Risk Assessment

Risk Health

Risk Area	Key Risks	Risk Assessment	Updates to note
Service Delivery	<p>Level of post and work volumes remain high and a concern remains over the failure to meet the KPI targets. This includes the internal backlogs which staff are seeking to reduce.</p> <p>Resourcing constraints means that work is not being received and allocated in a timely manner.</p> <p>Poor or out of date documentation, particular of an external nature could lead to service risks</p> <p>Associated risks following the processing of the pension increase exercise continue, due to an increase in discrepancies between databases arising from the increase exercise.</p> <p>A risk that frauds could occur if suitable internal controls are not implemented</p>	High	<p>As part of the business plan 2022/2023, the backlog was outsourced to Hymans.</p> <p>In March the Key activates of i-Connect and controls, the aggregations backlog and resourcing were identified as factors to overcome in order that the business plan 23/24 could improve on productivity. A Service Improvement team has been formed to facilitate data preparation and in turn productivity. The SIT Team are also focused on undertaking work to reduce the internal backlog.</p> <p>A work allocation system has been embedded for member services, with employer services managing their own work using different measures of reporting. This couples with changes to staff working practices.</p> <p>Weekly KPIs are now circulated and analysed and weekly insights have been launched for the member services team which show staff productivity.</p> <p>Embedding the use of bulk processing is now better supporting Fund processes. This is to be supplemented by a review of member documentation to make sure its clear, accurate and concise.</p> <p>Work on reviewing payroll database discrepancies between Altair and SAP is to be treated as a high priority by officers.</p> <p>Arrangements have been reviewed following an independent investigation into fraudulent activity, but a further audit is being considered</p>
Financial Management	<p>The employer contribution rate schedule is not accurately maintained and the Fund is unable to determine if it is receiving the correct contributions, or identify ceasing employers at an early stage.</p> <p>The Fund pays incorrect pensions, lump sums and other one off payments to pensioner members.</p> <p>Delays in Treasury Management processing could be caused by changes to approval limits</p> <p>A lack of guidance relating to covenant reviews and processes could cause a financial risk to the Fund.</p>	Medium	<p>Officers maintain an Employer Contribution and Data Management Working Group to mitigate the risk of the schedule not being maintained. Internal audit has highlighted further improvements over the internal controls in relations to financial management. An update will be presented to members at each meeting cycle.</p> <p>Officers are working to ensure that the new contributions rates are implemented & paid by all employers, and that this requirement is maintained.</p> <p>Covenant guidance requested from Hymans and covenant training to be provided to Committee members. An employer process review has been undertaken with changes implemented, particularly in relation to the management of Admission Agreements which have ceased or lapsed.</p> <p>Officers are working with Wiltshire Council Finance to ensure that the appropriate approval limits are in place.</p>
Fund Governance	<p>Although implemented, embedding the risk and control framework into departmental culture is an ongoing process</p> <p>The Fund has a number of key procurements due and there may be concern in completing these procurements due to resource levels in the Council's procurement team. This concern extends to the sourcing of existing contracts.</p>	Low	<p>Officer training on the risk and control framework has been completed and regular meetings are held to reinforce the concept.</p> <p>Officers are working with both the procurement team and internal auditors to ensure that these strategic management issues of the Fund are fulfilled.</p>
Systems Management	<p>It is noteworthy to highlight that the Council's contract will SAP expires in December 2023. However, SAPs payroll function is currently planned to continue until April 2024.</p> <p>Changes to the transfer value guidance has caused a suspension to the processing of certain calculation routines. Factors and guidance have been received, however their use is being queried with the database provider.</p> <p>The Fund's ability to screen the mortality and tracing of members needs to be robust</p>	Medium	<p>The migration to new payroll databases is crucial. In addition, other SAP functions such as HR could also impact the Fund if not properly migrated. Implementation of the Altair payroll to mitigate the cessation of SAP will help, however the Fund remains reliant on the Council's Evolve programme to move forward as expected. The expected mitigation is due between October 2023 & April 2024.</p> <p>The TV process review is largely completed and all TV calculations are able to recommence, however monitoring of the situation is ongoing.</p> <p>Delays in signing a new service provider concerning mortality screening has caused a cessation in the processing of this service. Such delays carry inherent risks, including the proper completion of key projects. Managers are risk assessing the implications as well as pursuing completion of the contractual negotiations.</p>
Investment	<p>Investment performance by managers is poor or misaligned with expectations leading to risks concerning the funding level, the achievement of the investment strategy and poor benchmarking.</p> <p>BPP needs to operate effectively to ensure funds are well managed & investments are made on a timely basis and delivering their objectives.</p>	Low	<p>The Fund is working with Brunel on pooling arrangements, particularly in relation to stock holdings not consistent with the Fund's SAA. Progress is being made in this area.</p> <p>The Investment Consultant has updated the Fund's new SAA strategy. The Fund is currently benefitting from net fee savings, but costs are under constant pressure to rise with high budget increases.</p> <p>Officers are working with BPP and other authorities in the partnership to update BPP's constitution.</p>
Compliance with Regulations	<p>Anticipated changes in legislation could impact the Fund adversely, specifically regarding compliance and resourcing.</p> <p>Failure to achieve statutory requirements & deadlines due to work volumes</p>	Low	<p>Regular updates to the Committee and Board enable all stakeholders to monitor any potential changes in legislations. This work is supported by adviser guidance.</p> <p>Project planning and holding of regular management meetings to ensure deadlines are achieved.</p>

Performance	Failure to have a clear Fund audit strategy and ensure that the audit plan commissioned each year by the Fund remains on schedule	Low	The internal auditors have been asked to undertake a review of Fund performance reporting. The recommendations will be incorporated into officer reporting practices. Officers are working with auditors to ensure that the commissioned audit strategy remains on schedule.
Employer Management	Contacts have inadequate knowledge, skills and experience to administer the Scheme correctly and effectively. Contact maintenance requires going improvement. Employers are not set up, maintained or leaving the Fund correctly. This can effect the starting position for funding, unitisation adjustments, pooling or cessation arrangements due to untimely or incorrect information.	Medium	The Fund offers training to employers to mitigate the risks highlighted. Implementation of the Stabilisation Policy provides a certain amount of increased security for employers. The Fund also works closely with our Actuarial advisers to ensure new sets up are managed correctly. In addition, officers need to maintain the Fund's unitisation database. An exercise updating the employer contacts is being reviewed.
Data Management	Information is posted through i-Connect or employer spreadsheets late which can delay processing. In addition, a lack of i-Connect checks may impact data accuracy. There's a risk that cessations are not advised resulting in delays to the start of this process. TUPE transfer are being delayed, but a new service using LGPS Create could resolves backlogs Employer asset and liability allocations should be monitored to avoid throwing out an employer's funding position. Poor data provision from large individual employers can heavily impact the Fund's data management	Medium	To enable the i-Connect onboarding process officers have worked closely with the outstanding employers, particularly major employers to obtain outstanding data. Although suspended background work has been ongoing. It is anticipated that the suspension may be lifted shortly. Relevant data quality checks associated with i-Connect submissions have been implemented and then passed to accounts for financial checks. A clear plan is now in place. TUPE & cessation reporting is in place and officers will migrate to the introduction of LGPS Create to enable more effecting process. Assignment of the responsibility to a specific officer as well as accurate transaction coding and Altair reporting will be implemented on the appointment of a key role.
Stakeholder Engagement	Inaccuracy of communications by the Fund could result in reputational damage. There is a risk that as a Fund we are delivering poor customer service to our members, with slow response times and disclosure breaches.	Low	Peer review arrangements are in place prior to publication and a strategy to maintain the compliance and content on MSS & the website has been implemented. A review of the Fund's Customer Service Excellence strategy is being considered following its initial assessment. Recent Customer Surveys have shown a small decrease in service quality.
Funding	Pension payment adjustments caused by the Rectification project may impact the Fund.	Low	The Accounting team continue to work with the project manager to ensure Funding is not adversely impacted. A reconciliation between Altair & SAP continues to be undertaken following the PI exercise.
Resourcing	The Fund is not appropriately resourced and staff all adequately trained to enable the service to be delivered in a sustainable and reliable way. In addition, key departures could lead to a loss of crucial knowledge in the team. A lack of an approved Committee training plan had increased the risk around a lack of knowledge and understanding in key areas	High	Key people in the team are seeking to transfer specialist knowledge to colleagues by documenting procedures and notes. In addition, a training strategy is under review for the department. However, in the event of a knowledge gap, we can call on our external consultants and independent advisors for help in the short-term; Whilst key vacancies have been filled staff have also left leading to a cycle of recruiting & replacement which can effect the overall knowledge base. Employer service staff continue to receive focussed training relating to their roles to mitigate processing errors and encourage i-Connect data
Climate risk	Failure to manage the risks in the investment portfolios, and/or to take advantage of the investment opportunities which arise from transition to a low carbon economy could cause the Fund to suffer material negative financial impacts. Difficulty in receiving climate data reporting from the Fund's Investment consultants and pooling arrangement could lead to poor decision making	Medium	The Fund has a climate change policy (within the responsible investment policy), decarbonisation targets, and has assessed alignment of all portfolios. The Fund reports against the requirements of the Task Force on Climate-related Financial Disclosures (TCFD). BPP continue to hold stock in the name of the Fund which is not in accordance with the Fund's climate change flightpath. This could lead to reputational damage. Officers are liaising with BPP and other Fund's in the group to ensure that the SAA of the Fund's climate change flightpath is back on track
Projects	Projects are managed by a designated Project Manager. Key projects currently being managed are the Backlog project, the rectification project and McCloud. The first two have been outsourced to 3rd party administrators. Regular updates are provided to the management team, Committee and Board in respect of the McCloud. Fourth & fifth projects relating to internal backlogs & the introduction of a new payroll system are also considered a risk area. The outsourced rectification project is progressing well, & McCloud is beginning to move forward too however the backlog project is moving more slowly. Changes to the Evolve programme is also contributing to risk in this area. Payroll staff have been recruited to implement Altair's payroll system over the next few months.	High	As part of the oversight of Evolve Payroll Programme periodic strategic updates are received from the s151 Officer to assess level of risk. Mitigations relating to the Evolve project involve the implementation of Altair's payroll system, which has now been further delayed to December/January to take on new pensioners in a phased approach. Its noted that significant retrospective legislative changes related to the McCloud case could lead to higher levels of administration resource. However, from October McCloud calculation routines have been run and its is anticipated that only about 50 potential members may be effected. Officers continue to work with Hymans to mitigate delays on the outsourced backlog casework, particularly in relation to the timeliness of checking. Whilst completion of the Rectification project has been delayed slightly, arrears payments have largely been completed and a new model for
Other External Risks	No "other" risks currently identified.	Low
