

Update on Recycling Performance

NI 192: Dry Recycling and Composting as Percentage of Household Waste

Recycled* - recycled, composted or re-used. The target for 2014-15 is 50%.

NI 191: Residual household waste per household

The cumulative figure to the end of January 2015 is 458.95 kgs/household. It is the quantity of waste collected per household (including at household recycling centres) after the removal of waste which has been re-used, recycled or composted. The total for 2013-14 was 595.9 kgs/household.

NI 192: Percentage of household waste sent for re-use, recycling and composting

The figures below set out performance to the end of January 2015.

Composting	25.5%
Recycling	24.7%
Total	50.2%

NI 193: Percentage of local authority collected waste which has been landfilled

This figure is 20% and includes waste collected by the council which is not household waste and household waste which could not be recycled or diverted to the energy from waste plant at Lakeside or the mechanical biological treatment plant at Westbury. The business plan target for 2014-15 is 25%.
