Chairman's Announcements

Adverse Winter Weather – Call for Partnership Working

Wiltshire Council is looking to expand its partnership working with the city, town and parish councils should problems be caused by adverse winter conditions.

Wiltshire Council is encouraging local Councils to record their interest in working with us to help provide services during adverse weather conditions. This could involve being a local agent for storing salt, or refilling salt bins, or mechanical salting of footpaths and roads.

This partnership working will help us jointly to provide a better and more extensive coverage at a time when resources will be fully stretched.

The local councils are asked to register their interest via their Community Area Manager before 30 November 2010.
