Categorisation Of Recommendations

When making recommendations to Management it is important that they know how important the recommendation is to their service. There should be a clear distinction between how we evaluate the risks identified for the service but scored at a corporate level and the priority assigned to the recommendation. No timeframes have been applied to each Priority as implementation will depend on several factors, however, the definitions imply the importance.

Priority 5: Findings that are fundamental to the integrity of the unit's business processes and require the immediate attention of management.

Priority 4: Important findings that need to be resolved by management.

Priority 3: The accuracy of records is at risk and requires attention.

Priority 2: Minor control issues have been identified which nevertheless need to be addressed.

Priority 1: Administrative errors identified that should be corrected. Simple, no-cost measures would serve to enhance an existing control.
