# Application Site Context

Page 22

# Extract from Appeal Decision pursuant to 20/06434/FUL - APP/Y3940/W/20/3263057

7. The proposal would introduce a new dwelling within an existing modestly sized plot at 6 Ash Walk. There is no evidence that the existing plot is proportionally larger than other plots within the locality, or that there is surplus land available to comfortably support a new dwelling at the site.
8. Consequently, the proposal would take up a significant proportion of the existing plot, which in and of itself would detract from the wider uniformity and arrangement of dwellings in the locality and make the existing dwelling appear cramped on a much smaller plot. Furthermore, and in a similar context, due to the existing plot being modest in size, the new dwelling would be squeezed onto a plot that is substantially smaller than others in the locality, and it too would detract from the general uniformity of the area.
9. Consequently, the proposal would change the pattern of development, which would have a harmful effect on the character and appearance of the area. By extension, the proposal would not preserve the setting of Warminster Conservation Area or Grade II listed buildings in proximity to the site. There is no evidence demonstrating that this harm would be outweighed by public benefits generated by the proposal.

# Aerial View of the Application Site

# Extract from the Wiltshire Design Guide, adopted March 2024

*9.2.2 Minimum garden areas for all houses should be equivalent to the footprint of the house.*

Page 26

*In general, a north facing garden for a typical 2 storey house should be minimum of 12m long or up to 15m long for a typical 3 storey house*

- In general, a south, east or west facing garden should be a minimum of 10m deep.*
