

Croft Road to Great Western Way

Public transport/rail/road interchange possible as well as a much-needed rail crossing to link north and south Swindon, as requested by business and residents at Consultation Meetings.

Croft Road to Hay Lane Link

Traffic forced to use J16, where 24 sets of traffic lights are proposed. SBC project additional 9000 vehicles per day – obviously carbon emissions will be increased.

Police continually issue warnings requesting the exercise of caution following accidents at this junction.

J16 exceeds capacity now at certain times of the day from just traffic entering and leaving motorway.
