The beneficiaries will be approximately 60 students aged 15 and 16 who are following a unique optional sponsored vocational course which includes vehicle mechanics, robotics, building, plumbing, domestic electrical installation and health and safety. I feel that it is essential that the next generation are aware of the effects that the combustion of fossil fuels has on the world's climate. This project will hopefully inspire the young people involved to take an active part in reducing atmospheric pollution during their adult life.			

Wiltshire Council will be unable to meet the ongoing costs of your project. Please describe, therefore, how you will ensure the financial sustainability of your project beyond the period of this grant (if successful)?

No further funding will be required as no consumable materials will need to be replaced.
If this bid is successful the equipment acquired will be used for future students on my course.

3 – Additional information to support and strengthen your application e.g consultation, community involvement, energy efficiency measures

Please tell us more about the organisations and groups that are involved in your project, who will benefit from the award and how will you know that it is making a difference.

My course is particularly aimed at those students who are motivated by learning through practical hands-on tasks. In past years the course has been supported by local firms such as L J Cooper & Son, Sweetnam & Bradley, Custom Transformers, Build Center, B & Q and Halcrow Group Ltd. However in a time of deep recession resulting in redundancies, short-time working and depot closures, some companies who have provided finance and resources in the past are no longer able to do so.

Successful students receive trophies and certificates from sponsors and some go on to take up apprenticeships with sponsoring firms.

In 2005 I was privileged to receive the Government's DfES Innovation Unit Award for Lifetime Achievement for the West of England which had links to this course.
