To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I wish to register my disapproval of any housing plan committed to "Plan Proposals" H3.1 – H3.3. My reasons for thinking this way is due to the spoiling of our countryside and the extra traffic that would without doubt be using the road between Netherhampton and Quidhampton. As it is, this area is already being used as a shortcut by traffic.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1650</a>	<b>Consultee</b> Mrs Nicola Lipscombe Chair  Salisbury Area Greenspace Partnership  <b>Person ID:</b> 905964	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft WHSAP is sound?</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>			<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Response from Salisbury Area Greenspace Partnership (SAGP) to the Wiltshire Housing Site Allocations Plan, 2017</p> <p>Salisbury Area Greenspace Partnership (SAGP) accepts that in the current climate there is likely to be continuing pressure for development around the periphery of the principal settlement. However, there are general concerns about the loss of greenfield sites; the loss of reasonable quality agricultural land at sites S1027 &amp; S1028 – land north &amp; south of Netherhampton Road; the impact on the landscape character &amp; setting of Salisbury at site S1027 &amp; S3272 - Rowbarrow; &amp; the impact on the community of increased congestion &amp; reduced air quality. It is regrettable that the need for these additional sites are to meet the shortfall arising from delays in the development of brown field sites in the central area and due to a slow uptake of existing consents.</p> <p>For development to be successful &amp; sustainable SAGP considers it important that i) the essential landscape qualities &amp; character of the Salisbury area are protected &amp; enhanced; ii) development is well designed &amp; properly integrated with the existing settlement &amp; not just added on around the settlement boundary in an isolated way, &amp; iii) every effort is made to alleviate the severe strain on the existing transport infrastructure. This means ensuring effective green infrastructure (GI) is provided as an integral part of the development process in line with Government policy. For green infrastructure to be effective there needs to be a comprehensive network of dedicated off-road links that provide more direct connections between people’s homes &amp; schools, work places, &amp; key services, as part of a broader strategy so that there are benefits for the whole community &amp; opportunities for future improvements are safeguarded.</p> <p>SAGP is concerned that this is not happening because there are continuing gaps in Wiltshire’s strategic planning policy framework as far as green infrastructure, open space &amp; transport are concerned, &amp; there are still no local or neighbourhood plans to ensure the aspirations of the local communities on these critical issues are being met. Developers are not being given strong messages, opportunities for planning gain are being missed &amp; there is an undue reliance on planning conditions which are notoriously difficult to enforce.</p> <p><b>1.0 Green Infrastructure &amp; its benefits</b></p> <p>The benefits of developing a comprehensive network of green safer corridors for people &amp; wildlife as part of the green infrastructure of a community has long been recognised. Its importance as essential infrastructure is acknowledged in the Natural Environment Planning Policy Guidance (PPG) published in February 2016 which is a supporting document for the National Planning Policy Framework (NPPF) where it clearly states that ‘Green infrastructure (GI) is important to the delivery of high quality sustainable development, alongside other forms of infrastructure such as transport, energy, waste and water’. It goes on to state that ‘GI should be a key consideration in both local plans &amp; planning decisions where relevant’.</p> <p>As the Natural Environment PPG spells out, effective GI encourages people to keep fit &amp; active as part of their daily round &amp; contributes to health &amp; wellbeing. It provides opportunities for recreation, for getting close to nature, &amp; for education. GI also delivers valuable ecosystem services if well managed, making the locality more resilient &amp; sustainable (a Core Strategy goal in line with Government policy) by helping to maintain good air, soil and water quality, reducing the potential for flooding, providing good wildlife habitat and biodiversity, providing water filtration, carbon capture, &amp; pollination services.</p>			

## Appendix Q - Schedule of representations

In addition, GI contributes significantly to the landscape setting of our communities, helping to create local distinctiveness & a sense of place which in turn has economic benefits, making the area an attractive one in which to live & work. Providing GI is a high impact/low cost approach as many green spaces already exist but need to be better linked together. It can also be used very effectively to create new landscape structure to integrate development.

2.0 Gaps in Wiltshire Council's strategic planning policy framework

2.1 Unfortunately, GI is not considered as essential infrastructure under the current Wiltshire Core Strategy Para 4.40.

2.2 There is still no published county-wide GI strategy, despite being promised over last 6 years, to highlight the importance of well designed & well managed GI which is essential to inform developers & should now be being promoted & secured in advance of any new development.

2.3 There is no local strategy for GI although SAGP is in the process of developing ideas for one & considers there is significant potential for improvements locally. From an initial assessment of local greenspace provision & connectivity, opportunities are being identified for improving connectivity in & around the city using off road routes & quiet streets where possible to create more direct, safer pedestrian & cycle routes between homes & schools, homes & work, & local facilities like shops, doctor's surgeries etc as well as links to city centre services, & with the countryside beyond.

2.4 It is also very disappointing that another key document, the Salisbury Transport Strategy 2012, has not been updated to include references to GI provision in the local area. Its main focus is on traffic management & junction improvements with very little emphasis on the importance & benefits of improving the off-road infrastructure for walking & cycling as part of a comprehensive green infrastructure (GI) network in line with current government guidance.

3.0 Gaps in the local strategic planning policy framework

SAGP has significant concerns about the apparent reliance on ad hoc approaches from landowners/developers without the benefit of an up to date spatial plan covering the main urban areas of Wilton, Salisbury & Laverstock & Ford, & adjoining parishes. The Salisbury Vision went some way to addressing local spatial planning issues but it did not relate to the whole of this area, & has now been abandoned. The Transport Strategy covers this area as does SAGP, but there is no other forum for bringing the 4 community areas & 10 parish councils together to be address the bigger picture in this area in relation to housing, employment, schools & other services & the infrastructure such as GI & transport which cross administrative & parish boundaries.

The absence of any neighbourhood plans or any joint working across the main urban areas makes it difficult for the community to raise the profile & potential of its green infrastructure when it comes to the consideration of new development. To quote the Natural Environment PPG again, 'GI should be a key consideration in both local plans & planning decisions where relevant'. It also states that 'local plans should identify the location of existing & proposed green infrastructure networks. Where appropriate, supplementary planning documents can set out how the planning, design & management components of the GI strategy for the area will be delivered'.

Furthermore, the fact that no assessment of current county-wide GI provision has been carried out means that there is a lack of direction & the ability 'to inform the role of green infrastructure in local & neighbourhood plans, infrastructure delivery plans & Community Infrastructure Levy (CIL) schedules'. Natural Environment PPG.

4.0 Wiltshire Council's recent track record on planning decisions

SAGP is concerned that the weak strategic planning context for green infrastructure has compromised recent planning decisions when it comes to integrating large scale housing & mixed developments with existing development. Planning consents have been given to sites around the north & north-western fringes of Salisbury with little commitment to connectivity with the existing settlement as part of an effective green infrastructure strategy.

This has been the case at Fugglestone Red (1250 dwellings + primary school & employment land) & Erskine Barracks (290 units). A very recent example is at Longhedge Village, where planning consent was given for 670 units, a primary school & employment land without any off-road links to the existing adjoining development at Old Sarum, or the country park beyond, or to the city centre. This creates a physically isolated community where people have very little choice but to use their cars to access local facilities, adding to an already overloaded road network & causing more pollution & congestion over the wider area.

There also appears to be an undue reliance on planning conditions which are difficult to enforce particularly when the local authority has very limited enforcement capacity & the developer is focused on maximising profits, not on the needs of the wider community. It is important that these key GI elements are secured and safeguarded before the start of development as it is extremely difficult to retrofit afterwards.

Appendix Q - Schedule of representations

	<p><b>Conclusion</b>  SAGP considers the overall basis for the Wiltshire Housing Site Allocations Plan is unsound because it is not consistent with national planning policy. There is no county-wide strategic commitment to green infrastructure as essential infrastructure in the Core Strategy; there is no approved county-wide GI strategy &amp; there is no local GI strategy for the Salisbury area.  Furthermore, the plan is not considered the most appropriate strategy in its current form &amp; cannot be justified. The inclusion of S1027 North of Netherhampton Road is not supported for the reasons given, &amp; sites S1028 South of Netherhampton Road &amp; S3272 Rowbarrow would require adjustment in line with the suggestions put forward.</p>

		Salisbury Area Greenspace Partnership  <b>Person ID:</b> 905964		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.3 North of Netherhampton Road			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Development here would have a major impact on the western approach and gateway to Salisbury and on the river valley setting of the city and the cathedral. The site is identified in the Salisbury District Settlement Setting Assessment 2008 as distinctive and memorable and that the view should be conserved and enhanced. The provision of adequate planting and open space to integrate the scheme and maintain a soft edge to the north side of Netherhampton Road and the western edge of the urban area would only exacerbate the problem of maintaining open views to the cathedral. SAGP therefore does not support the proposal to allocate this area for housing.

Comment ID:	<a href="#">1653</a>	<b>Consultee</b> Mrs Nicola Lipscombe Chair  Salisbury Area Greenspace Partnership  <b>Person ID:</b> 905964	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1 Netherhampton Road, Salisbury				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>If taken forward this large site needs more careful consideration with a landscape led master plan/development brief which makes full use of the undulating landform to provide a green infrastructure framework to accommodate the development, in line with the mitigation measures recommended in the Site Landscape Assessment Part 2, June 2017 &amp; to ensure that key views &amp; the quality &amp; character of this important approach to the city are protected.</p> <p>The proposed allocation &amp; master plan should be extended to include the south west corner of the site, as well as the adjoining excluded sites S237 and S3187 at West Harnham Business park to complete the picture. This would provide scope for providing 640 dwellings plus another 100 displaced from north of Netherhampton Road and 80 from Rowbarrow (see below), as well as land for employment, a primary school, a local centre, and country park for West Harnham as put forward in Policy H3.1. The master plan also needs to include S1027 North of Netherhampton Road to ensure that a comprehensive approach is taken towards a green infrastructure strategy for this area.</p> <p>The green infrastructure strategy should be extended to incorporate West Harnham and Netherhampton so that the new neighbourhoods can be effectively linked to local facilities in both places as well as the city centre, the secondary schools &amp; colleges, employment centres, the hospital etc with a well-designed network of greenways, ie. off-road footpaths &amp; cycleways &amp; with a clear indication of how this will be achieved.</p> <p>This broader approach is needed because it will be difficult to break through the existing urban development to access local facilities in Harnham &amp; there may be a need to consider the adjacent vacant sites &amp; business uses for opportunities for restructuring the area as part of any development.</p> <p>Other important routes in the area will also require investment as part of this development. There is a need for green access links for walkers &amp; cyclists to the rights of way along the River Nadder connecting with Broken Bridges. Broken Bridges will need widening &amp; upgrading as will the Town Path, a very well used key route to the station and city centre which is already under pressure and clearly in need of improvement. It is essential that Foxmore Drove is retained &amp; enhanced through the site linking to the Shaftesbury Drove which also needs some improvement works.</p> <p>These green access routes need to be secured before any development commences. There is also potential for establishing a more direct route to the hospital and East Harnham via existing greenways in the longer term, &amp; a possible new route to Churchfields across the River Nadder would need serious consideration. Again, investment would be needed to improve these routes but they need to be identified and safeguarded as part of the broader green infrastructure strategy for the Netherhampton Road development, as well as more generally for Netherhampton, Quidhampton &amp; Salisbury.</p> <p>The current requirement to limit all development to below the 75m contour is too simplistic. This should be the 65m contour at the eastern end of the site to protect the western shoulder and scarp slope of Harnham Hill (as established at the South Wiltshire Core Strategy Examination in 2010) rising to 75m over the south and west of the site. Any development footprint should follow the contours/landform rather than the site boundary as referred to in the Site Landscape Assessment document.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		This is an overdevelopment of this site, originally safeguarded from development above the 75m contour to protect the downland setting on the south side of Salisbury. Only 22 units can be achieved in the north-west corner of the site as proposed in the earlier consultation on potential site options. Any development on the higher ground south of the existing Rowbarrow development would obstruct commanding views of city & wider landscape from Old Sarum in the north west to the Avon Valley and Alderbury in the south east. This panoramic view is an essential component of the setting for the Woodbury Ancient Villages Scheduled Monument and Salisbury generally. The site (if no longer in sustainable use) offers greater potential as a future country park for east Harnham to protect the higher ground, the eastern shoulder of Harnham Hill, which forms the southern backdrop to the city.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.4			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		This is an overdevelopment of this site, originally safeguarded from development above the 75m contour to protect the downland setting on the south side of Salisbury. Only 22 units can be achieved in the north-west corner of the site as proposed in the earlier consultation on potential site options. Any development on the higher ground south of the existing Rowbarrow development would obstruct commanding views of city & wider landscape from Old Sarum in the north west to the Avon Valley and Alderbury in the south east. This panoramic view is an essential component of the setting for the Woodbury Ancient Villages Scheduled Monument and Salisbury generally. The site (if no longer in sustainable use) offers greater potential as a future country park for east Harnham to protect the higher ground, the eastern shoulder of Harnham Hill, which forms the southern backdrop to the city.

Comment ID:	<a href="#">1657</a>	<b>Consultee</b> Newland Homes  <b>Person ID:</b> 395553	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.5 Upper Studley			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Proposed allocation: the proposed allocation of Upper Studley under Policy H2 is supported in principle. However, the suggested quantum of development, 20 units has been arbitrarily reduced, without clear technical justification.</p> <p>The net developable area of the site is approximately 1.7ha when account is taken of flood modelling, which has excluded the areas of the site within Flood Zones 2 and 3. If new residential development is proposed at 30dph this would yield a total quantum of circa 50 units. This quantum of development also aligns with apre-application proposal that was discussed with the Council in 2016.</p> <p>Land ownership: Newland Homes hold a subject to planning option on the site, which extends to 2.27ha (refer enclosed Site Location Plan Drg. 14.111.101)</p> <p>Summary overview of site promotion: Newland Homes appointed a consultant team in 2014 to evaluate the subject site. Preliminary representations were submitted in May 2014 in response to the 'call for sites' to inform the Council's SHLAA.</p> <p>Subsequent to the initial SHLAA submission, Newland Homes undertook more detailed landscape, ecology, and access studies which informed an iterative pre-application process, which was submitted to the Council in January 2016 (16/00517/PREAPP). The initial submission proposed a scheme of 59 No. dwellings and included the following technical information:</p> <p>Landscape and Visual Appraisal – MPH                  Ecology Survey Report – Starkecology                  Breeding Bird Survey Report – Starkecology                  Otter and Water Vole Survey Report – Starkecology                  Reptile Survey Report – Starkecology                  Bat Survey Report - Starkecology                  Transport Statement– WYG                  Tree Survey – Alan Engley Associates</p> <p>Following an iterative dialogue with the planning officer, and internal consultees, revised plans were submitted in April 2016, with again in July 2017. This reduced the quantum of proposed development to 52 No. dwellings. The layout was considered to be broadly acceptable by the planning officer in urban design terms, and the priority access junction from Firs Hill (the A361) was considered acceptable by the Highway Authority. However, the landscape and arboricultural officers required more information in relation to the long-term management / replacement of the existing tree belt alongside the Lambrok watercourse.</p> <p>Technical work in progress: following a meeting with Wiltshire Council's Spatial Planning Team in August 2017, Newland Homes are progressing detailed flood risk, drainage and arboricultural impact assessments to inform future discussions.</p> <p>Deliverability: Subject to the grant of outline planning permission in 2018, the subject site is capable of being fully delivered between 1-5 years of the grant of planning permission.</p>			

Appendix Q - Schedule of representations

	<p>Statement of Common Ground: Newland Homes are committed to continue to work proactively with the Council to ensure the delivery of this site. It is proposed that a a Statement of Common Ground will be agreed with the Council in advance of the publication of the 'Submission' version of the draft Wiltshire Housing Site Allocations Plan in 2018.</p> <p>Policy H2.5: the quantum of residential development to be increased from 20 units to circa 40-50 units.</p> <p>Paragraph 5.73: the extent of application site measures 2.27ha not 2.33ha as stated.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4718182</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Newland Homes wish to be represented at the examination to assist the consideration of the technical issues, and to answer any technical or planning policy related queries that may be raised in the round table discussion by interested parties.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1658</a>	<b>Consultee</b> Redcliffe Homes  <b>Person ID:</b> 901813	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Policy H2: notwithstanding the relatively advanced stage of the Regulation 16 stage of the Bradford on Avon Neighbourhood Plan; and the progress that has been made in respect of housing delivery in Bradford on Avon against the Core Strategy's disaggregated targets for each community area, we consider that the draft Plan should be making provision for additional growth in Bradford on Avon on the following basis: The draft Plan has taken a minimal and conservative approach to new housing growth in the North and West Housing Market Area over the Core Strategy Plan period to 2026. The draft BoANP is a restraint plan that does not propose any housing allocations. There is an unmet affordable housing need in Bradford on Avon, which can only be addressed by the provision of new housing. A number of the allocated Core Strategy strategic sites, and proposed draft allocated sites in the North and West Housing Market Area are not deliverable within the next 5 years due to technical constraints, and political hostility which will further slow delivery. The Housing White Paper (February 2017) seeks to diversify the supply of new housing in response to the dominance of the national / PLC volume home builders. The subject site is of a size (circa 2 ha) that is suitable for development by a local / regional housebuilder. It is submitted that in order to ensure a deliverable 5-year housing land supply and the Core Strategy housing requirement in the North and West Housing Market Area, and specifically, to meet the need for new affordable homes in Bradford on Avon, that the subject site should be included as an allocation for circa 45 homes in the draft Plan. Promotion History Redcliffe Homes have held an option on the subject site for a number of years and fully participated in the Core Strategy process and have made successive SHLAA and BOANP submissions. Redcliffe Homes have established a comprehensive technical evidence base for the site across all applicable disciplines. A speculative outline application was submitted in January 2017. This application was subsequently withdrawn in August 2017 to allow for further design development to address comments raised by the statutory consultees (Ref: 16/12377/OUT). A new proposal for circa 45 units is currently being formulated. Statement of Common Ground: Redcliffe Homes are willing to work collaboratively with Wiltshire Council to progress a Statement of Common Ground in advance of the finalisation of the 'submission' version of the Draft Plan. Policy H2: Wiltshire Council to allocate the subject site for circa 45 dwelling units, as outlined in red on the enclosed Parameter Plan (Ref: 057-007C).		Effective	
	<b>Attached files (Please see Objective)</b>	4718203	Consistent with national policy	
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	To make the planning case for the subject 'omission' site to be included as an allocation in the draft Plan.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The Town Council feels this site meets the aspirations of the Warminster Neighbourhood Plan (section 4.2, third row), which aspires to: "A spread of new developments around the town to avoid imbalance caused by significant developments in any one area." However, they believe this should not be brought forward before 2026, the period of the Neighbourhood Plan and Core Strategy, as the sites already allocated in the west should be developed first. This site could be included when considering the town's future planning needs post 2026 when additional sites may need to be identified. Defer any plans for this site until after the period of the Wiltshire Core Strategy and Warminster Neighbourhood Plan.

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1662</a>	<b>Consultee</b> Mrs Fiona Fox Town Clerk	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		Warminster Town Council		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Figure	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		A.52			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1. The proposed lines now shown on the map, page 28 of the WCATP, do not show the current planning status accurately. They exclude the Core Strategy, the proposed SHLAA sites referred to in our earlier comments, and extant planning and completed permissions.</p> <p>2. The omission of the Core Strategy boundaries might prejudice the Appendix D Assessment Criteria, which are the basis for many of the SHLAA site selection process decisions. These could declare the process flawed, if the settlement boundaries are not correct, in particular the exclusion criteria set out in table D2 stage 2A questions 1 &amp; 2. Further issues occur when assessing any SHLAA site on the basis of its separation from the boundary, or not being adjacent to it (see sites 2091, 1007 and 1030 for example)</p> <p>3. The new Core Strategy Areas represents a considerable expansion of the Town and Settlement Boundary, and even if the exact line cannot be currently defined (due to house positions not being agreed) then due regard must be made as if the boundary line is the same as the Core Strategy's allowance. This line can then be tightened up later.</p> <p>4. Refer to the schedule of specific comments in section 7 below, based upon the same grid reference table A1 on page 29 of the WCATP. For convenience we have started at the same grid reference point G9, G10. All proposals in the WCATP table are accepted, these are:</p> <ul style="list-style-type: none"> <li>• excluding existing recreational spaces</li> <li>• following curtilages of existing properties</li> <li>• excluding physical features such as roads, e.g. transferring the existing line to the other side of the road</li> <li>• including newly built residential and commercial developments</li> <li>• Including existing properties physically related but not necessarily directly attached to the existing settlement</li> <li>• Excluding land more closely related to the countryside</li> </ul> <p>We have also added our further comments where the principles used in the table have not been consistent throughout the boundary review.</p> <p>We would invite WC to meet with WTC and review the proposals and discuss and assess each comment individually with larger scale drawings.</p>				

Appendix Q - Schedule of representations

ITEM NO.	MAP GRID REFERENCE	PROPOSED AMENDMENT OR CORRECTION
1	G9, G10	Agree with exclusion of the Warminster Common and Allotments.
2	F11, G11	Refer to section 1 of our response. We do NOT accept the use of SHLAA sites 1032 and 302 for residential housing.
3	G11 AND 12	The existing commercial Biogas site should be included as a detached site including its extant planning for commercial employment expansion.
4	J10	The newly developed extension to Damask Way should be included within the boundary.
5	I8	The proposed line should include the Football Club car park and clubhouse within the new green space.
6	N9	The small area alongside Boreham Road and rear of Rock Lane houses is currently subject to a planning application for which WTC has recommended refusal, but not yet determined by WC.
7	09 & 010	The SHLAA site refer 304 recently approved by Secretary of State and included in the WCATP should be included linked to the existing Boreham Road properties.
8	010	The newly built housing development (ex. Bus Depot) should be included as a detached site.
9	P8 & P9	The SHLAA site ref 603 included in the WCATP (accepted in section 1 of this response) should be included and attached to the existing line.
10	05	Why is this MOD building included with a narrow access line?  Why has this MOD area been included, for the first time, together with all of the military barracks and ABRO workshops? This area has a barbed wire fence line and is not available to the public.
11	M5 to 03	This area is all military residential areas and accessible to the public, hence accepted as a detached site.
12	L3 to M4	This area is also an extensive military residential area and accessible to the public, and should also therefore be accepted as a detached site.

Appendix Q - Schedule of representations

13	N4 to Q1	All the military units (inc. residential housing) are much more extensive over the grid N4 to Q1, and we question what policy or logic has been applied in order to understand why only part of this considerable area has been identified for inclusion with the new settlement boundary and others not included.
14	K4 & K3	The inclusion of the residential units along Elm Hill has been accepted, but the policy has not been applied consistently around the town boundary on similar properties.
15	G2, H2 & H3	The far north east end of the Warminster Business Park (access from Furnax Lane) goes right up to the railway lines, and is mostly built on. These are existing employment areas.
16	G4	This site has also planning permission, and is part of the Warminster Business Park.
17	H5	We recommend including the Minster Church car park with the churchyard boundary.
18	G5 & H5	We believe that it would be beneficial to include the Warminster School main grounds including the pool, workshops and Furneaux House as well as the hard sports courts within the new boundary. This would, however, exclude the green area sports field and pitches.
19	G4	Include the perimeter of the recently approved Traveller settlement at the corner of Bath Road and Coldharbour Lane.
20	F3 & G4	Include properties known as the White House and 109 Bath Road to be consistent with the policy of existing "built development physically related to the settlement". These properties are to be fully enclosed by the Core Strategy West Urban Extension.
21	E/F3 to B/C9	The new Wiltshire Core Strategy – Warminster West Urban Extension (WWUE) extends from the Bath Road, grid F3 to B8, on the north side of Victoria Road. This settlement boundary extension will need to be added at some time in the future when the full detailed site layout is approved. Noting that there will be extensive use of buffer zones along the A36 as well as internal to the new site.
22	B8 & D9	<p>The southern side of Victoria Road contains the remaining part of the WWUE, and consists of three separate sites:</p> <p>The Redrow site (known as Tascroft Rise) is already with full approval and under construction. The new boundary can therefore be extended from St Andrews Road and Folly Lane.</p> <p>The Persimmon Site (known as Bugley Farm) has not yet been approved, but an application is under review. The site will enclose the Bugley Barton Farm House which therefore should be included within the new boundary.</p>

Appendix Q - Schedule of representations

			The remaining site (known as Folly Farm) does not as yet have any planning proposals, but remains within the designated WWUE.
	23	C9	The Rugby Club and grounds will be surrounded by the WWUE, but should be excluded from the settlement.
	24	E6 to G5	This area known as SHLAA 1007 Grovelands is subject to a current planning application (exception site), with 17 acres set aside as open space. If this site is approved the settlement boundary will need to be adjusted accordingly.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1667</a>	<b>Consultee</b> Mr Ken J McCall Co-ordinator  Campaign For A Better Trowbridge  <b>Person ID:</b> 402907	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We are extremely concerned about the extra housing allocated to Wiltshire, particularly West Wiltshire because the present infrastructure is struggling to cope with the current population! We realise that your staff are under extreme pressure from central government to comply with their instructions to provide all these extra houses but we have to consider the adverse affect on the residents, particularly people in Trowbridge and surrounding villages. Would you please reply explaining exactly how these housing figures have been calculated?</p> <p>One of our many concerns is that these proposed houses in and around Trowbridge will have a very damaging affect to wildlife and the Bechstein's bat that has a maternity roost in the ancient Biss/Green Lane woods. We would remind you that Prof John Altringham spoke at the Wiltshire Core Strategy Examination in Public in 2013 advising against the Ashton Park development of 2600 houses! Although bat specialists warned against building the 650 houses at Castlemead, Trowbridge, the development went ahead!</p> <p>The following proposed sites, if built, would also affect bat habitats and their commuting corridors:- Southwick Court, Church lane, Southwick, North Bradley, Hilperton Gap, Upper Studley and Elm Grove Farm. Unfortunately these housing estates are mainly developer designed and car-based which contradicts central governments policies of walking, cycling and public transport. We have observed that some of the neighbouring counties do not have the same high allocation of houses.</p> <p>For many years we have promoted a "Brown Field First" policy and have advised that sites like Bowyers should be developed before considering green fields. Bowyers is ideally located near the railway station (which needs improving) and would be perfect for low rise quality flats for young families, older people or single professionals. An excellent example of well designed, sought after flats can be seen in Holland where communities are thriving amid an integration of pleasant flats, houses, landscaped areas, shops, employment, doctors surgeries, sports facilities, schools and the essential amenities that are a result of good town planning.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Wiltshire Housing Site Allocation Plan Crudwell proposals - Ridgeway Farm</p> <p>I am writing to comment on the draft Wiltshire Housing Site Allocation Plan (WHSAP) and specifically in relation to the village of Crudwell where I live.</p> <p>I have lived in the village with my husband for the past six years, and am some 200m from where existing development has started (10 houses) and where a proposed allocation of a further 40 dwellings are planned. I am extremely concerned about the proposed allocation of the additional 40 dwellings for the reasons set out below.</p> <p><b>General policy issues</b></p> <p>The Site Allocation Plan notes that housing will only be allocated by Wiltshire Council where there is a strategic priority to do so. Whilst I fully understand that Wiltshire Council needs to ensure an adequate five-year housing supply across each housing market area, the Site Allocation Plan would result in an over-supply of 4,284 dwellings to 2026 once past completions, deliverable commitments and windfall sites are taken into account. Even if one were to assume (unlikely) that there would be no windfall sites, the over-supply would still be 2, 198. The Site Allocation Plan further results in an over-supply of homes in the Malmesbury Community Area, even without windfalls. It is clear, therefore, that there is no strategic need to identify any new homes in Crudwell.</p> <p>Wiltshire's Core Strategy identifies Crudwell as a "large village". Policy 1 of the Core Strategy notes that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities".</p> <p><b>Crudwell specific issues</b></p> <p>I acknowledge that Crudwell has been late in producing a Neighbourhood Plan, due in part to a Parish Council which was struggling to attract members and to function adequately. This has now been addressed, and the village has started to work on a Neighbourhood Plan. As part of this we will be undertaking a survey to determine the extent of local need for housing and other land uses. This local need will be considered in the context of other constraints to determine where and how any identified local need can be met.</p> <p>Crudwell is unsuitable for large-scale development for a number of reasons.</p> <p>New homes will require additional space at the CE Primary School. I understand that the Council's Education Department considers that at least one new classroom will be required. The school is on a constrained site and lies in a conservation area, so its ability to expand is not guaranteed.</p> <p>The village has severe flooding problems. A large proportion of the village is at risk of flooding from waterways , surface water, or both.</p> <p>The road capacity is already constrained, with dangerous speeding both along the A429 and Tetbury Lane.</p> <p>The proposed development is in a conservation area and little attention has been paid to the environmental and ecological impacts of this.</p> <p><b>Our house specific issues</b></p> <p>The noise and disturbance from the existing development of 10 new houses is already very intrusive. A large-scale development site lasting several years will be unbearable to live with.</p>			

Appendix Q - Schedule of representations

	<p>Views across open farmland (in a conservation area) will be lost forever.  The public right of way leading from the development runs right past our house. There will be increased footfall, noise, loss of privacy, dog-fouling and littering.  Overall  As there is no strategic need for large-scale development in Crudwell, I consider that it would be more appropriate for the Neighbourhood Plan to determine the level of local housing need, to consider how the existing infrastructure might be expanded to accommodate any needs and to consider the wider issues identified above.  Crudwell is not anti-growth . However, I believe that small pockets of individual development, in keeping with the existing infrastructure is far more suitable and sustainable, and would have a far less negative impact on the village. Just because an opportunistic land owner and developer have offered up a single site does not mean that this is the right solution for the needs of Crudwell and the wider Wiltshire housing need.  I trust that Wiltshire Council will work constructively and sympathetically with the village of Crudwell to determine the most appropriate solution for all concerned.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Housing Site Allocations Plan</p> <p>1. I am writing to let you know that I do not consider the Draft Wiltshire Housing Site Allocations Plan to be a sound document for the following reasons:</p> <p>a) It unfairly targets Trowbridge for a large allocation of new homes where other North &amp; West Wilts areas such as Bradford on Avon, Melksham and Chippenham have been spared. Between 2001 and 2015 the population of Chippenham has grown by 7.8%. In that same period Trowbridge's number have increased by 31.3%, without a corresponding proportionate investment in infrastructure over that time.</p> <p>b) After years in preparation, the Plan is rushed out for consultation at the start of the holiday season, making it difficult for people to have time to properly consider its implications.</p> <p>c) Holding the one open day in Trowbridge on 26th July as schools are breaking up for the summer look like a deliberate attempt to keep people away from the event. The event itself was inadequately resourced by Wiltshire Council and no printed copies of the Plan were made available to the public to take away.</p> <p>d) The Plan puts additional pressure on already overstretched infrastructure in Trowbridge's, traffic, schooling, health and other services without providing realistic plans to augment these.</p> <p>e) It rides roughshod over previous assurances that villages surrounding Trowbridge such as Southwick, North Bradley and Hilperton would remain as separate entities.</p>

Comment ID:	<a href="#">1671</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Norman Swanney	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Proposal H2.6 – Site 3565 Land East of the A361 at Southwick Court</p> <p>2. I am also writing to oppose the inclusion of site 3565 (fields adjacent to Southwick Court) in the Site Allocations Plan for the following reasons:</p> <p>a) The land suffers from serious flooding which would not only jeopardise any new homes but would also threaten nearby existing properties with an increased risk of flooding.</p> <p>b) The land is bounded by an ancient and protected hedgerow which I believe cannot be legally breached and certainly should not be broken though as it is an important environmental asset.</p> <p>c) The site has been used by many generations for its current use of farming and recreational space and is a much appreciated and greatly valued asset to the local community.</p> <p>d) Building houses on this greenfield site when brownfield sites are available in the area is quite contrary to government assurances.</p> <p>e) This site has been opposed by Trowbridge Town Council and local alternatives for a greater number of dwellings identified. There is no need to lose this valuable green space for homes which will not be affordable to those who really need housing.</p> <p>f) Rare post-medieval earthworks will be destroyed by any housing development on this site.</p> <p>g) The sustainability appraisal for site 3565 admits that it is a less sustainable option for development, and that five moderate adverse effects have been identified in relation to this site. The inclusion of such a site gives the impression that it has been rushed into service just to make up the numbers. The statement that this site could substantially boost the supply of homes in the area is a “major beneficial effect” is derisive. Any site where building is allowed would provide this outcome and this assertion cannot be regarded as a positive argument in support of developing site 3565.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Sites: 1021 - Church Lane / 3620 - Upper Studley / 3565 - Southwick Court 3. For good environmental reasons I also wish to oppose the development of the above sites: a) Taken together, development on these sites would only increase congestion on the roads for residents trying to reach their day-to-day needs for commuting, shopping, schooling, health and other services in the town and farther afield. b) Existing bus services are inadequate and infrequent, and cycling involves routes into Trowbridge which are daunting through having to share busy and narrow main roads with motor traffic. c) Trowbridge is a dormitory town for employment in Bath and Bristol but an inadequate and expensive rail service and awkward to reach station (from these sites) would simply add to commuting by car on congested narrow main roads. Roads to Bath and Bristol are already problematic in rush hour and trains are always overcrowded.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Please see below my comments on the above consultation which I would like taken into account. Wiltshire is a rural county and the building of houses on greenfield sites should be restricted as much as possible to protect that. North Bradley should retain its status and identity as a village and not become part of Trowbridge. The buffer zone is very important. The solar farm fields on the North Bradley side already encroach on the open countryside which forms an oasis between North Bradley, Southwick and Trowbridge.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The HSAP includes not only sites, but also proposes changes to settlement boundaries. Such boundary changes have consequences for the application of policy, for example in determining where a presumption in favour of certain development should occur. The following response deals with the settlement boundary issue first before moving on to consider the sites.</p> <p>The boundary reviews generally consist of 'good housekeeping' in terms of updating boundaries to take in areas of development that are logically part of the village and parish of North Bradley.</p> <p>2.1 It is noted that the boundary of the White Horse Business Park (WHBP) has been moved westwards (as indicated in red on the map below). The Parish Council would normally have objected to this as an encroachment into the Parish, However, the area is not indicated as being suitable for saving as part of the proposed landscape setting policy as identified in the Landscape Setting report that supports the HSAP (see Appendix 2). The Parish Council is aware of the need to argue from sound evidence, and also values the local employment that could be provided by an expansion of the WHBP, and therefore does not object to this expansion, subject the larger area identified in the emerging NDP being protected. It does suggest however that landscaping be provided as indicated in the Landscape Setting Report main map (see Appendix 2 and section 3 [in attached document]).</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1687</a>	<b>Consultee</b> Lee Lee Vice Chair  North Bradley Parish Council  <b>Person ID:</b> 1129933	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Introduction</p> <p>This is the formal response of North Bradley Parish Council to the 10-week consultation on the above draft plan. The Parish Council OBJECTS to the Housing Site Allocations Plan (HSAP) and in particular two of the three sites suggested for allocation within the Parish. While the Parish Council routinely comments on such consultations, the community are currently engaged in producing a Neighbourhood Plan (NDP) , and this gives an additional significance to the following comments, since good planning practice and Government guidance demands that good co-ordination is maintained between emerging strands of policy and that, wherever possible, conflicts should be reconciled and aims harmonised. Paragraph 157 of the NPPF says: Crucially, Local Plans should ... be based on co-operation with neighbouring authorities, public voluntary and private sector organisations.'. It does not seem to the Parish Council as if the standards set in the NPPF or in Planning Practice Guidance have been met in the preparation of the HSAP.</p> <p>DPD and NDP Sites</p> <p>3.0 It is regrettable that, despite the LPA's Link Officer being asked to provide maps indicating the landscape policy of the NDP on 19th April, (see Appendix 1 [in attached document] for e-mail) that the implications of the landscape setting policy for site selection for the HSAP were not communicated to the Spatial Planning HSAP team. Additionally it is a pity that the Steering Group were not in any case directly consulted about site selection in their area at the site selection stage, before the HSAP went out to consultation on 10th July. Had this happened, the HSAP team would have known that the area in which they have allocated sites, is likely to be subject to a landscape policy, reflecting the wishes of the community, that retains open space between Trowbridge and North Bradley.</p> <p>3.1 The Parish Council is also concerned about the validity of the planning argument in the HSAP – with some of the assertions appearing to be based on rather thin evidence.</p> <p>3.2 Overall, there is, unfortunately, a fundamental conflict between the emerging HSAP and NDP. However, as these are both at an early stage, it may yet be possible to harmonise them. Nevertheless, as things stand, the Parish Council finds itself in the position of having to OBJECT to the emerging Housing Site Allocations Plan on the following Grounds:</p> <p>3.3 Failure in Duty to Cooperate</p> <p>The HSAP has fallen short of the standards required by the 2011 Localism Act, which amended the 2004 Planning and Compensation Act, and subsequent Planning Practice Guidance and is therefore flawed and likely to be UNSOUND.</p> <p>'The local planning authority should work with the qualifying body to produce complementary neighbourhood and Local Plans. It is important to minimise any conflicts between policies in the neighbourhood plan and those in the emerging Local Plan, including housing supply policies. This is because section 38(5) of the Planning and Compulsory Purchase Act 2004 requires that the conflict must be resolved by the decision maker favouring the policy which is contained in the last document to become part of the development plan. Neighbourhood plans should consider providing indicative delivery timetables, and allocating reserve sites to ensure that emerging evidence of housing need is addressed. This can</p>			

## Appendix Q - Schedule of representations

help minimise potential conflicts and ensure that policies in the neighbourhood plan are not overridden by a new Local Plan'. Paragraph: Planning Practice Guidance, Neighbourhood Plans, 009 Reference ID: 41-009-20160211.

The NPPF (Para. 155) says:

Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.

3.5 The North Bradley NDP has in fact been developing since November 2016. Early community engagement took place in February and March 2017. After conducting a considerable amount of research, Regulation 14 consultation for the NDP is now imminent and the NDP will shortly be submitted for SEA and HRA Screening. Community engagement revealed a strong desire to preserve the identity and setting of North Bradley village and to prevent it from losing its identity as a suburb of the principal settlement. The main evidence base for the plan is contained within a Scoping Report, which together with a professional Landscape Report (the latter given here in full as Appendix 2) indicate multiple reasons for retaining a landscape setting gap between Trowbridge and North Bradley on the grounds of setting, preventing coalescence that would lead to loss of local distinctiveness, and harm to biodiversity. Indeed the NDP is encouraged to create such a policy by virtue of paragraph 5.150 of the Wiltshire Core Strategy:

'It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities. The local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning.'

Given the existence of paragraph 5.150 and the emergence of the HSAP, it is surprising that Wiltshire Council did not realise the additional importance of ensuring co-operation with local NDP teams of the villages around Trowbridge. However, this may reflect a wider problem; the fact that Wiltshire Council does not seem to take neighbourhood planning as seriously as the regulations require.

3.6 It is accepted that some consultation with Parish Councils did take place, but Neighbourhood Plan Steering Groups are semiautonomous bodies, often made up of community members not members of the Parish Council. Simply consulting a Parish Council is no guarantee that this will result in effective consultation of any neighbourhood plan group. No effort was made to directly reach out to any NDP group in order to ascertain whether conflict was likely to arise between sites emerging there and those that could be considered for the HSAP.

The Wiltshire approach seems to fall short of what Planning Practice Guidance requires. PPG says:

'The duty requires active and sustained engagement. Local planning authorities and other public bodies must work together constructively from the outset of plan preparation to maximise the effectiveness of strategic planning policies. It is unlikely that this could be satisfied by consultation alone. Local planning authorities that cannot demonstrate that they have complied with the duty will fail the independent examination process'.

Paragraph: 009 Reference ID: 9-009-20140306

3.8 It goes on:

'Cooperation should take place throughout Local Plan preparation – it is important not to confine cooperation to any one point in the process. Local planning authorities and other public bodies need to work together from the outset at the plan scoping and evidence gathering stages before options for the planning strategy are identified. That will help to identify and assess the implications of any strategic cross boundary issues on which they need to work together and maximise the effectiveness of Local Plans. After that they will need to continue working together to develop effective planning policies and delivery strategies. Cooperation should continue until plans are submitted for examination and beyond, into delivery and review.

Local planning authorities should bear in mind that failure to demonstrate compliance with the duty at the Local Plan examination cannot be corrected after the Local Plan has been submitted for examination. The most likely outcome of a failure to demonstrate compliance will be that the local planning authority will withdraw the Local Plan'. Paragraph: 012 Reference ID: 9-012-20140306

3.9 We have to ask, why was a simple audit not undertaken of emerging NDP sites? This could have taken the form of a questionnaire to all groups. Alternatively a working group could have been formed in all areas where areas were proposed including representatives of both NDP groups and the LPA. This would have indicated sites and possible conflicts at an early stage. Unfortunately the answer to this question seems to suggest that the Wiltshire Council's attitude to neighbourhood planning as a whole may be the cause.

3.10 Incorrect approach to neighbourhood planning in site selection

Appendix Q - Schedule of representations

Verbal communication with the LPA seems to indicate that they believe a neighbourhood plan is 'not relevant' until it reaches the Regulation 16 stage. This is incorrect. It is disturbing that the LPA seems to believe that a neighbourhood plan about to embark on Regulation 14 Consultation is not worthy of consideration in site selection. If this really is the attitude of Wiltshire Council then it seems to conflict with that of the Government. Annex 1. Paragraph 216 of the NPPF says:

From the day of publication, decision-takers may also give weight to relevant policies in emerging plans according to:

- the stage of preparation of the emerging plan (the more advanced the preparation, the greater the weight that may be given);
- the extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given); and
- the degree of consistency of the relevant policies in the emerging plan to the policies in this Framework (the closer the policies in the emerging plan to the policies in the Framework, the greater the weight that may be given).

3.11 Planning Practice Guidance Neighbourhood Planning para 07 adds:  
 'An emerging neighbourhood plan may be a material consideration. .... Factors to consider include the stage of preparation of the plan and the extent to which there are unresolved objections to relevant policies.... Decision makers should respect evidence of local support prior to referendum when seeking to apply weight to an emerging neighbourhood plan. ....It is for the decision maker in each case to determine what a material consideration is and what weight to give it.'

3.12 Wiltshire Council might say that they have complied with the above wording, in determining that the North Bradley NDP is not worthy of consideration at the site selection stage of the HSAP. However, the decision made is clearly wrong when one considers its effects. In the case of the North Bradley Neighbourhood Plan, these include a fundamental conflict between the emerging policies of both NDP and HSAP. This cannot be good planning and it suggests that the way the HSAP was developed was faulty.

3.13 The advice given in PPG is clear:  
 Whilst a referendum ensures that the community has the final say on whether the neighbourhood plan comes into force, as part of the development plan, decision makers should respect evidence of local support prior to the referendum when seeking to apply weight to an emerging neighbourhood plan' PPG Paragraph: 007 Reference ID: 41-007-20170728

3.14 In order to avoid conflicts such as the one that has arisen, and given the stakes in this case, it seems evident that any emerging neighbourhood plan likely to conflict with the sites selected by the HSAP should be taken account as soon as possible, and weight duly attached according to its stage of progress. As it is, there was no direct consultation between the HSAP and neighbourhood plan groups and the entire matter of neighbourhood planning took up just 3 paragraphs in the HSAP.

3.15 Topic Paper 2, paragraph 6.6 states that in Step 3 of the site selection procedure, note was taken '...of how work on Neighbourhood Plans has progressed since first considered at stage 2 and the extent to which they may contain housing proposals of their own.' However, this DID NOT occur at North Bradley where no contact was made by the LPA to the NDP team.

3.24 Nowhere in the supporting documentation (e.g. Topic Papers 2 and 4) of the HSAP is it clear that the impact of the proposed sites on North Bradley's setting was properly considered. Indeed the entire process seems to have been a 'top-down' strategic level exercise without the benefit of local knowledge that better integration with the neighbourhood plan process might have achieved.

3.27 Value and Reputation of Localism  
 At the present time, contrary to the spirit of Localism, Wiltshire Council appear to be pursuing their traditional 'top-down' view of planning. This one way street involves lower tier plans conforming rigidly with those in higher tiers. There is little or no room for ideas to flow back upwards, from the community.

3.28 There can be little doubt that, should the HSAP proceed on its current basis, then this would cut directly across emerging neighbourhood plans and would impose sites upon them. At the present time conflicts between the HSAP and neighbourhood plans are known to exist at:  
 Hilperton  
 Market Lavington  
 North Bradley  
 Southwick

It is known that these groups are currently considering making a joint submission to the Inspector should the HSAP be submitted in its current form. There will no doubt be many more groups with similar arguments. The cumulative effect of this will be to significantly degrade public

Appendix Q - Schedule of representations

confidence in the neighbourhood planning process in Wiltshire. As neighbourhood plans have so far proved to be at least as good as LPA's in delivering sites nationally (as DCLG Studies 2015 and 2016 confirm) the ironic effect of this could be to actually slow housing delivery.

3.31 Value and Reputation of Localism  
Localism, especially its more active arm – neighbourhood planning – has the potential to deliver many new homes and in many cases seems to be outstripping traditional local plans as a delivery mechanism. For example a DCLG study in October 2015 ('Neighbourhood Planning: progress on housing delivery') suggested that Neighbourhood Plans frequently allocated more housing than did their Local Plans. A follow up study in 2016, confirmed this and suggested that the average plan allocated 10% more than their LPA.

3.32 Neighbourhood Planning is therefore valuable, not only because it allows the community a democratic input into the planning process, but because it actually works – delivering more sustainable homes than traditional top-down methods. It should follow therefore that LPA's should be carefully cultivating this new arm of the planning process. However, in Wiltshire this does not seem the case, with little meaningful engagement leading to confusion and delay. Given the extent of the housing crisis this is most regrettable. Why was an audit of all neighbourhood plan sites not taken during the site selection process?

3.33 The problem with the current approach is that it is already leading to dissatisfaction with the neighbourhood planning process in Wiltshire and in North Bradley in particular. If this spreads then collectively it could act as a major deterrent to the entire concept in Wiltshire, leading to substantially less delivery of new housing.

The process of developing the HSAP demonstrates a failure in the Duty to Cooperate This not only a failure to comply adequately with the Localism Act 2011, but also conflicts with one of the Core Planning Principles of the NPPF, namely that; 'development should be genuinely planned, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area'. NPPF paragraph 17.

The HSAP demonstrates an incorrect approach to neighbourhood planning as a whole  
It is clear that Wiltshire Council does not properly engage with neighbourhood planning, seeing it as an additional, almost optional element that has to fit in with the traditional top-down model. There is no recognition that the process should be a dynamic one with real two-way conversation and close linkages. In particular the LPA seems to believe that neighbourhood plans can be safely ignored until they have been submitted for examination. This is incorrect, bad planning and conflicts with Government guidance. This attitude has directly led to the present conflict that exists between the NDP and HSAP.

The HSAP clearly fails to fully consider the impact of the sites proposed on the setting of North Bradley  
The Wiltshire Core Strategy specifically invites neighbourhood plan groups around Trowbridge to consider the future of the landscape gap between them and Trowbridge stating in paragraph 5.150:  
'Open countryside should be maintained to protect the character and identity of these villages as separate communities. The local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning.'  
Having set the North Bradley NDP on this course, Wiltshire Council then allocate three large sites in the very area in question without any direct consultation with the NDP group.

Value and Reputation of Localism  
The HSAP as currently drafted is likely to seriously harm the credibility of neighbourhood planning in Wiltshire simply because it appears that neighbourhood plans have been paid scant regard in its creation. This will no doubt act as a deterrent to others currently considering making a plan. How real is Localism when it can be ignored and over-ridden by traditional top-down planning? The lack of a specific site audit direct from the neighbourhood planning groups is a serious omission in the HSAP, and the failure of Wiltshire Council to 'connect the dots', linking maps supplied by themselves for a landscape protection area at North Bradley with their HSAP is a serious error.

The Parish Council SUPPORTS the site at Elm Grove Farm, in order to deliver necessary housing for Trowbridge, but requests that the sites off the A363 at White Horse Business Park, and that at Southwick Court be removed in order to protect the landscape setting of North Bradley, local biodiversity and the reputation of neighbourhood planning in Wiltshire. Their selection is considered to be unsound for the reasons given.

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1688</a>	<b>Consultee</b> Lee Lee Vice Chair  North Bradley Parish Council  <b>Person ID:</b> 1129933	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		No	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>3.16 HSAP is based on questionable argument for housing growth                  The Wiltshire Core Strategy indicates that additional housing is required for growth in Trowbridge. Core Policy 29 sets out that an additional 960 dwellings should be developed at the town ... and the HSAP itself is foreshadowed; 'Further land for housing development at Trowbridge will be identified in the Housing Site Allocations DPD...'. However at no point is the fact that these houses might have to be accommodated within North Bradley parish mentioned – an example of poor drafting that effectively denied the community awareness that this might happen.</p> <p>3.17 However, there is a more serious objection to the HSAP's interpretation of the above policy. The HSAP states (4.52) '...housing development at Trowbridge will fall short of the WCS indicative level of 6,810 dwellings by around 1,220'.                  But, this assessment is based on the un-verifiable assumption that the Ashton Park will be much slower in delivery than anticipated and that sites for additional homes therefore need to be identified to avoid a shortfall in housing land supply later in the plan period. In fact the HSAP acknowledges that of the projected shortfall of 1220, fully 1000 come from the assumption that 1000 homes now will not be delivered within the WCS plan period (up to 2026) as thought.</p> <p>3.18 However, this assumption about Ashton Park relies simply on the word of the developers who supplied this estimate to the LPA. This cannot be considered to be reliable. The developers may have a vested interest in encouraging the belief that delivery will be slow (so as to get other land allocated in the HSAP). They are certainly not equipped with a crystal ball and cannot therefore accurately predict delivery ahead.</p> <p>3.19 This is particularly relevant at the present time, which is one of great economic uncertainty, as the UK struggles with negotiations on Brexit. The share prices of housebuilders have been hard hit by Brexit (making it more difficult for them to raise finance for new housing projects) and many have announced that they are putting new projects on hold. Yet recent announcements by opposition parties in the UK suggest that Brexit, least of all a Hard Brexit, may not even happen. The truth is no one knows how Brexit will pan out, yet the HSAP would have us believe that housing developers can accurately predict delivery for up to 9 years ahead! This seems very unlikely, if not impossible. We then have to consider what would happen should the developers simply change their minds if circumstances change. This is not at all unlikely; should the Brexit logjam be suddenly released (for example if an agreement was reached to stay in the EU or at least the customs union) then the circumstances and attractiveness of development at Ashton Park could change dramatically and almost overnight. This would pump 1000 homes into the housing supply far earlier than the HSAP predicts.</p> <p>3.20 Given the questionable basis on which the site allocation proposals are based – namely the actual need for the scale of development proposed – it has to be questioned whether the number and size of sites allocated is actually needed to meet the needs of Trowbridge.                  [From summary] -                  The HSAP is based on faulty argument for housing growth                  That housing is needed to support growth at Trowbridge is not disputed. However the quantum now being proposed is far higher than mentioned in the WCS and this seems to relate to the acceptance of an estimate submitted by an interested party. The assumption that Ashton Park will not</p>				

Appendix Q - Schedule of representations

	be delivered in its entirety during the plan period is a fundamental flaw in the calculations used to determine the level of housing which should be allocated. This is particularly unsound given the economic uncertainty in the UK today.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>3.21 Failure to fully consider impact of sites proposed on setting of North Bradley As shown in the Landscape Setting Report commissioned for the NDP, a meaningful gap between Trowbridge and North Bradley needs to be maintained in order to preserve the rural character and setting of the village. If this is not done, then it will lead to the inevitable coalescence of Trowbridge and North Bradley, creating an urban sprawl and destroying the village character for which this part of Wiltshire is famous and which the community loves.</p> <p>3.22 While development must take place to provide necessary housing, this should not be at the expense of destroying character and sense of place. If repeated across Wiltshire this would lead to an anonymous sprawl with everywhere becoming simply 'somewhere on the way to somewhere else'. It is the individual character of settlements that residents value and which underpin the county's tourism and leisure industries. Development which destroys this is not sustainable since it involves handing on to our descendants something worse than what we ourselves inherited.</p> <p>3.23 The Landscape Setting Report is given in full as Appendix 2. [in the attached document]</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1690</a>	<b>Consultee</b> Lee Lee Vice Chair  North Bradley Parish Council  <b>Person ID:</b> 1129933	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	3.25 Faulty SA Part of the sites selection procedure is based on an SA (Sustainability Appraisal), The Sustainability Objectives for this were: Sustainability Objectives Protect and enhance all biodiversity and geological features and avoid irreversible losses Ensure efficient and effective use of land and the use of suitably located previously developed land and buildings Use and manage water resources in a sustainable manner Improve air quality throughout Wiltshire and minimise all sources of environmental pollution minimise impacts on climate change a) through reducing greenhouse gas emission b) through reducing our vulnerability to future climate change effects. Protect, maintain and enhance the historic environment. Conserve and enhance the character and quality of Wiltshire's rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place Provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwellings sizes, types and tenures Reduce poverty and deprivation and promote more inclusive and self-contained communities Reduce the need to travel and promote more sustainable transport choices Encourage a vibrant and diversified economy and provide for long-term sustainable economic growth Ensure adequate provision of high quality employment land and diverse employment opportunities to meet the needs of local business and a changing workforce Objective 7 should have enabled the plan makers to determine that two of the sites they proposed were harmful to the setting of North Bradley. However, in Section 7.10.74 of the SA itself (regarding Land Off A363 at WHBP) we find no mention of the impact on the setting of North Bradley at all, except for a statement that: 'The site is situated to the immediate east of North Bradley village and west of the White Horse Business Park. The land comprises a series of agricultural fields / informal open space and, as such, would not maximise the use of previously developed land'. The score given for this site against Sustainability Objective 7 records only minor adverse effects on landscape. This completely ignores the sensitivity of the area in landscape setting terms as established by WCS paragraph 5.150, to which it fails to refer, and is clearly wrong in terms of actual impact as is proven by the Landscape Setting Report commissioned for the NDP. A similar error is made for the Southwick Court site. That the SA could have made such fundamental mistakes in scoring brings its entire credibility into question.

				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.2				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>3.29 Conflict with WCS Policy 51 Landscape                      The two sites not included in the NDP (Land off A363 at White Horse Business Park and Southwick Court) also conflict with Wiltshire Core Strategy policy 51 (Landscape). This states:                      ‘Development should protect, conserve and where possible enhance landscape character and must not have a harmful impact upon landscape character, while any negative impacts must be mitigated as far as possible through sensitive design and landscape measures. Proposals should be informed by and sympathetic to the distinctive character areas identified in the relevant Landscape Character Assessment(s) and any other relevant assessments and studies. In particular, proposals will need to demonstrate that the following aspects of landscape character have been conserved and where possible enhanced through sensitive design, landscape mitigation and enhancement measures.’                      The proposal of these sites also make the invitation contained within the following part of Paragraph 5. 150 of the WCS very hard to carry through:                      ‘It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities. The local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning.’                      4.0 There is no desire on the part of the NDP team to have any conflict between the emerging HSAP and the NDP. The Parish Council accepts the need to contribute towards housing need to Trowbridge. However, it does not agree with the quantum proposed nor the locations of all of the proposed sites. Dialogue is sought with the LPA to discuss revisions which will enable a suitable landscape setting area to be retained, while contributing towards local housing need. This is permitted by planning Practice Guidance, which says:                      A neighbourhood plan can propose allocating alternative sites to those in a Local Plan, but a qualifying body should discuss with the local planning authority why it considers the Local Plan allocations no longer appropriate. In rural areas, all settlements can play a role in delivering sustainable development.’                      Paragraph: 044 AD: 41-044-20160519                      4.1 The proposed Landscape Setting Policy for the NDP, based on the evidence of the Landscape Setting Report is given as Appendix 1.                      4.2 It should be possible to accommodate the growth actually needed for Trowbridge with the desirability of preserving the character and setting of North Bradley, and to this end the NDP accepts one of the sites proposed, that at Elm Grove Farm (200 new homes), but has to reject the others because they conflict with the professional advice obtained by way of landscape appraisal and also with the wishes of the community. It is requested that these sites are withdrawn in order to resolve the conflict between the HSAP and NDP.                      Land off the A363 at White Horse Business Park (150 houses) conflict directly with the biodiversity and landscape setting aims of the North Bradley NDP (for Policy 1 of the NDP – see Appendix 3 to this response [in attached document]). This is clearly demonstrated in the Landscape Setting Report given as Appendix 2 [in attached document].</p>

This states:                  ‘Development should protect, conserve and where possible enhance landscape character and must not have a harmful impact upon landscape character, while any negative impacts must be mitigated as far as possible through sensitive design and landscape measures. Proposals should be informed by and sympathetic to the distinctive character areas identified in the relevant Landscape Character Assessment(s) and any other relevant assessments and studies. In particular, proposals will need to demonstrate that the following aspects of landscape character have been conserved and where possible enhanced through sensitive design, landscape mitigation and enhancement measures..’                  The proposal of these sites also make the invitation contained within the following part of Paragraph 5. 150 of the WCS very hard to carry through:                  ‘It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities. The local communities may wish to consider this matter in more detail in any future community-led neighbourhood planning.’                  4.0 There is no desire on the part of the NDP team to have any conflict between the emerging HSAP and the NDP. The Parish Council accepts the need to contribute towards housing need to Trowbridge. However, it does not agree with the quantum proposed nor the locations of all of the proposed sites. Dialogue is sought with the LPA to discuss revisions which will enable a suitable landscape setting area to be retained, while contributing towards local housing need. This is permitted by planning Practice Guidance, which says:                  A neighbourhood plan can propose allocating alternative sites to those in a Local Plan, but a qualifying body should discuss with the local planning authority why it considers the Local Plan allocations no longer appropriate. In rural areas, all settlements can play a role in delivering sustainable development.’                  Paragraph: 044 AD: 41-044-20160519                  4.1 The proposed Landscape Setting Policy for the NDP, based on the evidence of the Landscape Setting Report is given as Appendix 1.                  4.2 It should be possible to accommodate the growth actually needed for Trowbridge with the desirability of preserving the character and setting of North Bradley, and to this end the NDP accepts one of the sites proposed, that at Elm Grove Farm (200 new homes), but has to reject the others because they conflict with the professional advice obtained by way of landscape appraisal and also with the wishes of the community. It is requested that these sites are withdrawn in order to resolve the conflict between the HSAP and NDP.                  Land off the A363 at White Horse Business Park (150 houses) conflict directly with the biodiversity and landscape setting aims of the North Bradley NDP (for Policy 1 of the NDP – see Appendix 3 to this response [in attached document]). This is clearly demonstrated in the Landscape Setting Report given as Appendix 2 [in attached document].</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Housing Site Allocations Plan: Marlborough Town Council                      Marlborough Town Council's Planning Committee met on Monday, 18th September and resolved to make a corporate response on the above consultation. An extract from the minutes is as follows:                      WILTSHIRE COUNCIL SITE ALLOCATION CONSULTATION                      Members noted a report by the Town Clerk and considered a corporate response. The Marlborough Area Neighbourhood Plan Steering Group had also considered this document. The Town Mayor's proposed comments were agreed to be included in the Town Council's response: "Marlborough Town Council recognises that the settlement boundary will have to be adjusted, in the coming years, to include new housing developments and additional amenities. This will include new housing like the Salisbury Road development on Crown Estates land, a new cemetery because the current one is nearly full, and a new school site for Preshute School which is in an unsuitable building with temporary classrooms outside. The settlement boundary will also be reviewed as part of the Marlborough Area Neighbourhood Planning process."                      RESOLVED: to delegate to the Town Clerk to send a corporate response to Wiltshire Council incorporating the Town Mayor's comments and the relevant points made by the Marlborough Area Neighbourhood Plan Steering Group.                      The following link the above comments to the Plan and other supporting documents to the consultation:                      Wiltshire Housing Site Allocations Plan - Chapter 6, page 71 - Settlement Boundary Review - Appendix 10, page 71 - Amended Settlement Boundary Map - Marlborough                      Topic Paper 1, Settlement Boundary Review Methodology - Chapter 7.31, page 22                      Marlborough Town Council recognises that the settlement boundary will have to be adjusted in the coming years to include new housing developments and additional amenities. This will include new housing like the Salisbury Road development on Crown Estates land, a new cemetery because the current one is nearly full and a new school site for Preshute School which is in an unsuitable building with temporary classrooms outside. The settlement boundary will also be reviewed as part of the Marlborough Area Neighbourhood Planning process. (The Neighbourhood Plan is not yet submitted so Chapter 6.7 of the Pre-submission draft plan is relevant to this)                      Community Area Topic Paper - Marlborough                      Settlement Strategy para. 2.3 Table 2.1                      Appendix 10, page 71 - Amended Settlement Boundary Map - Marlborough                      Manton is named as a small village but, is, in fact, part of Marlborough through boundary changes made in 1934. It is not clear if the settlement boundary map should include Manton as part of the town. It currently does not.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Community Area Topic Paper - Marlborough Issues and considerations, para 2.5                  The points about infrastructure requirements set out in this paragraph should not be overlooked or unduly delayed. In 2017, Preshute School is having to replace temporary buildings with more up to date ones to meet demand. Reception classes at the new Marlborough St Mary's School are almost at capacity and development (planning permission granted 13.9.17) at the strategic site at Salisbury Road (168 dwellings) will put further strain on capacity. At 5.78 in the WCS it states that...'There is a aspiration to merge the existing infant and junior schools in the town although extra capacity should be provided to cater for the long term needs of the town.'                  General Comment - On housing, Wiltshire Council documents deal with numbers only which doesn't give a true reflection of the needs of the community and do not address the proper mix of housing needed.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I would like to lodge my objection to the Ridgeway Farm site allocation (consultation closes 22 September 2017). As a resident of Crudwell village, I feel that an addition of 40 new houses (representing a 20% increase in dwellings in the village) is far too demanding on the fragile infrastructure of our village. I welcome the chance to set out my views and to participate in a fair consultation process.</p> <p>The main points of my objection are listed below, in no particular order:</p> <p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell.</p> <p>A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p> <p>Policy 1 of Wiltshire’s Core Strategy states that “Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities.” but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met.</p> <p>Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan, not via the whims of local landowner wishing to make a profit.</p> <p>Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.</p> <p>Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.</p> <p>Crudwell Primary School is already greatly over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of</p>			

Appendix Q - Schedule of representations

	<p>encroaching into playing fields. The school's ability to expand is not guaranteed and the governors and teachers have already expressed concern and noted their inability to expand in the short term.</p> <p>There is significant community concern about safety and the increased traffic flows that will arise on Tetbury Lane, particularly during morning and afternoon school runs, and particularly given the location of the Ridgeway site on Tetbury Lane. The lane is narrow and has only limited and broken stretches of pedestrian pathway down to the A429 main road and to the School and other facilities in the village.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell is not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I have read the Atkins Report entitled Wiltshire Housing Site Allocations Plan: Sustainability Appraisal. Insufficient importance and weighting is given to the adverse impact that any sizeable development will have on the capacity of the road network in the Harnham area. As a local resident I cannot support any suggestion of a development of this significant size in the local area. On this basis the Allocations Plan has not been positively prepared and is not effective. The existing road network across Harnham is already overloaded at peak times in the day. The roads are in a very poor state of repair (Old Harnham Road towards The Rose and Crown) and excessive transport is already using the historic old bridge on St Nicholas Road. Whilst reference is made to the Salisbury Transport Strategy and the need for this to take account of future developments no reference is made to the existing problems that are already being encountered on a day-to-day basis with the existing road network. Removal of any large scale allocations such as H3.1 due to an already overloaded road infrastructure.

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1703</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Skip Walker	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Ridgeway Farm, Crudwell, allocation of site for 40 houses</p> <p>As someone whose house has been flooded twice in the 15 years I have been living here I am writing to express my deep concern over the inclusion of a proposal for 40 houses at the above site in Wiltshire Council's Draft Site Allocation Plan.</p> <p>Residents in the vicinity of the Swillbrook stream have already been told by Wessex Water and the Environment Agency that while it is recognised that the present infrastructure (inadequate drains, sewers, pumping station, low bridge etc) cannot cope with the extremes of rainfall experienced in the last 15 years, and likely to recur with the same frequency in future years, there is simply not enough money to put matters right given that only 38 houses have been affected. The figure of 38 households might seem insignificant to these authorities but I am sure you recognise that to the individual householders involved it is of considerable significance and we all of us live in fear every time there is heavy rainfall that we will be flooded once again, with the huge amount of distress, disruption and expense that results.</p> <p>The Ridgeway Farm site is land that eventually drains into the Swillbrook and the proposed houses would no doubt share the present sewage and storm drainage systems. The area of land covered by the buildings themselves (houses and garages) and the roads serving them would be substantial, greatly reducing the ability of the land to soak up rainfall, increasing run-off and exacerbating what is already an unacceptable state of affairs for existing residents. From the number of meetings I have attended in recent months I am left with the impression that the council believes there is no alternative to the Ridgeway Farm site and that, as a designated Large Village, Crudwell has to accept its share of the county's housing allocation. If this turns out to be the case and the site is approved by the inspector I would urge the council as strongly as I am able not to approve any subsequent planning application for any further development on the Ridgeway Farm site without a condition that comprehensive flood prevention measures have to be put in place before any development begins.</p> <p>This should apply even if several applications are submitted over a period of years, each for a small number of houses on the site, in the crafty way developers have (which I believe is dishonest) of phasing the development to avoid having to pay for "planning gain".</p> <p>I would be most grateful if a copy of this letter is included in the package of documents submitted to the inspector of the Draft Site Allocation Plan in order that he is made aware of the enormous suffering that would almost certainly result if Crudwell residents were once again flooded simply to satisfy the bottom line of development companies and an arbitrary figure for new housing in the county demanded by the government.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1704</a>	<b>Consultee</b> Colerne Industrial Estates  <b>Person ID:</b> 404631	<b>Agent</b> Mr Giles Brockbank Director  Hunter Page Planning Ltd  <b>Person ID:</b> 863491	<b>Do you consider the draft WHSAP is legally compliant?</b>  No
				<b>Do you consider the draft WHSAP is sound?</b>  No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified
				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site with which this representation refers to is part of the former Colerne Airfield which is identified on the attached site location plan. Colerne is identified as a large village by Policy CP1 of the Wiltshire Core Strategy. This is a settlement with a limited range of employment, services and facilities. The policy further states that development at large villages will be limited to that needed to help meet the housing needs of settlement and to improve employment opportunities, services and facilities. In addition, policy CP37 allows for the redevelopment of redundant MoD sites.</p> <p>It is recognised within the draft Allocations Plan that the Corsham Community Area has a number of constraints including AONB and Green Belt. However, because there is no identified residual requirement, no sites in the Community Area have been identified beyond Stage 1. The view that no sites need to be allocated within the Corsham Community Area because there is no residual requirement is too simplistic. Within Colerne there is no Neighbourhood Plan Group which provides an alternative method of allocating sites and the settlement boundaries have been drawn tightly around the built form, which provides limited opportunities for infill development.</p> <p>Colerne Airfield currently has permission for B8 (Storage and Distribution) and has previously had permission for a number of live/work units and residential (refs: N/11/03148/FUL and N/13/01567/FUL). As a result, the principle of residential development in this location has previously been considered acceptable.</p> <p>The NPPF is clear a paragraph 47, LPA's should significantly boost the supply of housing. The figures set out in the Local Plan are a minimum target and by not allocating housing within the Corsham Community Area, this means that the area will not be able to meet its housing need. The site at Colerne Airfield has previously had permission for live/work units and residential. It is not a protected employment site, with a number of the existing hangers currently vacant. The recently published Housing White Paper (Fixing our Broken Housing Market) is clear at 1.25 that "brownfield land is suitable for housing unless there are clear and specific reasons to the contrary (such as flood risk)".</p> <p>Whilst Colerne Airfield is located within the AONB, it is not subject to any other designations. Given the constraints within the Corsham Community Area, this site represents an opportunity for development which would utilise a brownfield site within a large village.</p> <p>My client is promoting the site for a mixed-use development comprising up to 80 residential units together with a Care Home. Paragraph 50 of the NPPF seeks to deliver a wide choice of high quality homes based on current and future demographic trends. The mix of uses proposed will help to meet the increasingly ageing population in the county as acknowledges at 2.14 of the Core Strategy and is also part of the national trend which is acknowledged in the NPPG (ref:2a-021-20160401) and states that LPA's need to provide housing for older people given the projected increase in households aged 65 and over.</p> <p>The NPPF sets out 4 requirements which Local Plans must meet. Taking each in turn, in summary, the Allocations Plans does not meet these for the following reasons.</p> <p>Positively prepared: The Core Strategy supports the redevelopment of former MoD sites and the Housing White Paper also assumes a presumption in favour of the redevelopment of brownfield sites. Development at Colerne Airfield is considered to comply with the general aims of</p>			

Appendix Q - Schedule of representations

	<p>the Core Strategy and given the recent applications on the site, housing can clearly be delivered on this site and there is a willingness to deliver.</p> <p>Justified: No sites within the Corsham Community Area have been allocated on the basis that there is no residual requirement for the rest of the plan period. This simplistic approach does not allow for a detailed assessment of individual sites.</p> <p>Effective: By not allocating sites within Colerne, it is unlikely that the Parish will be able to meet its housing need.</p> <p>Consistent with National Policy: The NPPF seeks to significantly boost the supply of housing (paragraph 47), and also seeks to plan for a mix of housing based on current and identified future trends. By not allocating sites for development in Colerne or with wider Corsham Community Area, the Plan is not seeking to meet existing needs within the settlement, let alone future needs.</p> <p>In order to help Wiltshire meet its current identified housing needs together with future needs, this site should be allocated within the Allocations Plan for a mixed-use development for up to 80 residential units together with a care home.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Having read the draft plan for the above I would like to make some comments on the proposed development .</p> <p>I appreciate that there is a housing shortage but I am very concerned about the size and the number of houses in this proposed development. I do not think the road infrastructure along the Netherhampton and Harnham areas are suitable for such a large development. The increased amount of cars will lead to major traffic congestion not only in the immediate area but in the city centre and surrounding roads.</p> <p>I own a property on the Constable Park Estate. I remember when the previous proposed development of 350 houses on this site was abandoned due to poor road infrastructure and traffic concerns. The road network has not changed since then, which means this larger 840 house plan will cause complete chaos without major improvement to the road structure all around the Salisbury area.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Hankerton Parish Council is seriously concerned about the allocation of 50 houses at Ridgeway Farm in Crudwell. The sewage from Crudwell travels through Hankerton en route to Charlton and onward. Over recent years there have been too many cases of raw sewage leakage in Hankerton after heavy rain, including in the Hankerton Bridge pumping station area and upstream of the pumping station, and there are smells emanating from the Hankerton Bridge pumping station. Wessex Water are currently working on improving the sewers in Hankerton village itself but this doesn't help the pumping station nor the upstream area which already floods after heavy rain.</p> <p>We note that the 50 houses (40 on top of the existing-planned 10) constitute almost a 20% increase in the number of houses in Crudwell. That's likely to constitute almost a 20% increase in the volume of sewage flowing down through the Hankerton Bridge pumping station and through Hankerton. This is likely to increase the stress on the sewage system in this area and is a major concern for Hankerton.</p> <p>We believe such an increase to be a threat to Hankerton village. Given that we also understand that the allocation of 40 additional houses to Crudwell represents an oversupply in the Malmesbury Community Area of some 100 houses and forms part of a 2200-house oversupply across the wider Housing Market Area (North &amp; West Wiltshire), the Parish Council considers the risk to Hankerton is too great and urges that this allocation of 40 houses be dropped.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site which this representation refers to is land at the Forty, Cricklade. This is a settlement with a range of employment, services and facilities. Policy CP1 of the Wiltshire Core Strategy allows for a modest level of growth to support the function of Cricklade as a service centre. Steamcross would like land to the west of the Forty to be included within the development boundary for Cricklade for residential purposes and to facilitate access from Greensquare development to the south and the Forty. A plan of the site is attached for identification purposes. In providing the footpath link, the proposed inclusion of the site within the Neighbourhood Plan will deliver a significant social benefit by creating a safe pedestrian connection between the Greensquare Group's residential scheme and Cricklade Town Centre. Cricklade Town Council has identified the absence of such a pedestrian link as a concern, and has emphasised the benefits of this being delivered. Indeed, emerging Neighbourhood Plan policy TT3 encourages off road routes for cyclist and pedestrians and this site will help to deliver such a route. Paragraph 6 of the NPPF specifies that "The purpose of the planning system is to contribute to the achievement of sustainable development". Subsequently, Paragraph 187 states that "[...] decision takers at every level should seek to approve applications for sustainable development where possible". In terms of the Local Plan, Paragraph 12 notes that a departure from the policies of an adopted development plan is acceptable where material considerations indicate that it is appropriate. This development site is highly sustainable and the provision of a small number of houses and a footpath connection between from the development land to the south and the Forty will enhance the social and environmental benefits that could be delivered by development on the site in question. In order to help Wiltshire meets its current identified housing needs together with future needs, this site should be allocated within the Allocations Plan for residential development.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I'd like to raise my concern/objection to the proposal of building 740 houses on Netherhampton Rd. How many cars will come from this development, causing more chaos on Netherhampton Rd and Harnham Rd. I travel each day here on my way to work and It's bad enough now. Adding more than 700 cars to the road through Harnham is going to cause mayhem. The recent roadworks on the bridge has proved this, with queues right back to Wellworthy Drive.</p> <p>I'd like to object on this matter. Just how is the council going to sort this? It can't, as nothing can be done to the road through Harnham, without knocking down many houses.</p> <p>Please don't ruin our roads any more.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to protest against the plans of building an extra 40 houses on top of the current 10 houses being built, increasing the size of our village by nearly 20%!</p> <p>Although I recognise the need for extra houses, especially affordable houses, I think that expanding the village too quickly would overwhelm the current facilities. The increase in pedestrians in Tetbury lane without a proper continuous footpath is of great concern. I am a trustee of the village hall in tetbury lane and know how busy the road can be.</p> <p>It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Inadequate notification</p> <p>I am a resident living adjacent to site 321. I received no formal written notification from Wiltshire Council about the consultation process relating to this site. On 17/09/17 I spoke to other residents of the houses bordering the site. At this late date, there were still several households who were completely unaware of the WHSAP or the proposal to build 40 houses on this site.</p> <p>The village as a whole has remained largely unaware, until relatively recently, of this potentially significant village development. The Parish Council was notified subsequent to its July meeting. As no Parish Council meeting takes place in August due to the summer recess, councillors were unable to call a formal meeting for villagers. They were also left with very little time in which to examine in detail the lengthy and complex documents relating to the proposed development.</p> <p>A consultation period timed to take place when Parish councillors and villagers are taking annual leave can only be designed to suit the promoters of this development. The failure to allow adequate time for publicity, discussion and detailed consideration of plans which could have a significant impact on the village make the WHSAP proposal unsound.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I wish to express my concerns about the proposed housing development on Netherhampton Road, Salisbury, Site S1028 and S1027. My objection is to the large number of houses proposed and the pressures this will put upon the suburb of Harnham. The additional houses will obviously cause an increase in the amount of traffic on the roads to and through Harnham. These roads are often gridlocked with the current volume of traffic. In fact one of the reasons a proposed development site at Britford Lane was excluded from the long-term housing plans by Wiltshire Council planners, was that the main road leading to it was unable to take additional traffic. This is the same road that would be used by people travelling from the City Centre or London Road/Southampton Road area of Salisbury to the proposed site at Netherhampton Road (ie unable to take additional traffic). Cars will have to be the transport of choice for any residents at Netherhampton Road as it is not on a bus route. The local bus company has in fact reduced the number of buses to Harnham over the last few years and the buses are overcrowded at times with elderly passengers having to stand.

My objection is to the large number of houses proposed and the pressures this will put upon the suburb of Harnham. Harnham Infant and Junior schools are almost at capacity with many children travelling in from other areas of the city (and beyond). Although there is a possibility that a new school could be built at the Netherhampton Road site this is not usually the first building to be constructed. Therefore any children moving into the first phase of the site would need to be allocated a place at a school, the nearest being Harnham Infant and Junior schools. Parents may also wish to send their children to Harnham schools even after the construction of a school in Netherhampton as it is an established school with a good reputation. This could put pressure on the schools to increase the class sizes. Of course parents can choose which school they would like their children to attend, leading to the possibility of children from the other side of Salisbury and outlying villages enrolling at Netherhampton. This would then add to the increased amount of traffic through Harnham, 39 weeks of the year. This proposed development of 740 houses will add to the pressures on the local NHS hospital. Salisbury has a very good hospital but it is often full to capacity. Salisbury and the surrounding villages have had a large number of houses built in the last 10-15 years and this continues with housing being constructed for the Armed Forces on Salisbury Plain. More housing does of course mean more people and more patients requiring hospital care.</p> <p>I trust you will take my concerns into account when a final decision is made.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The percentage growth stated in the WHSAP is incorrect and misleading. Appendix E incorrectly states that Bratton has 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Table E1 in Appendix 1 highlights that the village has experienced growth of 26 houses, or 3.2%, in the last 10 years. This figure should actually be 5.1%. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. This is a significant growth for a village of Bratton's size, increasing strain on services such as the B3098, existing water pressure issues and the local GP surgery.</p> <p>The statement on page 56 of the WHSAP ('..the addition of 40 houses would represent modest growth') is misleading and incorrect.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the changes to the settlement boundaries for East of Dene and Boreham/Spurt Mead are not required and are illogical. In the case of the East of the Dene site this will allow developers the opportunity to further speculatively develop beyond the proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for spring 2018.</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared with other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable. It is noticeable that Warminster now has only 1 doctors' surgery with the closure of the Smallbrook Practice; that the local designated primary school is full, as is Warminster's only secondary school which, furthermore, has no room for expansion on its present site. Laying a financial contribution against a developer cannot conjure these types of service out of thin air and therefore need a deeper understanding of the infra-structure implications and needs as a result of development of the Boreham/Spurt Mead and East of the Dene sites. This argument equally applies to Warminster's employment situation, where most of its employees travel out of Warminster which, with the exception of Salisbury and the army facilities on Salisbury Plain, are accessed by roads across the town from these sites i.e. the A36 west and the A350 north and south.</p> <p>In Bishopstrow we are also deeply concerned by the potential for coalescence into Warminster. Both the sites mentioned here build on or close to Bishopstrow's parish boundary and Conservation Area.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Consistent – The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Council's Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>An analysis of the maps provided in your consultation documents show the risks of flooding in Bishopstrow due to upstream developments. The development of Boreham/Spurt Mead and East of the Dene will not reduce this risk and in fact has the potential to make the situation worse, as recent flood events have consistently shown.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for spring 2018.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The density of housing proposed is unachievable. Table F4 states that 'the site has a capacity for approximately 32 dwellings, although mitigation could reduce this number.' Paragraph 6.26 and table 6.27 revise the capacity to 40, despite the statement contained within F4. This is therefore both contradictory and unachievable

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Positive scoring on the Sustainability Appraisal Report is open to challenge  Of the three categories where the scoring was positive, all are open to challenge.  Objective 8: 'To provide everyone with the opportunity to live in good quality, affordable housing, and ensure an appropriate mix of dwelling sizes, types and tenures.' Every single site contained within Wiltshire Council's Sustainability Appraisal will score positively in this category, therefore making its comparative value of little worth.  Objective 11: 'To encourage a vibrant and diversified economy and provide for long-term economic growth.'  There are no plans to diversify or add to the existing village amenities. The word 'vibrant' is used imprecisely and in simply making reference to greater numbers of people.  Objective 12: 'To ensure adequate provision of high quality employment land and diverse employment opportunities to meet the needs of local businesses and a changing workforce.' The proposal is for housing only and not to provide land for employment.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The WSHAP contravenes the Wiltshire Core Strategy Policy Both the initial proposed number of houses (32) and the revised number of houses (40) exceed the number recommended for Large Villages within the Wiltshire Core Strategy. Paragraph 4.15 of the Wiltshire Core Strategy states: 'At the settlements identified as villages, a limited level of development will be supported in order to help retain the vitality of these communities. At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries.' Small housing sites are later defined as 'sites involving fewer than 10 dwellings (i.e. not a major application).' A proposal of 40 houses is far and beyond that suggested by the core strategy, thus rendering the WSHAP unsound.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Wiltshire Core Strategy has been ignored, leading to invalid decisions taken by Bratton Parish Council The response from Bratton Parish Council to the Informal Consultation of Large Villages in 2015 led to the Parish Council viewing site 321 as having potential for development in the future. As this response was made in the light of paragraph 4.15 of the Wiltshire Core Strategy, it was anticipated that this would be a development of fewer than 10 houses. The WHSAP has changed this to a development of 40 houses. This completely invalidates the previous positive response of the Parish Council.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.14			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Discrepancies between the Wiltshire Core Strategy and the WHSAP have undermined the autonomy of the Parish Council Paragraph 4.7 of the Wiltshire Core Strategy refers to 'appropriate levels' of development within Villages. Paragraph 4.15 of the Wiltshire Core Strategy represents Village development as 'limited', 'taking the form of small housing' and 'within the settlement boundaries.' The Parish Council did not draw up a Neighbourhood Plan because it did not feel the necessity to do so. Without a Neighbourhood Plan, the autonomy of the Parish Council is under threat and the village cannot protect itself from unwanted development. This shift away from the legally adopted objectives of the Wiltshire Core Strategy (40 houses does not represent an appropriate or limited level of development) has placed the village of Bratton in an insidious and vulnerable position and must surely be illegal.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">1739</a>	<b>Consultee</b> Mr AT Jeans  <b>Person ID:</b> 1130378	<b>Agent</b> Mr Diccon Carpendale Brimble Lea and Partners  <b>Person ID:</b> 1122261	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	A number of sites were put forward for inclusion within the reviewed settlement boundary for the large village of Broad Chalke. Our client's sites subject to this representation are SHLAA 3338 and 3339. 3338 (land at Newtown) was excluded because a small part of the area was within flood zone 2 therefore failing exclusionary question 5. In all other respects this received positive response to these exclusionary questions. However, the assessment adjudged the site was not developable because the road was not wide enough to accommodate access requirements. Other than the part of the road adjacent to the river (where suitable traffic control measures can be put in place) all of the road frontage is within our client's control and the road can therefore be widened as required. The site can be reduced to exclude the small area of flood zone 2. In such circumstances this site should have not been removed at the initial stages.			
	With respect to site 3339 (land at Knighton Road) the site was assessed positively under the exclusionary questions and recommended to be taken forward for further consideration. However, despite this land being considered appropriate and developable and an assessment being made that it would be unreasonable to remove sites within the AONB (because the whole village is within it) it has subsequently been assessed that all sites put forward at Broad Chalke should be removed from the revised settlement boundaries because there is inadequate capacity at the primary school. The assessment says that the school is not within the Councils control and therefore this lack of certainty means that the sites proposed for inclusion should be removed. As a consequence, none of the sites are being proposed for inclusion within the revised settlement boundary.			
<b>Attached files (Please see Objective)</b>	This approach seems to be remarkably short sighted and if adhered to is likely to prevent further modest growth of the village needed to support the community and local facilities. However, it is noted within the supporting documentation that reference is made to the emerging neighbourhood plan through which sites in our client's ownership may be given further consideration.			
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	Whilst it is understood that settlement boundaries are being reviewed at this point in time, it would be logical for the review to take place coincident with the making of the neighbourhood plan to ensure that both neighbourhood plan and core strategy settlement boundary plans are the same.			
The settlement boundary review should coincide with the "making" of the Broad Chalke neighbourhood plan to ensure consistency between neighbourhood plan documentation and core strategy (settlement boundary) information.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The mitigation measures needed to ensure that the development is in keeping with local distinctiveness are unachievable. Table G3 (Historic Environment) states: 'Any development on this site should nonetheless ensure that the significance and setting of the Conservation area and Listed Buildings maintained and local distinctiveness reinforced. This would be possible to mitigate through building type, size, design and layout.' Section 6.7 of the WHSAP, which seeks to increase the number of dwellings from 32 to 40, makes any proposed mitigation measures to maintain local distinctiveness unachievable. Bratton has many individual and unique houses, but the density of housing proposed for site 321 would necessitate smaller, densely packed dwellings, or possibly three-story buildings, to fit in the required number of houses. It is highly unlikely that the development would be in keeping with the village.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	No detailed survey has been undertaken in regard to wildlife and biodiversity at site 321. Table G3 states that the site is bound at its edges by trees and hedgerow that are considered to be of ecological importance as a wildlife corridor. My property borders the site and this is a correct assessment. Hedgehogs, bats, slowworms, field mice, shrews and slowworms are regular visitors, and there is also a badger's sett in the vicinity. Other visiting wildlife includes foxes, squirrels, and birds such as goldfinches, great-tits, robins, dunnocks, blue-tits, long-tailed tits, chaffinches, collared doves, wood pigeons, redwings and fieldfare (in winter) and (occasionally) gold crests. A large housing development on this site would have a significant impact, especially in the initial stages of construction. No amount of mitigating tree or hedge planting can bring back the wildlife once it has been driven away or destroyed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The proposed housing development of 40 houses does not meet the needs of the village. Paragraph 6.28 states that the development would 'contribute towards identified needs in the most recent Parish Housing Needs Survey.' This is not correct, as it greatly exceeds the numbers identified in the 2014 report, which were as follows: Subsidised rented housing - 2x one bedroom homes /1x two bedroom home /2x three bedroom homes Shared / Low cost home ownership - 2x two bedroom homes / 1x four bedroom home Sheltered housing for older people - None

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The proposed development of 40 houses on a small area of land represents an unrealistically high building density in Bratton. Residents of several village estates built here some years ago, with significantly lower density housing, experience constant access problems due to a marked increase in vehicle ownership and journeys made. In these circumstances how can Wiltshire Council justify a proposed density increase of nearly 50%?

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The proposed development threatens tourism and the environment, and is in conflict with the objectives of the Wiltshire Core Strategy In the Wiltshire Core Strategy, paragraph 2.8 outlines the need for 'careful stewardship of our environmental assets so that growth is complementary and does not erode the very qualities that make Wiltshire so attractive in the first place.' Paragraph 3.4 states: 'The potential of tourism should be realised as a major growth sector through capitalising on the quality of the environment and location Wiltshire benefits from.' In considering this sensitive site on the edge of the beautiful village of Bratton, little thought has been given to the vast numbers of people who climb the hills above Bratton to enjoy the wonderful views. A large housing estate, or indeed any additional dwellings, can only be detrimental to the rural views currently enjoyed by so many.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The WHSAP overlooks previous planning refusal objections</p> <p>Planning permission for development on site 321 has been refused on two previous occasions, with the reasons as follows:</p> <p>The site lies within a Special Landscape Area... (which) seeks to preserve the character and scenic quality of the landscape by generally restricting development to that which is essential to the rural economy.</p> <p>The local planning authority considers that the edge of the existing village is well defined and that the housing development proposed, together with the access road thereto across the field in front, would be a substantial intrusion into the rural landscape, and would therefore be detrimental to the character and scenic quality of the area.</p> <p>The conclusions of the WHSAP report (Table G3) make little reference to the above comments. It seems that Wiltshire County Council is now prepared to overlook these objections in order to meet government targets.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The impact of development on surrounding dwellings is significant but not mentioned in the Conclusion (Table G4)</p> <p>There would be a major visual impact for houses adjacent and overlooking to the proposed site, and yet any adverse effects are omitted from the overall conclusion (Table G4). This is a misrepresentation of the negative aspects of the development. Houses in Rosenheim Rise would be particularly vulnerable, as their low aspect could mean that bedrooms are overlooked, leading to loss of privacy and lack of sunlight.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The findings of the WHSAP summary are incorrect and imprecise in regard to traffic</p> <p>The WHSAP states: ‘The B3098 Westbury Road does not appear to be a particularly busy road and the landscape at the western edge has an exposed and remote feel. Overall the site and immediate landscape context is peaceful.’</p> <p>I would question at what time of day the evaluation was carried out. In the absence of a quantified rushhour traffic study, this qualitative statement regarding how busy the road is meaningless.</p> <p>Residents to the south of the site living along the B3098 often have to wait some considerable time before pulling out of their driveways to exit their properties, and doing so is often a risky and dangerous manoeuvre due to lack of visibility along this stretch of road, with no pavement to act as a ‘buffer’. The additional traffic associated with the building of 40 new homes (at least 80 more cars) would add considerably to the congestion and would have a major adverse impact on road safety. The stretch of road between Bratton and Westbury has a higher than average number of crashes than most areas of the country.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The WHSAP is incorrect in its findings regarding pressure on local infrastructure. The summary in the draft plan states that the site 'would not significantly add to pressures on local infrastructure, services and facilities.' I do not agree.</p> <p>The development is far enough away from the centre of the village for residents to want to use cars to access village amenities. There is already significant build up of parked cars in the village centre for traffic flow to be a problem. There is particular concern for the safety of children at school pick-up time. Additional traffic from the proposed housing development would only add to the congestion.</p>

Comment ID:	<a href="#">1760</a>	Consultee Nicola Blackmore  Person ID: 1130479	Agent  Person ID:	Do you consider the draft WHSAP is legally compliant?	
				Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I have lived nearby to Ridgeway Farm Crudwell for the last 23 years and I am concerned about the proposed allocation of an additional 40 dwellings at Ridgeway Farm Crudwell in the site Allocations Plan. Together with the 10 dwellings already being built on this site, I have been told this represents a near 20% increase in dwellings in the village of Crudwell.</p> <p>The Site Allocations Plan notes that housing sites will only be allocated by Wiltshire Council where there is a strategic priority to do so. I understand the Site Allocations Plan forecasts an oversupply of homes of some hundred houses in the Malmesbury Community Area. On this basis, there is no strategic need for a site of this scale in Crudwell.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan to determine the level of local housing needed at Crudwell. I understand the residents of Crudwell would like to determine what local needs for housing exist and how they should be met. Crudwell is not anti-development. I believe the residents would simply wish to plan any growth via the emerging Neighbourhood Plan.</p> <p>Previous proposals for additional housing in Crudwell have led to significant debate. I believe that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community. There should be no unnecessary allocation of one site for a substantial development.</p> <p>I feel there is no substantiated strategic need for further housing allocations in Crudwell. I feel that it should be appropriate that Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I am very concerned about the safety and increased traffic flows that will arise on Tetbury Lane, particularly in the morning and late afternoon. The lane from the entrance of Ridgeway Farm in the direction of Long Newton narrows and bends at places and it is always necessary to drive very slowly and carefully. The lane in the other direction down to the A429 main road and to the school and other facilities in the village is also narrow.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I recall over 23 years of living in this area that houses in Crudwell several times have experienced severe flooding due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Unless significant investment is made in increasing that drainage capacity additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>General comments, recommendations, and advice The relevance of this nationally designated Area of Outstanding Natural Beauty to this consultation is set out in Annex A to this response. Annex B lists the organisations that make up the Cranborne Chase AONB Partnership. Clearly a great deal of work has been invested in this Plan, and the Spatial Planning team is to be commended on the openness of the stepwise approach to the consideration of the sites and the thoroughness with which that has been done.</p> <p>This AONB finds that stepwise approach logical and readily understandable. Whilst it is noted that nationally designated landscape assets – the AONBs – are considered in Stage 2 of the assessment and selection process, along with other heritage and wildlife designations, the significance of the nationally important landscapes, and the obligations to conserve and enhance natural beauty, is rather understated. Parts of this AONB are in both the North and West Market Housing Area and the South Market Housing Area. Significant parts of the Warminster, Mere, Amesbury and Southern Wiltshire Community Areas are within this AONB, and the vast majority of both Tisbury and Wilton Community Areas are within this AONB.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Paragraph 4.19			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Having read the analysis for the locations within and adjacent to this AONB it seems that although the team members involved have demonstrated an effective understanding of AONB issues, those issues are not explicitly set down in the methodology criteria. I do, therefore, recommend that a modification is made to Table F.2 Stage 3 Sustainability Appraisal objectives by including a 7b category. That could be a refinement similar to the refinement of category 5 which reads as 5a and 5b. My recommendation is that the current category 7 becomes 7a and an additional 7b is added as follows: 7b Conserve and enhance the natural beauty of the landscapes of the nation's Areas of Outstanding Natural Beauty, sustaining and strengthening their sense of place, character, and local distinctiveness. That would provide a clear basis for the way sites within and close to the AONBs have been handled as well as reflecting their national importance.

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1765</a>	<b>Consultee</b> Mr Richard Burden Landscape and Planning Advisor	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Cranborne Chase and West Wiltshire Downs AONB	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Whilst the AONB welcomes the landscape and visual assessment in the final stage analysis, using external consultants, we are very concerned that the site analysis at that stage only appears to consider landscape from relatively close up. Many sites, and their impact on the landscape, are appreciated from the opposite side of a valley or from elevated positions. The final stage landscape and visual assessment should take account of the potential form, scale, and height of the potential development as well as the cumulative landscape and visual effects. This AONB does, therefore, strongly advise that sites should be consistently assessed from wider viewpoints and hence include their impacts on the wider landscape. This is especially important when sites are within an AONB or the setting of an AONB.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	It is only the Nadder Valley element in the extreme south of this community area that is within this AONB. Great Wishford is the only the Large Village, although there are also the Small Villages of Hanging Langford, Steeple Langford, Wylde, within this AONB. Table 2.2 indicates that the developable commitments and indicative residual housing requirement to 2026 for the whole of the community area outside Amesbury, Bulford and Durrington is 166. Amendments are proposed to the settlement boundaries of the Large Villages. The single potential site in Great Wishford has been removed due to the exclusionary criteria, and the AONB supports that decision. Two allocations are made in the north of the community area which leaves a residual housing requirement for the whole area of 76 dwellings.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This AONB Partnership is very concerned by the proposals to extend the Coombe Bissett settlement boundary northwards into the river flood plain in sectors J6, K6, and K7. The indication that further development could be acceptable in this extension would be most unfortunate. Not only would development in these locations effectively and visually narrow the river valley and restrict views along it where there is a public right of way across the valley but that would also be contrary to the natural form of the valley floor widening as progresses to join the River Avon. This AONB Partnership strongly recommends that the existing settlement boundary is retained in these sectors.

		Cranborne Chase and West Wiltshire Downs AONB		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Tisbury is the Local Service Centre for the Large Villages of Fovant, Hindon, and Ludwell, together with 11 Small Villages, all of which are within this AONB.</p> <p>Table 2.2 indicates that the developable commitments and indicative residual housing requirement to 2026 for Tisbury is 30 and for the rest of the community area outside Tisbury itself is 160. Amendments are proposed to the settlement boundaries of the Large Villages.</p> <p>This AONB Partnership is aware that considerable work has been done on a Tisbury Neighbourhood Plan which has reached the stage of being a draft document.</p> <p>It is noted that paragraph 5.4, page 8, of the WHSAP – Tisbury refers to a significant brownfield site in Tisbury that should take priority over greenfield sites, and that this is likely to come forward through the neighbourhood planning process. As the residual housing requirement is low it could be delivered through windfall and therefore proposed allocations for housing will not be identified. This AONB supports that approach.</p> <p>For the remainder of the community area it is noted that over a dozen potential sites were ruled out before Stage 2a of the assessment, and a further 9 were removed due to the exclusionary criteria. It is further noted that sites in Hindon and Ludwell did not progress beyond Stage 2b for AONB and school size reasons. This AONB Partnership supports those decisions.</p> <p>The decisions on the 2 sites at Fovant that were considered at Stage 3, and rejected, are also supported.</p> <p>This AONB Partnership recognises the situation set out in paragraph 7.2, page 15, that although there is an indicative residual housing requirement of 149 dwellings for the remainder of the Tisbury Community Area it is not proposed to identify sites for allocation.</p> <p>Dinton and Broad Chalke are close to the boundary of the Tisbury Community area but are actually in the Wilton Community Area. The AONB agrees that Dinton has experienced relatively significant growth, and that potential sites are being investigated via neighbourhood planning processes in Broad Chalke.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wilton is the Local Service Centre for the Large Villages of Broad Chalke and Dinton. Of the identified 9 Small Villages only Quidhampton, South Newton, and Stoford are outside this AONB, but in its setting, as is the main body of Wilton itself. The housing requirements of Wilton are considered separately in connection with the Salisbury Community Area.</p> <p>Table 2.2 indicates that the developable commitments and indicative residual housing requirement to 2026 for the community area outside Wilton itself is 140.</p> <p>Amendments are proposed to the settlement boundaries of the Local Service Centre, which abuts this AONB, and the 2 Large Villages which are within this AONB.</p> <p>Table 2.2 indicates that the indicative residual housing requirement to 2026 for the community area outside Wilton itself is 129. In the assessment 21 potential sites were removed prior to Stage 2a, and 6 potential sites at Broad Chalke and Dinton were removed due to exclusionary criteria. The remaining 4 sites did not pass the Stage 2b assessment for AONB, education capacity, and high growth reasons. This means no potential sites are being identified for allocation in the Large Villages of the remainder of the Wilton Community Area, although sites are being investigated via the neighbourhood plan processes [see Tisbury above]. The AONB notes the extent and distribution of potential sites shown on the plans in Appendix B, and supports the decisions.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	This AONB is, however, very concerned by the Broad Chalke boundary extension at I8. The majority of the extension is the garden of a dwelling that is an isolated property on the south side of the lane. If the purpose of the boundary review is to regularise land that is built upon then the AONB strongly recommends that the boundary should be drawn tight to the southern side of the dwelling and not along the southern garden boundary.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The housing requirement for the Local Service Centre of Wilton is included with Salisbury rather than the rest of the Wilton Community Area. Table 2.2 indicates that the developable commitments and indicative residual housing requirement to 2026 for Wilton itself to be a maximum of 381. The indicative residual element for both Wilton and Salisbury together is 173. 10 sites in Wilton were removed from further consideration due to exclusionary criteria [Stage 2a], and one was taken forward to the next stage. The site was rejected on school capacity grounds. The analysis found that the potential sites in Salisbury could provide significantly more dwellings than the requirement. The AONB acknowledges that there is, therefore, no requirement to provide additional sites in Wilton.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Whilst the AONB supports the outcomes of the analysis we are very concerned that, as set out on page 2 of this response, the site analysis at the final stage, using external consultants, only appears to consider landscape from relatively close up. Many sites, and their impact on the landscape, are appreciated from the opposite side of a valley or from elevated positions. In particular, site s1057 [Bulbridge] which abuts the AONB boundary, and is hence part of the setting, is particularly exposed to view from the public rights of way on the northern side of the valley. The fact that the site is on sloping ground and hence tilted towards the north makes the area even more open to view. The landscape and visual impacts of this site are, therefore, considerably understated. Furthermore, the reliance on hedge and tree screen planting could conflict with the basic landscape character of chalk downland. The AONB does, therefore, strongly advise that if this site comes forward again a more comprehensive and wide ranging landscape and visual impact assessment is carried out.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Sustainability Appraisal Report for Westbury Area describes the site as: 'A gently sloping pastoral field on the western edge of Bratton.' This field (then unfenced) and a large tract of agricultural land to its west were used to grow crops, including wheat, when I first moved to the village in 1984. During the 1990s a fence line was added and the field was cleared to facilitate two housing applications (both rejected). In the intervening years it has been used for grazing animals (sheep and cows) or left unused. The field can nevertheless still be classed as BMV and should therefore not be used as a site for housing development.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Bratton is being used to fulfil the indicative remaining housing requirement of WCC, rather than meeting the needs of the village. Table G3 states: 'The level of development on this site (approximately 40 dwellings) is positive in terms of making a substantial contribution towards meeting indicative growth targets and will not undermine the Plan objectives.'</p> <p>The word 'indicative' does not mean 'compulsory' and so Bratton does not have to fulfil targets beyond its own requirements (see results of Bratton housing needs Survey 2014 for needs, which are substantially lower than the suggested 40 houses).</p> <p>In striving to meet a target, this development would have a detrimental impact on a beautiful rural village.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The development of the site will increase pressure on secondary school places in Westbury (Matravers) Table G4 states: 'Matravers (secondary and sixth form in Westbury) currently has some surplus spaces but these are expected to reduce over the next 10 years' (as expanding primary schools in the Westbury area feed into Matravers). The report then states 'The school could be expanded if necessary', without explaining how this funding would be found, or offering mitigation measures to finance the extra places needed as a result of attracting large numbers of new families to the village of Bratton.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	An incorrect assumption has been made that more housing and people are required to fill the local Primary School Table G4 states that the local Primary School in Bratton has 'a large number of surplus places and would benefit from housing within the catchment area.' An assumption has been made that the school is not full because there are insufficient children living in the village to fill it. Traditionally Bratton Primary School has been full to capacity, and occasionally village children have had to be turned away (I spoke to one resident in Bratton who told me this had happened to her children). Parents from Westbury, Steeple Ashton, West Ashton and the surrounding area have been happy to bring their children to the school. In recent years there has been a very large number of experienced and long-term staff leaving, leading to some degree of instability. The school has become less sought after; some Bratton children are attending Westbury Schools as a matter of choice, and numbers have declined. As the school builds its reputation again, numbers will increase (the school could potentially attract children from the new White Horse Way development on the eastern edge of Westbury). The premise that the village needs more housing and more people is incorrect.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Site 321 should have been removed from consideration at Stage 3 of the site selection process as the conclusions of the Sustainability Appraisal are flawed</p> <p>6.16 states that the performance of the site has been measured against 12 objectives that cover the likely environmental, social and economic effects of development.</p> <p>6.18 states that sites are rejected where the appraisal concludes development would result in one or more major adverse effects.</p> <p>6.19 concludes that 321 was not rejected after stage 3 (presumably because it did not score for a 'major adverse effect')</p> <p>I believe that the scoring system is flawed and that site 321 should have been rejected at stage 3.</p> <p>Objective 7 is as follows: 'Conserve and enhance the character and quality of Wiltshire's rural (and urban) landscapes, maintaining and strengthening local distinctiveness and sense of place.' The Sustainability Appraisal rating gives this objective only one 'minus' scoring, whereas in fact it should have been assessed as having a 'major adverse effect', due to its high visual impact on the edge of the village and the significant difference it would make to views from the ridge above Bratton.</p> <p>Bratton is a unique and special place and its distinctiveness should be maintained. Every year I take photographs of the beautiful landscape around the village and produce a calendar which is sold to raise money for charity. The majority of the photographs are taken from the ridge above Bratton, and people travel from miles around to walk in the surrounding hills and look down upon miles of unspoilt countryside.</p> <p>A large housing development would have a MASSIVE detrimental effect on the character and distinctiveness of the village, and to score only one 'minus' point seems contrived and far-fetched.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The public release of the June 2017 Wiltshire Housing Site Allocations Plan Pre-submission Draft Assessment under the Habitats Regulations places a significant emphasis on the danger to habitats. This is far more wide-reaching than hitherto and suggests further obstacles to the development of site 3565. The public release of this document comes literally at the conclusion of the consultation period and does not provide the opportunity for informed public scrutiny of this document and the inclusion of this information within public objections. This timing could be seen to be highly suspicious, especially in the light of the cancellation of the promised second public presentation in Trowbridge (committed to in June 2017 and cancelled at the end of August with little or no public information) and the refusal to even acknowledge requests to extend the consultation process to make allowances for officers summer leave arrangements as detailed in my full submission. The fact that this document has been referenced in Council documentation and has not been available for independent scrutiny and public access for the entire period of the consultation is a matter of grave concern and questionable procedure. Any public access has been based on the 2012 HRA and does not contain references to surveys made by Wiltshire Wildlife in 2015, 2016 and 2017 which are of direct relevance to the Site Allocation Proposal. Full and honest placing of publicly-funded information in the public domain. Pertinent documentation to any objection made available to all at the start of a process such as this.			
<b>Attached files (Please see Objective)</b>				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The arguments supporting the objection are detailed and cross-reinforcing and deserve the opportunity to be fully aired and considered.			

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">1798</a>	<b>Consultee</b> Mr and Mrs West  <b>Person ID:</b> 1130564	<b>Agent</b> Mr Richard Cosker RCC Town Planning Consultancy  <b>Person ID:</b> 1120649	<b>Do you consider the draft WHSAP is legally compliant?</b>		
				<b>Do you consider the draft WHSAP is sound?</b>	No	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>  Justified			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.35					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>1.1 The Draft Wiltshire Housing Sites Allocation Plan is unsound, as it is not based upon a robust and credible evidence base and therefore not justified. We believe that the evidence on the ground does not support the choice the Council have made with regard to the proposed revisions to the settlement boundary for the village of Crudwell set out on the map on page 27 of the document and that using the Council's revised methodology there are realistic alternatives to the position of the settlement boundary for Crudwell.</p> <p>1.2 As a result the plan does not comply with the requirements of paragraph 182 of the NPPF. To be sound the plan should be the most appropriate strategy, when considered against reasonable alternatives, based on proportionate evidence. We consider that the settlement boundary should be revised to incorporate the Ridgeway Farm development site and the adjoining houses situated along the north side of Tetbury Lane in Crudwell.</p> <p>1.3 The settlement boundary review methodology which helps guide the settlement review process is set out in the Wiltshire Housing Site Allocations Plan Pre Submission Draft Plan Topic Paper 1, published by the Council in June 2017. This advises that areas that should be incorporated within the revised settlement boundaries should include residential and community facilities development that is physically related to the settlement, as compared to areas which are excluded such as employment development, farm buildings and farm yards at the edge of large villages and isolated development that is physically detached from the settlement. The revised methodology for determining the new settlement boundaries also states that built and commenced planning permissions should be included within the settlement boundaries (our emphasis).</p> <p>1.4 In August 2015, outline planning permission was granted at Ridgeway Farm, Tetbury Lane in Crudwell for the erection of 10 dwellings and associated works (planning reference no 15/03136/OUT). A subsequent reserved matters approval was granted in February 2017 (reference no 16/09797/REM). Work has started on this development site.</p> <p>1.5 The revised settlement boundary review methodology recognises that for those planning permissions where development has commenced, there is much greater certainty over the final built form of the development and as a result concludes that 'built or commenced planning permissions' should be included within the settlement boundary.</p> <p>1.6 Therefore, having regard to this methodology as work has commenced on this planning permission, the settlement boundary for Crudwell, which excludes the Ridgeway Farm site is clearly unsound on the 'justified' grounds and should be amended.</p> <p>1.7 We also consider that the houses adjoining the development site, situated along the north side of Tetbury Lane, should be included within the settlement boundary. Our client owns Thyme Cottage, the end dwelling of a terrace of houses that form part of a compact row of six residential properties which are physically related to the village and that front and extend westwards along Tetbury Lane from the Ridgeway Farm residential development site toward the principal range of the community facilities available within the village. Immediately to the east of Thyme Cottage sitting close to Tetbury Lane, is Cleaver House. Both of these two properties have been significantly altered and extended since the last settlement boundary was drawn up resulting in a consolidation of development in this location.</p> <p>1.8 The westernmost property of this group of 6 dwellings is Ye Olde Forge, which sits opposite the access to the community facilities. These incorporate the village hall, where the Crudwell pre-school is based, and the recreation ground including equipped play areas, tennis courts and</p>				

## Appendix Q - Schedule of representations

playing pitches. These are extremely well used facilities and access to them is from Tetbury Lane, passing in front of the aforementioned properties.

1.9 Clearly the houses on the north side of Tetbury Lane, read as a continuation of the village and very much form part of built up area of the village (therefore 'physically related to the settlement'), especially now that the development at Ridgeway Farm has now been permitted and work started on that development. Indeed, the principal and most widely used community facilities within this village are situated further still along Tetbury Lane. The logical boundary position for the revised settlement boundary should include these residential properties particularly having regard to the position of the village hall.

1.10 Our clients are currently appealing against the Council's decision to refuse planning permission for the conversion of an existing detached domestic outbuilding to a dwelling within the side garden of Thyme Cottage. The Council's first reason for refusal refers to the location of the site beyond the defined settlement boundary for Crudwell and as such they consider that the proposal amounts to a new dwelling in the open countryside. The Council concludes that the proposal would be "located remote from a range of services, employment opportunities and unlikely to be well served by public transport" and would thereby be an unsustainable location. We cannot agree, as this is simply not the case.

1.11 The photograph in figure 1 below is taken from the garden of Thyme Cottage towards the new houses currently under construction at the Ridgeway Farm site. This clearly shows just how closely associated the development site is to our clients property and how the sustainability argument put forward by the Council in their reasons for refusal is nonsensical.

1.12 Significantly, the Council's planning officer considering the acceptability of the outline planning application at Ridgeway Farm in 2015 (reference no 15/03136/OUT) which was outside of the dated settlement boundary, describing the site stated:

'Existing development lies to the east and west of the site and the development would therefore to a certain extent sit within and relate to the built form of the village.'

1.13 This view that this part of the village sits within the built form of the village and is physically related to the settlement has been carried forward in the Malmesbury Community Area Topic Paper, which aims to ensure a sufficient choice and supply of suitable housing sites. The comments expressed in this paper are of relevance to the consideration of whether the settlement boundary should be extended to include these houses.

1.14 The site selection process for the entire Malmesbury Community Area has identified only one preferred site for allocation for housing development. The site is at Ridgeway Farm in Crudwell (Site 3233) and adjoins the current Ridgeway Farm development site. The site allocation, which includes open agricultural land, has been identified for a development of 40 houses in addition to the 10 already permitted.

1.15 The sustainability appraisal for this housing allocation included in the Topic Paper states that there are no major adverse effects identified in allocating this site for housing. This appraisal states that the identified site is:

'located within a reasonable walking/cycling distance to the centre of the village' and that it:

'is closely related to the village and is within walking distance of the services and facilities within the settlement'.

1.16 The land at Ridgeway Farm site allocation is assessed as 'more sustainable' within this area of search. The Topic Paper describing the allocated site states:

'a logical boundary that reflects the existing settlement pattern would develop land between the current consent and land to the east and north towards the Dawneys'.

1.17 In comparison with other large villages within the community area, Crudwell has received the lowest amount of growth over the Plan period to date. The Council state this preferred site is available, achievable and deliverable and that it would represent a significant contribution towards meeting the residual requirement for housing in the Malmesbury Community Area (is 70 dwellings).

1.18 Therefore, having regard to the methodology, the houses on the north side of Tetbury Lane fit within the definition of residential development that is physically related to the settlement, as compared to areas that are excluded such as isolated development that is physically detached from the settlement. As a result, the settlement boundary for Crudwell, which excludes these properties is clearly unsound on the 'justified' grounds and should be amended.

1.19 Figures 2 and 3 (see separate sheet) show the relationship between the approved housing site at Ridgeway Farm (which having regard to the council's methodology must now be included within the defined settlement boundary) and the adjoining houses on the north side of Tetbury Road, the new housing allocation and the community facilities.

Appendix Q - Schedule of representations

	<p>Using the Council's own settlement boundary review methodology, the proposals for the revised settlement boundary for Crudwell shown on the plan on page 27 of the WHSAP should be extended to include the Ridgeway Farm development site and the residential properties situated on the northern side of Tetbury Lane in grid references G6 and H6, up to and including the property Ye Olde Forge. These changes to the revised settlement boundary for Crudwell are required to ensure it complies with the methodology as:</p> <p>It would include a residential development site where work has commenced, and</p> <p>It would include residential properties that a physically related to the settlement.</p> <p>These changes would ensure that the Plan justified and therefore sound.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		The road and current housing system in and around the area to include Frome Road, Bradley Road and Silver Street Lane is not suited to the increased traffic that would clearly result. These roads are already used as a "rat-run" with vehicles regularly breaking the 30mph speed limit. There would be greater risk to pedestrians, many who are children who commute to and from local schools and Trowbridge College. There would also be a greater risk to public health caused by the increased traffic pollution.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">1811</a>	<b>Consultee</b> Bovis Homes Limited  <b>Person ID:</b> 841393	<b>Agent</b> Mr Desmond Dunlop Managing Director  D2 Planning Limited  <b>Person ID:</b> 558013	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1 Netherhampton Road		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Land at Netherhampton Road, Salisbury – Policy H3.1 At the outset Bovis Homes support the Council's decision to allocate additional land for housing due to the remaining residual requirement which is not identified within the Core Strategy. However, part of the need to identify additional land in and around Salisbury/Wilton is due to the potential delay in the delivery of a number of strategic sites in South Wiltshire. Bovis Homes is not surprised at the potential non delivery of a number of strategic sites and has previously made representations to the Wiltshire Core Strategy to that effect.			
	Whilst Bovis Homes support the Council's decision to identify land under their control at Netherhampton Road, Salisbury (Potential Site Option s1028) for a mixed use development comprising housing, employment, community and social facilities they are disappointed that not all of the available land is identified for residential development. They consider that there is no justified reason why the additional land should not be allocated, particularly as considerable discussions have taken place with the Council to demonstrate the availability, suitability and deliverability of the site. A Vision Document was produced and sent to the Council to demonstrate that Bovis Homes have instructed a team of consultants to deal with the various issues relating to the deliverability of the site. That document demonstrated that there were no issues which represented a constraint to the development of the site in a timely manner. An update Vision Document is attached which reaffirms the site's deliverability. It is considered that the site is ideally placed to meet part of the additional housing requirement.			
The site was previously identified by the South Wiltshire Core Strategy as a draft strategic site, which signals the acceptance of the Planning Authority to release it for development i.e. 400 dwellings and 10 hectares of employment land. It was only deleted as an allocation because of a reduction in the overall housing provision for South Wiltshire not because of any site specific concerns, and essentially retains a 'reserve' allocation. Clearly additional land for housing is now required and the entire site is ideally placed to assist in meeting that need because: - (see Vision Statement)				
The site comprises intensively farmed arable land that is in one ownership. The farmland is 'in hand' and not subject to any agricultural tenancies. It is therefore available for development now and is achievable with a realistic prospect for delivery, as the land is in the control of an experienced developer i.e. Bovis Homes.				
The site is located to the west of the Harnham Business Park which is located within the settlement limits. The existing employment area will form a buffer between the proposed development and existing residential areas to the east. Existing residents will not therefore be directly affected by the proposed development (i.e. by issues of overlooking etc). Although development of the site would not immediately adjoin an existing area of residential development, its location adjacent to an existing employment area, public sports pitches, golf course and racecourse all help to ensure it can be integrated into the community, in a highly sustainable location.				
The site can be satisfactorily accessed through the introduction of a junction to the requisite standards along the A3094 Netherhampton Road. Bovis's retained highway consultants have confirmed that such an approach is acceptable.				
The site is located by road some 4.8km from the City Centre and Railway Station. However, a more direct route is available via the Tow Path, which is a distance of 2.8km from the City Centre. Accordingly the walking and cycling distance is approximately half the road distance, this				

Appendix Q - Schedule of representations

should encourage walking and cycling to the City Centre where there is a range of services, community facilities, employment opportunities and public transport.

The site is located within 5km (acceptable cycling distance) of a strategic employment site e.g. Southampton Road.

Furthermore the site is also within easy walking and cycling distance of a number of other local employment areas at: -

- o Harnham Trading Estate and Harnham Business Park
- o Ashfield Road Trading Estate
- o The Malverns, Cherry Orchard Lane
- o Kingsway Industrial Estate Wilton
- o Barnack Industrial Estate
- o Milford Trading Estate, Blakey Road off Tollgate Road

The site is therefore in an excellent location to access local employment opportunities by foot or cycle, thereby reducing reliance on the private car.

The site is not within any valued landscape as defined within the NPPF (paragraph 119). The landscape has capacity to assimilate development whilst retaining views of Salisbury Cathedral etc. The Landscape & Visual Impact Assessment has been undertaken and confirms the site's capacity to absorb the quantum of development proposed.

The site is not the subject of any ecological designation or designated sites of importance for biodiversity (e.g. SPA, SSSI). The eastern boundary of the site is located 250m to the west of a SSSI. The SSSI is a geological site adjacent to existing residential development to the north.

In order to provide a buffer between the SSSI and any new development (in addition to that already provided by the chalk pit) an area of open space could be incorporated along the eastern boundary of the site adjacent to the chalk pit.

The site is in arable use. It has been substantially managed and regularly ploughed.

Hedgerows are sparse and there are virtually no trees (apart from isolated trees close to the Netherhampton Road) on the site. There is therefore little opportunity for protected species to establish themselves on the site. The proposals would provide an opportunity to provide biodiversity enhancement measures, including the introduction of a wider variety of habitats than currently present across the agricultural land.

The entirety of the site is located within Flood Zone 1 and there are no flooding issues.

Surface water would be capable of being discharged to the ground via infiltration techniques.

The nearby Petersfield Sewage Treatment Works has satisfactory hydraulic capacity to accommodate predicted foul water drainage from the proposed development.

There are no statutorily designated heritage assets within the site or in proximity of the site.

Development of the site could provide a range of community benefits for existing and future residents in Harnham, namely: -

- o Provision of new area of public open space, enhancing existing provision;
- o Improvement to public transport serving the area;
- o Increased employment opportunities within walking and cycling distance; and
- o Provision of a range of local convenience services and facilities within any proposed local centre.

In view of the above, the allocation of the land is welcomed and we can confirm that it is available and deliverable within the Plan period. Indeed Bovis would be looking to submit an application as soon as possible.

With specific regard to the proposed policy we would comment as follows: -

- i. Approximately 640 dwellings
- ii. The Vision Statement demonstrates that the site is capable of accommodating up to 640 dwellings.
- iii. Land for employment (B1, B2 & B8 uses of the Use Classes Order)
- iv. The Vision Statement and illustrative masterplan have identified an area for employment uses and support is given to the flexibility between the use classes afforded by the proposed wording. However, concern is expressed at the lack of a firm evidence base regarding the quantum of employment land. Objections are therefore lodged to this aspect of the policy.
- v. At least 1.8ha for a two form entry primary school along with playing pitches. There are no objections in principle to the development meeting its need for primary education. However, the requirement for a 1.8ha two form entry primary school is beyond that which is justified for the proposed development. Accordingly Bovis object to this requirement.

Appendix Q - Schedule of representations

	<p>vi. A local centre</p> <p>vii. The submitted Vision Statement shows provision of a local centre within the overall development proposals.</p> <p>viii. A country park of at least 10ha in size with associated parking and facilities. The identified Vision Statement shows provision of at least 10ha of public open space but Bovis would question whether the term 'country park' is appropriate rather it should be renamed as 'public open space'. The draft policy goes on to state that development will be subject to the following requirements: -</p> <p>Strategic landscaping and open space provision. All built development to be located below the 75m corridor and a Country Park located on the east and south of the site. The Vision Statement shows that the development will be provided with strategic landscaping and open space. In addition built development will be restricted to below the 75m corridor. Furthermore, as stated above a Country Park is also included as part of the proposals. Transport Network Improvements necessary to accommodate the scale of development envisaged. The necessary transport network improvements will be undertaken as part of the proposed development provided they are proportionate to the impact from the proposed development.</p> <p>Provision of sufficient school and healthcare capacity to meet the need created by the development. Reference has already been made to the proposed education provision. Bovis believe that the provision of a 1.8ha two form entry primary school as not proportionate to the need created by the proposed development. With regards healthcare provision once again there is no objection in principle to the provision of healthcare provision however at present there is no evidence available in terms of the need for additional healthcare facilities etc. Bovis believe that additional evidence is required.</p> <p>Measures to safeguard the interest of Hornhill Hill Chalk Pit SSS2 and Harnham Slope Country Wildlife Site. The proposed development is capable of safeguarding the Harnhill Hill Chalk Pit SSS1 and the Harnham Slope Country Wildlife Site.</p> <p>Surface water management that achieves equivalent or less than current greenfield rates of run off. The surface water management program will be designed to be equivalent to or less than greenfield run off rates.</p> <p>Development will take place in accordance with a masterplan for the site approved by the Council.</p> <p>Bovis will prepare a masterplan for the site. However, it is unclear from this criterion how it will be approved by the Council. Further information is required on how this process will operate.</p> <p>Other policies within the Site Allocations DPD indicate that the masterplan should be approved as part of the application process and Bovis consider that this should equally apply to their masterplan.</p> <p>Finally, we note the viability assessment undertaken by BNP Paribas. This assessment has been undertaken without any consultation or input from Bovis Homes. Accordingly at this stage Bovis would object to the viability assessment.</p> <p>Recommendations</p> <p>In view of the above, Bovis recommend that: -</p> <ul style="list-style-type: none"> <li>i. All of the land within their control be identified within the proposed allocation.</li> <li>ii. Object to the proposed provision of a 1.8ha site for a two form primary school which is beyond that required for the proposed development.</li> <li>iii. Object to the level of employment land given the lack of a robust evidence base.</li> <li>iv. Object to the lack of guidance regarding the approval by the Council of any masterplan for the site. The masterplan should be approved as part of any planning application.</li> <li>v. Object to the requirement for a healthcare contribution when there is no evidence base to justify that requirement.</li> <li>vi. Object to the viability assessment with regards the site.</li> <li>vii. Object to the terminology 'country park' and consider it more appropriate to refer to it as 'public open space'.</li> </ul>

The additional traffic flow resulting from these houses will be disastrous to the already strained A3094 which is the only route through Harnham. Only a few weeks ago Harnham was brought to a complete standstill within minutes following a tragic accident when a pedestrian was struck by a lorry, and frequently the queues at rush hour at the lights at either end of the A3094 can tail back as far as the One Stop shop and the Garden Centre. A few years ago a smaller development was rejected on the grounds that the road system could not support the increased traffic so how can a development twice the size be feasible?

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my concern regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Draft Site Allocations Plan.</p> <p>Like most in Crudwell I am not against reasonable development. Over the 34 years that I have been a resident there have been several developments (including Kingsmeadow and Gooselands) and further expansion through in-fill. Most recently, approval has been granted for ten new dwellings at Ridgeway Farm, and frankly, that is enough. The suggestion that a further 40 dwellings could be built there is disproportionate and unacceptable since it represents a 20% increase to Crudwell's housing stock.</p> <p>There is no strategic need for a site of this scale (50 dwellings in total) in Crudwell. The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p> <p>Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities" but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy. Crudwell has already begun the process of producing a Neighbourhood Plan, which will include a survey to determine any local needs for housing exist and how they should be met. To reiterate, Crudwell is not anti-development ... it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan.</p> <p>Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell is not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1815</a>	<b>Consultee</b> Land at Mill Lane, Stratford Sub-Castle, Salisbury Landowner  <b>Person ID:</b> 1130720	<b>Agent</b> Richard Greenwood Director  Benchmark Development Planning Ltd  <b>Person ID:</b> 894742	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Effective  Consistent with national policy			
	<p>For the reasons set out below, we recommend that this site is allocated for housing development in the emerging draft Settlement Boundary and Housing Land DPD.</p> <p>The proposal involves amending an anomaly where a parcel of land within the built-up area of Stratford Sub-Castle, that is connected to and a part of the City of Salisbury, has been partially excluded erroneously from the settlement boundary (see Appendix 1). The access land is within the settlement and the small plot that is enclosed on three sides by housing has bizarrely been excluded.</p> <p>The land plays no strategic role. It is not needed to check urban sprawl; nor the merging of settlements; development of this infill plot would not lead to encroachment into the open countryside; most certainly the special character of Salisbury and Old Sarum will be preserved (completely); and, finally, allowing this to proceed will recycle land well suited for housing and relieve, in a small way, pressure for development on the more sensitive open countryside at sites in Salisbury including H3.1 + H3.4 Netherhampton Road and H3.3: Rowbarrow.</p> <p>We do not understand why Officers have not included ALL of this land within the settlement boundary as there would be no adverse effects. However, we recognise that Officers are recommending that where new housing allocations are proposed these can be identified beyond the new settlement boundaries.</p> <p>Whilst we do not agree that this is a sound way forward because it means the settlement boundaries are already out of date – in Salisbury’s case land already being developed at Fugglestone Red and Longhedge are being excluded (see Appendix 1).</p> <p>In our opinion, this is confusing and undermines confidence in the planning system: it is an unsound approach.</p> <p>If the Inspector does not agree with us, we request this land be allocated in its own right as it is suitable, available and viable development land. The land is not within a Flood Risk area or within the setting of a listed building(s) or a Scheduled Monument. Old Sarum is about 1 km to the north and quite separate from the well enclosed infill site within the existing built up area (See Appendix 2).</p> <p>There has been an appeal in respect of this land, in 2007 (see Appendix 3). This decision seems to be out of step with the current planning policy framework and the NPPF.</p> <p>The Inspector in 2007 considered the proposed use of the land as a residential garden.</p> <p>The Inspector at paragraph 3 of the appeal decision states that allowing the use of the land as a garden would lead to the erosion of the countryside setting of the village and harm its appearance and character.</p> <p>We wholly disagree with the Inspector’s statement. It seems to be completely at odds with the actual position and setting of the land – see our photographs and locations plans submitted today with this objection.</p> <p>We say: allocating this site for housing development – for one bungalow – as set out on our plan BEN 0006 – would not in any way lead to the erosion of the countryside. Nor could it harm the character or appearance of the settlement because it is so tightly constrained by existing development and significant hedges and trees. There are no public views of the site, except from Mill Lane and that would be fleeting and from some distance (+50m) and easily resolved with the planting of a single tree (see BEN 0006).</p> <p>The access meets current highway standards – Mill Lane is a cul-de-sac, not a through road.</p>			

Appendix Q - Schedule of representations

	<p>This is a sustainable proposal and it will help underpin national and local planning policies that seek to encourage the delivery of sustainable development in economic, social and environmental terms.</p> <p>Conclusion: We do not claim that allocating this proposal is essential to the vitality of the area. However, we do say that it is important. Local government should seek to allow acceptable infilling such as this site.</p> <p>By allocating further land the WHSAP will be more likely to meet the 5 Years Housing Supply for South Wiltshire Housing Market Area to the end of the period (2026) and housing need generally in this area during the Plan period.</p> <p>To deliver this much needed housing there need to be a correction to the currently unsound proposals for revisions to Salisbury's Settlement Boundary.</p>

Comment ID:	<a href="#">1816</a>	<b>Consultee</b> Coulston Estates  <b>Person ID:</b> 901939	<b>Agent</b> Mr Chris Beaver Director  Planning Sphere  <b>Person ID:</b> 901806	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified  Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.1 Elm Grove Farm			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Proposed allocation: the proposed allocation of Elm Farm under Policy H2 is supported in principle. This follows a collaborative approach that has been undertaken between Coulston Estates and Wiltshire Council following the acquisition of the site in 2015.</p> <p>Policy H2.1: the land area extent set out in Policy H2.1 and Paragraph 5.46 is incorrectly stated as 14.33ha. The correct extent of the allocation site is 14.95ha. This is shown on the enclosed Site Location Plan (Plan Ref: 1178.E.001).</p> <p>Fig 5.5: there is an error in the extent of the redline allocation site in Fig 5.5, which does not align with Coulston Estates ownership. This discrepancy is highlighted in the enclosed 'Corrected Development Plan Allocation boundary' (Plan Ref: 1178.E.010).</p> <p>Land ownership: the enclosed land ownership plan (Plan Ref: 1178.E.003) confirms that Coulston Estates are the freehold owners of Plots 1 and 2. Coulston Estates have an option to purchase Plot 3. Plot 4 is in third party ownership, but the landowner has confirmed that the land is available for development.</p> <p>Summary overview of site promotion: following the acquisition of site in 2015, Coulston Estates instructed PlanningSphere to promote the subject site through the Wiltshire Housing Sites Allocation Plan process. Initial representations were submitted in 2015 to ensure the registration of the site in the SHLAA process. A representation was submitted to Wiltshire Council in March 2015 in response to the informal consultation on 'initial site options'.</p> <p>Following this a comprehensive measured survey was commissioned, and extensive studies relating to ecology, drainage, transport, landscape were undertaken. A dialogue was also established with Trowbridge Town Council and Wiltshire Council's Spatial Planning Team.</p> <p>Trowbridge Town Council confirmed their formal support for the allocation in their response to the parish/town Council consultation that took place in the summer/autumn of 2015.</p> <p>An initial pre-application enquiry was submitted to Wiltshire Council showing a first phase residential development proposal in the context of a wider masterplan vision for the whole allocation site, under LPA Ref: 16/06760/PREAPP. The feedback received from the pre-application process led to further detailed drainage studies and ecological assessment and mitigation plans. Discussions over works to the existing Elm Grove recreation field were had with Wiltshire Council and Trowbridge Town Council.</p> <p>In view of the Trowbridge primary school capacity constraint, discussions were undertaken with Wiltshire Council with regard to accommodating a 1.8ha primary school site as part of the allocation. Following informal dialogue with council officers it was agreed that a school site could be accommodated on the allocation subject to Wiltshire Council taking full responsibility for its deliverability.</p> <p>Subsequent to the publication of the draft Plan in July 2017, a series of meetings have taken place with Wiltshire Council to discuss the delivery of the site, and the required mitigation measures to address the various technical constraints including: heritage; utilities; drainage; transport, ecology, landscape; and urban design.</p> <p>A dialogue has been commenced with Network Rail in respect of the culvert that carries the existing watercourse under the railway where it connects to the river Biss at Ashton Park. Coulston Estates are examining the feasibility of engineering options to improve surface water conveyance under the railway embankment. If these engineering proposals can be delivered with the agreement of Network Rail the potential</p>				

Appendix Q - Schedule of representations

	<p>residential development quantum of the site could be increased above the levels indicated in the enclosed draft masterplan and accommodation schedule. However, the proposals, as currently drafted, assume that the culvert will remain as existing.</p> <p>Technical work in progress: the following technical summary reports are included to demonstrate that the technical work in progress, which underpins the draft masterplan plan and development capacity assessment:</p> <p>Transport (CDA): Transport Technical Note (September 2017)  Landscape (Greenhalgh LA): Landscape Strategy (September 2017)  Drainage (AW Water Engineering): Draft Flood Risk Assessment (September 2017)  Ecology (Engain): Summary Ecology Report (September 2017)  Utilities (WYG): Utility Report Assessment (February 2016)  Heritage (Heaton Heritage Consultants): Archaeologic and Historic Assessment (January 2017)</p> <p>There is also drone footage and oblique aerial photographic records of the site</p> <p>Draft Masterplan and Site Capacity Assessment: following an extensive and iterative assessment of the site constraints, and feedback from the initial pre-application process (16/06760/PREAPP), the following information is enclosed:</p> <p>An Existing Constraints Plan (Keep Architects): Plan Ref: 1178.E.010  An Illustrative Masterplan (Keep Architects): Plan Ref: 1178.P.001  Illustrative Landscape Masterplans (GLA): Plan Refs: 038-001-D &amp; 038-R001-E</p> <p>An Accommodation Schedule aligned to the draft masterplans is enclosed. The current layout shows how 188 No. dwellings can be accommodated on the site along with a community use building (circa 1,260 sqm) and a site for double form entry primary school (2,200 sqm).</p> <p>Deliverability: Coulston Estates are currently in the process of selecting a housing delivery partner, which they expect to conclude in the Autumn of 2017. Discussion with Wiltshire Council's Education officers have confirmed that the Council will take responsibility for delivering the primary school site subject to being provided with a serviced site by Coulston Estates. This in turn will require agreement of a phased delivery sequenced out the development of Plots 1 and 2 from Drynham Lane. On the assumption that outline planning permission can be secured by the end of 2018 (including an agreed approach to s.106 contributions to maintain scheme viability), it is considered that the proposed allocation of Elm Grove can be fully delivered by April 2022.</p> <p>Statement of Common Ground: Coulston Estates are committed to continue to working proactively with the Council to ensure the phased delivery of this site. It is proposed that a further pre-application enquiry will be submitted in the Autumn of 2017; and that a Statement of Common Ground will be agreed with the Council in advance of the publication of the 'Submission' version of the draft Wiltshire Housing Site Allocations Plan in 2018.</p> <p>Elm Grove, Policy H2.1</p> <p>6th bullet amendment: New cycling and walking routes through the site to link into the existing network and the proposed Ashton Park Strategic Allocation site, and the White Horse Business Park</p> <p>Policy H2.1 and Paragraph 5.46: amend site area from 14.33ha to 14.95ha.</p> <p>Fig 5.5: amend allocation extent to align with the enclosed 'Corrected Development Plan Allocation boundary' (Plan Ref: 1178.E.010).</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4720333 / 4720331 / 4720347 / 4720343 / 4720342 / 4720334 / 4720332 / 4720346 / 4720335 / 4720339 / 4720348 / 4720340 / 4720345 / 4720344 / 4720341</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Coulston Estates wish to be represented at the examination to assist the consideration of the technical issues, and to answer any technical or planning policy related queries that may be raised in the round table discussion by interested parties.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">1817</a>	<b>Consultee</b> Mrs Julie Downton  <b>Person ID:</b> 702421	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Appendix Q - Schedule of representations

Comment ID:	<a href="#">1822</a>	<b>Consultee</b> Catherine Brabner-Evans Regional External Affairs Officer - South West  Woodland Trust  <b>Person ID:</b> 1130951	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Other		<b>Do you consider the draft WHSAP is sound?</b>		
Please identify the policy, paragraph, table, figure or site to which you are referring.			<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As the UK's leading woodland conservation charity, the Woodland Trust's vision is for a UK rich in native woods and trees, for people and wildlife. We work to protect, restore and create native woods, trees and their wildlife for the future. We manage over 1,250 sites, including over 200 sites in the South West, and have 500,000 members and supporters.</p> <p>We welcome the opportunity to comment on the Pre-submission draft Wiltshire Housing Site Allocations Plan and are pleased to be working with you in the area.</p> <p>The Woodland Trust welcomes the references to the protection of existing trees and hedgerows in Wiltshire. This is particularly important given the scale of housing development which is being allocated to sites.</p> <p>The Woodland Trust believes that trees and woods can deliver a wide range of benefits, and this is strongly supported by current national planning policy. Trees &amp; woods can play a significant role in sustaining the landscape scale connectivity that underpins ecological resilience and helps combat climate change effects.</p> <p>We note reference at 5.8 to mature hedgerows and trees, including a veteran oak. The length at which veteran trees take to develop and evolve provide varied and unique habitats for fauna and flora species which cannot afford to be lost. Their position in the landscape often creates vital connectivity within an increasingly fragmented environment.</p> <p>The Housing White Paper (February 2017) at section A.38 (p77/78) brackets ancient woodland and aged or veteran trees alongside protection for SSSIs, National Parks and Greenbelt, stating: 'Ancient Woodland and aged or veteran trees are irreplaceable habitats and we consider it important that national policy reflects the need to protect them'. Full Housing White Paper is at: <a href="https://www.gov.uk/government/publications/fixing-our-broken-housing-market">https://www.gov.uk/government/publications/fixing-our-broken-housing-market</a></p> <p>When considering protection of trees and hedgerows it is essential to consider the extent of root area to ensure that adequate buffers are provided. We recommend a minimum of 15 times the diameter or 5 metres beyond the crown, whichever is greater. Further, we strongly welcome the commitment to 'enhance with additional native planting.'</p> <p>Protection of existing trees and woods, plus the addition of new and diverse woodland creation to buffer and extend our depleted and fragmented habitats can all significantly help resilience and help combat climate change effects.</p> <p>Woodland creation is especially important because of the unique ability of woodland to deliver across a wide range of benefits: -these include for both landscape and biodiversity (helping habitats become more robust to adapt to climate change, buffering and extending fragmented ancient woodland), for quality of life and climate change (amenity &amp; recreation, public health, flood amelioration, urban cooling) and for the local economy (timber and woodfuel markets).</p> <p>Our publication Residential Development and Trees demonstrates the importance of incorporating woods and trees at the early design stage, and how new build can provide opportunities to enhance the natural environment through the delivery of green infrastructure.</p> <p>We hope you will take these comments into consideration as part of the consultation process. If you have any queries, please do not hesitate to get in touch via this email address <a href="mailto:governmentaffairs@woodlandtrust.org.uk">governmentaffairs@woodlandtrust.org.uk</a></p>				

Appendix Q - Schedule of representations

	The Woodland Trust looks forward to continuing to work with Wiltshire Council, and other partners, in the management of our existing 14 sites across the county, and the planting of new trees and woodlands.

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">1823</a>	<b>Consultee</b> MN, PA & RC Tilley  <b>Person ID:</b> 1130961	<b>Agent</b> Mr Cliff Lane Savills Planning  <b>Person ID:</b> 556489	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	Yes
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.4 Rowbarrow Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORTS: W&W Report A3 - Final_Ir Rowbarrow_Representation Form_Final Proposed allocation: the proposed allocation of Land at Rowbarrow under Policy H4 is supported in principle. This follows the owners taking pre-application advice from Wiltshire Council following the approval of three earlier phases of residential development. Guidance has also been followed from the 2005 Development Brief and guidance in this Draft Plan. Land ownership: the site is the freehold ownership of MN, PA & RC Tilley). The adjoining land to the north and east has already been built out by Persimmon Homes. We can confirm on behalf of the landowners that the subject site is available for early residential development subject to a subsequent planning application. Should the allocation be confirmed in the Submission Plan the landowners and their agents intend to coordinate further more detailed work regarding the site promotion in consultation with the Council. Please see accompanying Supporting Statement and specialist reports on: <ul style="list-style-type: none"> <li>· Ecology</li> <li>· Landscape</li> <li>· Heritage</li> <li>· Transport</li> <li>· Flood Risk and Utilities</li> </ul> Policy H3.4 and Paragraph 5.146: the land area extent set out in Policy H3.4 and Paragraph 5.146 is incorrectly stated as 6.1ha. The correct extent of the allocation site is 5.56ha. This is shown on the attached Site Location Plan and in the Masterplan within the Supporting Document. The buffer surrounding the neighbouring development is not included in the site. 9.3 Sustainability Policy CP41 of the Wiltshire Core Strategy deals with sustainable construction and low carbon energy. If the site is allocated, a subsequent application would be accompanied by an Energy statement which would address these issues in relation to the scheme proposed at that time. 9.4 Section 106 Contributions Other matters may also have to be addressed via a Section 106 Agreement. For example: Affordable Housing – The pre-app letter from the Council indicates that policy CP 43 of the Core Strategy requires a 40% on site affordable housing provision at nil subsidy. For a scheme of 100 dwellings this would equate to 40 affordable dwellings. This is shown for illustrative purposes on the masterplan. Education – In terms of education provision, the requisite financial contributions based on the Education Department’s cost multipliers per pupil place would be offered via a Section 106 Agreement, for both primary and secondary provision. These contributions could be used in locations of			

Appendix Q - Schedule of representations

	<p>the Education Authority's choice. The pre-app letter suggested current projects that could be funded would be expansion of St Martins CE at primary level and Sarum Academy at secondary level. One option could be for primary school contributions from this development to be channelled towards the primary school which we understand Persimmon Homes is proposing on land to the north of Downton Road, within walking distance of the site. That site is being promoted separately by Persimmon in this consultation.</p> <p>Open Space and Community – A significant amount of this site will be provided as public open space with footpaths for dog walking etc. Equipped play areas will also be provided in accordance with the Council's standards.</p> <p>9.5 Community Infrastructure Levy (CIL) The requisite CIL payment would be made, on the granting of planning permission, in accordance with the Council's latest CIL Charging Schedule</p> <p>9.6 Environment Impact Assessment (EIA) The pre-app letter suggests that as the neighbouring housing development was the subject of an EIA, a planning application will need to be screened and possibly an EIA addendum submitted. If the site is allocated a formal screening opinion will be sought well in advance of the submission of a planning application</p> <p>10.0 Conclusions Based on an objective assessment, Wiltshire Council has allocated the site in the Draft Wiltshire Housing Site Allocations Plan, currently being consulted upon. Because of potential constraints, it only allocates the site as suitable for 100 dwellings. Pre-application advice has been received from Wiltshire Council and this has been taken into account in formulating the illustrative proposals contained in this document. A development brief was prepared for The Rowbarrow / Downton Road area in 2005. Subsequent neighbouring housing development was developed taking this into account. Proposals now put forward have similarly also had regard to the brief. The illustrative masterplan has been formulated in order to achieve a sensitive and sustainable development taking on board guidance and policy. A series of reports were commissioned to support the draft allocation and to inform the illustrative masterplan. Other issues highlighted in the pre-application guidance letter have also been considered. On the basis therefore that: – the draft allocation has been formulated by the Council on the basis of an objective assessment; – this supporting document has gone a stage further and assessed pre-application guidance, Local Plan policy, government planning guidance and specialist consultant reports; – an illustrative masterplan has been prepared which demonstrates a sensitive and sustainable development can be achieved on the site, relating well to existing housing development, whilst not adversely affecting either the landscape or heritage assets, It is respectfully requested that Wiltshire Council confirms the allocation of the site for 100 dwellings in the Submission version of the Plan and extend the settlement boundary accordingly.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	8.2 Landscape SEE ATTACHED REPORTS: Land at Rowbarrow - Landscape and Visual Context - 20170911 Salisbury Rowbarry LVIA Figures - 20170911_Part1 Salisbury Rowbarry LVIA Figures - 20170911_Part2 Salisbury Rowbarry LVIA Figures - 20170911_Part3 Salisbury Rowbarry LVIA Figures - 20170911_Part4 Salisbury Rowbarry LVIA Figures - 20170911_Part5 Salisbury Rowbarry LVIA Figures - 20170911_Part6 The summary of the Landscape & Visual Impact Assessment prepared by Savills is as follows: It is acknowledged that the site occupies an elevated and open area of land that is distinguishable from as far away as Old Sarum to the north and Pepperbox Hill to the south. Given the panoramic nature of these views however, the sensitive development of the site need not result in any adverse visual effects. The site provides the opportunity to create a softened urban edge to the city, retaining a shelterbelt of mature beech trees, as well as an area of open space that could be enhanced with the restoration of chalk grassland. This open space would also include a small area of the Woodbury Ancient Villages Scheduled Ancient Monument, providing the opportunity for enhanced interpretation.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED REPORT Land at Rowbarrow - Heritage Appraisal Final</p> <p>8.3 Heritage</p> <p>The Heritage Appraisal prepared by CgMs Heritage summaries the potential impacts on the historic environment. It considered impacts on both buried archaeological remains and built heritage.</p> <p>It notes a small part of the site lies within the boundaries of the Woodbury Ancient Villages Scheduled Monument (SM). Whilst direct harm to the SM could cause substantial harm, the report says this could be completely eliminated by completely avoiding any built development within the area of the SM.</p> <p>Previous archaeological investigation indicates a high potential for archaeological remains within the site but impacts could be mitigated by a programme of archaeological works.</p> <p>The report also states that development within the site has the potential to impact on the setting of the Woodbury SM. However it states that the site only forms a small part of the setting of this monument, and the setting is not a primary contributor to the SM's significance. Therefore it is considered that any impact on the setting would cause less than substantial harm to the significance of the SM.</p> <p>It is also stated that it is not considered that any proposed development could cause any measurable harm to the significance of Old Sarum SM on the grounds of distance between the SM and the site (5km+) and the panoramic extent of Old Sarum's setting, of which the site only forms a tiny part.</p> <p>It is further stated that no designated built heritage assets (listed buildings, registered Parks and gardens, conservation Areas) within 1km of the site would be impacted by the proposed development.</p> <p>In respect of Salisbury Cathedral (1.2 km distant), the changes in setting would not be considered to amount to more than a negligible degree of harm to the asset's significance, which can be balanced by some mitigation measures in the development design.</p> <p>The report notes that no issue of impacts on buried archaeology or the setting of the Woodbury SM or any built heritage assets were considered as barriers to development of recent housing developments adjacent to the site. Any such issues arising as a result of development proposals within the site could similarly be dealt with via a programme of pre-determination works and suitably worded planning conditions, and should not preclude development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Peter Brett have undertaken a due diligence assessment covering constraints associated to Flood Risk and Utilities associated with the potential residential development of this site. SEE ATTACHED REPORT: 170911_Due Diligence Report_RevB Their summary conclusions were: Flood Risk 1. The site lies entirely within Flood Zone 1, the lowest classification of flood risk according to planning policy. The residential development proposals are acceptable within Flood Zone 1. 2. No other significant sources of flooding were found that would affect the proposed development as part of the information gathered as part of this appointment. 3. There are no watercourses or existing public surface water sewers within the vicinity of the site in which surface water discharges surface water on site via infiltration.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.4 Rowbarrow Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>9.2 Noise and Air Quality                  The pre-app letter mentions potential issues of noise and air quality impacting on the proposed housing from roads, the commercial use to the south east and the park and ride site further to the south east and from the District Hospital. With the proposed layout being tucked in adjacent to the existing housing development, these issues should not be too dissimilar to when considered for the original development. Additional planting will be proposed on boundaries particularly to the south and west which should assist with both issues. The commercial use to the south east was originally a milk depot which had the potential for noise but this has now been replaced by caravan storage. Noise should not be a problem from the park and ride which only operates for limited hours. Any potential air quality issues from roads, park and ride or the hospital would be addressed by the commissioning of an air quality report if the site is allocated and prior to the submission of a planning application.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.4 Rowbarrow Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORT ON SUPPORTING INFORMATION 9.1 Amenity and Design An illustrative masterplan accompanies this submission. Regard has been had to the existing residential properties to the north and east. There is an existing landscape buffer to these dwellings giving them protection. On top of this, due regard has been had to the height of proposed dwellings and face to face and gable to face distances to minimise overlooking and overshadowing. Pedestrian and cycle linkages between new and existing have also been taken into account in the layout. Because the location of the development it is noted that a high quality design will be required. To this end, the illustrative masterplan keeps proposed housing to the lower parts of the site and has dwellings fronting an area of public open space of the higher parts of the site which present an interesting face to those using the public open space. There would be more opportunity to discuss the layout of housing and design issues, if the site is allocated for development, by means of further pre-application discussions and community engagement.

<b>Comment ID:</b>	<a href="#">1832</a>	<b>Consultee</b> Neil Cowley Castlewood Properties Ventures Ltd  <b>Person ID:</b> 1130978	<b>Agent</b> Mr David Wetherill Senior Planner  Turley  <b>Person ID:</b> 1130975	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.2				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>On behalf of our client, Castlewood Properties Ventures Ltd., we write to provide representations to the pre-submission draft Wiltshire Housing Site Allocations Plan consultation.</p> <p>This response has been prepared with regard to our client's land interests at land off the A363 at White Horse Business Park. Our client's site is located outside of, but adjoining, the existing settlement boundaries of Trowbridge and North Bradley. Trowbridge is a Principal Settlement, situated within the Trowbridge Community Area and located in the North and West Wiltshire Housing Market Area (HMA).</p> <p>The scope of these representations is focused on the proposed strategy for the North and West Wiltshire HMA, the Trowbridge Community Area and Trowbridge specifically. Accordingly, any comments or observations made are done so without prejudice to any future representations. The Intention of the DPD and Spatial Strategy</p> <p>The spatial strategy within the DPD is, in summary, to allocate enough housing sites to fulfil the 'residual' housing requirement set by the 2015 Wiltshire Core Strategy in each Community Network Area. For the North and West HMA, further housing allocations are identified in the draft Plan at Trowbridge and Warminster (including land off the A363 at White Horse Business Park) identified in the Core Strategy Settlement Hierarchy as 'Principal Settlements' and 'Market Towns' respectively.</p> <p>The second bullet of paragraph 1.1 of the draft Plan states that the purpose of the plan is to:</p> <p>"Allocate new sites or housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three HMAs over the plan period to 2026."</p> <p>Paragraph 1.4 then goes on to reference the Wiltshire Core Strategy's intention to:</p> <p>"...ensure a sufficient choice and supply of suitable sites through the plan period in accordance with national policy..."</p> <p>Paragraph 2.3 then acknowledges the National Planning Policy imperative that:</p> <p>"...the Plan must involve a degree of flexibility and pragmatism to ensure a steady overall supply of enough land for housing development".</p> <p>Five Year Supply and Housing Provision</p> <p>We do not consider that Wiltshire Council can currently demonstrate a five year housing land supply, despite the Council's claimed supply in the North and West HMA of 6.62 years (Topic Paper 3). We note the conclusions of Inspectors at recent appeals in the HMA namely at Forest Farm, Chippenham (ref: 3150514) and the Grange, Hilperton (ref: 3167012) which also conclude that there is currently a five year supply in the North and West HMA. Despite this, the position in the North and West HMA is quite clearly marginal, with the Inspector for example in the Hilperton appeal decision stating that there was a surplus of just 59 dwellings.</p> <p>For the North and West Wiltshire HMA, currently a 5% buffer is applied to the housing land supply to ensure choice and competition in the market for land. Notwithstanding this, there is a strong case that a 20% buffer is also applicable for the North and West HMA given the delivery record set out below (See attached Appendix 1) demonstrating persistent under delivery in 8 of the previous 11 monitoring years (since the beginning of the plan period) and 8 of the past 9 years.</p>			

#### Appendix Q - Schedule of representations

Based on the findings of the Hilperton Appeal Decision, Wiltshire Council would be unable to demonstrate a five year supply in the North and West HMA with the application of a 20% buffer, and given the above delivery record, the situation can therefore be fairly described as precarious. It is also acknowledged at paragraph 2.14 of the DPD itself that:

“Fluctuation can occur in the delivery of housing but a central objective of the Plan, ensuring surety of supply, is to sustain a ‘five year housing land supply’ over the remainder of the plan period for each of these HMAs.”

Furthermore, the current approach of the DPD wrongly assumes 100% delivery of existing commitments to deliver the ‘residual’ housing requirement, without taking into account any lapse of those planning permissions, and not ensuring a suitable buffer of sites above that residual requirement.

Given the above, and in accordance with the NPPF, we consider the capacity of proposed allocations should be increased. These should contribute to over and above the ‘residual’ housing requirement in the North and West HMA to provide a realistic prospect of achieving the planning supply. This approach will ensure that the plans objective to sustain a five year supply of land across the plan period is met.

Crucially, there would be no planning harm from this approach, as the housing requirement in Wiltshire is a minimum, not a maximum, and cannot therefore be considered a cap to sustainable development.

#### Site Assessment

The proposed allocation of land off the A363 at White Horse Business Park (at policy H2.2) is supported in principle. The redevelopment of this site for housing would result in a logical extension to the settlement and would not result in any detrimental impacts. Policy H2.2 states the following objectives for the development of the site:

An objective of detailed design and layout will be to retain visual separation of the Town’s urban area from North Bradley village. To achieve this, development proposals would need to be focussed within the north-east of the site, screened with new planting and provide improvements to walking and cycling routes through to the town.

Development of the site would need to retain the distinctive pattern of mature and semi-mature hedgerows and trees and thereby provide a layout that respects the setting of North Bradley village as an important element of detailed design.

Existing hedgerows and trees also provide habitat for protected and non-protected species. These natural features therefore provide wildlife corridors that link habitat features within the local area; in particular, ‘dark corridors’ for foraging bats.

The site is in an area likely to be used by Bechstein’s bats associated with the Bath and Bradford on Avon Bats SAC. Sensitive habitat features on / adjacent to the site include: woodland belts associated with the White Horse Business Park; a network of mature hedgerows/hedgerow trees; and the grounds of Willow Grove. These features should be retained and / or buffered from development (including residential gardens) by wide (10-16m), dark (<1 lux), continuous corridors of native landscaping.

Proposals would need to provide for a high quality, sustainable development that enhances a key gateway approach to the town, whilst protecting the integrity of North Bradley as a village.

In order to facilitate development, appropriate contributions would be likely to be sought to help fund additional local school capacity. Funding contributions may also be sought where needed to increase capacity at local GP surgeries and dentistry at the town.

We consider that the requirement that development proposals need to be focussed within the north-east of the site to be unduly restrictive.

It is noted that the justification for this is to primarily retain visual separation of the Town’s urban area from North Bradley village. It is noted that the Council wish to maintain “visual” rather than “actual” separation, which is the correct approach in terms of maintaining the separate identity of settlements.

We consider that “visual separation” can be maintained with a much more extensive development of the proposed allocation. The key settlement gap between Trowbridge and North Bradley is provided along the road “Woodmarsh”, which forms the gateway into the town. In contrast the gap between North Bradley and the White Horse Business Park to the north east is not as significant, in terms of protecting the integrity of the two settlements. The requirements of the proposed allocation place undue significance on this gap. Our development strategy is to provide a landscape / open space buffer adjacent to A363 / Woodmarsh roundabout, in the north-western corner of the proposed allocation. This will ensure that the key settlement gap between Trowbridge and North Bradley is maintained, and the setting of North Bradley village is appropriately preserved.

#### Appendix Q - Schedule of representations

It is noted that the site was submitted showing a capacity of 366 dwellings (Site ref 298), and this was revised down to 150 dwelling following the assessment process, which required “mitigation measures to address environmental effects, including effects on heritage assets could be achieved” (Pre-Submission Draft Wiltshire Housing Site Allocations Plan Trowbridge Community Area Topic Paper June 2017).

It is noted that Listed Buildings are located within the southern section of the site, and that these would require appropriate buffers. However the northern section of the site is less constrained and should be developed to the full extent of the red line boundary, excluding the landscape / open space buffer as mentioned above.

Fig 1: Listed Buildings located in southern section of proposed allocation (Source: magic.gov.uk) (See attached Appendix 2)

As a Principal Settlement, Trowbridge is anticipated to be a primary focus for development. Moreover, the role of the town as a significant employment and strategic service centre will be expected to be strengthened over the Plan period up to 2026 and beyond. It should be noted that the growth of Trowbridge is constrained in other directions. In particular, with Green Belt and Flood Zone designations to the north and west of Trowbridge.

Therefore the site should be allocated for a much higher number of dwellings given the sustainable location and relative lack of constraints. The development would not be viewed as a protrusion into the countryside and neither would such an expansion be perceived as diminishing the visual gap between Trowbridge and North Bradley, subject to the open space strategy as outlined above. The development strategy would help to protect the integrity of North Bradley as a village.

The overall effect will be to proportionately increase the quantum of market and affordable dwellings, which can be achieved through the allocation, whilst simultaneously providing much greater potential to achieve a sensitively configured design. Indeed, the opportunity to achieve a comprehensive design will provide greater opportunities for more meaningful green infrastructure provision, landscaping and open space.

Fig 2: Trowbridge planning constrains (Pre-Submission Draft Wiltshire Housing Site Allocations Plan Trowbridge Community Area Topic Paper June 2017, Appendix C) (See attached Appendix 3)

Summary and Proposed Amendments to the DPD

As outlined within the scope of this representation, it is considered that the proposed allocation of additional residential at land off the A363 at White Horse Business Park is consistent with the Core Strategy spatial strategy, and serves to reinforce the ‘Principal Settlement’ status Trowbridge has within the settlement hierarchy. To this extent, the strategy for the North and West Wiltshire HMA and the Trowbridge Community Area is considered logical. Similarly, the principle of developing land off the A363 at White Horse Business Park site represents a sound and reasonable approach. This is in view of its location and its relatively unconstrained nature, when compared to potential alternative sites at the settlement.

However, the preparation of this DPD gives the Council an opportunity to proactively plan for future requirements, and potentially safeguard against under-delivery in to the future, should the need for additional housing provision be required (i.e. beyond the minimum required by the current Core Strategy). There is therefore an opportunity to counter the prospect of future shortfalls in delivery (which will ultimately need to be addressed), by planning to deliver over and above the Core Strategy minimum requirement.

Taking this into account, and for the reasons explained, it is considered that the site should be allocated for a much higher number of dwellings given the sustainable location and relative lack of constraints. In particular, the northern section of the site should be developed more extensively given the absence of Listed Buildings in this part of the site. A landscape / open space buffer should be proposed adjacent to the A363 / Woodmarsh roundabout. This will ensure that the key settlement gap between Trowbridge and North Bradley is maintained, and the setting of North Bradley village is appropriately preserved.

Accordingly, we consider the following points and amendments should be considered in the preparation of the draft Site Allocations DPD:

The spatial strategy for the draft Plan should be re-considered to positively plan for the allocation of further sites and increase the size of proposed allocations, particularly where this does not result in substantively different levels of harm and where this facilitates additional benefits; The northern section of the site is less constrained and should be developed to the full extent of the red line boundary, excluding a landscape / open space buffer to be proposed adjacent to the A363 / Woodmarsh roundabout in order to safeguard the visual gap. The wording of proposed allocation H2.2 should be amended to delete the following sentence “development proposals would need to be focussed within the north-east of the site”, as this is unduly restrictive. The setting of North Bradley village can be appropriately preserved with our proposed development strategy.

The settlement boundary should be amended to reflect the revisions to the boundary of the proposed allocation.

Appendix Q - Schedule of representations

	<p>We trust that these comments are helpful, and we look forward to participating in the next stages of the Plan. In regard to the next stages of the Plan, we request to be notified of the following:          The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination; and          That the Inspector's Report (including any recommendations) into the examination of the Wiltshire Housing Site Allocations Plan has been published.          If you would like to discuss our comments or require any further clarification, please do not hesitate to contact us.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to state my opposition to the inclusion of site 3565 (fields adjacent to Southwick Court) in the Trowbridge Site Allocation Plan. For the last 5 years I have suffered from severe depression and anxiety, and have been under the care of the mental health care team for the majority of this time. I find extremely difficult to go far from my home, and the above mentioned land has been an essential part of me being able to access recreation close to home, when family or neighbours have been able to accompany me on walks. It is well documented that fresh air and exercise is of benefit to everybody's mental health, whether or not they are suffering from a related illness. The removal of this area will have a detrimental effect on my mental health, as I will be unable to access similar recreational spaces which are further away.</p> <p>The age demographic of residents in the nearby bungalows, is at the upper end of age scale. Again, it is vital for these people, some who have limited mobility, to be able to access a recreational area which is close to their homes. They have been able to do so for many years, and it would be criminal to remove this facility in order to build housing, when there are many brownfield sites available in Trowbridge, which would not involve the loss of recreational space.</p> <p>The field system is a recognisable part of our heritage and dates back hundreds of years in its current form. The land has been used by many generations for its current use of farming and recreational space and is a valuable and valued asset to the local community.</p> <p>The site has been opposed by the Town Council and alternatives for a greater number of dwellings proposed. There is no need to forever lose this valuable space.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		I object to the proposed 740 homes on Netherhampton Road, Harnham and 100 new homes on Rowbarrow, Harnham on the following grounds :- TRANSPORT - There is already heavy traffic and rush-hour congestion along Netherhampton Road, Harnham Gyratory, Newbridge Road, Coombe Road and Downton Road caused by local and through traffic. Recent road works highlighted this with grid-lock throughout Salisbury. There is limited public transport to service the areas and Salisbury Park and Ride is ineffective. Please can you note and represent my objection.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I object to the proposed 740 homes on Netherhampton Road, Harnham and 100 new homes on Rowbarrow, Harnham on the following grounds :- SHOPS - Salisbury "town" is in decline. The old bus station and disused offices are being resurrected as homes for the elderly. CRIME - We have no Police Station, limited CCTV and minimal policing mainly by PCSO's, Custody Officers and Private Security Officers. HEALTH - Our hospital was unable to cope over the last mild winter. Currently under pressure and installing Portakabins to help cope with 4,000+ military personnel and their dependents now arriving in Tidworth the addition of a potential 3,000 new residents in Harnham will see the situation deteriorate. Doctors surgeries in Salisbury are merging amidst a shortage of GP's. Please can you note and represent my objection.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1 Netherhampton Road, Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		While I appreciate that more housing may be needed in Salisbury I think that 640 new dwellings on the outside of the town is excessive – this will create much more traffic down the Netherhampton Road, which is already too busy. These new houses will likely be bought by young families who need to get to work. Surely you need to be encouraging people to live in the town where they don't need to add more to the traffic throughout. Please consider reducing the size of this development.			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		I'm happy to be consulted on this matter, I enjoy living in Salisbury and don't want it to be ruined.

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Plan is not consistent with National Policy. It incorrectly identifies all sites within Settlement Boundaries as windfalls. It fails to take into account and give realistic and proper weight to windfall completions. The National Policy requires planning policies and decisions to encourage the effective use of land by re-using land. It is simply not good enough to hide behind the obvious conclusion that, for developers, the development of brownfield and infill sites is unattractive . Allocating greenfield sites is clearly the easy option as far as the Council is concerned.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There are sufficient sites (identified by Trowbridge Town Council and others) to meet the Council's requirements without permitting development of what is left of the open land between Hilperton and Trowbridge. Open countryside should be maintained to protect its character without reducing it - and in some places to just one insignificant small field/open space.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to state my opposition to the inclusion of site 3565 (fields adjacent to Southwick Court) in the Trowbridge Site Allocation Plan. These fields have been used by many generations for farming and as a recreational space; they are a valuable and valued asset to the local community. I regularly walk my dog on these fields; indeed the proximity of these fields to where my family and I live was one of the reasons we chose to buy our house on Balmoral Road. I am not alone in using these fields for dog walking; there are scores of people who do likewise, many of them elderly. Walking on these fields, with or without dogs, is good exercise &amp; is a very sociable experience for all concerned. To lose this valuable recreation space will have a real impact on the wellbeing of many people. We've already lost a large portion of the countryside with the installation of the solar panels near Axe &amp; Cleaver Lane, so the area to walk in will be very small if houses are built on these fields and on the proposed development site in Southwick.</p> <p>Do these proposed houses come with any guarantee or firm plan for infrastructure such as schools? I have seen no proposals for this. It's no good building houses if there isn't the infrastructure to support them.</p> <p>I urge you not to include site 3565 in the Trowbridge Site Allocation Plan. If you do we will lose a much loved part of the countryside that is used on a daily basis by a great number of people. It will have a really detrimental effect on our day to day lives and will make our neighbourhood a diminished place.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1855</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Francis Chalk	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6 Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to state my opposition to the inclusion of site 3565 (fields adjacent to Southwick Court) in the Trowbridge Site Allocation Plan. Housing on this site would not only contradict government policy of building on brownfield sites in preference to Greenfield, but would cause massive problems in its creation and existence for current residents.</p> <p>Why aren't the existing brownfield sites being used to build houses, such as the old West Wiltshire DC site on Bradley Road or the old Bowyers site? Plus I understand that developers hold granted planning permission for 5,096 dwellings in Trowbridge but aren't building on those sites. Is this because they prefer to have their buildings on attractive green field sites so that they will attract more money? It shouldn't be up to the developers to dictate where they will build; Wiltshire Council should instruct them where to build.</p> <p>I have been informed that expansion into the countryside is against the Wiltshire Strategic Plan. If this is the case, how can this proposed development be justified? It also seems that Trowbridge has to take a disproportionate number of houses for the Wiltshire housing allocation when compared to other towns in the county. How can this be justified? Furthermore I understand that the leader of the council Jane Scott has publicly spoken against developer lead house building. Well isn't this a perfect example of that?</p> <p>I have been informed that there is no active support for this site from the local Council, the Environment Agency, Natural England, Historic England or the County Planning Archaeologist despite such active support being voiced for other sites within the Proposal. In fact in a response from Natural England the case officer said :</p> <p>"I have briefly looked at the conclusions/recommendations in the Trowbridge Community Area Topic Paper and have noted that Site 3565 (Land east of the A361 at Southwick Court), is considered to be a less sustainable options for development, and that five moderate adverse effects have been identified in relation to this site."</p> <p>I urge you not to include site 3565 in the Trowbridge Site Allocation Plan. If you do we will lose a much loved part of the countryside that is used on a daily basis by a great number of people. It will have a really detrimental effect on our day to day lives and will make our neighbourhood a diminished place.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.6			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to state my opposition to the inclusion of site 3565 (fields adjacent to Southwick Court) in the Trowbridge Site Allocation Plan. Given that much of the building would take place in an area of notified flooding and standing surface water, the existing residents would have their property seriously threatened by an increased risk of flooding. I have seen the extensive flooding on these fields on a number of occasions since we moved here in 2007; much of the area of these fields is not suitable to build houses on because of this.</p> <p>I urge you not to include site 3565 in the Trowbridge Site Allocation Plan. If you do we will lose a much loved part of the countryside that is used on a daily basis by a great number of people. It will have a really detrimental effect on our day to day lives and will make our neighbourhood a diminished place.</p>

## Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1859</a>	<b>Consultee</b> Mrs. Marylyn Timms Clerk	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
		Hilperton Parish Council  <b>Person ID:</b> 547867		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge Community Area housing allocations		Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Hilperton Parish Council is of the opinion that the Wiltshire Council (WC) Draft Wiltshire Housing Site Allocations Plan is unsound for the following reasons:- Your method of calculating housing requirements for Housing Market Areas (HMA) is improperly based and contains errors. It seems that WC is using this exercise to improperly avoid due democratic process, and to engineer objectives beyond those required of a housing site allocations plan. An example is the allocation of land for a further 800 homes to Trowbridge (in addition to the 4,790 completed and committed and a further 1,000 'delayed') despite these being in excess of HMA housing needs. This seems to be in pursuit of an ambition, unrelated to housing requirements, to create an ever larger 'Greater Trowbridge' urban settlement.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>					

Appendix Q - Schedule of representations

<b>Comment ID:</b>	<a href="#">1860</a>	<b>Consultee</b> Mrs. Marylyn Timms Clerk	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge Community Area housing allocations		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>You have failed to encourage effective use of brownfield sites in accordance with NPPF Core Principle 8. NPPF Core Principle 8 requires planning authorities to “Encourage effective use of land by reusing Brownfield land.” and in Topic Paper 3 you state “during the Wiltshire Core Strategy period (2006-2015) delivery of brownfield sites have contributed 29% of all housing completions”. You go on to correctly note the much greater emphasis on brownfield in national policy, particularly in the Housing and Planning Act 2016 and the Housing White Paper of February 2017.</p> <p>However, beyond these token acknowledgements, your plan fails to consider any measures to encourage effective use of brownfield, especially in the principal settlement of Trowbridge which has acres of derelict former industrial land.</p> <p>Key documents fail to address brownfield properly or at all. For example, Topic Paper 4 states that “There are significant brownfield opportunities that are a priority for redevelopment, although this source of housing land is ultimately a modest proportion of overall supply”. You willingly fail to understand that, while this might be true of Wiltshire as a whole, it is far from true for the specific urban context of Trowbridge.</p>			
<b>Attached files (Please see Objective)</b>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	You have failed to allocate site 3247 Biss Farm for 210 new dwellings. This site is a logical extension of Trowbridge town which lies between the proposed Trowbridge settlement boundary and the Ashton Park allocation. Part of the Ashton Park development, closest to White Horse Business Park, could be reallocated for employment uses to compensate for the loss of this area as an employment allocation. This would also have the benefit of not reducing the build rate at Ashton Park within the plan period.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>You have ignored Planning Examination findings the basis for which have not changed. Over ten years ago the Planning Inspector determined, in relation to the Hilperton Gap, in his West Wiltshire District Plan First Alteration Inspector's Report:-</p> <p>"2.2.47. This area so contained comprises a series of small fields, separated by hedges, and crossed by a number of public and other footpaths. From my visits to this locality I consider that at present this area appears as a reasonably homogenous tract of open land, although there are subtle differences in landscape character within it. It is partly in agricultural use and partly consists of unused grassland, but there are views of Hilperton and the edge of Trowbridge from within and across it. I consider that the properties in Wyke Road, Victoria Road and Albert Road form an obvious definition to the eastern edge of Trowbridge hereabouts...</p> <p>2.2.48. I appreciate that the proposed Hilperton Relief Road is intended to cross this land [the Gap] broadly from north-west to south-east. Although the precise alignment of the road is not formally before me, a draft scheme has been drawn up and was presented to the inquiry. From this and my own observations, I cannot imagine that substantial earthworks would be needed to accommodate the road, wherever its precise route lay, so that its impact in the landscape might not be great. In these circumstances I do not believe that it would, if built here, appear as a more convincing boundary to the town than the existing development...</p> <p>2.2.49. An alternative boundary to the town policy limit further to the east would enable development to take place on the land so enclosed. This would extend Trowbridge into open land having a reasonably pleasant appearance and would in my opinion harm the semi-rural character and appearance of the area as open fields were replaced by built development of one form or another. It would also erode the gap between Trowbridge and Hilperton..."</p> <p>These comments relate specifically to sites 263 and 297.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>You have made unrealistic and unsubstantiated assumptions on building density.</p> <p>You have proposed sites 263 and 297 for housing stating that these would provide 205 dwellings after numerous mitigation measures. These sites have a combined area of approx. 20.5 ha and thus provide a net housing density of only 10 dwellings per hectare.</p> <p>This is only about one third of typical modern development density and indicates a highly wasteful use of precious green field space.</p> <p>HGT Developments llp has applied to develop houses on the northern part of site 263, an area of about 8.5ha partially in a flood zone. After over 18 months of negotiation with WC they are now asking for approval for 170 dwellings. This is a density of 20 dwellings per hectare which would provide, were it to be approved, 80% of the dwellings expected of site 263 on 40% (and the most difficult part) of the site.</p> <p>WC owns site 297 and has claimed (in Wiltshire SHLAA Appendix 3 for Trowbridge community area) that it alone could accommodate 74 dwellings.</p> <p>Your calculations are clearly unsound. Either only about one third of these sites is needed to provide the 205 dwellings you claim is required, or you have deliberately underestimated the number that will be built in an obvious attempt to assuage fierce local opposition to development in the Gap</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am expressing concern regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Site Allocation Plan.</p> <p>Together with the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings).</p> <p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so. However, the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell.</p> <p>A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p> <p>Policy 1 of Wiltshire’s Core Strategy states that “Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities”, but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So, this aspect of the Plan is not consistent with the Strategy.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met</p> <p>Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan.</p> <p>Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell having taken full account of parishioners’ wishes, and having examined carefully and fully the environmental and infrastructure constraints and options.</p> <p>Crudwell in not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am expressing concern regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Site Allocation Plan.</p> <p>Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options.</p> <p>Crudwell is not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1872</a>	Consultee Jules Blanch  Person ID: 1131127	Agent  Person ID:	Do you consider the draft WHSAP is legally compliant?	
				Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I was born and raised in the village of Crudwell and have chosen to bring up my own children in this community. Both of my daughters attend the village school which is incredible because of its size and ability to nurture the children on an individual basis. There is such a strong sense of community within the village school whereby all the parents and children know each other and therefore look out for each other. As a parent there is a sense of real safety and capacity for the children to be able to enjoy a rural upbringing. This is mostly because of the scale of the community and the school which it serves.</p> <p>I have serious concerns about the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell following the recent approval of 10 new houses. This represents nearly a 20% increase in the population of our village which is completely unsustainable and will have a huge impact on the roads, infrastructure and safety.</p> <p>The government has set out some clear guidelines to local authorities to allow a predetermined number of new dwellings within each Authority area. I believe however that the scale of this permitted development should reflect the size of the community into which it is being proposed. I do not believe that the proposed scale of this development reflect the size of Crudwell and as a result threatens the character of this closely knit community.</p> <p>Clearly a project of this size can have a hugely lucrative outcome for both the landowner and developer and both parties should be given the opportunity to express their moral conscience in terms of what the community will benefit from a development of this project. This could take the form of improvements to the local school, church restoration, flood risk prevention works, drainage improvements, road safety, etc, etc. Planning gains of this kind should be negotiated, agreed and formally tied up in advance of any planning permission being granted.</p> <p>It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints.</p>

				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		SEE ATTACHED REPORTS: 'Vision Statement part 1', 'Vision Statement part 2', 'Salisbury - Bovis - Wiltshire Housing Site Allocations Plan - Policy H3.1' Land at Netherhampton Road, Salisbury – Policy H3.1 At the outset Bovis Homes support the Council's decision to allocate additional land for housing due to the remaining residual requirement which is not identified within the Core Strategy. However, part of the need to identify additional land in and around Salisbury/Wilton is due to the potential delay in the delivery of a number of strategic sites in South Wiltshire. Bovis Homes is not surprised at the potential non delivery of a number of strategic sites and has previously made representations to the Wiltshire Core Strategy to that effect. Whilst Bovis Homes support the Council's decision to identify land under their control at Netherhampton Road, Salisbury (Potential Site Options 1028) for a mixed use development comprising housing, employment, community and social facilities they are disappointed that not all of the available land is identified for residential development. They consider that there is no justified reason why the additional land should not be allocated, particularly as considerable discussions have taken place with the Council to demonstrate the availability, suitability and deliverability of the site. A Vision Document was produced and sent to the Council to demonstrate that Bovis Homes have instructed a team of consultants to deal with the various issues relating to the deliverability of the site. That document demonstrated that there were no issues which represented a constraint to the development of the site in a timely manner. An update Vision Document is attached which reaffirms the site's deliverability. It is considered that the site is ideally placed to meet part of the additional housing requirement. The site was previously identified by the South Wiltshire Core Strategy as a draft strategic site, which signals the acceptance of the Planning Authority to release it for development i.e. 400 dwellings and 10 hectares of employment land. It was only deleted as an allocation because of a reduction in the overall housing provision for South Wiltshire not because of any site specific concerns, and essentially retains a 'reserve' allocation. Clearly additional land for housing is now required and the entire site is ideally placed to assist in meeting that need because: - (see Vision Statement). In view of the above, the allocation of the land is welcomed and we can confirm that it is available and deliverable within the Plan period. Indeed Bovis would be looking to submit an application as soon as possible. With specific regard to the proposed policy we would comment as follows: - i. Approximately 640 dwellings ii. The Vision Statement demonstrates that the site is capable of accommodating up to 640 dwellings. iii. Land for employment (B1, B2 & B8 uses of the Use Classes Order) iv. The Vision Statement and illustrative masterplan have identified an area for employment uses and support is given to the flexibility between the use classes afforded by the proposed wording. However, concern is expressed at the lack of a firm evidence base regarding the quantum of employment land. Objections are therefore lodged to this aspect of the policy.		

Appendix Q - Schedule of representations

	<p>v. At least 1.8ha for a two form entry primary school along with playing pitches. There are no objections in principle to the development meeting its need for primary education. However, the requirement for a 1.8ha two form entry primary school is beyond that which is justified for the proposed development. Accordingly Bovis object to this requirement.</p> <p>vi. A local centre</p> <p>vii. The submitted Vision Statement shows provision of a local centre within the overall development proposals.</p> <p>viii. A country park of at least 10ha in size with associated parking and facilities. The identified Vision Statement shows provision of at least 10ha of public open space but Bovis would question whether the term 'country park' is appropriate rather it should be renamed as 'public open space'.</p> <p>Recommendations</p> <p>In view of the above, Bovis recommend that: -</p> <p>i. All of the land within their control be identified within the proposed allocation.</p> <p>ii. Object to the proposed provision of a 1.8ha site for a two form primary school which is beyond that required for the proposed development.</p> <p>iii. Object to the level of employment land given the lack of a robust evidence base.</p> <p>iv. Object to the lack of guidance regarding the approval by the Council of any masterplan for the site. The masterplan should be approved as part of any planning application.</p> <p>v. Object to the requirement for a healthcare contribution when there is no evidence base to justify that requirement.</p> <p>vi. Object to the viability assessment with regards the site.</p> <p>vii. Object to the terminology 'country park' and consider it more appropriate to refer to it as 'public open space'.</p> <p>As above.</p>

The landscape has capacity to assimilate development whilst retaining views of Salisbury Cathedral etc. The Landscape & Visual Impact Assessment has been undertaken and confirms the site's capacity to absorb the quantum of development proposed. The draft policy goes on to state that development will be subject to the following requirements: - • Strategic landscaping and open space provision. All built development to be located below the 75m corridor and a Country Park located on the east and south of the site. The Vision Statement shows that the development will be provided with strategic landscaping and open space. In addition built development will be restricted to below the 75m corridor. Furthermore, as stated above a Country Park is also included as part of the proposals.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORT: Vision Statement pt 1, Vision Statement pt2 The site is not the subject of any ecological designation or designated sites of importance for biodiversity (e.g. SPA, SSSI). The eastern boundary of the site is located 250m to the west of a SSSI. The SSSI is a geological site adjacent to existing residential development to the north. In order to provide a buffer between the SSSI and any new development (in addition to that already provided by the chalk pit) an area of open space could be incorporated along the eastern boundary of the site adjacent to the chalk pit. The site is in arable use. It has been substantially managed and regularly ploughed. Hedgerows are sparse and there are virtually no trees (apart from isolated trees close to the Netherhampton Road) on the site. There is therefore little opportunity for protected species to establish themselves on the site. The proposals would provide an opportunity to provide biodiversity enhancement measures, including the introduction of a wider variety of habitats than currently present across the agricultural land. Measures to safeguard the interest of Hornhill Hill Chalk Pit SSS2 and Harnham Slope Country Wildlife Site. The proposed development is capable of safeguarding the Harnhill Hill Chalk Pit SSS1 and the Harnham Slope Country Wildlife Site.

There are no objections in principle to the development meeting its need for primary education. However, the requirement for a 1.8ha two form entry primary school is beyond that which is justified for the proposed development. Accordingly Bovis object to this requirement.  Provision of sufficient school and healthcare capacity to meet the need created by the development. Reference has already been made to the proposed education provision. Bovis believe that the provision of a 1.8ha two form entry primary school as not proportionate to the need created by the proposed development. With regards healthcare provision once again there is no objection in principle to the provision of healthcare provision however at present there is no evidence available in terms of the need for additional healthcare facilities etc. Bovis believe that additional evidence is required.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Please find attached my representation form in response to the above consultation for land east of Farrells Field, Yatton Keynell. The details in this letter should be considered as part of my representation.</p> <p>In response to question 6 on the form, I set out my reasons for the plan being unsound as follows:</p> <p>1. There is No evidence of housing need for Yatton Keynell</p> <p>The site is outside the framework of settlements boundary and is open country-side. It provides an attractive green buffer zone separating Yatton Keynell from the adjacent but separate small communities at Cold Harbour and Tiddlywink to the south-east.</p> <p>The proposal for 30 houses on land east of Farrells Field has been put forward at County level in order to meet the County's strategic housing requirements for the Chippenham remainder area. The site allocation for 30 houses in Yatton Keynell is not based on any evidence that there is a specific local housing need in Yatton Keynell. Appendix E of the Chippenham Community Area topic paper, confirms that no local housing needs survey was undertaken as part of the draft Plan. The proposed dwellings should be justified with evidence that there is a specific local need and the plan should confirm how that need will be met.</p> <p>In light of the above the plan is unsound, it not justified and is not consistent with national policy set out in paragraph 158 of the NPPF which states:</p> <p>'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local Planning Authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals'.</p> <p>2. There is an Absence of a Neighbourhood Plan</p> <p>Of the five large villages within the Chippenham Community Area, Yatton Keynell is the only village without a Neighbourhood Plan. It is acknowledged that delivery of housing supply through a community led Neighbourhood Plan offers a positive and proactive approach to delivering housing need rather than a site selection process which is only put forward by landowners.</p> <p>The local Ward Councillor (Cllr Scott ) called for a Neighbourhood Plan to be made at a Parish Council meeting back in November 2014 (copy of minutes attached and minutes quoted below). This was suggested in response to specific concerns that were raised by the community in relation to the proposal for development of land adjacent to Farrells Field. The Parish Council have not addressed this request.</p> <p>Notes from the minutes to November 2014 (extract)</p> <p>'Cllr. Scott advised that Yatton Keynell should look into setting up a neighbourhood plan, which allows people in the village more of a say as to what they want in terms of any developments that may be proposed'. (extract)</p> <p>'The proposed land is just outside the village boundary for Yatton Keynell, and unless the village see it a necessity the council favours objecting to the development'. (extract)</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p>				

## Appendix Q - Schedule of representations

'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be engaged in a proactive way, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made. There have been applications for development by local residents in Yatton Keynell (as infill) including a recent one in Tiddlywink which would work towards addressing the local community need.

The site selection process is unsound

Para 5.13 of the Chippenham Community Area Remainder Topic Paper – June 2017 states that the village of Sutton Benger which has an identified a housing need, was discounted as a village which could accommodate additional housing growth. The Plan states that the village primary school cannot accommodate growth and therefore the village cannot accommodate more housing. The exclusion of the village from the housing allocation plan seems unjustified as the plan should consider all housing types not just those for families. Just because the school is full that doesn't exclude new housing being delivered for elderly, and people without children (flats starter homes). If some additional housing was accepted in Sutton Benger it might reduce the overall need for housing which has been identified in the other larger villages where there is considered no housing need.

The village of Yatton Keynell which has no evidence of identified housing need (this is minuted in Parish Council Meeting minutes November 2014, attached), and no Neighbourhood plan has been identified for having a significant proportion of the 138 dwellings needed to meet the Chippenham Area Strategic housing target.

The housing sites selection process is contrary to Para 159 of the NPPF. It states:

'Local planning authorities should have a clear understanding of housing needs in their area. They should: prepare a strategic Housing Market Assessment to assess their full housing needs and .....The Strategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which ..... addresses the need for all types of housing, including affordable housing and the needs of different groups in the community such as but not limited to families with children, older people people with disabilities, service families and people wishing to build their own homes...';

Another factor which was not considered as part of the site selection was the landscape constraints in place for the village Yatton Keynell. A significant amount of Yatton Keynell settlement and adjoining land is washed over by AONB rendering a large area of land that is not available for development. This fact should have been identified as a constraint in the overall site selection process and taken into account when considering the amount of new development proposed in the village.

4. There are Infrastructure issues

Drainage is considered to be fundamental constraint on the land adjacent to Farrells Field. It is acknowledged in the Council's Sustainability appraisal that the moderate adverse effects related to the limited drainage supply capacity in the local distribution mains and that there is a potential need to serve the site by a pumped connection for foul water and that the site falls within a groundwater vulnerability area. These issues are identified in the site allocation supporting text, and the need for a capacity appraisal and further assessment is required. Infrastructure needs should be identified and established prior to the allocation of the site..

5. 30 dwelling will have a significant impact on the character of the area

Para 5.31 identifies land East of Farrells Field, Yatton Keynell for the development of approximately 30 dwellings which currently resides outside of the boundary.

The Council claim that 'it is in a location that has the capacity to accommodate change from an environmental, heritage and landscape perspective, and could assimilate into the existing built form, whilst positively conserving and enhancing the village-edge setting'. However, a large scale proposal of 30 additional houses at the entrance to the village is not suitable and will have a negative impact on the character of the area.

6. Lack of community engagement and poor consultation

The draft plan process is lengthy, complicated and difficult for us as the public to work with. Even the forms are hard to find, understand and they are hidden from view. It certainly does not encourage engagement or 'plain English understanding'.

The planning process which has taken place and resulted in the Farrells Field site being put forward for housing, has not been meaningful, as it has not provided opportunity for the local community to comment on or consider alternative sites. The Parish Council have not engaged in the plan process or adequately represented the views of the local people in response to the proposal being put forward. (as noted in point 2.)

Appendix Q - Schedule of representations

	<p>I consider the proposed allocation for such a large site which will have such a significant impact on the community in yatton Keynell should be the subject of a more meaningful consultation process by means of a Neighbourhood Plan.</p> <p>It is my understanding (from P61 of the Chippenham Community Area Remainder Topic Paper) that of the five large villages identified as part of the Chippenham remaining area, none of the Parish Council's responded to the Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement. It states in para 2.23:</p> <p>'Town and parish councils are the most local tier of democratic representation and, as such, they provide a key link with local communities. They are a specific consultation body under the Town and Country Planning (Local Planning) (England) Regulations 2012. Regulation 18 requires that Wiltshire Council has to consult with specific consultation bodies which they consider may have an interest in the subject. Wiltshire Council is committed to continuing to consult with the local councils'.</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p> <p>'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be proactively engaged, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <p>7. The proposed site is out of the village boundary</p> <p>Land east of Farrells Field is currently outside of the village boundary. Granting permission for housing allocation means an extension to the village perimeter in turn linking up the separate communities that surround it (Tiddlywink and Cold Harbour</p> <p>Withdraw land at east of Farrells Field and allow a neighbourhood plan to be prepared giving residents opportunity to explore other site options in a proactive way. In line with NPPF para 155.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Paragraph	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		4.16			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Draft Housing Allocation Plan for Netherhampton and Harnham.</p> <p>I attended two local meetings reference the above as I have a vested interest in property at Harnham and the road system. The Netherhampton meeting was well attended and the Harnham meeting in St Georges Hall had at least 250 attendees with some standing in the kitchen, even the windows were opened and people were leaning in to hear what was being said. There was a strength of feeling against the proposal.</p> <p>The proposal appears to be contrary to housing strategy policy, is it a brownfield site? A previous proposal mentioned 1200 houses, this would swamp the tiny village of Netherhampton which has already agreed to 30 houses. Does not appear to be in keeping with para 4.16 of the draft allocation plan.</p>

If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?					

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1885</a>	<b>Consultee</b> Mr Andrew Poole	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 447415	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Harnham sites			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>There is insufficient transport infrastructure. A previous study in 2012 revealed that Harnham, the village adjacent to the proposal, suffers from traffic density. The Harnham gyratory system, Park Wall traffic lights were found to be operating close to and exceeding capacity. We are now five years on with much increased traffic mainly due to recent new builds.</p> <p>There is no Wiltshire plan for additional road systems to relieve traffic which has grown considerably and in fact the A36 Wilton roundabout must also be above capacity hence the frequent traffic queues.</p> <p>Harnham itself is blighted by continuous traffic queues even after commuter times bringing frustration and pollution to residents. It needs to be noted that apart from Bishops Wordsworth all the secondary schools are north of the City of Salisbury and the existing road system would suffer with much increased traffic.</p> <p>It would be much better to place new housing on the north side of Devizes road where some construction is already under way on the south side at Fugglestone.</p> <p>The village of Alderbury on the A36 had a similar traffic problem some forty years ago and the parish council agreed with Highways and the Council that if a bypass was provided further housing in the village would be acceptable. This was the way the problem was solved. At present there does not appear to be an identified route around Salisbury for additional road systems and any possible or likely routes, instead of being preserved, are being allowed to be built out. Is this the way to run a Country?. Salisbury is a hub of many roads, A360, A354, A345 A30, A338 and the trunk road the A36. Much of this traffic does not want to stop in Salisbury and has to use the woefully inadequate inner ring road which in itself creates a swathe of pollution on either side of the road. I think the time now is to step back and rethink the transport strategy before embarking on new housing projects. The Wiltshire Core Strategy insists that housing estate road will be built before house construction commences, surely this rule must be extended to large developments providing main road infrastructure.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I wish to voice my opinion which is strongly against further disproportionate developments around Salisbury. I find it incredible that further development is being considered on such an inappropriate scale around Salisbury, namely the proposed 840 homes in Harnham and Ntherampton.</p> <p>The traffic situation in Salisbury has been unable to cope with the demands placed on it for many years, as anyone who attempts to enter or leave the city will testify. This must be having a significant negative economic effect on businesses which rely on goods or materials being transported in or out of our city a timely manner. It must also act to cast a negative impression for employers considering siting themselves in our city.</p> <p>A second major employer and provider of revenue, tourism, must also be being damaged by the ill considered development of inappropriate housing estates around Salisbury. I have been fortunate to have worked and traveled in many areas of the world and seen many great cities. I am well aware that development is necessary but it saddens me that our city is being strangled by poorly scaled "blocks" of development that is turning the approaches to our unique city into a series of unappealing suburbs. Tourists come here to see a unique medieval city, not a series of housing estates surrounding a dying city center.</p> <p>I would ask those proposing the development to consider the legacy that such an additional development would be for our city, I would ask them to enter our city by any main roads and look at what is around them with the eyes of a tourist that has spent hard earned money to visit a city famous throughout the world for the beauty of its medieval streets, cathedral and surrounding countryside. I would ask them to look hard and think about how their development will affect the future of our city.</p>

<b>Comment ID:</b>  <a href="#">1892</a>	<b>Consultee</b> Kent's Oak Ltd Kents Oak Ltd  <b>Person ID:</b> 1131190	<b>Agent</b> Mrs Caroline Jezeph Planning Consultant  Bryan Jezeph Consultancy  <b>Person ID:</b> 1131187	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	6.8			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1.1 This representation addresses a site within the village of Middle Winterslow. The representation is concerned with the alignment of the proposed modification of the Settlement Boundary (as detailed on the Plan accompanying this representation).</p> <p>1.2 The representation endorses the review of the boundary and notes the methodology which was employed as set out in Topic Paper 1 Settlement Boundary Review Methodology June 2107.</p> <p>1.3 This representation supports the realignment of the boundary in the vicinity of Witt Road but objects to the exclusion of an adjoining parcel of land. The realignment is not sufficiently extensive and thereby excludes land which should be considered as part of the Gunville area of the settlement of West Winterslow. The omission of the additional land renders the Plan not justified in this particular regard.</p> <p>2.0 Site Description</p> <p>2.1 The site lies within Middle Winterslow on the south side of the settlement. Witt Road runs southeastwards from the junction of The Common and Gunville Road. It is a lane of approximately 600m. The land is also a cul de sac terminating in two tracks serving more isolated dwellings. Much of the road is a shared surface road although there are some lengths of footpath approximately half way along.</p> <p>2.2 The road is characterised by continuous residential development along the northeastern side of the road. On the southwestern side of the road the frontage development is more sporadic. There is an enclave of a development of 6 dwellings (two terraces of three properties) at Bentley Way. Further along the road lie the properties Applewood Cottage, Dale Cottage, Fernlea, Suncot and Juniper. All except Juniper are sited right of the edge of the carriage way resulting in a strong and very evident building line.</p> <p>2.3 The properties have been developed over many years and show much diversity in age, size, style and appearance. The plot sizes also vary considerably with some properties and their curtilages running parallel to the road. The building line varies along the road with the older properties built close to the road.</p> <p>2.4 It is noted that the entire northeastern frontage of Witt Road was included in the settlement boundary of the previous Local Plan. This explains why there are recent infill plots along the road frontage.</p> <p>2.5 The site, the subject of this representation, is sited at the very northern end of the road on the southwestern side of the road. The site adjoins 1 Witt Road and is partly developed currently accommodating some worksheds. The property No 1 Witt Road has recently been sold and extended. The curtilage of the existing worksheds extends south eastwards to an existing barn which fronts Witt Road.</p> <p>2.6 On the northeast corner of Witt Road at its junction with Gunville Road stands the small Church of St John the Baptist. Just to the south and close to the dwelling No 1 Witt Road there is the Church Hall. Southwards lies the residential development fronting Witt Road.</p> <p>3.0 The Settlement Boundary Review Methodology</p> <p>3.1 In examining the Wiltshire Core Strategy the appointed Planning Inspector concluded that the settlement boundaries defined in the former District Local Plans were out of date. He advised that they should be reviewed without delay in order to ensure that they represent the most up-to-date position in policy terms. The Council therefore committed to reviewing the settlement boundaries through the preparation of the Housing Site Allocations Plan.</p>			

Appendix Q - Schedule of representations

	<p>3.2 The review of the boundaries has been undertaken in accordance with the provisions of the Settlement Boundary Review Methodology. This document sets out the procedures by which the Council has come to devise a methodology which provides a consistent approach to defining settlement boundaries throughout the County. This methodology has sought to meld together the various approaches from the former Local Plans which previously covered the districts of Wiltshire. The Methodology has also had to regard to the approaches of neighbouring Local Planning authorities which have carried out similar reassessment of their settlement boundaries. During the preparation of the methodology appropriate formal and informal consultations were held with relevant stakeholders.</p> <p>3.3 It is noted that the Council is seeking not to include land which relates to the countryside but that it does include land that it 'physically related to the settlement'. It is considered that the interpretation of this latter phrase should not be too restrictive.</p> <p>4.0 The Case for a Further Amendment in the Proposed Boundary</p> <p>4.1 The Salisbury District Local Plan 2011 defined the 'Housing Policy Boundary' which was the term used for what is now the 'Settlement Boundary'. That boundary was tightly drawn around existing buildings in the village and it included the property No 1 Witt Road but none of the adjacent land.</p> <p>4.2 The boundary also enclosed the existing frontage development on both sides of Witt Road and in some cases to some depth behind the frontage. It is noted that the proposed revised boundary maintains the previous alignment and adds one full curtilage at the far end of Witt Road.</p> <p>4.2 In respect of No 1 Witt Road the proposed boundary now includes the workshops and some of the adjacent land and this is supported.</p> <p>4.3 However this representation seeks the inclusion of a modest area of additional land. This proposed inclusion relates well to the existing settlement. The proposed increase in area of the Settlement Boundary in the vicinity of No 1 Witt Road is 0.226ha. There is an area of a further 0.132ha which adjoins the proposed boundary on the road frontage which should also be included within the revised boundary.</p> <p>4.4 This land in question is a smaller area than that already proposed and its inclusion would round off the settlement boundary in this corner of Winterslow. The site relates very well to the settlement of Winterslow in that it is close to the centre of the settlement. It is noted that the site is just less than 100m from bus stops on Gunville Road. The bus services serving Gunville Winterslow are services 87 and 88. Service 87 runs between Andover and Salisbury and Service 88 runs between Winterslow and Andover. There is also a bus service which runs on school days only.</p> <p>4.5 The site slopes gently downhill away from Witt Road. To the southwest there is a large agricultural building. This forms part of the surrounding farmland and would be excluded from the proposed amended boundary.</p> <p>4.6 It is considered that this extended site would make an effective but modest contribution to the settlement if frontage development was facilitated. The application of the Settlement Review Policy should not be too restrictively imposed such that it misses the opportunity to make an efficient and effective use of land.</p> <p>5.0 Conclusion</p> <p>5.1 The revision of the Settlement Boundary in Winterslow is welcomed and supported in respect of the proposed change made thus far. However, the opportunity to include small areas of additional land which are close to the village centre and in a sustainable location should not be overlooked. In this context this representation makes the case that the additional part of this frontage which amounts to 0.132ha should be included within the revised Settlement Boundary as shown on the Representation.</p> <p>5.2 This representation seeks the inclusion of the land shown hatched red on the accompanying plan within the Settlement Boundary. It is a sustainable site which relates closely to the existing built up area of Winterslow.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I can confirm that the above consultation document was considered at a recent meeting by West Knoyle Parish Council. The Parish Council has asked me to point out that due to the settlement strategy set out in Core Policy 1 and the fact that the village has no Housing Settlement Boundary as it is regarded as non-sustainable, the village is at risk of becoming a dormitory village full of elderly people with no younger people around to look out for them. Rural businesses in the area struggle to find employees and local amenities are suffering due to lack of younger attendees/volunteers. Whilst members accept the fact that it would be wholly inappropriate to encourage any large-scale development within the village, the current limitations would appear to prohibit any form of development for local workers and younger families other than via an Exception Policy. The Parish Council would like to see some relaxation in the policies in order to allow some minor low-key development for local employees and young people.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court		Justified
				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>B2 The Southwick Court site 3565 proposal should not go ahead because it is a direct result of the County Council's failure to manage the performance of the building of the correct amount of houses at the development at West Ashton, a situation which they should make an imperative to rectify with those developers and achieve full target on time building rates in accordance with the original plan for West Ashton. It was confirmed at the recent Wiltshire County Council Cabinet meeting (20th June 2017) in front of dozens of residents, parish and town councillors who attended, that proposals such as Southwick Court 3565, and many of the others planned for areas outside the settlement boundary of Trowbridge, are being considered as a direct result of the developers of houses at West Ashton reneging on their commitment to build the correct number of houses within agreed timescales. Indeed, some Councillors quoted figures of over 1000 shortfall for this project, which clearly creates an unfair and unsustainable situation in Trowbridge.</p> <p>It is apparent, therefore, that if the West Ashton site were on target the additional housing developments such as 3565 would not be required or countenanced, and we assert that the County Council needs to take responsibility of rectifying this situation as an imperative, by pressing the West Ashton developer into improving its performance in order to negate the need for the developments we are objecting to.</p> <p>We believe that the failure of the County Council in managing the performance of, and relationship with, this developer shows how the Council is being inadequate in its management of developers and may be failing in its duty of care. Developers, despite the weak assurances by the Cabinet members that this is not the case, may even be manipulating the Council's strategy and approach, evidenced by the provision of planning permission to several sites in Wiltshire that have not yet been developed – some stated by Cabinet as having over 10 years delay. Furthermore, we assert it is WCC's duty of care to taxpayers that they immediately identify what actions can be taken (including legal actions) to achieve the correct level of building with the West Ashton developer, whilst simultaneously and urgently establishing a way forward with other developers with delayed developments to speed up the potential building of these property developments as part of the Trowbridge allocation.</p> <p>In summary, we propose that</p> <ul style="list-style-type: none"> <li>There is a fairer allocation of development sites, relieving Trowbridge of some 400 of the proposed dwellings allocation</li> <li>That you bring into the calculation the 820 additional dwellings proposed by TCC</li> <li>That the West Ashton developer and other latent developments are placed under increased pressure by the County Council as an imperative to speed up the building and to maintain original commitments</li> <li>That 3565 Southwick Court is removed from the plan.</li> </ul>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>B3 The proposed development at Southwick Court 3565 unnecessarily prioritises building on a much-loved Green Field site (which are currently without planning permission), instead of prioritising Brown Field and other sites with existing planning permission yet to be completed. It was clearly stated in the Cabinet meeting on 20th June 2017 that there was a move to ignore sites in the Town with existing planning permission because the Council “could not control” when building on those sites might happen. The excuse given by the member for planning was it was about ensuring the right %’s of different types of land development as per regulations laid down by the Government, but it was not established as fact that these %’s had been applied, nor supported by evidence that Brown Field sites had to be actively ignored in preference to Green Field sites (which would not be logical given the large areas of Brown Field requiring regeneration in the centre of the town). Our understanding is that current Government communications do not require that Green Field sites should be prioritised over Brown Field sites and we propose the Council revisits the allocation and building plan accordingly.</p> <p>Our perception is that, against the wishes of the thousands of people in Trowbridge who value Green Field sites such as Southwick Court 3565, the County Council appears to be unnecessarily receptive to speculative developer pressure to develop those Green Field sites first rather than concentrating their efforts on redeveloping Brown Field sites in the Town (which are in desperate need of regeneration) and other sites in the town with existing planning permission.</p> <p>It is, we believe, fair to say that Trowbridge town centre area is not yet at an acceptable standard for any town, let alone a County Town and harbours many areas requiring urgent regeneration which have been derelict for many years. Where regeneration has been achieved, reasonable results have been evidenced such as with the Sainsbury’s site and the remaining old brewery sites adjacent and with Peter Black’s. These redevelopments have brought employment and housing in harmony, importantly in the middle of the town where it is needed most, not on the outskirts. This policy should be congratulated and prioritised for the remaining areas as it provides a recipe for success that out of town developments will never deliver.</p> <p>The Town Centre Brown Field sites provide excellent areas for starter homes and social housing as it has easy walking links to doctors, schools and shops for low income families who may not be able to afford cars or additional transport costs of living on the edge of the town. Conversely, in our view, any developer proposal for potential purchase and development of local farmland that does not have planning permission for residential development should be dismissed, especially where that land is outside of an external settlement boundary area and where the County, Town and local Parish councils have specifically stated they did not wish to change or develop, such as the Southwick area of which 3565 Southwick Court is part of.</p> <p>It was stated at the Cabinet meeting that this also reflects the policies of County Council, Town Council and Parish Councils but it appears that it is being ignored by the County Council’s own planners. We would like to know why and ask that the correct policy is adhered to.</p> <p>Such areas as 3565 Southwick Court being developed bring no social benefit to the town, and simply increase car traffic to the town centre, the routes to which are already congested and polluted by noise and vehicle emissions.</p>			

Appendix Q - Schedule of representations

	<p>We move that the “responsible people” running the County Council who maintain that they are trying to represent the wishes of the voters of their County, should not countenance speculative “get rich quick” developer pressures at the behest of the local residents. Instead, we believe the CC should support the inclusion of specifically identified sites into the allocation for Trowbridge, all of which are located within the Trowbridge Settlement Boundary as follows:  Former District Council Offices, Bradley Road (70)  East Wing/Trowbridge Hospital/Margaret Stancomb School (300)  Bowyers (250)  Ashton Street Centre (70)  The Pavillions, White Horse Business Park (130)  These amounts add up to an additional 820 additional dwellings, which would negate the need for the development of Southwick Court 3565 and other green field sites, removing the need for local villages to become engulfed into the Trowbridge suburban sprawl. The loss of village separation areas / buffer zones through development is also a strategy that seems to be against policy, but is simply being ignored.  In particular, the Bowyers site should be elevated to a primary category development site for the town of Trowbridge. To borrow a phrase from the heir to the throne “It is like a carbuncle on the face of a much loved aunt”. It has been an ever worsening sight in the heart of the town for over 10 years and sets a very poor impression especially when visitors arrive by train from the more salubrious areas of Bath and Bradford Upon Avon. Yet it has the potential to bring significant economic and social benefits directly to the centre of the town and the high street where shops and businesses are crying out for customers.  Additionally, as raised by me at the Cabinet meeting, the current development plan was produced by WCC in 2015 at a time when Bowyers was being considered for an alternative commercial development, which is no longer the case. Therefore, the Council should be sensible enough to recognise this difference and the site should now be included in the housing development plans for the town as the number 1 priority, and the other planned allocations for Trowbridge amended down in number accordingly. This is also supported by the Trowbridge Town Council’s amended proposals (see Appendix 1)</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1896</a>	<b>Consultee</b> Mr Roger Williams  <b>Person ID:</b> 1127014	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>B4 In relation to house building development proposals, the Council is being “developer led” and not taking proper control of planning and new proposal developments, or cognisance of its own planning policy.</p> <p>The Council’s leader assured residents at the Cabinet meeting on 20th June 2017 that they were following their own planning policy and were supportive and would listen to the evidence against the 3565 proposal and other schemes and assured residents and councillors alike that they were not “developer led”. This was repeated by the member for planning.</p> <p>However, as per our point B2 (above) the evidence suggests otherwise, as was obvious to all who attended the meeting. The inadequate answers by cabinet members, demonstrated that the strategy is driven by the developers because the Council “could not control them” (for example in relation to the case of the West Ashton building programme delays). It was further admitted “There is no point in asking developers for extra money under section 108 as they will just walk away”(see webcam footage on WCC website).</p> <p>Unfortunately, this admission shows the weakness of the strategy and approach taken by Council in relation to developers and should be the subject of an urgent enquiry to ensure tax payers are getting value for money from developers in terms of Wiltshire’s housing development.</p> <p>It was also stated that consideration of the 3565 and other Green Field proposals are as a direct result of the West Ashton developer not building the correct number of houses, nor being fast enough to complete the planned building programme on time, putting the pressure on the Council to find alternatives to keep up with the Government’s requirements.</p> <p>It is, therefore, a reasonable assumption that the County Council’s planning representatives may have been unduly influenced by the recent approaches of speculative developers, who propose that Council choose to prioritise their (the developers’) Green Field sites over others. Failure to effectively manage suppliers (as in the West Ashton situation) would not be tolerated at a high level in a private organisation so why should they be tolerated in a responsible County Council organisation? All this presumably adds costs and is wasting tax-payers money at a time when money is short for front line services and Council Tax is being increased.</p> <p>Additionally, several town councillors articulated how the agreed planning policies of the County Council and Trowbridge Town Council were not being followed, in particular in relation to prioritising Brown Field site development before Green Field development outside settlement boundaries. We are not experts in the policies but seek assurance that the points raised by the councillors are not being ignored and remedial action is being taken to change the approach of Council’s planning department where they are at fault.</p> <p>Several examples were provided about how decisions taken by, and the opinions of, the local Parish Councils and Trowbridge Town Council had been completely ignored in these proposals. Again this is a worrying trend, suggesting Council is acting arbitrarily and not listening to the valuable feedback from grass roots.</p> <p>That the County Council Planning Strategy is in direct conflict with the wishes of Trowbridge Council and the local Parish Councils, as was evident at the Cabinet meeting, suggests to me as a member of the public that the planning activity at the Council may not be performing to the standards to be reasonably expected. Clearly steps must be taken to ensure that there is a more effective and timely management of developers and the processes used to provide the best results for local council tax payers.</p>			

Appendix Q - Schedule of representations

	For example, it was stated at the same meeting that the 2500 page Planning Document about Housing Development doesn't even mention Bowyers. This points to possible negligence, or at least ineptitude, on the part of the County Council and / or their advisors – a point we hope that the Planning Inspectorate will take cognisance of when the time comes.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>B5 Initial consultation on the boundary changes was inadequate – does this breach planning law or regulations and does it indicate inadequate process by the County Council?</p> <p>Having lived in Trowbridge for 14 years, I was shocked to only find out about settlement boundary change proposals within a few yards of my house 1 day before the Cabinet meeting in June, despite the assertions by the County Council representatives that a “full and substantive consultation” had been carried out over a long period of time.</p> <p>Whilst I understand that ignorance is not a defence in law, we consider ourselves well read and active in and amongst local community life. For us and many of the other members of the public who attended the Cabinet meeting it seems, learning about this at a point that was quite late in the consultation process did not provide a reasonable amount of time for a response before the vote by the Cabinet to pass their resolution to progress to the formal development proposal consultation. Indeed we only attended the Cabinet meeting because of a worried neighbour that knocked on our door that day before.</p> <p>At the Cabinet meeting (see the webcam evidence) I gave an example of a road safety project I am involved in in Bath as a School Governor about the way a zebra crossing proposal (a minor development in comparison to this one) was the subject of letters to affected households in the area that might be affected. This was for a minor project.</p> <p>Despite the proposal to turn our road, which is quiet cul-de-sac for 44 years with only 22 houses in it, into a major thoroughfare with up to 720 cars daily using it, there was no written advice issued to our address. This is not evidence of a Council that cares about its residents. Consequently we were totally unaware of the consultations and propose that the Council urgently reviews its methodology of promotion of consultation matters.</p> <p>It was admitted at the Cabinet meeting by the Council that there had been “difficulties” in advertising the consultation and it had even been needed to hold the consultation again because so few people attended the first time. Why was there not wider coverage with advertisements in the press, on local radio, leaflets / letters through the doors of affected properties, etc.?</p> <p>This failure to advertise effectively and engage with the local residents leads us to believe that the Council may have failed in its duty to consult fully with local residents about a significant settlement boundary changes in our area and developments affecting our properties, roads, health, safety, stress and mental wellbeing, as well as our local way of life.</p> <p>Therefore, we propose that additional consultation time is provided for residents and simpler, less complicated documentation is provided at the next stage of consultation when amendments to the proposed plans are considered – both well before the County Council votes on such amendments.</p> <p>We also call for detailed responses to the individual consultation responses that the County Council receives and full publication of these responses, available online and in print at County Hall and other communication points such as libraries and Town Halls with timely and widely publicity.</p>

<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1898</a>	<b>Consultee</b> Mr Roger Williams  <b>Person ID:</b> 1127014	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> No
				<b>Do you consider the draft WHSAP is sound?</b> No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>B6 Increased traffic on local roads near Southwick Court site 3565</p> <p>Traffic ingress and egress into any new development at Southwick Court 3565 will create a significant rise in traffic on local roads, which are already heavily used, as well as increasing pollution on these busy roads.</p> <p>The evidence shows that a development of 180 houses at Southwick Court alone, reflecting current car ownership in this area, would bring at least a quarter of a million additional extra car journeys on already cramped and crowded roads (estimate at average of 720 trips a day = 263,000 per year).</p> <p>Any access via Silver Street Lane to site 3565 via the cul-de-sacs leading off Silver Street Lane would create traffic congestion on minor roads that are already under pressure at peak times, e.g. College Road and Willow Grove (the link between Silver Street Lane and College Road), the exits from Silver Street Lane onto Frome Road and onto Bradley Road, congestion at school times by the entrance to Hazel Grove and Clarendon, etc.</p> <p>Silver Street Lane is already subject to considerable concern about speeding, being used as a rat run in the peak and a race track in the evening. Extra traffic will simply increase the risk, endangering pedestrians and local resident car users alike.</p> <p>In rush hours there is significant queuing on the sections of Bradley Road between the Spitfire Retail Park and the Town Centre. This traffic predominately comes from the direction of Silver Street Lane, North Bradley village, Westbury, White Horse Business Park and West Wilts Trading Estate in the morning into the town.</p> <p>In the evening peak and at weekends there are delays in both directions. Additional traffic feed from Silver Street Lane (which would become an even worse rat run than now) would be untenable. The same applies in the opposite direction out of Silver Street Lane onto Frome Road.</p> <p>Traffic has already increased significantly at weekends due to the success of the Spitfire Retail Park and the one way system requiring all cars to turn left and go through to the roundabout to return down Bradley Road towards Silver Street Lane.</p> <p>Throughout the day and particularly in the evening Silver Street Lane's narrow, dipping and twisting road becomes a race track with cars far exceeding the 30 mph speed limit which makes the risk of additional traffic from the proposed development a serious road safety concern.</p> <p>Silver Street Lane is also a key access point to Hazel Grove where the local primary school is situated. Children and parents would be at increased risk from additional traffic on this road near to the Hazel Grove entrance and the footpath leading into Silver Street Lane from the rear of the school. Parking at school hours is already an issue on Silver Street Lane following parking bans in Hazel Grove.</p> <p>One of the most alarming elements of the proposal is the idea to access any new development at Southwick Court via either (or both) Balmoral and Sandringham Roads, although we are only hearing this as a rumour because the Council's representatives at the Public Consultation refused to provide any information on road access to site 3565 Southwick Court.</p> <p>The turning into Sandringham Road is a sharp turn on an incline with limited vision from the direction of Frome Road because of a significant dip in the road.</p>			

Appendix Q - Schedule of representations

	<p>Sandringham Road then narrows within a few yards of the junction and drivers are presented with a blind bend which is already dangerous. It is manageable with the current limited car flows from the 22 houses in Sandringham Road and the dozen or so which access Windsor Drive via Sandringham Road, but would not be suitable for additional traffic due to the restricted line of sight and the reduced width. Children on bikes also often use the bottom of the road as a play area.</p> <p>Egress from the junction of Sandringham Road onto Silver Street Lane is also not suitable for increased traffic due to the limited sight lines, traffic volume and speed along Silver Street Lane, plus the incline at the point of exit.</p> <p>Sandringham Road and Balmoral Road have been established as cul de sacs for over 40 years – please refer to the notes about these roads and settlement boundaries in Section A of this document which should be read in conjunction with Section B.</p> <p>Given the comments by the member for planning about not getting investment for additional infrastructure from developers, does that mean that the tax-payer would be burdened with additional costs of road access to the development and required changes to access into Frome Road and other necessary road changes? These and other questions about road access arrangements have not been answered as part of the consultation and we request urgent answers so we can comment.</p> <p>Indeed we are under the impression that the Council is somehow hiding this information, as it was not available at the public consultation, but other residents have told us that it exists. We would be glad to receive the information if it is available.</p> <p>If, as is suggested by the Council representatives, there are no designs to be considered for the road access into site 3565, how are we supposed to have a chance to provide comments in a full and open way? For the reasons already stated we request this information to be made available and additional time provided so that we can comment on it. Please also explain about the proposed exclusion from the settlement of the tarmac roadway area outside the last 5 houses at the end of Sandringham Road.</p>
<p><b>Attached files (Please see Objective)</b></p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>As stated in Section A, Sandringham Road, has a history of special requirements in relation to water drainage, with specially designed deep level drainage to cope with the ingress of storm water and sewerage at this point of the estate.</p> <p>There is a winterbourne stream / culvert at the end of the road in the ditch that is the current boundary between the fields of Southwick Court and Sandringham Road. From the Environment Agency map (see Appendix 3) it can clearly be seen as a natural extension of the Lambrok Stream and we believe this should not be compromised or re-routed as it forms part of the natural flood protection for Sandringham Road.</p> <p>Several properties at the lower level of Sandringham Road have been flooded in the past, following rainwater pressure from storm surges. The last time this happened was in 2013 and we attach pictures to show the problem in our garden (see Appendix 2). In addition to the excess rainwater, we suffered an ingress of raw sewage from flooded sewers which was distributed across our property and neighbouring properties, requiring a major clean up by Wessex Water, which took many weeks and at significant cost.</p> <p>It is for this reason we are extremely concerned that WCC has refused us access to the information provided to them by the water authority in respect to the flood plain / drainage / water / sewerage for the potential development at Southwick Court site 3565. We repeat our request under the terms of Freedom of Information for us to be provided with the information and reports from Wessex Water and other agencies involved in advising the County Council and developers about this potential development. Please forward the information we have requested and provide more time for proper and specific consultation on these matters.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I can confirm that Mere Town Council has considered the above document and Proposals for the Revised Settlement Boundary of Mere. Mere Town Council is broadly supportive of the Settlement Boundary Review – Pre-submission which is broadly in line with the suggestions that the Town Council made back in September 2014. Members would like to make one or two amendments though: M8: Southbrook – garden at Orchard House Although members felt that it was consistent to have this garden within the Housing Settlement Boundary, they also felt it was inappropriate for the area to be within the Housing Settlement Boundary as it contains the site of Southbrook pond which is an important drainage/water holding pond for the Southbrook area in wet weather times. The Town Council would therefore like this garden area to be excluded from the Housing Settlement Boundary.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1909</a>	<b>Consultee</b> Mr George Bunting Chairman  Hilperton Gap Action Group  <b>Person ID:</b> 895670	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> Yes
		<b>Person ID:</b> 895670	<b>Do you consider the draft WHSAP is sound?</b> No	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy	
Please identify the policy, paragraph, table, figure or site to which you are referring.	H2.3 Elizabeth Way			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>These representations are from the Hilperton Gap Action Group, a grassroots organisation representing the views of a large segment of the community in Hilperton village and eastern Trowbridge. Our particular interest is in SHLAA sites 263 and 297 (in the Hilperton Gap west of Elizabeth Way) but many of our objections that the Draft WHSAP is unsound apply more widely.</p> <p><i>[see map in attached full report]</i></p> <p>These comments are in addition to those we put forward at the informal consultation stage which we consider you have disregarded.</p> <p><b>We say that</b> the Draft Wiltshire Housing Site Allocations Plan ('your Plan') is unsound for the following reasons;</p> <ol style="list-style-type: none"> <li>1. Your Plan is not justified because your method of calculating housing requirements for HMAs overestimates the requirements for new sites and contains errors.</li> <li>2. Your method of disaggregating housing needs within HMAs is outdated and is not positively prepared.</li> <li>3. Your treatment of 'windfall' completions is not justified and unrepresentative of reality on the ground.</li> <li>4. You have failed to encourage use of brownfield sites, inconsistent with national policy.</li> <li>5. You have made unrealistic assumptions, which are not effective, on developer contributions for necessary supporting infrastructure.</li> <li>6. You have included a SHLAA site with unregistered land which is not effective.</li> <li>7. You have not justified why completion of a long planned urban extension to Trowbridge has now been delayed beyond ten years.</li> <li>8. Conflicts between your Plan and Wiltshire Core Strategy settlement policy and recently confirmed settlement boundaries are not justified.</li> <li>9. You have ignored Planning Examination findings such that it is not positively prepared.</li> <li>10. You have made unrealistic assumptions on building density which are not positively prepared.</li> <li>11. You have not justified the allocation of site 297 for housing because you have failed to declare in your plan that you have a vested interest in allocating agricultural land that you own for development.</li> </ol> <p>We have expanded on these objections in more detail below.</p> <ol style="list-style-type: none"> <li>1. <b>Your Plan is not justified because your method of calculating housing requirements for HMAs overestimates the requirements for new sites and contains errors.</b></li> </ol> <p>We refer to the WHSAP Pre-submission draft plan:</p>			

*[see table in attached full report]*

- Cell E3 contains an error and should read 895 (910 plan allocation less 15 already in commitments). Cells F3 and G3 therefore contain incorrect totals
- The total (col. G) Wiltshire surplus against requirement is 4,629 homes (inc. the 100 you have omitted at cell E3) or 11.3% of the requirement over the plan period. This translates into five year land supply estimates in excess of the requirements of national planning policy in N&W Wilts HMA in every year of the plan.

*[see table in attached full report]*

**We say** that it is clear that WC is using this exercise to engineer objectives beyond those required of a housing site allocations plan and in pursuit of an ambition, unrelated to local housing requirements, to create a large urban settlement.

In a June 2017 Planning Appeal the Planning Inspector found in any case that the ‘Liverpool Methodology’ whereby a housing shortfall in one year should be made up over the remainder of the plan period, is appropriate to apply in Wiltshire. This further supports our representation that housing sites have been over allocated.

An example is the allocation of land for a further 800 homes to Trowbridge (in addition to the 4,790 completed and committed and a further 1,000 ‘delayed’) in spite of these being in excess of HMA housing needs. This would increase the size of Trowbridge by over a quarter in just 15 years from 2011 - 2026.

*[see table in attached full report]*

Plus a further 1,000 (‘delayed’ at Ashton Park) presumably within a further five years providing a further 6%. So in 20 years Trowbridge would expand by one third.

**We say that** this rate and scale of expansion is unwarranted, not properly thought through and therefore unsound.

Changes to the Plan that we propose:

- Correct the error in cell E3 of Table 4.7 WHSAP and associated calculations elsewhere in the Plan.
- Adjust plan allocations 2017-2016 in the N&W Wilts HMA to reflect more accurately the actual need for sites to provide a five year supply plus a buffer by removing SHLAA sites 263, 297 and other sites not required in the current plan period that would create unsustainable demand on infrastructure and services.

**2. Your Plan is not positively prepared because your method of disaggregating housing needs within HMAs is outdated and dysfunctional**

DCLG Planning Guidance says:

“Needs should be assessed in relation to the relevant functional area, ie housing market area, functional economic area in relation to economic uses, or area of trade draw in relation to main town centre uses.”

However, you have disaggregated HMA housing needs firstly into 19 Community Areas (conceptual entities invented in 1998 and largely based on ancient settlement patterns). These CAs are then further split into towns and their rural hinterlands, a total of 37 parcels each averaging 6 miles square.

- **We say** that these sub-Community Areas are far too small and are an unsound basis to define where homes are needed. Even since 1998, working, shopping and recreational patterns have changed substantially and long gone are the days when most people looked to their immediate local town for these needs, let alone to a rural village hinterland. The single most important remaining determinants of where people would like to live are where they work and how they travel to it. The Travel To Work Area is the most robust and widely acknowledged descriptor of this pattern. This defines an area where 75% of people work and live in the same area. We show below the Trowbridge & Warminster TTWA superimposed on the HMAs and your Community Areas. We say that this clearly demonstrates that you should calculate housing need for larger units of geography than you have chosen.
- **We say** that micro-disaggregating housing needs assessment as you have done produces perverse and unsound results. For example
  - Trowbridge CA remainder is projected to provide 113 homes more than is needed in the plan period.
  - But Trowbridge (town) is deemed to be under supplied and you have allocated sites for 800 homes in the adjacent Trowbridge CA remainder.
  - Thus Trowbridge CA remainder is providing  $800+113=913$  homes.
  - But your unsound and perverse analysis concludes that only 800 will be contributed against the requirement for Trowbridge.

*[see map in attached full report]*

**Changes to the Plan that we propose:**

- a) Disaggregate housing needs assessments in the Plan down to HMAs only. The market, controlled by the planning process, will ensure the most efficient distribution of housing to meet demand at the micro level.

**3. Your Plan is not justified because your treatment of ‘windfall’ completions is inadequate and unrepresentative of reality on the ground**

You have included an allowance for windfall sites based on the NPPF definition of “Sites which have not been specifically identified as available in the Local Plan process”. You have anticipated that 3,633 homes will be delivered in Wiltshire in this way during the plan period compared with 2,331 (inc. 100 missing in error) from WHSAP site allocations, i.e. in your 4,500 pages of formal stage WHSAP planning documents you identify where fewer than 40% of the required homes will be sited. Just one page of analysis purports to explain how over 60% of Wiltshire’s new homes will be provided.

- **We say** that that this cursory analysis of windfall is deficient and unsound, both relatively to the site allocations analysis and in absolute terms.

We object that your methodology:

- a) relies on ‘standard delivery rates’ derived from experience in 2001-2008, i.e. you are projecting delivery to 2026 from data that will be up to 25 years old!,
- b) uses a single set of delivery rate assumptions for the whole of Wiltshire and does not represent inevitable variation that will exist at least down to HMA level.

**We say** that your methodology for calculating windfall is based on obsolete assumptions, is too generalised and is therefore unsound.

**Changes to the Plan that we propose:**

- a) Provide an analysis of windfall potential at a comparable level of rigour to your analysis of SHLAA sites.

**7. Your Plan is not justified because you have failed to explain why completion of a long planned urban extension to Trowbridge has now been delayed beyond ten years**

Housing has been proposed at Ashton Park for nearly twenty years and WC and its predecessor council have been planning large scale housing provision at Ashton Park for over ten years. This scheme has been worked up in great detail (and thousands of hours of officer time) as a strategic urban extension to Trowbridge, i.e. not just to provide housing but also addressing the associated needs for employment, roads and transport, education, healthcare and the environment in a holistic way.

The community has been involved in numerous consultations over the years about this, culminating in the adopted local plan which stated (Core Policy 59), "At Trowbridge, approximately 5,860 dwellings will be delivered and will involve an area for strategic growth to the south east of the town (Ashton Park), which extends towards the A350 to the south and the railway line to the west."

This strategic urban extension (with all its associated infrastructure) is thus the largest and most significant development project in Trowbridge for many years and we would expect to see (among your 4,500 pages of WHSAP reports) a detailed plan for how this housing provision will be delivered and an exposition of the impact it will have on the town. However, you make only superficial references to the scheme in discussion of other SHLAA sites. You have merely added an assumed number of dwellings at Ashton Park into your calculations as if this strategic scheme were no different from an aggregation of smaller dispersed sites.

**We say** that your plan is unsound because you have not properly taken account of the strategic nature of the Ashton Park Urban Extension and its associated infrastructure upon which much development elsewhere in the town will rely.

In a single paragraph you write off 1,000 dwellings which until as recently as December 2016 were planned for Ashton Park before 2026, as now undeliverable in the plan period.

"One main reason for a shortfall in land supply is the complexity and consequent delay developing Ashton Park, a south eastern extension to the town. 1,600 dwellings will be built on this site in the plan period and a further 1,000 post 2026; rather than first envisaged that the whole of the allocation would have been completed in the plan period. This can be seen to account for 1,000 of the 1,220 dwelling shortfall."

Based on this one paragraph you propose entirely to reshape Trowbridge to the NE and SW by major building on other greenfield land.

- You fail to provide any details of why this delay is expected.
- You fail to explain why you think that 1,000 homes will not be delivered and we suspect that this round number has been plucked out of the air.
- You fail to explain why 'complexities' at Ashton Park green fields (where a huge amount of strategic planning problem-solving effort has been applied) apparently can be brushed aside in respect of green field to the NE and SW of the town.
- You fail to explain why you have not progressed planning application 15/04736/OUT in over two years since it was submitted.

You have hinted that some of the delay is due to new evidence concerning bats. The Planning Inspector (June 2017) found this not to be the case and said;

Appendix Q - Schedule of representations

	<p>“the presence of bats, including the potential effects upon the SAC and the Bechstein bats maternity roosts were all considered by the Core Strategy inspector. I therefore do not consider that the Council’s trajectory needs to be amended in this regard.”</p> <p>It is clear that the presumed delay in delivery is because the major developer (Persimmon), having not long ago completed their adjacent major Castlemead development, do not see sufficient further demand forthcoming to take Ashton Park homes to market at a faster rate. This is indicated by correspondence from the developer seen by the Planning Inspector.</p> <p>We say that it is perverse and unsound to allocate new greenfield land around Trowbridge for housing for the reason that a principal developer chooses not to build houses on land already allocated because he does not believe he can sell them.</p> <p>You claim that “the plan allocations provide choice and flexibility as well as add to supply”. However this is a hollow claim:</p> <ul style="list-style-type: none"> <li>• You cannot demonstrate that Ashton Park and SHLAA sites 263 and 297 would be built within the plan period by competing developers offering a choice of homes.</li> <li>• There are more similarities between the sites than differences. All are on urban peripheries, all proposed for medium to low density housing, all are distant from facilities and all have similar road links.</li> </ul> <p><b>We say</b> that the addition of a greenfield housing site allocation in the Hilperton Gap cannot be shown to expand choice in any significant way.</p> <p><b>We say</b> that your plan is unsound because you entirely fail to explain why 1,000 houses cannot be delivered at Ashton Park but can be delivered at Elizabeth Way and Southwick.</p> <p><b>Changes to the Plan that we propose:</b></p> <p>a) Add an additional section to your Plan explaining in detail why Ashton Park Urban Extension cannot now be fully delivered in the Plan period and why none of these constraints applies to the other greenfield sites you have proposed for housing around Trowbridge.</p>

			Effective	
			Consistent with national policy	
<p><b>4. Your Plan is not consistent with national policy because you have failed to encourage use of brownfield sites</b></p> <p>a) NPPF Core Principle 8 requires planning authorities to “Encourage effective use of land by reusing Brownfield land.” and in Topic Paper 3 you state that “during the Wiltshire Core Strategy period (2006-2015) delivery of brownfield sites have contributed 29% of all housing completions”. You go on to note the much greater emphasis on brownfield in national policy, particularly in the Housing and Planning Act 2016 and the Housing White Paper of February 2017.</p> <p>However, beyond these token acknowledgements, your plan entirely fails to consider any measures to encourage effective use of brownfield, especially in the principal settlement of Trowbridge which is blighted by acres of derelict former industrial land. We object that key documents fail to address brownfield properly or at all:</p> <ul style="list-style-type: none"> <li>• WHSAP Sustainability Appraisal (SA) (296 pages) makes only a one sentence reference to remediation of brownfield in town centres.</li> <li>• The 217 page WHSAP Sustainability Appraisal Report Annex 1 A9 Trowbridge Principal Settlement makes no reference whatsoever to reusing brownfield in the town.</li> <li>• Nor does the TEP Landscape Assessment Part 2.</li> <li>• In the 112 page Community Area Topic Paper – Trowbridge even the word ‘brownfield’ does not appear once!</li> <li>• Topic Paper 4 - Developing Plan Proposals claims that “There are significant brownfield opportunities that are a priority for redevelopment, although this source of housing land is ultimately a modest proportion of overall supply”, failing to understand that while this may be true of the county as a whole it is far from true for the specific urban context of Trowbridge.</li> </ul> <p><b>We say that</b> you have comprehensively failed to fulfil the requirements of NPPF Core Principle 8 to encourage effective use of land by reusing brownfield land and as such your plan is unsound.</p> <p>b) By 31 December 2017, i.e. in parallel with the approval of the WHSAP, you are obliged to produce a register of brownfield sites, some of which can automatically gain permission in principle to develop. However there is no evidence that you are co-ordinating these two closely interdependent pieces of work.</p> <p><b>We say that</b> your plan is unsound because it fails to take specific account of the upcoming publication of the register of brownfield sites.</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>				

Appendix Q - Schedule of representations

	<p>c) You say that as a general county-wide method you have assumed brownfield sites to be a component of windfall which is only calculated for whole HMAs. However, brownfield sites are obviously much more concentrated in urban areas and Trowbridge (as a former manufacturing centre now de-industrialised) has a disproportionately high quantity of urban brownfield, in particular the town centre Bowyers site and surrounding parcels (capacity up to 200 homes)</p> <p>Further, your windfall calculations include a factor for non-delivery. However, the rate of delivery will be higher for brownfield where there will be in many cases approval in principal to develop.</p> <p>d) The Wiltshire Core Strategy says (bullet point 2) in respect of Trowbridge that, “Town centre growth should be a priority”</p> <p>but you take no specific account of the significant Bowyers brownfield site, which is able to deliver substantial short-term residential development.</p> <p><b>We say that</b> your treatment of brownfield as a component of windfall, your inappropriate delivery factoring and disregard for urban concentrations is unsound.</p> <p>changes to the Plan that we propose:</p> <p>a) Prepare a new paper, co-ordinated with work you are required to carry out to prepare the Brownfield Land Register, properly to analyse and account for the contribution brownfield can make to the provision of housing sites, especially in de-industrialised urban areas.</p> <p>In the light of assessed brownfield availability, recalculate (across all your Plan documents) the need for new green field space, particularly around Trowbridge urban area.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4723700</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We wish to be available to the Inspector to expand and explain, with further detailed evidence and as he/she may require, the issues that we have raised and the changes to the Plan that we argue for.</p>

			Effective	
			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally complaint / sound.</b>	<b>6. Your Plan is not effective because you have included a SHLAA site with unregistered land</b>			
	<p>You say in your site deliverability report that “where the land was not registered or where the land title was pending were recorded as having an unknown availability and therefore were removed from further consideration”</p> <p>However, SHLAA site 263 (Land west of Elizabeth Way, Trowbridge) includes unregistered land, indicated on the Land Registry cadastral map by the absence of an Inspire –ID reference number and the absence of a registered title at HM Land Registry.</p> <p><i>[see map in attached full report]</i></p> <p><b>We say that</b> you should remove SHLAA site 263 from the Wiltshire Housing Site Allocations Plan because a substantial portion of this site (south of Middle Lane) is not registered at HM Land Registry. This site should not have been considered at all because you were told by the developer offering it that it is in “Multiple or <u>unknown</u> ownership”.</p> <p>Changes to the Plan that we propose:</p> <p style="padding-left: 40px;">a) Remove SHLAA site 263 from allocation for housing.</p>			
<b>11. Your plan is not justified because you have failed to declare in your plan that you have a vested interest in allocating agricultural land that you own for development</b>				
<p>SHLAA site 297 (approx. 2.4 ha) is owned by WC and has been enjoyed for community use for many decades. You fail to mention anywhere in the Draft WHSAP that you own this land and stand to gain about £2.5m from a change of use from agriculture to housing.</p> <p>In fact, since the first SHLAA call for sites in 2012 (when you offered the site anonymously) we are not aware that you have ever declared this conflict of interest.</p> <p><b>We say that</b> you must publicly declare this vested interest, justify why you may potentially dispose of this community land to a private sector developer and enable proper accountability for its future use. At least until this is properly completed we say that you should withdraw SHLAA site 297 from your plan.</p>				

Appendix Q - Schedule of representations

	<p><b>Changes to the Plan that we propose:</b></p> <p>a) Add a statement to your Plan declaring that your interest in SHLAA site 297, the amount of money you stand to gain from development and the process you intend to follow to gain community approval for disposing of it.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4723700</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We wish to be available to the Inspector to expand and explain, with further detailed evidence and as he/she may require, the issues that we have raised and the changes to the Plan that we argue for.</p>

Appendix Q - Schedule of representations

Comment ID:	1914	<b>Consultee</b> Mr George Bunting Chairman  Hilperton Gap Action Group  <b>Person ID:</b> 895670	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b> Yes
		<b>Person ID:</b> 895670	<b>Do you consider the draft WHSAP is sound?</b> No	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy	
Please identify the policy, paragraph, table, figure or site to which you are referring.	H2.3 Elizabeth Way			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally complaint / sound.</b>	<p><b>8. Your Plan is not justified because it conflicts with Wiltshire Core Strategy settlement policy and recently confirmed settlement boundaries</b></p> <p>You have confirmed settlement boundaries – and then ignored them. The Wiltshire Core Strategy – the adopted local plan – determines that, (para 4.13) “The settlement boundaries of the Principal Settlements, Market Towns, Local Service Centres and Large Villages, as defined by former District Local Plans, will be carried into this strategy and retained. These settlement boundaries will be reviewed as part of the Wiltshire Housing Site Allocations and Chippenham Site Allocations DPDs, as set out in the council’s Local Development Scheme, in order to ensure they are up to date and can adequately reflect changes which have happened since they were established.”</p> <p>(para 4.15) “At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within settlement boundaries.”</p> <p>Settlement boundaries were fixed in 2016 after a two year process of review culminating in formal approval by Wiltshire Council. The Council was offered an option to move land west of Elizabeth Way from Hilperton village into Trowbridge town (Scheme 25), see below.</p> <p><i>[see map in attached full report]</i></p> <p><b>This proposal was specifically rejected</b> by Wiltshire Council and the land west of Elizabeth Way, it was explicitly decided, will remain in Hilperton.</p> <p>You have confirmed this decision in Wiltshire Housing Site Allocations Plan.</p> <p>In August 2017 a planning appeal in respect of another site near Hilperton Large Village was dismissed because:</p> <p>“21. I therefore conclude on this issue [the suitability of location for dwellings] that the proposal would not accord with policies CP1 and CP2 in terms of its location outside of the defined limits of development.”</p> <p>(The other reasons for dismissal were that para.47 of the NPPF did not apply and the development would cause unacceptable harm to the character of the area).</p>			

Appendix Q - Schedule of representations

**We say that** your plan is unsound because you (a) have restated that Trowbridge town will not incorporate part of Hilperton, (b) have made it a point of planning principle that development in Large Villages will focus on small sites, and yet (c) have proposed sites 263 & 297 (totalling 20.5ha) which would involve development on greenfield outside the Trowbridge principal settlement and within the boundaries of Hilperton Large Village.

**Changes to the Plan that we propose:**

- a) Remove SHLAA sites 263 and 297 from allocation for housing.

**9. Your plan is not positively prepared because you have ignored Planning Examination findings the basis for which have not changed**

Over ten years ago the Planning Inspector determined;

“2.2.48 I appreciate that the proposed Hilperton Relief Road is intended to cross this land [the Gap] broadly from north-west to south-east. Although the precise alignment of the road is not formally before me, a draft scheme has been drawn up and was presented to the inquiry. From this and my own observations, I cannot imagine that substantial earthworks would be needed to accommodate the road, wherever its precise route lay, so that its impact in the landscape might not be great. In these circumstances I do not believe that it would, if built here, appear as a more convincing boundary to the town than the existing development.

2.2.49 An alternative boundary to the town policy limit further to the east would enable development to take place on the land so enclosed. This would extend Trowbridge into open land having a reasonably pleasant appearance and would in my opinion harm the semi-rural character and appearance of the area as open fields were replaced by built development of one form or another. It would also erode the gap between Trowbridge and Hilperton.”

(The settlement boundary has been re- confirmed by WC in 2017)

In 2009 when the West Wiltshire District Plan was still adopted policy (R5), the Council sought (PIC129) “to bring forward a new recreational allocation nearer and more accessible to the people of Trowbridge ... There are opportunities to make better use of urban fringe locations to increase access to the countryside [and] maximise access to the countryside for active and passive recreation.”

*[see map in attached full report]*

The Planning Inspector required you to publish an explanation of how and why this policy has not been carried forward in the Core Strategy. You have failed to do this.

**We say that** your current plans should take account of the findings of Planning Examinations where the basis of these findings has not changed.

**Changes to the Plan that we propose:**

- a) Add a section to your Plan to meet the requirements of the Planning Inspector.

**Attached files (Please see Objective)**

4723700

**If your representation is seeking a change, do you**

We wish to be available to the Inspector to expand and explain, with further detailed evidence and as he/she may require, the issues that we have raised and the changes to the Plan that we argue for.

<b>consider it necessary to participate at the oral part of the examination?</b>

Please identify the policy, paragraph, table, figure or site to which you are referring.		Land on the south side of Harnham Rd			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing as a private resident, in respect of the above planning application. I have seen reports and comments on this proposal in The Salisbury Journal.</p> <p>There is land on the south side of Harnham Rd which links with Netherhampton Road which could be developed for people in need of housing including social housing. I would support this, provided there is adequate green space and footpaths. There are genuine concerns re infrastructure but, in my opinion we need to put the needs of those without adequate access to housing before concerns re traffic etc expressed by those who are already sitting comfortably in their own homes. There is a need for better public transport (buses and cycle lanes) locally and this would need to be integrated into any new housing development. We have a ring road of a kind but no ring road bus service which could link Harnham with Netherhampton with Wilton etc. But there are other possibilities including a local congestion charge within the ring road to reduce the number of local journeys made into the city.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Here are my concerns regarding the proposals to develop housing in Trowbridge. I live in the area of Church Lane and Southwick Court and am concerned about the plans to develop sites 1021, 3260 and 3565.</p> <p>The proposed housing allocation for 6,000 new homes identified for Trowbridge is too high compared with the allocation for other locations in Wiltshire towns and villages. Trowbridge should not carry the development burden for Wiltshire. Ashton Park already has 2,000 houses built with 2,600 further to be built by 2026. A two year delay caused by a debate over bats in the woods means the extra housing will not be built by the deadline. The new site proposals, identified in the consultation documents are to meet this shortfall.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Existing empty buildings and sites in the town where planning permission has lapsed should be upgraded and developed rather than use open this countryside. The Trowbridge Area Core Strategy makes no mention of the much needed development of the near empty town centre. The council has discounted a number of previously developed brownfield sites on the basis that they are within the existing settlement boundary. Potential housing sites including Bowyers, the old library and former site of West Wiltshire offices on Bradley Road have not been included in the Core Strategy. If these sites had been included, the proposed development of open countryside sites would not be needed. The question is: why are these sites not being developed before open countryside is touched? It would seem that Greenfield sites are preferred over the many brownfield sites in the town. This is not sustainable development but “developer friendly sites”. It appears that Wiltshire Councillors, none of whom live in Trowbridge, have not taken into consideration the value to the people of Trowbridge of open countryside on the outskirts of the town.

		Person ID: 1106467	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.4 Church Lane			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Trowbridge already has traffic congestion problems. Public transport and safe cycling is already minimal. Increased traffic will conflict with the areas low carbon energy proposals. The proposal to build 200 houses on sites 3565, 3620 and 1021, given that most houses have more than one vehicle, will mean further traffic particularly at peak times on the already congested A361 Frome Road. At peak times the traffic is already slowed by the volume going to the college at the traffic lights; and then to the school and town centre. The traffic sensing equipment in place over the summer will give an unrealistic measure of movement given the reduction during schools' and others holiday period. Further access points from the Frome Road to these proposed sites will only make matters worse, even with a change in the current speed restrictions. There is no evidence to justify the Council's view that sustainable development can be made on this side of the town given the current infrastructure or setting.</p> <p>Given there are proposals to also develop site 3565, there is a distinct possibility for a 'rat run' with vehicles from the south east of the town cutting through to and from Bradley Road, to avoid the queues at the traffic lights at College Road and Frome Road, in order to access Bath or other areas to the west of the town if these sites are joined by a through road.</p> <p>The increased traffic will impact on air quality in the area with increased carbon emissions, greenhouses gasses and noise pollution. The increased traffic will also impact on the village of Rode in Somerset on the A361, which narrows considerably through this part of the village, with housing close to the road.</p> <p>Southwick Country Park is well used by local people. The Park is also used for running and parking along the Frome Road when the car park is full often means traffic delays.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>In 2014, I objected to the Ridgeway Farm planning application for 29 nine houses when it was submitted to (and rejected by) Wiltshire Council and to my mind, the principle objections remain the same:</p> <ul style="list-style-type: none"> <li>• the strain on the village drainage and sewage system which is already inadequate for the number of properties it attempts to support.</li> <li>• Increased flooding risk to Tetbury Lane and the village as a whole. In the time we have lived in the village we have witnessed Tetbury Lane flooding on several occasions during periods of heavy rainfall. Water actually “fountains up” out of drains as they fail to cope with the volume of water. Walking our children along the lane to school we have been drenched by passing traffic as vehicles drive inconsiderately fast through puddles and surface road water. Any new development will add both to the surface water on areas of tarmac as well as the inadequate sewerage system which fails to cope in periods of heavy rain.</li> </ul> <p>Crudwell still has severe flooding problems which have not yet been completely addressed, it remains a major concern to people who live in properties around the Swillbrook which runs through the centre of the village. Many have experienced significant damage to their homes in recent years both through surface water and raw sewerage and I believe surface water from the proposed site would only make this situation worse. Many homes - including in The Butts cul de sac where I live, already need non-return valves to stay safe from sewerage flooding until the excess over capacity subsides.</p> <p>It is vital that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind – please re-consider Crudwell.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1939</a>	<b>Consultee</b> Mrs Charlotte Bullock  <b>Person ID:</b> 1131233	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to register my concerns about the proposed allocation of an additional 40 houses to the village of Crudwell on the Ridgeway Farm site as detailed in the draft Wiltshire Site Allocations Plan.</p> <p>I have lived in Crudwell for five years and understand from locals that there have been a number of new build housing projects in recent years, as a means of sustaining the viability of the village. With this sympathetic approach, the addition of small numbers of houses every few years, the character of the village has not been spoilt and the Conservation area has not been threatened.</p> <p>I am not against the present development of 10 houses on the footprint of the old farm yard as it is certainly better than what was there before (the landowner having chosen to leave the buildings fall into disrepair and deteriorate), it made good use of an existing "brown field" site and is of a scale consistent with other recent developments in the village. However against this backdrop, I am shocked to see the draft allocation of an additional 40 houses on this site which was previously deemed unsuitable.</p> <p>I also do not think that the allocation is justified when you look at your own guidance or notes within the Site allocations Plan. This states that housing sites will only be allocated where there is a strategic priority to do so. From the data available, the Site Allocation Plan currently results in an oversupply of some 4,300 dwellings to 2026 when you take into account past completions with deliverable commitments and windfall sites; even excluding windfall sites, the oversupply is still 2,200 across the housing market area. More specifically, the Site Allocations Plan results in an oversupply of some 100 homes in the Malmesbury Community Area; Wiltshire Council also has a history of oversupply of dwellings - in eight of the last ten years, more homes have been built than planned and over that period the oversupply has been over 140% of target.</p> <p>On that basis there is no strategic need or justification to allocate new homes in Crudwell and the Draft Site Allocations Plan should not do so. I am also concerned that the site size / boundary of the Ridgeway Farm Development encompasses an area far greater than is required - even for 40 homes - so I question why that is the case and would like it reviewed.</p> <p>As there is no immediate strategic need for any housing allocations at Crudwell, I would like to see the Neighbourhood Plan group given the opportunity to consult and engage with the local community and businesses to determine the scale and type of housing need in Crudwell; to examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity. The consultation will also help determine from local businesses what their needs might be to enable them to sustain and expand employment opportunities going forward. Where are the residents of these 50 (10 + 40) houses going to work? Being in a village with poor public transport links, they will all have at least one car.</p> <p>Policy 1 of the Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", given that we have circa 250 homes in Crudwell, I do not see how an additional 40 homes on top of the 10 already being built - a staggering 20% increase overall - even falls within Wiltshire Councils own Core strategy.</p>				

Appendix Q - Schedule of representations

	<p>This site allocation if allowed to stand would, in my opinion, completely change the character of the village and undo many years sensible and sensitive development supported by the Parish Council and the planning teams at Wiltshire Council. I am not anti-development but I do favour sensible, incremental development.</p> <p>It is vital that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind – please re-consider Crudwell.</p>

<b>Comment ID:</b>	<a href="#">1940</a>	<b>Consultee</b> Mrs Lindsey Wood Clerk	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		Kilmington Parish Council  <b>Person ID:</b> 468232		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Kilmington			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I can confirm that the above consultation document was considered at a recent meeting by Kilmington Parish Council. The Parish Council has asked me to point out that due to the settlement strategy set out in Core Policy 1 and the fact that the village has no Housing Settlement Boundary as it is regarded as non-sustainable, the village is at risk of becoming a dormitory village full of elderly people with no younger people around to look out for them. Kilmington has a village school that is in imminent danger of closing because there are very few young people left in the village. Rural businesses in the area struggle to find employees. Whilst members accept the fact that it would be wholly inappropriate to encourage any large-scale development within the village, the current limitations would appear to prohibit any form of development for local workers and younger families other than via an Exception Policy. The Parish Council would like to see some relaxation in the policies in order to allow some minor low-key development for local employees and young people.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">1941</a>	<b>Consultee</b> Peter Little  <b>Person ID:</b> 1131243	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am expressing concern regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Site Allocation Plan.</p> <p>Together with the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings).</p> <p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so. However, the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell.</p> <p>A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p> <p>Policy 1 of Wiltshire’s Core Strategy states that “Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities”, but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So, this aspect of the Plan is not consistent with the Strategy.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met</p> <p>Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan.</p> <p>Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell having taken full account of parishioners’ wishes, and having examined carefully and fully the environmental and infrastructure constraints and options.</p> <p>Crudwell in not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am expressing concern regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Site Allocation Plan.</p> <p>Crudwell Primary School is already greatly over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options.</p> <p>Crudwell in not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	As a resident of Crudwell, I would like to register my concern about the proposal to build 40 new homes on the Ridgeway Farm site. The site has already received permission to build 10 homes which are currently under construction, however, if the proposal for a further 40 homes is passed then it represents an almost 20% increase to the existing housing stock in Crudwell and will severely impact the village ambience. I understand that the Draft Site Allocations Plan states that housing sites will only be allocated to villages where there is a strategic need to do so but as the Plan also forecasts an oversupply in the Malmesbury Community Area this surely means that Crudwell does not fulfil that criteria. I also understand that there is a similar level of oversupply forecast across the wider housing market area in North and West Wiltshire.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Probably my greatest concern relates to the infrastructure. Salisbury is creaking at the seams, and has been for a long time, when it comes to the road network. Due to the geography of the area and the confluence of the 5 rivers, Salisbury is at the centre of a major intersection for the A338, A30 and A36, with undoubtedly the most dated road infrastructure in the county. The A3094 suffers from a bottleneck at both ends, the Wilton Wall traffic light junction and the Harnham gyratory, and struggles with existing traffic levels let alone the additional traffic associated with another 750 to 1300 dwellings! The infrastructure is not in place and there do not appear to be any plans of substance to provide it. I do not feel these two sites are supportable at the current time.

Please identify the policy, paragraph, table, figure or site to which you are referring.		Salisbury - Netherhampton Road			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>As a long-time resident of the Harnham area of Salisbury, 25 years, I would like to provide you with feedback on the proposed Wiltshire Housing Site Allocation Plan, pertaining to this area of Salisbury, namely H3.1 &amp; H3.3</p> <p>I am not in a position to comment on the technicalities of the Plan and whether they are legally compliant but would like to comment on practical considerations.</p> <p>The practical effect of backing these two site is to extend the boundary of Salisbury westwards. Although H3.1 and H3.3 are not within the boundary of Netherhampton Village, they fall under the scope of Netherhampton Parish Council and will bring closer the day when Netherhampton Village loses its identity and becomes just another area of Salisbury. The boundary of Salisbury needs to be carefully controlled so as to maintain the character of the City as it is at present.</p>

<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>LAND AT UNDERHILL NURSERY, MARKET LAVINGTON</p> <p>On behalf of our client, Castlewood Property Ventures Ltd., we write to provide representations to the pre-submission draft Wiltshire Housing Site Allocations Plan consultation. The landowners for the site have also prepared a separate representation, which confirms their intention to work in partnership to deliver a holistic development, which allows for a number of different vehicular access options. This response has been prepared with regard to our client's land interests at Underhill Nursery, Market Lavington. Our client's site is located outside of, but adjoining, the existing settlement boundary of Market Lavington. This settlement is a Local Service Centre, situated within the Devizes Community Area and located in the East Wiltshire Housing Market Area (HMA). This representation sets out our concerns with the approach taken towards the allocation of housing sites and overarching strategy set out within the draft Wiltshire Housing Site Allocations DPD. The scope of these representations is however focused on the proposed strategy for the East Wiltshire HMA, the Devizes Community Area and Market Lavington specifically. Accordingly, any comments or observations made are done so without prejudice to any future representations.</p> <p>The Intention of the DPD and Spatial Strategy</p> <p>The spatial strategy within the DPD is, in summary, to allocate enough housing sites to fulfil the 'residual' housing requirement set by the 2015 Wiltshire Core Strategy in each Community Network Area. For the Eastern HMA, further housing allocations are identified in the draft Plan at Tidworth (where 270 dwellings are proposed at Empress Way, Ludgershall). A number of other allocations are proposed at Market Lavington; Southcliffe (15 units), East of Lavington School (15 units) and Underhill Nursery where a further 50 dwellings are proposed at Allocation Policy Ref. H1.2.</p> <p>The second bullet of paragraph 1.1 of the draft Plan states that its purpose is to;</p> <p>"Allocate new sites or housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three HMAs over the plan period to 2026."</p> <p>Paragraph 1.4 of the draft DPD then goes on to reference the Wiltshire Core Strategy's intention to;</p> <p>"...ensure a sufficient choice and supply of suitable sites through the plan period in accordance with national policy..."</p> <p>Paragraph 2.3 of the document then acknowledges the imperative of national planning policy, in stressing that;</p> <p>"...the Plan must involve a degree of flexibility and pragmatism to ensure a steady overall supply of enough land for housing development".</p> <p>It is considered that the broad purposes and intentions of the draft DPD (as described above) are reasonable and justified, in relation to the East Wiltshire HMA and the Devizes Community Area (although not in relation to other parts of Wiltshire). However, for the reasons we identify below, we do not believe that the Plan (as currently prepared) will realise its stated objectives. We therefore do not consider that the Plan will be effective.</p> <p>Five Year Supply and Housing Provision in the East Wiltshire HMA</p>				

#### Appendix Q - Schedule of representations

It is considered that the Council is able to demonstrate a five year supply of land for housing in the Eastern HMA, applying a 5 percent buffer ('to ensure competition and choice') and using the Liverpool Method to determine the treatment of shortfall. However, it is notable that annualised completions in this HMA typically fall below the annualised requirement, with a deficit having occurred during 6 of the previous 11 monitoring years (which comprises the Plan period to date) and 6 of the past 8 years (See attached Appendix 1). In view of this persistent record of under delivery, there is a growing case for the application of a 20 percent buffer. Likewise, the PPG is clear that the Sedgfield Method is the most appropriate method for addressing any undersupply. Furthermore, the current approach of the DPD wrongly assumes 100 percent delivery of existing commitments to deliver the 'residual' housing requirement, without taking into account any lapse of those planning permissions, and not ensuring a suitable buffer of sites above that residual requirement.

Given the above, and in accordance with the NPPF, we consider that additional land should be identified, in order to provide over and above the 'residual' housing requirement in the East Wiltshire HMA. This is in order to provide a realistic prospect of achieving the requisite housing supply and ensure choice and competition in the market for land. This approach will ensure that the Plan's objective to sustain a five year supply of land across the plan period is met and corresponds to the NPPF's stated aim of significantly boosting the supply of housing. Crucially, there would be no ensuing harm from this approach, as the housing requirement in Wiltshire is (explicitly) expressed as a minimum, not a maximum, and cannot therefore be considered a cap to sustainable development. We suggest that to plan positively to ensure future development needs are met, additional land should be allocated in the East Wiltshire HMA above the 'minimum' requirement set out by the Core Strategy.

This approach has been advocated by other Inspectors in the examination of Site Allocations (Part 2) Plans in other Local Planning Authorities. For example, this occurred recently in North Somerset following the Examination of that authority's Part 2 Local Plan. In this instance the Inspector considered that the Part 2 Local Plan should allocate sufficient land, in order to meet a housing requirement which was equivalent to a 20 percent buffer above the 'minimum' requirement set out by the North Somerset Core Strategy.

At a more localised level it is notable that the Core Strategy housing requirement as apportioned to the Devizes Community Area (at Core Strategy Core Policy 12) has yet to be fully delivered, nor are there existing commitments sufficient to deliver the requirement by 2026 (the end of the Core Strategy Plan period). Despite its status in the settlement hierarchy, relatively little development has occurred at Market Lavington. Furthermore, although a Neighbourhood Plan is currently under preparation, this is progressing slowly and has yet to reach the Regulation 16 stage. In this respect, it is quite correct and reasonable for the Council to prioritise the supply of housing land through the allocation of sites at this settlement via the Housing Site Allocations DPD. However, there is clear scope to allocate additional land (over and above that currently proposed for allocation) at Market Lavington, which could further increase the supply of housing without engendering significantly greater harm.

**Sustainable Location**

In view the above, there is a necessity to identify additional land, capable of accommodating a greater quantum of housing development. Such additional housing should be identified in broad accordance with the Spatial Strategy and Delivery Strategy described at Core Policies 1 and 2 of the adopted Core Strategy.

Market Lavington is a 'Local Service Centre' which is defined, in Core Strategy Core Policy 1 as;

"Local Service Centres are defined as smaller towns and larger villages which serve a surrounding rural hinterland and possess a level of facilities and services that, together with improved local employment, provide the best opportunities outside the Market Towns for greater self-containment.

Local Service Centres will provide for modest levels of development in order to safeguard their role and to deliver affordable housing."

The spatial strategy therefore anticipates that a reasonable quantum of development will be delivered at settlements affiliated with Local Service Centre status. This is in order that such settlements can maintain their place in the settlement hierarchy, as denoted by their relative size and sustainability, and their functional role within the wider area (i.e. in terms of services or employment provision).

It is notable then that there has been little housing growth in Market Lavington during the Core Strategy Plan period to date. This is despite Market Lavington being the highest tier settlement in the Devizes Community Area Remainder (i.e. excluding the town of Devizes). Related to this there is also an acknowledgement, at paragraph 5.22 of the Submission Site Allocations DPD document, which suggests that additional housing development is needed, at Market Lavington, in order to "support local facilities and contribute to improved self-containment".

#### Appendix Q - Schedule of representations

Accordingly, we consider that the proposal to allocate land at Market Lavington for additional housing is sound in-principle and accords with the sustainability and delivery strategies described within the Core Strategy. However, in view of the record of under-delivery within the East Wiltshire HMA, there is a case for allocating additional land (at sustainable locations), with the intention of aiming to over-deliver against the minimum Core Strategy requirement. Such a strategy allows for a Plan-led approach, but provides greater flexibility to overcome probable lapses in planning permissions and/or the delayed delivery of certain sites. In turn, this will assist the Council in maintaining a favourable supply position, whilst also boosting the delivery of new housing in sustainable locations.

##### Site Assessment

The proposed allocation of land at Underhill Nurseries (at policy H1.2) is supported in principle. The redevelopment of this site for housing would result in a logical extension to the settlement and would not result in any detrimental landscape or heritage impacts. However, it is considered that the allocation is incomplete, as it does not include all of the land occupied by the extant nursery use, vis-à-vis all of the land promoted for development.

The Devizes Community Area Topic Area Paper (June 2017) gives consideration to the proposed development of Underhill Nurseries for residential use. Table G.7 evaluates site SHLAA Ref. 2055, whilst Table F.6 considers site SHLAA Ref. 530 (Fiddington Hill). The Council's assessment of these sites is logical, to the extent that the perceived harm arising from the development of these sites would be limited and outweighed by the benefits of providing market and affordable housing. Equally, it is logical that the two sites should be brought forward together in order to allow for a suitable access to be formed. In this respect, we add also that there are multiple options for forming a suitable vehicular access. These include providing an enhanced access off Fiddington Hill, with improvements being made to the junction with Fiddington Clay / Stirling Road. Equally viable is the option for form a new vehicular access off Stirling Road (to the north west), with this passing through the plot of an existing dwelling.

However, the evaluation of the SHLAA site ref. 2055 (at Table G.7) leads to the discounting of the north eastern / eastern extent of the land promoted, and accordingly part of the site is screened out at the Stage 4 assessment. This would appear to be because those parts of the site (which are excluded) do not appear to contain any significant built form. For clarity, we provide below extracts to illustrate the extent of sites 530 and 2055 (as promoted through the SHLAA) in Figure 1 (See attached Appendix 2), as compared with the proposed allocation (shown in Figure 2 (See attached Appendix 3)).

We consider that the reduction in the size of the allocation is unjustified. In this respect we note that the extension of the site to the north east (to the rear to dwellings fronting Sterling Road) would not result in substantively different landscape or visual impacts, when compared to the allocation of a reduced site as currently envisaged in the draft Site Allocations DPD. In this respect we would highlight that the entirety of the land promoted at sites ref. 2055 and 530, comprises an area of relatively flat land at the base of a series of hills which extend to the south east and north east.

It is also the case that the extension of the proposed allocation would result in a logical capping-off of the north eastern edge of market Lavington, by bringing the extent of new built form up to the spur of existing development which already projects along the northern boundary of bridleway / PROW (which is denoted by the green line in Figure 2). If this were to occur, views of future development on the site would be seen in the context of the existing built extent of the village. This is to say that the development would not be viewed as a protrusion into the countryside and neither would such an expansion be perceived as diminishing the visual gap between Market Lavington and Easterton to the east.

We note that all of the land promoted for development (i.e. SHLAA sites ref. 2055 and 530) is associated with the existing nursery. Once the nursery use ceases (in favour of the proposed residential use) the balance of the land will not transfer to a productive agricultural use, but will rather remain disused. To leave a significant portion of the site derelict does not provide for an efficient use of land. Likewise, in view of the site's location and the presence of defensible boundaries (and taking account of the degree to which potential alternative sites at Market Lavington are constrained), it is likely that the remainder of site will eventually come forward for development. There is then a case for allocating the balance of the land in order to facilitate a coherent development, rather than a series of sporadic schemes.

It is important to emphasise that even if the full extent of sites ref. 2055 and 530 were allocated in the Site Allocations DPD, this does not mean that the entirety of the enlarged allocation would be developed. Rather, should a larger site be allocated, it will be possible to achieve a comprehensive scheme layout which tapers off (and provides an open space buffer) towards the rural edge and which includes additional

Appendix Q - Schedule of representations

	<p>landscaping and green infrastructure. The overall effect will be to proportionately increase the quantum of market and affordable dwellings, which can be achieved through the allocation, whilst simultaneously providing much greater potential to achieve a sensitively configured design.</p> <p>Summary and Proposed Amendments to the DPD</p> <p>As outlined within the scope of this representation, it is considered that the proposed allocation of additional residential land at Market Lavington is consistent with the Core Strategy spatial strategy, and serves to reinforce the 'Local Service Centre' status the village has within the settlement hierarchy. To this extent, the strategy for the East Wiltshire HMA and the Devizes Community Area is considered logical. Similarly, the principle of developing the Underhill Nursery site represents a sound and reasonable approach. This is in view of its location and its relatively unconstrained nature, when compared to potential alternative sites at the settlement.</p> <p>However, the preparation of this DPD gives the Council an opportunity to proactively plan for future requirements, and potentially safeguard against under-delivery in to the future, should the need for additional housing provision be required (i.e. beyond the minimum required by the current Core Strategy). The East Wiltshire HMA currently has a more favourable housing land supply position when compared to the North and West HMA. However, it is clear from the analysis provided in this representation that completions routinely fall below the annualised requirement for this HMA. There is therefore an opportunity to counter the prospect of future shortfalls in delivery (which will ultimately need to be addressed), by planning to deliver over and above the Core Strategy minimum requirement.</p> <p>Taking this into account, and for the reasons explained, it is considered that the balance of the land promoted at Underhill Nursery should be allocated to allow for a comprehensive scheme to come forward. The concern then is that the approach currently envisaged in the DPD (i.e. the partial allocation of sites ref. 2055 and 530) shall serve to promote piecemeal development, with part of the site potentially remaining disused and vacant once the existing nursery use is superseded.</p> <p>If the balance of the land should come forward for residential use, this would not result in materially different landscape or visual impact effects, and no greater harm would arise from this than from the development of the smaller areas of land currently proposed for allocation. Indeed, the opportunity to achieve a comprehensive design will provide greater opportunities for more meaningful green infrastructure provision, landscaping and open space.</p> <p>Accordingly, we consider the following points and amendments should be considered in the preparation of the draft Site Allocations DPD:</p> <p>The spatial strategy for the draft Plan should be re-considered to positively plan for the allocation of further sites and increase the size of proposed allocations, particularly where this does not result in substantively different levels of harm and where this facilitates additional benefits;</p> <p>The full extent of the land associated with Underhill Nursery should be allocated for development, with this meaning that the proposed allocation H1.2 should be amended such that the entirety of SHLAA ref. sites 2055 and 530 can be brought forward as a part of an expanded and more coherent scheme. This scheme would include extensive areas of open space being provided at the north eastern extent of the enlarged site.</p> <p>The settlement boundary should be amended to reflect the revisions to the boundary of the proposed allocation.</p> <p>We trust that these comments are helpful, and we look forward to participating in the next stages of the Plan. In regard to the next stages of the Plan, we request to be notified of the following:</p> <p>The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination; and</p> <p>That the Inspector's Report (including any recommendations) into the examination of the Wiltshire Housing Site Allocations Plan has been published.</p> <p>If you would like to discuss our comments or require any further clarification, please do not hesitate to contact us.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	My understanding is that Policy 1 of Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities" but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation, so this aspect of the Plan is not consistent with the Strategy. Based on the above points it is clear that there is no substantiated strategic need for further housing allocations in Crudwell but also that it is absolutely appropriate that the Crudwell Neighbourhood Planning should determine what housing is required taking into consideration parishioners wishes and having examined the environmental and infrastructure constraints and options.

		Philip N Malcolm	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Comments on WCC's Housing Site Allocation Plan</p> <p>I wish to make representations regarding the Council's Draft Housing Site Allocations Plan dated June 2017 currently out for consultation. I am a resident of Crudwell, Malmesbury, Wilts and my representations focus on the allocation of the site at Ridgeway Farm, Crudwell : SHLAA Site 3223 (or 3233) for a further 40 houses.</p> <p>My representations are as follows:</p> <p>The allocation of this site is not necessary to meet any strategic need for housing, which is already met or exceeded by delivered, committed or planned developments in the North &amp; West Wiltshire Housing Market Area (HMA) and the Malmesbury Community Area (MCA) [In the HMA the minimum housing requirement over the period 2006-2026 is 24740, less Completions 12603 and Developable commitments 11566, leaving 571 to be allocated as a minimum. The draft Plan allocates sites totalling 1195 houses which, even without consideration of 'windfalls', is more than twice the minimum number needed. With windfalls, the excess is 2710.</p> <p>In the MCA as a whole, there is no remaining requirement, as completions and developable commitments together exceed the requirement.]</p> <p>In accordance with the stated Core Policy 1, the Plan explains that, in Large Villages such as Crudwell, development should be '....limited to that needed to help meet the housing needs of settlements and improve... (employment) opportunities, services and facilities.' Again, at Clause 3.7: 'Development at Large and Small Villages should accommodate local needs.' And at Clause 4.4: 'Some new development, to meet local needs, may be appropriate at some of the designated Large Villages...' However, the Plan does not explain the nature of these needs local to Crudwell and how development of this site at the scale envisaged would contribute to satisfying them.</p> <p>It is claimed that, according to the 'housing register', a further 26 households are seeking affordable housing in and around Crudwell, as are some 48 households "in the local area". However, no evidence is provided to support these claims. I note the statement that a 2015 Rural Housing Needs Survey only identified a need for 8 affordable/shared ownership properties in Crudwell. I am aware that existing development already under construction at the same site will provide 4 such properties.</p> <p>The allocation is disproportionately large with regard to the existing community; 40 further houses would represent about 10% of the current housing stock in Crudwell parish, and about 15% increase for the village itself.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The site is outside both the existing settlement boundary and the revised boundary proposed in the Plan. Clause 2.8 of the Plan states that ‘..development outside the settlement boundary is, with limited exceptions, not acceptable.’ Previous proposals for development on this site were scaled down after legitimate infrastructure and environmental concerns were raised, and have not been alleviated. It is not appropriate now to greatly expand the envisaged scale of development, so exacerbating those concerns. There may be other potential development sites which are better. The best way to identify what developments can and should be put forward is through the Crudwell Neighbourhood Plan which is being developed. The Site Allocations Plan acknowledges that as a priority planning controls should pass to local communities. In conclusion, I do not think that the allocation of this site is justified and I believe that it should be withdrawn from the Site Allocations Plan pending development of Crudwell’s own Neighbourhood Plan.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	The existing shop and pub serves the village well, but the doctors' surgery is notoriously difficult for current Bratton residents to get an appointment at, as it currently serves a great deal of Westbury residents. Has the Council considered what effect an additional 40 homes, each with 3 or 4 occupants, would have on this service, which can't accommodate the current demand. The village school has class sizes bordering on the maximum allowable levels, which would only be exasperated by more dwellings, many of which would house young families with primary school aged children. Are these few, overstretched village services that much of an attraction, that Bratton is the only village in the area that is suitable for this development??? "In addition, the scale of development proposed would not significantly add to pressures on local infrastructure (NOT TRUE), services and facilities. Therefore, the overall sustainability benefits of developing this site are considered to be good". Considered by whom? The creators of the fundamentally flawed 'Feasibility Study'? Not an altogether convincing argument for this unwanted, ill-advised, unnecessary, environmentally detrimental development.

				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Comments on consultation, processes, planning and the overall County Council approach, plus future process. We believe consultation approach by the County Council has been inadequate given the huge amount of information to be digested and commented on, especially given the amount of speculative developer applications in our area, the destructive impact of building on the proposed site at 3565 Southwick Court.</p> <p>As far as we know, no-one in Sandringham Road was aware of the informal consultations on settlement changes in respect to Southwick Court 3565, nor about the proposed development, until a couple of days before the cabinet meeting in June – proof if any was needed that the consultation publicity and engagement during the previous year was totally inadequate.</p> <p>Similarly as a group or individuals we have not seen the written recommendations from the consultation on the settlement boundaries or on the planning policy core strategy. What were these and have the key points raised by the limited number of residents that was engaged with been included in the plans? Were local Councillor views included in the amendments following consultation? What further consultation will be had following residents feedback as part of this process.</p> <p>The presentation maps and material at the public consultation at County Hall were not available to take away giving no time to understand the proposal properly. Whilst there are documents online some cannot be downloaded as they are locked out or wrongly formatted (even from direct links from the Council's own website about the Site Development Proposals was inaccessible last night 19th September 2017).</p> <p>We have been denied information by Wiltshire County Council (in writing) that we had requested under freedom of information about the feedback from the water authority about the situation of building on the flood plains at the Southwick Court 3565 site and the effect on our road and properties from additional risk of flooding.</p> <p>Instead we were provided with a long report with dozens of pages prepared by Atkins that has some seemingly strange or uninformed assertions about the supposed local benefits of development proposals and, in our view it appears biased in support of the proposals for Green Field sites such as Southwick Court 3565. We would like to have the opportunity to present our response to this report and ask for more time for consultation to do this, or to be allowed to present this at a later stage in the process.</p> <p>We understand that the Planning Inspectorate / Government makes the final decision but that the County Council will have a full meeting to consider the proposals and amendments proposed by the local councils and residents during the consultation period. Please advise of how we will be informed of the outputs and views presented by residents from the consultation before this meeting is held. Also, please advise the date of this meeting so we can attend.</p> <p>We would urge all Councillors to take account of the local residents' concerns and vote against the current proposals and instead adopt the positive alternatives put forward by Trowbridge Council (see Appendix 1).</p> <p>Baroness Scott said that Wiltshire Council will "treat every application ... in a fair and equitable way". We thank the Council Leader's affirmation of this and hope that the local residents, and the Councillors that represent us, are not only listened to, but their comments are acted upon and</p>			

Appendix Q - Schedule of representations

	<p>included in the amendments to the plans to ensure the appropriate, sustainable and relevant development of Trowbridge as a county town that we can all be proud of.</p> <p>We would ask if there are changes recommended from the current consultation that there be a further consultation period to review these. This was a promise made by the County Council at the Cabinet meeting in June and we trust you will deliver on this promise.</p> <p>Then once an inspector is appointed to review the evidence and information we would request that we are allowed to attend and make oral presentations as part of the deliberation process.</p> <p>At the cabinet meeting it was stated that a certain “Appendix G” of the plans said that the proposed developments were “desirable and sustainable”. In our view, to build on Southwick 3565 is certainly not desirable nor sustainable for the reasons we have stated in this document. It is also the view of the local residents, friends of Southwick Fields, local Parish and Trowbridge Town Councillors, and we hope we have demonstrated the plethora of reasons sufficiently to ensure removal of this proposal from the plans.</p> <p>Baroness Scott stated at the cabinet Meeting on 20th June that at the full council meeting the proposals “have to be agreed by all 98 councillors”. We have listened back to the recording of the Cabinet Meeting and there are some other words added after a slight pause. We believe therefore that this may be misleading and that a unanimous vote may not be required, but instead a majority vote only is required. We would like clarification of this statement.</p> <p>Baroness Scott asserted variously and encouragingly to all of us present {Look at the evidence – provide the evidence – we will listen and make amendments – it will be for the Full Council to agree those amendments before we then pass the matter to the Inspectorate}. We trust this promise will be upheld and that amendments that have merit will be accepted, even if this serves to prolong the process.</p> <p>Furthermore, Councillors and speakers stated at the Cabinet meeting that they believe that the WCC Planning Policy is in disarray – that the policy and processes are in a “desolate state”, that the Core plan is unsustainable and what we are seeing is developer led policy. Cllr. Sturgis and Baroness Scott both refuted this, so we now call on them and all County Councillors to demonstrate that this is not the case and that you will take the advice and representations from local residents and other councillors and include the proposed amendments by TTC and ourselves in the plans.</p> <p>We also support the points raised by local resident Graham Hill (Balmoral Road) who has carried out a significant amount of research about the land at Southwick Court 3565 and has provided evidence against this development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>NUMBERS OF DWELLINGS</p> <p>We (lay people not professionally qualified and employed to do so) are expected to accept a statement of housing needs, the evidence available only if you have the considerable time to research the many hundreds or thousands of pages on the subject. Wiltshire Council asserts that Trowbridge needs site allocations for 800 dwellings, despite also telling us that North and West Wiltshire Housing Market Area as a whole requires a minimum of 571 dwellings, considerably less over a wider area. There is no clear explanation why Trowbridge Community Area is being expected to take such a large allocation. Those better qualified than I have made detailed comments already, strongly suggesting how Wiltshire Council have not got this right.</p> <p>The numbers of dwellings proposed for green field sites are further inflated, by the rejection of sites in built up areas, so not taking into account the number of dwellings which should be placed there. This is unacceptable – I had understood that (nationally) development of brownfield sites was to be given preference, before expanding into green field areas.</p> <p>This is made even less acceptable, as most of the allocations are in four large developments, no doubt more convenient and lower cost for developers, but much more intrusive on adjoining properties and communities.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p><b>SIZE AND LOCATION</b></p> <p>The Trowbridge Community Area Topic Paper reminded us that Core Policy 29 of the Wiltshire Core Strategy says: “It is recognised that the villages surrounding Trowbridge, particularly Hilperton, Southwick North Bradley and West Ashton, have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities.” [my italics]</p> <p>Despite this, three areas (Plan References H2.1, H2.2 and H2.6) are being proposed in the two parishes I know best, for development which severely compromise (even ignore) this policy.</p> <p>Ideally none of the three sites should be developed; if we are forced to accept some development, with modification, particularly reduction in size, parts of H2.1 Elm Grove Farm and H2.6 Southwick Court might be developed reasonably, although not acceptable to nearby residents: H2.1 Elm Grove Farm should not be developed at the southwestern end of the area proposed, any building well clear of the A363 and Woodmarsh, to maintain visual separation between Trowbridge and North Bradley;</p> <p>H2.2 A363/White Horse Park should not be developed at all, in order to maintain the open area between Trowbridge and North Bradley. N.B. the organisation which assessed the possible sites for development was misinformed, describing this area as part of Trowbridge, while it is part of North Bradley parish.</p> <p>H2.6 Southwick Court should be considerably reduced in size, a narrower band adjoining Trowbridge to give the historic Southwick Court buildings a wider space and stopping considerably short of Axe &amp; Cleaver Lane. The intrusiveness of the solar farm (supposed to have limited life) along Axe &amp; Cleaver Lane came as a nasty surprise to many; permanent, taller, housing would be a visual intrusion over a wider area, in the open space between Southwick and North Bradley and Trowbridge.</p>

<b>Comment ID:</b>	<a href="#">1976</a>	<b>Consultee</b> Andrew and Margaret Foster	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1131326	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm Crudwell			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We wish to express concern at the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell, and would appreciate it if you would consider seriously the following key points.</p> <p>Together with the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings). The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so. however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell. A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell. Policy 1 of Wiltshire’s Core Strategy states that “Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities.” but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy. Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met. Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan. Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development. In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners’ wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell in not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

		Person ID: 1131326	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm Crudwell			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Crudwell Primary School is already greatly over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed.

Comment ID:	<a href="#">1983</a>	<b>Consultee</b> Jo Cadzow  <b>Person ID:</b> 1131344	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Warminster site allocations and settlement boundary		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: <ul style="list-style-type: none"> <li>• Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and</li> <li>• Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</li> </ul> I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons: <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

Comment ID:	<a href="#">1984</a>	<b>Consultee</b> Jo Cadzow  <b>Person ID:</b> 1131344	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Warminster site allocations and settlement boundary			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Consistent – The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.

<b>Comment ID:</b>	<a href="#">1985</a>	<b>Consultee</b> Mr Michael Felce	<b>Agent</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1131395	<b>Person ID:</b>	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Durrington		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>It is inappropriate for Wiltshire to 'join' Amesbury with Durrington and to refer to Durrington as a market town by 'joining' the two areas. Durrington regards itself as separate from Amesbury and has always done so.</p> <p>Durrington is 'full up' and the proposals are inappropriate for various reasons (which I give later).</p> <p>The proposed revised settlement boundary for Durrington given by Wiltshire (as I understand the position) is inconsistent with Wiltshire's proposals for extra housing. (No explanation is given).</p> <p>Durrington will soon only have one medical centre. Such extra houses will not bring another medical centre and so the medical service which exists will become more stretched.</p> <p>As regards paragraph 5.150 of the Wiltshire document, Durrington is already substantially self-sufficient and does not need such expansion to give self-sufficiency.</p> <p>Expansion under the Wiltshire proposals does not lead to 'the viability of existing services'. It is likely to detract from the efficiency of such existing services, which are already viable.</p> <p>The Wiltshire document at the end of paragraph 5.150 refers to 'creating demand for an improved local offer'. This appallingly bad English does not assist in an appraisal of the proposal. What does this mean? If this expression is intended to mean that the proposed development would bring new businesses to Durrington, then I think such a suggestion is misconceived. Apart from anything else, there is no room for new businesses and in any event, great care should be taken in introducing business use into settled residential areas. At present, Durrington has a good selection of businesses serving its community. Such services include a chemist and a veterinary surgery.</p> <p>I consider that the Wiltshire document lacks an understanding of Durrington and the Wiltshire proposals are inappropriate and/ or misconceived.</p> <p>I consider that the Wiltshire proposals for Durrington are lacking justification and effectiveness.</p> <p>Durrington includes Larkhill where the residential buildings for the Army are being built. Durrington and Larkhill has the prospect of significant change as a result.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We would like to put some questions and make comments on the proposal for over 800 homes around Harnham. How much thought is being given to the provision of other services, such as schools, shops and medical services? Too many developments lack these essential services within walking distance, encouraging more travel by car, with the consequent problems of congestion and pollution. We mentioned the hospital earlier. The only housing site proposal in which we can see positive benefit is the one to the south of Woodbury Rise (area 3272). As this is close to the hospital – and provided the mix of housing is suitable for all income brackets - a case could be made for this. In our view, the rest of the proposal is questionable as to its extent and viability.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Inclusion of curtilage of properties with large gardens relates more closely to the built environment is sound and consistent with National Planning Policy Framework. These properties adjoin others forming a continuous linear development of housing within Mere. Properties on either side of Shaftesbury Road are linked together within the built form. Properties with large gardens should not be allocated for planning permission of new dwellings. The National Planning Policy Framework 2012 paragraph 48 mentions a windfall allowance 'should not include residential gardens'.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I wish to register my concerns about the proposed allocation of an additional 40 houses to the village of Crudwell on the Ridgeway Farm site as detailed in the draft Wiltshire Site Allocations Plan.</p> <p>I have lived in Crudwell for five years and I can see that have been a number of new build housing projects in recent years, as a means of sustaining the viability of the village. With this sympathetic approach, the addition of small numbers of houses every few years, the character of the village has not been spoilt and the Conservation area has not been threatened.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2005</a>	Consultee Tim Bullock	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1131422	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>In 2014, I objected to the Ridgeway Farm planning application for 29 nine houses when it was submitted to (and rejected by) Wiltshire Council and to my mind, the principle objections remain the same:                      The scale of the development - it was much larger than previous developments in the village.                      The proposed development is too large and outside of the designated red line settlement boundary for the village, as well as encroaching on viable farmland.                      I am not against the present development of 10 houses on the footprint of the old farm yard as it is certainly better than what was there before (the landowner having chosen to leave the buildings fall into disrepair and deteriorate), it made good use of an existing "brown field" site and is of a scale consistent with other recent developments in the village. However against this backdrop, I am shocked to see the draft allocation of an additional 40 houses on this site which was previously deemed unsuitable.                      As there is no immediate strategic need for any housing allocations at Crudwell, I would like to see the Neighbourhood Plan group given the opportunity to consult and engage with the local community and businesses to determine the scale and type of housing need in Crudwell; to examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity. The consultation will also help determine from local businesses what their needs might be to enable them to sustain and expand employment opportunities going forward.                      This site allocation if allowed to stand would, in my opinion, completely change the character of the village and undo many years sensible and sensitive development supported by the Parish Council and the planning teams at Wiltshire Council. I am not anti-development but I do favour sensible, incremental development.                      It is vital that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind – please re-consider Crudwell.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>The development would increase the strain on the village drainage and sewage system which is already inadequate for the number of properties it attempts to support.</p> <p>Increased flooding risk to Tetbury Lane and the village as a whole. In the time we have lived in the village we have witnessed Tetbury Lane flooding on several occasions during periods of heavy rainfall. Water actually “fountains up” out of drains as they fail to cope with the volume of water. Walking our children along the lane to school we have been drenched by passing traffic as vehicles drive inconsiderately fast through puddles and surface road water. Any new development will add both to the surface water on areas of tarmac as well as the inadequate sewerage system which fails to cope in periods of heavy rain.</p> <p>Crudwell still has severe flooding problems which have not yet been completely addressed, it remains a major concern to people who live in properties around the Swillbrook which runs through the centre of the village. Many have experienced significant damage to their homes in recent years both through surface water and raw sewerage and I believe surface water from the proposed site would only make this situation worse. Many homes - including in The Butts cul de sac where I live, already need non-return valves to stay safe from sewerage flooding until the excess over capacity subsides.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Increased traffic in Tetbury Lane and the busy A429 causing further risk to pedestrians, bike and horse riders and vehicles. Tetbury lane is narrow and has stretches with no pavement, making walking to and from the facilities at the village hall to the rest of the village/school etc difficult and dangerous.</p> <p>Where are the residents of these 50 (10 + 40) houses going to work? Being in a village with poor public transport links, they will all have at least one car.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I also do not think that the allocation is justified when you look at your own guidance or notes within the Site allocations Plan. This states that housing sites will only be allocated where there is a strategic priority to do so. From the data available, the Site Allocation Plan currently results in an oversupply of some 4,300 dwellings to 2026 when you take into account past completions with deliverable commitments and windfall sites; even excluding windfall sites, the oversupply is still 2,200 across the housing market area. More specifically, the Site Allocations Plan results in an oversupply of some 100 homes in the Malmesbury Community Area; Wiltshire Council also has a history of oversupply of dwellings - in eight of the last ten years, more homes have been built than planned and over that period the oversupply has been over 140% of target. On that basis there is no strategic need or justification to allocate new homes in Crudwell and the Draft Site Allocations Plan should not do so. I am also concerned that the site size / boundary of the Ridgeway Farm Development encompasses an area far greater than is required - even for 40 homes - so I question why that is the case and would like it reviewed.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Policy 1 of the Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", given that we have circa 250 homes in Crudwell, I do not see how an additional 40 homes on top of the 10 already being built - a staggering 20% increase overall - even falls within Wiltshire Councils own Core strategy.

Comment ID:	<a href="#">2021</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 1131470	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>For many weeks I have been trying to figure out how to complain about the proposed development for 30 houses in Farrell's Field and don't know how. That in itself is indicative of a problem. I feel the whole notion has just been rushed through without any local advice sought on the development.</p> <p>YK is a wonderful tight-knit village community and we need to look out for the people who have been here for decades and see that their needs are met. Have they been consulted on this proposal? No. The majority of the villagers got to hear about it by word of mouth. That is all wrong. So I strongly object to your proposal on the grounds of lack of local consultation to ascertain housing needs, drainage problems, lack of access, and increased danger on an already overloaded road into YK.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Yes, we do need housing in YK, but not the sort you are proposing. There are people in the village who came here as families and now the children are flown the nest and they are widowed. So, because there are very few small bungalows, in several dwellings one person is taking up a family home. Also there are families who wish to upmarket but cannot afford the exorbitant prices of housing such as it is now in Farrell's Field. YK is a wonderful tight-knit village community and we need to look out for the people who have been here for decades and see that their needs are met. Have they been consulted on this proposal? No. The majority of the villagers got to hear about it by word of mouth. That is all wrong. So I strongly object to your proposal on the grounds of lack of local consultation to ascertain housing needs, drainage problems, lack of access, and increased danger on an already overloaded road into YK.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Hullavington and the Sustainability Appraisal		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Justified 1.16 The NPPF requires the plan to be “the most appropriate strategy when assessed against the alternatives”. 1.17 The plan process has not assessed reasonable alternatives. Sustainable sites across housing market areas have not been assessed as reasonable alternatives, as the area of search for sites has been artificially restricted. We consider that this is contrary to national policy. 1.18 It may at times be more sustainable to meet a housing requirement in a different settlement or community area, than where the need arises (which is the fundamental justification for the Wiltshire Core Strategy approach to the settlement hierarchy). The DPD evidence has not assessed whether this is the case, and therefore cannot be considered to be ‘the most appropriate strategy’ for Wiltshire, as required by paragraph 182 of the NPPF. The indicative requirements allowed for this flexibility, yet no flexibility and no resilience have been tolerated in the approach to the DPD. As a consequence, it is not justified.			
<b>Attached files (Please see Objective)</b>		4724834			
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		Moore Allen is the agent for landowners of land surrounding Hullavington that is capable of making a sustainable contribution towards Wiltshire's future housing supply, it is therefore important we are able to participate orally to expand on the comments we have made within this representation.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Hullavington</p> <p>1.29 In specific regard to Hullavington, Moore Allen is the agent for a land owner on the outskirts of the former MOD base at Hullavington, just outside the settlement of Hullavington.</p> <p>1.30 Hullavington is a large village. Hullavington, accommodates a primary school, local shop and public house. There is a bus service that connects the village to the market town of Malmesbury and the principle settlement of Chippenham. There is also a primary school at Stanton St Quintin.</p> <p>1.31 There is a live planning application for the conversion of hangers at Hullavington Airfield to form a research and development facilities for Dyson. If this application is approved this will bring a significant element of employment into this area. The planning statement confirms this application responds to a short term needs of Dyson and the intention is to seek develop a master plan for the site to develop a global hub for Dyson's research and development work.</p> <p>1.32 As such the site provides future potential to accommodate growth associated with Dyson's plans for the former MOD airfield. In early 2017, Dyson revealed plans to develop a second campus at the former MOD base at Hullavington. Dyson has purchased the land and submitted an initial application for the conversion of some of the hangers to create employment floor space.</p> <p>1.33 We also understand that there is potential to reopen the railway station on the Swindon to Bristol railway line at Hullavington that would in the future provide a sustainable transport link.</p> <p>1.34 We note the site wasn't considered in the Sustainability appraisal but in broad terms the SA generally supports development in this location to the north of the village.</p> <p>1.35 To be sound, the council should have assessed the opportunity for these sites to contribute to sustainable development, and to enable housing to come forward alongside the employment proposed on Hullavington Airfield, to reduce communiting and to form sustainable development.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Re Planning applications s1028 s1027 I wish to place my objections to the above proposed development on record. My grounds for objection are :- There is no plan for dealing with the increase in traffic that such developments would create. The Harnham gyratory is already operating beyond its design capacity and delays on the A0394 accessing the A354 and A 338 are often in excess of 10 minutes with the resulting increase in pollution levels and inconvenience. Over the 17 years that I have lived in Harnham traffic volumes have increased considerably and this plan offers no solution to managing the traffic increase.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Although not housing, I was told recently that the consultation and site allocation also applied to places of employment. The boundary, should include the Atworth Business Park, (Atworth map J7) including the adjacent square field to the west of the Park (Atworth map I7 and J7 overlapping). This whole area was in 1921 the assembly plant of Mendip Motor and Engineering Works. In 1948 it became part of the Dowty Engineering Group, closing in 1991. After this it was the Atworth Business Park I think that the square field ((Atworth map I7 and J7 overlapping which has permission for the Leafield Marine extension) is not suitable for housing due to access being through the Business Park. However I think this field is suitable to provide more units for work opportunities in the future. Atworth has extremely little land outside the boundary that is not owned by Neston Estate, making the building of new future places for employment in the village more than difficult.</p>

<b>Comment ID:</b>  	<a href="#">2038</a>	<b>Consultee</b> Mr David Pearce  <b>Person ID:</b> 1131509	<b>Agent</b> Mr Jon Gateley Associate Director  <b>Person ID:</b> 1131505	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	<b>Do you consider the draft WHSAP is sound?</b>	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.2 para 5.20 Hilltop Way Salisbury			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED LETTER DATED 22/9/17 170922 Savills Representations on Hilltop Way Salisbury</p> <p>David Pearce, the landowner of the proposed allocation site at Hilltop Way, supports the proposed allocation for 10 units and can confirm his intention to deliver the site within a relatively short timescale. However, we have some proposed modifications to the wording of the relevant policy to improve its effectiveness (as set out in the attached letter). However we must draw attention to the outcome of the recent appeal (24 August 2017)<sup>1</sup>, through which outline permission was granted on the site for:                  “the erection of 10 semi-detached bungalows, new footpath link and creation of public open space, incorporating 20 off-street parking spaces and 5x laybys to Hilltop Way.”</p> <p>This appeal decision affirms that WC are justified in identifying the site for allocation, with all environmental and technical issues having been adequately addressed. However, in light of the appeal decision the draft policy would now benefit from some minor amendments in wording, as suggested below.</p> <p>Proposed modifications to the draft DPD</p> <ol style="list-style-type: none"> <li>1. In the interest of clarity, reference should be made in paragraph 5.139, to the fact that outline planning permission for 10 units has been granted.</li> <li>2. Again in the interest of clarity, we suggest the following minor amendment to the wording of paragraph 5.140:                  “The site is a narrow area of undeveloped rough grassland adjacent to existing residential development along Hilltop Way. Access to the site would, as established in the existing planning permission, be achieved via Hilltop Way ...”</li> <li>3. The application and appeal have established that there is negligible (if any) intervisibility between the Old Sarum Conservation Area and the site. As such we would suggest the following modification:                  5.142 There is potential for impacts on skyline views from Old Sarum Airfield Conservation Area and from Old Sarum Castle and these will need to be mitigated As identified in the existing planning permission, any potential landscape and townscape effects should be addressed through the appropriate location of new dwellings and a high quality design scheme, together with suitable landscaping and provision of open space.</li> </ol>				

Appendix Q - Schedule of representations

	I trust that you will be able to take these reasonable suggestions directly on board within the next draft of the DPD; in the meantime I would be grateful for your acknowledgement of this representation.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The public release of the 2017 HRA made yesterday clearly states that: Recommendations on page 76 specifically relate to 3565 and state. 'Recommendations (continued) Bath and Bradford on Avon Bats SAC Habitat Loss / Deterioration H2.5 – Upper Studley The site is in an area likely to be used by Bechstein's bats associated with the Bradford and Bath Bats SAC. Sensitive habitat features on / adjacent to the site include: • Boundary hedgerows / tree lines • Lambrok Stream These features should be retained and / or buffered from development (including residential gardens) by wide (10-16m), dark (<1 lux) dark continuous corridors of native landscaping which will allow for their long-term protection and favourable management in order to secure continued or future use by Bechstein's bats. This recommendation therefore makes access to the full site impossible and therefore the site MUST be removed from the Proposal. Directives in the 2017 HRA should be adhered to and the site should be removed from the proposal forthwith.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2040</a>	<b>Consultee</b> Mr and Mrs Hawker	<b>Agent</b> Mr Daniel Drayton Associate	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		<b>Person ID:</b> 1131519	LPC (Trull) Ltd <b>Person ID:</b> 1131522	<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure	A24. Christian Malford Revised Settlement Boundary	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The proposed changes to the Christian Malford Settlement Boundary are Unsound because they are not 1) Positively Prepared; 2) Justified; 3) Effective; or 4) Consistent with National Policy. The reasons for this are set out below:-                  We wish to promote a parcel of land for inclusion within the Settlement Boundary at Main Road, Christian Malford, SN15 4AZ. We strongly object to the omission of this site from inclusion within the revised Settlement Boundary.                  Firstly, the site fully complies with the Council's Topic Paper 1 Settlement Boundary Review Methodology (June 2017) for inclusion. Secondly it is allocated for residential development in the emerging Christian Malford Neighbourhood Development Plan ("the CMNDP") (2015 – 2035) under Site Ref HS3 together with several other land parcels including Site Ref HS2, which for completeness, we consider should also be included within the village boundary.                  Conformity with Settlement Boundary Review Methodology                  The extent of the site is shown in the aerial photograph provided below. It is entirely developed by buildings and hardstanding and sits alongside the proposed new Settlement Boundary, with frontage onto the Main Road. The Settlement Boundary Review Methodology states that settlement boundaries should follow clearly defined physical features. As can be seen below, [attached] this site is clearly defined by the main road and elsewhere by the outer walls of the buildings that subsume it.                  We consider that there is no logical reason why this site would not be included within the revised Settlement Boundary. The buildings that occupy the site already define the built edge of the settlement.                  Conformity with the Neighbourhood Plan                  The site has been allocated in the emerging CMNDP along with a cluster of other housing sites in the immediate area, namely HS2, HS4, HS5 and HS6. These are all proposed to be included within a Revised Settlement Boundary in the CMNDP. Site HS3 is shown below (as extracted from the CMNDP) [attached].                  The CMNDP describes the appearance of the site as an eyesore when entering the village from the west and that it can be visually improved upon by a residential redevelopment. The site is described as in an historically residential part of the village which the CMNDP is seeking to reinvigorate and integrate more into the core of the village. The omission of this land parcel and others from the village settlement boundary as proposed in the Housing Site Allocations Plan will run totally contrary to these objectives.                  In addition, and without prejudice to the individual merits of our client's land and buildings which clearly form part of the physical limits of the village, the adjoining land and buildings forming site HS2 (shown below) [attached] are also part of the CMNDP's suggested allocations and for completeness should be included within the Revised Settlement Boundary as well.                  Given this clear direction, the omission of these sites from the settlement boundary is a negative and retrograde step which is unsound and contrary to the Council's own settlement boundary methodology.                  The Draft Settlement Boundary Review Methodology states that sites will be included if they are allocated in the development plan for residential uses.</p>				

Appendix Q - Schedule of representations

	<p>Paragraph 7.27 of the Methodology states that  “Generally,whena neighbourhood plan submitted to the Council has reviewed a settlement boundary and proposes amendments, this Plan does not carry out a second re vie w of the boundarie s ”. *</p> <p>(*emphasis added)</p> <p>In these circumstances, there are clearly no reasons why the revisions proposed to this Settlement Boundary in the Housing and Site Allocations Plan should be different to the CMNDP changes.</p> <p>Therefore we propose that in order to make the Plan sound the Settlement Boundary should be amended to include this site and HS2 as shown in the Settlement Map Extract shown below:- [attached]</p> <p>Conclusion</p> <p>This site lies in an historically residential part of the village. It is visually unattractive when entering the village from the west. The Neighbourhood Plan, which is now at an advanced stage, is seeking to regenerate this part of the village and this site and others have been identified for residential development as part of this objective. The Council's Settlement Boundary Methodology states that where settlement boundaries have been reviewed and amended as part of a Neighbourhood Plan the Housing and Site Allocations Plan will not interfere. On this basis, the Christian Malford Settlement Boundary should reflect the Neighbourhood Plan.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4725361 / 4725271</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We consider it is necessary to expand on the points raised in this representation with regard to the site's status in the Neighbourhood Plan.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2041</a>	<b>Consultee</b> Mr Henry Nurkowski  <b>Person ID:</b> 703908	<b>Agent</b> Mr Daniel Drayton Associate  LPC (Trull) Ltd  <b>Person ID:</b> 1131522	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.49 Hilperton Revised Settlement Boundary			Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We consider the proposed changes to the Hilperton Settlement Boundary are unsound because they are not 1) Positively Prepared; 2) Justified; 3) Effective; or 4) Consistent with National Policy (please find enclosed our completed Representation Form). The reasons for this objection are set out as follows.</p> <p>Our objection concerns the proposed changes to the Hilperton Settlement Boundary that relate to the Lion and Fiddle Inn, Trowbridge Road, Hilperton. The extent of this property is shown on the aerial photograph below. [attached]</p> <p>The existing settlement boundary (as shown by the thick blue line below) [attached] currently bisects the site. As can be seen, the existing boundary also bisects the rear gardens of several other properties in an illogical way without following any clearly defined physical features such as boundary walls, fences or hedgerows.</p> <p>The proposed changes to the Hilperton Settlement Boundary (as shown below by the thin red line) follows a more logical and realistic line, apart from the Lion and Fiddle. Here the boundary line 'spike's' inwards and back out again for no logical reason. In contrast to changes affecting adjacent properties, this proposed new line follows no clearly defined physical features on the ground within the site, as can be seen from the aerial photograph.</p> <p>Furthermore, there is nothing in the Topic Paper 1: Settlement Boundary Review Methodology to provide an explanation. The proposed change does not appear to follow any part of the methodology. Clearly, this site relates more closely to the built environment than it does to the open countryside.</p> <p>Not only is this alteration illogical it is also unsound as it is contrary to National Policy. Given that this property is in commercial use, and is therefore previously developed land, it is considered that this alteration is unsound because it fails to recognize the potential value of previously developed sites, which according to the NPPF are suitable locations for housing.</p> <p>A far more realistic and positive approach would be to amend the boundary as shown below. This would effectively continue the Settlement Boundary across the site in a straight line in a way that is more 'in line' with adjacent properties on either site.</p> <p>This approach would be more consistent with the settlement boundary methodology because it would follow the line of the neighboring property's rear boundary (to the west of the site), which is a hedgerow, thereby following a clearly defined physical feature.</p> <p>Furthermore, this approach would be consistent with National Policy because it would recognize the potential of the site as previously developed land within a built up area. [see attached map]</p> <p>In conclusion the existing settlement boundary in this part of Hilperton is currently illogically drawn and requires revision. A new settlement boundary methodology has been prepared which appears to have resulted in logical amendments in some areas. However, in respect of the Lion and Fiddle site, there is no logic to what is being proposed and the plan is unsound.</p> <p>This representation provides a far better solution – one which is consistent with the Council's methodology and national policy which recognizes the value and potential of previously developed sites.</p>				

Appendix Q - Schedule of representations

<p><b>Attached files (Please see Objective)</b></p>	<p>4725649 / 4725650</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>We consider that it is necessary to discuss in further detail the settlement boundary as it relates to this site and understand from the Council why they have proposed this illogical change,</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2042</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Jeremy Cuff	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I write in response to the latest proposals with regard to sites available for development and possible changes to settlement boundaries in Warminster, related to the development of Home Farm, which could occur should these changes be adopted.</p> <p>For a number of years, there has been deep, real and valid concern from large swathes of the local community about the irreparable effect on the local area should Home Farm be developed. It is therefore crucial that it (and any other unsuitable sites) are not given over to unwanted and poorly thought out developments simply because there is a willing seller of the land.</p> <p>As the same principles and concerns apply that have been argued for many years, I hereby object to the inclusion of Home Farm and other unsuitable sites to be included within the settlement boundary.</p> <p>As the same arguments apply, I show below my original letter of objection to the development of Home Farm from December 2016 (in blue on the following pages);</p> <p>I write in response to the receipt of a communication from Wiltshire Council giving notice of an outline planning application for a large-scale development of Home Farm on the outskirts of Warminster. I strongly believe that this proposed development to be both unnecessary and wholly unsuitable for the areas which it would affect, and hereby object to this application.</p> <p><b>Local Opposition</b></p> <p>Though not an argument in itself, there is and has been a very large and passionate opposition to the development of Home Farm with many well thought out, considered and justified arguments put forward by the local community. These views must be taken into account, as must the conclusions of the Wiltshire Council Core Strategy and the Warminster Neighbourhood Plan.</p> <p><b>The Overall Suitability</b></p> <p>It is widely accepted that there must be provision made for new housing. The question is about where is it most suitable for these developments to be allowed. The best solutions are to “in-fill” land that is already within the boundaries of the existing town such as “brownfield” sites and plots of land that are not being used or beneficial to the local residents.</p> <p>If, as is the case in Warminster where it is necessary to pursue both approaches in order to fulfil future housing needs, it is critical that any additional land designated must be the most suitable and least impacting, fully taking into account the impact on the environment, the historical value, the character of an area and able to provide an easy way to include infrastructure and access (such as to the Warminster bypass).</p> <p>The proposed development of Home Farm fails on all fronts as an area to be given over to housing.</p> <p>It is my strong belief that these arguments must be fully taken into account, resulting in the local authority strongly and clearly rejecting this unnecessary, unsuitable and unwanted development.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2043</a>	<b>Consultee</b> Mr Jeremy Cuff  <b>Person ID:</b> 701827	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The Wildlife of Home Farm Home Farm itself is host to a large number of species either all year round or seasonally, many of which are threatened by the kind of development that is proposed here. Should it go ahead, this development will almost certainly result in many of these species becoming a thing of the past in this area.</p> <p>Birds - Of species that are known to be threatened or in decline, the Woodcock, a secretive wading bird of wet woodlands and margins has been sighted. Two species of owl, the Barn and Tawny Owl are both residents of Home Farm and will be very vulnerable to any large-scale development due to the loss of feeding habitat and the inevitable human disturbance it will bring. Local residents have also enjoyed the summer visitations of the now threatened Cuckoo that has made Home Farm its destination of choice for the last 3 summers.</p> <p>The fields and barns of Home Farm have also been significant for House Martins, Swifts and Swallows. The farmhouse itself is used annually by nesting House Martins whereas the barns are used by nesting Swallows. One very interesting late summer phenomenon has been very large gatherings of Swallows and House Martins that have been seen feeding over the fields prior to migrating back to Africa, suggesting that the fields of Home Farm are significant for them.</p> <p>Other species of birds sighted include, but are not limited to the following; Bullfinch, Spotted Flycatcher, Goldfinch, Coal Tit, Marsh/Willow Tit, Treecreeper, Nuthatch, Green Woodpecker, Great Spotted Woodpecker, Goldcrest, Sparrowhawk, Kestrel, Raven, Jay, Song Thrush, Fieldfare, Red Wing, Blackcap, Redstart and Whitethroat.</p> <p>Reptiles &amp; Amphibians – The secretive and threatened Grass Snake is known to be a resident of Home Farm and its margins. This species is especially sensitive to human disturbance and development. Common Newts and Frogs are also found in local water bodies and damp hedgerows.</p> <p>Mammals – Home Farm is regularly visited by Roe Deer, Foxes and Badgers. The area is also used by at least 2 species of Bats (and probably more), including what I believe are Horseshoe Bats that can be seen flying over the fields in the summer months</p> <p>Invertebrates – Insects are also a significant beneficiary of the Home Farm environs, with butterfly species (which are declining on a national scale) including Comma, Peacock, Speckled Wood, Dark Green Fritillary, Holly Blue, Red Admiral and Small Tortoiseshell. Moths species are numerous and include the Hummingbird Hawkmoth. Dragonflies and Damselflies are also resident.</p> <p>The Wildlife of the Immediate and Near Surrounds of Home Farm The immediate areas around Home Farm are very rich in flora and fauna, and contain national and even international rarities that are rightly subject to high levels of protection. The neighbouring habitats include mature hedgerows, chalk downland, wet woodlands, flood meadows and a chalk river (and tributary streams).</p>			

Appendix Q - Schedule of representations

	<p>Any further pressure on these neighbouring habitats due to human encroachment and disturbance will have an adverse effect on the prospects of many of these species surviving into the future, and should not be underestimated. It is the duty of the local authority to ensure that these habitats and the species that are found within them are rigorously protected.</p> <p>There are colonies of rare, declining and important species of butterfly in the areas surrounding Home Farm – Marsh Fritillary and the Duke of Burgundy Fritillary are the most significant. Other species include Adonis Blue, Dark Green Fritillary, Small Copper, Grizzled Skipper, Dingy Skipper, Small Blue, Wall Brown, Green Hairstreak and Common Blue.</p> <p>In terms of birds in the near surrounds of Home Farm, there are Corn Bunting, Linnet, Kestrel, Snipe, Yellowhammer, Stonechat, Red Kite and Buzzard.</p> <p>Other species of interest and worthy of consideration are Common Lizard, Voles and Otters.</p> <p>The River Wylde</p> <p>The River Wylde is a chalk stream/river (an internationally rare habitat) and is therefore worthy of special consideration and protection. It is home to Otters, Voles, Owls, Grass Snakes, Trout, Grayling and possibly Crayfish – each of which is very sensitive to pollution and disturbance. The proposed Home Farm development is very close to the Wylde and is likely to cause polluted run-off and disturbance that will be very detrimental to this fragile habitat (see also “Flooding” below).</p>
<p><b>Attached files (Please see Objective)</b></p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The fields of Home Farm are prone to flooding and pooling during periods of significant rainfall. The likely result of any development of these fields is that this water will be directed "downhill" and straight into the River Wylye, thus degrading the water quality as raised in the point above. In recent years, the Wylye has flooded across the nearby "Bishopstrow Roundabout" and flooding regularly occurs at the entrance to Home Farm, where the lane joins the main road.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.7			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Anyone living in the area of Home Farm and Warminster in general will be concerned about the effects of such a development on the local infrastructure.</p> <p>Local Public Services (Doctors, Schools, Dentists etc) – As Warminster will already receive a large number of new houses, this proposed development alone will create significant additional strain on local public services and is likely to be problematic to accommodate. Currently, the local schools are fully subscribed and it is difficult to obtain prompt doctors appointments. Therefore, the additional and unplanned addition of a further 135 homes will only add to that burden in an unsustainable and unhelpful way.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORT Savills The Yard Salisbury The allocation of the Yard site is justified for a range of inter-related reasons. The Housing Site Allocations plan should include the allocation of the Yard site near Hampton Park, Salisbury as set out in the accompanying statement. There will be a reduction in the risk of crime and antisocial behaviour on the site. The building on the Yard site is located accessibly to built-up areas, but is not occupied, has relatively limited security infrastructure (in terms of lighting, fences etc) and also lacks passive surveillance from neighbours. As a result the site has attracted significant antisocial behaviour, suffering significant vandalism and graffiti with the police having been called on a number of occasions, including on 16 September 2017. The redevelopment of this site would entirely remove this risk, which is a material benefit.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORT: Savills The Yard Salisbury The Housing Site Allocations plan should include the allocation of the Yard site near Hampton Park, Salisbury as set out in the accompanying statement. The current application for 14 units shows that environmental and technical issues can be resolved. The current application on the site (16/06690/OUT) has shown that highway, drainage, ecological, and archaeological matters are capable of being overcome in a residential-only development. There are no objections from statutory consultees or internal officers of the council, with the only outstanding matter relating to the precise delivery mechanism for alternative reptile habitat, which is currently found on the site.				
<b>Attached files (Please see Objective)</b>	4742944 / 4725356				
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	In order to adequately put forward the case for the proposed allocation of my client's site by exploring the weaknesses of the submission draft document and discussing the benefits of including the Yard site as an 'omission' site.				

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2052</a>		<b>Consultee</b> Trustees of The D J Pearce 1998 Settlement  <b>Person ID:</b> 1131544	<b>Agent</b> Mr Jon Gateley Associate Director  <b>Person ID:</b> 1131505	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft WHSAP is sound?</b>		No
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury omission sites	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SEE ATTACHED REPORT: Savills The Yard Salisbury</p> <p>The Housing Site Allocations plan should include the allocation of the Yard site near Hampton Park, Salisbury as set out in the accompanying statement.</p> <p>This document proposes that the Allocations Plan formally allocates, for up to 15 dwellings, a dilapidated former storage building and yard, immediately adjoining the built-up area of Hampton Park (hereinafter referred to as 'the Yard site'. It also proposes that as part of the relevant policy, provision is made for a large (11.4 hectare) area of meadow to be designated as an extension to Hampton Country Park, linked to residential development on the Yard site.</p> <p>It would be beneficial for the Yard site to be redeveloped soon, in parallel with the Country Park.</p> <p>The inclusion of the meadow as an extension to the Country Park is justified because it is in line with the Laverstock and Ford Parish Plan, and will contribute to public enjoyment of accessible countryside and the formal separation of Salisbury from Ford. A Development Plan policy to formally seek this will act as a catalyst to assist the landowner and Parish Council in driving forward preliminary discussions to achieve these ends.</p> <p>The landowner proposes that in parallel with allocating the Yard site for residential development, a further area of meadow land measuring 11.4 hectares should be delivered as an informal extension to the Hampton Country Park, with ownership being transferred to the Parish Council and the land being formalised as Access Land.</p> <p>This proposal has been discussed provisionally with the Parish Council on the basis of the following:</p> <ul style="list-style-type: none"> <li>transferring (at nil value) the freehold ownership of the meadow land to Laverstock and Ford Parish Council (LFPC), or alternatively, another non-profit community body of its choosing.</li> <li>an in-perpetuity covenant to preclude any subsequent development on the land unrelated to agriculture, recreational or educational public access;</li> <li>the reserving of a small area of land close to Green Lane for ecological enhancement, as required for reptile translocation from the development of the Yard site.</li> </ul> <p>Although no formal agreement has been reached at this stage, the landowner is continuing to maintain positive dialogue with the Parish Council and Ward Councillor aiming to achieve these objectives.</p> <p>Rationale for allocation of the Country Park extension</p> <p>The availability of the Meadow land for public recreation would contribute directly to two of the objectives of the Laverstock and Ford Parish Plan (2009), Part 3, under the heading 'protecting the environment', particularly relevant elements of which are:</p> <ul style="list-style-type: none"> <li>'Acquiring riverside land for public amenity use'</li> <li>'Increase the number of footpaths and cycle routes as further development takes place'</li> <li>'Where possible acquire any land that could be a public amenity and provide a green buffer'</li> </ul>			

Appendix Q - Schedule of representations

	<p>As noted above, there is no process in train for Laverstock and Ford to bring forward a Neighbourhood Development Plan. As such, the Allocations Plan being taken forward by WC offers the only opportunity, for the foreseeable future to formalise into Development Plan policy, the landowner's intention to offer the land for open access / amenity.</p> <p>The presence of a Development Plan policy formally seeking the Country Park extension will significantly assist in enabling, and ensuring, the planning application and associated Section 106 agreement to deliver the transfer of the land.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.14		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The reasons I believe make the proposal not sound are:- The development would be outside the village boundary - encroaching on a valuable green belt of land. The Bratton Parish Council seem to agree as it recently voted overwhelmingly to reject the proposals. How can Wiltshire Council override this decision?. Particularly as Planning permission has twice previously been rejected on the grounds that a housing estate in this location would represent "a substantial intrusion into the rural landscape".

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026. I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons: Positively prepared Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion. Justified The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable. For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026. I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons: Effective The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets. For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</p> <p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Consistent</p> <p>The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">2065</a>	<b>Consultee</b> Mr Conor Lee Hannick Homes & Developments Ltd  <b>Person ID:</b> 863519	<b>Agent</b> Mrs Louise Follett Principle Planner  Pegasus Group  <b>Person ID:</b> 1128217	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	3.1 - 3.4		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Pegasus on behalf of Hannick Homes & Development Ltd do not support the Plan with regard to the proposed revised settlement boundary at Hullavington. It is noted that the first Objective of the plan is to review the settlement boundaries. The following comments also relate to Section 6 Settlement Boundary Review. Paragraph 4.13 of the WCS allows for the review of the existing settlement boundaries through the Wiltshire Housing Site Allocations Plan. Paragraph 4.15 states that:			
	'the sesettlement boundaries will also be reviewed as part of the Wiltshire Housing Site Allocations Plan as set out in the Council's Local Development Scheme, in order to ensure they remain up to date and properly (emphasis added) reflect building that has happened since they were first established'. (my emphasis).  In some cases these are clearly out of date as they do not reflect recent planning permissions. Topic Paper 1 Settlement Boundary Review Methodology states that as the boundaries were not altered in the Wiltshire Core Strategy that they relied on the district local plan settlement boundaries. Para 1.3 states that the "Council has undertaken a comprehensive review of the boundaries to ensure they are up- to-date and adequately reflect changes which have happened since they were first established. The Plan amends settlement boundaries where necessary. It is also the prerogative of local communities to review them through the preparation of neighbourhood plans." It is noted that in the three case studies referred to in Topic Paper 1 that; Winchester City included in the settlement boundary "Built/ commenced allocations/ planning permissions". Purbeck includes "Uses and buildings (including sites with unimplemented planning permission) that have a clear social or economic function." Kettering Borough Council includes "Existing commitments for built developments." It is noted that the Wiltshire Council draft settlement boundary methodology included "Both built and extant planning permissions for residential and employment uses for areas which are physically/ functionally related to the settlement." However, following consultation with the Parish and Town Councils who disagreed that the settlement boundary should include allocations, development proposals and unimplemented planning permissions as those who objected to the inclusion of sites with planning permission considered that many planning permissions never get built out and that the final built form may differ substantially from the original permission; the methodology was changed. Only those planning permissions that have commenced are included in the settlement boundary as they are considered to provide much greater certainty.			

Appendix Q - Schedule of representations

	<p>The Topic Paper concludes “Therefore, the revised settlement boundary review methodology will include within the settlement boundary built or commenced planning permissions but exclude all unimplemented planning permissions. Nevertheless, it is recognised that settlement boundaries represent a snapshot in time. Unimplemented planning permissions subsequently built out can be included within a future review.” ‘Topic Paper 1 – Settlement Boundary Review Methodology’ states at Paragraph 7.23 that, “.the revised settlement boundary review methodology will include recreational or amenity spaces that relate more closely to the built environment, however it will exclude those which relate more closely to the open countryside. Nevertheless, it is recognised that these decisions will often be a matter of officer judgement that depends on the individual circumstance’.</p> <p>The revised settlement boundary for Hullavington does not include the school playing field, only the school buildings. This results in a peculiar settlement boundary form when the proposed allocation to the west of the village is taken into consideration. Moreover, this is not a space that provides informal recreation in the village but is a part of a key social facility in the village, ie: the primary school. It is noted that both the Purbeck and Kettering studies above include uses or buildings that had a clear social or economic function. The school playing field clearly has a social function providing space for external play and formal recreation at the primary school. It is unlikely that the land would be sought for development if it were included in the settlement boundary owing to its present use. Should any such application be made it would be subject to all the checks and controls undertaken by both Wiltshire Council and Sport England who seek to retain existing playing fields.</p> <p>The question is therefore what harm can result from the inclusion of the school playing fields within the settlement boundary such that a logical settlement boundary can be defined to the west of the settlement of Hullavington once the proposed housing allocation has been built. A plan showing the proposed settlement boundary in Topic Paper 1 and our client’s proposed revision to include the school playing fields is attached at Appendix 1. [see attached].</p> <p>In order for the plan to be found sound it is submitted that the methodology for settlement boundary revision should be amended to include the school playing field at Hullavington as the site provides for a social use and is unlikely to be found suitable for development as it is an active playing field, there is therefore no harm in including it in the settlement boundary for Hullavington village.</p>

The Plan amends settlement boundaries where necessary. It is also the prerogative of local communities to review them through the preparation of neighbourhood plans.”</p> <p>It is noted that in the three case studies referred to in Topic Paper 1 that;</p> <ul style="list-style-type: none"> <li>• Winchester City included in the settlement boundary “Built/ commenced allocations/ planning permissions”.</li> <li>• Purbeck includes “Uses and buildings (including sites with unimplemented planning permission) that have a clear social or economic function.”</li> <li>• Kettering Borough Council includes “Existing commitments for built developments.”</li> </ul> <p>It is noted that the Wiltshire Council draft settlement boundary methodology included “Both built and extant planning permissions for residential and employment uses for areas which are physically/ functionally related to the settlement.” However, following consultation with the Parish and Town Councils who disagreed that the settlement boundary should include allocations, development proposals and unimplemented planning permissions as those who objected to the inclusion of sites with planning permission considered that many planning permissions never get built out and that the final built form may differ substantially from the original permission; the methodology was changed.</p> <p>Only those planning permissions that have commenced are included in the settlement boundary as they are considered to provide much greater certainty.</p> <p>The Topic Paper concludes “Therefore, the revised settlement boundary review methodology will include within the settlement boundary built or commenced planning permissions but exclude all unimplemented planning permissions. Nevertheless, it is recognised that settlement boundaries represent a snapshot in time. Unimplemented planning permissions subsequently built out can be included within a future review.”</p> <p>The revised settlement boundary proposed for Cricklade is not up to date as it does not reflect the recent planning permission granted on appeal in June 2016 after a previous Inspector’s decision was quashed in the High Court on Land South of the Forty for 70 dwellings (13/07132),</p>			

Appendix Q - Schedule of representations

	<p>(APP/Y3940/W/14/2223354). It should be noted that site preparation works have taken place at this site and a reserved matters application is currently with Wiltshire Council for determination (September 2017). It is submitted that work at the site could be undertaken imminently on approval of the reserved matters application and therefore the site should be included within the settlement boundary for Cricklade. Indeed, the Regulation 16 Cricklade Neighbourhood Plan includes this appeal site within the proposed settlement boundary for the Town acknowledging that the site provides part of the housing land supply for the Town for the remainder of the plan period up to 2026. The issue is what harm would there be to the settlement strategy of updating the settlement boundaries to reflect the recent planning permissions and proposed allocations, in addition to those under construction. These sites will, after all, be considered against the housing supply of the Wiltshire Core Strategy and are consistent with the settlement strategy, and at Cricklade have already benefited from initial site preparation works. In order for the plan to be found sound it is submitted that the methodology for settlement boundary revision should be amended to include extant planning permissions to enable sites that have previously been considered to be sustainable and suitable for development by either Wiltshire Council or the Planning Inspectorate to be included within a settlement boundary. In the case of Cricklade this would require the revised settlement boundary in the Wiltshire Housing Sites mended to harmonise with that published in the Cricklade Regulation 16 Neighbourhood Plan – see Appendix 1 attached. [see attached].</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to express my comments during the consultation period. My comments concern site 1021 Church Lane.</p> <p>Accessibility</p> <p>The proposed development plans for 45 houses on a site which will require a roundabout from the A361. The plan does not appear to acknowledge the concerns of the 2026 Trowbridge Traffic Model (PFA Consulting) regarding traffic flow into Trowbridge. The stretch of road under consideration has been a site of many accidents. There appears to be a suggestion that developing this site will enhance the town because residents will walk into the town and use public transport. However everyone who lives here will tell you that the majority of people drive into town, people do not walk because it is a long and not particularly pleasant walk.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I am writing to express my comments during the consultation period. My comments concern site 1021 Church Lane. Heritage sites The plan does not recognise the number of grade II listed houses which adjoin the site at Church Lane. The setting of these properties will need to be considered. The Church Lane site is an ancient water meadow (source: English Heritage) and has hedgerows which have to be protected. The current landowner has removed one section of hedge (which should not have happened) just to gain sufficient access to get a tractor onto the land. Housing development, a roundabout and access road will not be possible without removal of hedges. The site has become a site where deer rear their young. This site should not be developed when numerous brownfield sites closer to the town centre are being ignored. This goes against national policy, brownfield sites should be developed before greenfield sites are considered.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Draft Wiltshire Plan SHLAA ref. 482.</p> <p>I wish to register opposition to the above proposed construction of up to 30 houses and commercial properties on this site, using the existing entrance to Farrells Field as the access to the 84039.</p> <p>This exit, which already has a 'pinch point' at the junction to the 84039 serves some 15 houses, some of which have 3 or even 4 cars per dwelling. These 30 or 40 cars already take up parking along the street in the development, as driveways are not built to accommodate these vehicles; causing difficulties in access for delivery vehicles etc. Goodness knows what would happen should there be a fire in the development. How would this narrow residential street cope with the vehicles from a further 30 properties?</p> <p>I hope these points will be taken into consideration when discussing this proposed development.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2071</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mr Barrie Mellor	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I wish to oppose the Draft Wiltshire Plan SH LAA reference 482 for the development of land at Farrells Field, Yatton Keynell. Whenever development in the village takes place, access to the B4039 is necessary and, in my opinion, the use of the Farrells Field entrance is not practical as the main thoroughfare.</p> <p>Currently there are 15 houses in Farrells Field and 39 cars parked in garages, drives, on the road and on occasions on the pavement. We are aware of the need for additional cars because the children of a number of families are unable to leave home because they cannot afford to buy their own property, so they have to have a car to enable them to go to work, college etc. and so we have houses with 3 or 4 cars per house. This has been demonstrated to my knowledge over the past 30 years (being one of those families). What will happen if another development of some 30 houses and commercial premises are expected and to enter and exit when it was thought necessary to install a 'Pinch Point' in the entrance so many years ago. There must be safe entrance for Fire and Rescue vehicles at all times and also for large vehicles such as the Council's refuse Lorries, oil tankers, for central heating and a whole range of other type deliveries.</p> <p>This has been demonstrated by the refuse collection in John Aubrey Close where the vehicle cannot turn around at the end of each cul-de-sac, and has to reverse back around the parked vehicles. The recent development at Blacksmith's Close also echo the parking problem.</p> <p>Whatever Planning Consents are sought, I am of the opinion that wider consideration is given to the changes in the lifestyle of Villagers. I am also aware of the desperate need to increase the numbers of all types of housing.</p> <p>Thank you for the opportunity to give you my thoughts.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2072</a>	Consultee Ms Catriona Wood  Person ID: 1131624	Agent  Person ID:	Do you consider the draft WHSAP is legally compliant?	
				Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am writing to bring your attention to the objections I am raising with regard the proposed building of the 740 houses alongside the Netherhampton road, A3094, near Hamham. My objections are because of the following reasons:-</p> <p>1. Lack of assessment, analysis and preplanning with regard the infrastructure to support this proposed build and the impact on the surrounding environment. Mainly the increase in traffic this build will cause with entrance and exit only being onto the A3094. The A3094 is already an extremely busy traffic thoroughfare for cars, vans and large lorries. At peak periods, it is not unusual to have vehicles backlogging from the junction of the A3094 onto the Harnham Gyratory to as far back as Parsonage Green where Harnham Road becomes Netherhampton Road. It is not unusual to also have a backlog of traffic at the junction of the A3094 with the A36, with cars experiencing delays as far back as the junction to the road leading to the Race Course and the back entrance to Wilton House. The building of the proposed school will also increase the amount of traffic leading to and from the site. The emergency services frequently use the A3094 to get to accidents in the city and on the A303, this will be impeded with the increase in traffic. There is very little signage within the city boundary on the A3094, to indicate there is a 30mph speed limit and frequently vehicles speed along the road until they are halted by the backlog. Several accidents have occurred on the A3094, including a fatality, as well as damage to private property. The front garden wall of our property has previously been destroyed when a van and trailer drove into it. Unlimited parking also compounds the situation with reduced spacing for vehicles to pass each other, resulting in damaged cars. It is impossible to widen the road within the city boundary. Has discussion taken place with the bus companies to support the transport needs as buses to the city centre do not extend to there and if there are no plans to extend will cause additional cars on the road as inhabitants go about their everyday business. The plans to build a bypass to support traffic passing along the A36 and A3094 through the city needs to be resurrected before proceeding with any more building. Particularly the Harnham Gyratory will not be able to take the additional traffic leading onto it if this building of 7 40 houses goes ahead.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2073</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Ms Catriona Wood	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I am writing to bring your attention to the objections I am raising with regard the proposed building of the 740 houses alongside the Netherhampton road, A3094, near Hamham. My objections are because of the following reasons:- 2. To meet the need for affordable houses it is widely reported that 68% of the build needs to be affordable housing. I object to the fact that the large building corporations that could only afford to build this size of plot will make a vast profit out of the disruption it will cause to people already living in the area and passing through the city. Large building companies such as Barretts, Persimmon and Taylor Wimpey have made two million plus pounds profit since 2010. They appear to only agree to 29% of houses being affordable housing, and less if they can negotiate when they have to agree to other properties such as a school. They make their profit from the rest of the houses being 4 or 5 bedroomed houses. There is not a need for this type of houses in Netherhampton, as many are already being built in other parts of the city and Wilton.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026. I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons: Positively prepared Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion. Justified The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable. For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Thank you for the opportunity to comment on the draft Wiltshire Housing Site Allocations Plan. You advice that Wiltshire proposes to: <ul style="list-style-type: none"> <li>Revise, where necessary, existing settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Wiltshire's Market Towns, Local Service Centre's and Large Villages; and</li> <li>Allocates new sites for housing to ensure the delivery of homes across the plan period to maintain a five-year land supply in each of Wiltshire's three Housing Market Areas over the period to 2026.</li> </ul> I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons: <ul style="list-style-type: none"> <li>Consistent</li> <li>The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</li> </ul> For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		As an 82 year old man born and bred in Salisbury I wish to register a protest rewgarding the continual development in and around Salisbury. I have yet to see any sign of any infrastructure in the form of roads etc to accommodate this development? Traffic is so bad that unless I pick the time I can never visit the eastern side of the city. That is not a nice thought. No developer to my knowledge has offered up plans to solve the chaotic traffic situation in Salisbury. All they want to do is to build more and more houses to increase their profits. Heavy lorries are causing atmosheric polution which is at a high level on some roads. For the sake of citizens of Salisbury, I hope whatever decision is arrived at I hope you will bear in mind my points of view.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Delivery Strategy																																																				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Five Year Supply and Housing Provision</p> <p>We do not consider that Wiltshire Council can currently demonstrate a five year housing land supply, despite the Council's claimed supply in the North and West HMA of 6.62 years (Topic Paper 3). We note the conclusions of Inspectors at recent appeals in the HMA namely at Forest Farm, Chippenham (ref: 3150514), the Grange, Hilperton (ref: 3167012) and Land to the south east of Wouth View, Lyneham (ref: 31625812) which also conclude that there is currently a five year supply in the North and West HMA. Despite this, the position in the North and West HMA is quite clearly marginal, with the Inspector for example in the Hilperton appeal decision stating that there was a surplus of only 59 dwellings, and the Inspector in the Lyneham decision stating there was a supply of just 5.11 or 5.05 year supply.</p> <p>For the North and West Wiltshire HMA, currently a 5% buffer is applied to the housing land supply to ensure choice and competition in the market for land. Notwithstanding this, there is a strong case that a 20% buffer is also applicable for the North and West HMA given the delivery record set out below demonstrating persistent under delivery in 8 of the previous 11 monitoring years (since the beginning of the plan period) and 8 of the past 9 years.</p> <table border="1" data-bbox="450 901 2181 1125"> <thead> <tr> <th></th> <th>06/07</th> <th>07/08</th> <th>08/09</th> <th>09/10</th> <th>10/11</th> <th>11/12</th> <th>12/13</th> <th>13/14</th> <th>14/15</th> <th>15/16</th> <th>16/17</th> </tr> </thead> <tbody> <tr> <td>Completions</td> <td>1,365</td> <td>1,609</td> <td>999</td> <td>926</td> <td>1,129</td> <td>1,028</td> <td>1,039</td> <td>1,517</td> <td>1,139</td> <td>915</td> <td>847</td> </tr> <tr> <td>Requirements</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> <td>1,237</td> </tr> <tr> <td>Performance</td> <td>+128</td> <td>+372</td> <td>-238</td> <td>-311</td> <td>-108</td> <td>-209</td> <td>-198</td> <td>+280</td> <td>-98</td> <td>-322</td> <td>-390</td> </tr> </tbody> </table> <p>Based on the findings of the Inspectors at the Hilperton and Lyneham Appeal Decisions, Wiltshire Council would be unable to demonstrate a five year supply in the North and West HMA with the application of a 20% buffer, and given the above delivery record, the situation can therefore be fairly described as precarious. It is also acknowledged at paragraph 2.14 of the DPD itself that:</p> <p>"Fluctuation can occur in the delivery of housing but a central objective of the Plan, ensuring surety of supply, s to sustain a 'five year housing land supply' over the remainder of the plan period for each of these HMAs."</p> <p>Furthermore, the current approach of the DPD wrongly assumes 100% delivery of existing commitments to deliver the 'residual' housing requirement, without taking into account any lapse of those planning permissions, and not ensuring a suitable buffer of sites above that residual requirement.</p> <p>Given the above, and in accordance with the NPPF, we consider that additional sites should be identified over and above the 'residual' housing requirement in the North and West HMA to provide a realistic prospect of achieving the planning supply and ensure choice and competition in the market for land. This approach will ensure that the plans objective to sustain a five year supply of land across the plan period is met.</p>						06/07	07/08	08/09	09/10	10/11	11/12	12/13	13/14	14/15	15/16	16/17	Completions	1,365	1,609	999	926	1,129	1,028	1,039	1,517	1,139	915	847	Requirements	1,237	1,237	1,237	1,237	1,237	1,237	1,237	1,237	1,237	1,237	1,237	Performance	+128	+372	-238	-311	-108	-209	-198	+280	-98	-322	-390

Appendix Q - Schedule of representations

	<p>Crucially, there would be no planning harm from this approach, as the housing requirement in Wiltshire is a minimum, not a maximum, and cannot therefore be considered a cap to sustainable development.</p> <p>We suggest that to plan positively to ensure future development needs are met, additional sites should be allocated in the North and West HMA equivalent to a 20% buffer above the 'minimum' requirement set out by the Core Strategy. This approach has been advocated by other Inspectors in the examination of Site Allocations Plan (Part 2) plans in other Local Planning Authorities where there has been record of persistent under delivery, for example recently in North Somerset.</p> <p>Suggested change:</p> <p>The content of the draft Plan should be re-considered to positively plan for the allocation of further sites given the North and West HMA's marginal five year housing land supply position, justification for a 20% buffer to ensure choice and competition in the market for land, and Wiltshire's housing requirements being a minimum;</p>

<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>Housing Delivery Strategy</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Swindon</p> <p>A joint Wiltshire and Swindon Strategic Housing Market Assessment (SHMA) and Functional Economic Market Area Assessment (FEMAA) are being produced jointly by Wiltshire Council and Swindon Borough Council, these reports will reflect the most up to date evidence on functional housing market areas and will form the evidence for Local Plan reviews for both Local Planning Authorities.</p> <p>The latest reported position on the SHMA identifies that Wiltshire and Swindon comprise four constituent functional housing market areas centred respectively on Chippenham, Salisbury, Swindon and Trowbridge, the SHMA also considers the Objectively Assessed Need (OAN) for Wiltshire and Swindon to be higher than currently planned for.</p> <p>Also of note is the joint FEMAA, which reportedly identifies three 'best fit' functional economic market areas (Swindon/M4 corridor, A350/West Wiltshire towns and Salisbury/Amesbury/A36) that broadly correspond with the three economic zones of the Wiltshire and Swindon Strategic Economic Plan.</p> <p>Cricklade, despite being located under the jurisdiction of Wiltshire Council, and within the North and West HMA has strong connections with Swindon. Swindon is an important nearby town and an employment and service centre for Cricklade, with Cricklade being located 9 miles away from the town centre, and just 5 miles from the settlement limits at the north west of the town with development at Tadpole Farm. Due to its location, in both cases, we consider it reasonable to assume that Cricklade will be considered within the 'Swindon HMA' in the SHMA, and 'Swindon/M4 corridor' in the FEMAA.</p> <p>Also of relevance to this representation therefore is the status of the five year housing land supply in the adjoining Borough of Swindon, of note considering the emerging joint Wiltshire and Swindon SHMA.</p> <p>The five year housing land supply position in Swindon (within the same Housing Market Area as Cricklade) is distressingly low, with the Borough being able to demonstrate less than 2.5 years supply. This position is articulated through a recent called-in appeal decision determined by the Secretary of State at the land to the east of Marlborough Road, Wroughton (ref: 3147902), however we are of the strong view that the level of supply in Swindon is in even lower than reported. This acute shortfall is undoubtedly having significant knock on effects to affordability in the functional Swindon housing market area. We note also that it is agreed that for Swindon a greater 20% buffer is applicable due to their record of persistent under delivery supply to ensure choice and competition in the market for land.</p> <p>Due consideration should be given to this emerging planning policy context, it being clear that Cricklade is a logical and sustainable location to meet part of the burgeoning unmet needs of Swindon, given its strong, practical connections and the direction of travel of the emerging joint Wiltshire/Swindon SHMA and FEMAA.</p> <p>Suggested change: Further allocations in the North and West HMA should be located at Cricklade given it is a sustainable location for development (as confirmed in its status as a Local Service Centre), as it is well placed to accommodate development as part of the wider Swindon HMA;</p>

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">2085</a></p>	<p><b>Consultee</b> Unknown Bloor Homes</p> <p><b>Person ID:</b> 556573</p>	<p><b>Agent</b> Mr Andrew Ross Director</p> <p>Turley Associates</p> <p><b>Person ID:</b> 556956</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>	<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>		<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>	<p>North and West HMA</p>				
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>Sustainable Location and Site Assessment Taking all of the above into account, it is acknowledged in the Wiltshire Core Strategy, and accordingly within the draft DPD that Local Services Centres, such as Cricklade, can accommodate “modest levels of development”. However, currently the DPD does not allocate any further development at Cricklade. For the Royal Wootton Bassett and Cricklade remaining community area i.e. outside of Royal Wootton Bassett itself, we acknowledge that the residual requirement set out by the Core Strategy, when taking into account commitments, has been fulfilled. However, within that remaining area, Cricklade is identified as a Local Service Centre with the next biggest settlements being Lyneham and Purton. As such, it is reasonable to assume that, given the settlement hierarchy, any further housing allocations to bolster this housing provision (whilst also bearing in mind our points above) should be directed to Cricklade. Despite choosing not to allocate sites at Cricklade due to its position in the settlement hierarchy, the DPD is inconsistent in its approach by allocating further sites in the East Wiltshire HMA at Market Lavington, a settlement, like Cricklade, identified as a Local Service Centre. Within the site selection methodology for the draft Plan (Topic Paper 1), the land at Horsey Down, Cricklade has not been assessed due to its location in a settlement not considered by the Council to be a location where land supply needs to be supplemented. Despite this, we consider the land at Horsey Down, Cricklade to be a wholly sustainable location for residential development with extremely limited site constraints (see Constraints Plan enclosed at Appendix 2), and well located to local facilities and services (see Facilities Plan enclosed at Appendix 3). [see attached] The site selection methodology assessed sites against a set of sustainability objectives, giving each site a score against each objective based on a scale of effects from major positive to major adverse. When considered through the same methodology that the land at Horsey Down would score well overall against the sustainability objectives, its sustainability credentials as a location for residential development being clear. Notably however we consider that comparatively, the site would score as well as any other Greenfield site considered in the draft Plan.</p> <p>Summary and Proposed Amendments to the DPD The preparation of this DPD gives the Council an opportunity to pro-actively plan for future requirements, and potentially safeguard against under delivery in to the future, should the need for additional housing provision be required (beyond the minimum required by the current Core Strategy). As outlined in this representation, the land at Horsey Down, Cricklade for sustainable residential development. Accordingly, we consider the following points and amendments should be considered in the preparation of the draft Site Allocations DPD: Bloor Homes’ site as the land at Horsey Down should be assessed and considered in the emerging Site Allocations DPD as an option for sustainable residential development to support the delivery of homes within Wiltshire;</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<p><b>Comment ID:</b></p>	<p><a href="#">2086</a></p>	<p><b>Consultee</b> Rivington Land</p> <p><b>Person ID:</b> 1131666</p>	<p><b>Agent</b> Diana Thomson Associate Director</p> <p><b>Person ID:</b> 1131662</p>	<p><b>Do you consider the draft WHSAP is legally compliant?</b></p>	
<p><b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b></p>		<p>Other</p>	<p><b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b></p>	<p><b>Do you consider the draft WHSAP is sound?</b></p>	
<p><b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b></p>		<p>THE MALTINGS AND CENTRAL CAR PARK SITE, SALISBURY CITY CENTRE</p>			
<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>SEE ATTACHED LETTER: Savills The Maltings Salisbury Reps 22 09 17</p> <p>Thank you for providing us with the opportunity to engage in the consultation on the Council's Pre- Submission Draft Housing Site Allocations Plan. We write on behalf of our client, Rivington Land, who act as THRE's development manager for the Maltings and Central Car Park site in Salisbury City Centre.</p> <p>It is acknowledged that the Maltings and Central Car Park site is already allocated for retail-led mixed use development within Core Policy 21 of the adopted Wiltshire Core Strategy (January 2015). Core Policy 20 identifies the Central Car Park site as having the capacity to deliver 200 residential dwellings as part of this allocation. However, the site has not been identified within the Pre-Submission Draft Housing Site Allocations Plan, which we comment on below.</p> <p><b>Comments on the Pre-Submission Draft Housing Site Allocations Plan</b></p> <p>As a general comment, we note that the National Planning Policy Framework (NPPF) requires all plans to be based upon and reflect the presumption in favour of sustainable development, with clear policies that will guide how the presumption should be applied locally. Paragraph 158 of the NPPF requires the use of a proportionate evidence base which provides adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.</p> <p>Core Strategy Policy 2 seeks the delivery of a total of 42,000 new homes in Wiltshire, including 10,420 in the South Wiltshire Housing Market Area (HMA), and 6,060 within Salisbury. The Pre-Submission Draft Housing Site Allocations Plan seeks to maintain these housing targets. We strongly feel that the Council has a responsibility to assist in addressing the national housing shortage, which particularly affects the south of England, and therefore more efforts should be made to allocate additional land for housing.</p> <p>Whilst the Maltings and Central Car Park site has an allocation within the Wiltshire Core Strategy, it is not explicitly mentioned within the Pre-Submission Draft Housing Site Allocations Plan. We strongly recommend that this document should be revised to take account of the circa 200 residential dwellings which could come forwards at the Maltings and Central Car Park site.</p> <p>Opportunities for more than 200 dwellings to be delivered at the site (as part of a retail-led mixed use development) should be encouraged to assist in meeting the national and local unmet housing needs and to "boost significantly the supply of housing", as sought by Paragraph 47 of the NPPF.</p> <p><b>Future Participation</b></p> <p>We trust that the above is of assistance in the preparation of the Housing Site Allocations Local Plan. We would like to be kept up to date with the progress and look forward to further opportunities to engage.</p>

Comment ID:	<a href="#">2087</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Mrs K Bond	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Church Lane; Southwick Court			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Contradictions in the Strategy</p> <p>A core strategy or local plan is considered "sound" when it is consistent with national policy.</p> <p>Paragraphs 72, 111,156 and 157 of The National Planning Framework and Planning Guidance documents state that local policy should provide:</p> <p>The infrastructure required in the area, be drawn up over on appropriate timescale (15 years suggested), identify where building would be inappropriate because of its environmental and historic interest and look to enhance the natural, built and historic environment.</p> <p>I do not feel that the strategy delivers the development and infrastructure required by Trowbridge. The core strategy includes the provision of new schools at the West Ashton Site however these will not be completed in time and there is no mention of the much needed development of the near empty town centre. In fact, the council has discounted a number of brownfield sites on the basis that they are within the existing settlement boundary. It seems unbelievable that greenfield sites have been preferred over the many brownfield sites which exist within the town. This is not sustainable development, rather opting for developer friendly sites.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I am writing to express my concerns regarding the Draft Wiltshire Housing Sites Allocation Plan. I live in the vicinity of the Church Lane and Southwick Court sites which have been put forward as preferred sites within the housing allocation plan. My concerns are as follows:</p> <p>Accessibility from sites 3565, 3620 and 1021</p> <p>The A361 is a blackspot for accidents both "in the dip" where cars currently turn into the country park as well as in the 30mph limit zone further up the hill. Further access points, even with tightened speed restrictions would only make matters worse. Also, sites at Church lane, Southwick Court and Old Brickfields are being considered as they would reduce traffic (as residents would walk into Trowbridge rather than using their own vehicles) No evidence has been provided that this would be the case. Since the majority of households have 2 cars there could be an extra 400 cars travelling along, the already congested Frome Road at rush hour. The Councils view that they can justify development here as opposed to local villages on the basis that it provides sustainable development is clearly in question. There is neither the infrastructure or setting for development on this side of town.</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I write in regards to the proposed housing allocation for sites 3565 and 1021, representing approximately 250 new homes. I have examined the published proposals and I know both sites well, as we own property on Westmead Crescent and Church Fields. I wish to strongly object to the proposed housing allocations on these sites.</p> <p>These sites, along with the Upper Studley site (which is also objectionable), collectively, form the boundary gap between Trowbridge and the villages of Southwick and North Bradley. Development in these sites must be very carefully considered: infilling will ruin the character of these lovely villages, overwhelm local services, and will have a vast array of other undesirable side effects.</p> <p>It may be argued that infilling these boundaries is not in accordance with paragraph 64 of the national planning policy framework, which states that “permission should be refused for development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions” – we do not believe that any sort of new housing estate in these areas can possibly hope to achieve improvement in character and quality of these villages or the Bradley Gardens estate they border, and in no way will help to improve the way they function.</p> <p>I also believe that infilling these gaps is in direct contradiction to previous Wiltshire Council planning documents and decisions. Specifically, in a recent Wiltshire Times article, Councillor Geoff Whiffen said “Wiltshire Council go against their own core strategy. That document stated that developments should not be built where villages are swallowed up by towns, yet that is happening.” This is an accurate way to describe the potential outcomes if these proposals are allowed through: it will be impossible to differentiate Southwick and North Bradley from Trowbridge. In this same article, Councillor Whiffen also referenced another recent planning decision that did pass: the erection of a solar farm off Axe and Cleaver Lane. Councillor Whiffen stated that the reason the solar farm was located in this position was specifically to avoid being near houses. Clearly, if housing is built around this development, that will no longer be true.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2097</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Britt Smith	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Further, in addition to killing two beautiful, well-established, historic villages, the proposal is ill-considered for a plethora of important reasons. First, all sites proposed on this side of town have poor access routes. Frome Road is already exceedingly busy at peak times of day, and the traffic is fast moving, with almost no drivers slowing to 30 miles per hour as they enter Trowbridge limits: many people drive through the dip on Frome Road at speeds approaching 50 miles per hour, and only ease up as they pass Church Fields and hit the stop light at College Road. I speak from experience when I say that turning out of Church Lane is dangerous – I lived at 4 Church Fields for 3 years, and I never got used to peeking the nose of my car out. If additional traffic is expected to enter and exit at Church Lane or at another narrow lane on either side of Frome Road, it is only a matter of time before there is a fatal accident. Further, there are natural barriers to building additional access off Frome Road – including Lambrok Stream and the ancient hedgerows on the side nearest site 3565. It is unfathomable to think of cutting into the hedgerows – and if my understanding is correct, prohibited to do under law for any permanent reason. These hedgerows meet the criteria for protection, and cannot be permanently breached. Building under or over Lambrok Stream also presents difficulties, and run off and pollution from cars using any road built must be carefully considered and mediated. Since moving to Westmead Crescent, I have also experienced the flow of traffic off Silver Street Lane and down Marston Road, which is very steady, despite the road being difficult to navigate due to the significant number of cars that park on both sides of the road. Many student drivers are also brought down this road to teach them how to execute parking manoeuvres. Most worryingly, there are many children in the area and there are no zebra or pelican crossings for them to use. Increasing the flow of traffic here to access Southwick Court or Elm Grove Farm will surely increase the possibility of accidents. Someone will get hurt. On a less severe note, the increased traffic on Frome Road and down Marston Road/Silver Street Lane will prove a nuisance to all residents on these streets – particularly those close to junctions. The increased number of vehicles will contribute to increased noise pollution, increased light pollution at night, and, likely, increased insurance premiums.</p>

		Person ID: 1131696	Person ID:	Do you consider the draft WHSAP is sound?	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.6 Southwick Court			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Beyond the danger and irritation that the increased traffic and poor access routes will entail, we must consider that adding several hundred additional homes into this area will strain local services. This area is served by Grove Primary School, Studley Green Primary School, and the Southwick Primary School. According to a recent article in the Wiltshire Times, Clare Medland, Wiltshire Council's head of school place commissioning, stated that "if hundreds of homes are built in Trowbridge and the surrounding areas, the area would desperately need one or even two new primary schools to cater for incoming pupils".</p> <p>I do not believe the three currently sufficient primary schools would continue to be sufficient in the event that the proposal goes through. There will not be enough places for local children, and as young families grow, the crisis will become even more dire. Many couples on these estates are just starting out – as they mature, they will start to have children and will need local places for them. Should we be forced to take our children to other areas of town or to enroll them in private primary schools so that they have the opportunity to attain a good quality education?</p> <p>When we attended the open day for the proposal at the County Hall over the summer, we had the opportunity to speak with Mayor Deborah Halik, who suggested there might be a new school on the West Ashton side of town. Of course, while the school spaces are certainly needed and would surely be appreciated by residents on that side of Trowbridge, it is not a sustainable distance from the Bradley Gardens estate – it cannot be walked, and therefore would require that I drive our children to and from school. Many other parents would be in the same situation. In this same vein, I do not believe that the doctor's surgeries or the Trowbridge Hospital are equipped to support a significant population influx. It can be difficult to find a practice accepting new patients, and once you are accepted, you face lengthy wait times to be seen due to the high number of registered patients needing care. Visiting the Trowbridge Hospital shows a similar problem: lengthy wait times by an understaffed, poorly equipped facility that cannot cope with any sort of serious injury.</p> <p>I would also suggest that, based on previously enacted pay freezes for emergency responders like fire fighters and police officers, Wiltshire Council is unable to support increased demands on emergency services for a significantly higher population. Council tax has been raised year on year, and yet these critical services have been unable to grow or to increase compensation for their employees, and other previously enjoyed services, like green waste, have been forced to be removed from the standard services supported by our council tax. Clearly, there is still significant budget pressure – adding more demands to this already strained budget will not result in good outcomes for any of us dependent on these services, even considering the increased council tax revenue these homes are likely to generate.</p>

There will not be enough places for local children, and as young families grow, the crisis will become even more dire. Many couples on these estates are just starting out – as they mature, they will start to have children and will need local places for them. Should we be forced to take our children to other areas of town or to enroll them in private primary schools so that they have the opportunity to attain a good quality education?</p> <p>When we attended the open day for the proposal at the County Hall over the summer, we had the opportunity to speak with Mayor Deborah Halik, who suggested there might be a new school on the West Ashton side of town. Of course, while the school spaces are certainly needed and would surely be appreciated by residents on that side of Trowbridge, it is not a sustainable distance from the Bradley Gardens estate – it cannot be walked, and therefore would require that I drive our children to and from school. Many other parents would be in the same situation. In this same vein, I do not believe that the doctor's surgeries or the Trowbridge Hospital are equipped to support a significant population influx. It can be difficult to find a practice accepting new patients, and once you are accepted, you face lengthy wait times to be seen due to the high number of registered patients needing care. Visiting the Trowbridge Hospital shows a similar problem: lengthy wait times by an understaffed, poorly equipped facility that cannot cope with any sort of serious injury.</p> <p>I would also suggest that, based on previously enacted pay freezes for emergency responders like fire fighters and police officers, Wiltshire Council is unable to support increased demands on emergency services for a significantly higher population. Council tax has been raised year on year, and yet these critical services have been unable to grow or to increase compensation for their employees, and other previously enjoyed services, like green waste, have been forced to be removed from the standard services supported by our council tax. Clearly, there is still significant budget pressure – adding more demands to this already strained budget will not result in good outcomes for any of us dependent on these services, even considering the increased council tax revenue these homes are likely to generate.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Additionally, it is a well-known fact that the area referred to as Southwick Court is seriously prone to flooding, and does so with regularity (some local residents who have been in Trowbridge for decades told me that it happens annually). In fact, after reviewing the Environment Agency Surface Flood Maps, I understand that some areas of these fields are actually classed as Flood Zone 3, which have a high probability of flooding. Likelihood of flooding will be further increased when development is executed within the catchment area of the water courses. It should also be noted that further surveys and photographic evidence of floods in recent years suggest that the flood plain borders as defined in available documentation are inaccurate and do not describe the full extent of the flood plain. This means that, even in areas that are “safe(r)” from flooding, there is still real danger of flood waters and thus, the areas surrounding the defined flood plains may not truly be suitable for development. We firmly believe that it is unfair to build new properties on a site that is known to have such issues and expect the new home owners to deal with them when they inevitably occur. We can avoid the heartache and expense for them by simply choosing to build elsewhere.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Destroying this green space will also mean the destruction of many mature trees and hedges, and will result in significant loss of wild life. Many birds, voles, mice, badgers, and foxes, amongst other things, make their homes in these fields. Stealing their homes for the benefit of complying with a top-down forced housing proposal is wrong. Specifically, though, we must call attention to the habitat requirements of Bechstein's bats. The Housing Allocation Plan identifies that there are Bechstein's bats in the area, but it fails to highlight the fragility of the species. According to the Bat Conservation Trust, this breed of bat is one of the rarest in the UK – in fact, there are only 6 breeding populations in all of the country. All bats and their roosts are protected by the law. Disturbing these fields, even with sympathetic intentions, could mean the total destruction of this incredibly rare breeding population and must be avoided. We should look to the example of what has happened to the bat population at Green Lane Woods as a warning and heed the lessons learned. From page 80 of the Habitats Regulations Assessment, released 21/9/2017: "Counts have been made of Bechstein's bats using bat boxes in Green Lane Wood since 1999. These show that the maternity colony regularly stood at 17 to 71 bats between 2004 (average 44 bats). Numbers fell dramatically in 2012 to 2014 to an average of two bats which coincided with the peak period of construction and occupation for the two nearby development sites." Proximal development has a demonstrable negative impact on Bechstein's bats. Care was taken to protect this species in the surrounding development work and it nevertheless decimated the maternity population in the colony. So-called protective measures are clearly insufficient to shield these populations from damage. Additionally, it should be noted that the Southwick Court area is part of the government's programme for Higher Level Environment Stewardship scheme. This means that significant measures have been enacted to preserve the landscape in respect of the character of the area. If development is allowed to proceed, all investment in this area for this purpose will be wiped away, and any previously achieved benefits in ecology or environmental conservation will be lost.

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Trowbridge			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>If further housing really must be built in Trowbridge, I question why existing brownfield sites, such as the derelict Bowyers site, have not been first in line for redevelopment.</p> <p>These brownfield areas are closer to public transport and closer to local amenities. Their development will not harm the local environment or wildlife nor the character of the surrounding area (in fact, they will significantly improve the visual appeal of the town), will improve safety by removing abandoned and potentially unstable structures, and because they are already in areas with safe access routes and slower moving traffic, will not substantially increase risk of vehicle accidents.</p> <p>It is in the interest of all residents of Trowbridge to see the brownfield sites redeveloped – developers should be properly incentivized to utilize this available space first before setting their sights on green spaces, and Wiltshire Council needs to enact and enforce planning guidelines that effectively police developer greed to protect all of its residents' interests.</p> <p>Wiltshire Council has an obligation to the residents of Trowbridge, Southwick, and North Bradley to ensure that the benefits of new housing outweigh the costs. It seems that, in this case, rather than properly exploring other options and understanding what their proposal means to local residents, they have simply chosen the easiest targets.</p> <p>I call on Wiltshire Council to stay true to their core planning strategy, to think about the people who will be impacted by these lazy proposals, to consider the permanent impacts of their decisions on the surrounding environment, and to choose what is right rather than what is easy. Once built, these homes cannot be unbuilt – and we must all live with the consequences.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	I feel that The planners have not been to view the sight of the proposed housing developments in Netheravon and Harnham. The infrastructure is not there to support extra housing. Surely the roads should be in place before building and I have not heard of any plans to insure that the infrastructure will be in place. The traffic into Harnham is already over 70% Capacity and once it reaches the Harnham gyratory the results will be chaotic.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		With respect to the Ridgeway Farm Development I have concerns about the quantity of houses that are to be built which seem to have grown from the original 10 to 40+. I supported the original 10 reluctantly, simply on the grounds that there is a need for more housing and I think that Crudwell has to take its share with other villages in the area.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I share concern with many of the issues that have been put forward by others and in particular the flooding of late which luckily missed my house, but caused serious distress to the villagers affected some of whom I have known for decades.</p> <p>This village sits at the centre of a bowl, you can freewheel a long way on a bike from both East and West on the A429 into the centre and from North on Tetbury Lane - and so can water. What is not so obvious is that the road where the A429 sweeps up to the garage is actually an unintentional levee which is why Goosey Corner is so prone to flooding without constant maintenance and will remain so. In storm conditions this aggravates an already stressed system. The flood plain to the South has been inadequate in clearing storm water in the past and there is no reason to think it will improve. Thus pouring concrete by the ton just up Tetbuty Lane is only adding to the misery lower down thus my reluctance to support the additional 10 houses.</p> <p>However, the above is to state my general position on this issue.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>An item which I have not seen mentioned anywhere else is a path that is under construction from the Playing Field down to a position just opposite the beginning of the development. Its construction has involved grubbing out some of the embankment and work to shore up the remaining earth and also, by the look of things, the removal of a telegraph pole in due course, quite a serious bit of work. The path has obviously been primarily provided for the use of the prospective purchasers of the houses on the Ridgeway development. I have no problem with the path per say but it does beg the question, what about the rest of us? Many years ago I was involved with others from the village in the construction of the what was then termed the 'Swing Park' which is now part of the Playing Field and the effort put in then and since was on behalf of all the residents of the village. The path being provided I am sure is available for all to use but the difficulty for the rest of us is getting to it. Just a little further down towards the village Tetbury Lane is very much a country lane with high hedgerows and no easy escape route if there is a traffic mishap. Thus the path rather gives the impression of a somewhat privileged and safer access for some to a playing field and car park which many of us put effort into providing for the common good and will now have to contend with additional traffic generated by this development to get there. There is also the puzzle as to why the widest part of the road is effectively widened by the addition of a pavement and the narrowest part is ignored. Why wasn't the path extended down to the Butts!</p> <p>I can see what the sales force for the development get out of the provision of this path, the benefit to the rest of us is not so clear! My hope with this email is to contribute to the debate about providing a reasonable and proportionate number of new houses and safe access to the Playing Field for the village.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED DOCUMENTS: Sydenhams yard letter, Sydenhams yard site plan Please find attached details for a proposed site for consideration as part of the local Plan review process. Below I have set out a brief appraisal of the site and its context that I trust will assist you in assessing the suitability of the site for inclusion within the review as a potential residential allocation. Site Address -Sydenhams Timber Merchants, Bradley Lane, Maiden Bradley, Warminster Wilts BA12 7JR. Site Area - As shown edged red on the attached plan. Ownership - The Trustees of Lord Seymour's 1971 Settlement and Sherborne Holdings Ltd. The owners are willing to release the site for development. Current Use - Timber Yard in connection with Sydenhams Timber Merchants. Area - Approximately 0.88ha   2.18 acres. Proposed Development - Residential Development with associated infrastructure. Infrastructure Requirement/Capacity of utilities - Believed to be adequate but further investigation required Market Viability Good Availability Within 5 years Constraints The site lies outside of the current Maiden Bradley village curtilage and is within the village Conservation Area. Opportunities The site has an existing brown field use and adjoins the existing Settlement Boundary. The site would form a natural extension to the existing Settlement Boundary and could make a contribution to housing needs without undue impact on the wider planning objectives. I trust this provides you with sufficient detail for consideration of the site as part of the Wiltshire Housing Site Allocation Plan.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2113</a>	<b>Consultee</b> Mrs A.C. Purves Parish Clerk  Pitton and Farley Parish Council  <b>Person ID:</b> 392675	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>		
				<b>Do you consider the draft WHSAP is sound?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Figure		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	A.74					
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Please note that the consultation response sent earlier today (below) was incorrect, and the following text represents the Parish Council's agreed view.</p> <p>Until the flooding issue is resolved, it is not appropriate or advisable to include additional land within the settlement boundary. We do not want a repeat of Salisbury District Council's action in the 1970s of approving plans for new houses against local advice, only for the foreseeable and predictable increase in flood damage to occur.</p> <p>Pitton &amp; Farley Parish Council notes the proposal to increase the settlement boundary by adding a large area (1.15 ha) in the middle of the village, and other areas to the west. The Parish Council formally objects to the inclusion of the land in the middle of the village within the settlement boundary as part of this review.</p> <p>Pitton is a village that suffers periodically (recently every three years on average) from very serious groundwater flooding. Houses are flooded, roads are closed, businesses are adversely affected, and in particular the foul water drainage system is overwhelmed, with homes suffering from backflow of sewage into their toilets. The flooding and its consequences cause considerable distress for extended periods of time. In short, flooding is a local disaster.</p> <p>Pitton &amp; Farley Parish Council believes that it is premature to extend the settlement boundaries until works to fully alleviate groundwater flooding and its consequences are completed and proven to work successfully in actual flood conditions.</p> <p>Therefore we formally object to the proposed changes to the boundary.</p> <p>Please see below the Parish Council's response to the above mentioned consultation.</p> <p>"Pitton is a village that suffers periodically (recently every three years on average) from very serious groundwater flooding. This causes distress to many who live in the village, as houses are flooded, roads are closed, businesses are adversely affected, and in particular the foul water drainage system is overwhelmed, with homes suffering from back flow of sewage into their toilets. In short, flooding is a local disaster.</p> <p>Pitton &amp; Farley Parish Council notes the proposal to increase the settlement boundary by adding a large area (1.15 ha) in the middle of the village and other areas to the west. We do not feel that it is appropriate at this time to extend the settlement boundaries until the flooding issue is resolved, whatever the financial cost. We would not want a repeat of Salisbury District Council's action in the 1970s of approving plans for new houses against local advice, only for the predictable increase in flood damage to occur.</p> <p>Pitton &amp; Farley Parish Council believes that it would be irresponsible, even negligent, to extend the settlement boundaries until it is agreed by this Council that works to fully alleviate groundwater flooding and its consequences are successfully completed.</p> <p>Therefore we formally object to the proposed changes to the boundary."</p> <p>the Council very much hopes you will take its views and local knowledge into account.</p>

Comment ID:	<a href="#">2114</a>	<b>Consultee</b> Mr David Wilson  <b>Person ID:</b> 1131555	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H3.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I support the Council in principle in allocating additional land for much needed additional housing, however S1027 and S1028 are not sound because any mitigation proposed as part of the Transport Assessments accompanying a future planning application will not be able to mitigate the severe congestion at the A3094 Harnham Gyratory and Newbridge Road. The junctions are at capacity and currently suffer from significant queueing at various times daily. The queues extend back along Harnham Rd adjacent to residential properties. It is a key constraint on the highway network.</p> <p>The majority of development sites in the draft allocation plan are located in areas where investment in highway infrastructure can adequately mitigate the additional development traffic by providing additional capacity on the highway network. However in this case S1027 and S1028 are not sound because Newbridge Rd is the only vehicular river crossing between Harnham and Salisbury (other than the old Harnham Bridge). Due to land constraints at the junctions either end of the Newbridge Rd there is no scope to significantly increase capacity. In the 1990's the former Wiltshire County Council proposal to overcome this constraint by proposing a new river crossing further downstream (Downtown Rd, Harnham to Southampton Rd) was rejected at Public Inquiry. There is therefore no scope to provide a new link to the main road network to the east and north east of Salisbury.</p> <p>As a result the site will not be able to be delivered and will result in Wiltshire Council failing to meet their land supply obligations. The detailed Transport Assessment at the outline planning stage will find the site to be unviable. I therefore strongly object to the land at sites S1027 and S1028 being allocated as they cannot be justified when compared with other more viable sites north of Salisbury (ie north of the River Nadder constraint). Alternative SHLAA sites to the north of Salisbury are much more viable and deliverable as they can easily be linked to the principal road network ie A36 Southampton/A30 Andover/A303.</p> <p>I am a chartered civil engineer with many years of experience working as a highway development planner. I believe it is not sound to allocate this site and your summary of SA OBJECTIVE 10 (see below) confirms that a detailed transport impact assessment has not yet been done and will be required to understand impacts on the local and strategic road network and how these will be mitigated. If this work is done after the site is allocated and the additional traffic cannot be mitigated the site will not gain permission and as a result the Council will be at a significant risk of failing to deliver their housing supply targets</p> <p><b>SUMMARY OF SA OBJECTIVE 10</b></p> <p>The site is located to the South of Salisbury, 1.7km from the city centre. This site is in a fairly accessible location for the city centre that could help reduce the need to travel and/or reliance on the private car. A detailed transport impact assessment will be required to understand impacts on the local and strategic road network and how these will be mitigated.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I am writing to express my concern about the proposed development of 40 dwellings at Ridgeway Farm Crudwell. As this would represent around a 20% increase in the current number of dwellings in the village I feel strongly that it will pose increased traffic problems, and pressure on local resources. There is no strategic need for a site of this scale in Crudwell And so I ask you to seriously consider justification for this development.

<p><b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b></p>	<p>SEE ATTACHED DOCUMENTS: Response Harnham Trading Estate, Site Location Plan - Harnham Trading Estate We write on behalf of our client, Legal &amp; General Property Partners (Industrial Fund) Limited and Legal &amp; General Property Partners (Industrial) Nominees Limited (“Legal &amp; General”), who have an interest in a site at Harnham Trading Estate and have begun working to develop proposals for its redevelopment. Our client’s site currently comprises a number of commercial buildings, but is not located within a designated employment area. The site is currently located outside of, but immediately adjacent to, the designated settlement of Salisbury. The Pre-Submission Draft Housing Site Allocations Plan seeks to amend the settlement boundary such that the site at Harnham Trading Estate will be included within the settlement of Salisbury, which is welcomed. However, our client is seeking for the site to be allocated for residential development, which would be in line with national guidance which seeks the best and most efficient use of land. In addition local planning policy seeks for residential development to be focused in Principal Settlements such as Salisbury, where the site is located. We set out our detailed comments and justification for the residential development of the site within this letter. <b>The Site</b> The site measures approximately 2.1 hectares in size and is broadly triangular in shape. The site is located on the western edge of West Harnham and is accessed from Netherhampton Road / A3094 to the north. The site is bound by residential properties to the east and by Harnham Business Park, comprising a cash and carry wholesaler, to the west. To the south of the site is a an extensive tree belt beyond which lies open countryside. A site location plan is enclosed with this letter for your reference. The site currently comprises a number of commercial buildings. Areas of hardstanding used for parking associated with each unit are provided across the site. An access road runs north-south through the site from Netherhampton Road to the north, providing vehicular access to all of the units. <b>Comments on the Pre-Submission Draft Housing Site Allocations Plan</b> As a general comment, we note that the National Planning Policy Framework (NPPF) requires all plans to be based upon and reflect the presumption in favour of sustainable development, with clear policies that will guide how the presumption should be applied locally. Paragraph 158 of the NPPF requires the use of a proportionate evidence base which provides adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. The Council’s adopted Policies Map identifies the site outside of the designated settlement of Salisbury, albeit it is immediately adjacent to the settlement boundary. The Pre-Submission Draft Housing Site Allocations Plan seeks to amend the settlement boundary such that the site at Harnham Trading Estate will be included within the settlement of Salisbury.</p>				

#### Appendix Q - Schedule of representations

Whilst the inclusion of the site within the settlement boundary is welcomed, we understand that as a result of this, the site was not taken forward to be allocated as a housing site (as set out in the Salisbury Community Area Topic Paper, June 2017). The site is considered to be suitable, available and deliverable for residential development and as such, a housing allocation is sought.

##### Proposed Loss of Existing Commercial Use

Despite the site not being specifically allocated as an area protected for industrial or employment uses, Core Strategy Core Policy 35 seeks to protect any land or buildings currently or last used for activities falling within use classes B1, B2 and B8, for such uses. However, whilst the site is currently occupied, it is not considered to meet current needs and continued use of the site for commercial uses is not considered to be appropriate in light of the existing and emerging surrounding residential context.

##### Proposed Residential Development

Core Strategy Policy 2 seeks the delivery of a total of 42,000 new homes in Wiltshire, including 10,420 in the South Wiltshire Housing Market Area (HMA). The Pre-Submission Draft Housing Site Allocations Plan seeks to maintain these housing targets.

We strongly feel that the Council has a responsibility to assist in addressing the national housing shortage, which particularly affects the south of England, and therefore more efforts should be made to allocate additional land for housing. We consider that the site at Harnham Trading Estate should be allocated for residential development within the Housing Site Allocations Plan in order to assist in meeting the national and local unmet housing needs and to “boost significantly the supply of housing”, as sought by Paragraph 47 of the NPPF.

The site is in a sustainable location for residential development. It is not within the designated Green Belt and is not within an area at risk of flooding.

The site is currently located adjacent to, and is proposed to be included within, the settlement boundary of Salisbury, which is considered to be a Principal Settlement within the Core Strategy. Core Strategy Policy 1 states that Principal Settlements should be the primary focus for development, including the provision of significant levels of new homes. Core Strategy Table 1 seeks the delivery of 6,060 new dwellings in Salisbury City / Wilton Town specifically.

In addition, the site comprises a brownfield site where the development of new residential dwellings is encouraged by both national and local policy. Core Strategy Policy 36 states that the regeneration of brownfield sites within the Principal Settlements will be supported.

##### Indicative Capacity

Legal & General have begun working on proposals for the redevelopment of the site for residential use. Reference has been made to the Council's Strategic Housing Land Availability Assessment 2012 (published February 2014) with regards to the capacity of the site. In addition, proposals are being developed in response to the design and characteristics of the surrounding area.

It is anticipated that the site could accommodate up to approximately 80 dwellings, which would make a significant contribution towards local housing supply. This would result in a density of approximately 40 dwellings per hectare which is considered to be appropriate for this suburban location and would make the best and most efficient use of this brownfield site, in line with national policy guidance. Furthermore, this quantum of development would increase the financial viability of the site in order to achieve the Council's targets for the provision of affordable housing.

##### Summary

Overall, the continued use of the site at Harnham Trading Estate for commercial use is not considered to be appropriate. The Council's Employment Land Review recognised the poor quality of the site and commercial spaces as well as the constraints on ongoing commercial use as a result of conflicts with neighbouring residential dwellings. Overall the ELR concluded that the site could be released for non-employment uses.

The redevelopment of the site for alternative uses would have significant regeneration benefits.

Redevelopment of the site for residential development would help to “boost significantly the supply of housing” as sought by Paragraph 47 of the NPPF and is considered to make the best and most efficient use of this sustainable and accessible brownfield location.

Residential development of this brownfield site within a Principal Settlement is supported by national and local planning policy. In addition, the allocation of adjacent sites for residential development further supports that the location to the west of Harnham is suitable for the delivery of new housing.

The site is considered to be suitable, available and deliverable for the development of up to 80 new residential dwellings. As such we consider that the site should be allocated for residential development within the Housing Site Allocations Local Plan.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>We have examined the draft Wiltshire Housing Site Allocations Plan and specifically the proposed development of 30 houses on the land east of Farrells Field Yatton Keynell. The proposed development site lies outside the current settlements boundary in open country. As residents that back on to the site we know it well. In response to question 6 on the form, I set out my reasons for the plan being unsound as follows:</p> <p>1) No evidence of housing need for Yatton Keynell                  The proposal for 30 houses on the land east of Farrells Field has been put forward at County level in order to meet the County's strategic housing requirements for the Chippenham remainder area. The site allocation for 30 houses in Yatton Keynell is not based on any evidence that there is a specific local housing need in Yatton Keynell. Appendix E of the Chippenham Community Area topic paper, confirms that no local housing needs survey was undertaken as part of the draft Plan. The proposed dwellings should be justified with evidence that there is a specific local need and the plan should confirm how that need will be met.                  In light of the above, the plan is unsound, it is not justified and it is not consistent with national policy set out in paragraph 158 of the NPPF, which states:                  'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local Planning Authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals'.</p> <p>3) Site selection process unsound                  Para 5.13 of the Chippenham Community Area Remainder Topic Paper - June 2017 states that the village of Sutton Senger, which has an identified housing need, was discounted as a village that could accommodate additional housing growth. The Plan states that the village primary school cannot accommodate growth and therefore the village cannot accommodate more housing. The exclusion of the village from the housing allocation plan seems unjustified as the plan should consider all housing types not just those for families. Just because the school is full that doesn't exclude new housing being delivered for elderly, and people without children (flats, starter homes). If some additional housing was accepted in Sutton Senger it might reduce the overall need for housing which has been identified in the other larger villages where there is considered no housing need.                  The village of Yatton Keynell which has no evidence of identified housing need (this is minuted in the Parish Council Meeting minutes of November 2014 [see attached document]), and no Neighbourhood plan, has been identified for having a significant proportion of the 138 dwellings needed to meet the Chippenham Area Strategic housing target.                  The housing sites selection process is contrary to Para 159 of the NPPF. It states:                  'Local planning authorities should have a clear understanding of housing needs in their area. They should:                  -prepare a strategic Housing Market Assessment to assess their full housing needs and .....TheStrategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which ..... addresses</p>				

Appendix Q - Schedule of representations

	<p>the need for all types of housing, including affordable housing and the needs of different groups in the community such as but not limited to families with children, older people, people with disabilities, service families and people wishing to build their own homes...';</p> <p>Another factor, which was not considered as part of the site selection, was the landscape constraints in place for the village of Yatton Keynell. A significant amount of Yatton Keynell settlement and adjoining land is washed over by AONB rendering a large area of land that is not available for development . This fact should have been identified as a constraint in the overall site selection process and taken into account when considering the amount of new development proposed in the village .</p> <p>Withdraw land at east of Farrell's Field and allow a neighbourhood plan to be prepared, giving local residents the opportunity to explore other site options in a proactive way, in line with NPPF para 15.</p>

				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>2) Absence of a Neighbourhood Plan                  Of the five large villages within the Chippenham Community Area, Yatton Keynell is the only village without a Neighbourhood Plan. It is acknowledged that delivery of housing supply through a community led Neighbourhood Plan offers a positive and proactive approach to delivering housing need rather than a site selection process which is only put forward by landowners.                  The local Ward Councillor called for a Neighbourhood Plan to be made at a Parish Council meeting back in November 2014 (copy of minutes attached). This was suggested in response to specific concerns that were raised by the community in relation to the proposal for development of land adjacent to Farrells Field. The Parish Council has not addressed this request.                  In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF, which states:                  'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be engaged in a proactive way, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <p>5) Lack of community engagement and poor consultation                  The draft plan process is lengthy, complicated and difficult for the public to become engaged with. The planning process, which has taken place and resulted in the Farrells Field site being put forward for housing, has not been meaningful, as it has not provided opportunity for the local community to comment on or consider alternative sites. The Parish Council have not engaged in the plan process or adequately represented the views of the local people in response to the proposal being put forward.                  I consider the proposed allocation for such a large site, which will have such a significant impact on the community in Yatton Keynell, should be the subject of a more meaningful consultation process by means of a Neighbourhood Plan.                  It is my understanding (from P61 of the Chippenham Community Area Remainder Topic Paper), that of the five large villages identified as part of the Chippenham remaining area, none of the Parish Council's responded to the Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement . It states in para 2.23:                  'Town and parish councils are the most local tier of democratic representation and, as such, they provide a key link with local communities. They are a specific consultation body under the Town and Country Planning (Local Planning) (England) Regulations 2012. Regulation 18 requires that Wiltshire Council has to consult with specific consultation bodies which they consider may have an interest in the subject. Wiltshire Council is committed to continuing to consult with the local councils'.                  In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF, which states:                  'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be proactively engaged, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p>			

Appendix Q - Schedule of representations

	Withdraw land at east of Farrell's Field and allow a neighbourhood plan to be prepared, giving local residents the opportunity to explore other site options in a proactive way, in line with NPPF para 15.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		4) Infrastructure issues Drainage is considered to be a fundamental constraint on the land adjacent to Farrells Field. It is acknowledged in the Council's Sustainability appraisal, that there are moderate adverse effects related to the limited drainage supply capacity in the local distribution mains and that there is a potential need to serve the site by a pumped connection for foul water and also that the site falls within a groundwater vulnerability area. These issues are identified in the site allocation supporting text, and the need for a capacity appraisal and further assessment is required. Infrastructure needs should be identified and established prior to the allocation of the site. Withdraw land at east of Farrell's Field and allow a neighbourhood plan to be prepared, giving local residents the opportunity to explore other site options in a proactive way, in line with NPPF para 15.

A significant amount of Yatton Keynell settlement and adjoining land is washed over by AONB rendering a large area of land that is not available for development . This fact should have been identified as a constraint in the overall site selection process and taken into account when considering the amount of new development proposed in the village .</p> <p>5) 30 dwellings will have a significant impact on the character of the area</p> <p>Para 5.31 identifies the land East of Farrells Field, Yatton Keynell for the development of approximately 30 dwellings. The Council claims that 'it is in a location that has the capacity to accommodate change from an environmental, heritage and landscape perspective, and could assimilate into the existing built form, whilst positively conserving and enhancing the village-edge setting' . However, a large-scale proposal of 30 additional houses at the entrance to the village is not suitable and will have a negative impact on the character of the area.</p> <p>5) Environmental Considerations</p> <p>The land adjacent to Farrells Field is in open countryside outside the current settlement boundary. It has been uncultivated for over 15 years during which time it has become an attractive natural buffer zone separating Yatton Keynell from the two small communities at Tiddlywink and Cold Harbour to the southwest. It is rich in wildlife and mature trees running parallel to the road and alongside Blacksmiths Close which form important natural screening and habitats. The use of the site for the development of 30 houses would result both in the loss of the natural habitat and loss of the screening. It would also adversely impact on the feathering of development at the village boundary. For these environmental and visual impact reasons I consider that this site is not suitable for housing development.</p> <p>Withdraw land at east of Farrell's Field and allow a neighbourhood plan to be prepared, giving local residents the opportunity to explore other site options in a proactive way, in line with NPPF para 15.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.3 Elizabeth Way		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The site at Elizabeth Way (SHLAA 263) has been identified for the allocation of 205 dwellings, which is significantly lower than what the site could sustainably deliver. This raises the issue of major under-development of the site which, in combination allocation has not been positively prepared or justified.</p> <p>As stated above the current planning application for the site is for 170 dwellings, the remainder of the allocation is in Barratt Home's control and it is understood from their technical assessments that their site can sustainably accommodate approximately 175 dwellings, in combination this would equate to 355 dwellings.</p> <p>This allocation is generally supported by HGT Developments LL, however, in order to make the plan sound, the allocation for the land at Elizabeth Way should be increased significantly to properly reflect the true capacity of the site. This will ensure the most efficient use of the site and will ensure that the proposed allocation is positively prepared, effective, justified and consistent with National Policy. [for representation in full see attached]</p> <p>In summary the continued allocation of the site will:</p> <ul style="list-style-type: none"> <li>result in a deliverable residential development (to assist in meeting the Council's housing targets) in a sustainable location resulting in efficient use of the site;</li> <li>the provision of a range and mix of dwellings to meet housing needs, allowing provision of a balanced a mixed community. A wide range of high quality and well designed housing will contribute to existing communities and enhance local facilities;</li> <li>assist the District's housing need, including a diversity of housing stock for both market and affordable housing;</li> <li>achieve development in a sustainable location, with easy access to pedestrian routes, local facilities and amenities and close to public transport including bus routes;</li> <li>assist in the vitality and viability of small businesses and services within the settlement;</li> <li>deliver public open space;</li> <li>enhance the ecology of the site including an increase in tree planting, the ecological enhancements will support a range of species, in particular bats, birds and invertebrates;</li> <li>retain and enhance existing vegetation on the site;</li> <li>a substantial area of open space, creating a green network through the site, including a Local Equipped Play Areas (LEAP) and a Local Play Area (LAP) and areas of ecological enhancement are proposed;</li> <li>the public footpaths shall be improved on site to improve existing permeability; and</li> <li>benefits as set out in the draft S106 heads of terms include contributions to local social infrastructure, such as; education, leisure and green infrastructure and affordable housing</li> </ul>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Planning was granted for 10 houses on original barn footprint from initial application of 29 houses with huge opposition then. 10 houses invariably means 20 cars until you add in a teenager therefore 30 cars and so on. Total of 50 houses equals 100 cars plus a teenager per house 150 and so it goes on. Tetbury Lane is a lane and barely wide enough for 2 cars never mind anyone walking along. It is not a dual carriageway. Before long cars from the current site will be parking on the side of the road. Traffic on Tetbury Lane has increased significantly in the last 20 years and a lot of vehicles exceed the 30mph limit. It is no longer painted on the road as you come from Chedglow at the Rommel Lane junction. Street lights appear not to convey this message.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Flooding is another huge concern and with global warming and unpredictable weather patterns this will inevitably increase. Drains cannot cope. Field water already runs towards The Ridgeway. More houses more surface water running that way because of all the concrete/tarmac. Sewer on Tetbury Lane is small and will not cope with more houses. Is the developer going to fund the enlarging of the sewers and surface water? The existing pipe work for the sewer heading to Hankerton cannot cope as it is and overflows out of the manholes. Not very nice for those who live near this. 10 houses will be too many never mind another 40. It's all very well the relevant bodies saying it's ok. They don't live here just like the developer. They disappear into the sunset when there's a problem and have no money to spend on the problem.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am writing to express my concerns and object to the proposal to the allocation of housing site 482 next to Farrells Field in Yatton Keynell for 30 houses.</p> <p>I live on the edge of Yatton Keynell and have seen the village grow over the years, I appreciate that there is a need for housing in the county, but I strongly feel that a development of 30 houses in the proposed location would have a negative effect on the village and its residence.</p> <p>I find it strange that there is still no Neighbourhood Plan for the area, therefore it has not been proved that there is a lack of housing in Yatton Keynell. Surely any proposed development plans should be based on the results of a survey to identify where there is a need for housing.</p> <p>I feel that adding 30 houses to the entrance of the village will have a negative effect on the character of the village. The road through the village is very busy and increasing the traffic in that area would effect everyone in the village. All of the developments in the village over recent years have been small scale and fitted in well to the village. I would suggest that after completing a neighbourhood plan to identify if there is a need for housing in the village, smaller scale developments would be the more appropriate way forward.</p> <p>I would urge Wiltshire Council to withdraw the allocation of land at Farrells Field and start the process of producing a neighbourhood plan so that the whole village can have a say on how our village moves forward to accommodate any particular housing needs.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I wish to raise my concerns regarding the proposed allocation of an additional 40 dwellings Ridgeway Farm in Crudwell in the Wiltshire Council Draft Site Allocations Plan.</p> <p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell.</p> <p>In conclusion, I accept that there is a national need for development to address housing requirements however, any further allocation of sites for more housing should take into account the legitimate and real concerns felt by the local community, as well as full and careful consideration of the options available and any applicable environmental and infrastructure constraints.</p> <p>I ask that the Ridgeway Farm site (as an allocation of 40 houses) be removed from the Wiltshire Council Draft Site Allocations Plan whilst we complete our Neighbourhood Plan as this would convey the views of the village in respect of the scale and location of any development going forward.</p>

		Celestine Bramley	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		Many houses in Crudwell have experienced SEVERE FLOODING (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development. The WATER SUPPLY to residents living in the outer reaches of Crudwell suffers from poor pressure and flow, with supply frequently reduced to a trickle in the summer months. It is a concern that additional housing may reduce supply to such an extent that some villagers could be without mains supply.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>CRUDWELL PRIMARY SCHOOL IS ALREADY GREATLY OVER-SUBSCRIBED, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed.</p> <p>The village struggles to support an ENVIRONMENT that can be used by everyone, regardless of age, gender or disability. Additional housing will place more pressure on an already inadequate infrastructure.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I am concerned about safety and the INCREASED TRAFFIC FLOWS THAT WILL ARISE ON TETBURY LANE, particularly during morning and afternoon school runs, and particularly given the location of the Ridgeway site on Tetbury Lane. The lane is narrow and has only limited and broken stretches of pedestrian pathway down to the A429 main road and to the School and other facilities in the village. Furthermore, Tetbury Lane functions as a single track road with limited areas for overtaking. There have been at least two dogs killed on the lane in the last 5 years and cyclists hurt.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I understand that you are legally bound to plan for the numbers of houses to be built over the next 5/10 years in Wiltshire, as directed by the Government. It is good that you say that you are also trying to fit in with existing Neighbourhood Plans, and realise that extra infrastructure will be needed to alleviate the extra pressure on local communities, which will inevitably happen when large numbers of extra houses are built. However the type of housing that you are planning for is not mentioned. There have been a considerable number of houses built in Devizes recently, and it seems to me that many of them have been bought by newly retired people coming to Devizes, as it is an attractive town to live in, and quite often it means that they are able to buy the sort of accommodation they need, much more cheaply than the area they come from. I know that you are unable to change this, and I do not begrudge them being able to do this-----BUT There are many people in Wiltshire, who cannot afford to buy their own home, and are renting their homes: from private landlords, housing associations, or if they are lucky, from you Wiltshire Council. From your website, I understand that there are currently 2,200 households waiting for suitable housing on the Homes for Wiltshire Register. And that 4,200 new applications are received each year.</p> <p>I urge you therefore to do all in your power to make sure that a large part of this extra housing, is for rented accommodation, and preferably rented Council Accommodation.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	1. Inadequate Use of Brown Sites within Existing Town Boundary There is no consideration of regeneration of existing unused land within the town (brown field sites). The Wiltshire Housing Site Allocations Plan is about Wiltshire. There is a strong bias towards allocating a very significant proportion to Trowbridge (6,810 homes by 2026). The Trowbridge Area proposals are generally at the extremities of the town requiring boundary changes and bringing into question a re-assessment of the Green Belt (para 4.58 of PSCONS01). The WHSA Plan should be revised to reject the allocation of housing at H2.4 Church Lane/ site 1021, H2.5 Upper Studley/ site 3260 and H2.6 Southwick Court/ site 3565.				
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>	The WHSA Plan has a direct impact on the residents of Trowbridge; Wiltshire Council has an obligation to offer a full and open consultation with residents. It is essential that such consultation is well publicised and allows for the constraints on the lives of residents, working or otherwise.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>2. Failure to Consider Impact on Countryside                  Due consideration has not been taken on the adverse impact of allocations associated with H2.4, H2.5 and H2.6 to the open countryside. The Southwick Country Park was established in the mid-90s to provide 100 acres for recreational use and for wildlife. The Wiltshire Council website states: "This is a popular place for walking and it provides good opportunities for bird watching. The network of hedges, scrub and ditches offers both food and habitat for a wide variety of wildlife. Keep your eyes open for: woodpeckers searching for insects or buzzards soaring above the park, water voles and tadpoles swimming in the waters, or rabbits and the occasional deer grazing on the grass."                  Furthermore, the area around Church Land has a significant presence of bats (presumably nesting in or around St Johns Church). Any development between Church Lane and Southwick Country Park (H2.4 Church Lane/ site 1021) and close to the country park (H2.5 Upper Studley/ site 3260 and H2.6 Southwick Court/ site 3565) will have a significant detrimental impact on the Southwick Country Park and adjacent natural habitat.                  It is worthy of note that on 28 July, Wiltshire Council rejected an application to build 100 homes near Blind Lane in Southwick; "The application was refused on the advice of the council case officer because it was outside of Southwick's boundary, it was too big for the village's facilities to cope with, and it would have taken up open countryside." (Wiltshire Times).                  The WHSA Plan should be revised to reject the allocation of housing at H2.4 Church Lane/ site 1021, H2.5 Upper Studley/ site 3260 and H2.6 Southwick Court/ site 3565.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Effective	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3 Paras: 5.122 – 5.149 Table: 5.4 Land at London Road, Salisbury				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED SITE PLAN: ASDA London Rd Site plan</p> <p>The Housing Topic paper indicates that there is a need for greater intervention by the Plan with regard to the South Wiltshire HMA in order to ensure a continuity of land supply</p> <p>An Inspector at a recent appeal decision at Hilltop Way Salisbury (APP/Y3940/W/17/3173509) made the following comment in paragraph 16 of the decision letter:</p> <p>...the fact that the Council cannot demonstrate a 5 year housing land supply, when allowing for 5% buffer would render the adopted plan out of date for the purposes of housing land supply,</p> <p>The Council is obviously in a difficult position maintaining a five year housing land supply in the Southern HMA, as required in government guidance.</p> <p>The Draft Plan allocates 850 dwellings for Salisbury. 640 of these are at Land to the south of Netherhampton Road, between the edge of the existing settlement and the Livestock Market on a greenfield site which has a high degree of visibility. It is noted that the site is proving controversial in the locality because of its size, landscape impacts and the potential adverse highway impacts on the local network.</p> <p>Documents with the draft Plan make some interesting comments:</p> <p>In terms of new housing the Inspector for the Core Strategy emphasised that the 10,420 requirement for South Wiltshire is a minimum. More can be provided.</p> <p>Delays have occurred with housing delivery in the Southern HMA from the strategic sites.</p> <p>Of the three HMAs in Wiltshire, the Council estimate in the Plan that the Southern HMA has the lowest level of supply at 5.4 years.</p> <p>There will continue to be a requirement for additional growth to maintain supply.</p> <p>Beyond 5 years all HMAs' housing supply declines with the Southern HMA the most.</p> <p>Housing requirements in Area Strategies are indicative i.e. more could be provided.</p> <p>Wiltshire has significant housing land supply problems particularly in the Southern HMA. It also has major housing need issues. Whilst it has put forward housing allocations to meet Salisbury's express need, more sites are needed to allow choice, particularly when the Council has decided put 75% of Salisbury's allocation on one controversial site to the south of Netherhampton Road.</p> <p>Allocating the London Road site would promote choice particularly if the large Netherhampton Road site does not proceed or is reduced in size.</p> <p>Having a greater number of sites also assists with delivery by more housing developers rather than have the problems the Council has faced before with strategically large sites being slow to deliver and being in the control of one developer.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2162</a>	<b>Consultee</b> Mr Gavin Rudgley	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
		Person ID: 1131734		<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>4. Safety</p> <p>There has been no consideration of safety, notably with regard to the history of road traffic accidents on the A361 from Trowbridge to Southwick. The main A361 from Southwick to Trowbridge has a 30mph limit through Southwick, rising to a 40mph limit past Southwick Country Park and then reducing to 30mph at the edge of the Trowbridge Town Boundary. Having lived on the Frome Road near Church Lane for 23 years, we have been witness to numerous road traffic accidents. Even as recently as May 2017 when a vehicle struck a telegraph pole with such impact as to dislodge adjacent poles and tear down telephone lines to many properties. The entrance to Church Lane is a well-known hazard and has been cited on previous planning applications rejected by Wiltshire Council as a reason for not allowing any additional housing on Church Lane. The allocation of housing for the three sites (H2.4, H2.5 and H2.6) would require the addition of a new junction on the Frome Road feeding some 245 houses. Aside from the impact on the countryside and identity of the area, safety of life is not mentioned anywhere in the WHSA or relating documents that I can find. This is unacceptable.</p> <p>The WHSA Plan should be revised to reject the allocation of housing at H2.4 Church Lane/ site 1021, H2.5 Upper Studley/ site 3260 and H2.6 Southwick Court/ site 3565.</p>			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>		<p>The WHSA Plan has a direct impact on the residents of Trowbridge; Wiltshire Council has an obligation to offer a full and open consultation with residents.</p> <p>It is essential that such consultation is well publicised and allows for the constraints on the lives of residents, working or otherwise.</p>			

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2163</a>	<b>Consultee</b> Mrs Julie Baptista Chair  Meadow View Residents Association  <b>Person ID:</b> 1126221	<b>Agent</b>  <b>Person ID:</b>	Do you consider the draft WHSAP is legally compliant?  No
		<b>Person ID:</b> 1126221	Do you consider the draft WHSAP is sound?  No	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:	Justified  Effective  Consistent with national policy
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.5 Upper Studley		
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>As Chair of Meadow View Residents Association I am writing to express the concerns of my members regarding the soundness of the proposals in the Draft Wiltshire Housing Sites Allocation Plan for the site identified as 3260 – Upper Studley (The Site). The members consider this site to be completely unsuitable and unsustainable as a housing development for a variety of reasons outline below.</p> <p><b>BIODIVERSITY</b></p> <p>Wiltshire Council has recently produced an updated Wiltshire Housing Site Allocations Plan Pre-submission draft plan Habitat Regulations Assessment (HRA) June 2017. This is now available on the consultation portal. <a href="http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap">http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap</a></p> <p>Recommendations on page 76 specifically relate to site 3260 – Upper Studley and state:</p> <p>‘Recommendations (continued)</p> <p>Bath and Bradford on Avon Bats SAC Habitat Loss / Deterioration H2.5 – Upper Studley The site is in an area likely to be used by Bechstein’s bats associated with the Bradford and Bath Bats SAC. Sensitive habitat features on / adjacent to the site include:</p> <p>Boundary hedgerows / tree lines</p> <p>Lambrook Stream</p> <p>These features should be retained and / or buffered from development (including residential gardens) by wide (10-16m), dark (&lt;1 lux) dark continuous corridors of native landscaping which will allow for their long-term protection and favourable management in order to secure continued or future use by Bechstein’s bats.</p> <p>Development will also be required to contribute towards the delivery of the Trowbridge Recreation Management Mitigation Strategy through a financial contribution or direct provision of equivalent new infrastructure over and above normal Council requirements to deliver new habitat and recreational opportunities in line with criteria in the Strategy.’</p> <p>Comments from Natural England on pages 80 and 81 of the HRA state:</p> <p>‘The breeding population of Bechstein’s bats in Green Lane Woods is known to be linked to the Bath and Bradford on Avon Bats SAC sites (83). Little is known about the tolerance of this species to difference forms of human disturbance, however NE has raised concerns that it is likely to be sensitive to lighting, noise, habitat fragmentation/degradation and severance of commuting routes and impacts are more likely to occur where the effects are cumulative. Indeed individual and small groups of Bechstein’s bats are likely to be particularly vulnerable to disturbance given that natural roost features often tend to include features such as flaking bark and rotten limbs of old trees, which are inherently vulnerable to damage and disturbance. Bats are known to be sensitive to many forms of anthropogenic disturbance, although the exact causal mechanism is currently unknown due to a lack of scientific evidence. Bechstein’s are thought to be particularly sensitive as they are very rarely recorded in urban locations.’</p> <p>(83) Bats ringed in Green Lane Woods have been trapped while swarming at Box Mine SSSI</p>			

#### Appendix Q - Schedule of representations

As little is known about Bechstein's bats tolerance to different forms of human disturbance Wiltshire Council would be advised to approach with extreme caution any proposed development which may impact on the breeding colony at Green Lane / Biss Woods.

The Bechstein's bat, native to the UK, is classified as vulnerable on the IUCN Red List, and is identified as a UK Biodiversity Action Plan Species; this means it is a conservation priority on both a local and national scale. It is also listed on Annex II of the EC Habitats Directive, which requires designation of Special Areas of Conservation (SAC's) to promote important populations. The population in Green Lane / Biss Woods is recognised as the second largest population in Britain.

Further information about Bechstein bats can be found on the Bat Conservation Trust web site:  
[http://www.bats.org.uk/pages/bechsteins\\_bat\\_project.html](http://www.bats.org.uk/pages/bechsteins_bat_project.html)

'It is unlawful to disturb bats anywhere (roosts, flight lines or foraging areas) in particular if the level of disturbance can be shown to impair their ability to survive, to breed or reproduce, to rear or nurture their young to hibernate or migrate or to affect significantly local distribution.'

Any disturbance to trees on a potential development site is particularly damaging for Bechstein's bats, identified as one of the rarest mammals in Europe, as they are tree dwelling woodland bats. Any mitigation measures, such as planting new trees will not be effective in protecting these bats as Bechstein's prefer old growth broadleaved woodland.

To answer Wiltshire Council's question of soundness in relation to this site and biodiversity:  
It is obvious that the HRA used to judge the suitability of site 3260 – Upper Studley was the older document produced in February 2012. If a further HRA were to be undertaken using the guidelines in the Wiltshire Housing Site Allocations Plan Pre-submission draft plan Habitat Regulations Assessment (HRA) June 2017 it is my opinion that this site would be rejected as being less sustainable.

Increased mitigation measures, which will be required to maintain the continuous corridor of native landscaping as roosting and feeding sites for the protected bat population, will seriously reduce the net developable area of The Site. Therefore it seems unlikely that this site could accommodate the 20 dwellings originally indicated in The Plan. If this is the case one must seriously question the economic viability and therefore the soundness of this site for any developer.

Protection for the Bechstein's bats will require any developer to obtain a European Protected Species Licence.

Wiltshire Council is merely moving the issues regarding the Bechstein's bat population from Ashton Park to other areas in Trowbridge which will result in the same planning application chaos which is evident at the moment.

The Site provides a useful habitat for deer, rabbits, voles and a host of birds. In addition the ancient woodland, which surrounds The Site on 3 sides, contributes to the continuous corridor of native landscaping in this area of Trowbridge. It provides in particular, roosting and foraging sites for the rare and endangered Bechstein's bats and other protected bats from the colony nesting in Green Lane / Biss Woods.

To answer Wiltshire Council's question of soundness in relation to this site and sustainability:  
It is illegal (enforceable by fines and/or up to 6 months in prison) to cut down or damage any tree known to be used by Bechstein's bats for nesting, roosting or foraging. The section of The Site adjoining the Frome Road, with the exception of a small gateway, is completely lined with ancient woodland. It is not clear in The Plan how suitable visibility would be established for any access/egress point nor if any road requirement would be single lane.

It is clear to me and other members of Meadow View Residents Association that the amount of mitigation measures required on this small site to provide full protection for the rare Bechstein's bats, plus other bats living and breeding in Green Lane / Biss Woods, which use this site for regular night time foraging and feeding would further reduce the allocated number of houses and therefore render it uneconomically viable for any developer.

The Plan appears to be indicative of a council which takes little or no regard to the natural habitat and wildlife in the area and is unwilling or unable to stand up to greedy land owners and powerful housing developers resulting in a planning department in chaos.

I would recommend Wiltshire Council to remove site 3260 – Upper Studley from the Wiltshire Housing Site Allocations Plan thereby saving and protecting for future generations the important biodiversity associated with this site.

I would appreciate being kept informed (address at the beginning of this letter) that:  
The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination;  
The Inspector's Report (including any recommendations) into the Wiltshire Housing Site Allocations Plan has been published; and  
That Wiltshire Housing Site Allocations Plan has been adopted.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>As Chair of Meadow View Residents Association I am writing to express the concerns of my members regarding the soundness of the proposals in the Draft Wiltshire Housing Sites Allocation Plan for the site identified as 3260 – Upper Studley (The Site). The members consider this site to be completely unsuitable and unsustainable as a housing development for a variety of reasons outline below.</p> <p>Water Land in Upper Studley which borders Lambrok Stream is very low lying, clay based soil, and suffers serious flooding during the winter months. When searching GOV.UK Flood map for planning tool: <a href="https://flood-map-for-planning.service.gov.uk/summary/384252/156096">https://flood-map-for-planning.service.gov.uk/summary/384252/156096</a> It clearly states parts of this land is identified as flood zone 3 – land and property in flood zone 3 have a high probability of flooding. To answer Wiltshire Council's question of soundness in relation to this site and water: It is unclear, from The Plan, the extent of mitigation which might be required to offset this risk nor to what extent this would reduce the net developable area. However it should be noted that any development on this site will have an increased risk of flooding. It is clear to me and other members of Meadow View Residents Association that the amount of mitigation measures required on this small site to fully account for flooding risk I would appreciate being kept informed (address at the beginning of this letter) that: The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination; The Inspector's Report (including any recommendations) into the Wiltshire Housing Site Allocations Plan has been published; and That Wiltshire Housing Site Allocations Plan has been adopted.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>As Chair of Meadow View Residents Association I am writing to express the concerns of my members regarding the soundness of the proposals in the Draft Wiltshire Housing Sites Allocation Plan for the site identified as 3260 – Upper Studley (The Site). The members consider this site to be completely unsuitable and unsustainable as a housing development for a variety of reasons outline below. It is well known that the fields in the vicinity of Church Lane and Oldbrick Fields provide far reaching views across the local countryside. They provide the setting for at six listed buildings, as well as the archaeological site of an ancient water meadow. These need to be protected for the benefit and enjoyment of future generations as stated in the National Planning Framework and Wiltshire Council Core Strategy <a href="https://www.gov.uk/government/publications/national-planning-policy-framework--2">https://www.gov.uk/government/publications/national-planning-policy-framework--2</a> <a href="http://www.wiltshire.gov.uk/planninganddevelopment/planningpolicy/wiltshirecorestrategy.htm">http://www.wiltshire.gov.uk/planninganddevelopment/planningpolicy/wiltshirecorestrategy.htm</a> I would appreciate being kept informed (address at the beginning of this letter) that: The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination; The Inspector's Report (including any recommendations) into the Wiltshire Housing Site Allocations Plan has been published; and That Wiltshire Housing Site Allocations Plan has been adopted.</p>

<b>Comment ID:</b>  <a href="#">2167</a>	<b>Consultee</b> Mrs Julie Baptista Chair  Meadow View Residents Association  <b>Person ID:</b> 1126221	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.5 Upper Studley		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>As Chair of Meadow View Residents Association I am writing to express the concerns of my members regarding the soundness of the proposals in the Draft Wiltshire Housing Sites Allocation Plan for the site identified as 3260 – Upper Studley (The Site). The members consider this site to be completely unsuitable and unsustainable as a housing development for a variety of reasons outline below. In The Plan Wiltshire Council appears to completely ignore the number of homes which can easily be delivered from brown field site in Trowbridge. On 5th September 2017 Trowbridge Town Council Policy and Resources Committee met to discuss The Housing Sites Allocation Plan. In the minutes, see link below, there is substantial evidence to show The Plan is not sound with regard to landscaping and the identification of sustainable</p> <p><a href="http://www.trowbridge.gov.uk/wp-content/uploads/2017/06/170905-Policy-Resources-Minutes-Unapproved.pdf">http://www.trowbridge.gov.uk/wp-content/uploads/2017/06/170905-Policy-Resources-Minutes-Unapproved.pdf</a></p> <p>On page 11 of the minutes TTC lists the brown fields sites available in Trowbridge along with the number of houses which could be delivered on these sites by 2026 with minimal risk.</p> <p>'11. RESOLVED that Trowbridge Town Council supports the inclusion of specifically identified sites, which as such are not defined by the NPPF as Windfalls and are located within the Trowbridge Settlement Boundary:</p> <p>Former District Council Offices, Bradley Road - 70 dwellings                  East Wing/Trowbridge Hospital/Margaret Stancomb School - 300 dwellings                  Bowyers - 250 dwellings                  Ashton Street Centre - 70 dwellings                  The Pavillions, White Horse Business Park - 130 dwellings'</p> <p>This equates to total of 820 additional dwellings, easily deliverable within the time scale of The Plan, on brown field sites in Trowbridge. These potential dwellings would all be situated within Trowbridge Town Council's suggested 2 km sustainable travel distance and therefore supported by Trowbridge Town Council. Further details from Trowbridge Town Council Strategy 2017 – 2021 are mentioned below under the heading Accessibility and Sustainability.</p> <p>To answer Wiltshire Council's question of soundness in relation to this site and landscape:                  Wiltshire Council's Core Strategy supports the use of brown fields sites before identification of irreplaceable green field land.                  In The Plan Wiltshire Council appears to completely ignore the number of new dwellings which can easily be delivered from brown field site in Trowbridge.                  Trowbridge Town Council has identified a number of potential brown field sites which could accommodate up to 820 new dwellings in Trowbridge therefore reducing the need to identify additional green field sites.</p> <p>I would appreciate being kept informed (address at the beginning of this letter) that:                  The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination;</p>			

Appendix Q - Schedule of representations

	The Inspector's Report (including any recommendations) into the Wiltshire Housing Site Allocations Plan has been published; and That Wiltshire Housing Site Allocations Plan has been adopted.

Comment ID:	<a href="#">2168</a>	<b>Consultee</b> Mrs Julie Baptista Chair  Meadow View Residents Association  <b>Person ID:</b> 1126221	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.5 Upper Studley		Effective	
		<p>As Chair of Meadow View Residents Association I am writing to express the concerns of my members regarding the soundness of the proposals in the Draft Wiltshire Housing Sites Allocation Plan for the site identified as 3260 – Upper Studley (The Site). The members consider this site to be completely unsuitable and unsustainable as a housing development for a variety of reasons outline below.</p> <p><b>Education</b> Wiltshire Council’s Core Policy 29 clearly identifies the urgent need for additional primary school provision in Trowbridge and states this has now reached critical levels. New schools on the Ashton Park development may not be completed within the timescale of the plan. The Plan states that the existing secondary schools in Trowbridge will also reach capacity by 2020 and, in view of the scale of additional committed/planned developments in and around Trowbridge, another secondary school site will need to be identified within the lifetime of The Plan.</p> <p>It would therefore seem unnecessary, at this time, to be identifying additional land for housing in this area which will further increase the pressure on school places. This will impact on Wiltshire Council Education Department who may find it impossible to meet it’s commitments to provide education within a sustainable travel distance especially for those children requiring primary education who, aged between 4 and 11, are too young to travel to school independently.</p> <p>To answer Wiltshire Council’s question of soundness in relation to this site and Education: Any new housing developments in Trowbridge will need to be delayed until the shortfall in school provision, particularly primary education, has been addressed. The Plan states: ‘The site is situated on the edge of the town with access to local/town centre services and facilities achievable through walking, cycling and public transport.’ The Trowbridge Town Council Strategy 2017 – 2021 document under the section – Sustainable Future Growth, suggests a sustainable travel distance of 2 km from the town centre. Unfortunately a link to this document on the Trowbridge Town Council web site is not available at this time, however, in the copy available to me, it states: ‘Town Council should vigorously oppose further extensions to the urban envelope outside the 2 km circle in order to protect the integrity and sustainability of the town.’ Extract from point 2. FUTURE GROWTH clearly states: ‘Proposals which come forward through the Housing Site Allocations Plan will be supported only if they are within the 2 km distance criteria, are designed to integrate well with the town and can support sustainable development of Trowbridge, providing improvements to the environment, communication links and recreational opportunities.’</p>			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>					

Appendix Q - Schedule of representations

	<p>Although not scientifically proven a quick search using google maps and a post code from existing premises in Oldbrick Fields, Trowbridge produced the following results (See attached Appendix 1).          It should also be noted that any proposals for new developments further along the A361, Frome Road, would of course, be an increased distance away from the examples of the town centre amenities outlined above.          The Council's view that they can justify development on this site on the basis that it provides an accessible, sustainable development is clearly in question and development on this site should not be supported by Trowbridge Town Council.          I would appreciate being kept informed (address at the beginning of this letter) that:          The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination;          The Inspector's Report (including any recommendations) into the Wiltshire Housing Site Allocations Plan has been published; and          That Wiltshire Housing Site Allocations Plan has been adopted.</p>

<b>Comment ID:</b>	<a href="#">2170</a>	<b>Consultee</b> Mrs Julie Baptista Chair  Meadow View Residents Association  <b>Person ID:</b> 1126221	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.5 Upper Studley		Effective	
		<p>As Chair of Meadow View Residents Association I am writing to express the concerns of my members regarding the soundness of the proposals in the Draft Wiltshire Housing Sites Allocation Plan for the site identified as 3260 – Upper Studley (The Site). The members consider this site to be completely unsuitable and unsustainable as a housing development for a variety of reasons outline below.</p> <p><b>FITS WITH AREA STRATEGY</b></p> <p>It would seem that Wiltshire Council's Core Policy has recently been revised to account for the information outlined in the Wiltshire Housing Site Allocations Plan Pre-submission draft plan Habitat Regulations Assessment (HRA) June 2017.  <a href="http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap">http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap</a></p> <p>It is unclear to what extent this document has influenced proposals contained in The Plan as I can find no mention of the HRA June 2017 document in the references. It maybe that The Plan was produced at a time before the June 2017 document became available and was therefore based on the much older Habitat Regulations Assessment (HRA) February 2012.</p> <p>The Wiltshire Council Cabinet Report June 2017 – Draft Wiltshire Site Allocations Plan paragraph 20 (i) also refers to a Habitats Regulations Assessment (HRA) but does not specify if this is the February 2012 version or the recently published June 2017 version. However it should be noted that the version now available on the consultation portal clearly states:  <a href="http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap">http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap</a></p> <p>Extract from Page 77</p> <p>'It is also worth noting that the housing figures for each community area have now been relaxed from 'at least' to 'approximately', therefore if the 950 houses cannot be sustainably delivered at the town there is the option to deliver some of this requirement in surrounding community areas within the wider HMA. Nonetheless it is important that potential effects upon the Bechstein's populations are given due regard and attention throughout the site selection process.</p> <p>While CP29 only sets a strategic target for housing at Trowbridge rather than a specific location, it also now includes a clear requirement for the protection of bats and their habitats to be a key determinant in the allocation of sites through the forthcoming Site Allocations DPD. CP29 of the Wiltshire Core Strategy was also amended to reflect the recommendations and conclusions of the HRA by the inclusion of the following text:</p> <p>An additional 950 dwellings will then be developed at the town once improved secondary school provision is in place towards the end of the plan period and there has been a further assessment of the effects on protected bat species and their habitats to ensure that they are properly safeguarded.'</p> <p>To answer Wiltshire Council's question of soundness in relation to this site and fitting with area strategy:</p> <p>It is unclear when the Core Policy changed, to take account of the information outlined in the new Wiltshire Housing Site Allocations Plan Pre-submission draft plan Habitat Regulations Assessment (HRA) June 2017.  <a href="http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap">http://consult.wiltshire.gov.uk/portal/spatial_planning/sites_dpd/draftwhsap</a></p>			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>					

Appendix Q - Schedule of representations

	<p>It is also unclear to what extent the HRA June 2017 has influenced proposals contained in The Plan as I can find no mention of the HRA June 2017 document in the references. It maybe that The Plan was produced at a time before the June 2017 document became available and was therefore informed by the much older Habitat Regulations Assessment (HRA) February 2012.</p> <p>The Wiltshire Council Cabinet Report June 2017 – Draft Wiltshire Site Allocations Plan paragraph 20 (i) also refers to a Habitats Regulations Assessment (HRA) but does not specify if this is the February 2012 version or the recently published June 2017 version.</p> <p>SUMMARY</p> <p>It would appear that The Plan is fundamentally unsound as it was clearly developed before the recent changes to Wiltshire’s Core Policy, in relation to housing developments in Trowbridge, and the revised Wiltshire Housing Site Allocations Plan Pre-submission draft plan Habitat Regulations Assessment (HRA) June 2017. If this is this case then the site selection process, as outlined in The Plan, is basically flawed.</p> <p>I would appreciate being kept informed (address at the beginning of this letter) that:</p> <p>The Wiltshire Housing Site Allocations Plan has been submitted to the Secretary of State for independent examination;</p> <p>The Inspector’s Report (including any recommendations) into the Wiltshire Housing Site Allocations Plan has been published; and</p> <p>That Wiltshire Housing Site Allocations Plan has been adopted.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Before I start, we need more houses, that much I agree on. The number and location are a separate matter. I am firmly of the belief that an addition 40 houses in Crudwell will impact the infrastructure of the village beyond the pint of no return. This is a ridiculous notion that increasing the numbers of dwellings in this small location won't have bigger implications.</p> <p>Already the internet and phone lines are poor beyond this point and increasing it will only make matters worse.</p> <p>Beyond this it appears madness that other locations in Crudwell parish aren't being investigated to hit those numbers required. I appreciate that we need more properties but let's do it sensibly!! There are locations in Eastcourt that would happily absorb 6 or maybe more properties, One or two in morgans tyning and so on and so forth. This needs more options, more consultations and more time to consider. West Crudwell farm is not the only answer and it shouldn't be taken as perfect as in a lot of people's minds and views it is far from it.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.13				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I wish to register my concerns about the proposed allocation of an additional 40 houses to the village of Crudwell on the Ridgeway Farm site as detailed in the draft Site Allocations Plan.</p> <p>Sensible planned growth, which is sustainable and does not spoil the character of the village, will receive support generally. In 2014, I was against the Ridgeway Farm planning application for 29 houses when it was submitted to (and rejected by) Wiltshire Council and the principle objections remain:</p> <p>The scale of the development - it was much larger than previous developments in the village.</p> <p>It was outside the designated red line settlement boundary and                      [Officer note: other issues are contained in separate comments according to their theme]</p> <p>I support the present development of 10 houses on the footprint of the old farm yard as it is certainly better than what was there before, it made good use of an existing "brown field" site and was of a scale consistent with other recent developments in the village.</p> <p>It is concerning to see the allocation of an additional 40 houses on this site which was previously deemed unsuitable.</p> <p>I am also concerned that the site size / boundary of the Ridgeway Farm Development encompasses an area far greater than is required - even for 40 homes - so I question why that is the case and would like it reviewed as mist likely there is a desire by the developer to increase the number of houses which in terms of sustainability makes no sense.</p> <p>As there is no immediate strategic need for any housing allocations at Crudwell, I would much rather see the Neighbourhood Plan group consult and engage with the local community and businesses to determine the scale and type of housing need in Crudwell; to examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity. The consultation will also help determine from local businesses what their needs might be to enable them to sustain and expand employment opportunities going forward.</p> <p>Policy 1 of the Wiltshire Core Strategy notes that the "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities", given that we have circa 250 homes in Crudwell, I do not see how an additional 40 homes on top of the 10 already being built - a staggering 20% increase overall - even falls within Wiltshire Councils own Core strategy.</p> <p>It seems to me that there are clear reasons that the development should remain at ten houses and should not be increased by 40 houses or indeed a larger amount should that be the underlying plan by the developer.</p> <p>This site allocation if allowed to stand would, in my opinion, completely change the character of the village and undo many years sensible and sensitive development supported by the Parish Council and the planning teams at Wiltshire Council. I am not anti-development but I do favour sensible, incremental development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Its likely impact on the local infrastructure, specifically the impacts on already overburdened drainage and sewerage systems and</p> <p>It is concerning to see the allocation of an additional 40 houses on this site which was previously deemed unsuitable. Crudwell still has severe flooding problems which have not yet been completely addressed, it remains a major concern to people who live in properties around the Swillbrook which runs through the centre of the village. Many have experienced significant damage to their homes in recent years both through surface water and raw sewerage and I believe surface water from the proposed site would only make this situation worse. Many homes, require non-return valves to stay safe from sewerage flooding until the excess over capacity subsides.</p> <p>As there is no immediate strategic need for any housing allocations at Crudwell, I would much rather see the Neighbourhood Plan group consult and engage with the local community and businesses to determine the scale and type of housing need in Crudwell; to examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Sensible planned growth, which is sustainable and does not spoil the character of the village, will receive support generally. In 2014, I was against the Ridgeway Farm planning application for 29 houses when it was submitted to (and rejected by) Wiltshire Council and the principle objections remain: Its likely impact on the local infrastructure, specifically the likely increased traffic on Tetbury Lane; As there is no immediate strategic need for any housing allocations at Crudwell, I would much rather see the Neighbourhood Plan group consult and engage with the local community and businesses to determine the scale and type of housing need in Crudwell; to examine how the existing infrastructure can be expanded to accommodate growth - including the drainage and sewerage systems, the local roads which are already very busy - particularly joining the A429 - and the local school, which is at capacity. The consultation will also help determine from local businesses what their needs might be to enable them to sustain and expand employment opportunities going forward.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H3.1			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I have lived on the flood plain in Harnham for 23yrs, close to the River Nadder.</p> <p>I object to the proposal for the Netherhampton Rd housing development H3.1(S1028) and North of Netherhampton Rd H3.3 (S1027) because building 640 plus 100 new homes will add to our flood and drainage problems, the traffic jams we already experience, as well as impairing our wonderful landscape.</p> <p>My objections are covered in 1.12 the strategic Issues being flood and surface water drainage, traffic flows and the Strategic Road Network, and landscape and heritage considerations.</p> <p>Surface water flows and flooding has been improved with the Environment agency flood defence work in 2008, but we continue to have drainage problems when water levels in the River Nadder and ground water levels are high. This has been exacerbated by the small housing development of Buttercup Close, Middle Street, which occurred without improvement to the drains so that these have to be pumped out by a tanker on a regular basis.</p> <p>The S1027 site suffers regularly from surface water logging with heavy rainfall, and I cannot believe that the Environment Agency have been properly consulted and agreed to the proposal for 100 houses there against the principles stated in Wiltshire Core strategy to prevent development on our flood plains. (see Fig 1)</p> <p>If these houses are to be set back from the road so that some views of Salisbury Cathedral Spire are retained they will be closer still to the River Nadder.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I wish to register my concern and opposition to the proposed additional housing allocation at the Ridgeway site where building is currently underway. As a resident on Tetbury road I am already very aware of the heavy traffic flow here and general state of disrepair in the road and believe that an increase in traffic flow, which further housing at ridgeway will undoubtedly bring, would severely impact this road and lead to further deterioration.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		In addition I find it extremely disappointing that the council would look to allocate further sites in a village where there is insufficient infrastructure to support this. Crudwell has a fantastic but oversubscribed village school, no shop, only access to doctors surgeries which would require transport to local towns and there is currently a limited schedule of such public transport to crudwell. Who are these houses for? Families who will have nowhere to send their children? Elderly who will have no local facilities to support their daily needs?

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to express my opposition to the proposed development of a further 40 houses off Tetbury Lane in Crudwell. I am in favour of proportionate development within the village as I believe it brings in new people, especially families and adds to the vibrant life of the village. The ten houses currently being built fits this criteria but a further 40 is a disproportionate increase to the current 240 houses in Crudwell. This would put too much pressure on the school, drainage and traffic in the village. The village is now in the process of producing a Neighbourhood Plan that will set out criteria and areas for proportionate development in the village. It would be reasonable to delay any planning approval until the local people have set out their views.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I am writing to inform you of my objections to Wiltshire Councils Proposed Development Site at Southwick Court - 3565. Wiltshire Council are not complying with their core strategy, a document which clearly states that developments should not be built where villages are swallowed up by towns. Boundary Walk in Trowbridge forms the parish boundary that divides Trowbridge from Southwick. Development of this site would contradict the core strategy.</p> <p>As a resident of North Bradley I am concerned that the proposed plan would serve to develop land that for centuries has formed a natural boundary separating the town of Trowbridge from its outlying villages. Land that has been used by generations of farmers to provide an income and enjoyed by local residents who, have used the land for numerous leisure activities.</p> <p>In conclusion, the proposed development at site 3565 would contradict Wiltshire's Core Strategy Brownfield sites such as the old Bowyers area must be developed and Greenfield areas must be preserved.</p> <p>Thank you for considering my objections to site 3565. Remove site 3565 from Proposal</p>

				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I am writing to inform you of my objections to Wiltshire Councils Proposed Development Site at Southwick Court - 3565. As a parent, I am concerned about the lack of infrastructure detailed in the proposed plan. Primary schools are struggling to meet current demand. The development of site 3565 would further exacerbate what is already deemed by Clare Medland, Wiltshire Council's head of school place commissioning, a primary school crisis. In an article ran by The Wiltshire Times 14.07.2017 she stated that the two primary schools due to be built in Ashton Park would not be enough to meet the needs of the town. 'If hundreds of houses are built then the situation will become critical. Primary schools in the Trowbridge area are already tight. If all these applications are approved it would create a real problem.'</p> <p>In conclusion, the proposed development at site 3565 would placing additional pressure on an infrastructure that is not fit for purpose. Health and safety issues in the local area have not been taken into consideration. A lack of healthcare facilities, school placements would have a negative impact on the local community.</p> <p>Thank you for considering my objections to site 3565. Remove site 3565 from Proposal</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing to inform you of my objections to Wiltshire Councils Proposed Development Site at Southwick Court - 3565. Parking at and in close proximity to The Grove Primary School has been significantly restricted since the commencement of the new academic year 2017/2018, following the adoption of double yellow lines along Hazel Grove by the council. Staff employed by the school, are now forced to park their vehicles along Silver Street Lane as there are a limited and insufficient number of spaces on the school site. The situation is further exacerbated at the start and end of the school day by parents parking on what is already deemed a busy road that frequently serves as a rat run from Bradley Road through to the Frome Road. Parents and visitors to the school are also using Balmoral Road to park their vehicles. Balmoral Road forms part of a small residential development occupied in the main by retired members of the community. Further development in the local area would have a detrimental impact on local residents as traffic in the immediate area would increase significantly posing health and safety issues for both young and elderly in equal measure. In conclusion, the proposed development at site 3565 would a significant increase in vehicles on main and minor roads would have a negative impact on the local community. Thank you for considering my objections to site 3565. Remove site 3565 from Proposal

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2201</a>	<b>Consultee</b> Mr Barney Jones  <b>Person ID:</b> 1132105	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Elm Grove Farm; Land south of White Horse Business Park			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Firstly thank you for the work you do. I am certainly very glad that someone is thinking hard about the bigger picture of Wiltshire's difficult planning needs.</p> <p>I am writing to strongly object to the recent Wiltshire Housing Site Allocations Plan, in particular (a) the change to the settlement boundary around Westbury to include the West Wilts Industrial Estate and (b) the new housing allocations between Trowbridge and North Bradley (plots 613/248 and 298).</p> <p>In summary, I think the combination of these proposals is to breach Wiltshire Council's planning commitment not to endanger the boundaries and characters of its historic settlements. These new proposals will introduce and reinforce an unacceptable sprawl/ribbon development stretching from Trowle, North West of Trowbridge through the town, to North Bradley, Yambrook, Heywood and into Westbury.</p> <p>The new changes mean there will often be just meters between housing of allegedly separate settlements, with no substantial boundary of fields. North Bradley and Yam book will become suburbs of Trowbridge. Encouraged by the boundary change, the area around the West Wilts Industrial estate (which under your plans would become part of Westbury town) will grow further to replace beautiful green fields with more empty low-value industrial lots full of rusting vehicles (all there seems to be there right now!).</p> <p>In other words, these new proposals amount to the effectual euthanasia of towns and villages that have been separate communities for a thousand years or more. If these proposals go through, there will certainly be very little point maintaining separate town and village political boundaries here - it would be more appropriate to merge them into one single sprawl entity we could call Trow-bury.</p> <p>I might also add there has been no attempt by Wiltshire Council or North Bradley village council to inform me over either of these proposals which so obviously affect the setting of the Grade 1 listed building that I own. I have spoken to others in the area and very few people seem aware of these changes - it appears Wiltshire Council have made no attempt to contact council tax payers despite the once-in-a-lifetime nature of these changes. This is unwise given recent legal action by listed building owners in similar cases.</p> <p>I am also concerned that there has been no Bat Survey conducted on the North Bradley site before this housing allocation has been suggested, despite the proven presence of endangered bats nearby. This is reckless behaviour by the Wiltshire Council and, as these sites tend to have their trees cut down by developers to get rid of bats once a housing allocation is made, therefore probably illegal.</p> <p>My counter proposal is simple: the Wiltshire Spatial Planning team needs to urgently introduce effective greenbelts or other no-building zones around towns and villages in our area. Low value, low rise, countryside-eating sprawl would be replaced by high-value, high-rise developments in town and city centres - for example, the site around Trowbridge station should be planned for residential flats at least six storeys high. It is ironic that a hundred years ago they were building six and seven storey warehouses in Trowbridge on the same sites where now our planning system allows one and two storey residential and commercial units!</p> <p>This "positive planning" will at a stroke save our historic towns, villages and green fields to be enjoyed by future generations. I have four young children myself and would hate for them to grow up thinking of our area as a dirty place of uncared for housing and industrial sprawl.</p> <p>Thanks for your attention, I look forward to receiving a reply soon (or indeed notification for the first time that some changes are planned!).</p>

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Concern has been expressed regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Plan. Together with the 10 dwellings already being built on this site, this represents a near 20% increase in dwellings in the village of Crudwell (currently some 260 dwellings).</p> <p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. There is no strategic need for a site of this scale in Crudwell. A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell. Policy 1 of Wiltshire's Core Strategy states: "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met. Crudwell is not anti-development; it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan.</p> <p>In summary, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell is not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p> <p>I would be most grateful if the concerns for Crudwell were given urgent and appropriate thought. The implications of the Ridgeway Farm development proposal, if not considered seriously could be to the severe detriment of the village as a whole.</p>

So this aspect of the Plan is not consistent with the Strategy.</p> <p>The Core Strategy also states that</p> <p>"At the settlements identified as villages, a limited level of development will be supported in order to help retain the vitality of these communities. At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. These settlement boundaries will also be reviewed as part of the Housing Sites Allocations DPD as set out in the council's Local Development Scheme, in order to ensure that they remain up to date and properly reflect building that has happened since they were first established. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. Relaxation of the boundaries will only be supported where it has been formally reviewed through a subsequent DPD or a community-led neighbourhood plan".</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development. Crudwell Primary School is already greatly over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.

		Mr Ioan Rees	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Figure	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		A.23			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>I wish to object to the Draft Housing Allocation Plan and in particular the settlement boundary of Studley and Derry Hill which has significant inconsistencies and is not justified</p> <p>The main settlement boundaries around the two villages are generally satisfactory however the inclusion of an outlying separate settlement boundary around 21 houses on Old Road is an anomaly introduced by North Wiltshire DC. There is no justification for the inclusion of this area as it is inconsistent with the two other outlying areas of housing on Devizes Road and Norley Lane. The settlement boundaries were not drawn around the 15 or so houses on Devizes Road and the 28 houses on Norley Lane which is inconsistent considering all three are very similar small clusters of linear housing in the countryside, predominately on one side of roads leading from the villages.</p> <p>The Devizes Road houses are actually contiguous with the Derry Hill settlement, the Old Road housing is about 200m from the nearest village boundary and the Norley Lane housing about 350m from Studley. I consider that none of these clusters of housing should be part of the settlement boundary of either village as they are part of the countryside outside the settlements. The alternative of including all three is more consistent but undesirable.</p> <p>The suggested extension of the Old Road cluster across the A4 to include isolated and unrelated houses on the opposite side of this major road is illogical and inconsistent in comparison with the Devizes Road housing and 3 Bowood Estate houses fronting Church Road in the heart of Derry Hill which are all outside the settlement boundary. Wiltshire proposals correctly remove a part of the field to the north of Old Road from the settlement boundary which effectively split the Old Road cluster into even smaller areas.</p> <p>I believe at a time when a green open space in the heart of the Petty Lane housing estate in the middle of Derry Hill is proposed to be removed from the settlement, it is not logical, justified or consistent to retain the Old Road element of the settlement boundary.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>We would like to express our objection and concerns regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell. We are residents in the village and while understanding of the need for further development, including the current works to build ten dwellings, we are particularly concerned with the impact of a further 40 dwellings to our small village. Strategic Priority. There does not appear to be a strategic priority to allocate further housing in the village, the Ridgeway Farm total allocation represents a 20% increase, when there is a predicted oversupply of some 100 houses in the Malmesbury community area. The scale of the impact to the small village of Crudwell will be significant and change its character dramatically.</p> <p>In summary the impact to Crudwell of the additional allocation of 50 houses will be significant and detrimental to its services, facilities and safety of both residents and visitors to the village. Moreover, there does not appear to be a body of evidence to support the allocation from a strategic perspective. A far better approach would be to await the outcome of the Neighbourhood Plan, currently under development, to inform the housing need in Crudwell.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The ability of local facilities and services to cope with the increase in numbers of people and levels of traffic. The increased traffic flow through the village and specifically on Tetbury Lane, which provides access to the village hall and children's play area as well as to the School, represents an increased hazard to pedestrians.

To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Mrs Clare Churchill The Parish Clerk  Fovant Parish Council  <b>Person ID:</b> 391071			
Please identify the policy, paragraph, table, figure or site to which you are referring.		Figure  A.78	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Thank you for the opportunity to comment on the draft Wiltshire Site Allocations Plan, Fovant Parish Council resolved to make the following response at a meeting held on 16th September 2017.</p> <p>Large Village Miscategorisation Even though it was accepted by Mr Milton during Public Examination of the South Wiltshire Core Strategy in July 2011 that Fovant wasn't a Large Village, this persists in the DPD.</p> <p>These representations were made again during the preparation of Wiltshire Core Strategy. The Planning Department were instructed by Wiltshire Council Cabinet in December 2014 to explain this as a matter of urgency. Following intervention by the local MP, a response was finally received in July 2015 referring to a further assessment that had been made which apparently concluded that Fovant was a Large Village. A copy of that assessment has been requested, but has not been forthcoming. It is regretted that the Planning Department denied Fovant the normal consultation process given to all other parishes to comment on such an assessment.</p> <p>In any event, the Planning Inspector instructed the Planning Department to take account of Fovant's incorrect categorisation when preparing the DPD, but this doesn't seem to have been done.</p> <p>Village Boundary The village boundary is incorrect as small villages shouldn't have a boundary.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">2220</a>	<b>Consultee</b> Mrs Clare Churchill The Parish Clerk  Fovant Parish Council  <b>Person ID:</b> 391071	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Fovant				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Site Allocation</p> <p>It is noted that Hindon and Ludwell are excluded for site allocation because the schools in those villages were deemed incapable of expansion. Fovant has no school at all since Wiltshire Council chose to close it. Accordingly, the same reasoning for excluding Hindon and Ludwell should also apply to Fovant since it has no school at all.</p> <p>It is noted that the school at Dinton is identified as already being over capacity. However, unlike Ludwell and Hindon, Dinton is identified as being a school where space will occur due to dropping birth rates - do Wiltshire Council have evidence that birth rates will only fall in Dinton or is it expected that the same will also occur elsewhere? If so, then if Dinton is considered as being capable to support children in future, the same must surely apply elsewhere.</p> <p>Topographical and Infrastructure Limitations</p> <p>The Core Strategy recognises that it is not size but the opportunity for sustainability that is the key consideration.</p> <p>The whole of Fovant is in an Area Of Outstanding Natural Beauty, has two Conservation Areas, a Housing Restraint Area and an area of Important Open Space, all of which limit the opportunity for development.</p> <p>Fovant is a ribbon development generally running north-south along steep valleys of tributaries of the Nadder. The Core Strategy recognises that where settlements are linear or dispersed, further development would not necessarily contribute to sustainability objectives.</p> <p>Historic development has occurred along the tributaries which are considered to present a flood risk. Areas to the north and west of Fovant are also identified as being adjacent an area of Localised Flooding Incidents by the Strategic Flood Risk Assessment.</p> <p>Development to the east and west behind these historic dwellings on the valley sides has been consistently rejected by the Planning Office and Planning Inspectorate.</p> <p>The area to the north and to the west of Fovant was identified in the Town and Landscape Analysis of the SWCS as providing important open countryside separating Fovant from surrounding villages.</p> <p>Furthermore, Fovant has areas in the Settlement Setting Assessment marked as County Wildlife Sites and Ancient Woodland.</p> <p>The ribbon layout has meant that sites examined for small scale development on the outskirts of the village have been rejected for being too far from the remaining facilities and for being prone to flooding. Those sites closer to the remaining facilities have been rejected too.</p> <p>The existing Housing Policy Boundary appears to recognise the limited opportunity for sustainable growth other than by infilling. Even within these boundaries, Fovant has contributed to the Wiltshire housing stock with 12 housing completions and commitments since 2006 (draft Plan page 44). The proposed modifications to this historic boundary map, in the map and justifications Table A,2 on pages 22 and 23 of the draft Plan, are minor and logical.</p> <p>In terms of infrastructure, Fovant has no street lighting, no effective pedestrian walkway facilities, narrow (often single-track lanes) unsuited to increase in traffic, limited capacity to deal with additional sewerage or rainwater and is often subject to instability in the power supply.</p>				

Appendix Q - Schedule of representations

There are very few employment opportunities within the village with the vast majority of working residents commuting some distance for employment (both Salisbury and Shaftesbury being over 10 miles away).  
 There is no school.  
 Fovant has a long-established traffic and parking problems within the village, presumably as a result of reliance on cars for transportation to schools, shopping and employment.  
 Transportation  
 Fovant is identified as having a regular bus service with Tisbury, Shaftesbury and Salisbury. This is not true.  
 There is only a limited bus service with Salisbury during daytime hours, with no service on Sundays or Bank Holidays. There is (currently) one bus in the morning and one in the evening to Salisbury that you could catch if you could time-shift your working day, but you wouldn't be able to work more than a few minutes from the bus route for even that to work.  
 There is a bus from Fovant to Shaftesbury, but you have to stay overnight before you can come back.  
 For Tisbury, there is a bus in the morning, but then you have to come back shortly after or also stay overnight.  
 The draft Plan's assessment of SHLAA sites in Fovant parish  
 Three large SHLAA sites had been proposed for Fovant and these were reviewed in the draft Plan. One, no. 3557, at Moor Hill, stated as having a potential for 96 houses, was rejected before final assessment stage (stage 3) because of the lack of suitable vehicular access (page 39). The other two sites, nos. 3449 and 3450, with potentials for 20 and 38 houses respectively, got through to the last stage but were then ruled out in Appendix F. Each site was scored with a single 'major adverse effect', thus One major adverse effect has been identified. The site is located in the Cranbourne Chase and West Wiltshire Downs AONB. The site as a farmstead appears wholly in keeping with its surrounds and its loss would result in the unacceptable urbanisation which would not be possible to mitigate (SA Obj. 7).  
 There were five moderate adverse effects, covering potential groundwater issues and surface water run off, the nearness to the Conservation Area, the potential visual impact on the Fovant Badges scheduled monument, and the likely inability of Dinton Primary school to cope without problematic expansion.  
 We consider that three of these moderate factors would be far more serious, and would better have been scored as 'major'.  
 First, the Fovant Badges and the recently restored Sutton Down badge, all within the aegis of Fovant Camp of World War I, are increasingly recognised as extremely important heritage sites – witness the extent of media and public interest and the two recent major Heritage Lottery grants for work on badges on these two Downs. Officers have previously cited interference with the visual impact of the Badges in the refusal of planning submissions for houses in the grounds of Cross Keys house lower down the hill; houses on these two SHLAA sites, being even higher and likely far more numerous, would have an even more serious impact on the Badges.  
 Secondly, interactions in 2016/17 between Fovant Parish Council and Wiltshire planners over the County's idea to build seven affordable houses on an Exception site on Sutton Road revealed the inability of the County to demonstrate that they would be able to protect that local area from flooding and also provide redress to householders if flooding occurred. This has an obvious relevance to these SHLAA sites, because of the potential for the increased surface water run off from housing developments on higher ground on the A30 to tip the balance for the handling of surface water lower down at the junction with High Street, with the potential for disastrous consequences for the several houses around that junction; some of these houses are listed.  
 Thirdly, having lost our primary school and now having to rely on Dinton school, we believe that that no such development of Fovant should be considered until Dinton school has been expanded.

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2221</a>	<b>Consultee</b> Mr Jonathan Moffat	<b>Agent</b>  Person ID:	<b>Do you consider the draft WHSAP is legally compliant?</b>	
		<b>Person ID:</b> 1125984		<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Salisbury - Netherhampton Road		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I believe that the Proposed site allocations above are unsound because they are unjustified. Firstly it is unjustified because the proposed sites either side of the A3094 Netherhampton Road are in the parish on Netherhampton, not with the Salisbury development boundary. Netherhampton is a village and has already agreed to have a number of dwellings constructed in the village. Further substantial development of hundreds of houses would be contrary to para 4.16 of the Draft Allocation plan. Netherhampton is a distinct settlement with its own identity which should undoubtedly be preserved not incorporated as an extension of Salisbury. Although numerically small, it is a sustainable community as it is and should not be turned into a huge suburb of Salisbury. It is foreseeable otherwise that further development will creep all the way along the A3094 in the future once the green perimeter that currently exists is breeched. Lastly I do not think it is effective in providing needed new dwellings in a situation which is sustainable or appropriate. Most employment areas and transport links are on the northern side of the City and This is not the appropriate are for a whole new housing area, which in itself if far in excess of what the transport and local infrastructure can bear and will in itself create many more problems.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Secondly the number of houses proposed totalling 740 dwellings is far in excess of the 594 shortfall in the whole of South Wiltshire in the Councils own calculations. Also it would appear that should these schemes be approved there could potentially be up to 1277 dwellings, so more than double the need.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Thirdly, the local road network, consisting primarily of the A3094 Netherhampton road is already used heavily by traffic including commercial vehicles as a southern by-pass route alternative for traffic travelling on the A36 from Bristol to Southampton and vice versa, as well as local traffic. At peak times there are long tailbacks at both the Western end at Parkwall junction and the Eastern end at Harnham Gyratory. Both of these junctions have the physical ability to be changed to increase capacity, and the amount of traffic is already of great concern to the residents of Harnham. There is very little employment this side of the City, nor other facilities appropriate to large numbers of dwellings, which would in itself cause many additional car journeys, especially at peak times. It will also mean that motorists will make use of other minor roads such as through Quidhampton, Stratford Tony and Old Harnham, which are unable to accommodate any additional traffic. This is acknowledged in Para 5.136 that the current Transport Strategy does not contain measures to support the proposed allocations.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I'd like to put some questions and make comments on the proposal for around 800 houses in Harnham, Salisbury. Another point that's been overlooked is that Wellworthy housing Estate or constable court as it's known. This estate is cut close into the hillside of what's known as 'Harnham Slope' an ancient trackway and Historic and Ecological site at the chalk pits. If the housing on Plot 1028 was there, which is high above these Wellworthy houses rooftops was to go ahead, this would cut out the Sun all day from the entire south side from Harnham Transmitter mast and to the West (In-Excess Side) as it tracks around during the day, ruining summer days &amp; this would be particularly bad in the winter's short days. Casting long shadows all day and cutting out direct sunlight. Similar to being surrounded by skyscrapers, It would make this Close even more gloomy and not what people purchased them for. The proposal for building has been rejected twice, now matters are worse than then, I, therefore, would like this proposal rejected.</p>

				Effective
				Consistent with national policy
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED SITE PLAN: Bovis - WHSAP response - Policy H3.3          Policy H3.3 North of Netherhampton Road, Salisbury          Bovis Homes support the Council's decision to allocate land under their control to the north of Netherhampton Road, Salisbury for circa 100 dwellings. They consider that the site is ideally placed to meet part of the additional housing and/or employment requirement in the South Wiltshire Housing Market Area. Indeed Bovis Homes control additional land to the west of the proposed allocation which could provide additional residential or employment development. The extent of this land is shown on the attached plans. These plans demonstrate how by incorporating this land the proposals provide a better gateway to Salisbury in this location.</p> <p>A high-level study of the technical and environmental site constraints and opportunities detailed existing site knowledge and supplemented by visual walk-over survey to confirm key assumptions. Therefore, whilst proposals will be subject to further investigation and survey, the proposed scheme can be considered as both achievable and deliverable.</p> <p>Inclusion of additional land north of Netherhampton Road has the potential to create a number of benefits:-</p> <ol style="list-style-type: none"> <li>1. Opportunity to create a new consolidated Gateway to Salisbury on approach from the west - through a controlled enclosure of built form which logically extends the existing settlement as a series of streets and spaces, rather than simply driving past a new estate on the approach to the City.</li> </ol> <p>The site is available with only one landowner and can be delivered as it is under the control of an experienced national housebuilders. There are no constraints to the development of the site as follow:-</p> <p>The site comprises intensively farmed arable land that is in one ownership. The farmland is 'in hand' and is not subject to any agricultural tenancies. It is therefore available for development in the short term and is achievable with a realistic prospect for delivery as the land is controlled by an experienced developer in Bovis Homes.</p> <p>The site is well located to a range of services and facilities which would include strategic and local employment areas, as well as shops and other facilities.</p> <p>Bovis consider that the additional land that they control to the west of the proposed allocation, as shown on the attached plans, should also be identified for residential/employment development.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I implore you to consider the highly negative effects that the development of Site 321 will have on Bratton, a charming and individualistic village surrounded by an immensely beautiful and historic landscape. The high-density housing estate proposed will ruin the aesthetically pleasing entrance to the village, needlessly destroying greenbelt land renowned for its beauty and tranquillity. Such a development will set a dangerous precedent – in twenty years, how much of our glorious countryside will be dominated by rows and rows of houses? After the demolition of the Cement Works chimney, which was viewed as a ‘blot on the landscape’ by many, it seems hypocritical to mar the countryside with forty houses, which would be better situated in a town such as Westbury, where there are better facilities and infrastructure. Site 321 houses two Public Rights of Way, is classified as a Special Landscape Area				
<b>Attached files (Please see Objective)</b>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The report concludes that Site 321 is the only plot of land in the Westbury area suitable for development – on the contrary, there is plenty of land surrounding Westbury better suited to this purpose than Site 321. Moreover, Westbury is more centrally located than Bratton, with the proposed site being situated in a relatively remote, geographically immobile location. Wiltshire Council should listen to the wishes of Bratton Parish Council, who were elected to represent the villagers' wishes. They voted overwhelmingly to reject these plans, with no councillors voting in favour– nine voting against and one abstaining. Considering that the proposal has been rejected twice previously, it astonishes me why it should even be considered a third time. It was previously rejected 'to preserve the character and scenic quality of the landscape' – nothing has changed. The character of our village should not be sacrificed on the altar of government targets and private profit.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The report wrongly calls the location 'sustainable' and says that 'the sustainability benefits of the site are considered to be good'. Considered by whom exactly? Defined in environmental science terms, sustainability is 'the quality of not being harmful to the environment or depleting natural resources, and thereby supporting long-term ecological balance'. Building on greenbelt land is the antithesis of the concept of sustainability. Furthermore, the site scored negatively in nine out of twelve of the Wiltshire Sustainability Appraisal categories – further proof that the proposal is not sustainable and will only damage the environment and harm local wildlife.

		Dr Leo Aylen	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Policy	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.7			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>as residents of Crudwell, then we would like to raise the following issues in regard to the draft site allocation plan and consultation. We are concerned about the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Plan. Together with the 10 dwellings already being built on this site, this would represent a 20% increase in dwellings in the village. Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met. We are not anti-development; but our friends and neighbours mainly wish to have a say in any growth via the emerging Neighbourhood Plan. Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic. It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development. We cannot see that that there is a substantiated strategic need for further housing allocations in Crudwell. It would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell village is not anti-development, and acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed. We trust that our views will be considered, along with those of other villagers, in the consultation.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. So we have to ask - is there any strategic need for a site of this scale in Crudwell?</p> <p>A similar level of oversupply (2,200 houses) is forecast across the wider Housing Market Area (North &amp; West Wiltshire). This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Many houses in Crudwell have experienced severe flooding (on at least 3 occasions in the past 15 years) due to the inability of existing waterways and drains to cope with run-off water following heavy downpours. Surface water systems are already operating at maximum capacity. Unless significant investment is made in increasing that drainage capacity, additional housing will only exacerbate the flooding risk for dwellings downstream of this proposed development.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Crudwell Primary School is already over-subscribed, with classrooms and the assembly hall operating at maximum capacity. Forty additional homes will inevitably require the provision of an additional classroom, and unless the main hall is extended, would prevent assembly of the whole school. The site is constrained; lies in a conservation area and additional buildings could be accommodated only at the expense of encroaching into playing fields. The school's ability to expand is not guaranteed.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing to express my concern as to how the council can 'green light' the proposed development at ridgeway farm Crudwell. The village has made its view clear at the area board meeting and further to that I wish to ask how is it possible when the proposal effects an area outside the permissible bounds of development in Crudwell. The area is also a green field site. Tetbury lane can not cope with any further additional traffic. This is not sustainable development especially when you consider that this will be a increase of over 35% of the number of house holds in the village not to mention up to 100 extra cars (two cars per house hold, some have more...)in to a single track lane every morning.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Warminster		Justified	
				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the changes to the settlement boundaries for East of Dene and Boreham/Spurt Mead are not required and are illogical. In the case of the East of the Dene site this will allow developers the opportunity to further speculatively develop beyond the proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified- The draft plan for Warminster is not an appropriate strategy, when compared with other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable. It is noticeable that Warminster now has only 1 doctors' surgery with the closure of the Smallbrook Practice; that the local designated primary school is full, as is Warminster's only secondary school which, furthermore, has no room for expansion on its present site. Laying a financial contribution against a developer cannot conjure these types of service out of thin air and therefore need a deeper understanding of the infra-structure implications and needs as a result of development of the Boreham/Spurt Mead and East of the Dene sites. This argument equally applies to Warminster's employment situation, where most of its employees travel out of Warminster which, with the exception of Salisbury and the army facilities on Salisbury Plain, are accessed by roads across the town from these sites i.e. the A36 west and the A350 north and south. In Bishopstrow we are also deeply concerned by the potential for coalescence into Warminster. Both the sites mentioned here build on or close to Bishopstrow's parish boundary and Conservation Area.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire Council forces developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent- The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p>				

Appendix Q - Schedule of representations

	<p>An analysis of the maps provided in your consultation documents show the risks of flooding in Bishopstrow due to upstream developments. The development of Boreham/Spurt Mead and East of the Dene will not reduce this risk and in fact has the potential to make the situation worse, as recent flood events have consistently shown.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		The parcel of land lies adjacent to the White Horse Business Park. In my opinion, no one will want to live within this area because of the low frequency, permanent noise, appearing to emanate from the LF Beauty air conditioning unit on top of its building. I reported this to Wiltshire Council Environmental Health two months ago, and again last week. The noise has been persistent for a couple of years. Mostly noticeable in the summer months. I have recorded the noise on several occasions and hold this as evidence. I am awaiting a response from Environmental Health to investigate further. I do have some other issues, in line with other representations but this is the most important in my view. If this can be resolved it would be a step in the right direction.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.13 Ridgeway Farm			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	I am writing as a Crudwell resident of over 30 years standing to express my concern regarding the proposed allocation of an additional 40 dwellings at Ridgeway Farm in Crudwell in the Plan. Together with the 10 dwellings already being built on this site, this represents around 20% increase in dwellings in the village of Crudwell. This is disproportionate, unnecessary and unwelcome. There is absolutely no strategic need for a site of this scale in Crudwell. The Plan states that housing sites will only be allocated to Villages where there is a strategic priority to do so however the plan forecasts an oversupply in the Malmesbury Community Area of some 100 houses before any Windfall sites are taken into account. A similar level of oversupply of around 2200 houses is forecast across the wider North and West Wiltshire housing market area. This again undermines any argument that there is a strategic priority that 40 additional houses are required in Crudwell. Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met. Crudwell is not anti-development, it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Previous proposals for additional housing in Crudwell have led to significant debate about specific issues that affect their sustainability, including the ability of local facilities and services to accommodate increases in the numbers of people and levels of traffic.</p> <p>It is important that any further allocation of sites for more housing should be based on a genuine need and should take into account the legitimate and real concerns felt by the local community (including drainage and flooding, school capacity, road safety and impact on the environment), as well as a full and careful consideration of the options available and any applicable environmental and infrastructure constraints. The Neighbourhood Plan for Crudwell is being developed with these considerations in mind and there should be no unnecessary allocation of one site for a substantial development.</p> <p>To summarize, given that there is no substantiated strategic need for further housing allocations in Crudwell, it would be right and appropriate that the Crudwell Neighbourhood Planning should determine the scale and location of housing need in Crudwell; having taken full account of parishioners' wishes, and having examined carefully and fully the environmental and infrastructure constraints and options. Crudwell in not anti-development; it acknowledges the need for additional housing, but wishes to have a say in where and how further development of the village should proceed.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2275</a>	<b>Consultee</b> Nick Egerton  <b>Person ID:</b> 1132255	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.12				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>No evidence of housing need for Yatton Keynell</p> <p>The proposal for 30 houses on land east of Farrells Field has been put forward at County level in order to meet the County's strategic housing requirements for the Chippenham remainder area. The site allocation for 30 houses in Yatton Keynell is not based on any evidence that there is a specific local housing need in Yatton Keynell. Appendix E of the Chippenham Community Area topic paper, confirms that no local housing needs survey was undertaken as part of the draft Plan. The proposed dwellings should be justified with evidence that there is a specific local need and the plan should confirm how that need will be met.</p> <p>In light of the above the plan is unsound, it not justified and is not consistent with national policy set out in paragraph 158 of the NPPF which states:</p> <p>'Each local planning authority should ensure that the Local Plan is based on adequate, up to date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local Planning Authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals'.</p> <p>Absence of a Neighbourhood Plan</p> <p>Of the five large villages within the Chippenham Community Area, Yatton Keynell is the only village without a Neighbourhood Plan. It is acknowledged that delivery of housing supply through a community led Neighbourhood Plan offers a positive and proactive approach to delivering housing need rather than a site selection process which is only put forward by landowners.</p> <p>The local Ward Councillor called for a Neighbourhood Plan to be made at a Parish Council meeting back in November 2014 (copy of minutes attached). This was suggested in response to specific concerns that were raised by the community in relation to the proposal for development of land adjacent to Farrells Field. The Parish Council have not addressed this request.</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p> <p>'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be engaged in a proactive way, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p> <p>Site selection process unsound</p> <p>Para 5.13 of the Chippenham Community Area Remainder Topic Paper – June 2017 states that the village of Sutton Benger which has an identified a housing need, was discounted as a village which could accommodate additional housing growth. The Plan states that the village primary school cannot accommodate growth and therefore the village cannot accommodate more housing. The exclusion of the village from the housing allocation plan seems unjustified as the plan should consider all housing types not just those for families. Just because the school is full that doesn't exclude new housing being delivered for elderly, and people without children (flats starter homes). If some additional housing was accepted in Sutton Benger it might reduce the overall need for housing which has been identified in the other larger villages where there is considered no housing need.</p>				

Appendix Q - Schedule of representations

	<p>The village of Yatton Keynell which has no evidence of identified housing need (this is minutes in Parish Council Meeting minutes November 2014), and no Neighbourhood plan has been identified for having a significant proportion of the 138 dwellings needed to meet the Chippenham Area Strategic housing target.</p> <p>The housing sites selection process is contrary to Para 159 of the NPPF. It states:          'Local planning authorities should have a clear understanding of housing needs in their area. They should:          -prepare a strategic Housing Market Assessment to assess their full housing needs and .....The Strategic Housing Market Assessment should identify the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which ..... addresses the need for all types of housing, including affordable housing and the needs of different groups in the community such as but not limited to families with children, older people people with disabilities, service families and people wishing to build their own homes...';</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Another factor which was not considered as part of the site selection was the landscape constraints in place for the village Yatton Keynell. A significant amount of Yatton Keynell settlement and adjoining land is washed over by AONB rendering a large area of land that is not available for development. This fact should have been identified as a constraint in the overall site selection process and taken into account when considering the amount of new development proposed in the village.</p> <p>30 dwelling will have a significant impact on the character of the area</p> <p>Para 5.31 identifies land East of Farrells Field, Yatton Keynell for the development of approximately 30 dwellings. The Council claim that 'it is in a location that has the capacity to accommodate change from an environmental, heritage and landscape perspective, and could assimilate into the existing built form, whilst positively conserving and enhancing the village-edge setting'. However, a large scale proposal of 30 additional houses at the entrance to the village is not suitable and will have a negative impact on the character of the area.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2278</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Nick Egerton	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Site	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.12			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Lack of community engagement and poor consultation</p> <p>The draft plan process is lengthy, complicated and difficult for the public to become engaged with. The planning process which has taken place and resulted in the Farrells Field site being put forward for housing, has not been meaningful, as it has not provided opportunity for the local community to comment on or consider alternative sites. The Parish Council have not engaged in the plan process or adequately represented the views of the local people in response to the proposal being put forward.</p> <p>I consider the proposed allocation for such a large site which will have such a significant impact on the community in yatton Keynell should be the subject of more meaningful consultation process by means of a Neighbourhood Plan.</p> <p>It is my understanding (from P61 of the Chippenham Community Area Remainder Topic Paper) that of the five large villages identified as part of the Chippenham remaining area, none of the Parish Council's responded to the Council's consultation on the site allocations plan and settlement boundary review. This raises questions about the quality of the consultation that has taken place in order to create the plan and whether the Council has met the necessary requirements set out in its Statement of Community Involvement. It states in para 2.23:</p> <p>'Town and parish councils are the most local tier of democratic representation and, as such, they provide a key link with local communities. They are a specific consultation body under the Town and Country Planning (Local Planning) (England) Regulations 2012. Regulation 18 requires that Wiltshire Council has to consult with specific consultation bodies which they consider may have an interest in the subject. Wiltshire Council is committed to continuing to consult with the local councils'.</p> <p>In light of the above, the plan is unsound as it is inconsistent with national policy set out in Para 155 of NPPF which states:</p> <p>'Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide selection of the community should be proactively engaged, so that local plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Policy H3.1 (Land at Netherhampton Road)</p> <p>5.3 Like the land north of Netherhampton Road, as the Stages of Site Assessment plan above clearly shows, only a small part of the now proposed allocation was considered at the earlier stages of the site assessment process and the proposed allocation of the now much larger seems to be without any real justification other than the Susatrainability Appraisal, the conclusions of which we challenge for the reasons given in this document.</p> <p>5.4 The revised SA contained in the previous section of this document clearly demonstrates that this site scores more poorly than the land north of Downton Road. In light of this, it is considered that the allocation should be reduced by 190 dwellings. Reducing the number of proposed dwellings should not affect the ability of the proposed allocation to deliver the proposed primary school as such a facility is proposed on the land north of Downton Road, where the number of proposed dwellings (290) is lower than the proposed reduced allocation (350) on the land at Netherhampton Road.</p> <p>5.5 In light of the above, it is considered that inclusion of the land at Netherhampton Road in the DPD with the current amount of housing, would render the plan unsound as it does not represent the most appropriate strategy when considered against the reasonable alternatives i.e. land north of Downton Road. Land north of Downton Road should instead be allocated for the provision of 290 dwellings.</p> <p>[see attached for full representation]</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Table	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Table 4.1			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Table 4.1</p> <p>5.9 Table 4.1 sets out the Council's estimated Housing supply to meet the housing requirement contains within the adopted Wiltshire Core Strategy. This includes completions and developable commitments. the Council has confirmed in an email dated 15 September (a copy of which is attached as Appendix 7) that the allocated strategic site at Churchfields is included within the developable commitments figure. However planning permission is yet to be granted for the allocated 1,100 dwellings and the fact that the Council is now proposing to allocate the land at Netherhampton Road to compensate and try to address the lack of delivery from the Churchfields sites speaks volumes about the likelihood of the allocation at Churchfields ever delivering any of the allocated dwellings.</p> <p>5.10 The Council has a history of allocating large housing allocations in and around Salisbury and this has led to problems in terms of the delivery of new housing in the past. The allocation of a smaller number of larger sites provides a less flexible housing land supply. Allocation of the land north of Downton Road would provide a more flexible supply of allocations which could deliver new housing more quickly and in a more sustainable location).</p> <p>5.11 Paragraph 6.19 of Topic Paper 4 (Developing Plan Proposals) states "Further sites at Salisbury support provision for primary education in the south of the City. They improve choice. They also help to safeguard land supply should there be unforeseen and serious delay with the delivery of any other sites". In light of the email attached as Appendix 2, it seems clear that the contents of paragraph 6.19 apply just as much to the land north of Downton Road as they do to the sites proposed for allocation at Netherhampton Road.</p> <p>5.12 In light of the above and the conclusions of section 4 of this document, the land north of Downton Road should be allocated instead of the land north of Netherhampton Road and part of the land off Netherhampton Road or in addition to these sites.</p> <p>[see attached for full representation]</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.21			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Paragraph 4.21 5.6 Paragraph 4.21 states “The focus for further work was the set of ‘more sustainable’ sites identified at stage 3. Further consultation with stakeholders helped to develop potential sites into site options with individual housing capacities and specific boundaries. Consultation also helped to identify requirements that should be highlighted for individual site options, to guide the form development should take, including the definition of realistic site boundaries. In exceptional circumstances, it was necessary to consider ‘less sustainable’ sites”. This paragraph highlights the Council’s muddled thinking and flawed Sustainability appraisal and has led to the proposed allocation of unsuitable sites (such as the land north of Netherhampton Road) and the exclusion of sites suitable for allocation, namely the land north of Downton Road. [see attached for full representation]				
<b>Attached files (Please see Objective)</b>	4729436

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		4.67			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Paragraph 4.67</p> <p>5.7 Paragraph 4.67 states “The site at Netherhampton Road has the ability to address the lack of housing delivery at Churchfields, later within the plan period, and also the potential to provide employment land for Churchfields businesses to relocate, thereby freeing up land at Churchfields for housing delivery in the longer term. The WCS identifies the site within an area of search, to be considered if further land is required in future to meet housing requirements, as part of the Council’s monitoring process. Monitoring has shown that further land is required due to the redevelopment of Churchfields taking longer than anticipated. The Plan therefore implements this contingency in order to ensure a sufficient supply of housing. The allocation of land at Netherhampton Road, a substantial site, will not lead to an increase in the overall scale of housing growth at Salisbury than was proposed by the WCS”</p> <p>5.8 The contents of this documents have shown that the Sustainability Assessment of the proposed allocations is flawed and has resulted in the proposed allocation of sites that perform less well than sites which were previously being considered for allocation i.e. the land north of Downton Road. The land north of Downton Road could provide the same function as the proposed allocation at Netherhampton Road in terms of providing a contingency from the expected (and likely) underdeliver from the allocated strategic site at Churchfields and in a more sustainable location. It is therefore considered, the proposed allocation at Netherhampton Road in its current form renders the plan unsound, as it does not represent the most appropriate strategy when considered against the reasonable alternatives i.e. land north of Downton Road.</p> <p>[see attached for full representation]</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>Ridgeway Farm had been submitted to Wiltshire Council back in 2014. That application drew much local opposition from local people, principally on the grounds of the scale of the development, it being outside the designated red line settlement boundary, and its likely impact on the local infrastructure, specifically: the likely increased traffic on Tetbury Lane; impacts on already overburdened drainage and sewerage systems and oversubscription of Crudwell Primary School.</p> <p>It is clear there is a lot of local opposition to having a site allocation plan forced on the village. Over a hundred parishioners turned up at the last Area Board meeting to voice their opinion and over £5000 was raised in a fortnight to engage a consultant to put the villages case to an Inspector. 2</p> <p>In Conclusion I am surprised a Development as large as this is proposed in a small village with a significant conservation area which already has a School which is full, an identified Sewerage and Drainage problem, has no shop and a bus service which at best is poor and is planned to be reduced. I believe the village has the opportunity through its emerging Neighbourhood Plan to define its own future.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Whilst it is understood that Wiltshire Council needs to ensure an adequate five year housing land supply across each housing market area, the Site Allocations Plan would result in an oversupply of 4,284 dwellings to 2026 when past completions are combined with deliverable commitments, and windfall sites are included. Even when windfalls are excluded, the oversupply is still 2,198 dwellings across the Housing Market Area. The Site Allocations Plan also results in an oversupply of homes in the Malmesbury Community Area, even without windfalls. Wiltshire Council has a history of oversupply of homes in the former North Wilts area excluding Chippenham. In eight of the last ten years more homes have been built than planned, in the other two years targets were virtually met. In fact over the last ten years the average oversupply has been 143% higher than planned. On this basis, there is no strategic need to identify any new homes at Crudwell, so the Wiltshire Site Allocations Plan should not do so. I believe that this plan if adopted will set a planning precedent that will be impossible to manage, it being outside the designated red line settlement boundary.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	A major concern to Parishioners is the risk of flooding which happens to properties around the Swillbrook which runs through the centre of the village. Significant damage has occurred to many houses in the village in recent years both through surface water and raw sewerage. Surface water from the proposed site would make this situation far worse. We must not overlook the fact that many properties around the school and(former) post office green as far up the A429 as The Butts estate already need non-return valves to stay safe from sewerage flooding until the excess over capacity subsides. In addition, sewerage frequently exudes from all the manhole covers around the PO Green in Tuners Lane due to the lack of Pumping Station capacity , even during only moderate rainfall. The Council have been contacted by Hankerton Parish Council expressing their concern over the increase in Sewerage this plan would bring to their own pumping station as it barely copes at present.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I note the proposals that are being made to alter existing settlement boundaries in Salisbury, Trowbridge, and other Market towns to develop these areas, with the purpose of ensuring the delivery of houses in Wiltshire's three Market Town areas for the period up to 2026. I strongly object to ANY changes within Warminster to the existing settlement boundaries, and further allocation of new sites for housing, as the selection of sites is not sound.</p> <p>The proposed plan is NOT sound, and I object strongly for the following reasons:</p> <p>Environment and character of the area</p> <p>The proposed change to the settlement boundary at Home farm is a particularly baffling suggestion. This site has already been rejected by the planning inspector, for a great number of reasons, one of which was due the character of the area, the following was stated by the planning inspector</p> <p>"I saw that the land mostly comprises arable fields, with similar fields to the north, together with a few cottages and other houses (some set in trees) and bounded by lanes or roads, to the east, west and south. Although there is urban development immediately to the west (across Grange Lane), the area has a pleasant and obviously rural appearance and is very much on the edge of Warminster. From my observations from local footpaths to the north, west and east of the area and from Battlesbury Hill I consider that the land relates well in visual terms to the open countryside to the north and east, forming an integral part of the countryside east of the town. I accept that a high stone wall and cottages fronting Boreham Road impact on any meaningful visual relationship with the countryside to the south, other than when seen from the Hill top. However, in view of the open-ness of the land and its linkage with other open land to the east and north (and especially Battlesbury Hill), I consider that the town policy limit hereabouts should be drawn along the eastern edge of the denser development fronting The Dene, St George's Close and (the southern part of) Grange Lane."</p> <p>The character of the area has not changed and these comments are still valid.</p> <p>In summary, I strongly object to any change to the housing numbers and settlement boundaries in Warminster, and want my letter to be brought to the attention of the Planning Inspector's examination currently scheduled for Spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I note the proposals that are being made to alter existing settlement boundaries in Salisbury, Trowbridge, and other Market towns to develop these areas, with the purpose of ensuring the delivery of houses in Wiltshire's three Market Town areas for the period up to 2026. I strongly object to ANY changes within Warminster to the existing settlement boundaries, and further allocation of new sites for housing, as the selection of sites is not sound.</p> <p>The proposed plan is NOT sound, and I object strongly for the following reasons:</p> <p>Infrastructure The plan only increases the number of houses, and makes no provision for increasing or upgrading the infrastructure of the individual areas. Relying on all residents travelling across the town to use a single service only increases the pressure on roads, and discourages people from walking or cycling. No provision is made for local employment in the plan, and the large employment areas of Bath, and Trowbridge will increase the pressure on roads further still. Currently we have problems in the very narrow streets on the B3414 near the centre of Town. The proposed site access is onto Boreham Road. I consider this to be very dangerous. As a resident of Grange Lane, I know how dangerous and difficult it is currently to exit the lane safely due to the fast movement of traffic in this area including around the proposed entrance area. Having the entrance to the site to the south when the main housing development area is to the north also seems contrary and only inviting further applications for development the south of the area. If you must develop this area, why not consider an entrance directly from the roads near the north of the site of Woodcock Road.</p> <p>In summary, I strongly object to any change to the housing numbers and settlement boundaries in Warminster, and want my letter to be brought to the attention of the Planning Inspector's examination currently scheduled for Spring 2018.</p>

			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Justified	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.7		Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I note the proposals that are being made to alter existing settlement boundaries in Salisbury, Trowbridge, and other Market towns to develop these areas, with the purpose of ensuring the delivery of houses in Wiltshire's three Market Town areas for the period up to 2026. I strongly object to ANY changes within Warminster to the existing settlement boundaries, and further allocation of new sites for housing, as the selection of sites is not sound.</p> <p>The proposed plan is NOT sound, and I object strongly for the following reasons:                  Warminster has a great number of flooding problems at the moment, and it seems that nobody is willing to accept responsibility for managing it. This needs good sound solution to this problem.                  Home Farm is very wet during periods of heavy rain, and usually has a large pond on it during the winter period. Grange Lane floods regularly. There was a period last year when the Post Office was refusing to deliver letters to some of the properties. Clearly Home Farm is a run off area for water off the high ground to the North of it, and if it were developed the flooding issues will only become worse, with the development potentially increasing the flood risk to existing properties. Boreham Road regularly floods, and with more run off this will become worse.</p> <p>The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA), thereby managing and reducing risk of flooding throughout Wiltshire. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages. This omission may open up the threat of judicial review should the plan progress as it stands.</p> <p>In summary, I strongly object to any change to the housing numbers and settlement boundaries in Warminster, and want my letter to be brought to the attention of the Planning Inspector's examination currently scheduled for Spring 2018.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.7		Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I note the proposals that are being made to alter existing settlement boundaries in Salisbury, Trowbridge, and other Market towns to develop these areas, with the purpose of ensuring the delivery of houses in Wiltshire's three Market Town areas for the period up to 2026. I strongly object to ANY changes within Warminster to the existing settlement boundaries, and further allocation of new sites for housing, as the selection of sites is not sound.</p> <p>The proposed plan is NOT sound, and I object strongly for the following reasons:</p> <p>The increase in the allocation seems to be made as a contingency plan to the existing sound, and well considered delivery plan failing to meet the requirements for the 2026 figures. It seems an overreaction to change settlement boundaries, encouraging development of green field sites when the chances are that the existing plan will deliver the required housing and infrastructure that is required for this housing. The existing site at the West Urban Extension could have its allocation increased to cover this shortfall, and this way all of the issues regarding infrastructure etc will not pose problems. The sound existing plan for the West Urban extension, which was subject to careful consideration to deliver the housing to 2026 was considered sound by a planning inspector previously. Whilst we have some concerns about the negative impact of further development on the West side of town, this has the support of local councilors and as they have been recently reelected, presumably the local population there.</p> <p>In summary, I strongly object to any change to the housing numbers and settlement boundaries in Warminster, and want my letter to be brought to the attention of the Planning Inspector's examination currently scheduled for Spring 2018.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">2300</a>	<b>Consultee</b> Nicola Duke Parish Clerk  Bratton Parish Council  <b>Person ID:</b> 1125770	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.14		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Overall Planning Policy The Westbury Topic Paper of the Plan states that the number of dwellings in Bratton is 819. The actual number is 516 some 38% fewer than the number stated. The figure for Housing Completions 2006 – 2016 is stated as 20 whereas the reality is more like 8 so this figure too is grossly overstated. So the starting point for the plan is clearly wrong. These inaccurate numbers casts doubt on the other figures in the Plan. The Core Strategy states Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. This proposal satisfies none of these requirements The Housing Needs survey identified a need for 8 properties yet the Plan proposes 40. So clearly the land is not being allocated to meet the needs of the Bratton community. At para 2.15 of the Plan the following appears Development (within large villages) limited to that needed to help meet the housing needs of settlements and improve housing opportunities, services and facilities This proposal is contrary to this key core policy. The over-development proposed at the site is urbanisation within a village context and totally inappropriate and is not aimed at meeting 'the housing needs of the settlement'. Page 22 of the Core Strategy, para 4.15 states At the settlements identified as villages, a limited level of development will be supported in order to help retain the vitality of these communities. At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries.....Small housing site are defined as sites involving fewer than 10 dwellings This is not a small housing site of the type envisaged by the Core Strategy, rather a major proposal introduced without any discussion with the local community. This proposal is in breach of this strategic statement. The Core Strategy statement continues Relaxation of the boundaries will only be supported where it has been formally reviewed through a subsequent DPD or a community-led neighbourhood plan, which includes a review of the settlement boundary to identify new developable land to help meet the housing and employment needs of that community. In turn this could bring forward benefits to the local community such as improvements to the economy through the identification of land for employment purposes. The Parish Council, elected in May, has committed itself to developing a neighbourhood plan and this surely is the proper vehicle for identifying the housing needs of the village rather than allowing them to be blighted by an unneeded development just to satisfy the need to find somewhere			
	Effective  Consistent with national policy			

Appendix Q - Schedule of representations

to put 40 houses to meet a theoretical Government target. The Parish Council response recorded in the Plan is no longer its position as it is clear from an analysis of the planning policy that significant residential development on this site is inappropriate. In summary, it is clear that the allocation of Site 321 satisfies none of the requirements of the Core Strategy approved in 2015. The Council's Core Strategy confirms that developments of this nature are inappropriate in a village the size of Bratton. Dropping a development on an urban scale on the edge of the village is clearly insensitive to the village.

We have calculated that Site 321 is 12,529m<sup>2</sup>. That is 313m<sup>2</sup>/property.

Manor Fields, the only other major housing development in the village, has an area of 26,057m<sup>2</sup>. With its 66 houses, that's 395m<sup>2</sup>/property. Even at this density residents' car parking is a major problem.

If Manor Fields was built at 313m<sup>2</sup>/property it would be the equivalent of building 83 houses i.e. squeezing an additional 17 houses into the land, an additional 34 cars or more. This density of development is clearly unsuitable for a rural village.

The combined effect of these policies must mean that the level of development in a Large Village such as Bratton must be no greater than can fit within the village without causing it to impact on the wider hinterland of the area, in terms of needing jobs and relying on services and local shops. An allocation of approximately 40 houses is of a size suitable for placing at a Local Service Centre such as Market Lavington or a town such as Westbury rather than Bratton and the Core Strategy specifically states at paragraph 4.14 that Local Service Centres should provide for local employment opportunities, improved community facilities and/or affordable housing, and in the same manner paragraph 2.15 of the Plan stipulates that Local Service Centres should provide modest levels of development to safeguard their role and deliver affordable housing. Nor is the Plan effective since there is no prospect of employment opportunities being generated in the village to require such a significant development. Whilst we recognise national policy requires the Council to make appropriate housing allocations Site 321 does not meet wider Government priorities relating to the development of sustainable housing, reduction in transport and protection of the countryside.

To remedy this the review must take into consideration a wide range of national policies and Wiltshire Council's own Core Strategy. Better account must be taken of a wide range of other factors including

Highways where the topic paper understates the busyness of the B3098

The quality of the environment as the site sits in a Special Landscape Area

The quality of the land as the site concerned consists of agricultural land of the highest quality

There is an alternative site within the settlement boundary in the ownership of the Parish Council. The Council has resolved to investigate its potential to meet the housing needs of the village.

We would propose that Wiltshire Council withdraw Site 321 from the Housing Allocations Plan and work with the Parish Council to develop the alternative site which we estimate could provide some 15 homes.

West Wiltshire District Council refused planning consent for a smaller development of 23 houses on Site 321 in 1994. Bratton has ensured that affordable housing has been built since then, particularly at Pear Tree Orchard, and it is smaller developments such as this, which are suitable for the size of the village.

This letter contains the issues considered by the Council in reaching its decision to object to the allocation of Site 321 for housing in Bratton. The Clerk passed on the Council's decision in a letter sent to you by email on 14 September and subsequently confirmed in an email of 18 September that the Chair and vice-Chair would be submitting a supplementary paper expanding on the reasons for this decision. See also Comment IDs: 699-705.

For the record we think it is extremely optimistic to expect lay people to have the expertise to respond in the detail required but, thanks to the vice-Chair, the Council has researched the planning policy background to this allocation and we are extremely disappointed by what we have discovered.

I trust the above satisfies the requirements of the questions demonstrating why the Council question the legality and soundness of the Plan and why it considers it to be improperly prepared, unjustified, ineffective and not in accordance with national policy.

In closing we would like to re-iterate our concern about the nature of the consultation exercise. It was launched in July over the main holiday period, when most Parish and Town councils are in recess. This was compounded by a complex form for individuals to respond to, a portal on the internet which was difficult to access and a complete lack of contact with the community. This has led to widespread irritation in the village.

**Attached files (Please see Objective)**

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

Finally the Council will wish to participate at the oral examination of the Plan. We consider it necessary to ensure that those sitting in judgement of the Plan have a full appreciation of our concerns relating to the reasoning contained in the Topic Paper which led to the inclusion of Site 321.

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2301</a>	<b>Consultee</b> Nicola Duke Parish Clerk  Bratton Parish Council  <b>Person ID:</b> 1125770	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H2.14		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Landscape policy Turning now to landscape considerations the Core Strategy states that Policy C3 Special Landscape Areas (SLA) is a saved policy from the West Wiltshire District Plan. Site 321 is within the SLA. That Policy C3 states The landscape character of SLAs will be conserved and enhanced and development will not be permitted which is considered to be detrimental to the high quality of these landscapes. Proposals for development essential to the social and economic well-being of the rural community .....will be permitted having regard to other material planning considerations This proposal is contrary to this policy statement as the housing proposed is not 'essential' to the well-being of the rural community of Bratton Core Policy 51 is also relevant in this case not least owing to the designation of the area as SLA 13. This policy states Development should protect, conserve and where possible enhance landscape character and must not have a harmful impact upon landscape character....Proposals should be informed by and sympathetic to the distinctive character areas identified in the relevant Landscape Character areas identified in the Landscape Character Assessment(s) and any other relevant assessments and studies. The development proposed of 40 houses is in direct conflict with this policy. The Core Strategy at 6.80 identifies the Wiltshire District Landscape Character Assessment. The key section of this assessment is section 4.0. These requirements relating to the Bratton and Edington Chalk Terrace state The overall strategy for the area is to conserve the generally intact landscape and settlement pattern with small villages nestling at the bottom of the Chalk Downland...Specific management objectives are to Seek to resist any development that would affect the open views across the terrace to the chalk uplands Conserve ... the existing field pattern Conserve the existing small scale settlement pattern and avoid larger developments that would be out of scale and character. This proposal is in direct conflict with this policy. The Inherent Landscape Sensitivities for the area G2 (Westbury Greensand and Chalk Terrace) in which the proposed site lies are listed as Surviving hedgerow network Open views to dramatic Chalk Downland Edge Open views to Westbury White Horse as a dramatic landscape feature Strong sense of tranquility throughout the character area Development of this site within that landscape is at odds with the requirements of this policy The Specific Management Objectives for G2 are Seek to resist any development that would affect the open views across the terrace to the chalk uplands Conserve open views to the Westbury White Horse as a distinctive landmark			
	Effective  Consistent with national policy

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Sustainability Appraisal</p> <p>A Sustainability Appraisal is an obligatory part of the development process and must be published when a Plan is made. This has been done in this case. However, the conclusions of the Appraisal in the consideration of Site 321 in Bratton should be subject to critical examination: Objective 2 has an objective of ensuring efficient and effective use of land and the use of suitably located previously developed land and buildings. The land at Site 321 is agricultural land and is described as BMV (Best and Most Versatile) Land. No part of the land is previously used land. The land is part of a Special Landscape Area. Yet the scoring in the answer is one negative, on the basis that there is a minor adverse effect and mitigation measures are readily available. On any reasonable interpretation the loss of the best form of land with a site which has no brownfield land at all must rank an higher adverse rating than a single negative. The mitigation measure is to increase the number of houses from the number originally designated as the appropriate amount, but again if the appropriate number of houses at a site is 32 increasing it by 25% again to make 40 houses is unreasonable and results in over development. It disregards all planning policy as to how many houses should be located at Bratton as a Large Village. It renders any arguments about needs for the village and the community irrelevant. It is increased without any regard to the local infrastructure, medical care, transport, road safety and road capacity and the capacity of the site to provide sufficient parking for residents and friends. It ignores the capacity of the village to improve employment opportunities. Objective 12 relates to employment with an objective of ensuring adequate provision of high quality employment land and diverse opportunities to meet the needs of local businesses and a changing work force. The answer is a single positive. Yet in a case where no employment land is being provided at all it seems unreasonable to give a positive answer at all, rather a negative should be given. Objective 8 relates to the provision of housing: ensuring everyone with the opportunity to live in good quality, affordable housing and ensure an appropriate mix of dwelling sizes, types and tenures. This is answered with a triple positive. No other objective is answered with a triple sign, apart from this. All are answered in the negative except Objectives 8, 11 and 12. In terms of the needs of the village this triple answer may be unreasonable. The housing will be dense as approximately 40 will be fitted on the site. The presumption used is 30 houses per hectare with only two storey houses maximum. Housing in Bratton is expensive and the same housing in Westbury would provide greater affordability for a wider band of private purchasers. The affordable housing will be available for all residents in the region and not necessarily the children of residents in Bratton or the local area or others with a local need. Likewise with Objective 11 on encouraging a vibrant and diversified economy, two positives have been given to this objective. Objective 9 on the aim to reduce poverty and deprivation and to promote more inclusive and self-contained communities scores a single negative. Perhaps a double negative would be more appropriate considering the location and infrastructure of the village. To remedy this the review must take into consideration a wide range of national policies and Wiltshire Council's own Core Strategy. Better account must be taken of a wide range of other factors including Highways where the topic paper understates the busyness of the B3098 The quality of the environment as the site sits in a Special Landscape Area</p>			

Appendix Q - Schedule of representations

	<p>The quality of the land as the site concerned consists of agricultural land of the highest quality  There is an alternative site within the settlement boundary in the ownership of the Parish Council. The Council has resolved to investigate its potential to meet the housing needs of the village.  We would propose that Wiltshire Council withdraw Site 321 from the Housing Allocations Plan and work with the Parish Council to develop the alternative site which we estimate could provide some 15 homes.  West Wiltshire District Council refused planning consent for a smaller development of 23 houses on Site 321 in 1994. Bratton has ensured that affordable housing has been built since then, particularly at Pear Tree Orchard, and it is smaller developments such as this, which are suitable for the size of the village.  This letter contains the issues considered by the Council in reaching its decision to object to the allocation of Site 321 for housing in Bratton. The Clerk passed on the Council's decision in a letter sent to you by email on 14 September and subsequently confirmed in an email of 18 September that the Chair and vice-Chair would be submitting a supplementary paper expanding on the reasons for this decision.  See also Comment IDs: 699-705. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Landscape assessment                  At Stage 4a of the Process a Landscape Assessment was carried out.                  This Field Study highlights the two Public Footpaths running over the site.                  The Landscape character is described as "Pleasant". This is understated in the Council's opinion.                  The remoteness and tranquillity judgement is given as "Peaceful", but this is not correct. The B3098 although a B road is the main road leading through from Westbury to the east to West Lavington and on to Pewsey, Devizes and south to Salisbury and Andover. Much traffic passing from the Westbury direction and travelling to Devizes, Calne and Melksham use the B3098 from Westbury to Bratton to cut north and avoid the roundabout and delays at Yarnbrook. Statistical evidence is not available on this. The assessment states                  The B3098 Westbury Road does not appear to be a particularly busy road and the landscape at the western edge has an exposed and remote feel. Overall the site and immediate landscape context is peaceful.                  This is not the view of residents who have to drive out on to the road or use the road at its narrow points.                  As long ago as 2007 in the West Wiltshire District Council Landscape Character Assessment referred to above in the section for the Bratton &amp; Edington Greensand and Chalk Terrace, it was noted as a Key Landscape Change there was Increasing commuter traffic along the B3098.                  To remedy this the review must take into consideration a wide range of national policies and Wiltshire Council's own Core Strategy. Better account must be taken of a wide range of other factors including                  Highways where the topic paper understates the busyness of the B3098                  The quality of the environment as the site sits in a Special Landscape Area                  The quality of the land as the site concerned consists of agricultural land of the highest quality                  There is an alternative site within the settlement boundary in the ownership of the Parish Council. Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2305</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3 SALISBURY		Justified	
			Effective	
			Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORTS: Appendix A - Context Plan S80, Appendix B - Ecological Appraisal S80, Appendix C - Drainage Appraisal S80, Appendix D - Heritage Appraisal S80, Appendix E - Landscape and Visual Assessment S80, Appendix F - Transport Statement S80, Appendix G - Concept Plan S80 Dolphin Farms Ltd do not support Policy H3 insofar as allocations at Netherhampton Road should be deleted for reasons given in response to Policy H3.1. It is proposed that land North of The Partway (SHLAA Site S80) should be considered as a more sustainable location for growth that can be delivered in the plan period. This would contribute to replacing some of the above housing provision upon which Policy H3.1 is reliant. The land to the North of The Partway is well placed to accommodate growth in order to meet local housing needs and help sustain the new community at Old Sarum/Longhedge. The land is well related to the existing development, with direct access to the highway network and in single ownership. The land is available for development and a range of survey and assessment work has commenced to inform the master planning of the site. Old Sarum was originally open fields surrounding an isolated estate of around 70 social houses, although the Old Sarum Airfield business park was operational directly to the south and various other commercial uses, including the Park & Ride facility were in the vicinity. Land was originally allocated in the Salisbury District Local Plan (2004) for mixed use development including housing, employment, retail, education, recreation and community uses. Outline Planning Permission was granted in June 2007 for mixed use development with 630 dwellings, but with areas reserved for post 2011 development. Consequently, there have been consents for an additional 180 dwellings within the boundaries of the site. The residential estate extends to part of the south western boundary of site S80 with the remaining boundary adjoining public open space forming part of the Old Sarum development. A further mixed use development was allocated on land between the Old Sarum development and the A345, known as 'Longhedge'. This was allocated in the South Wiltshire Core Strategy for 450 dwellings and 8 hectares Employment. Subsequently outline planning permission was granted for a mixed use development comprising 673 dwellings, Employment Uses (B1, B2, B8), Neighbourhood Centre, Primary School, Public Open Space and access to the A345. The development is currently under construction, with Old Sarum completed and a Local Centre recently developed with access directly onto The Partway. Thus, over a period of 10 years or so, the Local Planning Authority has developed a strategy which has focussed development at Old Sarum, with the objective of a new community with a high level of self containment whilst having good public transport links to the city centre. Site S80 is well located in relation to the mixed use developments at both sites. Its south western boundary adjoins the northern phases of housing within the Old Sarum development, including as area of parkland along approximately half of the boundary. Its north western boundary adjoins the Longhedge development albeit that the adjoining area is also proposed for parkland. Site 690 and the Longhedge site are both contained by the Monarch's Way bridleway. A Context Plan is provided at Appendix A to this representation.			

Appendix Q - Schedule of representations

	<p>Dolphin Farms Ltd consider that land at Netherhampton Road (Sites 1027 and 1028) should be deleted from Policy H3 for reasons given in response to the Policy H3.1.</p> <p>Land North of The Partway (Site S80) should be included in Policy H3 as an allocation for about 350 dwellings to compensate, in part, for the deletion of the above sites</p> <p>The supporting text in the format used for other allocations could be as follows (subject to agreement with the LPA).</p> <p>"Land North of the Partway at Old sarum is allocated for the development of approximately 350 dwellings on 17 hectares of land as shown on the Proposals Map. The site is well located to the new communities at Old Sarum and Longhedge and will contribute to sustaining the local services and facilities provided by these developments. The existing impact of new housing at Old Sarum within the wider landscape can be mitigated by strengthening landscaping to the north east boundary of the site along the Monarchs Way PRoW.</p> <p>Designated heritage assets in the vicinity include 'Ende Burgh' long barrow, Old Sarum Airfield Conservation Area, and Old Sarum Ancient Monument. Archaeological remains are recorded within the site. Design and layout taking account of a Heritage Impact Assessment would be capable of preventing development from having a harmful influence. Strategic open space along the south eastern boundary would allow for preservation in situ of below ground archaeological remains whilst maintaining views to Old Sarum SAM from Monarch's Way.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4728525 / 4728522 / 4728517 / 4728520 / 4728519 / 4728518 / 4728521</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To allow opportunity to provide detailed evidence and demonstrate the sustainability of SHLAA Site S80, which is considered to have been unfairly represented in the Site Selection Process.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SEE ATTACHED REPORTS: Appendix A - Context Plan S80, Appendix B - Ecological Appraisal S80, Appendix C - Drainage Appraisal S80, Appendix D - Heritage Appraisal S80, Appendix E - Landscape and Visual Assessment S80, Appendix F - Transport Statement S80, Appendix G - Concept Plan S80</p> <p>Site Selection Process</p> <p>The Site Selection Process Methodology is set out in the Salisbury Area Topic Paper, June 2017. Land to the North of The Portway Site S80 did not progress to Stage 4 of the site selection process by reason of having 5 or more of the SA objectives recorded as "moderate adverse effects".i.e. where "mitigation is likely to be difficult or problematic." (A "minor adverse effects" rating is where "mitigation measures are readily achievable.")</p> <p>Dolphin Farms Ltd have commissioned several preliminary assessments to guide the master planning of the site and respond to some of the assumptions inherent in the Council's recorded assessment scales for the site.</p> <p>The allocation has essentially not been advanced based on "moderate adverse effect" being recorded against the following six SA objectives.</p> <p>Obj 1. "Protect and enhance all biodiversity and geological features and avoid irreversible losses"</p> <p>This rating appears to apply to all site options on the basis that the HRA screening assessment has identified that development at the settlement could contribute towards impacts upon the River Avon SAC through increased water abstraction, increased phosphate loading and habitat loss/damage. However, there is no embargo on development and for this to form basis of "moderate adverse effect" for all sites does not provide a meaningful comparison between the site options of any biodiversity constraints ..</p> <p>Dolphin Farms Ltd commissioned a Preliminary Ecological Appraisal which is provided as Appendix B.</p> <p>The vast majority of the site (arable) comprises land of negligible I low ecological value. Subject to a sensitively designed development scheme, implemented with suitable avoidance, mitigation and compensation measures, it is considered that there are no overriding ecological constraints to the future development of the site. On the contrary, the opportunity exists to provide a number of net gains in biodiversity as part of the development of the site.</p> <p>On the basis of the findings of the report the rating should reasonably change to "minor adverse effect."</p> <p>Dolphin Farms Ltd consider that land at Netherhampton Road (Sites 1027 and 1028) should be deleted from Policy H3 for reasons given in response to the Policy H3.1.</p> <p>Land North of The Portway (Site S80) should be included in Policy H3 as an allocation for about 350 dwellings to compensate, in part, for the deletion of the above sites</p> <p>The supporting text in the format used for other allocations could be as follows (subject to agreement with the LPA).</p> <p>"Land North of the Portway at Old sarum is allocated for the development of approximately 350 dwellings on 17 hectares of land as shown on the Proposals Map. <b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORTS: Appendix A - Context Plan S80, Appendix B - Ecological Appraisal S80, Appendix C - Drainage Appraisal S80, Appendix D - Heritage Appraisal S80, Appendix E - Landscape and Visual Assessment S80, Appendix F - Transport Statement S80, Appendix G - Concept Plan S80 Obj 6. "Protect, Maintain and Enhance Historic Environment" Dolphin Farms Ltd commissioned a preliminary heritage assessment to consider the potential impact and mitigation for designated heritage assets and potential archaeological interest., which is attached as Appendix D. Similar consideration of course applied to the adjoining developments and indeed Old Sarum would have had a greater impact on the adjacent Old Sarum Airfield conservation area. The review of heritage resources has identified below-ground archaeological remains within the site, specifically prehistoric below-ground remains associated with barrows, ditches and part of a large enclosure located within the site. The assessment has also identified intervisibility with two designated heritage assets, namely the Scheduled Monuments Ende Burgh and Old Sarum. However, with appropriate design, including appropriate use of open space, the recorded heritage resource is not considered to preclude development across the site as a whole. With appropriate design, adverse impacts to Ende Burgh and Old Sarum Scheduled Monuments would not exceed less than substantial harm, at the lower end of this spectrum. Development which includes for open space at the south eastern area of the site/adjacent to the centre of the south-western boundary, would allow for preservation in situ of remains in these areas.. It is not considered that development would result in any notable adverse impacts on the significance of the Old Sarum Airfield Conservation Area, which principally drives its significance from the illustrative value as a WW1 airfield. On the basis of the summary heritage assessment mitigation measures are clearly identified and achievable. The rating should be changed to "minor adverse effects." It is also noted that the allocated site 1028 at Netherhampton Road is recorded as "minor adverse effects" when it also has recognised high potential for archaeological significance. Dolphin Farms Ltd consider that land at Netherhampton Road (Sites 1027 and 1028) should be deleted from Policy H3 for reasons given in response to the Policy H3.1. Land North of The Partway (Site S80) should be included in Policy H3 as an allocation for about 350 dwellings to compensate, in part, for the deletion of the above sites The supporting text in the format used for other allocations could be as follows (subject to agreement with the LPA). 				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>SEE ATTACHED REPORTS: Appendix A - Context Plan S80, Appendix B - Ecological Appraisal S80, Appendix C - Drainage Appraisal S80, Appendix D - Heritage Appraisal S80, Appendix E - Landscape and Visual Assessment S80, Appendix F - Transport Statement S80, Appendix G - Concept Plan S80</p> <p>Obj 7. "Conserve and enhance character and quality of rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place"</p> <p>Dolphin Farms Ltd have commissioned a Preliminary Landscape and Visual Appraisal which is provided as Appendix E.</p> <p>In terms of landscape elements and features, the Site comprises a single, large arable field bordered by a minor road, existing housing development, a tall line of generally dense vegetation and gappy hedgerow vegetation along the Monarch's Way bridleway. Whilst development of parts of the site would inevitably result in the loss of the existing arable field, neither the arable fields nor the vegetation which largely defines the field boundaries are uncommon in the surrounding landscape. Any proposed development would create the opportunity to provide enhancements to the existing landscape structure, ensuring the retention of valued features and elements in the longer term, as well as providing additional biodiversity and green infrastructure benefits as recommended in the published landscape policy and guidance.</p> <p>There are limited places from where the existing site is visible. Where it can be seen, it is frequently seen in the context of existing built form such as the recently constructed housing development adjacent to the its south-western boundary.</p> <p>Proposed development would have a minimal effect on the view from the outer edges the Old Sarum hillfort, due to the context of existing built form which partially screens the site. The principal short range views towards the Site are from the Monarch's Way, The Partway minor road and from the adjoining housing. Publicly accessible views from these locations are limited to areas in close proximity to the site and typically feature clear views of the recent housing development adjacent to the south-western boundary of the Site. The low level existing vegetation along the edge of the recent housing development does little to visibly soften the transition between the housing and the wider countryside. Development of the Site would, necessarily, add to the extent of housing within the views. However, sensitive design of tree and hedgerow planting along the Partway edge and along the Monarch's Way would help to filter views both of the raw edge of the existing of housing development and the proposed housing.</p> <p>Recommendations have also been made to set back proposed built form from both The Partway frontage and along the Monarch's Way and this has been incorporated into the conceptual masterplan for the Site. These measures would help to limit the visual impact both in short range and long range views towards the site. They would also help to preserve the view from the Monarch's Way towards the hillfort at Old Sarum.</p> <p>In conclusion, following analysis of landscape and visual considerations relating to the Site and the surrounding area, a series of design mitigation measures have been proposed and incorporated into the conceptual masterplan for the site to limit its potential landscape and visual effects. This design is clearly at a formative stage and there would be scope to strengthen green infrastructure and landscaping if necessary. The</p>

"Reduce poverty and deprivation and promote more inclusive and self-contained communities." The rating of "moderate adverse impact" for this objective is curious and contradicts the Summary SA, which indicates a "moderate positive effect" as the development will increase the population and contribute to the economy through use of local shops and services (Obj 11). This must therefore also surely contribute to self-containment of the community at Old Sarum/Longhedge. From the SA Summary the "moderate adverse effect" rating appears to be based upon the misguided assumption that a new primary school would be required which could not be provided based on the relatively limited scale of development.. However, informal discussion with the Education Authority has indicated that the pupils generated by the new housing would help sustain the existing and planned schools, rather than require new provision as is the case with other proposed allocations in the plan. The primary school provision can be summarised as follows:		Effective																		
	<table border="0"> <thead> <tr> <th></th> <th>PUPILS</th> <th>SCHOOL CAPACITY</th> </tr> </thead> <tbody> <tr> <td>OLD SARUM</td> <td>250 (810 x 0.31)</td> <td>420</td> </tr> <tr> <td>LONGHEDGE</td> <td>208 (673 x 0.31)</td> <td>420</td> </tr> <tr> <td>SITE 690</td> <td>108 (350 x 0.31)</td> <td>-</td> </tr> <tr> <td>TOTAL</td> <td>566</td> <td>840</td> </tr> <tr> <td>274 SURPLUS</td> <td></td> <td></td> </tr> </tbody> </table>			PUPILS	SCHOOL CAPACITY	OLD SARUM	250 (810 x 0.31)	420	LONGHEDGE	208 (673 x 0.31)	420	SITE 690	108 (350 x 0.31)	-	TOTAL	566	840	274 SURPLUS			Consistent with national policy

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2312</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3 SALISBURY		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORTS: Appendix A - Context Plan S80, Appendix B - Ecological Appraisal S80, Appendix C - Drainage Appraisal S80, Appendix D - Heritage Appraisal S80, Appendix E - Landscape and Visual Assessment S80, Appendix F - Transport Statement S80, Appendix G - Concept Plan S80 Sustainable Location The presumption in favour of sustainable development is at the heart of the NPPF, with a core planning principle being that plan making should: "actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable." The developments of Old Sarum and Longhedge have not been planned comprehensively. Old Sarum has provided a primary school at a relatively early stage, which has since been extended to a 2FE school. There is a playing field delivered as part of MOD land redevelopment and children's play areas. A local centre has now been provided with an anchor store and small retail units. Land is reserved for a doctor's surgery. A similar level of facilities is planned for the Longhedge development although it remains to be seen if this is effectively delivered within the terms of the S106. Pegasus has previously been involved with the planning of the Old Sarum development, both the original allocation and the subsequent applications for additional housing. The need for services and facilities to come forward and be sustained at a reasonable level has been self evident from engagement with the local community on these applications. The provision of public open space is a key objective locally and the development of site S80 would create the opportunity for a strategic recreational green corridor linking the two developments and their respective open spaces. There have been various studies relating to catchments to sustain local services and facilities, which will very much depend upon the circumstances. All recognise that increasing customer choice and mobility means people are less likely to use local facilities and thus the population needed to support local services is tending to increase. The relative isolation of Old Sarum from the city, notwithstanding a good public transport service, has meant that delivery of local services and facilities are a key issue for the local community. The provision of about 350 new homes immediately within the vicinity of the developing community will sustain key services and facilities.		Effective	
	Dolphin Farms Ltd consider that land at Netherhampton Road (Sites 1027 and 1028) should be deleted from Policy H3 for reasons given in response to the Policy H3.1. <b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3 SALISBURY		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	SEE ATTACHED REPORTS: Appendix A - Context Plan S80, Appendix B - Ecological Appraisal S80, Appendix C - Drainage Appraisal S80, Appendix D - Heritage Appraisal S80, Appendix E - Landscape and Visual Assessment S80, Appendix F - Transport Statement S80, Appendix G - Concept Plan S80 A transport Statement is provided at Appendix F which further demonstrates the sustainability of the location for further housing in terms of proximity to local facilities and public transport links. In terms of traffic impact the report refers to the two sites which have been included within the draft WHSAP are the site S1027 and S1028 off Netherhampton Road. These sites have been considered by the Council more sustainable than S80. However, the Netherhampton Road sites are located in an area already noted in the council's Transport Model Forecasting report as having two key access junctions which are highway hotspots, these are Harnham Gyratory and Park Wall Junction. Any development to this area would impact severely on these two junctions which are already over capacity in peak periods. S80 is in a preferable location for development as the main junction affected, Castle Roundabout is not recognised as being a highway hotspot, and therefore it could cope with an increase in traffic. In conclusion, on the basis of the appended assessments Pegasus consider that the criteria for the site Selection process has been misapplied and underestimated the capability for effective mitigation for developments at Site S80. At the most only 2 of the SA objectives could be rated as "moderate adverse effects" and the site should be reconsidered for selection on this basis. Dolphin Farms Ltd consider that land at Netherhampton Road (Sites 1027 and 1028) should be deleted from Policy H3 for reasons given in response to the Policy H3.1. Land North of The Partway (Site S80) should be included in Policy H3 as an allocation for about 350 dwellings to compensate, in part, for the deletion of the above sites The supporting text in the format used for other allocations could be as follows (subject to agreement with the LPA). "Land North of the Partway at Old sarum is allocated for the development of approximately 350 dwellings on 17 hectares of land as shown on the Proposals Map. The site is well located to the new communities at Old Sarum and Longhedge and will contribute to sustaining the local services and facilities provided by these developments. The existing impact of new housing at Old Sarum within the wider landscape can be mitigated by strengthening landscaping to the north east boundary of the site along the Monarchs Way PRoW. Designated heritage assets in the vicinity include 'Ende Burgh' long barrow, Old Sarum Airfield Conservation Area, and Old Sarum Ancient Monument. Archaeological remains are recorded within the site. Design and layout taking account of a Heritage Impact Assessment would be capable of preventing development from having a harmful influence. Strategic open space along the south eastern boundary would allow for preservation in situ of below ground archaeological remains whilst maintaining views to Old Sarum SAM from Monarch's Way.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1) IMPACT ON LOCAL TRAFFIC</p> <p>There has been a significant increase in traffic flow along the A3094 Netherhampton Road in recent years, particularly at peak periods, due to the building of the Wellworthy Drive development and the relocation of Bookers to the Harnham Business Park. The A3094 is also used as a 'Southern Bypass' by traffic trying to avoid the Salisbury ring road when travelling from the A36 to the North to the Southern side of the city. The current road infrastructure is not, in my opinion, robust enough to absorb an additional 1000 vehicles (a conservative estimate), nor is the surrounding infrastructure, such as the junction of the A3094 with the A338, A354 and the Newbridge Road, or the junction of the A3094 and the A36 at Quidhampton. Both of these junctions see significant volumes of traffic, with queuing extending for well over a mile at times. Salisbury already has a significant infrastructure challenge due to the physical location of the city, the restrictions imposed due to the natural habitats, and the number of rivers and watercourses that criss-cross the environment. Allowing such a large development, in such a traffic sensitive area will only make the current situation significantly worse.</p> <p>In the past, a 'Southern Relief Road' was considered, which would have been a significant help in addressing a large part of Salisbury's traffic flow problems. As this was not implemented, I cannot see any justification for additional development work in the area that is already subject to so much congestion.</p> <p>I would also point out that recent changes to the provision of pedestrian crossings on the A3094 mean it is extremely difficult to cross this road at peak times and weekends.</p> <p>Whilst I fully understand the pressing need for additional, affordable housing, any development must take into account the impact of the proposed work on a number of important areas: LOCAL TRAFFIC, LOCAL EMPLOYMENT and LOCAL SERVICES.</p> <p>In conclusion, I would urge the Economic Development and Planning department to think very carefully about this and consider a holistic approach to the provision of housing in the City. The plans as they stand do not appear to have fully taken into account the very real issues that development on this scale would create, or the needs of the local population.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	2) IMPACT ON LOCAL EMPLOYMENT It is tempting to think that a large influx of new residents will be a good thing for the local economy, but I do not believe this to be the case with just provision of housing. The simple question to ask is "Where will people living in the new development work?" I put this question to the Council staff at the public exhibition held at the Guild Hall in Salisbury, and was told that all new housing development required provision for appropriate commercial development, to ensure that a balance was maintained. I asked about where this development would be, and did not get a straight answer, just a comment that 'commercial development tends to lag behind housing'. So, to put it bluntly, there is nowhere for a significant number of new people making their home in the City, to work. At the same exhibition, I also heard a Council representative suggest that new residents would be travelling 'to the West of the City' for work. This is a staggeringly na-ive view. There ARE NO SIGNIFICANT EMPLOYMENT OPPORTUNITIES TO THE WEST OF THE CITY. If you accept this fact, then adding to the population will actually increase the competition for jobs. It is interesting to note that the Harn ham Business Park STILL has only one client, namely Bookers, who relocated locally. The park has been available for development for years now, but it would appear that nobody wants to invest their time and money in Harnham for commercial purposes. This is probably related to the local traffic problems discussed in (1) above. Therefore, provision of work for so many new residents seems pretty remote. On a wider point, the number of employers who provided clerical work in the City has fallen drastically in recent years, with key companies like Friends Provident taking their business elsewhere. So, the opportunities for local work are limited. Whilst I fully understand the pressing need for additional, affordable housing, any development must take into account the impact of the proposed work on a number of important areas: LOCAL TRAFFIC, LOCAL EMPLOYMENT and LOCAL SERVICES. In conclusion, I would urge the Economic Development and Planning department to think very carefully about this and consider a holistic approach to the provision of housing in the City. The plans as they stand do not appear to have fully taken into account the very real issues that development on this scale would create, or the needs of the local population.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>3) IMPACT ON LOCAL SERVICES                  The A3095 runs for approximately four miles between Fugglestone St. Peter at Wilton in the West, to the Newbridge interchange in the East. The number of local amenities along that route is woeful:                  Local shop for everyday items= 1                  Locals School = 1 nursery and middle school                  Takeaway= 1                  Doctors surgery = none                  Chemists= none                  Petrol Station = none                  The lack of these facilities means that local residents are forced to travel into and out of Salisbury, all using the same section of the A3094, and adding to the problems. All school children not in primary or middle schools have to travel right across the City. I understand there is provision for a school of some sort, but any future developments MUST be supported by corresponding improvements to local services and facilities. I genuinely believe that the community would embrace improvements in local services if it meant that journeys into the city centre, and particularly the A36 Southampton Road, were greatly reduced. Just adding houses and residents will do nothing to help an already difficult situation. Whilst I fully understand the pressing need for additional, affordable housing, any development must take into account the impact of the proposed work on a number of important areas: LOCAL TRAFFIC, LOCAL EMPLOYMENT and LOCAL SERVICES.                  In conclusion, I would urge the Economic Development and Planning department to think very carefully about this and consider a holistic approach to the provision of housing in the City. I use these fields frequently for walking my dogs, and enjoying walking from Trowbridge to Southwick. Over time I've seen lots of wildlife, from Rabbits to woodpeckers and even Deer. The fields are next Southwick country park, and the wildlife doesn't suddenly start and end in this park. The wildlife spills over and needs places to live and thrive. I ask of you to take into consideration the effects you have on such a space. With so many brown sites in Trowbridge that are possible to build on, it's so disheartening that the wildlife will be significantly reduced by these proposed plans. I ask you reconsider the proposed plans, and I will fight them ever step of the way.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Wiltshire Council Community Governance Review July 2016</p> <p>A great deal of work and public expense was involved in preparing reports for the CGR consultation that took place last year. At a meeting of full council it was decided that this area of North Bradley should not be adopted by Trowbridge Town Council.</p> <p>However, in the Wiltshire Housing Site Allocations Plan it is stated in paragraph 3.3 'That no settlements in the Trowbridge Area are considered to have had their settlement boundaries reviewed through a sufficiently advanced neighbourhood planning process.'</p> <p>Are we to understand that the costly Boundary Review of 2016 was done in a less than professional manner and therefore ultimately pointless? Or is this a way of forcing a second review in order to overturn some of the earlier conclusions which do not suit Wiltshire Council and their desire to site the majority of houses in and around Trowbridge?</p> <p>Your draft plan believes that green spaces could be protected and enhanced albeit you are taking a lot and giving little in return yet not looking at your brown sites. You believe that it would create employment in the local building trade – we suggest it might mean more cars driving to and from the area and any construction would be temporary anyway once the houses were built. These proposals believe that local shops would benefit from more houses whereas we truly think that the local shops won't necessarily gain from more houses in and around Trowbridge, maybe with the exception of the revitalised Odeon area, because in our experience local people prefer to visit 'nicer' towns with better facilities. In our opinion despite Trowbridge being the county town of Wiltshire it is very sadly lacking – you should be looking to building it up inside out and not making into a big conurbation with no character or heart.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>Any road widening at either end of Drynham Lane will totally spoil the nature of this much appreciated local resource. (We actually produced a petition when objecting to the boundary review – which was just a snapshot of how people use and enjoy this lane.) Despite the draft plan stating that Trowbridge is within walking and cycling distance (we haven't noticed any properly 'joined up' cycle lanes within this busy county town of Wiltshire) it must be appreciated in this modern age that the majority of houses will use upwards of two cars for 'school runs' and transportation to a place of work. In addition to the people living on the estate, the traffic to and from the proposed school will just exacerbate this problem.</p> <p>Any road that joins up to the roundabout near KFC will only exacerbate the gridlock that frequently occurs with the link in roads. Extra traffic along Wiltshire Drive will have a similar effect further along Bradley Road. However, the worst aspect of having such an increased number of cars along the very limited capacity within Drynham Road and Dursley Road will create problems because the road, at the quietest times, is like a slalom run where you have to weave in and out of parked cars which frequently causes frustration with motorists.</p> <p>It would be interesting to see how you would solve the problem at the end of Dursley Road where, with the exception of taxis and buses, you are not allowed to turn right onto County Road. Cars are often tempted to illegally turn right across two lanes of traffic or, as we do, drive to the top and then do a very risky u-turn on the roundabout at the top. I frequently have to stop on the roundabout because other vehicles have misinterpreted my indications and assumed I was just turning right – increased traffic doing this can only increase the likelihood of an accident.</p>

This area is not prone to dramatic flooding, although the fields do have a tendency to 'pool' as pointed out by a representative of Wessex Water and the lane does flood after heavy rain. It does seem that the local area copes well enough with adverse weather but any large development is likely to introduce greater strain on this natural capability.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED REPORT: Salisbury Transport Strategy</p> <p>Dolphin Farms Ltd does not support the allocations at Netherhampton Road (Site S1028) and gives details as to why it is unsound. The WHSAP proposes to allocate 750 houses in the Salisbury Community Area. Site S1028 would accommodate the vast majority (640) with 100 houses proposed on the site opposite (Site S10271), 100 houses to extend the existing Rowbarrow housing development (Site 3272), and 10 houses at Hilltop Way (Site S61).</p> <p>The Plan therefore proposes to allocate 85% of the potential future allocated housing in Salisbury in one location at Netherhampton Road. Our client has several major concerns in this regard::</p> <p>Traffic</p> <p>The Netherhampton Road sites are located in an area already noted in Wiltshire Council's Transport Model Forecasting report as having two key access junctions which are highway hotspots. These are: Harnham Gyratory and Park Wall Junction. Any development at Netherhampton Road would severely impact on these two junctions which are already over capacity in peak periods. See the representations made in relation to Paragraph 5.128.</p> <p>The Summary of the Salisbury Transport Strategy is included at Appendix 1. Paragraph 5.6 states that:</p> <p>"Junction improvements tend to result in more traffic passing through a particular junction and thus consume any of the additionally created capacity. This is particularly so in Salisbury, where the Netherhampton Road provides an alternative route for traffic passing through Salisbury and improvement to traffic flow through the Harnham Gyratory would result in more traffic travelling along Netherhampton Road rather than along the A36."</p> <p>This implies that Netherhampton Road could (in 2012) accommodate increased levels of traffic from the Harnham Gyratory travelling away from Salisbury City Centre. The proposal of 740 homes on Netherhampton Road will not only have a major adverse impact on these junctions, it would also have to contend with the additional traffic proposed above if the Council's plans come to fruition. It is proposed that the Council's Transport Strategy is flawed and before any strategic allocations can be made, the traffic modelling and proposed network improvements MUST be robust and based on housing trajectories looking forward to 2036 in line with the timescales of the Council's intended Local Plan Review.</p> <p>A planning application was submitted by Wiltshire County Council in 2002 (ref. S/2002/1961) for the construction of a viaduct over the River Nadder and the construction of a single carriageway relief road for Harnham including associated infrastructure and works on land which forms part of the Site S1028.</p>				

Appendix Q - Schedule of representations

	<p>It is submitted that the development of Sites S1027 and S1028 would not only substantially increase traffic movements along Netherhampton Road and have major adverse impacts on the already burdened highway, it would also remove the opportunity to provide a clear and practical highways solution for the city. As it stands, there are no proposals to improve the current highways problems, despite having been on the Council's agenda for many years.</p> <p>In these circumstances, it is essential that a highways solution be proposed in order to be confident in the delivery of the homes prior to any allocation</p> <p>It is submitted that the Policy H3.1 allocations at Netherhampton Road (S1027 and S1028) are neither sustainable nor deliverable within the plan period. Policy H3.1 should be deleted and Site S1027 deleted from Policy H.3.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4728738</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To allow the opportunity to provide detailed evidence and articulate concerns over the sustainability and deliverability of the H3.1 allocation.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2337</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Landscape</p> <p>The evidence base supporting the WHSAP includes a Landscape Assessment which assesses all of the proposed site allocations. The assessment of Site Ref. S1028 is set out at pages 13-16 of the Landscape Assessment Part 2. It judges the site to be:</p> <p>Attractive and peaceful with high visual prominence;                  High sensitivity for public accessibility;                  Contains highly important views;                  Low mitigation potential;                  HIGH ADVERSE effect on landscape character;                  HIGH ADVERSE impact on views (including view from public rights of way);                  Medium adverse effects on neighbouring residential properties, and                  Low capacity to accommodate change.</p> <p>The assessment goes on to state that development of the site would adversely affect views and it would be difficult to mitigate against this; and that development of the site would conflict with the recommendations made for the site and the wider area, as set out in the "Salisbury District Settlement Setting Assessment" (2008).</p> <p>The findings of the Landscape Assessment as documented were not included in the summary assessment of the Sustainability Appraisal of Site S1028 which is set out at Table F.9 within the Salisbury Community Topic Paper. Misleadingly, the second paragraph specifically states that "No major adverse effects have been identified for this site". It is submitted that due consideration has not been given to the potential landscape harm that would arise through the site's development and its encroachment towards the Cranborne Chase AONB boundary, thereby potentially affecting its setting.</p> <p>Notwithstanding the sensitivity of the landscape within which Site S1028 is located, as an urban extension it relates very poorly to the existing settlement pattern and has no well defined boundaries. It does not represent a sustainable consolidation of existing development or relate to defined physical boundaries. There are more logical sites available, including our client's land North of Old Sarum (Site S80)</p> <p>It is submitted that the Policy H3.1 allocations at Netherhampton Road (S1027 and S1028) are neither sustainable nor deliverable within the plan period. Policy H3.1 should be deleted and Site S1027 deleted from Policy H.3.</p>				
<b>Attached files (Please see Objective)</b>					

Appendix Q - Schedule of representations

**If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?**

To allow the opportunity to provide detailed evidence and articulate concerns over the sustainability and deliverability of the H3.1 allocation.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Water Supply  There is no local water supply capacity available for the development of 640 homes at Site S1208 and this has been confirmed by a local water utility company (ref. Table G.5 of the Salisbury Community Area Topic Paper). A capacity appraisal would be needed to confirm the scope, and works would be necessary to upgrade the local supply and capacity. In the absence of knowledge of the scale of the works, it is submitted that such works may render the scheme unviable, particularly when combined with highways infrastructure upgrades (yet to be identified). It is submitted that the Policy H3.1 allocations at Netherhampton Road (S1027 and S1028) are neither sustainable nor deliverable within the plan period. Policy H3.1 should be deleted and Site S1027 deleted from Policy H.3.			
<b>Attached files (Please see Objective)</b>					
<b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b>				To allow the opportunity to provide detailed evidence and articulate concerns over the sustainability and deliverability of the H3.1 allocation.	

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2339</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	H3.1, H3.3 Netherhampton Rd Salisbury		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Deliverability  The deliverability of Site S1208 is extremely questionable. There is no evidence to indicate that development could come forward by overcoming the very real constraints and develop a comprehensive mixed use strategy within the plan period. We consider that the approach taken in the HSAP to allocate 87% of the Salisbury housing allocations in one location, with many unknown and unresolved issues, risks a significant housing shortage in Salisbury within the plan period.. Particularly when considered in tandem with the allocations of housing at Churchfields (1100 houses) and the Central Car Park (200 houses) which have been confirmed in the WHSAP as unlikely to come forward within the Plan period.  By limiting the potential housing supply to one large site in Salisbury, the plan conflicts with paragraph 14 of the NPPF which states that: "Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change"	Effective  Consistent with national policy		
	Should Sites S1028 and S1027 fail to deliver within the plan period, the Plan would not allow for sufficient flexibility for an alternative, deliverable site to come forward in accordance with policy. In terms of lead times a report into the delivery of urban extensions on behalf of Gladman developments limited was prepared in February 2014 and was submitted as evidence to the Stroud Examination. The Gladman study was supported by evidence provided by local authorities on 78 sites. The Study considered the factors associated with bringing forward major urban extensions of 500+ dwellings before moving on to look at specific case studies from each of the English regions, Scotland and Wales. The Study was an exercise in considering deliverability, the factors which affect deliverability, the timescales involved from a site being identified for development to planning permission being granted and thereafter the rates at which housing can realistically be delivered on major urban extension sites of 500+ dwellings. The results of the site specific research, was then drawn together to inform an overall assessment of the timescales associated with bringing forward urban extensions and rates of delivery once development gets underway. The Study was made available to LPAs, government departments and agencies and industry bodies as an evidence based tool which can be drawn upon to inform Development Plans across the UK. The Study found that the time taken to determine planning applications is a major factor in the overall delivery timescales for Major Residential Development sites. The average time period from the initial concept to the grant of planning permission for sites in England is 6.67 years. The average timescale from submission to a grant of outline planning permission was 34 months (time periods for determination as provided by the relevant Authority). The average across those sites in the Study which have extant permission in outline and where the timescales between the Council resolving to grant permission and the decision being issued are available (where the time period for legal agreements to be made has been provided by the Authority) was 23.6 months. It should be noted many sites failed to progress beyond a resolution to grant because of unresolved legal matters.			

Appendix Q - Schedule of representations

	<p>In terms of delivery from subsequent discussions with the relevant developers the Study found (including Taylor Wimpey, Barratt, David Wilson Homes, Bellway and Redrow), the average annual delivery rate of 30 - 35 dwellings per annum per single house builder outlet is realistically achievable.</p> <p>The Study concluded that an 8-year period should be allowed for from the preparation of an outline/ principle planning application to the delivery of homes. It is important to note that the Study was rooted in factual evidence provided by Local Authorities across England and Scotland. The Savills Study on behalf of Barratt Homes in October 2014 provided an update on the Gladman Study (also submitted to the Stroud Local Plan Examination). It identified 24 sites for which an outline application was submitted after 2010, 18 of which were identified in the original Gladman report.</p> <p>Compared with the overall sample, these sites progressed much more quickly, taking an average of 33 months from the submission of the outline application to start on site, against the average of the whole sample of 60 months. "This suggests that it has become more likely that large sites will progress through the planning system quickly enough to begin delivering housing units within the lifetime of a five-year housing land supply plan." Even so, 33 months from submission of outline planning application to a start on site would still point to an overall period approaching 4 years for the first occupation once the initial infrastructure phase has been allowed for together with the construction period for the first houses.</p> <p>If this were applied to the Netherhampton site, it would take 6.7 years to progress to outline application stage, and a further 33 months so first commencement. This would take the timeframe beyond 2026.</p> <p>Therefore, even in the event where Site S1028 is considered to be developable, it is highly unlikely to commence within the plan period. It is submitted that the Policy H3.1 allocations at Netherhampton Road (S1027 and S1028) are neither sustainable nor deliverable within the plan period. Policy H3.1 should be deleted and Site S1027 deleted from Policy H.3.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To allow the opportunity to provide detailed evidence and articulate concerns over the sustainability and deliverability of the H3.1 allocation.</p>

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2340</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	Yes
				<b>Do you consider the draft WHSAP is sound?</b>	No

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Local Plan Review The Wiltshire Core Strategy (WCS) 2015 plans for housing to come forward through its strategic allocations, neighbourhood plans and planning applications as well as subsequent site allocations development plan documents. The need to bring forward a Housing Site Allocations Plan to compliment the WCS was identified to provide a surety of housing supply through the remaining plan period to 2026. At the same time the Council has embarked upon the Wiltshire Plan Review for the period 2016 - 2036 with a regulation 18 consultation on Options in 2018. Notwithstanding the concerns over the sustainability of the proposed H3.1 allocation, there is a clear doubt over its ability to deliver housing over the plan period. Paragraph 4.68 recognises the need for a "generous lead in time" for delivery of Netherhampton Road, recognising the scale of the site and need to develop a mitigation strategy and master plan. The site is also identified as having potential to provide employment land for relocation of businesses from Churchfields Business Park, thus freeing up land for delivery of housing at that location in the "longer term". There is no indication of the extent of employment land to be provided under H3.1 for this purpose. Churchfields was first allocated in the South Wiltshire Core Strategy and there is still no indication of any strategy for relocating the 200 or so businesses that occupy the business park. It should be noted that this is a "Housing Sites Allocations Plan" intended to compliment the WCS and provide surety in housing land supply during the plan period up to 2026. Employment sites are allocated, with land requirements specified, through the WCS, mainly as part of strategic mixed use developments. The need for further employment sites will form part of the Local Plan Review. Policy H3.1 is the only mixed use allocation within the HSAP and of a significantly larger scale than the other allocations. In all the circumstances, it is evident that the land at Netherhampton Road should be given more time to assess constraints and develop a mixed use development strategy. The scale of development should be more appropriately considered through the Local Plan Review 2016-2036. It is submitted that the Policy H3.1 allocations at Netherhampton Road (S1027 and S1028) are neither sustainable nor deliverable within the plan period. Policy H3.1 should be deleted and Site S1027 deleted from Policy H.3.

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4 Church Lane			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The centre of Trowbridge is dying and presents a dismal welcome to visitors and locals alike; additional out-of-town development will only make matters far worse. Traders and shoppers are both very pessimistic about the commercial future of Trowbridge town centre and feel that the chronic neglect and lack of civic pride shown by the local authorities will lead to the irreversible decline of the heart of the town.

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I object most strongly to any change to existing settlement boundaries and further allocation of new housing sites within Warminster, as your draft plan is not sound for the following reasons:</p> <p>Positively prepared - the plan has not been prepared to meet objectively assessed development with sufficient supporting infrastructure. In Warminster, the draft plan is not consistent with achieving sustainable development but merely seeks to increase housing numbers in case Wiltshire cannot achieve an overall housing target by 2026. Further, the change to the settlement boundary for East of Dene is not required, is illogical and will allow developers the opportunity to further speculatively develop the site beyond your proposed draft plan. Finally, it fails to review viable alternatives; for example, increasing the West Urban Extension housing numbers; a site which is capable of significant expansion.</p> <p>Justified - The draft plan for Warminster is not an appropriate strategy, when compared against other reasonable alternatives, based on proportionate evidence. The Wiltshire Core Strategy, after careful analysis, selected the Warminster West Urban Extension as the site for development which was then ratified by a Planning Inspector. This site can absorb the perceived housing shortfall to 2026 and more importantly provide the supporting infrastructure making the site sustainable.</p> <p>Effective - The draft plan is in danger of not delivering over its period unless Wiltshire force developers to start approved development and it is not based on effective joint working on cross-boundary strategic priorities. The plan is merely a reactive solution to a perceived shortfall in housing targets.</p> <p>Consistent - The draft plan is not consistent with national policy, the Core Strategy or Warminster Neighbourhood Plan. Wiltshire Council's Flood Risk Policy 67 requires new development site selection to comply with the National Planning Policy Framework (NPPF), and the specific policies created in the Councils Strategic Flood Risk Assessment (SFRA). By adhering to these policies, Wiltshire manages and reduces the risk of flooding. The NPPF and SFRA require all selected sites to prove they have passed a sequential flood test based on the details in the SFRA. For areas at higher risk of flooding, which Warminster is recognised as being, safe site selection requires more detailed assessments by either a SFRA Level 2 or a Surface Water Management Plan (SWMP). This has not occurred in Warminster, but has occurred in other Wiltshire Towns and large villages, therefore Wiltshire should reject this draft site selection.</p> <p>For the above reasons, I most strongly object to any change to the housing numbers and settlement boundaries within Warminster proposed by the draft Wiltshire Housing Site Allocations Plan. Further, I would like my objection highlighted for the Planning Inspector examination scheduled for Spring 2018.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>As I understand it, there is already oversupply of housing forecast in both the local Malmesbury Community Area (100 houses before any Windfall sites) and the wider North &amp; West Wiltshire area (2200 houses). There is therefore no strategic need for a site of the proposed scale in Crudwell.</p> <p>Wiltshire's Core Strategy states that "Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities." but no such needs or opportunities, services or facilities have been identified that would be fulfilled or improved by this allocation. So this aspect of the Plan is not consistent with the Strategy.</p> <p>Crudwell has begun the process of producing a Neighbourhood Plan. As part of this, a survey is planned to determine what local needs for housing exist and how they should be met. Crudwell is not anti-development, it would simply wish to plan itself for any growth via the emerging Neighbourhood Plan.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I have lived in Crudwell all my life (26 years) and am very concerned about the proposals to substantially increase housing in the village when facilities are already running at full capacity. The plan to build 50 dwellings at Ridgeway Farm represents a 20% increase in dwellings in the village of Crudwell, an increase that is neither necessary nor sustainable.

<b>Comment ID:</b> <a href="#">2350</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Paragraph	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	5.128 Salisbury		Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>SEE ATTACHED REPORT: Salisbury Transport Strategy                  Dolphin Farms Ltd do not support the paragraph but give details as to why it is unsound.                  Paragraph 5.128 of the WHSAP relates to the transport network in Salisbury. The paragraph seeks to provide reassurance relating to 'measures to support the scale of growth envisaged by the WCS'. Our client has several key concerns in this regard.</p> <p>The Summary of the Salisbury Transport Strategy (2012) is attached at Appendix 1. There are no page numbers but page 1 sets out the housing growth for Salisbury and Wilton as set out in the WCS as 4, 170 homes. However, the indicative requirement is in fact 6,060 homes by 2026.</p> <p>Figure 3.2 of the Summary document specifically identifies the Harnham Gyratory, Exeter Street roundabout and the Park Wall Junction as operating at over 70% - 90% capacity. These junctions would all be heavily affected by the proposed allocation of 640 homes on Netherhampton Road as the traffic from that site (Site S1028) will pass at least one of these junctions when travelling to any destination.</p> <p>Section 3 of the Summary document sets out the highway constraints as including:</p> <p>The highway network is constrained by the operation of Exeter Street Roundabout.                  There are delays on the roads approaching the Harnham Gyratory.                  Some through traffic between Wilton and Southampton Road routes through Harnham rather than the A36.</p> <p>Despite forecasting traffic modelling dating back to 2008, there has been no progress in terms of upgrading the existing highway network to date.</p> <p>The Summary document makes recommendations for network improvements to the Harnham Gyratory and Exeter Street roundabouts but there has been no progress in terms of upgrading the capacity. Furthermore as the housing requirement increases, there is no evidence to demonstrate that the proposed measures to 'upgrade' the road network will be sufficient to address the increased amount of traffic.</p> <p>Paragraph 5.6 of the Summary document states that:</p> <p>"Junction improvements tend to result in more traffic passing through a particular junction and thus consume any of the additionally created capacity. This is particularly so in Salisbury, where the Netherhampton Road provides an alternative route for traffic passing through Salisbury and improvement to traffic flow through the Harnham Gyratory would result in more traffic travelling along Netherhampton Road rather than along the A36."</p>			

Appendix Q - Schedule of representations

	<p>This implies that Netherhampton Road could (in 2012) accommodate increased levels of traffic from the Harnham Gyratory travelling away from Salisbury City Centre. The proposal of 740 homes on Netherhampton Road will not only have a major adverse impact on these junctions, it would also have to contend with the additional traffic proposed above if the Council's plans come to fruition. It is proposed that the Council's Transport Strategy is flawed and before any strategic allocations can be made, the traffic modelling and proposed network improvements MUST be robust and based on housing trajectories looking forward to 2036 in line with the timescales of the Council's intended Local Plan Review.</p> <p>The Council cannot rely on the status quo to support the levels of traffic movements that would be generated from 740 homes on Netherhampton Road.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4728738</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>To allow the opportunity to present detailed evidence and articulate concern over outdated traffic modelling and lack of highway network improvements.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>I wish to register most strongly, my opposition to the proposed building of 840 houses in Harnham. We have lived at this address for thirty years and year on year, have had first hand experience of the ever increasing volume of traffic and the inability of the existing roads to cope. In twenty years the character of the traffic on the Harnham road has changed dramatically and now includes a very large number of heavy goods vehicles. The road can barely cope with volume of traffic at present: every day traffic backs up for more than 500 metres from the Harnham Gyratory. This causes significant pollution and is a major health hazard particularly to young children on their way to school and to the elderly. Road safety is a major concern. Sadly, a recent fatality closed the road for 5 hours. The result was an 8 minute journey to Park Wall traffic lights taking some 50 minutes, as the city routes and Wilton road felt the knock on effect of this accident. The constructions of a large number of dwellings, accompanied by at least one vehicle per household, will add an unsupportable burden to an already stretched transport system. Other solutions need to be explored. Before any building is considered, an efficient transport infrastructure has to be present. Last week, I was interested to see on local television, an Oxford City councillor highlighting their need for more housing and stating their priority and starting point would be transport. Because we are a medieval city, built around the confluence of 5 rivers, a modern transport infrastructure will always pose problems. We should be considering smaller, brown field site developments and developing those areas around established park and ride bus routes.</p>

Comment ID:	<a href="#">2357</a>	<b>Consultee</b> Dolphin Farms Ltd  <b>Person ID:</b> 1132344	<b>Agent</b> Mr Glenn Godwin Director  Pegasus Group  <b>Person ID:</b> 825048	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
				<b>Do you consider the draft WHSAP is sound?</b>	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?	Table			Positively prepared	
Please identify the policy, paragraph, table, figure or site to which you are referring.	4.1 Housing Market Areas: Minimum to be allocated	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Justified  Effective  Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	Dolphin Farms Ltd does not support Table 4.1 but explains why it is unsound. Table 4.1: Housing Land supply for Wiltshire's HMAs (forecast at 1 April 2017) indicates that the remaining housing requirement in the South Wiltshire HMA is: Requirement: 10,420, Completions 5,067, Developable Commitments 4,759, Plan Allocations 594 Pegasus do not agree that the Developable Commitments as set out in Table 4.1 at 4,759 is correct. This figure includes 750 (of the allocated 1100) homes at Churchfields (Salisbury) and 200 homes at the Central Car Park site (Salisbury). It is widely known that these sites have been longstanding allocations (ref. Wiltshire Core Strategy, Core Policy 20). Paragraphs 4.66 of the WHSAP confirm that Churchfields is a strategic mixed use site that, in order to be developed requires substantial employment uses to decant, and is now expected to commence "later than envisaged and much less land for new housing will be available before 2026." Commercial space at Churchfields is available to let and there are some 200 businesses with about 4,500 employees within the estate. The site was originally allocated for housing in the South Wiltshire Core Strategy (2012) and there is still no evidence to indicate that the decant process will commence in the foreseeable future or that the Council has any strategy to enable this to happen to the extent that the site can be comprehensively planned for housing.. Pegasus submit there is no prospect of this site coming forward within the plan period and the provision of housing should not be reliant upon this site. Similarly, the Central Car Park site is in commercial use with no evidence or application coming forward to indicate its deliverability within the plan period. Pegasus submit that neither Churchfields nor the Central Car Park site should be included within the Developable Commitments as this is misleading and contrary to paragraph 14 of the NPPF which states that local planning authorities should positively seek opportunities to meet the development needs of their area and should meet their objectively assessed needs. The WHSAP acknowledges the delay in these allocations being deliverable and on this basis, Wiltshire Council has not positively sought alternatives to meet the housing needs. Pegasus submit that the Developable Commitments in Table 4.1 to be reduced by 950 homes to 3,809. This would have the impact of increasing the residual requirement to 1,544 in the South Wiltshire HMA. This will ensure that the plan is justified insofar as being the most appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence (paragraph 182 of NPPF).

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Paragraph 47 of the NPPF requires that the full objectively assessed needs for market and affordable housing (OAN) is met within the Housing Market Area (HMA) as far as is consistent with the policies set out in the NPPF.</p> <p>The Wiltshire Core Strategy Inspector issued a letter on 2nd December 2013 (large parts of which are maintained in his Final Report) which identified that the OAN was in the region of 44,000 dwellings over the plan period. Nevertheless, the Inspector went on to accept a housing requirement of 42,000 dwellings.</p> <p>The High Court Judgment of Jelson Limited vs Hinckley and Bosworth Borough Council et al [2016] EWHC 2979 (Admin), defines what is meant by the terms OAN and housing requirement in paragraph 41, as follows:</p> <p>"Full Objective Assessment of Need for Housing: This is the objectively assessed need for housing in an area, leaving aside policy considerations. It is therefore closely linked to the relevant household projection; but it is not necessarily the same. An objective assessment of housing need may result in a different figure from that based on purely demographics ...                  Housing Requirement: This is the figure which reflects, not only the assessed need for housing, but also any policy considerations that might require that figure to be manipulated to determine the actual housing target for an area. For example, built development in an area might be constrained by the extent of land which is the subject of policy protection, such as Green Belt or Areas of Outstanding Natural Beauty. Or it might be decided, as a matter of policy, to encourage or discourage particular migration reflected in demographic trends. Once these policy considerations have been applied to the figure for full objectively assessed need for housing in an area, the result is a "policy on" figure for housing requirement. Subject to it being determined by a proper process, the housing requirement figure will be the target against which housing supply will normally be measured."</p> <p>This identifies that a policy-on housing requirement can be different from the policy-off OAN to achieve particular policy objectives, such as protecting environmental assets or preventing unsustainable cross boundary relationships. However, in Wiltshire no such policy objective was fulfilled through the adoption of a housing requirement below the OAN. The reasons were in effect that:</p> <ol style="list-style-type: none"> <li>i. the OAN could not be achieved;</li> <li>ii. the Council could not demonstrate a five-year land supply against the OAN;</li> <li>iii. the OAN was not assessed as being the preferred option through the Sustainability Appraisal; and</li> <li>iv. the Council were committed to rapidly reviewing and responding to the OAN.</li> </ol> <p>However, none of these reasons can now be justified (as described below) and so there can be no reason for not meeting the full OAN as required by paragraph 47 of the NPPF.</p>			

Appendix Q - Schedule of representations

The OAN could not be achieved

Wiltshire delivered in excess of the annualised housing requirement in 2013/14 and in 2014/15, even in the absence of allocations prior to 2015. This clearly demonstrates that the adopted housing requirement can be sustainably exceeded. Indeed, now that the Strategic Allocations of the Core Strategy (and the Chippenham Site Allocations Plan and Neighbourhood Plans) are delivering it would be expected that these rates of delivery would increase significantly. This entirely undermines the previous evidence presented to the Inspector examining the Wiltshire Core Strategy that such rates of development were unachievable.

The Council could not demonstrate a five-year land supply against the OAN

Based on the Council's figures and method of calculation, the Council would currently be able to identify a five-year land supply against a housing requirement of 46, 158 dwellings (7,440 in East Wiltshire HMA; 27,898 in North and West Wiltshire HMA; 10,820 in South Wiltshire HMA) in addition to the allowance for 900 dwellings at the West of Swindon. The adopted housing requirement can therefore be increased to reflect (or even exceed) the OAN in accordance with the NPPF.

The OAN was not assessed as being the preferred option through the Sustainability Appraisal

The Sustainability Appraisal (SA) has evolved since the adoption of the Core Strategy, and this has been used to inform the Housing Site Allocations Plan which proposes to deliver circa 46,600 dwellings.

The Council were committed to rapidly reviewing and responding to the OAN

The Inspectors Final Report relied upon the Council producing a new SHMA by early 2016 (see paragraph 81). This would have enabled the Council to respond positively to address the identified needs through the planned early review of the Core Strategy. However, in the intervening 3 years, no such SHMA has been produced and there has been no progress on the early review of the Core Strategy. It is self-evidently the case, that the Council have not re-assessed needs and responded appropriately. The continued reliance upon the commitments of the Council to identify and address the OAN should not be afforded weight, given that the previous commitments have not been fulfilled.

Based on the preceding analysis, there is no evidence and no justification for not meeting the OAN in full in Wiltshire, as required by paragraph 47 of the NPPF. The Housing Site Allocations Plan should therefore seek to deliver the OAN of 44,000 dwellings. Such an approach would be wholly consistent with the housing requirement of the Core Strategy which requires the delivery of at least 42,000 dwellings.

The SHMA

Wiltshire Council and Swindon Borough Councils have jointly commissioned a SHMA. A draft of this document was presented at workshops in October 2016 although the document was not published. However, in the following year no further progress has been made towards the publication of this SHMA. This is highly unusual given that SHMAs typically take only a few months to produce and that the Wiltshire Core Strategy Inspector had relied upon the publication of this document in early 2016 to find the Wiltshire Core Strategy sound.

This SHMA should be published as soon as possible in order that participants can either be reassured that the Development Plan for Wiltshire is doing its job and meeting the OAN in full; or that appropriate action can be taken to identify additional sources of supply.

The Standardised Methodology

The Government are due to consult upon a standardised methodology for the OAN in September 2017. Whilst this will only be a consultation document and the weight to be afforded should be viewed in this context, it will provide an indication of the OAN for Wiltshire.

Once the SHMA and/or the standardised methodology is made available, it will be necessary for the OAN to be responded to within the Housing Site Allocations Plan in accordance with the findings of the Inspector Ware regarding the Harrogate District Sites and Policies DPD who identified

#### Appendix Q - Schedule of representations

that where the OAN had been reassessed it is necessary to take this into account in a Site Allocations Plan. The same finding has recently been reached by Inspector Lyons in relation to the Forest of Dean Site Allocations Plan.

Based on the preceding analysis, it is clear that in order to accord with national policy, it is necessary for the Housing Site Allocations Plan to deliver the full OAN for Wiltshire, taking account of the identified OAN (44,000 dwellings) and any newly arising evidence.

#### DISTRIBUTION OF GROWTH BETWEEN THE HMAs

Wiltshire contains 3 HMAs, each of which is planned to deliver at least 9% in excess of the Core Strategy minimum housing requirement according to Table 4.7. Provision of a level of housing in excess of the minimum housing requirements, and cumulatively in excess of the currently identified OAN is to be supported providing this supports the spatial distribution identified in the Core Strategy.

#### DEVELOPABLE SUPPLY

The Council have identified the developable supply in the CA Topic Papers and in Table 4.9 of the draft Plan. However, the Council have not identified the individual components that make up this supply and as such the total figures in Table 4.9 cannot be relied upon. The necessary evidence should have been made available for this consultation, and will be required prior to examination. Pegasus Group reserve the right to submit detailed representations on this when the necessary evidence is made available.

The latest assessment of the developable supply which is available is contained in the Wiltshire Housing Land Supply Statement Update March 2017 (HLSS). It is useful to consider some of the components of supply identified in this report in order to assess the robustness of the Councils current unpublished assessment.

There are a number of sources of supply in the HLSS which should not be relied upon to deliver as outlined below.

#### Windfall allowance

The Draft Plan includes a windfall allowance based on the previous delivery of previously developed sites. This source of supply is in itself uncertain, but it is useful as an indication of what would be delivered if previous rates of delivery were able to be maintained.

There are however, methodological flaws in the approach the Council takes to calculating the windfall allowance.

The Council have changed their methodology for calculating the windfall allowance since the examination of the Wiltshire Core Strategy. At that time, the Council assumed that small sites would deliver circa 575 dwellings and that large sites would deliver circa 364 dwellings totalling 939 dwellings within five years. However, the Council now assume that there will be 1,611 windfall dwellings within five years. This has been calculated using a consistent methodology for calculating the small site allowance (although based on a different period) from which it can be calculated that the Council now assume that circa 1,036 dwellings will be delivered on previously developed large windfall sites. This is despite the fact that the Council do not have any evidence that there is sufficient capacity on such sites to deliver this level of housing. Indeed, at the time of the examination the Council identified a total potential capacity of only 364 dwellings (and some of these may have subsequently gained consent and so be included in the developable supply already).

The approach of the Council in regards to the large windfall allowance relies upon the delivery of a level of dwellings for which there is no evidence that there is the requisite capacity. Indeed, the Council rely upon the trends of large windfall development in recent years, but this is inevitably hugely variable and a single large windfall development can have a disproportionate effect on the average.

#### Saved Local Plan Allocations

The Council continue to rely upon the delivery of saved Local Plan allocations in the HLSS. This includes sites which were allocated in the North Wiltshire Local Plan in June 2006, the Salisbury District Local Plan in June 2003, and the West Wiltshire District Plan 1st Alteration in June

## Appendix Q - Schedule of representations

2004. Despite the fact that these sites have been allocated for development for between 11 and 13 years, there has been no progress towards site delivery.

The record of delivery of sites needs to be taken into account when assessing the availability of sites as set out in the NPPG (3-020). These saved allocations have an extensive record of non-implementation and against this background the certainty of any delivery from these sites is limited. Accordingly, in accordance with the NPPG these sites should not be relied upon to deliver.

### Neighbourhood Plan Allocations

The HLSS also includes a number of Neighbourhood Plan allocations which are not subject to planning applications. The developability of sites is not required to be demonstrated in order for a Neighbourhood Plan to be made. Indeed, this is demonstrated by the fact that Wiltshire Council do not consider that the majority of sites allocated in the Devizes Neighbourhood Plan will deliver prior to 2024 in the HLSS.

The fact that the Council do not consider that these sites are deliverable for an extended period casts doubt on whether these sites will deliver at all. Even if they do deliver, it would only take a minimal delay for them to deliver outside of the plan period. As such, these sites should not be relied upon to deliver in the absence of detailed evidence.

### MONITORING

The Housing Site Allocations Plan is one of the delivery mechanisms for the Core Strategy. As such, the Council will be required to demonstrate that a five-year land supply exists at adoption. The Council have not yet produced the HLSS for 2017 which will be required to demonstrate this and so Pegasus Group reserve the right to submit comments on this matter when the relevant information is available.

The examination of the Housing Site Allocations Plan provides the opportunity to set the framework for monitoring housing delivery through the remainder of the plan period. Such an exercise will prevent this matter being continually debated through S78 appeals as has happened for many years.

### The Buffer

Paragraph 47 of the NPPF requires that a 5% buffer is applied to the five-year housing requirement, but where there is a record of persistent under-delivery this should be increased to 20%.

The Council assess the record of delivery against the adopted housing requirement, which in itself does not represent the OAN. This means that even if the housing requirement was achieved there would still be a record of under-delivery against the housing needs. It is therefore necessary to treat the housing requirement as an absolute minimum.

Even against this housing requirement, East Wiltshire HMA has under-delivered in 60% of years; North and West Wiltshire HMA in 70% of years; and South Wiltshire HMA in 80% of years.

The Local Plans Expert Group report to Government proposed that where there was under-delivery in 65% of years this would equate to a record of persistent under-delivery. Similar approaches have been supported by Inspectors at S78 inquiries (for example ref: 3025120). This would indicate that a 20% buffer is required in both North and West Wiltshire HMA and in South Wiltshire HMA. Indeed, in these HMAs, the record of delivery has resulted in a significant shortfall against the housing requirement across the plan period to date.

The approach to dealing with undersupply Wiltshire Council adopt the Liverpool (or residual) approach to addressing undersupply which has arisen over the plan period to date. This approach has been adopted in Wiltshire since before the publication of the NPPG.

The NPPG (3-035) identifies that:

Appendix Q - Schedule of representations

	<p>"Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. Where this cannot be met in the first 5 years, local planning authorities will need to work with neighbouring authorities under the duty to cooperate."</p> <p>This is commonly referred to as the Sedgefield approach, and it is the preferred approach of the Government where there is undersupply (NB - where there is no such undersupply, there is no guidance of the appropriate approach). To adopt an alternative approach (including the Liverpool approach) it would be necessary to demonstrate that it was not possible to adopt the Sedgefield approach and that the Council was working jointly to address any five-year land supply shortfalls with neighbouring authorities.</p> <p>Indeed, this matter was discussed in detail during the appeal regarding Land off Park Road, Malmesbury (2200503) where the Inspector identified that it was necessary to adopt the Sedgefield approach to accord with the NPPG. This recommendation was supported by the Secretary of State.</p> <p>In the South Wiltshire HMA it would not be possible to demonstrate a five-year land supply using the Sedgefield approach. The Council should therefore have worked with neighbouring authorities to address the current shortfall, but they have not done so. In the absence of such joint working, it is necessary to adopt the Sedgefield approach and identify additional allocations to demonstrate a five-year land supply.</p>
<p><b>Attached files (Please see Objective)</b></p>	
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>Pegasus have put forward detailed considerations in this representation and would welcome the opportunity to discuss the various aspects with the Inspector and responding to any questions, including further discussion on emerging government policy.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Omission Land north of Downton Road, Salisbury				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The merits of allocating land north of Downton Road versus the merits of allocating land at Netherhampton Road.</p> <p>To demonstrate the suitability of the site for new residential development, the following documents have been prepared:</p> <ul style="list-style-type: none"> <li>• a concept masterplan;</li> <li>• an Ecological Appraisal of the site;</li> <li>• a Landscape &amp; Visual Impact Assessment (LVIA) of the site; and</li> <li>• a Heritage Assessment of the site.</li> </ul> <p>3.2 Copies of these documents are attached as appendices to this document. [see attached]</p> <p>3.3 The concept masterplan (a copy of which is attached as Appendix 1) shows how the site could provide up to 290 dwellings in an acceptable fashion that would not have an adverse impact on the Salisbury or Britford Conservation Areas, the Special Landscape Area that surrounds Salisbury or areas of ecological importance or protected species. The concept masterplan has taken account of and been informed by the recommendations of the Ecological Appraisal, Heritage Assessment and LVIA.</p> <p>3.4 Based on the Councils requirements for affordable housing provision contained within the adopted Core Strategy, the proposed scheme could provide 116 affordable dwellings.</p> <p>3.5 Following consultation with the Education Authority, the concept masterplan also includes a 1.8 ha site for a new Primary School in light of the fact that existing Primary Schools in Salisbury are at capacity and the provision of such a facility would provide some “future proofing”. An email from Claire Medland, the Head of School Place Commissioning at Wiltshire Council is attached as Appendix 2</p> <p>3.6 The provision of a school on the land north of Downton Road is also closer to existing schools that are at capacity, namely Harnham and Longford Primary schools as well as recently completed new residential developments and the proposed allocation at Rowbarrow, than the proposed school to be provided on the land at Netherhampton Road. This is acknowledged in para 5.28 of the draft Housing Site Allocations DPD.</p> <p>3.7 The LVIA that has been prepared (a copy of which is attached as Appendix 3) clearly demonstrates that the development of the site would not result in a significant adverse landscape or visual impact.</p>				

Appendix Q - Schedule of representations

3.8 The Heritage Assessment (a copy of which is attached as Appendix 4) also concludes that development of the site would not result in an adverse impact on Heritage Assets or harm the character and appearance of the Salisbury City and Britford Conservation Areas.

3.9 The Ecological Appraisal of the site (a copy of which is attached as Appendix 5) demonstrates that the residential development of the site could be achieved without having an adverse impact on protected species and could provide ecological enhancements.

In light of the above we would comment as follows on the scores given to the land north of Downton Road in the SA.

Objective 1 (Protect and enhance all biodiversity and geological features and avoid irreversible losses)

4.6 As the ecology assessment of the land north of Downton Road (a copy of which is attached as Appendix 5) demonstrates, residential development of the site would protect and enhance the biodiversity of the site. On this basis, it is considered reasonable to score it as a neutral or no effect.

Objective 2 (Ensure efficient and effective use of land and the use of suitably located previously developed land and buildings)

4.7 We agree that the scoring for this objective in respect of the land north of Downton Road is correct.

Objective 3 (Use and manage water resources in a sustainable manner)

4.8 We agree that the scoring for this objective in respect of the land north of Downton Road is correct.

Objective 4 (Improve air quality throughout Wiltshire and minimise all sources of environmental pollution)

4.9 Given both the site's proximity to key local services and facilities and the Park & Ride located opposite the site, it is considered that future residents would have a realistic opportunity to use more sustainable (non car) modes of travel and this would help improve air quality in Salisbury and should be scored as a major positive effect.

Objective 5 (Minimise our impacts on climate change through reducing greenhouse gas emissions)

4.10 We agree that the scoring for this objective in respect of the land north of Downton Road is correct.

Objective 6 (Protect, maintain and enhance the historic environment)

4.11 Given the conclusions of the Heritage Assessment (attached as Appendix 3) and the fact that the concept masterplan (attached as Appendix 1) has taken account of the recommendations of the Heritage Assessment, it is considered that the land north of Downton Road should be scored as a Neutral or no effect.

Objective 7 (Conserve and enhance the character and quality of Wiltshire's rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place)

4.12 Given the conclusions of the LVIA (attached as Appendix 5) and the fact that the concept masterplan (attached as Appendix 1) has taken account of the recommendations of the LVIA, it is considered that the land north of Downton Road should be scored as a Neutral or no effect.

Objective 8 (Provide everyone with the opportunity to live in good quality, affordable housing and ensure an appropriate mix of dwelling sizes, types and tenures)

Appendix Q - Schedule of representations

	<p>4.13 We agree that the scoring for this objective in respect of the land north of Downton oad is correct.</p> <p>Objective 9 (Reduce poverty and deprivation and promote more inclusive and self- contained communities)</p> <p>4.14 Given the proposed provision of a new primary school on the land north of Downton Road, which would serve both the existing community as well as new residents, we consider that the land north of Downton Road should be scored as a major positive affect.</p> <p>Objective 10 (Reduce the need to travel and promote more sustainable transport choices)</p> <p>4.15 Given both the site's proximity to key local services and facilities and the Park &amp; Ride located opposite the site, it is considered that future residents would have a realistic opportunity to use more sustainable (non car) modes of travel and should be scored as a major positive effect.</p> <p>Objective 11 (Encourage a vibrant and diversified economy and provide for long-term sustainable economic growth)</p> <p>4.16 We agree that the scoring for this objective in respect of the land north of Downton Road is correct.</p> <p>Objective 12 (Ensure adequate provision of high quality employment land and diverse employment opportunities to meet the needs of local businesses and a changing workforce)</p> <p>4.17 We agree that the scoring for this objective in respect of the land north of Downton Road is correct.</p> <p>4.18 In light of the above, we have prepared a revised version of the SA scoring in relation to the land north of Downton Road and the sites proposed to be allocated at Netherhampton Road. [See attached]</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Comments on Wiltshire Housing Site Allocation Plan                  Please find below comments on the above draft plan for consideration.                  I have used the recommended framework for providing a response as far as reasonably practicable.                  The Plan is Positively Prepared                  I cannot agree that the Plan has been entirely positively prepared. The requirement to provide additional areas for building with the county is recognised but the distribution of these additional areas seems highly biased towards Trowbridge. Why so many here, and why not in other areas? Whilst Trowbridge is the county town, the influx of the developments proposed will, in the opinion of many I am sure, ruin the town. Importantly:                  The sites proposed for HMA destroy the separation between Southwick, North Bradley and White Horse Business Park. Discussion locally confirms that residents are against this concept. It is not considered to be in the best interest of those outlying areas or the Town. Similarly, Hilperton and Church Lane sites should be added into the equation. The boundaries agreed in the Wiltshire Core Strategy document represent a more appropriate position.                  No consideration appears to have been given to use of 'Brown Field' sites of which there are several. These should be first choice for redevelopment and not the consumption of yet more Greenfield sites. Developers should not be allowed to dictate their preference for Greenfield sites in the quest for profit.                  No consideration is given to infrastructure issues. A school is proposed but no mention of doctors, public transport and other supporting services. There is no mention of a firm plan for these.                  The Core Plan (Jan 16) notes improvements to the A350 at Yarnbrook. However, the increased traffic associated with the proposed allocations will result in further gridlock of the area from Yarnbrook through to the town centre and possibly beyond. The 'holistically planned' upgrade of Drynham Lane and/or Drynham Road is meaningless and would in any event be a disaster. It would ruin a peaceful area with excessive traffic with nowhere to go other than the already saturated traffic flow on the A363 or the heavily used 'rat run' that Wiltshire Drive has become. Traffic management in the Trowbridge area is already chaotic and the proposals will simply compound the situation.                  The plan recognises the List II status of Drynham Lane Farmhouse which is welcomed. However, it makes no mention of the Farmhouse and outbuildings in Drynham Road which are known to house bats and other protected species and warrant similar HIA consideration.                  The Plan is Justified                  The Plan is not considered Justified. There is no (that I am aware of) comparison with alternative options or indeed any alternative options presented. Furthermore, 'proportional evidence' for the plan is at best weak or at worse absent. This component of the plan could usefully be strengthened to provide informed consideration. The plan therefore presents as a 'fait accompli'.                  There is much reliance on mitigation actions to known issues which have not been adequately explored or developed. Similarly, the plan states 'expectations as a significant employment and strategic service centre'. These have been the expectation of the Council for over thirty years and</p>				

Appendix Q - Schedule of representations

	<p>while some much needed amenities have been added, the reality is the situation is in decline and promises to remain so. I have heard it said that businesses consider Trowbridge as a dead end backwater. Harsh maybe, but the point being that there is no work for the occupants of the proposed housing so they will mostly have to travel outside the area. With a poor road network and just three river crossings of the Avon to where work might be, the whole thing becomes unattractive and will severely impact the nearby towns of Bradford on Avon and Melksham. In this sense the plan is not justified as it does not address any bigger picture issues. It just focusses on how to get as many houses as possible into our area!</p> <p>The Plan is Effective</p> <p>The plan could well be deliverable but at a cost to our environment and it is not the deliverable the residents wish to see at this juncture. As with any plan there will be risks. Resolution of these seems to rest on an 'it will be alright' approach. Until the bigger picture issues and risks are addressed, the plan does not appear effective.</p> <p>The Plan is Consistent With National Policy</p> <p>The Council and its Planners obviously consider the plan is in accordance with the National Policy. I am not informed enough to either agree or disagree with this position. However, I make the observation that there must be alternative and better ways of delivering the policy than that presented in this plan. For instance why do 700 of the 900 houses 'over' the original plan have to be in Trowbridge? Wiltshire is a big County and there must be alternative site(s) available.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Whilst the earlier paragraphs of the Wiltshire Housing Site Allocations Plan (WHSAP) attempt to provide a summary of the background to the preparation of the Plan including, importantly, the higher tier Wiltshire Core Strategy (WCS) (approved in 2014, the overall approach taken in the identification of sites is considered to be unsound as it fails to take account of a number of highly important considerations which stem not only from the WCS but also from gradual, but important, shifts in central Government policy, particularly as this relates to brownfield sites. To demonstrate this it is necessary to review briefly some of the WCS policies. The most important factor to bear in mind so far as the WCS is concerned is that:-</p> <p>(i) The overall housing total contained in Policy CP2 is a minimum. Hence the reference in the first paragraph of the Policy to “at least 42,000 homes” a fact which is also referred to in more detail in the Inspector’s Report on the overall housing numbers; Paragraph 81 of his report notes that:-</p> <p>“..... I consider that at this current time the minimum housing figure within the CS should reasonably equate to at least 42,000 homes over the Plan period with the flexibility to deliver more.”</p> <p>(ii) The housing figures for the individual Community Areas (CAs) set out in Policy CP2 of the WCS are an indicative requirement and therefore because of the need for the flexibility to go above the minimum 42,000 homes referred to above, they should not be regarded as ceilings above which further development should not be considered. The WHSAP fails to acknowledge this fact and instead operates using the numbers for each of the CAs as a ceiling (see below).</p> <p>In addition to these two important principles it is as well to draw attention to the fact that the Plan period (2006 – 2026) now has less than 10 years to run and is therefore not in accordance with the advice in Paragraph 157 of the NPPF; this states that “crucially” plans should be drawn up over an appropriate timescale, preferably a 15 Year horizon to take account of longer term requirements, and be kept up to date. In the context of this last point it should be borne in mind that since the approval of the WCS central Government has made it clear that it wants to boost housing supply to in excess of 250,000 units per annum. To that end it has recently released (14th September 2017) a consultation draft on how to undertake Objectively Assessed Housing Needs which includes a higher annual figure for Wiltshire (2,227pa) than the figure which is contained within the WCS (2,100pa). Both of these factors suggest that it is important for the WHSAP process to look positively at all aspects of housing delivery and not just use the process as one which seeks to impose a cap on development; this applies to all settlements be they Principal Settlements right down to Small Villages, provided the opportunities are there for a sustainable form of development.</p> <p>We believe that this particularly applies to brownfield development opportunities where central Government has over the last 5 years sought to place increasing emphasis particularly in the context of delivering more housing. First in the NPPF Paragraph 17 which sets out 12 housing principles; the eighth bullet point specifically encourages the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value. In this vein Paragraph 111 goes on to state:-</p>				

#### Appendix Q - Schedule of representations

“Planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value. Local planning authorities may continue to consider the case for setting a locally appropriate target for the use of brownfield land.”

It is relevant to note here that the NPPF refers not just to decisions but also to policies suggesting that local planning authorities should not just leave these matters to landowners but should actively promote brownfield land where such sites are known to be available and deliverable through the Local Plan (& Core Strategy) process.

It should also be noted that following on from the last sentence of Paragraph 111 of the NPPF, Policy CP2 of the WCS contains just such a target for housing delivery from brownfield sites (35%). According to Topic Paper No. 3 produced by the Council as supporting material, over the period 2006 – 2015 this target had not been met, with only 29% of completions coming from this source (see Paragraph 5.15). Moreover it is not clear that this source (identified as windfalls) actually represents brownfield land or just houses which have come forward on unallocated sites.

For the future, where there are likely to be a greater proportion of completions coming forward from strategic greenfield sites (such as those around Chippenham and Trowbridge), it seems highly likely that this figure will fall so that the 35% target for brownfield completions will be ever further away.

Since the publication of the NPPF both the Coalition and the current Government has placed even greater emphasis on housing delivery from brownfield sites. This includes first a Consultation Paper “Building More Homes on Brownfield Land” issued before January 2015. In the introduction to this paper Paragraph 7 states:-

“Brownfield land suitable for housing has a vital role to play in meeting the country’s need for new homes while protecting the countryside, and for this reason the Government wants to maximize the number of new homes on suitable brownfield land”.

Paragraph 8 continues:-

“The planning systems plays a key role in facilitating housing, and local planning authorities through their policies and decisions have the potential to drive up the number of homes coming forward on brownfield land. Historic data suggests that there is enough suitable brownfield land to accommodate up to 200,000 homes, and the Government wants to see local planning authorities take a proactive approach to realising this potential, through the use of local development orders.” (our emphasis)

The Paper then goes on to promote the wider use of brownfield Registers and local Development Orders with authorities identifying potential sites which are deliverable, free of constraint, and capable of developing (more than 5 units) (see Paragraph 14).

This was followed in December 2015 by a further paper on proposed changes to the National Planning Policy Framework which included questions on supporting housing development on brownfield sites by the use of brownfield registers, which at that stage were included in the Housing & Planning Bill (now an Act). Paragraph 22 of that Paper states:-

“To ensure that all possible opportunities for brownfield are pursued we propose to make clearer in national policy that substantial weight should be given to the benefits of using brownfield land for housing (in effect a “presumption” in favour of brownfield land). We propose to make it clear that development proposals for housing on brownfield sites should be supported unless overriding conflicts with the Local Plan or the NPPF can be demonstrated and cannot be mitigated.”

Following this, central Government pursued the idea of improving brownfield land registers (introduced in 2004) by setting out the legislation making them mandatory and by introducing the possibility of Council’s granting permission by the use of Orders for the principle of residential development; these powers are explained in the NPPG (Reference ID 59-001-20170728 Paragraphs 1 – 32 and ID 58-001-20170728 Paragraphs 1 – 48). It is expected that all authorities will have completed this process by the end of 2017.

Additionally the White Paper “Fixing the Broken Housing Market” issued in February 2017 identified the importance of using brownfield sites to boost housing production. In the Chapter 1 Summary the fifth bullet point identifies the need to maximize the use of brownfield land with Paragraph 1.3 noting that plans do not always encourage a sufficiently wide range of sites to come forward. These points are elaborated upon in Paragraphs 1.24 - 1.25 with the first sentence making clear that:-

“We must make as much use as possible of previously developed land (brownfield land) for homes – so that this resource is put to productive use, to support the regeneration of our cities, towns and villages, to support economic growth and to limit the pressure on the countryside.”

Paragraph 1.25 goes on to state:-

“Going further, the presumption should be that brownfield land is suitable for housing unless there are clear and specific reasons to the contrary (such as flood risk).”

## Appendix Q - Schedule of representations

All of this change to central Government policy on brownfield land sets a context for an examination of the WHSA DPD to see whether this advice has been carried through into practice by the Council. A starting point is the WCS since this provides the higher tier framework for the WHSA DPD.

We have already noted that Policy CP2 of the WCS is drafted in terms of minimum housing numbers and that it also contains a brownfield target which has yet to be met. Additionally it should be noted from the WCS Policy CP1 that settlement boundaries around all settlements above Larger Villages will be important in identifying land and that outside such boundaries development will not normally be permitted unless it falls within the “exceptions” identified in Paragraph 4.25. Small Villages have no settlement boundaries and development is limited to 5 or fewer dwellings and are therefore expected to play little or no part in the WHSA DPD.

The supporting text to Policy CP2 identifies sources for new homes in Paragraph 4.24 including strategic allocations in the WCS, retained Local Plan allocations, existing commitments, regeneration projects, business expansion plans, sites identified in the WHSA DPD and Neighbourhood Plans, and windfall sites. Paragraph 4.25 identifies additional sources of supply which it states are to respond to local circumstances and national policy including additional employment land (Policy 34), Military Establishments (Policy 37), Development Related to Tourism (Policies 39 and 40), Rural Exceptions Sites (Policy 44), Specialist Accommodation (Policies 46 and 47) and supporting Rural Life (Policy 48). Interestingly there is no policy dealing specifically with brownfield land albeit much of the brownfield land in Wiltshire is Military (or former Military) land and is presumably covered by Policy 37. The site at Neston falls into this category (see below) but in theory Wiltshire does not have a specific policy on re-use of brownfield land which helps maximize housing delivery.

Policy 37 is the closest to a brownfield policy and therefore should be quoted in full. It states:-

“New development and changes of use as operational facilities that help enhance or sustain their operational capability will be supported.

Redevelopment, conversion or change of use of redundant MoD sites and buildings will be supported provided they are well related to an existing settlement in terms of both location and scale. Sites that are removed from settlements should only be considered where the existing buildings and infrastructure on the site are suitable for redevelopment, conversion or change of use. Redevelopment proposals will not exceed the existing building footprint and floorspace unless they are well located to an existing settlement. The focus will be on employment-led development and other uses should be determined through a masterplanning approach with the local community.

Development at operational or redundant sites should enhance the overall character of the site. All development at operational or redundant sites should mitigate any adverse impacts on local infrastructure, and not erode the character of the surrounding area. All proposals must ensure that the cultural and historical significance of the military facilities located on the site are understood and inform the scope of future development of that site.”

The Policy itself is not entirely clear that it applies to redundant MoD sites which have already been sold and the supporting text suggests that any redevelopment process needs to go through a Master Planning exercise. Significantly the policy also says that preference will also be given for employment uses (as opposed to residential) although the reasons for this are not stated anywhere in the documentation. To that extent the Policy does not accord with the NPPF or the latest policy statements on brownfield land in the White Paper (as quoted above).

However, setting this aside for the moment, it is relevant now to see how this “flexibility” has been interpreted in the WHSA DPD. At the outset it should be stated that we do not believe any allowance has been made for the emergence of brownfield sites either in the Objectives for making allocations, or in the Housing Delivery Strategy; this latter includes a numerical analysis of needs based on the minimum requirement and the site selection process has been heavily influenced by the settlement hierarchy and settlement boundaries. It is clear from reading Sections 3 and 4 of the WHSA DPD that no effort has been made to identify brownfield sites at all in the context of meeting housing requirements. Despite the fact that there is a specific target for housing from brownfield sites in Policy CP2 of the WCS, maximizing delivery from this element simply does not feature in the approach taken, despite also the increasing emphasis placed on this source by central Government. We would have expected this to have been one of the basic objectives in terms of identifying new housing allocations but, apart from the cursory, rather dismissive reference in Paragraph 3.6 of the WHSA DPD, previously developed land is ignored for the purposes of land search. It is true that brownfield sites are discussed in Paragraphs 5.17 – 5.35 of the Housing Topic Paper No. 3 but this is primarily in the context of delivery and justification for a windfall site allowance, rather than positively identifying such sites.

The basis of the Plan appears to be twofold:-

(i) To ensure that the overall housing numbers and allocations are sufficient to at least meet the minimum indicative requirements for each Community Area (CA) and subsequently of the 3 HMAs.

#### Appendix Q - Schedule of representations

(ii) To focus on the Settlement Hierarchy when making new housing allocations.

In reality the methodology has meant that where housing numbers meet the minimum indicative housing figures in CAs no further work is undertaken to identify other potential sites. This is abundantly clear from Paragraph 4.24 which states quite openly:-

“The rationale for the Plan is to supplement housing land supply. This is a strategic priority stemming from the WCS. The spatial strategy expects development at Large Villages to respond to local needs. At the same time it is Government and the Council’s wish to give direct power to local communities to articulate their own visions for their area, to define and respond to their own local need. Therefore in the absence of a strategic priority, where land supply can meet objectives of the Plan without allocating sites at villages then it should not”.

Whether there are any sustainable locations in Large or Small Villages which could accommodate housing on brownfield sites, is simply not pursued if the overall minimum housing numbers are achieved. Such an approach we would say is neither positive, justified or effective; nor is it consistent with national policy.

The effect of this numerically based approach also carries through into the settlement hierarchy based principle which also militates against brownfield sites. In this case as Small Villages have no settlement boundaries and are limited to small scale development they are simply not examined in the WHSA DPD. Paragraph 4.16 makes this point clear as follows:-

“Housing Development at Small Villages is required to take the form purely of limited infill. House building will be small in scale, for sites of single figures, and the Plan does not seek to identify such sites.”

Again this militates against the identification of brownfield sites; and again it is neither positive, justified or effective in delivering Government policy.

Of course it may be argued that brownfield sites do not have to be identified and could come forward at any stage under WCS exceptions policies. However, this is a weak line of argument for a number of reasons. First, Paragraph 111 of the NPPF makes it clear that policies should be promoted which bring forward and identify brownfield sites and that Councils should be proactive in bringing forward such sites. Secondly, the Council do not actually have a policy which specifically refers to brownfield sites being used for housing; Policy 37 refers only to Military Establishments and then primarily in the context of employment uses. Where there are obvious brownfield sites which have been promoted for housing through the SHLAA (such as the objection site) this should be properly examined and allocated in the forward planning process. The larger the site the more important this becomes. Failure to undertake this task properly when making such assessments and allocations further undermines the whole selection process. Further reference will be made to this below.

Having identified these problems in the approach taken by the Council, we would strongly assert that at the general level, the Plan is unsound because it has not been positively prepared, is not properly justified in the context of brownfield land, is not effective in seeking to maximize housing production from sustainable and brownfield sites; and is fundamentally inconsistent with Government policy.

Having made general comments about the procedure for identifying housing sites generally and the lack of attention to brownfield sites we want to proceed by seeing how the approach has affected the Corsham Community Area which is set out in WHSA DPD and the supporting documents with particular reference to a potential housing site between Rudloe and Neston (which will be referred to as the objection site).

The simplest way of summarizing the Council’s position is to say that as both Corsham Town and the remainder of the Community Area already had housing sites which exceed the indicative housing figure no further sites were considered. However, it is interesting to note the approach in the DPD which has been taken to drawing settlement boundaries which are shown at the rear of that document. At the outset it should be stated that the settlement of Corsham, which is classified as a second tier Market Town, is surrounded on its western and southern sides by a large amount of military buildings and MoD land which links up the main settlement to Rudloe and to Neston. The former is regarded as a large village with a settlement boundary (but excluding employment land) and the latter is classified as a Small Village. However, the true amount of development and the actual separation from each other can be seen on the OS plans and is readily apparent on the ground. These areas of development and brownfield land can easily be distinguished from the open arable land which lies to the North and East. However, for the purposes of defining settlement boundaries much of this development is simply ignored even where it has recently been redeveloped, such as on parts of the MoD Corsham and at MoD Royal Arthur; the latter is now being developed as a retirement community. Not only does this decision to ignore recent redevelopment and MoD buildings seem completely illogical but it also generates a wholly artificial sense of separateness between the settlement boundaries which does not exist on the ground. Thus, for example Neston and Rudloe are effectively joined up by development and any gap between Neston and Corsham is narrow at best and effectively the two are joined by brownfield MoD land. And yet the settlement boundaries amendments continue to ignore these facts and treat them all as separate settlements.

Appendix Q - Schedule of representations

	<p>It can be seen that part of the reason for this derives from the methodology used in defining settlement boundaries as can be seen from Paragraph 7.11 of Topic Paper No. 1 which states that:-</p> <p>“This does not mean that employment land should be excluded from settlement boundaries in all types of settlement. Therefore the revised settlement boundary review methodology will exclude employment development at the edge of Large Villages.”</p> <p>This has apparently been done because Policy 35 of the WCS does not protect employment sites at Large Villages as it does in higher category settlements. However, in reality this approach fosters a wholly artificial approach to separation of settlements.</p> <p>This can be demonstrated quite graphically in relation to the objection site which we are seeking to promote which lies on the south side of Westwells Road at its junction Moor End; a plan is attached as Appendix 1 showing the brownfield site to the north together with a small area of greenfield land in the south adjacent to the Wadswick Green development. This is a site of approximately 6.1 hectares formerly owned by the MoD and used as a camp during WWII; the brownfield site comprises just under 5 hectares of this total. The buildings on the site have been partially demolished but the lower walls, foundations and roads are all evident on a site inspection. The Council accepts that this is a brownfield site and that it is subject to Policy 37 of the WCS as a former MoD site. It has previously had two earlier planning applications submitted on it, one for a mixed use scheme and one for employment; both have been withdrawn.</p> <p>Local residents have claimed that the site separates Neston from Rudloe but in reality the two are already linked on the Northern side of Westwells Road where a 1990s estate abuts the adjoining MoD employment area. The objection site lies on the south side of this road again adjacent to an MoD employment area and alongside a private road linking south westwards to the former Royal Arthur site (now known as Wadswick Green) which lies beyond the objection site. This site was also a brownfield site and originally received planning permission as long ago as 2008 and is now nearing completion. Bizarrely none of this very large area of development is shown as falling within a settlement boundary despite the overall character of the area being one of a mix of built up schemes very close to the edge of Corsham (and Rudloe).</p> <p>The site itself is therefore surrounded on three out of four sides by development and represents a brownfield site where there are no serious planning or other grounds against its redevelopment for residential purposes in accordance with central Government policy. As such this sustainably located site should be recognized as an important opportunity for residential development even though it might lead to the indicative minimum housing numbers for the Corsham CA being exceeded. This is precisely the sort of flexibility that is encompassed within the overarching WCS policy and one which the Inspector also recognized when he stated that such indicative figure should not be used prescriptively to prevent development from coming forward. It also complies with central Government advice. To make the Plan more effective, positive and in accordance with central Government policy the site should be specifically identified as a brownfield allocation on the Proposals Map and in Policy H2 of the WHSA DPD with an approximate capacity of up to 150 dwellings.</p> <p>To make the Plan more effective, positive and in accordance with central Government policy the site should be specifically identified as a brownfield allocation on the Proposals Map and in Policy H2 of the WHSA DPD with an approximate capacity of up to 150 dwellings.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4729415 / 4729416</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	<p>The Plan as drafted is fundamentally unsound because of its failure to properly consider brownfield sites in accordance with central Government advice. This point needs to be elaborated upon in detail at the Examination since the approach taken by the Council is also operating to depress potential housing numbers which could otherwise be brought forward entirely in accordance with the Plan. The Council has demonstrably failed to adopt a proactive approach to re-use of brownfield land and this needs further explanation at the Examination. The objection site is a large site capable of accommodating about 150 dwellings and its omission needs a proper explanation by the Council.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I cannot agree that the Plan has been entirely positively prepared. The requirement to provide additional areas for building with the county is recognised but the distribution of these additional areas seems highly biased towards Trowbridge. Why so many here, and why not in other areas? Whilst Trowbridge is the county town, the influx of the developments proposed will, in the opinion of many I am sure, ruin the town.

The sites proposed for HMA destroy the separation between Southwick, North Bradley and White Horse Business Park. Discussion locally confirms that residents are against this concept. It is not considered to be in the best interest of those outlying areas or the Town. Similarly, Hilperton and Church Lane sites should be added into the equation. The boundaries agreed in the Wiltshire Core Strategy document represent a more appropriate position.

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	The Core Plan (Jan 16) notes improvements to the A350 at Yarnbrook. However, the increased traffic associated with the proposed allocations will result in further gridlock of the area from Yarnbrook through to the town centre and possibly beyond. The 'holistically planned' upgrade of Drynham Lane and/or Drynham Road is meaningless and would in any event be a disaster. It would ruin a peaceful area with excessive traffic with nowhere to go other than the already saturated traffic flow on the A363 or the heavily used 'rat run' that Wiltshire Drive has become. Traffic management in the Trowbridge area is already chaotic and the proposals will simply compound the situation. With a poor road network and just three river crossings of the Avon to where work might be, the whole thing becomes unattractive and will severely impact the nearby towns of Bradford on Avon and Melksham. In this sense the plan is not justified as it does not address any bigger picture issues. It just focusses on how to get as many houses as possible into our area!

Please identify the policy, paragraph, table, figure or site to which you are referring.		Delivery and Plan Strategy			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		<p>The Plan is Justified The Plan is not considered Justified. There is no (that I am aware of) comparison with alternative options or indeed any alternative options presented. Furthermore, 'proportional evidence' for the plan is at best weak or at worse absent. This component of the plan could usefully be strengthened to provide informed consideration. The plan therefore presents as a 'fait accompli'.</p> <p>The Plan is Effective The plan could well be deliverable but at a cost to our environment and it is not the deliverable the residents wish to see at this juncture. As with any plan there will be risks. Resolution of these seems to rest on an 'it will be alright' approach. Until the bigger picture issues and risks are addressed, the plan does not appear effective.</p> <p>The Plan is Consistent With National Policy The Council and its Planners obviously consider the plan is in accordance with the National Policy. I am not informed enough to either agree or disagree with this position. However, I make the observation that there must be alternative and better ways of delivering the policy than that presented in this plan. For instance why do 700 of the 900 houses 'over' the original plan have to be in Trowbridge? Wiltshire is a big County and there must be alternative site(s) available.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	There is much reliance on mitigation actions to known issues which have not been adequately explored or developed. Similarly, the plan states 'expectations as a significant employment and strategic service centre'. These have been the expectation of the Council for over thirty years and while some much needed amenities have been added, the reality is the situation is in decline and promises to remain so. I have heard it said that businesses consider Trowbridge as a dead end backwater. Harsh maybe, but the point being that there is no work for the occupants of the proposed housing so they will mostly have to travel outside the area.

Appendix Q - Schedule of representations

Comment ID:	<a href="#">2388</a>	<b>Consultee</b> Mr David Ogborne Planning Liaison Manager  Wessex Water  <b>Person ID:</b> 390498	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	water and waste infrastructure				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Thank you for the consultation for the Site Allocations Plan, which supports the later stages of the Wilts Core Strategy plan period to 2026. We have been working with Wilts Council to review sites and make preliminary assessments on water and waste infrastructure. We note the sites that are now included in the allocations plan. There are a range of sites, which are subject to capacity constraints. These sites have previously been identified to Wilts Council and will require detailed appraisal work when promoted through the planning system. We note that there are a number of sites granted on appeal, which appear to fall outside settlement boundaries at a number of locations. Wessex Water will review strategic capacity for the larger allocations and examine smaller sites at the earliest possible stages through developer enquiries and planning consultations.</p> <p><b>Water Supply</b>                      Longer term Water Resource plans are currently being updated, however capacity for this plan period is available to support these allocations in the current Local Plan. Further discussions are underway to ensure that we can continue to support catchment growth for the next plan review beyond 2026.                      Supply networks – We will identify points of connection and specify capacity improvements where the local distribution network cannot meet predicted demand.</p> <p><b>Waste Water</b>                      The allocations plan will assist with treatment capacity planning, providing more definition to the location and timing of new development. Long term planning is essential to ensure that we can maintain headroom capacity at treatment works. Where extensions are required to meet demand we need time to plan design and construct new civil works.                      Discharge permits are also under review with revised consent limits. The removal of phosphates and nitrates will require a programme of works to selected sites with nutrient management plans to improve water quality in designated river catchments. These matters are subject to stakeholder and partnership arrangements emerging from the Local Plan to meet the Water Framework Directive and habitats regulations.                      Sewer networks – We will identify points of connection to foul and surface water systems. Where required capacity improvements will be defined and programmed to meet regulatory service levels. Developers will be required to fund off-site improvements with infrastructure charging approved through industry regulator OFWAT.                      We remain concerned over surface water discharges to public foul water systems and will make a formal objection to sites that seek surface water connections to the public foul system. We request that the Local Planning Authority and the Lead Local Flood Authority ensure that any site promoted through the planning system provides a satisfactory outfall for surface water. Viability of sites should also make allowance for any disproportionate investment that may be incurred by the sewerage undertaker to service new development sites. Discharging surface water to public foul systems directs unwanted investment in both network and treatment assets and does not comply with sustainable development under the NPPF.</p>				

Appendix Q - Schedule of representations

	<p>Where there are large land allocations we will consider the use of powers under the Water Industry Act 1991 to achieve a general system of sewerage to benefit all stakeholders. If any further information is required at this stage please advise.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b>  	<a href="#">2389</a>	<b>Consultee</b> Mr Haydn Jones Planning Director  Richborough Estates  <b>Person ID:</b> 1132602	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
				<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		Positively prepared
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Housing Delivery Strategy				Justified  Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		1. Introduction Richborough Estates is a successful land promotion business. We are promoting Land North of Pound Lane, Semington for a residential development of 75 dwellings and public open space. The emerging Plan does not propose to allocate the site for development. These representations relate to the emerging Plan's housing delivery strategy, which we consider to be unsound. 2. HOUSING NEED & LAND SUPPLY EVIDENCE We do not consider that the evidence put forward by the Council on housing need or housing land supply is robust or even satisfactory to inform the emerging Plan. In terms of housing need and the five year supply, we do not agree that the Council's assessment is correct. It does not reflect the true housing need in terms of an objectively assessed figure, hence the instruction of the Core Strategy Inspector to make the housing requirement a minimum and "at least" figure. CP2 housing requirements have always been a 'minimum' requiring "at least 42,000 dwellings". For the words 'at least' to have any meaning, other housing therefore needs to come forward for development but this is entirely at odds with the approach taken to the draft HSAP whereby community area targets are taken as a 'ceiling'. This might have been the correct course of action at that time of the Core Strategy examination but it was predicated on the fact that the Council made assurances about publishing an update SHMA in early 2016 and undertaking an early review of the Plan. Neither of these have materialised as of September 2017. Our view is that the emerging Plan has not been positively prepared because it treats the housing requirements as a ceiling and resists the allocation of otherwise sustainable sites where there would be no harm to the WCS or spatial strategy. Regarding land supply, the Council relies on overly optimistic delivery rates from many sites, thus overstating the actual realistic supply. We have specific concerns about various sites within the supply, including the Hunters Moon site (no allocation or permission); Land South of Bradford Road, Rudloe (outline permission expires in little more than 6 months time and with this the inevitable delay there will be to the reserved matters and actually delivering housing); Langley Park/Foundry Lane (has failed to deliver for a decade); Rowden Park (very little progress); and Station Road, Westbury (no permission with previous permission having lapsed). Our concerns on these sites principally relate to the fact that they are unlikely to deliver within five years or delivery rates will be slower than the Council suggest. In respect of the method of assessing the five year supply, the Council relies on Liverpool, whereas Sedgefield is a more appropriate approach now the Core Strategy is more than halfway through its Plan period. The recent appeal decision (Hilltop Way, Salisbury) in the Southern HMA APP/Y3940/W/17/3173509 confirms this. IR para. 11. "However, with the application of a 5% buffer, based on the 'Sedgefield' method, which appears to be the Government's preference according to the PPG ... ". The Sedgefield approach would help provide the Council with a more realistic assessment of their five year supply situation. Consequently we do not accept the Council's approach to assessing supply using Liverpool.			

#### Appendix Q - Schedule of representations

Neither do we accept that the Council is a 5% authority for the purposes of an NPPF buffer. They have under-delivered for 7 of the last 10 years. That is persistent under delivery. The evidence suggests the position will only get worse in the near future. Consequently our view is that the Council is a 20% authority.

Paragraph 2.14 of the emerging Plan is quite clear that a central objective of the emerging Plan is to maintain a five year supply of deliverable sites in each of the HMAs. The starting point of this must be a realistic assessment of what the current five year supply is so that this can inform further site allocations. The Council does not have a realistic assessment and this calls into question how effective the emerging Plan is. There are also significant delivery issues at Trowbridge which are reflected in both the HSAP and the supporting evidence base. This is going to have huge implications for the NWHMA and the effectiveness of the HSAP, whether it is positively prepared and whether or not a 5 year supply can be maintained at all points during the plan period (required by PPG030).

#### 3. North & West Wiltshire Housing Market Area

The emerging Plan's housing delivery strategy needs to be seen against the background of the Council having an adopted Core Strategy which was only found sound because the housing requirement is expressly provided as a 'minimum' figure. In fact the need to deliver at least 42,000 dwellings itself was only accepted by the Core Strategy Inspector because of the Council's agreement to undertake an early Plan review and the publication in early 2016 of a new SMHA.

The North & West Wiltshire HMA has a housing requirement of a minimum of 12,740 dwellings. The emerging Plan indicates that, along with the strategy for the two other HMAs, by focusing further allocations at higher tier settlements the Plan supports sustainable development sought by Objective 2 of the emerging Plan. We contend that it does no such thing as Objective 2 relates to demonstrating a rolling five year supply of deliverable sites, a matter that applies equally to rural areas as it does to larger settlements. PPG030 requires a rolling 5YR HLS at all points over a plan period.

Semington is situated within the Melksham Community Area (CA) of the North & West HMA and is defined as a Large Village. The emerging Plan makes no provision for allocations at Large Villages within this CA. We do not consider this to be the correct approach as the emerging Plan fails to be positively prepared, and this is discussed further in Section 4 below.

#### 4. Melksham Community Area

As with the other HMAs, the North & West is divided into a number of Community Areas with (as noted above) Semington falling within the Melksham CA. The housing requirement for the CA is a minimum of 2,370 dwelling, of which 2,240 should be at Melksham.

One of the justifications for not allocating sites in some Large Villages is because of the affect this could have on the spatial strategy. In the case of the Melksham CA and our site at Semington we do not believe that is a tenable argument. Our proposals for 75 dwellings do nothing to threaten the spatial strategy of the Core Strategy. The main focus for development in the Melksham CA is on Melksham itself and the provision of 75 new dwellings at Semington is not going to adversely affect this spatial distribution, especially as the requirement for Melksham is either completed or committed already.

There is an acute affordable housing crisis in Wiltshire, something we deal with further in our objections to Policy H2 and the non-allocation of our site at Semington. Over the last 20 years very few planning permissions have been granted in Semington. Rather than an allocation of our site for 75 dwellings being an issue, it is entirely in line with the Core Strategy's 'minimum' approach to the housing requirement. It is evident from reading the Core Strategy Inspector's Report that he saw the housing requirements for the Community Areas as being viewed flexibly and thus should not be treated as a ceiling nor seen as a position on the housing needs of a settlement. Indeed, when the Inspector reported on the Melksham CA he noted at Paragraph 286 that "the volume of intended housing is expressed indicatively and appropriately which provides for the overall level of provision ..... " One can conclude from this that it means flexibility in terms of both internal Melksham CA figures and across Community Areas. The Sustainability Appraisal should have also tested a 'reasonable alternative' of further allocations to at least test what this could mean for housing and affordable housing delivery. Testing reasonable alternatives to determine the most appropriate strategy is set out in The Environmental Assessment of Plans and Programmes Regulations 2004 and NPPG, Paragraph 001 Reference ID: 11-001-20140306.

Furthermore, allocating our site would also be in line with the NPPF policy of boosting significantly the supply of housing. Applying flexibility in the way the Core Strategy Inspector intended would help boost the supply of housing in Wiltshire and would not be outwith the minimum approach to the housing requirement.

Appendix Q - Schedule of representations

	<p>The housing requirements are all indicative and both the overall housing number and Melksham CA figure are minimum requirements. There is no embargo on more housing in the Melksham CA, thus no over-arching policy bar within the Core Strategy to allocating our site for 75 dwellings.</p> <p>Without further site allocations the Council will not deliver the level of housing they envisage. The flexible approach further allocations will bring will ensure that there is a genuine rolling five year supply. Without this flexibility the Plan is not advocating the most appropriate strategy and therefore it is not justified.</p> <p>The bulk of recent housing completions in the Melksham CA are associated with the build out of Policy H6 from the former West Wiltshire District Local Plan - First Alteration (2004), however this is simply meeting needs from the old plan period (1991 onward), not future requirements through to 2026. This is a further reason why additional allocations are needed to meet Melksham's future housing needs.</p> <p>Changes required to the housing delivery strategy</p> <p>The problem the emerging Plan has is that in getting the Core Strategy adopted the Council effectively put in place a 'short-term fix' Plan that should have be brought up-to-date through the publication of a new SHMA some 18 months ago, coupled with an early Plan review. Neither of these have taken place.</p> <p>A central plank of the emerging Site Allocations Plan is supposed to be the allocation of sites to provide a continuing rolling five year supply of deliverable sites. The starting point for considering how many, and which, sites should be allocated has to be a robust assessment of the five year supply to understand how the Council is delivering new housing. The Council do not have this and therefore one of the most important pieces of evidence that should underpin the emerging Plan is incomplete.</p> <p>The Council should rectify the issues within their assessment. Further land should then be identified for housing and one such site is Land at North of Pound Lane, Semington.</p> <p>At present the emerging Plan fails the positively prepared, justified and effective tests of soundness. This can be rectified by taking the approach we advocate above.</p>

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2		Justified	
		<p>1. Introduction                  Richborough Estates is a successful land promotion business. We are promoting Land North of Pound Lane, Semington for a residential development of 75 dwellings and public open space. The emerging Plan does not propose to allocate the site for development. In our objections to the emerging Plan's housing delivery strategy and settlement boundary review we have set out why we believe further site allocations need to be made, and in particular why the allocation of our site at Semington would not threaten the spatial strategy of the Core Strategy as the overwhelming majority of new housing in the Melksham Community Area would continue to be directed towards Melksham itself. As currently written we consider that the emerging Site Allocations Plan is not positively prepared, justified or effective in relation to both the housing delivery strategy and the failure to allocate additional sites, including ours. We therefore object to the fact that Policy H2 has not allocated Land North of Pound Lane, Semington for 75 dwellings (Location Plan attached as Appendix 1 to these representations). These representations evidence why the site would deliver sustainable development and therefore why it should be allocated for residential development.</p> <p>2. Draft Policy H2                  It is acknowledged that the draft policy does allocate some additional sites within the North &amp; West Wilshire HMA. We, however, do not consider this supports the notion that H2 is sound. To make the policy sound, our site North of Pound Lane, Semington should be included as an allocation for 75 dwellings. We have reviewed the content of the Melksham Community Topic Paper and Topic Paper 2: Site Selection Process Methodology; but do not consider either is an adequate piece of evidence to justify the lack of new site allocations within the Melksham CA, and more precisely at Semington.</p> <p>3. Land North of Pound Lane, Semington – recent history                  As the Council is aware Land North of Pound Lane has recently been the subject of a public inquiry following the refusal by the Council of a planning application for 75 dwellings, open space, play areas and access. The decision on that appeal is awaited. As the Council is equally aware, there are no technical objections from any statutory consultees to our proposals for the site. The opportunity now exists for the Council to allocate the site and amend the settlement boundary of Semington through this site allocations process. A copy of the Illustrative Masterplan for our proposals is contained in Appendix 2 of these representations. Importantly the very fact that an application was submitted supported by a large portfolio of evidence (expanded on further as part of the appeal) means that the site is available now and achievable. Furthermore, in our view the site is in an appropriate location for development and accessible to jobs, services and facilities. Therefore it is deliverable.</p> <p>4. Land North of Pound Lane, Semington – our proposals                  The description of development for the planning application does not really do the proposals justice.</p>			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.					

#### Appendix Q - Schedule of representations

Of the 75 dwellings, 30 will be affordable homes (40%). There is an enormous affordable housing problem in Wiltshire, not helped by the fact that some sites (especially large ones) are failing to achieve a policy compliant level of affordable housing. We are proposing an above policy level of affordable dwellings to assist in the Council meeting their acute affordable need.

The affordable housing that this site will deliver is a major social benefit for the area and therefore a very positive attribute in the sustainability balance.

Regarding the dwellings proposed, the scheme would comprise a mix of 1, 2, 3 and 4 bed properties including 17 bungalows, 9 of which would be affordable. The Wiltshire Housing Strategy notes the number of people over the age of 75 will increase from 44,400 in 2015 to 76,400 in 2025. The Council's own Housing Strategy makes clear that one of their priorities is to "Increase the supply of housing for older people"; and for those requiring housing support, over one-third of such households require a bungalow. The incorporation of bungalows is therefore another significant social benefit.

Almost half of the site (44%) would be retained as open space. Nearly all of that space would be linked together in a single swathe of land around the outer edge of the site, so that it can be enjoyed as a single experience. Within the open space there would be a canal side park, two children's play areas, a balancing pond feature, a wetland area and a restored WWII pill box.

The canal side park is more than just an area of standard open space. It provides an interface between the village and the canal responding to place-making and design guidance which promotes new development creating places that are individual and which respond to their context. In proposing the canal side park we have sought to provide a unique development delivering a sense of place for both occupiers and other residents of the village, as well as canal users.

As to be expected the development would make various off-site financial contributions including funding a new classroom at the village primary school.

In terms of the site's location within Semington, it is within 200m of the primary school; and the village has a thriving public house, a part-time post office, church, its own industrial estate and significant office development.

Semington lies just to the south west of Melksham/Bowerhill. This close relationship means there is accessibility to jobs, services and facilities. In particular Bowerhill provides over 4,000 jobs and the site is within 2km of this huge employment resource. Arguably, there is no village in Wiltshire that has such good access to the level of jobs available at Bowerhill.

The most direct route to these jobs is via a car free bus and cycle route so there is a genuine alternative to car use. The bus service connects Semington with both Melksham and Trowbridge; and has a frequency that would be the envy of most rural villages.

Of course as well as those moving to the development having excellent accessibility to Bowerhill, there are other indirect and induced employment/economic benefits arising from the proposals. These include:

£2.1m uplift in gross annual income from new employed residents;

£1.2m annual household retail expenditure;

£700,000 uplift in annual leisure expenditure;

£375,000 expenditure upon first occupation to make a house a home; and,

27 jobs supporting retail and leisure related jobs annually.

Further financial benefits are £100,000 additional Council Tax revenue per annum; £35,000 total New Homes Bonus payment to Wiltshire Council; and circa £400,000 in CIL contributions (precise figure will reflect eventual reserved matters scheme).

Even before the operational phase of the development there will be direct and indirect economic benefits from the construction stage of the 75 dwellings. These are estimated as:

Circa £9.9m of investments in the construction;

35 Full Time Equivalent (FTE) jobs per annum (28 direct net additional FTE jobs including 19 in Wiltshire and 14 indirect/induced FTE jobs including 5 in Wiltshire); and,

£9.0m GVA economic output uplift locally;

The construction and operational phases of the proposals have very clear and significant economic benefits that must be weighed in the planning balance.

There is no need in these representations to rehearse the three strands of sustainable development or the balancing exercise that should be undertaken when assessing whether proposals are sustainable development as the Council will be fully aware of how to approach such as

Appendix Q - Schedule of representations

	<p>assessment. We have, though, summarised below the economic, social and environmental aspects of our scheme for Land North of Pounds Lane.</p> <p><b>ECONOMIC</b>          In excess of 4,000 jobs available within 2km, accessible by non-car modes of travel.          £2.1m uplift in gross annual income from new employed residents.          £1.9m annual household retail expenditure and uplift in annual leisure expenditure.          27 jobs supporting retail and leisure related jobs annually.          £375,000 expenditure upon first occupation to make a house a home.          Circa £9.9m of investments in the construction and £9.0m GVA economic output uplift locally.          Construction requires 35 FTE jobs per annum.</p> <p><b>SOCIAL</b>          Additional housing choice to the local area.          40% affordable housing.          Significant area of public open space including a canal side park.          Incorporation of bungalows.          Funding for a new classroom and the local primary school.          Increase in health and wellbeing opportunities through accessible public open space.          Potential increase in personal wealth allowing possible access to greater social opportunities such as new or better services.</p> <p><b>ENVIRONMENTAL</b>          44% of the total site area retained as open space.          Inclusion of 0.413ha of wetland habitat (within the open space).          New hedgerow planting considerably greater than the small amount lost to facilitate access (just 0.6% of the current hedgerow would be lost).          Accessible to a range of jobs, services and facilities by a mix of walking, cycling and public transport.          As noted above we are of the view that the emerging Plan is unsound in relation to the housing delivery strategy and the lack of new allocated sites. Land North of Pound Lane, Semington can deliver sustainable development and therefore should be allocated for 75 dwellings and public open space as proposed by Richborough Estates. There is no reason not to allocate the site and therefore without it the emerging Plan remains unsound.          Changes required to Policy H2          At present, we consider the emerging Plan to be unsound as it is not positively prepared, justified or effective. To overcome this Land North of Pound Lane, Semington as shown in Appendices 1 and 2 of these representations should be allocated for 75 dwellings and included in Policy H2. In addition the settlement boundary for Semington should be amended to reflect the allocation.</p>

Appendix Q - Schedule of representations

<b>Comment ID:</b> <a href="#">2391</a>	<b>Consultee</b> Mr Haydn Jones Planning Director  Richborough Estates  <b>Person ID:</b> 1132602	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	No
			<b>Do you consider the draft WHSAP is sound?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Settlement Boundary Review		Justified  Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>1. Introduction                  Richborough Estates is a successful land promotion business. We are promoting Land North of Pound Lane, Semington for a residential development of 75 dwellings and public open space. The emerging Plan does not propose to allocate the site for development. These representations relate to the emerging Plan's settlement boundary review, which we consider to be unsound.</p> <p>2. The Need to Allocate Additional Sites for Residential Development                  We have set out in our objection to the housing delivery strategy our concerns over the Council's assessment of their five year supply situation. We consider it to be inadequate and therefore the Council will not deliver the level of housing they envisage. In view of this, further site allocations need to be made in the Site Allocations Plan to ensure that there will be a genuine rolling five year supply through a flexible approach to development. We therefore do not consider that the Council has undertaken a comprehensive review of settlement boundaries as claimed in Paragraph 1.3 of the emerging Plan.                  Without a change in direction, the emerging Plan is neither positively prepared nor effective. Furthermore, without the flexibility it is not the most appropriate strategy and therefore not justified either.                  We have reviewed the content of the Melksham Community Topic Paper and Topic Paper 2: Site Selection Process Methodology but do not consider either is an adequate piece of evidence to justify the lack of new site allocations within the Melksham CA, and more precisely at Semington.</p> <p>3. Land north of Pound Lane, Semington                  As the Council is aware, we are promoting Land North of Pound Lane, Semington for 75 dwellings and public open space. This site should form one of the additional site allocations needed to bring flexibility (and a robust five year supply position) into the Council's housing delivery. In our objection to Policy H2 for the non-allocation of our site we have set out the strong sustainability credentials of our proposals including a proposed level of 40% affordable housing and a mix of dwellings including starter homes, bungalows and larger family dwellings. In particular the provision of 30 new affordable homes, including 9 bungalows is a significant social benefit set against the background of an acute affordable need within Wiltshire.                  Clearly the allocation of the site would require the settlement boundary of Semington to be amended to include the site within the urban area. At present the emerging Plan makes no such amendment. By implication therefore, this part of the Plan also fails the positively prepared, justified and effective tests of soundness because more allocations are needed and one of these is our Semington site.                  Changes required to the settlement boundary                  The settlement boundary for Semington should be amended to include our site North of Pound Lane, Semington within the confines of the Semington urban area. This would mirror its allocation for 75 dwellings and public open space.                  The boundary should be redrawn to reflect the location plan attached to these representations as Appendix 1.</p>

Comment ID:	<a href="#">2392</a>	<b>Consultee</b> Rachel Sandy Asset Manager South West  Highways Agency  <b>Person ID:</b> 903251	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>		
				<b>Do you consider the draft WHSAP is sound?</b>		
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other		<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>			
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>I refer to the public consultation on the Pre-submission Draft of the Wiltshire Housing Site Allocations Plan (the Plan). Set out below is Highways England's formal response to the consultation.</p> <p>Highways England has been appointed by the Secretary of State under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the Strategic Road Network. Within Wiltshire, the Strategic Road Network comprises the M4 motorway and the A36 and A303 trunk roads.</p> <p>The Strategic Road Network is a critical national asset and Highways England is responsible for ensuring that it operates and is managed in the public interest, both in respect of current activities and needs, and in providing effective stewardship of its long- term operation and integrity.</p> <p>Policy</p> <p>Highways England policy relevant to the acceptability of new developments is set out in Department for Transport Circular 02/2013 – “The Strategic Road Network and the Delivery of Sustainable Development”. Paragraphs 9, 10 and 11 of the Circular summarise the correct approach to development proposals as follows:</p> <p>“9. Development proposals are likely to be acceptable if they can be accommodated within the existing capacity of a section (link or junction) of the strategic road network, or they do not increase demand for use of a section that is already operating at over-capacity levels, taking account of any travel plan, traffic management and/or capacity enhancement measures that may be agreed. However, development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe.</p> <p>10. However, even where proposals would not result in capacity issues, the Highways Agency’s prime consideration will be the continued safe operation of its network.</p> <p>18. Capacity enhancements and infrastructure required to deliver strategic growth should be identified at the Local Plan stage, which provides the best opportunity to consider development aspirations alongside the associated strategic infrastructure needs”.</p> <p>Applying the principals of paragraph 9 of Circular 02/2013, development proposals are likely to be unacceptable, by virtue of a severe impact, if they increase demand for use of a section that is already operating at over-capacity levels, or cannot be safely accommodated, ie, a development which adds traffic to a junction which already experiences road safety issues; would increase the frequency of occurrence of road safety issues; or would in itself cause those road safety issues to arise, would be considered to have a severe impact.</p> <p>These principles are reflected in the NPPF which (at paragraph 162) requires that local planning authorities should work with other authorities and providers during the plan making process to assess the quality and capacity of infrastructure for transport and its ability to meet forecast demands.</p> <p>The aim of this cooperation is to arrive at a final position where plans are in place to provide the land and infrastructure necessary to support current and projected future levels of development. (NPPF paragraph 181).</p> <p>Pursuing sustainable development requires careful attention to viability and costs. The sites and the scale of development identified in the plan should not be subject to such a scale that their ability to be developed viably is threatened. To ensure viability, the costs of any requirements</p>	

## Appendix Q - Schedule of representations

likely to be applied to development, such as infrastructure contributions or other requirements, should provide competitive returns to a willing land owner and willing developer to enable the development to be deliverable. (NPPF paragraph 173)

It is equally important to ensure that there is a reasonable prospect that planned infrastructure is deliverable in a timely fashion. (NPPF paragraph 177).

In terms of identifying the necessity of transport infrastructure, NPPF confirms that development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe. (NPPF paragraph 32).

For the Plan to satisfy the requirements of NPPF it would therefore need to be supported by an assessment of the infrastructure necessary to ensure that traffic impacts are not severe. Highways England would be content with the proposed allocations if the identified infrastructure satisfied the requirements of Paragraph 9 of Circular 02/2013.

The Local Highway Authority will have their own criteria and it should also be noted that the requirements of the Plan, in terms of providing the necessary housing, may require additional infrastructure to be identified, particularly in relation to existing issues which would be beyond the remit of Highways England to consider.

The Plan

The purpose of the Plan is established in the Wiltshire Core Strategy (WCS) to:

Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages; and

Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five-year land supply in each of Wiltshire's three HMAs over the period to 2026.

It is the second of these that is of specific interest to Highways England. The Plan is identifying additional sites (over and above those identified in the original 2006-2026 Plan) in order to maintain a 5 year housing land supply. The identification of additional sites has become necessary as some of the original sites have not come forward or been developed as originally proposed.

It is important to note that sites in Chippenham are specifically excluded from this Plan as they were considered under the separate Chippenham Site Allocations Plan which was adopted on 14th March 2017. Highways England worked closely with Wiltshire Council to develop the transport evidence base for that Plan. There Highways England's specific interest was focussed on M4 Junction 17 and full comments were provided on that Plan at the time.

Matters arising from the Pre-submission Draft of the Plan

Impact on A36

There are other sites in villages to the north and south of the A36 as it passes through Wiltshire. Though these sites are mostly small in nature, the cumulative impact would add to the traffic to the A36 and this impact on the operational performance is not known. For example, there are 200 dwellings proposed in the Warminster area. This will need consideration in development of the evidence base.

Transport Evidence Base

Wiltshire Council is currently in the process of developing the transport evidence base to support the development set out in the DPD. However, until that work is complete, Highways England is unable to confirm the scale or cost of the necessary highway interventions, or whether all parts of the Strategic Road network likely to be impacted by the development included in the Plan have been identified.

As recorded in the 'Consultation statement - Annex A: Report on the regulation 18 consultation June 2017' on the Plan, Highways England is committed to assisting Wiltshire Council with the production of a Transport Evidence Base. This may include the use of a number of Highways England transport models. These include a new VISSIM model of A36 between College Roundabout and Petersfinger, which, could be used to test the impact of the Netherhampton sites on A36 College roundabout and the already congested section to the east of that junction. Our current work on the A36 has two objectives, to understand what improvement options there are to help improve its current performance and operation, and to understand the impact of growth and how this might be safely accommodated.

Highways England will continue to work with Wiltshire Council to determine whether the impact of any of these sites is likely to have a material impact.

Specific Questions

The online consultation questionnaire asks specific questions about the Plan and set out below are Highways England's responses to these specific questions.

Appendix Q - Schedule of representations

	<p>Do you consider the Plan is Legally Compliant?  This is not a matter on which Highways England has a remit to comment on.</p> <p>Do you consider the Plan is sound?  This is a matter for the inspector to determine. Highways England will, of course, be willing to attend any examination to assist the inspector in understanding the implications of the plan.</p> <p>The soundness of Plans is assessed against the requirements set out in NPPF (Paragraph 182) which are that they should be Positively Prepared, Justified, Effective, and Consistent with National Policy. At this stage</p> <p>The work to assess infrastructure requirements for the Strategic Road Network is currently ongoing. This is being led by Wiltshire Council in consultation with Highways England. It is envisaged that infrastructure requirements will have been assessed by the time of the examination and Highways England will be willing to assist the inspector at that time to report on any residual implications for the Strategic Road network as may arise due to the Plan.</p> <p>What modifications are necessary?  The need for any modifications to the plan will not be established until the transport evidence base has been completed.</p> <p>I hope you find the above useful. While Highways England are in regular discussions with Wiltshire Council regarding the plan and the evidence base to support it, if there are any queries or matters raised above which would warrant additional discussion then please contact me on the telephone number at the head of this letter.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Chippenham sites - impact on M4 junction 17  The Plan introduces three other allocations in the vicinity of M4 junction 17 which were not included in the Chippenham Site Allocations Plan. These are at Hullavington (50 dwellings), Yatton Keynell (30 dwellings), and Crudwell (50 dwellings). There is no transport evidence to show that these sites would or would not impact on the SRN.  Transport Evidence Base  Wiltshire Council is currently in the process of developing the transport evidence base to support the development set out in the DPD. However, until that work is complete, Highways England is unable to confirm the scale or cost of the necessary highway interventions, or whether all parts of the Strategic Road network likely to be impacted by the development included in the Plan have been identified.  As recorded in the 'Consultation statement - Annex A: Report on the regulation 18 consultation June 2017' on the Plan, Highways England is committed to assisting Wiltshire Council with the production of a Transport Evidence Base. This may include the use of a number of Highways England transport models. These include a new VISSIM model of A36 between College Roundabout and Petersfinger, which, could be used to test the impact of the Netherhampton sites on A36 College roundabout and the already congested section to the east of that junction. Our current work on the A36 has two objectives, to understand what improvement options there are to help improve its current performance and operation, and to understand the impact of growth and how this might be safely accommodated.  Highways England will continue to work with Wiltshire Council to determine whether the impact of any of these sites is likely to have a material impact.  The work to assess infrastructure requirements for the Strategic Road Network is currently ongoing. This is being led by Wiltshire Council in consultation with Highways England. It is envisaged that infrastructure requirements will have been assessed by the time of the examination and Highways England will be willing to assist the inspector at that time to report on any residual implications for the Strategic Road network as may arise due to the Plan.  What modifications are necessary?  The need for any modifications to the plan will not be established until the transport evidence base has been completed.</p>

<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Policy	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared  Justified  Effective  Consistent with national policy	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>				
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Timetable</p> <p>The current programme as set out in the Wiltshire's Local Development Scheme is for the HSAP to reach adoption by 2018. This will depend on the response to this consultation and the changes the Council feel necessary to issues raised. Noting that consultation on 'Issues and Options' stage to this 'waypoint' in the Plan-making process, has largely been 'informal' consultation of local bodies and other groups and not wider consultation. Therefore, while this is a pre-submission consultation it is the first time that wider consultation has been carried with the general public and other stakeholders and it must be expected that a large weight of submissions should be expected.</p> <p>Historically significant delays have occurred during this stage of the plan making process. The Wiltshire Core Strategy (WCS) originally published a pre-submission draft in February 2012 but was not adopted until January 2015. The Chippenham Site Allocations Plan pre-submission draft was originally published in February 2015 and was adopted in May 2017. These two key documents in the suite that make up the existing local plan saw significant delays in their adoption post pre-submission publication.</p> <p>Furthermore, these plans have been adopted with a commitment to produce further documents to cover identified gaps in the policies across Wiltshire. In this respect the WCS has an immediate 'partial' review now programmed into the LDS which is further delayed. The WCS Inspector was very clear that the plan could be found sound only if the 42,000 was seen as a minimum and that the figures identified in the various community areas were seen as indicative. This conclusion was also informed by the fact the Council had told him that a new SHMA would be published by early 2016 and that the WCS would be subject an early review.</p> <p>This would appear to be related to a new Housing &amp; Economic Development Needs Assessment (HEDNA) for Wiltshire and Swindon being jointly prepared by the two authorities. It is our understanding that the HEDNA, although it has been with the Council for some time, has still not been published. It is further understood that the scope of the partial review will be extended to take account of the results of the HEDNA which will update the housing and economic requirements as is necessary whilst extending the WCS plan period to 2036. It is fair to conclude that the Council have also made no material progress towards adopting a Core Strategy review and this has specific implications in term Objectively Assessed Needs.</p> <p>The HSAP itself has also seen significant delays since originally being programmed in the Local Development Scheme. As part of the examination of the WCS in 2014 the LDS showed the HSAP being adopted in in 2015. Each subsequent Local Development Scheme has significantly revised this timetable with the current one published in December 2016. Therefore, with regard to a number of serious concerns outlined in this, and no doubt many other consultation responses, alongside a history of delayed delivery, the current document and the treatment of housing allocations at Trowbridge within it, is considered likely to exacerbate these historic failings.</p> <p>A positive approach is necessary within the HSAP to accord with the NPPF, but also to limit the length of the examination, and to enable sustainable development to occur in a timely fashion. It is therefore suggested, that significant amendments are required to the current draft HSAP prior to this being submitted to the Secretary of State in order to address some of the fundamental failings of the current draft, including additional allocations in the Trowbridge area.</p>

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Trowbridge		Justified Effective Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Failure to Address Strategic Needs of Trowbridge and Wiltshire</p> <p>As noted above, the 42,000 described in the WCS was seen as a minimum and in fact the Inspector concluded that OAN was in fact 44,000. The HSAP makes it clear that the 42,000 is likely to be delivered without full allocation at Trowbridge. In fact, the HSAP notes at paragraph 4.2 that: “The figures above show a minimum to be allocated, but a surplus is necessary to maintain five years supply of housing land in each HMA and to surpass the buffer in excess of five years required by the NPPF.”</p> <p>The HSAP sets out that of the indicative requirements for the Trowbridge Community Area (6,810 homes in Trowbridge and 165 homes in Trowbridge remainder), there are still approximately 3,755 homes to be delivered. The HSAP states that: “the residual housing requirement to be planned for at the town over the period to 2026 is significant.”</p> <p>The reasons for this significant housing shortfall include the extensive delays to secure planning permission on the Strategic Allocation of Ashton Park.</p> <p>This pattern is mirrored across the strategic settlements of Wiltshire where each of the three principal settlements have not delivered housing numbers as envisaged in the plan. Chippenham Community Area has delivered only 1,613 out of allocation of 5,090 and Salisbury Community Area has delivered 2,711 of an allocation of 6,315.</p> <p>The recurring key issue for all of these settlements has been reliance on large sites and significant urban extensions which have failed to deliver homes in the short term and with little under 8 years left in the plan period, it is clear that many of these sites will run over into the next period. Furthermore, this has led to development pressure elsewhere within the plan area where a number of towns have seen ‘planning by appeal’ and these will now deliver in excess of the indicative requirements as set out in the WCS.</p> <p>The NPPF does promote large strategic allocations as positive way to plan for infrastructure needs but stresses that a mix of housing sites will be needed to enable a timely delivery of housing needs in any area. To date the reliance on large sites (without the necessary smaller sites) has resulted in delays to delivery which has undermined the spatial distribution of the WCS.</p> <p>This has been exacerbated by the removal of the Chippenham sites from the WCS.</p> <p>This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,220 homes still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire.</p> <p>In any case taking the OAN and the fact the figure in the WCS is a minimum figure, there is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS.</p>			

Appendix Q - Schedule of representations

	<p>There is a clear pattern of under delivery at the strategic settlements of Wiltshire and the HSAP fails to acknowledge this issue or examine it in any meaningful way. There is limited commentary within the plan on the decision to not allocate the full amount at Trowbridge and the ramifications of this decision are not examined in the Sustainability Assessment (SA).</p> <p>The non-allocation of homes at a principal settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is clear and obvious requirement to allocate a full amount at Trowbridge.</p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<p>Hilperton and Trowbridge There has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge.</p> <p>The WCS emphasises the separate identity of Hilperton, and this is in part preserved by the important green space of Hilperton Gap. However, it should be recognised that Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area. The existing extensive development along Canal Road, at Staverton Marina and Hilperton Marsh to the west of the main historic core of the village, as well as the housing at Paxcroft Mead to the east, demonstrate the functional and physical relationship the village has with Trowbridge.</p> <p>There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations. The only definition comes in paragraphs 5.35 and 5.150 of the WCS which both identify that the figures for Trowbridge relate to the continuous urban area. Core Policy 29 is followed by Table 5.17 which sets out the respective housing requirements for Trowbridge and the remainder. This has a footnote which identifies that within the 6,810 housing requirement for Trowbridge urban area: “Housing numbers for Trowbridge include those planned for the village of Hilperton.”</p> <p>There are a number of settlements in close proximity, including Hilperton which is immediately adjacent and Staverton which is the other side of the canal from Trowbridge. Paragraph 5.35 nevertheless identifies that as Trowbridge is defined as its continuous urban area this includes Staverton. It identifies Staverton in particular as this lies in Bradford on Avon Community Area. It makes no comment on Hilperton (within Trowbridge CA) as this is not relevant to Bradford on Avon CA. However, by the same principle it would be expected that Hilperton would be included in the Trowbridge continuous urban area as it is far more closely physically related to Trowbridge than Staverton.</p> <p>The Core Strategy is therefore unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge. Notwithstanding this lack of clarity, the only explicit definition (in footnote 56) indicates that Hilperton forms part of Trowbridge and by any rational and consistent approach to Hilperton it must form part of the continuous urban area of Trowbridge.</p> <p>Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if contrary to footnote 56, Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements.</p> <p>Regardless of the conclusion on this matter, paragraph 4.34 states: “Despite the Housing Market Areas being the appropriate scale for assessing land supply, the town and Community Area requirements should also be capable of being a material consideration to ensure that delivery is distributed broadly in line with the strategy. So for example, whilst it is appropriate for supply in Trowbridge to provide for some of the requirement of Westbury, it would be wholly inappropriate for the entirety of</p>				

Appendix Q - Schedule of representations

	<p>Westbury's requirement to be added to Trowbridge. The policy framework sets out the strategic pattern of growth, while allowing some flexibility to respond to future, spatially distinctive opportunities and constraints.”</p> <p>This clearly indicates that providing the broad spatial distribution is maintained, as would be the case through development at Hilperton to meet Trowbridge's needs (regardless of whether or not Hilperton is included as part of Trowbridge), then this is appropriate. Therefore, even if the site is not included in the Trowbridge urban area, given lack of alternatives at Trowbridge development at Hilperton will be required to maintain the spatial distribution.</p> <p>Furthermore, the 2011 Census data shows that Hilperton had a population of 4,967, with the main part of the historic village located to the east of the site on Marsh Road. Facilities at Hilperton itself are not of a level that might be expected for a village with a population close to 5,000. It has a retail store located at the petrol station on Wyke Road, which includes the Hilperton Marsh sub-post office, with the Kings Arms pub opposite. Beyond these, the village has a primary school and village hall located toward the historic core.</p> <p>The spatial strategy that supported the WCS stated that settlements that had a functional relationship should be planned jointly. To this extent while physically separated Melksham and Bowerhill are considered a single settlement; and the needs of Salisbury and Wilton are assessed jointly. It is clear that Hilperton is largely dependent on Trowbridge for both employment and other facilities such as supermarkets and other convenience stores, doctor's surgeries and pharmacists, and secondary schools and that it is more closely related to Trowbridge than either Bowerhill is to Melksham or Wilton is to Salisbury. The housing and population of Hilperton are clearly part of the continuous urban area of Trowbridge, contributing to critical mass that has seen Trowbridge develop as strategic centre for Wiltshire. Therefore, the area acts effectively as one urban area and is functionally and physically connected. Indeed, the proximity of Hilperton to Trowbridge means that the residents of the village have better access to facilities than those in any other Large Village in Wiltshire, or than many suburban residents in larger settlements outside of Wiltshire.</p> <p>It is clear that development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the lack of assessment of Maxcroft Farm, which is examined in more detail in terms of the methodology in section 5, and the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan.</p>

<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>	

Appendix Q - Schedule of representations

<b>Comment ID:</b>  <a href="#">2400</a>	<b>Consultee</b> Barratt Homes (Bristol) Barratt Homes (Bristol)  <b>Person ID:</b> 1132626	<b>Agent</b> Mr Daniel Weaver Pegasus Group  <b>Person ID:</b> 1126961	<b>Do you consider the draft WHSAP is legally compliant?</b>	
			<b>Do you consider the draft WHSAP is sound?</b>	No
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>	Other	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>	Positively prepared	
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>	Omission site Maxcroft Farm		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	<b>MAXCROFT FARM</b>			
	We have presented the credentials of the Maxcroft Farm in a Technical Delivery Document that accompanies these representations. This considers:			
	<ul style="list-style-type: none"> <li>• the sustainability of the location;</li> <li>• the environmental factors affecting the location;</li> <li>• the realistic housing potential/capacity of the area in relation to the environmental effects of development;</li> <li>• the deliverability of the location.</li> </ul>			
This is also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire				
It is not the intention of this response to repeat the content of these documents. However, a brief assessment of the sites credentials in terms of sustainable development is presented in the following table. This focuses on the sustainability of the site itself rather than its role in the wider delivery of housing for Wiltshire which is the subject of this response.				

**Strategic Priorities of the JSP****Economic:**

The benefits of the proposed development would support the economic role of the NPPF through the purchase of materials and services in connection with the construction of the dwellings, an increase in local household expenditure as well as revenues to the Council from the New Homes Bonus.

Significant positive weight should be attached to the direct economic benefits associated with the construction of new homes within Maxcroft Farm and *significant* positive weight should be attached to the role that additional housing will play in supporting the existing services and facilities within the settlement.

**Social:**

Substantial weight is to be given to the provision of housing per se, particularly the provision of additional family and affordable housing that would boost housing supply, enhance the diversity of the local population and provide support to existing community and social facilities.

The development will provide a mix of housing types and sizes meeting the needs of the local population. In accordance with Core Strategy policy the development will provide 30% on-site affordable housing with no public subsidy. The affordable housing will be secured through a Section 106 Agreement. This would constitute a significant benefit in terms of paragraph 14 of the Framework.

The proposed development will also include a new community building, which will be of significant benefit to local people in providing a facility for use by local groups, people and other active organisations in the area.

**Environment:**

The proposed development will have a neutral impact on the landscape character and heritage setting as any minor adverse impact – an inevitability of the residential

Appendix Q - Schedule of representations

development on greenfield land will be mitigated by the proposed landscape measures.

A significant area of public open space is proposed across the development which will include formal and informal open space and provision for children and young people, which will be of substantial benefit to both new and existing residents.

A full Ecological Survey of the site will describe the habitats to be enhanced and introduced as part of the proposed development, which will benefit local biodiversity.

There is no suggestion that the proposed development would be unsustainable in respect of natural resources including ground, water and air.

The design of the proposed dwellings will be further discussed and refined prior to any application, but this will include measures to reduce overall energy and carbon dioxide emissions by reducing energy consumption through design, orientation, lighting, heating requirements and air tightness, including low energy appliances and heating systems.

Positive weighting should be attached in the planning balance to the environmental dimension of sustainable development.

It is considered that the proposals reflect all three dimensions and thus represent sustainable development. As explained below the proposals will secure significant benefits which must be weighed in the planning balance.

It is considered that the proposals reflect all three dimensions and thus represent sustainable development. As explained below the proposals will secure significant benefits which must be weighed in the planning balance. In terms

Appendix Q - Schedule of representations

of delivery Barratt Homes are keen to stress that the delivery of this site is immediate, and could be delivered from start on site (following allocation/consent) to practical completion with 24 months.

The table below sets out the programme for the delivery of up to 160 units at land Maxcroft Farm.

Programme	Timeframe/Numbers
Allocation in Wiltshire Housing Sites DPD/Hilperton Neighbourhood Plan	Winter 2018 (Based on Wiltshire Council Timetable)
Grant of Outline Planning Permission subject to S.106 Agreement	March 2019
Agreement of S.106 and issue of Outline Planning Permission	April 2019

Submission of Reserved Matters	June 2019
Approval of Reserved Matters	September 2019
Discharge of Conditions	November 2019
Commencement on site	March 2020
Housing Completions	
<ul style="list-style-type: none"> <li>• 1st Unit</li> <li>• 50 Unit</li> <li>• 100 Units</li> <li>• 150 Units</li> </ul>	<p>Sept 2020</p> <p>July 2021</p> <p>September 2022</p> <p>March 2023</p>

Appendix Q - Schedule of representations

	<p>Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim.</p>
<p><b>Attached files (Please see Objective)</b></p>	<p>4729773 / 4729774</p>
<p><b>If your representation is seeking a change, do you consider it necessary to participate at the oral part of the examination?</b></p>

				Effective	
				Consistent with national policy	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>The HSAP is inconsistent in its identification and treatment of locations across Trowbridge. As stated above, no assessment of Maxcroft Farm has been undertaken yet other sites around Trowbridge which manifestly are likely to have detrimental impacts on key issues identified for the town have been taken forward regardless. While there is currently no evidence that at least small parcels of these sites could be delivered, given the extensive delays caused by ecological issues at Ashton Park further allocations to the south and south east (incorrectly noted as south west in the HSAP) of Trowbridge would appear likely to suffer similar delivery issues making any reasonable prospect of delivering within the plan period highly unlikely.</p> <p>The methodology supporting the allocations of the HSAP is set out in a separate topic paper. This involved a five-stage process. We are satisfied by the basic model and the rigour of stages 3 to 5, if not the conclusions of these latter stages. As with the key decision around the lack of allocation of homes at Trowbridge, the Council has failed to provide sufficient clarity as to the area of search and exclusionary criteria used to identify potential sites for Trowbridge. The rationale for not including Maxcroft Farm is neither apparent in the outlined methodology nor any commentary in the document or the accompanying SA</p> <p>The first basic point is that the HSAP needs to clarify the area of search used for Trowbridge. The methodology states that sites connected physically to a defined settlement have been taken forward, yet sites to the east of Ashton Park have been taken forward from the stage 2 to stage 3 assessment, which are only notionally connected to town with sensitive ecological areas in between. The opportunity to for these sites to form part of the existing built up area is severely limited, a crucial part of the exclusionary criteria set out in stage 2.</p>

<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		Maxcroft is physically connected to the Trowbridge and Hilperton continuous urban area, adjacent to both the Trowbridge and the Hilperton settlement boundary. Therefore, why a site that is physically connected to the continuous Trowbridge urban area is not even considered in the area of search is not clear. Given the limited options and lack of full allocation at Trowbridge, the HSAP should establish an appropriate area of search for as an important location as Trowbridge in the settlement hierarchy, in line with the policies of the WCS highlighted in section 3.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge		Justified	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		5.5 As noted above [see attached], while at this stage the credentials and deliverability of many of the sites is yet to be fully established. It is clear that further allocations to the south and east of the town will be compromised by the delivery of Ashton Park and vice-versa. In the table [see following reps] below we highlight the sustainability and deliverability issues of some of the proposed allocations as highlighted in the Councils own SA.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge			
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>	It is clear that further allocations to the south and east of the town still have numerous ecological issues to overcome and would appear to be directly contradicting the key issues highlighted in paragraph 5.150 of the WCS. The sensitivities around the south east of the town mean that delivery of these sites is likely to be delayed and it is likely that there will be a significant under delivery at Trowbridge unless further deliverable sites are identified. The HSAP further states that there are significant ecological, landscape and infrastructure constraints with the following issues needing to be addressed by housing and yet the HSAP allocates to areas directly affecting the key sites and species connect to the Bradford-on-Avon SAC. The rationale to discount Maxcroft Farm will simply leave delivery of housing to later plan periods.

<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		Trowbridge		Justified	Effective
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		There is a failure to properly address the housing and development needs of Trowbridge and to recognise the role that sites adjacent to the continuous urban area of Trowbridge (including at Hilperton) can play in delivering housing at this key strategic location and principal settlement in Wiltshire. In this context, the site allocations for Trowbridge present a clear failing in this draft HSAP that will need to be rectified, in order that this document delivers an effective land supply of housing in Wiltshire. A separate Written Opinion is attached at Appendix 1 from No5 Chambers on the relationship between Hilperton and Trowbridge and the legal conformity to the Site Allocation Plan in its current form.

				Effective	
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>Land at 6 Halfway Firs, Bath Road, Corsham</p> <p>I write on behalf of our clients, Mr and Mrs Arnall, to set out representations to the pre-submission Wiltshire Housing Site Allocations Plan in relation to their house and surrounding curtilage at 6 Halfway Firs, Corsham. This representation relates specifically to the proposed revised settlement boundary for Corsham.</p> <p>In undertaking the task of revising the settlement boundaries of the towns in Wiltshire, the Council has recognised that the existing settlement boundaries are out of date and do not reflect changes which have taken place since they were first established. The Council has recognised that houses along the southern side of Bath Road, together with the former MOD Copenacre site to the north, form part of the settlement of Corsham and should be included in the settlement boundary. This is supported. However, it appears that the Council's proposed revised settlement boundary continues to be based on outdated, or inaccurate OS plans as only part of the curtilage of 6 Halfway Firs is included within the boundary. The boundary as drawn does not reflect the actual curtilage of the dwelling, or any physical boundary on the ground (please see attached extract of the aerial photo).</p> <p>It is submitted that the settlement boundary for Corsham should be revised as detailed in the attached plan, which reflects the actual curtilage of 6 Halfway Firs, and provides a clear and logical boundary to the settlement, with fields in active agricultural use beyond. The area is already clearly in residential use, surrounded on three sides by built development and would not extend the built form of Corsham.</p> <p>The sites inclusion as proposed would be consistent with the settlement boundary review methodology as set out the relevant Topic Paper (Topic Paper 1) and would be consistent with the inclusion of other sites on the edge of Corsham, particularly the land to the east of the site at Halfway Farm.</p>

## Appendix Q - Schedule of representations

Comment ID:	<a href="#">2419</a>	Consultee	Agent	Do you consider the draft WHSAP is legally compliant?	
		Person ID: 558939	Person ID:	Do you consider the draft WHSAP is sound?	
To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?		Other	Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:		
Please identify the policy, paragraph, table, figure or site to which you are referring.		Whole Plan			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.		I write in response to your email of 28th July and in response to consultation on the draft Wiltshire Housing Site Allocations Plan. It is noted that the Draft Plan has been prepared in accordance with the Wiltshire Core Strategy, on which there was significant and active engagement with B&NES Council and overall agreement on the strategy proposed. There is broad alignment between the two authorities respective Core Strategies. Further to a meeting with Wiltshire Council (Georgina Clampitt-Dix, Head of Spatial Planning and Carolyn Gibson, Spatial Plans Team Leader) I am writing to confirm that B&NES Council officers have considered the Draft Housing Site Allocations Plan and do not wish to make any comments on it. Whilst no concerns are raised in relation to the Draft Plan B&NES Council would welcome sight of any representations received by Wiltshire Council in relation to sites close to the boundary with B&NES. This is useful in remaining apprised of the issues being raised which may also be germane to preparation of a New Local Plan for B&NES which will cover the period to 2036.

Please identify the policy, paragraph, table, figure or site to which you are referring.		H2.13 Ridgeway Farm			
Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	<p>I am against the building of any further housing along Tetbury Lane, at Ridgeway Farm. I believe that further development will increase the chance of surface water flooding into my property.</p> <p>I live at and my garden butts up to the field ditch which runs along the back of the gardens on the west side of the Dawneys. This ditch catches all the surface water from the fields up the slope towards Chedglow and whenever we have a period of heavy rain, the ditch fills up and water seeps into my garden and ends up laying against the back of my bungalow.</p> <p>Periods of heavy rain are more frequent now and the existing Surface Water drainage in Crudwell takes longer to get back to normal after one of these storms. Over the past few years fields along Tetbury lane have flooded, the Village Hall playing field has been saturated, as well as manhole covers blown at the junction with the Street.</p> <p>It was recorded in letters, submitted at the first Planning Application for housing at Ridgeway Farm, from people living in the Dawneys, about the problems of flooded gardens as a regular occurrence, from surface water coming over the ditch from the field at the back.</p> <p>Will you be carrying out a survey to determine more accurately the surface water loading which travels down these fields. Just transferring the surface water run- off, from these developments, into the existing struggling drainage system in the village, is not acceptable.</p> <p>More housing will only further disrupt the existing natural surface water drainage routes and the problems caused by the speed and volume of run off from roofs, drives, gardens and roads will increase the likelihood of flooding to my property.</p> <p>If you wish to visit my property I am quite happy to see you.</p>

Comment ID:	<a href="#">2429</a>	<b>Consultee</b> Steve Wylie  <b>Person ID:</b> 1126922	<b>Agent</b>  <b>Person ID:</b>	<b>Do you consider the draft WHSAP is legally compliant?</b>	
<b>To which part of the draft Wiltshire Housing Site Allocations Plan does this representation relate?</b>		Site	<b>Do you consider the draft WHSAP is sound?</b>		
<b>Please identify the policy, paragraph, table, figure or site to which you are referring.</b>		H2.4 Church Lane Trowbridge	<b>Do you consider the draft Wiltshire Housing Site Allocations Plan is unsound because it is not:</b>		
<b>Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.</b>		<p>We live at . Along with our neighbours at St John’s Church and at least 5 other neighbouring properties our dwelling is grade 2 listed. According to the listing guidelines and development pertaining to such properties, any development has to fit certain criteria. This is not simply the structure of the listed building but location, context and surrounding. Any development that is obviously visible from the said listed buildings is detrimental to the buildings themselves which have been listed intrinsically with the location.</p> <p>Our address is 2 Church Lane. It is not Off the M4 next to Homebase. The setting is the lane, the church, and the extent thereof being the parish boundary. Any development affecting this setting is contrary to policy: local government, town and national planning.</p> <p>Section 66 of the Listed Buildings Act states that in planning the Council must pay particular regard to protecting the setting of listed buildings. Whilst we appreciate planning and development are necessary, it is fairly obvious that the council gets it wrong sometimes. As an example: whoever gave planning for the “lead bunkers” to be stuck on the side of St John’s Church in 1980 obviously was either mad or had no idea of what a Victorian gothic church was or is.</p> <p>So, in conclusion, to avoid incorrect planning decisions, any development in the fields (Site 1021) along Church Lane would be inappropriate from a town development point of view (the buffer zone between villages being taken up, the apparent attempt to change parish boundaries ie. Church Lane, the destruction of a setting that has been unchanged since the church and associated buildings were erected in the mid 19th century). There is no justification in planning law to ignore the legal standing of a listed building when it has been listed for very specific reasons.</p> <p>The above letter was written by my attached next-door neighbours at 2 Church Lane, Trowbridge. I agree with everything contained in it. Furthermore:</p> <p>Maintaining the Setting of Heritage Sites - Listed Buildings</p> <p>The sites at the back of Church Lane provide a rural setting for 7 Grade II Listed buildings as follows: -</p> <ul style="list-style-type: none"> <li>- St Johns Church School and Hall masters dwellings comprising 4 dwellings. (UID1021593)</li> <li>- Church of St Johns (UID 1364192)</li> <li>- 344 Frome Road (UID 1364193)</li> <li>- Rose Villa (UID 1021594) .</li> </ul> <p>See attachment for quotes from policy context and pictures.</p> <p>The photographs below clearly show that current development on this side of town has enabled these buildings to maintain their historic setting. Ancient landscape and monuments</p> <p>I have also been advised that the Church Lane Site 1021 may be crossed by ancient ley-lines.</p> <p>The site most certainly contains a well-documented ancient monument – the ancient water-meadow MW173579.</p> <p>Site 1021 is bordered by an ‘important’ historical hedge as defined by the Hedgrows Act 1997. Evidenced by OS 1890 map, and the OS Old Series 1791-1874 map.</p>			

Appendix Q - Schedule of representations

	<p>I attended the public exhibition evening laid-on by Wiltshire Council on 26th July 2017 at County Hall in Trowbridge where I was given a copy of the glossy brochure explaining the Site Allocation and consultation process. On page 7 of the document is a flow diagram showing how potential sites are selected. Point 2a on the chart reads:          'SHLAA sites are rejected from further consideration or their capacity reduced where affected by obstacles to development such as heritage and wildlife designations and flood plain, or because the site is already a commitment for development or located in the built up area.'          The Church Lane site 1021 should have been rejected on three different grounds:          Heritage – as set out above;          In summary, I would contend that the above Planning Practice Guidance will have been breached if modern housing development is implemented on Church Lane as it would cause clear detrimental deterioration to the immediate ancient rural landscape, the ancient monument being the wáter meadow, and to the setting of the 7 listed properties at this location, one of them being the 19th Century Church of St John the Evangelist. At least one of the Listed properties on Frome Road overlooking proposed development site 1021 dates back still further to at least the 18th Century.</p>

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Pre-Submission Draft Plan – Community Area Topic Paper – Warminster In the above you have allocated a development of 35 new houses to Chapmanslade, this relating to the proposed development of part of Barter's Nursery. I understand that the Chapmanslade Parish Council has objected. This is reversal of a continuing policy of approval whilst considering earlier versions of the same development. I am strongly in favour of the development and attended one of the supportive Parish Council meetings some while back.

Please give details of why you support or do not support the WHSAP including details of changes you consider necessary to make the draft Plan legally compliant / sound.	Further – the same Wiltshire Council brochure at page 10 says under the heading ‘Why review settlement boundaries?’ ‘The Wiltshire Core Strategy uses settlement boundaries as a policy tool for managing how development takes place. In simple terms, a ‘settlement boundary’ is the dividing line, or boundary between areas of built/urban development (the settlement) and non-urban or rural development – the countryside. In general, development within the boundary is, in principle acceptable, whereas development outside the boundary with limited exceptions, not acceptable.’ Site 1021 Church Lane is outside the settlement boundary, both before and after the settlement boundary review exercise as shown on the map above paragraph 5.29 in the Wiltshire Housing Site Allocations Plan Pre-submission draft plan Community Area Topic Paper – Trowbridge. As already stated It is difficult to imagine what exceptional reasons exist for developing site 1021 which has unique rural and heritage aspects, very valuable biodiversity and ancient monument status, sits on a flood plain adjacent to the well-established Southwick Country Park – as well as being OUTSIDE the settlement boundary.
