

## Appendix 1 – HIAMS Mobile

Below are some screen prints from the live HIAMS Street Works Mobile software and the main HIAMS database which is currently operational in Wiltshire.

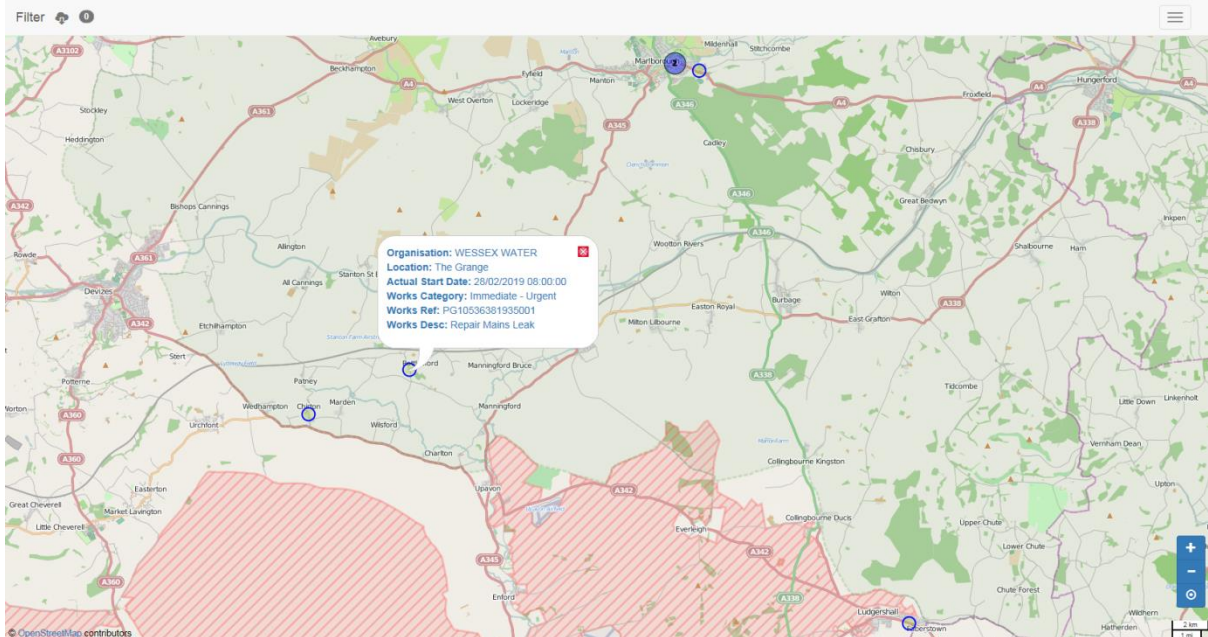

1) Inspectors select their works from the list.

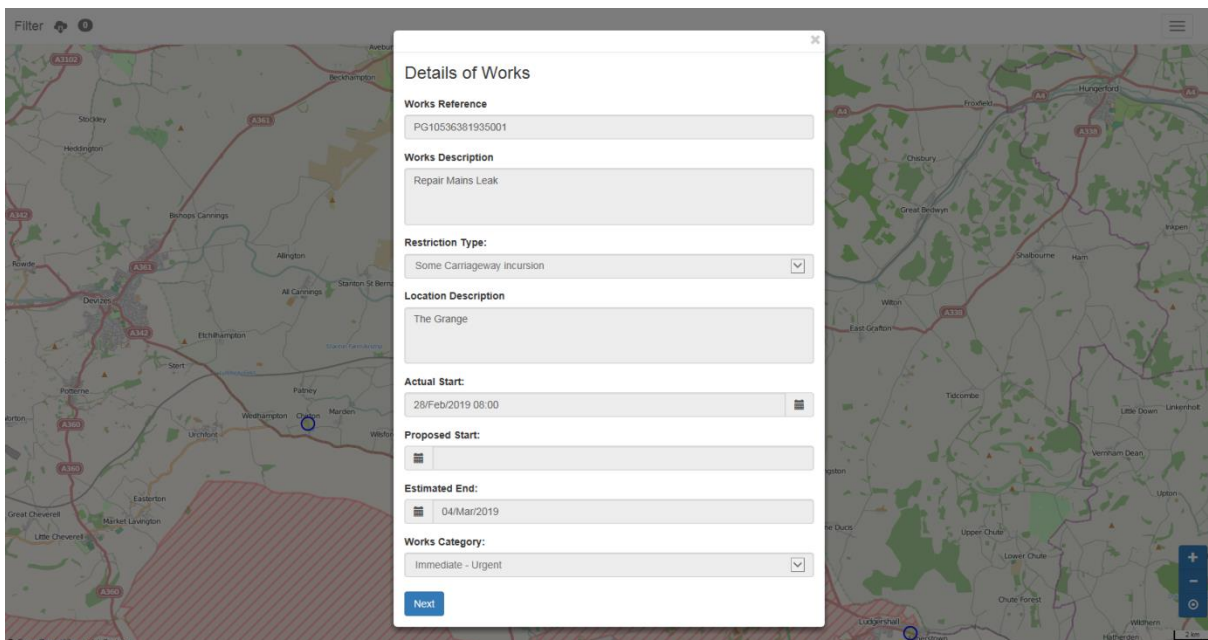

2) Inspectors can use GPS to help with location and travel.

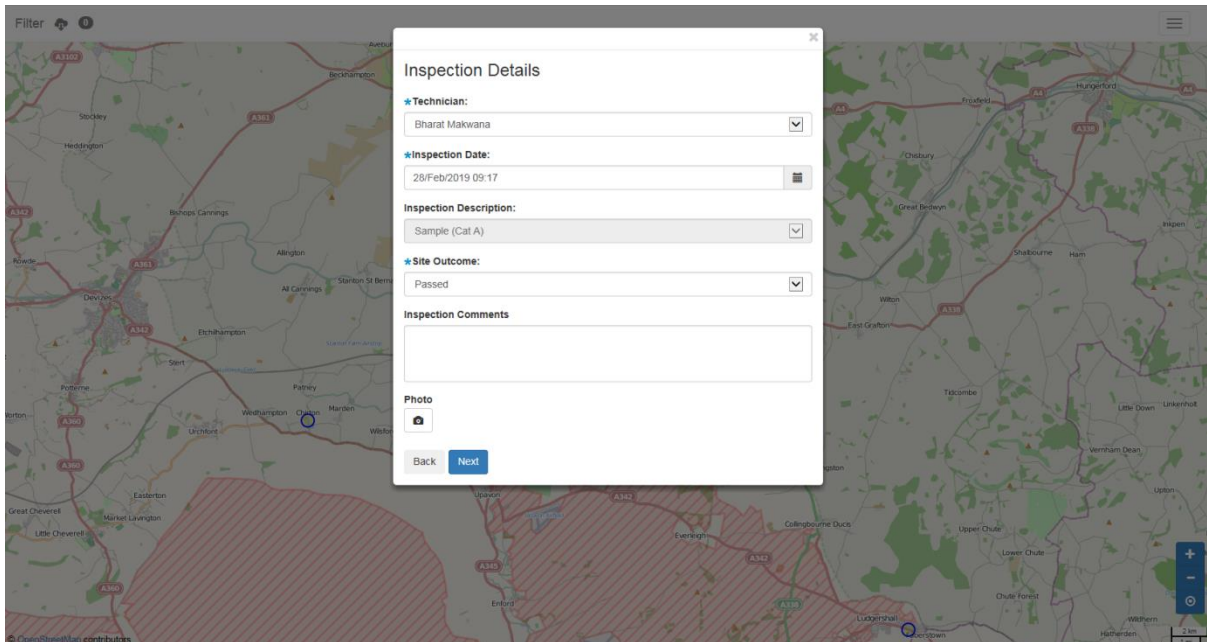

- 3) Inspections and works in their area are loaded on to interactive mapping along with their current position. Inspectors can select their works and view relevant information at a tap and a glance.

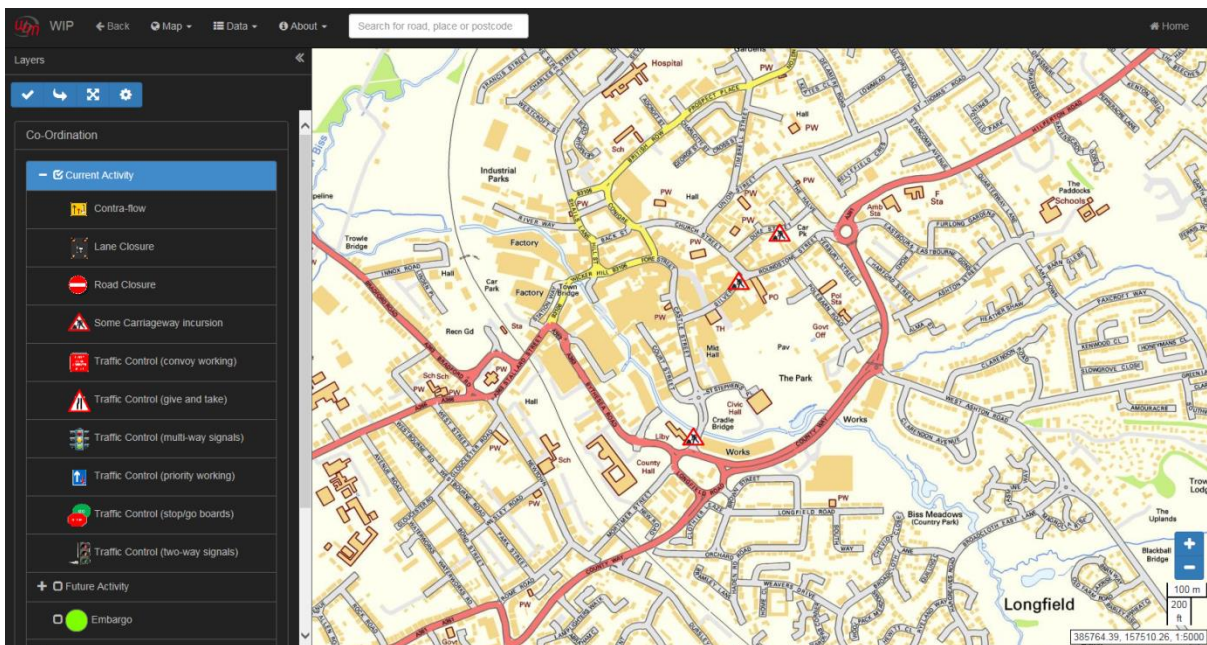

- 4) Inspectors can launch inspection forms and enter the results of the inspections at the site. These forms can be fully customised by the Authority with drop down lists and free text.

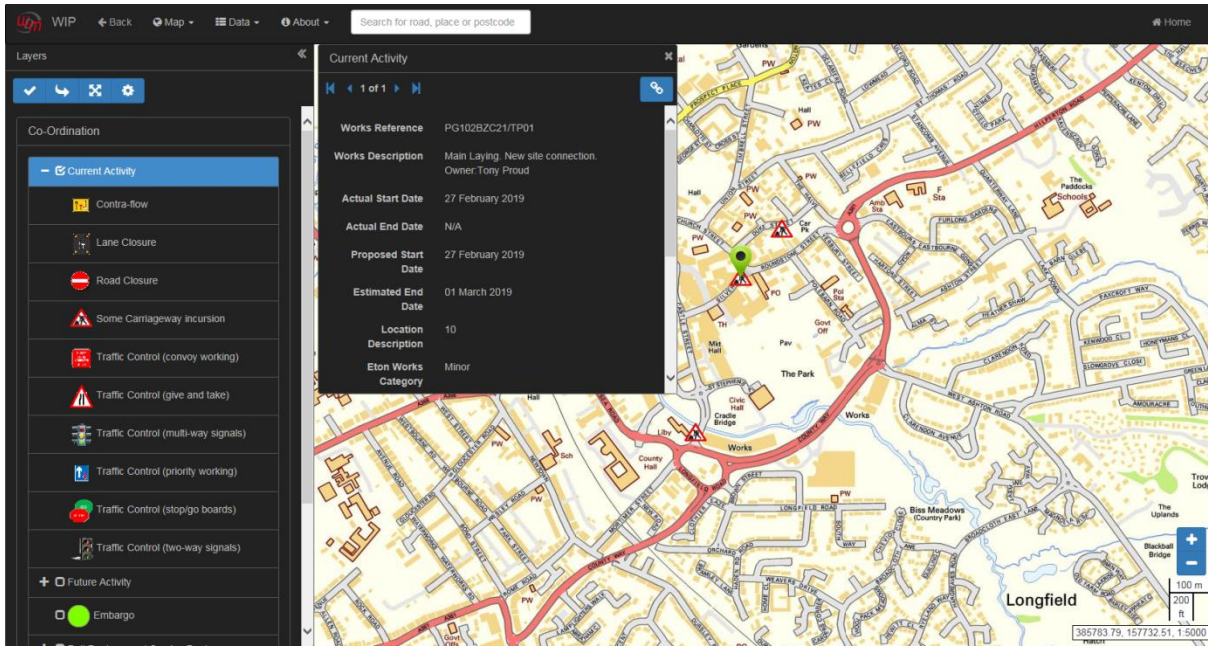

- 5) Inspectors can take photographs on their tablet and they are automatically uploaded to the main HIAMS database and sent to the statutory undertaker.

- 6) The main street works module also utilises interactive mapping streaming live spatial information on road works

7) Information pertaining to the works can be accessed from the mapping.

8) Including the full works register.
