 - Remove damaged kerb inlet. Install 1 no. HDP gully pot (450mm Ø) & connect to existing HW system via 150mm Ø plastic pipe. Install grade D400 hinged kerb gully unit (495 x 355- HB2 profile) Type Saint Gobain 'Aquaquerb' or similar

- General Notes
1. The works shown on this drawing could affect statutory undertakers apparatus and the contractor is required to verify the location and depth of all such apparatus prior to the commencement of works and to take all precautions necessary when working in the vicinity of such apparatus. Utility information is produced from a digital source and no guarantee can be given regarding its accuracy. It is the recipient's responsibility to check accuracy of measurements given. Should discrepancy occur please contact issuing authority to seek clarification.
 2. The use of this drawing does not absolve the client from his responsibilities under Health & Safety: The Construction (Design and Management) Regulations 2015.
 3. Notable site hazards marked with symbol. Note: HV positions are estimated and no guarantee of their accuracy can be given. It is the responsibility of the contractor to ensure the location of all utilities are determined prior to commencements of the works.
