<u>Appendix 16 – Planning Application no.20/00379/OUT- Summary of Relevant Planning Application Replies</u>

Planning Application no 20/00379/OUT – Land South of Trowbridge, Wiltshire: Outline planning permission with all matters reserved except access for the erection of up to 180 residential dwellings (Use Class C3); site servicing; laying out of open space and associated planting; creation of new roads; accesses and paths; installation of services; and drainage infrastructure.

Please note that planning application comments may be viewed in full on the Wiltshire Council website using the following link:

Planning Application: 20/00379/OUT (wiltshire.gov.uk)

Use of Land	Flooding
Cllr Vigar report 10/06/22 – Quotes Local	L Hartley 11/06/22 – "During at least 7 months of
resident: "These fields are where we grew up and	the year the fields are sodden and waterlogged in
what I want my children to enjoy"	the majority of the area/fields."
"Valued green space which has been used by	
thousands of local people and others for walking,	
exercise and recreation over many decades."	
S Barkwill 15/06/2022 – "We as a family use	S Barkwill 15/06/2022 "the fields flood
these fields daily, as do so many others. The	regularly
green space is so important for the surrounding	
communityIts also a lovely walk towards the	
farmhouse inn in Southwick"	
Mr D Mizen 15/06/22 – "My wife and I recently	Tracy Allsop 10/06/22 – "Having walked these
moved to the village and one of the aspects of	fields daily for the last 8 yrs, I have noticed that
why we decided to move here was the open	the degree of flooding has increased
spaces available for enjoying and walking and	considerably."
spotting wildlife.	
Having explored the walks around the area, the	
particular walk for us which we frequent takes us	
up to and across the land that is now being	
proposed for development.	
We have spent many walks across that area of	
land enjoying the country air, the abundant	
wildlife and getting to know our new	
surroundings"	
G Whiffen 09/06/2022 "this unofficial recreation	G Whiffen 09/06/2022 – "We have used the fields

area has been in constant use for over half a	in the planning application for in excess of 26
century, dog walkers, leisure walkers, joggers,	years whenever possible except when the lower

sanctuary for this side of Trowbridge where the	Environment Agency has classed as a main river,
Country Park at Southwick is regularly very busy	causing an extensive Flood plain (flood zone 2/3)
already with people."	after heavy rainfall. Fields and neighbouring
	gardens in Blind Lane and fields and roads in
	Brookmead have severely flooded at least 5
	times since the year 2000 and probably many
	years before then. In 2014 flooding was
	experienced in both January and JulyTo utilise
	this floodplain in the past, medieval farmers sited
	ridge and furrow field workings
	here'Groundwater flooding' has been
	mentioned but I understand that this is found
	where the underlying ground formation is of
	chalk. In this area the soil is of heavy clay
	construction. When the surface becomes
	saturated, the underlying clay prevents
	subsequent rail fall or flooding from being
	absorbed and it lays on the surface as fluvial

experienced here, not groundwater floodinga number of photos from local residents have shown substantial fluvial and surface water flooding here, often twice a year and in subsequent yearsIt seems probable, as local residents have subsequent yearsIt seems probable, as local residents have suggested that flooding has occurred here far more frequently than records suggest On the evening of 9th August 2021 Southwick Village suffered surface water flooding in what all agencies agreed was an extreme weather event, when homes, numerous gardens, roads, (including the A361 Frome Road) and sewers flooded and the Chantry Gardens pumping station was at 97% capacity." P Weeks 19/11/21 – "The whole estate relies on this open space for exercise, dog walking etc." Southwick Parish Council 25/02/21 – "the fields proposed for the development flood on a regular basis and are permanently water logged." B Johnson 16/11/21 – "This area is valued for the environmental and recreation benefit, supporting the physical and mental health of residents from such a wide area." North Bradley Parish Council 07/11/21 – "The fields south of Trowbridge are ancient water meadows and are regularly flooded by the Lambrok stream from both the horizontal watercourses that skirt the grounds of Southwick Court house and the vertical watercourse that joins that stream from both the horizontal watercourse sthat skirt the grounds of Southwick Court house and the vertical watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream from both the horizontal watercourse that joins that stream f		flooding or surface water flooding, this is what is

as I walk around them every day in the summer. I	proposed for development floods on a regular
tend to avoid them in winter as they are so	basis. Several times each year it is impossible to
waterlogged, for days after heavy rain there are	access the public footpath across the proposed
large puddles all over the place."	development site from the footbridge at the lower
	end of Spring Meadows. The water can be over
	600mm deep in the field where you step down off
	the footbridge. This is caused by excess water,
	that does not drain through the heavy clay soil on
	the site, flowing to the west side of the proposed
	siteThe Eastern part of the proposed
	development site is regularly covered with 30-
	75mm of surface water"
B Moth 23/03/21 – "heavily used by the local	S Tesler 01/11/21 – "I am amazed to read that
community to exercise and maintain mental	"no groundwater flooding incidents have been
health."	recorded within the vicinity of the proposed
	development"." [pictures of flooding enclosed]
J Bennett 23/03/21 – "you can walk for miles	Cllr G Hill Report sent 01/11/21 - "The photos are
across the fields, hopefully footpaths will have to	genuine and give visual evidence that flood
stay by law."	events not only occur, but do so on a regular
	basisthe combination of fluvial and surface
	water flooding events generally occur a handful of
	times each year."
T Culshaw 23/03/21 – "it is a valuable space	Cllr G Hill 26/10/21 - "Policy H2.6 clearly
that is enjoyed by all members of the community."	defines the need not to exacerbate flooding
	downstream, thereby <mark>confirming the existence of</mark>
	current flooding."
	M Roberts 23/08/21 - "Please find attached two
	images showing flowing water taken on 09
	August 2021 through bungalow window adjacent
	to kissing gate towards eastern boundary of site.
	These clearly show that flooding occurs
	nowImage 09.082021A indicates lying water
	which actually flows from south to north. Image
	09.082021B reveals that water flows from south
	to north along extreme eastern edge of site then
	westerly towards Lambrok Stream."

Cllr C Winterbourne 27/03/21 - "The land is
based on a flood plain fed by a flooding brook at
one end."
49 signatories 12/03/21 - "The fields south of
Trowbridge are ancient water meadows and are
regularly flooded by the Lambrok stream from
both the horizontal watercourse that skirts the
grounds of Southwick Court house, and the
vertical watercourse that joins that stream from
the direction of North Bradley.
Anyone who walks there knows that they are
marshy and water logged throughout the Autumn
and Winter especially at the end of Spring
Meadows"
B Johnson 26/03/21 – "the effects of climate
change have been increasingly apparent in
Southwick. This is an area known as the 'clay
vale' that has always suffered from fluvial and
surface water flooding hence the present [sic] of
numerous medieval and post medieval water
meadows. In recent years prolonged periods of
heavy rainfall have resulted in numerous
instances of flooding in connection with the
Lambrok waterway. No longer just 'more than
once in 30 years' but now several times every
year and the areas of flooding have also
increased."
H Lambert 23/03/21 – "The proximity of the
Lambrok stream frequently make the fields boggy
and waterlogged"
R Williams 23/03/21 – "The fields are a flood
plain that protects the houses of Sandringham
Road and Boundary Walk and Spring Meadows
from water ingress from the Lambrok River. Lots
of surface water collects in this area as the water
table is very high here and the sewers cannot
cope when it rains hard."
 S Pisarewicz 23/03/21 –"The fields south of
Trowbridge are ancient water meadows and are
regularly flooded by the Lambrok stream, I know

this because I walk them regularly in the Summer
when they are firm. I avoid them as they are
marshy and water logged throughout the Autumn
and Winter especially at the end of Spring
Meadows"
Cllr D Vigar 23/03/21 – "The EA notes that this
application includes a Flood Zone 3b (functional
floodplain), which is land defined by the Local
Authority Strategic Flood Risk assessment as
having a high probability of flooding – as this
photograph confirms."
S Wain 23/03/21 – "I know these fields fairly well
as I walk around them every day in the summer. I
tend to avoid them in winter as they are so
waterlogged, for days after heavy rain there are
large puddles all over the place."
Cllr D Vigar Report 10/06/22 – "parts of the site
lie within Flood Zones 2 and 3…The government
inspector who reviewed the WHSAP concluded
that: "The site is subject to several constraints
relating to heritage, drainage and biodiversity…"
"includes areas Flood Zone 2 and Flood Zone
3b (functional floodplain), which is defined by the
Local Authority Strategic Flood Risk Assessment
as having a "high probability of flooding", as well
as areas including Flood Zones. The flooding is
not so much a probability as a fact, as evidenced
by photographs taken by local residentsa
report in April 2021 from JH Groundwater Ltd
stated: "In discussion with WCC, it is understood
that no groundwater flooding incidents have been
recorded within the vicinity of the Proposed
development." This is clearly wrong as all local
residents know"
The 3 planning sites identified in the WHSAP:
"They experience regular flooding."
Mr D Mizen 15/06/22 – "there is flood plain in
the vicinity"
B Johnson 03/05/22 – "evidence of extensive
medieval ridge and furrow earth workings and

post medieval water meadows...In some areas close to the Lambrok Stream evidence of water meadows can still be found today (The Lambrok is now classified as a main river by the Environment Agency). In the Collins dictionary, the definition of a water meadow is given as 'a meadow that remains fertile by being periodically flooded by a stream.' This landscape of open green fields, a meandering waterway and often extensive flood plains that surround the 16th Century Southwick Court Manor House and this proposed development, has probably remained intact and unaltered since medieval times when as part of Southwick Court Farm, these water meadows were established to utilise the 'periodic flooding'. Surely this reinforces the fact that flooding has always been experienced here as in other areas adjacent to the Lambrok waterway and is only likely to increase in the future due to climate change."

B Johnson 07/03/22 – "...whole area...was covered by post medieval water meadows and some medieval ridge and furrow earth workings...does this not suggest (despite the land or more recent evidence of flooding here) that this area was historically considered wet, regularly, often over long periods of time and probably will continue to be so."
