Questions from Mr Ian James

Was Mr Sturgis aware of the recommendation made by a Wiltshire Council Senior flood engineer when asked by the Wiltshire Planning department as to whether or not he would recommend development to the east of Chippenham?

What was that recommendation?

Did Mr Sturgis see the photographs and comments sent to the planning department at Monkton Park on 24th December 2013 when the River Avon was bank full?

At the December 2015 cabinet meeting Mr Seed admitted that there was a risk to building upstream of Chippenham Town, do you agree with his assessment?

Will he agree that there is little risk to Chippenham Town or Melksham Town when developing downstream?

Are the results of the Environment Agency Modelling of the River Avon in Chippenham available to parish councils to review?

If not what date will they be made available?
