Indicative masterplan 19/05898/OUT

Indicative Landscaping plan – 19/05898/OUT

- ① Ornamental bulb planting is proposed at the entrance to the site and within key public open space. A specimen tree of local provenance such as an Oak (*Quercus robur*) for example would create an attractive feature with autumnal variation. Ornamental bulb planting are proposed at the site frontage to create an attractive entrance to the site.
- ② Structural landscape planting softens the edge of the ownership boundary. This will serve to retain the rural character of both Park Lane and Park Road as well as softening proposals from the surrounding landscape. The planting will comprise a mixture of locally present native shrubs and trees which correspond with, where appropriate, the published landscape character assessment.
- ③ Additional native trees to soften the western edge of the proposals. This will create a new subtle transition within the public open space, which will ensure the built form integrates within the local landscape.
- ④ Swathes of bulbs add seasonal interest and improvements to the aesthetic of the surrounding amenity space.
- ⑤ Creation, or enhancement where required, of new native planting to field boundary.
- ⑥ Existing vegetation on field boundaries is to be retained and enhanced with additional planting where there are gaps in boundary vegetation.

- ⑦ Informal pedestrian link between the site and existing open green space such as the adjacent amenity area, White Lion recreation field and outwards to the AONB.
- ⑧ Attenuation basin to feature species-rich wet grassland planting to soften the feature and achieve biodiversity benefits.
- ⑨ Existing land use to be preserved as open grassland and used as amenity green space.

- Site Boundary
- Ownership Boundary
- Vegetation to be Removed
- Retained Trees
- Retained Hedgerow
- Tree Preservation Order - reference "Land off Park Road, Malmesbury, Wiltshire (2012)"

Proposed Vegetation

- Proposed Trees - comprising species of local provenance such as *Quercus robur* and *Ulmus glabra*
- Hedgerow Mix - comprising species of local provenance such as *Prunus spinosa*, *Crataegus monogyna* and *Ulmus procera*
- SuDS Attenuation Basin
- Spring Bulbs
- Shrub Understorey - comprising a mixture of species which are of both local provenance and in line with the published landscape character assessment (where appropriate)
- Feature Tree
