<b>Identify Proposed Change Reference Number</b>	N/A [H2.4]				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>With regards to H2.4 Church Lane there appears to be no response to concerns raised during the initial consultation process in September 2017 regarding protection of ancient hedgerows in accordance with The Ancient Hedgerow Act 1997. Evidence was submitted to the Council ( Ancient Hedgerow, Hedgerow map 1838 and hedgerow map 1886)which proved that all the existing hedge lines at the site would qualify as ancient hedgerow. This evidence seems to have been completely ignored by the council. The Ancient hedgerows within Site H2.4 would preclude access to the larger portion of the site and on these ground alone development should not be permitted. WHSAP Consultation Statement Regulation 22 Appendices M-P: In Stage 2 of the HSAP the omissions sites for Trowbridge were discounted on the basis that they were inside the settlement boundary. When we moved into 344 Church Lane we were informed by Wiltshire Planning that development of the Church Lane site would not be possible as it was outside the settlement boundary. This is contradictory. How can this be a valid reason for excluding the Bowyers, Hospital, Margaret Stancombe School, East Wing and Ashton Street sites when Wiltshire Council states that it is committed to providing affordable housing with good transport links alongside urban regeneration for a growing population? In addition, the full extent of the Heritage, Archeological, Recreational, Agricultural and Environmental importance of Church Lane was not considered at Stage 2 as this was only raised by residents and outside agencies in September 2017. The Council should therefore remove Church Lane from the HSAP until they can prove that development of the omissions sites (mentioned above) would have a greater impact on these criteria (which clearly they cannot).</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I refer to Table 24 Grid references M9, N8, N9,O8, P8 and O9 of Document SBR PC27 where the text clearly states that the objection I raised during the initial consultation concerning 181 Devizes Road had been accepted and the settlement boundary would remain as the extent of the garden of the property and adjoining properties. The interim review had moved the boundaries of a number of properties to an artificial line half way down the long established gardens. However, though my objection had been accepted, the map published with this document shows the boundary still running on an artificial line halfway through my garden and the gardens of numbers 178-189 inclusive. Other properties on the same side of Devizes road on either side of 178-189 are shown as having their boundaries adjusted and in many cases extended so that they coincide with the gardens of the properties but not ours. I would be grateful if the examiner would rectify this error in his final report, or explain to me why numbers 178-189 need to be treated differently to the rest of Devizes Road. My reason for saying that the document is unsound is because the wording of the revisions and the map supplied are not in agreement.				
<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>		<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation Assessment Addendum (September 2018).</b>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the removal of the Ridgeway Farm site allocation from the Wiltshire Site Housing DPD (development plan document). I think the consultation material is sound and legally compliant. Local council is already complying with planning requirements and putting a lot of effort into ensuring the village meets with what is needed under national and regional planning requirements whilst taking into account what those already living in the area are happy with so that housing is grown as per national requirements but with sympathy to local concerns. The Ridgeway Farm Site Allocation goes against Wiltshire Council's own Core Strategy of development in large villages being limited to small sites. On that point alone, the Ridgeway Farm site allocation should be removed from the Wiltshire Site Housing DPD. However, furthermore I do not feel the roads and drainage in the village would cope with such a development. On the strength of that I support the removal of the Ridgeway Farm site allocation from the Wiltshire Site Housing DPD (development plan document).

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. Our Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Councils and Governments Localism agenda is best served by allowing the Parish to determine its own future.

<b>Identify Proposed Change Reference Number</b>	PC92				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	The consultation material and proposed changes now reflect far more accurately the views of myself, my wife, and as I understand it, the vast majority of Parishioners. Specifically: 1 There is no strategic need for Wiltshire to allocate housing in Crudwell. The supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to "small sites" of local needs. Recent development and a new proposed development does not fall within this definition and will, I believe, be severely detrimental to the character, amenity and enjoyment of the village by existing and future residents. 2 The village is currently well down the process of developing a Neighbourhood Plan. This is progressing extremely well with Reg 14 Consultation planned for November 2018 and Reg 16 planned for early Spring 2019. This plan identifies a number of small, sustainable sites, to meet identified needs, and more than adequately contributes Crudwell's share of housing supply and will be acceptable and welcomed by myself and most parishioners. 3 It is accepted as a principle that the Council's and Government's localism agenda is best served by allowing the Parish to determine its own future. In summary, I fully accept the need for future housing supply, and believe that the proposed changes to the Housing Allocation Plan outlined at PC92 properly reflect the views and wishes of Crudwell's parishioners.				
<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>			<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation Assessment Addendum (September 2018).</b>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the removal of the site at Crudwell from the WHSAP. The reason for this is that in the wider context of completions that have already occurred in the Malmesbury CA over the WCS plan period, there is no longer a strategic need to allocate a site in the community area through the WHSAP. Given that good progress has been made on the preparation of the Crudwell Neighbourhood Plan, which seeks to allocate sites, evidence indicates that the Council can defer housing allocation options to be developed through the emerging neighbourhood plan, rather than through the WHSAP the WHSAP. The reason for this is that in the wider context of completions that have already occurred in the Malmesbury CA over the WCS plan period, there is no longer a strategic need to allocate a site in the community area through the WHSAP. <b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support change PC92 proposed for the Wiltshire Site Allocation Plan and am in favour of its acceptance for the following reasons. General points: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to "small sites" to meet local needs. Our Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future. Site Specific points: I have major concerns about the size of the development proposed in H2.13 Ridgeway Farm Crudwell. The area already suffers from surface water flooding and sewage backup due to inadequate mains drainage. The road is small and without pavements and unable to accommodate traffic increases safely.				
<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>			<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation Assessment Addendum (September 2018).</b>

<b>Please give details of why you support or do not support the updates to the</b>	Please see a summary of my comments below:				

**associated evidence documents.**

1. My most important point is as follows – The selection of this site appears all too engineered. It scored negatively in 9 of the 12 sustainability criteria but was concluded to be ‘more sustainable’. Adjacent/opposite sites (e.g. site 738) have been excluded because of the lack of walking and cycling facilities but there is no mention of these issues at this site (site 321) which is located on the opposite side of the B3098. All 214 comments by the public as part of the September 2017 consultation have been ignored. And it is very convenient that the only portion of land identified as suitable for construction in the entire area surrounding Westbury happens to be land where the landowner has offered the Council the land.
2. The Westbury Community Area Topic Paper has failed to consider, or even mention, that Bratton Parish Council rejected the plans for site 321 in September 2017, citing a number of factors and concerns voiced by members of the Parish. In fact, the information contained in the table on page 46 has not been updated in this July 2018 document, and as such is a direct contradiction to the Parish Council’s September 2017 response, in which the plans were rejected. This is not reflected in the most recent paper and is of great significance (regardless of it being noted in another document, because it is of great importance). This is incorrect information and needs to be changed.
3. The Westbury Community Area Topic Paper document has failed to consider in excess of 200 responses to the Aug-Sept 2017 public consultation with regard to site 321, of which the overwhelming majority of contributors were raising serious concerns with building on the site. It appears evident that the results did not contribute to, and were not considered, before drawing a conclusion. This is the opportunity for local people to have a say on the future of their area; the responses to this consultation appear to have been ignored and not mentioned in any place within the document. It appears, on the surface, that a decision was already made and that the consultation was a waste of time for everybody involved. Local residents (Council Tax payers) deserve to have a valued input into the selection process – their views have not been mentioned in a report that is of great significance to the area in which they live and care about.
4. The Westbury Community Area Topic Paper notes that site 738 was removed for the following reason: “The overall sustainability benefits would be marginal due to a lack of certainty that comprehensive and attractive routes for pedestrians and cyclists are deliverable.” This site is located directly opposite site 321 – so I assume that this fact would equally apply to site 321. Why has this not been applied?
5. The Westbury Community Area Topic Paper contains contradictions within the document. On page 46 it is noted that, “The Parish Council did not respond to consultation on the Housing Site Allocations DPD.” On page 63 it then notes that, “Bratton Parish Council are in the early stages of preparing a Neighbourhood Development Plan...” which implies that they did respond. This is a contradiction within the same report.
6. As noted previously: In your reply to my concerns on 17th August, you noted the following:  
  
The Westbury Community Area Topic Paper (July 2018) is a record of both the site selection and the settlement boundary review process. The information that you refer to on page 46 was correct at the time that section of the site selection methodology was produced.  
  
This information is no longer correct, so why has it not been updated? The fact that it was correct at the time of the site selection methodology is not relevant. The information is incorrect and needs to be changed.
7. In September 2017 a public consultation was carried out in which 214 responses were received. Every single response appears to have been ignored. The only change that was put forward in the Consultation Statement Regulation 22 (1) (c) Appendices M-P was that the number of houses was reduced from 40 to 35 because “the promoters of the site have carried out further detailed assessment and potential layouts which show that 35 dwellings may be more readily accommodated”. No changes were made as a result of the public’s responses and the public and

	<p>the Parish Council have been overwhelmingly ignored. (For example, there was no comment on the fact that the village doctors' surgery is over capacitated). The only change that has been made has been made as a result of consultation with the promoter of the site.</p>

**Idmiston Parish Council Consultation Response**

We, The Idmiston Parish Council, have been asked to respond to the consultation request regarding the WHSAP proposed changes through to 2026.

The Idmiston Parish Council have a “made” Neighbourhood Plan, which following an independent examination and a positive referendum result, Wiltshire Council decided to formally adopt. The Idmiston Neighbourhood Plan (IPC NP) now forms part of the Development Plan for Wiltshire and the policies in the plan will be given full weight when assessing planning applications that affect land covered by the plan.

The IPC NP identified development sites as having either been identified in Wiltshire Strategic Housing Land Availability Assessment (SHLAA) exercises, or had been the subject of previous planning applications. With a recognised Parish housing target share of 32 new houses by 2026 (share of the Wiltshire total), c.74 sites were proposed and to-date c. 48 houses have received either outline or full planning permission.

Wiltshire Council Planning have since confirmed that further scale planning will not be supported in the Parish for the period through to 2026 owing to the over delivery of the housing target to-date - [REDACTED], Wiltshire Council Planning, 11.09.18:

“...Our view is that with the granting of planning permission of the Horfield development which is for 16 dwellings and what we consider is an extant consent at the Chalk House development which is for 20 dwellings, the Neighbourhood plans commitment to provide approx 32 houses has now been met. Therefore in principle we as planning officers would have in principle objections to any further sites allocated in the neighbourhood plan coming forward or any other sites outside the villages coming forward for housing. This would be through to 2026...”

The Idmiston Parish Council supported by the IPC NP and with the three villages in the Parish - Porton Large Village status, Golmeldons Small Village Status and Idmiston Small Settlement status does not support the inclusion of the SHLAA sites in the WHSAP and refer to the IPC NP for development through to 2016.

The “made” IPC NP forms the local lead for the Development Plan for this period (to 2026).

We summarise below our understanding of the core principles of the WHSAP:

**The Purpose of the Plan**

1.1 The purpose of the Wiltshire Housing Site Allocations Plan (‘the Plan’) is to:

Revise, where necessary, settlement boundaries in relation to the Principal Settlements of Salisbury and Trowbridge, Market Towns, Local Service Centres and Large Villages; and Allocate new sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire’s three HMAs over the period to 2026.

[SEE TABLE IN ATTACHMENT]

[SEE TABLE IN ATTACHMENT]

**Relationship with Neighbourhood Planning**

	<p>2.21 There are at the moment over sixty Neighbourhood Plans either being prepared or completed in Wiltshire and many more plans are likely over the years ahead. Many of these involve identifying land to meet the need for new homes. Their role in meeting housing requirements will become more significant alongside the Plan.</p> <p>2.22 It is a priority of both Government and the Council that planning controls pass to local communities so they can develop their own local vision of sustainable development. Parish and Town Councils have been consulted on the review of settlement boundaries. The work being done on Neighbourhood Plans influences the selection of sites(8) and where Neighbourhood Plans have been 'made' or are well advanced the Plan leaves decisions on the scale and locations for growth in settlements to the communities concerned.</p> <p>4.4 The WCS proposes much more modest levels of housing provision at Large Villages as reflected in the indicative scales of housing for each community area. Some new development, to meet local needs, may be appropriate at some of the designated Large Villages within these rural areas either through sites allocated in the Plan or by Neighbourhood Plans produced by the local community.</p> <p>4.15 The future development of some Large Villages has already been thoroughly considered by Neighbourhood Plans. Neighbourhood planning addresses the housing needs of a settlement in accordance with Core Policy 1 of the WCS. It is unnecessary for the Plan to supplement local consideration and SHLAA sites at Large Villages where Neighbourhood Plan preparation is at an advanced stage are not considered reasonable alternatives.</p> <p>[SEE TABLE/EXTRACT IN ATTACHMENT]</p>

<b>Identify Proposed Change Reference Number</b>	PC92				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>In line with the Governments Localism agenda, Crudwell Village is developing its Neighbourhood Plan (referred to hereafter as the Plan): the detailed community-led research underpinning the Plan indicates that a maximum of 20-25 new dwellings is needed by 2026 and situated throughout Crudwell Village rather than on a single site. The Plan has also identified that there is no 5 year housing land supply problem within the Housing Market Area that applies to Crudwell Village, thus supporting the Proposed Change (PC92) to Wiltshire Councils Housing Site Allocations Plan (WHSAP). In addition, the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. A development of the size and siting proposed under 18/05429/FUL is clearly contrary to the strategic need identified in the Plan. In addition, the proposed site is outside Crudwell Villages settlement boundary, which would be contrary to Wiltshire Councils adopted and emerging development plans. In line with these issues, and following the Full Council meeting in early July, Wiltshire Council has recommended that 18/05429/FUL (Ridgeway Farm) be removed from WHSAP. Supporting the Proposed Change (PC92) to WHSAP would not only support the needs and wishes of Crudwell Village, as identified in the Plan, but would also support Wiltshire Councils own recommendation to remove the proposed site from its Housing Site Allocations Plan. I therefore support the Proposed Change (PC92) to WHSAP. To the best of my knowledge, the consultation material is sound and legally compliant.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the proposed change to remove the Ridgeway Farm site in Crudwell from the Wiltshire Housing Site Allocations Plan , on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. Our Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Councils and Governments Localism agenda is best served by allowing the Parish to determine its own future

<b>Identify Proposed Change Reference Number</b>	N/A [H2.4]				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>I am writing to you regarding the proposed development: Housing Allocation H2.4 Church Lane, Trowbridge Presently you have come to 2nd consultation period where in we have until 5th November to object further to the violation of the green fields area where permission has been requested. Church Fields is currently a wildflower meadow adjacent to the Lambrok Stream that is a prominent wildlife habitat that includes various insects &amp; mammals. Just last week my husband &amp; I had the pleasure of witnessing a deer in the church fields. Development on this site will severely damage the ecosystem that is present &amp; will cause catastrophic changes to the natural environment which at present remains undisturbed by human activity. I strongly believe that construction on this site will be devastating to the local wildlife that call this home &amp; has &amp; will strongly affect the local residents of this town. This development will not only affect the houses directly surrounding the site but will also affect everyone who is a regular user of the neighboring country park who do not want the un-spoilt views to be replaced by yet another housing estate. Areas such as Church Fields with delicate ecosystems such as this should be preserved, protected &amp; cared for, not threatened. The construction of this development will have an impact on the wildlife currently calling Church Fields home, it will not only frighten the wildlife, but quite possibly kill any wildlife that cannot escape fast enough. The construction site run off will contaminate &amp; damage the ecosystem in the stream killing the currently thriving insects &amp; amphibians that rely on this freshwater stream being just that, fresh water. As per the EXAM.01 Schedule of Proposed Changes - Consultation Document: Please review my comments. 1. ID:1129173/ 402467 REP: 1523 Ancient hedgerows - The hedgerows surrounding this site were all in existence before 1850 (through maps this is easily clear to all) &amp; this means they are therefore protected under the Hedgerow Act. See attachment to email. 2. There is contradiction in the approach to discounting sites based on the settlement boundary. 3. The Council could not have taken into account the heritage, environmental &amp; flood importance of the site at the stage when they discounted sites in 2015-2017 as this was brought to their attention in Sept 2017. 4. This site is already subject to sever flooding on an annual basis, 5. ID: 395940 Rep: 2967, 2968, 2969: Surface water &amp; housing water will be directed into drainage pipes to an attenuation pond where this water will then be filtered directly into the freshwater stream via smaller pipes. When asked about contaminants &amp; pollutants from the attenuation pond the response I received was I dont know from Senior Urban Designer [REDACTED]. After a follow up email as requested I have this: The primary purpose of an attenuation pond is to help control surface water runoff and ensure the flood risk of a site is not increased. This statement does not provide reassurance for the residents, this is a hope that the flood risk wont increase, so it will not prevent the flood issues that are already evident on this site which are currently of no threat to homes &amp; is in direct conflict to the ID as stated above. It is only a secondary function to filter out potential pollutants which is something we have not been asked about before Have not been asked about before</p>				

	<p>RPS have put the safety of the ecosystem in the hands of a drainage consultant rather than an environmentalist or ecologist who would have a much larger understanding &amp; a wider scope of knowledge on the requirements needed to protect this area. Southwick country Park hired their own Ecologist who was less than impressed with the methods proposed by RPS. 6. ID: 903251 Rep: 239: Traffic is currently an issue on Saturdays for the Park Run, the car park overflows, cars park along the A361 causing obstruction on a main A road, with a new junction for site access to this area this will undoubtedly cause more dangerous &amp; extreme issues. The proposed placement for this junction is just below the brow of the hill, a blind spot for traffic that will need to pull out of this new junction. With the above issues in mind I implore you to please reconsider any development on this green field site &amp; instead, protect this area of natural importance &amp; beauty for current &amp; future generations.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Boundaries only relate to the large village of Hilperton. There is no reference to the rural settlement of Whaddon which is in the parish boundary. Geographically it sits closer to Holt and Semington. The material is generally sound but is limited to the main settlement in Hilperton. No consideration has been given to the very rural hamlet of Whaddon which lies within the Parish boundary. Young people and people reaching retirement age may wish to reside in the hamlet and therefore housing needs in this area should be considered.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	In line with the Governments Localism agenda, Crudwell Village is developing its Neighbourhood Plan (referred to hereafter as the Plan). Consultation for Reg 14 is planned for Nov 18 and Reg 16 is planned for early spring. The detailed community-led research underpinning the Plan indicates that a maximum of 20-25 new dwellings is needed by 2026 and situated throughout Crudwell Village rather than on a single site. The Plan has also identified that there is no 5 year housing land supply problem within the Housing Market Area that applies to Crudwell Village, thus supporting the Proposed Change (PC92) to Wiltshire Councils Housing Site Allocations Plan (WHSAP). In addition, the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. A development of the size and siting proposed under 18/05429/FUL is clearly contrary to the strategic need identified in the Plan. In addition, the proposed site is outside Crudwell Villages settlement boundary, which would be contrary to Wiltshire Councils adopted and emerging development plans. The Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future. I therefore support the Proposed Change (PC92) to WHSAP. To the best of my knowledge, the consultation material is sound and legally compliant.

<b>Identify Proposed Change Reference Number</b>	PC46				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Introduction We are responding to this consultation in respect of our clients land interest at Underhill Nursery in Market Lavington which was previously proposed allocation H1.2 in the Wiltshire Housing Site Allocations Plan (WHSAP). The proposed amendment PC46 and its consequential changes (PC1, PC5, PC7, PC8, PC11, PC15, PC17, PC18, PC38, PC39 and PC45) look to delete proposed allocation H1.2 in its entirety. This follows a decision by the Councils Cabinet to defer the allocation of housing sites in Market Lavington to the Market Lavington Neighbourhood Plan (MLNP) on two grounds, which we discuss below. Background It should be noted that the Councils Planning Policy Officers were previously supportive of proposed allocation H1.2, hence its inclusion in the Regulation 19 Pre-Submission Draft Plan (Summer 2017). The allocation combined parts of two adjacent land parcels on the edge of Market Lavington which had been identified in the Wiltshire Strategic Housing and Employment Land Availability Assessment (SHELAA) (2017) as being suitable, available, achievable and deliverable, as well as being developable in the short-term for housing. Combining the two SHELAA sites was considered to provide an opportunity for the holistic planning of the sites and would make use of previously developed land to prevent the need to encroach on the open countryside. The proposed allocation site was considered to be in a sustainable location with good access to the centre of Market Lavington and its facilities, which include a primary school and health centre. In addition we submitted various technical evidence reports to the Council to support our clients case for the redevelopment of the site for housing. Together the Councils findings, as well as our supporting technical evidence, demonstrate that proposed allocation H1.2 would be a logical development site to meet the housing needs of Market Lavington, as a Local Service Centre, which the Pre-Submission Draft Plan identified as the second tier of the Devizes Community Area settlement hierarchy. Despite the decision by the Councils Cabinet, we believe that proposed allocation H1.2 remains an exemplary candidate for inclusion in the WHSAP as a site for housing. Then at a meeting of the Councils Cabinet in July 2018, Members resolved to remove proposed allocation H1.2 along with other site allocations in Market Lavington from the WHSAP. Two arguments were put forward to justify these amendments. The first justification posited contends that there is a sufficient five year housing land supply position in the East Housing Market Area (HMA) and this negates the strategic need for the WHSAP to allocate residential sites in Market Lavington. The second being that significant progress has now been made in the preparation of the MLNP. For the reasons we will set out below, we consider this approach of deferring residential allocations to the MLNP to be unsound and recommend that proposed allocation H1.2 should be reinstated. Representations We fervently disagree with the Councils position, which is that a five year housing supply in the East HMA removes the strategic need to make residential allocations in Market Lavington. This would be inconsistent with national policy as paragraph 47 of the NPPF (2012), which requires local planning authorities to identify a supply of specific, developable sites</p>				

or broad locations for growth, for years 6-10 and, where possible, for years 11-15 . National planning policy is therefore clear that the Council must look at its residential allocations beyond five years, so as to ensure there is a consistent pipeline for bringing forward new residential development. Given that the Councils Housing Land Supply Statement Addendum July 2018 Submission Version (ref: TOP/03C) indicates there is still an indicative residual requirement for the remainder of the Devizes Community Area, outside Devizes itself, of at least 81 dwellings during the remainder of the Plan period up to 2026 the Council should still be looking to identify site allocations. To not allocate sufficient sites would mean the Councils approach would fail to fully meet its identified housing needs and as such would not be positively prepared. Rather than allocate sufficient sites through the WHSAP, the Councils proposed approach is to now defer any allocations in Market Lavington to the MLNP. Whilst we recognise that Neighbourhood Plans have the option of allocating land for housing, this must be in support of the strategic housing delivery targets for that area as explained in paragraph 184 of the NPPF (2012). In the Devizes Community Area Topic Paper July 2018 Submission Version (ref: CATP/06) it states at paragraph 2.13 that if a neighbourhood plan is sufficiently advanced, having at least submitted a draft neighbourhood plan to the Council for a Regulation 16 Consultation , then this includes information on whether it is allocating housing and reviewing settlement boundaries (our emphasis). Yet immediately after this, in Table 2.4, it is established that the MLNP has not yet progressed to the Regulation 16 Consultation stage. Whilst it is identified that the MLNP will incorporate housing allocations, there is no mention of the quantum or location of housing proposed to be allocated. This appears contradictory to the Councils own reasoning for making amendment PC46 which argues that progress on the MLNP has been sufficient to defer the consideration of housing allocations. In fact the MLNP is currently only going through its second round of Regulation 14 Consultation, which closes on 30th October 2018. This is being carried out to take account of comments and recommendations from the first round of Regulation 14 Consultation which took place between March and May 2018. Given the Market Lavington Neighbourhood Area designation was decided some time ago (in March 2015) it is clear that the MLNP has taken a significant length of time to emerge as it has now taken over 3.5 years just to reach a second round of Regulation 14 Consultation. We therefore contest the Councils position, which is that sufficient progress has been made on the MLNP to allow for the deferral of housing allocations to it. Indeed it is unclear when a Regulation 16 Consultation will be carried out let alone Examination. Although the second round of Regulation 14 Consultation for the Market Lavington Neighbourhood Plan does allocate sites in draft, this includes one not previously submitted to the Wiltshire SHELAA, namely North of Spin Hill (MLNP ref: Site 2). Therefore the suitability of this site has not yet been formally assessed by the Council and the first opportunity for it to now do so will be the MLNP Regulation 16 Consultation. We do not consider the North of Spin Hill site to be a robust allocation as it is remote from Market Lavington and a significant distance from the villages settlement framework boundary, as established in the Wiltshire Core Strategy. Given the lack of pedestrian routes or public transport options between the North of Spin Hill site and Market Lavington, it will encourage the use of the car to access facilities and services in the village which is contrary to the core planning principles established in paragraph 17 of the NPPF (2012) thereby rendering the site unsustainable. Furthermore another draft allocation in the Regulation 14 Consultation, The Spring (MLNP ref: Site 4, SHELAA ref: 3268), was discounted by the Council in the updated Devizes Community Area Topic Paper (ref: CATP/06) and not considered a preferred site. The development of The Spring site was considered to involve the loss of land that contributes to the rural character at the approach to the village. Also any measures to achieve heritage objectives and mitigate surface water flooding (if possible) would substantially limit the developable area, such that the benefits of developing the site were considered marginal and did not outweigh the adverse impacts. Based on the Councils own assessment of The Spring site, we consider that this draft allocation is unlikely to deliver in the way the authors of the draft Neighbourhood Plan envisage. Therefore, given that at least two of the four draft allocations in the MLNP are flawed, we consider that the MLNP will run into significant issues in the future. One scenario could be that the questionable allocations are removed from the MLNP. However, this would have the consequence of leaving Market Lavington with a lower number of allocated homes than would meet its needs as a designated Local Service Centre and second tier settlement within the Devizes Community Area. Another scenario could be that the described draft allocations result in the MLNP failing at Examination (or even failing to pass the Regulation 16 stage). This would result in further delays to the MLNP, thereby further hindering the allocation of any housing in Market

	<p>Lavington. Whilst we recognise it is not for the Inspector of the WHSAP to examine the MLNP, and its draft allocations, we do consider that the Inspector should take note of these issues as evidence that the Councils decision to defer potential housing allocations to the MLNP is an inappropriate strategy. The most appropriate strategy would be for the WHSAP to allocate residential development sites in Market Lavington and by not doing so the WHSAP is unjustified. By deferring site allocations to the MLNP, the WHSAP is deferring the deliverability of housing in Market Lavington to the MLNP and this is not regarded as likely to be effective given the potential delays we envisage the MLNP will face as a consequence of proposing to allocate sites that are unsustainable and unlikely to deliver as anticipated. Conclusion In view of our representations above, there is substantial evidence that the proposed modification PC46 and its consequential changes have made the WHSAP unsound contrary to paragraph 182 of the NPPF (2012). In order to remedy this and make the WHSAP sound, we consider that proposed modification PC46 should be removed, its consequential changes subsequently amended and proposed allocation H1.2 be reinstated so that it may form part of the adopted Development Plan for Wiltshire. In order to effectively put this case before the Inspector and address any questions they may have, and to also respond to any argument the Council may make for proceeding with proposed modification PC46 (and its consequential changes), we consider it necessary to attend the Examination Hearings in a speaking capacity. For reference, we append a full set of additional details as follows. These reports and drawings concern the proposed development of the site and provide information regarding constraints; Illustrative Layout Option 1 Illustrative Layout Option 2 Vision Document Pre-Application Statement Highways and Transport Access Options Rev A (which reflects the most up to date access strategy) Pedestrian Improvements Preliminary Ecological Appraisal Baseline Landscape Appraisal Heritage Desk Based Assessment Flood Risk and Drainage Technical Note</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I agree that the Ridgeway Development at Crudwell should be removed from the plan. It is extremely large and out of keeping as a development for the village. There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to "small sites" to meet local needs. Furthermore the site pedestrian access is unsafe for getting to the village to access the school or buses. The lane does not have enough space for cars to pass without pulling in and there is no footpath for all but the shortest part of the lane. The Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. Finally the Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Thank you for consulting with Sport England on the Wiltshire Housing Site Allocations. Sport England has an established role within the planning system which includes providing advice and guidance on all relevant areas of national, regional and local policy as well as supporting local authorities in developing the evidence base for sport. Sport England aims to ensure positive planning for sport, enabling the right facilities to be provided in the right places, based on robust and up-to-date assessments of need for all levels of sport and all sectors of the community. To achieve this our planning objectives are to seek to PROTECT sports facilities from loss as a result of redevelopment; to ENHANCE existing facilities through improving their quality, accessibility and management; and to PROVIDE new facilities that are fit for purpose to meet demands for participation now and in the future. We work with the planning system to achieve these aims and objectives, seeking to ensure that they are reflected in local planning policies, and applied in development management. Please see our website for more advice: <a href="http://www.sportengland.org/facilities-planning/planning-for-sport/">http://www.sportengland.org/facilities-planning/planning-for-sport/</a> Site allocations No sites including playing fields should be allocated for development if this would include the loss of playing field or prejudice the use of the playing field unless it is in line with Wiltshire adopted playing pitch strategy. I have had difficulty locating sites which are referred to in the documents due my lack of local knowledge and lack of postcodes. Site plans would have been of great assistance. <a href="http://www.sportengland.org/facilities-planning/tools-guidance/design-and-cost-guidance/other-design-guidance">http://www.sportengland.org/facilities-planning/tools-guidance/design-and-cost-guidance/other-design-guidance</a> Thank you once again for consulting Sport England.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the consultation material as it follows the published process and is in harmony with the wishes of the community as expressed through the Codford Parish Council. I believe the proposed changes made in Codford are legally compliant and sound. While the documentation published over the last 4 years has been detailed and numerous we focus on the following;- 1/The 3nr proposed changes stated in the consultation on changes between 15 th May to 11 th June 2018 were fully supported by the Codford Parish Council. These same changes were recommendations expressed by the Codford Parish Council when engaging with the informal settlement boundary review 28 th July to 22 nd September 2014. These changes are reflection of community involvement. 2/ The narrative stated in table SBR PC31 reference 28 and 28.1 follows the adopted methodology for reviewing the settlement boundary, demonstrates an understanding of the local geography and the close relationship of existing properties to the built environment. 3/ The changes made benefit the village and will improve the social wellbeing of the community by removing 20 years of stagnation through dereliction, is an effective use of the land were the existing use has become redundant, will make a positive economic contribution to the village while having minimum impact on the environment.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Following our telephone conversation yesterday, I have attached the scheduled proposed changes for Codford PC; SBR PC31, to which Codford PC has no objection. I confirm that Codford PC would like to be notified that the ensuing Inspector's Report, has been published. And to also be notified When the Wiltshire housing Site allocations Plan has been formally adopted.

<b>Identify Proposed Change Reference Number</b>	PC119				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC119 amends footnote 22 so that the settlement boundaries have been updated to take account of the implemented planning permissions up to April 2017. The previous version of the footnote referred to since 2016 . However, the settlement boundaries have not been updated to reflect the changes we proposed in response to the consultation on the Pre-Submission Draft. Pegasus submitted representations so that the settlement boundaries of Calne, Melksham and Westbury should be amended to reflect planning permissions. These changes have not been taken on board, so consequently the statement in the Focussed Changes is inaccurate, the settlement boundaries do not reflect implemented planning permissions up to 2017. Paragraph 4.13 of the WCS allows for the review of the existing settlement boundaries through the Wiltshire Housing Site Allocations Plan. Paragraph 4.15 states that: these settlement boundaries will also be reviewed as part of the Wiltshire Housing Site Allocations Plan as set out in the Council's Local Development Scheme, in order to ensure they remain up to date and properly (emphasis added) reflect building that has happened since they were first established. (my emphasis). In some cases these are clearly out of date as they do not reflect recent planning permissions. Topic Paper 1 Settlement Boundary Review Methodology states that as the boundaries were not altered in the Wiltshire Core Strategy and they relied on the district local plan boundaries. Para 1.3 states that the Council has undertaken a comprehensive review of the boundaries to ensure they are up-to-date and adequately reflect changes which have happened since they were first established. The Plan amends settlement boundaries where necessary. It is also the prerogative of local communities to review them through the preparation of neighbourhood plans. It is noted that the three case studies referred to in Topic Paper 1 that Winchester City included in the settlement boundary Built/ commenced allocations/ planning permissions . Purbeck includes Uses and buildings (including sites with unimplemented planning permission) that have a clear social or economic function. Kettering Borough Council includes Existing commitments for built developments. It is noted that the Wiltshire Council draft settlement boundary methodology included Both built and extant planning permissions for residential and employment uses for areas which are physically/ functionally related to the settlement. However, following consultation with the Parish and Town Councils who disagreed that the settlement boundary should include allocations, development proposals and unimplemented planning permissions as those who objected to the inclusion of sites with planning permission considered that many planning permissions never get built out and that the final built form may differ substantially from the original permission; the methodology was changed. Only for those planning permissions that have commenced are included in the settlement boundary as they consider that there is much greater certainty. The Topic Paper concludes Therefore, the revised settlement boundary review methodology will include within the settlement boundary built or commenced planning permissions but exclude all unimplemented planning permissions. Nevertheless, it is</p>				

	<p>recognised that settlement boundaries represent a snapshot in time. Unimplemented planning permissions subsequently built out can be included within a future review. The revised settlement boundaries proposed for Melksham, Westbury and Calne are not up to date and do not reflect recent planning permissions to RHL references 15/12454, 14/09262/OUT, 14/11179/OUT land at Prince Charles Drive, Calne respectively and also land at Low Lane Calne LPA reference 17/00679/OUT). The settlement boundary of Melksham should be revised to reflect planning permission 15/12454 land to the north of Sandridge Common, Sandridge Road, Melksham, where development has started. Likewise the settlement boundary of Westbury should be revised to reflect planning permission 14/09262 which was granted on appeal in July 2016 ( 300 dwellings, land north of Bitham Park, Trowbridge Road, Westbury) which has started. It is noted that the proposed new settlement boundary includes land to the west of Trowbridge Road which was granted permission and is under construction ( 220 dwellings 13/03568), but not land to the east of Trowbridge Road. It is noted that the settlement boundary is proposed to be altered to reflect earlier planning permissions at Calne, namely land off Sandpit Road and land south of Abberd Lane, which have been built and under construction; however recent planning permissions land at Prince Charles Drive ( 14/11179 for 130 dwellings) and land at Low Lane Calne (17/00679 for 165 dwellings) are not reflected in the changes to the settlement boundary. Building has commenced on Land at Prince Charles Drive. The issue is what harm would there be to the settlement strategy of updating the settlement boundary to reflect the recent planning permissions in addition to those under construction. These sites are after all considered against the housing supply and are consistent with the settlement strategy and are in some cases under construction. The comments above are also applicable to Chapter 6 and the Community Area Topic Papers.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>An objection is made to PC51 ie Policy H2 Table 5.3. The updates reflect the amendments to the housing site capacities /densities of allocations at Trowbridge and the removal of a housing allocation at Crudwell. Our concerns expressed in relation to Policy H2 and paragraphs 4.44 4.61 and paragraphs 5.43 5.44 in response to the consultation in September 2017 have not been addressed ie about the deliverability of sites at Trowbridge. On review of the evidence base: EXAM/03 ADDENDUM TO Wiltshire Housing Site Allocations Plan Pre-Submission Draft (June 2017) Assessment under the Habitats Regulations Original Addendum: 4 May 2018 Minor factual update to support the consultation on the Councils Schedule of Proposed Changes September 2018 Wiltshire Housing Site Allocations Plan Topic Paper 3 Housing Land Supply Addendum (July 2018 Submission version) (TOP/03C); Wiltshire Housing Site Allocations Plan Topic Paper 4 Developing Plan Proposals Addendum (July 2018 Submission version)( TOP/04C) Wiltshire Housing Site Allocations Plan Community Area Topic Paper Trowbridge (July 2018 Submission version - updated September 2018) (CATP/17a); Wiltshire Housing Site Allocations draft plan - Stage 4a Site Landscape Assessment Part 2: Salisbury, Tidworth, Trowbridge, Warminster and Westbury Community Areas Prepared by Wiltshire Council and The Environment Partnership (June 2017) (WHSAP/20) There appears to be no justification apart from in the Addendum to the HRA September 2018 paragraph 3.3.3 which refers to increasing the housing numbers at four allocations in Trowbridge which take the number of dwellings proposed at Trowbridge from 800 to 1,050 on greenfield sites. The paragraph states for example for the site at Elizabeth Way where the number of dwellings are proposed to increase from 205 to 355 ie a 73% increase, states: Below Middle Lane the allocation lies within the consultation area for Bechsteins bats and it seems that an increase of this scale could require this area to become urbanised to some degree. Any subsequent design solution to support development would need to ensure the provision of low lux lighting, dark corridors, open space and protection of existing habitat. Such measures have been incorporated into the draft Plan. It is noted that Natural England in their reponse to the Plan in 2017 raised concerns. Paragraph 3.3.2 of the Addendum to the SA (September 2018) states that a precautionary approach should be taken in determining a what constitutes key bat habitat. Habitats such as hedgerows, tree planting and streams will be assumed to be of key importance to bats within the consultation zones and also outside them where strategic routes may link important roosts. Furthermore, there is the cumulative effect which is acknowledged in the Addendum, whilst a loss of habitat at site level may be of low significance it is the cumulative impacts at a landscape level. It is understood that a Trowbridge Bat Mitigation Strategy is being prepared and that Phase 1 is to be consulted upon and made available to support the Examination. Paragraph 3.3.5 of the SA {EXAM03} states: The work being undertaken is complex and requires iterative consultation with bat experts and planners to test the deliverability of proposals. The overall approach will be to safeguard key</p>				

	<p>habitat features on site and offset the loss of others by creating new habitat according to a metric. It is noted that the Addendum report at paragraph 3.3.8 states that the capacity of the sites has been calculated on the basis of 30 dph. The capacity of housing allocations has been calculated on the basis of 30 dph and excludes parts of the sites that are undevelopable due to environmental and heritage constraints. In principle, the density of development at each site could be increased without leading to impacts alone, as long as it can be demonstrated that: The principles in the TBMS for protecting key bat habitat on site can be met; and The landscape remains porous to bat movements to the same extent after development as it was prior to development. The Addendum report states that the original estimates for the capacity of the sites in the Pre-Submission Draft Plan were based on a low density and that there will be only marginal, or no change to the footprint of development and the extent to which it may impinge upon habitat areas. The Plan envisages that the TBMS will guide design and layout so that effects are mitigated, if necessary offsite, and no additional safeguards need to be incorporated into the Plan. However, paragraph 3.3.10 importantly acknowledges that: In view of the fact that the bats response to development is likely to be delayed and difficult to ascertain with confidence, this could suggest a need for phasing further development over and above the current draft and adopted allocation that might arise from the Local Plan Review. Otherwise there would be a risk that the capacity of the area to support the internationally important population of Bechsteins bats may be exceeded and as a result have significant adverse effects on the integrity of the SAC. However, this would be a matter for the Review to resolve and is not necessary to progress in this Plan. It appears that the evidence base does not justify the approach and that the sites are not only allocated but the density for the sites is proposed to increased. It is considered that the evidence base is incomplete and that until such time that this work is completed a precautionary approach should be applied and therefore the capacity of the sites should not be increased through the Focussed Changes. This should be a matter for the Local Plan Review. (The Review of the Core Strategy has been significantly delayed from the timetable in the LDS). Consequently, in order to support the delivery of housing in the Core Stragegy, which has to date not matched expectations, sites elsewhere in the HMA should be brought forward to ensure housing is delivered and an adequate housing land supply maintained in accordance with the NPPF. We have in our response to the Plan in September 2017 indicated that land to the north west of Melksham comprising 74.54 acres, land off Abberd Lane, Calne comprising 4.92 acres and adjacent area comprising 5.77 acres and land off Low Lane, Calne are available and deliverable in the plan period.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC17 provide an update to Table 4.8 to reflect the latest position on housing land supply published in March 2018 with a base date of April 2017. It is noted that this has been updated to reflect the changes ie the proposed increase in densities on housing allocations at Trowbridge etc. In our previous representations to the Proposed Submission Plan in September 2017 we noted that Table 4.8 HMA 5 year land supply estimate 2017 2018 indicated that there would be in excess of a 5 year supply for the North and West HMA through to 2025/2026, in this year the housing supply fell to only 5.3 years. It is noted from Topic Paper 4 that the 5 year supply has been calculated on the basis that if a 20% buffer was required then a 5 year land supply could be met. Even in the year 2025/26 it would appear that the Council can demonstrate a 5 year land supply in the North and West HMA with a 5% buffer. However, what is not clear from Topic Paper 4 is the calculations behind these figures as no trajectory is available which reflects the Focussed Changes.

<b>Identify Proposed Change Reference Number</b>	PC15				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC15 updates Table 4.7 to reflect the latest housing land supply statement. The latest assessment of the developable supply which is available is contained in the Wiltshire Housing Land Supply Statement Update March 2018 (HLSS) with a base date is April 2017. It is useful to consider some of the components of supply identified in this report in order to assess the robustness of the Councils assessment. There are a number of sources of supply in the HLSS which should not be relied upon to deliver as outlined below. Windfalls It is noted that the figure for windfalls for the remaining plan period 2017-2026 has increased from 2,086 to 2,209 for North and West Wiltshire HMA. An objection is made to the approach to windfalls which has deviated from the approach in the adopted Wiltshire Core Strategy. The approach in the Core Strategy was found sound, (but conservative) by the Inspector. The Council are now using an approach which gives a higher figure and are relying on a greater number of large windfall sites than found sound by the Inspector. In the adopted Core Strategy the Council relied upon Method 1 (as set out in the July 2014 HLSS) ie for North and West Wiltshire over 5 years the windfall allowance was 583 dwellings. The Council are now using Method 3 from the 2014 HLSS (now referred to as Method A) which generates 980 dwellings over the 5 years. However, the consistent application of Method 3 / Method A shows how the number of windfalls has decreased over time ie from 1688 dwellings over 5 years to 980 dwellings over 5 years. This shows windfalls are declining and yet the Council persist with a method which is totally reliant on historic trends of windfalls. The Council are also allocating sites, therefore the capacity is reduced for windfalls as these sites will come forward as allocations. This would suggest that the number of windfalls will be below the declining historic trend. It is considered that going forward for the remaining plan period that there is an over reliance on windfalls, this together with the continued uncertainty over the sites proposed in Trowbridge where the density has been increased therefore demonstrates the need to consider increasing the number of proposed sites in the plan or at the very least to include reserve sites at sustainable market towns. Saved Local Plan Allocations The Council continue to rely upon the delivery of saved Local Plan allocations in the Table 4.7 of the HLSS, although the number of sites and the contribution from those sites has reduced to 123 dwellings in North and West Wiltshire HMA over the remaining plan period. The saved local plan allocations from the North Wiltshire Local Plan are: Quemerford House and Mill {3 dwellings} The saved local plan allocations from the West Wiltshire Local Plan are: Land off Oldfield Road, Westbury {30 dwellings} Station Road, Westbury Town {90 dwellings} These sites were allocated in June 2006 in North Wiltshire and in June 2004 in West Wiltshire. In the intervening 12/14 years these sites have not delivered and as such they are unlikely to provide a reliable source of supply in the future. Housing Land Supply There is a difference in the deliverable housing land supply from that set out in the Housing Land Supply Statement published March 2018 (base date April 2017). Table 2 states that the deliverable supply 2017-2022 for North and West</p>			

	<p>Wiltshire is 8,130 dwellings (this corresponds with Appendix 4 of the HLSS) however, when compared to Table 5.5 in Topic Paper 4 July 2018, the figure for the deliverable supply is less ie 8,086 dwellings. The figure in the HLSS in March 2018 comprises 7,680 dwellings from existing commitments and 450 dwellings in terms of emerging allocations. Clearly the figures for the emerging allocations do not reflect the increase in densities proposed as a result of the Focussed Changes as this took place after the HLSS was published. The figure in Table 5.5 of Topic Paper 3 comprises 7,680 from Table 3.3 in Topic Paper 3, July 2018 and the remainder is 406 dwellings reflecting the emerging allocations. It clear that the deliverable supply over the 5 years 2017-2022 is 44 dwellings less despite the increasing densities proposed in the Focussed Changes. There remains no up-to-date housing trajectory to support the Focussed Changes.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC13 Updates Table 4.5 to reflect the proposed increase to the number of dwellings at Trowbridge and Westbury. However, we have already objected to the sites identified to meet the shortfall at Trowbridge in our previous representations to paragraphs 4.44- 4.61 and para 5.43 5.44 of the Pre-Submission Draft in September 2017. The Proposed Changes retain the sites and furthermore increase the proposed number of dwellings at these sites. We have already expressed concern about the delivery of these sites and to increase the number of dwellings to these site to meet the HMA shortfall, although consistent with the Wiltshire Core Strategy does not appear to be adequately justified in the documentation published to support the Focussed Changes ( see comments on PC51) In our view if there remains a shortfall after the consideration of other sites at Trowbridge which would be considered consistent with the settlement strategy, then sites elsewhere in the HMA can be brought forward to ensure housing is delivered. Whilst there is no shortfall in the Melksham or Calne Community Area, (as evidenced in the respective Topic Papers even without taking into account windfalls) these market towns are both well placed to accommodate development that cannot be met in other areas in the HMA ( if there are no sites consistent with the settlement strategy in Trowbridge where there is a significant shortfall of 1,297 {Table 5.8 of Topic Paper 4 July 2018}). It is recognised that the SADPD must implement the settlement strategy set out in the adopted Wiltshire Core Strategy.</p>

<b>Identify Proposed Change Reference Number</b>	PC3				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>As the Plan has already been submitted for Examination (on the basis of NPPF 2012) it is noted that for the purposes of Plan-making the housing land supply should be calculated in accordance with the NPPF 2012 (as recognized in paragraph 3.1 3.2 of Topic Paper 3 Housing Land Supply Addendum July 2018) according to paragraph 214 of NPPF 2018. However, for the purposes of development management (ie the consideration of planning applications) the new NPPF 2018 applies for the calculation of the housing land supply. Therefore as soon as the Plan is adopted the housing land supply will be different to that considered through the local plan examination. It is noted that Topic Paper 3 sets out the before position ie it excludes the proposed allocations. The position once allocations are taken into account is included in Topic Paper 4 Table 5.8 It is evident that since the Pre-Submission Draft of the Plan was published that at three Principal Settlements (of Chippenham, Trowbridge and Salisbury), delays have resulted in an increase in the indicative residual requirement. Chippenham and Trowbridge are located in the North and West Wiltshire HMA. Topic Paper 3 acknowledges that whilst there have been a number of large permissions granted in the 2017 monitoring year which will have assisted housing supply, the further delays in delivery on strategic allocations in the Wiltshire Core Strategy and the Chippenham Site Allocations Plan have counter-acted this. There is on the basis of the Councils current housing supply position an indicative remaining housing requirement of 1,109 dwellings (excluding proposed allocations) (Table 4.1). The Housing Land Supply for the North and West Wiltshire HMA excluding the Plans Proposed Allocations is 5.9yrs in 2017/2018 excluding any buffer (Table 3.3 Topic Paper 3). Once a 5% buffer is included this equates to a 5.6 year land supply. Table 3.4 demonstrates that without the proposed allocations the five year land supply position will decline below five years in the latter part of the plan period. The Housing Land Supply position including the Plans Proposed Allocations is set out in Topic paper 4 Table 5.6 which identifies a 6.21 year land supply at 2017. If sites are not coming forward as anticipated in the principal settlements in the North and West Wiltshire HMA, then together with the remaining indicative housing requirement there is a need for further allocations to be made to ensure a healthy land supply is achieved. In order to address the housing supply the Plan has increased the densities at the proposed allocations in Trowbridge as set out in Table 4.5 (PC13 of the Proposed Changes), so that the scale of housing proposed more than meets the requirements of the HMA for the plan period. It is noted that according to Table 5.4 of Topic Paper 4 Addendum July 2018 that there is now a surplus of 144 dwellings over the plan period excluding windfalls.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Enclosed with this submission is a document titled, Proposed Settlement Boundary Alteration . Plan 2 shows change to the settlement boundary that is requested at Hilperton. It is incumbent upon the Housing Site Allocations Plan, to make it sound, that new development is facilitated in sustainable locations to help bring forward the housing requirement as set out in Core Policy 2. The alteration of the settlement boundary for Hilperton to include both the land at the Grange, and the land immediately to the east with planning permission for 15 dwellings, will ensure that the principle of residential development on the land is acceptable. It is absolutely fundamental that the Housing Site Allocations Plan assists the Governments Objective, as set out in the National Planning Policy Framework to boost significantly the supply of housing . Core Policy 2 of the Wiltshire Core Strategy requires that a minimum of 42,000 dwellings is provided for within the period 2006 and 2026. Furthermore, when the Core Strategy was adopted in 2015 a key element of the housing delivery strategy was the provision of a significant amount of the minimum 42,000 through the Housing Site Allocations Plan. It is clear that new housing should be located in sustainable locations. In this respect it is highly material to note that as part of the preparation for the Core Strategy the Council undertook a Strategic Housing Land Availability Assessment (SHLAA). The land at The Grange (as shown on the enclosed Location Plan) is identified as Site Reference 291 in the SHLAA where under the detailed assessments of the SHLAA analysis, Potential Suitability Constraints show no prohibitive factors and under Suitability the assessment is suitable. The land at The Grange (as identified on the enclosed Site Location Plan) is also the subject of a current full planning application for 20 dwellings (Ref: 18/00985/FUL). This will be approved shortly following the completion of a S106 Agreement. Following my original Representation in September 2017 this is a significant material change that verifies the substance of my case about the suitability of the land for residential development, and its obvious inclusion within the Settlement Boundary Hilperton. A further highly material fact is that the land immediately to the east of my clients land received outline planning permission on Appeal in December 2014 (Ref: 13/06879/OUT) for the erection of 15 dwellings, and recently reserved matters has been granted to facilitate the erection of these dwellings. Taking account of the above factors there is now no logical reason why the Council should not alter the Settlement Boundary for Hilperton as requested by this Representation.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Removing the Crudwell allocation is the right thing to do because: there is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the parish is good; individual housing developments in Crudwell should be limited to small sites with a small number of houses (10 of so) which would be appropriate to the character of the village and to its local needs; the Crudwell Neighbourhood Plan is progressing extremely well (Reg14 Consultation is planned for November 2018 and Reg16 planned for early Spring), and will allocate land to meet identified needs; the Parish should determine its own future as is consistent with Wiltshire Councils and the Governments Localism agenda.

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>			<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation Assessment Addendum (September 2018).</b>		
<b>Please state which evidence document this representation relates to:</b>	Wiltshire Housing Site Allocations Plan Community Area Topic Paper Westbury (July 2018 Submission version) (CATP/19)				
<b>Please give details of why you support or do not support the updates to the</b>	The re-introduction of Site 738 has highlighted an unfair assessment of the two sites (Site 321 and Site 738) using the sustainability criteria, with a bias in favour of Site 321. The Plan is therefore unsound.				

<p><b>associated evidence documents.</b></p>	<p>WHSAP Sustainability Appraisal Report Pages 254 and 255</p> <p>7.13.7 and 7.13.14 – no major adverse effects have been identified for either site.</p> <p>7.13.9 and 7.13.15 – one identical moderate adverse effect has been found for both sites (water pressure problems/ necessity for a foul flow capacity assessment).</p> <p>A further moderate adverse effect is identified for Site 738 but not for Site 321 ('overall, residents are likely to rely upon use of the private car to reach larger facilities and services'), yet this applies to both sites. However, this appears as a minor adverse effect for Site 321.</p> <p>Paragraph 7.13.15 notes that a crossing may be required for Site 738 residents to access the village safely, yet fails to take account that two village access routes from Site 321 are also unsafe due to dangerous road crossings (at the top and bottom of Court Lane).</p> <p>7.13.10 and 7.13.16 Minor adverse effects identified for both sites are identical. These include: recreational pressure on Salisbury Plain SPA / Loss of greenfield land / Air quality and greenhouse gas emissions / Flood risk / heritage considerations / Alteration of character and appearance of village / Secondary school capacity</p> <p>The only difference is that the fact that residents are likely to use their cars for reaching larger facilities and services appears in 'moderate adverse effects' for Site 738.</p> <p>Paragraphs 7.13.11 identifies that Site 321 will have a major beneficial effect by contributing to the local economy through use of local shops and services (this is because the proposal is for 35 houses rather than 22 for Site 738). Paragraph 7.13.17 identifies this as only a minor beneficial effect for Site 738 (because fewer houses means fewer people using facilities). However, local residents and the Parish Council feel that the proposed number of houses for site 321 is beyond the needs of the village and will result in traffic congestion and a high degree of out-commuting.</p> <p>Paragraph 7.3.11 identifies a moderate benefit for Site 321 in boosting the supply of housing for the village. This is seen as a minor benefit for Site 738 in Paragraph 7.3.17. However, it may be that Site 738 better meets the identified needs of the village in providing fewer homes.</p> <p>Paragraph 7.3.11 Identifies Site 321 as bringing a minor benefit by supporting the vitality of nearby employment areas. This is assessed identically for Site 738. However, the number of people residing in Site 321 is disproportionately large compared to the number of employment opportunities within the village, and would result in traffic congestion and a high degree of out-commuting.</p> <p>The reason for the eventual dismissal of Site 738 as being less suitable than Site 321: 'The overall sustainability benefits would be marginal due to a lack of certainty that comprehensive and attractive routes for pedestrians and cyclists are deliverable' is spurious, as it applies equally to both sites.</p>

<b>Please state which evidence document this representation relates to:</b>	Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1)(c) (July 2018 Submission version) (WHSAP/09)				

**Please give details of why you support or do not support the updates to the associated evidence documents.**

**The council has not adequately addressed the issues raised about the development of Site 321 as a result of the September 2017 consultation. Therefore the Plan is unsound. A summary of representations and the council's response can be found on pages 169/170 of the WHSAP – Consultation Statement Regulations 22 (1) (c) - Appendices M-P and also in WHSAP Sustainability Report July 2015**

**Issues 1,2 3, 4 5 and 6 and 20**– The need and justification for development within Bratton; the quanta of homes to be developed /proposed density; the site area of the allocation; the suitability of the site compared to alternative sites/brownfield sites; the potential for alternatives to be sought through a Neighbourhood Plan; concern over lack of local employment opportunities.

**Council's response** – 'The Plan has been developed in accordance with the WCS, and its approach to allocating at large villages is in conformity with the WCS's plan led approach to delivery of housing' (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170)

'In order to provide surety of housing land supply in the North and West HMA land is required to be allocated at some large villages. The Westbury Community Area remainder was considered an area of search as there is an indicative residual requirement for the area, and the most suitable site has been identified as the allocation site' housing' (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170)

'There is not a well-progressed Neighbourhood Plan in the village and the Council is unable to rely on a Neighbourhood Plan to deliver allocation' (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170) and 'It is too early to say whether the Parish Council will bring forward allocations of land for housing to meet their identified needs' (WHSAP – Sustainability Report July 2015 page 63)

'The density of the site at 40 dwellings is considered to be reasonable given the constraints of the site. However, the promoters of the site have carried out further detailed assessment and potential layouts which show that 35 dwellings may be more readily accommodated (Sept 2018 amendment). (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170)

**My Comments:** The Plan contravenes the WCS as it seeks to fulfil the quota for the Westbury Area Remainder rather than the needs of the village. (See WCS Paragraph 4.15 – fewer than 10 dwellings to be supported within a Large village) and page 11 of EXAM 02A (Housing should be in close proximity to employment sites). See also Paragraph 3.18 page 16 of 'Wiltshire 2026 – Planning for Wiltshire's Future' – Policy C settlements – Small towns and Villages (Third Tier) - 'Settlements in the third tier are described in RSS Policy C as Small Towns and Villages. Development at these settlements will only be appropriate where it supports their self-containment together with the rural communities they serve'.

The reduction in the proposed number of houses from 40 to 35 is still totally unacceptable and in contravention of the statements contained within the WCS.

Site 321 is not the most suitable site as there are problems with safe access into the village for pedestrians and cyclists, employment opportunities, destruction of landscape character, density of housing, parking and access, over-capacity of local doctor's surgery, impact on views from the White Horse chalk escarpment and impact on biodiversity in a sensitive area (there were over 200 representations to this effect from the local community).

The Parish Council has put forward an alternative site within the village that would address the needs of the village and is currently working on its Neighbourhood Plan. This does not to be fully developed at this stage as sufficient land has been identified to meet the village's requirements. It is blatantly incorrect to state that 'It is too early to say whether the Parish Council will bring forward allocations of land for housing to meet their

identified needs' (WHSAP – Sustainability Report July 2015 page 63). WHSAP Topic Paper 2 (June 2107) states on page 17 (paragraph 4.16): 'It is a priority of the Council for local communities to take direct control of their settlements, as it is national policy' and (Paragraph 4.17 – 'Preparing a Neighbourhood Plan addresses the housing needs of a settlement in accordance with Core Policy 1 of the WCS. It is unnecessary for the Plan to supplement local consideration.'

The development of Site 321 is outside the needs of the village. The village should not be made a scapegoat to help meet government targets.

**Issue 7 – Inaccuracies in the data used in the assessment**

**Council's response** – None. The inaccuracies highlighted in the representations (the number of houses in the village and the percentage proportion of the proposed new dwellings) have not been corrected in subsequent documents. In fact they are reiterated. Page 31 of the Wiltshire Council Topic Paper 3 – May 2018- states that: 'Over the WCS Plan to date, Bratton has received very little additional growth...The addition of approximately 40 dwellings would represent modest growth'.

Here is the wording from one of my September 2017 representations, which still applies to the amended Plan:

Appendix E incorrectly states that Bratton has 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Table E1 in Appendix 1 highlights that the village has experienced growth of 26 houses, or 3.2%, in the last 10 years. This figure should actually be 5.1%.

The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. This is a significant growth for a village of Bratton's size, increasing strain on services such as the B3098, existing water pressure issues and the local GP surgery.

The statement on page 56 of the WHSAP ('..the addition of 40 houses would represent modest growth') is misleading and incorrect.

**Issues 8, 13 and 14** – Impacts on biodiversity (including Salisbury Plain SPA, local SSSIs, wildlife species); Potential for harmful impacts on heritage assets (including Bratton Conservation Area, local archaeology and historic landscape); and Disagreement over potential landscape impact and ability to mitigate impacts, including from higher ground and the White Horse / Bratton Camp.

**Council's Response** – 'Evidence suggests that the site is developable from a landscape perspective, and that potential impacts on biodiversity can be mitigated within the site' (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170).

**My Comment:** No amount of tree planting will lessen the impact of a densely developed housing estate on the edge of a unique village when viewed from the White Horse escarpment Ridge and Castle Road. One of the unique features of an escarpment landscape and village is the lack of trees and the wide open views, yet the mitigation plans state: 'A new visual boundary to the settlement will need to be established along the site's western edge and new woodland planting will be a substantial part of the scheme.' This shows a lack of understanding of the character of the local landscape, and a determination to change it for the worse.

**Issue 9** – The need to preserve the site for agriculture.

**Council's Response** – As Site 321 is valuable agricultural land and currently in use for grazing beef cattle, the council's response was initially to increase their assessment of the land's capacity for 30 dwellings to 40 to 'make the most efficient use of land and maximise the delivery of affordable housing'. This number has now been reduced to 35 in the new proposals.

**My Comment:** The amendment to 35 houses is still too high for the needs of the village. To decrease this number would not be efficient use of prime agricultural land, therefore Site 321 is not the most suitable site for the area.

**Issues 10 and 12** – Land stability and Effects of development on surface water flow and flooding.

**Council's Response** – 'Amend supporting text to give greater emphasis to flood and drainage requirements' (WHSAP – Consultation Statement Regulation 22) and 'Incorporate surface water attenuation measures into the design of any subsequent layout' (WHSAP – Sustainability Report July 2015).

**My comment:** This appears to be the only positive amendment (out of two amendments) proposed by the Council and is much needed due to recent flooding in Rosenheim Rise (lower end of Site 321) after heavy rainfall.

**Issues 11 and 15** – Impacts on air quality/noise pollution; concern about impacts on amenity of adjoining residents.

**Council's response** – 'Evidence suggests that air and noise pollution arising would not be a barrier to development of the site, and that access is achievable from Westbury Road'. (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170)

'Potential impacts on amenity of existing residents cannot be determined at this stage'. (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170)

**My Comment:** It is inconceivable that building 35 houses will not give rise to air and noise pollution. My house is adjacent to Site 321 and I will not be looking forward to sitting out in my garden during the summer months should the development go ahead. I assume that the access referred to here is for service vehicles to and from the site. How will you assure that these vehicles will not use Court Lane for access?

Potential impacts on amenity of existing residents are easy to determine. There will be increased noise, traffic and light pollution for local residents and significant loss of views for others. Two windows of my house currently overlook miles of uninterrupted countryside. As any houses built will need to be in line with the current dwellings, the brick wall of a new house will replace my view. Residents of Rosenheim Rise risk losing light completely from their properties as new houses built on Site 321 will be significantly higher in elevation.

**Issue 16** – The need to preserve existing public rights of way that adjoin the site.

**Council's response** – 'The Plan requires that improved connections to adjoining rights of way BRAT24 and BRAT25 should be facilitated through any subsequent proposals' (WHSAP – Consultation Statement Regulations 22 (1) (c) page 170)

'Appropriate improvements to Public Rights of Way – BRAT25 and BRAT24 could be enabled through development of this site, thereby improving connectivity and reducing the need to access village facilities via private car journeys' (WHSAP – Sustainability Report July 2015 page 61).

**My Comment:** The existing footpaths should not be diverted to facilitate the proposed development. They are recorded on maps dating back to 1887 (and possibly earlier) and provide a potential buffer between current dwellings and proposed new buildings.

Even if improvements are made to existing footpaths (for example by providing a tarmac surface), pedestrian access into the village from Site 321 is hazardous and unsafe from both the upper and lower egress points (see my previous comments regarding the two crossing points at Court Lane and footpath travel on the footpath running from Site 321 to the junction with Court Lane).

**Issue 17 and 18** – Impact of development on capacity of local services and infrastructure (including schools, healthcare); request to include additional wording requiring education contributions

**Council's response** – 'Evidence indicates that there are sufficient local services available to support development' (WHSAP – Consultation Statement Regulation 22 page 170)

With regard to the secondary and sixth form school in Westbury, 'the development of the site could increase pressure on secondary school places' (WHSAP – Sustainability Report July 2015 page 62).

Development could help to address local infrastructure capacity issues over and above CIL ((WHSAP – Sustainability Report July 2015 page 63).

**My comment:** Many of the representations from the September 2017 consultation make reference to the over-capacity of the village Doctor's surgery. This appears to have been overlooked by the Council.

It has been acknowledged that the proposed development could put pressure on the secondary school in Westbury. The phrase 'Development could help to address local infrastructure capacity issues over and above CIL' is vague and uncommittal and places no obligations on the developer to assist financially.

**Issue 19** – Concern over highways, access and parking.

**Council's response** – 'Vehicular and pedestrian access would appear to be achievable from B3098' (WHSAP – Sustainability Report July 2015 page 61).

'An extension of the footway across the site frontage would be a desirable addition. Pedestrian access along the B3098 could be achieved, and there is an opportunity to link with the adjoining Public Rights of Way network (BRAT25 and BRAT 24) (WHSAP – Sustainability Report July 2015 page 61).

**My comment:** No mention is made of the congestion difficulties presented to the village by the potential increased volume of cars (at least 2 cars per household - 70 cars plus - if current car ownership within Bratton can be an indicator). The B3098 is a narrow road on the approach to site 321 from the Westbury direction, adjacent to Site 321 itself, and as far as the junction with Court Lane. Traffic along this section is a hazard to pedestrians and cyclists attempting to access the village from Site 321. Two coaches recently became jammed directly adjacent to site 321, causing a build-up of traffic. Cars frequently park on pavements between Site 321 and the junction with Court Lane, forcing pedestrians and

	<p>pushchair users out into the road. Wide vehicles sometimes mount the pavement to pass each other, and it is often impossible for large vehicles to turn left into Court Lane without mounting the pavement (and thus endangering pedestrians).</p> <p>If insufficient parking spaces are allocated within the site itself (including for visitors and service vehicles), drivers will attempt to park on the main road, thus presenting hazards to both other road users and pedestrians. There appear to be no assurances at this stage that sufficient spaces will be allocated.</p> <p>It is likely that a number of residents will travel to work in the Trowbridge / Bradford on Avon / Bath / Melksham direction, rather than Westbury, which means that they will be using Court Lane to exit the village. This steep, narrow and winding lane is extremely hazardous to both cars and pedestrians and is permanently reduced to single lane flow due to the amount of cars parked outside houses with no garages or driveways. The increase in traffic will be dangerous for pedestrians and cyclists making their way from Site 321 to access village amenities such as the school and shop.</p> <p>The Council have correctly observed that ‘an extension of the footway across the site frontage would be a desirable addition.’ Unfortunately, this is not achievable for the linking footpath that provides access from the Public Footpath at Site 321 into the village, which remains narrow at just 1.22m wide compared to 2-metre width near the Manor Fields development.</p>

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>					Sustainability Appraisal September 2018 - Main Report (EXAM/02A)
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>					The proposed reduction in the number of houses from 40 to 35 is unsound as it is still too large a development for the size of the village. In the Wiltshire and Swindon Structure Plan 2016, paragraph DP3 (page 31) states (in capital letters):  LOCAL DEVELOPMENT DOCUMENTS SHOULD...  IDENTIFY SMALL TOWNS AND VILLAGES TO MEET LOCAL NEEDS ONLY

<b>Assessment Addendum (September 2018).</b>	<p>DEVELOPMENT SHOULD BE LIMITED IN SCALE AND WELL INTEGRATED WITH THE EXISTING FORM OF THE SETTLEMENT.</p> <p>EXAM/02A Appendix B states: 'Inappropriate development in a Green Belt should not be approved except in very exceptional circumstances and new buildings in the Green Belt will not generally be approved.'</p> <p>i) The number proposed is beyond the needs of the village (which identified the need for 8 houses only) and serves only to fulfil the needs of the Westbury Remainder quota</p> <p>ii) It shows a complete disregard for the representations made by Bratton residents and Parish Council during the consultation period of September 2017.</p> <p>iii) The Parish Council has infill land that can meet the needs of the village and beyond. It is also actively seeking new alternatives.</p> <p>iv) The Parish Council rejected the plans for Site 321 in September 2017 yet this is not reflected in the most recent Westbury Area Topic Paper.</p> <p>v) The Parish Council is currently working on a Neighbourhood Plan for the village yet this has been dismissed in the Sustainability Appraisal report (p.63) as 'being in the early stages'. Document EXAM /02A p.86 states: 'Emerging Neighbourhood Plans should be considered when planning new developments in Wiltshire towns and villages.'</p> <p>vi) The building of 35 houses exceeds the number recommended for Large Villages within the Wiltshire Core Strategy. Paragraph 4.15 states: 'At the settlements identified as villages, a limited level of development will be supported...At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries.' Small housing sites are identified as 'sites involving fewer than 10 dwellings.'</p> <p>vii) The density of the proposed dwellings would necessitate multi-storey buildings (especially if space is to be made for green/amenity sites and sufficient parking places within the development). This would be out of character with the predominant housing style of the village.</p> <p>viii) Any multi-storey buildings would impact critically on the long-range views across open countryside currently enjoyed by many residents of the village.</p> <p>ix) A large estate development at the gateway to the village would be completely out of character and change the nature of the village. A high-density development does not suit a village with a largely low-density housing stock.</p>

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>	Sustainability Appraisal September 2018 - Main Report (EXAM/02A)				
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	The existing infrastructure of the village does not provide safe access into the village for cyclists and pedestrians travelling from Site 321, thus contravening the Transport element of the Sustainability Appraisal Objectives (page 345 of WHSAP: Sustainability Appraisal Report –‘Policies should enable the provision of effective walking and cycling connections’ and EXAM /02a page 89 – ‘Locate new development where it is accessible to all on foot, by bicycle or through using public transport’ and ‘Ensure new development incorporates appropriate facilities and infrastructure for cyclists’.). In the Wiltshire and Swindon Structure Plan 2016, paragraph DP2 (page 30) states (in capital letters):				

**Assessment Addendum  
(September 2018).**

DEVELOPMENT SHOULD NOT PROCEED UNLESS THE INFRASTRUCTURE, SERVICES AND AMENITIES MADE NECESSARY BY THE DEVELOPMENT CAN BE PROVIDED AT THE APPROPRIATE TIME.

Document EXAM /02A (page 70 – Sustainability Themes) Paragraph 3.2.1 states: ‘Ensure that development is supported by the necessary infrastructure’.

Pedestrian access into the village via the B3098

i) Both the road and footpath are narrow between Site 321 and the junction at the top of Court Lane. The footpath is 1.2 metres wide at its widest point (compared to 2 metres width at Manor Fields). This represents a traffic hazard if young families make their way to and from the local school or other amenities, especially if children are tempted to overtake other pedestrians or pushchairs, as they will be forced to walk into the road). Traffic passes very close to pedestrians, as the road is narrow. When buses or lorries pass each other, they sometimes mount the pavement. When cars park on the main road, they park on the pavement, as to park on the road would be hazardous to overtaking traffic due to poor line of sight. This forces pedestrians (especially those with pushchairs) into the road. As I walked my children along this path to school for several years, I am only too aware of how dangerous it is. The Bratton Village Appraisal report of 1999 (page 11) records a number of requests for improvement to the pavement along this stretch of road. I recently witnessed two buses trying to pass each other on the road directly adjacent to Site 321. The road was blocked for about an hour, with subsequent build-up of traffic, as the two buses tried to extricate themselves. This road is too narrow for safe passage of cyclists and pedestrians from Site 321.

ii) The wide junction at the top of Court Lane where it meets with the B3098 has also been identified in the Bratton Village Appraisal report as a dangerous crossing place for pedestrians, yet this forms part of the route for pedestrians into the village from Site 321 (this would be exacerbated with the increased traffic flow from the proposed new development). The junction is a crossroads, with cars coming at speed from several directions, often unseen until the last minute. Large vehicles turning left from the B3098 into Court Lane often mount the pavement, putting waiting pedestrians at risk (the road sign on the corner of this road has been damaged several times).

iii) To access the village via the footpath link adjacent to Rosenheim Rise to the lower end of Court Lane also involves a dangerous road crossing (across Court lane and into Bury Lane), yet this forms part of the route for pedestrians into the village from Site 321 (this would be exacerbated with the increased traffic flow into Court Lane from the proposed new development). Traffic comes at speed down the steep hill of Court Lane, with little visibility for pedestrians and no pavement to act as a buffer. I used this crossing when my children were small and I was a resident of Rosenheim Rise. It was not an easy task to prevent a young child running out blindly onto this road. An increasing number of cars parked along this road have reduced the visibility even further for pedestrians. In the Bratton Village Appraisal report of 1999, it was suggested that a barrier could be erected at this footpath /road junction. However, a barrier would also prevent easy access for pushchairs /wheelchairs. Additionally, this path is very narrow and difficult for wheelchair /pushchair users. It is often choked with mud and debris during the winter months, which washes down from the steep bank on one side.

Cycling access into the village via the B3098

The narrow and busy B3098 (especially between Site 321 and the junction of Castle Road) is not a pleasant road to cycle along and would be totally unsuitable for Junior School age children and families accessing the village by bicycle. It cannot hope to form part of the Sustainability Objectives (the provision of effective walking and cycling connections) in connection with the proposed housing development on Site 321.

	<p>Cyclists returning from the village and turning right into Site 321 would be vulnerable to oncoming traffic and traffic approaching at speed from behind if positioned in the centre of the road for turning.</p> <p>EXAM/02A Appendix B (page 345) states: ‘Policies should enable the provision of effective walking and cycling connections.’</p> <p>EXAM /02A Appendix B (page 346) states: ‘Ensure that development is supported by the necessary infrastructure.’</p> <p>The danger inherent for pedestrians and cyclists accessing village facilities from Site 321 contravenes Strategy DPD SA Objective 11 (EXAM/02A page 93) – ‘Provide a safe and healthy environment in which to live.’ This is particularly pertinent should some of the housing stock be provided for young families with children or the elderly (see page 260 of EXAM/02A Paragraph 8.36 – ‘The policy could be strengthened by requiring that some of the new housing meets the specific needs of vulnerable and older people.’)</p>

<b>Please state which evidence document this representation relates to:</b>	Wiltshire Housing Site Allocations Plan Community Area Topic Paper Westbury (July 2018 Submission version) (CATP/19)				
<b>Please give details of why you support or do not support the updates to the</b>	The reason for the dismissal of Site 738 (Land south of Westbury Road) applies equally to Site 321 (Court Orchard /Cassways). The decision to reject one site but keep the other is not sound.				

<p><b>associated evidence documents.</b></p>	<p>The reason for the dismissal of Site 738 (Land south of Westbury Road): ‘The overall sustainability benefits would be marginal due to a lack of certainty that comprehensive and attractive routes for pedestrians and cyclists are deliverable’ applies equally to Site 321. The reasons this is the case for BOTH sites are as follows.</p> <p>The WHSAP states: ‘The B3098 Westbury Road does not appear to be a particularly busy road and the landscape at the western edge has an exposed and remote feel. Overall the site and immediate landscape context is peaceful.’</p> <p>The B3098 is a busy road and this description of it is inaccurate. Increased traffic now flows into Bratton as the village is used as an alternative route to the Yarnbrook roundabout, which is often heavily congested. Residents living along the B3098 often have to wait some considerable time before pulling out of their driveways to exit their properties at peak times, and doing so is often a risky and dangerous manoeuvre due to lack of visibility along this stretch of road, with no pavement to act as a ‘buffer’. The additional traffic associated with the building of 35 new homes (potentially at least 70 more cars) would add considerably to the congestion and would have a major adverse impact on road safety. The stretch of road between Bratton and Westbury has a higher than average number of crashes than most areas of the country.</p> <p>For cyclists: Whether turning right out of Site 738 to access the village or right into Site 321 upon returning from the village, a busy and dangerous road has to be negotiated. This narrow stretch of road is unsuitable for children of Junior School age to cycle to the village school.</p> <p>For walkers: A disadvantage of Site 738 is that a busy road (the B3098) must be crossed to reach a footpath. But for residents of housing on Site 321 accessing the village via the footpath link from Rosenheim Rise to Court Lane, an equally dangerous crossing must be made (across Court Lane to Bury Lane). There is limited visibility for traffic emerging at speed down a steep hill and no footpath to act as a barrier. The crossing at the top junction of Court lane on the B3098 (which is a crossroads) is equally hazardous, yet this forms an access route into the village from both sites 738 and 321.</p>

<b>Please state which evidence document this representation relates to:</b>	Wiltshire Housing Site Allocations Plan Community Area Topic Paper Westbury (July 2018 Submission version) (CATP/19)				
<b>Please give details of why you support or do not support the updates to the</b>	Dismissal of Site 738 without fair public consultation is unsound.				

<p><b>associated evidence documents.</b></p>	<p>Subsequent to the consultation process in September 2017 on Site 321 (Court Orchard / Cassways), a further site (Site 738 – Land south of Westbury Road –dismissed at an earlier stage in the assessment process) was reinstated as a viable alternative (EXAM /02A page 16). Local interested residents, the Parish Council and local councilor Jerry Wickam were not made aware of the reinstatement and the site was dismissed by the selection process without due public consideration. Site 738 should be reinstated as a consideration. The sustainability assessment scores for the two sites were remarkably similar (as the sites are opposite each other), yet 738 seems to have been engineered out (The criteria for dismissal – ‘The overall sustainability benefits would be marginal due to a lack of certainty that comprehensive and attractive routes for pedestrians and cyclists are deliverable’ – applies equally to both sites). Site 738 received no major adverse scores on the sustainability assessment and should not have been eliminated.</p> <p>In the WHSAP Sustainability Report (July 2015), page 67, Table G5 states: ‘Taking account of likely mitigation measures, the combined pool of both site options in this area would deliver substantially more than the indicative 47 dwellings required over the remainder of the plan period and would not represent the modest growth envisaged by the WSC in Core Policy 1. It is therefore necessary to reject one site option at this stage of the assessment process in order to ensure the timely delivery of sustainable growth.’</p> <p>In fact, Site 738 more readily meets the needs of the village as identified by a village housing needs survey. The September 2017 consultation process has highlighted the village’s concern about the proposed number of houses to be built on Site 321. Site 738 would be less obtrusive as an edge-of-village development than a large development on Site 321, and would be screened to a greater degree by other buildings already in existence.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC 13 Table 4.5 PC 51 Policy H2 Table 5.3 PC 60 - Policy H2, Table 5.3; Paragraph 5.52 PC 64 para 5.58 Comment No justification is given for increasing the number of housing units on these sites. Are the numbers just being plucked out of the air? Surely these figures to be backed up by careful research? Whereas high density may be acceptable and expected in the centre of a town, surely lower densities should be employed with most developments in rural areas? A factor which I do not believe is readily understood is that, with higher densities, there is less space for gardens and less space in those gardens for wildlife sustainability; and fences prevent hedgehogs, for example, penetrating into these areas. Neither is there space for reasonably sized trees to provide nesting spaces for birds. Also, large numbers of houses on one site are not appropriate for rural areas unless one is designing a new settlement. Established villages need to absorb expansion in small bites, so as not to upset the general life of the village. Considerations such as this do not seem to feature in WHSAP, presumably because of the need to provide numbers.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC 13 Table 4.5 PC 51 Policy H2 Table 5.3 PC 60 - Policy H2, Table 5.3; Paragraph 5.52 PC 64 para 5.58 Comment No justification is given for increasing the number of housing units on these sites. Are the numbers just being plucked out of the air? Surely these figures to be backed up by careful research? Whereas high density may be acceptable and expected in the centre of a town, surely lower densities should be employed with most developments in rural areas? A factor which I do not believe is readily understood is that, with higher densities, there is less space for gardens and less space in those gardens for wildlife sustainability; and fences prevent hedgehogs, for example, penetrating into these areas. Neither is there space for reasonably sized trees to provide nesting spaces for birds. Also, large numbers of houses on one site are not appropriate for rural areas unless one is designing a new settlement. Established villages need to absorb expansion in small bites, so as not to upset the general life of the village. Considerations such as this do not seem to feature in WHSAP, presumably because of the need to provide numbers.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC 70 Para 5.73 Comment The only justification to increase the number of houses on site H 2.5 from 20 to 45 is to maximise efficient use of land and in response to consultation . Either the original appraisal work done on this site was not fit for purpose, in which case all the other sites in HSAP need querying, or the current increase is one of expediency rather than careful consideration which this site merits. There should be a demonstration of the effect that the increase in housing units will have on all the aspects of the site, rather than just counting houses. The Council may have to provide sufficient housing for its residents but this does not justify a slapdash approach to planning. We need to leave a legacy that our children and grandchildren will be happy to call home. I find it odd that numbers have been increased in response to comments. If all the comments received on this site were considered a case could be made not to have any development on this site.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC 74 New Paragraph under 5.87 Highways England has raised that there may be cumulative impacts on the A36 arising from proposed housing allocations at Warminster and this requires consideration. Comment The only similar comment from the Highways section of Wiltshire Council that I have noticed relates to Salisbury - Transport: development inevitably has impacts on the local transport network. Does this mean that that section was not consulted on other areas or are they not concerned about traffic conditions in Trowbridge, for example? Congestion is already present in central Trowbridge and new housing can only exacerbate the problem. Surely development in and around Trowbridge needs to be delayed until serious consideration is given to capacity improvement, or is it time to identify sites for Park and Ride parking and control of private parking? It is rather side-stepping responsibility to suggest that development in Warminster on sites that Wiltshire Council planners have identified should consider the effect of each separate development on congestion. It is the cumulative effect of WHSAP that Highways England is concerned about. The appropriate Transportation Plan should cover this point or is it too embarrassing to admit that congestion will get worse and Wiltshire Council can do nothing about it? It rather puts a hole in the sustainability justification.

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>	Sustainability Appraisal September 2018 - Main Report (EXAM/02A)				
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<b>Response to</b> <b>“Wiltshire Council: Wiltshire Housing Site Allocations Plan: Sustainability Appraisal Report”</b> <b>Policy H2</b>				

<p><b>Assessment Addendum (September 2018).</b></p>	<p>Having been a traffic engineer for 40 years I find it somewhat disturbing that this policy discussion states:-</p> <p>“Minor negative effects are identified in relation to air quality and the policy identifies general mitigation to this effect, though some of the wording could be strengthened. Ultimately, though the allocation of a number of sites will result in an increase in the number of private car journeys (SA Obj. 4).”</p> <p>This omits to mention that there will be some locations where there will be serious reductions in air quality due to increases in congestion. Congestion does not increase linearly with traffic increase. It is far more complicated than that. When congestion is already present then any increase in traffic results in extended queues and extended periods of queuing. Living in North Bradley as I do, I have direct experience of the conditions in Bradley Road Trowbridge at various times of the day. Whilst the A350 West Ashton Relief Road will help at Yarnbrook, the extra homes suggested for the south side of Trowbridge will exacerbate the situation and walking along Bradley Road will not be good for my health or the runners who seem to use it as part of a circuit.</p> <p>Southwick Road in North Bradley is due to receive a very large increase in traffic due to the Ashton Park development. It is already unpleasant to walk along the road at peak periods. This will be extended over the working day. Building the Ashton park development will bring a lot of aggregate trucks through North Bradley bringing more diesel fumes.</p> <p>These are not minor problems. Research is showing that traffic fumes have more serious adverse effects on health than previously thought. We should not be building houses fronting on to trafficked roads. These problem areas need to be acknowledged. When they are, then there is more chance of some remedial action. Brushing them under the carpet is not helpful or professional.</p>

We have reviewed the proposed changes to the Wiltshire Housing Site Allocations Plan. None of the changes proposed lead us to advise the plan is unsound. However, we await the Habitats Regulation Assessment for this Plan, and until such time as we are satisfied that the Plan will not have an adverse effect on the integrity of any relevant designated sites, we cannot advise that the Plan is sound in HRA terms.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I'm not in favour of the Council's housing plan. I would like to register my objection to the decision as when planning permission was given for Elizabeth Way it was on the basis that it would be a relief road for Hilperton and that no houses were going to be built along the road. Also building houses would mean exits onto Elizabeth Way which means that it won't be a relief road anymore. It would be appreciated if you would register my objection to the relevant parties please including the planning inspector.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Land ownership: Following the acquisition of a strip of land to the north of Southview Farm from Wain Homes, the extent of the overall proposed allocation site area has now increased from 17.78ha to 17.85ha (refer to Location Plan Ref: 1178.E.001 Rev D as shown at Appendix A).  Proposed allocation: the proposed allocation of Elm Grove under Policy H2.1 is supported in principle. This follows a collaborative approach that has been undertaken between the site owners and Wiltshire Council following the initial promotion of the site in 2015. Pre-application enquiry: an updated masterplan has been formulated which demonstrates that the proposed allocation site can deliver c.254 homes and a 2FE primary school and associated infrastructure (refer to Masterplan Ref: 1178.P.001 Rev G as shown at Appendix B and proposed Accommodation Schedule at Appendix C). This masterplan will be the subject of a further pre-application submission that will be submitted to the Councils Development Management team in November 2018. Deliverability: Subject to the grant of outline planning permission in 2019, and subsequent approval of reserved matters, the infrastructure and housing (including affordable housing) elements of the proposed allocation will be capable of being fully delivered by the end of 2023. Wiltshire Council take on the responsibility of deliver the new primary school. Statement of Common Ground: Coulston Estates are committed to continue to work proactively with the Council to ensure the delivery of this site, and are willing to participate in the preparaton of a Statement of Common Ground in advance of the forthcoming Examination.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Proposed allocation: the proposed allocation of land at Court Orchard / Cassways under Policy H2 is supported in principle. This follows a collaborative approach that has been undertaken between the site owners and Wiltshire Council following the initial promotion of the site in 2015. Land ownership: the subject site is in the freehold ownership of Mr and Mrs Miller (acquired in 1975). We can confirm on behalf of the landowner that the subject site is available for residential development and that they will cooperate with the Council in respect of the site promotion in consultation with the local community. PC94: the revision to the quantum of development of approximately 35 dwellings is supported. However, area of the proposed allocation is incorrectly stated as 1.35ha. Additional land to the western boundary will be required for site drainage and landscape mitigation. The correct extent of the allocation site is 1.61 as shown on the enclosed Site Location Plan (Plan Ref: 1136.011 shown at Appendix A). Deliverability: Subject to the grant of outline planning permission in 2019, and subsequent approval of reserved matters, the housing (including affordable housing) will be capable of being fully delivered by the end of 2021. Statement of Common Ground: the landowners are committed to continue to work proactively with the Council to ensure the delivery of this site, and are willing to participate in the preparaton of a Statement of Common Ground in advance of the forthcoming Examination.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Regarding Site 3260 Upper Studley and site 1021 Church Lane, there appears to be no response to concerns raised during the initial consultation process in September 2017 regarding protection of ancient hedgerows in accordance with the Ancient Hedgerow Act 1997. Evidence was submitted to the Council (Ancient Hedgerow, Hedgerow map 1838 and Hedgerow Map 1886) which proved that all the existing hedge lines at the sites would qualify as ancient hedgerow. The evidence seems to have been completely ignored by the council. The ancient hedgerow within Sites 3260 and 1021 would not allow access to the large portion of these sites, or indeed through to site 3565. On these grounds alone, development should not be permitted. WHSAP Consultation Statement Regulation 22 M P: in Stage 2, the omission sites for Trowbridge were discounted on the bases that they were inside the settlement boundary. Neighbours have informed me that they were told by Wiltshire planning on moving to properties adjacent to sites 3260 and 1021 that development of these sites would not be possible as they were outside the settlement boundary. There cannot be a valid reason for excluding the following sites: Bowyers, Hospital, Margaret Stancombe School, East Wing and Ashton Street, when Wiltshire Council states that it is committed to providing affordable housing with good transport links alongside urban regeneration for a growing population. In addition, the full extent of the Heritage, Archeological, Recreational, Agricultural and Environmental Importance of Upper Studley and Church Lane was not considered at Stage 2 as this was only raised by residents and other agencies in September 2017. The Council should therefore remove Upper Studley and Church Lane sites from the HSAP until it can prove that development of these omission sites (above) would have a greater impact on these criterion (which clearly it cannot</p>

<b>Please state which evidence document this representation relates to:</b>	Wiltshire Housing Site Allocations Plan Community Area Topic Paper Westbury (July 2018 Submission version) (CATP/19)				
<b>Please give details of why you support or do not support the updates to the</b>	Wiltshire Housing Site Allocations Plan - Focussed consultation on the Schedule of Proposed Changes and associated evidence documents Introduction				

**associated evidence documents.**

1. I have been appointed as the Chair of the Steering Group(SG). In the introductory meeting with the Council's Liaison Officer it became apparent that our work could be undermined by the consultation (then closed) on the above Plan.
2. The Schedule of Proposed Changes has given the SG the opportunity of communicating our initial views to you and the Inspector.
3. The SG recognises that Bratton Parish has come, rather late in the day, to develop a Neighbourhood Plan. Previous Councils, I have been informed have resisted embarking on a Plan for financial reasons and also because it was felt that Core Policy 1 (Settlement Strategy) of Wiltshire Council's Core Strategy (of which more later) protected the Village from large scale development proposals. This was probably somewhat naïve given the information in the Strategy relating to the housing allocation requirement for the Westbury Community Area Remainder.
4. The Council elected in 2017 had different ideas and it immediately started to discuss formally and informally within the Village the energy for developing a Neighbourhood Plan. A series of public meetings was held and the SG established. Progress was delayed for many months because of the failure of Wiltshire Council to appoint a Liaison Officer.
5. At the public meetings and a subsequent questionnaire sent to every home in the Village the issue of further house building in the Village was identified as a key issue. Most respondents recognise that adequate provision must be made to meet local housing needs and one of our first requests to Wiltshire Council was to carry out a Housing Needs Survey, the results of which are still awaited.
6. The Schedule of Changes pays great respect to those communities that have achieved Neighbourhood Plans but rather brushes aside the significance of Bratton's because we are at an early stage in the process.
7. I note from your website that the Inspector's task is to consider the soundness of the submitted Plan, based on the criteria set out in paragraph 182 of the 2012 National Planning Policy Framework (the Framework). I will use those headings to communicate the views of the Steering Group on the Plan.
8. Positively prepared. The provisions of the Plan to which the SG wishes to object to is the identification of two sites 321 for 40 houses (or sometimes 35) and a rejected site 738 for 22 houses. This is to meet a perceived need for 115 houses in the Westbury Area Remainder identified at para 4.26 of the Core Strategy. The March update of the housing numbers is as follows:  
  
Area Westbury Community Area Remainder:  
  
Indicative requirement 2006 - 2026 – 115  
  
Completions 2006 - 2017 – 60  
  
Developable commitments 2017 - 2026 - 51  
  
Indicative remaining requirement - 4

9. Enquiries have revealed that, despite the footnote to the figures stating 'Figures in the developable commitments column represent committed sites only and do not include a windfall allowance' site 321 has already been included in this 'developable commitments' column.

10. Bratton is in the fourth tier of settlement identified in the Core Strategy yet there does not appear to have been any objective assessment within the documentation to clarify why Bratton as a fourth tier settlement should be required to meet the identified shortfall.

11. The figures for the Westburty Town Area excluding the Remainder are as follows:

Area Westbury Community Area Town

Indicative requirement 2006 - 2026 – 1500

Completions 2006 - 2017 – 940

Developable commitments 2017 - 851 & 2026 - 1791

Indicative remaining requirement - 0 (291 houses more than required)

12. Therefore, taking the Westbury Community Area as a whole, the building blocks of the Core Strategy, an over provision of some 245 houses has been achieved. The failure to analyse this demonstrates that the development requirements have not been objectively analysed. Had they been it would have been recognised that certainly no further allocation is necessary.

Justified

13. The evidence above demonstrates that no reasonable alternatives have been considered in the context of Core Policy 1, which applies to Large Villages like Bratton.

14. Core Policy 1 states Large Villages are defined as settlements with a limited range of employment, services and facilities. Small Villages have a low level of services and facilities, and few employment opportunities.

Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities.

At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries.....Small housing sites are defined as sites involving fewer than 10 dwellings

15. The Policy is used in the documentation as a reason for ruling out any sites in the Small villages within the Westbury Area Remainder but is ignored in relation to the Large villages of Dilton Marsh and Bratton. Dilton Marsh is excluded for another reason – the school is full!

16. The SG cannot understand why the Plan automatically rejects any sites within the current settlement boundary. In Bratton a site exists, owned by the Parish Council adjoining and served by an access a site that currently provides 10 affordable housing units. The available site is at least as large and can be accessed along the same road.

17. Nor is the scale of development justified in the two sites. Site 321 has been reduced from 40 to 35, apparently achieved by the intervention of the site owner, and 22 are proposed for the excluded site 738. Developments of this scale bring suburbanisation to a village setting and clearly such developments fly in the face of Core Policy 1 of small scale developments to meet the housing needs of the village. More importantly, elsewhere in the Core Strategy it states that Large villages should not accommodate housing developments of more than 10 houses.

18. The SG has commissioned another housing needs survey and we await the results but local housing needs will never amount to what is proposed in the Plan. The survey conducted in the village and the public meetings demonstrated widespread support for modest housing growth and this is what we will seek to achieve. Confirmation of either of the sites will completely sabotage that approach.

Effective

19. Whilst the Plan may be achievable within the Plan period there is no evidence produced to demonstrate that a market exists for the provision of this number of homes in the West Wiltshire. Trowbridge, Westbury and Warminster all have significant allocated sites where there is little evidence of development taking place. Whilst the SG appreciates the requirement to provide additional housing sites it questions the wisdom of allocating sites in a Large village when towns are much better served to meet the needs of people moving to the area or requiring homes close to employment opportunities.

Consistent with National Policy

20. The SG understands the National Policy requires a sufficiency of land allocated for housing to meet the theoretical number identified by central government for Wiltshire. National Policy though also requires that planning authorities have regard for the principles and policies relating to sustainability. Large scale housing developments in Large villages are not promoted by National Policy. Nor, in fact, is it promoted by Wiltshire Council's own Core Strategy!

Finally

21. The SG hopes that the Inspector will reject the inclusion of sites 321 and 738 in the Plan and allows the opportunity for it to develop its own Neighbourhood Plan. The evidenc is clear. The Westbury Community Area has met its target to provide additional housing sites without the need to impose insensitive developments on the Village.

22. There is much more the SG could have said but we are aware of the information provided in the initial representation made by the Parish Council and it re-iterates its support of those statements.

23. The SG looks forward to presenting its case in detail at the Examination in Public.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	We are writing to support the proposed change (PC92) to remove the Ridgeway Farm, Crudwell site (Housing Allocation H2.13) from the Wiltshire Housing Site Allocations Plan. The proposed development at Ridgeway Farm is inappropriately large and were it to go ahead, would have a detrimental impact on the community for all the reasons stated in previous consultations. The proposed change to have this development removed from the WHSAP is therefore welcomed and we support it on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to 'small sites' to meet local needs. The Crudwell Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring) and will allocate land to meet identified needs. The Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future. We trust that this and similar representations will result in PC92 going ahead and thank you for your consideration in this matter.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Land ownership: Newland Homes hold a subject to planning option on the site, which extends to 2.27ha [REDACTED] Proposed allocation: the proposed allocation of Upper Studley under Policy H2.5 is supported in principle. This follows a collaborative approach that has been undertaken between the site owners and Wiltshire Council following the initial promotion of the site in 2015. Pre-application enquiry: a pre-application enquiry process has confirmed that the allocation site can accommodate a scheme of up to 47 dwellings including a 30% provision of affordable housing [REDACTED]. The vehicular access arrangements, drainage strategy and spatial layout of the scheme have been agreed as being acceptable in principle, as confirmed in a letter received from the Councils Development Management Team dated 27th September 2018 [REDACTED]. Deliverability: Subject to the grant of outline planning permission in 2019, and subsequent approval of reserved matters, the subject site is capable of being fully delivered by the end of 2021. Statement of Common Ground: Newland Homes are committed to continue to work proactively with the Council to ensure the delivery of this site, and are willing to participate in the preparation of a Statement of Common Ground in advance of the forthcoming Examination.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Re: The Stables, Millditch, Bratton BA13 4SX In reviewing the settlement boundary I note you have included the development to the east of the land shown with an X on the attached plan. The land marked with an X is currently occupied by a derelict building which is capable of being converted into a bungalow to meet local housing need. I would request the Council and/or the Inspector to include the site marked X within the new settlement boundary as this will have the effect off rounding off development in this part of the Village. The land to the West is composed of Council allotments and so agreeing to this request sets no precedent for more significant development in this area.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	As we are all aware, Somerset is a 2 tier local authority system. Given our statutory planning role we have no comments to make on the Schedule of Proposed Changes to the Wiltshire Housing Site Allocations Plan. Drawing upon the evidence within their respective local plan processes I am of the view that both Mendip DC and South Somerset DC face considerable constraints and challenges in accommodating their own housing need. As your documents relate to housing matters, we look towards our district colleagues to make representations on such matters. Once again, thank you for consulting us and seeking our views on this matter.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>During an earlier consultation period, I raised a comment that some of the proposed settlement boundary changes within Crudwell did not fully recognise the residential curtilage of a number of the properties. This was due to outdated mapping being used and a delay in regards to Council approved property boundaries being formally recorded. My property is one such example. The area in question is shown in the following document: 22 EXAM. 01.19 Schedule of Proposed Changes (Sept 2018)_19of46_Crudwell.pdf In 2014, Wiltshire Council accepted that a small area of land surrounding the property (Ravenscourt) was to be incorporated within the planning unit of the property and more importantly, as residential curtilage (14/06643/FUL). A more recent application incorporated all land owned by Ravenscourt within the residential curtilage, which was confirmed by Wiltshire Council (17/10085/FUL). A recent discussion with Wiltshire Council has confirmed that Ravenscourt now consists only land associated with residential use (see Location Plan attached). I would therefore request that the land associated with Ravenscourt be incorporated within the proposed settlement boundary for Crudwell. The land is contained within a substantial and clearly defined post and rail, which has also been stockproofed. This fence line offers a very clear delineation between the residential unit and the neighbouring farmland (see images attached). This would require a small change to the boundary line within the map reference 16 &amp; 17.</p>

<b>Please state which evidence document this representation relates to:</b>	Wiltshire Housing Site Allocations Plan Community Area Topic Paper - Salisbury (July 2018 Submission version) (CATP/13)				
<b>Please give details of why you support or do not support the updates to the</b>	Para. 5.23 The changes make it clear that this site is required to pay for a primary school to serve a greater area than the site itself yet no recognition is made that this site is poorly situated to serve a wider area.				

<p><b>associated evidence documents.</b></p>	<p>This is clearly illustrated by the maps in the Salisbury Transport Strategy which show its relation to existing infrastructure and facilities, public transport , park and ride sites and links to the city. Primary school children grow up and this site does not afford easy access to the Secondary Schools.</p> <p>The Sustainability Appraisal Summary site S1028 , F9 admits that ‘the site is not considered to be within walking distance of most services and facilities’ . It talks of further assessment being required in relation the sites ability to support enhanced bus services. This work should be carried out in advance of any allocation - not as an afterthought.</p> <p>The positive effects identified are not site specific and would apply to any site of this size.</p> <p>On the other hand , The negative effects identified are site specific and the impact of an incongruously large development in the landscape, the loss of good quality agricultural land ( the significance of food security may increase after Brexit) has been underestimated in the assessment. The effect of the likely increase in queueing traffic on air quality for children walking to school along the A3094 has been glossed over.</p> <p>It states that there is a moderate positive effect in that the scale of the site will help reduce poverty and deprivation in the wider community yet a site with no public transport or facilities within walking distance will compound social disadvantage for those allocated to live there in social housing as it imposes additional costs and isolation upon its occupants. This is a moderate negative effect- not a positive one.</p> <p>para 5.38 . The Salisbury Transport Strategy fails to demonstrate that mitigation schemes are achievable. On the contrary it shows at table 2.5 that the A3094 has seen the biggest increase in traffic of Salisbury roads over 10 years and its junctions at either end lack capacity. As the Strategy does not propose to provide any increase in capacity (no new roads) there is no way the effects can be mitigated.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I am writing in response to your consultation on proposed changes in connection with the Wiltshire Site Allocations Plan I can confirm the Mendip Council was notified of consultation on the pre-submission plan (in July) and this additional consultation. The Council did not submit representations on the Submission Plan. The Council notes that the proposed changes do not alter the adopted spatial strategy And it supports the overall intent of the proposed changes to focus allocations in principal centres rather than market towns.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport. The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in an hour. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special landscape Area and Salisbury Plain SPA ( Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement.</p>			

	<p>Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 Will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. We have no objections to a moderate number of houses, but for all the reasons above, this is too many.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Last year, on 20th September 2017 I provided a comprehensive objection, primarily to the proposed removal of an area in Hullavington which is currently in the Framework Boundary on both justification and soundness grounds. I was contacted by letter by your department on 25th September 2018 specifically because I had commented previously, but I cant find my comments, or if they have been addressed on any of the documents posted online. So whilst evidence points to the fact that you received my documents (from your letter dated 25/9/18), I cant find where they have been captured and/or addressed. For completeness, I am therefore writing further, duplicating those comments and objections (in the attachments) but also using the fact that because they seemingly havent been noted or addressed, as evidence that the process followed has NOT either been sound and therefore, arguably, not legal compliant (although I am not an expert on the latter). I wonder that if all comments havent been captured or addressed, how many times has that happened? and therefore, how valid is the whole process?

<b>Identify Proposed Change Reference Number</b>	SBR PC14				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Please find attached a new objection to the soundness of the Wiltshire Housing Site Allocations Plan together with the two attachments Objection/Comments as follows: Objection on the basis of Justification and Soundness Further to my previous objections (dated 20th September 2017) specifically to the justification of the proposed removal of the an area of land in Hullavington, (J6 and J7 on the map which illustrates the Hullavington Framework Boundary), I am writing to object further with additional information and additional reference points, noting actions which have taken place during the past 12 months, which continue to underscore that this removal is not justified and does not meet the criteria laid out by Wiltshire CC: The key criterion for removal is that the land should be more closely linked to the rural form, but this absolutely is not the case, and recent actions link the land much much more to the built form than it was before. What I trust is evident from the attached annotated aerial photograph, is that the land in question is clearly more closely related to the built form and unmistakably bordered from the open countryside by a well-established stone wall. This same stone wall borders other neighbouring residential properties on both sides of the development site (East and West). In addition, 18 months ago, neighbouring farm buildings were removed and a new development of circa 14 homes was built (Old Farm Close), which borders the site to the North hence agricultural buildings have been removed on 2 boundaries of the development site in the past 2 years and converted to residential, clearly strengthening the relationship of the site to the built up area distinct from the open countryside. Perhaps more importantly, a planning application for two new homes was submitted in April 2018, ref: 18/03185/FUL for two new homes on the same development site that is proposed for removal from the Framework Boundary. I therefore wish to strongly object to the justification and soundness of the plan and the application of the criteria, which is clearly incorrectly applied in this particular example, or not applied at all. The strong objection is on the basis of the lack of physical logic on the ground to exclude the site. This is particularly true given the planning departments professional support for the lands suitability for development, evidenced by the Case Officers recommendation to the Committee, to accommodate new dwellings. See link below. <a href="https://unidoc.wiltshire.gov.uk/UniDoc/Document/File/MTgvMDMxODUvRlVMLDExNzg2NTc=">https://unidoc.wiltshire.gov.uk/UniDoc/Document/File/MTgvMDMxODUvRlVMLDExNzg2NTc=</a> With regards to justification, it also says in the WHSAP documentation that the Plan isnt a desktop exercise but will solicit local Case Officer opinion, who is familiar with the locality. As can be seen, the local Case Officer identified that this land is suitable for sustainable development! In addition, the LPA previously referenced the unmet housing need in the area of 158 homes (which has now been amended to 138) and there is no ceiling to appropriately sited housing. Why is it therefore sound to remove areas from the Framework Boundary, when there is local unmet need and the documented justification clearly has not been applied. It should be noted that this unmet need was calculated prior to the announcement that Dyson had purchased the neighbouring 519 acre airfield site, which will lead to the creation of circa 10,000 future jobs. Even</p>			

	<p>if the situation was ambiguous, then no change should be the outcome, but in this particular case there is absolutely no ambiguity and no justification for its removal. To do so would make the process adopted unsound. To really highlight the lack of justification there is a proposed change to the Hullavington boundary in the process with the reference SBR PC14, which has the following note: Amend pre-submission settlement boundary to include the school playing fields. This is the curtilage of community facility that relates more closely to the built environment (e.g. a playing field) and has limited capacity to extend the built form of the settlement in terms of scale and location. If any independent Inspector looks at these situations, it underscores the fact that the removal of the land to the rear of Mays Farm (J6 and J7 on the Hullavington Framework Boundary Map) is not justifiable. Please could you bring this situation to the Inspector, such that the land in question is NOT removed from the Framework Boundary as I believe that there is no clear logic to support the change. Thank you</p>

<b>Identify Proposed Change Reference Number</b>	N/A [H2.2, H2.4, H2.5, H2.6]				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>I am writing to put forward my objection of the above planning permission. I feel having lived in this area for 24 years now I can offer valid points on how the building of new houses will effect the surrounding area and the people of Trowbridge. I live at [REDACTED] Trowbridge. My house being in the corner, is side on to the A361 Frome road Trowbridge. The A361 is a main trunk road into Trowbridge, used by heavy goods as well as cars and vans etc. There is congestion always in the mornings of traffic flowing into Trowbridge. Its at a standstill. Not only is there noise but air pollution. The traffic simply cannot flow. Building houses on Site 1021 (adjacent to Church Lane) Site 3260 (land at Upper Studley) this traffic will join onto the A361 Frome road. I believe a roundabout is suggested at these sites, which will further add to the problem. I have also considered that being family homes, children will be commuted to schools. In the proposal the local school was put as Walwayne School, Broadmead, Trowbridge. At a distance of nearly 3 miles , I can't see parents walking their children to school! As most families have two parents working, most households have two cars. The children are commuted to school enabling the parent to then go on to work. Hence adding to yet more congestion on the roads. As I have mentioned living in this area for the last 24 years, I have seen the flooding to the Southwick Country Park and the main A361. I believe that building on Site 1021 and Site 3260 will cause further problems in the future. Both sites and on the hillside. The water then loses its drainage through the soil. It will find its own level and being a dip between Whiterow hill and Southwick, will collect there. I have seen this dip flooded, where only HGV's could pass through. Not only that the Southwick Country Park will also flood more. It does currently with heavy days and months of rainfall. Given the fact our climate is changing, I foresee more of this. My concerns on houses built on the A361 are also linked to the Saturday fun run at Southwick Country Park. The carpark could hold possibly 35-45 cars. There are in the region of 200 runners on a Saturday. The cars the spill out and park on the main A361, in both directions. HGV's are held back on the hill Southwick end because they have to wait for oncoming traffic and a gap. This will cause serious problems if the houses are built AND a roundabout is put in!!! Runners are asked to park at the college which some do, others park along Silver Street Lane, again causing more congestion. The land on Site 1021 and Site 3260 is green land and offers home to wildlife. Deers and often been seen in the fields off Church Lane. Foxes, kingfishers, butterflies, insects, bats can all been seen. I feel this must be considered when building houses here as it will spoil the Country Park. So , my objections for Site 1021 and Site 3260 are; Air Pollution and Noise pollution from traffic. Disruption to a natural habitat for wildlife Building on land which will flooding elsewhere Site 3565, Land east A361 at Southwick Court, again this is put forward as a huge site for houses. I have seen this land at the bottom of Spring Meadows, where you can access these fields under 18inches of water. It is a flood plain!! I've seen some of the houses at the bottom of Sandringham Road (which backs on to this area) have their gardens flooded. The site will</p>				

	<p>join traffic to Spring Meadows, Sandringham Road and Balmoral Road, which in turn join onto Silver Street Lane. This will cause colossal traffic to an already busy Area. Parents park on Silver Street Lane due to yellow lines outside The Grove School. Adding more houses will simply congest this area. Not only that, this traffic will join onto Bradley Road and Frome Road. The road infrastructure simply cannot cope with the traffic. Weekends the Bradley Road is at a standstill because of the Spitfire Retail Park. The traffic just cannot flow. It backs up onto the Whitehorse Business Park. Not only can you not get into Trowbridge, you can't get out!!!! Again is the issues of school, parents commuting, more traffic etc. I do feel that it will also spoil the land which separates Trowbridge From Southwick. Building of houses will join the two up. It takes away again land which is tranquil and of natural beauty, home to much wildlife. My objection to Site 3565 is; Noise and Air pollution Traffic congestion The spoiling of land which is of natural beauty. Building on flood plain. I feel the building of these site won't enhance Trowbridge and object to it.</p>

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should see k to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport. The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its</p>			

	<p>pavement and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy.</p>

<b>Identify Proposed Change Reference Number</b>	N/A [General]				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Response of Pitton & Farley Parish Council to the Wiltshire Council SHLEAA consultation 2018 The Parish Council's view remains the same as in 2015 ie that any substantial development in Pitton, apart from infilling, will have a detrimental impact on the existing infrastructure, and consequently will widen and worsen the effects of any flooding which may occur in the future. The Parish Council would strongly resist any new development in Pitton, unless and until the impact of flooding is ameliorated as far as possible. You should be aware that access to the Pitton sites via Above Hedges/Black Lane/Church Lane are single tracks at all the entrances/exits. Access to 'The Orchard' site is within a flood zone. All proposed sites are outside the housing policy boundaries. However, the Parish Council recognises that some small scale development is necessary within the parish in order to keep both individual settlements of Pitton and Farley sustainable, and would like to undertake a Housing Needs Survey to establish what the communities' particular needs are.

<b>Identify subject of representation</b>		Schedule of Proposed Changes - Consultation Document (September 2018) (EXAM/01)	<b>Do you consider the consultation material you are commenting on is unsound because it is not: Positively prepared; Justified; Effective; Consistent with national policy?</b>	(1) Positively prepared; Justified; Effective; Consistent with national policy	
<b>Identify Proposed Change Reference Number</b>		PC94			
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		Positively prepared - Development requirements have not been objectively analysed, nor analysed in compliance with National Policy. The NPPF require a buffer of land for housing of 20% where there has been under delivery instead of the 5% mandated. The County Council has included a 20% buffer in spite of no under-delivery within Wiltshire as it would be prudent. If my calculations are correct, this means that Wiltshire CC are planning for 24,740 dwellings for North and West Wiltshire when according to the NPPF they should only be planning for 21,648 and as they already have completions and developable commitment totalling 23,631. it is difficult to see how the additional minimum to be allocated of 1,109 can be justified. Within this context Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The allocation is also contrary to the Wiltshire Core Strategy which seeks to avoid out-commuting and the provision of employment to complement any additional housing. The proposed allocation to Bratton does not appear to be accompanied by any proposals (nor land sites) for additional employment (See the statements of EXAM / 02A (WHSAP Sustainability Appraisal Sept 2018), under the title Education and Skills, states that Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work. and under the title Economy and Enterprise, states that Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport. The reduction of 5 houses in PC 94 does not materially impact on the following: Both sites 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council appears to have made errors in the assessment of Bratton as a Large Village by counting 2 Recreation Fields, 1 Childrens Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Childrens Play area and 1 Sports Pitch. Both proposed sites are considered modest developments, but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the			

proposed 15-year growth of the village to 12.9%. The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. In particular, any out-commuting to Trowbridge is likely to use Court Lane which is a narrow, deep lane which in places is insufficient for two vehicles to pass and which is already dangerous for pedestrians as the major parts of the road lack any pavement on either side, in particular in areas where there is limited visibility. The sunken nature of the road, together with the hedges etc also make the road dark even in the summer and exits from the side roads particularly hazardous. Increasing out-commuting will increase the risk of serious accidents to pedestrians and minor accidents to vehicles. In addition existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across Court Lane is unsafe due to the hazardous road junction at Court Lane (it is a blind junction owing both to the bend, the acute nature of the turning, the immediate drop in height, the bend within 20 metres of the junction, and its sunken nature), the quantity of traffic using the highway and the inadequacies of the existing pavement. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Both sites will also alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Both sites will intrude on the benefit provided by the footpaths along the scarp of the hillside above Bratton. Proposed landscaping with trees and shrubs conflicts with the wide-open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area) and will also be ineffective for a large part of the year. Developments of this size will add to the existing pressures on Bratton Surgery; closing this surgery and requiring all Bratton residents to use the White Horse Medical Centre in Westbury will add to traffic problems as well as reducing the quality of life of the residents of the village. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective Large developments at Large Villages are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in Large Villages are not promoted by National Policy, and the calculations which have led to the proposed allocations are flawed. I believe that the allocations have not taken note of the environmental impact commissioned by Wiltshire County Council, for example (but not restricted to) the fragility of water supply.

<b>Please give details of why you support or do not support the updates to the</b>	Wiltshire Housing Site Allocations Plan - Focussed consultation on the Schedule of Proposed Changes and associated evidence documents				

**associated evidence documents.**

1. This letter, drafted by the Chair and vice-Chair, is sent to you as a holding response as agreed in an exchange of emails I had with you. The content will be considered by the Council on 13 November and I will let you have details of any further comments, deletions or amendments by 14 November.
2. The Council is disappointed that this further consultation has come about at this late stage after the appointment of the Inspector. The Guidance on responding to the consultation which you sent to me is complicated and this further consultation compels the Council to repeat that the whole process is incredibly difficult for lay persons to understand.
3. The amount of documentation and the scale of the alterations introduced is overwhelming. Appendix 1 attached to this letter itemises the changes that have been identified which relate to the Parish. In this letter, the Council has tried to simplify the issues and endeavoured to respond by reference to the four principles that the Inspector will apply when considering your Council's submission – namely positively prepared, justified, effective and consistent with national policy.
4. The Council responded in detail to the original submission with a letter of representation dated 22 September 2017, a copy of which is annexed at Appendix 2. This further representation needs to be read in conjunction with that letter. The principal issue that the revised consultation has brought to the attention of the Council is the re-admission of site 738 south of Westbury Road almost opposite to the included site 321, and the consequential addition of many new pages of Proposed Changes and the wholesale re-writing of the Bratton section of the Community Topic paper of Westbury  
  
Conflict with existing policy
5. The Council's position is that they are opposed to the scale of the development proposed on each of those sites. Inclusion of either is in fundamental conflict with Wiltshire Council's own Core Strategy. That Strategy states that the priority is to locate housing development in the top two tiers of settlements, the Principal Settlements of Chippenham, Trowbridge and Salisbury and the Market Towns, including Westbury. Furthermore the Core Strategy recognises that the other areas of the County are rural countryside which need protection. There is no strategic need to develop in open countryside adjoining Large Villages.
6. The Core Strategy Policy No 1 reads:-  
  
Large Villages are defined as settlements with a limited range of employment, services and facilities. Small Villages have a low level of services and facilities, and few employment opportunities.  
  
Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities.  
  
At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries.....Small housing sites are defined as sites involving fewer than 10 dwellings
7. The proposals in this Plan are totally inconsistent with the Council's own Core Strategy. The Plan is not positively prepared and the proposals are not justified when weighing this evidence.

Core Strategy targets delivered

8. According to the Regulation 22 (1)(9)(C) statement the purpose of the Plan is to:

Allocate sites for housing to ensure the delivery of homes across the plan period in order to maintain a five year land supply in each of Wiltshire's three HMAs over the period to 2026.

9. The Target for the Westbury Community Area identified in the Core Strategy was 1,615 houses (sub-divided 1,500 to the Town 115 to the Remainder). Paras 2.9, 2.10 and 2.11 and table 2.3 have been added to the Wiltshire Site Allocation Plan – Westbury Community Area Topic paper following receipt of the latest figures contained in the Housing Land Supply Statement.. Para 2.11 makes it clear that the developable commitments 2017 -2026 shown in the Table 2.3 excludes any proposed allocations.

10. This Table shows that, so far, the Town of Westbury has delivered 940 homes and the Remainder 60. So a shortfall of 615. The developable commitments (excluding any proposed allocations), in the Westbury Community Area amount to 862 making a total 1862. This is an over-provision of 242 (15.29%), way in excess of the total of 1,615 originally allocated in the Core Strategy.

11. In the Market Lavington Topic paper the following appears at 7.2:-

However, in the light of the significant supply of housing land in the East Wiltshire Housing Market Area the Council's Schedule of Proposed Changes (July 2018) proposed the deletion of the site allocations that emerged from the site assessment process. Similar to the position with Large Villages there is the opportunity, as set out in paragraph 6.4, for the Market Lavington Parish Council to allocate land for housing in their emerging Neighbourhood Plan.

12. So a 'significant supply of housing land' in one community area has led to the deletion of sites in a community identified as a Local Service Centre and by definition, therefore, one that is intended to have some significant development. Why cannot a similar decision be made in respect of a Large Village and allow the Neighbourhood Planning process to identify and allocate land for housing to meet local need in accordance with the requirements of the Core Strategy and Government policy?

13. The target for the Westbury Community Area has been met. Government Policy has been complied with and the provision identified in the Core Strategy for the number of homes in the Westbury Community Area achieved. The allocation of sites in Bratton is not justified in the light of the evidence produced in the Housing Land Supply Statement.

Neighbourhood Plan

14. Prior to the election in May 2017, the Council had considered the cost and effort in developing a Neighbourhood Plan was unnecessary, in the light of the Core Strategy Policy stating clearly that housing in Large Villages should be confined to meeting local needs. The Council elected last May, however, resolved to develop a Plan.

15. A Steering Group was established in February 2018 after a series of public meetings and a Parish wide survey. It is clear from all the responses that there is no fundamental objection to further housing in the Village. What is of concern is the 'suburbanisation' of the village by the

creation of high density developments. With housing numbers of 35 -40 and 22 which far exceed the definition of “mall housing” of fewer than 10 dwellings.

16. The Neighbourhood Plan is well underway albeit with a six months' delay whilst the Council waited for a County Liaison Officer to be appointed. A Housing Needs Survey has been carried out. The draft report has just been received. It shows a small demand for local housing (5 properties). Once the final version is received the Council will forward the Report to the Inspector. The Neighbourhood Plan will be analysing potential sites to meet the housing need identified and will be carrying out further work to refine the information by considering evidence provided by Wiltshire Council's Housing Register and the Strategic Housing Market Assessment. The Westbury Area Topic paper on page 66 used information from the 2013 Housing Survey to identify local need. The new survey reduces demand from 8 to 5. Potential for housing within the village existing village settlement boundary is shown as Omission Site OM007 in the Proposed Changes. This opportunity will be fully investigated by the Steering Group.

17. The allocation of either sites 321 or 723 would destroy the Neighbourhood Plan initiative and is contrary to Government Policy which supports communities in developing such Plans. A potential housing site in the Village has been omitted.

#### Fundamental error

18. Despite the Council's submission made in 2017 pointing out the incorrect figure the Council's officers have not changed the figures and have repeated the error with site 738. The Westbury Community Area Topic paper still states the Village consists of 819 houses whereas the correct number is 516. An overstatement of 38%.

19. Such an error (not corrected) is not legally sound.

#### Sustainability, highway, and environmental issues

20. The differentiation between the sites 738 and 321 is negligible at Stage 3 and Stage 4, steps 1 to 4, yet the sustainability of site 321 is assessed as 'good' and site 738 as 'marginal'. The Council has seen the detailed representations of local resident, [REDACTED], who alongside the vice-Chair of the Council has examined in detail all the documents relating to this consultation. The Council supports and concurs with all the points made in that submission. The Council re-states its concerns in relation to site 321 as set out in the submission letter of 22 September 2017.

21. The decision to reject one site but keep the other is not sound. The decision to allocate so many houses to a Large village is contrary to Government Policy.

#### Precedent and consistency

22. The Council has not been able to analyse all the changes in the documentation but it notes numerous variations where sites have been excluded for reasons which could equally apply to Bratton. It is noted that some sites in communities where current Core Strategy policy permits housing growth have been removed because (extract from the Market Lavington Community Area Topic paper):-

	<p>Development at this site would very likely have a significant adverse impact on the amenity and setting of the Conservation Area. It would be difficult to achieve a pattern of development that protects and enhances the character of the settlement and the Conservation Area. Achieving a suitable access would be problematic without further negative effects on the Conservation Area, neighbouring residents and highway safety.</p> <p>23. Bratton has all these qualities (see [REDACTED]'s representations) yet a contrary decision is taken in respect of sites 321 and 738, eliminated on just a single ground relating to cycling and pedestrian access and safety reasons. By the way, those reasons should apply to both sites as they are almost opposite one another on the same highway but the issue of 'accessibility' for site 321 does not weigh up good cycling connections, unlike for site 738. Nor does it consider the need for cyclists to cross the road when returning to site 321 from Bratton.</p> <p>24. Based on this inconsistent and unsound approach the Parish Council consider continuing to promote sites in Bratton is unjustified</p> <p>As I said above, I will confirm the Parish Council's position on November 14 after it has considered this holding letter.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] 1.0 Introduction 1.0 This is the formal response of North Bradley Parish Council to the Focussed Consultation of the Schedule of Changes to the Wiltshire Housing Site Allocations Plan (HSAP). The Parish Council acknowledges the change in respect of the Strategic Site 298 H 2.2 Land off A363 at White Horse Business Park following submissions on behalf of the Parish Council. While the Parish Council would prefer that this site is not developed, it does not wish to impede the delivery of a strategic site and recognises the need to avoid conflict between higher level plans and the NDP. On this basis only it therefore SUPPORTS the allocation of all the proposed strategic sites (Elm Grove Farm (SHELAA Site 613, HSAP H2.1), Southwick Court (SHELAA Site 3565, HSAP H2.6) and Land off the A363 at White Horse Business Park (SHELAA Site 298, HSAP H2.2). 1.1 HOWEVER, while the revised HSAP indicates that the quantum of development on site 298 / H 2.2 has been reduced to facilitate the creation of a meaningful landscape gap between the site and Trowbridge, it does not take account of the work already done between the Neighbourhood Plan team, the teams professional planner, landscape architect and the LPAs own ecologist. The Parish Council therefore believes that it is necessary to add more detail to the plan text in order to: Provide the clarity expected from a Development Plan Document Ensure that landscape and biodiversity are appropriately protected in the final HSAP Ensure proper co-ordination between the HSAP and the emerging North Bradley Neighbourhood Plan as required by the NPPF and PPG. 1.2 This Response also comments on the proposed settlement boundary changes to North Bradley village, which the Parish Council SUPPORTS. 2.0 Policy H 2: HSAP Site H 2.2 / SHELAA 298 Land off White Horse Business Park 2.0 The proposed change indicated at PC60 in the Extended Consultation document reduces the number of homes at site H2.2 (land off the A363 south-west of the White Horse Business Park) from 225 to 175. The explanatory text says that this is; To reflect the resolution of Wiltshire Councils Cabinet, the capacity of allocation H2.2 is proposed to be amended. It was previously proposed through a schedule of proposed changes put before May Cabinet that the site capacity should be increased from 150 dwellings to 225 dwellings in order to maximise efficient use of land whilst protecting heritage and ecological interests. However, as a result of subsequent further consultation is was resolved by Cabinet in July 2018 that the figure of 225 should be reduced by 50 dwellings, to 175. This would better enable the provision of a strategic landscape buffer between Trowbridge and the village of North Bradley. 2.1 This is welcome. However, in fact the resolution of the Cabinet reflected the emergence of the North Bradley Neighbourhood Plan, brought to Cabinets attention by local councillors. This emerging Neighbourhood Plan establishes a defined landscape buffer between Trowbridge and the village of North Bradley. Through discussions with the county ecologist It also goes further than this and puts forward a specific general layout for site H 2.2, designed to provide a</p>				

satisfactory landscape gap (as determined by professional landscape architect consultants) which is also optimal in respect of the flightpaths and foraging corridors for the protected bats of the Bath and Bradford on Avon SAC (as suggested by the County Ecologist). 2.2 As it stands, the allocation of site H 2.2 in the HSAP covers the following matters: a) Number of dwellings b) Need to separate Trowbridge and North Bradley and respect setting of the village c) Need to focus development proposals within the north-east of the site d) Improvements in walking and cycling infrastructure e) Retention of landscape features f) Need to create a dark corridor for bats g) Contributions towards school and medical facilities. 2.3 However it does not include: The fact that a more detailed site layout is being developed by the North Bradley Neighbourhood Plan (NDP) That the NDP will contain a landscape setting policy covering the entire area. That the preferred layout in the NDP does NOT concentrate development in the north-east as proposed in the HSAP but west and south-west - adjacent to the village. This has been discussed and agreed between the landscape architects advising the NDP and the County Ecologist. Of all the above points, point c) is the most critical. As presently written there is likely to be a conflict between the NDP and the HSAP on this point. 2.4 It is accepted that the North Bradley Neighbourhood Plan has not yet reached the Regulation 16 stage. However, it seems likely to do so before the HSAP is adopted. It should therefore be possible to make some mention of the link between the two plans, at least in general terms at this stage. This would not be putting too much weight on an emerging plan, simply improving co-ordination between community and council planning at an appropriate stage (working constructively as advised by PPG paragraph 43) and demonstrating awareness, support for Localism and good practice. It would also be allowing the NDP to achieve the role anticipated for it in NPPF paragraph 28 in adding value and detail to the Development Plan, something that would provide greater clarity and opportunity for engagement by the developers of Site H 2.2. 2.5 It is therefore suggested that the following changes (indicated in [BOLD] text) are made to the text of Policy H 2.2: 5.52 Approximately 25.26 ha of land off the A363 south-west of the White Horse Business Park is allocated for the development of approximately 175 dwellings, as identified on the Policies Map. It is reasonably well located with regard to services and facilities. The site extends over a significant area of agricultural land used for a mix of grazing and arable cropping. It is contained, to a degree, by existing development to the east and west and fronts a gateway route to the town. An objective of detailed design and layout will be to retain visual separation of the Towns urban area from North Bradley village. The issue of the setting of the village of North Bradley is currently being taken forward by the emerging North Bradley Neighbourhood Plan which aims to create a landscape setting policy and suggests a general site layout for this HSAP site. The NDP has yet to reach The Regulation 16 stage, when it will have significant weight, however it is already clear that to achieve a satisfactory design, creating a suitable landscape buffer while simultaneously conserving biodiversity, development proposals would need to be focussed within the west and south-west of the site, screened with new planting and provide improvements to walking and cycling routes through to the town. 5.53 The site is characterised by a distinctive pattern of mature and semi-mature hedgerows and trees that form a feature in the landscape. Development of the site would need to retain these features and thereby provide a layout that respects the setting of North Bradley village as an important element of detailed design. Existing hedgerows and trees also provide habitat for protected and non-protected species. These natural features therefore provide wildlife corridors that link habitat features within the local area; in particular, dark corridors for foraging bats. This matter is addressed further in the emerging North Bradley Neighbourhood Plan and its supporting documents which include a landscape assessment and have involved the participation of the County Ecologist. These documents will achieve significant weight once they reach the Regulation 16 stage. 5.54 The site is in an area likely to be used by Bechsteins bats associated with the Bath and Bradford on Avon Bats SAC. Sensitive habitat features on / adjacent to the site include: woodland belts associated with the White Horse Business Park; a network of mature hedgerows/hedgerow trees; and the grounds of Willow Grove. 5.55 These features should be retained and / or buffered from development (including residential gardens) by wide (10-16m), dark (<1 lux), continuous corridors of native landscaping which will allow for their long-term protection and favourable management in order to secure continued or future use by Bechsteins bats. Development will be required to contribute towards the delivery of the Trowbridge Bat Recreation Management Mitigation Strategy.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Settlement Boundary Review Tuckingmill Settlement Boundary Review West Tisbury Wiltshire This review was a very late amendment that has not been responded to by the West Tisbury PC at this date. The residents of the affected area to be reviewed have had little knowledge of this proposed change. The Draft Settlement Boundary review states in 5 (5.1) Areas which have been excluded are- Curtilages of properties which have the capacity to extend the built form of the settlement, This includes large residential gardens. Recreational or amenity space at the edge of settlements which primarily relate to the countryside (inform or nature ) Isolated development which is physically or visually detached from the settlement (including farm buildings or agricultural buildings, renewable energy installations). Also Ref 8 (8.1) The areas which have been excluded are- Extended curtilage of a property that relates more closely to the open countryside (e.g. a field or paddock) or has the capacity to substantially extend the built form of the settlement in terms of scale and location. Recreational or amenity space at the edge of the settlement that relates more closely to the open countryside. My comments on the proposed change review are as follows. 1. The current boundaries of the properties that are affected show they were always part of Pythouse estate which makes up the field complex which extends to the Southeast. The two gardens in the review do not need to be included in the revised boundary curtilage. 2. It appears that the proposed curtilage boundary line has been drawn to keep the line straight and for no other good reason. 3. If the boundary is moved it could in the future open up the feasibility of development of this open countryside area which does not follow the methodology criteria used in this review.</p>

<b>Identify Proposed Change Reference Number</b>	PC93, PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a Large Village by counting 2 Recreation Fields, 1 Childrens Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Childrens Play area and 1 Sports Pitch. Both sites are considered modest development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM / 02A (WHSAP Sustainability Appraisal Sept 2018), under the title Education and Skills, states that Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work. and under the title Economy and Enterprise, states that Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport. The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. There is a severe effect on the dwelling at 40 Westbury Road which will change from a rural setting to surrounded by houses to the North, West and South West if both sites are developed. Effective Large developments at Large Villages are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in Large Villages are not promoted by National Policy.</p>

<b>Comment ID:</b>	123	<b>Consultee</b> Friends of Southwick Country Park	<b>Agent</b> <b>Person ID:</b>	<b>Do you consider the Proposed Change to be legally compliant?</b>	No
		<b>Person ID:</b> 1187466		<b>Do you consider the Proposed Change to be sound?</b>	No
<b>Identify subject of representation</b>	Schedule of Proposed Changes - Consultation Document (September 2018) (EXAM/01)		<b>Do you consider the consultation material you are commenting on is unsound because it is not: Positively prepared; Justified; Effective; Consistent with national policy?</b>		
<b>Identify Proposed Change Reference Number</b>	N/A [H2.4]				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] We do not consider this proposal legally compliant because: it is not consistent with county policy as laid out in the Executive Summary of the Methodology Used to Select Sites (2a. on p.1) which says: SHLAA sites are rejected from further consideration or their capacity reduced where affected by obstacles to development such as heritage and wildlife designations and flood plain ...; it fails to meet requirements of Wiltshires Core Strategy Policy 50 (p.260) and to apply assessment criterion 1 (p.92) of the Sustainability Appraisal as laid out in European Directive 2001/42/EC: Protect and enhance all biodiversity and geological features and avoid irreversible losses it fails to meet standards set by UK Governments Water Framework Directive. I. The Friends of Southwick Country Park [FoSCP] believe that this site should not have been selected. The Lambrok Stream at the foot of this steeply sloping site, separating it from Southwick Country Park, supports a complex biota that contains species that are protected and species that are vulnerable: Water vole (<i>Arvicola amphibius</i>) - protected under the Wildlife and Countryside Act 1981; Scarce Chaser Dragonfly (<i>Libellula fulva</i>) - listed in Category 3 in the British Red Data Book for Invertebrates Steve Covey, Wiltshire recorder for Dragonflies and Damselflies, writes about the Scarce Chaser in a mail dated 16.10.2018: Bradford on Avon and Melksham is the primary site for this species in Wiltshire. I suspect the park is used as a maturation site for <i>L. fulva</i> which then moves back down to the Avon to breed. In any case, development would affect these watercourses and maybe reduce the number of maturation sites this species might have available Eight species of Odonata (dragonfly and damselfly) see Appendix 1, have been identified in the park. Opposite-leaved pond weed (<i>Groenlandia densa</i>) - listed as vulnerable in both the IUCN's Red List and in the British Red Data Book for vascular plants. Bullhead (<i>Cottus Gobio</i>) - a reportable species in Wiltshire; The River Avon Special Area of Conservation requires the monitoring of local populations of Bullheads. Spined Loach (<i>Cobitis taenia</i>) this a tentative identification of a very rare species that would be listed under Annex II of the EC Habitats and Species Directive. Photographic evidence has been sent to DEFRA. A colony of Swan Mussels (<i>Anodonta cygnea</i>) estimated to be at least 60 years old, indicating good water quality. Bechstein bats (<i>Myotis bechsteinii</i>) listed in Annex II of the EC Habitats Directive, come from the Green Lane Wood roost, using the Lambrok as a green corridor, to feed in the park and the Church Lane site on the insects that breed in the parks stream and ponds. Nine species of bats (see Appendix 2) have been identified in the park. Increased activity this summer has suggested a change in behaviour yet to be assessed by the Wiltshire Bat Group. Thirty nine identified species (see Appendix 3) in the park are directly dependent on Lambrok Stream. Access Southwick Country Parks full species lists here for details of when, by whom and with what evidence identification was made. II. The Friends of Southwick Country Park believe that residential development on the Church Lane site cannot enhance biodiversity in Lambrok Stream and will result in the irreversible loss of species. Wiltshire</p>			

	<p>Council is applying for Local Nature Reserve status for Southwick Country Park. In response to a 2017 application (No. 17/03269/OUT) to develop land between Trowbridge and Southwick, Natural England wrote: If the proposal site is on or adjacent to a local site, e.g. Local Wildlife Site, Regionally Important Geological/Geomorphological Site (RIGS) or Local Nature Reserve (LNR) the authority should ensure it has sufficient information to fully understand the impact of the proposal on the local site before it determines the application. FoSCP believes Wiltshire Council does not have sufficient information to fully understand the impact of the proposal. The Environment Agency, has assessed Lambrok Stream. as part of the Bristol Avon Catchment, since 2009. The current status of the Lambrok is moderate and the EA has a target of good by 2027. Run off from housing development is likely to carry oil from vehicles, salt from defrosting activities, herbicides and nutrients from garden run-off. These will lead to deterioration of the Lambrok water quality unless the run-off is treated using some type of EA approved constructed wetland. The EA classes the Lambrok as a river; this affects which legislation will apply to it. Residential and commercial development are considered significant threats to Opposite- leaved Pondweed. Odonata are indicator species; their life cycle is both aquatic and terrestrial and they respond to stressors in both environments. Research has shown that urbanisation will always result in reduction of numbers and/or species loss. There has been a 90% loss in Water Vole numbers since the middle of the last century which is attributed to fragmentation of habitat, urbanisation, predation and loss of riverside vegetation. FoSCP believes that development at this site will result in the disappearance of the parks small population of Water Voles. Odonata, Swan Mussels and Bullheads depend on the maintenance of high water quality; in particular, the run off from a construction site would do irreversible damage. III. Development at the Church Lane site, the Upper Studley site (H2.5) and Southwick Park site (H2.6) site will not be consistent with the UK Governments ten year plan for the improvement of British waterways. We believe that development at these sites will reduce the water-quality of Lambrok Stream. Wiltshire Council is a partner in Wessex Waters Bristol Avon Catchment Plan which states: Any waterbody that does not meet good ecological status is classified as failing under the European Unions Water Framework Directive. The UK Government aims to ensure all waterbodies meet Good Ecological Status by 2027. The ecological status of Lambrok Stream has been assessed by the EA as moderate on a five point scale (high, good, moderate, poor, bad) and a target of good set for 2027. We believe that Development at the Church Lane, Upper Studley and Southwick Court sites will have a deleterious effect on the water quality of Lambrok Stream. contrary to the improvement which is being sought. Lambrok Stream is part of the Bristol Avon Catchment Plan (BACP). The Bristol Avon Catchment Partnership is developing a 10 year plan that will address environmental issues and target resources. No development should be considered on the H2.4,5 and 6 sites until this Action Plan produces more information. The relevant details of the BACP are in Appendix 5.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	[REFER TO ATTACHMENT FOR FULL REPRESENTATION] The Friends of Southwick Country Park believe that the park and the site at Church Lane are parts of a single landscape, the biodiversity and geodiversity of which should be protected The Lambrok Stream is not a barrier between the two or a boundary to either; it is the centre of a shared geology and ecology. See Appendix 4 Together the park and the sites at Church Lane, Upper Studley and Southwick Court form a single historic landscape of water meadows and old pasture. It is a buffer between town and country which encourages wildlife into the park and protects it from disturbance. The park, Lambrok Stream, the open land. mature trees and veteran trees at Southwick Court and Upper Studley form a wildlife corridor between Trowbridge and the villages of Southwick and North Bradley. The bats from the Green Lane Wood roost use this corridor when they come to the park to feed.

The Friends of Southwick Country Park believe that it will not be possible to protect Lambrok Streams biota from the consequences of development at the Church Lane site and that the development of the site will incur loss of habitat for the parks wildlife. See Response to PC67 The site is steepest on its eastern boundary, the slope exceeding 5%. Tree and hedgerow planting along the SW margins of the site, as proposed will not protect Lambrok Stream from domestic run off or from the effluvia of a building site. See Appendix 4. The site is rough unimproved grassland: old pasture. The perimeter and internal hedges, and the dense scrub at its edges provide daytime cover for roe deer and nesting sites for birds; it supports a large population of field voles, prey for buzzards, owls, kestrel and foxes. The mature oaks in the hedges at the north east boundary and the veteran oak at the centre of the site are roosts from which barn owls hunt. Otters, kingfishers, herons and egrets come up the stream from the River Biss to feed in the park. and in the Church Lane site. During the summer, residents in Church Lane recorded increased bat activity over the site. This has been reported to the Wiltshire Bat Group who have yet to investigate. Wiltshire Councils Tree and Woodland Officer is checking our oaks for signs of new roosts. Residential development will bring predators into the park; cats and magpies.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] The ecological importance of these sites has not been assessed. WHSAP does not recognise the ecological importance of the Lambrok. The Sustainability Appraisal of the sites at Church Lane, Upper Studley and Southwick Court suggests, without evidence, that development of these three sites will be an opportunity to enhance the biodiversity of the stream. All the evidence that we have, contradicts that suggestion; urbanisation will not improve the biodiversity of Lambrok Stream, it will pose a threat to it. WHSAP treats Lambrok Stream as a landscape feature; PC72 proposes that there will be social, environmental and economic advantages to the developments; PC 73 proposes that the flood plain of Lambrok Stream should be enhanced as a local amenity feature. The Lambrok has form and function in the landscape that will not be enhanced by residential development; the Lambrok is habitat for species that will not survive development. The use of trees and hedges as natural drainage attenuation will not slow drainage sufficiently to protect the stream from run-off from the steep slopes on its northern bank. Anything less than EA-approved constructed wetlands will result in pollutants reaching the stream. There has been no assessment of the complex ecological importance of Southwick Courts 16th Century moat, which the Lambrok flows through. It acts as a reservoir for the stream, and its biota, preventing the stream from drying up and offering refuge during periods of drought. It is probable that some of our species of Odonata breed there. There have been unsubstantiated suggestions that the moat harbours great crested newts (Triturus cristatus). An ecological assessment (pages13 &amp;14) carried out FPCR for Gladman Land (Planning Application No.17/03269/OUT) in an application to build on another part of Southwick Court, came to the conclusion there were no great crested newts but closer examination of the report shows that the moat and another nearby pond were not included in the analysis. We feel the importance of the green space between Southwick and Trowbridge cannot be over-emphasised. It is part of the wildlife corridor that runs south of the town connecting the woodlands to the east with the open farmland to its west. To close it will fragment habitat and limit the passage of wildlife in and out of Southwick Country Park.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Q4 Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not. Change Reference Number: PC67 Amend the boundary of the allocation as set out in Annex E. And first sentence of paragraph 5.67 to read: Approximately 3.72 5.93 ha of land at Church Lane is allocated for the development of approximately 45 dwellings, as identified on the Policies Map." The proposed change to the site area is not considered sound unless there is also a change to the proposed quantum of development. For the reasons set out below, the wording of paragraph 5.67 should be amended to read: Approximately 5.93 ha of land at Church Lane is allocated for the development of a minimum of 45 dwellings, as identified on the Policies Map." Overall the proposed allocation at Church Lane is welcomed and an outline planning application for residential development was submitted to Wiltshire Council in October 2018. All matters aside from access have been reserved for subsequent approval. An indicative masterplan has been submitted with the application and this illustrates the site is capable of accommodating circa 65 homes. The application and the masterplan have been informed by a raft of technical reports, including a Design and Access Statement, Preliminary Landscape and Visual Appraisal, Transport Assessment, Flood Risk Assessment, Outline Drainage Strategy, Preliminary Ecological Appraisal including bat, badger and reptile surveys, a Built Heritage Assessment and an Archaeological Desk Based Assessment. As such, the constraints of the site are clearly understood by the site owner and the design team and the proposed figure of circa 65 dwellings is considered entirely appropriate and justifiable. Paragraph 117 of the NPPF stipulates that planning policies should promote an effective use of land in meeting the need for homes, while safeguarding and improving the environment. Furthermore, paragraph 122 makes it clear that planning policies should support development that makes efficient use of land. Paragraph 123 also requires that where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities and ensure that developments make optimal use of the potential of each site. The resulting density from the parameters set down by the proposed changes to paragraph 5.67 would be 9.1 dwellings per hectare. Advocating such a low density is not consistent with the NPPF and would not reflect the development potential of the site. The arbitrary figure of 45 dwellings is not supported by any evidence from Wiltshire Council and in other supporting documents that feed into the Wiltshire Housing Sites Allocations Plan, the number of dwellings proposed has ranged from 45 up to 129, without any robust, consistent, evidence-based assessment of the sites opportunities and constraints: [TABLE - REFER TO ATTACHMENT] The Wiltshire Core Strategy seeks to deliver a minimum of 42,000 new homes across Wiltshire between 2006 and 2026, with at least 24,270 provided in the North and West Wiltshire Housing Market Area (NWWHMA). The most recent Housing Land Supply Statement (March 2018), highlights that the average annual</p>			

	<p>completions across the Plan period for the NWWHMA is currently 1,184 against an annual target of 1,237. Only 96% of the requirement has been met since 2006. If Wiltshire is to meet its minimum housing need, policies must seek to maximise densities, taking into account site specific factors. In the case of Church Lane, the significant technical work that has been undertaken provides confidence that the site could accommodate a higher quantum of development than currently envisaged, without detriment to ecological, landscape or heritage assets. Paragraph 5.67 should be amended to allow for upward flexibility and therefore a more appropriate density for the number of dwellings proposed. In its current form, paragraph 5.67 is considered to be unsound, in that it is not justified, or consistent with national planning policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC3 we note that Table 4.1 has been updated through the PC which refers to Annex A, Table 4.1. We also note that for the North and West Wiltshire HMA the figures for Developable Commitments, 2017 2026 has reduced and the Minimum to be allocated figure has increased as set out in Annex A. The update is provided following the monitoring work that has been undertaken since the publication of the pre-submission draft Plan. The evidence to support the change is found at Topic Paper 3 Housing Land Supply Addendum (TOP/03C) and Topic Paper 4 Developing Plan Proposals TOP/04C). The Table is important as it sets out how many units are required to be delivered via the allocations in the three HMAs. Noting that Trowbridge and Warminster are the focus for allocations in this HMA (as set out at Table 4.2) then our previous views regarding the need to allocate sufficient land in the right places in and around Trowbridge are of relevance. In this respect, the commentary at para. 3.6 in Topic Paper 3 states that there have been delays in delivery at key principal settlements including Trowbridge. This reiterates the need to identify sufficient land that is actually going to deliver the minimum amount of homes needed for the town. At para. 3.8 we note the reference to the significant number of large site permissions granted in the 2017 monitoring year having bolstered supply. However there needs to be careful analysis of the ability of those sites to deliver development at the rates anticipated noting the updated guidance in both the NPPF and PPG in relation to this point. Tables 3.3 and 3.4 within the Topic Paper needs to be carefully assessed and reviewed accordingly to ensure that an adequate housing land supply can be demonstrated. The consequences of the housing land supply position for each HMA is set out in paras. 3.14 to 3.16 and, in relation to the North and West HMA we support the assertion (made at para. 3.15) regarding the need for additional allocations.

<b>Identify Proposed Change Reference Number</b>	PC13				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC13, PC15, PC17, PC21, PC22, PC23, PC24, PC26, PC55 PC73 (inclusive) - the changes identified relate to the provision of development in the North and West HMA and Trowbridge. We do not, at this part of our representation, question any of the information put forward except in relation to the identification of the components of supply as those figures impact upon the amount of land that is to be allocated. In this respect our comments at PC3 regarding the definition of a truly deliverable site and its inclusion as a commitment needs to be carefully examined. The amendment to Table 4.7 confirms the latest position regarding housing land supply in relation to each individual HMA. Again, careful analysis is required of the commitments and windfall allowance in order to establish that those figures are robust. At PC25 a summary is provided of the six proposed allocations for Trowbridge in terms of the number of units that, collectively, those allocations can provide. The figure of 1,050 reflects the amended totals identified in PC13 for four of the proposed allocations. The Council/Inspector should be aware that we have not undertaken a rigorous assessment of each site. However, the changes proposed both in relation to the amount of housing now required to be allocated for Trowbridge and the increase in capacity highlights a number of concerns. First, the changes at PC25 and 26 explain that the shortfall in land supply is due to lack of delivery at Ashton Park (a strategic allocation in the Core Strategy) and notwithstanding the changes to the capacity of four of the allocations, housing development will fall short of the Core Strategy figure at an increased level (1,297 dwelling shortfall as opposed to 1,220 as originally identified). This demonstrates that the uncertainty around delivery of Ashton Park is having a significant impact on the delivery at Trowbridge. The Council is suggesting that Ashton Park will deliver 1,250 post 2026 but the Ashton Park allocation is required in total to assist with meeting the housing requirement of 6,810 units to 2026. That being the case, then the shortfall needs to be addressed with even greater urgency and that can only be achieved by properly planned growth that includes a sufficient number of allocations that are capable of delivering the required number of units. The second point is that we note that the capacity of four of the allocations has increased by 200 units which, in its own right, is not unacceptable if sufficient land that has the ability to properly deliver development is being made to accommodate the additional number of units or there has been a practical re-evaluation of densities. However, on the face of it, the increase in numbers suggests that the Council may be seeking to address the shortfall through squeezing units out of sites. There is, however, an alternative strategy and that is to deliver further unconstrained sites such as that which is being promoted by our Client. Land at Organpool Farm can deliver up to 100 units in a sustainable location when considering all of the site constraints. It is our view that to overlook this site as a potential housing allocation to contribute to meeting the needs of the HMA is shortsighted, particularly owing to its proximity to Trowbridge where the delivery of homes is being brought into question. The third point we wish to make is that it is noted that in</p>				

	<p>respect of some of the allocations additional criteria have been added in terms of matters to be addressed to ensure delivery. A number of the sites are in multiple ownership e.g. H2.1 now includes Council owned land. Clarification on whether this has been agreed for by the Councils Estate Dept. or relevant Dept. is advised. Furthermore, the delivery of these sites could be impacted upon as there are significant constraints relating to drainage and heritage assets in particular. We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC13, PC15, PC17, PC21, PC22, PC23, PC24, PC26, PC55 PC73 (inclusive) - the changes identified relate to the provision of development in the North and West HMA and Trowbridge. We do not, at this part of our representation, question any of the information put forward except in relation to the identification of the components of supply as those figures impact upon the amount of land that is to be allocated. In this respect our comments at PC3 regarding the definition of a truly deliverable site and its inclusion as a commitment needs to be carefully examined. The amendment to Table 4.7 confirms the latest position regarding housing land supply in relation to each individual HMA. Again, careful analysis is required of the commitments and windfall allowance in order to establish that those figures are robust. At PC25 a summary is provided of the six proposed allocations for Trowbridge in terms of the number of units that, collectively, those allocations can provide. The figure of 1,050 reflects the amended totals identified in PC13 for four of the proposed allocations. The Council/Inspector should be aware that we have not undertaken a rigorous assessment of each site. However, the changes proposed both in relation to the amount of housing now required to be allocated for Trowbridge and the increase in capacity highlights a number of concerns. First, the changes at PC25 and 26 explain that the shortfall in land supply is due to lack of delivery at Ashton Park (a strategic allocation in the Core Strategy) and notwithstanding the changes to the capacity of four of the allocations, housing development will fall short of the Core Strategy figure at an increased level (1,297 dwelling shortfall as opposed to 1,220 as originally identified). This demonstrates that the uncertainty around delivery of Ashton Park is having a significant impact on the delivery at Trowbridge. The Council is suggesting that Ashton Park will deliver 1,250 post 2026 but the Ashton Park allocation is required in total to assist with meeting the housing requirement of 6,810 units to 2026. That being the case, then the shortfall needs to be addressed with even greater urgency and that can only be achieved by properly planned growth that includes a sufficient number of allocations that are capable of delivering the required number of units. The second point is that we note that the capacity of four of the allocations has increased by 200 units which, in its own right, is not unacceptable if sufficient land that has the ability to properly deliver development is being made to accommodate the additional number of units or there has been a practical re-evaluation of densities. However, on the face of it, the increase in numbers suggests that the Council may be seeking to address the shortfall through squeezing units out of sites. There is, however, an alternative strategy and that is to deliver further unconstrained sites such as that which is being promoted by our Client. Land at Organpool Farm can deliver up to 100 units in a sustainable location when considering all of the site constraints. It is our view that to overlook this site as a potential housing allocation to contribute to meeting the needs of the HMA is shortsighted, particularly owing to its proximity to Trowbridge where the delivery of homes is being brought into question. The third point we wish to make is that it is noted that in</p>				

	<p>respect of some of the allocations additional criteria have been added in terms of matters to be addressed to ensure delivery. A number of the sites are in multiple ownership e.g. H2.1 now includes Council owned land. Clarification on whether this has been agreed for by the Councils Estate Dept. or relevant Dept. is advised. Furthermore, the delivery of these sites could be impacted upon as there are significant constraints relating to drainage and heritage assets in particular. We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC13, PC15, PC17, PC21, PC22, PC23, PC24, PC26, PC55 PC73 (inclusive) - the changes identified relate to the provision of development in the North and West HMA and Trowbridge. We do not, at this part of our representation, question any of the information put forward except in relation to the identification of the components of supply as those figures impact upon the amount of land that is to be allocated. In this respect our comments at PC3 regarding the definition of a truly deliverable site and its inclusion as a commitment needs to be carefully examined. The amendment to Table 4.7 confirms the latest position regarding housing land supply in relation to each individual HMA. Again, careful analysis is required of the commitments and windfall allowance in order to establish that those figures are robust. At PC25 a summary is provided of the six proposed allocations for Trowbridge in terms of the number of units that, collectively, those allocations can provide. The figure of 1,050 reflects the amended totals identified in PC13 for four of the proposed allocations. The Council/Inspector should be aware that we have not undertaken a rigorous assessment of each site. However, the changes proposed both in relation to the amount of housing now required to be allocated for Trowbridge and the increase in capacity highlights a number of concerns. First, the changes at PC25 and 26 explain that the shortfall in land supply is due to lack of delivery at Ashton Park (a strategic allocation in the Core Strategy) and notwithstanding the changes to the capacity of four of the allocations, housing development will fall short of the Core Strategy figure at an increased level (1,297 dwelling shortfall as opposed to 1,220 as originally identified). This demonstrates that the uncertainty around delivery of Ashton Park is having a significant impact on the delivery at Trowbridge. The Council is suggesting that Ashton Park will deliver 1,250 post 2026 but the Ashton Park allocation is required in total to assist with meeting the housing requirement of 6,810 units to 2026. That being the case, then the shortfall needs to be addressed with even greater urgency and that can only be achieved by properly planned growth that includes a sufficient number of allocations that are capable of delivering the required number of units. The second point is that we note that the capacity of four of the allocations has increased by 200 units which, in its own right, is not unacceptable if sufficient land that has the ability to properly deliver development is being made to accommodate the additional number of units or there has been a practical re-evaluation of densities. However, on the face of it, the increase in numbers suggests that the Council may be seeking to address the shortfall through squeezing units out of sites. There is, however, an alternative strategy and that is to deliver further unconstrained sites such as that which is being promoted by our Client. Land at Organpool Farm can deliver up to 100 units in a sustainable location when considering all of the site constraints. It is our view that to overlook this site as a potential housing allocation to contribute to meeting the needs of the HMA is shortsighted, particularly owing to its proximity to Trowbridge where the delivery of homes is being brought into question. The third point we wish to make is that it is noted that in</p>				

	<p>respect of some of the allocations additional criteria have been added in terms of matters to be addressed to ensure delivery. A number of the sites are in multiple ownership e.g. H2.1 now includes Council owned land. Clarification on whether this has been agreed for by the Councils Estate Dept. or relevant Dept. is advised. Furthermore, the delivery of these sites could be impacted upon as there are significant constraints relating to drainage and heritage assets in particular. We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC13, PC15, PC17, PC21, PC22, PC23, PC24, PC26, PC55 PC73 (inclusive) - the changes identified relate to the provision of development in the North and West HMA and Trowbridge. We do not, at this part of our representation, question any of the information put forward except in relation to the identification of the components of supply as those figures impact upon the amount of land that is to be allocated. In this respect our comments at PC3 regarding the definition of a truly deliverable site and its inclusion as a commitment needs to be carefully examined. The amendment to Table 4.7 confirms the latest position regarding housing land supply in relation to each individual HMA. Again, careful analysis is required of the commitments and windfall allowance in order to establish that those figures are robust. At PC25 a summary is provided of the six proposed allocations for Trowbridge in terms of the number of units that, collectively, those allocations can provide. The figure of 1,050 reflects the amended totals identified in PC13 for four of the proposed allocations. The Council/Inspector should be aware that we have not undertaken a rigorous assessment of each site. However, the changes proposed both in relation to the amount of housing now required to be allocated for Trowbridge and the increase in capacity highlights a number of concerns. First, the changes at PC25 and 26 explain that the shortfall in land supply is due to lack of delivery at Ashton Park (a strategic allocation in the Core Strategy) and notwithstanding the changes to the capacity of four of the allocations, housing development will fall short of the Core Strategy figure at an increased level (1,297 dwelling shortfall as opposed to 1,220 as originally identified). This demonstrates that the uncertainty around delivery of Ashton Park is having a significant impact on the delivery at Trowbridge. The Council is suggesting that Ashton Park will deliver 1,250 post 2026 but the Ashton Park allocation is required in total to assist with meeting the housing requirement of 6,810 units to 2026. That being the case, then the shortfall needs to be addressed with even greater urgency and that can only be achieved by properly planned growth that includes a sufficient number of allocations that are capable of delivering the required number of units. The second point is that we note that the capacity of four of the allocations has increased by 200 units which, in its own right, is not unacceptable if sufficient land that has the ability to properly deliver development is being made to accommodate the additional number of units or there has been a practical re-evaluation of densities. However, on the face of it, the increase in numbers suggests that the Council may be seeking to address the shortfall through squeezing units out of sites. There is, however, an alternative strategy and that is to deliver further unconstrained sites such as that which is being promoted by our Client. Land at Organpool Farm can deliver up to 100 units in a sustainable location when considering all of the site constraints. It is our view that to overlook this site as a potential housing allocation to contribute to meeting the needs of the HMA is shortsighted, particularly owing to its proximity to Trowbridge where the delivery of homes is being brought into question. The third point we wish to make is that it is noted that in</p>				

	<p>respect of some of the allocations additional criteria have been added in terms of matters to be addressed to ensure delivery. A number of the sites are in multiple ownership e.g. H2.1 now includes Council owned land. Clarification on whether this has been agreed for by the Councils Estate Dept. or relevant Dept. is advised. Furthermore, the delivery of these sites could be impacted upon as there are significant constraints relating to drainage and heritage assets in particular. We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC13, PC15, PC17, PC21, PC22, PC23, PC24, PC26, PC55 PC73 (inclusive) - the changes identified relate to the provision of development in the North and West HMA and Trowbridge. We do not, at this part of our representation, question any of the information put forward except in relation to the identification of the components of supply as those figures impact upon the amount of land that is to be allocated. In this respect our comments at PC3 regarding the definition of a truly deliverable site and its inclusion as a commitment needs to be carefully examined. The amendment to Table 4.7 confirms the latest position regarding housing land supply in relation to each individual HMA. Again, careful analysis is required of the commitments and windfall allowance in order to establish that those figures are robust. At PC25 a summary is provided of the six proposed allocations for Trowbridge in terms of the number of units that, collectively, those allocations can provide. The figure of 1,050 reflects the amended totals identified in PC13 for four of the proposed allocations. The Council/Inspector should be aware that we have not undertaken a rigorous assessment of each site. However, the changes proposed both in relation to the amount of housing now required to be allocated for Trowbridge and the increase in capacity highlights a number of concerns. First, the changes at PC25 and 26 explain that the shortfall in land supply is due to lack of delivery at Ashton Park (a strategic allocation in the Core Strategy) and notwithstanding the changes to the capacity of four of the allocations, housing development will fall short of the Core Strategy figure at an increased level (1,297 dwelling shortfall as opposed to 1,220 as originally identified). This demonstrates that the uncertainty around delivery of Ashton Park is having a significant impact on the delivery at Trowbridge. The Council is suggesting that Ashton Park will deliver 1,250 post 2026 but the Ashton Park allocation is required in total to assist with meeting the housing requirement of 6,810 units to 2026. That being the case, then the shortfall needs to be addressed with even greater urgency and that can only be achieved by properly planned growth that includes a sufficient number of allocations that are capable of delivering the required number of units. The second point is that we note that the capacity of four of the allocations has increased by 200 units which, in its own right, is not unacceptable if sufficient land that has the ability to properly deliver development is being made to accommodate the additional number of units or there has been a practical re-evaluation of densities. However, on the face of it, the increase in numbers suggests that the Council may be seeking to address the shortfall through squeezing units out of sites. There is, however, an alternative strategy and that is to deliver further unconstrained sites such as that which is being promoted by our Client. Land at Organpool Farm can deliver up to 100 units in a sustainable location when considering all of the site constraints. It is our view that to overlook this site as a potential housing allocation to contribute to meeting the needs of the HMA is shortsighted, particularly owing to its proximity to Trowbridge where the delivery of homes is being brought into question. The third point we wish to make is that it is noted that in</p>				

	<p>respect of some of the allocations additional criteria have been added in terms of matters to be addressed to ensure delivery. A number of the sites are in multiple ownership e.g. H2.1 now includes Council owned land. Clarification on whether this has been agreed for by the Councils Estate Dept. or relevant Dept. is advised. Furthermore, the delivery of these sites could be impacted upon as there are significant constraints relating to drainage and heritage assets in particular. We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] PC13, PC15, PC17, PC21, PC22, PC23, PC24, PC26, PC55 PC73 (inclusive) - the changes identified relate to the provision of development in the North and West HMA and Trowbridge. We do not, at this part of our representation, question any of the information put forward except in relation to the identification of the components of supply as those figures impact upon the amount of land that is to be allocated. In this respect our comments at PC3 regarding the definition of a truly deliverable site and its inclusion as a commitment needs to be carefully examined. The amendment to Table 4.7 confirms the latest position regarding housing land supply in relation to each individual HMA. Again, careful analysis is required of the commitments and windfall allowance in order to establish that those figures are robust. At PC25 a summary is provided of the six proposed allocations for Trowbridge in terms of the number of units that, collectively, those allocations can provide. The figure of 1,050 reflects the amended totals identified in PC13 for four of the proposed allocations. The Council/Inspector should be aware that we have not undertaken a rigorous assessment of each site. However, the changes proposed both in relation to the amount of housing now required to be allocated for Trowbridge and the increase in capacity highlights a number of concerns. First, the changes at PC25 and 26 explain that the shortfall in land supply is due to lack of delivery at Ashton Park (a strategic allocation in the Core Strategy) and notwithstanding the changes to the capacity of four of the allocations, housing development will fall short of the Core Strategy figure at an increased level (1,297 dwelling shortfall as opposed to 1,220 as originally identified). This demonstrates that the uncertainty around delivery of Ashton Park is having a significant impact on the delivery at Trowbridge. The Council is suggesting that Ashton Park will deliver 1,250 post 2026 but the Ashton Park allocation is required in total to assist with meeting the housing requirement of 6,810 units to 2026. That being the case, then the shortfall needs to be addressed with even greater urgency and that can only be achieved by properly planned growth that includes a sufficient number of allocations that are capable of delivering the required number of units. The second point is that we note that the capacity of four of the allocations has increased by 200 units which, in its own right, is not unacceptable if sufficient land that has the ability to properly deliver development is being made to accommodate the additional number of units or there has been a practical re-evaluation of densities. However, on the face of it, the increase in numbers suggests that the Council may be seeking to address the shortfall through squeezing units out of sites. There is, however, an alternative strategy and that is to deliver further unconstrained sites such as that which is being promoted by our Client. Land at Organpool Farm can deliver up to 100 units in a sustainable location when considering all of the site constraints. It is our view that to overlook this site as a potential housing allocation to contribute to meeting the needs of the HMA is shortsighted, particularly owing to its proximity to Trowbridge where the delivery of homes is being brought into question. The third point we wish to make is that it is noted that in</p>				

	<p>respect of some of the allocations additional criteria have been added in terms of matters to be addressed to ensure delivery. A number of the sites are in multiple ownership e.g. H2.1 now includes Council owned land. Clarification on whether this has been agreed for by the Councils Estate Dept. or relevant Dept. is advised. Furthermore, the delivery of these sites could be impacted upon as there are significant constraints relating to drainage and heritage assets in particular. We note that the Council has addressed these matters through the submission of evidence to support the allocations. However, in our view there is a real danger that with there being complexities in relation to the delivery of these sites that they may not realistically contribute towards meeting the housing requirement for Trowbridge. It is our suggestion that the Council should identify further suitable sites so that they are futureproofing the Plan. If this does not happen then there is the potential for speculative planning applications to arise creating a situation where plan led growth will not occur. Therefore, as stated earlier, we have reviewed the Plan having regard to the tests of soundness as set out in paragraph 35 of the NPPF. The modifications do not overcome our concerns as previously stated regarding the ability of the sites identified to make a real and genuine contribution to meeting the housing requirement identified in the Core Strategy. The strategy for delivery of housing in the Plan is not effective noting that there are reasonable alternatives that can deliver and the strategy has not been properly justified. We therefore object to the submitted Plan as proposed to be modified.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC3 provides an update of Table 4.1 Housing Market Areas: Minimum to be allocated. As the Plan has already been submitted for Examination (on the basis of NPPF 2012) it is noted that for the purposes of Plan-making the housing land supply should be calculated in accordance with the NPPF 2012 (as recognised in paragraph 3.1 3.2 of Topic Paper 3 Housing Land Supply Addendum July 2018) according to paragraph 214 of NPPF 2018. However, for the purposes of development management (ie the consideration of planning applications) the new NPPF 2018 applies for the calculation of the housing land supply. Therefore as soon as the Plan is adopted the housing land supply will be different to that considered through the local plan examination. It is noted that Topic Paper 3 sets out the before position ie it excludes the proposed allocations. Table 3.4 of Topic Paper 3: Housing Land Supply Addendum identifies that the housing land supply position of the South Wiltshire HMA will decline rapidly unless the emerging allocations are found to be sound, which cannot be guaranteed. Even when the allocations are included in Topic Paper 4, Table 6.6, on the basis of the Councils assessment there is a only five year housing supply until the monitoring year of 2021. The amendments to Table 4.1 show that the minimum to be allocated has increased from 594 dwellings to 1,331 dwellings, reflecting the reduction in supply of approximately 1,058 dwellings. It is noted that the strategic allocation of Churchfields, Salisbury is no longer included in the supply as it is subject to significant delay and therefore is not included in the plan period to 2026. In addition we have questioned some of the commitments, eg 200 homes at the Central Car Park site (Salisbury). It is widely known that this site together with Churchfields have been long standing allocations (ref Wiltshire Core Strategy Core Policy 20). Similar to Churchfields, the Central Car Park is in commercial use with no evidence or application coming forward to indicate its deliverability within the plan period. Pegasus continue to object to the inclusion of the Central Car Park site of which 100 dwellings are anticipated on the site in the plan period. Including this site as part of the developable commitments is both misleading and contrary to paragraph 14 of the NPPF (2012), which states that local planning authorities should positively seek opportunities to meet the development needs of their area and should meet their objectively assessed needs. Furthermore, it is noted that paragraph 6.2 of Topic Paper 4 July 2018 states that there is uncertainty as to whether the full number of units allocated at the Kings Gate, Amesbury strategic allocation will be delivered. As a result there remains a residual requirement to be met in the South Wiltshire HMA and significant uncertainty over those sites that are included in the deliverable supply. The Councils response is to propose a new allocation of 14 dwellings at The Yard, Salisbury, rely on an delivery at Fugglestone Red (a site with planning permission) and the proposed allocation a</p>			

	Netherhampton Road, the anticipated delivery from these sites during the plan period is questioned. An objection is made to the deliverable supply this is addressed in detail in response to PC15 and PC17.

<b>Identify Proposed Change Reference Number</b>	PC4				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC4 is the changes proposed to paragraph 4.2 to clarify that the figures in Table 4.1 do not include windfalls. The proposed changes to Table 4.1 ( PC3) clearly show that the minimum to be allocated in the South Wiltshire HMA has increased by approximately 55%. Our objections to PC15 Table 4.7 have questioned the methodology for windfalls. An objection is made to the approach to windfalls which has deviated from the approach in the adopted Wiltshire Core Strategy. The approach in the Core Strategy was found sound, (but conservative) by the Inspector. The Council are now using an approach which gives a higher figure and are relying on a greater number of large windfall sites than found sound by the Inspector. In the adopted Core Strategy the Council relied upon Method 1 (as set out in the July 2014 HLSS) ie for South Wiltshire over 5 years the windfall allowance was 230 dwellings. The Council are now using Method 3 from the 2014 HLSS (now referred to as Method A) which generates 330 dwellings over the 5 years. However, the consistent application of Method 3 / Method A shows how the number of windfalls has decreased over time ie from 449 dwellings over 5 years to 330 dwellings over 5 years. This shows windfalls are declining and yet the Council persist with a method which is totally reliant on historic trends of windfalls. The Council are also allocating sites, therefore the capacity is reduced for windfalls as these sites will come forward as allocations. This would suggest that the number of windfalls will be below the declining historic trend. It is considered that going forward, for the remaining plan period that there is an over reliance on windfalls in the South Wiltshire HMA.

<b>Identify Proposed Change Reference Number</b>	PC15				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC15 provides an update to Table 4.7 HMA housing land supply to reflect the latest housing land supply statement. The latest assessment of the developable supply which is available is contained in the Wiltshire Housing Land Supply Statement Update March 2018 (HLSS) with a base date of April 2017. The Councils latest evidence indicates that from April 2018 the Council are unable to demonstrate a five-year land supply against the adopted requirement without the emerging allocations, this is based on NPPF 2012 which allows a far more permissive definition of a deliverable site. Whilst this is acceptable as the Plan was submitted under the transition arrangements, once the Plan is adopted the assessment of housing land supply will be subject to the new NPPF 2018 and the housing delivery test (the latter is to be published in November 2018). NPPF 2018 fundamentally changes the assessment of deliverable supply, such that certain sources of supply should only be considered deliverable where the Council provides clear evidence that the first completions will be achieved within five-years. We have undertaken an assessment of the deliverable supply in accordance with NPPF 2012 and conclude that the Council is only able to demonstrate a deliverable supply of 2,593 homes, which equates to a 4.20 year land supply rather than the figure of 5.7 years supply as suggested in amendments to Table 4.8 (PC17). Given the figures in the adopted Wiltshire Core strategy are a minimum housing requirement and given that the housing land supply as currently calculated is fragile towards the end of the plan period, and furthermore given the delay in the preparation of the Wiltshire Core Strategy (it cannot be relied upon to address the shortfall) it is considered that a contingency should be included for the South Wiltshire Housing Market Area. Land to the north of Old Sarum has been submitted to the Council, indeed this area (Longhedge) along with land at Netherhampton was recognised in paragraph 5.112 of the Wiltshire Core Strategy ( adopted January 2015) as:- broad areas of search for future development around Salisbury are mapped in Topic Paper 19 (see map Potential Areas for Strategic Growth in and around Salisbury/Wilton ) 45. If further land is required in the future, sites at Netherhampton and additional growth at Longhedge should be considered as part of the councils ongoing monitoring process. An objection has already been made to Policy H3.1 the inclusion of land at Nerthhamton Road for 640 dwellings and questioned the deliverability of the site in the plan period. It is noted that whilst in the Housing Site Allocations Plan, land at Netherhampton Road, Salisbury is proposed in the Plan for 640 dwellings, however, according to the HLSS March 2018, only 520 are envisage to be delivered in the plan period and this is assuming a start date of 2021/22 with 40 dwellings in that year and thereafter 120 dwellings per annum. Evidence Windfalls In our reps to PC4 we have questioned the windfall figure. As can be seen from page 113 of the Housing Land Supply Statement, the number of windfall completions and permissions is highly variable (ranging between circa 40 and 170 dwellings per annum in South Wiltshire). This is as a result of the influence of occasional large site windfalls which cause significant variation from the broadly</p>			

consistent level of delivery of small site windfalls. The Council now simply assume that the historic average rates persist without evidence that there is the capacity to sustain previous rates of large site windfall delivery. This means that exceptional windfall permissions (which will not be replicated) become embedded in the trends which the Council relies upon in the future, even if there are no similarly sized potential sites which could replicate that which has occurred. Such an approach cannot be sound. Saved Local Plan Allocations The Council continue to rely upon the delivery of saved Local Plan allocations in the Table 4.7. Appendix 1 of the HLSS, March 2018 although the number of sites and the contribution from those sites has reduced significantly as the Council have acknowledged that the Churchfield site will not come forward until beyond the plan period. There are still some saved local plan sites that are included: The saved local plan allocations from the South Wiltshire Local Plan are: Bulbridge {45 dwellings} Salisbury District LP 2003 and carried forward to South Wiltshire Core Strategy (adopted 2012). Bulbridge this site is a saved allocation from the Salisbury District Local Plan which was adopted in June 2003. In the intervening 15 years, no planning application has been received for the development of this site. This record alone indicates that there is no realistic prospect of delivery according to the PPG (3-020). This site is not subject to any planning application. Oldstock hospital {45 dwellings} this sites also dates from the Salisbury District Local Plan and is not envisaged to delivery until 2022/23, some 20 years later from when it was allocated. Old Manor Hospital {9 dwellings} Salisbury District LP 2003 and carried forward to South Wiltshire Core Strategy (adopted 2012). It was allocated for 80 dwellings. A full planning permission has been granted for 71 dwellings (15/09465/FUL) and the remainder of the allocated area has gained permission or been built for alternative uses (including care homes and a primary healthcare facility). There is therefore no remaining capacity for the residual 9 dwellings to be built. However, the Council include these remaining 9 dwellings for which there is no capacity, and which is not the subject of detailed consent within their deliverable supply. It can be concluded that these sites were allocated in June 2003 and saved again in February 2012. In the intervening years these sites have not delivered and as such they are unlikely to provide a reliable source of supply in the future. Proposed Allocations It is evident from the HLSS March 2018 that the allocations comprise 173 dwellings of the deliverable supply for 2017-2022. Due to the reliance on one large site and commitments, the housing land supply deteriorates towards 2022/23. (Table 4.8 PC 17). Housing Land Supply There is a difference in the deliverable housing land supply from that set out in the Housing Land Supply Statement published March 2018 (base date April 2017). Table 2 states that the deliverable supply 2017 2022 for South Wiltshire is 3,173 dwellings (this corresponds with Appendix 4 of the HLSS) however, when compared to Table 6.5 in Topic Paper 4 July 2018, the figure for the deliverable supply is 3,187 dwellings. The difference being 14 dwellings which is the proposed allocation: The Yard, Salisbury. For reasons set out above, eg question the reliance on windfalls, the saved allocations and the deliverability of some of the proposed allocations, we do not believe the housing supply as set out in Topic Paper 4. There remains no up-to-date housing trajectory to support the Proposed Changes.

<b>Identify Proposed Change Reference Number</b>	PC16				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC16 refers to paragraph 4.32 which is proposed to be updated to reflect the HLSS March 2018. The amended text states that for the supply exceeds the five year requirement through to the end of the plan period for all years except for four in South Wiltshire HMA, and then states that by then additional allocations will be included within the review of the Wiltshire Core Strategy. However, the Wiltshire Core Strategy is significantly delayed. It is over twelve months since there was a consultation on the scoping of the Core Strategy Review and no further consultation is envisaged until the latter part of 2019. Consequently, the Site Allocations Plan will not be able to rely upon the Wiltshire Core Strategy to address the housing shortfall later in the plan period. Even based on the Councils assessment of housing land supply, the position deteriorates in 2019/2020 onwards so that by 2022/23 the housing land supply is vulnerable being only 5.14 years (PC17 Table 4.8). In order to ensure that there is a five year housing land supply it is considered that a contingency site needs to be included in the plan ie land north of the Portway, Old Sarum which has previously been identified in the Wiltshire Core Strategy as an area suitable for additional growth.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC 17 relates to Table 4.8 HMA Five Year Housing Land Supply. Topic Paper 4 paragraph 6.6 acknowledges that a 5 year housing land supply with a 5% buffer can only be demonstrated until 2021 and this is calculated on the basis of NPPF 2012 which takes a more permissive approach to assessing deliverable sites. We have already made the point in representations to PC4 that once the Local Plan is adopted the method for the calculation of housing land supply will change and therefore the position is not as robust as set out in Topic Paper 4 July 2018. Therefore it is considered that the Plan should include a contingency site ie land north of the Portway, Old Sarum which is in the Longhedge area which was acknowledged in the Adopted Wiltshire Core Strategy as if further land is required in the future, sites at Netherhampton and additional growth at Longhedge should be considered as part of the councils ongoing monitoring process. (paragraph 5.112). Land at Netherhampton Road is proposed in the Site Allocations Plan, but the allocation of 640 dwellings is not deliverable in the Plan period to 2026 ( approximately 120 dwellings are envisaged post 2026). This is set out in the Councils evidence base the HLASS published March 2018. Pegasus has already submitted detailed objections on behalf of Dolphin Farms Ltd in September 2017 objecting to the Netherhampton Road site (Policy H3.1) and promoting land north of the Portway, Old Sarum which has been assessed in the preparation of the Housing Site Allocations Plan. We have objected to the Sustainability Appraisal of the site and provided evidence to support our objections when we responded to the consultation on the Plan in September 2017. Our previous representations set out that land north of the Portway (SHLAA site S80) should be considered as a more sustainable location for growth that can be delivered in the plan period, which would contribute to some of the housing provision on which Policy H.3 is reliant and also in recognition that the housing land supply deteriorates through the plan period. The land to the north of the Portway is well placed to accommodate growth in order to meet local housing needs and help sustain the new community at Old Sarum/Longhedge. We have outlined in our previous representations that over a period of 10 years or so, the Local Planning Authority has developed a strategy which has focussed development on Old Sarum, with the objective of creating a new community with a high level of self containment whilst having good public transport links to the city centre. SHLAA site S80 is well located in relation to the mixed use developments at both sites. The south western boundary adjoins the northern phases of housing with the Old Sarum development, including an area of parkland along approximately half of the boundary. Its north western boundary adjoins the Longhedge development albeit that the adjoining area is also proposed for parkland. Site 690 and the Longhedge are both contained by the Monarchs Way bridleway. The land is well related to the existing development with direct access to the highway network and in single ownership. The land is available and a number of technical studies have been undertaken to inform</p>			

	the masterplanning of the site. These were submitted to the Council in September 2017 to support our representations on the Site Allocations Draft Plan.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC27 provides an update to Table 4.11 South Wiltshire HMA - distribution of housing development 2006-2026. It is noted that the developable commitments includes the proposed allocations. The developable commitments has reduced from 3,833 dwellings to 2,970 dwellings, it is considered that this figure should be reduced further to reflect the uncertainties surrounding the central car park site (even though only 100 dwellings is included in the plan period at this site) and also to acknowledged the uncertainties in relation to the delivery of housing at Kings Gate, Amesbury (paragraph 6.3 Topic Paper 4 July 2018). Based on the Councils figures the developable commitments excluding proposed allocations for Salisbury and Wilton are 2,226 (Table 2.3 Community Topic Area Paper Salisbury July 2018), allocations comprise: Netherhampton Road reduced in the HLSS for the plan period to delivery 540 dwellings ( allocated for 620 dwellings) Hilltop Way 10 dwellings North of Netherhampton Road 100 dwellings Land at Rowbarrow 100 dwellings The Yard 14 dwellings The total allocations proposed to delivery in the plan period is 744 dwellings. Compared with the residual requirement of 866 for Salisbury and Wilton (Table 2.3 of the Community Topic Paper July 2018 referred to above), leaving a shortfall which is to be met by windfalls in Salisbury and Wilton. We have critised the assumptions for the windfall figure in our response to PC4. In view of our objections to the Housing Land Supply and our objections to the allocation of Netherhampton Road ( the latter is set out in detail in response to the Draft Plan in September 2017) it is considered that the developable commitments (which includes proposed allocations) should be increased to reflect the fact the overall housing requirement is a minimum (indicative housing requirement and is therefore not a ceiling figure). The Council based on their own figures acknowledge that the surplus amount possible over the indicative requirement for the plan eriod is modest even at face value . In view of the above there should be a contingency site included in order to support/maintain the five year housing land supply and housing delivery across the plan period and support the role of Salisbury as the Principal Settlement and focus for development in the HMA.</p>

<b>Identify Proposed Change Reference Number</b>	PC29				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC29 amends paragraph 4.64 to the effect that two allocations of over 500 dwellings provide a large source of supply . However, one of the allocations was included in the Wiltshire Core Strategy ie Fuggleston Red and has planning permission and is continuing to be developed. The other allocation is a proposed allocation at Netherhampton Road. The reliance on these two sites is significant. Of the proposed allocations in the Salisbury Community Area ie 850 dwellings, the plan proposes 74% on one site at Netherhampton Road (Policy H3.1), which is not envisaged to commence delivery until 2021/22 and then only 40 dwellings are anticipated. Thereafter, 120 dwellings are expected with the site continuing to delivery post 2026 beyond the plan period. We have in our response to Policy H3.1 of the Draft Plan in September 2017 objected to the site and outlined our major concerns in respect of traffic, landscape, water supply and deliverability. The proposed changes do not provide any further information to support the proposed allocation of land at Netherhampton Road, (Site 1208) Policy H3.1. There is no evidence to indicate that the development could come forward by overcoming the very real constraints and develop a comprehensive mixed use strategy within the plan period. Furthermore, it is noted that both sites ie land to the north of Netherhampton Road (Policy H3.3) and land at Netherhampton Road (Policy H3.1) comprising proposed allocations of 640 dwellings and 100 dwellings respectively are in the control of the same developer Bovis Homes. The HLSS ( March 2018) indicates that both sites will start to deliver with 40 dwellings each in 2021/22 and then the following year 120 dwellings are expected from land at Netherhampton Road and 60 dwellings from land north of Netherhampton Road, ie 180 dwellings from Bovis Homes in a year. Even on the basis of the Councils own evidence for a forthcoming inquiry the average that has been achieved on one site is 117 dwellings ( on land North, West and South of Bishopdown Farm - Barratt David Wilson). We remain of the view that the approach taken in the Housing Site Allcoations Plan to allocate 74% of the Salisbury housing allocations in one location, with many unknown and unresolved issues, risks a significant housing shortage in Salisbury within the plan period. By limiting the potential housing supply to one large site in Salisbury, the plan conflicts with paragraph 14 of the NPPF which states that: Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to prapid change. Should sites S1028 and S1027 fail to deliver within the plan period, the Plan as currently proposed does not allow for sufficient flexibility for an alternative, deliverable site to come forward in accordance with policy. It is considered that the Plan should address this issue and a contingency site at land north of the Portway, Old Sarum should be included in the Plan, this site should be allocated and can then support the five year housing land supply.</p>

<b>Identify Proposed Change Reference Number</b>	PC31				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC31 amends paragraph 4.68 to reflect that the intention is that Fuggleston Red (instead of Churchfields) and the Netherhampton Road site will deliver new homes alongside each other towards the end of the plan period. For reasons set out in response to the Proposed Changes this is not considered to be a robust and effective strategy as the anticipated delivery per year from these sites is questionable. I refer to our previous representations on Policy H3.1 which questioned the delivery from the Netherhampton Road site and also reference was made a report into the delivery of urban extensions on behalf of Gladman Developments Limited in 2014 and the also the Savills study on behalf of Barratt Homes in 2014. Nathaniel Lichfield and Partners produced a report 'Start to Finish' in November 2016 which also illustrates the long lead in times for large sites, that on average it took 3.9 years lead in time for large sites prior to the submission of the first planning application. Pegasus remain concerned that the sites that the Council rely upon will not delivery as set out in the housing trajectory.

<b>Identify Proposed Change Reference Number</b>	PC99				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Hallam Land Management Limited (HLM) and Velcourt Limited object to PC99 on the basis that development encroaching above the 70 metre contour would have an adverse effect on the approach and landscape setting of Salisbury along Netherhampton Road. In addition to the landscape and setting concerns HLM and Velcourt raised at the Regulation 19 stage in their objection to Policy H3.1, the ability for built development to encroach above the 70 metre contour would fail to have full regard to the Stage 4a Site Landscape Assessment whereby the Capacity to Accommodate Change is Low and both the Magnitude of Effect on Landscape Character and Views are High Adverse. There is limited, if any, logic to potentially increasing these visual and landscape adverse effects by pushing built development further up the slope. HLM and Velcourt also find it somewhat curious that there are no comments similar to PC104 concerning the historic setting of Salisbury.

<b>Identify Proposed Change Reference Number</b>		PC104			
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC104 highlights the concerns raised by Hallam Land Management Limited (HLM) and Velcourt Limited to the suitability and appropriateness of allocating land north of Netherhampton Road for housing development (Policy H3.3). By reason of the sensitivity of this site for the setting of historic Salisbury, the heritage assessment should already have been undertaken to determine what the capacity of the land might be to accommodate development (if at all). Indeed, the Heritage Impact Assessment (HIA - March 2018) has been published post the Regulation 19 version of the Local Plan rather than informing decisions about the principle and suitability of land to include in the Local Plan as allocations. HLM and Velcourt consider that the belated preparation of the HIA is seeking to justify the allocation after a decision has been taken rather than informing the assessment process. The HIA identifies the following which indicate the very real and significant harm development on land north of Netherhampton Road would cause to important heritage assets: Historic Setting of Salisbury and the Cathedral The nature, scale (particularly height and massing) and location of any development proposed on the site will be critical in determining precise levels of impact. Nevertheless, it is likely that harm will occur as a consequence, interacting with the aesthetic value of the Cathedral and potentially reducing the ability to appreciate the asset (and Salisbury) in its rural landscape and topographical setting. The communal values of the asset may also be affected, although the extent to which the view is valued by the public is not clear. With regard to the Conservation Area, impact on this strategic view could be held to directly conflict with the requirements of the Conservation Area Appraisal. Taking a precautionary approach, it is likely that the effect would be at least medium-high given the importance of the asset and the sensitivity of this element of its setting to change. (paragraph 9.19) It is unlikely that the effects of development could be entirely avoided or satisfactorily mitigated with regard to impacts on strategic views. Development would therefore be very likely to conflict with the requirement to conserve strategic views set out in the City of Salisbury Conservation Area Appraisal and Management Plan (2014). (paragraph 9.24) Archaeological Matters While the significance of the on-site archaeological assets is not anticipated to be of an order likely to completely constrain development, the presence of at least regionally significant later prehistoric industrial activity in close association with putative settlement suggests that a precautionary approach is advisable. (paragraph 9.21) These issues go to the very heart of the soundness of the proposed allocation and, if it were to be retained, what is this sites real capacity is to accommodate built development without causing the significant harm to designated heritage assets as identified in the HIA. For these reasons, HLM and Velcourt object to the inadequacy of PC104 to address the real heritage concerns associated with the land north of Netherhampton Road.</p>

<b>Identify Proposed Change Reference Number</b>	PC110				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC110 Hallam Land Management Limited and Velcourt Limited objected to the principle of the Rowbarrow housing allocation (Policy H3.4) and PC110 confirms the concerns raised relating to heritage matters are clear material considerations, specifically the impact on a designated heritage asset of national importance. There remains no clear evidence that development could occur within the allocation without significant detriment to the setting of the Scheduled Ancient Monument notwithstanding PC110. Even if the allocation is retained, then what is the realistic capacity? Given the recognised heritage constraint, it is unfathomable why the Heritage Impact Assessment (HIA March 2018) does not include any assessment of the proposed Rowbarrow allocation. This comment is made notwithstanding the fact that the HIA appears to have been prepared after the Council made the decision to include this allocation in the Local Plan. HLM and Velcourt consider that the belated preparation of the HIA is seeking to justify the allocation after a decision has been taken rather than informing the assessment process. For these reasons, HLM and Velcourt object to the inadequacy of PC110 to address the real and significant heritage concerns associated with Rowbarrow.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the proposal to remove the Ridgeway Farm site from the Wiltshire Housing Site Allocation Plan on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to "small sites" to meet local needs. Further development of the Ridgeway Site would lead to even greater traffic flows down what is already a very busy road without continuous pavements to the Village Hall. It is already dangerous for mums with youngchildren who walk this way to the local village pre-school As a young person, I decided to get involved with the Neighbourhood Plan and assisted on one of their Focus Groups and it is my belief that it is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), is very well supported by the community and is planning to not only allocate land to meet identified needs but to also make provision for the younger generations in any new development. The Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>On behalf of the CCG I have had look at the latest planning website information as suggested and the following is the CCG's position. Clearly there is a lot of information contained in the latest Council submission which runs to hundreds of detailed documents. However the headlines I have gleaned are:- The housing numbers are constantly under review by Wilts Council. Market conditions affect deliverability and we seem to be seeing a cooling of the market. Some of the more rural areas have already met their allocation up to 2026. There is some fairly minor tweaking of settlement boundaries to reflect what has actually been built on the ground since the last plan and to reflect natural / logical boundaries. The pace of delivery for Trowbridge is a big problem due to not meeting certain environmental and ecology requirements. Salisbury is also a problem because a certain large, fairly central site has not come forward quickly enough. The growth areas are concentrated in the larger urban areas particularly Trowbridge (2000), Salisbury (3000) and Chippenham (2000) (figures in brackets approx. residual numbers i.e. still to be built). Also we have seen draft projections for the plan period up to 2036 that increase all of these numbers, particularly for (in order of magnitude highest to lowest) Melksham, Trowbridge, Chippenham and Devizes. Generally the CCG are not in the position of objecting to new housing, but we do need to keep making the point that, when the L.P.A. grants permission for housing, this has a direct effect on the provision of health care in the area affected by that new housing. It is easiest to demonstrate a direct correlation with primary care, but where it becomes more difficult is to make a case for other NHS providers (such as secondary care, acute, ambulance service etc.) but this is not to say those organisations should not also have the opportunity to comment and make representations. Due to the potential enormous uplift in values of land with planning consent there should be enough money in the planning system to support an element of primary care development, in particular for GP premises, which is easiest to quantify. The CCG is aware that it has a challenge of getting health up the agenda in order to join traditional Council financed services, such as highways and schools which, as we are aware, are also under pressure. The NHS also has the challenge of arguing a case against housing developers / landowners and their agents, even though those same developers seem more accepting of the need to pay for local schools and highways works etc. Our experience is that where a good case is made and the local planning officer is supportive the chances of a successful NHS bid increase. The main challenge for the CCG is following these things through, which can take years to come to fruition. Funds normally flow through to the Local Authority (e.g. on the construction of the 100 th house) not automatically to the NHS, so again this needs to be monitored and a case made to secure those funds. The CCG then will have the responsibility to ensure the money is spent as originally indicated, otherwise the developer/ landowner can expect to be paid back if they are not used as agreed and within a specified timescale. Therefore the timing of any receipt and expenditure by the CCG via a practice</p>				

	development becomes key. To summarise the CCG do not object to the proposed housing as such in the draft Allocations Plan but wish to be fully consulted on the plan as it proceeds and on any applications for housing of, say above 50 dwellings, in order that a case can be made for financial support via S106 or CIL where appropriate and look to the LPA to support those bids.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively Prepared: NO - Development requirements have been overprovisioned in the Westbury Community Area by 245 houses. No further allocations are required Justified; NO - The Site 738 and 321 developments are non-compliant with the Core Strategy Policy 1, Clause 1.15. i.e. "Small housing sites are defined as sites involving fewer than 10 dwellings". The Council's assessment of Bratton as a "Large Village" is flawed and incorrect, in essence, over counting the number of recreation and sports fields. The development of both sites has been assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households with an increase of 26 houses in the following 10 years. Therefore a further 40 houses will increase the proposed 15 year growth to 12.9% Neither development complies with the EXAM/02A (WHSAP Sustainability Appraisal Sept 2018). Housing allocations should match employment opportunities to reduce out-migration for work and developments should be located in close proximity to employment site to reduce commuting. Clearly Bratton does not comply with this definition. The increase in cars per household, normally an average of 2 per dwelling, will increase traffic flows, noise and pollution. Traffic has doubled through Bratton in the last 3 years. The previous applications for these sites was rejected on the unsuitability of the entrances for the sites as they were considered dangerous to traffic on the main road due to poor visibility for pedestrians and drivers. Additionally, There is little opportunity for bicycle lanes either side of highway. What has changed to make these entrances less dangerous? Developments of this size will add to the pressures the Bratton school and on the NHS, in particular, Bratton Surgery. Already the White Horse Surgery in Westbury is exceeding capacity due to the vast housing estates being built in Westbury and Doctor's appointment have to be made up to 3 weeks in advance. Loss of green space and agricultural land Effective: NO - Large developments in a village the size of Bratton are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with National Policy: NO - Large scale housing developments in "Large Villages" are not promoted by National Policy. Additional Comments: My concern with this proposal is that the developers have already applied for 57 houses on these two sites which exceeds the total (44) required by the community by 13 more houses. The danger here is that there is no doubt that they will try to shoe-horn in more houses as building commences, as they did in Rosenheim Rise (numbers 5 and 7) and in Manor Fields Estate. The proposed estate entrances on the B3098 have already been considered as dangerous and unacceptable and it would be difficult to make any improvements to the road to make any difference to the safety of other road users.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>My name is [REDACTED]. My wife [REDACTED] and I have owned and lived at Mount Pleasant, Quarry Hill, Box, Corsham, Wiltshire S13 8LP since July 1976. Yesterday evening a neighbour pointed out to us that our garden is not included in the current settlement boundary on the Box Plan included in the Corsham Community Area Topic Paper. This morning we got in touch with [REDACTED], Senior Planning Officer at Wiltshire Council, who assisted us in finding the map online. The map outlines the villages Settlement Boundaries suggested (?) in 2015, 2017 and 2018. To our surprise our garden is excluded from them all. Our curtilage extends into J5, J6, K5 and K6. We are surprised to find the black and red boundary line obliterates our house, but that may be from a conflict of scales. What is evidently clear from its omission is our triple garage located in K5 for which the preceding Planning Authority gave us planning permission somewhen early on in our ownership. In the forty-two plus years we have lived here we have supported applications for and seen houses built in divided gardens on the other side of Quarry Hill. We have always assumed that some of our large garden could likewise be given up for much needed housing. The exclusion of our garden from sequential boundary delineations seems most arbitrary. After studying the detail of the published plan, we can find no other example in the village where a long established curtilage has been cut off from its dwelling house. As the subject of your examination is in part to judge on the sufficiency of available housing sites within proposed boundaries, we would ask that you could eliminate a patent boundary anomaly that limits further the very limited housing options within our village.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>WILTSHIRE COUNCIL WILTSHIRE HOUSING SITE ALLOCATION PLAN SCHEDULE OF PROPOSED CHANGES - CONSULTATION</p> <p>OCTOBER 2018 Highways England welcomes the opportunity to comment on the Schedule of proposed changes to the emerging Wiltshire Housing Site Allocation Plan (WHSAP). As you are aware Highways England is responsible for operating, maintaining and improving the Strategic Road Network (SRN) to support its primary function - that is the safe and efficient movement of people and goods, alongside its long term integrity. In the Plan area, the SRN comprises parts of the M4 and A36. In recognition of our responsibilities, the following comments are made. Highways England previously provided a formal consultation response dated 21 September 2017 for the pre submission draft of the WHSAP. A further consultation response was provided dated 29 March 2018 in relation to proposed additional housing sites. While this response addresses further changes, the same policy requirements set out in the letter dated 21 September 2017 continue to apply to the WHSAP and the new sites identified. Matters arising from the Schedule of proposed modifications of the Plan It is noted that there are an 250 additional dwellings proposed in Trowbridge across 4 site allocations which were previously assessed by Highways England. Furthermore, all site allocations within Market Lavington (80 dwellings) and Crudwell (50 dwellings) have been omitted from the Plan. Strategic Road Network (A36) updated references; PC74 Warminster Updated to include a reference that new developments are required to address any direct or indirect cumulative impact on the A36. PC100 Update provided to highlight that a refresh of the Salisbury Transport Strategy has taken place in dialogue with Highways England. PC106 Netherhampton Updated to highlight that Transport Assessment is necessary, in addition to the provision of network improvements in conjunction with development proposals Highways England welcomes these updates to the WHSAP which strengthen the requirement for proposals to be supported by appropriate transport assessment and mitigation necessary to ensure that impact on the SRN is not severe. Salisbury Transport Strategy (STS) and A36 Southampton Road Study Highways England has worked collaboratively with Wiltshire Council to refresh the Salisbury Transport Strategy which sets out a package of high-level highways and transport interventions to improve accessibility and support growth and development across the city. In parallel to the STS refresh and recognising particular constraints at A36 Southampton Road, Highways England is progressing a study to identify potential options to improve the existing performance and operation of this link and to help to facilitate growth aspirations across the City. Highways England is working closely with Wiltshire County Council in the development of this study, which will dovetail with the Salisbury Transport Strategy. The study is due to conclude in early 2019. Both highway authorities recognise the challenges of the existing and predicted situations resulting from growth along the A36T through Salisbury. Highways England welcome the opportunity to continue to work with the Council to further develop a joint understanding of the issues, problems and</p>				

	limitations of the existing network, and thus work towards the identification of interventions that will enable the safe accommodation of growth whilst also delivering improvements to journey times and journey reliability.

As you are aware Highways England is responsible for operating, maintaining and improving the Strategic Road Network (SRN) to support its primary function - that is the safe and efficient movement of people and goods, alongside its long term integrity. In the Plan area, the SRN comprises parts of the M4 and A36. In recognition of our responsibilities, the following comments are made. Highways England previously provided a formal consultation response dated 21 September 2017 for the pre submission draft of the WHSAP. A further consultation response was provided dated 29 March 2018 in relation to proposed additional housing sites. While this response addresses further changes, the same policy requirements set out in the letter dated 21 September 2017 continue to apply to the WHSAP and the new sites identified. Matters arising from the Schedule of proposed modifications of the Plan It is noted that there are an 250 additional dwellings proposed in Trowbridge across 4 site allocations which were previously assessed by Highways England. Furthermore, all site allocations within Market Lavington (80 dwellings) and Crudwell (50 dwellings) have been omitted from the Plan. Strategic Road Network (A36) updated references; PC74 Warminster Updated to include a reference that new developments are required to address any direct or indirect cumulative impact on the A36. PC100 Update provided to highlight that a refresh of the Salisbury Transport Strategy has taken place in dialogue with Highways England. PC106 Netherhampton Updated to highlight that Transport Assessment is necessary, in addition to the provision of network improvements in conjunction with development proposals Highways England welcomes these updates to the WHSAP which strengthen the requirement for proposals to be supported by appropriate transport assessment and mitigation necessary to ensure that impact on the SRN is not severe. Salisbury Transport Strategy (STS) and A36 Southampton Road Study Highways England has worked collaboratively with Wiltshire Council to refresh the Salisbury Transport Strategy which sets out a package of high-level highways and transport interventions to improve accessibility and support growth and development across the city. In parallel to the STS refresh and recognising particular constraints at A36 Southampton Road, Highways England is progressing a study to identify potential options to improve the existing performance and operation of this link and to help to facilitate growth aspirations across the City. Highways England is working closely with Wiltshire County Council in the development of this study, which will dovetail with the Salisbury Transport Strategy. The study is due to conclude in early 2019. Both highway authorities recognise the challenges of the existing and predicted situations resulting from growth along the A36T through Salisbury. Highways England welcome the opportunity to continue to work with the Council to further develop a joint understanding of the issues, problems and</p>			

	limitations of the existing network, and thus work towards the identification of interventions that will enable the safe accommodation of growth whilst also delivering improvements to journey times and journey reliability.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>WILTSHIRE COUNCIL WILTSHIRE HOUSING SITE ALLOCATION PLAN SCHEDULE OF PROPOSED CHANGES - CONSULTATION</p> <p>OCTOBER 2018 Highways England welcomes the opportunity to comment on the Schedule of proposed changes to the emerging Wiltshire Housing Site Allocation Plan (WHSAP). As you are aware Highways England is responsible for operating, maintaining and improving the Strategic Road Network (SRN) to support its primary function - that is the safe and efficient movement of people and goods, alongside its long term integrity. In the Plan area, the SRN comprises parts of the M4 and A36. In recognition of our responsibilities, the following comments are made. Highways England previously provided a formal consultation response dated 21 September 2017 for the pre submission draft of the WHSAP. A further consultation response was provided dated 29 March 2018 in relation to proposed additional housing sites. While this response addresses further changes, the same policy requirements set out in the letter dated 21 September 2017 continue to apply to the WHSAP and the new sites identified. Matters arising from the Schedule of proposed modifications of the Plan It is noted that there are an 250 additional dwellings proposed in Trowbridge across 4 site allocations which were previously assessed by Highways England. Furthermore, all site allocations within Market Lavington (80 dwellings) and Crudwell (50 dwellings) have been omitted from the Plan. Strategic Road Network (A36) updated references; PC74 Warminster Updated to include a reference that new developments are required to address any direct or indirect cumulative impact on the A36. PC100 Update provided to highlight that a refresh of the Salisbury Transport Strategy has taken place in dialogue with Highways England. PC106 Netherhampton Updated to highlight that Transport Assessment is necessary, in addition to the provision of network improvements in conjunction with development proposals Highways England welcomes these updates to the WHSAP which strengthen the requirement for proposals to be supported by appropriate transport assessment and mitigation necessary to ensure that impact on the SRN is not severe. Salisbury Transport Strategy (STS) and A36 Southampton Road Study Highways England has worked collaboratively with Wiltshire Council to refresh the Salisbury Transport Strategy which sets out a package of high-level highways and transport interventions to improve accessibility and support growth and development across the city. In parallel to the STS refresh and recognising particular constraints at A36 Southampton Road, Highways England is progressing a study to identify potential options to improve the existing performance and operation of this link and to help to facilitate growth aspirations across the City. Highways England is working closely with Wiltshire County Council in the development of this study, which will dovetail with the Salisbury Transport Strategy. The study is due to conclude in early 2019. Both highway authorities recognise the challenges of the existing and predicted situations resulting from growth along the A36T through Salisbury. Highways England welcome the opportunity to continue to work with the Council to further develop a joint understanding of the issues, problems and</p>			

	limitations of the existing network, and thus work towards the identification of interventions that will enable the safe accommodation of growth whilst also delivering improvements to journey times and journey reliability.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Historic England note and welcome the proposed clarifications / modifications that seek to ensure due regard is had to conserving the significance of the affected heritage assets and their setting. However, during recent discussion with the local authority and site promoters, it was apparent that to avoid undue harm to the significance of Southwick Court, the design of any future road across the site and junction off the A361 (Frome Road) required a very sensitive bespoke approach; a rural/parkland/ country estate typology with discreet low level lighting and unobtrusive signage to minimise harmful intrusion within this historic landscape. It will be important for the Plan to clearly set out such expectations.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Historic England note the proposed modifications that seek to ensure due regard is had to conserving the significance of the affected heritage assets and their settings. However, during a recent meeting with the Local Authority and site promoter, it became apparent that at present it could not be demonstrated with any degree of confidence that a residential scheme could come forward to accord with the objectives of the Plan and its specific conditions for the site; legislation, national policy and guidance in respect of the great weight that needs to be afforded the conservation of affected heritage assets and their setting. It was left for the site promoters and Wiltshire Council to reconsider the matter. At present Historic England consider the site allocation is inappropriate.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Historic England note and welcome the proposed modifications that seek to ensure due regard is had to conserving the significance of the affected heritage assets and their settings. This is an important site in relation to the integrity of historic Salisbury, its Cathedral and the wider landscape setting. There is some doubt that a scheme could accord with the objectives of the Plan, the site specific conditions, national policy and guidance in respect of the great weight that needs to be afforded the conservation of affected heritage assets and their setting, primarily in this respect, Salisbury Cathedral. However at a recent constructive meeting with the local authority and site promoter, it was agreed that further evidence might be prepared and submitted to provide a degree of reasonable confidence that a scheme could be forthcoming that delivers a satisfactory housing development in accordance with the above expectations. We await the outcome of such further work before the proposed allocation can be considered appropriate. The Plan should also make clear how this area of archaeological sensitivity should be addressed.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objection to PC 3 and Annex A Table 4.1 Housing Land Supply [TABLE INSERT] 1. Because the latest completion and commitment figures (PC3) for South Wiltshire (and North and West Wiltshire) increase significantly the minimum to be allocated 2017 2026 (see 5th column above) the Authority (and now the Inspector) need to respond in a sound and responsible and timely way. 2. In the case of South Wiltshire, plainly there is a need to allocate something like twice as much housing because 594 was the target to be allocated in 2017 and the Council now (September 2018) needs to identify a further 737 more houses to bring up the amount of housing to meet the minimum housing requirement up to 1,331. Wiltshire Council is not proposing to do anything about this. 3. In our opinion, the Council (and now the Inspector) must increase the amount of land to be allocated for housing in a commensurate way to meet need and ensure a 5-year housing land supply. (See also our comments regarding PCs 15, 16, 17, 27, 28 and in respect of the Atkins Sustainability Assessment, particularly para 8.3.226 etc.) 4. Furthermore, the wording of the first column as Minimum to be allocated fails to indicate a likely acceptable range contrary to NPPF (1) 6: Delivering a wide choice of high-quality homes. NPPF (1) promotes flexibility and delivery through, inter alia, the use of an additional buffer (para 47). We are therefore asking the Inspector under Section 20 (7C) - because there are only about 7 years left until the end of the plan period (2026) - and given housing need - to identify sufficient land to come forward. It is reasonable to suggest a 5% range, on top of the minimum requirement. We set out below our proposed amendment to Table 4.1. For South Wiltshire, this means the target range should be between 1,331 and 1,852 dwellings between 2017 2026. [TABLE INSERT] 5. Background argument: PC3 is not legally compliant because: (i) it does not appropriately reflect guiding legislation; (ii) nor is it in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 6. The proposed change is not sound because whilst the numbers are factual, the Authority has failed to react to what the new numbers mean and therefore we say this draft document: (1) it is not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) it is not sufficiently justified; (3) it is not able to respond to change; and, (4) it is not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 7. We are asking the Inspector to amend PC 3 that includes Table 4.1 at Annex A in accordance with our paragraph 4 above. Likewise, with the explanatory wording. Our proposed change is set out at Paragraph 8 below. These two changes would enable, with other knock-on amendments elsewhere in the Proposed Changes, the allocation of further housing land at H3.6 Clover Lane, Durrington. Briefing note to the Inspector: As this is the first of our objections, we now enclose site specific information about H3.6 and the adjoining land known as S98. This H3.6/S98 site passes all the key preliminary site Sustainability and Environmental Impact Assessments, in our opinion. This information is attached at</p>				

	Appendix 1. It should have been taken more seriously by Wiltshire Council when it was duly submitted in respect of the Wiltshire Housing Site Allocations Plan back in September 2017. 8. We are suggesting PC3s justification should be amended on p2 of EXAM 01 as follows (our suggestions are in bold below): - factual update to table of figures to reflect the latest Housing Land Supply Statement published March 2018 (base date April 2017) and to increase the allocation of housing land in accordingly and in accordance with Section 6 of NPPF (1).		
<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>		<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation Assessment Addendum (September 2018).</b>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objection to PC 15 and Annex A Table 4.7 Windfall and Housing Land Supply [TABLE INSERT] 1. Summary of our windfall objection: the proposed latest windfall allowance 2017 - 2026 in the 5th column seeks to increase the windfall allowance to try to fix the increasing housing land shortfall (see our objection to PC 3 etc). In our opinion, this is contrary to NPPF (1) that is tilted 6: Delivering a wide choice of high-quality homes and also deals with windfall housing. 2. NPPF (1) para 48 promotes flexibility and delivery and warns Planning Authorities not to use an allowance for windfall sites unless the evidence is - realistic - reliable and - compelling. No such evidence has been submitted and those numbers should be viewed with caution. 3. Further, with the considerable tightening of all the main settlements boundaries and the exclusion of residential gardens, infill windfall brownfield housing cannot be a reliable supply: it is a dwindling asset. The forecast amount of windfall sites coming forward should be conservative, robust and reliable, not hopeful and optimistic (fingers crossed). 4. It is very important point to note and in fairness to the Authority, Wiltshire Council do indeed (of course) concede this at para 5.7 of Topic Paper 3 (July 2018): the use of a windfall allowance should not be relied upon. 5. However, it is not realistic to say windfalls should be completely not relied upon. This is too extreme and contradictory a position for the Authority to take. Para 5.7 should be amended accordingly. 6. We are therefore again placing before the Inspector under S20 (7C) an invitation to correct this significant flaw and contradiction in the DPD and supporting paperwork. We are suggesting a simple, robust and reliable 4% windfall allowance (4% of the minimum housing requirement). In the context of our Objection to PC15, this means the windfall for South Wiltshire should be c. 420 dwellings rather than c. 740 between 2017 - 2026: [TABLE INSERT] 7. Forgive the complexity of the next table, but we have applied the 4% windfall to Table 4.7 whilst also taking into account our objection to PC 3 regarding the need to allocate more housing land and identify a housing requirement range, rather than an absolute minimum [TABLE INSERT] 8. Background argument: PC15 is not legally compliant because: (i) it does not appropriately reflect guiding legislation; (ii) nor is it in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of highquality homes. 9. The proposed change in Table 4.7 is not sound because: (1) it is not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) it is not sufficiently justified; (3) it is not able to respond to change; and, (4) it is not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 10. We are asking the Inspector to amend PC 15 and Annex A and particularly Table 4.7 (see above) and also the explanatory wording at Para 5.7 of The Topic Paper 3: HLSA (July 2018).</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objection to PC 16 and PC 17: Five Year Housing Land Supply [TABLE INSERT]</p> <p>1. Summary of our 5 Year Housing Land Supply objection: the proposed latest information (above) is contrary to NPPF (1) 6: Delivering a wide choice of high-quality homes with respect to both South Wiltshire and N/W Wiltshire. The Framework (1) now imposes a duty on Wiltshire Council to take steps to rectify the problem and not rely on a later review of the WCS (Wiltshire Core Strategy) that may take several years. 2. This DPD needs to provide now a reliable and realistic, planned 2018 - 2026, 5 Year Supply to deliver much needed homes of a type and tenure in the right place continuously. 3. Having more than a 5 years housing land supply (much better to have at least 7 or 8 years) also encourages commensurate with the amount - greater choice for consumers. This keeps house prices lower through competition. Having more than 5 years land supply is essential it brings greater surety and greater resilience, should one or more sites be delayed. To correct this flaw that is painfully obvious in PCs 16 and 17, more developable and deliverable land, in accordance with Footnotes 11 and 12 on p12 of NPPF (1) - must be brought forward from the list of Omission Sites etc. Benchmarks proposed revisions to PC 17 include: [TABLE INSERT] 4. PC16 and 17 are not legally compliant because: (i) they do not appropriately reflect guiding legislation; (ii) nor are they in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of highquality homes. 5. PC 16 and PC 17 Table 4.8 and supporting text are not sound because: (1) they are not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) they are not sufficiently justified; (3) they are not able to respond to change; and, (4) they are not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 6. We are asking the Inspector to amend PC 16 and PC17 and Annex A particularly the table (see above) and also the explanatory wording by allocating more land for housing in South Wiltshire (an N + W Wiltshire, too).</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. I agree with everything stated by the neighbourhood plan steering group. Five houses are already undergoing construction. A large number of houses would change the whole character of the village. No more houses should be built until the neighbourhood plan is in place.</p>

The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional Comments: Consultation document not available at Wilts Council Trowbridge on 5/11/18 so unable to comment on specific matters raised. From discussion with Planning Officer (very helpful) I question the need for the quantity of dwellings (35) proposed in the WHSAP. I also believe that an appropriate number of dwelling within the existing village boundary would be preferable. The matter should await the establishment of the Bratton Neighbourhood plan.</p>

<b>Identify subject of representation</b>		Schedule of Proposed Changes - Consultation Document (September 2018) (EXAM/01)	<b>Do you consider the consultation material you are commenting on is unsound because it is not: Positively prepared; Justified; Effective; Consistent with national policy?</b>	(1) Positively prepared; Justified; Effective; Consistent with national policy
<b>Identify Proposed Change Reference Number</b>		PC27		
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objections to PC 27 and PC 28 and Annex A Table 4.11 Housing Land Supply and Annex J by Benchmark (Nov 2018) [TABLE INSERT] 1. Summary of our objection to PC 27 and PC 28: the proposed changes indicate shortfalls in supply but hides key information about how big the shortfall is based on the minimum requirement. The column headings are also misleading. Finally, because of the shortage of developable land (see our objections to PC3, PC 15 etc) the wording of the first column as indicative requirement is not the same as a Minimum to be allocated. In any event, in our opinion, PC27 fails to indicate a likely acceptable range contrary to NPPF (1) 6: Delivering a wide choice of highquality homes. NPPF (1) promotes flexibility and delivery through, inter alia, the use of an additional buffer (para 47). 2. We are therefore asking the Inspector under Section 20 (7C) - because there are only about 7 years left until the end of the plan period (2026) - and given housing need - to identify sufficient land to come forward and improve the 5-year supply of housing land after 2022. It is reasonable to suggest a 5% buffer see revised Table 4.11, next page: [TABLE INSERT] 3. Background argument: PC27 and PC 28 are not legally compliant because: (i) they do not appropriately reflect guiding legislation; (ii) nor are they in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of high-quality homes. 4. The proposed changes are not sound because: (1) they are not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) they are not sufficiently or robustly justified; (3) they are not able to respond to change; and, (4) they are not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 5. We are asking the Inspector to amend PC 27 and Annex A and Annex J - particularly the table (see above) and also the explanatory wording (our suggestions are in bold as follows): Factual Update to table of figures to reflect the latest Housing Land Supply Statement published March 2018 (base date April 2017). This has also been updated to reflect the addition of a new housing allocation at Salisbury and an extended allocation at Durrington and the minimum and top end range of housing requirements (see PC111). (Source: Exam.01 Schedule of Proposed Changes Sept 2018 p10). 6. We do not consider using the word factual is sound (see reasons see above). The impact of the unhealthy increasing gap between (A) minimum housing requirement and ( E ) supply needs to be interpreted and explained, properly, hence our objection to PC 28 etc. 7. Objection to PC 28 We note that paragraph 4.63 below Table 4.11 is an attempt to describe the meaning of the numbers. It is not a factual statement. It is a subjective judgement slightly less generous is to become slightly less generous but these words are still not either reasonable nor proportionate to the shortfall. This is the context: The South Wiltshire HMA has a slightly less generous housing land supply than elsewhere in Wiltshire. (Source: WHSAP0101 Submission Document July 2018). 8. The Council is saying their proposed minimum allocation is an act of generosity. Using the word generous is not fair</p>			

or sensible. It is an exaggeration and misleading. We now suggest the following wording in the context of all our objections and the promotion of H3.6 Clover Lane, Durrington that comprises part of S98 Hackthorne Rd, Durrington (see Plans attached). Benchmarks proposed new para 4.63: The South Wiltshire HMA did not have a sound has a slightly less generous housing land supply than elsewhere in when compared to other areas of Wiltshire in September 2018 and so further land has been brought forward for development before 2026 in the Amesbury, Bulford, Durrington Community Area where the shortfall was significant. The site at H3.6 Clover Lane / Hackthorne Road, Durrington now has an increased minimum allocation from at least 45 to 110, to address this shortfall. (Proposed amendment to para 4.63 by Benchmark, Oct 2018.) 9. Please note, the housing figures do not need to radically change to make the Plan sound. However, making optimal use of locations already preferred for development is a robust and sustainable way forward. Of course, windfall sites will also play a part see our objections to PC 15 where we are suggesting a robust and deliverable windfall figure for South Wiltshire of at least 420 houses 2017 2026 (not the Authoritys over-ambitious 743). 10. We are therefore asking the Inspector to improve the Plan and make it sound, by bringing forward additional land at H3.6 Clover Lane, Durrington (from S98 Hackthorne Road) as follows and see Plans 1 to 5: [TABLE INSERT] 11. In 2016 and then September 2017 and then again in March 2018, we submitted to Wiltshire Council, following several emails and meetings in early 2018, detailed information about H3.6 Clover Lane and S98 Hackthorne Road, Durrington. The Council therefore did have every opportunity to try to re-balance the housing numbers and to fully consult, in the usual way 2016 - 2018. 12. We now understand that the information requested by Officers in March 2018 and submitted at that time has not been submitted to the Secretary of State for consideration at the forthcoming DPD. 13. If the Inspector does consider it sound to increase the supply of allocated land, then he will also need to also receive the same information already submitted to Wiltshire Council in March 2018 in respect of H3.6 and adjoining remnant land: S98 Hackthorne Road, Durrington (about a quarter of S98 is already included in H3.6). 14. We therefore now enclose the March 2018 information, submitted by email: We have pleasure enclosing our response to your emails and the last two recent meetings at your office. Attached to this email you will find: Drainage Technical Note by Baker Gilbey Associates for H3.5 and S98 Land at Clover Lane, DURRINGTON. Their conclusion is: From the initial investigations, the site could readily be serviced in terms of foul and surface water drainage, without impacting on the SSSI or the Groundwater Source Protection Zone (p6). Illustrative layouts to provide you with an idea of the housing numbers, for all the relevant permutations Aerial photos of the site (drone video footage is also available) Our consultant team includes: KP ecology Forum heritage AC Archaeology Bellamy Roberts Highway Engineers (report attached) Baker Gilbey Hydrology and Drainage Engineers (see above) Benchmark master planning & landscape see layouts and all the various submission to the Housing DPD (2014 2018) The Ecology Statement confirms the stables and associated buildings have negligible bat potential and are not suitable for bats. In respect of all the land shown on the illustrative plans (excluding Piece Meadow) it is concluded that: There are no reasons with regards to ecology why this site cannot be developed. Bats are the most important species using the site, but they are doing so along the boundaries, so will need to ensure very low-level lighting/no lighting along these. Other than that as long as you clear vegetation at the right time of year and provide ecological enhancements, there are no significant ecological challenges on H3.5 and S98. Forum Heritage ([REDACTED] of Forum helped write the Durrington Conservation Area Statement) In my opinion ([REDACTED]), the position of the proposed access off Hackthorne Road will not cause harm to the character and appearance of the Durrington Conservation Area. With respect of the Grade II listed Durrington Manor Farmhouse, this house does not seem to have had an important visual relationship with the fields to the west as there is only one window in the west elevation. Similarly, the proposed access will not harm the setting of the Grade II listed Manor House and Hackthorne Cottage. In my view this is a site which is capable of being developed for residential use although the constraints of the Conservation Area and the setting of the Grade II listed Durrington Manor House mean that a design more reflective of the historic uses of the site would be more appropriate AC Archaeology concluded a 2% trench sample would be needed for the planning application stage: Overall, the site has the potential to contain significant archaeological remains that would require mitigation, through planning condition, but I see nothing in the archaeological data that we have to hand that would be of such importance to warrant refusal of permission on historic environment grounds. Bellamy Roberts Highway Engineers have concluded: I am content that an access off Hackthorne

	<p>Road as identified previously is sufficient to accommodate the 140 dwellings. , it would be of benefit to provide a pedestrian/cycle link from the site through the existing access track serving the stables. This would enhance overall permeability. Conclusions: We commend the allocation of the land identified to you because it is available, suitable and viable for residential development and it is both deliverable and developable in terms of footnotes 11 and 12 from the 2012 NPPF and the proposed definition of the word deliverable in the Glossary of the Draft NPPF March 2018. The site is AVAILABLE NOW, OFFERS A SUITABLE LOCATION FOR DEVELOPMENT NOW, AND IT IS ACHIEVABLE WITH A REALISTIC PROSPECT THAT HOUSING WILL BE DELIVERED ON THE SITE WITHIN FIVE YEARS. Yours sincerely 15. We are enclosing at Appendix 1: the information submitted in March 2018. 16. We are also enclosing at Appendix 2: further information on surface water drainage. 17. Appendix 3 refers to our Plan 1 which is based on Annex J re: H3.6 Clover Lane, Durrington: Annex J shows existing H3.6 Clover Lane for at least 45 dwellings (Sep 2018) - see red and blue dotted line - to be extended to include all the adjacent blue land and the allocation increased to at least 110 dwellings (see also Plan 2). All the land shaded blue formally known as S98 is in one ownership and deliverable and developable before 2026 (see evidence already submitted 2016, September 2017 and March 2018 on design, access, ecology, trees, heritage, archaeology, drainage, FRA and phosphates * etc). We are suggesting the enlarged site be called: 3.6 Clover Lane and Hackthorne Road, Durrington see p 130 of this document.</p>		
<p><b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b></p>		<p><b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation Assessment Addendum (September 2018).</b></p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objections to PC 27 and PC 28 and Annex A Table 4.11 Housing Land Supply and Annex J by Benchmark (Nov 2018) [TABLE INSERT] 1. Summary of our objection to PC 27 and PC 28: the proposed changes indicate shortfalls in supply but hides key information about how big the shortfall is based on the minimum requirement. The column headings are also misleading. Finally, because of the shortage of developable land (see our objections to PC3, PC 15 etc) the wording of the first column as indicative requirement is not the same as a Minimum to be allocated. In any event, in our opinion, PC27 fails to indicate a likely acceptable range contrary to NPPF (1) 6: Delivering a wide choice of highquality homes. NPPF (1) promotes flexibility and delivery through, inter alia, the use of an additional buffer (para 47). 2. We are therefore asking the Inspector under Section 20 (7C) - because there are only about 7 years left until the end of the plan period (2026) - and given housing need - to identify sufficient land to come forward and improve the 5-year supply of housing land after 2022. It is reasonable to suggest a 5% buffer see revised Table 4.11, next page: [TABLE INSERT] 3. Background argument: PC27 and PC 28 are not legally compliant because: (i) they do not appropriately reflect guiding legislation; (ii) nor are they in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of high-quality homes. 4. The proposed changes are not sound because: (1) they are not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) they are not sufficiently or robustly justified; (3) they are not able to respond to change; and, (4) they are not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 5. We are asking the Inspector to amend PC 27 and Annex A and Annex J - particularly the table (see above) and also the explanatory wording (our suggestions are in bold as follows): Factual Update to table of figures to reflect the latest Housing Land Supply Statement published March 2018 (base date April 2017). This has also been updated to reflect the addition of a new housing allocation at Salisbury and an extended allocation at Durrington and the minimum and top end range of housing requirements (see PC111). (Source: Exam.01 Schedule of Proposed Changes Sept 2018 p10). 6. We do not consider using the word factual is sound (see reasons see above). The impact of the unhealthy increasing gap between (A) minimum housing requirement and ( E ) supply needs to be interpreted and explained, properly, hence our objection to PC 28 etc. 7. Objection to PC 28 We note that paragraph 4.63 below Table 4.11 is an attempt to describe the meaning of the numbers. It is not a factual statement. It is a subjective judgement slightly less generous is to become slightly less generous but these words are still not either reasonable nor proportionate to the shortfall. This is the context: The South Wiltshire HMA has a slightly less generous housing land supply than elsewhere in Wiltshire. (Source: WHSAP0101 Submission Document July 2018). 8. The Council is saying their proposed minimum allocation is an act of generosity. Using the word generous is not fair		

or sensible. It is an exaggeration and misleading. We now suggest the following wording in the context of all our objections and the promotion of H3.6 Clover Lane, Durrington that comprises part of S98 Hackthorne Rd, Durrington (see Plans attached). Benchmarks proposed new para 4.63: The South Wiltshire HMA did not have a sound has a slightly less generous housing land supply than elsewhere in when compared to other areas of Wiltshire in September 2018 and so further land has been brought forward for development before 2026 in the Amesbury, Bulford, Durrington Community Area where the shortfall was significant. The site at H3.6 Clover Lane / Hackthorne Road, Durrington now has an increased minimum allocation from at least 45 to 110, to address this shortfall. (Proposed amendment to para 4.63 by Benchmark, Oct 2018.) 9. Please note, the housing figures do not need to radically change to make the Plan sound. However, making optimal use of locations already preferred for development is a robust and sustainable way forward. Of course, windfall sites will also play a part see our objections to PC 15 where we are suggesting a robust and deliverable windfall figure for South Wiltshire of at least 420 houses 2017 2026 (not the Authority's over-ambitious 743). 10. We are therefore asking the Inspector to improve the Plan and make it sound, by bringing forward additional land at H3.6 Clover Lane, Durrington (from S98 Hackthorne Road) as follows and see Plans 1 to 5: [TABLE INSERT] 11. In 2016 and then September 2017 and then again in March 2018, we submitted to Wiltshire Council, following several emails and meetings in early 2018, detailed information about H3.6 Clover Lane and S98 Hackthorne Road, Durrington. The Council therefore did have every opportunity to try to re-balance the housing numbers and to fully consult, in the usual way 2016 - 2018. 12. We now understand that the information requested by Officers in March 2018 and submitted at that time has not been submitted to the Secretary of State for consideration at the forthcoming DPD. 13. If the Inspector does consider it sound to increase the supply of allocated land, then he will also need to also receive the same information already submitted to Wiltshire Council in March 2018 in respect of H3.6 and adjoining remnant land: S98 Hackthorne Road, Durrington (about a quarter of S98 is already included in H3.6). 14. 		<b>Person ID:</b> 1123635	<b>Person ID:</b>	<b>Do you consider the Proposed Change to be sound?</b>	No
<b>Identify subject of representation</b>	Schedule of Proposed Changes - Consultation Document (September 2018) (EXAM/01)		<b>Do you consider the consultation material you are commenting on is unsound because it is not: Positively prepared; Justified; Effective; Consistent with national policy?</b>	(1) Positively prepared; Justified; Effective; Consistent with national policy	
<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional Comments: I am greatly concerned over the possible development of the land directly in front of our home in Westbury Road Bratton and the possible effect it will have on our house value and also the impact on our village. The proposed large development is totally out of keeping with the village location. The Westbury Road is already a rat run for commuters to Devizes and Swindon. Trying to pull out onto this road in the morning is a nightmare - the inevitable increase in traffic is only going to make the situation worse. It appears that Wiltshire Council have little interest in what local people think, despite the public consultations/local objection to recent planning applications in Westbury and Warminster they were given approval regardless.</p>

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. From reading, and trying to make sense of the paperwork that I have it would seem that there is no reason or requirement for Bratton to have any development at this time. The road between Bratton and Westbury is an absolute disaster for any and all traffic that has to use it. Adding all those proposed properties would just make the road more dangerous. Little "Westbury Market Town" is surrounded by modern housing which is not compatible with the town itself and it is my understanding that numbers of these properties have not yet been sold. Westbury is now largely a dormitory town with the incomers rising before the day starts to dash off to work in Bath, Swindon and often London. This does not do the finances of Westbury shops any good at all. Building the number of houses suggested in Bratton would have much the same effect turning it into a dormitory village since there is nothing in the way of employment nearby. Bratton surgery is excellent BUT is unlikely to be able to cope with an influx of large numbers of people all requiring medical care. I am very very opposed to these developments for Bratton even should they be scaled down.</p>

The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional Comments: Bratton is not a large village. There is not the proper infrastructure here. Doctor's office always too busy. There are severe parking problems. the traffic through the village is already heavy enough - not to mention the dangers of speeding cars. that particular junction is dangerous. Sightline problems for pedestrians and cyclists' safety have not been considered. There are so many reasons this proposed site is unsuitable and unnecessary: loss of green space, the landscape being spoiled; and the look and feel of the village because of this unsuitable development - Bratton's charm will be effected. Adding more housing in Wiltshire would be far better served in and around Westbury - which is not a village.</p>

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. I already feel that our village is at capacity and its amenities stretched due to this. Our roads are already used to maximum, and many vehicles use smaller roads within the village to avoid traffic hold-ups/queuing and often at an unacceptable speeds. With more traffic entering the village for the suggested housing will only increase the number of vehicles and worsen the situation further and effectively remove the feeling of village life.</p>

There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional Comments: Westbury has already been "over developed", without any apparant concern over schooling or medical facilities. A second medical practice has been required at Westbury for some years. The Westbury over development seems now to be proposed for surrounding villages. There is NO employment in Bratton, so all housing development will necesitate travel to and from the village adding to the problems on the narrow B3098.</p>

Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional Comments: The WHSAP dated July 2018 is not clear on the proposed number of dwellings for site 321. Stage 4A Para 6.24 shows the SHLAA capacity as 32, but 6.26 shows "capacity after mitigation" of 40, a figure that is repeated in Table 7.1. The problems of safe vehicular and pedestrian access to this site will be greater if 40 units are to be constructed, Even 32 units will pose considerable problems in the provision of safe access, which need to be fully addressed PRIOR to any approval given for development. Site 738 is unsuitable for the reasons detailed above, the potential provision of both sites with joint access to the B3098 is completely unsuitable.</p>

Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. 35 + 22 = 57 houses. This is far too many for any sized village. Only the school might benefit. Where will the people go for employment? The cars coming onto the already busy and narrow entrance to the village is alarming.</p>

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional Comments: I fully support all of the above points. The planned development for sites 321/738 is far too large and Bratton's amenities simply could not support the increase in population. A small development which would blend in with the existing properties may work and I have every confidence that the Neighbourhood Plan being compiled by the village will be far more suitable due to their knowledge and experience and consultation with the villages which has been excellent so far.</p>

<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<p><b>[REFER TO ATTACHMENT FOR FULL REPRESENTATION]</b></p> <p>Objections to Atkins Sustainability Appraisal (Sept 2018) regarding paragraph 8.3.226 by Benchmark (Oct 2018)</p>				

**Assessment Addendum  
(September 2018).**

What does para 8.3.226 say?

[TABLE INSERT]

1. We need to raise an objection to the proposed new text because it is misleading and confusing. However, to begin to understand our point of view, we need to set out the factual background.

2. First, sites S98 and 3154 are defined quite clearly on page 122 under paragraph 7.3.6 of the SA (Exam02ASA). Here is the extract, albeit 'zoomed-in' to assist the reader:

[MAP INSERT]

3. Second, in the table immediately below is the SA score for site S98 owned by our clients. NB Site S98 has an area of about 5 ha and a capacity for about 110 dwellings (see our housing layout Plan 5 attached to our objections to PCs 27 and 28)

[TABLE INSERT]

4. Third, Piece Meadow (site 3154) has a site capacity of about 15 dwellings.

5. So, this means that we can agree with the Authority about the capacity of the two sites (shaded yellow on the map above) as being broadly:

[TABLE INSERT]

6. Perhaps the simple explanation of our confusion might be that the Authority has simply made a 'typo' and the sentence in para 8.3.226 should read ...

"This allocation has been formed from a combination of sites S98 and 3154. These sites were assessed individually in the SA. The allocation of 45 dwellings in the Schedule of Proposed Changes results in a significant reduction in the number of dwellings considered across these two sites (15 103 for Site S98 and 103 15 for Site 3154). This reduction in site size overall addresses some of the sustainability issues identified for these two sites."

7. However, there is a more important point we wish to make about the SA generally, this paragraph as a whole and even more particularly the final sentence in paragraph 8.3.226 that states: "This reduction in site size overall addresses some of the sustainability issues identified for these two sites." Why is the word "overall" used? Is there a difference between the "sustainability issues" for 3154 and S98? (Surely: yes?) ... and several other questions. This is a puzzling sentence not helped by it not being very good English. We think it means a subjective judgement has been made and that several considerations weighed in the balance at the same time. But, frustratingly, this isn't explained. And we wonder if the site has been properly assessed and understood? Certainly, Atkins have never contacted us – whatsoever – to discuss.

8. On balance Atkins/Wiltshire Council probably consider that site 3154 can accommodate 15 dwellings and S98: 30 dwellings? Of course, a total of 45 dwgs.

9. Just to be clear, this 45 dwelling-judgement does not include the parcel of land between 3154 and S98, as shown in blue on the plan below that has had, in the past, planning permission for about 15 houses. This field is a paddock attached to the house called Piece Meadow (3154).

[MAP INSERT]

10. So, this leads us to consider that the amendment to the Sustainability Appraisal, taking an ordinary reading of the words at face value, probably means that Atkins / Council should already support 60 dwellings at H3.6 (not 45), as the table demonstrates below:

[TABLE INSERT]

11. The housing layout plans below, are our interpretation of the situation, showing 60 and 75 dwelling options. Both are comfortable, well designed layouts that are deliverable and developable:

[MAP INSERT]

[MAP INSERT]

12. In the light of all our comments and objections to the emerging Housing DPD and supporting documents (Nov '18), we have demonstrated that there is a need to make optimal use of housing land and locations and allocate more land to meet need and provide a better 5-year housing land supply, post 2021.

13. We are therefore asking the Inspector, as a minimum, to amend the DPD wording to allow an optimal use of the land at H3.6 Clover Lane and adjoining land, including Piece Meadow and S98 for 60 dwellings. We cannot see any reason why Atkins/Wiltshire Council can object, in the light of their SA evidence.

14. But there is more to our case. We are asking the inspector for more than the minimum of 60 dwellings at H3.6. We are asking for at least 100 dwellings.

15. Our team of consultants have produced evidence that we now enclose, that assesses the site thoroughly enough at this stage and adds the information the SA (Sept '18) does not include. The SA does not explain how the decision to divide S98 was made or where the greater areas of sensitivity might be. To fill in this important information, we have asked Officers at meetings between January 2018 and September 2018, for an explanation and this is our position statement

Atkins / consultants for the Council and Officers did not appear to have a detailed knowledge of the site and had not stood on S98 or walked-over the land and boundaries from within the site.

Atkins / consultants for the Council and Officers had not accurately read our plans and reports from our team (arboriculturist, highway engineer, ecologist, Flood Risk expert, architect etc) in support of the scheme but also in respect of the position of the proposed access from Hackthorne Road and mistakenly thought it to be within the Conservation Area (it is not – it is 50m to the west). Furthermore, no tree removal is necessary. Plus, the highway junction with Hackthorne Road, works in technical highway-terms, in all respects.

	<p>Atkins / consultants for the Council and Officers appeared not to have understood our evidence about providing surface water storage to protect the River Avon SAC and deal effectively with phosphates.</p> <p>We have still not been able to meet Officers or their consultants on site to discuss these matters.</p> <p>16. These experiences and the SA's generalised and nebulous assessment of S98 can be readily explained because of the enormity (and complexity) of the task facing Wiltshire Council. But even so, as H3.6 and part of S98 is a housing allocation, it does deserve a much more detailed understanding, particularly to overcome the impression that the way the land has been divided, has boiled down to intangible 'gut feelings' – which may not be sound.</p> <p>17. If two guiding principles can be boiled down to they are probably: heritage and the River Avon SAC – all of which are to the north east of S98. We do now ask The Inspector to make note that the north eastern parts of S98 between the A345 and Hackthorne Road are more between 150 – 315 metres from the River and also to bear in mind, S98 is very well enclosed by its dense TPO'd tree belt.</p> <p>18. Our preferred way forward is for about 140 houses at a newly titled: H3.6 Clover land and Hackthorne Road, Durrington:</p> <p>[MAP INSERT]</p>

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. The only benefit I see from this development would be to the owner and builders who no doubt would be financially better off. The project is the thin end of the wedge. It would be a precedent set for the next field along to be developed and before long we will be turned into the outskirts of Westbury and joined with Edington the other way. It is not needed, not planned for, more green fields lost, pressure on the school, doctors, roads etc I well and truly am against this development.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. Whilst I understand the desire of the landowners to realise the profits such developments would release, the fact is that they would be the sole beneficiaries as there are only problems for Bratton village to come from this. It is wholly inappropriate in scale, outside of plan and/or plan requirements and would set a dangerous precedent for future planning abuse. They are bad in themselves and a Trojan horse for our future. I am 100% against these developments and hope to see them refused without possibility of the usual "wearing down" appeals.</p>

Summary of our 5 Year Housing Land Supply objection: the proposed latest information (above) is contrary to NPPF (1) 6: Delivering a wide choice of high-quality homes with respect to both South Wiltshire and N/W Wiltshire. The Framework (1) now imposes a duty on Wiltshire Council to take steps to rectify the problem and not rely on a later review of the WCS (Wiltshire Core Strategy) that may take several years. 2. This DPD needs to provide now a reliable and realistic, planned 2018 - 2026, 5 Year Supply to deliver much needed homes of a type and tenure in the right place continuously. 3. Having more than a 5 years housing land supply (much better to have at least 7 or 8 years) also encourages commensurate with the amount - greater choice for consumers. This keeps house prices lower through competition. Having more than 5 years land supply is essential it brings greater surety and greater resilience, should one or more sites be delayed. To correct this flaw that is painfully obvious in PCs 16 and 17, more developable and deliverable land, in accordance with Footnotes 11 and 12 on p12 of NPPF (1) - must be brought forward from the list of Omission Sites etc. Benchmarks proposed revisions to PC 17 include: [TABLE INSERT] 4. PC16 and 17 are not legally compliant because: (i) they do not appropriately reflect guiding legislation; (ii) nor are they in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of highquality homes. 5. PC 16 and PC 17 Table 4.8 and supporting text are not sound because: (1) they are not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) they are not sufficiently justified; (3) they are not able to respond to change; and, (4) they are not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 6. We are asking the Inspector to amend PC 16 and PC17 and Annex A particularly the table (see above) and also the explanatory wording by allocating more land for housing in N + W Wiltshire (and South Wiltshire, too).</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objection to PC 3 and Annex A Table 4.1 Housing Land Supply [TABLE INSERT]</p> <p>1. Because the latest completion and commitment figures (PC3) for North and West Wiltshire (and South Wiltshire) increase significantly the minimum to be allocated 2017 2026 (see 5th column above) the Authority (and now the Inspector) need to respond in a sound and responsible and timely way. 2. In the case of North &amp; West Wiltshire, plainly there is a need to allocate almost twice as much housing because 574 was the target to be allocated in 2017 and the Council now (September 2018) needs to identify a further 535 more houses to bring up the amount of housing to meet the minimum housing requirement up to 1,109. Wiltshire Council is not proposing to do this. 3. In our opinion, plainly the Council (and now the Inspector) must increase the amount of land to be allocated for housing in a commensurate way to meet need and ensure a 5-year housing land supply. (See also our comments regarding other proposed changes.) 4. Furthermore, the wording of the first column as Minimum to be allocated fails to indicate a likely acceptable range contrary to NPPF (1) 6: Delivering a wide choice of high-quality homes. NPPF (1) promotes flexibility and delivery through, inter alia, the use of an additional buffer (para 47). We are therefore asking the Inspector under Section 20 (7C) - because there are only about 7 years left until the end of the plan period (2026) - and given housing need - to identify sufficient land to come forward. It is reasonable to suggest a 5% range, on top of the minimum requirement. We set out below our proposed amendment to Table 4.1. For North and West Wiltshire, this means the target range to be allocated should be between 1,109 and 2,346 dwellings between 2017 2026. [TABLE INSERT] 5. Background argument: PC3 is not legally compliant because: (i) it does not appropriately reflect guiding legislation; (ii) nor is it in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of highquality homes. 6. The proposed change is not sound because whilst the numbers are factual, the Authority has failed to react to what the new numbers mean and therefore we say this draft document: (1) it is not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) it is not sufficiently justified; (3) it is not able to respond to change; and, (4) it is not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 7. We are asking the Inspector to amend PC 3, Table 4.1 and Annex A but particularly Table 4.1 (see our suggestion above) and the explanatory wording (our suggestions are in bold below): - factual update to table of figures to reflect the latest Housing Land Supply Statement published March 2018 (base date April 2017) and Section 6 of NPPF (1) .</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objections to PC 21 and Annex A Table 4.11 Housing Land Supply and Annex J by Benchmark (Nov 2018) [TABLE INSERT] 1. Summary of our objection to PC 21: the proposed change indicates a significant shortfall in supply at Trowbridge (-19%) but hides key information about how big the shortfall is based on the minimum requirement. The column headings are also misleading. Finally, because of the shortage of developable land at Trowbridge (see our objections to PC3, PC 15 etc) the wording of the first column as indicative requirement is not the same as a Minimum to be allocated and so the shortfall is even greater than might appear to the reader of the table. In any event, in our opinion, PC21 fails to indicate a likely acceptable range contrary to NPPF (1) 6: Delivering a wide choice of high-quality homes. NPPF (1) promotes flexibility and delivery through, inter alia, the use of an additional buffer (para 47). 2. We are therefore asking the Inspector under Section 20 (7C) - because there are only about 7 years left until the end of the plan period (2026) - and given housing need - to identify sufficient land to come forward at Trowbridge and improve the 5-year supply of housing land. It is reasonable to suggest a 5% buffer see revised Table 4.10, next page. Trowbridge has a shortfall of between 1,297 and 1,638 new houses from 2018 2026 (!): [TABLE INSERT] 3. Background argument: PC21 is not legally compliant because: (i) it does not appropriately reflect guiding legislation; (ii) nor is it in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of highquality homes. 4. The proposed change is not sound because: (1) it is not sufficiently positively prepared with respect to the delivery of a surety of housing land supply for TROWBRIDGE; (2) it is not sufficiently or robustly justified; (3) it is not able to respond to change; and, (4) it is not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 5. We are asking the Inspector to address this shortfall in housing land at Trowbridge by amending PC 21 by including land at Staverton Triangle, Trowbridge that has a lapsed detailed planning permission for c. 65 dwellings and an outline residential planning application to renew that housing scheme with 2.1 ha of additional suitable alternative green space LPA ref: 17/10949/OUT: [TABLE INSERT] [APPENDED MAP] [APPENDED MAP]</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objections to Trowbridge SBR PC 26 by Benchmark (Nov 2018) [TABLE INSERT]</p> <p>1. This Proposed Change raises a number of issues, not least because of the curious explanation for including land that is currently not built-on but on the edge of Trowbridge that is to be enclosed within the towns new settlement boundary (Sept 2018). We have underlined those words and phrases that have caught our attention Amend pre-submission settlement boundary to retain the existing settlement boundary and follow but not include(1) clearly defined physical features, such as hedgerows(2). This is recreational or amenity space at the edge of a settlement that relates more closely to the built environment(3) . 2. On the first point (1): follow but not include we assume this means that in the case of a hedgerow, tree belt, stream, road, railway line etc that the boundary is proposed to fall adjacent to but not over the top of that physical feature. If that is the correct interpretation, then that is acceptable. 3. (2) Hedgerows it follows that hedgerows are an example of a clearly defined physical feature and that there are of course several other features, such as tree belts, rivers/streams, roads, railway lines etc that also qualify as potential settlement boundaries. 4. (3) We support the inclusion of recreational or amenity space on the edge of settlements being included within settlement boundaries that relate more closely to the built environment . 5. Our concern with SBR PC 26 is this: those judgements have not been applied systematically and consistently, but it seems, just where interested parties have raised concerns. 6. Our clients land at Staverton Triangle (before our appointment) was regrettably not the subject of a detailed objection about the proposed moving of the settlement boundary. All that was said by Persimmon Homes in September 2017 in a valid objection to Wiltshire Councils WHAPS was: Persimmon Homes objects to the proposed removal of the land to the south of Blackthorn Way (Staverton Triangle) from the Trowbridge settlement boundary (grid reference I4). 7. However, what should have been said was that the proposed settlement boundary at Staverton Triangle will follow the existing settlement boundary and follow but not include the clearly defined physical feature of the railway. Staverton Triangle is land with a lapsed detailed planning permission for housing and is currently used as ad hoc and temporary recreational and amenity space at the edge of a settlement that relates more closely to the built environment . 8. The circumstances are very similar to the latest boundary changes (SBR PC 26) and therefore in the interests of consistency and the application of a systematic and fair boundary methodology, we are asking the Inspector to retain SBR PC 26 but amend the proposals plan and supporting text. WE asking that, once again, Staverton Triangle is recognised as being within Trowbridges settlement boundary. Afterall, that land is closely related to the built environment of Staverton and Trowbridge and</p>				

	not the cery separate open countryside (Green Belt) beyond the railway line, as the Inspector will see on his site visit. The follow plan indicates the amendment: [MAP INSERT] [MAP INSERT]

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] Objection to PC 15 and Annex A Table 4.7 Windfall and Housing Land Supply [TABLE INSERT] 1. Summary of our windfall objection: the proposed latest windfall allowance 2017 - 2026 in the 5th column seeks to increase the windfall allowance to try to fix the increasing housing land shortfall (see our objection to PC 3 etc). In our opinion, this is contrary to NPPF (1) that is titled 6: Delivering a wide choice of high-quality homes and also deals with windfall housing. 2. NPPF (1) para 48 promotes flexibility and delivery and warns Planning Authorities not to use an allowance for windfall sites unless the evidence is - realistic - reliable and - compelling. No such evidence has been submitted and those numbers should be viewed with caution. 3. Further, with the considerable tightening of all the main settlements boundaries and the exclusion of residential gardens, infill windfall brownfield housing cannot be a reliable supply: it is a dwindling asset. The forecast amount of windfall sites coming forward should be conservative, robust and reliable, not hopeful and optimistic (fingers crossed). 4. It is a very important point to note and in fairness to the Authority, Wiltshire Council do indeed (of course) concede this at para 5.7 of Topic Paper 3 (July 2018): the use of a windfall allowance should not be relied upon. 5. However, it is not realistic to say windfalls should be completely not relied upon. This is too extreme and contradictory a position for the Authority to take. Para 5.7 should be amended accordingly. 6. We are therefore again placing before the Inspector under S20 (7C) an invitation to correct this significant flaw and contradiction in the DPD and supporting paperwork. We are suggesting a simple, robust and reliable 4% windfall allowance (4% of the minimum housing requirement). In the context of our Objection to PC15, this means the windfall for North and West Wiltshire should be c. 990 dwellings rather than c. 2,210 between 2017 - 2026: [TABLE INSERT] 7. Forgive the complexity of the next table, but we have applied the 4% windfall to Table 4.7 whilst also taking into account our objection to PC 3 regarding the need to allocate more housing land and identify a housing requirement range, rather than an absolute minimum [TABLE INSERT] 8. Background argument: PC15 is not legally compliant because: (i) it does not appropriately reflect guiding legislation; (ii) nor is it in line with national policy, NPPF (1) particularly Section 6: Delivering a wide choice of highquality homes. 9. The proposed change in Table 4.7 is not sound because: (1) it is not sufficiently positively prepared with respect to the delivery of a surety of housing land supply; (2) it is not sufficiently justified; (3) it is not able to respond to change; and, (4) it is not consistent with the NPPF (1) particularly Section 6: Delivering a wide choice of high quality homes. 10. We are asking the Inspector to amend PC 15 and Annex A and particularlybTable 4.7 (see above) and also the explanatory wording at Para 5.7 of The Topic Paper 3: HLSA (July 2018).</p>

<b>Identify Proposed Change Reference Number</b>					
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Identify subject of representation</b>		Schedule of Proposed Changes - Consultation Document (September 2018) (EXAM/01)	<b>Do you consider the consultation material you are commenting on is unsound because it is not: Positively prepared; Justified; Effective; Consistent with national policy?</b>	(1) Positively prepared; Justified; Effective; Consistent with national policy
<b>Identify Proposed Change Reference Number</b>		PC94		
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>		

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	North Dorset District Council has responded to consultations on this proposed DPD in June 2016 and September 2017. These comments relate to the potential need for allocating a site for development in Wiltshire to meet the needs of Shaftesbury (a town in our District). The present consultation appears to be a series of modifications to the submitted DPD (we note that the consultation consists of 50+ separate PDFs). NDDC assumes that if there is anything in this consultation that would likely have an impact on the District then Wiltshire Council would draw our attention to it and seek meaningful consultation under the duty to cooperate. Otherwise, we have no further comments to make.

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Bratton is situated on the edge of the largest continuous expanse of unimproved chalk grassland in NW Europe, it is also one of the most important wildlife sites in lowland Britain. Please don't destroy it by excessive and unnecessary development when it appears that Wiltshire Councils own housing development policy has not only been met but exceeded in this area.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>I write to object in the strongest possible terms to the proposed settlement boundary extension at Winterslow Map Grid References F5, F6, G5, G6 Amend settlement boundary to include the entirety of the garden of Beechwood within the settlement boundary . The proposed change directly contravenes the settlement boundary review methodology, which states that areas excluded from the review include Curtilages of properties which have the capacity to extend the built form of the settlement. This includes large residential gardens (TOP.01 Topic Paper 1 - Settlement Boundary Review Methodology, July 2018). This was correctly recognised in the Officer response to representation numbers 381 and 382 in Appendix P of the Wiltshire Site Allocations Plan Consultation Statement Regulation 22 (1) (c). Here (p. 424) the Officer confirmed that the inclusion of the entirety of this garden would substantially extend the built form of the settlement in terms of scale and location and that No action should be taken, i.e. the settlement boundary should not be amended to include the entirety of the garden of Beechwood. None of the above has changed during the most recent consultation and revision period and so this change should be rejected. Though it should have no bearing on the Wiltshire Housing Site Allocations DPD, it may also be helpful, in light of representation numbers 381 and 382 referenced above, to note that the site approximated by that indicated at Winterslow Map Grid References F5, F6, G5, G6 was deemed, in December 2017, undeliverable by the Winterslow Neighbourhood Plan steering group. As a result, the site was removed from the developing Winterslow Neighbourhood Plan.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the removal of the Ridgeway Farm site allocation from the Wiltshire Site Housing Development Plan Document (DPD). I consider the consultation material to be sound and legally compliant. The removal of the Ridgeway Farm site allocation will specifically address my concerns regarding; the scale of the proposed site, planning policy together with environmental and infrastructure impact. Generally, I support the removal on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. Our Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Councils and Governments Localism agenda is best served by allowing the Parish to determine its own future.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the removal of the Ridgeway Farm site allocation from the Wiltshire Site Housing Development Plan Document (DPD). I consider the consultation material to be sound and legally compliant. The removal of the Ridgeway Farm site allocation will specifically address my concerns regarding the requirement for the development and the impact on the infrastructure of the village. Generally, I support the removal on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. Our Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Councils and Governments Localism agenda is best served by allowing the Parish to determine its own future.

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. Mindful of the analysis above, the need for transparent decision making, personal accountability and the forensic examination to which decisions will be subjected, I urge Wiltshire Council to reconsider its plans for new housing in Bratton. As things stand, it seems that all those involved in Wiltshire Councils decision making process deem Brattons Neighbourhood Plan Steering Groups points to be invalid and can presumably state authoritatively why that is so. I disagree with their apparent view. Please note these points and reconsider. Thank you.</p>

<b>Identify subject of representation</b>	Schedule of Proposed Changes - Consultation Document (September 2018) (EXAM/01)		<b>Do you consider the consultation material you are commenting on is unsound because it is not: Positively prepared; Justified; Effective; Consistent with national policy?</b>	(1) Positively prepared; Justified; Effective; Consistent with national policy	
<b>Identify Proposed Change Reference Number</b>	PC76				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>The local community believe that the H2.7 East of Dene (Home Farm) site should be removed from the proposed DPD. The reasons are attached by separate sheet to the document. [see below]. The views represented in this paper are that of the local East Boreham community submitted on their behalf by the East Boreham Residents' Action Group (EBRAG). The aim is to ensure that development in and around East Boreham is sustainable. EBRAG formed in 1980, but still retains an active, experienced and knowledgeable committee, a data base of some several hundred concerned residents and a website (currently being reconstructed) with over 7,000 hits. EBRAG has held several well attended public meetings, regularly updates local residents on the current situation through email and leaflet drop and has the backing of the local county MP, ward town councillors and clearly the local community. EBRAG has submitted many representations on the Wiltshire Council websites against a speculative development application 16/10502/OUT and the original proposed Wiltshire Council Spatial Planning WHSAP/20 for site H2.7, dated 22nd September 2017. These documents should be read in conjunction with this further submittal. The community feels that the proposed revised changes to PC76, PC77 and PC:78 within the WHSAP for Housing Allocation H2. 7 does not adequately reflect the many representations and specific concerns made on this proposed allocation during the initial and subsequent consultation. The Wiltshire Council changes only repeat the policies in the National Planning Policy Framework (NPPF) that a Planning Authority would be required to follow. The Regulation 22 (1) (c) Report Consultation Statement Appendices M -P (Paragraph 21.74) indicated that 64 representations were received and documents the Wiltshire Council response. The following paragraphs highlight the local communities continued concerns with the lack of proposed changes following that representation. Landscape/ conservation Issues Issues raised Disagreement over potential landscape/conservation impacts and the suitability of parts of H2.7 site to be developed. Wiltshire Council Response Assessment of H2.7 site and the raised concerns by Wiltshire Council officers has led to the conclusion that development should be located primarily within the northwest part of H2.7, where landscape and conservation impacts can be more effectively mitigated. Proposed change by Wiltshire Council following representation None. EBRAG comment The conclusion from the 2017 Landscape Assessment Part stated - "The site contributes to the setting of Bishopstrow Conservation Area, Battlesbury Hill and south eastern edge of Warminster. There are also views through the site from the local PRoW network north towards Battlesbury Hill and south towards the treed Bishopstrow Conservation Area. It would be difficult to mitigate the removal of these features should the site be developed. However, proposed development would be less constrained in the north west of the site due to the proximity of existing development and the lower sensitivity in terms of wider landscape setting and views. Boundaries to development could be planted with groups of trees, copses and individual specimen trees to help mitigate the effect on landscape character and views. The</p>				

northern, south western and eastern parts of the site would be more sensitive to development due to the proximity of the Conservation Area and views north towards Battlesbury Hill. The overall capacity to accommodate change would be moderate -/ow". The Landscape Assessment does not consider the views from Battlesbury however the Heritage Impact Assessment does indicate a potential for - "setting change to Battlesbury Camp hillfort (SM) in vistas to the south from the monument". The landscape associated with this site has not changed since the Planning Inspectors Report into the West Wiltshire District Plan in 2004 who, when considering the location of Warminster's Settlement Boundary, commented - "/ saw that the land mostly comprises arable fields, with similar fields to the north, together with a few cottages and other houses (some set in trees) and bounded by lanes or roads, to the east, west and south. Although there is urban development immediately to the west (across Grange Lane), the area has a pleasant and obviously rural appearance and is very much on the edge of Warminster. From my observations from local footpaths to the north, west and east of the area and from Battlesbury Hill, I consider that the land relates well in visual terms to the open countryside to the north and east, forming an integral part of the countryside east of the town. I accept that a high stone wall and cottages fronting Boreham Road impact on any meaningful visual relationship with the countryside to the south, other than when seen from the Hill top. However, in view of the open-ness of the land and its linkage with other open land to the east and north (and especially Battlesbury Hill), I consider that the town policy limit hereabouts should be drawn along the eastern edge of the denser development fronting The Dene, St George's Close and (the southern part of) Grange Lane". The current Heritage Impact Assessment (LUC) provides a much more comprehensive and detailed assessment including the effects of limiting development in the north. This document details much more significant effects than were considered by the Sustainability Analysis and therefore should be reviewed in entirety before any decisions are reached. River Avon SAC Issues raised The need to protect biodiversity (River Avon SAC and 5551, local wildlife). Wiltshire Council Response Additional wording is proposed to be added to the supporting text to ensure that the policy adequately addresses the need to protect the River Avon SAC. EBRAG Comment Although Wiltshire Council Response indicates that a wording change is proposed, EBRAG cannot identify any change in PC76, PC77 and PC78 that relates to change. The main problem affecting the River Avon SAC is phosphate concentration. To this end Wiltshire Council has a Nutrient Management Plan (NMP) to identify appropriate and proportionate mitigation measures. However, the Planning . Officer's report on application 17-01463-FUL to the Strategic Planning Committee 15th August 2018 stated - "The aim of the NMP is to bring phosphate concentrations in the River Avon SAC down to the conservation targets set by Natural England in order to bring the river system into a favourable condition. This is a requirement of the Habitats Regulations. The underlying premise of the Plan is that increases in sewage derived phosphate would be more than offset by reductions from DEFRA's catchment sensitive farming {CSF} initiatives. However, at the beginning of 2018, Natural England and the EA reported that CSF has been much less effective than that which was projected by the NMP modelling and is unlikely to satisfactorily offset the increased level of phosphates from new development". Surface water flooding has been reported many times on the East of Dene site (H2.7), to the west in Grange Lane, to the south along Boreham Road and principally around the Sutton Veny roundabout. This combined with the less effectiveness mitigation is likely to increase the phosphate concentration in the River Avon. Wiltshire Council have yet to successfully manage pollution of the River Avon with respect to the current planning approvals and should not be proposing further harmful development at this time until a SFRA level 2 is completed. Flooding Issue raised Flooding issues on the site and in the local area and the lack of SFRA Level 2 or Surface Water Management Plan. Wiltshire Council response The proposed allocation is located within Flood Zone 1. The Environment Agency has no objection in principle. Any proposals for development of this site should be informed by a site-specific flood risk assessment which should inform design, layout and any mitigation measures required. Proposed change Give greater emphasis to flood and drainage requirements through site specific assessments. EBRAG Comment The only way Wiltshire Council can achieve its legally required duty of managing all forms of flooding in combination across the county is to understand the causes of all floods, record the extent of flooding, where the problem areas are and then devise a strategy to manage these issues. Current national flood risk management policy requires councils to undertake high level flood risk assessments (SFRA 1) and use these to highlight areas needing further assessment; Warminster has been highlighted as needing more. Using the historic flood records and additional flood assessments undertaken in high risk areas such as a SFRA 2,

surface water management plan, flood risk asset maps and floodplain extent maps, Wiltshire Council can then devise an adequate flood management strategy. This has yet to occur. Without the required SFRA 2, or associated supporting plans, Wiltshire Council has (like in Watermead Parish) broken national requirements and proceeded without undertaking an adequately detailed sequential test. Does this make the current development site selection for Warminster illegal? The EA and Wiltshire Council came to a legal understanding when finalising the Core Strategy called a Main Modification which meant the EA would not stop the whole Core Strategy by objecting, only if Wiltshire Council agreed to do the required SFRA 2. This was intended to increase Wiltshire Councils understanding of flood causes in Warminster to ensure safe site selection, which is a legal requirement. The cause of flooding comes from Zones 1 and 2 overwhelming the known limited capacity of the flood infrastructure and the amount of space left in Zone 3, the floodplain, due to previous developments and the addition of flood assets like culverts, bridges and sluices. These increase flood risk across the area but the location and effects have not been mapped yet. Wiltshire Councils response to the issues raised are that the areas being put forward are in Zone 1, the developers will do sufficient flood risk assessments and that the EA will not object. This fails to recognise the EA have a standing objection that Wiltshire Council doesn't have sufficient flood info to make site selection decisions. Developers assessments therefore, when completing their flood risk assessments, will also be based on inaccurate data, so any flood management strategies are extremely suspect. Heritage Assets Issue raised Potential harmful impacts on heritage assets (including Bishopstrow Conservation Area and listed buildings surrounding the site). Wiltshire Council Proposed change. Heritage Impact Assessment to ensure appropriate consideration is given to the significance of heritage assets and their settings. EBRAG Comment The proposed changes do not adequately reflect the comment (ID 1646) from Historic England - "There is a risk to the significance of several affected heritage assets including a Conservation Area, listed buildings and the wider historic landscape setting. No doubt this site will be of considerable archaeological interest. Is the local authority able to confirm it is satisfied that it is appropriate to undertake an archaeological assessment at the application stage that would allow an appropriate response where necessary as a result of the findings? See relevant national policy. Greater certainty/clarity is required re the degree of harm; the strategic layout and form of future development in response to this context. This is sensitive site and difficult to access and as it is a pivotal issue in relationship to the principle it needs to be resolved at the Plan stage and not left to any future application. A field boundary/Jane divides the site north south and is a strong characteristic feature". The Wiltshire Council proposed changes only reflect the actions that would be carried out for any development site to designated and non-designated heritage consistent with national policy. It does not reflect the quantity of heritage assets affected, archaeological interest, historic setting and the degree of harm that development would produce. As stated by Historic England in their comment this is a sensitive site. The local community have repeatedly suggested extending the Bishopstrow Conservation area from the east of the site to cover the south west and eastern area of the site to protect against future development. Infrastructure Issue raised Concern over infrastructure capacity (including Education and Health). Wiltshire Council response towards Education While local school capacity is noted as problematic, primary school expansion is possible. Wiltshire Council Proposed change None. EBRAG Comment The Wiltshire Infrastructure Delivery Plan (dated September 2013) indicated the essential infrastructure need was - "Relocation of Kingdown Secondary School to provide an additional 241 pupil places. Some surplus places but forecast to be full by 2014/11 The Wiltshire Infrastructure Delivery Plan (dated December 2016) indicated the essential infrastructure need was - "Site (at least 3.6ha) to co-locate additional secondary places within West Urban Extension to provide 309 places. Some surplus places but full by 2018. Not able to expand. No land nearby. Land required on strategic site. 11 (Note: emphasis in bold in original Wiltshire Council document). The Planning Officer's Report to the Strategic Planning Committee (15th August 2018) for planning application 17-01463-FUL states that- "In terms of secondary school infrastructure, the only designated non-private local secondary serving Warminster is Kingdown Academy which has PAN (years 7-11) capacity of 1,385 places. As of October 2017, the number of year 7-11 pupils on the roll amounted to 1,310 pupils and it is forecasted that the number of pupils will increase to 1,335 by 2023. As is the case with the local primary schools, there are other registered/consented residential developments in the community area that would take up the nominal spare capacity at the Academy which has limited potential to expand at the existing site". At the Warminster Town Council meeting (22nd May 2018) to discuss planning application 17-

01463-FUL, Town Councillor Brett, Chair of the Kingdown Academy, stated that he was unaware of any approach made to the school about future provision to meet requirement. He also stated that there were no plans for Kingdown Academy Year 7 group to be moved to a different site. Wiltshire Council response does not address the well-known infrastructure problems associated with secondary education in Warminster. The capacity problems of secondary education in Warminster has been well documented before the original Core Strategy examination in 2013 and Wiltshire Council have yet to demonstrate any progress to mitigate in the last 5 years. Wiltshire Council response towards provision of Health Provision The Wiltshire Infrastructure Delivery Plan {dated September 2013} indicated the essential infrastructure need was- "£Potential relocation of existing GP practice and improvements to existing practices in the villages. Most practices are full to capacity". The Wiltshire Infrastructure Delivery Plan (dated December 2016) indicated the essential infrastructure need was - "Support development of local primary healthcare facilities. Meet impact of new housing of local practises, which are already undersized for the current number of current patients". (Note: emphasis in bold in original Wiltshire Council document). Since the Wiltshire Core Strategy was approved, the number of GP Practices in Warminster have decreased from 2 to 1, with the closure of the Smallbrook Surgery in September 2017. An outline planning application has been approved for the WUE in June 2018 which does include a new medical centre, however this is not supported by NHSE of the CCG and so has yet to materialise. EBRAG Summary By failing to address raised concerns or propose solutions to either the education or health infrastructure, deemed essential for development in Warminster in the Core Strategy in 2013, Wiltshire Council have not adequately explained how further additional housing in Warminster can be proposed without the relevant infrastructure issues being addressed and mitigated. Access Issue raised Concerns over highways and access impacts. Wiltshire Council response Evidence indicates that the local highways network is capable of accommodating the number of dwellings proposed and that Highways consider access could be achieved. Wiltshire Council Proposed change None. EBRAG Comment Wiltshire Council proposed access to H2.7 from Boreham Road, now reclassified as a B road, however the speed of traffic in both directions remains significant as cars accelerate leaving or start to slow to enter, Warminster. This is directly opposite the proposed access entrance. Anyone standing on the blind bend just short of the proposed Boreham Road entrance to the site, witness cars regularly driving well above the speed limits. The local community remains concerned that since this is the only proposed access to the site, there will be a high risk of accidents occurring at the proposed entrance just after a blind bend. The final Heritage Impact Assessment (LUC) dated March 2018 described in its predicted effects for the access from Boreham Road as- "11/f access is taken from Boreham Road, development will result in loss of at least one section of historic walling. This would result in setting change to the Bishopstrow Conservation Area as the wall currently provides a strong visual and historic boundary for the CA -in addition to making a strong positive contribution to the character and appearance of the CA". It goes on to say in the options for sustainable development that - "limited development could be accommodated in northwest corner of the site. This, in parallel with strengthening existing landscape structure, would avoid adverse setting change to key heritage assets". Access would need to be secured from the existing road network in The Dene, or via other means of access to the north, to avoid issues set out above. Although Wiltshire Council have accepted the overall conclusions from this document and limited the development to the northwest part of the site, they have ignored the effects of setting change due to access from Boreham Road. Wiltshire Council have not provided any explanation as to the reason that the option of access from the north has been ignored. Employment. Issue raised. Concern over lack of local employment opportunities. Wiltshire Council response. Due to the close location of Warminster, a Market Town and the proximity of the site to existing bus networks, the site is considered to be in a reasonably sustainable location. Proposed change. None. EBRAG Comment The underlying principles of the Wiltshire Core Strategy (Policy CPI) seek to manage future development to ensure that communities have an appropriate balance of jobs, services and facilities and homes. The strategy recognises that previous growth hasn't always been delivered in a proportionate manner, whereby housing is delivered in settlements where there are insufficient employment opportunities leading to out-commuting. This is the primary reason why the Warminster West Urban Extension (WUE) is a mix of housing, employment land, primary school, local amenities etc. H2.7 is purely a housing development and does not meet the principles of the Core Strategy in providing balanced facilities that are needed for a self-contained community. H2.7 does not provide additional employment area and so for new local

	<p>employment, relies on the employment area being developed to support the needs of the WUE. Wiltshire Council and Warminster Town Council have both recognised that Warminster is unusual in that more people commute out of town for work than are employed within the town boundaries. The main towns for employment near Warminster are Bath, Westbury, Trowbridge, Freme and Salisbury. With the exception of Salisbury, all of these would involve households from H2. 7 commuting through Warminster Town Centre. It therefore will contribute to Warminster's existing current traffic problems at peak times. EBRAG Overall Conclusion. Given the above information on landscape, pollution, flooding, heritage assets, infrastructure, access and employment the local community feel that if the sustainability assessment was repeated for this site against the objectives, it would have produced a different result. The site would have been classified as having major adverse effects and so would not have been considered suitable for selection. The local community believe that the H2.7 East of Dene (Home Farm) site should be removed from the proposed plan.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. 1) Massive local developments makes nonsense of the few homes proposed for Bratton. As a family, we have lived opposite site 231 for nearly 40 years and several attempts to trade the farmland for building have, thankfully, come and gone. 2) It is more important to address the volume of peak time traffic using the B3098 as a 'rat run'. It is almost like having a single lane motorway, with very little in the way of traffic control. Any new development would merely exacerbate this chaotic situation. 3) Bratton has a brilliant surgery which is becoming inundated.</p>

<b>Identify Proposed Change Reference Number</b>	PC72				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[ORIGINAL COPY OF REPRESENTATION ATTACHED] Representations relating to the Schedule of Proposed Changes to the draft Wiltshire Housing Site Allocations Plan I refer to you letter of 25 th September 2018 concerning the above matter and wish to submit the following observations. These relate to Site 3565 land at Southwick Court. I challenge the soundness of these changes because they cannot be justified on the basis that the amended plan related to Southwick Court is not the most appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence. Put simply, Wiltshire Council (Spatial Planning Dept) has at long last acknowledged the historical importance of this site which encompasses Southwick Court itself, together with the surrounding water meadows upon which building land at Site 2565 has been included in the Plan. The Schedule of Changes states that the changes have been made in response to comments from Heritage England , without reference, I would add, to any representations from members of the public presented in the 2017 consultation process, including myself, regarding these very important heritage assets. Clearly nobody else counts in the minds of the planning officers! In particular, the historical significance of the setting of the medieval manorial farmstead, namely the water meadows surrounding it, as well as the farmstead itself, individually and collectively, have been acknowledged as significant heritage assets . Yet the Council has still retained this site within its Housing Plan to allow building on the water meadows to the east of Lambrok Stream, i.e. Site 3565, very close to Southwick Hall, even though it acknowledges in the Schedule of Changes that some harm may ensue to these heritage assets from any future planning application. There are all sorts of caveats within the Schedule of Proposed Changes, clearly put in place to pacify the concerns of Heritage England, but this wording still indicates that some harm to these heritage assets would be permitted providing it is not substantial and that there is convincing justification for it . Thus, despite the caveat there is no escaping the fact that the Council , by its insistence upon allowing building development on this site, is prepared to allow some harm to occur to this nationally important heritage site by reason of its rarity , due to the water meadows still being intact, which surround the medieval farmstead. It is not reasonable to allow this to happen to such an important heritage site and landscape. The obvious solution would have been for the Council to remove Site 3565 from its Housing Site Allocations Plan , thereby preserving these heritage assets, including the landscape setting from any possible harm. This is the most reasonable alternative for such a precious heritage asset and its setting. The Plan in relation to this proposed building site at Southwick Court is therefore not justified and thus unsound. Early in the appraisal process this site was considered less sustainable in the area of search, which would have been the right decision then , bearing in mind the position of the medieval farmstead which was known to the Council, and should have been removed from the Plan at that time . That early decision , i.e. the site being less sustainable has now been endorsed by the</p>				

	<p>Councils belated acceptance of these heritage assets including the setting of the water meadows, as of significant importance , and demonstrates that the Plan is not sound because it is not justified . My other concern in relation to the proposed changes is the suggestion that land to the west of Lambrok Stream (i.e. water meadows), whilst not to be used for housing, could be used as formal or informal open space or remain in agricultural use . These water meadows are clearly in agricultural use now and always have been since Southwick Court Farmstead was built, and it is glaringly obvious that that their heritage integrity as water meadows as part of the farmstead will only be maintained by remaining as agricultural land , with the existing ancient footpaths, as shown on the Definitive map, available to people who wish to walk on them, as has always happened. Formal or informal open space has never been part of the setting of Southwick Court and clearly cannot be justified , to the detriment of these water meadows which complement the setting to Southwick Court. This again demonstrates that the Proposed Changes to the Plan are not justified , and therefore not sound , and this site should be removed from the Plan, because it is an unreasonable strategy. When this letter is published online I would like it to be shown as set out in this letter, and not broken up under your own headings, as originally happened to my representations for the 2017 consultation. It ended up as unintelligible gobbledegook, which I asked to be removed and my original letter published (which was done in typed format, produced by your department, and checked by me). These representations on the soundness of the Schedule of Proposed Changes contain legal arguments which would be completely compromised if broken up for your own purposes. If a summary of main issues is again produced for this consultation I would expect these representations to be on it to reach the attention of the Inspector, because there can be no doubt that any arguments raising the issue of soundness must be a main issue , because of the consequences if the Inspector finds those arguments to show that all or part of the Plan is not sound .</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>This whole process has been done in such a way as to obscure and hide the real issues in Warminster by repeatedly changing the assessment criteria used in producing both the DPD and the SA. In 2004 the EA highlighted the high flood risk in Warminster due to the steep topography, multiple flood sources, many unmanaged flood risk assets, a lack of flood storage area and a lack of knowledge on the capacity of the flood infrastructure and river system used to manage flood risk across the town. Due to this lack of understanding during the Core Strategy and at every consultation since the EA have pointed out the need for a Sfra 2 covering all Warminster to understand the causes and solutions to flooding. It was such an issue that the EA and council as well as the Core strategy examiner added a main modification and explanatory note to the core strategy stating that the West urban extension could proceed but any further developments must show how they are able to manage flood risk with reference to the details in the SFRA 2 and surface water management plan to ensure flood risk is adequately controlled. This has not been done and sites are simply asked to produce flood risk assessments based only on current flood information which as stated by the EA is insufficient for safe site selection. Only by mapping the extent of the floodplain, the impact of flood assets, the areas already effected by flooding and the causes, and the required solutions would it be possible to state which sites had the most flood risk and which sites cause the most flooding. So without any accurate details the council has approved 4 sites in zones 2 and 3, prior to any town wide assessment and in addition to the already approved West Urban Extension. Now the aim is to add more sites without the required assessments. The NPPF is clear that all sites must pass the sequential test, the SFRA1 for Wiltshire reaffirms this yet no site put forward has a sequential test document to prove it complies with the legal requirement for one. The only way to do a sufficiently detailed Sequential test is to understand flood risk in each area, what causes it and as highlighted in the updated NPPF what the in combination effect of all flood sources and causes will be. To know this an up to date flood asset map, floodplain extent map, surface, river and ground water flooding extent and expected increases in flood maximums caused by current and future developments and the effects of climate change is needed. With the steep valleys, limited floodplain multiple flood sources of ground surface and river flooding, and plenty of flood risk assets ranging from lakes, culverts, screens, bridges, roads, sluice gates etc being mainly unmanaged or maintained all acting in unison to increase flood risk and extent especially across the vital emergency access routes the roads and no accurate understand of how each risk interacts any flood risk assessment will not highlight the actual risks or provide effective solutions.</p>

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>	Sustainability Appraisal September 2018 - Main Report (EXAM/02A)				
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<p>The sustainability appraisal is required to assess the relevant issues effecting each area and highlight theses issues and how they will be dealt with yet repeatedly the document provides conflicting information that does not reflect the actual issues related to the area.</p> <p>It states only Trowbridge and Salisbury are being looked at for flood issues and states these are mainly river flooding. This contradicts the local flood risk management strategy which highlights that Salisbury and Trowbridge have each got over 1000 properties at risk of surface water flooding. The report fails to mention that Warminster also has over 1000 properties at risk from surface water flooding. Considering Wiltshire has</p>				

<p><b>Assessment Addendum (September 2018).</b></p>	<p>over 16000 properties at risk of surface water flooding and is one of the highest risk areas in the country for this flood source according to the NAO it seems strange that this issue is not highlighted in the report.</p> <p>The appraisal claims to use set criteria for assessing sites but it does not refer to the SFRA 1 document and the requirement for all sites selected in the DPD to pass the sequential test.</p> <p>Also strangely absent is the EA advice that Warminster is at high risk of flooding from many sources, and that a SFRA 2 and surface water management plan are required to ensure safe site selection.</p> <p>The SA ignores and fails to mention the main modification in the core strategy for Warminster in which the previous examiner, the EA and Wiltshire council agreed that the only safe way to proceed was to do the West urban extension first but that any additional sites must show how they have complied with the sfra 2 and reduced flood risk accordingly. To state that site specific flood risk assessments will be sufficient when the data they are using refers only to their site and not the impact to the wider community shows this is not sustainable. Each site will have no idea of the town wide issues, what cause them, if the system has enough capacity or what the in combination effects might be. These questions can only be answered by more detailed flood assessments such as SFRA 2 etc which then feed into site specific flood management strategies, this has not been done so the conclusions are false as shown by the statement that me development is within 20m of the river when this will be the case on 304, and is already true on the beeline site which is potentially deadly.</p>

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>	Update to Habitats Regulations Assessment Addendum (September 2018) (EXAM/03)				
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<p>Thank you for consulting the Authority on the above documents. On behalf of the Authority I would like to take this opportunity to make the following comments.</p> <p>The Authority would like to take this opportunity to reiterate the comments and concerns made on the Local Plan Review Consultation Paper November 2017 (our letter dated 19 December 2017 refers). The Authority considers that Wiltshire Council needs to address impacts on the protected habitats of the New Forest through ensuring that adequate habitat mitigation measures are in place as outlined below.</p>				

<p><b>Assessment Addendum (September 2018).</b></p>	<p>The Authority is aware that a New Forest Mitigation Strategy referred to in paragraph 6.77 of the adopted Core Strategy (January 2015) hasn't been produced to date. It is stated in paragraph 6.77 that;</p> <p><i>'Wiltshire Council will support the production and implementation of a New Forest Mitigation Strategy in partnership with Natural England and other partners as appropriate. This will set out the delivery mechanisms and funding requirements (through either CIL, S106 or other appropriate mechanism) such that impacts of the plan upon the New Forest SPA are fully mitigated. After adoption the New Forest Mitigation Strategy will be a relevant planning consideration. Prior to this, planning applications will be subject to individual HRAs and bespoke mitigation secured as necessary.'</i></p> <p>As previously mentioned, mitigation strategies have been in place for planning permissions granted by the National Park Authority and New Forest District Council since 2012 and 2015 respectively (and more recently Test Valley Borough Council) and it was suggested that these could provide a useful starting point for any discussions on the production of a mitigation strategy in line with Wiltshire Council's obligations under the Habitats Regulations. In the longer term there is a clear need for local planning authorities around the New Forest to adopt a more strategic cross-boundary approach to habitat mitigation measures, to ensure each local planning authority complies with the requirements of the Habitats Regulations and Wiltshire Council's current involvement in the on-going research project along with other partner local authorities is welcomed.</p> <p>Notwithstanding the above however, in the absence of a current mitigation strategy it is unclear how the housing allocations proposed in southern Wiltshire, which may have an impact on the New Forest protected European sites, <u>have been</u> (if already developed) and <u>will be</u> mitigated against (as they come forward for development). As such without provision for mitigation both in the recent past and moving forward, the Plan as currently drafted, fails to comply with the Habitats Regulations</p>

<b>Identify Proposed Change Reference Number</b>	PC72				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Wiltshire Housing Site Allocation Plan Opposition to Site 3565 For the attention of the GOVERNMENT INSPECTOR Throughout the planning process Wiltshire Council has consistently broken a number of its Core Policies and ignored legislation and governmental agencies reports and recommendations directly pertaining to Site 3565. There has been widespread public condemnation of Site 3565 from the local community. Factual supporting evidence supplied by members of the public containing reports from government agencies directly linked to the site has been disregarded throughout the consultation process. Submissions made by the public as part of the process have been significantly edited by Spatial Planning in its final publication. Trowbridge Council has consistently opposed all plans to develop the site. Despite an exhaustive list of significant arguments backed and reinforced by government legislation against the development of 3565, the site remains in Wiltshires Housing Site Allocation Plan. Arguments against the development of Site 3565 with supporting evidence are as follows: The site has been widely recognised as an area of archaeological landscape of considerable importance. Furthermore, Natural England in possession of the full facts pertaining to the site, concluded, we advise that the plan is unsound. The proposed development is adjacent to important heritage sites and recognised by government agencies as being of significant importance. Trowbridge Council and Parish Councils, notably Southwick and North Bradley have consistently opposed any proposal for development. Moreover in Wiltshire Councils Core Policy 29 and the supporting text (paragraph 5.150) of the WCS, it clearly states that surrounding villages should have separate and distinct identities as villages. Open countryside should be maintained to protect the character and identity of these villages as separate communities. Development of the site would contravene this policy and neighbouring villages would merge with Trowbridge thus losing their distinct individuality affording no separation in its outcome. Site 3565 has been recognised as of significant importance as referenced in the Listed Buildings and Conservation Areas Act 1990, as it encompasses the Grade 11* Listed Southwick Court Farm and farmstead with its medieval moat and post medieval water meadow system. The 1990 Act gives special regard when considering land for development and the need to take account of the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses (S16 and 66). Paragraph 132 of the NPPF states that when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the assets conservation. Significance can be harmed or lost through development within its setting. As heritage assets are irreplaceable, any harm or loss should require clear and convincing justification. Core Policy 58 of the Wiltshire Core Strategy echoes the above national policy in seeking the protection, conservation and, where possible, enhancement of listed buildings. Any development of the site would significantly undermine the integrity of the listed buildings and archaeology and subject it to significant harm. Southwick Court lies immediately to</p>			

the south of the proposed development. The County Planning Archaeologist reported in June 2017 that by putting 180 houses will have an impact on a number of heritage assets. The preservation and conservation of the site has already been significantly compromised in recent years by the installation of a Solar Farm. This has already impacted on the managed landscape and associated buildings related to the heritage site. Recommendations, findings and conclusions documented in a Sustainability Assessment Heritage Impact Assessment of the site have been ignored by Wiltshire Council. The report concluded by highlighting The designated assets are of high importance, reflecting their national significance Paragraph 132 of the NPPF states that when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the assets conservation. Significance can be harmed or lost through development within its setting. As heritage assets are irreplaceable, any harm or loss should require clear and convincing justification. Core Policy 58 of the Wiltshire Core Strategy echoes the above national policy in seeking the protection, conservation and, where possible, enhancement of listed buildings. Bramble Farm sits within Site 3565 under a tenancy arrangement. Cattle graze on the fields and winter feed is an invaluable by product that ensures the farm is economically viable. Development of the land would make the farm unsustainable by removing fields that provide essential winter feed. The site has historically provided recreational and leisure pursuits for the local community. Three public footpaths are officially recognised on OS maps and an additional two are in the process of being added as they meet the criteria for being in use for an excess of thirty years. Wiltshire Core Policy clearly states that public rights of way network will be protected from development for other land uses Development of the site would directly impact on the landscape potentially blocking or removing public footpaths and rights of way. This clearly contravenes Wiltshires Core Policy. In addition, Natural England has stated that they are unsure how the arguments surrounding public rights of way, open spaces and common land have been duly considered in Wiltshire Councils Planning Allocation Plan. Site 3565 encompasses hedgerows that fulfil the criteria of Important as set out in the 1997 Hedgerow Act. The hedgerows date back to at least 1795 as can be evidenced on an Andrews and Dury map of Wiltshire dating back to this year. Development of the site would necessitate cutting through Important hedgerows. The Act clearly and unreservedly states that a hedgerow must not be cut through unless it is for the defence of the realm or public safety and by no more than 20 metres wide, where no other means of access is available and then it must be immediately made good. Any access to Site 3565 would necessitate the hedgerow being cut through and that would contravene criteria set out by DEFRA. In addition to contravening government legislation, it must be noted that the hedgerows form natural habitats for endangered species, notably Bechstein Bats and water voles. Any disruption to the hedgerows would impact detrimentally on these creatures. As custodians it is our duty and responsibility to ensure the continuation of protected species wherever possible and government legislation is in place to ensure local governments adhere to this. To cut through hedgerows in the certain knowledge that these endangered species are present is unacceptable and contravenes government legislation presented by DEFRA. Furthermore any cut through would involve cutting down trees that have tree protection orders in place. Wiltshire Council has been made aware that the site encompasses both Level 2 and 3 flood plains. The area is bisected by the Lambrok Stream and the Lambrok Brook. The site has historically and regularly experienced episodes of significant flooding. This has directly impacted on the North South axis of the site where surface water and raw sewage has been forced out of drains into existing housing developments gardens adjacent to the proposed site. The land consistently suffers from excessive surface water. Further development would exacerbate and increase incidents of flooding and would invalidate the Environment Agency requirement for a lifetime certainty of freedom from flooding. NPPF regulations state that development should be away from flood plain areas and associated drainage and this is further supported by Natural England. Should Site 3565 be developed, flooding will inevitably increase, thereby significantly impacting on current housing developments built in the 1970s, 1980s and 1990s alongside newly built properties under the current proposals whilst further undermining and damaging important heritage sites situated on and within the site. This will directly contravene the Environmental Agency documentations. To gain access to the site would incur breaking through Important and protected hedgerows and protected trees, dissecting flood plains and or building a bridge/culvert from the A361. None of which is either legal or financially viable. Given the number of brown sites currently available for development in Trowbridge, most notably the old Bowyers site and mindful that planning permission for a significant number of houses has already been granted

	<p>by Wiltshire Council eg: at West Ashton Court, the need to develop a significant heritage site with legal protection is unwarranted. We must preserve our heritage sites and be mindful of any development that significantly under minds their integrity and importance for future generations. To develop Site 3565 would be illegal and unsustainable under current legislation. The site is presented as being of marginal sustainability and fails many of the tests set up for sustainability criteria, most notably access to an infrastructure supporting health, education and transport links. Serious concerns have been raised in the HIA report pertaining to these matters. Thank you for taking the time to consider my arguments as listed above. Given the strength and significance of the legal arguments stated within and supplied by government agencies, I hope Site 3565 will be removed from Wiltshires Housing Site Allocation Plan following your inspection.</p>

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Not positively prepared the analysis of actual housing development requirements for the Westbury Town area is inadequate; there is an excess of 291 houses against the plan, which means that the Westbury Community Area is planned to be over-provisioned for by 245 houses. This means that no additional requirement for allocations is needed. Not justified the development of both Site 738 and Site 321 does not comply with Wiltshires Core Strategy, Core Policy 1, Clause 4.15: Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. Both sites are outside the village settlement boundary, which according to 2.8 is "with limited exceptions, not acceptable". In the last survey of housing need of Bratton, in 2015, just 8 houses/households were identified as required. Thus, both Site 738 and Site 321 individually exceed the housing needs requirement of the village. This calls into question the non-compliance with Core Strategy, Core Policy 1: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities . It is suggested that both sites are considered modest development, although this is assessed against the incorrect figure of 819 dwellings in the village. The 2011 census identified 512 households, with 1248 residents. This misrepresentation of the number of households in Bratton (there are currently less than 520) is despite being clearly advised of the correct number by many residents of Bratton, and by Bratton Parish Council in 2017, in response to the pre-submission consultation on the Housing Site Allocations Plan. Over the last 10 years, Bratton has had the addition 26 new houses, or 5.1%. An extra 40 new houses in Bratton would represent a further 7.8% increase, so that the proposed 15-year growth of the village would be 12.9%. This is neither justified, nor proportionate, nor sustainable. The WHSAP, Community Area Topic Paper Westbury, states at Table E1, Stage 2B (p46): Bratton Parish Council have advised Wiltshire Council that SHLAA site 321 is a site with potential for building in the future bearing in mind it is in the Salisbury Plain Special Landscape Area and, as it is at the West entrance to the village, any development should be designed to present an attractive aspect both in terms of landscape and architecture to this approach. This statement is a FALSE representation of the Parish Councils views. The minute of Bratton Parish Council Meeting, 5 September 2017, Item 17/63, reads: Wiltshire Council Draft Housing Site Allocations Plan Members discussed the Housing Site Allocations Plan (HSAP) and noted the report from the Chair, which had been circulated with the agenda papers. Members discussed the draft plan and it was proposed by Cllr Ridley, seconded by Cllr Forsyth and resolved (Cllr Ligo abstaining) to object to the inclusion of the land in the HSAP on the following grounds: That the development site is outside the settlement boundary That the development would have an adverse effect on the conservation area of the parish, impacting the</p>			

views from higher ground and the White Horse That the development would have an adverse impact on local amenity and represented over development That the development would have a detrimental impact on already over burdened infrastructure That there were other potential sites within the existing settlement boundary which needed to be considered which could provide the potential for development to meet local need within the settlement boundary That the increase in residents would represent an unmanageable increase in traffic and create significant highway issues It is noted that in the WHSAP Sustainability Appraisal Sept 2018, under the title Education and Skills, it states that Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work . Also, under the title Economy and Enterprise, that Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport. There are very limited employment opportunities within Bratton; the proposed new housing would result in increased out-commuting. Either or both developments would have a detrimental impact on the already over burdened infrastructure and services of the village water, drains, pre-school and primary school, GP surgery, shop. An extra 40 additional houses would bring major disruption and pressures to the whole community, as well as significantly change the nature of the village. There are no straightforward mitigation measures that can be applied as asserted in the Westbury Community Area Topic Paper. Access to both sites from the narrow main road, B3098, would be very difficult. The changes needed for reasonable access would in themselves make a significant impact on the village. The B3098 is very busy especially at each end of the day, with regular heavy traffic incl large lorries. The number of vehicles through the village can exceed 400 per hour as recorded by the village Speed Watch team, representing a doubling in the last 3 years. Access to and from Site 738 in particular for vehicles and cyclists would be unsafe due to poor visibility and adequate sightlines, plus the narrowness of the highway. Current pedestrian and bicycle access along Westbury Road to the centre of the village is inadequate, and in several places unsafe. Major changes would be needed to accommodate either site. Both sites would significantly affect the view and entry to the village and impact on the nature of it being a village. Both would have an adverse effect on the conservation nature of the village. Both sites would be very prominently seen from the main Westbury Road, as one enters the village particularly with Site 321 dropping sharply away from this road before levelling out, so that the layout of any buildings, etc in the area could not be hidden or shielded from view. The whole area is in an area of outstanding beauty and the proposed development would impact very significantly on the views from the Westbury White Horse and the top of Salisbury Plain. Any proposed landscaping with trees and shrubs would conflict with the openness and expanse of the hillside, which is part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). There are other existing and potential small housing sites within the current settlement boundary to meet local need. Such smaller units are better integrated into the existing infrastructure which would reduce the impact on the village and its community. This would also preserve the beauty of the whole area below the White Horse ridge. Bratton is a village, and its characteristics need be preserved as such. Bratton is currently carrying out its own Neighbourhood Plan which will set out future plans for the village. Not effective Large-scale developments on the edge of large villages are not effective in delivering the needs of people moving to the area who require housing unless there are employment opportunities there. Not consistent with national policy Large-scale housing developments on the edge of large villages are not promoted by National Policy.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC3 provides an update to Table 4.1 Housing Market Areas: Minimum to be allocated. As the Plan has already been submitted for Examination (on the basis of NPPF 2012) it is noted that for the purposes of Plan-making the housing land supply should be calculated in accordance with the NPPF 2012 (as recognised in paragraph 3.1 3.2 of Topic Paper 3 Housing Land Supply Addendum July 2018) according to paragraph 214 of NPPF 2018. However, for the purposes of development management (ie the consideration of planning applications) the new NPPF 2018 applies for the calculation of the housing land supply. Therefore as soon as the Plan is adopted the housing land supply will be different to that considered through the local plan examination. It is noted that Topic Paper 3 sets out the before position ie it excludes the proposed allocations. Table 3.4 of Topic Paper 3: Housing Land Supply Addendum identifies that the housing land supply position of the South Wiltshire HMA will decline rapidly unless the emerging allocations are found to be sound, which cannot be guaranteed. Even when the allocations are included in Topic Paper 4, Table 6.6, on the basis of the Councils assessment there is a only five year housing supply until the monitoring year of 2021. The amendments to Table 4.1 show that the minimum to be allocated has increased from 594 dwellings to 1,331 dwellings, reflecting the reduction in supply of approximately 1,058 dwellings. It is noted that the strategic allocation of Churchfields, Salisbury is no longer included in the supply as it is subject to significant delay and therefore is not included in the plan period to 2026. In addition we have questioned some of the commitments, eg 200 homes at the Central Car Park site (Salisbury). It is widely known that this site together with Churchfields have been long standing allocations ( ref Wiltshire Core Strategy Core Policy 20). Similar to Churchfields, the Central Car Park is in commercial use with no evidence or application coming forward to indicate its deliverability within the plan period. Pegasus continue to object to the inclusion of the Central Car Park site of which 100 dwellings are anticipated on the site in the plan period. Including this site as part of the developable commitments is both misleading and contrary to paragraph 14 of the NPPF (2012), which states that local planning authorities should positively seek opportunities to meet the development needs of their area and should meet their objectively assessed needs. Furthermore, it is noted that paragraph 6.2 of Topic Paper 4 July 2018 states that there is uncertainty as to whether the full number of units allocated at the Kings Gate, Amesbury strategic allocation will be delivered. As a result there remains a residual requirement to be met in the South Wiltshire HMA and significant uncertainty over those sites that are included in the deliverable supply. The Councils response is to propose a new allocation of 14 dwellings at The Yard, Salisbury, rely on an delivery at Fugglestone Red (a site with planning permission) and the proposed allocation a</p>			

	Netherhampton Road, the anticipated delivery from these sites during the plan period is questioned. An objection is made to the deliverable supply this is addressed in detail in response to PC15 and PC17.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC4 is the changes proposed to paragraph 4.2 to clarify that the figures in Table 4.1 do not include windfalls. The proposed changes to Table 4.1 ( PC3) clearly show that the minimum to be allocated in the South Wiltshire HMA has increased by approximately 55%. Our objections to PC15 Table 4.7 have questioned the methodology for windfalls. An objection is made to the approach to windfalls which has deviated from the approach in the adopted Wiltshire Core Strategy. The approach in the Core Strategy was found sound, (but conservative) by the Inspector. The Council are now using an approach which gives a higher figure and are relying on a greater number of large windfall sites than found sound by the Inspector. In the adopted Core Strategy the Council relied upon Method 1 (as set out in the July 2014 HLSS) ie for South Wiltshire over 5 years the windfall allowance was 230 dwellings. The Council are now using Method 3 from the 2014 HLSS (now referred to as Method A) which generates 330 dwellings over the 5 years. However, the consistent application of Method 3 / Method A shows how the number of windfalls has decreased over time ie from 449 dwellings over 5 years to 330 dwellings over 5 years. This shows windfalls are declining and yet the Council persist with a method which is totally reliant on historic trends of windfalls. The Council are also allocating sites, therefore the capacity is reduced for windfalls as these sites will come forward as allocations. This would suggest that the number of windfalls will be below the declining historic trend. It is considered that going forward, for the remaining plan period that there is an over reliance on windfalls in the South Wiltshire HMA.</p>

<b>Identify Proposed Change Reference Number</b>	PC15				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC15 provides an update to Table 4.7 HMA housing land supply to reflect the latest housing land supply statement. The latest assessment of the developable supply which is available is contained in the Wiltshire Housing Land Supply Statement Update March 2018 (HLSS) with a base date of April 2017. The Councils latest evidence indicates that from April 2018 the Council are unable to demonstrate a five-year land supply against the adopted requirement without the emerging allocations, this is based on NPPF 2012 which allows a far more permissive definition of a deliverable site. Whilst this is acceptable as the Plan was submitted under the transition arrangements, once the Plan is adopted the assessment of housing land supply will be subject to the new NPPF 2018 and the housing delivery test (the latter is to be published in November 2018). NPPF 2018 fundamentally changes the assessment of deliverable supply, such that certain sources of supply should only be considered deliverable where the Council provides clear evidence that the first completions will be achieved within five-years. We have undertaken an assessment of the deliverable supply in accordance with NPPF 2012 and conclude that the Council is only able to demonstrate a deliverable supply of 2,593 homes, which equates to a 4.20 year land supply rather than the figure of 5.7 years supply as suggested in amendments to Table 4.8 (PC17). Given the figures in the adopted Wiltshire Core strategy are a minimum housing requirement and given that the housing land supply as currently calculated is fragile towards the end of the plan period, and furthermore given the delay in the preparation of the Wiltshire Core Strategy (it cannot be relied upon to address the shortfall) it is considered that a contingency should be included for the South Wiltshire Housing Market Area. Land to the north of Old Sarum has been submitted to the Council, indeed this area (Longhedge) along with land at Netherhampton was recognised in paragraph 5.112 of the Wiltshire Core Strategy ( adopted January 2015) as:- broad areas of search for future development around Salisbury are mapped in Topic Paper 19 (see map Potential Areas for Strategic Growth in and around Salisbury/Wilton ) 45. If further land is required in the future, sites at Netherhampton and additional growth at Longhedge should be considered as part of the councils ongoing monitoring process. An objection has already been made to Policy H3.1 the inclusion of land at Nerthhamton Road for 640 dwellings and questioned the deliverability of the site in the plan period. It is noted that whilst in the Housing Site Allocations Plan, land at Netherhampton Road, Salisbury is proposed in the Plan for 640 dwellings, however, according to the HLSS March 2018, only 520 are envisage to be delivered in the plan period and this is assuming a start date of 2021/22 with 40 dwellings in that year and thereafter 120 dwellings per annum. Evidence Windfalls In our reps to PC4 we have questioned the windfall figure. As can be seen from page 113 of the Housing Land Supply Statement, the number of windfall completions and permissions is highly variable (ranging between circa 40 and 170 dwellings per annum in South Wiltshire). This is as a result of the influence of occasional large site windfalls which cause significant variation from the broadly</p>				

consistent level of delivery of small site windfalls. The Council now simply assume that the historic average rates persist without evidence that there is the capacity to sustain previous rates of large site windfall delivery. This means that exceptional windfall permissions (which will not be replicated) become embedded in the trends which the Council relies upon in the future, even if there are no similarly sized potential sites which could replicate that which has occurred. Such an approach cannot be sound. Saved Local Plan Allocations The Council continue to rely upon the delivery of saved Local Plan allocations in the Table 4.7. Appendix 1 of the HLSS, March 2018 although the number of sites and the contribution from those sites has reduced significantly as the Council have acknowledged that the Churchfield site will not come forward until beyond the plan period. There are still some saved local plan sites that are included: The saved local plan allocations from the South Wiltshire Local Plan are: Bulbridge {45 dwellings} Salisbury District LP 2003 and carried forward to South Wiltshire Core Strategy (adopted 2012). Bulbridge this site is a saved allocation from the Salisbury District Local Plan which was adopted in June 2003. In the intervening 15 years, no planning application has been received for the development of this site. This record alone indicates that there is no realistic prospect of delivery according to the PPG (3-020). This site is not subject to any planning application. Oldstock hospital {45 dwellings} this sites also dates from the Salisbury District Local Plan and is not envisaged to delivery until 2022/23, some 20 years later from when it was allocated. Old Manor Hospital {9 dwellings} Salisbury District LP 2003 and carried forward to South Wiltshire Core Strategy (adopted 2012). It was allocated for 80 dwellings. A full planning permission has been granted for 71 dwellings (15/09465/FUL) and the remainder of the allocated area has gained permission or been built for alternative uses (including care homes and a primary healthcare facility). There is therefore no remaining capacity for the residual 9 dwellings to be built. However, the Council include these remaining 9 dwellings for which there is no capacity, and which is not the subject of detailed consent within their deliverable supply. It can be concluded that these sites were allocated in June 2003 and saved again in February 2012. In the intervening years these sites have not delivered and as such they are unlikely to provide a reliable source of supply in the future. Proposed Allocations It is evident from the HLSS March 2018 that the allocations comprise 173 dwellings of the deliverable supply for 2017-2022. Due to the reliance on one large site and commitments, the housing land supply deteriorates towards 2022/23. (Table 4.8 PC 17). Housing Land Supply There is a difference in the deliverable housing land supply from that set out in the Housing Land Supply Statement published March 2018 (base date April 2017). Table 2 states that the deliverable supply 2017 2022 for South Wiltshire is 3,173 dwellings (this corresponds with Appendix 4 of the HLSS) however, when compared to Table 6.5 in Topic Paper 4 July 2018, the figure for the deliverable supply is 3,187 dwellings. The difference being 14 dwellings which is the proposed allocation: The Yard, Salisbury. For reasons set out above, eg question the reliance on windfalls, the saved allocations and the deliverability of some of the proposed allocations, we do not believe the housing supply as set out in Topic Paper 4. There remains no up-to-date housing trajectory to support the Proposed Changes.

<b>Identify Proposed Change Reference Number</b>	PC16				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC16 refers to paragraph 4.32 which is proposed to be updated to reflect the HLSS March 2018. The amended text states that for the supply exceeds the five year requirement through to the end of the plan period for all years except for four in South Wiltshire HMA, and then states that by then additional allocations will be included within the review of the Wiltshire Core Strategy. However, the Wiltshire Core Strategy is significantly delayed. It is over twelve months since there was a consultation on the scoping of the Core Strategy Review and no further consultation is envisaged until the latter part of 2019. Consequently, the Site Allocations Plan will not be able to rely upon the Wiltshire Core Strategy to address the housing shortfall later in the plan period. Even based on the Councils assessment of housing land supply, the position deteriorates in 2019/2020 onwards so that by 2022/23 the housing land supply is vulnerable being only 5.14 years (PC17 Table 4.8). In order to ensure that there is a five year housing land supply it is considered that a contingency site needs to be included in the plan ie Land off Britford Road, Harnham which has previously been identified in the WHSAP process as a Potential Site Option.

<b>Identify Proposed Change Reference Number</b>	PC17				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC 17 relates to Table 4.8 HMA Five Year Housing Land Supply. Topic Paper 4 paragraph 6.6 acknowledges that a 5 year housing land supply with a 5% buffer can only be demonstrated until 2021 and this is calculated on the basis of NPPF 2012 which takes a more permissive approach to assessing deliverable sites. We have already made the point in representations to PC4 that once the Local Plan is adopted the method for the calculation of housing land supply will change and therefore the position is not as robust as set out in Topic Paper 4 July 2018. Therefore it is considered that the Plan should include a contingency site ie land off Britford Lane, Harnham which was acknowledged in the initial Issues and Options Consultation of the WHSAP as a Potential Site Option. Land at Netherhampton Road is proposed in the Site Allocations Plan, but the allocation of 640 dwellings is not deliverable in the Plan period to 2026 ( approximately 120 dwellings are envisaged post 2026). This is set out in the Councils evidence base the HLASS published March 2018. Pegasus has already submitted detailed objections on behalf of Longford Estate in September 2017 objecting to the Netherhampton Road site (Policy H3.1) and promoting land off Britford Lane which has been assessed in the preparation of the Housing Site Allocations Plan. We have objected to the Sustainability Appraisal of the site and provided evidence to support our objections when we responded to the consultation on the Plan in September 2017. Our previous representations set out that land north of Britford Lane (SHLAA site 3434) should be considered as a more sustainable location for growth that can be delivered in the plan period, which would contribute to some of the housing provision on which Policy H.3 is reliant and also in recognition that the housing land supply deteriorates through the plan period. The land off Britford Lane, Harnham is well placed to accommodate growth in order to meet local housing needs in a sustainable way within walking distance of Salisbury city centre. SHLAA site 3435 is highly sustainable and deliverable that could be allocated to help address housing need. Including Site 3435 as a housing allocation would ensure that the WHSAP is effective as it is deliverable within the plan period and would ensure that despite proposed changes made to the residual requirement in the Salisbury and Wilton Community Area (as set out in accompanying representations), the objectively assessed needs can be met before 2026. The land is available and a number of technical studies have been undertaken to inform the masterplanning of the site. These were submitted to the Council in September 2017 to support our representations on the Site Allocations Draft Plan. Longford Estate also considers that Site S110 (Land to the East of Southampton Road, Alderbury) could help to address housing need. It was considered to be a suitable housing site and recommended to be allocated for housing by the Planning Inspector who reviewed the Salisbury District Local Plan (adopted in 2003). It has continued to be promoted since then and an outline planning application for 50 dwellings is currently subject to an appeal (planning application ref. 17/04001/OUT). The proposals will deliver a range of social, economic and environmental benefits which can be afforded varying levels of weight. The site is outside of any</p>				

	<p>designations and surrounded by built form therefore the degree of change to Alderbury village is at worst marginal. Of all the Large Villages, Alderbury is the largest with a greater number of residents and facilities, and it is the most sustainable, being the closest to Salisbury city centre (2km) with a number of regular bus routes into the City Centre and within 1km of the Park and Ride. Alderbury has a primary school; including before and after school care (with confirmed capacity to accommodate children from the proposed 50 dwellings); a pre-school and other village infrastructure such as local pubs, shops, churches and community facilities that are well placed to accommodate growth in order to meet local housing needs and support existing services and facilities including rural employment opportunities. Potential development sites in the Southern Wiltshire Community Area, including site (Site S110 Land to the east of Southampton Road, Alderbury) submitted to the Wiltshire Strategic Housing Land Availability Assessment process, have not been assessed in the Sustainability Appraisal (June 2017) as the WHSAP states that development in the Large Villages in the Southern Wiltshire HMA should come forward through Neighbourhood Plans, not through allocations in the WHSAP. It is clear from the HWP (Feb 2017) that the current policy approach of the Government to housing in villages is to support development that will help villages to thrive and to meet local housing need. While changes to the NPPF are yet to be published for consultation the Governments emerging direction of travel with regard to this policy matter is clear, and accordingly sites for growth in the Large Villages of the WHSAP should be positively considered for allocation within the Southern Wiltshire Housing Market Area where Neighbourhood Plans are not at an advance stage of preparation. For certainty and to plan positively for housing land supply purposes, and to meet the minimum local housing need identified through the WCS the WHSAP should allocate sites in the Large Villages. Site S110 is located in a sustainable location as described above and has a thriving local community with active community organisations and associations. The allocation of Site S110 in this location would help to sustain the local services and facilities and would meet local housing need.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>PC27 provides an update to Table 4.11 South Wiltshire HMA - distribution of housing development 2006-2026. It is noted that the developable commitments includes the proposed allocations. The developable commitments has reduced from 3,833 dwellings to 2,970 dwellings, it is considered that this figure should be reduced further to reflect the uncertainties surrounding the central car park site (even though only 100 dwellings is included in the plan period at this site) and also to acknowledged the uncertainties in relation to the delivery of housing at Kings Gate, Amesbury (paragraph 6.3 Topic Paper 4 July 2018). Based on the Councils figures the developable commitments excluding proposed allocations for Salisbury and Wilton are 2,226 (Table 2.3 Community Topic Area Paper Salisbury July 2018), allocations comprise: Netherhampton Road reduced in the HLSS for the plan period to delivery 540 dwellings ( allocated for 620 dwellings) Hilltop Way 10 dwellings North of Netherhampton Road 100 dwellings Land at Rowbarrow 100 dwellings The Yard 14 dwellings The total allocations proposed to delivery in the plan period is 744 dwellings. Compared with the residual requirement of 866 for Salisbury and Wilton (Table 2.3 of the Community Topic Paper July 2018 referred to above), leaving a shortfall which is to be met by windfalls in Salisbury and Wilton. We have critised the assumptions for the windfall figure in our response to PC4. In view of our objections to the Housing Land Supply and our objections to the allocation of Netherhampton Road ( the latter is set out in detail in response to the Draft Plan in September 2017) it is considered that the developable commitments (which includes proposed allocations) should be increased to reflect the fact the overall housing requirement is a minimum (indicative housing requirement and is therefore not a ceiling figure). The Council based on their own figures acknowledge that the surplus amount possible over the indicative requirement for the plan eriod is modest even at face value . In view of the above there should be contingency sites included in order to support/maintain the five year housing land supply and housing delivery across the plan period and support the role of Salisbury as the Principal Settlement and focus for development in the HMA.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>PC29 amends paragraph 4.64 to the effect that two allocations of over 500 dwellings provide a large source of supply . However, one of the allocations was included in the Wiltshire Core Strategy ie Fuggleston Red and has planning permission and is continuing to be developed. The other allocation is a proposed allocation at Netherhampton Road. The reliance on these two sites is significant. Of the proposed allocations in the Salisbury Community Area ie 850 dwellings, the plan proposes 74% on one site at Netherhampton Road (Policy H3.1), which is not envisaged to commence delivery until 2021/22 and then only 40 dwellings are anticipated. Thereafter, 120 dwellings are expected with the site continuing to delivery post 2026 beyond the plan period. We have in our response to Policy H3.1 of the Draft Plan in September 2017 objected to the site and outlined our major concerns in respect of traffic, landscape, water supply and deliverability. The proposed changes do not provide any further information to support the proposed allocation of land at Netherhampton Road, (Site 1208) Policy H3.1. There is no evidence to indicate that the development could come forward by overcoming the very real constraints and develop a comprehensive mixed use strategy within the plan period. Furthermore, it is noted that both sites ie land to the north of Netherhampton Road (Policy H3.3) and land at Netherhampton Road (Policy H3.1) comprising proposed allocations of 640 dwellings and 100 dwellings respectively are in the control of the same developer Bovis Homes. The HLSS ( March 2018) indicates that both sites will start to deliver with 40 dwellings each in 2021/22 and then the following year 120 dwellings are expected from land at Netherhampton Road and 60 dwellings from land north of Netherhampton Road, ie 180 dwellings from Bovis Homes in a year. Even on the basis of the Councils own evidence for a forthcoming inquiry the average that has been achieved on one site is 117 dwellings ( on land North, West and South of Bishopdown Farm - Barratt David Wilson). We remain of the view that the approach taken in the Housing Site Allcoations Plan to allocate 74% of the Salisbury housing allocations in one location, with many unknown and unresolved issues, risks a significant housing shortage in Salisbury within the plan period. By limiting the potential housing supply to one large site in Salisbury, the plan conflicts with paragraph 14 of the NPPF which states that: Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to prapid change. Should sites S1028 and S1027 fail to deliver within the plan period, the Plan as currently proposed does not allow for sufficient flexibility for an alternative, deliverable site to come forward in accordance with policy. It is considered that the Plan should address this issue and a contingency site at land off Britford Lane, Harnham should be included in the Plan, this site should be allocated and can then support the five year housing land supply.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC31 amends paragraph 4.68 to reflect that the intention is that Fugglestone Red (instead of Churchfields) and the Netherhampton Road site will deliver new homes alongside each other towards the end of the plan period. For reasons set out in response to the Proposed Changes this is not considered to be a robust and effective strategy as the anticipated delivery per year from these sites is questionable. I refer to our previous representations on Policy H3.1 which questioned the delivery from the Netherhampton Road site and also reference was made a report into the delivery of urban extensions on behalf of Gladman Developments Limited in 2014 and the also the Savills study on behalf of Barratt Homes in 2014. Nathaniel Lichfield and Partners produced a report 'Start to Finish' in November 2016 which also illustrates the long lead in times for large sites, that on average it took 3.9 years lead in time for large sites prior to the submission of the first planning application. Pegasus remain concerned that the sites that the Council rely upon will not delivery as set out in the housing trajectory.

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>	Sustainability Appraisal September 2018 - Main Report (EXAM/02A)				
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<p>Pegasus Group submitted representations to the draft WHSAP in June 2017, objecting in relation to Site 3435 (Land off Britford Lane, Harnham). The site was included in the Issues and Options Consultation Draft of the WHSAP as a "Potential Site Option" but was subsequently removed</p> <p>Wiltshire Council published a Housing Site Allocations Informal Consultation in February 2015. Included within this was a Plan identifying "Potential Site Options". The Council's Site Identification Process involved removal of sites with strategic policy concerns, including land within Flood Zone 2 or 3. As a result of several discussions with Wiltshire Council policy officers in August 2014 through to the publication of the</p>				

**Assessment Addendum  
(September 2018).**

Informal Consultation regarding the deliverability of the site, Site 3435 was included as a Potential Site Option. The site is referred to as SAL2 (and erroneously included the neighbouring rugby fields).

A large amount of technical information was submitted to Wiltshire Council (highways, drainage, flood risk, landscape impact, heritage, design) yet the Stage 2(a) assessment contained within the Salisbury Community Area Topic Paper failed take any of this technical information into account, which led to its unreasonable exclusion from the site selection process.

The Stage 2a assessment was based on a series of “exclusionary questions” which were set out at Table D.2. We did not object to the principle of the methodology, however the approach taken to question 5 (“Is the site fully or partly within flood risk areas, zones 2 or 3?”) was inflexible and resulted in errors which consequently led to the removal of Site 3435 (Land off Britford Lane) from the assessment at that stage.

Furthermore, the assessment made an uninformed and incorrect assumption of the highway capacity of the ‘main road’ (Newbridge Road), using it as a reason to remove the site from further assessment. Our objections highlighted a major inconsistency in the approach taken to the site assessments and we detailed in the representations the specific errors in the approach taken to assessing site 3435 (Land of Britford Lane) which we do not propose to repeat here

In response to the representations made, the Council has assessed Site 3435 in the revised Sustainability Assessment which defines it as a “less sustainable site” at the Table at page 15.

At paragraph 7.1.3, there is a review of ‘additional’ sites that have come through the Council’s Stage 2 site selection process, and this includes Site 3435. At page 103, the Table states that:

*“This site was previously rejected at Stage 2 of the Council site selection process however, additional information has since been received and this site has now been taken forward for SA”.*

The site was therefore considered to have passed Stage 2 of the Council site selection process and in the document it is put forward to the Stage 3 assessment stage. Site 3435 is assessed at pages 186-187. The assessment considers the site as being capable of accommodating 87 dwellings, however architectural masterplanning has demonstrated to officers that the site is capable of accommodating 100 dwellings.

The assessment confirms that no major adverse effects have been identified which we agree with.

However, we disagree with the six moderate adverse effects that the assessment identifies at the site and we raise the following points:

- The assessment refers to the woodland belt running through the middle of the site and that it should be protected and enhanced. The technical submission prepared in relation to Site 3435 explained that the tree belt is protected by a Tree Preservation Order, and designs were set out to illustrate how this feature of the site could be opened up to the public and made into a landscape design feature.
- The assessment considers that development at Site 3435 would lead to an increase in demand for water. This would be the same for any development site and it would be unreasonable to allocate an adverse effect for this reason.
- The assessment recommends that further flood modelling work and a Flood Risk Assessment would be required. Masterplans have been presented including a detailed package of technical information which specifically excludes the Flood Zone 2 area from development. The detailed package of information included a surface water drainage strategy.

- The assessment makes a sweeping statement that development of the site would cause harm to the character and appearance of the Conservation Area, the setting of the Conservation Area and the setting of the Cathedral. It is unreasonable to make these assumptions without qualifying them. A heritage assessment was undertaken as part of the technical submission, and a meeting held with Officers confirmed that there would be “less than substantial harm” and therefore the test is whether this is outweighed by public benefit and no such assessment is set out in the Consultation document.
- In terms of local services and facilities, the assessment states that the local GPs and schools are at capacity and therefore mitigation would be required. This is inaccurate. On 08.11.2018 the Edubase website states that there is capacity at the school of 90 pupils are there are 81 currently at the school. Harnham Infant School is stated to have a capacity of 270 children and there are currently 255. Therefore there is capacity within these two schools for 24 pupils. It is unreasonable to state these reasons as rendering the site as having a moderate adverse impact.
- The assessment refers to the highly sustainable location of the site yet considers it to have a minor adverse effect as it is likely to generate car journeys – however it is clear that being within 10 minute walk from the city centre, the site is far less likely to generate car journeys than, for example being located at Netherhampton Road.

To summarise, the Sustainability Assessment of Site 3435 (Land off Britford Lane) makes incorrect assumptions that are not justified by evidence. The inconsistent approach to site assessment is amplified by the fact that Wiltshire Council planning officers have been party to a number of meetings discussing the development potential of the site and have received a detailed package of technical information which demonstrates that the site can accommodate 100 houses in a highly sustainable location, bringing with it numerous material benefits including 40% affordable housing

It is submitted that in order to make the WHSAP sound that Site 3435 be re-assessed in light of the technical information that has been provided to the Council regarding the capacity of the site.

The site is highly sustainable and deliverable that could be allocated to help address housing need.

Including Site 3435 as a housing allocation would ensure that the WHSAP is effective as it is deliverable within the plan period and would ensure that despite proposed changes made to the residual requirement in the Salisbury and Wilton Community Area (as set out in accompanying representations), the objectively assessed needs can be met before 2026.

Longford Estate request that the site is considered as an ‘omission site’ at the Examination as it is well placed to accommodate growth in order to meet local housing needs and support existing services and facilities and reduce the number of car journeys and pressure on the highway network in comparison with other proposed allocations further away from the city centre which would result in a heavier reliance on the car.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Re: Crudwell Parish Council in support of the removal of Ridgeway Farm - Wiltshire Housing Site Allocation Crudwell Parish Council fully supports the decision at Cabinet Level to remove the Ridgeway Development from the Housing site allocation plan and would like to restate its comments on the original plan that decisions of this type are best made by local people at a local level with the support of the community. Crudwell Parish Council continues to object to the proposed allocation of Ridgeway Farm for 50 dwellings (or 40 additional dwellings) on the basis that: there is no strategic need for the Housing Site Allocations Plan to identify any housing sites in the Malmesbury Community Area; in that context, Wiltshire Council's own documentation states that "the most appropriate means to assess local needs and plan growth at each Large Village is through the neighbourhood planning process" The emerging Crudwell Neighbourhood Plan is advancing rapidly and has already been the subject of a number of rounds of public consultation and exhibitions; the Crudwell Neighbourhood Plan will identify a housing site or sites to meet its local housing needs as defined by a housing needs assessment produced to inform it; the collaborative and inclusive approach adopted in producing the Crudwell Neighbourhood Plan is intended to achieve public support to a far greater extent than Wiltshire's Housing Site Allocations Plan has achieved; On that basis, we support the Housing Site Allocations Plan removal of any proposed allocations in Crudwell, and allow the Crudwell Neighbourhood Plan to make the decision about Crudwell's growth.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the proposed change to remove the Ridgeway Farm site from the Wiltshire Housing Site Allocations Plan because firstly there is no Strategic Need for Wiltshire to allocate housing in Crudwell because firstly it isnt justified or necessary - supply in the Housing Market Area is good and the Wiltshire Core Strategy says development in Large Villages should be limited to small sites to meet local needs. Alongside this, Crudwells Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for earlySpring), and this will allocate land to meet identified needs. The Councils and Governments Localism agenda is best served by allowing the Parish to determine its own future.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	On behalf of Linden Homes Ltd we make the following written representation in respect of PC62, as follows: Surface water runoff from the Linden Homes development would be managed using a sustainable drainage strategy, with this incorporating appropriately located SuDS features within the layout and landscaping of the site. These features would include basins and swales to convey the surface water runoff across and from the proposed development at an attenuated rate, and therefore provide flood risk management to the surface water runoff rates and volumes. The use of these features would also provide additional environmental and community benefits, including to water quality, biodiversity, ecology, landscape, visual impact, recreation and education. Features for the infiltration of water to ground would be used in areas where this is viable followed then by an attenuated release with a discharge in accordance with the sustainable drainage hierarchy. The use of these features is a key component of the layout of the site, meaning that the drainage strategy would enhance the overall feel of the scheme and provide green corridor linkages across and from the site to the surrounding area.

<b>Identify Proposed Change Reference Number</b>	PC92				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the proposal to remove the Ridgeway Farm site from the Wiltshire Housing Site Allocation Plan on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to "small sites" to meet local needs. Our Neighbourhood Plan is at an advanced stage and progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future. Over and above the comments above, I objected to the inclusion of the Ridgeway site in the first instance as I felt that the number of houses proposed was more than the Housing Needs Assessment indicated and that the over development of that site would only serve to exacerbate the high volumes of traffic using Tetbury Lane and increase the congestion at the very busy junction with the main road through the village.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the proposal to remove the Ridgeway Farm site from the Wiltshire Housing Site Allocation Plan on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to "small sites" to meet local needs. I have attended a number of meetings of the Neighbourhood Plan Steering Group and it is my belief that it is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), is very well supported by the community and is planning to allocate land to meet identified needs. The Council's and Government's Localism agenda is best served by allowing the Parish to determine its own future. The Parish Council is also fully engaged with the NHP and I truly believe that this collaboration will deliver the right decision for the community with the right and appropriate level of development built in line with design standards and guidelines that will maintain the inherit character of the Parish.

**associated evidence documents.**

1 Poor Residential Area Planning?

Anecdotal observation suggests that there are many mature and elderly residents in the immediate catchment area of Elizabeth II field. The lack of use of the play equipment is partly due to the increasing age profile of local residents.

The environment of Elizabeth II field represents one of the few areas of land available to exercise dogs, an amenity disparaged by the (unsigned author) of APPENDIX 3 to Cabinet Report 3rd July 2018 Note on Elm Grove Field and Implications for Asset Transfer. as 'dog walking'. Dogs are a common pet for the elderly and certainly contribute to the wellbeing of an aging population in this area. There are no other areas available for this amenity within any reasonable distance.

'Locating the proposed school close to existing residential areas should act as a catalyst for promoting sustainable transport choices by extending pedestrian and cycles routes .. ' may be laudable council aim, but it does not fit with the potential access hazards of a bend in Wiltshire Drive.

As a grandparent who routinely collects primary age children from both Bratton and Hilperton primary schools, I see almost no children on bikes in this age group, with over 50% transported by car, and almost nil by bus. With many parents working, children are often delivered to school by carers who often do not live within the designated school catchment area and thus, may be unaudited by schools planning.

A typical example of poor planning to be avoided is at Hilperton school, located at the very end of a housing estate, which consequently gets blocked by cars; parking and manoeuvring. (Although there is a pedestrian access route, children and carers still need to emerge onto Newleaze).

The potential siting of a proposed school at the northern end of this development adjacent to Elizabeth II field (613/248) would inevitably create a similar problem, especially if the catchment area of 298 is included, with traffic moving through the estate to enable safe and secure transit for very young children!

It therefore makes sense to place a school; 'where the school can provide a natural focus for the local community, possibly in association with other local facilities such as shops or other community buildings'. - ie. central to new development, with appropriate transport planning.

from 'School-places-strategy-2015-2020' Wiltshire Council.

2 Safety on the bend

Attached is a photograph taken at a distance of 2.4m from the edge of Wiltshire Drive showing the bend, and the extremely poor visibility splay. A prior application to create an access here was withdrawn, due to highways concerns. The visibility splay problem has not improved since then, while the number of cars parked on Wiltshire Drive has increased, and is unlikely to diminish. While the main entrance of the proposed school would be from the South to the Elm Grove development, any access from Wiltshire Drive (including for construction traffic) would undoubtedly cause a parking problem either side of this bend, further adding to the reduction in visibility, and almost certainly, potential for accidents.

	To simply avoid the potential for serious accidents, the council should engage with the developer to provide the standard infrastructure required as part of the housing development. Bending the normal rules, in haste, to save money and provide a quick fix could well lead to unfortunate consequences.

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>I did write about these two sites before on the 23rd July 2017 and 20th September 2017, but I am not able to find copies of my letters on the Council website and so I am writing again. My initial reaction is that the designated area Number 321 (Court Orchard/.Cassways) is rather small for 35 to 40 homes and the access is very poor and will be dangerous if the development goes ahead. Each morning, there will be some 35 to 40 cars all trying to get onto the Westbury Road through a single road access. Given that this site is lower than the Westbury - Bratton road, visibility of cars on the road will be limited for those leaving Court Orchard/Cassways. Perhaps half the cars will want to go to Trowbridge and so will turn left. From that direction, turning left again into the Trowbridge Road is difficult and the road then becomes narrow and steeply descending. The problems of accessing the Westbury Road and using the Trowbridge Road are very similar for the 738 site. Would it not be better to have a new development along the Lower Westbury Road, to the West of the existing houses on that road and with small groups of the new houses each with their own point of access to Lower Westbury Road. This would require that the Lower Westbury Road is upgraded and also a new access road constructed onto the Trowbridge Road. In order to pay for the extra roads, one could develop more than 40 homes. In this way and, if designed correctly, it should not spoil the view for any of the existing residents of Lower Westbury Road. A new link to the Trowbridge Road would mean that the new residents need not drive pass the existing residents on the Lower Westbury Road. The cost of upgrading the Lower Westbury Road and improving the link to the Trowbridge Road could be a condition of the tender. If the number of houses were to be increased to, say, 50 or more, then most developers would be willing to absorb the cost of the road building. Finally, regarding both sites, they are highly visible to any driver entering Bratton Village and whatever is eventually built on the sites needs to appropriate for a village setting and complement the existing features of the village. High density housing, as proposed, certainly would not complement the village.</p>

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Thank you for consulting Hampshire County Council Minerals and Waste Policy Team regarding the above. Whilst we have no comments to directly make on the above, we would like to take the opportunity to highlight the following there are two safeguarded mineral and / or waste sites on the Hampshire / Wiltshire border. The two sites, and relevant details of each are as follows: Dean Hill MOD site, West Dean This is a waste water treatment work site and there is no reason why this would not continue to function Pound Bottom This previously was within the Hampshire border, but is now a site that sits within Wiltshire. However, it comes under the Hampshire Minerals and Waste Plan (HMWP) 2013 because it is within the New Forest National Park. This is an operational non-hazardous landfill site. In 2007, the New Forest National Park granted planning permission for the installation and operation of a leachate storage tank (which was to replace the previous leachate lagoon). New Forest National Park also granted planning permission (in 2007) for the installation and operation of a landfill gas utilisation plant. This latter permission initially granted operation until November 2017. I believe the site was due to enter into a restoration phase soon, but if you need further information on this, I would suggest you check the New Forest National Park planning pages since the planning permission and associated conditions lie with the National Park. Please also note that safeguarding requires any proposed development to avoid prejudicing the continued use of safeguarded minerals and waste infrastructure. For further information please see the Hampshire Minerals and Waste Safeguarding SPD <a href="http://www3.hants.gov.uk/hmwp-spds.htm">http://www3.hants.gov.uk/hmwp-spds.htm</a></p>

<b>Identify Proposed Change Reference Number</b>	PC21				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>TOP.04C Topic Paper 4 Developing Plan Proposals Addendum (July 2018) provides on p.15 figures relating to the land supply position for Chippenham Community Area. These figures reflect PC21 (amendments to Table 4.10). This clearly shows that there is only a 1% variation in this particular rural community area between the Indicative Requirement for the plan period 2006-2026 of 580 dwellings and the total number of dwellings completed or committed (including allocations) for the plan period of 585 dwellings. The total Indicative Requirements for urban areas and rural areas for North and West Wiltshire of 24,740 are expressed in Table 4.7 as a Minimum Housing Requirement, they are not a maximum figure for housing delivery. This demonstrates that increasing the capacity of allocation H2.11 at Hullavington by a further 20 dwellings, by including the field to the north west of the allocated site within the allocation, that is allocating the whole of SHLAA site 690, will help to provide an enhanced buffer for this particular rural community area should other commitments fail to deliver. Twenty additional units at Hullavington, in line with previous representations made on behalf of our client for this site at Regulation 19 in September 2017, would result in an additional 3% of contingency for the Chippenham Community Area remainder providing enhanced flexibility in housing land supply for this geographical area of the authority. Moreover additional residential development at Hullavington would be sustainable in terms of reducing the need to travel as employment opportunities will continue to increase in the area with the purchase and development of the Hullavington Airfield site by Dyson for advanced technological and automotive engineering purposes. The Hullavington Airfield employment site lies to the south east of Hullavington village and will continue to provide additional employment opportunities within the plan period up to 2026 and beyond. This is evidenced by the recent submission by Dyson Technology Ltd of a planning application to Wiltshire Council registered on 29th August 2018 18/08271/OUT for the following development; Outline planning application for up to 44,150 sq.m. (GIA) of development, comprising a maximum of 20,000 sq.m. (GIA) of research and development/office floorspace (Class B1 (a) and (b)) and 24,150 sq.m. of ancillary development comprising test areas, an energy centre, a logistics/storage building, hangar building, staff and customer facilities, and gatehouse, retention and extension of operational runway, and new access arrangements, comprising a re-aligned section of C1 road and new roundabouts at both the junction of the A429/C1 roads and on the C1 road (all matters reserved except for access).</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>For the attention of: Inspector for planning. I wish to raise my concerns and objections to the following planning project included in the County Council' Draft Wiltshire Housing Site Allocations Plan. Policy H2.1 -Proposed allocation on land at Elm Grove Farm. A petition has been raised, not by any social media method, but by talking to people in the local area of the proposed site and producing a list of signatures, of people who are against the idea. A total of 348 signatures have been collected. The petition was based on the following: 1). The loss of our only green area, for children to play, people exercising and dog walkers to use. 2). The field became part of a legacy, after the London Olympics. It has been a recreational area for the past 30 years. 3). Increased traffic on Wiltshire Drive. At least 14 recorded accidents in recent years. 4). Large construction Lorries entering the field from Wiltshire Drive, during the adjacent housing development, prior to the school being built. 5). Do we need a new school? Schools are included in plans for the Yarnbrook to Hilperton development. It amazed me how many people didn't have any knowledge of what could possibly happen in this planning for houses in the town, 90% to 95% had never heard of anything taking place and therefore knew nothing about it. Even households, with young children, do not want to see changes to the Queen Elizabeth field, to incorporate a new school. They would rather keep the field, but only better maintained. They all thought that the field was in trust, there for ever and could not be changed. I personally attended a Council meeting on the 10th July 2018 and presented both questions and statements. Some of the questions have since been kindly answered in an e-mail dated the 12th October, from Mr. Toby Sturgis, Cabinet Member for Spatial Planning, Development Management &amp; Property, others are still outstanding. I will now, if I may, go through those questions and statements, expanding on them, after receiving some answers and drilling down into the well-hidden council web-site for further details provided in the Appendix 3. Note on Elm Grove Field and Implications for Asset Transfer. The Queen Elizabeth Field: It states, among other things that, The Queen Elizabeth II Field, known as Elm Grove Field, is owned by Wiltshire Council and comprises a playing field of approximately 2.85 hectares. It includes a small play area in poor condition and a basketball hoop. No marked out pitches, as it is very wet, unsuitable for team sports. Its current use appears to mainly be for dog walking. In response to the statement, I would like to emphasise that the main reason it is used mostly by dog walkers, is due to the fact that the field has been very badly maintained, the ditches have never been cleaned out, and hence the drainage is very poor. The grass has not been cut on a regular basis and when it is cut, it is left to rot, making it impossible to play on. Only certain sections of the field were cut, the rest left to grow very long, too long for children to be able to play on. That changed a month or so ago, when the proposed plan came to the notice of some of the local residents, it has since been cut more often and the cut included the whole field. This maybe suggests it was deliberately left so that it became unplayable, which then enabled the council to say it was only used by dog walkers. The hedges around the</p>			

field are now being trimmed back, the first for a very long time, (10 years has been mentioned). Attached pictures No's 1-4 show the state of the area at times. A fund of £20k, available under an S106 agreement, from the development of the WWDC Offices, has not been used. It could have been spent on up grading the playing equipment, so that it would have been utilised more. The rough draft that I have seen of the plan, for the field, does not offer the open space that the present area does. The inclusion of football pitches, gymnasium, car park, changing rooms, eats into the area, thereby not offering the same freedom of open space for children, adults and dog walkers, as there is at present, provided the current area was maintained well. Plus the fact that the area is the only open space this side of town, it's on the perimeter of an established residential area, offering tranquillity and nature, rather than having to travel miles, which only adds to the current air pollution and traffic problems of Trowbridge. Even the government is stating that we all need to exercise more and by recent media reports, the whole country is stating that we should retain our parks and playing fields. Parks and green spaces are proven to help people, both physically and mentally. Places where they can walk, breathe fresh air, run and play. They are an important tool to drive social cohesion, combat loneliness and build community spirit. Don't destroy that tool. I mentioned nature, the following list highlights the different wildlife that survives in and around the field. Herons, Woodpeckers, Cuckoos, Bats (Pipistrelle), small Deer, Foxes, Newts (in the ditches), Hedgehogs, Field Mice, plus all the common birds frequent the field. Even a Stork has been seen flying over. Access to the field off Wiltshire Drive: The planners state that access is sufficiently large that it can be used for construction traffic. I would totally disagree with this statement, Wiltshire Drive is at times a very dangerous road. There have been 14 accidents, (see attached record), between Ramsbury Walk and Dursley Road, 12 of which have occurred between Ramsbury Walk and Champion Dive, dead centre of these two roads, is the proposed entry to the field. The accidents were varied, with pavements mounted, walls knocked down, collisions with parked cars, even a car hitting the front wall of a house and one demolishing a telephone junction box. Speeds of over 60mph have been officially recorded. Wiltshire Drive is currently seeing an increase in traffic, as more are using this as a rat run, from the town centre, to Bradley Road and beyond. It would see an even greater increase should all the proposals go ahead. The Council should have correspondence from 2004, when a planning application, by the Council, was turned down by the Highways Officer, on three issues: a). the possibility of overspill parking on the surrounding roads, which in this current proposal would be cars dropping and collecting school children. b). It stated that visibility, to the left, for emerging traffic did not meet the required standard. c). The site has insufficient frontage to the south-west to enable an access to be satisfactorily laid out incorporating the necessary visibility splays which are essential in the interests of highway safety. Attached pictures No's 5-9 detail the problem. The correspondence also said that overspill parking would cause complaints and conflict with residents, as the latter would find their roads and drive ways congested with cars. This was based on the fact of anything over the number of persons using the one football pitch was unacceptable. The number of children being brought into the school would be greatly over and above this number. A recent national survey shows that 50% of children are transported to school. Information says that Wiltshire Drive was purposely designed, with its bends to stop parking and speed, on this type of road. People parking would not even give this a thought, it would be a matter of, park as nearer to the entrance as possible, I won't be long dropping / collecting the kids. Too suggest that large construction Lorries and even more traffic, than was mentioned in the plan at that time, now be given access to the site, surely this would not reach the present required safety standards. Established trees would be destroyed in the access area, as it's not wide enough for large Lorries to pass through, without damaging the branches. Attached picture No. 10. There is also a Public Right of Way footpath down the centre of the access area. Attached picture No. 10. If access was deemed necessary to the site, would it not make sense to build the proposed road for the new housing development first? Starting at the KFC roundabout and going through the development to join up with Dursley Road. Even access for a school could be provided by a turn off from the new road, thereby leaving the present entrance as a green area and eliminating the increased traffic problems on Wiltshire Drive. A method used when the Castle Mead new development was commenced. Do we need a new school?: In the Council document ref. SHLAA ref Site 613 and 248 it states that development proposals on this site would need to deliver a two form entry primary school. Correct me if I'm wrong, this would cover some 420 pupils, plus the necessary teachers, teaching assistants, cleaners etc. and a possible nursery attachment. We already have several schools in the area, not all are fully subscribed and the nearest, Holbrook, only a few minutes away, is not full, plus it has

	<p>the ground space for expansion. Take the national figures for new schools, where they say that new houses generate 1 primary pupil for every 8 new homes built. Taking into account the 250 houses to be built next to the school, plus the 79 at the top of Wiltshire Drive and the 31 on the land between Dursley Lane and the railway line, that's 45 pupils, not sufficient to demand a new school. To achieve full occupation of the school, pupils would have to be transported in from other areas, only adding to the already increasing traffic problems. Parents don't send their children to primary schools by bus, because of their age. They transport them by the family car. Noise levels. The noise levels for houses backing onto the proposed football pitches would increase considerably, from having a green field, to two football pitches, with 44 players, officials, supporters etc. shouting. The next thing will be floodlights erected, giving even more disturbance. Under this heading of noise, it is worth mentioning that one house in Sorrell Close, the side of which runs parallel to the proposed entrance and the rear facing the area for the proposed school, is run as a home for children with learning difficulties. The last thing they would want is the noise/ disturbance of construction Lorries driving past, they want calmness and tranquillity. Hence all the above goes against five of the planning's Sustainability Appraisal objectives: Numbers: 4.Improve air quality throughout Wiltshire and minimise all sources of environmental pollution. 5a. Minimise our impacts on climate change though reducing greenhouse gas emission. 5b. Minimise our impacts on climate change though reducing our vulnerability to future climate change effects. 7.Conserve and enhance the character and quality of Wiltshire's rural and urban landscapes, maintaining and strengthening local distinctiveness and sense of place. 10.Reduce the need to travel and promote more sustainable transport choices. People's health is a major concern for the Country and will continue to be so, with its aging population The pressure for more money for the NHS and Old age care, will increase the demands on the Government and Councils, this can be helped by protecting green spaces for walking, relaxing etc. hence the Daily Mails petition for the following: A statutory requirement for councils to ring-fence funding for parks at £30 per household, per year. A legal duty for all green space to be managed to a good standard. New rules banning development on, or the inappropriate use of, parkland. A new central Government fun to provide emergency help for parks most at risk and ensure the long term future of Britain's green spaces. I hope that you will take into consideration all of the above points, the number of signatures collected from local house holders, before you agree with the proposed plan. [See attached].</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Application No 18/05429/FUL Comments There is no 5 year housing land supply problem in Crudwell and the most appropriate means to assess local needs and plan growth is through the fast developing neighbourhood plan. The NPs housing needs assessment has determined a local need for 20 to 25 new homes, the Neighbourhood Plan proposes to allocate land to meet that need. I cannot see good reason why this application should be successful and consideration should be given to the content of the NP, currently being worked on and close to completion. Traffic and potential flooding issues have not been addressed by the developer. Name [REDACTED] Address: [REDACTED] Date: 30/07/2018 Case Officer: [REDACTED]

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. This is a small village which falls in a conservation area. It is popular for walkers, bikers and tourists. This number of housing would definitely detract from the area and cause major environmental issues.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Our clients support the amending of text at Paragraph 5.015 such that the area of land recommended for the expansion of Hullavington Primary School is the same as that in the text of Policy H2.11 of 0.2 hectares. Hannick Homes have been working with the Hullavington Neighbourhood Plan Steering Group and the local community with regard to the site identified at draft allocation H2.11. It has become clear through the course of consultations that the local community have aspirations to deliver additional community benefits at the site over and above those identified in Policy H2.11. Given the site is already allocated in the Wiltshire Housing Sites Allocation Plan for approximately 50 dwellings, and its location adjacent to the Primary School it is well placed to meet the communitys additional requirements which include the following; Additional off-street parking for the school to address current congestion problems experienced at pick-up and drop-off times An equipped childrens play area as currently there is no publically available play space in the village A public park/green space for the benefit of the whole village The SHLAA site 690, which is wider than the allocated site of H2.11 and comprises 3.8 hectares is able to provide the requirements of Policy H2.11 as well as to integrate the additional requests of the local community. However, in order to be able to release additional land for car parking to serve the Primary School adjacent to The Street, to retain and enhance the existing public rights of way that cross the site, to provide the 0.2ha for school expansion and to provide the necessary open space and drainage attenuation to serve the site, it will be necessary to increase the area for development over and above that allocated at Policy H2.11. This matter is being addressed through the Hullavington Neighbourhood Plan and will result in a proposal that can deliver the following benefits for the village of Hullavington; Land reserved for the the expansion of the adjoining primary school (0.2ha) as required by Policy H2.11 Improvements to the junction of The Street and Norton Road which have been confirmed as acceptable with the Highway Authority to meet the needs of up to 70 additional dwellings at the site. About 28 affordable dwellings (40%) to meet local needs A new off street parking area for the school to address congestion in The Street at drop-off and pick-up times and when events are run at the school A new public parkland along the watercourse for use by the whole community, currently excluded from the boundary of Policy H2.11 Ecological enhancement along the watercourse corridor within the parkland and across the site, particularly with regard to the Barberry moth. A new equipped childrens play area and informal natural play features within the new parkland for use by the whole community Circular walk for residents within the parkland and the historic public right of way crossing the site, with an enhanced green corridor link to the The Street The allocation being pursued through the Hullavington Neighbourhood Plan, and previously submitted for consideration to the WHSAP Reg 19 consultation is shown on the Concept Plan (November 2018) at Appendix 1.</p>

<b>Identify Proposed Change Reference Number</b>	PC43				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Thank you for consulting us on the Schedule of Proposed Changes to the draft Wiltshire Housing Site Allocations Plan on 27 th September 2018. This email forms the basis of our response (please confirm receipt of this email). We would like to reiterate those comments initially made in our email dated 15 th September 2017, made to the Council on the Pre-Submission Draft of this Plan document. As Network Rail is a publicly funded organisation with a regulated remit it would not be reasonable to require Network Rail to fund rail improvements necessitated by commercial development. It is therefore appropriate to require developer contributions to fund such improvements. With this in mind we would strongly urge that when the council undertakes its viability testing for any proposed allocated site it considers the impact the proposal may have on the railway infrastructure. The cost of mitigating any impact may have a bearing on the viability and deliverability of any such proposed site. In particular the following allocated sites / policies will almost certainly have an impact on the level crossings listed below. Policy H1.1 Empress Way The following level crossings will be impacted: €□ Berrys Public Footpath Crossing. This may be resolved by diverting the PROW over the proposed connecting highways link between Empress Way and Simonds Road. Details of the crossing can be found on our website <a href="http://archive.nr.co.uk/Transparency/LevelCrossingItemDetail.aspx?Icid=2354&amp;name=Berrys&amp;View=onList &amp;postcode=&amp;radius=">http://archive.nr.co.uk/Transparency/LevelCrossingItemDetail.aspx?Icid=2354&amp;name=Berrys&amp;View=onList &amp;postcode=&amp;radius=</a> Network Rail is a statutory undertaker responsible for maintaining and operating the countrys railway infrastructure and associated estate. Network Rail owns, operates, maintains and develops the main rail network. This includes the railway tracks, stations, signalling systems, bridges, tunnels, level crossings and viaducts. The preparation of development plan policy is important in relation to the protection and enhancement of Network Rails infrastructure. Level Crossings The level crossings which appear to be affected are listed above and give detail of the type of crossing. Any development which would result in a material increase or significant change in the character of traffic using these rail crossings should be refused unless, in consultation with Network Rail, it can either be demonstrated that the safety will not be compromised, or where safety is compromised serious mitigation measures would be incorporated to prevent any increased safety risk as a requirement of any permission. Network Rail has a strong policy to guide and improve its management of level crossings, which aims to; reduce risk at level crossings, reduce the number and types of level crossings, ensure level crossings are fit for purpose, ensure Network Rail works with users / stakeholders and supports enforcement initiatives. Without significant consultation with Network Rail and if proved as required, approved mitigation measures, Network Rail would be extremely concerned by the impact the proposed site allocations would have on the safety and operation of the level crossings listed above. The safety of the operational railway and of those crossing it is of the highest importance to Network Rail. Councils are urged to take the view that level crossings can be impacted in a variety of ways by development proposals: By a proposal being directly next to a</p>			

	<p>level crossing By the cumulative effect of development added over time By the type of crossing involved By the construction of large developments (commercial and residential) where road access to and from site includes a level crossing By developments that might impede pedestrians ability to hear approaching trains By proposals that may interfere with pedestrian and vehicle users ability to see level crossing warning signs By any developments for schools, colleges or nurseries where minors in numbers may be using a level crossing. Councils are urged to take the view that level crossings can be impacted in a variety of ways by third party planning proposals which are further detailed in Appendix 1 attached to this email. It is Network Rails and indeed the Office of Rail Regulations (ORR) policy to reduce risk at level crossings, not to increase risk, as could be the case with an increase in usage at the level crossings in question. The Office of Rail Regulators, in their policy, hold Network Rail accountable under the Management of Health and Safety at Work Regulations 1999, and that risk control should, where practicable, be achieved through the elimination of level crossings in favour of bridges or diversions. The Council have a statutory responsibility under planning legislation to consult the statutory rail undertaker where a proposal for development is likely to result in a material increase in the rail volume or a material change in the character of traffic using a level crossing over a railway: <math>\text{€}</math> (Schedule 5 (f)(ii) of the Town &amp; Country Planning (Development Management Procedure) order, 2010) to requires that where a proposed development is likely to result in a material increase in the volume or a material change in the character of traffic using a level crossing over the railway (public footpath, public or private road) the Planning Authoritys Highway Engineer must submit details to both Her Majestys Railway Inspectorate and Network Rail for separate approval . We would urge that information is provided within each policy to identify the need to either close the crossing and divert the public right of way or to improve the crossing, i.e. provision of a bridge. Any future proposals must be supported by a detailed Transport Assessment which assesses any potential impacts on the railway and detail anymitigation proposed. We would appreciate the Councils providing Network Rail with an opportunity to comment on any future planning policy documents as we may have more specific comments to make (further to those above). We look forward to continuing to work with you to maintain consistency between local and rail network planning strategy. We trust these comments will be considered in your preparation of the forthcoming Plan documents.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments serious impact on visual image to approach to village from west along B3098 potential for overloading sewage pumping station due to excessive development - check situation with Wessex Water Inadequate public transport to provide sustainable means of coping with increased demands from residents of new development</p>

Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments Whilst there is a need for more social housing, a development on this scale is out of keeping and based on need, unnecessary. A small development on site site 321 would be beneficial if affordable housing is included, but anything on a larger scale would bring access problems on the B3098, which is already very busy. Any development on site 738 would damage the landscape so close the escarpment and the White Horse, and be out of keeping. As the basis for these proposals is flawed, based on inaccurate data, I do not understand why this is still under consideration. In addition, more pressure on the surgery and school would bring additional problems.</p>

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments We have no objection to a maximum of 10 houses being constructed, but such a huge building programme, in addition to other developments in the village i.e. in the Butts, would radically change the dynamics and security of the village. The landscape is unique and the additional traffic will be dangerous.</p>

Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments I'm particularly concerned that the new developments will result in a build up of traffic and put more pressure on the surgery, it's difficult enough at the moment to get a doctor's appointment within a reasonable time.</p>

<b>Identify Proposed Change Reference Number</b>	PC86				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Proposed change PC86 is correct as it removes reference to land that lies outside the allocated site for Policy H2.11. However, the evidence that it refers to the Pegasus consultation response to the Regulation 19 WHSAP consultation (September 2017) - argued for an increase in the site size of the allocation to 3.8ha as per SHLAA site 690. This wider site would have included the area for which text is now proposed to be deleted from the plan. The consultation response did not provide an evidence base that required the deletion of the text from the plan it merely pointed out that it would not be possible to provide public open space and biodiversity enhancements along the corridor of the watercourse as part of a comprehensive scheme if this land was not included within the allocation. The submitted WHSAP (July 2018) does not increase the size of the allocated site at Hullavington under Policy H2.11 and it is submitted that leaving the field to the west outside of the allocation means that the opportunity is lost through the Local Plan making process to secure open space and biodiversity enhancements for the benefit of the local community. This matter is now being addressed through the emerging Hullavington Neighbourhood Plan, in accordance with paragraph 13 of the NPPF (2018). By working closely with the local community to bring forward sustainable development the infrastructure requirements of both the emerging allocation H2.11, and the identified needs of the local community which are not addressed by H2.11, can both be met. The Concept Plan (November 2018) for the site is attached at Appendix 1. By working collaboratively with the local community our client will ensure a development that delivers significant community benefits to this large village in the Chippenham Community Area as well as new open market and affordable housing that helps contribute to the five year housing land supply of the authority on adoption of the plan.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Re: 04 EXAM 01 Schedule of Proposed Changes (Sept 2018)_1of46_SPC.pdf(page 1of60) PC92 - Crudwell I am writing to strongly support the proposed change to remove the Ridgeway Farm site from the Wiltshire Housing Site Allocations Plan, on the basis that: There is no Strategic Need for Wiltshire to allocate housing in Crudwell because supply in the Housing Market Area is good and the Wiltshire Core Strategy states that development in Large Villages should be limited to small sites to meet local needs. Our Neighbourhood Plan is progressing extremely well (Reg14 Consultation planned for November 2018 and Reg16 planned for early Spring), and is planning to allocate land to meet identified needs. The Councils and Governments Localism agenda is best served by allowing the Parish to determine its own future.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	PC87 concerns the insertion of additional wording at paragraph 5.107 concerning Policy H2.11 The Street Hullavington in so far as it relates to concerns raised by the Environment Agency, highlighting the need to address flood risk and drainage for development sites as well as groundwater. Our client is aware of the requirements of the Environment Agency with regard to flood risk and groundwater protection at the site. This matter will be addressed in any forthcoming planning application by the submission of a Flood Risk Assessment and additional supporting information comprising a Groundwater Risk Assessment to demonstrate that any proposed development will comply with Core Policy 68 (Water Resources). Initial research indicates that the EA requirements with regard to groundwater do not pose any risk to the development of the site and that all matters relating to potential pollutants; surface water runoff and mitigation can be conditioned on an outline planning permission.

<b>Identify Proposed Change Reference Number</b>	SBR PC 14				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>SBR PC 14 proposes to include the existing Hullavington school playing field within the Settlement Boundary for the village. Pegasus Group made specific representation on this matter on behalf of our client, Hannick Homes, to the Wiltshire Housing Sites Allocation Plan Regulation 19 Consultation under cover of letter dated 21st September 2017 seeking the inclusion of the playing field within the settlement boundary for the village. Our client supports the proposed amendment SBR PC 14 to the Hullavington Settlement Boundary. Our client also supports the Councils view on the role of Neighbourhood Plans in determining settlement boundaries as referred to in the WHSAP Topic Paper 1 Settlement Boundary Review Methodology July 2018 which states at paragraph 7.29, Neighbourhood plans submitted subsequently will still be able to consider their own settlement boundary through the neighbourhood planning process. Once a future neighbourhood plan is made, its settlement boundaries will then supersede those in the Plan. Hullavington Neighbourhood Plan (HNP) is at an advanced stage of preparation and is due to be submitted imminently to the Council under Regulation 15 of the Neighbourhood Planning Regulations. The HNP proposes a settlement boundary that has been subject to extensive consultation with the local community and seeks to ensure sufficient land is included within the settlement boundary to ensure the provision of new community infrastructure highlighted through local community consultation exercises. WHSAP Topic Paper 4 Developing Plan Proposals Addendum (July 2018) states at paragraph 5.4 that; The plan aims to compliment work carried out by local communities in progressing Neighbourhood Plans. Where Neighbourhood Plans have been made or are well advanced the Plan leaves the decisions on the scale and locations for growth in settlements to the communities concerned. Paragraph 5.12 states; In the rural areas, progress on neighbourhood plans since the estimated 2017 position has boosted supply in the Malmesbury and Chippenham Community Areas. This together with the proposed allocations at Large Villages in the HMA offers a healthy supply for the rural area in line with the Spatial Strategy. It is noted that the Hullavington Neighbourhood Plan when made will continue to ensure that supply in the Chippenham Community Area is met and maintained and will carry the weight of having been approved by a community referendum.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement		

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Bratton has already had two large estates built, The Tynings and Manor Fields, plus a considerable number of infill developments e.g. Cassways Orchard and Reeves Piece. Together with recent large scale developments in nearby Westbury this area has already more than done its part regarding extra housing. No local employment either, so more pressure on the already overcrowded road system. Surely developments on these two greenfield sites should be banned.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the removal of the site at Crudwell from the WHSAP. The reason for this is that in the wider context of completions that have already occurred in the Malmesbury CA over the WCS plan period, there is no longer a strategic need to allocate a site in the community area through the WHSAP. Given that good progress has been made on the preparation of the Crudwell Neighbourhood Plan, which seeks to allocate sites, evidence indicates that the Council can defer housing allocation options to be developed through the emerging neighbourhood plan, rather than through the WHSAP the WHSAP.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Further to comments made in relation to the pre-submission document, the suggested amendment to the settlement boundary at Hullavington does not include land adjacent to the public house which represents a clear infill opportunity in a sustainable village location. The proposed boundary further restricts rural development opportunities and as such is neither justified or positively prepared. The local planning authority will be aware that a planning application is currently under consideration for residential development of this land; ref 18/09895/FUL. Attached hereto are the documents supporting the proposals.

Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Proposals for revised Settlement Boundaries Proposed change SBR PC4 (8-E/F) Residents have brought to the attention of West Tisbury Parish Council their concerns at the proposed revised changes. Please could direct consultation take place with all the owners of adjoining land/properties to the said proposed area for change, including a site visit. Also, could Wiltshire Council please clarify the status of the various pieces of land and their usage within the revised proposed areas of change. We await to hear from you in the near future.

<b>Please state which of the Sustainability Appraisal documents or Habitats Regulation Assessment document this representation relates to:</b>	Sustainability Appraisal September 2018 - Annex I Chippenham Community Area (EXAM/02A.1)				
<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<p>Exam/02A details changes to the Sustainability Appraisal as of September 2018. Changes to the text are clearly shown <b><u>in bold and underlined.</u></b></p> <p>The Sustainability Appraisal (SA) of the site for Policy H2.11 The Street Hullavington is detailed at pp. 275-276 of the document with a summary of changes to the Policy as a result of the SA detailed at pp.293-294.</p> <p>Paragraph 8.3.149 is clear in stating that the SA relates to SHLAA site 690 (the wider site which comprises 3.8ha).</p>				

**Assessment Addendum  
(September 2018).**

Paragraph 8.3.150 states that;

**'The site has been reduced in capacity to approximately 50 dwellings since assessed against the SA Objectives, which addresses some of the sustainability issues identified in relation to SA Objectives 3 and 5b'.**

Paragraph 8.3.152 states that;

**'The moderate adverse effects in relation to SA Objective 3 and 5b is addressed by the Submitted Schedule of Proposed Changes which requires a Flood Risk Assessment and comprehensive drainage strategy for the site'.**

These comments all relate to the wider SHLAA site 690, they refer to a reduced capacity across the wider site, they do not suggest that the site area should be reduced or that the reduced quantum of dwellings should be provided on a smaller site. Moreover, our client has submitted in their response to PC87 that the issues raised by SA Objectives 3 and 5b can be covered off by condition on an outline planning permission.

However, WHSAP Policy H2.11 is for a smaller site than SHLAA site 690 and neither Exam/02A nor Exam/02A.1 provide any reasoned justification for a reduction in the physical size of the site from the SHLAA site size of 3.8ha.

Indeed Exam/02A.1 states at the summary of SA Objective 8 that

*'The whole SHLAA site provides capacity for approximately 86 residential units (though this may be reduced through the mitigation set out in this assessment), which contributes towards Wiltshire's housing supply. A development on this site would help to meet local housing needs in accordance with the policies of the Core Strategy, and has the potential to deliver a significant level of affordable units alongside the open market units. Overall it is considered that allocation of this site would have a major positive benefit in terms of meeting the aim of SA Objective 8'.*  
(emphasis added)

Exam/02A.1 states that;

*'There is potential to introduce pollution prevention measures, including sustainable drainage measures (SuDS) to control the risk of surface water flooding'*

however, by reducing the site area to only that proposed by Policy H2.11 the ability of the wider site to make a 'major positive benefit' is compromised, as is the ability of any scheme to provide a comprehensive SuDS scheme that drains to the tributary of the River Gauze located to the north west of the site.

Our client has undertaken extensive pre-application investigation with regard to constraints at the site including drainage matters. This initial work has demonstrated that the wider SHLAA site 690 can provide up to 70 dwelling units plus additional community infrastructure required by Policy H2.11 and the local community.

The allocation of the site is being pursued through the Hullavington Neighbourhood Plan as well as through the WHSAP. The Concept Plan (November 2018) for the site is attached at Appendix 1 to these representations.

	It is considered that Exam/02A and Exam/02A.1 do not provide a well-argued reasoned justification for a reduction in capacity of the wider SHLAA site 690 from 86 dwelling to 50 dwellings hence there is no SA justification for a site allocation that is smaller than SHLAA site 690.

<b>Identify Proposed Change Reference Number</b>	PC43				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	The landowner and promoter of proposed allocation H1.1 wishes to comment that Public Right of Way LUDG34 does not exist within the extents of the allocation. No reference should be made to LUDG34 within the 5th bullet point. The removal of reference to LUDG34 would overcome the soundness issue concerning the effectiveness of the policy. The illustrative masterplan does not propose any diversion of LUDG1. The illustrative masterplan proposes the partial diversion of LUDG2 along the eastern boundary before rejoining the existing route. The wording 'retention and enhancement' is supported as it does not restrict the route of LUGD2 to its current alignment and would not preclude the partial diversion of the right of way within the allocation site, if required in the interests of masterplanning and ensuring the development does not lead to a net loss of recreational amenity. The landowner and promoter did not submit any comments in this particular matter on the previous stage and this seeks to clarify his position in response to the Natural England consultation response.

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should see k to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport. The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). pavement and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. [REDACTED] - Additional comments to Bratton Site allocation Plan - Form A Normally a council will make the excuse that they are following government requirements but in this case they have shown a total disregard for them in 'planning' for far more houses than guidelines suggest: up to around 5 to 6 times more than their own core strategy! They appear to be bowing down to the wishes of developers rather than to the voices of the people within their area. They do not support Bratton at all, either directly or indirectly. The heavy goods traffic through the village is unacceptable because they will not take the necessary action to restrict the weight limit. Congestion around Westbury due to a lack of council action is causing Bratton to be rat run with traffic travelling at totally unacceptable speeds with no policing at all. All these houses will only increase this problem. A number of very questionable actions by the planners has led me to question their ability and indeed integrity. Actions by them in this case only go to support this view: errors in number of houses and amenities in village, classification of village, delays in issuing paperwork thereby reducing response times, changes in numbers of new houses in planning applications, and sudden inclusion of new developments without proper process or notification. Bratton was a very nice village in a mainly conservation area. All these developments in addition to those already authorised will spoil this rural community. Why do we need all these houses when Westbury, only 3 miles away, has already agreed to over-commit to by 291 houses! Do not progress site 321 at all and reduce Site 738 as much as possible to closer to the figure for a Small village ie less than 10.

Land to the South will comprise up to 640 dwellings, employment, Primary School, Open space and landscaping Land to the North will comprise of around 100 dwellings Bovis have been in continuous discussions with the Council regarding the land under their control during the preparation of the Site Allocation DPD. Furthermore, they have submitted representations in respect of the pre Site Allocation DPD which concludes that their land is suitable, available and deliverable for development within the Plan period. Bovis will continue to work with the Council and other statutory consultees and other interested parties in bringing forward their site. Indeed, they are in the process of preparing a planning application for the land to the south of Netherhampton Road. Finally, Bovis have considered the various Main Modification in respect of Salisbury and we note that there are no Main Modifications which affect either of the site allocations under Policies H3.1 and H3.3.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Consultation on Schedule of Proposed Changes to the draft Wiltshire Housing Site Allocations Plan Harnham Trading Estate, Salisbury, SP2 8NW Thank you for providing us with the opportunity to engage with the consultation on the Councils Schedule of Proposed Changes to the draft Wiltshire Housing Site Allocations Plan (the Plan). We write on behalf of our client, Legal &amp; General Property Partners (Industrial Fund) Limited and Legal &amp; General Property Partners (Industrial) Nominees Limited ("Legal &amp; General"), who have an interest in the Harnham Trading Estate, Salisbury. As way of a reminder, the Council published its pre-submission version of the Plan in July 2017. The Council is proposing to amend the settlement boundary of Salisbury to include the site. The site has not been given a housing allocation for two reasons: 1) the Council states that it will apply a presumption in favour of sustainable development within the settlement boundaries so it considers it unnecessary to allocate sites within the settlement boundaries for development; and 2) the site is already a committed site being a non-designated employment site. In September 2017 we submitted representations to the Council on behalf of our client relating to the pre-submission version of the Plan (Representation Number 2120). We requested that the site be allocation for housing for the reasons set out in the representations (which are enclosed with this letter). In July 2018 the Council submitted the Plan along with a Schedule of Proposed Changes to the Secretary of State for independent examination. With regards to the Schedule of Proposed Changes to the Plan, no changes are proposed to the site. As set out within our previous representations, the continued use of the site at Harnham Trading Estate for commercial use is not considered to be appropriate. The Councils Employment Land Review recognised the poor quality of the site and commercial spaces as well as the constraints on ongoing commercial use as a result of conflicts with neighbouring residential dwellings. Overall the Employment Land Review concluded that the site could be released for non-employment uses. The redevelopment of the site for alternative uses would have significant regeneration benefits. Redevelopment of the site for residential development would help to significantly boost the supply of homes as sought by Paragraph 59 of the NPPF and is considered to make the best and most efficient use of this sustainable and accessible brownfield location. Residential development of this brownfield site within a Principal Settlement is supported by national and local planning policy. In addition, the allocation of adjacent sites for residential development further supports that the location to the west of Harnham is suitable for the delivery of new housing. The site is considered to be suitable, available and deliverable for the development of up to 80 new residential dwellings. As such we consider that the site should be allocated for residential development within the Plan. Future Participation We trust that the above is of assistance in the preparation of</p>				

	the Plan. We would like to be kept up to date with the progress and look forward to further opportunities to engage. We look forward to confirmation of receipt of these representations. Please feel free to contact me if you have any queries or if you would like to discuss.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments In addition to all the above comments to which I subscribe, I recently narrowly avoided being knocked down by a car outside my property whilst crossing the B3098 to access the pedestrian walkway on the opposite side and running along the edge of the site 321. This was due to restricted line of sight and the speed of passing traffic. This restricted line of sight also makes egress by car from my property rather 'dicey' as it is without any increased traffic from the proposed developments.</p>

Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments The amount of traffic on the B3098 is already at an unacceptable level. The front of this property is regularly damaged by large vehicles passing each other on the narrow road. Either or both of the mentioned developments would irreversibly alter the nature of this rural community, which already does not have any further prospects for employment, so necessitating the emptying of a large part of the dormitory by road every day, and vice versa every evening.</p>

Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement and across</p>			

	<p>Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. Additional comments We agree with the above comments that the proposed developments are disproportionate to the village size. As Bratton is a village with just over 500 houses adding an additional 57 houses will alter the balance particularly as there is no extra employment within the village so new residents will require transport to neighbouring towns. Transport access at these sites both for potential construction vehicles and later for residents' cars is very poor along this narrow section of the B3098 and will represent a hazard. It seems unnecessary to build so many houses in Bratton when Westbury already has an oversupply of houses and is still building. There has already been considerable development in Bratton in recent years and infilling taking place.</p>

Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations. Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. <b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	Yatton Keynell Parish Council is unanimously opposed to the proposed change to the settlement boundary - July 2018, as set out in Table 14 Proposed changes to the Yatton Keynell Settlement Boundary SBR PC16 The current settlement line is properly aligned with the current building line of the property including the garden and is already consistent with approach adopted the neighbouring properties. More notably this approach of tying in the settlement boundary to the building line has been consistently applied elsewhere in the village resulting in larger plots of land attached to certain properties moving outside the settlement boundary. It is therefore contrary to and inconsistent with the approach adopted elsewhere in the village to allow part (approximately 1/2) of what is more correctly described as a paddock to be sited within the settlement boundary. It is clear that this request has been made simply to help facilitate the approval of a previously rejected plan to build a single dwelling on the plot and to circumvent earlier objections.

The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. * The development would be outside the village boundary - encroaching on a valuable green belt of land. * The development will be the most densely populated housing estate in Bratton - entirely not in keeping with the village style. * It would have a terrible effect on the conservation area of the parish, impacting the views from higher ground and the White Horse. * It would dramatically and adversely impact on local amenity/infrastructure. ALREADY IT IS NEARLY IMPOSSIBLE TO MAKE AN APPOINTMENT WITH A DOCTOR. * The local road system is already dangerously overloaded. Try cycling through the village on the B3098, a busy road that has seen 49 reported collisions (11 "serious") since 2000. * As a supporter of Wiltshire Wildlife I must also point out the loss of habitat for the hedgehogs, slow worms and bats in the area. * I am concerned about the drainage. Already the development site cannot cope with surface water and causes excess water to run down into the housing estate below it. With dwelling on the site there would be even less soakaway. * The Bratton Parish Council seem to agree as it recently voted overwhelmingly to reject the proposals. How can Wiltshire Council override this decision? Particularly as Planning permission has twice previously been rejected on the grounds that a housing estate in this location would represent "a substantial intrusion into the rural landscape".</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>COMMENTS RE WILTSHIRE HOUSING SITE ALLOCATION PLAN HOUSING ALLOCATION H2.4 - CHURCH LANE, TROWBRIDGE. There are three main reasons why I consider this site should not have been selected for development in the Wiltshire Site Allocation Plan. Point 1. Housing development on this site will cause considerable, damage to the water quality and biodiversity of the RIVER LAMBROK as it runs through this site. Resulting in an irreversible loss of species at a time when: a) Wiltshire Council is applying for Local Nature Reserve Status for Southwick Country Park which borders this site. b) The Environment Agency, as part of the Bristol and Avon Catchment Plan, have targeted an increase in water quality in the RIVER LAMBROK from Moderate to Good by 2027 in line with the UK Government aims to ensure all waterbodies meet good Ecological Status by 2027. The RIVER LAMBROK lies at the foot of this sloping site and is all that separates the site from Southwick Country Park. It is home to a diverse range of flora and fauna that includes endangered and protected species including water voles, kingfishers, otters, grass snakes and rare species of plants and insects. Nine species of bats and thirty nine identified species in the park are directly dependent on the RIVER LAMBROK. (See appendix 1, 2, and 3.) This site is too small to accommodate 45 homes, gardens, roads attenuation areas etc. without encroaching too closely on the RIVER LAMBROK and its flood plain. Run off from housing development on this steeply sloping site would be difficult to mitigate. The use of trees, hedgerows and suitable grasses as natural attenuation will not slow drainage sufficiently to protect the LAMBROK on the steep slopes of its northern bank, where run off which is likely to carry oil from vehicles, salt from defrosting activities, herbicides and nutrient from garden run off and also all the accumulative effects of building work. Anything less than constructed wetland will result in pollutants reaching the RIVER. Climate change in recent years has led to prolonged periods of heavy rainfall causing an increase in widespread surface water and river flooding in Southwick and surrounding areas. Photographic evidence was provided to the Environment Agency after extensive flooding in winter 1004, Jan 2014 and July 2014. I believe their flood predictions were amended. Any increase in the flood zone 3 area on this site would risk attenuation areas becoming flooded and pollutants being washed in to the RIVER. Predation by pet cats and disturbances from children would be impossible to mitigate against and could cause considerable harm to protected wildlife species using the RIVER LAMBROK, rare bats found in the parkland and to wildlife in general using Southwick Country Park. Too often development close to the Lambrok river/stream seems to be considered in isolation. This waterway is a precious resource and should be considered as a whole. The Lambrok and its tributaries have flowed throughout Southwick for hundreds of years, from beyond the furthest southern point to the northern boundary of the parish and beyond to join with River Biss in Trowbridge. Bordered throughout much of its journey by ancient species rich hedgerows. This important wildlife corridor offers great opportunities for many wildlife species to move freely along the</p>			

	<p>length of this waterway to find food, shelter and nest sites, greatly increasing their chances of survival. Water voles are seen here and are known to move to deeper water at times of drought, Kingfishers are seen on numerous occasions, bats, perhaps Bechstein's follow the hedgerows and streams foraging for insects and recently it has been discovered that Otters, often recorded in the River Biss, use these waterways in Southwick to supplement their food source. In April 2016, despite requests that the River be surveyed as protected water voles were present, the river Lambrok at Wynsome Street was cleared by workman, from Thomas Brothers Group Ltd, who knew nothing of water voles and were given no instruction on how to avoid destroying their habitat and food source. Residents who had lived there for many years reported seeing 1 hundreds of water voles there in the past but now there are very few.' The Natural Environment White Paper describes the importance of a healthy natural environment to economic growth. Two of the four main objectives are: 1, Protecting and improving the natural environment and 2, Re-connecting people and nature. Perhaps this H2.4 Church Lane site would be better used as part of Southwick's proposed LOCAL NATURE RESERVE, to buffer and protect the RIVER LAMBROK, improve the local natural environment and to reconnect people and nature. Point 2: This site is at present a popular recreation area and is also used by dog walkers from a wide surrounding area. There are limited green spaces in this area and no direct access from here to Southwick Country Park. Point 3: A new road junction arrangement sited here, off the A361, will greatly increase the risk of serious accident on this already dangerous and at times extremely busy road. The A361 as it runs through Southwick and Upper Studley is known to carry very high levels of traffic at busy times of day.</p>

**associated evidence documents.**

Changes, additions, amendments and deletions in (amongst others) PC94. Sites 321 and 738. Westbury Community Area Remainder. New OMISSION SITE OM007. PC21 (Statistics).

**1. Incorrect statistical basis:**

Table E.1 on page 43 (Number of dwellings in the village) is still wrong and has not been corrected in the Proposed Changes although many other paragraphs have been amended.

The table inserted below, taken from the earlier paper (which provided the basis for the Wiltshire Core Strategy) called the January 2012 WHSAP Topic Paper 3: Settlement Strategy , Appendices, Appendix B., shows the number of houses in Bratton as at 2006 as 506 and a current count in 2018 reveals 512, but the figures given in Table E.1 show 809. This is wrong by 303 dwellings, an error of more than half - 59.88%. This is one of the key basis for placing Bratton as a "Large Village" and is the keystone/critical figure on which other calculations are made, the size of any development and expansion is judged, and growth is calculated and compared with other types of settlement and place. Table E.1 has the figure for growth from 2006- 2026 (that is 26 houses in addition to the incorrect figure of 819) as 3.2% but this is wrong as it should be (26 houses above 506) 5.14%.

This flaw is repeated again with the re-inclusion and consideration of 22 houses at Site 738 in the Proposed Changes.

Table:	Bratton	Dilton Marsh	Edington/Tinhead
Dwellings:	506	643	296
Population:	1,260	1,900	330

FROM: Consultation January 2012, Topic Paper 3: Settlement Strategy , Appendices, Appendix B.

Relying on such an incorrect figure must cast doubt on the whole process of evaluation and the sustainability tests, and must result in flawed conclusions making the process unsound.

**2. Over achievement of housing development in the Westbury Community Area: Page 66 Table G.4 Step 2 paragraphs 2, 3 and 4:**

These new paragraphs inserted for Site 738 state that the development of 22 houses would "contribute towards the indicative housing requirements for the community area", and

"The indicative remaining housing requirements of 47 homes in the Westbury Community Area. The level of development on this site (738) is positive in terms of making a SUBSTANTIAL contribution towards the indicative growth targets.....and

approximately 20 dwellings on this site would contribute a MODERATE proportion of the anticipated level of housing growth for the Westbury Community Area, including much needed affordable housing for the village as set out in the Core Strategy".

But this is not the case. Reasons:

The most up to date housing figures show that the number of dwellings in the Westbury Community Area have already been exceeded. This means that the extra houses are not needed to complete the figures. The Government and the County quota in this area have been satisfied.

The figures are as follows from the July 2018 Submission pages – taken from “ Exam.01.45,Annex A:Proposed Changes to the figures in Section 4: Housing Delivery Strategy”.

*Proposed Change PC21 amends Table 4.10 on pages 26 and 27 of the WHSAP Document.*

*Westbury*

*Indicative Requirement 2006-2026: 1,500.*

*Completions 2006 – 2017: 940*

*Developable commitments 2017 – 2026: 851.*

*Total: 1,791.*

*% variation: 19% [end of table].*

Therefore, taking the Westbury Community Area as a whole, the building blocks of the Core Strategy *make* an over provision of some **291 dwellings. The figures in the earlier statistics also made an overprovision.** The failure to analyse this demonstrates that the development requirements have not been objectively analysed. Had they been it would have been recognised that no further allocation is necessary.

Therefore, 20 dwellings will **not be moderate** growth, when compared with an overachievement in the area. It will be **excessive** and without basis from the Core Strategy or the WHSAP doc.

ADD to this the number of houses on Site 321 (reduced to 35) one has an **over development of 57 houses.**

The argument remains the same for Site 321 **on its own.** As the quota has been satisfied 35 houses is also against the spatial plan of the Core Strategy for ordered growth and development.

Add to this the fact that the site size only allows for the development of 32 houses but this number has been increased to 35 to mitigate the use and loss of best agricultural land and it is clearly not modest growth.

The Core Strategy seeks to ensure that the development is carried out according to the hierarchy of settlements with the large towns at the top, followed by the market towns including Westbury, down to the non -strategic settlements of the Local Service Centres such as Market Lavington, and eventually down to the villages with the \large Villages above the Small Villages. To provide the development the County has been divided into areas and Bratton is in with Westbury town. The most recent statistics show that Westbury Town and the area as a whole have an excess, and therefore there can be no case for adding in more in an area which the strategy aims to keep rural such as Bratton. This is particularly important with the village being located on the "remote" north-west corner of Salisbury Plain within the Landscape Area and close to the Bratton SSSI, close to the White Horse and an area which can be seen from many miles away to the north and west, and is on the edge of the expanding developed/proposed developments on the edges of Westbury, Trowbridge (to join West Ashton and Yarnbrook) and Melksham. To throw in more houses in a village contrary to the strategy is unlawful.

**3. It is also directly against the Core Strategy.** Explanation:

The added proposed changes of Step 3 for Site 738 Table G.4 on page 86 are wrong in the following respect: Second paragraph: ".....As anticipated by Core Policies 1 and 2 of the WCS, the addition of approximately 20 dwellings would represent modest growth....". Policy 1 of the WCS specifically sets out that in the Large Villages there will be (Paragraph 4.15) "development will predominantly take the form of **small housing and employment sites within the settlement boundaries:.....small housing sites are defined as sites involving less than 10 dwellings (i.e. not a major application. Development outside of the settlement boundary will be strictly controlled.** [emphasis added] Relaxation of the boundaries will only be supported where it has been formally reviewed through a **subsequent DPD or a community led neighbourhood plan**, which includes a review of the settlement boundary to identify new developable land to help met the housing and employment **need of that community.**"..... [emphasis added]. Note: not adjacent or other communities.

Therefore to state as it does ..."as anticipated..." is self evidently wrong.

The new paragraphs added of 20-22 houses at Site 738 is not small housing of less than 10. 20 is double the amount. Double can can not be modest.

The same applies to Site 321. In the same way as above at Step 3 for Site 321, Table G.s page 62 it states".....As anticipated by Core Policies 1 and 2 of the WCS, the addition of approximately 40 dwellings would represent modest growth....". Again, it is not "as anticipated" and stating it to be so does not make it so. Further, 40 is four times the rate set out in WCS Core Policy 1. Clearly it follows that 40 is not "small housing", and at 4 times the rate provided by WCS policy it can not be "modest". This is unsound evaluation.

#### **4. Development within the Settlement Boundaries:**

Further WCS sees the development being **within** settlement boundaries including those boundaries as reviewed and amended by the WHSAP document, but the current review of the boundaries in the current WHSAP does **NOT** include extending the settlement boundary around Site 321 nor Site738 to include them. The boundaries are reviewed, yes, and the village settlement boundaries are rounded around the village, but not further to the extent to add in Site 321 or Site 738 or both. No lines have been added in for this in the Proposed Changes. Both Sites remain **outside** of the new proposed settlement boundary. This prevents the allocation of a site at this stage of the planning process. As such the Settlement Boundaries can be reviewed by the present Neighbourhood Plan currently being undertaken in the village, which has got to the stage of receiving its new Housing Survey. This is the process envisaged as the correct forum for local decision making in the LOCALISM ACT.

#### **5. Objections on evaluations and judgements: Site MO007 and Neighbourhood Plans.**

Dealing first and again with the numbers of dwellings in Site 738 introduced again in the Topic Paper for Westbury and the manner in which these are weighed up and compared with the existing and new paragraphs for Site321:

At STAGE 3 Sustainability scoring stage for both sites **Table F.3** on page 53 of the Westbury Area Topic Paper has been changed and Site 738 has been added. There is very little between the scores of both sites and both sites pass through this stage (Site 738 had been rejected previously prior to this stage). (i) on Sustainability **Objective 8** (Providing good quality, affordable housing and ensure an appropriate mix of dwelling sizes, types and tenures) Site 321 is given a score of Three Pluses and Site 738 is given two pluses, but when the WCS policy aims for fewer than 10 houses in Large Villages the number such as 20 and 35 are still in breach of the over arching Core Strategy Policy. Development in Bratton will result in more expensive housing than the same housing provided in Westbury, this is an unhappy situation but can not be ignored and is recognised in the fact that 40% affordable housing has to be provided in Bratton rather than 30% in Westbury and elsewhere in the area. It is unlikely that the housing will provide for all types of tenure, and unlikely in particular for secure long term affordable rented properties of the type which can be owned and rented by Housing Association landlords.

**SITE OM007: This site is owned by Bratton Parish Council.** This type of housing could be developed in Bratton within the centre of the village at a site which already has a new road containing mains services of electricity, gas, water and sewage, leading to a small social housing estate of 12 dwellings constructed about 20 years ago. **This site has been added to the Westbury Community Area Topic Paper and the Proposed Changes as Site OM007 for 15 houses .** This is a potential source of housing for rented and owned or part rented-part owned

housing on an affordable scale and the Bratton Neighbourhood Plan can consider this when developing the Neighbourhood Plan. This is the appropriate forum for making decisions at a local parish scale, either at the Council level or in the Neighbourhood Plan process as envisaged by the Localism Act. The importance of the Neighbourhood Plan process is emphasised throughout the WHSAP doc and it is one of the key purposes and objectives of the WCS to promote this.

The development of the Neighbourhood Plan is being progressed and some delay was caused by an approximate weight of four months for a County Liaison Officer to be appointed by Wiltshire Council.

See also Paragraphs at 8 below.

Continuing with the Scoring Results in **Table F.3 Stage 3** on page 53 and turning to **OBJECTIVE 10** (reduce the need to travel and promote more sustainable transport choices). Site 321 with 35 houses scores one negative and site 738 scores two negatives, yet it will be the larger Site 321 which produces more out commuting and a greater need to travel with increased private car use, noise and pollution. One reason for the WCS to have the hierarchy of development with development NOT being in the outlying villages (save for fewer than 10 houses and small plots) and the development being IN the towns with employment services shops and secondary schools is to prevent the increase in car use and the damage caused by climate change. Yet on this scoring system the larger the development and the more in breach of the policy a housing estate may be the better the score in this vital Stage 3. The measuring and evaluation stages are unsound.

Lastly, there is one other difference in the scores at Stage 3 shown in Table F.3 on page 53 with **Objective 11** (encourage a vibrant and diversified economy and provide for long term economic growth). Site 321 scores two positives and Site 738 scores one positive. We certainly do wish to ensure that the Village Shop, the village Public house and other small businesses in Bratton and Edington do thrive and a larger population in the village should hopefully help here. Houses within the centre of the village will be close to these and within safe walking distance. Housing at Site OM007 is one development which can be progressed locally. As for Sites 321 and 738, the paragraphs on both sites dealing with "accessibility" (see also below) both mention

"however residents are likely to to rely on the use of private vehicles to access a wider range of services and facilities further afield" (page 61 Site 321) and

"however residents are likely to rely on the use of private vehicles to access a wider range of services and facilities further afield" (page 65 Site 738).

The economic improvements may benefit the towns around to a greater extent than the villages and Bratton, as has been historically the case with decreasing shops and services in the villages. There is no reasoning behind or measurement of the "likelihood" in the information provided, yet the scoring between the two sites gives an extra plus to Site 321 (double the score of Site 738), that is that the extra new residents at Site

321 over and above the 20 at Site 738 will not drive to towns and will use the village shop, public house and services, contrary to the statement of "likelihood" set out above.

The other score points at Stage 3 are the same. The two sites are on opposite sides of the road to each other.

#### **6. Other evaluations and judgements are also unsound.**

Table 6.7. page 17 of the Community Area Topic Paper for WESTBURY states that SITE 738 (South side of the B3098 Westbury Road) the "overall sustainability benefits would be MARGINAL DUE TO THE lack of certainty that comprehensive and attractive routes for PEDESTRIANS and CYCLISTS are deliverable". This judgement is repeated at the Summary in Step 4 on page 67 of Table G.4 on Site 738. This judgement does not prevent Site 738 from going through to Step 5 of the sustainability assessment along with Site 321, but it does result in Site 738 being assessed very poorly as "marginal", and in Step 5 on page 68 Site 738 is removed and rejected (once again) from the Plan, the basis for this being "Generally, it should be the site option(s) that performs the least well using evidence from Step 4" that is rejected - see page 34 of Topic Paper 2 Site Selection Process Methodology Appendix 2, Stage 4a selection of preferred sites.

However these same factors (accessibility for pedestrians and cyclists) will apply to Site 321 on the other side of the road (North side) but they have not been weighed up in the same way or been given the same weight in the calculation of sustainability for Site 738. SEE page 61 boxes on Accessibility for Site 321 in the Westbury Area Topic paper. This is a a major omission in the considerations for Site 321 but also (later in the process), makes the decision making process of the Plan flawed and unsound with a different test being applied for Site 738. Cyclists travelling east from Site 321 to the village do not need to cross over the road whereas cyclists from Site 738 do need to cross, and on the return journey from the village travelling west the cyclists going to Site 321 would have to cross the road where the visibility to see oncoming traffic is poor, where as cyclists returning to Site 738 would not need to cross the traffic. This is not surprising but has not been considered at all. It must mean that both sites are equal on this issue, yet the information is judged sufficient to reject one site to the benefit of the other. Sustainability for Site 321 is judged as "good", a scale several points higher than "marginal" for Site 738.

Pedestrian access to the village from both sites will be problematic as the pavement to the village is poor on the north side of the road from the point of these sites up to the junction with Court Lane, and in turn the junction at Court Lane is not safe for children and young adults and difficult for all pedestrians, especially with children and buggies. Clearly for Site 738 there is the added need to cross the road at Site 738 to the north side as there is no pavement on the south side for the existing houses. As for Site 321, pedestrian access to the centre of the village from the Public Footpath at the lower/northern edge of Site 321 is not safe for children due to the blind narrow crossing at Court Lane, the steepness of the hill, the narrowness of the road, the number of parked cars, and the quantity and speed of local and through-commuting traffic in particular at rush hours/school times. These draw backs and safety hazzards for Site 321 are not weighed up in the same way as for pedestrians crossing the

B3098 from site 738, rather it is recorded for Site 321: "there is an opportunity to link with the adjoining Public Rights of Way...." and there is no mention of issues with Court Lane (page 61 Accessibility site 321).

**7. Unsoundness of the selection between the sites or either site:**

**The steps for the selection of preferred sites and developing plan proposals** are set out on page 21 of **Topic Paper 2**, Site Selection Process Methodology July 2018 Submission Version. Stage 4A Selection of Preferred sites on pages 21 and 22. Stage 4B: Testing Plan Proposals is on page 22. And also on pages 33 and 34. **In the Westbury Community Area Topic Paper** this is set out in Appendix G, pages 58 to 68.

Both Site 321 and 738 pass through the Steps of Stage 4A. As set out above the flawed weighing up of points and scores as set out in the Summary for Site 321 mean that (page 63) for **Step 4** of the Process it is stated (this is not accepted), "the overall sustainability benefits of developing the site (321) are considered **good**". It states that the estate would deliver " a proportionate number of dwellings within the context of a large village setting". It does not attempt to deal with the conflict with WCS for "small housing" or "fewer than 10 dwellings" or the needs of the village for employment opportunities. all is unsound deliberation and draws an incorrect conclusion. This was all contained in the papers for the Consultation last year **but has to be repeated here because of the re introduction of Site 738.**

For Site 738 at **Step 4** (page 67) the Summary sets out that the Site "could deliver a **moderate** but nonetheless acceptable and justified level of growth when considered within the the context of the indicative housing requirements of the Community Area Remainder. Development.....However the overall sustainability benefits of developing the site would be marginal due to a lack of certainty that comprehensive and attractive routes for pedestrians and cyclists are deliverable". The above is new. It is unsound. Reasons:

- The level of growth conflicts with the WCS.

- It fails to deal with the conflict of development at Large Villages being "small housing"... " fewer that 10".

- As for the reliance on the argument that it is acceptable and justified in the context of the Wesbury C.A.Remainder this is flawed because: firstly the allocation of housing is done in WHSAP in Housing Areas and this is the area for Westbury Community Area and the allocation of housing and the statistics (quoted above) show that the numbers have been exceeded so that further provision is not needed in Westbury Town nor in the Wesbury Community Area Remainder. (The successful Market Lavington argument that further housing should not automatically follow should be applied).

- the weighing up of the pedestrian and cyclist routes are not weighed up in a sound manner and they are not weighed up correct between the two Sites and the same points are not weighed up for Site 321 in the same manner or at all.

Secondly, that in the Westbury Community Area there is only one other Large Village - this is Dilton Marsh with a higher population than Bratton, closer to main roads such as A36 linking to larger communities such as Bath and Bristol for commuting and with a train station linking to Westbury and the south coast, ports of Southampton and Portsmouth, Swindon and Melksham, Bath, Bristol and the Midlands, but rejected from the WHSAP for even one small allocation as its primary school is full at present. The WHSAP doc has resulted in a plan where once one village is rejected the other must take all housing no matter how great the number and no matter what the scores and evaluations produce and even where contrary to the WCS policy for developments in Large Villages. The process is self evidently unsound. This is repeated here because this applies to the reintroduced Site 738 as much as for Site 321.

### **Moving on to Step 5.**

**The extract below is from pages 21-22 of Topic Paper 2:**

"6.8 Step 5 considered all the sites in each Area of Search together and resulted in the selection and rejection of sites. All sites that have satisfied Steps 1-3 were taken forward. This step compared the total dwellings that are provided by the pool of sites to indicative residual requirements. Where necessary, it selects and justifies site options that need to be rejected because the overall scales of development exceed that proposed by each area strategy and [Page 21] growth would not result in sustainable development. ***For example, if several site options at a large village suggest too much development, in excess of local needs, then a site may need to be rejected.(emphasis added).***

"6.9 The result of this five step assessment were a set of draft allocations in the form of detailed site boundaries and an approximate dwelling capacity. Each Community Area Paper also identifies particular considerations connected to a given site that should be referred to by the Plan.

"6.10 Assessments are recorded in each Community Area Paper and they use a common template of guidance (included in this paper in appendix two) and evidence sources." [end of extract].

**I repeat the critical wording: "For example, if several site options at a large village suggest too much development, in excess of local needs, then a site may need to be rejected." This argument applies regardless as to whether there is one, two, three or more sites. Where one site delivers housing in excess of local needs then that one site must also be rejected. If there were say 5 small sites of say 7 houses by way of example and the village had a need for this, then all could go through the process. The critical points are whether**

**- (a) the development fits in with the WCS for "small housing" for Large Villages. This applies regardless of whether there is a single development or multi sites. and**

**- (b) whether they exceed the local needs, that is the needs of Bratton.**

***The answer to (a) has been set out and the answer is "No".***

***The further reasoning under point (b) is as follows. This applies to the new Site 738. It also applies to Site 321.***

***A new Housing Survey has been carried out by Wiltshire Council at the request of the Parish and results just received and the Summary is extracted and set out below.*** 552 Questionnaires were sent out. 197 responses were received back.

[Extract] "Summary

This survey's recommendations (see Section 8 below) concentrate on those households who are unable to afford accommodation on the open market.

This is just a quarter of the research needed for this assessment: the Housing Register of Wiltshire Council, the local Strategic Housing Market Assessment and the advice from allocation staff who manage the Register must also be taken into account.

In October 2018, there were four households on the Wiltshire Council Housing Register seeking affordable accommodation in Bratton parish seeking accommodation between one and four bedrooms, and any full assessment of housing need in the parish must take account of the Register.<sup>[1]</sup>

- The 2011 Census recorded fifty two social homes in the parish.<sup>[2]</sup> These properties represent 10.2% of the total housing in Bratton, which is lower than the Wiltshire affordable housing average of 14.7%.<sup>[3]</sup>
- The social housing in Bratton had a high re-let rate of 21.2% in the past year. From the third quarter of 2017 to the third quarter 2018 eleven social home were re-let in the parish.<sup>[4]</sup>

• This re-let rate suggests that two of the households responding to section two of this survey and in need of affordable accommodation could meet its needs through accessing the existing social housing of the parish."<sup>[end of extract]</sup>.

**In conclusion it states that 4 households have responded and state they require social housing.**

This is **lower** than the figures already set out in the Westbury Community Area Topic Paper on pages 27 (Site 321) and pages 66-67 (Site 738). The figures from the 2013 Rural Housing Needs Survey show a need at that time for Subsidised rented accommodation of 5 units , and 3 for low cost home ownership/shared ownership. This is number which can be considered in the Neighbourhood Planning process by the village, the Parish Council and the Steering Group of the neighbourhood plan. The OM007 site is recorded in the Proposed Changes as having an area for 15 houses. It is unlikely that the development of private land at Sites 321 or 738 will result in long term affordable secure tenancy rented homes more akin to that provided by Housing Associations, or that the owned ones will be shared ownership shared with a freehold owner such as a

Housing Association. Affordable Housing to to rent and to buy may be at reduced rates but will be available to all in the region, not just to those in need in the Village.

The Housing Survey of October 2018 shows that the development at Site 321 and Site 738 **exceed** the needs of the village. Therefore it follows under the WCS process at Step 4 that both sites should be rejected.

The answer to point b) above is also:No.

However at Stage 5 (page 67 of the Westbury Area Topic Paper), both sites are taken forward and one is rejected as "the combined pool of both site options in this area would deliver substantially more than the indicative 47 dwellings [note: **now reduced to 44** in up to date statistics]required over the remainder of the plan period and would not represent modest growth envisaged by WCS in Core Policy 1". On page 68 it is stated that Site 738 "has **several** constraints which make the site less sustainable in comparison to Site (321),....." but if several means three it does not set outthe additional constraints. Again for Site 738 it refers to "....developing the site would be marginal due to the lack of certainty that comprehensive and attractive routes for pedestrians and cyclists are deliverable". There is no mention previously to the need for "attractive" routes in the weighing up of the site or for comparison with site 321.- there is no justification for this. There is no reference to the need for safe routes at all and the fact that both sites have safety issues with this, either for 738 or 321.

In the final paragraph ( whole paragraph is a Proposed Change and newly added wording): (for Site 321, last sentence) "However, in overall terms, the evidence gathered to date indicates that all adverse impacts can be appropriately mitigated". Site 321 therefore is preferred - see table G.6. It is preferred for "40 dwellings" - [Note:now reduced to 35 in Proposed Changes]. As such the whole selection process is flawed. Correctly carried out in accordance to the WCS would result in both Sites being rejected at an earlier stage.

Development can be progressed in Bratton, but through the neighbourhood planning process. See below at 8. and above at 5.

#### **8. The need to provide development through Neighbourhood Plans. Site Allocation contrary to WCS.**

It is a core aim of the WCS to provide for the Localism Act with development being considered in the local areas and communities. I repeat the paragraphs from the WHSAP Topic Paper 2 Site Selection Process Methodology July 2018 Submission Version. See in particular paragraph 3.8:

At pages 13-14:[start quote]

"3. Stage 1:Areas of Search

"Neighbourhood Planning

"3.5 Neighbourhood Plans are an important part of the planning system. The National Planning Policy Framework (NPPF) describes their role:

*"Neighbourhood planning gives communities direct power to develop a shared vision for their neighbourhood and deliver the sustainable development they need. Parishes and neighbourhood forums can use neighbourhood planning to:*

*"set planning policies through neighbourhood plans to determine decisions on planning applications..." (note 7)*

**"3.6 The Council supports passing direct powers over planning to local communities as a part of building up the resilience of local communities.**

"3.7 Referring to the role of Local Plans prepared by the Council the NPPF states:

*"Local planning authorities should set out the strategic priorities for the area in the Local Plan. This should include strategic policies to deliver:*

*"the homes and jobs needed in the area ..." (note 8)*

**"3.8 It is only necessary for this Plan to allocate land for housing development where it is a *strategic priority to do so*. WCS Core Policy 1 proposes that development at **Large Villages should be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. Unless there is a strategic priority to deliver the homes needed in an HMA, then the most appropriate means to assess local needs and plan growth at each Large Village is through the neighbourhood planning process.**" [End of quote].(emphasis added).**

The WCS strategy does not extend to housing sites in Large Villages. There is concern that neighbourhood Plans may not deliver sufficient housing in a Large Village for a Community Area but this is not the case in Westbury Community Area. As set out a 1. above, the housing numbers are in excess of the numbers required. In addition on the statistics there is sufficient for the 5% buffer also required over the period. In keeping with the WCS the way to proceed therefore is not by allocating one, other or two sites at Bratton, but to proceed via the Neighbourhood Plan.

## **9. Conclusion:**

The objections show that the process and basis of allowing both sites 321 and 738 through to Steps 4 and 5 of Stage 4 are flawed and unsound, and the basis for selecting Site 321 over 738 is unsound. Both sites should be rejected. Wesbury Community Area has satisfied the amount of housing it must provide. Bratton is able to proceed with measured development through the current planning laws and the neighbourhood Planning process to provide housing which is actually in accordance with the village needs, is not fundamentally in breach of the WCS Core Strategy and is of a size, type and tenure suitable for the village needs.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. I object to developments 138 and 321 in full.</p>

Regarding: Proposed Changes PC13 & PC94.

We are today submitting representations on behalf of our client, [REDACTED] in relation to the proposed changes to the Emerging Wiltshire Housing Site Allocations Plan. [REDACTED] is the landowner of SHLAA site 738, referred to as 'Land south of Westbury Road' within the Wiltshire Housing Site Allocations Plan and supporting documentation.

Site 738 was originally rejected from the site selection process at stage 2, but following the presubmission consultation in the summer of 2017 the site was re-assessed and within the July 2018 submission version of the plan was found to be a 'more sustainable' site. However, the site was rejected at stage 4a of the site selection process as the LPA considered that the combined pool of the two potential allocation sites (321 and 738) within the Westbury Community Area would result in an oversupply of housing for the Community Area remainder.

In light of the proposed alterations to the Wiltshire Housing Site Allocations Plan which reduce the allocation capacity of site 321 ('Land off B3098 adjacent to Court Orchard/ Cassways'), we submit that the allocation of site 738 should be reconsidered so that the requirement for housing within the Westbury Community Area remainder can be met in full.

PC13 & PC94

Both of these changes reduce the number of approximate dwellings anticipated to be delivered at site 321, from 40 to 35.

The housing requirement for the Westbury Community Area remainder for the period 2006-2026, as shown in table 2.3 of the Submission Version of the Westbury Community Area Topic Paper is 44 dwellings.

Based on the revised number of 35 dwellings allocated at site 321, the allocation of only the 'Land off B3098 adjacent to Court Orchard/ Cassways' site would lead to the provision of only c.79.5% of the stated housing requirement for the Westbury Community Area remainder.

However, the actual level of provision may be even less, as Table 6.6 of the Westbury Community Area Topic Paper states that site 321 has a SHLAA capacity of 32 dwellings. Based on this figure, the allocation of only site 321 would result in the provision of only c.72.7% of the housing requirement.

[TABLE INSERT]

Paragraph 35 of the National Planning Policy Framework (as revised) states:

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.”

By failing to take the opportunity to meet the identified housing need within the Westbury Community Area remainder, the Plan cannot be considered to be positively prepared, justified, or consistent with national policy.

NPPF 35(a) is extremely clear – a LPA’s spatial strategy should as a minimum seek to meet the objectively assessed needs of an area. In this case, the need for housing in the Westbury Community Area remainder over the rest of the plan period is 44 dwellings. The allocation of any less than both sites 321 and 738 would therefore result in an under-delivery of housing in direct contrast to the guidance contained within the NPPF.

In the same vein, the Wiltshire Housing Site Allocations Plan currently ignores the reasonable alternative of allocating site 738, which has been identified within the site selection process as a ‘more sustainable’ site. Taking NPPF 35(b) into account, this approach is not justified.

The decision to not allocate site 738 within the Plan is also inconsistent with national policy, contained within the NPPF. Paragraph 59 clearly states the Government’s intention through the planning system is to significantly boost the supply of housing, and the development of site 738 would make a modest contribution to this objective.

NPPF 77 states:

“In rural areas, planning policies and decisions should be responsive to local circumstances and support housing developments that reflect local needs.”

The Plan’s currently proposed approach would not respond to the identified local need for the Westbury Community Area remainder and as such, would be contrary to NPPF 77.

Most importantly, allocating only site 321 would be contrary to the presumption in favour of sustainable development, which NPPF 10 states is “at the heart of the framework”. NPPF 11 details this presumption and specifically states in relation to plan-making:

“For plan-making this means that:

- a) plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;
- b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
  - i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or
  - ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

A development need of 44 dwellings for the Westbury Community Area remainder has been identified, which cannot be met solely through the allocation of site 321. The additional allocation of site 738 would help fully realise the need for housing in the Westbury Community Area remainder and provide an additional buffer, which would allow for future flexibility should a sudden increase in demand or decrease in supply occur.

Again, NPPF 11 reiterates that strategic policies should provide for the objectively assessed housing needs of an area as a minimum. There are no policies within the Framework which specifically protect any areas or assets of value relevant to site 738 and the land has been assessed as being ‘more sustainable’, so its development would not result in adverse impacts which could be capable of significantly and demonstrably outweighing the benefits of delivering a housing scheme on the site. Therefore, the presumption in favour of sustainable development clearly weighs in favour of the allocation of site 738 within the Wiltshire Housing Site Allocations Plan.

On the basis of the above, the decision only to allocate site 321 in the Westbury Community Area remainder is inconsistent with national policy contained within the NPPF (Paragraphs 11, 59 & 77) and is therefore contrary to NPPF 35(d).

#### Concluding Remarks

Site 738 was the only other site within the Westbury Community Area remainder to be identified as a suitable site for allocation within the Wiltshire Housing Site Allocations Plan and represents an obvious opportunity to secure the delivery of a suitable supply of future housing stock in a sustainable location. The site would provide approximately 20 dwellings for the Westbury Community Area remainder, which when added to

	<p>the anticipated supply of either 32 or 35 dwellings at site 321 would mean that the required 44 dwellings could be provided (c.118.2% or 125.0% fulfilment of requirement).</p> <p>Even the higher level of supply is not considered to be so great that it would represent an adverse over-delivery of housing and in light of the Government's clear intention to significantly boost the supply of housing, achieving this level of supply is a sustainable, realistic and positive ambition.</p> <p>I trust this representation will be given due consideration, however should you wish to discuss any element further please do not hesitate to contact me.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>Representations on the Focussed Consultation on Schedule of Proposed Changes and Associated Evidence Documents for the Wiltshire Housing Site Allocations Plan Land at Victoria Drive, Lyneham Pegasus Group are instructed by Barratt Homes (Bristol) Ltd to submit representations in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). The Council submitted the draft Wiltshire HSAP along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. This was followed by a procedural letter from the inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). Barratt Homes has a land interest in Lyneham at the site referred to within these representations as Land at Victoria Drive. To summarise, the Council are continuing to over-estimate the delivery rates at large strategic sites in the district and are failing to allocate a sufficient number of sites to account for the inevitable shortfall that will result. The Council, therefore, need to allocate sites that are likely to deliver dwellings by the end of the current plan period. Land at Victoria Drive, Lyneham is one such location that could sustainably accommodate development that would contribute to meeting the housing needs of Wiltshire over the remaining years of the plan period. Implications for Lyneham The proposed changes to the HSAP have little to no impact on Lyneham or the Royal Wootton Bassett (RWB) and Cricklade Community Area. The Council have decided that there is no need to identify additional sites for development in the RWB and Cricklade Community Area as it has effectively met its housing requirement under the Core Strategy. This position is supported by the RWB and Cricklade Community Area Topic Paper which confirms that of the 1,455 dwellings required to be delivered under the current plan period, a total of 1,319 have been delivered. Of the remaining 136 dwellings, there are current planning permissions to deliver 317 dwellings. As such, Barratt Homes consider it likely that the RWB and Cricklade Community Area will at least meet its housing target over the remaining years of the plan period. As a result of the above, the proposed changes to the HSAP do not alter this position. Issues with the HSAP However, there remain a number of fundamental issues with the plan. Specifically, there is a substantial over-reliance on strategic sites to deliver homes over the remaining years of the plan period which means that it will fail to deliver the requisite quantum of housing to secure the Councils five-year housing land supply position. The delivery of housing on a number of strategic sites across the Councils Housing Market Areas has failed to come forward at a rate that was expected when they were first allocated under the Core</p>				

Strategy. Sites around Chippenham, Salisbury (Churchfields) and Trowbridge (Ashton Park) have suffered significant delays and are expected to deliver significantly fewer dwellings over the remaining years of the plan period than was previously anticipated when the Core Strategy was adopted. Furthermore, the Council continue to be overly optimistic in their assumed delivery trajectories at a number of these strategic sites across the district. Indeed, there is a very realistic prospect that the delivery at these sites will be significantly below what is predicted by the HSAP, based on research into lead in times and build out rates for large strategic sites. For example, the Council are expecting to deliver 1,350 dwellings at Ashton Park (PC25 and 26), a strategic allocation to the south of Trowbridge. The Council are expecting the site to deliver 1,350 dwellings over the remaining years of the plan period (with 1,250 to follow beyond the end of the plan period), despite the fact that outline consent has not been granted yet and the site is reliant on the delivery of a new bypass to allow the majority of housing to come forward. However, even assuming permission was granted immediately, it is still expected that it would take a minimum of five years before the first completions came forward on the site. In that case there would only be 2/3 years left of the plan period to deliver 1,350 dwellings. This would equate to c. 675/450 dwellings per year. Based on research into build-out rates on large scale sites, this is clearly overly optimistic. For example, Research by Lichfields suggests that build out rates on sites for 2,000+ dwellings average around 161 dwellings per year. The highest build out rate they assessed was 321 dwellings per annum and even this is significantly below what the Council appear to be predicting. There is, therefore, a very real prospect that the sites allocated under the HSAP will not deliver the predicted quantum of housing and, as such, the Council will fail to secure its five-year housing land supply position for the remaining years of the plan period. Given that securing the Councils five-year land supply position is one of its key aims, this is a fundamental flaw with the plan. Land at Victoria Park, Lyneham Lyneham is defined as a Larger Village by the Core Strategy. Development at the Larger Villages is restricted to small scale infill development and redevelopment within its settlement boundary. As such, Lyneham has not taken on any growth over the current plan period, save for some small-scale development/redevelopment in line with this approach. The Council have not been averse to allocating sites at the Larger Villages where there is a clear strategic/local need to do so. Given the identified flaws of the HSAP, there is a clear need to allocate further sites for development that will be deliverable over the remaining years of the plan period. Barratt Homes would not object to this being done based on the current hierarchical approach set out within the Core Strategy, but development at the Larger Villages should be considered. Furthermore, the approach to development in the RWB and Cricklade Community Area should also be altered to allow for further development. The target requirement set out in the Core Strategy for each community area should be regarded as a minimum figure. Exceeding this figure should not automatically preclude further development within a specific area, especially when it can accommodate development sustainably, whilst helping to meet the strategic housing targets of the district as a whole. In terms of an identified local need, the Parish Council prepared a housing needs survey which identified a need for around 28 affordable dwellings. The survey also identified that only 10.8% of properties in the parish were affordable, compared with a district wide average of 19.2%. As the Core Strategy's policy towards Larger Villages effectively precludes large scale development unless sites are specifically allocated within the development plan, this affordable housing need remains unmet by the small-scale development that has taken place which has largely been exempt from delivering affordable homes. Lyneham is a fundamentally sustainable location for development given that it benefits from a number of services and facilities, good public transport links, with relatively frequent services to Chippenham and Swindon throughout most of the day. Lyneham's biggest asset is MOD base (MOD Lyneham) within the village. The base acts as a key employer with close ties to the village. It is understood that the base is home to c. 1,500 students and provides up to 620 jobs. Furthermore, it is likely that further army training facilities are to be provided at the site. Barratt propose matching housing delivery with employment delivery at this settlement, which although it has less facilities than Wotton Bassett, it nevertheless has a good range of local services. The development of the site would result in a modest amount of growth at Lyneham and provide benefits in the form of affordable housing and open space. Barratt Homes would also be able to provide additional employment space alongside new residential development to further enhance the self-containment of the village. However, most importantly, the site would be deliverable within the plan period and,

	therefore, be able to make a positive contribution to securing the Councils Housing Land Supply position over the remaining years of the plan period.

The Council submitted the draft Wiltshire HSAP along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. This was followed by a procedural letter from the inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). Barratt Homes has a land interest in Lyneham at the site referred to within these representations as Land at Victoria Drive. To summarise, the Council are continuing to over-estimate the delivery rates at large strategic sites in the district and are failing to allocate a sufficient number of sites to account for the inevitable shortfall that will result. The Council, therefore, need to allocate sites that are likely to deliver dwellings by the end of the current plan period. Land at Victoria Drive, Lyneham is one such location that could sustainably accommodate development that would contribute to meeting the housing needs of Wiltshire over the remaining years of the plan period. Implications for Lyneham The proposed changes to the HSAP have little to no impact on Lyneham or the Royal Wootton Bassett (RWB) and Cricklade Community Area. The Council have decided that there is no need to identify additional sites for development in the RWB and Cricklade Community Area as it has effectively met its housing requirement under the Core Strategy. This position is supported by the RWB and Cricklade Community Area Topic Paper which confirms that of the 1,455 dwellings required to be delivered under the current plan period, a total of 1,319 have been delivered. Of the remaining 136 dwellings, there are current planning permissions to deliver 317 dwellings. As such, Barratt Homes consider it likely that the RWB and Cricklade Community Area will at least meet its housing target over the remaining years of the plan period. As a result of the above, the proposed changes to the HSAP do not alter this position. Issues with the HSAP However, there remain a number of fundamental issues with the plan. Specifically, there is a substantial over-reliance on strategic sites to deliver homes over the remaining years of the plan period which means that it will fail to deliver the requisite quantum of housing to secure the Councils five-year housing land supply position. The delivery of housing on a number of strategic sites across the Councils Housing Market Areas has failed to come forward at a rate that was expected when they were first allocated under the Core</p>			

Strategy. Sites around Chippenham, Salisbury (Churchfields) and Trowbridge (Ashton Park) have suffered significant delays and are expected to deliver significantly fewer dwellings over the remaining years of the plan period than was previously anticipated when the Core Strategy was adopted. Furthermore, the Council continue to be overly optimistic in their assumed delivery trajectories at a number of these strategic sites across the district. Indeed, there is a very realistic prospect that the delivery at these sites will be significantly below what is predicted by the HSAP, based on research into lead in times and build out rates for large strategic sites. For example, the Council are expecting to deliver 1,350 dwellings at Ashton Park (PC25 and 26), a strategic allocation to the south of Trowbridge. The Council are expecting the site to deliver 1,350 dwellings over the remaining years of the plan period (with 1,250 to follow beyond the end of the plan period), despite the fact that outline consent has not been granted yet and the site is reliant on the delivery of a new bypass to allow the majority of housing to come forward. However, even assuming permission was granted immediately, it is still expected that it would take a minimum of five years before the first completions came forward on the site. In that case there would only be 2/3 years left of the plan period to deliver 1,350 dwellings. This would equate to c. 675/450 dwellings per year. Based on research into build-out rates on large scale sites, this is clearly overly optimistic. For example, Research by Lichfields suggests that build out rates on sites for 2,000+ dwellings average around 161 dwellings per year. The highest build out rate they assessed was 321 dwellings per annum and even this is significantly below what the Council appear to be predicting. There is, therefore, a very real prospect that the sites allocated under the HSAP will not deliver the predicted quantum of housing and, as such, the Council will fail to secure its five-year housing land supply position for the remaining years of the plan period. Given that securing the Councils five-year land supply position is one of its key aims, this is a fundamental flaw with the plan. Land at Victoria Park, Lyneham Lyneham is defined as a Larger Village by the Core Strategy. Development at the Larger Villages is restricted to small scale infill development and redevelopment within its settlement boundary. As such, Lyneham has not taken on any growth over the current plan period, save for some small-scale development/redevelopment in line with this approach. The Council have not been averse to allocating sites at the Larger Villages where there is a clear strategic/local need to do so. Given the identified flaws of the HSAP, there is a clear need to allocate further sites for development that will be deliverable over the remaining years of the plan period. Barratt Homes would not object to this being done based on the current hierarchical approach set out within the Core Strategy, but development at the Larger Villages should be considered. Furthermore, the approach to development in the RWB and Cricklade Community Area should also be altered to allow for further development. The target requirement set out in the Core Strategy for each community area should be regarded as a minimum figure. Exceeding this figure should not automatically preclude further development within a specific area, especially when it can accommodate development sustainably, whilst helping to meet the strategic housing targets of the district as a whole. In terms of an identified local need, the Parish Council prepared a housing needs survey which identified a need for around 28 affordable dwellings. The survey also identified that only 10.8% of properties in the parish were affordable, compared with a district wide average of 19.2%. As the Core Strategy's policy towards Larger Villages effectively precludes large scale development unless sites are specifically allocated within the development plan, this affordable housing need remains unmet by the small-scale development that has taken place which has largely been exempt from delivering affordable homes. Lyneham is a fundamentally sustainable location for development given that it benefits from a number of services and facilities, good public transport links, with relatively frequent services to Chippenham and Swindon throughout most of the day. Lyneham's biggest asset is MOD base (MOD Lyneham) within the village. The base acts as a key employer with close ties to the village. It is understood that the base is home to c. 1,500 students and provides up to 620 jobs. Furthermore, it is likely that further army training facilities are to be provided at the site. Barratt propose matching housing delivery with employment delivery at this settlement, which although it has less facilities than Wotton Bassett, it nevertheless has a good range of local services. The development of the site would result in a modest amount of growth at Lyneham and provide benefits in the form of affordable housing and open space. Barratt Homes would also be able to provide additional employment space alongside new residential development to further enhance the self-containment of the village. However, most importantly, the site would be deliverable within the plan period and,

	therefore, be able to make a positive contribution to securing the Councils Housing Land Supply position over the remaining years of the plan period.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>The increased number of houses proposed for the western side of the Hilperton Gap (up from 205 to 355) is not justifiable. The increase in area (16.33ha to 21.24ha) does not justify the increase in numbers especially when much of the 'new' land comprises balancing ponds for Elizabeth Way. The suggested increase in housing numbers is contrary to Policy 1 of the Hilperton Neighbourhood Development Plan 'made' by Wiltshire Council on the 5th November 2018. In particular it would not be possible to comply with policies 1f and 1g if the increased density went ahead. In addition, the original number (212) was set by Wiltshire Council and their June 2017 document stated 'although mitigation measures could reduce this number'. How WC can now feel that 355 houses can be accommodated with mitigation measures is a mystery. WC concedes that approx. 3/4 of site 263 'appears to be grade 3a agricultural land'. Grade 3a should be protected from, not sought out for, housing. Allocation H2.3 was flawed and ill conceived from the very beginning. For WC to choose to ignore their own mitigation measures is bizarre. Some of these mitigation requirements are shown below. 5.59 Mature and semi-mature hedgerows and trees are key features in the landscape and provide habitat for protected and non-protected species. The existing natural features of the site are significant in the landscape and would be incorporated within the detailed layout. These features also provide wildlife corridors that link habitat features within the local area; in particular, dark corridors for foraging bats. These elements should be protected and enhanced where possible by additional planting with native species. 5.60 This site may be used by Bechsteins bats associated with the Bradford and Bath Bats SAC. Potentially sensitive habitat features on / adjacent to the site include: mature trees; hedgerows; and stream (minor watercourse) at the northern end of the site 5.61 These features should be retained and / or buffered from development (including residential gardens) by wide (10-16m), dark (&lt;1 lux), continuous corridors of native landscaping which will allow for their long-term protection and favourable management in order to secure continued or future use by Bechsteins bats. 5.62 Development will also be required to contribute towards the delivery of the Trowbridge Recreation Management Mitigation Strategy through a financial contribution or direct provision of equivalent new infrastructure over and above normal Council requirements to deliver new habitat and recreational opportunities in line with criteria in the Strategy. 5.63 An important measure will be the provision of landscaping between Elizabeth Way and new housing in order to attenuate noise and reduce the visual impact of this road. Consideration of drainage patterns and flood risk from all sources would need to inform any subsequent layout. In addition, surface water attenuation measures and improvements to existing on-site water infrastructure would need to be provided to support a comprehensive development of the site. 5.64 The layout and design of the site would need to give great weight to the significance of nearby heritage assets and</p>			

	their setting. Where necessary, stand-offs to existing development in Victoria Road, Albert Road and Wyke Road, along with the incorporation of appropriate boundary treatment would need to be considered through detailed layout and design.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy. I agree with all the above! There is a lot of housing development in the Bratton/Westbury area already. As a health care professional it causes me great concern that the health care infrastructure is not strong enough to support the ongoing and proposed expansion of the housing market in Bratton/Westbury.</p>

Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. All of the points raised by our Parish Council are valid and relevant to the well being and safety of our village and its residents. For us, the major issues are the number of houses proposed on the particular sites and the safety issues on the roads. The sites proposed are on the narrowest part of the road into the village from Westbury, on a slight bend and visibility, particularly on site 738, is hindered due to houses to left, right. This road is also used as a "rat run" for traffic to Erlestoke Prison and into Devizes and is busy with speeding traffic all day, but particularly mornings and evenings - presenting a certain danger to everyone using the road. The vehicles from new housing will only add to these dangerous conditions.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>I support the decision regarding the Wiltshire Housing Site Allocation Plan at PC92 in relation to Site H2.13 at Ridgeway Farm, Crudwell where it says the site should be removed from the list to reflect the resolution of Wiltshire Council Cabinet, not be included in the WHSAP list and to wait for the Crudwell Neighbourhood Plan. I have been involved in the drafting of Crudwell Neighbourhood Plan now nearing completion and feel that should be waited for to see the wishes of the people of Crudwell before any further decision is taken about site size or allocation in Crudwell parish. There is universal opinion locally that Crudwell's infrastructure, sewers for instance, are already overstretched with soil water flowing onto public roads and into the main river on rainy days. Despite repeated complaints to Wessex Water they provide only platitudes but no action - because their pipe leading out of Crudwell, although renewed only about a decade ago, was and is of insufficient capacity to take the sewerage flows it should, and nobody seems to have the will or the ability to force Wessex Water to rectify this. Roads are tiny in width. Tuners Lane and Tetbury Lane (where the Ridgeway Farm site exits) are so small that a tractor fills them and they are regularly used by cars, tractors and lorries that hazard children walking to school, or walking to the playground on Tetbury Lane. There is no employment in the village so there is little point in adding houses there since the people must travel by already-busy roads to work. If any houses are added they should be in accordance with the needs and wishes of the village as observed by those who live there. Those needs will be detailed in the Crudwell Neighbourhood Plan. Please wait for it to be published and follow it's guidance.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] 1. INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

### 3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

#### Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

#### APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	The increase in house numbers is contrary to the Hilperton Neighbourhood Development Plan which was made by Wiltshire Council four days ago. Policy 1f requires biodiversity protection, and landscaping and green infrastructure. Policy 1g requires any development to be well set back from Elizabeth Way whilst landscaping should conceal any development from Hilperton and the eastern side of the road. Neither of these policies can be implemented with the proposed new density of houses. The increased number of houses proposed for the west side of the Hilperton Gap (from 205 to 355) is not justifiable. The increase in area (16.33ha to 21.24ha) does not justify this increase especially when much of the 'new' land are the balancing ponds for Elizabeth Way. In addition, the original number for this site (212) was set by Wiltshire Council and their June 2017 document stated 'although mitigation measures could reduce this number'. How WC can now feel that 355 houses can be accommodated with mitigation measures is a mystery. 'Reduction' surely means a lower number, not an increase? WC concedes that approx. 3/4 of site 263 'appears to be grade 3a agricultural land' and so should be protected from development.

<b>Identify Proposed Change Reference Number</b>	PC94				
<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages " are not promoted by National Policy.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I support the removal of Site 3233 Ridgeway Farm from the Malmesbury Community Area Reminder. Having read the submissions and participated in the consultation regarding the Crudwell Neighbourhood Plan I am pleased that the issues raised by the local community have been largely recognized. There is no current or near term need for a development of this size within the Village of Crudwell. I am not opposed to developments of an appropriate scale and the emerging Neighbourhood Plan is identifying land that is consistent with the Wilshire Core Strategy of developments in large villages being limited to small sites. (This was why I had no objection to the original development of the 10 permitted residences that is now complete).

The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. All of the points raised by our Parish Council are valid and relevant to the well being and safety of our village and its residents. For us, the major issues are the number of houses proposed on the particular sites and the safety issues on the roads. The sites proposed are on the narrowest part of the road into the village from Westbury, on a slight bend and visibility, particularly on site 738, is hindered due to houses to left, right. This road is also used as a "rat run" for traffic to Erlestoke Prison and into Devizes and is busy with speeding traffic all day, but particularly mornings and evenings - presenting a certain danger to everyone using the road. The vehicles from new housing will only add to these dangerous conditions.</p>

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	I fully support the proposed change to remove the Ridgeway Development from the Housing Site Allocation Plan. I believe that the originally proposed allocation of 50 dwellings (ie an additional 40 dwellings) is quite unnecessary and contrary to the emerging Crudwell Neighbourhood Plan and to the wishes of the great majority of Crudwell residents. The recent Housing Needs Analysis conducted in Crudwell identifies a need for just 20 - 25 additional dwellings in Crudwell during the coming 10 year planning period; many of which will be satisfied by "windfall" planning applications. Further, it is understood that there is no strategic need for any additional housing needs in the Malmesbury Community Area, and hence the allocation of a further 40 dwellings to Crudwell is quite unnecessary and unjustified. The Ridgeway Development is poorly located, and will give rise to increased traffic and road safety issues in the narrow and already congested Tetbury Lane. The residents of Crudwell are well now advanced in the preparation of the Crudwell Neighbourhood Plan (having conducted several rounds of public consultation). That Neighbourhood Plan will confirm the housing needs of the village, and will identify preferred housing sites and infrastructure needs to support those sites. It would be premature and, I consider, undemocratic to impose the Ridgeway Development on Crudwell in advance of the finalisation of the Crudwell Neighbourhood Plan.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>		<p>Positively prepared - Development requirements have not been objectively analysed. Westbury Town has an excess of 291 houses against the plan, resulting in the Westbury Community Area being over provisioned by 245 houses. There is no requirement for further allocations.</p> <p>Justified - Development of Site 738 and Site 321 are non-compliant with the Core Strategy, Core Policy 1, Clause 4.15 which states: At Large Villages settlement boundaries are retained and development will predominantly take the form of small housing and employment sites within the settlement boundaries. Small housing sites are defined as sites involving fewer than 10 dwellings (i.e. not a major application). Development outside the settlement boundary will be strictly controlled. The reduction of 5 houses in PC 94 does not cancel the following points. Site 738 and Site 321 individually exceed the housing needs requirement of the village (8 houses were required at the last survey) and are therefore non-compliant with Core Strategy, Core Policy 1 which states: Development at Large and Small Villages will be limited to that needed to help meet the housing needs of settlements and to improve employment opportunities, services and facilities. The Council has made errors in the assessment of Bratton as a "Large Village" by counting 2 Recreation Fields, 1 Children's Play Area and 1 Sports Pitch as facilities. However, there is in fact only 1 Recreation Field which includes a small Children's Play area and 1 Sports Pitch. Both sites are considered "modest" development but this is assessed against an incorrect figure of 819 dwellings. The 2011 census identified 512 households, with 1248 residents. Bratton has experienced growth of 26 houses, or 5.1%, in the last 10 years. The addition of 40 new houses in Bratton will therefore represent a further 7.8% increase, bringing the proposed 15-year growth of the village to 12.9%. Neither development complies with the statements of EXAM/ 02A (WHSAP Sustainability Appraisal Sept 2018), under the title 'Education and Skills', states that 'Policies should seek to match housing allocations to employment opportunities within the county, to assist in reducing trends of out-migration for work.' and under the title 'Economy and Enterprise', states that 'Housing development should be located in close proximity to employment sites in order to reduce out-commuting and promote travel to work using sustainable modes of transport . The latest statistics for cars per household indicate 1.76 for rural locations, which will lead to increased traffic, more out-commuting, vehicle noise and pollution. Community speed watch data shows traffic through Bratton has doubled in the last 3 years. On some days more than 400 vehicles in a hour. Both developments will alter the entrance to the village due to their size and will result in the loss of the rural nature of the village on the western edge, creating a suburban view. Site 738 would alter and harm the views and landscapes of the Village, the slopes of the Salisbury Plain and the White Horse and Bratton Camp hillside. Proposed landscaping with trees and shrubs conflicts with the wide open expanses of the hillside at this part of the Special Landscape Area and Salisbury Plain SPA (Special Protection Area). Existing Pedestrian and bicycle access to the centre of the village along Westbury Road and its pavement</p>			

	<p>and across Court Lane is unsafe due to the hazardous road junction at Court Lane, the quantity of traffic using the highway and the inadequacies of the existing pavement. Access to and from Site 738 for vehicles and cyclists will be unsafe due to poor visibility, lack of sufficient sightlines, the narrowness of the highway, quantity of traffic and accessing the highway will be a danger to other traffic. Pedestrian access to and from the village from Site 738 will be unsafe, reaching the pavement on the northern side will mean crossing the highway at a point of poor visibility for pedestrians and drivers. Bicycle access to and from the site is hazardous and there is little opportunity for a bicycle lane on either side of the highway, a point which affects site 321 in the same way but not assessed in Stage 4a. There is loss of green space and agricultural land. Developments of this size will add to the existing pressures on Bratton Surgery. The village is carrying out its own Neighbourhood Plan which will set out the plans for the village, not this Plan. Effective - Large developments at "Large Villages" are less effective in delivering the needs of people moving to the area who require housing where there are employment opportunities. Consistent with national policy - Large scale housing developments in "Large Villages" are not promoted by National Policy. The proposal exceeds dramatically the housing needs required therefore a total waste to develop unneeded houses. Traffic at west end of the village and very difficult access onto main road. Very dangerous. Westbury has an excess of houses. Pressure on the surgery - already very pressurised.</p>

<b>Please give details of why you support or do not support the updates to the Sustainability Appraisal (September 2018) or the Habitats Regulation</b>	<p>WHSAP: Consultation response from the White Horse Alliance, November 2018</p> <p>We wish to respond to the following documents. Wiltshire Housing Site Allocations Plan - Focussed consultation on the Schedule of Proposed Changes to the draft Wiltshire Housing Site Allocations Plan supported by the accompanying revised Sustainability Appraisal Report, updates to the Addendum to the Habitats Regulations Assessment and associated evidence documents</p>				

**Assessment Addendum  
(September 2018).**

We do not want to use the 'Representation forms' for the simple reason that the Habitats Regulations Assessment and 'Addendum' cannot demonstrate that the housing sites allocations plan if approved would not lead to a breach of the Habitats Regulations 2010 and Habitats Directive 1992.

We will comment on the HRA Addendum in relation to its assessment of likely significant effects on the Bath and Bradford-on-Avon SAC for Bats and the River Avon system SAC and question whether the Sustainability Appraisal performs any useful function in examining the sustainability of the plan.

**Bath and Bradford-on-Avon SAC for Bats**

If the Council's plans for mitigating the adverse impacts of the housing sites plan on the integrity of the Bath and Bradford-on-Avon Special Area of Conservation (SAC) for bats cannot show beyond reasonable scientific doubt that the proposed additional housing development in the Trowbridge area, in combination with previously permitted development including Ashton Park and its relief road, will not lead to a breach of Article 6(3) of the Habitats Directive then the legality and soundness of the Housing Sites Allocations Plan itself is in question.

You will see from the attached report by Professor John Altringham of Leeds University that he is not satisfied that significant adverse effects on the SAC can be ruled out.

**River Avon System SAC - HRA and SA**

The favourable conservation status of the Avon and its tributaries has been under threat since at least the 1990s when it became a cSAC. Optimism and wishful thinking have characterised action – or lack of it – by the bodies exercising delegated powers on behalf of the 'member state' – DoE/DETR/DEFRA; EN/NE'; EA; and local councils. Problems of over-abstraction, nutrient enrichment and silting have been identified and then massaged away by acceptance of long-term plans by the water companies for capital investment in reducing end-of-pipe discharges of phosphates and nitrates at treatment plants, notably Warminster and Petersfinger (Salisbury). A 'nutrient management plan' has made optimistic assumptions that management of pollution from agriculture will somehow create capacity for water companies to continue non-compliant discharges and developers to build housing estates without controlling phosphate discharges from the development itself

National England and the EA finally confessed to the failure of the 2015 nutrient management plan (NMP). Almost three years after the creation of the NMP, on 9 March 2018, the EA sent a joint statement to councils in the Avon System's catchment area admitting that control of agricultural sources had been less successful than expected, local treatment plants would not be able to control emissions within their current investment plans and local authorities would have to ensure that new developments were phosphate neutral

The email from the agencies is quoted in the HRA Addendum:

"Evidence suggests that the targets in the Hampshire Avon nutrient management plan are unlikely to be delivered by 2021. We are modelling what this means for the Nutrient Management Plan, and will be providing recommendations in March 2019.

We know that there will be new development and we advise that the new development within the catchment of the Hampshire Avon needs to be "phosphate neutral". We will work with you to help you demonstrate how that can be best achieved."

The HRA Addendum spells out the implications of the message from EA and NE:

“The aim of the NMP is to bring phosphate concentrations in the River Avon SAC down to the conservation targets set by Natural England in order to bring the river system into favourable condition as required by the Habitats Regulations.”

This appears to be a clear admission that the conservation status of the Avon SAC does not currently comply with the Habitats Directive/Regulations. The Member State is therefore in breach of its duty to maintain and enhance the conservation status of sites in the Natural 2000 network.

The joint statement from NE and EA says, in effect, that the phosphate burden on the Avon SAC cannot be controlled by agricultural management and the water companies are not going to invest in plant improvements soon enough to accommodate the extra phosphate discharges from new housing developments. The HRA Addendum explains the implications for councils controlling development in the Avon catchment:

Consequently the Council has been advised that in order to comply with the Habitats Regulations, it should demonstrate all development is “phosphate neutral” for an interim period until any necessary permanent reductions can be accommodated in the water company’s asset management plan

The HRA Addendum then goes on to reach a conclusion that somehow shifts the responsibility for action to bring the condition of the SAC into compliance with the Habitats Directive away from the one source of phosphates that it can control:

It is recognised that the conservation targets will only be met in the long term if measures are taken to reduce runoff from agricultural land and discharge concentrations from sewage treatment works. Both these measures are outside the control of local authorities.

Under ‘Implications for integrity test’, the Addendum sets out steps that could eventually reduce nutrient enrichment of the Avon to a point where the river system would be in a favourable conservation status.

The [Wiltshire] Council, Natural England, the EA, Wessex Water PLC, New Forest District Council, New Forest National Park Authority and Christchurch and East Dorset Council are making constructive progress, and developing a Memorandum of Understanding (MoU) which will be available to support submission of the Plan. It will describe how each local planning authority will ensure that development is ‘phosphate neutral’, and will define ‘phosphate neutral’.

Other mechanisms for improving the condition of the chalk stream system will include an improved nutrient management plan and, belatedly, adequate investment in treatment plants under the next ‘Water Industry Asset Management Plan (AMP) 2025-2030.’

So, even though there appears to be an ongoing breach of the Habitats Directive none of the parties involved in allowing this situation to develop are required to do anything especially urgent. Meanwhile the HRA Addendum is content to conclude that its housing sites plan is unlikely to have significant effects on the integrity of the Avon SAC.

Although other parties share responsibility for the poor state of the river system the HRA conclusion seems to rest entirely on Wiltshire and the other councils setting limits on phosphate emissions from new developments

As with the role of the TBMS in relation to the SAC for bats, we must await documents that may still be in draft when the examination of the WHSAP will be required to reach a conclusion on whether or not the plan can be judged - beyond reasonable scientific doubt - to be in compliance with European biodiversity law.

The Sustainability Appraisal by Atkins and WC will not help us answer that question. The timing of the statement the NE and EA issued on 9 March 2018 seems to have arrived too late to be considered in the SA (document created on 10 May).

At page 6 of the non-technical summary, the SA sets out the problems afflicting the river system in terms that will be familiar to anyone who has followed this saga over recent decades:

The River Avon SAC and ground water sources are particularly vulnerable to the effects of diffuse and point source pollution, in particular to elevated phosphate levels from additional sewage discharges in the catchment. This can be addressed through the introduction of a Nutrient Management Plan (NMP) to reduce phosphate levels

And:

Nitrogen enrichment of surface waters and groundwater is already regarded as [sic] problem in a number of areas. Wiltshire's chalk streams are internationally important for biodiversity, but currently suffer from a number of interacting factors that are having negative impacts.

Groundwater resources need to be protected and managed to ensure sustainable future supplies. There are two key risks to groundwater: pollution / contamination; and over use of groundwater.

What is to be done to ensure that the WHSAP addresses these problems? Will all housing developments in the river's catchment be required to be phosphate neutral? Are policy changes and plan modifications needed to ensure that this happens? The SA has no up-to-date recommendations to make. For example, dealing with Policy H2 North and West Wiltshire Housing Market Area, it says

#### Recommendations

'Whilst no LSE on the River Avon SAC and phosphate loading has been identified in the HRA, it is recommended that, when available, Annex 2 of the River Avon Special Area of Conservation Nutrient Management Plan for Phosphorus is reviewed for any additional mitigation measures that may be proposed.' It then quotes the Council response: 'Any implications arising from review of the Nutrient Management Plan will be addressed as Plan preparation progresses.'

In examining sustainability criteria for individual sites it does not highlight locations that will require control of phosphates at local level or recommend modifications to policies or plans.

It goes without saying that, as with other failures to meet sustainable development goals, such as those for car-dependency and carbon emissions, the SA concludes that while the plan could be improved it is, on balance, sustainable.

When serious scientific doubts hang over compliance with the Habitats Directive/Regulations in relation to the integrity of two of the three SACs that could be adversely impacted by the plan, we do not see how it can be judged 'sustainable' – or lawful, or sound.

	We ask you to ensure that these comments together with the attached report from [REDACTED] are brought to the attention of the Inspector.

<b>Please give details of why you support or do not support the consultation material. Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] 1. INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

### 3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

#### Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

#### APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

### 3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

#### Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

#### APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

Please let us know whether you think the consultation material is sound and legally compliant, and if not why not</b>	<p>[REFER TO ATTACHMENT FOR FULL REPRESENTATION] 1. INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

### 3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

#### Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

#### APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>

INTRODUCTION 1.1 This submission is made by Barratt Homes (Bristol) Ltd in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan Examination. 1.2 The Council submitted the draft Wiltshire Housing Site Allocations Plan (HSAP) along with a Schedule of Proposed Changes and supporting evidence to the Secretary of State for independent examination in July 2018. 1.3 This was followed by a procedural letter from the Inspector in August 2018 which required the Council to undertake a consultation on the Schedule of Proposed Changes to the HSAP, along with the revised Sustainability Appraisal, update to the Habitats Regulations Assessment Addendum, and associated evidence. 1.4 These representations set out Barratt Homes response to these proposed changes and have been prepared having regard to the requirements set out by the National Planning Policy Framework (NPPF). 1.5 Barratt Homes has land interests in the Trowbridge area and have submitted representations at previous stages of the HSAPs preparation in support of allocating land in this location. These specific representations relate to land at Maxcroft Farm in Hilperton, which forms part of the wider Trowbridge Urban Area. 1.6 The following proposed changes are, therefore, considered to be of particular relevance: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. 1.7 Unfortunately, the proposed modifications do not make any fundamental changes to the plan or strategy for Trowbridge. As such, the fundamental thrust of arguments made in previous representations remains the same. 1.8 These key points are considered further in Sections 2, 3 and 4 of these representations, but their content is summarised briefly below: The proposed changes have done nothing to address the shortfall anticipated over the remaining years of the plan period at Trowbridge; The delivery of housing at Trowbridge over the remaining years of the plan period continue to rely on the delivery of housing at a strategic site (Ashton Park) where anticipated delivery trajectories are overly optimistic; There remain serious questions over the deliverability of the identified allocations at Trowbridge given that there is potential for them to be affected by same ecological issues that have affected Ashton Park; The plan simply continues to postpone the delivery of housing at Trowbridge until after the plan period which is an unacceptable approach; The Council should, therefore, look to allocate additional sites to meet Trowbridges housing needs over the remaining years of the plan period and these should include land at Maxcroft Farm. 1.9 Given the above, it is our belief that the plan continues to fail when assessed against the four tests of soundness, as set out at paragraph 35 of the NPPF: Positively prepared the plan fails to meet the objectively</p>				

assessed development and infrastructure requirements of a key strategic settlement (Trowbridge); Justified the plan has not demonstrated it is the most appropriate strategy, when considered against the reasonable alternatives, based on evidence; Effective the plan will not deliver housing in a timely manner in accordance with Wiltshire Core Strategy; and Consistent with national policy a key priority for national planning policy is to boost significantly the supply and delivery of housing. This plan fails to plan for housing at a key strategic settlement with little more than 8 years left in the plan period. 1.10 Land at Maxcroft Farm represents a sustainable and deliverable location for housing development that can support the needs of Trowbridge and Hilperton. Given that housing delivery at Trowbridge is particularly reliant on a large strategic site (Ashton Park) which has suffered significant delays, the risk of further non-delivery of housing at a key strategic settlement in Wiltshire is exacerbated by this plan. The risk for Wiltshire is that the HSAP provides another adopted development plan document that has manifestly failed to address key issues with regard to the delivery and supply of housing. 1.11 The failure to address these issues would simply result in their deferral to a future development plan document or leave them to be addressed via the development management process. 1.12 Barratt Homes trust that the comments contained in these representations will be carefully considered and appropriately responded to by Wiltshire Council in their submission to the Secretary of State. 2. KEY CHANGES MADE TO HSAP 2.1 Some 135 changes are proposed to the HSAP. None of these were particularly fundamental to the overall approach of the plan, with the majority of them relating to factual corrections and tweaks to site allocations. 2.2 The more significant changes relate to the removal of site allocations from the plan at Crudwell, Malmesbury and Market Lavington. The Councils rationale for this was that development at these locations could be addressed through the delivery of Neighbourhood Plans. Barratt Homes do not have any specific comments to make regarding these specific changes. 2.3 To repeat, the specific changes these representations relate to are: PC13 and PC51 which amends the table relating to the quantum of development anticipated at the proposed allocations at Trowbridge; PC25 which revises the anticipated quantum of development at the proposed allocations at Trowbridge and the extent of the shortfall expected over the plan period; and PC54-PC73 which relate to amendments made to the proposed allocations at Trowbridge. Implications for Trowbridge 2.4 The fundamental strategy for Trowbridge has not been changed. Whilst the expected quantum of housing to be delivered on the HSAP sites has been revised to the extent where an additional c. 250 dwellings (800 1,050) are now expected to be delivered, the bulk of housing to be delivered is still reliant on the delivery of the long-term allocated site at Ashton Park to meet its housing target identified in the Wiltshire Core Strategy. 2.5 Given the delays in housing coming forward at Ashton Park, the Council are now only expecting the site to deliver 1,350 dwellings over the remaining plan period where it had previously been expected to deliver 1,600 dwellings. They are expecting the remainder (1,250 dwellings) to be delivered post 2026. This reduction has largely cancelled out the additional dwellings that are expected to be delivered at the other allocated sites over the remaining years of the plan period. 2.6 It should be noted that Barratt Homes question this delivery trajectory and consider the Councils assumptions to be overly optimistic. The reasons for this are set out in Section 3 below. 2.7 Regardless, there will be a shortfall in the number of dwellings delivered at Trowbridge over the plan period. This shortfall is expected to be 1,297 dwellings (PC25) which is broadly equivalent to the number of dwellings the Council expects to be delivered at Ashton Park beyond the end of the plan period (1,250). This is not a sound approach and fails to comply with paragraph 182 of NPPF 2012 (since replaced by paragraph 35 of the NPPF 2018). Key Concerns 2.8 Barratt Homes have previously made representations to the HSAP, expressing concerns with the overall approach to delivering housing at Trowbridge in September 2017. 2.9 As the fundamental strategy for Trowbridge has not changed, the thrust of the previous representations is still very much relevant. The key points made within those representations were as follows: There has been a pattern of failure across the district to deliver dwellings at key strategic sites at Chippenham, Salisbury and Trowbridge. There are serious question marks with regard to the delivery of any dwellings at Ashton Park between now and the end of the plan period, with no evidence in terms of a delivery timetable that the 1,350 dwellings that are anticipated by the Council can be completed; As such, it is clear that the large strategic sites have failed to deliver housing in the short-term and will run over into the next plan period; This has led to development pressure elsewhere within the plan area where a number of towns have seen planning by appeal and these will now deliver in excess of the indicative requirements as set out in the Wiltshire Core Strategy (WCS). We expect that the failure to deliver housing at these identified sites will exacerbate pressures on other

areas within Wiltshire to accommodate more growth and undermine the spatial distribution of the WCS; This will be further compounded by the failure of current proposed allocations in the HSAP at Trowbridge to meet the full allocation. As proposed there would be a residual shortfall of 1,297 homes (the changes to the HSAP revised this figure from 1,220 homes) still required to meet the needs of Trowbridge Town and a shortfall of 750 homes to meet the needs of Trowbridge Community Area. As a key strategic settlement and the primary focus of development within the WCS, it is not clear how under delivery at Trowbridge can meet the spatial strategy and development requirements of Wiltshire. There is plainly no difficulty in the HSAP document allocating sites for housing in excess of 42,000. Indeed, properly read, a figure above 42,000 would be entirely consistent with both the working and the evidence surrounding the WCS. Whilst the HSAP provides some limited commentary on the decision not to address the shortfall in Trowbridge, the ramifications of this decision are not examined in the Sustainability Assessment (SA). The non-allocation of homes at a Principal Settlement is a crucial strategic decision and the lack of analysis or commentary of this issue is a glaring omission on the current evidence base. Given the acknowledged need within the HSAP to provide a surplus, alongside the shortfall in the OAN, there is a clear and obvious requirement to allocate a full amount at Trowbridge.

2.10 Moreover, the failure to deliver a full amount of housing at Trowbridge does not match the ambitions of the Town Council who want to maintain Trowbridges status as Wiltshires County Town. The failure to plan to meet its housing needs in full under the HSAP would not be in line with the Towns status and the stated ambitions of locally democratic elected bodies.

Amendments to Trowbridge Settlement Boundary

2.11 In addition to the above, Barratt would like to formally register their support for the proposed amendments to the settlement boundary at Hilperton and Trowbridge which now captures parts of the built-up area that were previously excluded.

### 3. IMPLICATIONS FOR PROPOSED ALLOCATIONS

#### Ashton Park

3.1 In addition to the above, Barratt Homes would wish to elaborate further on the deliverability issues at Ashton Park, specifically in reference to the definition of deliverable as set out within the revised NPPF (2018).

3.2 The representations to the Regulation 19 version of the plan were submitted in September 2017. Over a year has since passed and the Ashton Park site still remains without outline planning permission, albeit it is understood that it was resolved to grant permission in April 2018, subject to the signing of a S106 agreement. This agreement had not yet been signed at the time of writing these representations.

3.3 The NPPFs definition of deliverable (for the purpose of Housing Land Supply assessments) states that sites with outline permission or allocated within development plans are not considered to be capable of delivering dwellings unless there is clear evidence that housing completions will begin on site within five years.

3.4 The Council have not provided any clear evidence to suggest that Ashton Park is capable of delivering any dwellings over the next five years. However, the Council are expecting it to deliver 1,350 dwellings by the end of the plan period (2026). With around 7-8 years left of the plan period and the assumption that no dwellings are likely to be delivered over the next five years, the Council appear to be expecting the site to deliver somewhere in the region of 450-675 dwellings per year over the last 2-3 years of the plan period.

3.5 Lichfields produced a research paper entitled Start to Finish: How Quickly do Large-Scale Housing Sites Deliver (November 2016). In their assessment of build-out rates, they noted that the average annual build-out rate for a scheme of 2,000+ dwellings was 161 dwellings per annum (dpa). The highest build out rate of the sites they assessed was 321 dpa (Cranbrook). Even taking this higher figure, the Councils anticipated delivery trajectory for Ashton Park is clearly overly optimistic. The full report is attached at Appendix 1.

#### APPENDIX 1: LICHFIELDS (NOVEMBER 2016) START TO FINISH: HOW QUICKLY DO LARGE-SCALE HOUSING SITES DELIVER

3.6 Notwithstanding this, the delivery of the bulk of housing at the site is reliant on the provision of a new bypass. It is understood that only around 300 dwellings could be delivered in advance of this key piece of infrastructure. This is another key issue that will have significant implications for delivery of dwellings at Ashton Park.

3.7 Taken together, this means that the shortfall of housing delivery at Trowbridge will be even more significant than the HSAP currently suggests both in the short and longer term.

3.8 This also has implications for the delivery of housing across the district in locations (e.g. Chippenham and Salisbury) which are also heavily reliant on the delivery of housing at strategic development locations to meet their Core Strategy targets. Indeed, the Councils overly optimistic view of delivery trajectories for strategic sites, coupled with an under provision of allocations that are deliverable over the remaining years of the plan period means that the prospect of a housing shortfall would not be confined to the Trowbridge area alone.

3.9 The Council argue that not addressing this shortfall under the HSAP is justified because Trowbridges

needs will be met by housing delivery under a future plan period. However, failing to address important issues of delivery, especially when there is a clear onus from the government to significantly boost the supply of housing, is not an appropriate position to take and fails to comply with paragraph 182 of the NPPF 2012. 3.10 There is a need for Trowbridge to deliver housing in the short term to relieve pressure on other, less sustainable locations for development across the district. 3.11 The Councils decision to pursue a strategy that effectively postpones the delivery of housing at a key strategic settlement such as Trowbridge to a future plan period is unacceptable and unsound. The plan accepts that there will be a shortfall in the delivery of housing at Trowbridge over the current plan period to the tune of 1,297 dwellings. This figure is based on a overly optimistic view as to the quantum of homes that might be delivered by the end of the current plan period (1,350 dwellings) and, as such, we would expect this shortfall to be even more substantial than is currently predicted. 3.12 Given the extent of this shortfall and the implications for failing to deliver a sufficient quantum of homes at Trowbridge under the current plan period, there is a clear need to identify additional housing sites that can deliver housing in the shorter term (i.e. within the remaining years of the plan period). 3.13 Land at Maxcroft Farm is one such site that could deliver housing in the shorter-term help Trowbridge to meet its housing requirements to the end of the current plan period (2026). Other Site Allocations 3.14 The remaining site allocations and their expected delivery are summarised as follows (PC13, PC51 and PC54-73): [TABLE INSERT] 3.15 Section 5 of the previous representations to the Regulation 19 Local Plan also included a critique of the other site allocations within Trowbridge. This still remains very much relevant and we would direct the Inspector to review its contents. 3.16 In essence, the assessment points out that the allocations to the south and east of the town are likely to be affected by the same ecological issues that have affected Ashton Park coming forward. There are, therefore, concerns with regards to the deliverability of these sites within a timely manner (i.e. within the plan period). Again, the HSAP has not identified a suitable set or quantum of sites that will ensure the delivery of housing at Trowbridge in the short term. 3.17 The strategy, in identifying an insufficient number of sites, some (if not all) of which may be unsuitable to be delivered in the plan period, simply postpones the inevitable allocation of further sites at Trowbridge to later plan periods when it should be doing so now. 3.18 The plan is, therefore, unsound because it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives and is inconsistent with national policy. 4. LAND AT MAXCROFT FARM Hilperton and Trowbridge 4.1 As stated previously, Barratt Homes have a specific interest in Land at Maxcroft Farm, Hilperton. However, there has been no assessment of Maxcroft Farm in the HSAP. This is thought to be because it is perceived as relating to Hilperton and not Trowbridge. The previous representations set out why this thinking was flawed. To summarise: Trowbridge, Hilperton, and Staverton Marina effectively constitute a continuous urban area; There is no visual spatial definition of Trowbridge or the remainder for the purposes of identifying additional allocations; The Core Strategy is unclear on the status of Hilperton, as it identifies it as a separate settlement in Core Policy 29; and requires that its distinct identity is protected in paragraph 5.150; but includes it as part of Trowbridge in footnote 56; The Core Strategy also defines Trowbridge Town as the continuous urban area of Trowbridge (which must by any rational definition include Hilperton); and Explicitly includes a less well-connected settlement within the continuous urban area of Trowbridge (Staverton). 4.2 Therefore, in order to meet the indicative housing requirement for Trowbridge Town, there is a need to allocate sites at Trowbridge including Hilperton. However, even if (contrary to footnote 56) Hilperton is excluded from Trowbridge Town, allocations are still required including those at Hilperton to meet the Community Area requirements. 4.3 It is noted that in the Councils submission documents, Wiltshire Housing Site Allocations Plan Consultation Statement Regulation 22 (1) (c) (WHSAP/09), the Council notes the importance of retaining the separate identities of Hilperton, North Bradley and Southwick. Crucially, both Southwick and North Bradley are currently separated by open countryside from the Trowbridge urban area, compared to Hilperton which already forms part of the continuous urban area. Furthermore, the plan goes on to allocated sites adjacent North Bradley, although sets out that a strategic gap should be maintained. This view that Hilperton is a separate village does not recognise the existing pattern of development across north Trowbridge. 4.4 Either way, the delivery of development at Maxcroft Farm in Hilperton would contribute to addressing the shortfall within the Trowbridge CA, whether it is viewed as development at Trowbridge, Hilperton or both. 4.5 Regardless, it is clear that the development of Maxcroft Farm must be seen in the context of delivering housing for the needs of Trowbridge and Hilperton. Therefore, the continuing lack of assessment of Maxcroft Farm as part of the

	<p>Sustainability Appraisal coupled with the lack of commentary on the decision not to allocate for the full housing needs at Trowbridge, means that the HSAP will not meet the needs of Wiltshire nor deliver a sound and objectively assessed plan. Land at Maxcroft Farm 4.6 The credentials of land at Maxcroft Farm were presented to the Council in a Technical Delivery Document as part of the representations on the Regulation 19 version of the HSAP. This document covered: the sustainability of the location; the environmental factors affecting the location; the realistic housing potential/capacity of the area in relation to the environmental effects of development; and the deliverability of the location. 4.7 This was also supported by detailed technical notes supporting this representation in order to address identified concerns from internal consultees at Wiltshire. 4.8 In terms of delivery, Barratt Homes are keen to stress that the delivery of this site is immediate and could be delivered from start on site (following allocation/consent) to practical completion within 24 months. 4.9 Given the issues with delivery in Wiltshire and the strategic settlements this must be considered a significant benefit of the site to realistically deliver well within the remaining plan period before 2026. As set out in the next section it is not thought that the allocations as they stand will achieve this aim. 5. CONCLUSION 5.1 These representations have been prepared by Pegasus Group on behalf of Barratt Homes (Bristol) in response to the Focussed Consultation on the Schedule of Proposed Changes and associated evidence documents being carried out by Wiltshire Council as part of the preparation of the Housing Site Allocations Plan (HSAP). 5.2 These representations are specifically concerned with the strategy set out within the HSAP delivering new homes at Trowbridge. The key proposed changes identify additional dwellings to be delivered at the already proposed sites, but do not identify additional sites. 5.3 Under the HSAP, Trowbridge is projected to fall short of its Core Strategy housing target by a minimum of 1,297 dwellings. Barratt Homes feel that this figure will be significantly higher due to the Councils overly optimistic assumptions regarding delivery rates at the proposed allocations namely Ashton Park. 5.4 The Council are justifying this shortfall by saying that it will be met during the following plan period (i.e. 2016-2036). However, aside from being bad planning, this approach will further exacerbate pressure on other parts of the district to deliver the housing required under the current plan period (2006-2026), whilst also failing to deliver (among other things) the housing required to support the economic growth of Trowbridge. Ultimately, the strategy will delay the allocation of additional sites to a new local plan when they should be allocated under the HSAP. 5.5 The HSAP must, therefore, be found unsound as it has not been positively prepared, its strategy is unjustified, it will be ineffective in meeting its strategic objectives of the Core Strategy and is inconsistent with national policy. 5.6 In order to be found sound, Barratt Homes believe it is imperative that additional sites are identified within the HSAP due to the pressing need to deliver homes at Trowbridge over the remaining years of the current plan period. 5.7 Given the sustainable performance and policy compliance of Maxcroft Farm in relation to the strategic priorities set out in the WCS, this is one such location that should be included.</p>
