Please provide a reference/page no.	Ref 3. Page 8

What is the link between your project and other local priorities? e.g. Priorities set by your area board and parish plans.

The provision of showers will allow Trowbridge Wanderers to play more games on site , enter more leagues as home ground will be FA site criteria, as well as increase training capabilities on the site thus attracting more younger players.

How did you discover there was a need for your project and how will your project benefit your local community?

Important: Please do not type in paragraphs – This section is limited to 1200 characters only (inclusive of spaces)

The problem with the showers has been consistent for the past two seasons, initially the problem was sporadic however, now the system is totally inoperable. The current system is very dated and infringes on health & safety legislation in their current state. Until the showers are replaced the club no longer meet FA site criteria and are compromising Trowbridge Wanderers ability to continue to play at league level. The project will benefit the community by extending the site usage, offering an FA approved standard facility, encourage more young players to the team and set a benchmark facility upon comparison to other facilities in the town.

Any other information about your project.

We strongly believe that this improvement on-site will benefit the community, alongside this project we are planning a program to attract more players of a younger age group. Trowbridge Wanderers currently have 180 under sixteen players from 4 years old upwards. We currently have 16 individual teams in this age range, for both boys and girls and we would like to attract more players by promoting this improvement.

It is proposed that a gas run system is fitted to replace the electric showers which would become more cost effective on utility bills. Electric showers can be left running therefore wasting water whereas the gas system will be fitted with a single push button which is timed at about 3 mins each. Over the course of a year this should provide significant savings.
