

# REPORT TO THE WESTERN AREA PLANNING COMMITTEE

<b>Date of Meeting</b>			
<b>Application Number</b>	<b>07/03866/FUL</b>		
<b>Site Address</b>	<b>Country Wide Farmers Ltd Bradford Road Melksham Wiltshire SN12 8LQ</b>		
<b>Proposal</b>	<b>Demolition of existing buildings (2500m2 A1 - established use, Storage and Distribution - 5,193m2) and erection of new food convenience store 4,645m2 gross with net sales area of 2,601m2 with proposed new vehicular access and new signalised junction with linked vehicular servicing area to the rear plus 249 car parking spaces</b>		
<b>Applicant</b>	<b>Asda Stores Limited And Countrywide Farmers PLC</b>		
<b>Town/Parish Council</b>	<b>Melksham (Town)</b>		
<b>Electoral Division</b>	<b>Melksham (Town)</b>	<b>Unitary Member:</b>	
<b>Grid Ref</b>	<b>389940 164146</b>		
<b>Type of application</b>	<b>Full Plan</b>		
<b>Case Officer</b>	<b>Mr Sim Manley</b>	01225 770344 Ext 240 sim.manley@wiltshire.gov.uk	

## 1. Background

This application was placed before Planning Committee of West Wiltshire District Council on 26.2.09 following its deferral from the same Planning Committee on 8.1.09.

At that planning meeting on 8.1.09 Members resolved to be minded to agree to the principle of development, contrary to the officer's recommendation of refusal, and noted that the application would be referred to the Secretary of State as a Departure from the Development Plan and under the Town & Country Planning (Shopping Development) (No 2) Direction 1993.

Officers, who had advised planning refusal on five grounds, were instructed to bring back a report to a future meeting of the Planning Committee to include material considerations that would justify the granting of permission contrary to the Development Plan together with proposed conditions and agreed planning obligations under S106 (See Appendix 1 – Report and Minutes Planning Committee 8.1.09)

In accordance with the instruction from the Planning Committee on 8.1.09, the application was returned to the meeting of the Planning Committee on 26.2.09 with the following justification to allow the grant of permission:-

'Officers have given the matter full consideration to this issue and also the submissions by Melksham Town Council. It is recommended that the best approach is to justify the proposal in its entirety on the basis that the approval would create further employment opportunities for Melksham area, and is mitigated by the proposed planning conditions, environmental and sustainable transport measures and off-site highway modifications to be carried out at the applicant's cost. On this basis members are prepared to allow this proposal as being an exception to current Government retail guidance set out in PPS6 together with Policy DP3, 6 of the Wiltshire and Swindon Structure plan 2016 and Policy SP3 of the West Wiltshire District Plan 1st alteration 2004. In respect of loss of employment land there would

remain employment land opportunities in close proximity to the Town centre and a limited net increase in retail floor space taking into account the existing ancillary retail use which has established use rights. In terms of highway impact, the attached planning conditions together with mitigation measures through the applicant's proposed contributions towards sustainable transport measures and off-site modifications to the adjoining highway, justify an exception to Policy T8 of the Wiltshire and Swindon Structure Plan 2016 and the above mentioned policies and Guidance'.

Members resolved that they were minded to grant permission subject to the application be referred to the Secretary of State for Communities and Local Government under the requirements of the Town and Country Planning (Shopping Development) (England and Wales) (No.2) Direction 1993. In the event that the Secretary of State did not call the application in, the Members resolved that the Development Control Manager be authorised to grant planning permission with conditions and subject to the completion of a S106 agreement to secure the following:

(i) Sustainable transport measures which will include a £500k contribution based upon £100k per annum towards bus transport to Melksham Town Centre from the application site.

(ii) Funding and implementation of off site highway works including the signalised junction modifications, which have been budgeted by the applicants at £600k.

(iii) An odour mitigation and environment programme in view of the close proximity of the site to the Melksham waste water treatment works.

(See Appendix Report and Minutes – Planning Committee 26.2.09).

Subsequent to this resolution, the application was referred to the Secretary of State for Communities and Local Government under the requirements of the Town and Country Planning (Shopping Development) (England and Wales) (No.2) Direction 1993 with the resolution to grant permission. The Secretary of State did not call the application in and directed that Wiltshire Council could determine the application as per their resolution.

In the interim progress has been made in relation to the negotiations in terms of the S106 agreement and, was at the time of writing this report, close to being finalised in accordance with the member's resolution.

## **2. Main Issues**

The application has been brought back to the Planning Committee following legal advice being received. The advice is that the existing justification lacks clarity in relation to the issue of retailing presented to Members at the Planning Committee meeting on 26.2.09, and endorsed by them at that time, which only covered employment, transportation and issues of odour. It did not, however, sufficiently address the issue of retail impact which formed two reasons for refusal within the officer's original recommendation for refusal.

Whilst reference to the material consideration of retail impact was not addressed within the 'Justification' provided in support of the resolution at the Planning Meeting on 26.2.09, this matter was covered within the report which referred to the imposition of conditions to mitigate against the retail impact. These conditions are as follows:

2 The gross external area of the food store hereby permitted shall not exceed 4,700 metres square. The net sales and display area (defined as all areas used for the display and sale of goods, including floor spaces used for checkouts, customer circulation and customer services but excluding entrance/exit lobbies, customer toilets, cafe and Automated Teller Machines (ATMs)) shall not exceed 2,900 metres square, of which not more than 75% of the net sales and display area shall be used for the sale of convenience goods.

REASON: In order to protect the vitality and viability of the town centre.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies SP1 and SP3.

3 No part of the net sales and display area (defined as all areas used for the display and sale of goods, including floor spaces used for checkouts, customer circulation and customer services but excluding entrance/exit lobbies, customer toilets, cafe and Automated Teller Machines (ATMs)) of the food store hereby permitted shall be given over to any dry cleaning services, key cutting, shoe repair, photographic, or pharmacy services dispensing medicines by prescription or post office counter services.

REASON: In order to protect the vitality and viability of the town centre.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies SP1 and SP3.

These conditions sought to control both the total area of retail floorspace along with ensuring that the use of the proposed store excludes uses which would otherwise be found within the town centre as detailed above. In doing so, the conditions would mitigate against the otherwise unacceptable impact that the proposed development might have upon the retailing function of the existing centre. In addition, the resolution to grant also included, as detailed above, a S106 contribution towards a sustainable public transport links with the town centre which would facilitate a link between the two.

Having regard to the above it is recommended that the 'Justification' be amended so that the reason for the decision is wholly addressed, including reference to the fact that the resolution on 26.2.09 has taken into consideration the issue of retail impact

#### Recommendation

That the original reason used in justification for the grant of permission be amended as follows:

Full consideration has been given to the officer report and the documents supporting the application and also the submissions by Melksham Town Council. The committee endorses the following reasons for approval:

1. Part of the site has a lawful use for retail and this proposal would result in a limited net increase in retail floor space taking into account this existing ancillary retail use

2 The approval would create further employment opportunities for Melksham area, in terms of the range and type of jobs. In respect of loss of employment land there would remain employment land opportunities in close proximity to the Town centre

3. The proposed retail store would result in some beneficial 'claw back' of part of the trade lost from the town centre as a result of customers travelling to other centres to undertake their shopping, with associated benefits in terms of sustainability/reduction in the need to travel. In addition, the proposed planning conditions controlling retail floorspace and use (Precluding sale of certain goods and services) will mitigate against the unacceptable impact the proposed store would otherwise have upon the vitality and viability of the existing town centre. Lastly, in accepting the principle of need for the new store there is no sequentially more central and preferable location that could accommodate a store of this size.

4.Environmental and sustainable transport measures and off-site highway modifications to be carried out at the applicant's cost. This will contribute to access by means of transport other than the private car and will offer the opportunity for linked trips to the town centre.

5.In terms of highway impact, the attached planning conditions together with mitigation measures through the applicant's proposed contributions towards sustainable transport measures and off-site modifications to the adjoining highway, justify an exception to Policy T8 of the Wiltshire and Swindon Structure Plan 2016 and the above mentioned policies and guidance..

On this basis members are prepared to allow this proposal as being an exception to current Government retail guidance set out in PPS6 together with Policy DP3, 6 of the Wiltshire and Swindon Structure plan 2016 and Policy SP3 of the West Wiltshire District Plan 1st alteration 2004.

Finally, at the meeting of the West Wiltshire District Council's Planning Committee the issue of the application being referred to the Secretary of State as a departure from the development plan was discussed. A motion was put forward by Councillor Carbin, which was seconded, that the proposal did not constitute a development of more than local significance and was not of such a scale and nature

that it would prejudice implementation of the policies and proposals of the plan. Member's resolved to accept the motion which was duly agreed.

For the sake of clarity, it is now requested that Members confirm that this was the case and that it was their considered opinion that there is no requirement that the Application now be referred to the Secretary of State as a Departure.

**Recommendation:**

**The committee having regard to the officers report, the Development plan and other material considerations consider that an exception to Development Plan policy specifically (Retail and Highway) can be made to grant permission for the proposed development subject to legal agreement(s) and a number of safeguarding conditions. The S106 relates to:**

**\* Sustainable transport measures specifically a £500k contribution based upon £100k per annum towards bus transport to Melksham Town Centre from the application site.**

**\* Funding and implementation of off site highway works**

**\_Environmental management measures in relation to the proposed use.**

**For the following reason(s):**

**Full consideration has been given to the officer report and the documents supporting the application and also the submissions by Melksham Town Council. The committee endorses the following reasons for approval:**

**1. Part of the site has a lawful use for retail and this proposal would result in a limited net increase in retail floor space taking into account this existing ancillary retail use**

**2 The approval would create further employment opportunities for Melksham area, in terms of the range and type of jobs. In respect of loss of employment land there would remain employment land opportunities in close proximity to the Town centre**

**3. The proposed retail store would result in some beneficial 'claw back' of part of the trade lost from the town centre as a result of customers travelling to other centres to undertake their shopping, with associated benefits in terms of sustainability/reduction in the need to travel. In addition, the proposed planning conditions controlling retail floorspace and use (Precluding sale of certain goods and services) will mitigate against the unacceptable impact the proposed store would otherwise have upon the vitality and viability of the existing town centre. Lastly, in accepting the principle of need for the new store there is no sequentially more central and preferable location that could accommodate a store of this size.**

**4.Environmental and sustainable transport measures and off-site highway modifications to be carried out at the applicant's cost. This will contribute to access by means of transport other than the private car and will offer the opportunity for linked trips to the town centre.**

**5.In terms of highway impact, the attached planning conditions together with mitigation measures through the applicant's proposed contributions towards sustainable transport measures and off-site modifications to the adjoining highway, justify an exception to Policy T8 of the Wiltshire and Swindon Structure Plan 2016 and the above mentioned policies and guidance..**

**On this basis members are prepared to allow this proposal as being an exception to current Government retail guidance set out in PPS6 together with Policy DP3, 6 of the Wiltshire and Swindon Structure plan 2016 and Policy SP3 of the West Wiltshire District Plan 1st alteration 2004;**

**and that, subject to a safeguarding condition and a s.106 agreement concerning environmental management of the proposed use in relation to its close proximity to the Melksham Sewage Treatment Works, the proposal would comply with policy U5 of the West Wiltshire District Plan 2004.**

**Finally, Members confirm that, in accordance with the previous resolution, that the application does not need to be referred to the Secretary of State as a departure as they consider that the development did not constitute a development of more than local significance and was not of such a scale and nature that it would prejudice implementation of the policies and proposals of the plan.**

**Subject to the following condition(s):**

- 1 The development hereby permitted shall begin either before the expiration of three years from the date of this permission.

REASON: In accordance with Section 91 of the Town & Country Planning Act 1990 as amended by Section 51 of the Planning & Compulsory Purchase Act 2004.

- 2 The gross external area of the food store hereby permitted shall not exceed 4,700 metres square. The net sales and display area (defined as all areas used for the display and sale of goods, including floor spaces used for checkouts, customer circulation and customer services but excluding entrance/exit lobbies, customer toilets, cafe and Automated Teller Machines (ATMs)) shall not exceed 2,900 metres square, of which not more than 75% of the net sales and display area shall be used for the sale of convenience goods.

REASON: In order to protect the vitality and viability of the town centre.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies SP1 and SP3.

- 3 No part of the net sales and display area (defined as all areas used for the display and sale of goods, including floor spaces used for checkouts, customer circulation and customer services but excluding entrance/exit lobbies, customer toilets, cafe and Automated Teller Machines (ATMs)) of the food store hereby permitted shall be given over to any dry cleaning services, key cutting, shoe repair, photographic, or pharmacy services dispensing medicines by prescription or post office counter services.

REASON: In order to protect the vitality and viability of the town centre.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies SP1 and SP3.

- 4 Deliveries and servicing hours for customers to the food store hereby permitted shall be limited to the hours of 0700 – 2300 hours Monday to Saturdays, and 0900 – 1800 hours on Sundays and Bank Holidays.

REASON: In order to safeguard the amenities of the area in which the development is located.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C38.

- 5 Whilst in the servicing and delivery yard, any delivery vehicle's engine, including lorry and van engines, shall be switched off during loading and unloading.

REASON: in order to safeguard the amenity of the area.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C38.

- 6 The rating level (as defined in British Standard 4142:1997) of noise emitted by all fixed plant, including refrigeration plant, on site shall not exceed 34 dBA between 2300 and 0700 hours or 43 dBA at any other time. The noise levels shall be determined at the nearest noise sensitive properties.

REASON: in order to safeguard the amenities of the area in which the development is located.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C38.

- 7 Suitable ventilation and filtration equipment shall be installed to suppress and disperse any fumes and/or smell created from any cooking operations on the premises. Details of the equipment for each phase of the development shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of the development. All equipment shall be installed in accordance with the approved details and in full working order to the satisfaction of the Local Planning Authority prior to the commencement of use of the relevant phase of the development

REASON: In order to safeguard the amenities of the area in which the development is located.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C38.

- 8 Prior to the commercial premises being brought into use, a scheme providing for the storage or display of goods, materials, plant, machinery, equipment, waste or other items. Adequate storage of refuse from the commercial properties shall be submitted to and approved by the Local Planning Authority. The scheme shall then be carried out in accordance with the approved details, prior to the commencement of use, and shall be maintained at all times.

REASON: In the interests of the appearance of the site and public health and safety.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy SP1, SP3, & C38.

- 9 Prior to the commencement of any development the site shall be subject to:
- i) Site investigation and risk assessment works for chemical contamination;
  - ii) Works to remediate any chemical contamination identified, that is unacceptable in the context of the approved development and its environmental setting, as identified by the site investigation and risk assessment work;
  - iii) Remediation validation works.

The above to be carried out to the satisfaction of the Local Planning Authority.

Site investigation works shall be carried out in line with the main procedural requirements of BS 1017:2001 - Investigation of Potentially Contaminated Sites - Code of Practice.

Where a requirement for quantitative risk assessment is identified, the assessment works shall be carried out in line with the requirements of the UK Contaminated Land Exposure Assessment (CLEA) guidelines, for assessment of human health risks. Also for ground and surface water risk assessment the Environment Agency R&D Publication 20 "Methodology for the Derivation of Remedial Targets for Soil and Groundwater to Protect Water Resources" protocol shall be utilised.

REASON: in the interests of public health and safety.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C37.

- 10 Details of lighting to the site (including measures to minimise sky glow, glare and light trespass) shall be submitted to and approved in writing by the Local Planning Authority before each phase of the development prior to the commencement of the relevant phase of the development. The scheme shall only be carried out in accordance with the approved details.

REASON: In the interests of pollution prevention.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C35.

- 11 Any facilities for the storage of oils, fuels or chemicals shall be sited on impervious bases and surrounded by impervious bund walls. The volume of the bunded compound should be at least equivalent to the capacity of the tank plus 10%. If there is multiple tankage, the compound should be at least equivalent to the capacity of the largest tank, or the combined capacity of interconnected tanks, plus 10%; or 25% of the total volume which could be stored at any one time, whichever is the greater. All filling points, vents, gauges and sight glasses must be located within the bund. The drainage system of the bund shall be sealed with no discharge to any watercourse, land or underground strata. Associated pipework should be located above ground where possible, and protected from accidental damage. All filling points and tank overflow pipe outlets should be detailed to discharge downwards into the bund. Full details shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of development. The scheme shall only be carried out in accordance with the approved details.

REASON: To minimise the risk of pollution of the water environment.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U4.

- 12 All surface water drainage from impermeable parking areas and hardstandings for vehicles, commercial lorry parks and petrol stations shall be passed through an oil interceptor designed and constructed to have a capacity and details compatible with the site being drained. Roof water shall not pass through the interceptor.

REASON: To minimise the risk of pollution of the water environment.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U4.

- 13 The development hereby permitted shall not be commenced until surface water drainage works have been carried out and completed in accordance with details to be submitted to and approved in writing by the Local Planning Authority. Such a scheme shall utilise Sustainable Drainage Principles and shall not result in an increase in the rate and / or volume of surface water discharge to the local land drainage system. The works shall be undertaken in accordance with the approved details.

REASON: To ensure that the development can be adequately drained.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U2

- 14 The development hereby permitted shall not be commenced until the following details, based on a 1 in 100 year flood flow design standard, have been submitted to and approved by the Local Planning Authority:

- i) A scheme for the alleviation of flooding.
- ii) A detailed programme of proposed drainage works.
- iii) The method of accommodating the spring/pond/watercourses) on the site.

Subsequently the works shall be completed in accordance with the approved details, including any timescale attached thereto.

REASON: In the interests of flood prevention.

- 15 Contaminated water shall not be discharged to any stream, watercourse or underground strata, whether direct or via soakaways.

REASON: To minimise the risk of pollution of the water environment.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U4.

- 16 Detailed plans of the parking and servicing areas, together with the means of access thereto, shall be submitted to and approved by the Local Planning Authority for each phase of the development before development commences for each phase on the relevant phase of the development. The detailed proposals shall indicate the provision to be made for the draining of the parking and servicing areas, the individual marking of car parking spaces, the landscaping of the parking and servicing areas where appropriate, and full details of the method of construction. All works referred to in this condition shall be completed, and the parking and servicing areas shall be available for use before the premises are occupied.

REASON: To ensure that an adequate area for parking and/or servicing is available in the interests of highway safety.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy T10

- 17 No part of the development hereby permitted shall take place until construction stage plans have been submitted to and approved in writing by the Local Planning Authority. The plans will need to agree the routing and timing of construction traffic, together with identifying the need for any temporary traffic orders that may be necessary. These works shall be undertaken in accordance with these approved details.

REASON: in the interests of highway safety.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies H4 and SP3.

- 18 Before any phase of the development is occupied, the access roads and car parking areas shall be surfaced in accordance with details for that phase of the development, which shall have been submitted to and approved in writing by the Local Planning Authority and shall be maintained as such thereafter.

REASON: In the interests of highway safety.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy T10.

- 19 A Travel Plan shall be submitted to and approved by the Local Planning Authority prior to the commencement of the retail phase of the development. The Travel Plan shall include measures to minimise vehicle movements to the foodstore and a timetable for implementation, and shall be implemented in accordance with the approved scheme.

REASON: In pursuit of sustainable transport objectives.

- 20 Landscaping schemes for the application site, including a programme for its implementation, shall be submitted to and approved by the Local Planning Authority for each phase of the development prior to the commencement of the relevant phase of the development. The landscaping schemes shall include provision for landscape planting, the retention and protection of existing trees and other site features, walls, fencing and other means of enclosure and any changes in levels. The approved scheme shall be implemented in accordance with the approved programme, and the landscaping shall be maintained thereafter for a period of not less than five years. Any trees and shrubs which fail within that period shall be replaced to the satisfaction of the Local Planning Authority and maintained for a further period of five years.

Upon approval:

- \* The approved scheme for each phase of the development shall be fully implemented with new planting carried out in the planting season October to March inclusive, following occupation of the building(s) or the completion of the relevant phase of the development whichever is the sooner, or in accordance with a timetable to be agreed in writing with the Local Planning Authority;
- \* all planting shall be carried out in accordance with British Standards, including regard for plant storage and ground conditions at the time of planting;
- \* the scheme shall be properly maintained for a period of 5 years and any plants (including those retained as part of the scheme) which die, are removed or become damaged or diseased within this period shall be replaced in the next planting season with others of a similar size and the same species, unless the Local Planning Authority gives written consent to any variation; and
- \* the whole scheme shall be subsequently retained.

REASON: In the interests of visual amenity, to ensure that the approved landscaping scheme is carried out at the proper times and to ensure the establishment and maintenance of all trees and plants.

POLICY: West Wiltshire District Plan - First Alteration 2004 - Policies C32 and C40.

- 21 No development shall take place on any phase of the development until there has been submitted to and approved in writing by the Local Planning Authority a plan indicating the positions, design, materials and type of boundary treatment to be erected. The boundary treatment shall be completed before the buildings are occupied or in accordance with a timetable agreed in writing with the Local Planning Authority, for each phase of the development. Development shall be carried out in accordance with the approved details.

REASON: To ensure the appearance of the development is satisfactory.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 – Policies C17 and C32.

- 22 No development shall take place on any phase of the development until a schedule of the materials and samples of the materials to be used in the construction of the external surfaces of the relevant phase of the development hereby permitted have been submitted to and approved in writing by the Local Planning Authority. Development shall be carried out in accordance with the approved details.

REASON: To ensure that the development harmonises with its setting.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 – Policies C17 and C31A.

- 23 Details, including samples where appropriate, of the materials for the surface of all roads, footways and pedestrian areas, cycleways and all other hard surfaced areas for each phase of the development shall be submitted to and approved by the Local Planning Authority prior to the commencement of development, or prior to the commencement of any relevant phase of the development, whichever is appropriate. The development shall be carried out in accordance with approved details.

REASON: To ensure that the development harmonises with its setting and provides clearly defined linkages to and from Trowbridge Town Centre.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C31A and Planning Policy Statement Planning Policy Statement 6 - Planning for Town Centres.

- 24 Details of existing and proposed land levels across the site, illustrated by means of spot heights, contours and sections across the site, and demonstrating the relationship between the proposed development and the surrounding land shall be submitted to and approved in writing by the

Local Planning Authority. Development shall then only be carried out in accordance with the approved details. There shall be no land raising unless approved under the terms of this condition.

REASON: In the interests of proper planning of the area.

- 25 Details of storage areas for wheeled refuse bins for each phase of the site, designed so as to minimise their impact on the appearance of the street scene shall be submitted to and approved in writing by the Local Planning Authority. The approved storage area shall be provided prior to the buildings on the relevant phase of the development being first occupied and shall be maintained as such thereafter.

REASON: In the interests of the appearance of the street scene.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C31A.

- 26 No development hereby permitted shall take place until the applicants, or their agents or successors in title, have secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation that has been submitted to and approved by the Local Planning Authority. The works shall be undertaken in accordance with the approved works.

REASON: to protect the areas of the site which are of archaeological interest.

POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C15.

- 27 Details of the protection, easement, and / or realignment of any public infrastructure across the site, including water mains and sewers, shall be submitted to and approved in writing by the Local Planning Authority before the commencement of any works on site. The works shall be undertaken in accordance with these approved details.

REASON: in order to protect public infrastructure.

- 28 Prior to the commencement of the retail and commercial properties hereby permitted, details of all security measures, including CCTV, shall be submitted to and approved in writing by the Local Planning Authority. The works shall be carried out in accordance with these approved details.

REASON: in the interest of public safety.

- 29 Prior to the commencement of development and during the course of the development, the building shall be carefully surveyed to determine whether bats or barn owls are present. If any sign of bats or barn owls is discovered during the development, work shall cease immediately and Natural England shall be consulted further.

REASON: In the interests of natural species which have statutory protection.

POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C7.

- 30 A legal easement has been completed between the freeholder of the site to which the application relates (the Site) and Wessex Water Services Limited (Wessex Water) to permit Wessex Water in perpetuity to continue the passage of odours and flying insects from Wessex Water's Melksham Sewage Treatment Works (STW) over the Site at current levels. Current levels to be established by odour and insect number survey during normal operation of the existing plant, equipment and processes at the STW in accordance with good operational practice over a 12 month period and the results recorded by the planning authority.

(2) an agreement is completed between Wessex Water and [Asda Stores Limited] (Asda) in which Asda agrees to fund the reasonable costs of Wessex Water in carrying out odour abatement works or flying insect control measures necessary to meet any requirements of an

abatement notice served by the local authority under the statutory nuisance provisions in Part 111 of the Environmental Protection Act provided that such notice is not caused by a failure of Wessex Water to operate the existing plant, equipment and processes in accordance with good operational practice.

REASON: To enable the development to reasonably co-exist in proximity to the waste water treatment works, in accordance with policy U5 of the West Wiltshire Local Plan

- 31 No work shall commence in respect of the development hereby approved until full details of all off site highway works required as part of the development to be submitted and approved in writing by the Local Planning Authority

REASON: In the interests of highway safety.

- 32 Opening hours for customers to the food store hereby permitted shall be limited to the hours of 0800 – 2200 hours Monday to Saturdays, and 1000 – 1600 hours on Sundays and Bank Holidays.

REASON: in order to safeguard the amenities of the area in which the development is located.

<p><b>Appendices:</b></p>	<p><b>APPENDIX 1- REPORT TO COMMITTEE AT MEETING OF 8.1.2009 AND MINUTES</b></p> <p>This application is brought to Committee because it is a significant departure from the development plan.</p> <p><b>APPLICATION SITE &amp; SURROUNDING AREA</b>  The site is currently occupied by the Countrywide Stores shop to the southern half of the site, with the vacant animal food-stuff buildings to the north of this. These buildings are proposed for demolition. They are a mix of materials, heights, and design, reflecting the existing and previous use of the site. The site slopes gently towards the west. There are currently two vehicular accesses to the site, one off the B3107 at the south of the site, and the other off the one-way A350 system to the north. There is no pedestrian access to the site from the town or surrounding areas.</p> <p>The site is surrounded by a mix of uses, including the railway to the west of the site (beyond which is farm land), further vacant manufacturing buildings to the south, the A350 to the eastern boundary beyond which are offices and residential uses. To the north is a car garage with further employment uses beyond this. The Melksham Sewage Treatment Works lies adjacent to the east of the site, and shares one of the site's accesses.</p> <p><b>PROPOSAL</b>  This is a full application for a new Asda superstore at Countrywide Farmers, Bradford Road, Melksham. The existing buildings would be demolished and a new store erected which would have a gross area of 4,645m<sup>2</sup>, with a net sales area of 2,601m<sup>2</sup>. Of the 2601m<sup>2</sup> net sales floorspace, 1,858m<sup>2</sup> would be for convenience goods and 743m<sup>2</sup> for comparison goods. The building would be located to the southern corner of the site, with its car park and access to the north. The service yard would be to the rear of the building, to the southern edge of the site.</p> <p>31  The building would be constructed of white cladding panels with</p>
---------------------------	---

	<p>an aluminium roof. A small detached building would be located to the north-east corner of the store to provide ATM facilities.</p> <p>The application has been supported by the following documents:-</p> <ul style="list-style-type: none"> <li>* A Planning and Retail statement;</li> <li>* A Floor Risk Assessment;</li> <li>* A Design &amp; Access statement;</li> <li>* A Statement of Community Involvement;</li> <li>* A Sustainability Statement;</li> <li>* A Transport Assessment;</li> <li>* A draft Travel Plan;</li> <li>* A S-Paramics Microsimulation Model Testing report; and</li> <li>* An Odour Control report.</li> </ul> <p>In summary, these reports provide justification for the development of the site as a supermarket.</p> <p><b>CONSULTATIONS</b></p> <p><b>Parish/Town Council</b></p> <p>MELKSHAM TOWN COUNCIL state "The Town Council noted that reports were available on the retail justification for the store in the town and what changes could be made to the highway if the application went ahead. The transport report included details on improvements to encourage non car modes of transport, such as enhanced pedestrian and cycle access and public transport enhancements.</p> <p>"Councillors welcomed the additional information but</p> <p>"RESOLVED: To make no changes to their original comments, ie:</p> <p>"The Town Council welcomed this application and felt it showed that Asda had faith in developing in Melksham. However, the Council has concerns relating to access to the site:</p> <p>"1. Vehicle access. This needs to be looked at more closely. The proposed junction is on a very busy road, which already suffers from considerable congestion.</p> <p>"2. If traffic lights are used at the proposed junction these need to be synchronised with others nearby.</p> <p>"3. The proposed pedestrian/cycle. This needs to be looked at more closely. It was felt there is an opportunity to link in with Footpath 22 which crosses the road at the proposed junction point from Bradford Road/Old Broughton Road then across to the railway line on the other side. It was asked whether a footbridge could be used at this point. It was also asked if the possibility of linking an underpass to the site from the current underpass could be used. This would mean that the development was likely to comply with planning Policy SP1 (C) and (D).</p> <p>"4. The need for good public transport links into town, the east side of Melksham and the outlying villages and/or dedicated shop buses.</p> <p>"5. The need for some form of link to the train station.</p> <p>"The Town Council also would ask that any Section 106 Agreement money be used to improve transport links. The Town Council requested that the application be considered by the Planning Committee at WWDC."</p> <p><b>External</b></p> <p>HIGHWAY AUTHORITY state: "I am writing to let you have our final observations on the above application. A considerable amount of discussion has taken place between us and the applicants particularly in terms of the viability of providing good access by public transport and making sure the traffic modelling work is robust. We have serious misgivings about the impact of this development, for the following reasons:</p> <p>"1) Effect on the A350</p>
--	--

	<p>It can be seen by comparing the 2009 base traffic model (ie. predicted traffic without the development) with the 2009 base + development model that the introduction of additional traffic and the signal controlled access into the site have a serious detrimental impact on the functioning of the A350. The Friday PM peak model is of most concern. This shows that southbound journey times would increase and queues back from the new junction would extend across the existing A350/A365 junction, causing issues with the functioning of this junction. The introduction of the signals also has some detriment to northbound traffic, at times the model shows queues extending back from the signals onto the roundabout. This means vehicles on the B3109 would have difficulty getting onto the roundabout, leading to large queues and most likely rat-running on alternative roads</p> <p>"2) Access onto the A350 Policy T8 of the Wiltshire and Swindon Structure Plan states that: "Proposals for new developments should not be accessed directly from the national primary route network outside built-up areas, unless an over-riding need can be demonstrated. Developments should provide appropriate mitigating measures to offset any adverse effects on the transport network arising from traffic generated at both construction and operational. stages." The A350 is a national primary route. Given that the speed limit past the site is derestricted, from a transport perspective the site is not in a built-up area. Therefore the proposal to install a new access off the A350 would not be acceptable in principle under policy T8.</p> <p>"3) Access by sustainable modes of transport Discussions have been held between our public transport section and the applicant's consultant about how the site could be accessed by public transport. Although there are a number of services which pass the site on the A350, putting stops on the A350 is not viable. If there were lay-bys it would be difficult for buses to pullout here and if the buses stopped in the line of traffic it would cause congestion. The possibility of diverting services into the site has been discussed but this could lead to considerable delays for services and existing passengers. A350 southbound buses would have to go right around the roundabout, access the site from a specific bus access off the roundabout and then have to queue with the rest of the traffic leaving the site to turn right onto the A350 again. Northbound buses would use the restricted access and would also have to queue with the rest of the traffic. "In addition to this, although a proposed designated footway and cycleway down the east side of the A350 and pedestrian phases on the signals are proposed, it would not be possible to make this a pleasant route for cyclists or pedestrians to use so would not encourage these modes of transport.</p> <p>"The applicant has been unable to overcome the issues that we have raised in my previous letters to you, therefore our reasons for recommending refusal are as before:</p> <p>"1) The proposal is contrary to Policy T8 of the Wiltshire and Swindon Structure Plan 2016 since the proposed development derives access from the A350 National Primary Route where no overriding need has been demonstrated. Detailed modelling has proved that the development would have a detrimental impact on the function of the A350.</p> <p>"2) The development is poorly sited to encourage access by non-car modes and is therefore contrary to Policy DP3 of the Wiltshire</p>
--	---

and Swindon Structure Plan 2016, and Policy SP3(E) of the West Wiltshire District Plan 1st Alteration. "

LIBRARY & HERITAGE state: "Although no archaeological features are recorded within the Proposed Development Area, the Avon Valley is rich in archaeological material particularly along the gravel terraces which formed a favoured location for earlier settlement and related activity. Neolithic pottery and Bronze Age socketed spearheads have been recorded in the vicinity and to the south of the site, a number of ring ditches indicative of Bronze Age funerary activity have been recorded from aerial photography. Furthermore Romano-British pottery sherds and roof tiles have been found to the west and south east of the site. "Although the site still has potential, given the area will have been disturbed in part by the earlier development on the site it, I advise that an archaeological watching brief is carried out during the initial stages of development to record anything of interest. I recommend that the following condition, as set out in DoE Circular 11/95, is placed on the application to enable a watching brief to take place:

'No development shall take place within the area of the application until the applicant, or

Their agents or successors in title, has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved in writing by the Local Planning Authority.'

COUNTY PLANNING state: "Thank you for consulting Wiltshire County Council as strategic planning authority on additional information received in respect of the outline application for the development of the above site comprising new retail foodstore (4,645 square metres gross floorspace), car parking and landscaping.

"I have now had the opportunity to fully consider the additional information provided by Planning Potential and apologise for the delay in responding. My colleague, Allan Creedy has already provided a response to you on transportation matters (letter of 29 July 2008), which is referred to later in this letter.

"A Supplementary Retail Statement (SRS), dated July 2008, has been submitted to clarify the methodology and assumptions made in the original Planning & Retail Statement (P&RC), December 2007. This mainly relates to the quantitative need for the proposals. The concern expressed in my previous response that a sufficiently robust assessment has not been undertaken still stands. In particular, this is due to the size of the Primary Catchment Area (PCA) that has been identified and used as the basis for the retail analysis. As you will recall at the meeting on 17 June 2008 I raised this as a particular issue with the applicants.

"The PCA is a fundamental part of any retail assessment and provides the key basis for the analysis. The NEMS Household Survey undertaken in May 2006 relates to the whole PCA and I suspect does not allow analysis by smaller areas or zones, which may be why the PCA has not been reconsidered and revised as requested. As such, any conclusions drawn from the information are likely to be flawed. Clearly if a PCA relating to a particular site

	<p>or centre is too large it will not provide a fair representation of local shopping patterns and it will not be possible to robustly assess issues such as trade loss and claw back.</p> <p>"In addition, the Survey itself, undertaken May 2006, may also now be considered a little dated.</p> <p>Since the date of survey a number of extensions to main food stores at Bradford-on-Avon, Chippenham and Trowbridge have been implemented that could have influenced shopping patterns within the PCA as defined.</p> <p>"The additional information in the SRS, particularly Section 2, has sought to address some of the detailed points set out in my letter dated 2 April 2008. The points raised in the SRS are discussed in turn below:</p> <p>"Primary Catchment Area" The additional information provided in support of the defined Primary Catchment Area (PCA) refers to the Competition Commission Report (CCR) 'Market investigation into the supply of groceries in the UK' (April 2008). The Government has not yet fully reported on the findings of this report and neither PPS6 nor the recently published Draft PPS6 refers to the need to consistently apply a 10 minute drive time when defining primary catchment areas. While the application of a 10 minute drive time may be common practice that is accepted in particular circumstances, local variances may apply that justify a smaller or larger area to be defined. In the Melksham context, a smaller primary catchment area can clearly be justified. "It is appreciated that the CCR has considered shopping patterns and store catchment areas. However, it should be recognised that this analysis is general and does not show the wide range of differences that may be apparent in the base data if stores were considered on an individual basis.</p> <p>"As stated in my original letter, the PCA is considered to be unreasonably large for Melksham particularly given its close proximity to the larger higher order centres of Chippenham and Trowbridge as well as the availability of alternative main food shopping destinations located outside of Melksham. The PCA is even showing parts of the urban area of the towns of Bradford-on-Avon, Chippenham and Trowbridge within it. All these towns contain alternative main food shopping destinations that are closer than the proposed new store at Melksham. As is recognized in paragraph 5.40 of the P&amp;RS, the PCA should be defined as that where "future customers should find their shopping trips more convenient than other competing destinations" (emphasis added). As is clearly appreciated within paragraph 5.42 of the P&amp;RS, it would be unsustainable for people to travel further than they have to, to undertake a main food shop.</p> <p>"I am particularly concerned about the reference in paragraph 2.21 of the SRS, which states that there is a compelling argument to increase the PCA for the ASDA store. This implies that the type of store being proposed would be inappropriate in scale to the role and function of Melksham. Paragraph 2.22 also goes on to explain that 20% of the stores trade would be drawn from outside the PCA.</p> <p>"Population Growth Rate</p>
--	---

	<p>"More detailed information would be required to check the population figures and growth rates used in the assessment to determine whether the figures are reasonably consistent with the County Council projections. This has not yet been checked due to the outstanding issue about the size of the PCA, which should be revised for the reasons set out above.</p> <p>"Convenience Expenditure Growth Rates "The growth rates are in line with the most up to date MapInfo Information Brief 07/02, although higher than previous Briefs. The rate used is therefore reasonable in the absence of a more up to date Brief. It is of course possible given the current economic climate that a new Brief for 2008 may indicate a different rate.</p> <p>"Special Forms of Trading" Paragraph 3.28 of the West Wiltshire Retail Study 2007 indicates that non-store sales (i.e. special forms of trading SFT) would be at 4.3% in 2011 even taking into account a weaker-case scenario for internet growth. It would appear that SFT has not been over compensated for contrary to the statement at paragraph 2.39 of the SRS.</p> <p>"Turnover of Existing Stores Efficiency Growth "Paragraph 5.65 of the P&amp;RS only clarifies that a 0.75% productivity growth rate has been applied to the proposed store. Table 3 of the capacity tables provides estimates of store turnovers at 2003 based on the survey information but does not consider the turnover of these stores in 2013 (the design year). No explicit allowance has therefore been made for sales densities of other stores to improve.</p> <p>"Lidl, Melksham" It is acknowledged that the Lidl store is mentioned in paragraph 5.56 of the P&amp;RS with a proposed turnover of £2.9m. It is perhaps disappointing that this information was not included within the original capacity tables found within the Appendix. "New capacity tables have now been provided that incorporates this commitment (Tables 4A, and 4C). However, it is noted that no allowance has been made for Lidl to improve its sale density (i.e. efficiency growth).</p> <p>"ASDA, Chippenham" The appeals relating to a new ASDA store at Chippenham have now been dismissed [Appeal Ref: APP/J3910/A/2062538 (Appeal A) &amp; APP/J3910/A/2062541 (Appeal C) Decision date: 5 August 2008]. The potential implications of the delivery of ASDA's proposals at Chippenham are therefore no longer relevant, although some of the Inspector's conclusions may be of interest.</p> <p>"Trowbridge" There is insufficient information within the Melksham Shopping Survey results in Appendix 4 of the PR&amp;S to substantiate the comment in paragraph 2.51 that "a significant contributing factor to those stores overtrading is trade being drawn from Melksham". The survey results are not broken down into zones and as the catchment area extends outwards to the edge of, and indeed includes parts of the urban area of, Trowbridge it is unclear how much of the overtrading can genuinely be attributed to trade being drawn from Melksham. "Notwithstanding this, it is also important to recognise that Trowbridge is identified as a Strategic Service Centre within the adopted Wiltshire and Swindon Structure Plan 2016 and is one of the Region's Strategically Significant Cities</p>
--	--

	<p>and Towns within the Draft Regional Spatial Strategy. It is therefore expected that Trowbridge draws trade from a wide catchment area and it is of course possible that people undertaking main food shopping trips at Trowbridge are doing this as part of a combined trip with other activities within the Town.</p> <p>"Clawback of Trade"</p> <p>As discussed previously, the retail analysis submitted in support of this application is based on an unreasonably large primary catchment area that does not properly take into account the nearby higher order centres of Chippenham and Trowbridge, which in themselves are sub-regional settlements with significant main food shopping opportunities. The level of expenditure that should be retained within Melksham in order to promote sustainable patterns of growth is therefore likely to be over-estimated and the case for claw-back is not based on sound evidence.</p> <p>"Potential Impact /Linkage"</p> <p>As referred to in paragraph 2.70 of the SRS, it is recognised that impact can be positive as well as negative."However, the analysis undertaken in paragraphs 2.75 to 2.83 is flawed. The Survey only asks people whether they ever combine their main food shopping trip with any other activities in Melksham town centre (Question 7). 102 respondents or 20% said yes, of these just 60% did on either all or most trips. It is possible that a significant proportion of these are already shopping at main food shopping destinations in Melksham Town Centre. In total, 149 respondents do their main food shopping at Sainsbury's, Somerfield and Iceland within Melksham Town Centre (Question 1 ). The reason why they may be combining their main food shopping activity could very well be due to the fact the these stores are located within the town centre and as such encourage linked trips to take place. It is unclear from the survey information to what degree other out of town stores such as the one proposed are able to encourage linked trips with town centres and therefore the likelihood of the proposal having a positive benefit on the town centre. In light of the above, the uplift of £4.1 m could be over-estimated."</p> <p>Although it is appreciated that some improvements are now proposed for pedestrian and cycle access, the route would not be pleasant and so would not encourage these modes of transport. This view is shared by my colleague's transportation comments. The A350 could be perceived as a major barrier between the site and the town centre, and therefore unlikely to encourage linked trips by sustainable means. To reiterate my previous response, the proposal is likely to serve as a standalone shopping destination that is primarily accessed by car and offers little potential to support the vitality and viability of the Town Centre.</p> <p>"Specifically, in terms of the comments at paragraph 2.84 of the SRS, it is perhaps not surprising that Il ASDA and Countrywide's proposals have not been subject to objections from existing retailers in Melksham" due to the recent investigation by the Competition Commission into retailing." In addition, to the above comments, it is noted that the convenience sales floorspace information (Table 3, Appendix 6) has not been reconsidered in light of the County Council monitoring data. This underestimates the level of existing convenience sales floorspace, in particular Tesco and Asda at Trowbridge, and Sainsbury's and Morrisons at Chippenham. Also, insufficient detail is provided within the Table</p>
--	---

	<p>to consider whether the estimated turnovers and national average turnovers are reasonable, particularly for the "other" stores. The sales floorspace information has been used to estimate levels of over and under trading and forms part of the justification for the proposed store.</p> <p>"In conclusion, it is clear that a robust assessment of retail matters has not been carried out by the applicant, not least because the PCA that underpins the retail analysis does not reflect the Melksham context. While further discussion and negotiation with the applicants could continue to work towards addressing the detail within the assessment it is unclear whether an agreed position could be reached. Nevertheless, even if an agreed position could be reached, the issue still remains about the location of the store as set out in my earlier letter.</p> <p>"An objection to the application is therefore still maintained. In particular, the proposal is considered to be contrary to Policies DP1, DP3 and DP6 of the adopted Wiltshire and Swindon Structure Plan 2016 in that it would not achieve a pattern of land of land uses which minimise the need to travel and support increased use of non-car modes of travel. "</p> <p>ENVIRONMENT AGENCY state:          "Thank you for consulting the Environment Agency on the above planning application. We have no objection to the proposed development subject to the following conditions (or similar) being included within any planning permission granted. This is discussed below.          "Flood Risk".</p> <p>Our flood zone outlines were recently updated using more definitive ground level calibration. Consequently, our flood zone 2 outline now follows approximately the 35.10m AOD contour as shown on the submitted drawing 002/8. Therefore, we would support the sequential test logic and the selection of this site for the development as set out in section 5.2 of the Flood Risk Assessment (FRA).</p> <p>"We agree with the proposed surface water attenuate on site up to the 1:100 year climate change event through two below ground attenuation systems, which would address the current onsite surface water flooding issues and lower the pre-development run off rate.</p> <p>"CONDITION: No development approved by this permission shall be commenced until a scheme for the provision and implementation of a surface water run-off limitation, including provisions for pollution prevention where appropriate, has been submitted to and approved in writing by th Local Planning Authority. The scheme shall be implemented in accordance with the approved programme and details.</p> <p>"REASON: To prevent the increased risk of flooding and to prevent pollution of the water environment."</p> <p>NOTE -We also recommend all manhole covers on the surface and foul sewerage systems be identified and preferably colour</p>
--	---

	<p>coded.</p> <p>"CONDITION: Finished floor levels of the development should be set no lower than 35.25m AOD "</p> <p>REASON: To protect the development from flooding "Pollution Control</p> <p>"CONDITION: Any drainage from areas where waste food materials are stored, waste skips or compactors are sited should either be totally contained or directed to the foul sewer."</p> <p>REASON: To prevent pollution of the water environment.</p> <p>"NOTE - We recommend provisions are put in place to prevent any shopping trolleys from being taken outside the perimeter area of the store and its car park .</p> <p>"Contaminated Land"</p> <p>The development overlies a Minor Aquifer as defined by the Environment Agency's Policy and Practice for the Protection of Groundwater (PPPG), but does not lie within any Source Protection Zone, as described in the same PPPG. An Aquifer is a body of rock beneath the surface which stores water.</p> <p>"Activities carried out at this site may have caused contamination of soil, subsoil and groundwater present beneath the site and may present a threat to nearby surface waters, especially as a result of the proposed development.</p> <p>"CONDITION:</p> <p>Prior to the commencement of development approved by this planning permission</p> <p>(or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a scheme to deal with the risks associated with contamination of the site shall be submitted to and approved by the local planning authority. That scheme shall include all of the following elements unless specifically excluded, in writing, by the Local Planning Authority.</p> <p>"1. A desk study identifying:</p> <ul style="list-style-type: none"> <li>- all previous uses</li> <li>- potential contaminants associated with those uses</li> <li>- a conceptual model of the site indicating sources, pathways and receptors</li> <li>- potentially unacceptable risks arising from contamination at the site</li> </ul> <p>2. A site investigation scheme, based on (1) to provide information for an assessment of the risk to all receptors that may be affected, including those off site.</p> <p>3. The results of the site investigation and risk assessment (2) and a method statement based on those results giving full details of the remediation measures required and how they are to be undertaken.</p> <p>4. A verification report on completion of the works set out in (3) confirming the remediation measures that have been undertaken in accordance with the method statement and setting out measures for maintenance, further monitoring and reporting.</p>
--	--

	<p>"Any changes to these agreed elements require the express consent of the local planning authority.</p> <p>"REASON: Although generic remedial options are available to deal with the risks to controlled waters posed by contamination at this site, further details will be required to ensure that risks are appropriately addressed." This practice is considered important so that the site operator/owner, the regulatory authorities and other parties, such as the general public, potential purchasers or investors, can have confidence in the outcome, and any subsequent decisions made about the need for action to deal with any contamination at the site. "We recommend using the following documentation</p> <p>- The risk management framework provided in CLR11 , Model Procedures for the Management of Land Contamination when dealing with land affected by contamination. It provides the technical framework for structured decision- making regarding land contamination. It is available from <a href="http://www.environment-agency.gov.uk">www.environment-agency.gov.uk</a> .- BS 101752001 , Investigation of potentially contaminated sites -Code of Practice as a guide to undertaking the desk study and site investigation scheme.</p> <p>"Pollution Prevention During Construction Safeguards should be implemented during the construction phase to minimise the risks of pollution and detrimental effects to the water interests in and around the site." Such safeguards should cover the use of plant and machinery , oils/chemicals and materials; the use and routing of heavy plant and vehicles; the location and form of work and storage areas and compounds and the control and removal of spoil and wastes.</p> <p>"We recommend referring to our Pollution Prevention Guidelines, which can be found at:  <a href="http://www.environment-agency.gov.uk/business/444251/444731/PQg/38">www.environment-agency.gov.uk/business/444251/444731/PQg/38</a></p> <p>"Storage of Oils, Fuels or Chemicals"</p> <p>CONDITION: Any facilities for the storage of oils, fuels or chemicals shall be sited on imperious bases and surrounded by impervious bund walls. The volume of the bunded compound should be at least equivalent to the capacity of the tank plus 10%. If there is multiple tankage, the compound should be at least equivalent to the capacity of the largest tank, or the combined capacity of interconnected tanks, plus 10%. All filling points, vents, gauges and sight glasses must be located within the bund. The drainage system of the bund shall be sealed with no discharge to any watercourse, land or underground strata. Associated pipework should be located above ground and protected from accidental damage. All filling points and tank overflow pipe outlets should be detailed to discharge downwards into the bund.</p> <p>"REASON: To prevent pollution of the water environment.</p> <p>" Water Efficiency</p> <p>"We strongly recommend water efficiency measures be incorporated into this scheme. It would assist in conserving natural water resources and</p>
--	---

	<p>offer some contingency during times of water shortage. Please note the following condition has been supported in principle by the Planning Inspectorate."</p> <p>CONDITION: No development approved by this permission shall commence until a scheme for water efficiency has been submitted to and approved in writing by the Local Planning Authority. The scheme shall be implemented in accordance with the agreed details.</p> <p>"REASON: In the interests of sustainable development and prudent use of natural resources."</p> <p>NOTE TO APPLICANT: The development should include water efficient appliances, fittings and systems in order to contribute to reduced water demand in the area. These should include, as a minimum, dual-flush toilets, water butts, spray taps and white goods (where installed) with the maximum water efficiency rating. Greywater recycling and rainwater harvesting should be considered " The submitted scheme should consist of a detailed list and description (including capacities, water consumption rates etc. where applicable) of water saving measures to be employed within the development. Further advice can be found at:  - <a href="http://www.environment-agency.gov.uk/">http://www.environment-agency.gov.uk/</a> &gt; Subjects &gt; Water Resources &gt; How We Help To Save Water &gt; Publications &gt; Conserving Water in Buildings; and  - <a href="http://www.savewatersavemoney.co.uk/">http://www.savewatersavemoney.co.uk/</a>." A scheme of water efficiency should be submitted in accordance with the information supplied on the website.</p> <p>"Sustainable Construction"  We strongly recommend that the proposed development includes sustainable design and construction measures, which comply with the Code for Sustainable Homes. The development should aim to achieve the highest number of stars possible, preferably six. For detailed advice on how to comply with the Code please visit: <a href="http://www.planningportal.gov.uk/uploads/code%20for%20sustainable%20homes.pdf">http://www.planningportal.gov.uk/uploads/code for sust homes.pdf</a>. It includes sections on energy and water efficiency and will soon be compulsory for all housing. "In a sustainable building minimal natural resources and renewables are used during construction, and the efficient use of energy is achieved during subsequent use. This reduces greenhouse gas emissions and helps to limit and adapt to climate change. Running costs of the building can also be significantly reduced."</p> <p>WESSEX WATER state:  "Our discussions focused on when the planning application is to be determined and on Wessex Water's view as to the desirability of dealing with odour mitigation measures by way of planning condition."  To confirm our position:-  "1) Wessex Water is currently assessing the outputs from an odour survey carried out by Entec.    "2) This process will involve an appraisal of what mitigation measures might be necessary to allow Wessex Water to withdraw its objection to the above planning application together with the preparation of outline designs and reporting on the matter to</p>
--	---

	<p>internal approvals teams.</p> <p>"3) This process is likely to take another 6-8 weeks.</p> <p>"4) At this stage Wessex Water is not in a position to say with any certainty what works might be required or even if mitigation measures will satisfactorily remove the risk of odour issues at the proposed Asda store.</p> <p>"5) Given the above we are not in a position to agree to the imposition of a planning condition as being an appropriate way forward in this matter let alone what the wording of any such condition might be.</p> <p>"6) Our preference is that planning permission should not be granted unless and until an agreement is entered into between the developer and Wessex Water for the funding and carrying out of mitigation measures to an agreed design.</p> <p>"7) As indicated above we are some way from this position.</p> <p>"8) In our opinion potential odour issues should have been the subject of discussions between the developer and Wessex Water well in advance of the submission of the planning application.</p> <p>"9) In view of the above Wessex Water maintains its objection to the planning application."</p> <p>WILTSHIRE WILDLIFE TRUST state: "The Trust has no objection to this application, and has the following comments:          "Protected Species. Clearance of vegetation and felling of trees may impact on roosting bats and breeding birds.          "Bats. All bats are protected under the Wildlife and Countryside Act 1981 (as amended) and under the Conservation (Natural Habitats &amp; c) Regulations 1994." A condition of any planning permission should be to ensure protection of any bats on site.          "Breeding Birds. A condition of any planning permission should be protecting breeding birds.          "Measures to Enhance Biodiversity. The Trust is pleased to see that native species of local provenance are proposed for landscaping on the site. Measures to Increase Sustainability. The developer should use an energy supplier that is 100% renewable energy-based. A green roof would be a further measure, with wide positive sustainability impact."</p> <p>NATURAL ENGLAND state: "The information forwarded to Natural England is of no use to determine whether or not the development will have an adverse effect on any protected species. Therefore, Natural England's initial objection still stands. However, if a wildlife survey is submitted then Natural England will be happy to make comment."</p> <p>REGIONAL DEVELOPMENT AGENCY has not responded.</p> <p>NETWORK RAIL state: "Thank you for your letter and enclosures dated 28 December 2007, together with the opportunity to comment on this proposal. Below are some standard guidelines that should be considered with any application on or adjacent to</p>
--	---

	<p>railway owned land or infrastructure.</p> <p><b>DRAINAGE.</b>  “Additional or increased flows of surface water should not be discharged onto Network Rail land or into Network Rail’s culverts or drains. In the interest of the long-term stability of the railway, it is recommended that soakaways should not be constructed within 10 metres of Network Rail’s boundary.”</p> <p><b>SAFETY.</b>  “No work should be carried out on the development site that may endanger the safe operation of the railway or the stability of Network Rail’s structures and adjoining land. In particular, the demolition of buildings or other structures must be carried out in accordance with an agreed method statement. Care must be taken to ensure that no debris or other materials can fall onto Network Rail land.....”</p> <p><b>GROUND LEVELS.</b>  “The developers should be made aware that Network Rail needs to be consulted on any alterations to ground levels. No excavations should be carried out near railway embankments, retaining walls or bridges.”</p> <p><b>SITE LAYOUT.</b>  “It is recommended that all buildings be situated at least 2 metres from the boundary fence, to allow construction and any future maintenance work to be carried out without involving entry onto Network Rail’s infrastructure. Where trees exist on Network Rail land the design of foundations close to the boundary must take into account the effects of root penetration in accordance with the Building Research Establishment’s guidelines.“</p> <p><b>LANDSCAPING.</b>  “In the interests of safety, all new trees to be planted near Network Rail’s land should be located at a distance of not less than their mature height from the boundary fence.Details of planting schemes should be submitted to this office for prior approval.”</p> <p><b>PLANT, SCAFFOLDING AND CRANES.</b>  “Any scaffold which is to be constructed adjacent to the railway must be erected in such a manner that at not time will any poles or cranes over-sail or fall onto the railway. All plant and scaffolding must be positioned, that in the event of failure, it will notfall onto Network Rail land.”</p> <p>Internal:  <b>PLANNING POLICY state:</b>  <b>"Key Issues:"</b>  The potential proposal site lies on the western edge of Melksham, to the immediate west of both the A350 (Western Way) and River Avon. The proposal site is currently in mixed use with one quarter of the site being retail use and the remainder being in employment use under Use Classes B1 (Offices) and B8 storage. The proposal seeks to redevelop the northern half of the Countrywide Farmers site for retail/ foodstore uses (approx 28,000 sq ft) and</p>
--	--

	<p>associated car parking."</p> <p>The surrounding area is predominantly industrial/employment use in character, with a sewage treatment works, and a car showroom and repair garage immediately adjoining the site. Warehousing and a kitchen manufacturing factory are to the immediate north and a further vehicle repair facility is to the south. Some of these uses have an ancillary retail element. The site is bounded by the Trowbridge – Swindon Rail line. The proposal site, and the other sites surrounding it, is identified within the West Wiltshire Employment Land Assessment as being a key (non-allocated) employment site within Melksham.</p> <p>"The site is physically distant from Melksham Town Centre – 310 metres to the nearest point of the town centre commercial area boundary (as the crow flies) and 550 metres walking distance to the nearest point of the town centre commercial area boundary. The site is 625 metres distant (centroid to centroid – as the crow flies) from the heart of the commercial area boundary (Primary Retail Frontage), or 940 metres walking distance. The site is physically separated from the town centre and adjoining residential areas by the A350 and the River Avon. Based upon this information the site can be described as being out of centre (in terms of distance from town centre primary retail frontages) and potentially out of town due to it being physically separated from both the town centre and urban residential areas (as per PPS6).</p> <p>"Retail Need Government policy is set out within PPS6, paragraphs 2.28 - 2.31 discuss site selection and analysis within the development control context. Our own retail planning Policy SP3 addresses the issue of out of centre shopping along similar criteria – namely, need, sequential approach (to site selection), harm to town centre vitality and viability and site accessibility."</p> <p>The applicant has produced both a quantitative and qualitative needs assessment. The quantitative needs analysis is based upon a 500 household telephone survey within a 10 minute (drive time) catchment area. The applicant's assessment challenges the detail of the District Council's own district wide retail needs assessment. Whilst the District Council's assessment states that there is no further quantitative need for additional foodstore provision within the town, the applicant's contrary position is that there is a need. Their conclusion is based on the assumption that their survey methods are more specific to the town, rather than being district wide. I recommend that the District Council takes further advice on the validity and robustness of the applicant's assessment methodology."</p> <p>I note that the applicant's methodology does not take into account the implications of either recent retail commitments, or the potential impact (upon need) of current applications. Clearly, were the District Council minded to allow current proposals in Trowbridge Town Centre and in Melksham itself (Lidl), there would be an impact upon the need for further floorspace – as calculated by the applicant."</p> <p>The applicant also claims that the provision of (their) additional foodstore floorspace will make a positive contribution in terms of 'clawing back' customer seepage into the town - namely, bringing back resident customers (and indeed non-residents), who currently shop elsewhere. This is a mistaken assumption. Claw</p>
--	--

	<p>back can be a consideration in the determination of retail proposals. However, it can only be justified in locations where the existing foodstore retail offer is limited. That is not the case in Melksham. In qualitative terms, the proposal is for an ASDA store; Melksham already has a Sainsbury, Somerfield and Aldi stores, which provide a wide selection of comparison retail offer for the town. It is difficult to see how an ASDA will provide a qualitative improvement or substantially increase the range of offer."</p> <p>The applicant has produced a sequential approach study to justify their site selection. The site analysis included within their study is at not very detailed and in a number of areas superficial. I recommend that we seek further advice on the robustness and validity of this part of their supporting information."</p> <p><b>Town Centre Impacts</b></p> <p>The potential negative impact of the proposal upon the existing town environment is of great concern. PPS6 states that even where a need for a new retail use can be demonstrated there will still be an impact upon the town centre. PPS6 continues by explaining how positive impacts will be achieved if the proposal is either within or well related to the town centre. This is clearly not the case with the proposal site, which is both distant and remote. It is extremely unclear how a distant and remote site such as this will provide a positive benefit to the town centre as the links between the two are non-existent. Whilst the applicant has suggested the introduction of improved accessibility arrangements, these elements of the proposal are geographically limited to the site and it's immediate surroundings. It remains unclear how the site will connect, access and function with the town centre. The primary concern is that the proposal will be predominantly reliant upon the private car for access at the exclusion of trips to the town centre itself. As the proposal include a comparison, in addition to foodstore, element there is significant scope of an extremely negative impact upon Melksham town centre.</p> <p><b>Accessibility</b></p> <p>"Current safe pedestrian and cycle links between the site, the town centre and Melksham's residential area are non-existent. Public transport links are limited to bus stops on the busy A350. Whilst the site is highly accessible for employment purposes, particularly for goods traffic, it significantly less accessible to prospective shoppers, who will rely upon the private car to access the site - such access arrangements are unlikely to encourage shared trips to this prospective store and the town centre."</p> <p>The applicant has not demonstrated how access can be sustainably improved.</p> <p>"The Highway Authority has expressed great concern about this application in terms of it being able to provide viable access improvements from the A350 onto the site. Current highway access is for a much smaller store and employment uses, which will not have sufficient capacity to accommodate a proposal of this nature."</p> <p>"Given the likely reliance upon the private car to travel to this remote site there are also access associated sustainability issues.</p>
--	--

	<p><b>"Loss of Employment Land/ Floorspace</b>  Whilst part of the site (approximately one quarter) has a certificate of lawfulness permitting the current ancillary retail uses, the proposal seeks to expand retail activities across the whole of the northern site. The resultant retail use being entirely free standing. The applicant has failed to provide any justification for the loss of the remaining employment land."</p> <p>The applicant notes the contents of the District Employment Land Assessment and concludes that there is sufficient employment land provision. This is curious as the Employment Land Assessment states a conservative need for at least another 50 ha of new employment land over the Core Strategy period (until 2026) over and above current provision. The assessment also notes the negative impacts of the trend of employment land lost to other uses, and that such land lost to other uses has to be made good by new allocations elsewhere." Whilst the proposed use will generate new jobs this point is overplayed. Many of the new jobs will be part time. Most will be poorly paid service sector jobs. This is unlikely to positively contribute to the district's economy, or employment market."</p> <p>The applicant has not considered or tested other/ alternative employment uses on the site. I expected an analysis of the site and demonstration of its fit-for-purpose status as employment land. Such an analysis should include details of how the site was marketed for employment uses – successfully or otherwise." Employment sites such as this, located on the edge of settlements, provide a valuable contribution towards the urban employment offer. If redeveloped for small scale employment uses/ business start ups, such sites provide a sustainable alternative to more remote/ rural sites – namely, where such uses are currently pushed out to.</p> <p><b>Sewage Treatment Works</b>  The sites proximity to a sewage treatment works is a major concern. Wessex Water the works operators have expressed this concern and stated that it will be impossible to mitigate the impact of the treatment works upon the proposed foodstore. Given the Foodstore use will include food sale and preparation (items not currently for sale on the site) the potential nuisance impact of the treatment works is likely to be considerable.  "I note the contents of the applicant's odour study. The statement that there have been no odour complaints pertaining to the proposal is understandable given it's current status as an employment site, with limited retail provision. It can be assumed (using the applicant's logic) that the proposed intensification of public uses upon the site would in reality raise the potential for future odour complaints rather than lower them.</p> <p><b>Flood Risk</b>  Although the proposal site does not sit within the current functional flood plain it does lie within Flood Zone 2. Land to the immediate south of the site, south of the Western Way Bridge (over the River Avon) is subject to one in five year flood events. Current guidance, under PPS25 identifies retail uses as falling within the less vulnerable category and acceptable within all but functional flood plain. Given current guidance, the EA's advice is not to provide a refusing objection. However, given the increasing sensitivity of flood risk to new development a FRA for the proposal is highly advisable.</p>
--	--

	<p>"Conclusions: The proposal is not acceptable in principle. The District Retail Needs Assessment states that there is neither a quantitative or qualitative need for further comparison retailing within Melksham. Given the applicant's challenge to our study, I recommend that we take further advice on their methodology, assumptions and conclusions. Nevertheless, there are genuine concerns that the proposal will have a significant negative impact upon the town centres continued vitality and viability. The site has poor accessibility, particularly by alternative modes other than the private car. The proposal will result in the loss of existing urban employment land alternative employment uses have not been considered. The site's close proximity to the sewage treatment works and the associated (significant) nuisance is also noted. "Policy Recommendation: Unacceptable in policy terms."</p> <p>ENVIRONMENTAL HEALTH state: "Matters Considered: Odour, flies, birds, noise and light causing loss of amenity. Food Comments: N/A. Licensing Comments: N/A. Safety Comments: N/A. Protection Comments: The site is located next to the Wessex Water sewerage works that serves Melksham and the surrounding villages. Odour. Odour incidents can be expected throughout the year, however, it can be particularly bad during the summer dryer months. The smelliest odour producing processes of the works are located near to the boundary of the proposed development. These processes are:</p> <ul style="list-style-type: none"> <li>- Screw Pump (raw sewage intake, which is open to the atmosphere)</li> <li>- Screening Handling (removes all the paper, sanitary towels and non-sewage solids) washes,grinds, dries and then discharged to an open skip</li> <li>- Grit Rake and Paddle, discharges to an open skip</li> <li>- 2 Primary Tanks and 2 Overflow tanks</li> </ul> <p>Rats. "The distribution chambers are open to the surrounding environment to allow the natural breakdown of the sewage. Thus providing a readily available food source for the rats."</p> <p>Birds The distribution chambers are open to the surrounding environment to allow the natural breakdown of the sewage. Thus providing a readily available food source for birds such as ducks and gulls.</p> <p>Flies "There is the potential for insect complaints to be generated from the sewage works as insects are seen as an integral part of the purification of the sewage. A mixed and diverse micro- and macrofauna is highly desirable for the efficient working of a filter bed."</p> <p>The inconvenience or annoyance resulting from the presence of insects may lead to a statutory nuisance.</p> <p>"Noise and Light The site is currently sufficiently far enough away from residential properties to alleviate any concerns regarding noise and construction nuisance. However, if nuisance arises from the site, Environmental Protection have the</p>
--	---

	<p>capacity to use their primary legislation."</p> <p>Recommendation: Recommend refusal due to the incompatible nature of the proposed use with existing important infrastructure.</p> <p>"Light If you are minded to recommend approval, please reconsult. "Informatives: N/A"</p> <p>REGENERATION OFFICER states: "I am of the view that these [revised information] do not significantly alter the fundamental issues within this application. I would not seek to add to my original comments." These stated: "The Retail Needs Assessment also showed that by 2012 Melksham would have an additional convenience floorspace need of 237-473sqm which is considerably less than the 28,000sqft gross store proposed by ASDA. While ASDA's consultants argue that the DC's assessment is conservative and does not account for factors such as population growth it should be noted that major residential development will be situated to the east of Melksham without a direct road link to the application site and thus the proposed ASDA store would not practically cater for the growing local population it being situated on the opposite side of town. Inevitably should residents of the East of Melksham development wish to visit this store they are more than likely to do so by car which would increase traffic congestion and undermine any sustainability case made by the applicants. "In their critique of the DC's Retail Needs Assessment the applicant claims that the development would attract visitors from beyond the boundaries of the District. Given the relatively isolated nature of the site and its reliance on vehicular access any inflow of expenditure from beyond the District will be inevitably car-based and thus detrimental to traffic flows and congestion. It is also likely to favour park and shop visits with little opportunity to capture economic benefits to Melksham Town Centre.</p> <p>"Access/Transport: With 255 car parking spaces it is apparent that the applicant views car access as the principle means of visiting the site. The site itself being situated on the boundary of the urban area and being isolated from the residential areas by the A350 and adjacent land uses, is effectively "out of town" being beyond the zone that could readily be viewed as "edge of town centre". By virtue of location and emphasis on vehicular access and car parking capacity the development encourages "drive and shop" and therefore limits opportunities for existing retail etc in the town centre to share the economic benefits of this scheme. Moreover, despite the applicant's claims to the contrary, the pedestrian/cycle route proposed does not directly link to the town centre but instead emerges adjacent to the Cooper Tyre plant (not a town centre site) and to the west of the Avon. In addition this route does not link to a major residential area. I would contend that on this basis the proposed development offers no benefits to the economy or regeneration of Melksham Town and could in fact have a deleterious impact on the vitality of the town centre as it pulls trade away from established retailers. Moreover the site is only minimally connected to the town.</p>
--	---

	<p>"The applicant stresses the proximity of the site to Melksham railway station as a positive for access and transport but I would argue that given the very poor service on this line and its connections to towns already well supplied with convenience and comparison retail, it is of no meaningful relevance. The application therefore fails to prove its sustainability in terms of access. "It is worth noting that the applicant's Transport Assessment claims that this development would create a change in customer/visitor behaviour in that it would attract customers who currently use the existing convenience stores in the town centre. Thus by their own admission the applicant admits that this development would take trade from the town centre and thus cannot be regarded as anything other than detrimental to the vitality and viability of Melksham Town Centre."</p> <p>In terms of Regeneration, the only benefit would be aesthetic by replacing the rather "tired" looking Countrywide Store with new architecture (albeit a "clone" of ASDA stores elsewhere and not locally distinctive) and landscaping. However, the proposed site is already a successful retail outlet and as such there is not strong case for the sites "regeneration" as described by the applicant. As described above I am of the view that the negative impact of a convenience store on this site to town centre retail makes the application harmful to town centre regeneration."</p> <p>DRAINAGE ENGINEER has not responded.</p> <p>LANDSCAPING OFFICER has not responded.</p> <p>ECONOMIC DEVELOPMENT has not responded.</p> <p>NOTIFICATIONS Site Notices/Visits Date of visit: 09.01.08</p> <p>Neighbours Neighbour notifications have been undertaken. Both the District &amp; County Council have taken the view that the Countrywide site is an out of centre site. As such, any application for a new superstore needs to meet the tests set out in PPS6, which also clearly puts the onus on the applicant to demonstrate:</p> <p>"a) the need for the development;</p>
--	---

	<p>b) that the development is of an appropriate scale;  c) that there are no more central sites for the development;  d) that there are no unacceptable impacts on existing centres; and  e) that locations are accessible." (Para 3.4) These requirements are reiterated in Adopted Development Plan Policy (SP3 Out of Centre Shopping) in the West Wiltshire District Plan - 1st Alteration 2004.</p> <p>The application was supported with a "Planning &amp; Retail Statement" (12/07) and then during the processing of the application with a further "Supplementary Retail Statement" (dated July 2008). This additional report was submitted in order to clarify the methodology and assumptions used for justifying the need for this type of store at this particular site.</p> <p>The Local Planning Authority has been consistent in its advice to the applicant and their agents. Even at the pre-application discussions for the proposed store, the applicant has been advised that the proposal could not satisfy all the requirements in PPS6 and SP3. Despite this advice, an application was submitted. However, even with the supporting retail document the proposal raises a number of fundamental retail concerns that cannot be addressed. The very location of the proposal means that the site has very limited potential "to encourage access by sustainable modes of transport". The A350 effectively separates the site from the town. Despite the proposed public transport and pedestrian linkage measures, the physical separation of the site from the town by a very busy road will be highly unlikely to encourage shared trips to the proposed store and town centre. Indeed the physical attributes of the site is unlikely to result in sustainable usage, necessitating single trip private car usage to the site which is contrary to PSP6 and PPG13, Development Plan policy, and sustainability aims. This forms a robust reason for refusal.</p> <p>Both the County and the Local Planning Authority have questioned the applicant's retail justification for the store. Neither authority can support the proposal in terms of its negative impact on Melksham's vitality and viability. In particular, the impact of the store on the town centre is of great concern, as the very location of the store means that linkages between the two area virtually non-existent, and it is unclear how the site will connect, access and function with the town centre. The evidence provided by the applicant is, therefore, insufficiently robust, and would create a standalone store that would harm the vitality and viability of Melksham town centre. In addition the West Wilts Retail Needs Survey (April 2007) indicates that there is little need within the short term for future retail development at Melksham. This forms a further robust reason for refusal.</p> <p><b>Highways Issues</b></p> <p>During the processing of the application, a considerable amount of discussion and negotiation has occurred to address the fundamental highways concerns this proposal raises. The Highway Authority have "serious misgivings about the impact of this development", for three main reasons:</p> <ul style="list-style-type: none"> <li>- the effect on the A350 and surrounded road network;</li> <li>- the access onto the A350; and</li> <li>- access by sustainable modes of transport.</li> </ul> <p>Despite the provisions of a Transport Assessment and modelling, the Highway Authority are fundamentally concerned that the new store would create serious congestion problems on the A350, which would extend onto the neighbouring network, particularly</p>
--	---

the A350/A365 junction. Even with the introduction of signals, the proposal would still result in queuing onto the surrounding network, impeding the functioning of the roundabout, and leading to large queues and rat-running on alternative roads. In addition, the A350 is a national primary route, whereby an access off it is contrary to Policy T8 of the Wiltshire & Swindon Structure Plan 2016. As a result, the proposal cannot be supported on highway safety grounds.

Numerous discussions have also been held with the Highway Authority to discuss how the site could be accessed by public transport. The applicant has proposed a lay-by bus-stop off the A350, but the Highway Authority have raised objection to this as it could further add to the congestion proposals caused by the scheme. Diverting existing services into the site is also not supported due to the possible delays for services and existing passengers, and for adding to the congestion onto the A350. In addition to the bus services, the Highway Authority also object to the proposed footway and cycleway, which are considered to be an unpleasant route for these uses which would not be conducive to its use. The applicant has not been able to overcome these issues, so refusal is also recommended on sustainable access grounds.

#### Melksham Sewage Treatment Works

Policy U5 of the West Wiltshire District Plan - 1st Alteration 2004 states that "Proposals for housing or other development which is sensitive to odour pollution will not be permitted within the sewage treatment works buffer zones, as defined on the Proposals Map, where the proposed development cannot reasonably co-exist in proximity to a sewage treatment works." The whole site lies within this odour-sensitive area, and has raised objections from both Wessex Water and the Council's Environment Health Section. Although extensive negotiations have occurred with Wessex Water to address this matter, to date no agreement or satisfactory solution has been arrived at to overcome the problems of odour nuisance. In addition to the odour nuisance, Environmental Health have also raised objection to the other pests and vermin that the works generate, such as rats, birds and flies. It is considered that all of these are likely to create a statutory nuisance problem for the store and its users. The proposal is, therefore, considered contrary to Policy U5.

#### Loss of Employment Floorspace

Policy C5 is concerned with the loss of existing employment floorspace. Approximately part of the site has a Certificate of Lawfulness permitting retail uses, but the site extends into the industrial area to the north of the existing store. The Planning Policy Section raise concern over the loss of the employment uses on the site. Although the applicant argues that the proposed use will generate new jobs, many of these will be part time, poorly paid service sector ones, which are considered unlikely to positively contribute towards the district's economy or employment market. The applicant has also not tested whether other and/or alternative uses are appropriate for the site. In such a location, the site currently provides a valuable contribution towards urban employment, particularly in respect of the need to find at least another 50 hectares of new employment land over the Core Strategy period (until 2026). The proposal is, therefore,

	<p>considered contrary to Policy E5, and this forms a further reason for refusal.</p> <p><b>Water Environment</b>  The site lies just outside the 100 year flood plain, and the area and road network does experience flooding most years. The Environment Agency have raised no objection to the proposed development, subject to conditions concerning flood risk, pollution control, contaminated land, storage of chemicals, water efficiency, and sustainable construction. It is not felt that with this expert opinion that an objection on flooding grounds could be substantiated.</p> <p><b>Protected Species</b>  Both the Wiltshire Wildlife Trust and Natural England have been consulted on the application. Although Natural England have objected to the proposal, the Trust have no objection subject to conditions concerning the protection of protected species, and breeding birds, plus measures to enhance biodiversity and sustainability. In view of the current built-up nature of the site, it is felt that the conditions suggested by the Trust would be acceptable.</p> <p><b>Railway</b>  The northwestern boundary of the site is delineated by the railway line. Network Rail have been consulted and have suggested a number of conditions to ensure the safety of the railway.</p> <p><b>Design</b>  Policies C31A and SP3 are concerned with the design of a proposed development. The store design is a large white shed, with a first floor. In terms of design, its location within an area characterised by a mix of employment uses and types and styles of building would mean that it is likely to be difficult to substantiate a reason for refusal on design.</p> <p><b>Amenity</b>  In addition to the nuisance issues raised by the proposal's proximity to the Sewage Works, control would also need to be exercised over lighting measures to the store. This would also be achieved by condition.</p> <p><b>Archaeology</b>  The County Archaeologists are aware that the area is rich in archaeological deposits. Although they consider that the site may still have archaeological potential, due to the existing developed nature of the site they are satisfied that an archaeological watching brief is sufficient and that this could be dealt with by condition.</p> <p><b>CONCLUSION</b>  The proposal is considered unacceptable and contrary to Government Guidance and Development Plan policy. It is not felt that these fundamental objections can be overcome by condition, and so the application is recommended for refusal.</p> <p><b>RECOMMENDATION: Refusal</b>  Reason(s):  1 Planning Policy Statement 6, Policy DP3 and DP6 of the</p>
--	---

	<p>Wiltshire &amp; Swindon Structure Plan 2016 and Policy SP3 of the West Wiltshire District Plan - 1st Alteration 2004 states that new out of centre superstores will only be permitted if there is a need for the development, there are no suitable and viable sites within town centre and edge of centre locations, and that the development does not harm the vitality and/or viability of nearby centres. The need for the store has not been satisfactorily justified, and the proposal would harm the vitality and viability of nearby town centres by virtue of it being a stand-alone shopping destination. The proposal is therefore considered contrary to Government Guidance and Development Plan policy.</p> <p>2 Planning Policy Statement 6, Policies DP3 &amp; PPG6 of the Wiltshire &amp; Swindon Structure Plan 2016, and Policy SP3 of the West Wiltshire District Plan - 1st Alteration 2004 state that new out of centre superstores will only be permitted if the development is accessible by a choice of means of transport, including by foot, bicycle, and public transport, and that the development is sited so as to reduce the number and length of car journeys. The location of the proposed superstore is such that it cannot be satisfactorily and safely accessed by noncar modes and is therefore detrimental to highways and public safety, and contrary to development plan policy.</p> <p>3 Policy T8 of the Wiltshire &amp; Swindon Structure Plan 2016 requires new development not to be accessed from the national primary road network, outside built-up areas, unless an overriding need can be demonstrated. No overriding need has been demonstrated, and detailed modelling has proved that the development would have a detrimental impact on the functioning of the A350. The proposal is therefore contrary to development plan policy and highways safety.</p> <p>4 Policy E5 of the West Wiltshire District Plan - 1st Alteration 2004 states that applications involving the loss of existing employment floorspace, including proposals for retail development, will only be permitted whereby there is an adequate supply and mix of genuinely available land and premises elsewhere in the locality for employment uses, where such proposals are compatible with neighbouring land uses, and whereby such proposals do not give rise to, or continue existing traffic problems. The proposal has not satisfactorily demonstrated that the loss of employment premises is acceptable, it is not compatible with the neighbouring sewage treatment works, and it will give rise to traffic problems. The proposal, is therefore, considered contrary to this policy.</p> <p>5 Policy U5 of the West Wiltshire District Plan - 1st Alteration 2004 states that development which is sensitive to odour pollution will not be permitted where the proposed development cannot reasonably co-exist in proximity to a sewage treatment works. The proposal will experience odour, vermin and insect nuisance in particular that cannot be satisfactorily addressed to ensure compatibility with the sewage treatment works. The proposal is, therefore, considered contrary to development plan policy and incompatible with the adjoining sewage treatment works.</p> <p>MINUTES</p>

	<p>Application No.4 – 08/03866/FUL – Country Wide Farmers Ltd, Bradford Road, Melksham.</p> <p>A recorded vote was requested.</p> <p>The following committee members voted in favour of the motion: Cllr Alford, Binding, Bolwell, Burden, Clark, Carbin, Fortescue, Fuller, Griffiths, Halik, James, Jenkins, March, Parks and Phillips OBE.</p> <p>The following committee members voted against the motion: Cllr Martindale and Mounde.</p> <p>There were no abstentions.</p> <p>The vote was won 15 - 2 – 0.</p> <p>Postponement of decision.</p> <p>The Committee was minded to agree to the principle of development subject to referral to the Secretary of State as a Departure from the Development Plan and under the Town &amp; Country Planning (Shopping Development) (No 2) Direction 1993.</p> <p>Officers who had advised planning refusal on five grounds were instructed to bring back a report to a future meeting of the Planning Committee ideally prior to the end of February to include material considerations that would justify the granting of permission contrary to the Development Plan together with proposed conditions and agreed planning obligations under S106.</p> <p><b>REPORT TO COMMITTEE AT MEETING OF 26.2.2009 AND MINUTES</b></p> <p><b>Background</b></p> <p>The application as set out in the officer's report and addendum note (Appendix 1), which was recommended for refusal by officers, was considered by members at the meeting of the committee, which met on the 8 January 2009 .</p> <p>Members considered the officer's report and addendum, plus late representations and the applicants/agents representations and comments of various visiting members at the meeting. After consideration, it was not considered appropriate by members to refuse the application and officers were instructed to bring a report back to committee detailing the appropriate planning conditions and s.106 heads of terms for full consideration at a future meeting.</p> <p>Members noted that in light of their stance in respect of the application, it would then need to be considered as a departure from the adopted Development Plan and would, as advised by officers, also need referral under the Town and Country Planning No.2 Shopping Direction Regulations 1993. Therefore officers were also instructed to consider suitable wording to explain why this application was to be allowed, as it was contrary to the Development Plan, and to clarify those matters when the application was reported back to members. Officers' advice is that it is important that these procedures are followed to minimise the risk of a judicial challenge.</p> <p>Since the meeting, officers have discussed the s.106 heads of</p>
--	---

terms and condition matters with the applicants/agents and the key outcomes are firstly summarised with the list of conditions appended to this report as recommended by officers. The applicants and their agents have suggested a list of appropriate planning conditions (Appendix 2). Whilst it is appropriate for the Local Planning Authority to take those into account, it is important for the LPA to recommend an appropriate set of conditions for such a major development which, amongst other things, protect the town centre and the amenities of the nearest residents. It should, if granting permission, also safeguard as far as possible, the safe and free flow of traffic on the adjoining highway, and other routes to the town centre as well as pedestrian and cycling movements within and to and from the site.

#### Planning Conditions Guidance

All Local Planning Authorities are guided by current circular guidance, in this case circular 11/95, which requires that any conditions are relevant necessary etc; (see Appendix 3) and officers are fully aware of this. To conclude, in the view of the officers, the recommended conditions are considered reasonable and appropriate and balance the needs of the community, together with the operational needs and potential impact of the proposed retail development and also safeguard the Council's position.

#### Referral Issues

The applicant's agents have asked the LPA to justify the Council's position in respect of the departure from the development plan and shopping direction. Their letter dated 19 January 2009 is appended for members' information (Appendix 4). To support the Council's position officers have carried out the appropriate research, but have also asked for counsel's opinion for the avoidance of doubt. Members are advised that the counsel's report fully supports the Council's stance in that if members are minded to resolve to grant permission, the application should follow both the departure and shopping referral procedures.

#### Shopping Departure Matter

Officers have carried out a survey of the current shopping floor space capacity within the 10 mile radius of the application site as required under the current criteria set out in shopping direction No.2 1993 (Appendix 5). The threshold of 20,000m<sup>2</sup> has been exceeded substantially, to the effect that, taking into account other retail developments and a number of extant and implemented planning permissions within Melksham Town, Trowbridge, the Bath retail development, and Chippenham (ie. excluding Bradford on Avon and Calne), total potential additions amount to a net increase of approximately 60,000m<sup>2</sup>. Prior to counsel's opinion being sought, officer's view is that there is no doubt that a shopping referral is the appropriate procedure to follow if members decide to move to formally approve and agree the suggested planning conditions and s.106 heads of terms now to be presented.

#### Departure from the Development Plan

Procedurally, the Town and Country Planning (Development Plans and Consultation) Departures Directions 1999 and Article 17 of the GPDO 1995 and subsequently the Planning and Compulsory Purchase Act 2004, require local authorities to notify the Secretary of State of applications for approval which are major

	<p>departures from the Development Plan, subject to specific criteria (Appendix 6).</p> <p>The LPA is relying upon the departure criteria which are concerned with the scale, nature or location of the land, which would significantly prejudice the implementation of the development plan's policies and proposals. Officers' view is that the provisions of a development plan constitute a material consideration in determining that application in so far as they are material to that application. If members agree with that view then following the formal referral, the Secretary of State has 21 days to decide whether to call the application in or not for his own determination or he may issue a holding direction.</p> <p>The application site is situated out of the Melksham Town Centre, but within the town policy limits as shown on the proposal map. This is accepted by the applicant's agents in their supplementary statement para 2.15 (Appendix 7). The site is located within a mixed use site which is predominantly employment with an ancillary retail store. In effect 75% of the site is in B1 office and B8 storage use. The current store (2500m2) has the benefit of A1 retail through an established use certificate for a retail purposes and currently has 40 car parking spaces. The site is currently accessed in vehicular terms at two points from the adjoining highway. The proposed highway proposals would involve modification of the current site access junction to an all movement arrangement and a signalised junction at the A350/A365 Road junction. This would facilitate closure of the current roundabout access. Therefore any highway conditions required by the WCC highway authority will take into account these modifications. The proposed highway modifications are shown on the applicant's highway agents latest plan No. 0697/41 for members' information (Appendix 8).</p> <p>Comments upon the applicants position on referral A great deal of comment has been made by Asda's agents about the status of the application site. In response officers have set out their views as follows: The application site is within Town Policy limits, but is outside the main urban area and defined commercial boundary and also the Primary retail frontage of Melksham Town Centre. It is separated from the main urban area of Melksham by the A350.</p> <p>West Wiltshire District Council / Planning / 26 February 2009 The site is not a designated retail site. The current A1 established use (Country Wide Farmers ) at 2,500 m2, is an ancillary retail use, as the whole site also comprises B1 office and storage (5,100m2).</p> <p>Town and County Planning Act S.106 Matters Officers have fully considered the applicant/agents proposed type and level of s.106 contributions which relates to: * Sustainable transport measures specifically a £500k contribution based upon £100k per annum towards bus transport to Melksham Town Centre from the application site. * Funding and implementation of off site highway works including the signalised junction modifications, which have been budgeted by the applicants at £600k.</p>
--	---

	<p>Following consultations with the WCC highway authority, officers' view is that the first contribution should be made in full upon commencement of works and for sustainable transport measures to maximise flexibility and to allow consideration for improved pedestrian/cycle links from the site to the town centre. This approach also minimises the risk of potential repayment of contributions in the event of bus route failure.</p> <p>Secondly WCC highways have requested that the applicants carry out all off-site works related to this proposal at their own cost, ie. not just based upon an estimated cost (£600k), if members decide to formally approve the application with the attached planning conditions and the s.106 heads of terms.</p> <p><b>Wessex Water matters</b> Wessex Water have concerns about the impact of odour from the sewage works and its close proximity to the proposed food store building. They have suggested both condition and heads of terms for a legal agreement as follows:</p> <p>The development shall not be implemented until:</p> <p>(1) a legal easement has been completed between the freeholder of the site to which the application relates (the Site) and Wessex Water Services Limited (Wessex Water) to permit Wessex Water in perpetuity to continue the passage of odours and flying insects from Wessex Water's Melksham Sewage Treatment Works (STW) over the Site at current levels. Current levels to be established by odour and insect number survey during normal operation of the existing plant, equipment and processes at the STW in accordance with good operational practice over a 12 month period and the results recorded by the planning authority.</p> <p>(2) an agreement is completed between Wessex Water and [Asda Stores Limited] (Asda) in which Asda agrees to fund the reasonable costs of Wessex Water in carrying out odour abatement works or flying insect control measures necessary to meet any requirements of an abatement notice served by the local authority under the statutory nuisance provisions in Part 111 of the Environmental Protection Act provided that such notice is not caused by a failure of Wessex Water to operate the existing plant, equipment and processes in accordance with good operational practice.</p> <p><b>Reason:</b> To enable the development to reasonably co-exist in proximity to the waste water treatment works, in accordance with policy U5 of the West Wiltshire Local Plan.</p> <p>Officers therefore are proposing an additional heads of terms for a S.106 agreement relating to the sewage works.</p> <p><b>Planning Conditions</b> The applicants proposed a set of planning conditions (attached), which have been properly Considered within the context of circular 11/95. There are a number of key considerations as follows: Design, parking arrangements, integration of landscaping and subsequent implementation, traffic impact upon the highway network, the off-</p>
--	---

	<p>site highway works, external lighting and the operational affects of this proposed food convenience store with 295 spaces. Other matters which need to be conditioned are; environmental management matters in view of the building's close proximity to the Melksham Sewage Treatment Works, boundary treatment and archaeological matters.</p> <p>The applicants and agents, in discussions with officers since the last committee meeting, have stated that they are seeking 24 hour opening of the food convenience store and unlimited servicing. Your officers' view is that this is against normal planning practice and a restriction upon operating hours is in line with the Council's approach to other proposals within the District. In cases where longer operating hours have been allowed this relates to an existing store and is usually a temporary permission so the impact can be properly assessed by the Local Planning Authority.</p> <p><b>Conclusion</b> The proposed conditions and s.106 heads of terms are set out in this report and it is for members to agree that they are appropriate in terms of mitigating environmental impact if they decide to formally approve subject to the departure and referral procedures outlined by officers.</p> <p><b>Recommendation :</b> To formally reverse the previous officer recommendation for refusal of permission and grant approval subject to the following conditions and s.106 heads of terms and subsequent formal referral to the Secretary of State as this would then constitute a major departure from the Development plan and secondly referred under the Town and Country Planning Shopping Direction No.2 1993.</p> <p>The recommended conditions are attached and in the opinion of officers would if members decide to accept them, ensure the effective operation of the proposed development with adequate safeguards for the amenities of the nearest residents and the safe and free flow of traffic on the adjoining highway and to and from the site.</p> <p><b>JUSTIFICATION FOR RECOMMENDATION:</b> Officers have given the matter full consideration to this issue and also the submissions by Melksham Town Council. It is recommended that the best approach is to justify the proposal its in entirety on the basis that the approval would create further employment opportunities for Melksham area, and is mitigated by the proposed planning conditions, environmental and sustainable transport measures and off-site highway modifications to be carried out at the applicant's cost. On this basis members are prepared to allow this proposal as being an exception to current Government retail guidance set out in PPS6 together with Policy DP3, 6 of the Wiltshire and Swindon Structure plan 2016 and Policy SP3 of the West Wiltshire District Plan 1st alteration 2004. In respect of loss of employment land there would remain employment land opportunities in close proximity to the Town centre and a limited net increase in retail floor space taking into account the existing ancillary retail use which has established use rights. In terms of highway impact, the attached planning conditions together with mitigation measures through the applicant's proposed contributions towards sustainable transport measures and off-site modifications to the adjoining highway,</p>
--	---

	<p>justify an exception to Policy T8 of the Wiltshire and Swindon Structure Plan 2016 and the above mentioned policies and guidance.</p> <p>Finally, subject to a safeguarding condition and a s.106 agreement concerning environmental management of the proposed use in relation to its close proximity to the Melksham Sewage Treatment Works, the proposal would comply with policy U5 of the West</p> <p>Wiltshire District Plan 2004. RECOMMENDATION: The committee having regard to the officers report, the Development plan and other material considerations consider that an exception to Development Plan policy specifically (Retail and Highway) can be made to grant permission for the proposed development subject to legal agreement(s) and a number of safeguarding conditions.</p> <p>Condition(s):</p> <p>1 The development hereby permitted shall begin either before the expiration of three years from the date of this permission.</p> <p>REASON: In accordance with Section 91 of the Town &amp; Country Planning Act 1990 as amended by Section 51 of the Planning &amp; Compulsory Purchase Act 2004.</p> <p>2 The gross external area of the food store hereby permitted shall not exceed 4,700 metres square. The net sales and display area (defined as all areas used for the display and sale of goods, including floor spaces used for checkouts, customer circulation and customer services but excluding entrance/exit lobbies, customer toilets, cafe and Automated Teller Machines (ATMs)) shall not exceed 2,900 metres square, of which not more than 75% of the net sales and display area shall be used for the sale of convenience goods.</p> <p>REASON: In order to protect the vitality and viability of the town centre.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies SP1 and SP3.</p> <p>3 No part of the net sales and display area (defined as all areas used for the display and sale of goods, including floor spaces used for checkouts, customer circulation and customer services but excluding entrance/exit lobbies, customer toilets, cafe and Automated Teller Machines (ATMs)) of the food store hereby permitted shall be given over to any dry cleaning services, key cutting, shoe repair, photographic, or pharmacy services dispensing medicines by prescription or post office counter services.</p> <p>REASON: In order to protect the vitality and viability of the town centre.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 –</p>
--	---

	<p>Policies SP1 and SP3.</p> <p>4 Deliveries and servicing hours for customers to the food store hereby permitted shall be limited to the hours of 0700 – 2300 hours Monday to Saturdays, and 0900 – 1800 hours on Sundays and Bank Holidays.</p> <p>REASON: In order to safeguard the amenities of the area in which the development is located.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C38.</p> <p>5 Whilst in the servicing and delivery yard, any delivery vehicle's engine, including lorry and van engines, shall be switched off during loading and unloading.</p> <p>REASON: in order to safeguard the amenity of the area.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C38.</p> <p>6 The rating level (as defined in British Standard 4142:1997) of noise emitted by all fixed plant, including refrigeration plant, on site shall not exceed 34 dBA between 2300 and 0700 hours or 43 dBA at any other time. The noise levels shall be determined at the nearest noise sensitive properties.</p> <p>REASON: in order to safeguard the amenities of the area in which the development is located.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C38.</p> <p>7 Suitable ventilation and filtration equipment shall be installed to suppress and disperse any fumes and/or smell created from any cooking operations on the premises. Details of the equipment for each phase of the development shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of the development. All equipment shall be installed in accordance with the approved details and in full working order to the satisfaction of the Local Planning Authority prior to the commencement of use of the relevant phase of the development</p> <p>REASON: In order to safeguard the amenities of the area in which the development is located.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C38.</p> <p>8 Prior to the commercial premises being brought into use, a scheme providing for the storage or display of goods, materials, plant, machinery, equipment, waste or other items. Adequate storage of refuse from the commercial properties shall be submitted to and approved by the Local Planning Authority. The</p>
--	--

	<p>scheme shall then be carried out in accordance with the approved details, prior to the commencement of use, and shall be maintained at all times.</p> <p>REASON: In the interests of the appearance of the site and public health and safety.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy SP1, SP3, &amp; C38.</p> <p>9 Prior to the commencement of any development the site shall be subject to:</p> <p>i) Site investigation and risk assessment works for chemical contamination;</p> <p>ii) Works to remediate any chemical contamination identified, that is unacceptable in the context of the approved development and its environmental setting, as identified by the site investigation and risk assessment work;</p> <p>iii) Remediation validation works. The above to be carried out to the satisfaction of the Local Planning Authority. Site investigation works shall be carried out in line with the main procedural requirements of BS 1017:2001 - Investigation of Potentially Contaminated Sites - Code of Practice. Where a requirement for quantitative risk assessment is identified, the assessment works shall be carried out in line with the requirements of the UK Contaminated Land Exposure Assessment (CLEA) guidelines, for assessment of human health risks. Also for ground and surface water risk assessment the Environment Agency R&amp;D Publication 20 "Methodology for the Derivation of Remedial Targets for Soil and Groundwater to Protect Water Resources" protocol shall be utilised.</p> <p>REASON: in the interests of public health and safety.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C37.</p> <p>10 Details of lighting to the site (including measures to minimise sky glow, glare and light trespass) shall be submitted to and approved in writing by the Local Planning Authority before each phase of the development prior to the commencement of the relevant phase of the development. The scheme shall only be carried out in accordance with the approved details.</p> <p>REASON: In the interests of pollution prevention.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C35.</p> <p>11 Any facilities for the storage of oils, fuels or chemicals shall be sited on impervious bases and surrounded by impervious bund walls. The volume of the bunded compound should be at least equivalent to the capacity of the tank plus 10%. If there is multiple tankage, the compound should be at least equivalent to the</p>
--	--

	<p>capacity of the largest tank, or the combined capacity of interconnected tanks, plus 10%; or 25% of the total volume which could be stored at any one time, whichever is the greater. All filling points, vents, gauges and sight glasses must be located within the bund. The drainage system of the bund shall be sealed with no discharge to any watercourse, land or underground strata. Associated pipework should be located above ground where possible, and protected from accidental damage. All filling points and tank overflow pipe outlets should be detailed to discharge downwards into the bund. Full details shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of development. The scheme shall only be carried out in accordance with the approved details.</p> <p>REASON: To minimise the risk of pollution of the water environment.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U4.</p> <p>12 All surface water drainage from impermeable parking areas and hardstandings for vehicles, commercial lorry parks and petrol stations shall be passed through an oil interceptor designed and constructed to have a capacity and details compatible with the site being drained. Roof water shall not pass through the interceptor.</p> <p>REASON: To minimise the risk of pollution of the water environment.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U4.</p> <p>13 The development hereby permitted shall not be commenced until surface water drainage works have been carried out and completed in accordance with details to be submitted to and approved in writing by the Local Planning Authority. Such a scheme shall utilise Sustainable Drainage Principles and shall not result in an increase in the rate and / or volume of surface water discharge to the local land drainage system. The works shall be undertaken in accordance with the approved details.</p> <p>REASON: To ensure that the development can be adequately drained.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U2</p> <p>14 The development hereby permitted shall not be commenced until the following details, based on a 1 in 100 year flood flow design standard, have been submitted to and approved by the Local Planning Authority:</p> <ul style="list-style-type: none"> <li>i) A scheme for the alleviation of flooding.</li> <li>ii) A detailed programme of proposed drainage works.</li> <li>iii) The method of accommodating the spring/pond/watercourses) on the site. Subsequently the works shall be completed in accordance with the approved details, including any timescale attached thereto.</li> </ul>
--	---

	<p>REASON: In the interests of flood prevention.</p> <p>15 Contaminated water shall not be discharged to any stream, watercourse or underground strata, whether direct or via soakaways.</p> <p>REASON: To minimise the risk of pollution of the water environment.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy U4.</p> <p>16 Detailed plans of the parking and servicing areas, together with the means of access thereto, shall be submitted to and approved by the Local Planning Authority for each phase of the development before development commences for each phase on the relevant phase of the development. The detailed proposals shall indicate the provision to be made for the draining of the parking and servicing areas, the individual marking of car parking spaces, the landscaping of the parking and servicing areas where appropriate, and full details of the method of construction. All works referred to in this condition shall be completed, and the parking and servicing areas shall be available for use before the premises are occupied.</p> <p>REASON: To ensure that an adequate area for parking and/or servicing is available in the interests of highway safety.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy T10</p> <p>17 No part of the development hereby permitted shall take place until construction stage plans have been submitted to and approved in writing by the Local Planning Authority. The plans will need to agree the routing and timing of construction traffic, together with identifying the need for any temporary traffic orders that may be necessary. These works shall be undertaken in accordance with these approved details.</p> <p>REASON: in the interests of highway safety.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policies H4 and SP3.</p> <p>18 Before any phase of the development is occupied, the access roads and car parking areas shall be surfaced in accordance with details for that phase of the development, which shall have been submitted to and approved in writing by the Local Planning Authority and shall be maintained as such thereafter.</p> <p>REASON: In the interests of highway safety.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy T10.</p> <p>19 A Travel Plan shall be submitted to and approved by the Local Planning Authority prior to the commencement of the retail phase of the development. The Travel Plan shall include measures to</p>
--	--

	<p>minimise vehicle movements to the foodstore and a timetable for implementation, and shall be implemented in accordance with the approved scheme.</p> <p>REASON: In pursuit of sustainable transport objectives.</p> <p>20 Landscaping schemes for the application site, including a programme for its implementation, shall be submitted to and approved by the Local Planning Authority for each phase of the development prior to the commencement of the relevant phase of the development. The landscaping schemes shall include provision for landscape planting, the retention and protection of existing trees and other site features, walls, fencing and other means of enclosure and any changes in levels. The approved scheme shall be implemented in accordance with the approved programme, and the landscaping shall be maintained thereafter for a period of not less than five years. Any trees and shrubs which fail within that period shall be replaced to the satisfaction of the Local Planning Authority and maintained for a further period of five years.</p> <p>Upon approval:</p> <ul style="list-style-type: none"> <li>* The approved scheme for each phase of the development shall be fully implemented with new planting carried out in the planting season October to March inclusive, following occupation of the building(s) or the completion of the relevant phase of the development whichever is the sooner, or in accordance with a timetable to be agreed in writing with the Local Planning Authority;</li> <li>* all planting shall be carried out in accordance with British Standards, including regard for plant storage and ground conditions at the time of planting;</li> <li>* the scheme shall be properly maintained for a period of 5 years and any plants (including those retained as part of the scheme) which die, are removed or become damaged or diseased within this period shall be replaced in the next planting season with others of a similar size and the same species, unless the Local Planning Authority gives written consent to any variation; and</li> <li>* the whole scheme shall be subsequently retained.</li> </ul> <p>REASON: In the interests of visual amenity, to ensure that the approved landscaping scheme is carried out at the proper times and to ensure the establishment and maintenance of all trees and plants.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 - Policies C32 and C40.</p> <p>21 No development shall take place on any phase of the development until there has been submitted to and approved in writing by the Local Planning Authority a plan indicating the positions, design, materials and type of boundary treatment to be erected. The boundary</p>
--	--

	<p>treatment shall be completed before the buildings are occupied or in accordance with a timetable agreed in writing with the Local Planning Authority, for each phase of the development. Development shall be carried out in accordance with the approved details.</p> <p>REASON: To ensure the appearance of the development is satisfactory.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 – Policies C17 and C32.</p> <p>22 No development shall take place on any phase of the development until a schedule of the materials and samples of the materials to be used in the construction of the external surfaces of the relevant phase of the development hereby permitted have been submitted to and approved in writing by the Local Planning Authority. Development shall be carried out in accordance with the approved details.</p> <p>REASON: To ensure that the development harmonises with its setting.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 – Policies C17 and C31A.</p> <p>23 Details, including samples where appropriate, of the materials for the surface of all roads, footways and pedestrian areas, cycleways and all other hard surfaced areas for each phase of the development shall be submitted to and approved by the Local Planning Authority prior to the commencement of development, or prior to the commencement of any relevant phase of the development, whichever is appropriate. The development shall be carried out in accordance with approved details.</p> <p>REASON: To ensure that the development harmonises with its setting and provides clearly defined linkages to and from Trowbridge Town Centre.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C31A and Planning Policy Statement Planning Policy Statement 6 - Planning for Town Centres.</p> <p>24 Details of existing and proposed land levels across the site, illustrated by means of spot heights, contours and sections across the site, and demonstrating the relationship between the proposed development and the surrounding land shall be submitted to and approved in writing by the Local Planning Authority. Development shall then only be carried out in accordance with the approved details. There shall be no land raising unless approved under the terms of this condition.</p> <p>REASON: In the interests of proper planning of the area.</p> <p>25 Details of storage areas for wheeled refuse bins for each phase of the site, designed so as to minimise their impact on the appearance of the street scene shall be submitted to and approved in writing by the Local Planning Authority. The approved</p>
--	---

	<p>storage area shall be provided prior to the buildings on the relevant phase of the development being first occupied and shall be maintained as such thereafter.</p> <p>REASON: In the interests of the appearance of the street scene.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C31A.</p> <p>26 No development hereby permitted shall take place until the applicants, or their agents or successors in title, have secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation that has been submitted to and approved by the Local Planning Authority. The works shall be undertaken in accordance with the approved works.</p> <p>REASON: to protect the areas of the site which are of archaeological interest.</p> <p>POLICY: West Wiltshire District Plan - First Alteration 2004 – Policy C15.</p> <p>27 Details of the protection, easement, and / or realignment of any public infrastructure across the site, including water mains and sewers, shall be submitted to and approved in writing by the Local Planning Authority before the commencement of any works on site. The works shall be undertaken in accordance with these approved details.</p> <p>REASON: in order to protect public infrastructure.</p> <p>28 Prior to the commencement of the retail and commercial properties hereby permitted, details of all security measures, including CCTV, shall be submitted to and approved in writing by the Local Planning Authority. The works shall be carried out in accordance with these approved details.</p> <p>REASON: in the interest of public safety.</p> <p>29 Prior to the commencement of development and during the course of the development, the building shall be carefully surveyed to determine whether bats or barn owls are present. If any sign of bats or barn owls is discovered during the development, work shall cease immediately and Natural England shall be consulted further.</p> <p>REASON: In the interests of natural species which have statutory protection.</p> <p>POLICY: West Wiltshire District Plan - 1st Alteration 2004 - Policy C7.</p> <p>30 A legal easement has been completed between the freeholder of the site to which the application relates (the Site) and Wessex Water Services Limited (Wessex Water) to permit Wessex Water in perpetuity to continue the passage of odours and flying insects from Wessex Water's Melksham Sewage Treatment Works (STW) over the Site at current levels. Current levels to be established by odour and</p>

	<p>James Against March For Martindale Abstained Mounde Against Newbury Against Parks Against Phillips OBE For</p> <p>The Planning Committee resolved that: The application be referred to the Secretary of State for Communities and Local Government under the requirements of the Town and Country Planning (Shopping Development) (England and Wales) (No.2) Direction 1993.</p> <p>In the event that the Secretary of State does not call the application in, the Development Control Manager be authorised to grant planning permission with conditions and subject to the completion of a S106 agreement to secure the following: West Wiltshire District Council/Planning/26 February/2009</p> <p>(i) Sustainable transport measures which will include a £500k contribution based upon £100k per annum towards bus transport to Melksham Town Centre from the application site.</p> <p>(ii) Funding and implementation of off site highway works including the signalised junction modifications, which have been budgeted by the applicants at £600k.</p> <p>(iii) An odour mitigation and environment programme in view of the close proximity of the site to the Melksham waste water treatment works.</p> <p>Together with justification and conditions as follows:</p> <p>Justification: Officers have given the matter full consideration to this issue and also the submissions by Melksham Town Council. It is recommended that the best approach is to justify the proposal its in entirety on the basis that the approval would create further employment opportunities for Melksham area, and is mitigated by the proposed planning conditions, environmental and sustainable transport measures and off-site highway modifications to be carried out at the applicant's cost. On this basis members are prepared to allow this proposal as being an exception to current Government retail guidance set out in PPS6 together with Policy DP3, 6 of the Wiltshire and Swindon Structure plan 2016 and Policy SP3 of the West Wiltshire District Plan 1st alteration 2004. In respect of loss of employment land there would remain employment land opportunities in close proximity to the Town centre and a limited net increase in retail floor space taking into account the existing ancillary retail</p>
