

Appendix 3 – Authorisation

The PiD, whether for the overall programme, the workstream or an individual project will detail the level of delegated authority that it will operate within. These will also be included in the terms of reference for the IE, JIT and Workstreams, as well as their respective project boards. However, there will be cases where authorisation will be required from the programme management level above (see graphic for simple illustration). The general referring principle will be as follows:

‘Additional activity that requires additional resource over and above the working budget, or an intended activity or decision that would sensibly require ratification from the next level of management’

Authorisation route
