

2021 Wiltshire Council Highway Schemes

Wiltshire Council is responsible for the roads in the county, with the exception of the motorways, trunk roads and private streets. The Council's highway network in Wiltshire comprises almost 4,500 kilometres of road, 3.9 million square metres of footway, 1,500 bridges and over 40,000 streetlights. It would have a replacement value of over £5 billion.

Wiltshire Council as highway authority carries out a variety of schemes to keep the county's roads safe and to improve conditions for all road users. These include integrated transport, road surfacing, bridge, structures and drainage schemes. The priority is to keep the network safe, and a range of surveys and inspections are undertaken regularly in order to monitor the condition of the highway assets, and to help prioritise maintenance work. The road collision records are used to identify locations where consideration needs to be given to particular schemes to identify specific problems.

Improvement schemes are also identified through the Community Area Transport Groups (CATGs), which provide the opportunity for local communities, town and parish councils to raise concerns and help develop solutions.

This document contains a list of the highway schemes completed in 2021 and has been prepared to give an indication of the type, number and range of projects undertaken during the year.
