

Wiltshire's HGV Route Network

This map has been produced to inform HGV drivers of the most appropriate routes in Wiltshire. By using these routes, drivers will minimise their impact on the environment and local residents, whilst reducing driver stress by avoiding unsuitable roads.

The map overleaf shows a network of Strategic Lorry Routes (shown in green) and local lorry routes (shown in orange). Drivers that pass through the County without stopping to make a delivery or collection are encouraged to use the M4 or other Strategic Lorry Routes. Access to Wiltshire's towns and villages should be made via the nearest available Strategic Lorry Route, then by the designated Local Lorry Route (where available). All other roads should only be used where it is essential to gain access.

By adopting the HGV Route Network, drivers will be protecting Wiltshire's environment and residents interests, whilst meeting the economic needs of the County.

HGV Code of Conduct

HGV operators are also encouraged to adopt Wiltshire's Code of Conduct for HGV's

- Operators should join the 'Well Driven?' campaign promoted by the Freight Transport and Road Haulage Associations (Tel: 01892 552319)
- Operators should ensure that their vehicles are legal and roadworthy in order to ensure safety and reduce noise nuisance
- Drivers should stick to Wiltshire's strategic and local lorry route network and only use other routes for essential access

- Drivers should comply with the speed limit of their vehicle and drive at the appropriate speed for the driving conditions at all times
- Drivers should drive thoughtfully in residential and other noise sensitive areas, and avoid residential areas wherever possible
- Drivers should show consideration to other road users at all times, especially vulnerable road users such as pedestrians, cyclists and motorcyclists
- Drivers should abide by the Highway Code and all relevant legislation
- Drivers should wear a seat belt
- Drivers should refrain from using mobile phones and CB radios whilst driving
