

Wiltshire Fire & Rescue Service

Wiltshire and Swindon Fire Authority

Report for Bradford on Avon Area Board - November 2010

Fires

WFRS attended 4 accidental fires during the months of September and October 2010 including two cooker fires, one with a fault in the fan system, a fire in a microwave and a tumble dryer.

We were also called to 1 deliberate fire over the same period involving 70 tons of hay. WFRS continues to liaise with other agencies to reduce deliberate fire setting.

Injuries

No injuries through any fire related incidents have occurred during this period.

RTC'S

We have attended 2 Road Traffic Collisions within the Boards area. One of these occurred at Lower Westwood and one on the B3107 Forewoods Common, Holt Junction. Bolland's Hill. One injury was reported.

Co-Responder Calls

WFRS have responded to 39 co-responder calls over this period.

Community Safety

Wiltshire Fire & Rescue Service is reminding people about the importance of getting chimneys swept after being called to a chimney fire in October. The recent chilly weather at night has led to many homes having fires lit much earlier in the year than normal - which can be dangerous if the chimney has not been swept since the fire was last used.

The Service's advice is to ensure that chimneys for wood burning fires are swept every three months when in use. If you burn bituminous coal, the chimney should be cleaned at least twice a year, and at least once a year when burning smokeless coal. An annual clean is sufficient for oil and gas fires. Other tips include:

- Have the chimney properly swept – using a vacuum cleaner alone is not sufficient.
- Make sure your fire receives enough air to allow the fuel to burn properly.
- Only burn suitable fuels.
- Do not overload the grate or appliance.
- Maintain your appliance in accordance with the manufacturer's instructions.
- Use a fire or spark guard to prevent accidental fires.
- Inspect your chimney breast, particularly in the roof space. Make sure that it is sound and that the sparks or fumes cannot escape through cracks or broken bricks.
- Make sure you are not at risk from carbon monoxide poisoning by having appliances installed and serviced by competent engineers. Fit a carbon monoxide detector and never block air bricks, vents or flues.
- Extinguish the fire before going to bed or leaving the house.
