured in the UK when car doors are opened into them. As an experienced cyclist I know to give parked cars a wide berth, but this causes other issues.

Given the nature of the A361 the route is simply not adequate for the many large lorries and buses that attempt to use it. If the drivers of these large vehicles are responsible they have to drive slowly, frequently having to stop to give way to oncoming traffic at particular pinch-points in the road. I, and the numerous other keen and experienced cyclists will continue to use this route into town. I almost invariably end up with a convoy of large articulated lorries following behind me as I approach town on the A361. The road is not wide enough for them to pass me, so they have to follow at whatever speed I am cycling. Taking planning decisions that lead to more motor vehicles on this route and adding to the congestion and air pollution would be pure folly.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Alternative sites to Church Lane and Upper Studley</p> <p>1. Review of Atkins "Wiltshire Housing Site Allocations Plan"</p> <p>Atkins were employed to review the six key sites identified by Wiltshire council for housing:</p> <p>Elizabeth Way – 205 houses</p> <p>White Horse Business Park – 150 houses (67% negative impact vs 33%positive)</p> <p>Elm Grove Farm – 200 houses</p> <p>Church Lane – 45 houses (83% negative impact to 17% positive)</p> <p>Upper Studley – 20 houses (80 % negative impact vs 20% positive)</p> <p>Southwick Court – 180 houses (71% negative impact vs 29% positive)</p> <p>Each site was assessed against the following headings Bio-diversity, Water, Historic Environment, Landscape, Accessibility, Education and Housing/ Employment provision. They were given a rating against each objectives (negative impact or positive impact.)</p> <p>The land at Church Lane was deemed the least appropriate site of all six.</p> <p>In addition, the sites at Elizabeth Way, White Horse Business Park and Elm Grove farm provide infill between existing developed sites whereas the other three site would impinge on open countryside.</p> <p>In fact, the recent planning application for 100 plus houses off Blind lane was refused on the basis that it provided "an unwarranted encroachment of the open countryside". This is also the case at the Church Lane, Boundary Walk and Old Brick fields sites. This was rejected based on paragraph 17 of the National Planning Framework:</p> <p>Core planning principles 17.</p> <p>Within the overarching roles that the planning system ought to play, a set of core land-use planning principles should underpin both plan-making and decision-taking. These 12 principles are that planning should:</p> <ul style="list-style-type: none"> <li>● be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area. Plans should be kept up-to-date, and be based on joint working and co-operation to address larger than local issues. They should provide a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency;</li> <li>● not simply be about scrutiny, but instead be a creative exercise in finding ways to enhance and improve the places in which people live their lives;</li> <li>● proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth. Plans should take account of market signals, such as</li> </ul>				

Appendix Q - Schedule of representations

land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities;

- always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings;
  - take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;
  - support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change, and encourage the reuse of existing resources, including conversion of existing buildings, and encourage the use of renewable resources (for example, by the development of renewable energy);
- contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework;
- encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value;
- promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production);
  - conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;
  - actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable; and
  - take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.

The Church Lane (1021) and Upper Studley (3260) proposed sites in Trowbridge form the outer boundary of the town and lead into beautiful, unspoilt countryside which forms the buffer between Trowbridge and Southwick. Provision of new housing in Trowbridge should make use of sites which do not extend into open countryside before rural sites are considered. This paper will put forward other sites within the current settlement boundary which would provide the same housing capacity whilst maintaining the Wiltshire Countryside.

The Church lane and Upper Studley sites offer 6ha of developable land. Wiltshire Council could easily offer this land using a variety of sites which are within the town. The following sites should be used before encroaching on our countryside:

Site 645,646 and 647 – Land to the rear of Trowbridge Road (over 2 ha)

Whilst this land is currently agricultural, it provides an infill between two residential areas and should therefore be used before open countryside.

Site 1018 – District Council Offices (2.46ha)

Seen as windfall by the council but should be offset against open countryside.

Site 198 – Land and Buildings (0.33ha)

Site 200 – Trowbridge Garden Centre (1.33ha)

This land is ripe for development and again provides infill between residential areas

Site 247 – The Stables (0.7ha)

Site 248 - Drynam Lane (1.68 ha not yet accounted for)

This site is ideal for development as it would complement development which is already planned for this part of town

These sites alone would provide 8.5ha of land for development which would mean that none of the open land between Southwick and Trowbridge need be touched. All of these sites could be developed within the next 10 years. In addition to this there is:

Site 613 – Land off the A363 White Horse Business Park to...(5.7ha)

Although agricultural land, this site provides infill between existing development as opposed to open countryside.

In addition to these sites other sites were dismissed as part of the SHLAA, the reason given for this was that they were within the current settlement boundary. The National Planning Policy states, “planning policies and decisions should encourage the effective use of land by re-using land.” It appears that Wiltshire Council have decided that developing infill sites would be less attractive to developers and have therefore chosen open sites which do not need to be built on to fulfil their housing quota. Surely Wiltshire Council should not opt for the easy, developer led option to the detriment of our countryside, wellbeing and wildlife.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	CONTRARY TO HOUSING DELIVERY STRATEGY • The Housing Delivery Strategy describes the proposed allocations as being “in Salisbury”, whereas the locations lie within Netherhampton Parish. These allocations are therefore contrary to the stated policy of focusing on higher tier settlements in the pursuit of “sustainable development”. • Para 4.16 of the Draft Allocation Plan: “Housing development at Small Villages is required to take the form purely of limited infill. House building will be small in scale, for sites of single figures, and the Plan does not seek to identify such sites.”				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	INSUFFICIENT TRANSPORT & GREEN INFRASTRUCTURE • Para 5.128 of the Draft Allocation Plan says: “The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS”. This is simply not true. • The “Salisbury Transport Strategy” (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed. • Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: • “Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy.” • It should also be noted that such “Salisbury Transport Strategy” as exists is not detailed and has never been subject to public consultation or formal adoption. • Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end. • We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague “solutions” should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through. • There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess. • We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all. • Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	FLOOD & SEWAGE IMPACT • Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the problem is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites. • Site S1027 is well known locally for having standing water regularly during the winter. • There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. The existing sewage pumping infrastructure is already operating at capacity.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	FLAWED PROCESS • We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process. • The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed. • The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan. • The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There is no infrastructure to support this number of additional houses in Harnham. The current road system is already at capacity and ceases to function when there is any disruption (eg. the recent New Bridge road repairs caused huge disruption. Adding at least 1000 extra cars would cause gridlock and make it impossible to join the Harnham Road from the various residential roads along it. The gyratory, again already at capacity, would add to an already very difficult traffic situation. There is a similar issue going west to Wilton, where the queues along Parkwall, particularly at peak times, are very long. Residents wishing to shop all travel along the Netherhampton/Harnham Road as all the major shops and access to the city are on the east side of Salisbury, meaning more cars and more delays. As the site is located along way from town, is not well served by bus routes, this will further add to traffic congestion. Look long and hard at the traffic implications before going any further. The likely disruption to the whole of the city needs to be considered, thought through and tested before any building is started. Make sure that all the infrastructure is considered and put in place, again before any building is started.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The proposed sites along the Netherhampton Road are described as being within the settlement area of Salisbury but are actually outside the Salisbury Community area, and in Netherhampton Parish. As coherent Community Areas are key principles of the Wiltshire Core Strategy. I believe that the Housing Site Allocation Plan cannot therefore be sound. The proposed sites for 640 dwellings and 100 dwellings along Netherhampton Road represent a vastly disproportionate increase in this small village of currently some 60 homes. It must be shown that there is a transport infrastructure solution capable of implementation which does not involve the a3094. THIS WILL HAVE TO BE RADICAL.

Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I wish to strongly object to the planning application to build 740 homes and a school along the Netherhampton Road for the following reasons The total lack of infrastructure in the area, the roads could not cope with more traffic, they can't cope now. Public Transport links are totally absent i.e. busses into Salisbury. The gyratory is operating at %70 of capacity, if there is an accident the whole area grinds to a halt and the emergency services have great difficulty doing their job efficiently.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing with our objections to the proposed building of houses and a school on the Netherhampton Road site. It would appear the plans to build the houses does not include improving the infrastructure, we have roads all around Harnham that are incapable of taking any more traffic. I regularly find myself in queues whichever way I try to drive whether it be towards Wilton or towards Salisbury.</p> <p>I have lived in Harnham many years and have seen the fields on which the building is to take place flooded for large parts of the winter and spring months. Already there is too much traffic through Harnham and I understand that the Britford Meadows plans were rejected as it was felt that the roads were unable to take the increase in traffic that would ensue. I would be interested in how the same roads would now be able to take an increase in traffic for the Netherhampton Build?</p> <p>Not only would the 840 houses and school mean the roads would be busier after they would be built but the lorries carrying the material to build these houses would have a significant impact on the roads.</p> <p>I would like our objections to be noted.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. Pagnell Lane  1. Minor changes are proposed with no apparent justification or consequence. However, the boundary should be extended to include the house and outbuildings of 12 Pagnall Lane which comprise a "built...residential...facility". The surrounding garden area, extending at its northern end along a clearly defined hedge opposite number 13 Pagnell Lane, should also be included as "the curtilage of a property that relates more closely to the built environment (e.g. a garden)...". The space immediately to the north side of this hedge, however, is an agricultural field and should therefore be excluded in accordance with the stated criteria that it "relates more closely to open countryside (e.g. a field or paddock) and has the capacity to substantially extend the built form of the settlement in terms of scale and location".  Boundary should include the house, any outbuildings and the specified garden of 12 Pagnall Lane.  It should be noted that the parish of West Lavington is advanced in the preparation of a Neighbourhood Plan. Options for new housing sites were the subject of extensive public consultation on a first draft of the Plan in 2015/16 and, as a result, final draft proposals are being prepared which will recommend one site for development preferred by 68% of respondents of 40 to 60 dwellings on the edge of the village, close to shop and pub facilities and adjacent to the primary school, recreation and play grounds, village hall and youth club. It is intended that submission of the Plan proposals to Wiltshire Council will be in January 2018 with inspection and referendum following within 12 months. Then (in accordance with Wiltshire Core Strategy which supports the review of settlement boundaries through neighbourhood plans) the parish's settlement boundary can again be reviewed with a view to achieving boundary consistency in line with the results of the Neighbourhood Plan as emerging for adoption.</p>

It should be noted that the parish of West Lavington is advanced in the preparation of a Neighbourhood Plan. Options for new housing sites were the subject of extensive public consultation on a first draft of the Plan in 2015/16 and, as a result, final draft proposals are being prepared which will recommend one site for development preferred by 68% of respondents of 40 to 60 dwellings on the edge of the village, close to shop and pub facilities and adjacent to the primary school, recreation and play grounds, village hall and youth club. It is intended that submission of the Plan proposals to Wiltshire Council will be in January 2018 with inspection and referendum following within 12 months. Then (in accordance with Wiltshire Core Strategy which supports the review of settlement boundaries through neighbourhood plans) the parish's settlement boundary can again be reviewed with a view to achieving boundary consistency in line with the results of the Neighbourhood Plan as emerging for adoption.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site: Land at 100 Frome Road, Southwick (SHLAA Ref: 3341)</p> <p>Policy H2: we consider that the draft Plan should be making provision for additional housing growth in the Trowbridge Community Area on the following basis:</p> <p>The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026. There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative deliverable sites in the Trowbridge Community Area. There is an unmet affordable housing need in Southwick which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing.</p> <p>There is no Neighbourhood Plan being prepared for Southwick.</p> <p>The Housing White Paper (February 2017) seeks to diversify the supply of new housing in response to the dominance of the national / PLC volume home builders. The subject site is of a size that is suitable for development by a local / regional housebuilder.</p> <p>It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in the Trowbridge Community Area, that the subject site should be included as an allocation for circa 20-25 homes in the draft Plan.</p> <p>Promotion History:</p> <p>The subject site of approximately 1.0ha comprises part residential curtilage and part agricultural land. Access is available from the A361 via Hoggington Lane and there are no physical constraints.</p> <p>The site is well contained in landscape terms with defensible boundaries on all sides, and has potential to accommodate circa 20-25 houses in the form of mixed tenure scheme of open market and affordable homes.</p> <p>Statement of Common Ground: the landowner confirms his willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that the landowner would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.</p> <p>Policy H2: Wiltshire Council to allocate the subject site for circa 20-25 dwelling units as outlined in enclosed Title Plan (SHLAA Ref: 3341).</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In South Wiltshire , Salisbury has been selected as the main focus for housing development yet the pattern of employment in the area is more dispersed. Proposed housing sites and settlement boundaries need to reflect this in order to reduce the need to travel , particularly commuting out to more rural sites.</p> <p>The proposed large greenfield site at Netherhampton Road (3.1) is not in Salisbury but within the rural parish of Netherhampton which lacks facilities. It would therefore appear to contravene the objectives of the spatial strategy and the key challenges of the Wiltshire Core Strategy. The allocations have not been demonstrated to be achievable in the absence of detailed highway and drainage proposals. The plan should demonstrate on a site by site basis how the key challenges of the Wiltshire Core Strategy have been met. The plan seeks to concentrate development in the principal settlements but in the Salisbury area, employment patterns are more dispersed. ( these range from large employers such as Porton Down to the numerous conversions of farm buildings to business purposes) Also modern lifestyles with an increase in remote working and internet shopping reduces the need for development to be concentrated in large sites on the edge of towns. A more dispersed pattern allowing more development in villages would have less landscape impact and make better use of existing resources. The configuration of Salisbury as a convergence of routes at the confluence of several rivers and enclosed by hills makes any expansion of the settlement difficult without significant impacts in terms of landscape setting and heritage , traffic congestion and reduction in air quality , flood risk and drainage . A more thorough appraisal of existing infrastructure should be undertaken and a detailed updated transport strategy should be published before greenfield sites with no existing infrastructure are allocated . The existence of a ring of park and ride sites lends itself to satellite development leaving green space around the city.</p> <p>The proposed sites at Netherhampton Road are fundamentally in the wrong place. They could only be justified if they delivered the Harnham Relief Road/Brunel Link. I was given to understand at the Guildhall consultation meeting that this is no longer in the transport strategy. These proposed greenfield sites do not tie in with the best use of existing infrastructure and facilities and are in a location away from health, leisure and education facilities with no public transport available to provide access to such facilities. This would appear not to meet the key challenges of the Wiltshire Core Strategy.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The LPA should identify the best and most sustainable sites for housing and development to occur taking account of all constraint and then approach the land owner via a land registry search. Just because a landowner is 'plugged' into the planning system does not mean it is the most sustainable site. Just because a landowner is not up to date with the planning system does not mean if approached he or she would not promote their land. It may be the complexity of the system that puts landowners off. I believe this to be a flaw in your site allocation methodology and therefore the plan is not legally compliant. The LPA should start the methodology again by identifying which sites are the most sustainable and then approach landowners if the land has not already been promoted to the council. Without this happening the plan cannot be legally compliant or sound. The LPA should start the methodology again by identifying which sites are the most sustainable and then approach landowners if the land has not already been promoted to the council. Without this happening the plan cannot be legally compliant or sound. The method is therefore not positively prepared, justified or effective and therefore not consistent with national policy. The LPA should start the methodology again by identifying which sites are the most sustainable and then approach landowners if the land has not already been promoted to the council. Without this happening the plan cannot be legally compliant or sound.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>As just one example, the Council has failed to register its ownership and financial interest in a plot of land behind the junctions of Victoria Road and Wyke Road. This is agricultural land from which the Council might expect to receive a financial windfall by selling it to a developer - who would require "change of use" planning approval in order to build there.</p> <p>Wiltshire Council stands to make a financial killing by permitting its use for development and this should (legally) have been made clear on the Plan. Clearly, these financial advantages would provide considerable incentive for the local authority to grant planning permission for that area to be re-classified as residential.</p> <p>This should be clear from the context above.</p> <p>In order to make the draft Wiltshire Housing Site Allocations Plan sound, it needs to be totally scrapped and completely re-written from scratch - this time committing more care and intellectual vigour to its construction!</p> <p>Plenty - but I'll keep them for later!. I am disappointed that a project of such importance should take so long to produce with ultimately unworkable proposals.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1171</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mrs Sandra Freeman	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We write regarding the draft housing site allocations in Salisbury at the above areas. We live in the Harnham area of Salisbury and until moving to our present address in East Harnham, lived on the Netherhampton Road for 15 years.</p> <p>During that time we saw probably a ten-fold increase in the amount of traffic (both local and through traffic) causing long delays at the A36 junction and the Harnham gyratory making it difficult to exit our drive onto the main road, hence our move to another part of Harnham. This situation has necessarily worsened over the years due to the huge increase in traffic generally through and around Salisbury.</p> <p>The proposed development of 740 houses on the Netherhampton Road will bring gridlock and misery onto this road and the Harnham Road. Most houses now have at least one car and there could therefore be an extra 1000 plus vehicles using these roads. Traffic is currently damming back from the Harnham gyratory in the mornings to the turning to Upper Street thus confirming that the road network cannot feasibly take more traffic. The Harnham gyratory is almost on permanent gridlock, taking not only local traffic but commercial traffic from the A3094, A338, A354 and A30.</p> <p>Until the Salisbury road network has undergone a complete and thorough overhaul, it is our opinion that the proposal to construct this quantity and density of housing in this particular location would be nigh-on catastrophic for the free flow of traffic on Salisbury's arterial and local roads, which are already at bursting point, and we trust that our views will be given appropriate discussion and consideration.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>H3.1 I object to the allocation for the following reasons:</p> <ul style="list-style-type: none"> <li>I think you should look carefully at the way you are allocating or expressing the allocation of the site, and whether you need to be more specific as to your requirement, otherwise given the area of land that you are proposing (63 hectares) the community will end up with much more than 640 houses. For example, using a generous housing density you only really need 20 ha plus greenspace which you have identified as 10 ha, so you should only be allocating 30 ha of land at this juncture (plus any employment land required). Alternatively rather than reducing the site area you could increase the green space requirement in negotiation with the housebuilder. Otherwise there is a danger say up to 1200 houses could be delivered on the site. The plan is supposed to provide certainty to the community and the current size of the allocation does not provide this and therefore the size of the allocation is not justified or effective.</li> </ul> <p>Reduce the site area to represent the amount of development you want to allocate to make the plan effective rather than the area of land the developer wants allocation. This is to ensure there are no surprises to the community later on as the site as allocated could probably fit up to 1300 houses on it.</p> <p>Consider all types of development, that could also result in reduced transport movements eg. small supermarket.</p> <p>Ensure good design in keeping with Harnham village.</p> <p>The plan is not fully justified and therefore not effective, positively prepared or consistent with national policy for reason's expressed above.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Proposed 840 homes in Harnham, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>To whom it may concern:</p> <p>I am writing with our objections to the proposed building of houses and a school on the Netherhampton Road site. It would appear the plans to build the houses does not include improving the infrastructure, we have roads all around Harnham that are incapable of taking any more traffic. I regularly find myself in queues whichever way I try to drive whether it be towards Wilton or towards Salisbury.</p> <p>I have lived in Harnham many years and have seen the fields on which the building is to take place flooded for large parts of the winter and spring months.</p> <p>Already there is too much traffic through Harnham and I understand that the Britford Meadows plans were rejected as it was felt that the roads were unable to take the increase in traffic that would ensue. I would be interested in how the same roads would now be able to take an increase in traffic for the Netherhampton Build?</p> <p>Not only would the 840 houses and school mean the roads would be busier after they would be built but the lorries carrying the material to build these houses would have a significant impact on the roads.</p> <p>I would like our objections to be noted.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I wish to protest as strongly as I can against this proposed development It will turn this present predominantly rural area into an urbanised suburb and cause the busy A 3094, already choked at both ends during rush hours, to become even busier. It will create a miserable environment not only for those already living in West Harnham and Netherhampton, but also for the residents of this proposed development. If the Council gives this scheme its approval, it will be an act of planning vandalism for which it will never be forgiven.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing with regards to the proposed development of 740 homes along the Netherhampton Road. I have viewed the plans with both dismay and complete astonishment that such a development is even being considered.</p> <p>Primarily the infrastructure does not lend itself to such a development. The narrow Netherhampton and Harnham roads are inadequate now, without the potential of at least another 1500 vehicles using the road. The narrow main road lined with housing, the medieval burial ground in the middle of the Netherampton Road, and the narrow bridges into the city itself just were not built for today's 2 or 3 car families.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.3 North of Netherhampton Road			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Furthermore, with regard to the erection of houses on the North side of Netherhampton Road, has the flood plain even been considered. Many of the houses built on that side of the road are prone to flooding when the water levels rise, and many have had to be underpinned due to subsidence. Indeed, the proposal for a link road from Churchfields Endustrial estate to Harnham was rejected due to this fact.

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1185</a>	<b>Consultee</b> Mr Roger McCartney	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		<b>Person ID:</b> 1126992		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I consider the plan is not legally compliant. The site identified in figure 5.10 has been used by the local residents for "lawful sports and pastimes" for a period considerably in excess of 20 years. It should therefore be included in the Register of Towns and Village Greens under the provisions of the Commons Act 2006 - Section 15, and given protected status.</p> <p>2. In the alternative, removing this facility is contrary to the NPPF, paragraphs 69 - 70, page 17; and paragraphs 73 - 78 pages 18 - 19.</p> <p>Paragraph 7 - Changes to make the Plan Compliant None. This is a red line issue.</p> <p>Paragraph 6 - Information in Support of my Submission.</p> <p>3. Currently, site H2.6 is designated as a green buffer zone, providing a distinct boundary between the southern boundary of Trowbridge and the nearby villages of Southwick and North Bradley. It has at least three public footpaths running across it, with links to Southwick Court, the Axe and Cleaver bridle path and the two neighbouring villages. It is used by local residents for recreational purposes, in particular, dog walking, jogging, flying model aircraft, ball games, golf practice, and by groups of young people as a meeting place. In the past I have used the field to help my grand children with various nature projects, usually connected with topic work set by the Grove school.</p> <p>4. This open land has become more valuable as local recreation facilities have been withdrawn. For example, the Bradley Road football field was available for local residents to use. The Town Council bought the freehold of the field, it has been fenced off (using an imposing six foot high metal fence), and the public right of way across the field was closed in January 2015. It is now for the sole use of the football club. Prior to this loss, the White Ensign Club recreation field (now B&amp;Q), and the Cow and Gate cricket pitch and pavilion (now the B&amp;M car park) were sold for development.</p> <p>5. Cyclists have been banned from using Boundary Walk, a broad traffic free asphalt path.</p> <p>6. Site H2.6 is close to Southwick Country Park. A report on the options for the development of the Park was prepared by consultants Kit Campbell Associates and presented to the former West Wiltshire Council Cabinet on the 3 May 2006, Agenda Item 9. This report states far more eloquently than I the issues relating to the park.</p> <p>7. Infilling open spaces on existing housing estates, and building houses on new estates with smaller gardens, is increasing the density of urban development. More traffic on the roads, and a lack of cycle paths, restricts the ability of younger children to use the remaining open spaces.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court		Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The plan is not sound. The historic importance of the site is underestimated, and the proposals are not consistent with paragraphs 132 - 141 of the NPPF.</p> <p>Paragraph 5 - Reason the Plan is not Sound</p> <p>I note that a Heritage Impact Assessment has been requested. Paragraph 5.78 of the Draft Plan, refers to "Southwick Court Farmstead". It is a Medieval Manor House with a moat. The earliest written record dates from c1421. It is of national significance. For example, it was the home of John Stafford, who became Archbishop of Canterbury 1443 to 1452. He served Henry V as Lord Privy Seal, 1421 to 1422. Under Henry VI he was Lord Privy Seal and Lord High Treasurer 1422 to 1426, and also Lord Chancellor 1432 to 1450. His mother, Lady Emma Stafford is buried in St Nicholas Church, North Bradley. Humphrey Stafford, grand nephew of John Stafford, entered Parliament in 1641 as Lord Stafford of Southwick. He supported the Yorkists during the Wars of the Roses. King Edward IV created him the 1st Earl of Devon on the 17 May 1649. Later that year, the Yorkist army was defeated at Edgecombe. Stafford escaped from the battlefield, but was captured by a mob in Bridgewater and executed on the 17th August 1649.</p> <p>Originally Southwick Manor had extensive land attached to it. The "ingrounds" around the Manor consisted of "7 closes" of some 97 acres. (The Victorian History of Wiltshire vol 8). A medieval water meadow still exists on the site.</p> <p>There is already a significant solar panel farm visible from the Southwick Court site. Moving the existing boundaries, and building houses close to the Manor, would further detract from the site.</p> <p>Paragraph 7 - Changes Necessary to the Plan</p> <p>At the western end of the site is Southwick Country Park. In 2006 the former West Wiltshire District Council received a recommendation, from Consultants, to develop Biss Meadows at the expense of Southwick. The Council was advised to undertake only minimum conservation work, so not to prejudice any future development of the site. At the eastern end of the Southwick Court site, but separated by one field, is the Trowbridge Football Club ground. Club facilities are basic, and the site is liable to flooding. It is fenced off to members of the public, and in January 2015 a public right of way across the field was closed.</p> <p>A restored water meadow, with an area of land crossed by public footpaths, and with established wildlife would provide an alternative to the Southwick Park. Moving the football field to the Country Park would potentially provide a bigger and better site for the club. Links, over the</p>				

Appendix Q - Schedule of representations

	<p>Frome Road and to the Bradley Road site via Boundary Walk would give walkers and cyclists access to all three areas. It may be possible to build houses on a brownfield site in the town centre, to pay for any development work. Apparently, constraints on the Southwick Park prevent it being used for housing.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1187</a>	<b>Consultee</b> Mr Roger McCartney  <b>Person ID:</b> 1126992	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1. The plan is not sound. Access to the site has not been identified. Paragraph 6 Information in Support of my Submission</p> <p>2. Paragraph 32 of the NPPF states "Plans and decisions should take account of whether: -</p> <ul style="list-style-type: none"> <li>• safe and suitable access to the site can be achieved for all people"</li> </ul> <p>3. Guidance issued on the 13 March 2015 by the Department for Communities and Local Government states that the key aspects that need to be addressed include: - "... accessibility, congestion, mobility, safety, pollution, affordability, carbon reduction ... including existing settlements and proposed land allocations" Paragraph 005 Reference ID: 54-005-20141010 Revision Date 10 10 2014</p> <p>4. 180 houses will require a distributor road to be constructed. Access to the Frome Road seems unlikely, because of the impact upon the ancient water meadow and the Grade II listed buildings. Developing a link to Silver Street Lane, via Balmoral/Sandringham Road or Marston Road raises the following issues: -</p> <ul style="list-style-type: none"> <li>• the existing local streets cannot be upgraded to a distributor road;</li> <li>• there are no cycle routes in the area;</li> <li>• destruction of the peace and tranquility of the existing housing estates, by generating noise, air pollution and creating safety issues for the current residents;</li> <li>• destruction of part of the boundary hedge disrupting the bats; and</li> <li>• considerable traffic conflicts where the road joins Silver Street Lane, particularly during school term time.</li> </ul> <p>5. Normally, services such as water, sewerage, electricity, gas, communication cables and so on, follow a distributor road. Has an objective assessment been made of these issues?</p> <p>Paragraph 7 - Changes to make the Plan Compliant</p> <p>I note that the draft plan proposes to build houses up to the boundary of the White Horse Business Park, consequently restricting the ability to extend the business park at a future date. Can these proposed houses, and those proposed for site H2.6, Southwick Court, be relocated to a brownfield site in Trowbridge, (including the empty Manvers House building, or the former Town Bridge Vauxhall garage)? Alternatively, I note that James Dyson has initiated plans to develop the former RAF Hullavington base, providing some new 3,500 jobs. Cannot houses be built closer to Hullavington?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The developments around Salisbury are very piecemeal and there does not seem to be any thought given to the infrastructure - most particular road building to support this. The road set up in Salisbury is already poor and cannot support the developments proposed Particularly the development on Netherhampton Road need no roads or a new road management system to alleviate the huge congestion that will be caused by building 840 new homes on one (already congested) road. A relief road around Harnham so that through traffic (it is currently used by many heavy lorries to bypass Salisbury) avoids this road.

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1189</a>	<b>Consultee</b> Mr Roger McCartney	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1126992	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1. The plan is not sound. It is not consistent with national guidance. Trowbridge lacks the public sector funded infrastructure (ie roads, sport and leisure activities) to support the proposed development. Paragraph 5 - Reason the Plan is not Sound</p> <p>2. The road system. The Department and Local Government guidance note "Transport evidence bases in plan making and decision taking", published on the 13 March 2015 recommends that transport implications should be assessed during the development of the local plan. In the case of Southwick Court, the draft plan has not identified the access to the proposed site. Traffic calming measures in College Road, and parking restrictions on Hawthorne Grove have already increased the risks for adults and children crossing Silver Street Lane on their way to the Grove school. Additional traffic from Southwick Court will considerably increase these safety issues, if access is via Silver Street Lane.</p> <p>3. The development of other sites in the southern area of town, including the former WWDC site on Bradley Road, will put further pressure on the local road system.</p> <p>4. Indoor Leisure Facilities. Trowbridge is one of three principal settlements in Wiltshire. The principle facilities in the town, funded by Wiltshire Council are: -</p> <ul style="list-style-type: none"> <li>• Castle Place Leisure Centre, housed in a former multi screen cinema; and</li> <li>• Trowbridge Sports Centre, a joint use facility based at the Clarendon Academy site on Frome Road.</li> </ul> <p>These facilities compare unfavourably with those at Chippenham and Salisbury. WWDC, in the Recreation and Development Plan 2009, (the Plan) acknowledged that the Castle Place Leisure Centre should be relocated and the Trowbridge Sports Centre refurbished. The Plan also sought to encourage joint development of indoor facilities with secondary schools. As a principal settlement, Trowbridge should have stand alone sites to allow the provision of social facilities, in particular cafes/restaurants, community rooms etc. for residents to meet.</p> <p>5. Outdoor Sports Facilities. The Plan also highlighted the "inadequate provision of pitch sports" especially in Melksham, Trowbridge and Westbury. The County Council announced on the 13 February 2017 the opening of a "new £7.3m state of the art grassroots sports hub", including 16 football and rugby pitches. This is in Melksham, and only part of a much larger project. The only recent investment in Trowbridge appears to be the purchase of the freehold of the existing Trowbridge Town FC ground, believed to have cost around £350,000. The new GP Adcroft Health Centre has been built on the practice pitch of the Cricket Club, thus reducing outdoor facilities.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	It has not taken into account nor properly costed and funded the full impact on local services and utilities and assumes a great deal from the willingness of developers to contribute. It fails to link H3.1 with H3.3 which both have the same environmental and resource impacts. Each will severely adversely impact the existing infrastructure and if taken together will overwhelm it. The plans have already identified that local resources will be unable to cope and recommends further study in a number of areas. These must be done before the plan is considered further. Conduct all precursor studies before taking this plan forward.

Comment ID:	<a href="#">1193</a>	<b>Consultee</b> Mr Tim Hounsome  <b>Person ID:</b> 403859	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	settlement boundary figure A50 North Bradley				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>NPPF requires development to accord with the development plan, in this case Wiltshire Core Strategy. The Core Strategy acknowledged the need to examine settlement boundaries and as a consequence, and following public consultation, adopted a Methodolgy for assessing them. For reasons set out below the proposed amendments at North Bradley do not comply with the adopted methodology and therefore does not comply with the Core Strategy.</p> <p>Comments on proposed settlement boundary review in respect of North Bradley.</p> <p>My concern relates to land comprised within White Horse Business Park, which is a block of development lying within North Bradley Parish. Settlement Boundary Review Methodology Topic Paper 1 states inter alia: -</p> <p>'The revised settlement boundary review methodology</p> <p>The settlement boundaries define the built form of the settlement by, where practicable, following but not including clearly defined physical features, such as walls, fences, hedgerows, roads and water courses.</p> <p>Areas which have been included are:</p> <p>Built and commenced employment development in principal settlements, market towns and local service centers that is physically related to the settlement.</p> <p>Areas which have been excluded are:</p> <p>Isolated development that is physically detached from the settlement (including farm buildings or agricultural buildings and renewable energy installations) Site allocations'</p> <p>White Horse Business Park is isolated from the present built up limits of both Trowbridge and North Bradley. However it is most distinctly separated from Trowbridge by open fields, a lane and a major road. Open fields alone separate it from development in North Bradley. Since this employment land is not 'physically related' to the built up limits of either Trowbridge or North Bradley it is difficult to see how the proposed modification fits with the selection criteria.</p> <p>Moreover since the land in question is mostly built out there is no real reason to change its current status. If there is a need for additional planning control this can be done through the North Bradley Neighbourhood Plan currently being developed. The amendment should be deleted. Confusingly the amendment plan does not indicate whether the employment land is to be regarded as an amendment to the settlement boundary of Trowbridge or an amendment to that of North Bradley. In either case the proposal does not meet the requirement of the methodology criteria, as stated above.</p> <p>Additionally the amended settlement boundary behind properties on the eastern side of Woodmarsh does not follow the current built situation in that the boundary behind the properties should be constant not broken by artificial deviations to the road frontage. It is accepted that there are small gaps in the frontage but these read as part of the built up area of the village. Thus the line for example should go behind Nos. 16 and 18 Woodmarsh. These amendments may lead to pressure for infill development but such development would not be significant given the extent of frontage development along Woodmarsh.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my deep concerns regarding the Draft Wiltshire Housing Sites Allocation Plan in Trowbridge. I live on Frome road near the country park next to the Church Lane and Southwick Court sites. I understand these two sites have been put forward as preferred sites within the housing allocation plan. I would like to raise the following concerns:-</p> <p>Contradictions in the Strategy  A core strategy or local plan is considered "sound" when it is consistent with national policy.  Paragraphs 72, 111,156 and 157 of The National Planning Framework and Planning Guidance documents state that the local policy should provide:-  The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environment and historic interest and look to enhance the natural, built and historic environment.  I do not believe the current strategy delivers on either the development or infrastructure required by Trowbridge.</p>

		Mrs S Willcock	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.					
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>The council appears to have completely ignored the many brownfield sites available in the town centre. If the mission is to attract more people to live in the Town, surely the rejuvenation of the available brown field sites should be the priority? Areas of the Town centre are an absolute 'eyesore', but could so easily be knocked down or converted into wonderfully desirable living accommodation.</p> <p>Building on the proposed sites is just a short- sighted fix to a long- term problem and is not sustainable. As a local resident I am aware that a private individual has applied at least twice in the past for building permission on the land bordering Frame Road, Southwick country park and Church Lane but has been refused permission for valid reasons and surely these reasons still apply. And as a local resident I am also aware that the area was flagged as a risk to flooding on my searches. So, why would anyone build on such a site? I consider it outrageous this greenfield site which has had planning permission previously denied is now a site proposed by the council.</p> <p>Also as a resident I am appalled that this information has only come to me from another resident, it all feels a little underhand and sneaky!</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Comments on Draft Housing Allocation Plan – Trowbridge Community Area  General Comments on sites to the south of Trowbridge.  Section 5.150 of the Wiltshire Core Strategy (Trowbridge Area Strategy) acknowledges the need to keep the villages of Southwick and North Bradley physically separate from the current built up limits of Trowbridge and to maintain their distinct character and identity. This can only realistically be achieved through keeping open land between the settlements.  The southern allocations represent an opportunity to achieve separation and at the same time create additional benefit by establishing a linear park or green space linking Southwick Country Park in the west right through to the development on the east of the railway line and in particular to the bat sensitive areas. There could additionally be links to the Biss Brook project.  Apart from maintaining separation, this green space would also meet a number of other objectives notably.  Core Policy 51 – landscape notably ii and iii  Core Policy 52 – Green Infrastructure  The need to support/protect/supplement the foraging, roosting and breeding areas for bats on the southern edge of Trowbridge – some of which are to be lost to development.  Support access to open space, country parks and the countryside, which was seen as a high priority and achieved high usage scores in the Wiltshire Open Space Study 2015 – 2026.  Reference ( in each sites supporting text) to the opportunity of creating a linear park/green space would ensure the necessary open space, landscaping and bat corridors referred to in each of the allocated areas are appropriately designed for proper linkage.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.2 Land off of the A363 at White Horse Business Park, Trowbridge		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I do not believe the draft Wiltshire Housing site allocations plan is sound because: 1) Developing the site in question (H2.2 Land off of the A363 at White Horse Business Park, Trowbridge) would lead to North Bradley losing it's Village identity and merging the village with the Town of Trowbridge. 5) Site H2.2 is adding development to North Bradley not Trowbridge, since this site is contained within the Parish of North Bradley and is part of North Bradley village, it should not be used to allocate Trowbridge housing demands to. Don't develop the site in question (H2.2 Land off of the A363 at White Horse Business Park, Trowbridge) instead look to develop existing brown field sites in Trowbridge.2 2) Whilst site H2.2 is only allocated for 150 houses at this time, due to the large size of the site, what measures would be taken to ensure these 150 houses were not built in a small area of the site, and further houses filling up the site at a later date?

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>i'm unable to answer if this is legal or not, as i'm not a lawyer. However, i can't see its legal to loose a village status, into a town, when the town is not fulfilling its housing allocation!</p> <p>The Wiltshire core strategy document discusses the fact that villages &amp; rural areas are to have a limited level of development, in order to help retain the vitality of these communities. The number of the proposed houses for the North Bradley area, goes against this core strategy completely, as we would no long have this village status &amp; would be considered as part of Trowbridge itself. We are already experiencing high volumes of traffic, including heavy goods vehicles. We don't have the infrastructure to cope with additional housing.</p> <p>Areas for development are evident within the town centre &amp; must be considered, before the destruction of the rural communities around the town. Although i understand there is a housing crisis and that we need to assist in rectifying this situation, I would never support the complete destruction of our village in order to facilitate this.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Development of the land on Netherhampton Road on this scale is not sustainable. Bearing in mind that the site is not considered to be in walking or cycling distance of the City Centre, the development will cause a significant increase in traffic along the Netherhampton Road and the Harnham Road towards the Harnham Junction and the Park Wall Junction which are already congested and operating at capacity. The road is not capable of widening and there is very little scope for improvement of traffic flow and at these junctions to alleviate the problem that exists already. I don't believe a refresh of the Salisbury Transport Strategy will be able to address this. The ring-road round Salisbury is the meeting point of many major A-roads and is frequently congested. An increase in housing will increase this traffic and Salisbury does not have the capacity for more traffic on these roads. If they are really needed, more suitable sites for development across Wiltshire should be sought.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site H2.2 Land off the A363 at White Horse Business Park			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>There seems to be no reference to any strategic highway plan for Trowbridge. At the moment there is a saying that ‘ all roads into Trowbridge lead to a traffic jam!’ The allocations to the south of Trowbridge and particularly those at and adjoining North Bradley, will clearly exacerbate the problem unless there is some relief network proposed. The strategic improvements to the A350 at Yarnbrook and West Ashton are high ranking in highway plans. It is essential therefore that the relief road running through site 262 etc. together with links to new housing areas is committed to and programmed before the proposed allocation at North Bradley takes place.</p> <p>Core Strategy strategic objective 6 and Policy 3 require infrastructure delivery plans to be in place before development takes place. Consequently the text supporting the allocation needs to be explicit about securing infrastructure before development takes place.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.10			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Wiltshire Housing Consultation was discussed at the Chapmanslade Parish Council held on 31st August 2017 at Chapmanslade Village Hall. The discussion was able to benefit from the results of a detailed village survey which covered many subject areas but in particular there was a section on housing.</p> <p>There was no clear decision on the need for housing but there was a preference for smaller developments. There was a clear decision that any development should have some affordable housing and this would ideally be a mix of affordable to buy or to rent. There was a significant number of respondees to the questionnaire who expressed neither a positive or negative opinion.</p> <p>There was a lengthy discussion of the main site identified, Barbers for 35 houses, but the discussion widened to the total housing requirement across the Warminster Without area. Taking into account possible development in other surrounding villages the conclusion was that Chapmanslade should not be allocated more than 9 houses. It was considered that this number of houses could materialize within the village boundary by windfall development and infill sites.</p> <p>The conclusion of the Parish Council was to oppose all the proposals for Chapmanslade in the consultation document.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Land at Frogmore Road, Westbury (SHLAA Ref: 3218) Policy H2: we consider that the draft Plan should be making provision for additional housing growth in the Westbury Community Area on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026. There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative deliverable sites in Westbury, which is the next tier down in the Core Strategy settlement hierarchy. There is an unmet affordable housing need in Westbury which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing. There is no Neighbourhood Plan being prepared for Westbury. It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in the Westbury Community Area, that the subject site should be included as an allocation for circa 150 homes in the draft Plan. Site context: the subject site of approximately 5.2 ha comprises a triangular shaped arable field with defensible boundaries: on two sides by the railway line, and on the western side by Frogmore Road. The site is relatively flat and unconstrained. In landscape terms the site is very well contained, and apart from the tree buffer on the western edge there is very little ecological interest. In spatial planning terms, the subject site lies within an area where there has been considerable new residential development, and its development would represent a natural rounding off of the settlement with potential to form a new permanent boundary to the north side Westbury. The site performs well in accessibility terms lying in good proximity to both the Westbury town centre and the mainline railway station. Our initial assessment of the site suggests that it could accommodate circa 150 dwellings also making provision of onsite public open space and strategic landscaping. Statement of Common Ground: the landowning consortium confirms their willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that the landowner would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan. Policy H2: Wiltshire Council to allocate the subject site for circa 150 dwelling units as outlined in enclosed Site Location Plan (SHLAA Ref: 3218).

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Traffic Congestion on the Netherhampton Road in the Netherhampton Road development in Salisbury has not been fully considered. An extra 840 homes on this one road will lead to traffic congestion that potentially could lead to gridlock in the Salisbury area. This plan should not have been put forward without the traffic arrangements being reviewed also with congestion alleviation schemes included in the infrastructure plan. A thorough review of the road infrastructure for Salisbury is needed as well as the area around the proposed Netherhampton Road development. There are too many houses being built on one road and traffic management alone will not cope with this. Bypasses or restricted access to the Netherhampton road seem like the only way this will work. Please consider carefully the road infrastructure around the Netherhampton area - it will not work as currently planned.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Hullavington and the Sustainability Appraisal		Positively prepared  Justified  Effective  Consistent with national policy		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Introduction</p> <p>1.1 Terence O'Rourke Ltd has been appointed by Moore Allen @ Innocent to respond to the current consultation on the draft Wiltshire Site Allocations DPD (the draft DPD). Moore Allen @ Innocent retains land interests at Hullavington, which offer the opportunity to secure sustainable plan led development.</p> <p>1.2 This representation deals with a number of concerns principally:                  The DPD has not been brought forward in the way envisaged when the Core Strategy inspector found the Core Strategy to be sound, particularly with respect to meeting the objective assessment of housing need (OAN). This is inconsistent with the NPPF.                  The evidence base is insufficient, in particular the sustainability appraisal and the topic papers have not been positively prepared because the Council started from a point of not assessing all of the opportunities for sustainable development across Wiltshire as part of the process.                  The output is that reasonable alternatives have not been considered.                  Also, that the plan will not be resilient and will be ineffective in meeting housing need, including addressing affordability issues.                  Overall the plan cannot be considered sound as it is not positively prepared, justified or consistent with national policy.</p> <p>1.3 Site-specific representations, and the justification as to why various sites should be allocated in the draft DPD, have been provided separately.</p> <p>Positively prepared</p> <p>1.4 Paragraph 47 of the Framework states that a Local Plan should meet the full objectively assessed needs for market and affordable housing in the relevant HMA as far as is consistent with the other policies of the Framework. There has been no attempt in the draft plan to meet the objectively assessed need (OAN) as set out below.</p> <p>1.5 The Wiltshire Core Strategy Inspectors report at paragraph 78 identified the OAN as around 44,000 and later in paragraph 80 stated "... the sites DPD, the Chippenham Site Allocation DPD and the neighbourhood planning processes will enable the Council to proactively seek to meet, and if necessary reassess, its objectively assessed housing need and plan for its provision accordingly".</p> <p>1.6 The inspectors report goes on to state "Indeed, I am particularly mindful that the Council intends to produce a new SHMA by early 2016 which may revise the objectively assessed needs for the relevant HMAs affecting the county and which will inform its plan making processes. Consequently I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the plan period with the flexibility to deliver more".</p> <p>1.7 As stated this was the 'minimum housing figure' and is not the OAN. The Inspector was expecting a revised SHMA with a new OAN in early 2016 and clearly set an expectation that Wiltshire Council should be planning, through subsequent DPDs, to meet this OAN as well as the 'Swindon allowance' (900 homes) because the latter does not meet the housing needs Wiltshire. No updated SHMA with revised OAN has been published to date. Nevertheless, the most recent evidence, as reported to the Swindon Wiltshire Local Enterprise Partnership on 14 February</p>				

Appendix Q - Schedule of representations

2017 and correlating with the Government's recently published OAN figures using a standard methodology (currently subject to consultation), is that the OAN remains at or above 44,000 homes across a 20 year period.

1.8 It is surprising that the consultation document makes no mention of these requirements, set by the Core Strategy Inspector. Further, whilst it is noted that the Site Allocations DPD proposes to allocate more than the minimum requirement, the additional provision, only amounts to 996 dwellings (above the minimum requirement) which falls significantly short of meeting the OAN and making up for the Swindon allowance. If these OAN/Swindon allowance requirements are to be met, in accordance with the NPPF and Government imperative to boost the supply of housing, a further circa 2,500 homes should be identified/allocated across Wiltshire within the DPD. A positive approach must be taken, looking for opportunities to accommodate the homes needed.

1.9 In recognition of the need, the Wiltshire Core Strategy distributed the indicative minimum across each community area, with this only being an indicative minimum due to the lack of a comprehensive evidence base of available sites and their sustainability. Flexibility to deliver more in any one Community Area was fundamental to the soundness of the Core Strategy and to its consistency with the NPPF.

1.10 In this context, the council's insufficient response to the overall numbers through the Site Allocations DPD, as set out above, creates a fundamental lack of soundness within the plan. Further its approach, as put forward in Topic Paper 2, of only assessing opportunities to allocate housing in community areas where the indicative minimum housing requirement has not been met is fundamentally flawed. The approach responds only to appeal success (resulting from sites being released over the last two years through s78 appeals given the presiding shortfall in housing land supply over that period) and fails to provide a positive approach by failing to consider and allow opportunities for sustainable plan led development which could assist settlements in meeting their own housing (market and affordable) and economic / community needs and assist more widely in meeting the full OAN across Wiltshire, as required by national policy.

1.11 In addition, the objective for the plan to "demonstrate a rolling five year supply" and to "allocate sites at the settlements in the County that support the spatial strategy of the Wiltshire Core Strategy" does not go far enough. An objective of the DPD should be to meet the OAN, and the DPD should be allocating sufficient sites to meet the OAN, not the minimum housing figure, in order to be consistent with National Policy.

1.12 In the preparation of the site allocations plan, the council should have firstly understood the capacity of all promoted sites in each community area (which should have formed the evidence base) to undertake a full sustainability appraisal to determine which are most sustainable to allocate in each housing market area in order to fully meet the OAN.

1.13 The approach that has been taken conflicts with one of the key outcomes set by the core strategy, with an outcome of Objective 3 being: 'providing everyone with access to a decent, affordable home'.

1.14 Paragraph 4.22 of the Core Strategy states that:  
"The indicative figures also allow a flexible approach which will allow the council, including through the preparation of the Site Allocations DPD, and local communities preparing neighbourhood plans, to respond positively to opportunities without being inhibited by an overly prescriptive, rigid approach which might otherwise prevent sustainable development proposals that can contribute to delivering the strategic objectives of the plan".

1.15 By restricting allocations only to those community areas and settlements that haven't met their indicative requirements, a rigid and negative approach is taken, frustrating sustainable development, contrary to the core strategy and contrary to national policy. The plan is not sound in its current form as it is not positively prepared and inconsistent with national policy.

Effective

1.19 To be effective the NPPF states that the plan should be deliverable over its period, including being based on effective joint working on cross-boundary strategic priorities. One concern is that Wiltshire Council has agreed to work with Swindon Borough Council on housing needs. A revised SHMA was available to the Council 12 months ago, yet the Council has failed to date to publish or take positive action to address the output. We still expect the SHMA to be published imminently, but at this stage it is unclear as to how 'effective joint working' has been undertaken.

1.20 It is of concern that by only allocating development in community areas where the indicative Core Strategy (non OAN) housing requirement has not been met does not allow for a positive response to the findings of the new SHMA, including any re-drawing of housing market areas, does not respond to the considerable housing land supply shortfall in Swindon Borough, does not allow for the OAN to be met and does not allow flexibility and resilience should any of the sites relied upon not deliver as expected. If the Council become a 20% buffer authority the DPD position will become indefensible.

Appendix Q - Schedule of representations

	<p>1.21 To be effective, the plan should take a more flexible approach, allowed for by the Core Strategy and expected by the Core Strategy Inspector when he found that plan sound, and allocate additional sites. Consistent with national policy</p> <p>1.22 As set out above, there are a number of elements of national policy that the draft DPD is not compliant with. In particular the requirement to significantly boost the supply of housing set out in paragraph 47 of the NPPF. This is a Government imperative, supported by the recent Ministerial Statement made alongside publication of the draft standard methodology to calculate OAN. Furthermore the requirement at NPPF paragraph 28 to support economic growth in rural areas. The DPD Fails to take a positive approach to sustainable new development, as one of the starting points to achieve sustainable development (the OAN) has been ignored and the full potential to identify sustainable new housing sites has not been assessed.</p> <p>Summary</p> <p>1.23 In conclusion, the Wiltshire Site Allocations Plan is required to meet four tests to be considered 'sound', as set out in paragraph 182 of the NPPF. It is considered that none of these have been met / demonstrated. The plan is not sound in its current form.</p> <p>1.24 As established at the core strategy examination and supported by more recent evidence, the OAN for Wiltshire is 'around 44,000 dwellings. To be compliant with National Policy, Wiltshire Council should be positively seeking opportunities to allocate sufficient sustainable sites to meet the OAN. Yet, this is not part of the objective of the plan. The plan cannot be considered to be positively prepared or consistent with national policy. It is not sound.</p> <p>1.25 The NPPF requires the plan to be "the most appropriate strategy when assessed against the reasonable alternatives". Allocating development in Community Areas or settlements which have already met their indicative minimums (particularly given the process from which those requirements have been met – which has released sites on their own merits rather than against reasonable alternatives) is clearly a 'reasonable alternative'. The council should have taken a more flexible approach, as allowed for by the Core Strategy and expected by the Core Strategy Inspector, to ensure the most appropriate strategy is proposed. Without having assessed this, the plan cannot be considered justified and is not sound.</p> <p>1.26 There is concern over the effectiveness of the policy, as it is not clear how work with Swindon has been integrated into the proposed plan and how the plan has responded to the redefined Housing Market Areas and difficulty that Swindon has with meeting its own OAN and five-year housing land supply. The Plan, particularly at this stage in its preparation, must respond positively to the most up to date evidence base in order to be effective. This is a key requirement of the NPPF.</p> <p>1.27 It is also of concern that there is no allowance for non-delivery or under delivery in community areas.</p> <p>1.28 The NPPF requires that the plan should "enable the delivery of sustainable development in accordance with the policies in the framework". The plan does not enable the delivery of sustainable development, with opportunities for sustainable development precluded. It is not in accordance with the NPPF requirement to 'significantly boost the supply of housing'.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Moore Allen is the agent for landowners of land surrounding Hullavington that is capable of making a sustainable contribution towards Wiltshire's future housing supply, it is therefore important we are able to participate orally to expand on the comments we have made within this representation.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1217</a>	<b>Consultee</b> Ms Jennifer Dennis  <b>Person ID:</b> 1127043	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I would like to state my objections to the proposed development for the following reasons:-</p> <ol style="list-style-type: none"> <li>1. In the Wiltshire Core Strategy (paragraph 5.150) states 'It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick, North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identities of these villages as separate communities.'</li> <li>2. I understand that Planning permission has been granted for over 5000 dwellings in Trowbridge that have yet to be completed. Brownfield sites like Bowyers, East Wing, Trowbridge Hospital, the Virgin Building and Margaret Stancomb School are all yet to be decided upon. Surely it is common sense to use these existing sites before despoiling open countryside? Wiltshire Council has been asked to provide 900 homes over plan, with Trowbridge being asked to provide 700 of them. Trowbridge lacks the infrastructure to support this number, whilst Chippenham is situated near the M4 motorway and has a mainline railway station enabling residents an easier commute to centres of employment.</li> <li>3. The Fields around Southwick Court are pastoral land that is enjoyed by people of all ages - from dog walkers, countryside lovers and children enjoying the freedom to safely run, play, climb trees and explore the streams that bisect the proposed site.</li> <li>4. The streams tend to flood after heavy rain and the surface water remains for sometime due to the clay content of the ground. Some properties in Sandringham Road and Spring Meadows are low lying and have suffered flooding to homes and gardens in the past. This area is in flood zones 2 &amp; 3 on the Exclusionary Plan.</li> <li>5. Southwick Court is a grade 11* listed building with many archaeological remains in the adjacent fields - the area of the proposed housing development. Extremely rare post-medieval earthworks will be destroyed, in fact they have already suffered damage from the ill-informed exploratory work.</li> <li>6. Access to the proposed site cannot be through an ancient and I believe, protected, hedgerow which surrounds the site south of Silver Street Lane. This hedge is an important habitat for many creatures including several families of hedgehog. Woodpeckers and kingfishers have been spotted in the location and buzzard often hunt in the existing pasture land.</li> <li>7. The location of the site will create unacceptable peril for existing and incoming residents, particularly at rush hour and school times.</li> <li>8. Local schools do not have spare capacity for this development.</li> <li>9. Public services and access to transport hubs are out of the specified range of this development, meaning increased use of cars resulting in a lowering of air quality.</li> </ol> <p>There is no active support for this site from either Local Council, Environment Agency, Natural England, Historic England or the County Planning Archaeologists, despite such active support being voiced for other sites within the proposal. In fact the response from Natural England states 'conclusions/recommendations in the Trowbridge Community Area Topic Paper have noted that Site 3565 (land East of the A361 at Southwick Court), is considered to be a less sustainable option for the development, and that five moderate adverse effects have been identified with the site'.</p>			

Appendix Q - Schedule of representations

	Whilst I understand that Trowbridge needs to provide new homes I strongly believe that Wiltshire Council should remove Site 3565 (Southwick Court Fields) from the Wiltshire Housing Site Allocation Plan.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.14 Court Orchard/Cassways, Bratton		Justified	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The site is not a suitable for a large housing development, as: Bratton is a village, and its characteristics need be preserved as such. The site is outside the village settlement boundary, which according to 2.8 is "with limited exceptions, not acceptable". There are other potential sites for development within the existing settlement boundary to meet local need. The Council should address sustainability issues and consider smaller units to be integrated into the existing infrastructure which would reduce the impact on the village and its community. This would also preserve the beauty of the whole area below the White Horse ridge. The current plan seems to take a simplistic approach to try to place a large number of houses in an area which has been highlighted by the local owner, which had been purchased many years ago. The Council's own assessment of the area highlighted a number of sustainability problems. Instead, it is more important to pursue other potential sites for development within the existing settlement boundary to meet local need. For example, the field next to Peartree Orchard is one such area (which is owned by Bratton Parish Council, and which they have raised with Wiltshire Council). Additionally, there are currently planning applications under consideration for the replacement of Oxford House, The Butts, with four dwellings, and the much delayed completion of a 4-bedroom house on land next to 1A Lower Road. In addition, the number of houses proposed is significantly over the number as assessed by the Parish Council's own Housing Survey in 2015 (8 dwellings). The Site Allocations Plan for Bratton seems also to be based on a misrepresentation of the number of houses in Bratton ie there actually less 520 houses, whereas the Council has referred to there being 819 houses!

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	We are not legal experts - just ordinary residents trying to make sense of a complicated process, which seems to be over complicated and unnecessarily bureaucratic in our view. We believe there may be regulatory and / or legal issues over the proposals in relation to Sandringham Road settlement boundary changes because of the issue around potential endangerment / destruction of historic hedgerows; ignoring / changing without reasonable purpose historic parish boundaries; potential issue with 50 year moratorium on changes to land use in Sandringham Road; potential issue over supporting speculative development of Green Field sites in priority to regeneration of Brown Field sites; potential failure to provide adequate, timely, effective and reasonable notification of consultation and consultation of to residents directly affected by settlement changes; potential denial of access to residents of relevant information during the consultation; potential issue over loss of habitat to Bechstein Bats; potential issue over building on land known to be susceptible to flooding / potentially against advice of Environment Agency; potential issue over building on land with historic archeological pedigree; potentially denying local residents access to and use of areas of common recreational land; issue over potentially changing established cul-de-sacs into through roads; issue over increasing local traffic pollution in a built up area; issues over proposals which are not supported by sufficient health, education, transport, policing and other required infrastructure. We apologise if these are not strictly "legal" issues but are aspects we believe require review and clarification by the relevant regulatory bodies. <b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The reasons we would wish to take part in the oral part of the examination is because the volume of information we have to present is significant, with a the high degree of relevance to the planning decisions for the Trowbridge area, especially Southwick Court site 3565. We wish to ensure the accuracy of understanding of the points made and be able to answer questions that these points may raise in the mind of the inspectorate, providing the inspectorate with a degree of explanation that otherwise may not be available to them. Additional pertinent information is also likely to be available by the time of the oral part of the examination which we have been denied access to from the County Council but may by then have received. This will be enable us to present the fullest and most accurate information for the inspectorate. We may also be representing some of our neighbouring residents (tbc), a number of whom may not all be able to make their own presentations for various reasons of health, stress, lack of experience, etc.

		Mr P T Gee	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I am writing to register my objections to the proposed planning scheme on the Netherhampton Road, Harnham, Salisbury. Firstly, one has to look at the infrastructure, with regards to services, doctors surgeries etc, plus the local hospital is already at breaking point, with little or no funding for further expansion.

Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Secondly, I ask whether the planning authorities have given due consideration to the amount of houses that have already been built in the Salisbury and surrounding areas. There has been in the last few years well over a thousand houses built in the Salisbury area, with a further 700 at least over the next few years. Plus, the extension of Tidworth, 400 more at Larkhill, more at Old Sarum, more on The Avenue at Wilton and even more at Fugglestone. This places an unknown pressure on road already at bursting point.</p> <p>Has there been at any time a point where thought has been given to taking stock of the road systems already at breaking point before continuing this madcap dash to build a further 600 plus houses, plus a 480 place school adding further problems to an area that cannot cope.</p> <p>Salisbury as a city, has a low unemployment rate, and as these new houses, very few of which will be social housing, will result in more cars on roads as people drive to find work.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>This area was, I believe, already a site planning for 1100 houses, which was turned down. The site designated for industrial premises will, we all know, not happen, but, will over time, revert to house planning, with the resulting 400 or so built via back door planning. It is, in my opinion, lunacy to think of building more houses on this site, or any other in this area. I therefore ask the planning authority to withdraw the proposed plan.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I live on the boundary between North Bradley and Southwick parishes; although I would be affected (e.g. by traffic) if any of the developments in these parishes are made, only the edge of one might be within sight of my property. I have no financial, sentimental or nostalgic connection to the sites under consideration and no connection to landowners or developers. My interest is that I believe that North Bradley village would be harmed by development of two of the proposed areas, also that the development of another area has the potential to harm Southwick village. Farming is not thriving at the moment, and farming land adjacent to residential areas has additional problems. I can understand the attraction to a landowner of taking a developer's offer to purchase such land. Also, I sympathise with those struggling to get on the housing ladder, because of the lack of suitable housing. I do not know whether they want or need to live in the areas under consideration; neither do I know whether developers would choose to build sufficient numbers of the types of housing in these areas to meet needs, rather than the wish to return what developers consider an acceptable level of profit. I do not have confidence that the planning system is able to control this sufficiently well. See attached

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am also concerned about the lack of infrastructure in place to cope with 840 new homes. There are insufficient primary and secondary school places, cycle and bus routes, health services, and food outlets to cope with such a huge increase in households. As an employee at Salisbury District Hospital, I am worried about the impact heavy traffic levels will have on patient safety as ambulances and patients struggle to get through heavy traffic. Linked to this is the increase in air pollution levels at a time when more and more scientific papers are being published demonstrating the harmful effects traffic omissions have on health. The Royal College of Physicians estimates that air pollution shortens the lives of between 29,000-40,000 people each year in the UK. Only smoking contributes to more early deaths. [Royal College of Physicians (2016) Every breath we take: the lifelong impact of air pollution. Report of a working party. London: RCPs] The pollution levels on numerous roads in the Salisbury area already exceed European Union targets, to add to this seems criminal. Produce a new transport strategy for the city taking into account the latest research on the harmful effects of exhaust fumes on public health, along with the desperate need for most people to take more exercise, and where possible cycle or walk to work/school.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I wish to object to the proposed development of 40 high-density housing on site 321 on the western edge of Bratton. The basis of this objection is that your allocation plan contains inaccuracies (i.e. you have overstated the existing size of the village by a staggering 307 houses), it draws the wrong conclusions from the data (both accurate and inaccurate data). It appears to have been compiled with almost no regard for the actual situation or consideration of the factors. My key objections are: 1) Significant additional traffic on an already busy and dangerous road (B3098 Westbury Road) Other sites more suitable, with greater need and much less adverse impact, can and should be found

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Bratton is a village, and its characteristics need be preserved as such.</p> <p>6.4 states that it is the prerogative of local communities to review Settlement Boundaries through neighbourhood planning. Bratton has thus far not yet been able to prepare and adopt a Neighbourhood Plan. However, Bratton Parish Council has resolved to object to any change to the settlement boundary for the village (with one minor exception), there being no adequate reasons to amend the current boundary. I fully support this view – there is no need to change it. There are a number of houses outside the current settlement boundary, and that presents no issues for the village; indeed, it does mean there can be no ‘presumption of planning approval’ within such areas, which might otherwise be construed. Any change to the settlement boundary would have an adverse effect on the conservation area and aspects of the village. Leave the Settlement Boundary for Bratton as it is, except for the minor amendment proposed by the Parish Council. Then leave the Parish Council to prepare and adopt its own Neighbourhood Plan.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Plan is not consistent with national policy because the council does not properly consider brown field sites. They should consider the number of derelict sites in Trowbridge which could be used to create new homes instead of using Hilperton Gap. There is no way to make this draft plan sound. Therefore I would recommend abandoning this unsound plan and start a new plan to utilize brown field sites that are practical, suitable for purpose and provide the required housing (not more housing than is necessary as is being proposed) without destroying valuable open countryside.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		My family and I do not believe the Wiltshire Housing Site Allocations Plan is justified or effective because of the following points: 1) H2.2 Land off of the A363 at White Horse Business Park, Trowbridge will add even more traffic to an already ridiculously congested area, and no suggestion for improvement has been put forward. At certain times of the day, Bradley Road and Yarnbrook are just large traffic jams, adding 150 more houses (with potential of 150 to 600 more cars) will cause constant gridlock. Not to mention the increase in air pollution and noise pollution. Don't build on site H2.2!

<b>Comment ID:</b> <a href="#">1234</a>	<b>Consultee</b> Mrs Mary Pelton  <b>Person ID:</b> 1125482	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1 and H3.3			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>H3.3 is on the flood plain of the river Nadder and has a boundary on a housing area already liable to flooding despite 2008 flood protection reinforcements.</p> <p>The size of the development of H3.1 on the hilly higher ground across the road will impact on the valley water table of H3.3. I do not believe that the Environment Agency could have been properly consulted and agree to such developments. I would like to see the report of the Environment Agency and their views on mitigating the flood risks at H3.1 and H3.3. I understand that housing development on a floodplain or in areas liable to flooding can only be considered if there are no other sites suitable for development.</p> <p>I see no reference to exploring further development on the north side of the city at Old Sarum where there is no flood risk. We need more housing in Wiltshire but I note that H3.1 and H3.3 developments total far more houses than is being considered for any housing development elsewhere in Wiltshire so this is not justified.</p> <p>I see no considerations of other sites for housing development in Salisbury eg at Old Sarum, or brownfield sites at Churchfields, at the Maltings. The Environment Agency has already assessed the flood risk at the latter 2.</p> <p>I do not agree that there is employment or that this can be created in Salisbury on the south side of the city. Thus the residents of the developments will need to commute to the north of Salisbury or to Southampton adding to the traffic saturation already present on the Netherhampton Rd. The Salisbury transport plan has not delivered improvements to date on this.</p> <p>The plans for H3.3 and H3.1 cannot be justified until there is clear reporting from the Environment Agency on these being the preferable sites in Salisbury for housing development.</p> <p>Highways for England needs to report on the traffic implications so that Salisbury Transport Plan can be re-examined. Traffic on the Netherhampton Rd approach to the Harnham Gyroty has increased hugely in 23yrs and is often gridlocked at peak times, and on market Tuesday when the livestock market on the road is operational, and during Salisbury races. Additional cars from new homes will add to this morning and evening as people head to work most of which is to the north of the City. Salisbury Transport Strategy has not delivered a solution to these problems to date and review and consultation with the Highways Agency must surely happen BEFORE hundreds of new homes add to the traffic.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Re: Wiltshire Housing Site Allocations Plan which includes the following proposals for the Salisbury area:</p> <p>640 houses – Netherhampton Road (south) near the cattle market                      100 houses – Netherhampton Road (north) at Waldron’s Farm                      100 houses just south of Woodbury Rise, Rowbarrow</p> <p>As a resident of West Harnham for more than 50 years, I must object to these proposals based on the following:</p> <p>Traffic                      Pollution                      Flood risk                      Sewage and surface water drainage</p> <p>Re 1. Traffic                      The Netherhampton and Harnham Road was originally designated as a Class B road before being upgraded to an A Class road (A3094) with little or no physical change except for a significant increase in traffic volume and very little or no enforcement of speed restrictions, resulting in fatalities and damage to property along the Netherhampton / Harnham Road caused by motor vehicles.                      The Salisbury bypass proposal for this area was supposed to reduce traffic along this route and now 840 new houses are proposed! Will a bypass be once again be considered as part of these proposals?                      The existing road network in this area cannot cope with the existing traffic as highlighted during the recent works on Newbridge Road, a main arterial road leading into Salisbury and its ring road, fed by the Harnham gyratory. The construction of these new homes would be disastrous for traffic in this area.                      The Netherhampton / Harnham Road is also a main route for emergency vehicles to and from the Salisbury District Hospital.                      Has or will a road traffic analysis been carried out as part of these proposals?</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I cannot comment on the legality of the proposal as I am not suitably qualified and I would hope that council lawyers would have advised accordingly. The Wiltshire Core Strategy documentation states that "the villages surrounding Trowbridge have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities". The documentation provided which details the proposed development shows that in the North Bradley area alone potentially between 569 and 350 houses are due to be built and whilst these are classed as being in Trowbridge, ultimately this proposal would join North Bradley to Trowbridge and remove any village status that it currently has. Our current road infrastructure is overstretched due to the amount of building work which is already taking place around Trowbridge, leaving our roads grid locked regularly especially with heavy goods vehicles, any further building will put more strain on our roads and services. The Wiltshire Core Strategy also talks about the regeneration of Trowbridge itself and identifies that there are areas which could be further developed to provide the much needed housing required, which may reduce the need for such a large proposal within the rural areas. Not only would this regeneration of existing sites benefit the town as a whole, it would lessen the burden on the surrounding villages and make Trowbridge a much more appealing area to live and work. These town areas should be looked at in more depth before resorting to the "easy" option of building on Green Land sites. Whilst I understand that there is a housing crisis and that all areas must "do their bit" to assist, I would not support any proposals that would cause the village of North Bradley to be lost forever and become another suburb of Trowbridge itself. More engagement is needed as even the Parish Council has not done enough to encourage discussion and provide the required information to the residents that this proposal is going to drastically affect. This information has been all but "hidden" in reams of documentation that most people would be daunted by and the council left it so late to engage with the local population that even they believe it is a "done deal"!

<b>Comment ID:</b> <a href="#">1242</a>	<b>Consultee</b> Corsham LVA LLP  <b>Person ID:</b> 836280	<b>Agent</b> Mr Matthew McShane Land Value Alliances LLP  <b>Person ID:</b> 835942	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	All.		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This representation is submitted by LVA in respect of their land to the north of Bradford Road, Corsham. We wish to raise observations concerning potential housing allocations within the Plan. LVA consider that Wiltshire Council should allocate further sites than those proposed within the draft Plan to ensure there is flexibility in the land supply to meet future housing requirements. [representation promoting land at Corsham as an alternative allocation] LVA consider that land to the north of Bradford Road, Corsham should be allocated for housing within the Plan. The site is available, developable, technically viable and more importantly deliverable. The site has previously been promoted during the earlier stages of the Wiltshire Housing Site Allocations Plan process. Notably the site has been assessed by the Council and featured as a Refined Option for housing within the Informal Consultation on initial site options which took place February to March 2015. The land is identified within Refined Option 5: Site 3250. LVA believes the allocation of smaller sized non-strategic sites such as land to the north of Bradford Road, Corsham can make a vital contribution to land supply. A site of this size and nature, which has been subject to assessment and found developable, can provide the Local Authority with significantly more certainty and clarity in terms of housing delivery and completion rates as opposed to larger scale strategic sites which can often spend long periods of time within the planning process due to a wide variety of factors. Sites such as land to the north of Bradford Road, Corsham are more readily available for development as, in this particular case, the site is within single ownership (LVA), will require less upfront infrastructure and can respond efficiently to various market demands. These factors allow the site to be easily delivered and make a definitive contribution towards the housing requirements of Corsham, the Housing Market Area and Wiltshire as a whole. The allocation of small sites in suitable locations around Market Towns such as Corsham will ensure that required levels of growth are delivered in the plan period whilst providing flexibility and certainty in the event that the strategic sites do not come forward as expected.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1243</a>	<b>Consultee</b> Ms Nicola Morris  <b>Person ID:</b> 1122130	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph 2.7 and Paragraph 2.15 and Table of levels of development Table 2.2, and Paragraph 4.4 (all related)		Justified
			Effective	Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>a)The WHSA Plan is a development document drawn up under the Wiltshire Core Strategy (WCS), and it must follow its strategy. WCS paragraph 4.7 states that if a development proposal does not accord with the WCS then "it is deemed unsustainable and will not be supported" (direct quote).</p> <p>b)This point is raised in relation to Paragraph 2.15 of the Plan and the information in Table 2.2. which does not conform with WCS Core Policy 1. The purpose of the WHSA Plan is to allocate housing and review settlement boundaries where necessary, It is a development of the Core Strategy, a further stage. It can not revise the Core Strategy or set out the wording of the Core Strategy differently.</p> <p>c) The wording in the "box" in Table 2.2 of the Plan on Large Villages is wrong in a significant respect. Core Policy 1 provides that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve EMPLOYMENT opportunities, services and facilities".</p> <p>d)BUT the wording in Table 2.2 states "... help meet housing needs of settlements and to improve HOUSING opportunities, services and facilities". The error is significant. The public consultation will NOT extend to considering EMPLOYMENT and instead the phrase mentions HOUSING twice. To emphasise: no coverage on one important aspect of employment and double emphasis on HOUSING at Large Villages. This needs correcting immediately. It is a fundamental flaw. Firstly, it may mean that the methodology of assessing the individual Housing Market Areas may have been weighed up using the wrong definition and incorrect key framework. This must be unsound. Secondly, it means that the public when weighing up the proposals in the Plan will not have been aware of the need to consider the importance of providing employment opportunities when considering the scheme as a whole or when considering individual sites. This goes to the crux of the consultation process for the public when considering development in Large Villages.</p> <p>e) To compound it, the ERROR is carried over to the all-important SITE SELECTION AND PROCESS METHODOLOGY and Topic Paper 2 (June 2017) paragraph 1.12 refers to Core Policy 1 but Table 1 beneath this sets out that the level of development for "Large Villages" should be "... that need[ed] to help meet the housing needs of settlements and improve HOUSING opportunities, services and facilities". This repeats the error. It may well be that the instructions to civil servants was clear and correct, and that despite the two errors they were still aware of the need to weigh up employment opportunities. Even if this is the case, the double error means that the public will be even less likely to be aware of the employment issue and reading other documents in the Plan papers such as this Topic Paper 2 would mislead them further and reinforce the wrong policy.</p> <p>f) This is particularly relevant to Bratton in the Westbury C.A.R. Site 321 allocates approximately 40 houses to this Large Village. Yet the likelihood of there being a small yet alone a modest opportunity for employment in the village must be very low. Bratton residents in particular will have been misled by the Plan into thinking that they must just deal with housing "needs" and housing "opportunities", quite oblivious of the need for employment opportunities. It will mean that people against the Plan may not have considered that a comment was worthwhile as it removed an issue which is important to the public.</p>		

Appendix Q - Schedule of representations

g) There is a further conflict between the Plan and the WCS. The WCS states at Paragraph 4.15 "At Large Villages ...development will predominately take the form of small housing and employment sites within settlement boundaries.....Small housing sites are defined as sites involving fewer than 10 dwellings (ie not a major application).....Development outside the settlement will be strictly controlled. Relaxation of boundaries will only be supported.....identify new developable land to help meet the housing and employment needs OF THAT COMMUNITY....."

h) However, the WHSA Plan omits the reference to small housing sites or to fewer than ten houses, and this should be clear in the Plan. This is a significant omission. At Parag 4.4 of the Plan, it states: "The WCS proposes much more modest levels of housing at Large Villages as reflected in the indicative scales of housing for each community area." "Modest" is not the same as "Small". At 2.15 of the Plan it is set out that at Local Service Centres there will be "modest levels of development to safeguard their role and deliver affordable housing". Bearing in mind the hierarchy of development areas from Principal Towns down to Small Villages or undesignated areas, it can not be right that the the Plan is setting out "modest" housing more appropriate in size for a Local Service Centre, when the WCS states "small housing " for Large Villages. Only after it became clear that many of the sites which were "entered" following the calling in of sites process were in the Large Villages did the process expand to consider Large Villages.

i) A further flaw follows directly from this which makes the process unsound. The Plan disaggregates the number of houses required as a whole between now and 2026 between the various HMAs. The overall methodology of disaggregating houses over the HMAs and setting a fixed number is flawed for an area such as the Westbury Community Area Remainder. Here the indicative number of houses required is 47. This might be appropriate for the other HMAs where each Market Town has several Large Villages and may also have Local Service Centres. But it is fallacious for a small rural area such as the Westbury CAR where the number of villages is few running along the edge of the Plain escarpment apart from Dilton Marsh to the west of Westbury. (Westbury Leigh has already been taken in to the Westbury town area.) In an area where one Large Village Dilton Marsh can not apparently accommodate any housing because the school has no space, it means that all the housing must be allocated to Bratton. Edington is a Small Village and so takes no allocated housing. Result: Bratton must take all 47 houses or the Council can not prove that it has met its 5 year plan. This means that the proposed development in Bratton has changed from a possible 10 houses in 2015 to 47 today. This is above modest. The allocation includes affordable housing, which the WCS has set out is part of the role of a Local Service Centre. This process is clearly not "Plan-led". It is simply 47 houses into one place despite all key policies on a County level and without taking in to account all considerations on the local level. This can not be sound method, planning or policy. The Plan is then put out to consultation and there is no choice about where the house are placed. It negates the value of all the Site assessments and valuations.

The Bratton Parish Council did complete a questionnaire on the question of sites in Summer 2015. However as at that time the WCS (adopted 2015) was clear that "small housing" would be allocated to villages then the responses must have been made under a false impression. If the Parish Council had thought that a positive response of any sort would result in 40 houses then I believe the response would have been different. I believe the same may apply for the Housing Needs questionnaire. Very few responded, which on its own may make the result unreliable. However if the respondents had know that if they answered yes in favour of 8 houses, that they would get 40 - then again I believe the responses would have been different.

j) The division between some of the Market Towns and the adjacent villages is not logical. In the Westbury CAR it means that housing on the east side of Westbury outside of the settlement boundary is rejected out of hand. The recent application for 47 houses has now gone to appeal following a refusal. Yet this site is only 2 miles from Bratton and the sites are not considered as a cogent whole. Clearly, a site in Westbury has advantages over Bratton - it is a cheaper place to buy and to rent, the land values are lower, the town has multiple primary schools and Matravers as its secondary school, residents can walk in to the town (where as Bratton residents have to use a car or cycle or walk on a dangerous road, or rely on the bus to Westbury, with increased "out commuting"), it has a railway station so commuting for work and travel is easier than from Bratton, Westbury can accommodate larger numbers, it has a large employment estate to give employment opportunities, Westbury needs the growth to assist its own development. The list is long. Yet through the Plan there is no logical way of dealing with Westbury and its villages together as the Villages are separated into the Westbury CAR and must be dealt with separately. The result is that a large number such as 47 houses have to be accommodated in a village before 2026, with a potential for 40 almost immediately. Small developments are appropriate in Bratton, but not large ones suitable for the urban environment.

k) It is worth emphasising that the policy states that the development must benefit the particular community, and not the whole area, to quote: "Development outside the settlement boundary will be strictly controlled. Relaxation of boundaries will only be supported.....identify new

Appendix Q - Schedule of representations

	<p>developable land to help meet the housing and employment needs OF THAT COMMUNITY.....", that is where the houses are in Bratton this should be for the benefit of Bratton.</p> <p>l) A housing needs survey was carried out at Bratton and this identified a need for 8 houses. Under the process, 40 are allocated to Bratton.</p> <p>m)The methodology for Site 321 assessed that the correct number for the Site was 32 houses, but this is increased to approximately 40 in order to mitigate for the adverse effects the estate will cause. But such an arbitrary increase ignores the other vital concerns such as number of cars, parking issues, highway safety, the increase in numbers out-commuting, the lack of infrastructure at Bratton, the capacity of the local GP surgery. It ignores the harm that a larger estate causes in an Area of Special Landscape Area.no) The assessment carried out for the SHLAA site 321 records the area as peaceful, but this is not the view of local residents who have to deal with the traffic on the narrow B3098, especially at rush hour</p> <p>(n) In Paragraph 2.7 it is stated that the Core Policy 1 of the Core Strategy identifies FIVE (5) types of settlement and sets out "Large Villages" and "Small Villages" as two separate entities. This is wrong, incorrect and misleading. The Core Strategy identifies FOUR (4) categories. Large and Small Villages are categorised together. The difference between the two is that one has a "limited range" of services, facilities and employment and the other has a "low" level of services and facilities and "few" employment opportunities, but all are villages. Further, the Core Strategy sets out the development at Large and Small Villages as a single category, both treated together and the same, namely, development will be "limited to that needed to help the housing needs of settlements and to improve employment opportunities, services and facilities".</p> <p>(o) The "Boxes" in Table 2.2 of the Plan for "Large Villages and Small Villages" have been separated contrary to the designation in Core Policy 1. The omission will mislead the public further to the above as the link provided by Core Policy 1 between Large &amp; Small Villages is broken and lost.</p> <p>(p) The wording in the "Box" in Table 2.2 for Small Villages does not conform to Core Policy 1 as the wording is wholly different. Firstly, the wording should be in the same terms as for Large Villages, (see above), as in the Core Strategy. Secondly, the wording in the "box" for Small Villages has been taken from the Core Strategy paragraph 4.16 but then amended. Paragraph 4.16 of the Core Strategy actually states that "some VERY modest development may be appropriate at Small Villages....", (rather than modest) and it does not say that this must be restricted to infill. Paragraph 2.1 misleads by stating that the table sets out the relationship ... and the expected level of development "UNDER Core Policy 1", when it does not.</p> <p>q) It unreasonable to expect members of the public to consider earlier documents such as the precise wording of Core Policy 1 when considering the wording of the WHSA Plan which should be clear on the face of the document.</p> <p>The corrections are recommendations are set out above with the comments</p> <p>I repeat the paragraphs set out above.</p> <p>The proposed corrections for the paragraphs above are clear from the contents.</p> <p>These points are submitted by me in a personal capacity as a resident and parishioner in Bratton village.</p> <p>This Representation is NOT made by me in my capacity as a Parish Councillor and NOT on behalf of Bratton Parish Council.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1244</a>	<b>Consultee</b> Mrs Lesa Drewett	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Person ID: 1127962		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Site Nos. H3.1 and H3.3		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The existing infrastructure, predominantly the A3094, will simply not be able to sustain this new development of 840+ houses. This road is currently as breaking point already and serves as a poor excuse to an extension of the Salisbury ring road. Major congestion is evident at the Harnham gyratory and the Park Wall junction (going all the way down to the Wilton roundabout which is also overloaded now with extra housing in Wilton and on the A360).</p> <p>I live on the A3094 by the Quidhampton Lower Road junction and as Quidhampton is used as a 'rat run' to cut through to Churchfields Ind Estate and the city centre, this junction is extremely busy at peak traffic times. This year we have witnessed approx 1 accident a month at this junction with police and ambulance in attendance. If the A3094 is overloaded with yet more traffic the amount of accidents at this junction is only going to increase and it will only be a matter of time before we have a fatality (as they recently had at the other end of the A3094 in Harnham a few weeks ago). Is the Council willing to accept blood on their hands because they are forcing the housing on a truly unsuitable site?</p> <p>The Council cannot simply allocate this disproportionate amount of new housing to Netherhampton Parish just because a landowner has offered the land for sale. The location of land has to be correct in terms of infrastructure, this just seems to be a case of the Council panicking because they are not meeting their new housing quota.</p> <p>A new road network or bypass needs to be built before the Council can consider dumping these huge numbers of new housing in an already congested area. Through traffic has to be taken away from the A3094 before any new housing can be considered.</p>				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Because I can give you some first hand evidence of the fragility of the A3094 and why it is already unsafe for the huge amounts of traffic it already serves.

<b>Comment ID:</b>  <a href="#">1246</a>	<b>Consultee</b> Mrs Roz Walker  <b>Person ID:</b> 1128189	<b>Agent</b> Mark Reynolds  <b>Person ID:</b> 1124938	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A70 Sutton Veny settlement boundary		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	See attachments: Wiltshire Presubmission draft Housing Site allocations DPD - Representation - Land north of the Kennels, Sutton Veny PDF Appendix 1, Appendix 2 (part 1), Appendix 2 (part 2), Appendix 3 (part 1), Appendix 3 (part 2). This objection centres on the following parts of the document; 6. Settlement boundary review (and its supporting text) Table 6.2; Appendix A –Warminster Community Area, A.70 Sutton Veny proposals for revised settlement boundaries. Particular regard is focussed on Sutton Veny but the representation also questions the validity of the policy approach to the settlement boundary review as a whole, in terms of its wording and construct. This representation is structured to firstly consider the rationale underpinning the requirement for the settlement review before considering the housing supply position within the North West Housing Market Area (NW HMA) and the Warminster Community Area (WMCA). It goes on then to consider the methodology for the settlement boundary review before making the case for my Client's land in Sutton Veny to be included within the revised settlement boundary. An assessment of other development options within Sutton Veny is undertaken and thereafter the requested change to the WHSAP is outlined before concluding remarks are drawn. The WHSAP Topic Paper 1 Settlement Boundary Review Methodology noted at the draft methodology stage 'built and extant planning permissions' were to be included within the revised settlement boundaries. Following some objections to the draft methodology on the basis that not all sites with planning permission will be built out. The revised methodology was adopted which seeks to exclude unimplemented but extant planning permissions.  The rationale for this alteration to the methodology is described at 7.14 of the Topic Paper 1 where it is concluded that 'the role of a settlement boundary is to define the built form of the settlement. Unimplemented planning permissions, by definition, have yet to be built and, therefore, do not form part of the built environment...therefore the revised settlement boundary review methodology will include within the settlement boundary built or commenced planning permissions but exclude all unimplemented planning permissions'.  This methodology is fundamentally flawed and fails to acknowledge the very purpose of settlement boundary review. The CS Inspector was very clear that settlement boundaries would need to be expanded to accommodate growth, indeed the CS was only found sound on the basis that this would happen in a timely fashion through the WHSAP. If settlement boundaries were intended to be utilised to only illustrate the existing form of a settlement they would have no value as a planning policy tool because they would not be proposing any development. The methodology underpinning the decision to exclude sites which have been granted planning permission is flawed and inconsistent with national policy which requires a DPD as part of a Local Plan to be positively prepared.			
	Consistent with national policy			

Appendix Q - Schedule of representations

	<p>Settlement boundaries should be prepared to facilitate development coming forward. It is an important constituent part of the spatial expression of the plan making process. Settlement boundaries should offer both a recognition of the extent of the existing settlement but also the most appropriate spatial distribution of future development. Sites which have gained planning permission have been found to be compliant with the Development Plan or if not material considerations have indicated that they should be approved in any event. Either way they have been through the detailed Development Management process and been found to be acceptable. It is only then sensible that the plan making function of the Council should support the implementation of the sites which have already been found to be acceptable.</p> <p>See attachments  Wiltshire Presubmission draft Housing Site allocations DPD - Representation - Land north of the Kennels, Sutton Veny PDF  Appendix 1, Appendix 2 (part 1), Appendix 2 (part 2), Appendix 3 (part 1), Appendix 3 (part 2).  The revised settlement boundary for Sutton Veny should be expanded to include my Client's land which benefits from planning permission under ref: 17/01776/FUL in full which is depicted at (Fig 1) and (Appendix 2). If this is not supported at the very least the existing part of the site which is in the existing settlement boundary should be retained within it.  My Client's land as outlined in (Fig 1) and (Appendix 2) is being relied upon as a 'developable commitment' over the CS plan period but it is not proposed to be included within settlement boundary. This threatens the deliverability of a key site required to support meeting some of the unmet housing need within Sutton Veny. If WC are to rely upon sites such as my Clients to deliver housing over the plan period then planning policy needs to align with the housing trajectory to enable this otherwise the risk is that the permission will lapse and the housing supply could be lost. Given that sites with planning permission have already been determined to be acceptable for development there would be no disadvantage in including them within the revised settlement boundary which should be a tool to outline the future spatial distribution of development in the large villages. The permissions could after all be implemented at any point before they lapse thereby changing the extent of the built form of the settlement.  In the context of a significant level of unmet need being identified within the WMCA it is critical that existing supply which the Council is reliant on is actually safeguarded for the length of the CS plan period. Failure to include my client's land within the settlement boundary could act to reduce the supply of housing which the Council is reliant upon.  The examples of best practice in settlement boundary review cited by WC at Winchester, Purbeck and Kettering all include sites with planning permission within their settlement boundaries and the draft methodology for settlement review proposed this and in order to avoid undermining supply the methodology should be revised to include sites with planning permission within the revised boundaries. The housing shortage and lack of available supply to meet demand in Sutton Veny lend further significant weight to the land being included prior to examination of the WHSAP.  See attachments  Wiltshire Presubmission draft Housing Site allocations DPD - Representation - Land north of the Kennels, Sutton Veny PDF  Appendix 1, Appendix 2 (part 1), Appendix 2 (part 2), Appendix 3 (part 1), Appendix 3 (part 2).</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4713392 / 4713391 / 4713390 / 4713389 / 4713393 / 4713394</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>In the event that the Council is unwilling to make the amendment sought through this representation it will be necessary to address the Inspector at the examination in public because the representation raises issues which question the soundness of the plan.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1247</a>	<b>Consultee</b> Durrington Town Council Chair planning  Durrington Town Council  <b>Person ID:</b> 458507	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.5 and H3.6		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Following the publication of the Draft Housing Site Allocations Plan (the Plan), Durrington Town Council set up a Task Group to deliver its response about the Plan (specifically relating to Durrington) to Wiltshire Council. Throughout the 10 week consultation period the Task Group has discussed the Plan with Wiltshire Council Spatial Department representatives at the Consultation events, conducted its own survey within Durrington, conducted fact finding, reviewed the Plan and other Wiltshire Council documents and held a Public Meeting for its residents on the 17th of August. As a result of the Task Group's work, the Town Council sat an Extraordinary Meeting on the 12th of September to approve the following response in relation to the Plan.</p> <p>The Town Council believes that the Plan (specifically relating to Durrington) is unsound because it is not Positively Prepared, Justified or Effective based on the following evidence:</p> <p>Market Town versus Large Village</p> <p>The draft plan and Wiltshire Core Strategy list Durrington along with Bulford and Amesbury as a Market Town, based on geographical boundaries and obvious transportation links to Amesbury. It makes little mention of Larkhill, which is part of the Parish (Durrington and Larkhill). Durrington should be seen as the unique large village it is, no more linked to Amesbury than perhaps the smaller villages of Cholderton or Newton Tony. Durrington is currently self-contained and sustainable. The Plan and Wiltshire Core Strategy should therefore reflect Durrington as a Large Village, not the Market Town of Amesbury including Bulford and Durrington.</p> <p>SUSTAINABILITY</p> <p>Services</p> <p>The Town Council acknowledges that there may be a positive impact on local businesses in the village, this was highlighted in the recent survey it conducted and is recognised in the Plan. It does not however believe it could be any more sustainable than it already is. This is a statement that the</p> <p>Plan often quotes 'making Durrington more sustainable'. With a plethora of facilities; 3 x Mini Supermarkets (including a Post Office), 3 x Schools covering all age groups, along with pre-schools, 6 x Take Aways, Hairdressers and Barbers shops, 2 x Doctors Surgeries, a Chemist, a DIV shop, a Flower shop, a Carpet shop, a Petrol Station, 2 x MOT/Repairs garages, a Swimming Pool, Fitness Centre, Dance Studio and Vets. The only real service missing in the village is a Dentist, but with Dentists in Tidworth and Amesbury at capacity and not taking on new patients either</p>			

Appendix Q - Schedule of representations

	<p>on the NHS or through Private Dental Providers any new residents would have to seek this service outside the immediate area.</p> <p>At present there are two doctors surgeries in the village, one of which will close in early 2019. Its patients will potentially be relocated to new facilities at Larkhill once they are built. We therefore see a reduced capacity within Durrington. There is a known issue with availability of pre-school places, where will the pre-school aged children of the additional service families along with those of the 60 new families go, particularly given insufficient places at Larkhill?</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1248</a>	<b>Consultee</b> Durrington Town Council Chair planning	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Durrington Town Council  <b>Person ID:</b> 458507		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.5 and H3.6 Durrington		Justified	Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Employment  The Plan makes assumptions that 60 more homes will bring employment to the village to help make Durrington more sustainable. The Town Council does not believe that there is significant employment opportunities within the village, 60 more homes will not bring more employment. It will have the opposite effect and will likely increase the carbon footprint of the village with residents travelling outside of the village for employment, impacting more on the roads.			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1249</a>	<b>Consultee</b> Durrington Town Council Chair planning	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Durrington Town Council  <b>Person ID:</b> 458507		<b>Do you consider the draft WHSAP is sound?</b>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Infrastructure</p> <p>The Plan allocates two sites for Durrington, both sites will negatively impact on the roads, parking and public safety in the village. The proposed 45 homes off Clover Lane are intended to be linked into the current road structure on Clover Lane through two access roads that were built during the original build phase of the Avon Fields development in 2012. These roads were built to link to an extra 15 homes where planning had been approved but not taken place. Notwithstanding the 15 homes for which planning has been granted, an additional 30 homes are now being planned</p> <p>This would bring into question the Design and Access Statement of Avon Fields which was for a total of 156 homes and whether the current access roads and road structure within the estate could sustain an additional 30 homes.</p> <p>The proposed 15 homes on Larkhill Road would be sited on a busy A road that already suffers from speeding vehicles, parking and congestion issues, as well as it being a rat run through to the A303. The Town Council does not believe that the site has the capacity for 15 homes in the building line as is consistent with the current line of permanent residences along this side of Larkhill Road.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Army Rebasing – Larkhill  The Core Strategy and Plan do not fully consider the impact of Army Rebasing in Larkhill on Durrington. Not only are in excess of 440 homes being built at Larkhill for service personnel and their families, but there will also be an increase in approximately 1500 single service personnel arriving in Larkhill. Given the facilities and services that Durrington has, the Town Council believes there will be a significant increase in traffic to and from Durrington. How can Wiltshire Council have thoroughly considered the potential impact of Army Rebasing on Durrington given there is little evidence or mention of it in the Plan? The Town Council believes a common sense approach should be adopted in relation to the development of the sites allocated in the Plan until post Army Re basing and the full impact on Durrington's infrastructure, self-containment and sustainability can be fully assessed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Roads  An increase of 60 homes in Durrington plus Army Rebasing at Larkhill will have a detrimental impact on public safety, our roads and parking, which the Town Council believe to be at full capacity. This was the main concern of residents in the survey responses submitted and at the Public Meeting held. There is serious congestion in the village for high percentages of the day when navigating the narrow village streets. It is also potentially dangerous due to the levels of traffic including HGVs, buses, school pick up and drop off locations due to access issues at schools. The Town Council also foresees the impact of Army Rebasing as mentioned above on the village's roads.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Conservation  Durrington is unique in where it sits in Wiltshire and how it shares its tight boundary with Conservation areas, SSSIs, the River Avon and of course Salisbury Plain, there is therefore concern over how these areas will be affected through further development. Durrington is already acknowledged via the Wiltshire Council's Draft Open Spaces 2015-2026 document as being under resourced in recreational and open space. It is therefore important to protect the limited green space and woodland available in the village.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Affordability</p> <p>The Town Council understands that there is a need for land supply and houses and that some of those houses need to be affordable (rent/purchase). The Wiltshire Housing Needs Survey of 2015 (page 13) states that given the annual median income in Wiltshire (£19,254 in 2013) it would be unlikely that a current Durrington resident wanting to buy or rent a home in Durrington would be able to afford to do so. This potentially means that any new homes built as part of the Plan in Durrington, whilst meeting Wiltshire Council quotas won't necessarily assist in getting those Durrington residents who want to buy or rent in the village a home to live in. This will result in more residents from outside of Durrington moving to live in Durrington, whilst Durrington residents wanting to buy or rent locally may have to move elsewhere to more affordable homes.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Boundary Settlement Review  The Town Council objects to the expansion of the current settlement boundary to fulfil the Plan, overturning what was considered in the Salisbury District Local Plan a 'safe' plan. The village has positively contributed to conducting infill in line with its Village Design Statement recognised by Wiltshire Council. Over 40 infill developments have taken place in the past 5 years, in addition to the 140 homes built at Avon Fields. With the increase of 440 homes in Larkhill, the Parish will see a 34% increase in homes over an 8-10 year period, potentially making Durrington less sustainable. There is concern that once the settlement boundary is expanded to include new sites for development under the Plan the boundary will potentially be expanded again and again to include other sites outside the current and/or projected boundary post the delivery of the Plan.

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1258</a>	<b>Consultee</b> Major David Cummings	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 445982	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Point Three. Of further concern is the increased traffic flow that will be created as a result of this proposal. Traffic volume on the A3094 has noticeably increased in recent years, and there are already considerable queues of traffic at certain times of the day, particularly during peak traffic periods, at the Harnham Gyratory and at Quidhampton where the A3094 joins the A36 at Park Walls. A development, of the shear size contemplated, can only increase the size of the queues and their duration. I am are sure the residents of Harnham and Quidhampton, living alongside the A3094 will have similar concerns.</p> <p>Point Four. Netherhampton Village proper, is comprised of approximately 60 to 100 residential properties. This new proposal of 740 new houses on Netherhampton Road on the A3094 would mean the creation of a whole new town, approximately 7 and a half times of the existing Netherhampton Village! There is currently no infrastructure to support such a proposal. There is, however, an already inadequate road system that in the last 5 or so years has become the 'unofficial' Salisbury Ring Road. This is the current A3094.</p> <p>Point Five. One day, Salisbury will be allocated funding to build a proper 'bypass'. It has got to happen. Other towns and cities (with lesser claims) have already been granted funding. The present proposal to build 740 houses on the A3094 Netherhampton Road blocks, exactly, the route of the bypass that was considered fifteen years ago.</p> <p>Point Seven. When the firm 'In Excess' applied to move it's very small shop in Harnham to it's main warehouse one mile away on the A3094 towards Netherhampton Village, planning permission was refused for almost 10 years by Salisbury District Council, on the grounds that the increased traffic on the A3094 would result in the road being impassable.</p> <p>Point Eight. I note that minor changes were made to the South Wiltshire Core Strategy Submission Document submitted before the Initial Hearing Sessions. Page 161 of the Core Strategy (which covers the land area regarding this particular proposal) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". I can find no evidence that this has been carried out and, therefore, this proposal should not even be considered until such time as these measures have been carried out and agreed by all of those those in authority.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site was the subject of an appeal for retail development in 1987-89. The decision referred to the significance of the western approach to the city along Netherhampton Road in appreciating the special setting of the cathedral amongst the watermeadows and the need to protect Salisbury's unique setting.</p> <p>This is still a valid consideration today, and the preservation of the important public views and setting of the cathedral is more difficult to achieve with a housing development than a supermarket owing to the greater density of ground cover. Three storey houses such as can be found on the Wellworthy estate opposite would cause an adverse impact as would large trees. The low density/low height housing scheme necessary to reduce the impact on the setting of Salisbury and preserve the open character of the views across to the watermeadows would not deliver the number of houses proposed. Landscaping of this site would require a different approach from current housing developments with a greater quantity of open space and no large tree species.</p> <p>Should this allocation go ahead it would be necessary for a height restriction to be imposed.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>This my objection to the Wiltshire Housing Site Allocation Plan for the period 2006 to 2026.</p> <p>Below is an extract from the Wiltshire Core Strategy regarding open country between the town and villages at paragraph 5.150 page 181."it is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick, North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities."</p> <p>Developers are holding granted planning permission for over 5000 dwellings in Trowbridge which they are not building.</p> <p>On the basis that the Former District Council Offices, the East Wing site, the Virgin building, and the Bowyers site, (all Brownfield sites) have been specifically identified by Wiltshire Council to include housing they should all be included in the preferred sites list with minimal risk that they would not be delivered by 2026.</p> <p>Procedural anomalies relating to the process itself are rife. The indications being that this parcel of land has been added to the Proposal in a rushed manner without due diligence on its suitability having been performed. Furthermore all attempts to activate the commitments made by Councillors &amp; County Officers have been met with negativity and inaction.</p> <p>There is no active support for this site from either, Local Council, Environment Agency, Natural England, Historic England or the County Planning Archaeologist despite such active support being voiced for other sites within the Proposal. In fact in a response from Natural England the case officer said :</p> <p>Conclusions/recommendations in the Trowbridge Community Area Topic Paper have noted that Site 3565 (Land east of the A361 at Southwick Court), is considered to be a less sustainable options for development, and that five moderate adverse effects have been identified in relation to this site."</p> <p>As NPPF demands:                      "If a planning application fails to score positively against the aims and objectives of the Local Plan Sustainability Appraisal or Local Plan policies . . . . planning permission should be refused."</p> <p>After considering all the comments/objections, from all sources, regarding this site, the Council should seriously consider removing Site 3565 (Southwick Court Fields) from the Wiltshire Housing Site Allocation Plan.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		The land suffers from serious flooding already currently impacting severely on the built form around it. Any further water entering the drainage system (which is close to capacity) will exacerbate this and will break the Environment Agency 'Lifetime surety' to be free of flooding for at least 100 years for homes already existing.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Access to the potential site cannot be through the Important and protected hedgerow where the proposed access is on to Silver Street Lane, therefore access can only be from the A361 directly past the grade 11* listed building and across the Ladbroke Stream floodplain which bifurcates the site. This route is also not possible as it would have to break through the protected hedgerow.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Though we largely confirm the appropriateness of the proposed settlement boundary for Purton Parish, we would like one adjustment please for accuracy and to conform with our neighbourhood plan.</p> <p>1. Regarding College Farmyard, we request to retain the settlement boundary as it is in that area. The reason is that contrary to the consultation document where it says, "Amend boundary to remove employment land at the edge of the large village." this area has not been used for employment (farming) for decades and it is not designated as employment land in any Wiltshire Council document or in our neighbourhood plan.</p> <p>2. The proposed settlement boundary is shown passing through the middle of St Mary School (as shown on the map below) whereas it should skirt the southern boundary of the school including its car park to the east and the play area to the southeast.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1285</a>	<b>Consultee</b> Mr John Fullegar	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Person ID: 1125498		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.2 Land off of the A363 at White Horse Business Park, Trowbridge		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I do not believe the draft Wiltshire Housing site allocations plan is sound because: 8) Site H2.2 is regularly flooded, building on this site not only poses a flood risk to the new house built, but in reducing the area available for flood water to drain, will likely cause more flood problems for existing villagers. Don't develop the site in question (H2.2 Land off of the A363 at White Horse Business Park, Trowbridge) instead look to develop existing brown field sites in Trowbridge. 2) Whilst site H2.2 is only allocated for 150 houses at this time, due to the large size of the site, what measures would be taken to ensure these 150 houses were not built in a small area of the site, and further houses filling up the site at a later date?

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Settlement boundaries - Tidworth, Ludgershall, Bulford, Whiteparish, Winterslow			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Amended Settlement Boundaries</p> <p>It has been noted from the plan that the minimum housing requirement set out in the Wiltshire Core Policy for the East Wiltshire Housing Market Area is 5,940 dwellings along with 10,420 dwellings for the South Wiltshire Housing Market Area.</p> <p>The Council has identified a small number of the proposed settlement boundary amendments within the plan for settlements found in the East and South of the county . These amendments are for settlements within relatively close proximity to the border of Test Valley Borough. The sites in question have been listed below:</p> <ul style="list-style-type: none"> <li>Tidworth (East HMA)</li> <li>Ludgershall (East HMA)</li> <li>Bulford (South HMA)</li> <li>Whiteparish (South HMA)</li> <li>Winterslow (South HMA)</li> </ul> <p>Overall, after reviewing the maps of the amended settlement boundaries the Council would support the plan. However, we are aware that any future amendments to settlement boundaries close to the border of with Test Valley could possibly see increased pressure on housing requirements in the Borough alongside the additional pressures to transport infrastructure, open space and other services which would require further co-operation.</p> <p>In summary, in terms of housing, transport and infrastructure, there are cross boundary matters which we will continue to seek to liaise with you on, the Council welcomes the opportunity to continue to work together in the future.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H1.1 Empress Way Ludgershall			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Thank you for the opportunity to comment on the above document and the supporting evidence base. The Council notes the plan covers 2 main topics of Housing Site Allocations and Amended Settlement Boundaries. The Council is mainly concerned with proposals by Wiltshire Council in the East and South Housing Market Areas, which are within close proximity to the border of Test Valley Borough Council.</p> <p>Housing Site Allocations The consultation document has identified 16.5ha of land at Empress Way, Ludgershall with a total possible development of approximately 270 dwellings. This includes 109 dwellings that have already been granted planning permission, (shown above in blue). In terms of figures this is the largest site that has been identified within the plan document. This site is approximately 350 meters from the border between Test Valley and Wiltshire.</p> <p>The Council welcomes the acknowledgement that a transport assessment will be needed to inform detailed measures to mitigate impacts on the local road network, including the nearby A342 Andover Road which directly connects the two authorities. Additionally it has been noted the requirement for significant additional screening at the southern and eastern site boundaries, along with landscaping and green infrastructure throughout the site as there are middle and long distance views of the site from the south from the direction of Test Valley.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Netherhampton Road, Salisbury.</p> <p>Also this is an area of beauty, the first views to the cathedral from the Wilton Road. It will destroy the area. There is already an excess of dumping rubbish in local fields and on Harnham Slope, this will only increase. Unless the above issues (in particular the matter of local roads) are fully addressed this proposal should not go ahead. It will also destroy an area of great natural beauty and cause more noise, pollution, traffic jams and damage to the environment...as well as impacting visitors to Salisbury where traffic is already an issue. A development on this scale is horrendous in a beloved countryside area.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The site is inappropriate for the allocation of 40 dwellings as previously smaller developments have already been rejected on this site. Access to this site is very dangerous and will increase traffic on the B3098 and court lane, which are both narrow, blind in places and busy roads already. School children currently have to walk on the road as there are no pavements on court lane to crossover to Bury lane to access a safe route to school, an increase in traffic on court lane will make an already dangerous road to cross an accident hotspot. A development on this site will mean that any children accessing the primary school, park or local facilities will have to cross over at the top of court lane leading to the B3089 which currently has blind spots as you approach from both ways. Current services and amenities would be stretched offering no benefit to current resident or new . Other sites within the village boundaries need to be explored, and the size of any development be relevant to the needs of the village.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Hilperton Gap (HSAP reference 263/297)  The Plan is not consistent with national policy because Wiltshire Council has failed to give proper weight to brown field sites. In Trowbridge town centre, there is the large derelict site of the old Bowyers factory which lies unused and an eyesore. It is the first thing seen from the railway station and sets the tone for the whole town. This could provide hundreds of homes and give the town a facelift at the same time. The fields of the Hilperton Gap are a green open space vital to and well used by the local community. Please reconsider this development.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13		
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I wish to register my concerns about the proposed allocation of an additional 40 houses to the village of Crudwell on the Ridgeway Farm site as detailed in the draft Site Allocations Plan.</p> <p>I, like many other people in the village, have in the past supported the introduction of new build housing projects as a means of sustaining the viability of the village. With the introduction of small estates every few years the character of the village has not been spoilt and the Conservation area has not been threatened. The centre of the village has been developed without spoiling the rural feel of the village.</p> <p>Back in 2014, I objected to the Ridgeway Farm planning application for 29 nine houses when it was submitted to (and rejected by) Wiltshire Council and to my mind, the principle objections remain the same:</p> <p>The scale of the development - it was much larger than previous developments in the village.</p> <p>It was outside the designated red line settlement boundary and</p> <p>Its likely impact on the local infrastructure, specifically</p> <p>the likely increased traffic on Tetbury Lane;</p> <p>the impacts on already overburdened drainage and sewerage systems and</p> <p>oversubscription of Crudwell Primary School.</p> <p>I did, like many other parishioners, support the present development of 10 houses on the footprint of the old farm yard as it is certainly better than what was there before, it made good use of an existing "brown field" site and was of a scale consistent with other recent developments in the village.</p> <p>Against this backdrop, I was staggered to see the allocation of an additional 40 houses on this site which was previously deemed unsuitable.</p> <p>I also do not think that the allocation is justified when you look at your own guidance or notes within the Site allocations Plan. This states that housing sites will only be allocated where there is a strategic priority to do so. From the data available, the Site Allocation Plan currently results in an oversupply of some 4,300 dwellings to 2026 when you take into account past completions with deliverable commitments and windfall sites; even excluding windfall sites, the oversupply is still 2,200 across the housing market area. More specifically, the Site Allocations Plan results in an oversupply of homes in the Malmesbury Community Area; Wiltshire Council also has a history of oversupply of dwellings - in eight of the last ten years, more homes have been built than planned and over that period the over supply has been over 140% of target.</p> <p>On that basis there is no strategic need or justification to allocate new homes in Crudwell and the Draft Site Allocations Plan should not do so. I am also concerned that the site size / boundary of the Ridgeway Farm Development encompasses an area far greater than is required - even for 40 homes - so I question why that is the case and would like it reviewed.</p> <p>As there is no immediate strategic need for any housing allocations at Crudwell, I would much rather see the Neighbourhood Plan group consult and engage with the local community and businesses to determine the scale and type of housing need in Crudwell; to examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very</p>		

Appendix Q - Schedule of representations

	<p>busy - particularly joining the A429 - and the local school, which is at capacity. The consultation will also help determine from local businesses what their needs might be to enable them to sustain and expand employment opportunities going forward.</p> <p>Policy 1 of the Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", given that we have circa 250 homes in Crudwell, I do not see how an additional 40 homes on top of the 10 already being built - a staggering 20% increase overall - even falls within Wiltshire Councils own Core strategy.</p> <p>As I noted at the start of this email, I have watched this village grow over the last 27 years to the point now where we have a viable and thriving Pre-School Group, a thriving and excellent school, a fabulous Village Hall that we funded through community events that is without debt and thriving, we have an all weather sports facility, upgraded play area and outdoor gym! All this has added too, rather than detracted from, the character and feel of the village. This site allocation if allowed to stand would, in my opinion, completely change the character of the village and undo many years sensible and sensitive development supported by the Parish Council and the planning teams at Wiltshire Council. I am not anti-development but I do favour sensible, incremental development.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Crudwell still has severe flooding problems which have not yet been completely addressed, it remains a major concern to people who live in properties around the Swillbrook which runs through the centre of the village. Many have experienced significant damage to their homes in recent years both through surface water and raw sewerage and I believe surface water from the proposed site would only make this situation worse. Many homes - including in The Butts estate where I live, already need non-return valves to stay safe from sewerage flooding until the excess over capacity subsides. I believe that sewerage frequently exudes from all the manhole covers at the end of Tuners Lane due to the lack of Pumping Station capacity, even during only moderate rainfall.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We wish to register our OBJECTIONS to the proposal to build 640 new houses on the flood plain, south of the Netherhampton Road, Salisbury, and 100 houses on the north side.</p> <p>TRAFFIC</p> <p>We live on Harnham Road and traffic is already a major problem - the road being used as a 'rat run' by traffic, including many heavy lorries, between the A30/A303 and roads south. This road becomes particularly clogged at 'rush hour times' with queues from the Harnham Gyratory backing up for half a mile; with resulting pollution and making it almost impossible to cross the road safely or to get our car out at those times. Traffic capacity in Harnham Road was assessed as at "maximum" capacity in 2011 (Atkins' Transport Strategy for Salisbury) and the volume of traffic has since increased. To add 740 house with, inevitably, at least 740 more cars seems irresponsible, to say the least.</p>

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		5.110 Yatton Keynell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Paragraph 6: The soundness of the Wiltshire Housing Site Allocations Plan: Presubmission draft plan (the "Plan") Summary Paragraph 5.110 of the Plan states: "A woodland corridor along the western boundary [the "Woodland Corridor"] should be retained as a wildlife corridor ... Access would be taken from Farrell Fields and the possibility to link to adjacent footpaths should be explored" (own emphasis added). 2. I understand from attending Parish Council meetings over the summer of 2017 that there has been some uncertainty regarding the use of the Woodland Corridor. 3. In my opinion, unless the Woodland Corridor is retained, the Plan is not sound as if the Woodland Corridor is used for vehicle access this would cause irreversible damage to the environment, and most likely be contrary to national environmental and sustainability policies. The environmental importance of the Woodland Corridor 4. The Woodland Corridor: a) Lies very close to an Area of Outstanding Natural Beauty boundary. b) Has the single largest concentration of mature trees within the village and mature hedgerows running along both sides, which include a diverse range of native trees and plants. c) Provides an important nesting, feeding and breeding habitat for wildlife, including bats and owls (including potentially protected bats and barn owls). d) Provides habitat connectivity from the main village to the open countryside. 5. If the Woodland Corridor was to be used for vehicle access to the new housing development, I believe that all the trees and hedgerows along the Woodland Corridor would have to be removed to make room for a road. Such a loss of mature trees and hedgerows would be irreversible and have a severe adverse impact on wildlife. Further reasons for retaining the Woodland Corridor 6. In addition to the environmental importance of the Woodland Corridor, in my opinion it must not be used for vehicle access for the following reasons: a) It is too narrow (even if the trees and hedgerows were removed) for two lanes of traffic. b) Numerous roads and entrances already connect to the main road very close to the Woodland Corridor, including the school entrance (which is only metres away from the Woodland Corridor), Blacksmiths Close, Farrells Field, and a farm track opposite the Woodland Corridor. It would be very dangerous to have a further road connecting to the main road at this location. c) The Plan as currently drafted states that the Woodland Corridor should remain. Further, it expressly refers (elsewhere in the Plan and in supporting documents) to points of access. If the Woodland Corridor is in fact removed, this would give rise to legal issues as the Plan is progressing on the basis that the Woodland Corridor should be retained.			

Appendix Q - Schedule of representations

	<p>d) I understand from Parish Council meetings that it is uncertain who owns the Woodland Corridor. Therefore, there may be issues regarding ownership and legal entitlement to create a road.</p> <p>e) The main road at the point at which the Woodland Corridor meets it is already prone to flooding. If the Woodland Corridor was to be made into a road this would likely cause a flooding risk.</p> <p>Possibility of using the Woodland Corridor as a footpath</p> <p>I understand from the Parish Council that it is likely to assert that the Woodland Corridor should be used as a footpath. I would support this proposal, subject to the results of any sustainability studies and provided that any street lighting used is appropriate to avoid creating unnecessary disturbance to nocturnal wildlife.</p> <p>Paragraph 7: Suggested revised wording for the Plan.</p> <p>For the reasons stated in my response to paragraph 6, in my opinion paragraph 5.110 of the Plan should be amended as follows.</p> <p>The following words should be removed: "A woodland corridor along the western boundary should be retained as a wildlife corridor ...</p> <p>The replacement words should be as follows: "A woodland corridor along the western boundary must be retained as a wildlife corridor and must not be used for vehicle access" (changes shown in bold).</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We wish to register our OBJECTIONS to the proposal to build 640 new houses on the flood plain, south of the Netherhampton Road, Salisbury, and 100 houses on the north side.</p> <p>TRAFFIC</p> <p>We live on Harnham Road and traffic is already a major problem - the road being used as a 'rat run' by traffic, including many heavy lorries, between the A30/A303 and roads south. This road becomes particularly clogged at 'rush hour times' with queues from the Harnham Gyratory backing up for half a mile; with resulting pollution and making it almost impossible to cross the road safely or to get our car out at those times. Traffic capacity in Harnham Road was assessed as at "maximum" capacity in 2011 (Atkins' Transport Strategy for Salisbury) and the volume of traffic has since increased. To add 740 house with, inevitably, at least 740 more cars seems irresponsible, to say the least.</p>

Comment ID:	<a href="#">1310</a>	<b>Consultee</b> Mr Adrian Rickett  <b>Person ID:</b> 1128369	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> Yes
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7 Land East of the Dene		Justified
				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent – The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection. I feel that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, for development within Warminster. This site can take the perceived increase in housing numbers.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for consulting Sport England on the above named documents. Please find herein our formal comments for your consideration. Sport England has an established role within the planning system which includes providing advice and guidance on all relevant areas of national, regional and local policy as well as supporting local authorities in developing the evidence base for sport. Sport England aims to ensure positive planning for sport, enabling the right facilities to be provided in the right places, based on robust and up-to-date assessments of need for all levels of sport and all sectors of the community. To achieve this our planning objectives are to seek to PROTECT sports facilities from loss as a result of redevelopment; to ENHANCE existing facilities through improving their quality, accessibility and management; and to PROVIDE new facilities that are fit for purpose to meet demands for participation now and in the future. We work with the planning system to achieve these aims and objectives, seeking to ensure that they are reflected in local planning policies, and applied in development management. Please see our website for more advice: <a href="http://www.sportengland.org/facilities-planning/planning-forsport/">http://www.sportengland.org/facilities-planning/planning-forsport/</a> Site allocations</p> <p>No sites including playing fields should be allocated for development if this would include the loss of playing field or prejudice the use of the playing field (I have not identified any sites in the document where this would appear to be the case). <a href="http://www.sportengland.org/facilities-planning/tools-guidance/design-and-costguidance/other-design-guidance/">http://www.sportengland.org/facilities-planning/tools-guidance/design-and-costguidance/other-design-guidance/</a></p> <p>Thank you once again for consulting Sport England.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The B3098 is a well-used road and a major junction will cause significant delays and increase the risk of accidents. The development does not have the physical capacity to accommodate the amount of vehicles that will be owned by the new residents. This will cause congestion on the main road – B3098 – and overspill into the surrounding roads and residential areas. The congestion will have an extremely detrimental effect on the village – 1 badly parked car can cause traffic jams up to 10 cars long so the impact of up to an additional 80 cars will be catastrophic to the peace and tranquillity, road safety, and air quality of the village.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		In 2014, Wiltshire Council published the results of the Bratton Parish Housing Needs Survey. The aim of the survey was “to investigate the need for affordable housing among local people (or those who have a need to live in the parish or the locality) of Bratton.” The survey recorded a “very good” response rate of 198 replies (35.9%). Of the 198 replies, 11 respondents indicated their need for additional housing in Bratton. All declared a local connection to Bratton, and the most popular reason given for needing to move was in order to move on from living with families and achieve independence. An online search shows 54 houses available in Westbury and a 3-mile surrounding area, ranging from 1 bedroom to 3 bedrooms – all under the national average price. There is NO NEED to build new developments, as there is already more property available than is being proposed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Whilst I appreciate the need for suitable housing in the local area, I have several concerns regarding this proposal. The access onto the B3098 will create a safety hotspot where you have a large number of vehicles trying to enter/exit onto an already busy road. Furthermore, the road is narrow and will struggle with the additional number of cars. Access onto Court Lane cannot be made effectively. Parking is very often insufficient in housing developments. Overflow vehicles will then create a further safety hazard and stop traffic flow on the B3098.</p> <p>Widen and improve the B3098.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>In the case of the WI allotments, in Appendix 3 map grid H6, the well-used allotments are bounded on west, east and south sides by the built environment. To the north, half the boundary consists of an open field and the built environment to the east extends well north of that northern boundary. There is a sense that one is on land within the settlement and not on land more related to the open countryside. As a WI allotment holder I can personally confirm this viewpoint. The boundary change methodology therefore does not stand scrutiny</p> <p>The Seend Lye Recreation Field (SLRF), now excluded from the Seend large village settlement by the proposed boundary change, has been part of the settlement since the 1960s. The SLRF is enclosed on three sides by the built environment of the settlement. The SLRF has constructed upon it a cricket pitch, 2 tennis courts, a children's play area, an equipment store and a concrete pad for cricket net practice. All of these features are said, by the methodology, to be "more related to the open countryside" than the settlement is patently not the case due to the very recreational nature and physical location of these facilities. Furthermore, when standing on the SLRF one has the sense of being in the settlement and not in the open countryside or anywhere related to the open countryside. The Seend WI considers that both recreational areas, the WI Allotments and the SLRF, must be retained as part of the Seend settlement, within the settlement boundary.</p> <p>The change necessary to achieve consistency and accuracy is to do nothing and leave the Seend settlement boundary unchanged but subject to review by the forthcoming Seend Neighbourhood Plan.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>INSUFFICIENT TRANSPORT &amp; GREEN INFRASTRUCTURE</p> <ul style="list-style-type: none"> <li>• Para 5.128 of the Draft Allocation Plan says: “The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS”. This is simply not true.</li> <li>• The “Salisbury Transport Strategy” (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</li> <li>• Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations:</li> <li>• “Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy.”</li> <li>• It should also be noted that such “Salisbury Transport Strategy” as exists is not detailed and has never been subject to public consultation or formal adoption.</li> <li>• Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</li> <li>• We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague “solutions” should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</li> <li>• There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</li> </ul>				

Appendix Q - Schedule of representations

	<ul style="list-style-type: none"> <li>• I feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</li> <li>• Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</li> </ul>

		<b>FLAWED PROCESS</b>  <ul style="list-style-type: none"> <li>• We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</li> <li>• The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</li> <li>• The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</li> <li>• The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</li> </ul>

		VISUAL AMENITY / HERITAGE LANDSCAPE  • The proposed sites along the Netherhampton Road were previously removed from consideration in the Wiltshire Core Strategy, at least partly because of the negative impact on the unique view of the city and the cathedral spire from the south and west. In assessing the propose sites the planners have given no serious consideration to the severe impact that the proposed development would have on what is a priceless landscape and heritage asset.  In fact much more could be made of the recreational value of this landscape in terms of footpaths and cycle ways which would allow more people (both local and tourists) to enjoy the stunning views of the City and Cathedral.  The local Scouts use this area regularly for hikes and navigation exercises.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>We would like to add our objection to the additional 40 homes proposed on the above site. As well as the obvious impact such a large increase in houses in the village would have on the school etc one of my main concerns is the traffic on Tetbury Lane. As it is planning was given for a pig farm at Cheglow Field farm . This has increased the volume of large vehicles and in addition we still get very large vehicles on route to Melcourt Industries which is also on Tetbury Lane. Sat nav gives the most direct route from the A429 to Tetbury ( and Melcourt ) down Tetbury Lane . It's a Lane !! Not a road and is single track most for several miles turning right out of Ridgeway . Turn left out of Ridgeway and again it's single track up to the Dawneys and then not very wide up to the main road .</p> <p>In addition a large quantity of heavy farm vehicles use the lane , understandable as this is a farming area but the size of these leave little room for those on foot . As a regular walker in both directions any increase in the volume of traffic would be unacceptable and dangerous and as it stands the extra 10 houses will add to this risk. Crudwell is a village , Tetbury Lane is a Lane , surely sites can be found with better access to main routes . The proposed development is on farm land , let's hope it stays that way and not ruin the present amenities to satisfy the greed of landowners and developers in an area clearly not suitable for an extra 40 homes Let's hope common sense will prevail.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	The Community Area Topic Paper – Salisbury				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Introduction</p> <p>The Wiltshire Housing Allocation Plan, published in June 2017, raises various points of concern, particularly with regard to the proposed developments at Netherhampton Road, Salisbury. This commentary is submitted on behalf of the South Wiltshire group of the Campaign to Protect Rural England.</p> <p>The Community Area Topic Paper – Salisbury, part of the Pre-submission draft plan, indicates that the indicative residual housing requirement for Salisbury is 173 dwellings [page 10, para. 2.9, table 2.2]. Two sites in Netherhampton Road are identified as suitable for housing development, and labelled as ‘more sustainable’, viz. site S1027 – ‘North of Netherhampton Road’, and site S1028 – ‘Land at Netherhampton Road’ [page 16, para. 5.12, table 5.2]. However, the paper argues “... for a more generous supply of land than is required to meet the residual housing requirement, because of delays in delivering another housing site in Salisbury”, the site in question being Churchfields [page 18, para. 5.21]. The areas of S1027 and S1028 are 5.64 hectares and 9.63 hectares respectively [page 75, appendix G]. The document states that there will be a need to establish a new primary school, and that site S1027 will meet that need [page 19, paras. 5.23 and 5.27], and that the capacity for new dwellings at S1027 is 100, and at S1028 is 640, far in excess of the indicative residual housing requirement of 173, and indeed of the number of dwellings initially proposed for this site (400) when the South Wiltshire Core Strategy was under discussion in 2010 [Wiltshire Council Local Development Framework: South Wiltshire Core Strategy - Proposed Submission Draft (DJM/CS/Rev 12), page 54, para. 7.10, July 2009]. It is accepted that there may be adverse effects at S1027 in respect of heritage, landscape, biodiversity, flood risk and pollution [page 20, para. 5.34], but it is asserted that these adverse effects “... are relatively minor and can be resolved by straightforward mitigation measures” [page 20, para. 5.35]. In respect of S1028, it asserts that “There are no overriding environmental constraints that cannot be mitigated through onsite measures” [page 22, para. 5.36]. The document goes on to state that “Potential adverse effects, in terms of impacts on sewage treatment capacity and impacts on the highway network are considered capable of being averted. A refresh of the Salisbury Transport Strategy can occur alongside a detailed Transport Assessment to address the site’s traffic impacts”, and that “therefore a specific viability assessment is necessary” [page 22, para. 5.37].</p> <p>There are serious omissions here. No attempt has been made either to identify with precision the nature of possible adverse effects or environmental constraints, or to quantify their scale, or to detail what “straightforward environmental measures” might be envisaged. As for the “... refresh of the Salisbury Transport Strategy” and the proposed “detailed Transport Assessment”, it is not clear how radical a ‘refresh’ is intended.</p> <p>When this matter was previously considered, as part of the Examination in Public which was part of the consultation exercise for the development of the South Wilts. Core Strategy, it became clear that there were considerable problems with the Salisbury Traffic Model on which the development of such a strategy was to be based. It was made clear then that there was no intention to revisit the model at that time, and no indication that it has been revised since then. The next section of this document addresses the problems of the traffic model.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>H3.1 and H3.3 are unsound because</p> <p>Traffic</p> <p>Salisbury Transport Strategy “measures” would need to include a new bridge over the Avon to accommodate the extra traffic. This is not proposed and all bridges carrying traffic north in the morning and south in the evening are at capacity. Cf – 2011 study showed Netherhampton Rd incapable of sustaining more cars. Earlier development turned down for this reason. No link to major trunk road available without crossing these bridges. Not possible to link one to development infrastructure. Brunel Link and Harnham Relief Rd not going ahead. Look to build away from the flood plain, not disgorging 1,000 cars twice a day onto a B road with bridges at both ends (even a link to Shaftesbury Drove will only be a diversion back to Coombe Rd unless everyone is travelling to Dorset!) The policy obligations can be better met by building near the park and rides in Salisbury or for a new garden town for the whole of Wiltshire near A303. Proper consultation over changes to infrastructure which should be specific, detailed, achievable, measurable and timely. These current documents lack specifics. The council needs to demonstrate that residents lives will not be adversely impacted by gridlock or their homes flooded (more often). A plan linking to major road systems north and south would be more sound.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Mitigation measures in respect of site S1028 are listed in Table G.4, which summarises pp 83-88 of Pre-submission draft plan: Community Area Topic Paper – Salisbury. Once again, there are no specific plans, only aspirations and platitudes. For example, the impact on biodiversity will be mitigated by provision of alternative public open spaces, but with no indication as to where these might be. We are advised that the presence of badgers requires assessment, but we are not told what the expected impact of the proposed development on the badger population is expected, or by whom this assessment will be done, or when. We are told that there will be loss of high quality agricultural land, and that development of the site should be located so as to minimise this. Again, there is no specific indication as to how this might be achieved.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Most importantly, adverse impacts on the transport network, it is argued, could be addressed by developing "...the master-planning of this site ... in parallel with a refresh of the Salisbury Transport Strategy". However, since there is no certainty that the revision of the transport strategy could produce the desired mitigation of the impact of the proposed development on the transport network, it is unsatisfactory to do this in parallel with the master planning of the site. It should really be completed first

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The impacts on transport are particularly serious, and there is no accurate basis for the assertion that they are capable of mitigation. The Salisbury Traffic Model is deeply flawed, and likely to lead to erroneous conclusions. It should be remembered that, at the time of the Examination in Public for the South Wiltshire Core Strategy, the Harnham Residents Association arranged a 'drive-in' during the morning rush hour to attempt to mimic the impact of the much smaller development then proposed for Netherhampton Road on the traffic situation, The result was chaotic, with enormous queues building up on and around the Harnham Gyratory.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	In principal, the development of a greenfield site for no other reason than that there have been delays in making a brownfield site available is entirely wrong. It would be far better to concentrate on freeing up and developing the brownfield site in question, rather than destroying permanently an important rural greenfield site on the edge of the city. To permit urban sprawl of this nature simply to overcome a short term planning glitch is completely ill-conceived, and is neither justifiable nor sustainable.

Comment ID:	<a href="#">1370</a>	Consultee E Lane  Person ID: 1128696	Agent  Person ID:	Do you consider the draft WHSAP is legally compliant?	
				Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Contradictions in the Strategy                      A core strategy or local plan is considered "sound" when it is consistent with national policy.                      Paragraphs 72,111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide:                      The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.                      I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p>

Further access points, even with tightened speed restrictions would only make matters worse. Also, sites at Church lane, Southwick Court and Old Brickfields are being considered as they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles) No evidence has been provided that this would be the case. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The Parish Council also wishes to offer two comments on Appendix A to the Salisbury Community Area Topic Paper. Settlement Boundary in the vicinity of Hampton Park, Bishopdown Farm and Riverdown Park. The Council is pleased to note that the change proposed in 2015 has been modified and is now restricted to the boundary of the dwellings in these areas. Settlement Boundary in the vicinity of Old Sarum. The developed areas both north and south of The Portway are seen to form part of the Salisbury Settlement Area. This surely cannot be correct as this settlement falls both within the Parish of Laverstock and Ford as well as the Southern Wiltshire Community Area. This area at Old Sarum forms an 'island' which is well separated from the main body of Salisbury Settlement Area and, therefore, it is not logical for it to form part of this. Why is this settlement not identified within the Southern Wiltshire Community Area Topic paper? The document already identifies boundaries for 7 separate settlements and an Old Sarum settlement should form the 8th.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Laverstock and Ford Parish Council note that the Draft Plan allocates 910 dwellings in the South Wiltshire Housing Market Area against the minimum requirement of 594 to supplement the existing Wiltshire Core Strategy. The Parish has been subjected to some 2600 units being either built, or planning permission granted to be built, over the last 15 years. Furthermore, the Parish Council supported a planning application for development at Longhedge for 673 dwellings - 223 more than called for in the Core Strategy. The Parish Council, therefore, believes strongly that it is unreasonable to consider any further development within the Parish boundaries and is pleased to note that the Draft Plan supports this view.

Comment ID:	<a href="#">1391</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Peter Craft	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.11 The Street, Hullavington			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	As a fairly new Resident in Hullavington, we have already noticed a series of new Property being built in this beautiful village. We were aware that, despite many objections, a proposed development for 50 houses was passed by the Council we would strongly object to a further 20 houses. This village just isn't big enough to take all these extra properties - we only have one small shop and one school. There is enough traffic going through the main street which is fairly narrow in places and a further possible 50 or even 70 vehicles would make things worse. Living in the centre and fairly close to the Street, we see traffic passing through at totally unacceptable speeds.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>You should not just be allocating whole sites that have been submitted to you via the SHLAA and the private sector. As a representative of the community the council should be undertaking its own proper site assessments and evidence gathering to drill down and allocate only the amount of land required and needed now not the amount proposed by a house builder (30 ha). This is a flaw in the process and should be rectified for your submission draft.</p> <p>Due to the above [other representations] the policy is therefore not consistent with the NPPF.</p> <p>Reduce the site area to represent the amount of development you want to allocate to make the plan effective rather than the area of land the developer wants allocation. This is to ensure there are no surprises to the community later on as the site as allocated could probably fit up to 1300 houses on it.</p> <p>Consider all types of development, that could also result in reduced transport movements eg. small supermarket.</p> <p>Ensure good design in keeping with Harnham village.</p> <p>The plan is not fully justified and therefore not effective, positively prepared or consistent with national policy for reasons expressed above.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>· Rather than just assessing housing, you should be looking comprehensively at Salisbury, including community requirements. For example, in order to go to the supermarket every resident in Harnham has to travel through the Harnham Gyrotory system. If a small supermarket (say 1,200 sq m) was also identified on a site such as this, this could reduced substantially traffic movements through the gyratory and also serve residents in Wilton.</p> <p>Due to the above [other representations] the policy is therefore not consistent with the NPPF.</p> <p>The plan is not fully justified and therefore not effective, positively prepared or consistent with national policy for reason's expressed above.</p>

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>H3.1 and H3.3 are unsound because</p> <p>Traffic</p> <p>Salisbury Transport Strategy “measures” would need to include a new bridge over the Avon to accommodate the extra traffic. This is not proposed and all bridges carrying traffic north in the morning and south in the evening are at capacity. Cf – 2011 study showed Netherhampton Rd incapable of sustaining more cars. Earlier development turned down for this reason. No link to major trunk road available without crossing these bridges. Not possible to link one to development infrastructure. Brunel Link and Harnham Relief Rd not going ahead</p> <p>Look to build away from the flood plain, not disgorging 1,000 cars twice a day onto a B road with bridges at both ends (even a link to Shaftesbury Drove will only be a diversion back to Coombe Rd unless everyone is travelling to Dorset!)</p> <p>The policy obligations can be better met by building near the park and rides in Salisbury or for a new garden town for the whole of Wiltshire near A303.</p> <p>Proper consultation over changes to infrastructure which should be specific, detailed, achievable, measurable and timely. These current documents lack specifics.</p> <p>The council needs to demonstrate that residents lives will not be adversely impacted by gridlock or their homes flooded (more often).</p> <p>A plan linking to major road systems north and south would be more sound.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.11 The Street, Hullavington			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Firstly, there was a long process followed to come up with the village area plan of 50 houses, which I understand was agreed by Wiltshire council. I do not like the principle that a developer can immediately come along and undermine the area plan. I already felt that the village plan of 50 was a large expansion on top of all the building that has recently gone on which pre-dated the plan. However I reluctantly accepted this as inevitable. The expanded proposal of 70 houses is going too far, will lead to even more cars etc in the village, and further expands the village footprint into the field with the brook, affecting existing houses at the end of Newtown.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to add my voice to those raising objections to increasing the size of the proposed housing development in Hullavington village, on the grounds that 70 new houses would indeed represent an over-development.</p> <p>There should be concern about the effects of development on the land drainage to the Gauze Brook. I have used the footpaths through the fields that adjoin the school playing-field over a number of years, and I know the area to be marshy, and waterlogged, extensively so in the winter and in periods of high rainfall.</p> <p>I hope that provision will be made for the conservation of mature trees on any green area considered for the building of houses.</p> <p>I share concerns about the inevitable, undesirable increase in traffic, through the village itself and on our surrounding minor roads; also about how over-development would change the character of the village.</p> <p>While some further development may have to be accepted as a result of Wiltshire Council's agreement in principle to the proposal, I consider that 50 new houses should be regarded as the absolute maximum number that should be approved.</p>

Comment ID:	<a href="#">1404</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr and Mrs Peter and Mariette Stott	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.11 The Street, Hullavington			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		We are Hullavington residents and are keen to conserve the character of the village - we feel that to exceed the already targeted expansion (of fifty dwellings) will be detrimental to its way of life, stretch the infrastructure and overload access road capacity. The impact of Dyson development of the airfield is in addition to this.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Too many too itemise			Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	To use the vernacular, it appears to have been "written on the back of a fag packet"! Mistakes were made previously in estimating the contribution which the development of Castle Mead would make to the area's housing needs. These were based on assumptions rather than fact, with the result that it is now said that fewer houses can be built there within the required timescale. This should have been foreseen as a possibility (I understand there are conservation issues) and allowed for. The current proposals in the Housing Site Allocation Plan display a similar lack of accuracy and flexibility and can therefore be expected to fail at some stage during its implementation. In order to make the draft Wiltshire Housing Site Allocations Plan sound, it needs to be totally scrapped and completely re-written from scratch - this time committing more care and intellectual vigour to its construction! Plenty - but I'll keep them for later!. I am disappointed that a project of such importance should take so long to produce with ultimately unworkable proposals.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	I do not necessarily wish to speak but I am keen to observe the discussions at first hand.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Plan also displays a lamentable lack of lessons learned from previous debacles. When the building of Elizabeth Way was being discussed initially, objectors pointed out the risk of flooding - both (a) because of the lie of the land and its marshy consistency and (b) because, the more marshy land is concreted over, displaced water will affect other areas and property. As an example my own house, near the top of Horse Road, has experienced two episodes of serious flooding since work on the Hilperton Relief Road commenced. It therefore follows that, the more marshy flood plains are concreted over, the more risk there is to existing properties. Ultimately, the displaced water has to go somewhere. In order to make the draft Wiltshire Housing Site Allocations Plan sound, it needs to be totally scrapped and completely re-written from scratch - this time committing more care and intellectual vigour to its construction! Plenty - but I'll keep them for later!. I am disappointed that a project of such importance should take so long to produce with ultimately unworkable proposals.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows: Contradictions in the Strategy A core strategy or local plan is considered "sound" when it is consistent with national policy. Paragraphs 72,111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide: The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment. I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We are new to the village having only been here less than 12 months and living in a farm yard development which has added further housing to the village. When we first decided to purchase our house at 11 Old Farm Close we popped into a planning meeting in the village hall which was considering the various options for additional housing to meet the Wiltshire Council's 10 year plan requirements. We were impressed with the professional approach of all concerned and noted where the various options were for additional housing around 120 across 5 local villages. There did not appear to be any suggestion that as many as 70 new houses were needed for the area therefore are quite concerned that this number has been dropped into the equation. I believe figures of between 40 to 50 were mentioned. Thus we would support any cause which would campaign to limit the number of houses on the proposed development are to a maximum of 50. Some of which must be social housing to help the younger generation to find affordable accommodation.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		We are in full support of the need for 50 houses to be built in the village and, although nobody likes having building near then, we do support the field designated by Wiltshire Council as a suitable site. That having been said, we are completely against the extension of this building programme to include an extra 20 houses for the following reasons: <ul style="list-style-type: none"> <li>• The Neighbourhood Development plan called for the new housing to be split between the S Large Villages in the Chippenham Community Area and Hullavington having 50 new houses means we are accommodating more than an equal share already – 183 needed between all S large villages.</li> <li>• The extra 20 houses are purely being added by the building company to extend the profit they can extract from this site. There is not identified need within the Neighbourhood Development plan.</li> <li>• They are saying they will provide extra foot paths but we already have over 30 registered WCC paths extending from the village so a little loop around a field will not in effect add anything of value.</li> <li>• The field already has a water meadow at its' bottom so their statement about adding this is questionable. Far from developing an "Environmental" addition with the "Park" they will be disrupting the site with their building and replacing the "natural" state with a manmade solution to their water drainage issues.</li> <li>• Access onto "The Street" is already going to be a challenge for them with the original 50 house let alone extending it to 70. It is already a narrow and dangerous entrance to the village.</li> </ul> To sum up, we fully support the building of 50 houses on the Wiltshire Council suggested site but are also fully AGAINST the extension of this development to 70 houses disrupting the adjacent field.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		The proposed development will be on water meadows. The Environment Agency spent millions of pounds a few years ago on flood defences in Harnham (five rivers run through Salisbury). If this development went ahead (the houses being built on the wrong side of the bund) all the runoff from so many roofs and drives would undermine all that work and cost.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>2: New Developments and its effect on flood risk to existing property                      This is a paragraph from RTPi Southwest Division study regarding flooding and flood plains.                      New development both in and outside of the floodplain can have an effect on flood risk and flood levels elsewhere. The effects are summarised as follows: Development in the floodplain could be at risk from flooding itself. In times of flood, development in the floodplain may obstruct the flow of flood water. This can increase flood levels upstream thus increasing upstream flood risk. Development in a floodplain may reduce the amount of land available for flood water storage. Loss of flood water storage reduces the ability of the floodplain to store floodwater which results in an increase in downstream levels, thereby increasing downstream flood risks. Surface water drainage from areas outside the floodplain can also have an effect on flood risk. In many cases development will result in an increase in concrete and paved areas, through which water cannot penetrate. Water therefore runs off these areas in greater volumes and at a quicker rate than previous, causing higher flows in rivers for shorter periods of time. This can result in an increased flood risk downstream. The alteration of flow patterns, with higher flow rates for shorter periods and reduced flows at normal times can dramatically alter the river habitat. Increased flow rates can cause erosion of riverbanks and beds, resulting in the deposition of material downstream. These changes can destroy habitats and alter the natural flora and fauna.                      This is a report from BBC news on Tuesday 28 February 2006                      Future flood defences on display A new underground pumping station, raised flood banks and new flood walls form the blueprint for future flood defence at Harnham, near Salisbury. An exhibition depicting the preferred option for new Environment Agency flood defences has opened to the public. Floods have affected the area regularly with problems reported in 1960, 1979, 1990, 1995 and 2000.                      In 1979 flooding affected 25 properties and in 1990 eight homes were under water with 19 more seriously affected.                      Studies by the Environment Agency show 340 properties are currently at risk from a severe flood, with a one-in-100 chance of occurring in any one year. The preferred option will involve raising existing flood banks at Waldrons Farm, Gypsy Lane and Middle Street Meadow, constructing new flood banks across Middle Street Meadow and the Recreation Ground, building flood walls around the Old Mill Hotel and in Town Path and constructing an underground pumping station in the Recreation Ground. "We have considered a wide range of factors including the height of the defences, effect on flood levels, opinions of local people and cost before coming to this proposal," said Nick Lyness, of the Environment Agency.</p>

		Mr T Wakeman	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1, H3.3 Netherhampton Rd Salisbury			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>S1027 and S1028 Netherhampton Road Salisbury Wilts</p> <p>We write to object to the proposals outlined in your draft plan.</p> <p>We all need houses or somewhere to live but at what cost. Anybody with knowledge of Harnham and particularly Netherhampton Road will tell you it's already very busy. A plan for 740 houses and industrial units (or maybe over a 1000 houses if the industrial units don't work out) will cause havoc unless some sort of better infrastructure is put into place.</p> <p>1: Transport</p> <p>The Netherhampton Road A3094 provides a half-hearted bypass to some of the worst of Salisbury's traffic, providing you are passing from the A30/A36 at Wilton to the A338/A354 to the south of the city, or vice-versa. It doesn't, however, miss out Wilton and the junction at Park Wall or the Harnham Gyratory in East Harnham where most bottlenecks occur.</p> <p>The increase of traffic from these new developments would have a very adverse affect on this already over populated road system. In our opinion a bypass would be needed to alleviate the problem or this side of Salisbury will become gridlocked.</p> <p>We have lived in Netherhampton Road for 28 years and seen some considerable changes in that time including the upgrading of the 83094 to the A3094 and a definite increase of traffic.</p> <p>Benefit</p> <p>Lastly who would benefit most from this development, the landowner, the developer, or the people who actually need these houses and the facilities that go with it.</p> <p>Wiltshire Council must take a strong hold as their failings in the past always come back to haunt them namely having a road to nowhere (now gone) and a ring road that splits a town in half.</p> <p>* Please Wiltshire Council look at the bigger picture otherwise Salisbury will become a place to avoid adversely affecting tourism and the local economy.</p> <p>My final note is if Salisbury's inhabitants were a pile of stones in the middle of a field and of some significance we would get a bypass but we're not we just live here and are obviously not that important.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1446</a>	<b>Consultee</b> Mr T Painter  <b>Person ID:</b> 901829	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Land at Shallowaggon Lane, Westbury (SHLAA Ref: 3445) Policy H2: we consider that the draft Plan should be making provision for additional housing growth in the Westbury Community Area on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026. There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative deliverable sites in Westbury, which is the next tier down in the Core Strategy settlement hierarchy. There is an unmet affordable housing need in Westbury which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing. There is no Neighbourhood Plan being prepared for Westbury. It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in the Westbury Community Area, that the subject site should be included as an allocation for circa 80-90 homes in the draft Plan. Site context: the subject site of approximately 3.8 ha comprises an arable field with defensible boundaries: Hawkeridge Road to the west; Shallow Waggon Lane to the south; the railway to the east, and a former railway siding to the north. The site lies immediately to the south of the Hawke Ridge Business Park strategic employment allocation, and is within an area that has been subject to significant change with new solar parks and other development proposals. The arable site is relatively flat and unconstrained. In landscape terms, the site is very well contained, and apart from the hedgerow boundaries there is very little ecological interest. There is a regular half hour bus service along Hawkeridge Road connecting to Westbury and Trowbridge. Our initial assessment of the site suggests that it could accommodate circa 80-90 dwellings also making provision of onsite public open space and strategic landscaping. The landowner would also consider a mixed-use scheme building upon the potential synergy with Hawke Ridge Business Park. Statement of Common Ground: the landowner confirms his willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that the landowner would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan. Policy H2: Wiltshire Council to allocate the subject site for circa 80-90 dwelling units as outlined in enclosed Site Location Plan (SHLAA Ref: 3445).

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Warminster site allocations and settlement boundary		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advise that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocate new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared- the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of The Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire, force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p> <p>The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Turnpike Field, Old Dilton Lane, Westbury (SHLAA Ref: 3375) Policy H2: we consider that the draft Plan should be making provision for additional housing growth in the Westbury Community Area on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026. There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative deliverable sites in Westbury, which is the next tier down in the Core Strategy settlement hierarchy. There is an unmet affordable housing need in Westbury which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing. There is no Neighbourhood Plan being prepared for Westbury. It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in the Westbury Community Area, that the subject site should be included as an allocation for circa 80-90 homes in the draft Plan. Site context: the subject site of approximately 3.3 ha comprises an arable field with defensible boundaries adjoining the southern edge of Westbury, and bounded by the A350 to the west, and Old Dilton Lane to the East. The site is relatively flat and unconstrained other than the mature trees and hedgerows on the boundary, and a small cluster of trees located centrally within the site. In landscape terms the site is very well contained. Preliminary advice from transport consultants indicates that a new roundabout access could be formed at the junction of the A350/Old Dilton Lane. In spatial terms, the site relates well to existing development to the north and east, and would represent a natural rounding-off of the settlement with potential to form a new permanent boundary to the south side of Westbury. The site performs well in accessibility terms lying approximately 1.2km from the Westbury Leigh Local Centre. There are existing bus stops immediately adjacent to the site, and a footway on the western side of the A350 which could be further enhanced by the proposals. Our initial assessment of the site suggests that it could accommodate circa 80-90 dwellings also making provision of on-site public open space and strategic landscaping. Statement of Common Ground: the landowner confirms his willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that the landowner would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan. Policy H2: Wiltshire Council to allocate the subject site for circa 80-90 dwelling units as outlined in enclosed Site Location Plan (SHLAA Ref: 3375).

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The figures in the paragraph 4.1table come from table 4.2 in Topic Paper 3. The 'minimum to be allocated' column of table 4.1 is the 'Indicative Remaining Requirement' column of table 4.2.</p> <p>The 'Indicative Remain Requirement' column only considers allocations and does not include any allowance for windfall (See Topic Paper 3 paragraph 4.13).</p> <p>In order to meet the Minimum Housing Requirement the Core Strategy not only used site allocations but also windfall (See Core Strategy paragraph 5.13). Therefore to be consistent to the original Core Strategy methodology to calculate the 'Minimum to be Allocated' figure an allowance for windfall should also be included.</p> <p>Using the anticipated windfall allowance for 2017-2026 (See Topic Paper Table 5.1) the 'Minimum to be Allocated' figures should be:</p> <ul style="list-style-type: none"> <li>- East Wiltshire HMA: -641</li> <li>- North &amp; West Wiltshire HMA: -1515</li> <li>- South Wiltshire HMA: -142</li> </ul> <p>Therefore, rather than needing to allocate additional housing sites, the figures above indicate that Wiltshire has already allocated more housing than is required to meet the Minimum Housing Requirement outlined in the Core Strategy.</p> <p>The delay in the Chippenham DPD examination meant that for a considerable period Wiltshire was unable to demonstrate a 5 Year Housing Supply, thereby allowing sites not originally allocated in the Core Strategy to be granted planning permission. Although some Core Strategy allocations have not yet reached the commitment stage, these have been more than compensated for by the unanticipated speculative allocations.</p> <p>The overall effect is that to meet the Minimum Housing Requirement of 41,100 houses (excluding 900 West of Swindon) shown in Core Policy 2 of the Core Strategy, Wiltshire is intending to increase this figure by 11% to 45,629 houses. Even without the allocations proposed in this DPD, the overall housing figure is 43,398, an increase of 5.5% over the Core Strategy figure.</p> <p>No evidence in terms of an update to the Strategic Housing Market Assessments has been provided to justify this increase.</p> <p>Wiltshire Council must reassess and update the Minimum Housing Requirement figures based on a consistent methodology outlined in the Core Strategy before allocating new sites and changing settlement boundaries.</p> <p>Any change to housing number targets thereafter should be based on an evidence based approach justifying an increase.</p>

<p>Policy H2: we consider that the draft Plan should be making provision for additional growth in the Trowbridge area on the following basis:                  The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026.                  There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative deliverable sites.                  The Housing White Paper (February 2017) seeks to diversify the supply of new housing in response to the dominance of the national / PLC volume home builders. The subject site is of a size that is suitable for development by a local / regional housebuilder.                  It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in Trowbridge, that the subject site should be included as a housing allocation for circa 24 homes in the draft Plan.                  Promotion history: This representation is submitted on behalf of Ashford Homes (South West) Ltd, a wholly owned subsidiary of the Doric Group, who are the freehold owners of land at Marsh Road, Hilperton. The subject site of 0.8ha is located on the northern side of Marsh Road as outlined in red on Drawing 1032/001 (enclosed).                  The site has been subject to a previous application proposal for 30 dwellings which was dismissed at appeal in August 2013 (LPA Ref: W/12/01840/OUT &amp; PINS Ref: 2192250). Subsequently, a lower density scheme of 24 units was the subject of a pre-application enquiry to Wiltshire Council (LPA Ref: 14/1887/PREAPP). This scheme was not progressed due to the location of the site adjacent to, but outside the settlement boundary, albeit that the site is fully contained by defensible boundaries on all sides. At a public consultation event in 2012 it was evident that there was widespread support for the principle of housing on this site.                  Representations have been submitted to the Regulation 14 version of the Hilperton Neighbourhood Plan. As drafted, the HNP is a 'restraint' plan, and is not seeking to make any housing allocations. We have attempted to engage proactively with the HNP Steering Group but no response has been received. In light of this, we consider that it would be entirely appropriate for Wiltshire Council to make provision of additional housing growth in Hilperton through the Housing Site Allocation Plan process.                  Design development: Ashford Homes have developed a full technical evidence base that can demonstrate that circa 24 dwellings could be accommodated on the subject site. In spatial planning terms, the site represents a natural rounding off of the settlement. The Council did not raise any technical objections to the previous planning application W/12/01840/OUT.                  Statement of Common Ground: Ashford Homes confirm their willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that Ashford Homes would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.                  Policy H2: to allocate land at Marsh Road, Hilperton for 24 No. residential dwellings and/or amend Hilperton's settlement boundary to include the site.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Access into site H2.2 should only be from the A 363. Access from Woodmarsh or Westbury Road would in effect link/combine the new housing directly with the established parts of North Bradley thereby undermining the objective of keeping the identity and character of the existing village separate and distinct. The interface between the new housing area and older properties along Woodmarsh is particularly sensitive and needs to be carefully designed to ensure the new and old are linked informally through opens spaces, footpaths and landscaping rather than by house boundaries and access roads.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Paragraph 4.7 indicates that main settlement areas were selected where land supply failed to meet the indicative levels set out in the Core Strategy. This ignores the fact, made clear in the Core Strategy (paragraph 4.30) and repeated in this document (paragraph 2.18), that the indicative requirement for each Community Area was determined to avoid an unbalanced level of growth and was not intended to be prescriptive.</p> <p>A housing requirement can only be meaningfully calculated in terms of a Housing Market Area (HMA) and to attempt to use the indicative requirement figures as a fixed requirement is meaningless. The only justification for selecting areas in this way would be if the housing requirement for a HMA has not been met. Using the Core Strategy methodology to calculate 5 year land supply, Wiltshire has exceeded the Core Strategy 'Minimum Housing Requirement' in every HMA.</p> <p>Wiltshire Council must reassess and update the Minimum Housing Requirement figures based on a consistent methodology outlined in the Core Strategy before allocating new sites and changing settlement boundaries.</p> <p>Any change to housing number targets thereafter should be based on an evidence based approach justifying an increase.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1459</a>	<b>Consultee</b> Hill Homes Hill Homes Development Ltd  <b>Person ID:</b> 900566	<b>Agent</b> Mr Steven Smallman Director  Pro Vision  <b>Person ID:</b> 1125375	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	4.3 - in relation to Devizes			Positively prepared	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Core Policy 12 requires approximately 2,500 new homes to be provided in the Devizes Community Area, of which about 2,010 homes should be at Devizes. This reflects the spatial strategy set out in Core Policy 1 and the role and function of Devizes as the only designated Market Town in the Community Area . Growth is to be concentrated at Devizes to support a sustainable pattern of development and in recognition of the capacity of the Town to accommodate further strategic development.</p> <p>However, Paragraph 4.3 of the draft HSAP explains that "In order to deliver the spatial strategy the priority for housing land allocations has been to focus on those higher tier settlements that have not yet met or contributed towards indicative levels of provision (Principal Settlements/ Market Towns and Local Service Centres)."</p> <p>The Devizes Community Area Topic Paper (June 2017) indicates that there is not an "indicative residual requirement" for Devizes to be delivered during the Plan period, because the "indicative requirement" is met by completions and commitments. The HSAP therefore proposes that no housing sites will be identified for allocation at Devizes, and the site selection process ended after Stage 1.</p> <p>[Representation inserts Table 2.2 of the Devizes Community Area Topic Paper, which can be seen in the attachment 'Rep 1459 (a)']</p> <p>A sizable proportion of the Commitments 2017 - 2026 are the site-specific allocations at Policy H3 of the adopted Devizes Neighbourhood Plan (2015). H3 allocates a total of 15 small/medium sized sites to accommodate 364 dwellings; for the most part within the Settlement Framework Boundary as it was defined by the Kennet Local Plan in 2004. Nine sites are considered capable of delivery in the period 2014- 2019, with the remaining six sites considered capable of delivery in the period 2019-2026.</p> <p>The analysis attached [table can be seen within the attached document 'Rep 1459 (a)] shows that of the 222 dwellings which the Neighbourhood Plan considered would be delivered by 2019, planning permission has been granted in respect of five sites delivering 121 dwellings. There is no recent planning history relating to the other four sites that would indicate that there is any likelihood of them being developed soon (or indeed at all). These sites should not be regarded as "deliverable". Furthermore, the planning history strongly suggests that none of the sites in the second phase (beyond 2019) are "developable".Indeed, one site, Browfort, now has planning permission for 55 "extra care" apartments - clearly a C2 use - which should not be included as contributing to the adopted Core Strategy's Housing Requirements.</p> <p>Overall the evidence suggests that the sites allocated in the Neighbourhood Plan are likely to deliver only 121 dwellings - a shortfall of 243 dwellings.</p> <p>It is therefore now abundantly clear that the HSAP should not rely on the adopted Neighbourhood Plan to deliver the key Core Policy objective of concentrating strategic growth at Devizes, particularly as the "indicative residual requirement" must be regarded as an absolute minimum (as the draft HSAP itself acknowledges at Paragraph 4 .2).</p> <p>If the Core Strategy's spatial strategy for the Community Area is to be delivered and the NPPF's objective to boost significantly the supply of housing (Paragraph 47) is to be met, the HSAP must allocate a site at Devizes to ensure that at the very least the minimum indicative requirement for the Town is delivered, and preferably that it is exceeded. By failing to do so, the draft HSAP has not been positively prepared and will not be effective.It is therefore not sound.</p>				

Appendix Q - Schedule of representations

	<p>Allocate a site Devizes that is deliverable (footnote 11 of the NPPF) and that can accommodate approximately 250 dwellings. We attach a Site Promotion Document [attached documents 'Rep 1459(b)] relating to land at Windsor Drive (in part, SHLAA reference 624). The SHLAA concludes that the northern part of the site now promoted is suitable for development, subject to potential constraints (the southern part was not previously assessed). Much of the site lies within the 20-minute walking distance from the Town Centre, which the Neighbourhood Plan identifies as being a key consideration in determining the most suitable locations for new housing. None of the site is designated as being of special environmental, visual or historic significance (see extract from WCC's online mapping below). [inserted map extract can be seen in the PDF attached to this document - 'Rep 1459 (a).]</p> <p>The Promotion Document demonstrates that the site has the potential to deliver between 250 and 300 dwellings in the form of a logical urban extension to Devizes to create a sustainable new neighbourhood. The site is well related to the existing pattern of development, with good access to local facilities and public transport routes. Development of the site provides the opportunity to enhance the eastern edge of the town, providing a substantial GreenInfrastructure link and landscape buffer to define the edge of settlement, between the open landscape of the AONB to the east and the town edge.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4715079 / 4715092</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The omission of Land at Windsor Drive Devizes raises substantial doubt about the soundness of the HSAP, because of the inadequacy of the Plan's housing provision (as it relates to the Devizes Community Area).</p>

Comment ID:	<a href="#">1465</a>	<b>Consultee</b> Mr and Mrs Miller	<b>Agent</b> Mr Chris Beaver Director	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 901952	Planning Sphere <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.14		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Proposed allocation: the proposed allocation of land at Court Orchard / Cassways under Policy H2 is supported in principle. This follows a collaborative approach that has been undertaken between the site owners and Wiltshire Council following the initial promotion of the site in 2015. Policy H2.8 and Paragraph 5.93: the land area extent set out in Policy H2.8 and Paragraph 5.93 is incorrectly stated as 1.35ha. Additional land to the western boundary will be required for site drainage and landscape mitigation. The correct extent of the allocation site is 1.61 as shown on the enclosed Site Location Plan (Plan Ref: 1136.011).  Fig 5.18: there is an error in the extent of the redline allocation site in Fig 5.18. a Corrected Development Plan Allocation Boundary is enclosed (Plan Ref: 1136.011).  Land ownership: the subject site is in the freehold ownership of Mr and Mrs Miller (acquired in 1975). We can confirm on behalf of the landowner that the subject site is available for residential development and that they will cooperate with the Council in respect of the site promotion in consultation with the local community.  Summary of planning and site promotion history:  The subject site has previously been considered for development following the submission of a planning application in 1993 with Parish Council support (LPA Ref: W93/0507), and representations that were submitted in respect of West Wiltshire District Plan 1st Alteration in 2003. In 2014 the landowner assembled a project team to review the potential of the site to come forward as an allocation. Since the previous consideration of the site, a hedgerow on the western boundary has been established and now forms a defensible boundary. The site is managed and has low ecological potential.  A landscape appraisal has been undertaken by Greenhalgh Landscape Architects. This appraisal has confirmed that with mitigation the site could be developed without causing harm to the wider landscape. Additionally, technical studies have confirmed that the site can be accessed by a simple priority junction from the B3098 with a full standard of visibility splays achievable in both directions. The new junction has can be designed in a manner that will reduce vehicle speeds into the village through the provision of a gateway of development on both sides of the road approach into Bratton.  The following technical evidence base has been prepared:  Topographical survey;  Landscape appraisal (GLA);  Access feasibility study (WYG); and  Site capacity assessment (Keep Architects)  Further detailed studies into heritage, ecology, drainage, and levels will inform the next iteration of the masterplan.  The site owners have also commenced the process of finding a development partner to assist the delivery of the site.  Statement of Common Ground: Mr and Mrs Miller are currently in the process of selecting a residential delivery partner, and will be formulating a vision for the site, which will be underpinned by an updated technical evidence base.</p>				

Appendix Q - Schedule of representations

	<p>It is proposed that a further pre-application enquiry will be submitted in the Autumn of 2017; and that a Statement of Common Ground will be agreed with the Council in advance of the publication of the 'Submission' version of the draft Wiltshire Housing Site Allocations Plan in 2018.                  Land at Court Orchard / Cassaways, Bratton Policy H2.14                  Policy H2.14, Fig 5.12, and Paragraph 5.116: the land area extent set out in Policy H2.14 and Paragraph 5.116 is incorrectly stated as 1.35ha.                  The correct extent of the allocation site is 1.61ha.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4715086 / 4728091 / 4728092</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Mr and Mrs Miller wish to be represented at the examination to assist the consideration of the technical issues, and to answer any technical or planning policy related queries that may be raised in the round table discussion by interested parties.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to object to the draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites, which have been put forward as preferred sites within the Housing Allocation Plan. My objections are as follows:</p> <p>Contradictions in the strategy  A core strategy or local plan is considered 'sound' only when it is consistent with national policy.  Paragraphs 72, 111, 156 and 157 of the National Planning Framework and Planning Guidance documents state that the local policy should provide:  The infrastructure required in the area, be drawn up over an appropriate timescale(15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.  I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site, however these will not be completed in time, and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brown field sites on the basis that they are within the existing settlement boundary. It is difficult to understand why 'green field' sites have been preferred to the many 'brown field' sites which exist within the town other than to placate potential developers.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Accessibility</p> <p>The A361 is prone to accidents both in 'the dip' where cars currently turn into the Country Park, as well as in the 30 mph limit zone further up the hill towards Trowbridge. Further access points, even with tightened speed restrictions, would only make matters worse. Also, sites at Church Lane, Southwick Court and Oldbrick fields are being considered on the basis that they would reduce traffic, as residents would walk into Trowbridge rather than using their own vehicles. No evidence has been provided to show that this would be the case. Since the majority of households have two cars there could be an extra 400 cars travelling along the already congested Frame Road at rush hour. The council's views that they can justify development here, as opposed to local villages, on the basis that it provides sustainable development is clearly in question. There is neither the infrastructure nor the setting for development on this side of town.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Background and planning history: Land to the north of east of Station Road is subject to a development plan allocation allocated in the adopted Wiltshire Core Strategy for housing as shown on Inset Map 14: Westbury. The site is allocated under Saved Policy H3 of the West Wiltshire District Local Plan 1st Alteration (2004), which allocated the application site for 90 dwellings. The allocation is carried forward under Policies CP2 and CP32 of the adopted Core Strategy. The allocation also falls within defined settlement boundary for Westbury under Policy CP1. Planning permission W/10/02479/FUL for 102 dwellings was permitted in November 2013. Although this permission has lapsed, Newland Homes have recently submitted a planning application for 88 homes, which is currently under consideration (Ref: 17/07548/FUL). Given that the principle of residential development of this site is subject to a development plan allocation in the Core Strategy, and a live planning application, we submit that the settlement boundary on the proposals map should be reinstated to its original alignment, as outlined in blue on Westbury Proposals Map for Revised Settlement boundaries. The settlement boundary on the proposals map should be reinstated to its original alignment, as outlined in blue on Westbury Proposals Map for Revised Settlement Boundaries.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site is not a suitable for a large housing development, as:</p> <p>The site is very prominently seen from the B3098, the main Westbury Road, as one enters the village – the site drops sharply away from this road before leveling out, so that the layout of any buildings, etc in the area could not be hidden or shielded from view.</p> <p>The whole area is in an area of outstanding beauty and this proposed development would impact very significantly on the views from the Westbury White Horse and the top of Salisbury Plain.</p> <p>The site would have an adverse effect on the conservation area of the village.</p> <p>The development would represent an over-development of the site and would have an adverse impact on local amenity.</p> <p>The Council should address sustainability issues and consider smaller units to be integrated into the existing infrastructure which would reduce the impact on the village and its community. This would also preserve the beauty of the whole area below the White Horse ridge.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The site is not a suitable for a large housing development, as: The development would have a detrimental impact on the already over burdened infrastructure and services of the village – water, drains, pre-school and primary school, GP surgery, shop. An extra 40 additional houses would bring major disruption and pressures to the whole community. In addition, the number of houses proposed is significantly over the number as assessed by the Parish Council's own Housing Survey in 2015 (8 dwellings). The Site Allocations Plan for Bratton seems also to be based on a misrepresentation of the number of houses in Bratton ie there actually less 520 houses, whereas the Council has referred to there being 819 houses!

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Access to the site from the narrow main road, B3098, would be difficult. The changes needed would in themselves make a significant impact on the village. The B3098 is very busy especially at each end of the day, with regular heavy traffic incl large lorries. The number of vehicles through the village can exceed 400 per hour as recorded by the village Speed Watch team

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Bratton does not need the proposed number of additional dwellings; it may be that Wiltshire has been required to identify sites for additional housing for people from other areas/parts of the country, but that alone does not justify the selection of Bratton to place them. The village would not be able to absorb the excessive number of adults and children that a housing development of 40 houses would bring. Based on Table E.1 in Appendix E (page 39) of the Wiltshire Council Site Allocation Plan (where it highlights that the village has experienced growth of 26 houses in the last 10 years), a further addition of 40 dwellings would mean more than a 17% increase in the total number of houses since 2007.</p> <p>The Council should address sustainability issues and consider smaller units to be integrated into the existing infrastructure which would reduce the impact on the village and its community. This would also preserve the beauty of the whole area below the White Horse ridge.</p> <p>The current plan seems to take a simplistic approach to try to place a large number of houses in an area which has been highlighted by the local owner, which had been purchased many years ago. The Council's own assessment of the area highlighted a number of sustainability problems. Instead, it is more important to pursue other potential sites for development within the existing settlement boundary to meet local need. For example, the field next to Peartree Orchard is one such area (which is owned by Bratton Parish Council, and which they have raised with Wiltshire Council). Additionally, there are currently planning applications under consideration for the replacement of Oxford House, The Butts, with four dwellings, and the much delayed completion of a 4-bedroom house on land next to 1A Lower Road.</p> <p>In addition, the number of houses proposed is significantly over the number as assessed by the Parish Council's own Housing Survey in 2015 (8 dwellings). The Site Allocations Plan for Bratton seems also to be based on a misrepresentation of the number of houses in Bratton ie there actually less 520 houses, whereas the Council has referred to there being 819 houses!</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H1; Greenacres, Green Lane, Devizes		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Policy H1: notwithstanding the adoption of the Devizes Neighbourhood Plan in 2015, and the progress that has been made in respect of housing delivery in Devizes against the Core Strategy's disaggregated targets for each community area, we consider that the draft Plan should be making provision for additional growth in Devizes on the following basis:</p> <p>The draft Plan has taken a minimal and conservative approach to new housing growth in the East Housing Market Area over the Core Strategy Plan period to 2026.</p> <p>The adopted Devizes Neighbourhood Plan is a restraint plan that does not propose any housing allocations.</p> <p>There is an unmet affordable housing need in Devizes, which can only be addressed by the provision of new housing.</p> <p>The Council should be working proactively with public sector organisations to release surplus land assets, which in turn will enable the proceeds to be re-invested in the provision of mental health services.</p> <p>The Housing White Paper (February 2017) seeks to diversify the supply of new housing in response to the dominance of the national / PLC volume home builders. The subject site is of a size that is suitable for development by a local / regional housebuilder.</p> <p>It is submitted that in order to ensure a deliverable 5-year housing land supply and the Core Strategy housing requirement in the East Market Area, and specifically, to meet the need for new affordable homes in Devizes, that the subject site should be included as an allocation for circa 50 homes in the draft Plan.</p> <p>Promotion History: AWP's Green Lane site, as outlined in blue on the enclosed Land Ownership Plan, is a key site for provision of services in Wiltshire, and has had recent investment to provide specialist provision of new in-patient bed spaces for clients with mental health / severe learning difficulties. Future planned investment in on the Green Lane campus will provide a Wiltshire-wide safe environment for patients which are subject to review in conjunction with the local constabulary by providing a 'place of safety'. It is in this context the vacant Green Acres site, as outlined in red on the enclosed Land Ownership, was been deemed surplus to future operational requirements by AWP. The site has been vacant since March 2017. The previously developed site is now incurring ongoing holdings costs for AWP, and on this basis, it is considered strongly in the public interest that a new viable use for the site is found as soon as possible.</p> <p>In May 2014 details of the Greenacres site were submitted in response to the Council's call for sites. At a meeting attended by both AWP and NHS Property Services was held at Wiltshire Council's offices in October 2014 It was agreed that a comprehensive approach to the provision of healthcare in Devizes and the disposal of surplus sites owned by AWP and NHS Property Services would be progressed. It was also acknowledged at that time that the Devizes Neighbourhood Plan was too far advanced to address these issues, and that the Site Allocation DPD would be the appropriate plan through which AWP's surplus land assets could be promoted.</p> <p>AWP have progressed a technical evidence base comprising landscape, transport and utility surveys which has informed a draft capacity layout that indicates that the surplus Greenacres site has the potential to accommodate a scheme of up to 54 houses with open space and parking for users of the public right of way.</p> <p>The following information is enclosed:</p>			

Appendix Q - Schedule of representations

	<p>Land Ownership Plan showing the extent of AWP's land ownership (Ref: 03.RevB)  Indicative draft layout showing circa 50 units on the former Greenacres site (Ref: 1135/SK012A)  Statement of Common Ground: the site owners, AWP, reconfirm their willingness to work collaboratively with Wiltshire Council to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.  Policy H1: Wiltshire Council to allocate the subject site for circa 50 dwelling units, as outlined in red on the enclosed Site Location Plan (Plan Ref: 03.RevB).</p>

		Mr Roy Pegrum	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I write in connection with the above proposal, I know the area well having enjoyed living at the above address for over twenty year. As you may appreciate my house is bordered on three sides by the proposal and I wish to object strongly to the erection of dwellings in this location on ecological grounds.</p> <p>Because of its unique situation we are fortunate to have experienced the pleasure of living close to the surrounding countryside and the wildlife that it supports. We have taken great pleasure in viewing the deer, fox, badger hedgehog and birds and have endured and enjoyed their frequent invasion. Regrettably the loss of such wild life and the land that they rely on would not in its self be considered grounds for removing the above proposal from the WHSAP but evidently the presence of bats could. With this in mind we have been monitoring their presence with the aid of an Echo Meter Touch 2. This device together with an iPad app. detects, identifies and tracks bat movements.</p> <p>In the short period that we have been monitoring, the device has identified fourteen different species of bat. Significantly these include the protected Greater Horseshoe and the very rare Bechstein. All these bats have been tracked while foraging on our land and; significantly; the fields adjoining Framfield. Copies of these records are available for your review and I hope to pass copies to the Environmental Services of Wiltshire Council at Bythesea Road when I can find a medium capable of holding the large files involved.</p> <p>In conclusion the fields adjacent to Framfield are an important area of forage for rare and protected species of bats and the provision of so called 'dark corridors 'would be an inadequate replacement for these natural environments. These fields therefore should not be included in the WHSAP and if they should continue to be so I will repeat my objections at all subsequent stages of the planning process.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Table 4.10 indicates the distribution of housing development for the various community areas. In the case of Warminster, this table shows a shortfall of 14% (262 houses). This figure is made up of the 462 house shortfall shown in table 4.2 of Topic Paper 3, less the allocations for Warminster of 200 houses shown in table 4.6 of the DPD. This shortfall of 462 is a snapshot and will depend on the delivery rate of the West Urban Extension in Warminster. The Core Strategy allocation for this site was set at a quanta 900, although it was acknowledged by Wiltshire during the examination, and confirmed by the Examination Inspector, that the area is much larger than required to deliver 900 homes.</p> <p>As a result, the Core Strategy Examination Inspector in his report did not recommend an additional allocation to meet Warminster's shortfall of the then 317 houses, if the site only provided the 900 quanta.</p> <p>The masterplan for this site (16/01323/MAS) was approved on the 15th June 2016. This masterplan indicated that the allocation was capable of supplying 1550 houses, 893 prior to 2026, justifying the Examination Inspector's and Wiltshire's belief that no additional allocation was required. It is the housing trajectory in this masterplan that has been used in the Wiltshire Housing Land Supply Statement (March 2017) to provide the shortfall figure of 462.</p> <p>A subsequent detailed planning application (17/01463/FUL) from a different developer for the southern part of the site is currently under consideration. The housing trajectory given in this application of 1025 houses by 2026 would result in the shortfall being considerably reduced from 462 to 230. See attached spreadsheet below on page 14 &amp; 15 showing the calculation for these numbers.</p> <p>It should be noted that the 'indicative requirement' figures in the Core Strategy for each community area in a HMA were provided to prevent individual settlements from receiving an unbalanced level of growth and they are just 'an indicative value' and allow for a flexible approach. Wiltshire Council must reassess the Minimum Housing Requirement figures within each HMA based on a consistent methodology outlined in the Core Strategy, particularly for Warminster.</p> <p>Any increase in housing numbers thereafter should be based on an evidence based- approach justifying the approach.</p>				
<b>Attached files (Please see Objective)</b>	4715394				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	<p>EBRAG represents the views of the East Boreham residents as a community association concerned with ensuring that development in and around East Boreham is sustainable and in keeping with the local heritage assets. Re-established in 2012 to oppose a speculative development proposal, which subsequently became a speculative application, EBRAG has an active committee of 10 persons, a website, database of some 400 concerned residents and regularly keeps the community updated on relevant planning information through the internet, press, social media, public meetings and hardcopy drops to some 1,000 residents.</p> <p>EBRAG would like to represent the views of the community at any public hearing concerned with development on East of Dene (known locally as Home Farm) and Boreham Road (known locally as Spurt Mead).</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Salisbury does not have a straightforward road layout due to the fact that there are five rivers crossing through the city, so traffic is already heavily congested around the few bridges that exist. To add over 1000 cars to the already heavy traffic levels seems irrational. The Harnham Gyratory and route down Newbridge Road, which the majority of new residents' cars would need to pass through, can struggle to cope during the rush hour at present with traffic backing up along all of the approaching A roads, as demonstrated by the drive by protest on the 19th September where just 10% of the expected additional traffic, forecast by TRICS data, joined the rush hour traffic and more than doubled the usual time it takes to get from Wilton to Harnham. A new and effective transport strategy for Salisbury is badly needed and should be in place before any new developments of this size are first considered.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		3) North Bradley is a village, the area of H2.2 is a part of the parish of North Bradley, not part of Trowbridge. If Trowbridge needs to expand and accept more housing, it should be on land WITHIN Trowbridge and its boundaries, you shouldn't be allowed to move boundaries as it suits to meet targets for the town. Villagers have paid a premium to live in a village, building on this plot of land will lead to the village being lost and turned in to just another part of Trowbridge. It is so sad and unfair on us to take our village away, while other villages are allowed to keep fields as boundaries. Don't build on site H2.2!

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Table 4.8 indicates the projected 5 Year Housing Land Supply values to the end of the plan period for the various HMAs when the allocations in this DPD are included.</p> <p>The position prior to the allocations in this DPD is shown in table 3.4 of Topic Paper 3. This table shows the 5 Year Housing Supply figures dropping below the minimum 5.25 value towards the end of the plan period. It is for this reason that the DPD made additional allocations to ensure that the 5 Year Housing Supply figure was above the minimum.</p> <p>As a result of the Chippenham DPD examination delay however and subsequent problems with the North and West HMA 5 Year Housing Supply, a number of sites were granted permission that were not included in the Core Strategy allocation. This increased the commitments in this HMA while the Minimum Housing Requirement remained constant.</p> <p>In response to this increase in commitments EBRAG would expect that the 5 Year Housing Supply figure would increase towards the end of the period.</p> <p>The figures 3.4 of Topic Paper 3 are derived from the Housing Supply Statement (March 2017) Appendix 1 which provides a prediction of commitments for the year to the end of the plan in 2026. To calculate a 5 Year Housing Supply however you also need a completion figure for each year and correcting for the data ending at 2026. This spreadsheet shows, rather than dropping as predicted by this DPD, the actual 5 years housing supply for the North and West HMA values would increase towards the end of the plan period. This undermines and negates the reasons used by the DPD to make additional allocations.</p> <p>Wiltshire Council must reassess the Minimum Housing Requirement figures within each HMA based on a consistent methodology outlined in the Core Strategy, particularly for Warminster.</p> <p>Any increase in housing numbers thereafter should be based on an evidence based- approach justifying the approach.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>This may or may not be the correct way of objecting to the planned housing development on the Hilperton Gap but looking at the forms you have to fill in and the complexity of it all, I've always been a man of few words, but on this occasion I feel I have to voice my concerns. My objections are based on the facts that the town has Brown Field sites standing vacant within Trowbridge and nothing has been done to them, yet this Green Field site seems to have been jumped on as the only piece of land that can be used. Houses need to be built, yes, but until all other Brown Field areas have been exhausted within Trowbridge then I feel compelled to object to this planning application as strongly as I can. I feel WC are going over people's heads to try to get this through and not taking there concerns seriously, so, build on the Brown Field sites first then look at this again.</p>

<b>Comment ID:</b>  <a href="#">1495</a>	<b>Consultee</b> Mr Nick Parker Chairman  East Boreham Residents Action Group (EBRAG)  <b>Person ID:</b> 706891	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Page 40		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The paragraph proposes an additional allocation of 200 houses (East of Dene, Bore Hill Farm, Boreham Road) for Warminster. The Sustainability Appraisal Report Annex 1A 1T Warminster Market Town has not considered the lack of infrastructure to support further development in Warminster.			
	The Wiltshire Infrastructure Delivery Plan 2 for Warminster (dated September 2013) associated with the Core Strategy listed as essential: <ul style="list-style-type: none"> <li>- Health 2011 - 2016 Potential relocation of existing GP practice and improvements to existing practices in the villages.</li> <li>- Education 2016 - 2021 New 2FE primary school and site, preferably to replace Princecroft School, to provide an additional 339 pupil places.</li> <li>- Education 2011 - 2016 Relocation of Kingdown Secondary School to provide an additional 241 pupil places.</li> <li>- Education 2021 - 2026 Extension to existing primary schools in the villages to provide an additional 9 pupil places</li> </ul> It further states that the majority of housing on the strategic site of the West Urban Extension will come forward during the middle five years of the plan period. Essential projects phased to come forward during the initial stages of development are either needed to enable the development to proceed, or existing provision is close to or at capacity.			
The updated version of this document dated December 2016 lists as essential: <ul style="list-style-type: none"> <li>- Education 2021 - 2026 Expansion of existing town primary schools to provide 137 places.</li> <li>- Education 2021 - 2026 Expansion of existing village primary schools to provide 19 places.</li> <li>- Education 2016 - 2021 Site (at least 3.6ha) to colocate additional secondary places within West Urban Extension to provide 309 places.</li> <li>- Education 2021 - 2026 Nursery provision for children aged 0 to school age (to include, based on housing numbers, 56 places for 0 to 2 year olds and 126 places for 3 to 4 year olds).</li> <li>- Health and social care 2016 - 2021 Support development of local primary healthcare facilities.</li> <li>- Emergency Services 2016 - 2021 improvements to (including relocation/ replacement) of Warminster Fire Station.</li> </ul> The Core Strategy Wiltshire planned that almost all of these essential facilities would be provided on the West Urban Extension. As of today none of these essential items have appeared on a detailed planning application and therefore no delivery date is available. In fact the situation in terms of health has deteriorated in that of the two doctors surgeries in the town one is closing in October 2017, increasing the necessity of early delivery of primary healthcare facilities.				
The delivery plan states that Kingdown Secondary school has some surplus places but will be full by 2018. It is not able to expand in its current location as no land nearby is available. The land required for expansion is within the West Urban Extension strategic site.				

Appendix Q - Schedule of representations

	<p>Given this lack of essential supporting infrastructure, it is not sustainable to allocate additional housing to Warminster until the northern part of the West Warminster Urban Extension, where this infrastructure is to be located, has at least reached the planning stage, at which point as calculated previously, additional allocation will not be required.</p> <p>If further housing allocation is made for Warminster, above that currently identified in the Core Strategy, then Wiltshire need to allocate appropriate infrastructure to support the increase. No mention is made of this in this draft plan.</p>

<b>Comment ID:</b>  	<a href="#">1504</a>	<b>Consultee</b> Mr John McGarry  <b>Person ID:</b> 402734	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road Salisbury		Justified	Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Wiltshire Housing Site Allocations Plan is UNSOUND in respect of H3.1 Netherhampton Road in that the traffic implications render it UNSUSTAINABLE. The following pages are a detailed analysis of the Sustainability Appraisal Report indicating where it is misleading or in error, with suggestions for amendment.</p> <p>Finally I include a paragraph on the strategic issues in which I indicate why this allocation is not only unsustainable but strategically flawed.</p> <p><b>STRATEGIC ISSUES</b></p> <p>Wiltshire Council have sought to justify the need for the Netherhampton Road site on the grounds of difficulties experienced in relocating commercial activities from the Churchfields site, which was intended to release space for additional housing in the City Centre. Difficult or not, strategically this objective must be pursued.</p> <p>In the long run, there will eventually be an over-riding need to re-route the A36 Southampton-Bristol trunk road away from Salisbury Ring Road. This will inevitably be routed to the north of the City, the southern route having been discounted on environmental grounds.</p> <p>Commercial development should therefore be concentrated to the north of the City, forming a cluster with Porton Down, Boscombe Down, High Post and Solstice Park in Amesbury, where businesses will ultimately benefit from good access to this new trunk road.</p> <p>There is ample space at Old Sarum, Long Hedge and beyond for such development.</p> <p>In the shorter term, access to the national road network via the A303 is much better from the north of the City than elsewhere in Salisbury. The failure of Harnham Business Park to attract new businesses in over 10 years is clear evidence that this is not regarded by business as a suitable location for commercial activity.</p> <p>How then does it make sense to allocate a huge new greenfield site for residential development on the south side of the City, with the worst possible road communications to the current and developing commercial zones?</p> <p>Salisbury has a history of strategic blunders. Let us not add another.</p> <p>The Site Allocations Plan would be rendered sound by deleting the Netherhampton Road site from the Plan.</p> <p>Detailed amendments to the Sustainability Appraisal to correct errors and misleading statements as follows:</p> <p>The following are my detailed comments on the Wiltshire Council Housing Site Allocations Plan Sustainability Appraisal Report prepared by Messrs Atkins in respect of Site H3.1(S1028) Netherhampton Road.</p> <p>SA Objective 1 Summary (Page 95)</p> <p>Line 8 reads: 'Significant in-combination effects may make mitigation for phosphate challenging at this location. Hence Line 9 should be amended to delete 'moderate' and read: 'Overall, adverse effects are considered likely against this objective .... and mitigation is considered problematic'.</p> <p>SA Objective 2 Summary (Page 97)</p> <p>Lines 1-2 should be amended to: 'The site is situated on the South West of the City, partly outside Salisbury City boundary and is not considered to be within a reasonable walking/cycling distance of the City centre.</p>			

Line 3-4 should be amended to: 'Therefore development of this site will lead to a loss of Best and Most Versatile agricultural land.'

Line 7 should be amended to: 'Overall this site is considered likely to have adverse effects against this objective and mitigation would be problematic'.

SA Objective 3 Summary (Page 98-99)

Lines 6-7 should be amended to: 'Overall, given the anticipated size of the development, the need for water capacity appraisal and location within the Hampshire Avon river catchment, adverse effects are considered likely against this objective'.

SA Objective 4 (Pages 99-101)

Much of this section concentrates on Air Pollution, and in the medium to long term, I accept that electric propulsion is likely to mitigate nuisance from this aspect.

However, the statements on noise pollution and other effects of traffic movement are highly contentious. There are currently around 2000 dwellings whose sole or primary road access to Salisbury is via Netherhampton Road/Harnham Road. These dwellings are served by a 15-minute bus service.

If both sites on Netherhampton Road (S1027 and S1028) are developed this adds 840 dwellings, and hence potentially an additional 42% in traffic movements.

The Highways Agency Design Manual for Roads and Bridges classifies Harnham Road as (Urban All purpose) UAP4 with a peak capacity of 900 vehicles per hour in each direction. Current morning and evening flows exceed 700 vehicles per hour, and hence there is little room to accommodate any major increase.

At the time of the EIP of the South Wilts Core Strategy in 2011, when a development of around 400 dwellings was proposed, the above analysis was submitted to the Planning Inspector and was not challenged by Wiltshire Council. In my view, the inability of Wiltshire Council to identify any realistic mitigation measures for Harnham Road and Netherhampton Road was the primary reason for the withdrawal of this site. If plans for 400 dwellings were unsound, how much less so are plans for 840 dwellings?

The response to Question 2 states: 'Development of the site will lead to .... long term (occupation) impacts associated with noise, light pollution, odour and vibration. Mitigation measures to limit such impacts will need to be developed and implemented ....'

Thus far we have seen no evidence whatsoever that any significant mitigation is possible, indeed it is apparent that the existing road structure is quite incapable of supporting this development.

Hence the last line of the summary should be amended to read: 'Overall, the additional traffic generated by this site will have a damaging effect on the quality of life of the existing residents of Harnham and Netherhampton, and it is likely that increased congestion will impede economic activity in the City as a whole. Unless and until a traffic plan is drawn up to demonstrate how the additional volumes can be accommodated, this site should be withdrawn.'

SA Objectives 5a and 5b (Pages 101-103)

No comment

SA Objective 6 (Pages 103-104)

No comment, except to stress the various qualifications in the appraisal e.g. 'Assessment and preservation in situ would be required ....', 'The extent of housing development on this site may need to be reduced ...'.

SA Objective 7 (Pages 104-107)

The Appraisal twice refers to it being adjacent to Harnham Business Park, presumably to imply that the area is already developed. Harnham Business Park has a single occupant (Bookers Cash and Carry) which generates low traffic volume and negligible noise, and is situated well

Appendix Q - Schedule of representations

below the ridge line. It has attracted no new tenants for upwards of 10 years.

The summary should be amended to delete the irrelevant reference to Harnham Business Park. Also delete the word 'fairly' so that line 2 of the summary reads: 'This is a visually sensitive location ....'

The final line should read: 'Overall it is considered that development of this site would have adverse effects against this objective'.

SA Objective 8 (Pages 107-108)

We do not dispute that a site of this size is capable of providing a large number of houses, we simply claim that it is not deliverable in this location.

We note that the summary refers to 'approx. 1195 dwellings'. The Site Allocations Plan refers to 740 dwellings and the summary should be amended accordingly.

SA Objective 9 (Pages 108 - 109)

Question 4 response states that there is public transport nearby. I have searched the internet and the nearest regular service I have found is the Reds r5 route, the nearest stop being an estimated 800m away near the junction of Netherhampton Road and Middle Street.

The only realistic access to Salisbury District Hospital is via Netherhampton Road/Harnham Road, which is destined to be hugely congested if this development goes ahead.

With the exception of Sarum Academy, the site is just about as far away from the other secondary schools at Laverstock as it is possible to get within the City conurbation.

We note that the summary again refers to 1195 dwellings, as well as a 2-form intake primary school and other community facilities. This will further increase traffic volumes, and we repeat that this plan is simply not deliverable in this location.

SA Objective 10 (Pages 110-111)

This is the major issue affecting this planned development, and this part of the Appraisal is an absolute travesty, being grossly misleading and in my view professionally sub-standard.

The response to question 4 states specifically that 'the site is not considered to be within walking distance of most services and facilities in Salisbury' and that 'a development of this size will inevitably increase private car use and travel movements'.

It concludes that 'development of this site must be accompanied with (sic) significant improvements in walking/cycling/public transport infrastructure and highways infrastructure to allow additional traffic movements to be mitigated'.

This bland assertion ignores the scale of the development. The development (at 840 dwellings including S1027 and S1028) represents an increase of about 42% above the existing housing served by Netherhampton Road/Harnham Road. If the figure becomes 1195 dwellings, the increase is nearly 60%.

Existing housing is served by a 15-minute bus service, and many parts are within walking distance of the City centre, and most are within easy cycling distance. Also, a significant proportion is occupied by the elderly (Norfolk Road, Brympton House etc) where the proportion of car ownership and use is likely to be lower.

Accordingly, it is likely that car ownership and use for the new development, considering its greater distance from Salisbury, will be greater pro rata than for existing housing.

Faced with this analysis, the final line of the summary concludes:-

Appendix Q - Schedule of representations

	<p>'Overall, the site is considered as having minor adverse effects against this objective'. Whatever the assessment of adverse effects, in no sense are they 'minor'.</p> <p>I would submit that this section of the Appraisal totally fails to address the major traffic implications of this development, and should therefore be withdrawn and completely rewritten after a proper analysis of likely traffic numbers, the capacity of the existing road network, and an assessment of the impact on the local and wider community. This would allow a proper transport plan to be developed, without which this site allocation is unsustainable.</p> <p>SA Objective 11 (Page 111) SA Objective 12 (Pages 111-112)</p> <p>I fully support plans for a significant increase in housing in the Salisbury area, which is necessary both for demographic reasons, and to support local economic growth.</p> <p>However, I believe that my notes above demonstrate that the limitations of the road Infrastructure, together with a number of other major concerns incapable of satisfactory mitigation, render this site allocation unsound.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Salisbury City and Wiltshire Councillors are inhibited from voicing opinions on such plans due to their subsequent involvement in the planning process.</p> <p>This particular plan is not only unsustainable, it is almost universally opposed by the residents of Harnham and Netherhampton. It is important that informed residents have to opportunity to oppose this folly, at the examination if necessary.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I wish to comment on the proposal to increase the number of houses, through the site allocation plan from 10 by a further 40. I supported the original planning application with a proviso that the number was not subsequently increased. Now that there is a proposal to build a further 40, I wish to register my objection for the following reasons:</p> <p>There appears to be a potential oversupply of about 100 houses in the Malmesbury area, together with an overall over supply excess of 2000 houses within North and West Wilshire. Given this prediction, how can a further 40 house in Crudwell be justified on the basis of need, which has not been identified?</p> <p>The County strategy leads us to believe that development in villages , both large and small, will be limited to meet the housing needs of settlements, and to improve employment opportunities, services and facilities. Apart from the lack of need, strategic or otherwise, the basic infrastructure in the village , which is already stretched beyond its designed capacity, will be unable to cope. The drainage system is inadequate, and the village has suffered from severe flooding in the last few years, and the additional building will add significant risk from run off water. The school is full and over subscribed, and the road serving the site is but a narrow country lane.</p> <p>I support the current plan to build the 10 houses, and further proposals for more houses, should not be considered until the village has submitted, and had accepted, its Neighbourhood Plan. It is important that the village has a voice in its future development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>EBRAG objects to the proposed Home Farm (East of Dene) allocation for the following reasons:                  Development Principles (Wiltshire Core Strategy CP1)                  The underlying principles of the Wiltshire Core Strategy seek to manage future development to ensure that communities have an appropriate balance of jobs, services and facilities and homes. The strategy recognises that previous growth hasn't always been delivered in a proportionate manner, whereby housing is delivered in settlements where there are insufficient employment opportunities leading to out-commuting. This is the main reason why the West Urban Extension is a mix of housing, employment land, primary school, local amenities, etc. This allocation is purely a housing development and does not meet the principles of the Core Strategy in providing balanced facilities that are needed for a self-contained community.                  EBRAG concludes that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector.                  Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, for development within Warminster. This site can take the perceived increase in housing numbers if Wiltshire disagree with the EBRAG arguments/representations earlier in this document.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Housing Need Wiltshire's documentation now indicates that Warminster is 468 houses short of its target. The underlying reason for this shortfall has been the necessary delay in designing solutions for the problems associated with the West Urban Extension development. Problems particularly associated with Warminster include secondary education places, flooding, pollution of the River Wylye, traffic, recreation, green buffer. Faced with these problems, it was correct for Wiltshire to directly involve the people of Warminster, especially those most directly affected in the West, in the discussions as to how to develop the West Urban Extension. Time is required to provide the additional facilities needed to support development in Warminster and therefore the proposed rate of development on the West Urban Extension is the maximum possible given these constraints.</p> <p>The Home Farm site does not provide any additional facilities and so rather than increase the overall number of houses completed, it would limit the number that could be immediately developed on the West Urban Extension in order not to break supporting infrastructure.</p> <p>EBRAG concludes that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>River Wylde</p> <p>At a recent Wiltshire Council 'Our Community Matters' event, one of the items that was discussed was the pollution problems associated with the River Wylde. Recognising that the River Wylde is a SAC, and as such is afforded the highest protection under law, EBRAG is extremely concerned by the comments from Wiltshire Council's Ecology Officer (See Below).</p> <p>These comments indicate that if this development, in conjunction with the West Urban Extension, proceed there will be significant amounts of pollution discharged in the river. Given that the West Urban Extension is the site selected in the Core Strategy for Warminster, it would not be appropriate to hinder development by also granting permission for this application.</p> <p>Wiltshire Council's ecology officer- "River Avon SAC - The development would presumably discharge to Warminster sewage works (STW). This STW discharges into the River Wylde, which is part of the River Avon SAC, a European protected site, which has nationally agreed targets for its water quality. The targets are being widely breached across the catchment for phosphorus. As a result the Environment Agency and Natural England have therefore published a Nutrient Management Plan to demonstrate how water quality will be improved over the next few years to ensure the targets are met. However, it is currently recognised there is a high risk that the plan will not deliver its objectives for the upper Wylde (and lower Avon sub-catchments). The Council is therefore not able to approve planning applications that would discharge to Warminster STW, where they would take the quantum of development above that forecast in the Wiltshire Core Strategy.</p> <p>Permitted and pending applications currently exceed the Core Strategy allocation and this places uncertainty in the short to medium term for further residential housing applications in the Warminster catchment. The Council is working with Wessex Water, the EA and NE to undertake further modelling of housing growth scenarios and identify the scope for measures that would offset additional forecast phosphate.</p> <p>This situation will have implications for the current pre-application site.</p> <p>Optimistically the matter could be resolved within the next year. However, it seems more likely that significant further growth at Warminster may be delayed until after 2020 when advanced phosphate stripping technologies may be available for the STW.</p> <p>EBRAG concludes that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector.</p> <p>Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, for development within Warminster. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p><b>Flooding</b> The site is subject to ground water flooding issues and a large part of the site is subject to surface water flooding issues. Many instances of flooding have been reported to Wiltshire Council by residents of Grange Lane over the past few years. The allocation is within flood zone 1 in relation to fluvial flood risk. The recent review of 'The Winter Floods of 2015/2016 in the UK' brings together both river flow and meteorological data in an analysis of the events that led to extensive river flooding. This report considered the three months of 'remarkably persistent and exceptionally mild cyclonic' activity which, along with Storm Desmond, included the major storms of Abigail, Frank and Gertrude. Current speculation is that the flood risk is increasing due to climate change and there are trends towards higher river flows over the last five decades, especially in western Britain. Although this flooding was worse in the north of England, EBRAG has reported to Wiltshire and the EA concerns over flooding on this site, Bishopstrow Village, Sutton Veny roundabout and Grange Lane. EBRAG remains very concerned that if this development was to be allowed, a period of persistent rain would not only cause this site to flood, but also increase significantly the risk of flooding to adjacent properties and surface water discharge into the River Wylye, endangering properties down stream. EBRAG concludes that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. This site was considered as part of this process and rejected at the planning stage by Wiltshire, followed again at the examination stage by the Planning Inspector. Wiltshire selected the West Urban Extension, with its allocated supporting infrastructure and supporting employment areas, for development within Warminster. This site can take the perceived increase in housing numbers if Wiltshire disagree with the EBRAG arguments/representations earlier in this document.</p>

Local residents witness speeds of traffic in both directions significantly higher and consider there is a high risk of accidents happening at the proposed junction. The matter is made worse as traffic flowing from Warminster towards Salisbury needs to negotiate a blind bend before meeting the proposed junction within 200 metres. All local residents close to the proposed entrance consider Boreham Rd to be at its most dangerous on this bend due to lack of clear sight and non observance of speed limits. The Wiltshire traffic officer was not at liberty to comment on the bend merely the splay lines as defined by national policy.</p> <p>EBRAG concludes that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Environment</p> <p>This site was considered for development during the West Wiltshire District Plan and the examiner described the site as – "I saw that the land mostly comprises arable fields, with similar fields to the north, together with a few cottages and other houses (some set in trees) and bounded by lanes or roads, to the east, west and south. Although there is urban development immediately to the west (across Grange Lane), the area has a pleasant and obviously rural appearance and is very much on the edge of Warminster.</p> <p>From my observations from local footpaths to the north, west and east of the area and from Battlesbury Hill, I consider that the land relates well in visual terms to the open countryside to the north and east, forming an integral part of the countryside east of the town. I accept that a high stone wall and cottages fronting Boreham Road impact on any meaningful visual relationship with the countryside to the south, other than when seen from the Hill top. However, in view of the open-ness of the land and its linkage with other open land to the east and north (and especially Battlesbury Hill), I consider that the town policy limit hereabouts should be drawn along the eastern edge of the denser development fronting The Dene, St George 's Close and (the southern part of) Grange Lane."</p> <p>EBRAG concludes that Wiltshire Council has spent many years considering the best options for development, which resulted in the Core Strategy gaining approval after a long examination by the nominate Planning Inspectorate. <b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1.1 Development Planning and Design Services Ltd is instructed to make representations on the draft Wiltshire Housing Site Allocations Plan on behalf of the Crudwell Neighbourhood Plan Steering Group.</p> <p>1.2 In essence, the grounds of objection are that the emerging Crudwell Neighbourhood Plan is the appropriate document in which to identify the level of local need for new housing at Crudwell, and to determine the best location to meet any identified need.</p> <p>1.3 Crudwell Parish Council has put in place appropriate mechanisms by which to produce the Crudwell Neighbourhood plan.</p> <p>1.4 Sufficient homes are or will be delivered in both the North and West Wiltshire HMA and the Malmesbury Community Area to meet the strategic housing requirement, so there is no strategic justification for Wiltshire Council to allocate housing at Crudwell.</p> <p>1.5 On that basis, the proposed allocation at Ridgeway Farm, Crudwell (site H2.13), should be deleted.</p> <p>Deletion of H2.13 Crudwell.</p> <p>3.1 There is no need to allocate any sites in Crudwell when Crudwell has begun its neighbourhood plan.</p> <p>3.2 Documents released to support the Housing Site Allocations Plan note that housing sites will only be allocated by Wiltshire Council where there is a "strategic priority" to do so.</p> <p>3.3 When past completions are combined with deliverable commitments, the Housing Site Allocations Plan results in an oversupply of 624 dwellings across the North and West Wiltshire HMA, or 2,710 dwellings when forecast windfalls are included. If the indicative residual requirement was met for each community area town and each community area remainder, this oversupply increases to 2,198 dwellings excluding windfalls, or 4,284 dwellings including windfalls.</p> <p>3.4 The Crudwell allocation is the only allocation proposed in the Site Allocations Plan in the Malmesbury Community Area. Without it, when completions are combined with deliverable commitments, there is still an oversupply of 60 dwellings in the Community Area. On that basis, there is no strategic priority to justify Wiltshire allocating any sites at Crudwell, either from an HMA or a community area point of view.</p> <p>3.5 Crudwell is designated as a large village in the Wiltshire Core Strategy. Core Policy 1 limits housing in large villages to that required to meet local needs.</p> <p>3.6 The neighbourhood plan is the best place to determine the level of local need for new housing, and the Neighbourhood Plan Steering Group plans to begin this work in the very near future.</p> <p>3.7 The need for new homes will then be considered against the various constraints in and around the village. Early work undertaken to inform the emerging Neighbourhood Plan, and an analysis of representations made to the various proposals for development at Ridgeway Farm, suggest that there are infrastructure capacity issues, along with other constraints that should inform decisions about new housing at Crudwell. These include:</p> <ul style="list-style-type: none"> <li>- the ability of Crudwell CE Primary School to expand to accommodate additional demand, considering its constrained location within a conservation area;</li> </ul>			

Appendix Q - Schedule of representations

	<ul style="list-style-type: none"> <li>- flood risk and drainage capacity issues, particularly bearing in mind that a large proportion of the village is at risk of either fluvial or surface water flooding, or both;</li> <li>- sewerage capacity;</li> <li>- highways capacity and safety;</li> <li>- impact of development on the conservation area;</li> <li>- impact of development on wildlife and landscape.</li> </ul> <p>3.8 The Crudwell Neighbourhood Plan can work through these issues and constraints, and consider any local housing need in this context to come up with a plan that is supported by the local community.</p>

<b>Comment ID:</b>  	<a href="#">1518</a>	<b>Consultee</b> Sian Burke-Murphy  <b>Person ID:</b> 1132949	<b>Agent</b> Mr Stuart Miles  <b>Person ID:</b> 1129139	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	2.0 Housing Requirement Calculations 2.1 The analysis below will demonstrate that the Site Allocations Plan will result in an oversupply of dwellings in the North and West Wiltshire Housing Market Area, and in the Malmesbury Community Area. 2.2 Crudwell is defined in the Wiltshire Core Strategy as a large village, in which new housing should be limited to meeting local needs. In this context, the documentation produced alongside the Site Allocations Plan makes it clear that Wiltshire Council will only allocate new housing sites where there is a strategic priority to do so. In the context of paragraph 47 of the NPPF, there is no housing land supply problem in the HMA, so there can be no strategic priority to allocate additional housing at Crudwell. Housing Market Area 2.3 The housing requirement for Wiltshire between 2006 and 2026 is set out in Wiltshire Core Strategy Core Policy 2. This explains that 42,000 dwellings are required across Wiltshire, and 24,740 dwellings are required in the North and West Wiltshire Housing Market Area (HMA). 2.4 Table 1 of Wiltshire Council's Housing Land Supply (Update), Base Date April 2016, published March 2017, shows that 11,756 dwellings were completed in the HMA by 31 March 2016. Table 3.2 of Topic Paper 3: Housing Land Supply, June 2017, released alongside the Housing Site Allocations Plan, estimates that a further 847 dwellings were completed in the year to 31st March 2017, resulting in 12,603 completions by March 2017. This leaves a residual requirement of 12,137 dwellings to March 2026. 2.5 Table 4.2 of Topic Paper 3 shows that 11,566 of this residual requirement are committed, meaning that an additional 571 dwellings need to be found across the HMA. 2.6 Figure 11 of the Site Allocations Plan shows that 1,195 dwellings are proposed to be allocated in the HMA via the Site Allocations Plan, resulting in an oversupply of 624 dwellings, or 2,710 dwellings when windfalls are included. 2.7 However, the premise behind the Housing Site Allocations Plan is that the indicative requirement set out in the Core Strategy should be met for each geographical area in Core Strategy table 1. This is the basis of the indicative residual requirement set out in table 2.2 of the Malmesbury Community Area Topic Paper and table 3.1 of Topic Paper 3, and this is an argument that a developer will make when promoting housing in community areas and sub-areas where the table 1 numbers are not met. 2.8 Table 4.2 of Topic Paper 3 indicates that, if this indicative requirement for each area in Core Strategy Table 1 (the "Indicative remaining requirement (quoted)" in table 4.2), were delivered, then 2,769 additional dwellings will be delivered, i.e. 2,198 dwellings more across the HMA than is required. 2.9 There is no need to do this when sufficient homes will be delivered across the HMA, according to Wiltshire Council's own numbers. Paragraphs 5.5 to 5.9 of Topic Paper 3 refers to Neighbourhood Planning. Relevant extracts are repeated below: 5.6 "... where neighbourhood plans have reached the examination stage, the Council has not sought to identify further housing sites. Progress on neighbourhood planning in other areas of the County has also been kept under review as preparation proceeds. How the Plan interacts with particular Neighbourhood Plans is explained in individual Community Area Topic Papers. Plan preparation thus serves to support neighbourhood				

## Appendix Q - Schedule of representations

plans already in preparation; and allow appropriate opportunity for dialogue with communities, who may be considering the preparation of such plans, to articulate their views on how settlements should grow.”

5.7 “However, it is recognised that in certain locations (particularly higher order settlements such as Principal Settlements, Market Towns and Local Service Centres) there may well be a need for the Council to take a strategic lead, by identifying sites to ensure that sufficient land is made available to maintain supply and market choice.”

5.8 “Equally, where neighbourhood plans are being developed that do not allocate sites for housing despite there being a requirement to be met in an area then, again, the Council may need to identify sites at those locations.” (DPDS emphasis)

2.10 Equally, Topic Paper 2: Site Selection Process Methodology, June 2017, refers to Neighbourhood Planning in paragraphs 3.5 to 3.10. This includes the following extracts:

3.6 “The Council supports passing direct powers over planning to local communities as a part of building up the resilience of local communities.”

3.8 “It is only necessary for this Plan to allocate land for housing development where it is a strategic priority to do so. WCS Core Policy 1 proposes that development at Large Villages should be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. Unless there is a strategic priority to deliver the homes needed in an HMA, then the most appropriate means to assess local needs and plan growth at each Large Village is through the neighbourhood planning process.” (DPDS emphasis)

2.11 Paragraph 4.10 of Topic Paper 3 notes that the housing requirement across the HMA is a minimum figure. This is noted and accepted, but the allocations proposed in the Housing Site Allocations Plan would result in substantially more dwellings in the HMA than are required, especially when windfalls are included.

2.12 Crudwell has begun to produce a neighbourhood plan. The area has been designated, a steering group has been set up and initial evidence gathering will begin soon. Crudwell is classified as a large village, not a Principal Settlement, Market Town or a Local Service Centre, so there is no need for Wiltshire Council to take a strategic lead by identifying any housing sites at Crudwell.

2.13 On the basis of the housing numbers set out in the Site Allocations Plan there is also no “strategic priority” in terms of the North and West Wiltshire HMA for Wiltshire Council to allocate any housing sites at Crudwell in advance of the neighbourhood plan. The Crudwell Neighbourhood Plan Steering Group wholeheartedly agrees that “the most appropriate means to assess local needs and plan growth at each Large Village is through the neighbourhood planning process.”

Malmesbury Community Area

2.14 Wiltshire Core Strategy Core Policy 2 refers to a more detailed distribution of the 42,000 dwellings required across Wiltshire and 24,740 dwellings required across the North and West Wiltshire HMA. This indicative housing requirement is set out for each settlement and community area in Table 1 of the Core Strategy.

2.15 Crudwell lies in the Malmesbury Community Area, in which 1,395 dwellings are anticipated. This includes 885 in Malmesbury town, and 510 in the “Malmesbury remainder”, which includes Crudwell.

2.16 Figure 14 of the Site Allocations Plan and Table 4.2 of Topic Paper 3: Housing Land Supply indicate that 560 dwellings have been completed in Malmesbury up to March 2017, and that 455 dwellings remain available as developable commitments. This suggests that Malmesbury is likely to accommodate 1,015 new dwellings between 2006 and 2026, or 130 more than the indicative requirement.

2.17 Of the 510 dwellings indicatively required in the Malmesbury remainder area, 336 were built by March 2017 and 104 are developable commitments. This totals 440 dwellings.<sup>1</sup>

2.18 While the total completions and current commitments in Malmesbury remainder is less than the 510 dwelling requirement, as a result of the oversupply at Malmesbury, there is also an oversupply across the community area of 60 dwellings (or 100 dwellings based on Figure 14 of the Site Allocations Plan).

2.19 Core Strategy Core Policy 1 notes that:  
“Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities.”

2.20 Crudwell is defined as a large village. The above analysis shows that there is no strategic priority for Wiltshire Council to allocate any housing sites at Crudwell in advance of the forthcoming neighbourhood plan.

2.21 In this context Core Policy 1 is clear; development at Crudwell should be limited to that needed to help meet Crudwell’s housing needs. The

Appendix Q - Schedule of representations

neighbourhood plan will determine the level of this local need and the best way to meet that need. Rest assured that, if additional housing sites are required, Crudwell Neighbourhood Plan Steering Group understands that it will need to identify a site or sites to meet this need.

Comparison with other settlements

2.22 The table below demonstrates the imbalance between the high level of growth proposed for Crudwell when compared with other comparable settlements. It summarises the proposed level of growth resulting from allocations in either neighbourhood plans or Wiltshire's Site Allocations Plan for each of the local service centres and large villages in the Malmesbury Community Area, along with the neighbouring Royal Wootton Bassett and Cricklade Community Area for comparison. The Dwellings in 2011 is based on the dwelling numbers by built up area from NOMIS.

2.23 The Royal Wootton Bassett and Cricklade settlements need to identify no new allocations on the basis that sufficient dwellings are either completed or committed in both Royal Wootton Bassett and in the remainder of the Community Area.

2.24 In the Malmesbury Community Area, Ashton Keynes has a relatively low level of growth proposed in its made neighbourhood plan. Sherston has no allocations because it lies within the Cotswolds AONB. Oaksey has no allocations because no SHLAA sites were considered appropriate. Great Somerford has a high proposed level of growth but this is based on an advanced neighbourhood plan where the local community determined that this was appropriate.

2.25 The only reason that Crudwell has an allocation in the Wiltshire Site Allocations Plan is because it happens to have a site included in the SHLAA that is developable.

2.26 It is not appropriate for a level of growth of over 15% to be imposed on Crudwell by Wiltshire Council when the local community will soon determine what development is needed to meet local housing needs, and will then determine how best to meet that local need.

2.27 Additionally, from a planning first principles point of view, the table above illustrates the illogicality of Wiltshire Council's position. As noted above, sufficient dwellings have or will be provided in the North and West Wiltshire HMA, in the Malmesbury Community Area, and in the Royal Wootton Bassett & Cricklade Community Areas to meet Core Strategy requirements. The only difference between housing supply in the Malmesbury and Royal Wootton Bassett & Cricklade Community Areas is that the oversupply in the latter is in both Royal Wootton Bassett and the remainder of the Community Area. In the Malmesbury Community Area the oversupply is focussed on Malmesbury, which is the most sustainable settlement in the community area anyway.

2.28 As a result of this particular distribution of development in the community area, for which, it should be re-emphasised, the housing requirement is only indicative, Crudwell, a large village with 260 dwellings, is due to receive allocations resulting in over 15% growth, when Cricklade, a local service centre with 1,737 dwellings, and Lyneham and Purton, large villages with 1,769 and 1,492 dwellings respectively, are due to receive no new housing allocations.

2.29 Cricklade, Lyneham and Purton all have a greater level of facility provision than Crudwell and are therefore more sustainable, and more able to accommodate growth. While the Crudwell Neighbourhood Plan Steering Group does not wish to be seen to be suggesting additional growth elsewhere, this simply emphasises that there is no strategic imperative for Wiltshire Council to allocate any housing sites in Crudwell, particularly when the Crudwell local community will soon consider this via its neighbourhood plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Policy H2: the Holt Neighbourhood Plan (HNP) makes provides explicit support for the redevelopment of the Tannery site for housing and employment, and does the adopted Core Strategy. However, neither development document amended the settlement boundary and Area of Opportunity extent that was originally, an arbitrarily, drawing through the middle of the Tannery Site, as shown on the Holt proposals map in the West Wiltshire District Plan 1st Alteration.</p> <p>It is submitted that the draft Plan should amend the Holt settlement boundary to include the whole of the Tannery Site as shown outlined in red on the enclosed Site Location Plan (Ref: 1711 AP(0)00A).</p> <p>Promotion History: following the withdrawal of an initial scheme submitted by a land promoter (Ref: 16/01306/OUT) in April 2017, the landowner has entered into a subject to planning contract with HAB Housing to promote the site for a comprehensive scheme of mixed-use development for employment and housing (43 units). A pre-application scheme has been submitted to the Council, which is currently under consideration (Ref: 17/08890).</p> <p>In summary, it is necessary for the whole Tannery Site to be developed so that the new housing can assist in cross subsidising the delivery of the employment space in the existing redundant curtilage listed buildings, and add address other matters such as site remediation, ecology mitigation and parking / infrastructure provision that is required to deliver a comprehensive scheme.</p> <p>It is anticipated that a planning application will be submitted by the end of the Calendar Year. This application will be accompanied by an open book viability assessment, which will demonstrate the need to new build housing on the part of the site that lies outside the arbitrarily drawn 'Area of Opportunity', which has been carried forward from the West Wiltshire District Plan 1st Alteration.</p> <p>Policy H2: either; the inclusion of a mixed-use employment / housing allocation on the Holt Tannery Site; or, the extension of the existing settlement boundary to align with the area in red outlined on the enclosed plan (Ref: 1711 AP(0)00A).</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Infrastructure Issues</p> <p>2.30 Representations made by the local community to the application for 10 dwellings at Ridgeway Farm suggest that there is community concern about the impact of this particular proposal in terms of road capacity and safety, flood risk and drainage issues, school capacity, landscape and biodiversity impacts and the potential for alternative sites to meet this demand.</p> <p>2.31 In considering the amount of development that Crudwell can accommodate, it is necessary to consider the capacity of existing infrastructure currently, and the ease with which this existing capacity can be increased if necessary.</p> <p>2.32 The Crudwell Neighbourhood Plan Steering Group has recently been advised by Wiltshire's School Places Commissioning department that Crudwell CE Primary School is at capacity, to the extent that an additional 40 dwellings would generate the need for an additional classroom at the school.</p> <p>2.33 The Topic Paper 2: Site Selection Process Methodology, June 2017 (at paragraph 6.1) notes that education specialists were consulted in determining which sites should be recommended for allocation. The detail of these discussions is not explained however.</p> <p>2.34 As you will be aware, Crudwell CE Primary School is on a small and constrained site, and lies within Crudwell's conservation area. In this regard, the Steering Group has received a statement from the Crudwell School Governing Body dated 19 th September 2017, which reads "Crudwell School, in its current form, is not able to accommodate a large increase in the number of children it educates. Significant financial investment would be required to develop the site including extra teaching space and staff and a larger school hall. Enlarging the number on role at the school may exacerbate parking problems already experienced at the school. At present there are no plans to expand the school."</p> <p>2.35 On that basis, there is no certainty that planning permission would be granted for any extension of the school. Without an extension, the additional primary school children that would live at any new allocation in Crudwell would need to travel either by private car or bus to schools outside Crudwell.</p> <p>2.36 Flood risk is also a significant issue at Crudwell, with a significant proportion of the village being at risk of either fluvial or surface water flooding, or both. The two plans below show the extent of flood risk set out on the Environment Agency's mapping.</p> <p>2.37 Inevitably this leads to community concern about the ability of the drainage network to accommodate new development. Again, the Neighbourhood Plan is best placed to examine this concern in detail, and to balance this risk with an as yet unidentified local need for new homes.</p> <p>2.38 Other infrastructure issues, including road capacity and safety, heritage impacts and landscape and wildlife impacts would also be best examined by the Neighbourhood Plan when there is no strategic priority for the Site Allocations Plan to be allocating sites. The Neighbourhood Plan Steering Group would determine the local need for housing, and then determine how best to accommodate any need that results, bearing these constraints in mind.</p> <p>Deletion of H2.13.</p>

				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.9 Boreham Road			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Principle of development: the site at Boreham Road (Site 304) was granted outline planning permission by the Secretary of State for the Department of Communities and Local Government (DCLG) on 20th July 2017: LPA Ref: 13/06782/OUT; and PINS Ref: APP/Y3940/W/16/3150774. The outline planning permission grants detailed permission for a new vehicular access; and all other matters relating to 'layout', 'scale', 'external appearance', and 'landscaping' are reserved. A parallel listed building consent relating to the re-siting and refurbishment of the listed milestone has now been fully implemented pursuant to 13/06783/LBC.</p> <p>Policy H2: We fully support the proposed development plan allocation of the Boreham Road site (also known as Boreham Mead) under Policy H2. The permitted application proposals were supported by a comprehensive evidence base of reports covering all applicable technical disciplines. The evidence base has been subject to a high level of scrutiny including by: third parties to the planning process; statutory consultees; Wiltshire Council consultees, a judge in Judicial Review proceedings, a Planning Inspector; and most recently the Secretary of State. Our comments in respect of the proposed allocation under Policy H2 relate to the following matters of fact and detail:</p> <p>Quantum of development: the comprehensive evidence base that supports planning permission 13/06782/OUT, and its associated illustrative masterplan, clearly demonstrate the technical deliverability of site for up to 35 dwellings and associated infrastructure. We therefore object to the proposed quantum of 30 dwellings as set out in Table 5.3 under Policy H2.9.</p> <p>The Council have asserted that the site areas extends to 1.32ha. This is not correct. The applicant's land ownership extends to 1.513ha. The total developable area is 1.189ha. The Illustrative Layout included in the application submission demonstrates how 35 dwellings can be accommodated on the developable part of the site at a net density of approximately 29 dph (dwellings per hectare). Taking into account the peripheral landscaping and flood plain area, which will form part of the setting, the gross density equates to approximately 23 dph. On this basis, we consider that the quantum of development should be revised to 'approximately 35' dwellings.</p> <p>We can confirm that we would be willing to work with the Council to prepare a Statement of Common Ground to support the next iteration 'submission' version of the Plan.</p> <p>Our proposed changes are as follows:</p> <p>Amend Fig 5.13: to ensure that the redline corresponds precisely with the black (ownership line) of enclosed Plan Ref: 340/S/101</p> <p>Amend Table 5.3: to 35 dwellings</p> <p>Amend Paragraph 5.97: amend reference to the site area extent to 1.51 ha (i.e. the ownership line outlined in black)</p> <p>Amend Paragraph 5.101: delete reference to grade II listed milestone as its relocation and refurbishment has already been implemented pursuant to 13/06783/LBC (photosheet attached)</p>

Comment ID:	<a href="#">1522</a>	<b>Consultee</b> Braeman Holdings  <b>Person ID:</b> 556645	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Policy H2: we consider that the draft Plan should be making provision for additional growth in Melksham Community Area on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026.</p> <p>There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative sites.</p> <p>There is an acute unmet affordable housing need in the Melksham area, which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing. Additional growth in large villages should be progressed in locations where there are no Neighbourhood Plans in prospect. New housing growth will support existing local facilities such as primary schools.</p> <p>The Housing White Paper (February 2017) seeks to diversify the supply of new housing in response to the dominance of the national / PLC volume home builders. The subject site is of a size that is suitable for development by a local / regional housebuilder.</p> <p>It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in the Melksham Community Area, the subject site should be included allocated for circa 20 homes.</p> <p>Promotion history: Braeman Holdings own the freehold interest of the subject site (SHLAA Ref: 311). The site could also unlock the adjacent SHLAA site No. 317, which is in third party ownership. The subject site lies immediately adjacent to the Atworth Business Park, which is owned by Braeman Holdings. The site has defensible boundaries, and is not subject to any flood risk, arboricultural or other known constraints. Braeman Holdings have undertaken a feasibility study that has confirmed that a vehicular access to the subject site can be formed via the Atworth Business Park through re-organisation of the existing car park. The subject site has potential to accommodate up to circa 20 dwellings with associated landscaping works.</p> <p>Statement of Common Ground: Braeman Holdings confirm their willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that Braeman Holdings would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.</p> <p>Policy H2: to allocate land at Atworth (SHLAA Ref: 311) for circa 20 houses and associated works.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4 Church Lane			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Draft Wiltshire Housing Sites Allocations Plan – June 2017 Pre Submission Consultation Response On behalf of Judith Parry</p> <p>Overall the proposed allocation at Church Lane, Trowbridge is welcomed. The site owner has instructed the completion of the surveys necessary to submit a planning application. It is anticipated that an application can be submitted by the Spring 2018.</p> <p>With regards to the exact wording of Policy H2.4 a revision is necessary to make the Plan as effective as possible. At para 5.67 we would request the wording is changed to:</p> <p>Approximately 3.72ha of land at Church Lane is allocated for the development of at least 45 dwellings, as identified on the Policies Map. The concept masterplan attached has been completed taking into the mitigation requirements as advised following the habitat survey undertaken. The recommendations were the following features should be retained and/or buffered from development (inc residential gardens) by wide (10-16m) dark (,1 lux) continuous corridors of native landscaping:</p> <ul style="list-style-type: none"> <li>- Boundary with Framfield, Church lane</li> <li>- Boundary Hedgerows</li> <li>- Lambrook Stream</li> </ul> <p>Taking this into account as well as other constraints the resultant developable area is 2.75 hectares. This is capable of accommodating in excess of the 45 dwellings envisaged in the wording as drafted.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7 Land East of the Dene		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to:</p> <p>Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and</p> <p>Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p>				

Appendix Q - Schedule of representations

	<p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p> <p>The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Objection to Planning application site 3565 Southwick Court Fields                      Not positively prepared                      This site was considered "less sustainable" at stage 3. We therefore refute the suitability to build on "the edge of the built framework".                      Not consistent with national policy                      Government define housing number needs to Councils. However, Councils should be scrutinising more accurately how those numbers are divided around their county and not be led by developers who seek to make the most profit.                      Wiltshire Council is unfairly in our view promoting 900 homes to be built in Trowbridge that fall within approximately 2 miles of one another. Absurd and not a fair distribution around the County. Ie Chippenham has near links to the motorway but appears not to be taking their equivalent share.                      Other agencies not supporting development at Southwick Court                      The following agencies do not support development on Southwick Field. Clearly their views cannot be ignored nor their reasons why.                      Trowbridge Town Council                      Environment Agency                      Natural England                      Historic England                      County Planning Archaeologist                      Research has provided a response from Natural England case officer stating                      "I have briefly looked at the conclusions/recommendations in the Trowbridge Community Area Topic Paper and have noted the Site 3565 (Land east of the A361 at Southwick Court) is considered To be a less sustainable options for development and that five Moderate adverse effects have been identified in relation to this Site".                      This was the point raised at the very beginning of our objection letter</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The infrastructures are totally insufficient. Trowbridge has acute traffic congestion, during peak times vehicles are nose to tail. More vehicles in this 2 mile radius given traffic is routed only through 2 main routes, increases congestion adds more peril to cyclists, pedestrians, and especially school children who are encouraged to walk. We do not have wide enough roads for cycle routes.</p> <p>Access to Southwick Court fields No indication has been given at this stage although rumoured access would join Silver Street Lane.</p> <p>This is a heavily used road connecting traffic from Frome Road to Bradley Road.</p> <p>Grove Court School has new parking restrictions and parents now park in Silver Street Lane, and Balmoral Road, taking children to and from school. All day Silver Street Lane is busy with parked cars as it would appear staff now need to park there since the parking restrictions. The area is very busy with parents and children walking to and from school and coaches have always needed to park in Silver Street Lane when trips are arranged and children walk to the coach. Accessing a new development into Silver Street Lane with potential of an average of two cars per household x 180 houses bring ridiculous potential risks with dangerous increased levels of commuters.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Health and welfare services are stretched to the limit. Surgeries are indicating closing lists to new patients. We especially need an additional secondary school. Wiltshire Council Education officer actually stated this summer in the local press that without another senior school being built, there will be a shortage of places. Police and emergency services under constant pressure and under resourced. Trowbridge no longer has A&E services after 10pm at night. The RUH in Bath is absolutely working to full potential. We've just had personal in patient experience this month in RUH, when a medical doctor could not admit a single patient until another was discharged. She explained there was a serious shortage of nurses in the current climate. How can another 900 homes be added while the infrastructure is fit to bust?

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>The ditch must be kept intact to sustain drainage.</p> <p>Southwick Court has heavy clay soil that holds the water and exhibits flooding and water pooling long after dryer weather resumes. This is known and well documented and contractors have been undertaking investigations recently in the fields. Extreme flooding has occurred where development has taken place on flood plain land despite developers so saying 'engineering fix is possible'. Tell that to the unfortunate home owners who suffer the 4 consequences. This was well documented by the media in Gloucestershire. Planning authorities must take more responsibility to prohibit such risky development taking place where there is any hint of doubt.</p> <p>Southwick Court fields clearly exhibit high flood plain risks.</p> <p>We take issue that building on Southwick Court puts the bungalows that front the field in particular jeopardy of flooding if a massive concrete development takes place and pushes water towards them. Also being single storey they would be overlooked.</p> <p>The Lambrok brook is essential for the draining of excessive water escaping from Southwick Court fields and we have recordings at different times during the summer indicating the fast flow of water.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Too little emphasis is considered for starter properties. One/two bedroom apartment and flats are ideal for starter homes. Blocks of flats too would enable more homes on land that is already available in the town. A much more economic use of valuable land.</p> <p>More affordable giving an opportunity to obtain home ownership because once renting, people cannot affordably save for a mortgage required for a house.</p> <p>Secondly, many people, single, older, perhaps retired and often want to downsize. If there were more desirable apartments with lower maintenance, downsizing would lead to houses being released to the open market. So many are too big for one occupant but who wants to downsize unless an attractive option is available?</p> <p>Huge lost opportunities here to help first time buyers and downsizing people. It seems all the emphasis is on homes for families.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1538</a>	<b>Consultee</b> Develop 6  <b>Person ID:</b> 1129228	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>  No
				<b>Do you consider the draft WHSAP is sound?</b>  No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Policy H2: we consider that the draft Plan should be making provision for additional housing growth in Melksham on the following basis:                  The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026.                  There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative sites in settlements in the next tier in the settlement hierarchy, such as Melksham.                  There is an acute unmet affordable housing need in Melksham, which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing.                  It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in Melksham, that the subject site should be included as an allocation for circa 80 homes in the draft Plan.                  Promotion History: Develop 6 have agreed a subject to planning promotion agreement with the landowner, to develop the paddock attached to Old Loves Farm for housing which extends to circa 2.5ha. The subject site has not previously been promoted for development, and is not included in the Council's SHLAA register.                  We enclose a copy of the Title Plan, which includes the existing principal dwelling to be retained, and the potential development site.                  Develop 6 are in the process of procuring a technical evidence base to support the site promotion. This will include: a topographical survey; drainage and utilities; heritage; ecology; transport and landscape baseline studies.                  Landscape, ecology and drainage: the site is not subject to any protected landscape or ecological designations, and is contained by defensible boundaries. A Landscape and Visual Appraisal, Phase I Habitat Survey and Flood Risk Assessment will inform the progression of a masterplan.                  Listed Building setting: the setting of the existing grade II listed farmhouse will need to be preserved. Subject to retaining a generous residential curtilage, it is considered that the subject site could be developed whilst preserving the setting of the listed building. The subdivision of the adjoining paddock site will be considered carefully through a landscape-led masterplan, and strict control of building heights through an agreed parameters plan.                  Site access and accessibility: preliminary comments from the project team's transport consultant are set out below:                  The speed limit on the A365 is 40mph which requires visibility splays at the Bowerhill Lane junction of 120m in both directions, which is achievable. It may be necessary to introduce a ghost island right turn lane similar to that at the Hornchurch Road junction to the west.                  To serve a development of circa 80 units Bowerhill Lane would need to be widened to at least a 5.5m carriageway width (ideally 6m) and at least one 2m wide footway, i.e. a total highway width of between 7.5 and 8m. The existing verges and carriageway are in excess of this overall width so it would be possible to implement the required widening.</p>			

Appendix Q - Schedule of representations

	<p>The proposed site is within a convenient walking distance of local primary and secondary schooling together with convenience shopping on the wider Bowerhill Estate. A pedestrian / cycle link is already provided linking Bowerhill Lane through to Hornchurch Road which helps with the overall non-car accessibility of the site. Local bus services are also available on both the A365 and through the Bowerhill Estate.</p> <p>Statement of Common Ground: the site promoter, Develop 6, confirms their willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that Develop 6 would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.</p> <p>Policy H2: Wiltshire Council to allocate the subject site for circa 80 dwelling units on the paddock part of the site, as outlined in enclosed Title Plan.</p>

<b>Comment ID:</b>  	<a href="#">1539</a>	<b>Consultee</b> Mr Paul Clarke PAC Farms LTD  <b>Person ID:</b> 1129236	<b>Agent</b> Miss Emma Greening Senior Planner  Hunter Page Planning  <b>Person ID:</b> 1004509	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Marlborough				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>My Client owns the Manton Estate in Marlborough, and has previously made a SHLAA submission in respect of the attached site. Whilst outside the settlement boundary, the site is not considered to be in an isolated location. There are a number of existing dwellings and commercial units within the vicinity and there is good road access within the estate to the site.</p> <p>It is disappointing that the Allocations Plan fails to allocate any sites within the Marlborough Community Area on the basis that there is only an indicative residual requirement of 17 dwellings within the plan period. Paragraph 47 of the NPPF requires LPA's to boost significantly the supply of housing and it should be acknowledged that the numbers set out in the Core Strategy are a minimum target.</p> <p>The SHLAA submission for the Manton Estate proposes a mixed use residential development for up to 50 dwellings together with the possible conversion of the existing stable block, possibly to create a care home of around 50 beds.</p> <p>There is a requirement within the NPPF at paragraph 50 to deliver a wide choice of high quality homes and create sustainable, inclusive and mixed communities. It is acknowledged in the Wiltshire Core Strategy at paragraph 2.14 that the county has an increasingly ageing population which over the plan period is likely to increase the fastest.</p> <p>Whilst it is acknowledged that the site is located within the AONB, there are already a significant number who live and work on the Manton Estate and the proposals present an opportunity for additional communities facilities for both new and existing residents such as improvements to the village green or additional community or recreation space.</p> <p>Additional development would represent infill development around existing dwellings and commercial space, and should not be viewed as isolated development in the countryside, moreover development within the Manton Estate would help to ensure the sympathetic use and longevity of the estate.</p> <p>The NPPF sets out 4 requirements which Local Plans must meet. Taking each in turn, in summary, the Allocations Plans does not meet these for the following reasons.</p> <ol style="list-style-type: none"> <li>1. Positively prepared: The failure to consider sites within the Marlborough Community Area, will mean that it will be difficult for parishes to meet their housing need.</li> <li>2. Justified: No sites within the Marlborough Community Area have been allocated on the basis that there is no residual requirement for the rest of the plan period. This simplistic approach does not allow for a detailed assessment of individual sites.</li> <li>3. Effective: By not allocating any sites, it is unlikely that Parishes will be able to meet their housing need.</li> <li>4. Consistent with National Policy: The NPPF seeks to significantly boost the supply of housing, and also seeks to plan for a mix of housing based on current and identified future trends. By not allocating sites for development within the Marlborough Community Area, the Plan is not seeking to meet existing needs within the settlement, let alone future needs.</li> </ol> <p>The Council should consider the inclusion of this site, within the Allocations Plan.</p>

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

Alternative sites suitable for development should be discussed in a public forum.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1540</a>	<b>Consultee</b> Freehold Consortium for Harnham Business Park  <b>Person ID:</b> 1129241	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Policy H3; and H3.1: the Freehold Consortium support the principle of a mixed-use allocation of Land at Netherhampton Road. However, they object to the omission of the subject site, Land at Harnham Business Park (SHLAA Ref: Site 3187), from this proposed allocation on grounds of: lack of a comprehensive approach; and an incorrect assessment of the subject site in the Sustainability Appraisal (Ref: Annex 1: A6: pages 112-129). Land ownership the Harnham Business Park, extending to circa 3.0ha as outlined in red on the enclosed Site Location Plan (Ref: 1402/P01), is owned by the 'Freehold Consortium for Harnham Business Park'. We can confirm on behalf of the Freehold Consortium that the subject site remains available for development / allocation. Promotion background: the subject site is previously developed land that was formerly occupied by SSEB as an engineering and maintenance depot. It is understood that the original SSEB building coverage on the site was circa 2,100 sqm and that around 45 FTE jobs were accommodated on the site. Following the closure of the SSEB depot, the subject site has been the subject to a number of previous planning applications and permissions. The southern portion of the site has been developed, and an access road linking the site to Netherhampton Road was installed following the implementation of planning permission S/2004/1779. Booker Cash & Carry occupy a building of circa 680 sqm. The remaining site area of circa 3.0ha remains undeveloped, but continues to be marketed by commercial agents, Myddleton Major. A speculative outline planning application was submitted on the subject site in 2014 for '65 dwellings, public house, 60-bed hotel, 1,902sqm of new business units (B1, B2, B8) and parking, landscaping and associated works' (LPA Ref: 14/08321/OUT). Following an objection from the Council's Spatial Planning Team, the application was withdrawn to enable the site to be promoted through Wiltshire Housing Site Allocations Plan. However, it should be noted that technical reports and baseline studies submitted pursuant to the 2014 application were accepted by the Council and statutory consultees. This confirms that there are no constraints or technical issues that cannot be overcome or mitigated in relation to the future development of the subject site. All previous employment-related planning permissions granted in respect of the subject site have now lapsed. The subject site is not allocated for employment development in the adopted Core Strategy (2015). Ongoing site marketing by the appointed commercial agents, Myddleton Major, confirms that there is no specific demand for the vacant land, and the speculative provision of serviced employment plots (or speculative employment units) in this location would not be viable. Following the withdrawal of planning permission 14/08321/OUT, informal discussions have taken place with both the Council and the promoters of the adjacent site (SHLAA Ref: S1028), Bovis Homes, in respect of the inclusion of the subject site as part of the proposed allocation of Land at Neverhampton Road. The combined sites, including the subject site (3187), were included in a draft Vision Statement that was prepared by Bovis Homes in October 2015.		Effective	
			Consistent with national policy	

Appendix Q - Schedule of representations

Although no formal contract has been agreed between Bovis Homes and the Freehold Consortium, the Consortium wish to continue to collaborate with Bovis Homes and the Council in respect of the promotion of the subject site as part of a comprehensive approach embracing both sites, as envisaged in the aforementioned Draft Vision Statement (2015).  
 We submit that it is essential for the subject site to be included in the allocation under Policy H3.1. The inclusion of the subject site would provide:  
 an attractive frontage to the development with associated public realm enhancement along the A3094, including the long-term preservation and management of the existing avenue of mature roadside trees;  
 provision of a direct pedestrian/cycle links from S1028 to Netherhampton Road;  
 potential to be independently delivered as a first phase of a comprehensive development; and  
 bringing vacant previously developed employment land into viable beneficial use through residential-led mixed-use development, which in turn will reduce the need for greenfield site release.  
 Comments on the Sustainability Appraisal: it is noted that the Sustainability Appraisal assessment rejected the subject site solely on grounds relating to loss of employment land under Objectives 11 and 12. All the preceding Objectives (1-10) were demonstrably satisfied. However, we note that the subject site was measured incorrectly as 1.39ha where as its gross area measurement is in fact 3.0ha. Consequently, the potential residential development capacity of the subject site was underestimated at 35 dwellings. The subject site has capacity to accommodate circa 80-90 dwellings plus associated landscaping and infrastructure.  
 The incorrect reference to the area of the subject site leads us suspect that the external sustainability assessor, Atkins, may have confused the subject site with the adjacent Harnham Trading Estate.  
 The reason for the exclusion of the subject site under the Level 3 assessment is stated under the Objective 12 summary is as follows:  
 "Development of this site would lead to the direct loss of designated employment land. Development of this site would significantly adversely affect the industrial estate and therefore development of this site is considered to result in a major adverse effect against this objective."  
 We submit that this statement is factually incorrect. The land is not 'designated' employment land. It is previously developed land that was last in employment use. It is not allocated employment land in the adopted Core Strategy.  
 It is not clear from Objective 12 summary which 'industrial estate' would be significantly adversely affected. The adjacent Harnham Trading Estate is fully developed and occupied, and the Booker Cash and Carry on the Harnham Business Park is trading.  
 The approach taken by Atkins under Objectives 11 and 12 of their sustainability appraisal appears to have ignored national planning policy as set out in Paragraph 22 of the NPPF, which states:  
 22. Planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. Land allocations should be regularly reviewed. Where there is no reasonable prospect of a site being used for the allocated employment use, applications for alternative uses of land or buildings should be treated on their merits having regard to market signals and the relative need for different land uses to support sustainable local communities.  
 The Freehold Consortium, and their commercial agent advisors, submit that the subject site is not viable for employment development. New larger scale employment land could be included on the land being promoted by Bovis (S1028) and targeted at appropriate employment sectors. The Harnham Business Park site has potential to deliver a first phase of housing and infrastructure as part of an agreed masterplan.  
 Statement of Common Ground: the Freehold Consortium re-confirm their willingness to work collaboratively with Wiltshire Council and Bovis Homes to promote a comprehensive mixed-use development including the subject site and the land being promoted by Bovis Homes. If the Council is minded to include the subject site in the Land at Netherhampton Road allocation under Policy H3.1, we can confirm that The Freehold Consortium would be willing to participate in process of agreeing a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.  
 Policy H3, Policy H3.1: to include Land at Harnham Business Park (Site 3187) in the Land at Neverhampton Road allocation – noting the potential of this previously developed land to contribute circa 80-90 dwellings as part of an early phase of a comprehensive mixed-use development proposal.

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

To make the planning case for the subject 'omission' site to be included as an allocation in the draft Plan.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1541</a>	<b>Consultee</b> Mr Stuart Lee Managing Director  GFL Developments Ltd  <b>Person ID:</b> 1129247	<b>Agent</b> Mr Gary Llewellyn Planning Consultant  <b>Person ID:</b> 399789	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.22		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The provisions of Core Policy 1 (and Core Policy 8) of the adopted Wiltshire Core Strategy (January 2015) indicates that Calne is a “Market Town” within the District’s settlement hierarchy where new housing development (1440) is encouraged to locate. It is seen as having “the potential for significant development that will increase the number of jobs and homes to help sustain/ enhance services and facilities and promote self-containment and sustainable communities”. The supporting text to Core Policy 1 (Paragraph 4.13) states that the town’s development boundary will be reviewed as part of this DPD and its Neighbourhood Plan.			
	The provisions of the NPPF (Paragraph 158) require that a Local Plan be based on adequate up-to-date and relevant evidence. The Wiltshire Housing Site Allocation Plan (WHSAP) and the emerging Neighbourhood Plan both fail in this regard.			
The WHSAP is supported by a Topic Paper (1) which indicates the methodology adopted to review the settlement boundaries. The document indicates that “the Council has undertaken a comprehensive review of the boundaries to ensure they are up-to-date and adequately reflect changes which have happened since they were first established” and the settlement boundaries have been amended “where necessary”(Paragraph 1.3). It is noted that in formulating the new settlement boundary for Calne, due regard has been given to including all “built and commenced planning permissions” but excluding “all types of unimplemented planning permissions” (Table 7.1). This approach is justified on the basis that the schemes may “never get built out and that the final built form may differ substantially from the original permission” (Paragraph 7.13) and as the settlement boundary defines the “built form of the settlement” the such planning permissions “do not form part of the built environment” (Paragraph 7.14). The fact that the Council has given planning permission to such developments confirms that they are, in planning policy and other terms, acceptable. Also, the decision to submit such applications would have been made on the basis there is intent to build out the approved scheme. They will have the usual timescale (3 years) in which to be implemented and, if they do lapse, then the planning history of the site is a material planning consideration for the submission of further planning applications.				
The revised settlement boundary (as shown by a red line) for Calne is still deemed to be out of date and thus not compliant with the advice in the NPPF. It seems to acknowledge some housing developments and not others. In seeking to illustrate the point, these developments have been mapped and are shown on the attached Annex to these representations. The plan indicates that:-				
1. The 124 dwelling housing estate being built by Barratts at Abberd Lane is acknowledged. This was given consent in October 2014 (13/02833/OUT) and August 2015 (15/05254/FUL) respectively.				
2. The 200 dwelling housing estate being built by Hills Homes at Oxford Road is ignored. This was given consent in September 2012 (11/03524/OUT) and May 2016 (15/05831/REM) respectively.				
3. The 12 dwelling housing estate being built by GFL Developments at Sandpit Road is ignored. This was given consent in May 2015 (14/03053/OUT) and January 2016 (15/07282/REM) respectively.				

Appendix Q - Schedule of representations

	<p>The plan also indicates that outline planning permission (16/07531/OUT) was given in March 2017 for a 21 dwelling housing estate at the east end of Sandpit Road. It is understood that this land is to be sold to a developer.</p> <p>The Council currently has 2 applications pending determination; one for Hills Homes (16/05344/FUL) for a 26 dwelling housing estate on Oxford Road and the other for David Wilson Homes (15/11230/OUT and 17/07700/REM) for a 42 dwelling housing estate also on Oxford Road.</p> <p>The reserved matters application by David Wilson Homes also indicates that land immediately to the north of the site is intended to accommodate a further 42 dwellings. This is also the case for GFL Developments who are looking to develop the land to the east of the Hills Homes estate and this is seen as being able to accommodate 100+ dwellings.</p> <p>The emerging Neighbourhood Plan (February 2017) includes a Policies Map (Map 4) which shows a Settlement Framework Boundary (SFB) (CS - CP1) surrounding the town. The identified boundary appears to be the same as that in the former adopted North Wiltshire Local Plan 2011 (2006) which is deemed to be out of date. Also, no indication is given that the SFB (Policy H5) is to be amended despite the Town Council allocating a site for housing development (Policy H1(Site A)) directly abutting it. This allocation is seen as being able to accommodate up to 250 dwellings and will provide significant community benefits.</p> <p>The Topic Paper (1) referred to above indicates (Paragraphs 8.3 and 8.4) that the review of Calne's settlement boundary was done using the following:-</p> <ol style="list-style-type: none"> <li>1. Geographical information system (GIS) data sets, including aerial imagery and ordnance survey maps; and</li> <li>2. Feedback from Planning Officers with relevant local knowledge.</li> </ol> <p>Given the information on the attached map, it would appear that only the housing scheme being built by Barratts was the only one worthy of acknowledgement. Depending on when the Planning Offices provided feedback to the desk-top maps, two sites are currently under construction. As noted above, this includes the large housing estate (200 dwellings) being built by Hills Homes Ltd to the east of Oxford Road, Calne and the small housing estate (12 dwellings) being built by GFL Developments Ltd to the south of Sandpit Road, Calne. In view of the above, the published plan for Calne should be revised to take account of these 2 housing developments.</p> <p>The Topic Paper (1) indicates that where current unimplemented planning permissions are subsequently built out they can be included within a future review (Paragraph 7.14) of settlement boundaries. The situation is such that no indication is given as to the timescale for such a review. The settlement boundary for Calne, for instance, has been in place since the North Wiltshire Local Plan was adopted in June 2006! The Topic Paper recognises that "settlement boundaries represent a snapshot in time" (Paragraph 7.14). This is the problem i.e. they have no flexibility when it comes to acknowledging and accepting changes in circumstances. The NPPF requires the supply of housing to be boosted significantly (Paragraph 47) and so overly restrictive settlement boundaries are more of a hindrance than a help in this regard.</p> <p>The recognition of unimplemented planning permissions on sites within a settlement boundary will show that, at some time, they will come forward thus giving a degree of certainty to all parties, including the landowner, developer and Council. It is noted that the Footnote (11) to the second bullet point of Paragraph 47 of the NPPF indicates that "sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within five years, for example, they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans." Again, as noted above, the planning history of a site is a material planning consideration and so any future applications for housing would have to take this into account.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1542</a>	<b>Consultee</b> W N Overy  <b>Person ID:</b> 704465	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.7 Land East of the Dene				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p> <p>The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Policy H2: we consider that the draft Plan should be making provision for additional growth in Melksham Community Area on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026.</p> <p>There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative sites.</p> <p>There is an acute unmet affordable housing need in the Melksham area, which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing.</p> <p>Additional growth in large villages should be progressed in locations where there are no Neighbourhood Plans in prospect. New housing growth will support existing local facilities such as primary schools.</p> <p>Housing White Paper (February 2017) seeks to diversify the supply of new housing in response to the dominance of the national / PLC volume home builders. The subject site is of a size that is suitable for development by a local / regional housebuilder.</p> <p>It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in the Melksham Community Area, the subject site should be included allocated for circa 12 homes.</p> <p>Promotion history: Doric Developments (Bath) Ltd own the freehold interest of the subject site.</p> <p>The subject site measures approximately 1.72ha and comprises an agricultural paddock adjacent to Lagard House. The site is also bounded by First Lane to the north; Corsham Road (B3353) to the east; and a water course to the south known as South Brook.</p> <p>The enclosed Environment Agency Flood Risk Map extract confirms that only the south eastern part of the site is situated within Flood Risk Zones 2 and 3. The paddock is relatively open and is not constrained by trees or any known protected species. No landscape or other designations are applicable.</p> <p>A pre-application enquiry was submitted to Wiltshire Council in August 2016. Written pre-application advice was received in September 2016 (16/07809/PREAPP). This confirmed that all technical issues associated with the delivery of the site could be addressed, and as such it is concluded that circa 8 No. dwellings plus an overflow car park for the primary school could be accommodated on site.</p> <p>Statement of Common Ground: Doric Developments confirm their willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that Doric Developments would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.</p> <p>Policy H2: to allocate land at Whitley (SHLAA Ref: 3459) for circa 8 houses and associated works including the provision of an overflow parking area for the primary school.</p>

We are of the view that these two properties should be excluded on the grounds that the combined site "... has the capacity to substantially extend the built form of the settlement in terms of scale and location." We are of this opinion because the site is a substantial one at the end of a narrow lane which makes access difficult. It is also in close proximity to North Meadow National Nature Reserve which is a Site of Special Scientific Interest. Therefore the possibility of this site being proposed for 'infill' development at some stage in the future should be resisted.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to add my voice to object to the proposed building on land the Trowbridge side of Elizabeth Way.</p> <p>I feel that if you are to build houses (180 odd) on that side of the road, then in due course there will be building on the Hilperton Gap side. This is what I really object to . Hilperton as a village needs to keep its autonomy and not just become an urban sprawl into Trowbridge. The land on the Hilperton side needs to be kept safe in the way it is, green fields. I would not like to see housing on the Trowbridge side spill onto the other side of Elizabeth Way.</p> <p>What guarantees would there be? We cannot have surrounding villages like Hilperton and others on the other side of Trowbridge (for example, Southwick/North Bradley), becoming sucked into Trowbridge.</p> <p>There are other brownfield sites which are available to build on nearer to Trowbridge; why not use those, and not build on green field sites. Also building on Hilperton Marsh which is liable to flood etc (hence the name!) seems somewhat shortsighted.</p> <p>I hope my comments will be taken into account.</p>

Comment ID:	<a href="#">1550</a>	<b>Consultee</b> Juliett Todd  <b>Person ID:</b> 1129287	<b>Agent</b> Miss Emma Greening Senior Planner  Hunter Page Planning  <b>Person ID:</b> 1004509	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.36 Oaksey		Justified
				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The site with which this representation relates is SHLAA Site 3349 Street Farm Paddocks, Oaksey, together with the former agricultural/commercial buildings along the street frontage.</p> <p>Oaksey is identified within the Core Strategy as a large village which policy CP1 describes as a settlement with a limited range of employment, services and facilities. The policy further states that development at large villages will be limited to that needed to help meet the housing needs of settlement and to improve employment opportunities, services and facilities.</p> <p>The Allocation plan only proposes to allocate 40 additional dwellings within the Malmesbury Community Area, despite there being a residual requirement for 70. It is also noted that the NPPF at paragraph 47 requires LPA's to boost significantly the supply of housing.</p> <p>My clients site is currently located within the settlement boundary for boundary and is therefore currently considered acceptable in principle for development.</p> <p>The Allocations Plan proposes to amend the settlement boundary so that it excludes this site.</p> <p>The justification for the amendments to the settlement boundary are to exclude the area which is more closely related to the countryside.</p> <p>The site in question comprises a paddock in the centre of the village, there are clearly defined boundaries around the site which means that there would be no further encroachment into the countryside and in addition, the residential curtilages to the east extend almost in line with the rear of the site. The site is located in the centre of the village, close to the Village Hall, primary school and bus stop. As a result, the site is seen as a sustainable location within the village. The allocations plan seeks to extend the settlement boundary for Oaksey in a linear fashion away from the centre of the village and its associated facilities, which is considered to be less suitable.</p> <p>The site assessment for site 3349 excluded it at Stage 2, because there is uncertainty over how direct vehicular access to the site would be achieved. My client is currently preparing a planning application, that would utilise the access from Cargill Place into the site which would overcome the concerns relating to the access. The initial SHLAA site proposed a total of 18 dwellings in this location, however my client is looking at a smaller number of dwellings (3-5) which would be more in keeping with the character of the Conservation Area and adjoining heritage assets. The development of the proposed paddock will also assist in enabling the sympathetic conversion of the traditional barns to the front of the site fronting onto 'The Street' ensuring that the new development integrates well with the existing built form.</p> <p>Given that the concerns over the access can be overcome, the site is considered to be available and suitable for development. A lower density proposal with suitable landscape treatment will also ensure that the development will assimilate with the current development boundary and provide a clear definition between countryside and settlement.</p> <p>Between 2006 and 2016, there have only been 13 completions within the village of Oaksey, and in order to survive in a sustainable manner villages need some growth. Within Oaksey, the only site which was taken forward beyond stage 2a was land at Wick Road. However further assessment of this revealed significant sites constraints.</p>		

Appendix Q - Schedule of representations

	<p>The NPPF sets out 4 requirements which Local Plans must meet. Taking each in turn, in summary, the Allocations Plans does not meet these for the following reasons.</p> <ol style="list-style-type: none"> <li>1. Positively prepared: The proposals fail to allocate a site within Oaksey despite it being identified as a large village. The lack of housing proposed and the removal of suitable sites from the settlement boundary will mean that the village is unable to meet any local housing need.</li> <li>2. Justified: Given the constraints relating to the Wick Road site, there are not considered to be any suitable alternatives within the village and as such the settlement boundary should remain in its current location so that Street Farm Paddocks is included.</li> <li>3. Effective: By amending the settlement boundary in the centre of the village, it means that development will extend in a linear fashion, whereas retaining the settlement as existing will ensure additional development in the centre of the village which is seen as more sustainable.</li> <li>4. Consistent with National Policy: The NPPF seeks to significantly boost the supply of housing, by removing sustainable sites from the settlement boundary, this will mean that in time Wiltshire will be unable to meet its Objectively Assessed Need.</li> </ol> <p>The settlement boundary should be retained in its current position to include SHLAA site 3349 Street Farm Paddocks.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4716433</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>It is necessary for the debate associated with change in settlement boundary to be discussed in a public forum.</p>

Oaksey is identified within the Core Strategy as a large village which policy CP1 describes as a settlement with a limited range of employment, services and facilities. The policy further states that development at large villages will be limited to that needed to help meet the housing needs of settlement and to improve employment opportunities, services and facilities. The Allocation plan only proposes to allocate 40 additional dwellings within the Malmesbury Community Area, despite there being a residual requirement for 70. It is also noted that the NPPF at paragraph 47 requires LPA's to boost significantly the supply of housing. My clients site is currently located within the settlement boundary for boundary and is therefore currently considered acceptable in principle for development. The Allocations Plan proposes to amend the settlement boundary so that it excludes this site. The justification for the amendments to the settlement boundary are to exclude the area which is more closely related to the countryside. The site in question comprises a paddock in the centre of the village, there are clearly defined boundaries around the site which means that there would be no further encroachment into the countryside and in addition, the residential curtilages to the east extend almost in line with the rear of the site. The site is located in the centre of the village, close to the Village Hall, primary school and bus stop. As a result, the site is seen as a sustainable location within the village. The allocations plan seeks to extend the settlement boundary for Oaksey in a linear fashion away from the centre of the village and its associated facilities, which is considered to be less suitable. The site assessment for site 3349 excluded it at Stage 2, because there is uncertainty over how direct vehicular access to the site would be achieved. My client is currently preparing a planning application, that would utilise the access from Cargill Place into the site which would overcome the concerns relating to the access. The initial SHLAA site proposed a total of 18 dwellings in this location, however my client is looking at a smaller number of dwellings (3-5) which would be more in keeping with the character of the Conservation Area and adjoining heritage assets. The development of the proposed paddock will also assist in enabling the sympathetic conversion of the traditional barns to the front of the site fronting onto 'The Street' ensuring that the new development integrates well with the existing built form. Given that the concerns over the access can be overcome, the site is considered to be available and suitable for development. A lower density proposal with suitable landscape treatment will also ensure that the development will assimilate with the current development boundary and provide a clear definition between countryside and settlement. Between 2006 and 2016, there have only been 13 completions within the village of Oaksey, and in order to survive in a sustainable manner villages need some growth. Within Oaksey, the only site which was taken forward beyond stage 2a was land at Wick Road. However further assessment of this revealed significant sites constraints. The NPPF sets out 4 requirements which Local Plans must meet. Taking each in turn, in summary, the Allocations Plans does not meet these for the following reasons.			
	Effective  Consistent with national policy			

Appendix Q - Schedule of representations

	<p>1. Positively prepared: The proposals fair to allocate a site within Oaksey despite it being identified as a large village. The lack of housing proposed and the removal of suitable sites from the settlement boundary will mean that the village is unable to meet any local housing need.</p> <p>2. Justified: Given the constraints relating to the Wick Road site, there are not considered to be any suitable alternatives within the village and as such the settlement boundary should remain in its current location so that Street Farm Paddocks is included.</p> <p>3. Effective: By amending the settlement boundary in the centre of the village, it means that development will extend in a linear fashion, whereas retaining the settlement as existing will ensure additional development in the centre of the village which is seen as more sustainable.</p> <p>4. Consistent with National Policy: The NPPF seeks to significantly boost the supply of housing, by removing sustainable sites from the settlement boundary, this will mean that in time Wiltshire will be unable to meet its Objectively Assessed Need.</p> <p>The settlement boundary should be retained in its current position to include SHLAA site 3349 Street Farm Paddocks.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4716433</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>It is necessary for the debate associated with change in settlement boundary to be discussed in a public forum.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Contradictions in the Strategy  A core strategy or local plan is considered "sound" when it is consistent with national policy.  Paragraphs 72,111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide:  The infrastructure required in the area, be drawn up over an appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.  I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Accessibility                  The A361 is a blackspot for accidents both "In the dip" where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. Also, sites at Church lane, Southwick Court and Old Brickfields are being considered as they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles) No evidence has been provided that this would be the case. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I've lived in Crudwell for a number of years, and feel that the development proposed for the village is ill thought and too invasive. Adding another 40 houses to the site raises all sorts of issues: I suspect that most of the residents of the new homes will be employed elsewhere - I was under the impression that new development would only be supported by Wiltshire Council if they improved employment opportunities, services and facilities. I guess my main issue is that for various reasons we don't have the protection and strategy of a Neighbourhood Plan, so we're being taken advantage of. What really should be happening is allow us to create our Neighbourhood Plan so that a comprehensive survey followed by an analysis of how Crudwell can be produced. Once we know the limitations and opportunities, then sensible development guidelines can be put in place. I genuinely believe that there is room for development in Crudwell, especially mixed private/social housing that includes starter homes so my children can afford to live in the village they were brought up in, and homes for people like me who will want to downsize soon but have to leave the village. I just don't want another 40 houses foisted on us - it'll chnge the whole character of the place.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Objection 1 to: Plan at p43 titled: “Durrington: Proposals for revised Settlement Boundaries”</p> <ol style="list-style-type: none"> <li>1. We object to the proposed revisions to Durrington’s settlement boundary because of two fundamental flaws: Flaw 1 – the boundary proposed is unsound because it fails to be consistent across Durrington and Bulford.</li> <li>2. For example, there are two areas where the Authority has correctly applied their boundary criteria to include two fringe areas that are clearly part of their respective settlements – see BEN 0001: <ol style="list-style-type: none"> <li>a) Durrington School and Leisure Centre (yellow)</li> <li>b) Western extent of Bulford (blue)</li> </ol> </li> <li>3. However, we do not understand why Officers have not included the northwestern extent of Durrington (pink - see BEN 0001). We believe this decision has been contrived to favour their proposal for just 45 houses at H3.5 (more of which in our other objections) and not for sound planning reasons. Because the boundary has been contrived to exclude most of S98 (our client’s land) we consider the revised boundary plan has not been positively prepared, nor has it been justified why it excludes S98 – rendering the boundary plan – ineffective and inconsistent with national policy that requires sufficient land to be allocated to provide a 5-year housing land supply and to provide sufficient deliverable land over the plan period in South Wiltshire.</li> <li>4. Proposed solution: See BEN 0002 identifies our preferred settlement boundary based on a clear understanding of the urban area.</li> <li>5. Justification: The criteria for defining settlement boundaries should be applied reasonably and consistently along easily identifiable and defensible features on the ground. Boundaries should be based on a clear understanding (not a muddled one) of the urban area. Boundaries should define what is and is not - going to be - part of Durrington. Those same boundaries must protect the open countryside from urban sprawl in the mid to long term. Clearly there is no point in excluding previously developed land that is obviously part of Durrington. We would include within this judgment some weight being given to residents’ perceptions of whether ‘their houses’ are ‘in’ Durrington.</li> <li>Flaw 2 – Durrington’s proposed boundary proposal is unsound because it fails to identify land to be allocated for development on the urban fringe of Durrington and Durrington’s Conservation Area boundary.</li> <li>7. Proposed solution: Our plan BEN 0003 should replace the Authority’s Proposed revisions to Durrington’s boundary. It will allow an understandable and simple policy document – using old-style Local Plan Proposal Plans methodology – to show essential related designations side by side – overlaying each other where necessary, to deliver a positive, justified and effective simple and sound document that is much more consistent with national policy. It will be easier for the public to understand BEN 0003.</li> <li>8. New allocated sites should be identified alongside the settlement boundary because they will establish the new outer edge of the settlement boundary by 2026 (just 9 years away). Not including them now has already generated confusion amongst the public. Not including them</li> </ol>				

Appendix Q - Schedule of representations

	<p>indicates the Authority may not believe them to be likely to be built in the plan period, undermining the Plan's clarity and, quite probably, public confidence in this document.</p> <p>9. It is also unsound not to include Durrington's Conservation Area boundary on the Durrington's settlement boundary plan because CAs identify the settings and important spaces around buildings and settlements. It is vital information of equal importance to settlement boundaries. Conservation Area boundaries should always be shown alongside the settlement boundary (see BEN 0002).</p> <p>10. Proposed solution: See BEN 0003 identifies a sound way forward based on a clear understanding of the urban area and the inclusion of site S98 at Hackthorne, Durrington for residential development.</p> <p>11. Justification: The criteria for defining settlement boundaries should be applied reasonably and consistently along easily identifiable and defensible features on the ground. Boundaries should be based on a clear understanding (not a muddled one) of the urban area and the need to provide sustainable housing development. Boundaries should define what is - and is going to be - part of Durrington by 2026. Those same boundaries must protect the open countryside from urban sprawl up to and after the end of the Plan period (2026). Clearly there is no point in excluding previously developed land that is already part of Durrington (see BEN 0002), that is not any longer part of the open countryside anymore.</p> <p>12. We are proposing a sustainable and balanced approach to the future of Durrington, by allocating site S98 that already falls within and on the urban fringe of Durrington at Hackthorne. Our Plan BEN 0003 will meet Durrington's and The Amesbury Community Area's housing need to 2026.</p> <p>By allocating further land the WHSAP will be more likely to meet the 5 Years Housing Supply for the Amesbury Community Area to the end of the period (2026) and housing generally in this area during the Plan period.</p> <p>To deliver this much needed housing there need to be several corrections to the currently unsound proposals for revisions to Durrington's Settlement Boundary in accordance with our other objections, including Objection 1 and our plans BEN 0001, 0002 and 0003 submitted today with this form.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4716538</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To explain to the Inspector the merits of this objection and to examine in public the Authority's case, as presented to the Examination (assuming the Authority to not accept our objections and modify the WHSAP).</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1584</a>	<b>Consultee</b> Mr Richard Greenwood  <b>Person ID:</b> 1119095	<b>Agent</b> Richard Greenwood Director  Benchmark Development Planning Ltd  <b>Person ID:</b> 894742	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.5 Clover Lane, Durrington		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Objection 2 to: The Draft Housing DPD and whole supporting background documentation about housing, H3.5 and S98 and including The Sustainability Appraisal p106 - 111 titled: "Amesbury Community Area Topic Paper – Cabinet Version"</p> <p>1. We object to the Authority's Sustainability Appraisal of S98 at Hackthorne (Durrington) that concluded at Stage 4 that this site was – partially – less sustainable, because of two fundamental flaws:                  Flaw 1 – the assessment is unsound because it failed to understand available information leading to a biased Sustainability Appraisal and unduly harsh recommendation to remove most of S98 from H3.5.                  2. The Authority's Sustainability Appraisal is a sequence of arbitrary and quite generalised judgements leading to a convenient and contrived conclusion about S98. We have tried to make it as easy as possible for the Inspector to understand our point of view by drawing together in one place the Authority's Sustainability Appraisal on S98 at their Stages 1, 2, 3 and 4 at our Appendix 1. It is important to note that this site passes all the Stages, except Stage 4. The Authority then state somewhat irrationally – before excluding the main part of S98, at Stage 4: "Assessment Results (for S98) No major adverse effects have been identified."                  See p106 of the Cabinet Report – at Appendix 1.                  3. We do not understand why Officers have not included ALL of S98 for a 100 – 140 much needed houses (red line - see BEN 2001 – at Appendix 2) if there are: "No major adverse effects." We consider the decision to split S98 and favouring just 45 houses at H3.5 (more of which in our other objections) is not based on sound, up to date and relevant planning information. Because the Sustainability Appraisal has been contrived to exclude most of S98 (our client's land) we consider the plan has not been positively prepared, nor has it been justified why it excludes most of S98 – rendering the plan – ineffective and inconsistent with national policy that requires sufficient suitable land to be allocated to provide a 5-year housing land supply and to provide sufficient deliverable land over the plan period in South Wiltshire.                  4. Proposed solution: See BEN 2001 at Appendix 2 that identifies our preferred settlement boundary around the allocated site S98 that should become part of an enlarged Site H3.5 based on a clear understanding of the settlement and a revised Sustainability Appraisal.                  5. Justification: The Sustainability Appraisal criteria for assessing potential housing sites should be applied reasonably and consistently based on a clear understanding (not a muddled one) of the area (see our Sustainability Appraisal at Appendix 3 etc).                  6. Flaw 2 – Proposed H3.5 Clover Lane is unsound because it fails to allocate 1,783 sqm (0.18 ha) of land that passes their own Sustainability Appraisal (with flying colours) near the Stables and adjacent land all within S98.                  7. Proposed solution: Our plan BEN 2002 at Appendix 4 identifies the parcel of 0.18 ha land that the Authority may have by error failed to include within their own assessment of H3.5. Our plan also includes the 0.59 ha parcel of S98 already allocated within H3.5 (total area 0.18 + 0.59 = 0.77 ha).                  8. Overall Objection 2 Conclusions:</p>				

Appendix Q - Schedule of representations

	<p>We are proposing a sustainable and balanced approach for the future of Durrington, by allocating all site of S98 and H3.5 within and on the urban fringe of Durrington at Hackthorne. Our Plan BEN 2001 at Appendix 1 will meet Durrington's and The Amesbury Community Area's housing need to 2026.</p> <p>By allocating further land the WHSAP will be more likely to meet the 5 Years Housing Supply for the Amesbury Community Area to the end of the period (2026) and housing generally in this area during the Plan period.</p> <p>To deliver this much needed housing there need to be several corrections to the currently unsound proposals for revisions to Durrington's Settlement Boundary and proposed housing allocations at H3.5 and H3.6.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.3		Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>(1) Positively prepared - In regard to my submission the proposal lacks local understanding.</p> <p>(2) Justified - Based on wrong information</p> <p>(3) Effective - Arising from (1) &amp; (2) impossible</p> <p>(4) Consistent with national policy - Bad information and interpretation might result in a breach of national policy.</p> <p>There has to be a risk that if legislation drives a particular course there might be a case to answer if inappropriate measures are taken, outside the primarily intended framework established under that legislation, to provide a result not created within the main intention of parliament.</p> <p>I am not aware that the above relates to my particular issue.</p> <p>PLEASE SEE ATTACHED SUBMISSION [inserted below] BY Mr &amp; Mrs Reynolds and that included in respect of immediately adjacent ground owned and occupied by Mr WVG Hall of Clyffe Hall Market Lavington.</p> <p>I now write on behalf of my wife and I to object to the detailed Red edging indicated on the Market Lavington Proposals for Revised Settlement Boundaries as it directly affects our ownership and right of way at this address. Plan No 1 shows our ownership edged Green; our right of access to this property coloured Brown and shared ownership of 41 The Spring edges Orange. I would ask that our plans be read with the Settlement Boundary Revision Plan for Market Lavington. For purposes of the mutual convenience of my neighbour Mr W V G Hall and Wiltshire Council included also in the submission is a proposed revision relating to a small piece of land within the kitchen garden of Clyffe Hall coloured Yellow on Plan No 3A.</p> <p>Introduction</p> <p>The whole of this land was, and indeed part still is, owned with Clyffe Hall, positioned to the West where the house and a small piece of land surrounding it is edged Red under the revised proposals.</p> <p>In the late 1950's two broiler house units for chicken meat production were erected on the site of our house and were in production until one burned down in 1995. Plan No 1 shows their positions within the subject site edged Green.</p> <p>In 1996 planning permission K/032707 was granted to build our present house on the basis that the other undamaged broiler house was demolished. Of course the reason our planning application was agreed was because a residential use of the site was preferable to the smelly, noisy chicken fattening units.</p> <p>The planning permission K /032707 granted ( copy enclosed), and it was our expectation anyway, designated land area lying North of the Lavington School playing field and bounded to the East by the Lavington School access road and in the West by Clyffe Hall ownership as amenity ground associated with Parsonage Mead (condition No 09). The accepted reason for the land designation of our garden/amenity ground was to be sure that we would not seek to replace the chicken houses after our dwelling was completed. New chicken houses would have required planning permission because the land was no longer designated as agricultural. Planning legislation has since changed.</p> <p>The later work creating the existing village boundary plan adopted by Kennet District Council used as their village boundary the line of the South wall of the Southerly chicken house the OS extract shows the buildings and of course you have the County Proposals dated 2017 edging the</p>			

Appendix Q - Schedule of representations

2002 village boundary Blue more or less accurately. This Kennet designation does not reflect the natural and actual use made of the land edged Green in Plan No 1

We objected to the Kennet draft plan a single copy of which I hold but may well be available from Wiltshire records only in minor detail as to certain of the boundary lines shown but lost the majority of our submission which is why the village boundary as it now exists takes arbitrary lines across our immediate garden and amenity area which have since received appropriate planting. It would really be much better if the revised village boundary that I propose in respect of the amenity land attached to this house uses natural existing hedge and fence delineations but that is less vital than maintaining at least those created in 2002.

The Inspector found for us in regard to our small set of buildings which he advised might be included within the revised village boundary with our house which we were living in by 2002. This 'U' shaped single storey timber, brick and tile structure is edged Pink on Plan No 3

Thus there has occurred a revision from agricultural to residential/amenity use over this ownership edged Green on Plan No 2 enclosed.

Submission A

You will readily appreciate that under the County's current proposals the garden area running with this house is thought appropriate to extend to the stream and that seems to us to be a pretty fair guess at what might be useful as garden ground with this property based on a common urban configuration but is not suitable here with the important established boundaries as they exist and the opportunity given to us and later gardeners. It does look as if there might be some confusion as to land use associated with Parsonage Mead where our garden and amenity area have been excluded from within the village boundary because the ground is still thought to have an agricultural connotation.

The Kennet boundary along the South did not recognise the natural needs of the house as I have said and so far as our planting associated with this property affects the matter as indeed it must we would submit that the new village boundary ought to run along the stream for the full width of the present ownership so that at least this land here is secure within the village boundary and properly regarded as land running with Parsonage Mead.

However none of the land included within the planning permission for Parsonage Mead either side of the stream can be separated from Parsonage Mead because it is so important to the best enjoyment of the house.

Access to the area South of the stream is only available over good culverts presently. Although it would be a major alteration to the settlement limits really the line ought to extend to the playing field boundary to our South.

I should explain that we have purchased 25 The Spring, Market Lavington as a 'downsizing exercise' and have obtained planning permission (reference 17/01098/FUL) to construct an extension onto this chalet/bungalow using land running with Parsonage Mead which blocks the highway access to the subject land edged Green on Plan No 1. The planning department was somewhat reluctant to grant the permission we sought because the land was thought to be agricultural but fortunately our permission conditions for this house referred to above were considered appropriate to allow the development. Our permission was granted long after the new revised settlement boundaries were proposed some months ago.

In purchasing 25 The Spring, constructing our extension to the building and forming a garden area to the South and West, we have blocked the opportunity to develop South of 27, 29 and 31 The Spring; a suggestion put to us on a number of occasions.. We would ask that, since the designated land use will continue, the new village boundary be moved at least to the stream, but preferably using the playing field boundary already referred to, and by using also as the boundary the ownership onto the playing field road on the East. Plan No 2 shows our request edged Green. I do hope that you will understand that by physical action we minimise the opportunity to develop the existing garden running with this house but do need County support to allow its use as 'within' the village exactly as intended by our original Permission envisaged in 1996 when the agricultural use was abandoned.

Lastly on this matter I would say that the garden ground we are retaining with 25 The Spring extends from The B3098 to the stream for ground source heating; the new owner of Parsonage Mead will be granted amenity rights over our garden in order to have access to his paddocks for special purposes.

Parties are happy for all matters to be separately considered but really the basic submission is pretty similar as to each aspect. We are looking for the most appropriate designation for the relevant land areas.

We understand that there are great number of words used in making this submission for which we apologise but the matter does have planning history and the current proposals appear to seek to limit existing use designations by giving guidance for the future never intended originally.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>(1) Positively prepared - In regard to my submission the proposal lacks local understanding.</p> <p>(2) Justified - Based on wrong information</p> <p>(3) Effective - Arising from (1) &amp; (2) impossible</p> <p>(4) Consistent with national policy - Bad information and interpretation might result in a breach of national policy.</p> <p>PLEASE SEE ATTACHED SUBMISSION [inserted below] BY Mr &amp; Mrs Reynolds and that included in respect of immediately adjacent ground owned and occupied by Mr WVG Hall of Clyffe Hall Market Lavington.</p> <p>Submission B</p> <p>I now refer to a very small area of the new Market Lavington Boundary Proposal.</p> <p>The new settlement boundary has been drawn in the most odd way at and near our access point onto the B3098 and we just cannot understand why so close to and associated with the very busy junction of the Lavington School junction with the B3098 road. Of course the County do regard the Lavington School land East of the present school buildings as suitable for residential development and my understanding is that highway access to this land will be via the existing school drive.</p> <p>Please see Plan Nos 3 &amp; 3A which indicates the following;</p> <p>Part of Parsonage Mead edged Green as in Plan No 1,</p> <p>The access to Parsonage Mead edged Brown.</p> <p>41 The Spring edged Orange</p> <p>The 2002 Kennet village boundary shown Blue</p> <p>'U' shaped buildings, part of Parsonage Mead, edged Pink</p> <p>The proposed Wiltshire Market Lavington Settlement boundary in Red is shown on Plan 3A.</p> <p>Access to greenhouses coloured Yellow on plan 3A</p> <p>The County proposal is to exclude the 83098 from the village at our access way to this house and the frontage of 41 The Spring, although there is the pedestrian pavement on the South side, such that our access would be outside the settlement boundary but our land and buildings within it. The county proposal would appear to us to be a contrived proposal which is pretty nearly impossible to see on the published plan and we really cannot find out why it was drawn in this way - we have been advised to 'make a proposal' under the relevant provisions at the exhibition day held in Devizes in order to find out. However our proposal is an actual submission for a change in the boundary line shown.</p> <p>Whatever the thinking that proposes a complicated piece of edging the consequence is to place a different basis for thinking, in planning terms, how a short length of private drive - about 18 m - should be used to the house and associated buildings it serves. This may be a mistake but might in the future affect an intention we have to improve the access situation for 41The Spring by creating a driveway into the North garden and indeed the building edged Pink.</p>				

Appendix Q - Schedule of representations

	<p>We would be grateful if you would consider including the full length of the drive within the settlement boundary and the adjacent part of the 83098 thus allowing 41 The Spring the same planning considerations as the other dwellings fronting onto The Spring as well as Parsonage Mead, our house and the buildings with it..</p> <p>We have referred already to the designation of garden/amenity land running with Parsonage Mead but also ought to ask that the 83098 be included within the settlement boundary to the playing field access way as the Green edged land fronts onto this road; of course this frontage is now forming the garden and access for 25 The Spring discussed above.</p> <p>Parties are happy for all matters to be separately considered but really the basic submission is pretty similar as to each aspect. We are looking for the most appropriate designation for the relevant land areas.</p> <p>We understand that there are great number of words used in making this submission for which we apologise but the matter does have planning history and the current proposals appear to seek to limit existing use designations by giving guidance for the future never intended originally.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1589</a>	<b>Consultee</b> Mr Slater Reynolds  <b>Person ID:</b> 396105	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.3				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>(1) Positively prepared - In regard to my submission the proposal lacks local understanding.</p> <p>(2) Justified - Based on wrong information</p> <p>(3) Effective - Arising from (1) &amp; (2) impossible</p> <p>(4) Consistent with national policy - Bad information and interpretation might result in a breach of national policy.</p> <p>PLEASE SEE ATTACHED SUBMISSION [inserted below] BY Mr &amp; Mrs Reynolds and that included in respect of immediately adjacent ground owned and occupied by Mr WVG Hall of Clyffe Hall Market Lavington.</p> <p>Submission 3</p> <p>I now refer also to a strip of land within the Clyffe Hall kitchen garden area shown Yellow on Plan No 3A. Mr Hall feels that it would provide a more successful village delineation if the strip which contains pedestrian access at its Northern end from the highway to the greenhouses within the garden, which are themselves include within the settlement area, is included as well. Along the full length of the drive passing the kitchen garden land is a brick wall so this access way is important to the ability to reach the greenhouses built along this wall from the corner entrance. This is a small case of practical garden amenity management.</p> <p>Independently of the submission in the previous paragraph it is important to us that the settlement boundary is taken at least along the wall on the West side of our entrance way in order that Parsonage Mead has the same rights of access to the highway as houses normally have within the Red edging shown on the Country proposal. Similarly there must be a potential worry about access to 41The Spring which lies East of the access drive referred to above. This is the same point as that above but might be considered beneficially with this section too.</p> <p>It will be seen that the little 'U' shaped building is within the proposed settlement boundary and we have recently made enquiry about its future use. This listed structure ( a listing relating to that of Clyffe Hall originally) is regarded as suitable in principal for residential use subject to stringent conditions and so we want to arrange vehicular access within the Market Lavington Plan. For this additional reason we would request that the settlement boundary be located on the Western side of the access way during its initial run to our property from the 83098.</p> <p>It is considered much more sensible to relocate the vehicular access into 41 The Spring directly off the 83098 rather than down the access we share which is why we think it better for our needs and for those using the footpath for this length of highway to be within the settlement boundary.</p> <p>Parties are happy for all matters to be separately considered but really the basic submission is pretty similar as to each aspect. We are looking for the most appropriate designation for the relevant land areas.</p> <p>We understand that there are great number of words used in making this submission for which we apologise but the matter does have planning history and the current proposals appear to seek to limit existing use designations by giving guidance for the future never intended originally.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Objection 4: Site H3.6 Land at Larkhill Road, Durrington</p> <p>1. We support the allocation of proposed Housing H3.6 at Larkhill Road, owned by the Objector. It is suitable, available and viable for immediate housing development.</p> <p>2. The owners of H3.6 also own all the land down the River known as Site 3179.</p> <p>3. At Stage 4 of the Sustainability Appraisal, Site 3179 was assessed and it was recommended the northern part of the site be allocated for housing. The key part of that plan is below: [map extract – refer to attachment]</p> <p>4. The Draft Housing DPD might allocate a slightly different site in the area the Vets on the eastern side of 3179: [map extract – refer to attachment]</p> <p>5. In any event, this Objection confirms that the area shown in red is owned by the objector and it is respectfully requested that it is added back into H3.6: [map extract – refer to attachment]</p> <p>6. We are therefore asking for H3.6 to be amended as follows – see yellow shade: [map extract – refer to attachment]</p> <p>By allocating further land the WHSAP will be more likely to meet the 5 Years Housing Supply for the Amesbury Community Area to the end of the period (2026) and housing generally in this area during the Plan period. To deliver this much needed housing there need to be several corrections to the Draft Housing DPD.</p>				
<b>Attached files (Please see Objective)</b>	4716754				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	To explain to the Inspector the merits of this objection and to examine in public the Authority's case, as presented to the Examination (assuming the Authority to not accept our objections and modify the WHSAP).

		Person ID: 1129432	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I would like to lodge my objection to the Ridgeway Farm site allocation (consultation closes 22 September 2017). As a resident of Crudwell village, I feel that an addition of 40 new houses (representing a 20% increase in dwellings in the village) is far too demanding on the fragile infrastructure of our village. I welcome the chance to set out my views and to participate in a fair consultation process.</p> <p>The main points of my objection are listed below, in no particular order:</p> <p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell.</p> <p>A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p> <p>Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met.</p> <p>Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan, not via the whims of local landowner wishing to make a profit.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Crudwell Primary School is already greatly oversubscribed with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed and the governors and teachers have already expressed concern and noted their inability to expand in the short term.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There is significant community concern about safety and the increased traffic flows that will arise on Tetbury Lane particularly during morning and afternoon school runs, and particularly given the location of the Ridgeway site on Tetbury Lane. The lane is narrow and has only limited and broken stretches of pedestrian pathway down to the A429 main road and to the School and other facilities in the village. In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell in not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>INSUFFICIENT TRANSPORT &amp; GREEN INFRASTRUCTURE • Para 5.128 of the Draft Allocation Plan says: “ • Housing development at Small Villages is required to take the form purely of limited infill. House building will be small in scale, for sites of single figures, and the Plan does not seek to identify such sites.”</p> <p>The Salisbury Transport Strategy contains measures to support the scale of growth envisaged by the WCS”. This is simply not true. The “Salisbury Transport Strategy” (a summary produced in November 2012, which was not subject to any formal consultation or adoption process) acknowledged that the Harnham Gyratory and Wilton Wall Lights junctions were operating very near to or at capacity. Since then traffic has increased considerably and there is no new plan in place to accommodate this increase, let alone the increase that would occur of the Netherhampton Road allocations are allowed.</p> <p>Indeed, it is acknowledged in Para 5.136 that the current Transport Strategy does NOT contain measures to support the proposed allocations: “Comprehensive improvements to the local and strategic road network would be necessary to safely accommodate development where the residual cumulative impacts are severe. (...) To address such matters, dialogue with Highways England will be required and work would take place in conjunction with a refresh of the Salisbury Transport Strategy.”</p> <p>It should also be noted that such “Salisbury Transport Strategy” as exists is not detailed and has never been subject to public consultation or formal adoption.</p> <p>Any talk of road improvement or widening is specious given a/ that widening is not possible along much of the A3094 and b/ that the problem lies in the pinch points at either end.</p> <p>We have heard cavalier talk from City Councillors as to how the Harnham Gyratory capacity could be increased by having no traffic lights and / or by installing pedestrian underpasses. That such vague “solutions” should be being bandied around demonstrates that the traffic problems that Netherhampton and Harnham residents already face are not being addressed seriously, and that the likely implications of the proposed housing allocations are not being seriously thought through.</p> <p>There is no adopted Green Infrastructure (GI) Strategy in place, which means that the impact of the proposed new dwellings is impossible to assess.</p> <p>We feel strongly that in proposing new locations for dwellings without having seriously considered Transport and Green Infrastructure, Wiltshire Council is putting the cart before the horse. Previous experience tells us that there is a huge risk that new dwellings might approved with new transport and GI arrangements only following on piecemeal or not at all.</p> <p>Page 161 of the South Wiltshire Core Strategy (which covers the S1027 and S1028 locations) states that "No development will be permitted until such time as detailed transportation measures including improvements to the local road network have been submitted to and approved by the Council". There is no evidence that this has been carried out.</p>

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

The consultation has been drawn up without proper regard for the many considerations I have outlined. The impact of these plans on residents will be very significant and I believe that it is vital that the Council is held to account and made to give careful thought to the impacts BEFORE it adopts this Housing Site Allocation Plan.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p><b>FLOOD &amp; SEWAGE IMPACT</b>                  Drainage too is a huge issue. Netherhampton and all of the fields to the north of the A3094 are routinely inundated following even a few days of heavy rain (see attached picture from Sunday 23rd July). Our understanding from drainage engineers is that the infrastructure to move water away from the valley is substandard all the way down to Christchurch. Given that, the impact of up to 640 dwellings (Site S1028) plus 100 dwellings (Site S1027) and associated hard standing will be a massive increase in run off which will impact both downstream and upstream of the proposed sites.                  Site S1027 is well known locally for having standing water regularly during the winter.                  There is no clear strategy for ensuring that sufficient sewage pumping infrastructure is in place to deal with the impact of the proposed new dwellings. The existing sewage pumping infrastructure is already operating at capacity.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>FLAWED PROCESS</p> <p>We are told by planners that the key thinking informing the vastness of the 640 dwelling site (S1028) is around “critical mass”. A perfectly good site for 200 or so houses in Odstock has been rejected by the planners simply because that site could not “sustain” a new school. This seems to be a rationale that is not in fact part of the planners brief and is thus a failure of process.</p> <p>The National Planning Policy Framework (NPPF) includes a key principle “to encourage the effective use of land by reusing land that has been previously developed (i.e. brownfield land)...”. The Draft Housing Allocation Plan does not explain why housing planned for brownfield sites such as The Maltings and the Engine Shed is being delayed.</p> <p>The NPPF protects high quality agricultural land such as the proposed sites on Netherhampton Road, but no weight appears to have been given to this in the Draft Housing Allocation Plan.</p> <p>The proposed sites along the Netherhampton Road are described as being within the “settlement area” of Salisbury but lie in fact outside the Salisbury Community area, and in Netherhampton Parish. Since coherent Community Areas are key to the Wiltshire Core Strategy, we believe that the Housing Site Allocation Plan cannot be sound given the boundaries that currently pertain.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1603</a>	<b>Consultee</b> Malaby Holdings  <b>Person ID:</b> 556400	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.8		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Proposed allocation: the proposed allocation of Bore Hill Farm under Policy H2 is supported in principle. This follows a collaborative approach that has been undertaken between Malaby Holdings and Wiltshire Council following the acquisition of the site in 2009.</p> <p>Policy H2.8 and Paragraph 5.93: the land area extent set out in Policy H2.8 and Paragraph 5.93 is incorrectly stated as 4.74ha. The correct extent of the allocation site is 5.14ha. This is shown on the enclosed Site Location Plan (Plan Ref: 1190-E-001).</p> <p>Fig 5.5: there is an error in the extent of the redline allocation site in Fig 5.12. a Corrected Development Plan Allocation Boundary is enclosed (Plan Ref: 1190-E-001).</p> <p>Table 5.3 and Paragraph 5.93: the suggested quantum of development, 70 dwellings, is considered to be too conservative. A preliminary capacity design undertaken by Keep Architects indicates that the whole allocation site could accommodate 110-120 dwellings.</p> <p>Land ownership: the Bore Hill Farm site (4.6ha) is in the freehold ownership of Malaby Holdings (SHLAA Ref: 1032). The adjoining land at Bradley Road (0.54ha) is in separate ownership of Keysley Ltd (SHLAA Ref: 302). We can confirm on behalf of both landowners that the subject site is available for residential development and that they intend to coordinate work regarding the site promotion in consultation with the Council.</p> <p>Site context: the whole site measuring 5.14ha lies approximately 1.4km to the south of the Warminster town centre. The site is bounded by existing residential development at Ludlow Close, Bradley Close and Bradley Road to the north; Deverill Road to the east; the A36 Warminster bypass to the south; and the Bore Hill Biodigester to the south west.</p> <p>Summary of planning and site promotion history: part of the site has been developed to accommodate the Bore Hill Biodigester (LPA Ref: W/10/03967/WCM). The planning permission also makes provision for a Phase 2 employment development and access road located adjacent to the biodigester. Initial ground preparation works and site levelling relating to the Phase 2 employment development were completed in 2016.</p> <p>A third-party developer, David Wilson Homes (DWH), submitted a pre-application enquiry to Wiltshire Council (Ref: 13/03407/PREAPP). Subsequently Malaby Holdings have decided to promote the site themselves and will seek a niche / regional housing partner as opposed to a national volume home builder in order to deliver a more diverse and exemplary scheme of housing.</p> <p>A full technical evidence base has been prepared, and is continuing to be developed on an iterative basis:</p> <ul style="list-style-type: none"> <li>topographical survey;</li> <li>an access feasibility proposal with new design for priority junction from Deverill Road (WYG);</li> <li>site levels and drainage (SLR)</li> <li>ecology assessment (Engain);</li> <li>strategic landscape appraisal (MacGregor Smith);</li> <li>heritage assessment (Heaton Heritage Consultants); and</li> <li>a capacity / urban design study (Keep Architects)</li> </ul> <p>Vision for the site: A comprehensive vision for the site is in the process of being formulated. Malaby Holdings are open to the site accommodating a mix of live-work and custom-build housing, and houses designed for occupation by elderly persons.</p>				

Appendix Q - Schedule of representations

	<p>It is also proposed that new employment space (buildings and serviced plots) will be delivered as part of comprehensive masterplan for the whole site. The employment layout is shown in the enclosed illustrative layout plan (Ref: 1170-F-001).</p> <p>The mixed-use housing and employment proposal intends to take advantage of the existing on-site renewable energy potential though the provision of direct renewable heat and electricity from the adjacent Biodigester (subject to design and regulatory approval).</p> <p>The proposal will also include strategic landscaping and drainage proposals, and an access and movement strategy.</p> <p>Statement of Common Ground: Malaby Holdings are currently in the process of reviewing residential delivery options, and will be formulating a vision for the whole site, which will be underpinned by an updated technical evidence base.</p> <p>It is proposed that a further pre-application enquiry will be submitted and that a Statement of Common Ground will be agreed with the Council in advance of the publication of the 'Submission' version of the draft Wiltshire Housing Site Allocations Plan in 2018.</p> <p>Bore Hill Farm, Policy H2.8</p> <p>Table 5.3 and Paragraph 5.93: amend the quantum of development to approximately 110 dwellings.</p> <p>Policy H2.8, Fig 5.12, and Paragraph 5.93: the land area extent set out in Policy H2.8 and Paragraph 5.93 is incorrectly stated as 4.74ha. The correct extent of the allocation site is 5.14ha.</p>

<b>Comment ID:</b>  	<a href="#">1604</a>	<b>Consultee</b> Mr Richard Greenwood  <b>Person ID:</b> 1119095	<b>Agent</b> Richard Greenwood Director  Benchmark Development Planning Ltd  <b>Person ID:</b> 894742	<b>Do you consider the draft WHSAP is legally compliant?</b>  No
				<b>Do you consider the draft WHSAP is sound?</b>  No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.4 Rowbarrow Salisbury		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Objection to: Draft DPD including proposed housing numbers within South Wiltshire Housing Market Area, including all the supporting Topic Papers where they deal with, inter alia, the 5-year housing land supply, Central Car Park (Salisbury), Churchfields, H3.1, H3.3 and H3.4 Rowbarrow.</p> <p>By allocating further land the HWSAP will be more likely to meet the 5 years housing supply to the end of the period (2026) and housing need generally in this area during the Plan period. To deliver this much needed housing there need to be several corrections to the draft Housing and Settlement Boundary DPD.</p> <p>Objection to Draft DPD including proposed housing numbers within the South Wiltshire Housing Market Area, including all the supporting Topic Papers where they deal with, inter alia, the 5-year housing land supply, Central Car Park (Salisbury), Churchfields, H3.1, H3.3 and H3.4: Rowbarrow. We are also objecting to the proposed Settlement Boundary for Salisbury.</p> <p>In this statement, we promote further housing development for 100 dwellings (including more than 50% affordable) at a new site to be known as H3.7 Britford Park &amp; Ride.</p> <ol style="list-style-type: none"> <li>1. In our opinion, insufficient land is proposed to be allocated to meet the minimum housing requirement set out in the adopted Wiltshire Core Strategy (2015). We are therefore proposing the allocation of 100 dwellings at H3.7: Britford Park &amp; Ride. The land is available, suitable and viable – see annotated plans and photographs at Appendix 1.</li> <li>2. Despite the resilience testing of the Draft DPD – set out in the Topic Paper 4: ‘Developing Plan Proposals’ - we are not convinced by those judgements and consider that insufficient land is being proposed for housing development. As a result, there is a strong likelihood of an unnecessary shortfall in supply to the rolling 5 Year Land Supply.</li> <li>3. Furthermore, we are close to a possible change to the way housing figures are assessed. We understand (early September 2017) the Government will publish a consultation document setting out details for a standard method for assessing housing need. This has been delayed and is now expected by the end of September 2017. We therefore reserve comment and may add further to this objection, in the light of the anticipated new advice.</li> <li>4. We now set out the main points of our case that we are likely to expand upon at the Examination. First, we need to set the scene.</li> <li>5. Core Policy 2 of the WCS requires the County to accommodate at least 42,000 additional dwellings over the period 2006 to 2026. This places a minimum requirement on the South Wiltshire Housing Area for 10,420 dwellings, divided potentially, but not in a fixed way, roughly as follows: Summary of DPD Table at paragraph 2.17 (SEE ATTACHMENT)</li> <li>6. Our point is this: sustainable well-planned and delivered development is quite possible within this community area at the newly titled: H3.7: Land at Britford P&amp;R</li> <li>7. We particularly note the WCS describes Salisbury as a thriving place where people want to stay that is attractive to new residents, businesses and visitors alike.</li> </ol>			

Appendix Q - Schedule of representations

8. And yet we do not consider this draft DPD accords (i.e. it is not sound) with the WCS in this respect. Certainly, the Draft DPD does not accord with paragraph of the NPPF that sets out the Government's intention to "boost significantly the supply of housing". In our opinion, this Planning Authority should not seek to provide the minimum requirement (indeed we note in passing that the word 'minimum' is dropped all too easily from key parts of the draft DPD). Wiltshire council should instead meet the full objectively assessed housing need by:

- roviding five years' worth of housing with an additional buffer of 20% by including H3.7: Britford P&R for 100 dwellings;
- And / or identifying land at H3.7 to assist with the supply of specific, developable sites or broad locations for growth, for year 6–10, and where possible, for years 11–15. (Alarmingly, the Council has no published housing plans for post-2026 – just 8 years or so away);
- Providing a housing trajectory for the plan period to describe how the Authority will maintain delivery of a five year + 20% to the end of the plan period: currently the Draft DPD fails – see table below:

Summary of Table at para 4.32 of 5 Year Housing Land Supply (SEE ATTACHMENT)

9 Paragraph 55 of the NPPF also, amongst several criteria, promotes the optimisation of the potential of sites to accommodate development and there is an emphasis on re-using previously developed land – such as the P&R at Britford.

10. We would like to draw the Inspector's attention to two matters – deliverability' and 'developability': we are not convinced the Authority has assessed fairly or soundly the potential housing land that they consider will be developed before 2026 at:

- x Central Car, Salisbury (CP 2 and CP 21 of WCS for 200 dwgs) – Benchmark's opinion: This site is neither deliverable or developable as matters stand in September 2017. This site is too complicated and unrealistic and mired in viability and delivery/developability problems. There is no realistic prospect this site will be redeveloped before 2026 (just c. 8 years away).
- x Churchfields, Salisbury (CP 2 of WCS for 1,100 dwgs) – Benchmark's opinion: neither deliverable or developable as matters stand in September 2017. Likewise, and even more so than Central Car Park: too complex and unrealistic and not viable. It is a laudable goal but incredibly difficult to achieve without major intervention. And this should be done now. (Compulsory Purchase Orders, if started today, (none are now to be in the 'offing') might yield vacant possession, in 15 years' time, precedable over another 10 years, for the first 100 houses to be built in 2040 – at the earliest (if it ever happens).)
- x Netherhampton Rd, Salisbury (H3.1 and H3.4 of draft DPD for 740 dwgs) – Benchmark's opinion: neither deliverable or developable as matters stand in September 2017. Too controversial with sensitive issues regarding traffic, ecology and heritage – and public opinion. Not deliverable before 2026 – perhaps after 2035.
- x Rowbarrow, Salisbury (H3.4 100 dwgs H3.) – Benchmark's opinion: neither deliverable or developable as matters stand in September 2017. Too controversial with sensitive issues regarding traffic, ecology and heritage (setting of the Cathedral) – and public opinion. Bad site – unsuitable - it should be dropped (see landscape and visual impact statement at Appendix 2).

11. We do not consider the Authority's application of Footnotes 11 and 12 of NPPF that define the deliverability and developability of these 4 arguably key potential sites, has been sound enough. This is what should have been assessed. The Footnotes state:

"(11) to be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular the development of the site is viable...

(12) to be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged."

12. Even taking into account the Council's resilience testing in Topic Paper 4: 'Developing Plan Proposals' – there could easily be a shortfall of 200 + 1,100 + 40 + 100 dwgs = 2,040 dwellings.

13. The impact of the loss of about 2,000 dwellings (about 20%) out of the Authority's ability to provide a 5-year rolling supply of housing land could be severe: developers would be able to try to promote sites already excluded via the SHLAA process in the light of paragraph 49 of the NPPF:

"Housing applications should be considered in the context of the presumption in favour of sustainable development. Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites."

14. To begin to build more stability into the housing figures, we are suggesting the Council do more than aim to meet the minimum requirement and also allow a housing at H3.7 Britford P&R – to meet South Wiltshire HMA's housing needs.

Appendix Q - Schedule of representations

<b>Attached files (Please see Objective)</b>	4717209
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	To explain to the Inspector the merits of this objection and to examine in public the Authority's case, as presented to the Examination (assuming the Authority do not accept our objections and modify the WHSAP).

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">1605</a>	<b>Consultee</b> The Reversioners Trust  <b>Person ID:</b> 1129497	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Policy H2: the draft Plan makes no provision in terms of allocations for custom / self-build housing despite demand in Wiltshire. The draft Plan is therefore in conflict with national planning policy and legislation in this regard. National planning policy and legislative context: Paragraph 50 of the NPPF (2012) states that LPAs should: "...plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes)"; (Bold our emphasis) The Self-Build and Custom Housebuilding Regulations 2016 (2016 Regulations) came into force on 31st October 2016. The 2015 Self-Build and Custom Housebuilding Act states that LPAs are obligated to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land in an LPA's administrative area in order to build houses for those individuals to occupy as homes. National Planning Practice Guidance was updated on 28 July 2017. In response to the question "How can relevant authorities increase the number of planning permissions which are suitable for self-build and custom-build housing?" (NPPG: Paragraph: 024 Reference ID: 57-024-201760728) states: "Relevant authorities should consider how they can best support self-build and custom housebuilding in their area. This could include: developing policies in their Local Plan for self-build and custom housebuilding; using their own land if available and suitable for self-build and custom housebuilding and marketing it to those on the register; engaging with landowners who own sites that are suitable for housing and encouraging them to consider self-build and custom housebuilding and facilitating access to those on the register where the landowner is interested; and working with custom build developers to maximise opportunities for self-build and custom housebuilding" (Bold our emphasis) Demand for custom /self-build in Wiltshire: the statutory Wiltshire Register currently indicates a demand for self-build plots from 218 No. individuals and one group of 4 No. households. However, actual demand for self-build / custom-build housing is likely to be much higher as local community awareness of the statutory register is very low. For example, evidence used to support a recent appeal process at Boreham Mead, Warminster obtained from Buildstore (who own Plot-search and the Custom-Build Register), confirmed that in 2014 there were: within 15 miles of BA12 postcode (Warminster): 638 Plot-search subscribers and 77 custom build register subscribers. within 20 miles of BA12 postcode (Warminster): 1319 Plot-search subscribers and 150 custom build register subscribers Supply of custom/self-build housing in Wiltshire: apart from subdivision of individual gardens for plots, there has been no larger scale provision of custom/self-build housing plots in Wiltshire. The only planning commitment that we are aware of is an extant outline planning permission at Boreham Mead, Warminster, which was approved by the Secretary of State in July 2017 (LPA Ref: 13/06782/OUT, PINS Ref: 3150774). The Boreham Mead site will be marketed by the		Effective

Appendix Q - Schedule of representations

	<p>landowner to prospective custom-builders later this year. It is therefore concluded that demand (based on the statutory register) exceeds supply, and that on this basis, it is submitted that the Council should be making provision for self/custom-build allocations in the draft Plan in accordance with legislation and national planning policy and guidance.</p> <p>Promotion of Land at Old Road, Derry Hill: The Reversioners Trust wish to work with the Council and local community to promote Land at Old Road, Derry Hill explicitly for a hybrid scheme of self/custom-build and associated infrastructure and a comprehensive landscaping scheme. The subject site extends to 4.9ha as annotated on the enclosed Site Location Plan. The site is not subject to any national or local landscape or ecological designations, and is classified as Grade 3 agricultural land. The site has fully defensible boundaries on all sides: New Road (A4) to the north; existing dwellings to the east and west; and Old Road to the south.</p> <p>A preliminary transport feasibility study has been undertaken by Entran which indicates that vehicular access can be taken from south boundary in the form a simple priority junction from Old Road along with road widening on part of the southern side of Old Road, which is also in The Reversioners Trust's ownership.</p> <p>The Reversioners Trust has initiated work on building up a technical evidence base for the subject site so that the constraints and opportunities can be identified. Preliminary discussions with prospective custom-build developers have also commenced.</p> <p>The intention is to develop a comprehensive masterplan for a hybrid scheme of self / custom-build. The custom-build units would be located on the site frontage to create an appropriately 'designed' site frontage to Old Road comprising the custom-build plots as a set piece design, with serviced self-build plots and public open space within the site. A design code with parameters would be developed to control building heights (eaves and ridge parameters) and a pallet of suitable quality building materials.</p> <p>Statement of Common Ground: The Reversioners Trust is willing to work collaboratively with Wiltshire Council to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan, in the event that the Council decide to include the subject site as an allocation.</p> <p>Policy H2: in order to comply with national planning policy and legislation relating to the provision of custom/self-build to meeting demonstrable local demand, it is submitted that the Council should allocate Land at Old Road, Derry Hill as a custom / self-build site.</p>

Comment ID:	<a href="#">1606</a>	<b>Consultee</b> Fosse 1  <b>Person ID:</b> 1129527	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.11			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Policy H2: the principle of allocating land for housing at Hullavington is supported. However, we submit that Land to the rear of Newtown (SHLAA Ref: Site 1112) should be allocated in addition to Land at The Street under Policy H2.11 (SHLAA Ref: 690) as a single comprehensive allocation. The basis of our submission is that Site 1112 has been incorrectly assessed in the Council's Sustainability Appraisal; and that there are clear planning benefits to the local community, which lead to a compelling planning case for both sites (1112 and 690) to be allocated. We further note that additional demand for residential properties in this local area is likely to arise from new employment opportunities that will be created at the Hullavington airfield site following its recent acquisition by the Dyson group. Site 1112 promotion context: Fosse 1 hold a 'subject to planning option' of Site 1112, which extends to circa 0.95ha, as outlined on the enclosed Site Location Plan (Ref: 16-004-200).</p> <p>Fosse 1 have assembled a professional team and have procured a technical evidence base of the site. This includes topographical; drainage; landscape; heritage; agricultural land classification; ecology; and transport information. The baseline evidence demonstrates that the subject site has capacity to accommodate a low-density / high quality mixed-tenure scheme of circa 25 dwellings, and associated infrastructure. Positive informal feedback has also been received from the Parish Council in respect of the proposed development of the subject site. Comments on Chippenham Community Area Sustainability Appraisal: the suggested SHLAA site capacity of 24 No. units in Table 5.7 of the Sustainable Appraisal accords with Fosse 1's assessment of the site and is considered to be achievable in technical terms whilst delivering an appropriate landscaped-led design.</p> <p>The comments in Table 6.8 in respect of Site 1112 assessment (Stage 4a) are not considered to be well founded on the following grounds:</p> <p>Ground A - Sustainability benefits: the assessment questions the sustainability benefits on the basis of site size and capacity. The inclusion of the subject site as an 'additional' housing allocation will deliver the following sustainability benefits:</p> <p>(i) it will enable the delivery of the preferred option site at The Street as part of a comprehensive approach. The enclosed photosheet illustrates a significant existing traffic congestion problem along Newtown, which is which is obstructed by parked cars. At times prevents the passage of emergency vehicles, refuse and other commercial vehicles whilst also posing a highway safety issue to other road users and pedestrians (refer to Photos 1-6 on the attached photosheet). This situation will only be exacerbated by the development of proposed allocation at The Street on a standalone basis. Many of the houses along Newtown do have any off-street parking provision. Fosse 1 have agreed to make provision in their masterplan for dedicated off-street parking provision for the existing dwellings at Newtown, which front onto the southern boundary of the subject site. These parking spaces can be integrated into the design of the internal access road and would reduce on-street parking along Newtown. This in turn would enhance highway safety, and would assist in enabling the delivery of proposed allocation at the Street.</p> <p>(ii) a combined development approach of The Street and the subject site, which share a common landownership boundary, will enable the provision of shared services, pedestrian links, and also the creation of circular walks and routes avoiding Newtown.</p> <p>Ground B - setting and landscape impact: the heritage setting and landscape impact are addressed below:</p>			

Appendix Q - Schedule of representations

	<p>(i) Fosse I instructed Michael Heaton Heritage Consultants to consider the significance and setting of the grade II listed Baptist Chapel as well as the archaeological potential of the site (Refer to enclosed Heritage Statement Ref: 3760). The report concludes that residential development of the subject site would not adversely affect the setting or the significance of the Baptist Chapel, and that the 'visual background, foreground and historical context of the chapel would remain unaltered and the average person's perception of the chapel would remain unaltered'.</p> <p>(ii) The subject site is not subject to any national or local landscape or ecological designations. The enclosed Agricultural Land Classification report confirms that the site has an agricultural land classification of grade 3a to 4, as confirmed in the enclosed Soil Classification report and associated Agricultural Land Classification Plan (Ref: Bateman Rural Associated Ltd) Therefore, development would not result in the loss of best and most versatile agricultural land</p> <p>(iii) The site is relatively level, and is bounded by defensible boundaries on all sides including hedgerows on the north and north-western edges. The development of the subject site would represent a logical rounding off against existing the existing natural topography and also in spatial character terms. Additionally, the edge condition of the site could be strengthened by new tree and hedge planting, which could provide additional visual screening mitigation from public views outside the site.</p> <p>Statement of Common Ground: the site promoters, Fosse I, are willing to work collaboratively with Wiltshire Council (and the promoters of Site 690) to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan.</p> <p>Policy H2: in order to deliver a comprehensive solution for Hullavington, it is submitted that the Council should allocate SHLAA sites 690 and 1112 as a single comprehensive allocation.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1609</a>	<b>Consultee</b> Braeman Holdings  <b>Person ID:</b> 556645	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Policy H2: we consider that the draft Plan should be making provision for additional growth in Melksham on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026. There are significant technical and political delivery issues associated with allocated Core Strategy strategic sites, and proposed allocation sites in the Draft Plan, particularly around the Trowbridge Area. This may necessitate a search for alternative sites in settlements in the next tier in the settlement hierarchy, such as Melksham. There is an acute unmet affordable housing need in Melksham, which can only be addressed by the provision of new housing to subsidise the provision of new affordable housing. It is submitted that in order to ensure a deliverable 5-year housing land supply and meet the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in Melksham, that the subject site should be included as a mixed-use allocation for circa 75 homes and new employment space (Class B1) in the draft Plan. Promotion history: Braeman Holdings own the freehold interest of the subject site. The site is currently allocated as a Principal Employment Area under Policy CP35 of the adopted Core Strategy (2015). Long term marketing of the site by local agents Carter Jonas has confirmed that there is no employment interest in this site. Furthermore, the site's narrow frontage, and topographical constraints, preclude larger scale employment uses that rely on a roadside presence and/or HGV access/egress. On this basis, having regard to the advice in Paragraph 22 of the NPPF (below) it is considered that there is a compelling case to allocate this site for mixed-use housing and employment development comprising: circa 75 units of housing; with the balance of the site as flexible Class B1 employment units, which could be provided to the market on a speculative basis through cross-subsidy from the housing. 22. Planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. Land allocations should be regularly reviewed. Where there is no reasonable prospect of a site being used for the allocated employment use, applications for alternative uses of land or buildings should be treated on their merits having regard to market signals and the relative need for different land uses to support sustainable local communities. Design development: Braeman Holdings have undertaken extensive flood risk modelling to determine the extent of the potential developable area. A draft masterplan is presently being evolved and will be subject to a process of pre-application engagement later in 2017. It is anticipated that the whole mixed-use development will be potentially deliverable by April 2020. The enclosed Ownership and Residential Boundary Plan shows the extent of residential development coverage in green (Ref: 2484-100A). Statement of Common Ground: Braeman Holdings confirm their willingness to work collaboratively with Wiltshire Council to promote this site. If the Council is minded to allocate the site, we can confirm that Braeman Holdings would be willing to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan. Policy H2: to allocate land at Upside Park for a mixed-use development of employment and housing.		Effective	
			Consistent with national policy

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.14 Court Orchard/ Cassways, Bratton			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Our family has been in residence in Bratton for 39 years, the reason for purchasing was to live in a country village in a green belt area with access to Westbury where I worked as an Engineer and Manager with ALH Systems Ltd.</p> <p>Housing development in a small field opposite our home has already been considered and refused a number of times over the years. The land, which is farming by nature somehow now becomes ideal for building homes, one wonders if the current cost ratio of farming versus building land has something to do with this.</p> <p>When people wish to live in the country and are prepared to pay arguably the largest sum of money ever spent on a country home, they do not expect to have both value and aspect devalued by a development of green-belt land which should have incurred some degree of security. One wonders what the legal position is when rules can be broken so easily by Local Authorities.</p> <p>To squeeze forty homes into such a small acreage and provide the necessary roads, pathways and services, as well as access to a main road which gets busier daily, and to spoil entry to a village, suggests some reasons why previous attempts to exploit this piece of farmland have failed.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		This small plot of land with a right of way path running down the right hand side is no more than a few acres on which forty homes are proposed. The main road through Bratton is the b3098 and passes in front of my property, this road now carries three to four times the traffic as when we arrived. Between our property and the said field the road narrows to almost single lane, road signs have little or no effect on what is a 30 mile limit. This limit is ignored by a large percentage of traffic both entering and leaving the village.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12 East of Farrells Field, Yatton Keynell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I have had a letter asking me to object to planning of 30 new houses at the back of Faller Fields in Yatton Keynell.</p> <p>This e-mail is to say that I couldn't disagree more with the letter and think this development is great for the village.</p> <p>As it stands the village is unaffordable for young people or families on limited income and will become a retirement village like others in the area. The school is undersubscribed at the moment and would benefit greatly by having more people in its catchment. Also I assume most people that will object will be in houses that are barley 15 years old themselves.</p> <p>The letter alludes to poor consultation but if parish councils at not willing to engage proactively with planning requests and just dismiss them out of hand then I don't see this justified.</p> <p>The location wont have a visual impact as the location is behind existing houses and will have open spaces around it.</p> <p>Over all I think the application is exactly what is needed to keep the village viable and thriving and not lose business and go dormant.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1614</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Debbie Credicott	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am very concerned about the proposed allocation of an additional 40 dwellings on the Ridgeway Farm Site in addition to the 10 that are currently being built.</p> <p>I objected back in 2014 when plans were submitted for 29 houses but I, like many, were happy with the revised plans for 10 because it was in proportion with the developments that have occurred over the last 20 or so years at Gooselands and in Ridgeway, Tuners Lane. There has been many other smaller developments of 2 - 4 houses which, again, are proportionate and have enabled the village to grow and thrive in a way that has not put undue pressure on the drainage and sewerage systems, the infrastructure and the school.</p> <p>Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy.</p> <p>As a Neighbourhood Plan is currently being worked on by a Group in the village, I firmly believe the community should be consulted and allowed to formulate a development plan that not only meets identified housing needs over the next 10 - 15 years but also takes into consideration the legitimate concerns of residents. As a community we will insure that it addresses the infrastructure constraints such as road, drainage and sewerage capacity, addresses the impact on the school and comes forward with a well thought out plan of how the village should develop over the coming years, the services it might need to meet those additional demands and look holistically at how it might look in 20 years time whilst maintaining the essential characteristics of a village.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am very concerned about the proposed allocation of an additional 40 dwellings on the Ridgeway Farm Site in addition to the 10 that are currently being built.</p> <p>When I objected to the 29 houses it was because of the impacts on the school which was nearly at capacity in 2014 and certainly is now. We already have children travelling in from the Malmesbury and Tetbury areas and I am aware of a few cases where residents in Crudwell are having to travel outside the village for their to go to school. This does not make any sense.</p> <p>As a Neighbourhood Plan is currently being worked on by a Group in the village, I firmly believe the community should be consulted and allowed to formulate a development plan that not only meets identified housing needs over the next 10 - 15 years but also takes into consideration the legitimate concerns of residents. As a community we will insure that it addresses the impact on the school and comes forward with a well thought out plan of how the village should develop over the coming years, the services it might need to meet those additional demands and look holistically at how it might look in 20 years time whilst maintaining the essential characteristics of a village.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	No This proposal will affect the distinct character & natural boundary between Town & village. I urge the council to reconsider overall planning & present a coherent overall infrastructure vision. Maintaining the very homeland character of the area, which is a Country Market town surrounded, by individual outlying villages and countryside should be crucial. Existing road systems are currently choked to capacity at peak times, with major noise & pollution spots. Does good planning include adding to an existing problem, without addressing the issue? This clearly contradicts sustainability objectives 4 & 6 on Page 923. The DPD in it's current form threatens to further degrade the existing quality of life for the local population. Again in the past & present Trowbridge seems to be a focal point for big Town development seemingly being the easy option in respect of large numbers . Suggest DPD needs to consider spreading future development, thinly over wider Wiltshire area, wherever possible small developments in many villages will be more easily accepted & absorbed into the community.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1635</a>	<b>Consultee</b> Mr Richard Greenwood  <b>Person ID:</b> 1119095	<b>Agent</b> Richard Greenwood Director  Benchmark Development Planning Ltd  <b>Person ID:</b> 894742	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
				<b>Do you consider the draft WHSAP is sound?</b>	No
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
Please identify the policy, paragraph, table, figure or site to which you are referring.				Justified	Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Objection 3 to: Draft DPD including proposed housing numbers within the Amesbury Community Area and South Wiltshire Housing Market Area, including all the supporting Topic Papers where they deal with, inter alia, the 5-year housing land supply, Central Car Park (Salisbury), Churchfields, H3.1, H3.3 and H3.4.</p> <p>In this statement, we are promoting further housing development at H3.5 plus all of S98 Clover Lane / Hackthorne and H3.6 Larkhill Rd, Durrington</p> <ol style="list-style-type: none"> <li>Our main objection is to the Authority's failure to allocate all S98 at Hackthorne (Durrington) for housing. (Our Objection 4 supports further housing development at H3.6: Larkhill Rd, Durrington.) In our opinion, insufficient land is proposed to be allocated to meet the minimum housing requirement set out in the adopted Wiltshire Core Strategy (2015).</li> <li>Despite the resilience testing of the Draft DPD – set out in the Topic Paper 4: 'Developing Plan Proposals' - we are not convinced by those judgements and consider that insufficient land is being proposed for housing development. As a result, there is a strong likelihood of an unnecessary shortfall in supply to the rolling 5 Year Land Supply.</li> <li>Furthermore, we are close to a possible change to the way housing figures are assessed. We understand (early September 2017) the Government will publish a consultation document setting out details for a standard method for assessing housing need. This has been delayed and is now expected by the end of September 2017. We therefore reserve comment and may add further to this objection, in the light of the anticipated new advice.</li> <li>We now set out the main points of our case that we are likely to expand upon at the Examination. First, we need to set the scene.</li> <li>Core Policy 2 of the WCS requires the County to accommodate at least 42,000 additional dwellings over the period 2006 to 2026. This places a minimum requirement on the South Wiltshire Housing Area for 10,420 dwellings, divided potentially, but not in a fixed way, roughly as follows:</li> </ol> <p>Summary of DPD Table at paragraph 2.17 [see table in attachment]</p> <ol style="list-style-type: none"> <li>We need to now briefly explain about Durrington's position in South Wiltshire and its importance and capacity to receive some further housing.</li> <li>Durrington falls into the southern housing market area within the Amesbury Community Area where 27% of the minimum requirement is currently to be 'sent' <math>[(2,785/10,420) \times 100]</math>. We consider that this proportion should be increased to relieve pressure on the Salisbury CA up to 30% - representing a minimum housing requirement for the Amesbury Community area of about 3,125 dwellings.</li> <li>We say this because Durrington, along with Bulford and the associated military garrisons, forms part of a group of settlements with Amesbury which have close links to one another, both geographically and functionally, and collectively make up a large population, almost 50% that of Salisbury.</li> </ol>				

#### Appendix Q - Schedule of representations

9. Durrington (c 5,000 people) is a town with pubs, several shops including small supermarkets operated by Sainsbury's and Tesco and schools at all levels. It has a good and modern swimming and fitness centre. Apart from the older part of the settlement around the Church (within the Conservation Area) – it's not like a traditional south Wiltshire town or large village – there is capacity for more structured growth to help underpin the town (and cluster) for about 200 dwellings.

10. Amesbury Community Area: Over the last 15 years there has been significant balanced growth in and around Amesbury with major employment and economic development opportunities at Solstice Park the 64 ha Business Park fronting the A303. Porton Down is now an international centre of excellence for biological research and health protection. Boscombe Down is a major research and development establishment and the army super garrisons all add to the importance of this area. Taken as a whole, it is significant self-sufficient sustainable cluster.

11. Of course, most of South Wiltshire is heavily constrained by significant international, national and local planning designations. Near but not including Durrington there are two Natura 2000 sites: the River Avon and Salisbury Plain Special Areas of Conservation and of course nearby – but not including Durrington - Stonehenge World Heritage site attracts visitors from all over the world and directly and indirectly employs people from the locality.

12. Our point is this: sustainable well-planned and delivered development is quite possible within this community area and more specifically at S98, Durrington - without causing actual or feared significant environmental harm before 2026. Indeed, the partial allocation of S98 within H3.5 indicates just how suitable ('ripe') this land is, as already accepted by the Council.

13. We particularly note paragraph 5.21 of the WCS describes the Amesbury Community Area to be thriving and a place where people want to stay that is attractive to new residents, businesses and visitors alike.

14. And yet we do not consider this draft DPD accords (i.e. it is not sound) with the WCS in this respect or is sound. Certainly, the Draft DPD does not accord with paragraph 47 of the NPPF that sets out the Government's intention to "boost significantly the supply of housing". In our opinion, this Planning Authority should not seek to provide the minimum requirement (indeed we note in passing that the word 'minimum' is dropped all too easily from key parts of the draft DPD). Wiltshire Council should instead meet the full objectively assessed housing need by: Providing five years' worth of housing with an additional buffer of 20% by including all of S98 at Durrington; And / or identifying land at S98 Durrington to assist with the supply of specific, developable sites or broad locations for growth, for year 6–10, and where possible, for years 11–15. (Alarmingly, the Council has no published housing plans for post-2026 – just 8 years or so away); Providing a housing trajectory for the plan period to describe how the authority will maintain delivery of a five year + 20% to the end of the plan period: currently the Draft DPD fails – see table below:

Summary of Table at para 4.32 of 5 Year Housing Land Supply  
[see table in attachment]

15 Paragraph 55 of the NPPF also, amongst several criteria, promotes the optimisation of the potential of sites to accommodate development (i.e. higher densities).

16. We would like to draw the Inspector's attention to two matters – 'deliverability' and 'developability': we are not convinced the Authority has assessed fairly or soundly their potential housing land that they consider will be developed before 2026 at:  
Central Car, Salisbury (CP 2 and CP 21 of WCS for 200 dwgs) – Benchmark's opinion: This site is neither deliverable or developable as matters stand in September 2017. This site is too complicated and unrealistic and mired in viability and delivery/developability problems. There is no realistic prospect this site will be redeveloped before 2026 (just c. 8 years away).  
Churchfields, Salisbury (CP 2 of WCS for 1,100 dwgs) – Benchmark's opinion: neither deliverable or developable as matters stand in September 2017. Likewise, and even more so than Central Car Park: too complex and unrealistic and not viable. It is a laudable goal but incredibly difficult to achieve without major intervention. And this should be done now. (Compulsory Purchase Orders, if started today, (none are known to be in the 'offing') might yield vacant possession, in 15 years' time, procedable over another 10 years, for the first 100 houses to be built in 2040 – at the earliest (if it ever happens).)

Appendix Q - Schedule of representations

	<p>Netherhampton Rd, Salisbury (H3.1 and H3.4 of draft DPD for 740 dwgs) – Benchmark’s opinion: neither deliverable or developable as matters stand in September 2017. Too controversial with sensitive issues regarding traffic, ecology and heritage – and public opinion. Not deliverable before 2026 – perhaps after 2035.</p> <p>Rowbarrow, Salisbury (H3.4 100 dwgs H3.) – Benchmark’s opinion: neither deliverable or developable as matters stand in September 2017. Too controversial with sensitive issues regarding traffic, ecology and heritage (setting of the Cathedral) – and public opinion. Bad site – unsuitable – it should be dropped.</p> <p>17. We do not consider the Authority’s application of Footnotes 11 and 12 of NPPF that define the deliverability and developability of these 4 arguably key potential sites, has been sound enough. This is what should have been assessed.</p> <p>The Footnotes state:  “(11) to be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular the development of the site is viable...  (12) to be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.”</p> <p>18. Even taking into account the Council’s resilience testing in Topic Paper 4: ‘Developing Plan Proposals’ – there could easily be a shortfall of 200 + 1,100 + 740 + 100 dwgs = 2,040 dwellings.</p> <p>19. The impact of the loss of about 2,000 dwellings (about 20%) out of the Authority’s ability to provide a 5-year rolling supply of housing land could be severe: developers would be able to try to promote sites already excluded via the SHLAA process in the light of paragraph 49 of the NPPF:  “Housing applications should be considered in the context of the presumption in favour of sustainable development. Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites.”</p> <p>20. To begin to build more stability into the housing figures, in the context of our other objections, we are suggesting the Council do more than aim to meet the minimum requirement and also allow a little more housing from Amesbury CA to provide a fairer share – a proportionate share – to meet South Wiltshire HMA’s housing needs. The Table at paragraph 4.28 of the Draft DPD is therefore proposed to be amended as follows (red):  [see table in attachment]  By allocating further land the WHSAP will be more likely to meet the 5 Years Housing Supply for the Amesbury Community Area to the end of the period (2026) and housing need generally in this area during the Plan period.</p> <p>To deliver this much needed housing there need to be several corrections to the draft Housing and Settlement Boundary DPD.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Re Ridgeway Farm Development Crudwell North Wiltshire I write to oppose any further development to this site.</p> <p>Reasons: DRAINAGE The existing sewage and storm drainage systems can not cope with the current burdens and have been overwhelmed several times in recent years. This Site is an agricultural field and part of a working farm. It must therefore be considered as a Green Field Site and in Open Countryside. It should not, therefore, be considered ahead of all the other Brown Field Sites and in-fill opportunities in the area. In this regard, I would submit that both Hullavington and Kemble airfields which have unused buildings and large areas of existing concrete would be more suitable for additional housing.</p>

Reasons:                      SIZE &amp; AMENITIES                      Crudwell has been designated a Large Village within the Malmesbury district, which is not justified and should not be allowed to stand. Crudwell's population in the 2011 census was 1057 whereas Minety's population in the 2011 census was 1414 and is designated a Small Village. There is no evidence to suggest this ratio has changed since 2011. I would therefore submit that Minety would be an more appropriate village for additional housing and that Crudwell be reclassified as a Small Village unsuitable for the additional housing being proposed.                      Crudwell has no village shop whereas the villages of Sherston and Oaksey do.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Re Ridgeway Farm Development Crudwell North Wiltshire I write to oppose any further development to this site. Reasons: TRANSPORT 1. This Site is not served by any public transport. The nearest, extremely infrequent, bus service is from the end of Tetbury Lane on the A429 and there is no footpath or pavement from this site. Tetbury Lane is narrow and insufficiently wide both to the West and East of this Site to enable vehicles travelling in opposite directions to safely pass. This means that pedestrians such as children coming and going from pre School at the Village Hall just west of the Site/Crudwell School and catching school buses to/from secondary school would be placed at great risk. This problem is made worse due to the inadequate very poor street lighting. 2. The nearest shopping town to the Site is Tetbury and the nearest supermarket is also in Tetbury. This means that the increased traffic using Tetbury Lane to the west of the Site will inevitably increase. In terms of both width and structure this Lane is unable to cope with the existing demand being put upon it and is wholly unsuitable for any increased usage. 3. This Site has already been approved for 10 houses currently under construction. This in itself will significantly exacerbate the problems in 1. & 2. above - the full impact of which is yet to become apparent. 4. The Rommel Lane intersection immediately to the west of the Site is a blind spot junction with no street lighting. Any increase of traffic would make this extremely dangerous junction even more challenging.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Allocation of housing site adjacent to Farrels Field Yatton Keynell</p> <p>I was surprised to say the least to find this 'guidence' letter showing residents of Yatton Keynell how to object to possible housing of 30 houses adjacent to Farrells Field. The residents of Farrells Field may be upset about the location of housing but do they really have a valid reason to object? given that when built Farrells Field was also outside the boundaries of the village?</p> <p>I honestly believe you should only object to new housing if the housing overlooks your property, interferes with your right to light or intrudes upon your property. Housing is vital in these rural areas as is shown by the All- Party Parliamentary Group for Housing and for care of the elderly. Lord Richard Best Vice Chair of APPG making the case for more rural housing to cope with the nation's villages getting more elderly after research by the Local Government Association.</p> <p>The only reason that the Parish of Yatton Keynell is a thriving Parish is that housing was allowed in the 1970s through to the development of Farrells Field, Yatton Keynell unlike others in this area, still retains employment, a fine Post Office/Shop, a Doctor's Suregery, a School and a very popular Public House. We should aim to keep it that way, I have lived in this area all my life bar five years and remember villages like Castle Combe, Grittleton, Burton and Nettleton being the same size as Yatton Keynell and through the actions Nimbys are now almost ghost villages, I have been told by a Castle Combe Parish Councillor that 75% of the houses in Lower Castle Combe are now holiday homes. We must strive to encourage people to come to Yatton Keynell and keep it thriving village. I would like to give this allocation of housing my whole hearted support.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1640</a>	<b>Consultee</b> Sue Bond Clerk  Seend Parish Council  <b>Person ID:</b> 1129662	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.40					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Seend Parish Council's response to Wiltshire Council's Draft Housing Site Allocations Plan in relation to the proposed changes to Seend parish's Settlement Boundaries Introduction The proposed settlement boundary changes in the Parish of Seend only relate to most of the village of Seend and not to Seend Cleeve and Sells Green. The Parish Council and the Neighbourhood Planning Group have looked at the settlement boundary methodology and have applied this to the existing settlement boundary and to the proposed changes. The Parish Council and the Neighbourhood Planning Group are in complete agreement on the points made in this submission. Overall we cannot see why it is necessary to change the existing settlement boundary, in most instances. We request that the original settlement boundary is maintained, with a few exceptions that are listed below. Specific Comments Commencing at the western boundary F8/G8 (West), we do not agree that this site should be included within the settlement boundary as the site is more related to the open countryside especially in relation to the expansive views it provides. G7 Bradley Lane entrance to School Road we agree to this change as it tidies up this boundary. H6 WI Allotments and 17/16 the Lye Field we contend in the strongest possible terms that these two areas are recreational and amenity spaces that are part of the settlement and that they relate more closely to the built environment. K6 - Horse Pond - we are content with the proposal to tidy up the boundary in this area. J7/17 - We cannot agree with the proposed boundary changes to the large houses on the south side of Seend High Street as they include the extended curtilage of these properties that relate more closely to the open countryside as they are gardens/paddock s and consequently has the capacity to substantially extend the built form of the settlement in terms of scale and location. H8/18 We do agree with the inclusion of the Church at the end of Church Walk and the inclusion of three houses one in Church Walk i.e. H7 the Old Stables and the house on the corner of Church Walk together with Seend House as we contend that these buildings are 'the curtilage of a property that relates more closely to the built environment and has limited capacity to extend the built form of the settlement in terms of scale and location'. The line of trees, we contend is part of amenity space at the edge of a settlement that relates more closely to the built environment. We do not agree with including the other parts of this area in H7. We have re-defined the settlement boundary as is shown on the map in H7 because this is now more consistent with other zones on the map. In H7 - It is inconsistent to move the settlement boundary along the High Street, to the north of it but in 17 and J7 to bring the settlement boundary back to the south of the High Street. G8 (South) we agree with the tidying-up of this small sector.					

Appendix Q - Schedule of representations

	We request that we are kept informed at each stage and reserve the right to be involved with the progress of the policy on the settlement boundaries until its adoption in Winter 2018.

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">1641</a></p>	<p><b>Consultee</b> Mr Rohan Torkildsen Historic Environment Planning Advisor South West/ West Midlands</p> <p>Historic England</p> <p><b>Person ID:</b> 403792</p>	<p><b>Agent</b></p> <p><b>Person ID:</b></p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>			
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>The whole document</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Draft Wiltshire Housing Site Allocations Plan</p> <p>Thank you for providing an opportunity to respond to this Draft Plan. We hope our comments will help to support the local authority in its preparation of a sound, robust and effective document and in so doing secure the delivery of sustainable development.</p> <p>A key reference that has informed our following response is that local plans should set out a positive strategy for the conservation and enjoyment of the historic environment, and special regard should be paid to the desirability of preserving or enhancing designated heritage assets. (NPPF paragraphs 126, and 132 and the Planning (Listed Buildings and Conservation Areas) Act 1990).</p> <p>It will be important for the local authority to clearly demonstrate that the approach to development affecting designated and non-designated heritage set out in this Plan is justified, consistent with national policy, and likely to be effective in helping to deliver the Wiltshire Core Strategy's vision and objectives and its policies which emphasise a positive commitment to the conservation of Wiltshire's historic environment and to high quality design.</p> <p>Historic England believes that it is clear from the NPPF that the Government is expecting local planning authorities, through their Local Plans, to actively deliver the conservation and enhancement of the historic environment. The Government's use of the words and phrases "seeking positive improvements", "positive strategy", "deliver the conservation and enhancement" and "a clear strategy for enhancing" all demonstrate that it is not sufficient for local planning authorities to be passive or merely reactive in the conservation and enhancement of their historic environment and the preparation of this Site Allocations Plan.</p> <p>Evidence base to inform a positive strategy for the Historic Environment</p> <p>It will be critical for you to present, for consideration, adequate evidence (in accordance with NPPF paragraphs 129, 158 and 169) that demonstrates the local authority has considered the impact of each relevant allocation to determine the level of effect (harm) on the significance of affected heritage assets and their setting. I note that the SA and Landscape Assessment undertaken provide some commentary but are in themselves insufficient. They both defer to the need for further work required to determine issues of significant importance that really need to be dealt with at the plan making stage and before the principal of development is determined.</p> <p>Before the principal, the future form and capacity of each site can be established, great weight must be applied to the conservation of the affected heritage assets in accordance with NPPF paragraph 132. A lack of evidence would suggest that great weight has not been applied and therefore that the Plan has not been justified (based on proportionate evidence) or accords with national policy nor the Planning (Listed Buildings and Conservation Areas) Act 1990.</p> <p>Section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires that considerable importance and weight (special regard) is given to the desirability of preserving the setting of listed buildings. As planning decisions need to be taken in accordance with the development plan there needs to be a reasonable degree of certainty that a future application is deliverable. Is there a reasonable degree of</p>				

Appendix Q - Schedule of representations

	<p>certainty that allocations affecting listed buildings would satisfy Section 66? When considering the soundness of the Plan the following question will no doubt be asked.</p> <p>In selecting the sites allocated for development, has the Council paid special regard to the desirability of preserving or enhancing designated heritage assets (Planning (Listed Buildings and Conservation Areas) Act 1990 and NPPF paragraph 132).</p> <p>National policy seeks to protect and or enhance where appropriate the significance of heritage assets. Only where harm is unavoidable should mitigation be considered (NPPF paragraph 152). Any harm and mitigation proposals need to be fully justified and evidenced to ensure they will be successful in reducing harm. The local authority will therefore need to provide sufficient evidence to establish the level of impact / harm, and if harm were unavoidable, the justification.</p> <p>Historic England believes it is reasonable to expect a specific and moderately detailed heritage report – as evidence - that assesses whether, how and to what degree the setting of any effected heritage asset makes a contribution to its significance; and demonstrates the assessment of the effects of the proposed allocation on that significance to determine whether measures to maximise enhancement and avoid or minimise harm might be effective.</p> <p>Deferring an impact assessment to a future planning application stage is not considered appropriate as fundamental heritage considerations may affect the principle of development, its form and quantum, and as a consequence, its deliverability i.e. informing whether the allocation is justified. As such, when allocating a strategic site the local authority needs to set out clearly the type and amount of development that would be acceptable and provide details on how any affects to heritage assets can be addressed. The commentary provided by the local authority so far in respect of the impact of allocations in the Plan lacks detail or demonstrable rigour.</p> <p>The NPPF requires Local Plans to set out a positive strategy for the conservation and enjoyment of the historic environment and conserve heritage assets in a manner appropriate to their significance (NPPF paragraph 126). In terms of potential site allocations, we would suggest this means identifying sites for development which are compatible with the requirements of national policy for the delivery of sustainable development. At present the local authority has not demonstrated this would/could be the case in a substantive way.</p> <p>To address the above it may be useful to produce a specific heritage topic paper/statement making the case for the spatial strategy and individual allocations from a heritage perspective.</p> <p>Specific observations on individual suggested sites are included in the Appendix to this correspondence.</p> <p>We hope our comments will help to support the local authority in its preparation of a sound, robust and effective Site Allocations Plan and in so doing secure the delivery of sustainable development. At present there are important matters to be resolved for Historic England to be confident that the Plan accords with national planning policy.</p> <p>Nevertheless, following our recent meeting with officers at County Hall we remain optimistic of a positive response to the above is achievable and we continue to be available to further engage constructively to help support you finesse the Allocations Plan accordingly.</p>
