The football club needs to modify its floodlights in order to comply with new football league requirements. If the club cannot raise the money to upgrade the light fittings then it will be relegated from the Sydenhams Football League (Wessex). The football club is a community club which regularly attracts spectators of circa 100. The club has a large membership and is run by a dedicated team of circa 15 volunteers. The club has around 45 playing members so in all, this project will benefit at least 160 people on a regular basis. In addition, the club is currently progressing the opportunity of setting up a junior and female section but the financial impact of being relegated to a lower league would limit its ability to do this. The Club also host up to 10 local Salisbury & District Cup Finals each year. Although no ladies teams of their own Salisbury City teams use the pitch each Sunday

Wiltshire Council will be unable to meet the ongoing costs of your project. Please describe, therefore, how you will ensure the financial sustainability of your project beyond the period of this grant (if successful)?

The club currently operates on a sustainable basis but is not profit-making. It therefore has very little capital in reserve but operates on a sustainable basis year on year. The club would not require revenue funding support from the Council after the floodlight modifications have been completed. The modification of the floodlights will help the club remain in its current league which will help maintain levels of interest in the club in the form of paying spectators and contribute towards long-term sustainability.

3 – Additional information to support and strengthen your application e.g consultation, community involvement, energy efficiency measures

Please tell us more about the organisations and groups that are involved in your project, who will benefit from the award and how will you know that it is making a difference.

IMPORTANT: PLEASE DO NOT TYPE IN PARAGRAPHS - THIS SECTION IS LIMITED TO 1500 CHARACTERS ONLY (INCLUSIVE OF SPACES)

The floodlight modifications are necessary for the club to remain in existence. If relegation became a reality, it would be detrimental to the club and the impact could be that it could fold. The new floodlights would also be less bright and more "shrouded" from nearby housing which would in turn help reduce light pollution. This would assist the local housing developer with the sale of new homes which are being built next to the club.

At present, there is some significant progress being made by the club to grow the number of teams to include junior relayers and women although the impact of relegation on club finances would be very hard to bear. It is likely that

egation would have an impact on gate receipts which would then limit the club's ability to grow the number of paid coaching sessions it could provide for young children. It is vitally important that the club avoids relegation by upgrading the floodlights and can only do this with grant assistance and fund-raising.
