

## Communications Plan Overview

There will be a comprehensive information campaign before any services change, to ensure that residents are aware of the changes and when they will be implemented. This will involve providing information to as many recipients as possible including area boards, schools, community groups, parish councils and, of course, householders. Leaflets, newspaper articles, road shows and much more will be used to get the message to residents. Below is an overview of some of the planned communication activities.

Communication activity	Key aim of communication	Date
<b>Leaflets</b>		
New service 'coming soon' leaflet	To introduce the changes to waste and recycling collection service to all Wiltshire residents.	From 4 July 2011
