

- target sound levels at key monitoring points close to the boundary with residential premises to allow The New Inn to undertake their own validation monitoring during events to ensure that noise controls are working.
 - written observations shall be made at agreed points on the premises perimeter by a member of staff. This shall relate to both music and people noise. Notes shall also be made on what corrective actions were taken.
- 5) *The Premises Licence Holder shall purchase and arrange for the installation of a noise limiting device in The Stables and the main pub, the specification and design to be agreed with the Environmental Health Officer. The device shall be fitted so that all regulated entertainment is channelled through the devices. The maximum noise levels shall be set in agreement with the Environmental Health Officer. The settings of the noise limiter(s) shall not be adjusted unless agreed by Environmental Health Officer and in the presence of the licence holder.*
