MARCH 2021

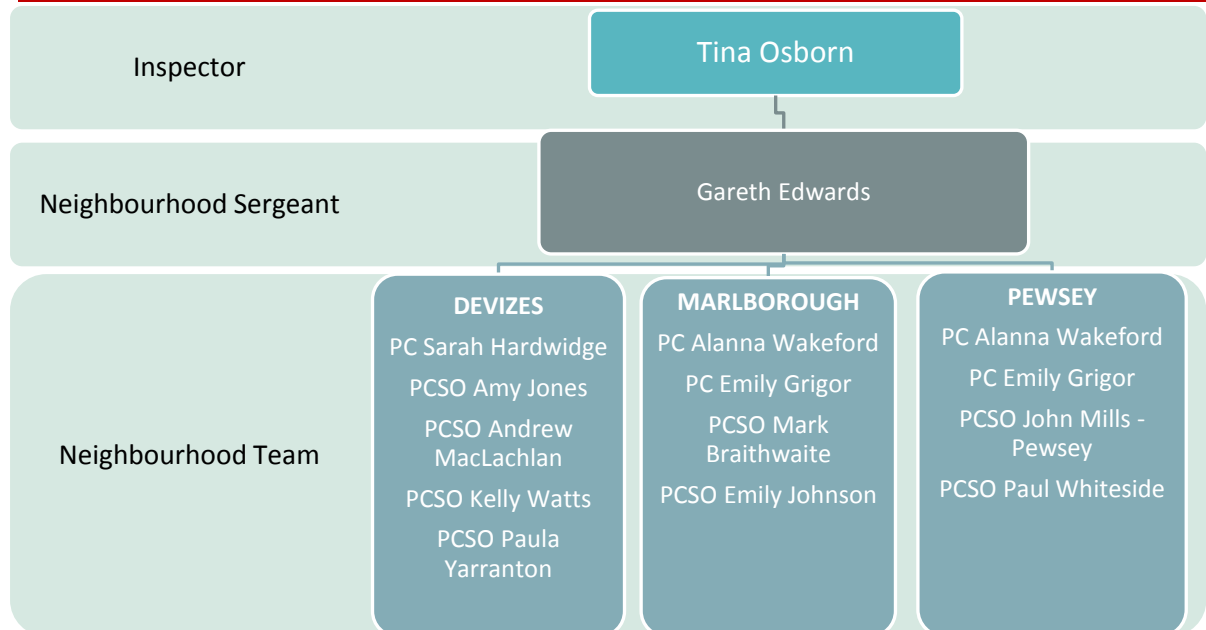

## Key Updates

Again, as with the previous report in December the most significant update must focus on COVID-19. We are now thankfully approaching the time whereby some of the restrictions can be relaxed whilst still being mindful of the risks to all. One of the most important changes I think you will agree is the return of children into the schooling environment. This will not only support them in their education but provide those important social interactions they have been unable to have with teachers and other children over the last couple of months. It is also positive to hear how many people have now received their vaccination in a short period of time.

However, I would like to plea again to all, that everyone continues to follow the guidance provided at each stage over the coming months as restrictions are relaxed, to ensure that we protect the most vulnerable and prevent further spread of the virus. Not wearing face masks, unnecessary travel or allowing people into your home; it all amounts to additional demand on your Police Service who would prefer to be proactively fighting crime in the more traditional sense.
