

Wiltshire Council Strategic Risk and Issues Summary - 2022/23

This summary gives details of issues the council is dealing with, the strategic risk register and the emerging risk that may need to be quantified in the future. A guide to reading the risk register is included at the back of this summary.

Issues

Obstacles and Challenges that are now present and being managed as issues by Wiltshire Council

Macro economic pressures on our budgets: Sustained inflation Nationally, there is a 'cost of living crisis' impacting businesses and residents and, due to inflation, the council has experienced a significant increase above that forecast in the budget. As part of the final financial outturn reporting, the Council took the opportunity to prudently set aside reserves to offset the unforeseen costs of inflation likely to arise in 2022/23, with £7m set aside for Contractual Inflation & £2m set aside for Pay Inflation to address the in-year pressure.

Staff Capacity: Recruitment and retention Some, but not all, service areas have identified that this has now become an issue, with there being a range of factors at play in different labour markets. These include:

- A smaller national workforce (less European immigration, earlier retirement/semi-retirement following the pandemic, increased numbers of those on out of work benefits) and closer to full employment.
- Specific skills shortages.
- Competition from the private sector and from other public sector organisations.
- The impact of the increase in the cost of living making higher wages more important.
- The cost increase of driving for those who have to travel in their role.

The result is that some services are now impacted by insufficient staffing.

Emerging Risks	
Events that have the potential to interrupt the work of the Council but of which not enough is yet known to quantify the risk to the delivery of our services.	
Continuing financial impact of global events	International capital and energy markets remain impacted by conflict and speculative investment are likely to sustain additional inflationary pressure in the UK. Disruption to global supply chains causing shortages, more inflation and potentially more demand for support of council services. A more uncertain world could mean a more insular economy and lower UK market sentiment meaning less investment in Wiltshire.
Additional service pressures	As the Council operates in a multi-agency environment with complex and intricate dependencies, it could be adversely impacted by the actions of others (including short term workforce pressures, greater service demand or budgetary constraints).

How to read the strategic risk register

There are significant challenges for Wiltshire Council as it looks to empower people, build stronger communities, grow the county's economy and lead the way in tackling climate change. The Strategic Risk Register reflects these challenges.

The Strategic Risk Register draws together information recorded on risk registers of individual services across Wiltshire Council.

Information that has significance across the council as a whole is displayed in two categories on the Strategic Risk Register.

1. Critical service risks: significant risks that sit in a single service but which, should they become an issue, will have a significant impact on the council as a whole.
2. Composite strategic risks: where similar risks exist in a number of different services which would not have a significant impact on the organisation on their own but put together represent a significant impact. These risks are compiled into a single strategic composite risk and included within the strategic risk register. These risks are scored by reviewing the service component risks.
3. National level risks: Wiltshire Council's response to the risks recorded by central government on the National Risk Register (NRR). The updated NRR is due to be published in the near future. When it is, Wiltshire Council will work within the Local Resilience Forum to produce an appropriate response. In the meantime Wiltshire Council's pre-existing response to the previous NRR is shown in the grey rows above.

Each risk is fully defined by the responsible service (who assess the cause, event and effect that make up the identified risk).

Each risk is scored for impact and likelihood to give an overall score. A risk is scored twice; firstly, as inherent (the current level of risk) and then as residual (the risk as it would be once all the planned mitigating actions are in place).

The confidence in the implementation of these mitigating actions is assessed as high, moderate or low. This guides the reader of the register to understand the true current risk.

A whole range of service risks are kept under observation each quarter.
